indictments which come before him, and which he, after a preliminary inquiry, brings up before the lawcourts, are as follows. Injury to parents (for bringing these actions the prosecutor cannot suffer any penalty); injury to orphans (these actions lie against their guardians); injury to a ward of state (these lie against their guardians or their husbands), injury to an orphan's estate (these too lie against the guardians); mental derangement, where a party charges another with destroying his own property through unsoundness of mind; for appointment of liquidators, where a party refuses to divide property in which others have a share; for constituting a wardship; for determining between rival claims to a wardship; for granting inspection of property to which another party lays claim; for appointing oneself as guardian; and for determining disputes as to inheritances and wards of state. The Archon also has the care of orphans and wards of state, and of women who, on the death of their husbands, declare themselves to be with child; and he has power to inflict a fine on those who offend against the persons under his charge, or to bring the case before the law-courts. He also leases the houses of orphans and wards of state until they reach the age of fourteen, and takes mortgages on them; and if the guardians fail to provide the necessary food for the children under their charge, he exacts it from them. Such are the duties of the Archon.

The King in the first place superintends the mysteries, in conjunction with the Superintendents of Mysteries. The latter are elected in the Assembly by open vote, two from the general body of Athenians, one from the Eumolpidae, and one from the Ceryces. Next, he superintends the Lenaean Dionysia, which consists of a procession and a contest. The procession is ordered by the King and the Superintendents in conjunction; but the contest is managed by the King alone. He also manages all the contests of the torch-race; and to speak broadly, he administers all the ancestral sacrifices. Indictments for impiety come before him, or any disputes between parties concerning priestly rites; and he also determines all controversies concerning sacred rites for the ancient families and the priests. All actions for homicide come before him, and it is he that makes the proclamation requiring polluted persons to keep away from sacred ceremonies. Actions for homicide and wounding are heard, if the homicide or wounding be willful, in the Areopagus; so also in cases of killing by poison, and of arson. These are the only cases heard by that Council. Cases of unintentional homicide, or of intent to kill, or of killing a slave or a resident alien or a foreigner, are heard by the court of Palladium. When the homicide is acknowledged, but legal justification is pleaded, as when a man takes an adulterer in the act, or kills another by mistake in battle, or in an athletic contest, the prisoner is tried in the court of Delphinium. If a man who is in banishment for a homicide which admits of reconcilliation incurs a further charge of killing or wounding, he is tried in Phreatto, and he makes his defence from a boat moored near the shore. All these cases, except those which are heard in the Areopagus, are tried by the Ephetae on whom the lot falls. The King introduces them, and the hearing is held within sacred precincts and in the open air. Whenever the King hears a case he takes off his crown. The person who is charged with homicide is at all other times excluded from the temples, nor is it even lawful for him to enter the market-place; but on the occasion of his trial he enters the temple and makes his defence. If the actual offender is unknown, the writ runs against 'the

doer of the deed'. The King and the tribe-kings also hear the cases in which the guilt rests on inanimate objects and the lower animal.

The Polemarch performs the sacrifices to Artemis the huntress and to Enyalios, and arranges the contest at the funeral of those who have fallen in war, and makes offerings to the memory of Harmodius and Aristogeiton. Only private actions come before him, namely those in which resident aliens, both ordinary and privileged, and agents of foreign states are concerned. It is his duty to receive these cases and divide them into ten groups, and assign to each tribe the group which comes to it by lot; after which the magistrates who introduce cases for the tribe hand them over to the Arbitrators. The Polemarch, however, brings up in person cases in which an alien is charged with deserting his patron or neglecting to provide himself with one, and also of inheritances and wards of state where aliens are concerned; and in fact, generally, whatever the Archon does for citizens, the Polemarch does for aliens.

The Thesmothetae in the first place have the power of prescribing on what days the lawcourts are to sit, and next of assigning them to the several magistrates; for the latter must follow the arrangement which the Thesmothetae assign. Moreover they introduce impeachments before the Assembly, and bring up all votes for removal from office, challenges of a magistrate's conduct before the Assembly, indictments for illegal proposals, or for proposing a law which is contrary to the interests of the state, complaints against Proedri or their president for their conduct in office, and the accounts presented by the generals. All indictments also come before them in which a deposit has to be made by the prosecutor, namely, indictments for concealment of foreign origin, for corrupt evasion of foreign origin (when a man escapes the disqualification by bribery), for blackmailing accusations, bribery, false entry of another as a state debtor, false testimony to the service of a summons, conspiracy to enter a man as a state debtor, corrupt removal from the list of debtors, and adultery. They also bring up the examinations of all magistrates, and the rejections by the demes and the condemnations by the Council. Moreover they bring up certain private suits in cases of merchandise and mines, or where a slave has slandered a free man. It is they also who cast lots to assign the courts to the various magistrates, whether for private or public cases. They ratify commercial treaties, and bring up the cases which arise out of such treaties; and they also bring up cases of perjury from the Areopagus. The casting of lots for the jurors is conducted by all the nine Archons, with the clerk to the Thesmothetae as the tenth, each performing the duty for his own tribe. Such are the duties of the nine Archons.

There are also ten Commissioners of Games (Athlothetae), elected by lot, one from each tribe. These officers, after passing an examination, serve for four years; and they manage the Panathenaic procession, the contest in music and that in gymnastic, and the horse-race; they also provide the robe of Athena and, in conjunction with the Council, the vases, and they present the oil to the athletes. This oil is collected from the sacred olives. The Archon requisitions it from the owners of the farms on which the sacred olives grow, at the rate of three-quarters of a pint from each plant. Formerly the state used to sell the fruit itself, and if any one dug up or broke down one of the sacred olives, he was tried by the Council of Areopagus, and if he was condemned, the penalty was death. Since, however, the oil has been paid by the owner of the farm, the procedure has lapsed, though the law remains; and the oil is a state charge upon the property instead of being taken from the individual plants. When, then, the Archon has collected the oil for his year of office, he hands it over to the Treasurers to preserve in the Acropolis, and he may not take his seat in the Areopagus until he has paid over to the Treasurers the full amount. The Treasurers keep it in the Acropolis until the Panathenaea, when they measure it out to the Commissioners of Games, and they again to the victorious competitors. The prizes for the victors in the musical contest consist of silver and gold, for the victors in manly vigour, of shields, and for the victors in the gymnastic contest and the horse-race, of oil.

All officers connected with military service are elected by open vote. In the first place, ten Generals (Strategi), who were formerly elected one from each tribe, but now are chosen from the whole mass of citizens. Their duties are assigned to them by open vote; one is appointed to command the heavy infantry, and leads them if they go out to war; one to the defence of the country, who remains on the defensive, and fights if there is war within the borders of the country; two to Piraeus, one of whom is assigned to Munichia, and one to the south shore, and these have charge of the defence of the Piraeus; and one to superintend the symmories, who nominates the trierarchs arranges exchanges of properties for them, and brings up actions to decide on rival claims in connexion with them. The rest are dispatched to whatever business may be on hand at the moment. The appointment of these officers is submitted for confirmation in each prytany, when the question is put whether they are considered to be doing their duty. If any officer is rejected on this vote, he is tried in the lawcourt, and if he is found guilty the people decide what punishment or fine shall be inflicted on him; but if he is acquitted he resumes his office. The Generals have full power, when on active service, to arrest any one for insubordination, or to cashier him publicly, or to inflict a fine; the latter is, however, unusual.

There are also ten Taxiarchs, one from each tribe, elected by open vote; and each commands his own tribesmen and appoints captains of companies (Lochagi). There are also two Hipparchs, elected by open vote from the whole mass of the citizens, who command the cavalry, each taking five tribes. They have the same powers as the Generals have in respect of the infantry, and their appointments are also subject to confirmation. There are also ten Phylarchs, elected by open vote, one from each tribe, to command the cavalry, as the Taxiarchs do the infantry. There is also a Hipparch for Lemnos, elected by open vote, who has charge of the cavalry in Lemnos. There is also a treasurer of the Paralus, and another of the Ammonias, similarly elected.

Of the magistrates elected by lot, in former times some including the nine Archons, were elected out of the tribe as a whole, while others, namely those who are now elected in the Theseum, were apportioned among the demes; but since the demes used to sell the elections, these magistrates too are now elected from the whole tribe, except the members of the Council and the guards of the dockyards, who are still left to the demes.

Pay is received for the following services. First the members of the Assembly receive a drachma for the ordinary meetings, and nine obols for the 'sovereign' meeting. Then the jurors at the law-courts receive three obols; and the members of the Council five obols. They Prytanes receive an allowance of an obol for their maintenance. The nine Archons receive four obols apiece for maintenance, and also keep a herald and a flute-player; and the Archon for Salamis receives a drachma a day. The Commissioners for Games dine in the Prytaneum during the month of Hecatombaeon in which the Panathenaic festival takes place, from the fourteenth day onwards. The Amphictyonic deputies to Delos receive a drachma a day from the exchequer of Delos. Also all magistrates sent to Samos, Scyros, Lemnos, or Imbros receive an allowance for their maintenance. The military offices may be held any number of times, but none of the others more than once, except the membership of the Council, which may be held twice.

The juries for the law-courts are chosen by lot by the nine Archons, each for their own tribe, and by the clerk to the Thesmothetae for the tenth. There are ten entrances into the courts, one for each tribe; twenty rooms in which the lots are drawn, two for each tribe; a hundred chests, ten for each tribe; other chests, in which are placed the tickets of the jurors on whom the lot falls; and two vases. Further, staves, equal in number to the jurors required, are placed by the side of each entrance; and counters are put into one vase, equal in number to the staves. These are inscribed with letters of the alphabet beginning with the eleventh (lambda), equal in number to the courts which require to be filled. All persons above thirty years of age are qualified to serve as jurors, provided they are not debtors to the state and have not lost their civil rights. If any unqualified person serves as juror, an information is laid against him, and he is brought before the court; and, if he is convicted, the jurors assess the punishment or fine which they consider him to deserve. If he is condemned to a money fine, he must be imprisoned until he has paid up both the original debt, on account of which the information was laid against him, and also the fine which the court has imposed upon him. Each juror has his ticket of boxwood, on which is inscribed his name, with the name of his father and his deme, and one of the letters of the alphabet up to kappa; for the jurors in their several tribes are divided into ten sections, with approximately an equal number in each letter. When the Thesmothetes has decided by lot which letters are required to attend at the courts, the servant puts up above each court the letter which has been assigned to it by the lot.

The ten chests above mentioned are placed in front of the entrance used by each tribe, and are inscribed with the letters of the alphabet from alpha to kappa. The jurors cast in their tickets, each into the chest on which is inscribed the letter which is on his ticket; then the servant shakes them all up, and the Archon draws one ticket from each chest. The individual so selected is called the Ticket-hanger (*Empectes*), and his function is to hang up the tickets out of his chest on the bar which bears the same letter as that on the chest. He is chosen by lot, lest, if the Ticket-hanger were always the same person, he might tamper with the results. There are five of these bars in each of the rooms assigned for the lot-drawing. Then the Archon casts in the dice and thereby chooses the jurors from each tribe, room by room. The dice are made of brass, coloured black or white; and according to the number of jurors required, so many white dice are put in, one for each five tickets, while the remainder are black, in the same proportion. As the Archon draws out the dice, the crier calls out the names of the individuals chosen. The Ticket-hanger is included among those selected. Each juror, as he is chosen and answers to his name, draws a counter from the vase, and holding it out with the letter uppermost shows it first to the presiding Archon; and he, when he has seen it, throws the ticket of the juror into the chest on which is inscribed the letter which is on the counter, so that the juror must go into the court assigned to him by lot, and not into one chosen by himself, and that it may be impossible for any one to collect the jurors of his choice into any particular court. For this purpose chests are placed near the Archon, as many in number as there are courts to be filled that day, bearing the letters of the courts on which the lot has fallen.

The juror thereupon, after showing his counter again to the attendant, passes through the barrier into the court. The attendant gives him a staff of the same colour as the court bearing the letter which is on his counter, so as to ensure his going into the court assigned to him by lot; since, if he were to go into any other, he would be betrayed by the colour of his staff. Each court has a certain colour painted on the lintel of the entrance. Accordingly the juror, bearing his staff, enters the court which has the same colour as his staff, and the same letter as his counter. As he enters, he receives a voucher from the official to whom this duty has been assigned by lot. So with their counters and their staves the selected jurors take their seats in the court, having thus completed the process of admission. The unsuccessful candidates receive back their tickets from the Ticket-hangers. The public servants carry the chests from each tribe, one to each court, containing the names of the members of the tribe who are in that court, and hand them over to the officials assigned to the duty of giving back their tickets to the jurors in each court, so that these officials may call them up by name and pay them their fee.

When all the courts are full, two ballot boxes are placed in the first court, and a number of brazen dice, bearing the colours of the several courts, and other dice inscribed with the names of the presiding magistrates. Then two of the Thesmothetae, selected by lot, severally throw the dice with the colours into one box, and those with the magistrates' names into the other. The magistrate whose name is first drawn is thereupon proclaimed by the crier as assigned for duty in the court which is first drawn, and the second in the second, and similarly with the rest. The object of this procedure is that no one may know which court he will have, but that each may take the court assigned to him by lot.

When the jurors have come in, and have been assigned to their respective courts, the presiding magistrate in each court draws one ticket out of each chest (making ten in all, one out of each tribe), and throws them into another empty chest. He then draws out five of them, and assigns one to the superintendence of the water-clock, and the other four to the telling of the votes. This is to prevent any tampering beforehand with either the superintendent of the clock or the tellers of the votes, and to secure that there is no malpractice in these respects. The five who have not been selected for these duties receive from them a statement of the order in which the jurors shall receive their fees, and of the places where the several tribes shall respectively gather in the court for this purpose when their duties are completed; the object being that the jurors may be broken up into small groups for the reception of their pay, and not all crowd together and impede one another.

These preliminaries being concluded, the cases are called on. If it is a day for private cases, the private litigants are called. Four cases are taken in each of the categories defined in the law, and the litigants swear to confine their speeches to the point at issue. If it is a day for public causes, the public litigants are called, and only one case is tried. Water-clocks are provided, having small supply-tubes, into which the water is poured by which the length of the pleadings is regulated. Ten gallons are allowed for a case in which an amount of more than five thousand drachmas is involved, and three for the second speech on each side. When the amount is between one and five thousand drachmas, seven gallons are allowed for the first speech and two for the second; when it is less than one thousand, five and two. Six gallons are allowed for arbitrations between rival claimants, in which there is no second speech. The official chosen by lot to superintend the water-clock places his hand on the supply tube whenever the clerk is about to read a resolution or law or affidavit or treaty. When, however, a case is conducted according to a set measurement of the day, he does not stop the supply, but each party receives an equal allowance of water. The standard of measurement is the length of the days in the month Poseideon.... The measured day is employed in cases when imprisonment, death, exile, loss of civil rights, or confiscation of goods is assigned as the penalty.

Most of the courts consist of 500 members...; and when it is necessary to bring public cases before a jury of 1,000 members, two courts combine for the purpose, the most important cases of all are brought 1,500 jurors, or three courts. The ballot balls are made of brass with stems running through the centre, half of them having the stem pierced and the other half solid. When the speeches are concluded, the officials assigned to the taking of the votes give each juror two ballot balls, one pierced and one solid. This is done in full view of the rival litigants, to secure that no one shall receive two pierced or two solid balls. Then the official designated for the purpose takes away the jurors staves, in return for which each one as he records his vote receives a brass voucher marked with the numeral 3 (because he gets three obols when he gives it up). This is to ensure that all shall vote; since no one can get a voucher unless he votes. Two urns, one of brass and the other of wood, stand in the court, in distinct spots so that no one may surreptitiously insert ballot balls; in these the jurors record their votes. The brazen urn is for effective votes, the wooden for unused votes; and the brazen urn has a lid pierced so as to take only one ballot ball, in order that no one may put in two at a time.

When the jurors are about to vote, the crier demands first whether the litigants enter a protest against any of the evidence; for no protest can be received after the voting has begun. Then he proclaims again, 'The pierced ballot for the plaintiff, the solid for the defendant'; and the juror, taking his two ballot balls from the stand, with his hand closed over the stem so as not to show either the pierced or the solid ballot to the litigants, casts the one which is to count into the brazen urn, and the other into the wooden urn.

When all the jurors have voted, the attendants take the urn containing the effective votes and discharge them on to a reckoning board having as many cavities as there are ballot balls, so that the effective votes, whether pierced or solid, may be plainly displayed and easily counted. Then the officials assigned to the taking of the votes tell them off on the board, the solid in one place and the pierced in another, and the crier announces the numbers of the votes, the pierced ballots being for the prosecutor and the solid for the defendant. Whichever has the majority is victorious; but if the votes are equal the verdict is for the defendant. Each juror receives two ballots, and uses one to record his vote, and throws the other away.

Then, if damages have to be awarded, they vote again in the same way, first returning their pay-vouchers and receiving back their staves. Half a gallon of water is allowed to each party for the discussion of the damages. Finally, when all has been completed in accordance with the law, the jurors receive their pay in the order assigned by the lot.

Τῶν κατὰ μηδεμίαν συμπλοκὴν λεγομένων ἕκαστον ἤτοι οὐσίαν σημαίνει ἢ ποσὸν ἢ ποιὸν ἢ πρὸς τι ἢ ποὺ ἢ ποτὲ ἢ κεῖσθαι ἢ ἔχειν ἢ ποιεῖν ἢ πάσχειν. ἔστι δὲ οὐσία μὲν ὡς τύπῳ εἰπεῖν οἶον ἄνθρωπος, ἵππος· ποσὸν δὲ οἶον δίπηχυ, τρίπηχυ· ποιὸν δὲ οἶον λευκόν, γραμματικόν· πρὸς τι δὲ [2a] οἶον διπλάσιον, ἥμισυ, μεῖζον· ποὺ δὲ οἶον ἐν Λυκείῳ, ἐν ἀγορᾷ· ποτὲ δὲ οἶον χθές, πέρυσιν· κεῖσθαι δὲ οἶον ἀνάκειται, κάθηται· ἔχειν δὲ οἶον ὑποδέδεται, ὥπλισται· ποιεῖν δὲ οἶον τέμνειν, καίειν· πάσχειν δὲ οἶον τέμνεσθαι, καίεσθαι. ἕκαστον δὲ τῶν εἰρημένων αὐτὸ μὲν καθ' αὐτὸ ἐν οὐδεμιᾷ καταφάσει λέγεται, τῇ δὲ πρὸς ἄλληλα τούτων συμπλοκῇ κατάφασις γίνεται· ἅπαντα γὰρ δοκεῖ κατάφασις ἤτοι ἀληθὴς ἢ ψευδὴς εἶναι, τῶν δὲ κατὰ μηδεμίαν συμπλοκὴν λεγομένων οὐδὲν οὔτε ἀληθὲς οὔτε ψευδὸς ἐστίν, οἶον ἄνθρωπος, λευκόν, τρέχει, νικᾷ.

Κεφάλαιο 5

Οὐσία δέ ἐστιν ἡ κυριώτατά τε καὶ πρώτως καὶ μάλιστα λεγομένη, ἢ μήτε καθ' ὑποκειμένου τινὸς λέγεται μήτε ἐν ὑποκειμένῳ τινὶ ἐστιν, οἷον ὁ τις ἄνθρωπος ἢ ὁ τις ἵππος. δευτέραι δὲ οὐσὶαι λέγονται, ἐν οἷς εἶδесιν αἱ πρώτως οὐσὶαι λεγόμεναι ὑπάρχουσιν, ταῦτά τε καὶ τὰ τῶν εἰδῶν τούτων γένη· οἷον ὁ τις ἄνθρωπος ἐν εἶδει μὲν ὑπάρχει τῷ ἀνθρώπῳ, γένος δὲ τοῦ εἶδους ἐστὶ τὸ ζῷον· δευτέραι οὖν αὗται λέγονται οὐσὶαι, οἷον ὁ τε ἄνθρωπος καὶ τὸ ζῷον. — φανερόν δὲ ἐκ τῶν εἰρημένων ὅτι τῶν καθ' ὑποκειμένου λεγομένων ἀναγκαῖον καὶ τοῦνομα καὶ τὸν λόγον κατηγορεῖσθαι τοῦ ὑποκειμένου· οἷον ἄνθρωπος καθ' ὑποκειμένου λέγεται τοῦ τινὸς ἀνθρώπου, καὶ κατηγορεῖται γε τοῦνομα, — τὸν γὰρ ἄνθρωπον κατὰ τοῦ τινὸς ἀνθρώπου κατηγορήσεις· — καὶ ὁ λόγος δὲ τοῦ ἀνθρώπου κατὰ τοῦ τινὸς ἀνθρώπου κατηγορηθήσεται, — ὁ γὰρ τις ἄνθρωπος καὶ ἄνθρωπός ἐστιν· — ὥστε καὶ τοῦνομα καὶ ὁ λόγος κατὰ τοῦ ὑποκειμένου κατηγορηθήσεται. τῶν δ' ἐν ὑποκειμένῳ ὄντων ἐπὶ μὲν τῶν πλείστων οὔτε τοῦνομα οὔτε ὁ λόγος κατηγορεῖται τοῦ ὑποκειμένου· ἐπ' ἐνίων δὲ τοῦνομα μὲν οὐδὲν κωλύει κατηγορεῖσθαι τοῦ ὑποκειμένου, τὸν δὲ λόγον ἀδύνατον· οἷον τὸ λευκὸν ἐν ὑποκειμένῳ ὄν τῷ σώματι κατηγορεῖται τοῦ ὑποκειμένου, — λευκὸν γὰρ σῶμα λέγεται, — ὁδὲ λόγος τοῦ λευκοῦ οὐδέποτε κατὰ τοῦ σώματος κατηγορηθήσεται. — τὰ δ' ἄλλα πάντα ἤτοι καθ' ὑποκειμένων λέγεται τῶν πρώτων οὐσιῶν ἢ ἐν ὑποκειμέναις αὐταῖς ἐστίν. τοῦτο δὲ φανερόν ἐκ τῶν καθ' ἕκαστα προχειριζομένων· οἷον τὸ ζῷον κατὰ τοῦ ἀνθρώπου κατηγορεῖται, οὐκοῦν καὶ κατὰ τοῦ τινὸς ἀνθρώπου, — εἰ γὰρ κατὰ μηδενὸς τῶν τινῶν [2b] ἀνθρώπων, οὐδὲ κατὰ ἀνθρώπου ὅλως· — πάλιν τὸ χρῶμα ἐν σώματι, οὐκοῦν καὶ ἐν τινὶ σώματι· εἰ γὰρ μὴ ἐν τινὶ τῶν καθ' ἕκαστα, οὐδὲ ἐν σώματι ὅλως· ὥστε τὰ ἄλλα πάντα ἤτοι καθ' ὑποκειμένων τῶν πρώτων οὐσιῶν λέγεται ἢ ἐν ὑποκειμέναις αὐταῖς ἐστίν. μὴ οὐσῶν οὖν τῶν πρώτων οὐσιῶν ἀδύνατον τῶν ἄλλων τι εἶναι· πάντα γὰρ τὰ ἄλλα ἤτοι καθ' ὑποκειμένων τούτων λέγεται ἢ ἐν ὑποκειμέναις αὐταῖς ἐστίν· ὥστε μὴ οὐσῶν τῶν πρώτων οὐσιῶν ἀδύνατον τῶν ἄλλων τι εἶναι.

Τῶν δὲ δευτέρων οὐσιῶν μᾶλλον οὐσία τὸ εἶδος τοῦ γένους·

ἐγγιον γὰρ τῆς πρώτης οὐσίας ἐστίν. ἐὰν γὰρ ἀποδιδῶ τις τὴν πρώτην οὐσίαν τί ἐστι, γνωριμώτερον καὶ οἰκειότερον ἀποδώσει τὸ εἶδος ἀποδιδούς ἢ τὸ γένος· οἷον τὸν τινὰ ἄνθρωπον γνωριμώτερον ἂν ἀποδοίῃ ἄνθρωπον ἀποδιδούς ἢ ζῶον, — τὸ μὲν γὰρ ἴδιον μᾶλλον τοῦ τινὸς ἀνθρώπου, τὸ δὲ κοινότερον, — καὶ τὸ τι δένδρον ἀποδιδούς γνωριμώτερον ἀποδώσει δένδρον ἀποδιδούς ἢ φυτόν. ἔτι αἱ πρῶται οὐσίαι διὰ τὸ τοῖς ἄλλοις ἅπασιν ὑποκεῖσθαι καὶ πάντα τὰ ἄλλα κατὰ τούτων κατηγορεῖσθαι ἢ ἐν ταύταις εἶναι διὰ τοῦτο μάλιστα οὐσίαι λέγονται· ὥς δέ γε αἱ πρῶται οὐσίαι πρὸς τὰ ἄλλα ἔχουσιν, οὕτω καὶ τὸ εἶδος πρὸς τὸ γένος ἔχει· — ὑπόκειται γὰρ τὸ εἶδος τῷ γένει· τὰ μὲν γὰρ γένη κατὰ τῶν εἰδῶν κατηγορεῖται, τὰ δὲ εἶδη κατὰ τῶν γενῶν οὐκ ἀντιστρέφει· — ὥστε καὶ ἐκτούτων τὸ εἶδος τοῦ γένους μᾶλλον οὐσία. — αὐτῶν δὲ τῶν εἰδῶν ὅσα μὴ ἐστὶ γένη, οὐδὲν μᾶλλον ἕτερον ἐτέρου οὐσία ἐστίν· οὐδὲν γὰρ οἰκειότερον ἀποδώσει κατὰ τοῦ τινὸς ἀνθρώπου τὸν ἄνθρωπον ἀποδιδούς ἢ κατὰ τοῦ τινὸς ἵππου τὸν ἵππον. ὡσαύτως δὲ καὶ τῶν πρώτων οὐσιῶν οὐδὲν μᾶλλον ἕτερον ἐτέρου οὐσία ἐστίν· οὐδὲν γὰρ μᾶλλον ὁ τις ἄνθρωπος οὐσία ἢ ὁ τις βοῦς.

Εἰκότως δὲ μετὰ τὰς πρώτας οὐσίας μόνα τῶν ἄλλων τὰ εἶδη καὶ τὰ γένη δευτέραι οὐσίαι λέγονται· μόνα γὰρ δηλοῖ τὴν πρώτην οὐσίαν τῶν κατηγορουμένων· τὸν γὰρ τινὰ ἄνθρωπον ἐὰν ἀποδιδῶ τις τί ἐστίν, τὸ μὲν εἶδος ἢ τὸ γένος ἀποδιδούς οἰκείως ἀποδώσει, — καὶ γνωριμώτερον ποιήσει ἄνθρωπον ἢ ζῶον ἀποδιδούς· — τῶν δ' ἄλλων ὃ τι ἂν ἀποδιδῶ τις, ἄλλοτρίως ἔσται ἀποδεδωκώς, οἷον λευκὸν ἢ τρέχει ἢ ὀτιοῦν τῶν τοιούτων ἀποδιδούς· ὥστε εἰκότως ταῦτα μόνα τῶν ἄλλων οὐσίαι λέγονται. ἔτι αἱ πρῶται οὐσίαι διὰ τὸ τοῖς ἄλλοις ἅπασιν ὑποκεῖσθαι κυριώτατα οὐσίαι [3a] λέγονται· ὥς δέ γε αἱ πρῶται οὐσίαι πρὸς τὰ ἄλλα πάντα ἔχουσιν, οὕτω τὰ εἶδη καὶ τὰ γένη τῶν πρώτων οὐσιῶν πρὸς τὰ λοιπὰ πάντα ἔχει· κατὰ τούτων γὰρ πάντα τὰ λοιπὰ κατηγορεῖται· τὸν γὰρ τινὰ ἄνθρωπον ἐρεῖς γραμματικόν, οὐκοῦν καὶ ἄνθρωπον καὶ ζῶον γραμματικόν ἐρεῖς· ὡσαύτως δὲ καὶ ἐπὶ τῶν ἄλλων.

Κοινὸν δὲ κατὰ πάσης οὐσίας τὸ μὴ ἐν ὑποκειμένῳ εἶναι. ἢ μὲν γὰρ πρώτη οὐσία οὔτε καθ' ὑποκειμένου λέγεται οὔτε ἐν ὑποκειμένῳ ἐστίν. τῶν δὲ δευτέρων οὐσιῶν φανερόν μὲν καὶ οὕτως ὅτι οὐκ εἰσὶν ἐν ὑποκειμένῳ· ὁ γὰρ ἄνθρωπος καθ' ὑποκειμένου μὲν τοῦ τινὸς ἀνθρώπου λέγεται, ἐν ὑποκειμένῳ δὲ οὐκ ἔστιν, — οὐ γὰρ ἐν τῷ τινὶ

ἄνθρωπῳ ὁ ἄνθρωπός ἐστιν· — ὡσαύτως δὲ καὶ τὸ ζῷον καθ' ὑποκειμένου μὲν λέγεται τοῦ τινὸς ἀνθρώπου, οὐκ ἔστι δὲ τὸ ζῷον ἐν τῷ τινὶ ἀνθρώπῳ. ἔτι δὲ τῶν ἐν ὑποκειμένῳ ὄντων τὸ μὲν ὄνομα οὐδὲν κωλύει κατηγορεῖσθαι ποτε τοῦ ὑποκειμένου, τὸν δὲ λόγον ἀδύνατον· τῶν δὲ δευτέρων οὐσιῶν κατηγορεῖται καὶ ὁ λόγος κατὰ τοῦ ὑποκειμένου καὶ τοῦνομα, — τὸν γὰρ τοῦ ἀνθρώπου λόγον κατὰ τοῦ τινὸς ἀνθρώπου κατηγορήσεις καὶ τὸν τοῦ ζώου. — ὥστε οὐκ ἂν εἴη οὐσία τῶν ἐν ὑποκειμένῳ. — οὐκ ἴδιον δὲ οὐσίας τοῦτο, ἀλλὰ καὶ ἡ διαφορὰ τῶν μὴ ἐν ὑποκειμένῳ ἐστίν· τὸ γὰρ πεζὸν καὶ τὸ δίπουν καθ' ὑποκειμένου μὲν λέγεται τοῦ ἀνθρώπου, ἐν ὑποκειμένῳ δὲ οὐκ ἔστιν, — οὐ γὰρ ἐν τῷ ἀνθρώπῳ ἐστὶ τὸ δίπουν οὐδὲ τὸ πεζόν. — καὶ ὁ λόγος δὲ κατηγορεῖται ὁ τῆς διαφορᾶς καθ' οὗ ἂν λέγεται ἡ διαφορὰ· οἷον εἰ τὸ πεζὸν κατὰ ἀνθρώπου λέγεται, καὶ ὁ λόγος τοῦ πεζοῦ κατηγορηθήσεται τοῦ ἀνθρώπου, — πεζὸν γὰρ ἐστὶν ὁ ἄνθρωπος. — μὴ ταραττέτω δὲ ἡμᾶς τὰ μέρη τῶν οὐσιῶν ὡς ἐν ὑποκειμένοις ὄντα τοῖς ὅλοις, μὴ ποτε ἀναγκασθῶμεν οὐκ οὐσίας αὐτὰ φάσκειν εἶναι· οὐ γὰρ οὕτω τὰ ἐν ὑποκειμένῳ ἐλέγετο τὰ ὡς μέρη ὑπάρχοντα ἔν τινι.

Ὑπάρχει δὲ ταῖς οὐσίαις καὶ ταῖς διαφοραῖς τὸ πάντα συνωνύμως ἀπ' αὐτῶν λέγεσθαι· πᾶσαι γὰρ αἱ ἀπὸ τούτων κατηγορίαι ἦτοι κατὰ τῶν ἀτόμων κατηγοροῦνται ἢ κατὰ τῶν εἰδῶν. ἀπὸ μὲν γὰρ τῆς πρώτης οὐσίας οὐδεμία ἐστὶ κατηγορία, — κατ' οὐδενὸς γὰρ ὑποκειμένου λέγεται· — τῶν δὲ δευτέρων οὐσιῶν τὸ μὲν εἶδος κατὰ τοῦ ἀτόμου κατηγορεῖται, τὸ δὲ γένος καὶ κατὰ τοῦ εἶδους καὶ κατὰ τοῦ ἀτόμου· [3b] ὡσαύτως δὲ καὶ αἱ διαφοραὶ καὶ κατὰ τῶν εἰδῶν καὶ κατὰ τῶν ἀτόμων κατηγοροῦνται. καὶ τὸν λόγον δὲ ἐπιδέχονται αἱ πρῶται οὐσίαι τὸν τῶν εἰδῶν καὶ τὸν τῶν γενῶν, καὶ τὸ εἶδος δὲ τὸν τοῦ γένους. — ὅσα γὰρ κατὰ τοῦ κατηγορουμένου λέγεται, καὶ κατὰ τοῦ ὑποκειμένου ῥηθήσεται· — ὡσαύτως δὲ καὶ τὸν τῶν διαφορῶν λόγον ἐπιδέχεται τά τε εἶδη καὶ τὰ ἄτομα· συνώνυμα δὲ γε ἦν ὧν καὶ τοῦνομα κοινὸν καὶ ὁ λόγος ὁ αὐτός. ὥστε πάντα τὰ ἀπὸ τῶν οὐσιῶν καὶ τῶν διαφορῶν συνωνύμως λέγεται.

Πᾶσα δὲ οὐσία δοκεῖ τόδε τι σημαίνειν. ἐπὶ μὲν οὖν τῶν πρώτων οὐσιῶν ἀναμφισβήτητον καὶ ἀληθές ἐστὶν ὅτι τόδε τι σημαίνει· ἄτομον γὰρ καὶ ἐν ἀριθμῷ τὸ δηλούμενόν ἐστιν. ἐπὶ δὲ τῶν δευτέρων οὐσιῶν φαίνεται μὲν ὁμοίως τῷ σχήματι τῆς προσηγορίας τόδε τι σημαίνειν, ὅταν εἴπῃ ἄνθρωπον ἢ ζῷον· οὐ μὴν ἀληθές γε, ἀλλὰ

μᾶλλον ποιόν τι σημαίνει, — οὐ γὰρ ἔν ἐστι τὸ ὑποκείμενον ὥσπερ ἡ πρώτη οὐσία, ἀλλὰ κατὰ πολλῶν ὁ ἄνθρωπος λέγεται καὶ τὸ ζῶον· — οὐχ ἀπλῶς δὲ ποιόν τι σημαίνει, ὥσπερ τὸ λευκόν· οὐδὲν γὰρ ἄλλο σημαίνει τὸ λευκόν ἀλλ' ἢ ποιόν, τὸ δὲ εἶδος καὶ τὸ γένος περὶ οὐσίαν τὸ ποιὸν ἀφορίζει, — ποιὰν γάρ τινα οὐσίαν σημαίνει. — ἐπὶ πλεῖον δὲ τῷ γένει ἢ τῷ εἶδει τὸν ἀφορισμὸν ποιεῖται· ὁ γὰρ ζῶον εἰπὼν ἐπὶ πλεῖον περιλαμβάνει ἢ ὁ τὸν ἄνθρωπον.

Ὑπάρχει δὲ ταῖς οὐσίαις καὶ τὸ μηδὲν αὐταῖς ἐναντίον εἶναι. τῇ γὰρ πρώτη οὐσίᾳ τί ἂν εἴη ἐναντίον; οἷον τῷ τινὶ ἀνθρώπῳ οὐδὲν ἐστὶν ἐναντίον, οὐδὲ γε τῷ ἀνθρώπῳ ἢ τῷ ζῳῳ οὐδὲν ἐστὶν ἐναντίον. οὐκ ἴδιον δὲ τῆς οὐσίας τοῦτο, ἀλλὰ καὶ ἐπ' ἄλλων πολλῶν οἷον ἐπὶ τοῦ ποσοῦ· τῷ γὰρ διπῇχει οὐδὲν ἐστὶν ἐναντίον, οὐδὲ τοῖς δέκα, οὐδὲ τῶν τοιούτων οὐδενί, εἰ μὴ τις τὸ πολὺ τῷ ὀλίγῳ φαίη ἐναντίον εἶναι ἢ τὸ μέγα τῷ μικρῷ· τῶν δὲ ἀφωρισμένων ποσῶν οὐδὲν οὐδενὶ ἐναντίον ἐστίν.

Δοκεῖ δὲ ἡ οὐσία οὐκ ἐπιδέχεσθαι τὸ μᾶλλον καὶ τὸ ἥττον· λέγω δὲ οὐχ ὅτι οὐσία οὐσίας οὐκ ἔστι μᾶλλον οὐσία, — τοῦτο μὲν γὰρ εἴρηται ὅτι ἔστιν, — ἀλλ' ὅτι ἐκάστη οὐσία τοῦθ' ὅπερ ἐστὶν οὐ λέγεται μᾶλλον καὶ ἥττον· οἷον εἰ ἔστιν αὕτη ἡ οὐσία ἄνθρωπος, οὐκ ἔσται μᾶλλον καὶ ἥττον ἄνθρωπος, οὔτε αὐτὸς αὐτοῦ οὔτε ἕτερος ἐτέρου. οὐ γάρ ἐστὶν ἕτερος ἐτέρου μᾶλλον ἄνθρωπος, ὥσπερ [4a] τὸ λευκὸν ἐστὶν ἕτερον ἐτέρου μᾶλλον λευκόν, καὶ καλὸν ἕτερον ἐτέρου μᾶλλον· καὶ αὐτὸ δὲ αὐτοῦ μᾶλλον καὶ ἥττον λέγεται, οἷον τὸ σῶμα λευκὸν ὃν μᾶλλον λευκὸν λέγεται νῦν ἢ πρότερον, καὶ θερμὸν ὃν μᾶλλον θερμὸν καὶ ἥττον λέγεται· ἡ δέ γε οὐσία οὐδὲν λέγεται, — οὐδὲ γὰρ ἄνθρωπος μᾶλλον νῦν ἄνθρωπος ἢ πρότερον λέγεται, οὐδὲ τῶν ἄλλων οὐδὲν, ὅσα ἐστὶν οὐσία· — ὥστε οὐκ ἂν ἐπιδέχοιτο ἡ οὐσία τὸ μᾶλλον καὶ ἥττον.

Μάλιστα δὲ ἴδιον τῆς οὐσίας δοκεῖ εἶναι τὸ ταὐτὸν καὶ ἐν ἀριθμῷ ὃν τῶν ἐναντίων εἶναι δεκτικόν· οἷον ἐπὶ μὲν τῶν ἄλλων οὐδενὸς ἂν ἔχοι τις προενεγκεῖν [ὅσα μὴ ἐστὶν οὐσία], ὃ ἐν ἀριθμῷ ὃν τῶν ἐναντίων δεκτικόν ἐστίν· οἷον τὸ χρῶμα, ὃ ἐστὶν ἐν καὶ ταὐτὸν ἀριθμῷ, οὐκ ἔσται λευκὸν καὶ μέλαν, οὐδὲ ἡ αὕτη πρᾶξις καὶ μία τῷ ἀριθμῷ οὐκ ἔσται φαύλη καὶ σπουδαία, ὡσαύτως δὲ καὶ ἐπὶ τῶν ἄλλων, ὅσα μὴ ἐστὶν οὐσία. ἡ δέ γε οὐσία ἐν καὶ ταὐτὸν ἀριθμῷ ὃν δεκτικὸν τῶν ἐναντίων ἐστίν· οἷον ὁ τις ἄνθρωπος, εἷς καὶ ὁ αὐτὸς ὢν, ὅτε μὲν λευκὸς ὅτε δὲ μέλας γίγνεται, καὶ θερμὸς καὶ ψυχρὸς, καὶ

φαῦλος καὶ σπουδαῖος. ἐπὶ δὲ τῶν ἄλλων οὐδενὸς φαίνεται τὸ τοιοῦτον, εἰ μὴ τις ἐνίσταται τὸν λόγον καὶ τὴν δόξαν φάσκων τῶν τοιούτων εἶναι· ὁ γὰρ αὐτὸς λόγος ἀληθῆς τε καὶ ψευδῆς εἶναι δοκεῖ, οἷον εἰ ἀληθῆς εἴη ὁ λόγος τὸ καθῆσθαι τινα, ἀναστάντος αὐτοῦ ὁ αὐτὸς οὗτος ψευδῆς ἔσται· ὡσαύτως δὲ καὶ ἐπὶ τῆς δόξης· εἰ γὰρ τις ἀληθῶς δοξάζῃ τὸ καθῆσθαι τινα, ἀναστάντος αὐτοῦ ψευδῶς δοξάσει τὴν αὐτὴν ἔχων περὶ αὐτοῦ δόξαν. εἰ δέ τις καὶ τοῦτο παραδέχοιτο, ἀλλὰ τῷ γε τρόπῳ διαφέρει· τὰ μὲν γὰρ ἐπὶ τῶν οὐσιῶν αὐτὰ μεταβάλλοντα δεκτικὰ τῶν ἐναντίων ἐστίν, — ψυχρὸν γὰρ ἐκ θερμοῦ γενόμενον μετέβαλεν (ἡλλοίωται γάρ), καὶ μέλαν ἐκ λευκοῦ καὶ σπουδαῖον ἐκ φαύλου, ὡσαύτως δὲ καὶ ἐπὶ τῶν ἄλλων ἕκαστον αὐτὸ μεταβολὴν δεχόμενον τῶν ἐναντίων δεκτικὸν ἐστίν· — ὁ δὲ λόγος καὶ ἡ δόξα αὐτὰ μὲν ἀκίνητα πάντῃ πάντως διαμένει, τοῦ δὲ πράγματος κινουμένου τὸ ἐναντίον περὶ αὐτὰ γίγνεται· ὁ μὲν γὰρ λόγος διαμένει ὁ αὐτὸς τὸ καθῆσθαι τινα, τοῦ δὲ [4b] πράγματος κινήεντος ὅτε μὲν ἀληθῆς ὅτε δὲ ψευδῆς γίγνεται· ὡσαύτως δὲ καὶ ἐπὶ τῆς δόξης. ὥστε τῷ τρόπῳ γε ἴδιον ἂν εἴη τῆς οὐσίας τὸ κατὰ τὴν αὐτῆς μεταβολὴν δεκτικὴν τῶν ἐναντίων εἶναι, — εἰ δὲ τις καὶ ταῦτα παραδέχοιτο, τὴν δόξαν καὶ τὸν λόγον δεκτικὰ τῶν ἐναντίων εἶναι. οὐκ ἔστι δὲ ἀληθὲς τοῦτο· ὁ γὰρ λόγος καὶ ἡ δόξα οὐ τῷ αὐτὰ δέχεσθαι τι τῶν ἐναντίων εἶναι δεκτικὰ λέγεται, ἀλλὰ τῷ περὶ ἕτερόν τι τὸ πάθος γεγενῆσθαι· — τῷ γὰρ τὸ πρᾶγμα εἶναι ἢ μὴ εἶναι, τούτῳ καὶ ὁ λόγος ἀληθῆς ἢ ψευδῆς εἶναι λέγεται, οὐ τῷ αὐτὸν δεκτικὸν εἶναι τῶν ἐναντίων· ἀπλῶς γὰρ οὐδὲν ὑπ’ οὐδενὸς οὔτε ὁ λόγος κινεῖται οὔτε ἡ δόξα, ὥστε οὐκ ἂν εἴη δεκτικὰ τῶν ἐναντίων μηδενὸς ἐν αὐτοῖς γιγνομένου· — ἡ δὲ γε οὐσία τῷ αὐτὴν τὰ ἐναντία δέχεσθαι, τούτῳ δεκτικὴ τῶν ἐναντίων λέγεται· νόσον γὰρ καὶ ὑγίειαν δέχεται, καὶ λευκότητα καὶ μελανίαν, καὶ ἕκαστον τῶν τοιούτων αὐτὴ δεχομένη τῶν ἐναντίων εἶναι δεκτικὴ λέγεται. ὥστε ἴδιον ἂν οὐσίας εἴη τὸ ταῦτόν καὶ ἐν ἀριθμῷ ὄν δεκτικὸν εἶναι τῶν ἐναντίων. περὶ μὲν οὖν οὐσίας τοσαῦτα εἰρήσθω.

Κεφάλαιο 6

Τοῦ δὲ ποσοῦ τὸ μὲν ἐστὶ διωρισμένον, τὸ δὲ συνεχές· καὶ τὸ μὲν ἐκ θέσιν ἐχόντων πρὸς ἄλληλα τῶν ἐν αὐτοῖς μορίων συνέστηκε, τὸ δὲ οὐκ ἐξ ἐχόντων θέσιν. ἔστι δὲ διωρισμένον μὲν οἷον ἀριθμὸς καὶ λόγος, συνεχές δὲ γραμμὴ, ἐπιφάνεια, σῶμα, ἔτι δὲ παρὰ ταῦτα χρόνος καὶ τόπος. — τῶν μὲν γὰρ τοῦ ἀριθμοῦ μορίων οὐδεὶς ἐστὶ κοινὸς ὅρος, πρὸς ὃν συνάπτει τὰ μόρια αὐτοῦ· οἷον τὰ πέντε εἰ ἔστι τῶν δέκα μόριον, πρὸς οὐδένα κοινὸν ὅρον συνάπτει τὰ πέντε καὶ τὰ πέντε, ἀλλὰ διώρισται· καὶ τὰ τρία γε καὶ τὰ ἑπτὰ πρὸς οὐδένα κοινὸν ὅρον συνάπτει· οὐδ' ὅλως ἂν ἔχοις ἐπ' ἀριθμοῦ λαβεῖν κοινὸν ὅρον τῶν μορίων, ἀλλ' αἰεὶ διώρισται· ὥστε ὁ μὲν ἀριθμὸς τῶν διωρισμένων ἐστίν. ὡσαύτως δὲ καὶ ὁ λόγος τῶν διωρισμένων ἐστίν· (ὅτι μὲν γὰρ ποσὸν ἐστὶν ὁ λόγος φανερόν· καταμετρεῖται γὰρ συλλαβῇ μακρᾷ καὶ βραχεῖα· λέγω δὲ αὐτὸν τὸν μετὰ φωνῆς λόγον γιγνόμενον)· πρὸς οὐδένα γὰρ κοινὸν ὅρον αὐτοῦ τὰ μόρια συνάπτει· οὐ γὰρ ἔστι κοινὸς ὅρος πρὸς ὃν αἱ συλλαβαὶ συνάπτουσιν, ἀλλ' ἑκάστη διώρισται αὐτὴ καθ' αὐτήν. [5a] — ἡ δὲ γραμμὴ συνεχές ἐστίν· ἔστι γὰρ λαβεῖν κοινὸν ὅρον πρὸς ὃν τὰ μόρια αὐτῆς συνάπτει, στιγμὴν· καὶ τῆς ἐπιφανείας γραμμὴν, — τὰ γὰρ τοῦ ἐπιπέδου μόρια πρὸς τινὰ κοινὸν ὅρον συνάπτει. — ὡσαύτως δὲ καὶ ἐπὶ τοῦ σώματος ἔχοις ἂν λαβεῖν κοινὸν ὅρον, γραμμὴν ἢ ἐπιφάνειαν, πρὸς ἣν τὰ τοῦ σώματος μόρια συνάπτει. ἔστι δὲ καὶ ὁ χρόνος καὶ ὁ τόπος τῶν τοιούτων· ὁ γὰρ νῦν χρόνος συνάπτει πρὸς τε τὸν παρεληλυθότα καὶ τὸν μέλλοντα. πάλιν ὁ τόπος τῶν συνεχῶν ἐστίν· τόπον γὰρ τινὰ τὰ τοῦ σώματος μόρια κατέχει, ἃ πρὸς τινὰ κοινὸν ὅρον συνάπτει· οὐκοῦν καὶ τὰ τοῦ τόπου μόρια, ἃ κατέχει ἕκαστον τῶν τοῦ σώματος μορίων, πρὸς τὸν αὐτὸν ὅρον συνάπτει πρὸς ὃν καὶ τὰ τοῦ σώματος — τὸς μόρια· ὥστε συνεχές ἂν εἴη καὶ ὁ τόπος· πρὸς γὰρ ἓνα κοινὸν ὅρον αὐτοῦ τὰ μόρια συνάπτει.

Ἔτι τὰ μὲν ἐκ θέσιν ἐχόντων πρὸς ἄλληλα τῶν ἐν αὐτοῖς μορίων συνέστηκεν, τὰ δὲ οὐκ ἐξ ἐχόντων θέσιν· οἷον τὰ μὲν τῆς γραμμῆς μόρια θέσιν ἔχει πρὸς ἄλληλα, — ἕκαστον γὰρ αὐτῶν κεῖται πού, καὶ ἔχοις ἂν διαλαβεῖν καὶ ἀποδοῦναι οὗ ἕκαστον κεῖται ἐν τῷ ἐπιπέδῳ καὶ πρὸς ποῖον μόριον τῶν λοιπῶν συνάπτει· — ὡσαύτως δὲ καὶ τὰ τοῦ ἐπιπέδου μόρια θέσιν ἔχει τινά, — ὁμοίως γὰρ ἂν ἀποδοθεῖη

ἕκαστον οὐ κεῖται, καὶ ποῖα συνάπτει πρὸς ἄλληλα. — καὶ τὰ τοῦ στερεοῦ δὲ ὡσαύτως καὶ τὰ τοῦ τόπου. ἐπὶ δέ γε τοῦ ἀριθμοῦ οὐκ ἂν ἔχοι τις ἐπιβλέψαι ὥς τὰ μόρια θέσιν τινὰ ἔχει πρὸς ἄλληλα ἢ κεῖται· ἢ ποῖα γε πρὸς ἄλληλα συνάπτει τῶν μορίων· οὐδὲ τὰ τοῦ χρόνου· ὑπομένει γὰρ οὐδὲν τῶν τοῦ χρόνου μορίων, ὃ δὲ μὴ ἐστὶν ὑπομένον, πῶς ἂν τοῦτο θέσιν τινὰ ἔχοι; ἀλλὰ μᾶλλον τάξιν τινὰ εἰποις ἂν ἔχειν τῷ τὸ μὲν πρότερον εἶναι τοῦ χρόνου τὸ δ' ὕστερον. καὶ ἐπὶ τοῦ ἀριθμοῦ δὲ ὡσαύτως, τῷ πρότερον ἀριθμεῖσθαι τὸ ἐν τῶν δύο καὶ τὰ δύο τῶν τριῶν· καὶ οὕτω τάξιν ἂν τινὰ ἔχοι, θέσιν δὲ οὐ πάνυ λάβοις ἂν. καὶ ὁ λόγος δὲ ὡσαύτως· οὐδὲν γὰρ ὑπομένει τῶν μορίων αὐτοῦ, ἀλλ' εἴρηται τε καὶ οὐκ ἔστιν ἔτι τοῦτο λαβεῖν, ὥστε οὐκ ἂν εἴη θέσις τῶν μορίων αὐτοῦ, εἴγε μηδὲν ὑπομένει. — τὰ μὲν οὖν ἐκ θέσιν ἐχόντων τῶν μορίων συνέστηκε, τὰ δὲ οὐκ ἐξ ἐχόντων θέσιν.

Κυρίως δὲ ποσὰ ταῦτα μόνα λέγεται τὰ εἰρημένα, τὰ δὲ ἄλλα πάντα κατὰ συμβεβηκός· εἰς ταῦτα γὰρ [5b] βλέποντες καὶ τᾶλλα ποσὰ λέγομεν, οἷον πολὺ τὸ λευκὸν λέγεται τῷ τὴν ἐπιφάνειαν πολλήν εἶναι, καὶ ἡ πρᾶξις μακρὰ τῷ γε τὸν χρόνον πολὺν εἶναι, καὶ ἡ κίνησις πολλή· οὐ γάρ καθ' αὐτὸ ἕκαστον τούτων ποσὸν λέγεται· οἷον ἐὰν ἀποδιδῷ τις πόση τις ἡ πρᾶξις ἐστὶ, τῷ χρόνῳ ὀριεῖ ἐνιαυσίαν ἢ οὕτω πῶς ἀποδιδούς, καὶ τὸ λευκὸν ποσόν τι ἀποδιδούς τῇ ἐπιφανείᾳ ὀριεῖ, — ὅση γὰρ ἂν ἡ ἐπιφάνεια ᾗ, τοσοῦτον καὶ τὸ λευκὸν φήσει εἶναι· — ὥστε μόνα κυρίως καὶ καθ' αὐτὰ ποσὰ λέγεται τὰ εἰρημένα, τῶν δὲ ἄλλων οὐδὲν αὐτὸ καθ' αὐτό, ἀλλ' εἰ ἄρα κατὰ συμβεβηκός.

Ἔτι τῷ ποσῷ οὐδὲν ἐστὶν ἐναντίον, (ἐπὶ μὲν γὰρ τῶν ἀφωρισμένων φανερόν ὅτι οὐδὲν ἐστὶν ἐναντίον, οἷον τῷ διπῆχει ἢ τριπῆχει ἢ τῇ ἐπιφανείᾳ ἢ τῶν τοιούτων τινί, — οὐδὲν γὰρ ἐστὶν ἐναντίον), εἰ μὴ τὸ πολὺ τῷ ὀλίγῳ φαίη τις εἶναι ἐναντίον ἢ τὸ μέγα τῷ μικρῷ. τούτων δὲ οὐδὲν ἐστὶ ποσὸν ἀλλὰ τῶν πρὸς τι· οὐδὲν γὰρ αὐτὸ καθ' αὐτὸ μέγα λέγεται ἢ μικρόν, ἀλλὰ πρὸς ἕτερον ἀναφέρεται, οἷον ὅρος μὲν μικρὸν λέγεται, κέγχρος δὲ μεγάλῃ τῷ τὴν μὲν τῶν ὁμογενῶν μεῖζον εἶναι, τὸ δὲ ἔλαττον τῶν ὁμογενῶν· οὐκοῦν πρὸς ἕτερον ἢ ἀναφορά, ἐπεὶ εἴγε καθ' αὐτὸ μικρὸν ἢ μέγα ἐλέγετο, οὐκ ἂν ποτε τὸ μὲν ὅρος μικρὸν ἐλέγετο, ἢ δὲ κέγχρος μεγάλῃ. πάλιν ἐν μὲν τῇ κώμῃ πολλοὺς φαμεν ἀνθρώπους εἶναι, ἐν Ἀθήναις δὲ ὀλίγους πολλαπλασίους αὐτῶν ὄντας, καὶ ἐν μὲν τῇ οἰκίᾳ πολλοὺς,

ἐν δὲ τῷ θεάτρῳ ὀλίγους πολλῶ πλείους ὄντας. — ἔτι τὸ μὲν δίπηχυ καὶ τρίπηχυ καὶ ἕκαστον τῶν τοιούτων ποσὸν σημαίνει, τὸ δὲ μέγα ἢ μικρὸν οὐ σημαίνει ποσὸν ἀλλὰ μᾶλλον πρὸς τι· πρὸς γὰρ ἕτερον θεωρεῖται τὸ μέγα καὶ τὸ μικρόν· ὥστε φανερόν ὅτι ταῦτα τῶν πρὸς τί ἐστίν. — ἔτι ἐάν τε τιθῇ τις αὐτὰ ποσὰ εἶναι ἐάν τε μὴ τιθῇ, οὐκ ἔστιν αὐτοῖς ἐναντίον οὐδέν· ὁ γὰρ μὴ ἔστιν αὐτὸ καθ' αὐτὸ λαβεῖν ἀλλὰ πρὸς ἕτερον ἀναφέροντα, πῶς ἂν εἴη τούτῳ τι ἐναντίον; — ἔτι εἰ ἔσται τὸ μέγα καὶ τὸ μικρὸν ἐναντία, συμβήσεται τὸ αὐτὸ ἅμα τὰ ἐναντία ἐπιδέχεσθαι καὶ αὐτὰ αὐτοῖς εἶναι ἐναντία. συμβαίνει γὰρ ἅμα τὸ αὐτὸ μέγα τε καὶ μικρὸν εἶναι, — ἔστι γὰρ πρὸς μὲν τοῦτο μικρόν, πρὸς ἕτερον δὲ τὸ αὐτὸ τοῦτο μέγα· — ὥστε τὸ αὐτὸ καὶ μέγα καὶ μικρὸν κατὰ τὸν αὐτὸν χρόνον εἶναι συμβαίνει, ὥστε ἅμα τὰ ἐναντία ἐπιδέχεσθαι· ἀλλ' οὐδὲν δοκεῖ [6a] ἅμα τὰ ἐναντία ἐπιδέχεσθαι· οἷον ἐπὶ τῆς οὐσίας, δεκτικὴ μὲν τῶν ἐναντίων δοκεῖ εἶναι, ἀλλ' οὔτι γε ἅμα νοσεῖ καὶ ὑγιαίνει, οὐδὲ λευκὸν καὶ μέλαν ἐστὶν ἅμα, οὐδὲ τῶν ἄλλων οὐδὲν ἅμα τὰ ἐναντία ἐπιδέχεται. καὶ αὐτὰ δ' αὐτοῖς συμβαίνει ἐναντία εἶναι· εἰ γὰρ ἐστὶ τὸ μέγα τῷ μικρῷ ἐναντίον, τὸ δ' αὐτὸ ἐστὶν ἅμα μέγα καὶ μικρόν, αὐτὸ αὐτῷ ἂν εἴη ἐναντίον· ἀλλὰ τῶν ἀδυνάτων ἐστὶν αὐτὸ αὐτῷ εἶναι ἐναντίον. — οὐκ ἔστιν ἄρα τὸ μέγα τῷ μικρῷ ἐναντίον, οὐδὲ τὸ πολὺ τῷ ὀλίγῳ, ὥστε κἂν μὴ τῶν πρὸς τι ταῦτά τις ἐρεῖ ἀλλὰ τοῦ ποσοῦ, οὐδὲν ἐναντίον ἔξει. — μάλιστα δὲ ἡ ἐναντιότης τοῦ ποσοῦ περὶ τὸν τόπον δοκεῖ ὑπάρχειν· τὸ γὰρ ἄνω τῷ κάτω ἐναντίον τιθέασι, τὴν πρὸς τὸ μέσον χώραν κάτω λέγοντες, διὰ τὸ πλείστην τῷ μέσῳ διάστασιν πρὸς τὰ πέρατα τοῦ κόσμου εἶναι. εἰκάσι δὲ καὶ τὸν τῶν ἄλλων ἐναντίων ὀρισμὸν ἀπὸ τούτων ἐπιφέρειν· τὰ γὰρ πλείστον ἀλλήλων διεστηκότα τῶν ἐν τῷ αὐτῷ γένει ἐναντία ὀρίζονται.

Οὐ δοκεῖ δὲ τὸ ποσὸν ἐπιδέχεσθαι τὸ μᾶλλον καὶ τὸ ἥττον, οἷον τὸ δίπηχυ, — οὐ γὰρ ἐστὶν ἕτερον ἐτέρου μᾶλλον δίπηχυ· — οὐδ' ἐπὶ τοῦ ἀριθμοῦ, οἷον τὰ τρία τῶν πέντε οὐδὲν μᾶλλον [πέντε ἢ] τρία λέγεται, οὐδὲ τὰ τρία τῶν τριῶν· οὐδέ γε ὁ χρόνος ἕτερος ἐτέρου μᾶλλον χρόνος λέγεται· οὐδ' ἐπὶ τῶν εἰρημένων ὅλως οὐδενὸς τὸ μᾶλλον καὶ τὸ ἥττον λέγεται· ὥστε τὸ ποσὸν οὐκ ἐπιδέχεται τὸ μᾶλλον καὶ τὸ ἥττον.

Ἴδιον δὲ μάλιστα τοῦ ποσοῦ τὸ ἴσον τε καὶ ἄνισον λέγεσθαι. ἕκαστον γὰρ τῶν εἰρημένων ποσῶν καὶ ἴσον καὶ ἄνισον λέγεται, οἷον σῶμα καὶ ἴσον καὶ ἄνισον λέγεται, καὶ ἀριθμὸς καὶ ἴσος καὶ ἄνισος

λέγεται, καὶ χρόνος καὶ ἴσος καὶ ἄνισος· ὡσαύτως δὲ καὶ ἐπὶ τῶν ἄλλων τῶν ῥηθέντων ἕκαστον ἴσον τε καὶ ἄνισον λέγεται. τῶν δὲ λοιπῶν ὅσα μὴ ἐστὶ ποσόν, οὐ πάνυ ἂν δόξαι ἴσον τε καὶ ἄνισον λέγεσθαι, οἷον ἢ διάθεσις ἴση τε καὶ ἄνισος οὐ πάνυ λέγεται ἀλλὰ μᾶλλον ὁμοία, καὶ τὸ λευκὸν ἴσον τε καὶ ἄνισον οὐ πάνυ, ἀλλ' ὅμοιον. ὥστε τοῦ ποσοῦ μάλιστα ἂν εἴη ἴδιον τὸ ἴσον τε καὶ ἄνισον λέγεσθαι.

Κεφάλαιο 7

Πρός τι δὲ τὰ τοιαῦτα λέγεται, ὅσα αὐτὰ ἄπερ ἐστὶν ἐτέρων εἶναι λέγεται ἢ ὅπως οὖν ἄλλως πρὸς ἕτερον· οἷον τὸ μείζον τοῦθ' ὅπερ ἐστὶν ἐτέρου λέγεται, — τινὸς γὰρ μείζον λέγεται, — καὶ τὸ διπλάσιον ἐτέρου λέγεται τοῦθ' ὅπερ [6b] ἐστίν, — τινὸς γὰρ διπλάσιον λέγεται. — ὡσαύτως δὲ καὶ ὅσα ἄλλα τοιαῦτα. ἔστι δὲ καὶ τὰ τοιαῦτα τῶν πρὸς τι οἷον ἕξις, διάθεσις, αἴσθησις, ἐπιστήμη, θέσις· πάντα γὰρ τὰ εἰρημένα τοῦθ' ὅπερ ἐστὶν ἐτέρων λέγεται καὶ οὐκ ἄλλο τι· ἢ γὰρ ἕξις τινὸς ἕξις λέγεται καὶ ἢ ἐπιστήμη τινὸς ἐπιστήμη καὶ ἢ θέσις τινὸς θέσις, καὶ τὰ ἄλλα δὲ ὡσαύτως. πρὸς τι οὖν ἐστὶν ὅσα αὐτὰ ἄπερ ἐστὶν ἐτέρων λέγεται, ἢ ὅπως οὖν ἄλλως πρὸς ἕτερον· οἷον ὅρος μέγα λέγεται πρὸς ἕτερον, — πρὸς τι γὰρ μέγα λέγεται τὸ ὅρος, — καὶ τὸ ὅμοιον τινὶ ὅμοιον λέγεται, καὶ τὰ ἄλλα δὲ τὰ τοιαῦτα ὡσαύτως πρὸς τι λέγεται. ἔστι δὲ καὶ ἡ ἀνάκλισις καὶ ἡ στάσις καὶ ἡ καθέδρα θέσεις τινές, ἢ δὲ θέσις τῶν πρὸς τι· τὸ δὲ ἀνακε<κλ>ίσθαι ἢ ἐστάναι ἢ καθῆσθαι αὐτὰ μὲν οὐκ εἰσὶ θέσεις, παρωνύμως δὲ ἀπὸ τῶν εἰρημένων θέσεων λέγεται.

Ὑπάρχει δὲ καὶ ἐναντιότης ἐν τοῖς πρὸς τι, οἷον ἀρετὴ κακία ἐναντίον, ἐκάτερον αὐτῶν πρὸς τι ὄν, καὶ ἐπιστήμη ἀγνοία. οὐ πᾶσι δὲ τοῖς πρὸς τι ὑπάρχει ἐναντίον· τῷ γὰρ διπλασίῳ οὐδὲν ἐστὶν ἐναντίον οὐδὲ τῷ τριπλασίῳ οὐδὲ τῶν τοιούτων οὐδενί. — δοκεῖ δὲ καὶ τὸ μᾶλλον καὶ τὸ ἥττον ἐπιδέχεσθαι τὰ πρὸς τι· ὅμοιον γὰρ μᾶλλον καὶ ἥττον λέγεται, καὶ ἄνισον μᾶλλον καὶ ἥττον λέγεται, ἐκάτερον αὐτῶν πρὸς τι ὄν· τό τε γὰρ ὅμοιον τινὶ ὅμοιον λέγεται καὶ τὸ ἄνισον τινὶ ἄνισον. οὐ πάντα δὲ ἐπιδέχεται τὸ μᾶλλον καὶ ἥττον· τὸ γὰρ διπλάσιον οὐ λέγεται μᾶλλον καὶ ἥττον διπλάσιον οὐδὲ τῶν τοιούτων οὐδέν.

Πάντα δὲ τὰ πρὸς τι πρὸς ἀντιστρέφοντα λέγεται, οἷον ὁ δοῦλος δεσπότης λέγεται δοῦλος καὶ ὁ δεσπότης δούλου δεσπότης λέγεται, καὶ τὸ διπλάσιον ἡμίσεος διπλάσιον καὶ τὸ ἥμισυ διπλασίου ἥμισυ, καὶ τὸ μείζον ἐλάττονος μείζον καὶ τὸ ἐλάττον μείζονος ἐλάττον· ὡσαύτως δὲ καὶ ἐπὶ τῶν ἄλλων· πλὴν τῇ πτώσει ἐνίοτε διοίσει κατὰ τὴν λέξιν, οἷον ἢ ἐπιστήμη ἐπιστητοῦ λέγεται ἐπιστήμη καὶ τὸ ἐπιστητὸν ἐπιστήμη ἐπιστητόν, καὶ ἢ αἴσθησις αἰσθητοῦ αἴσθησις καὶ τὸ αἰσθητὸν αἰσθήσει αἰσθητόν. οὐ μὴν ἄλλ' ἐνίοτε οὐ δόξει

ἀντιστρέφειν, ἐὰν μὴ οἰκείως πρὸς ὃ λέγεται ἀποδοθῇ ἀλλὰ διαμάρτη ὁ ἀποδιδούς· οἷον τὸ πτερόν ἐὰν ἀποδοθῇ ὄρνιθος, οὐκ ἀντιστρέφει ὄρνις πτεροῦ· οὐ γὰρ οἰκείως τὸ [7a] πρῶτον ἀποδέδοται πτερόν ὄρνιθος, — οὐ γὰρ ἢ ὄρνις, ταύτη τὸ πτερόν αὐτῆς λέγεται, ἀλλ' ἢ πτερωτόν ἐστιν· πολλῶν γὰρ καὶ ἄλλων πτερά ἐστιν ἃ οὐκ εἰσὶν ὄρνιθες· — ὥστε ἐὰν ἀποδοθῇ οἰκείως, καὶ ἀντιστρέφει, οἷον τὸ πτερόν πτερωτοῦ πτερόν καὶ τὸ πτερωτὸν πτερῶ πτερωτόν. — ἐνίστε δὲ καὶ ὀνοματοποιεῖν ἴσως ἀναγκαῖον, ἐὰν μὴ κείμενον ἢ ὄνομα πρὸς ὃ οἰκείως ἂν ἀποδοθεῖ· οἷον τὸ πηδάλιον πλοίου ἐὰν ἀπο — δοθῇ, οὐκ οἰκεία ἢ ἀπόδοσις, — οὐ γὰρ ἢ πλοῖον ταύτη αὐτοῦ τὸ πηδάλιον λέγεται· ἔστι γὰρ πλοῖα ὧν οὐκ ἔστι πηδάλια· — διὸ οὐκ ἀντιστρέφει· τὸ γὰρ πλοῖον οὐ λέγεται πηδαλίου πλοῖον. ἀλλ' ἴσως οἰκειότερα ἂν ἢ ἀπόδοσις εἴη, εἰ οὕτω πως ἀποδοθεῖ τὸ πηδάλιον πηδαλιωτοῦ πηδάλιον ἢ ὁπωσοῦν ἄλλως, — ὄνομα γὰρ οὐ κεῖται· — καὶ ἀντιστρέφει γε, ἐὰν οἰκείως ἀποδοθῇ· τὸ γὰρ πηδαλιωτὸν πηδαλίῳ πηδαλιωτόν. ὡσαύτως δὲ καὶ ἐπὶ τῶν ἄλλων, οἷον ἡ κεφαλὴ οἰκειότερως ἂν ἀποδοθεῖ κεφαλωτοῦ ἢ ζῶου ἀποδιδομένη· οὐ γὰρ ἢ ζῶον κεφαλὴν ἔχει· πολλὰ γὰρ τῶν ζῶων κεφαλὴν οὐκ ἔχει. οὕτω δὲ ῥᾶστα ἂν ἴσως τις λαμβάνοι οἷς μὴ κεῖται ὀνόματα, εἰ ἀπὸ τῶν πρώτων καὶ τοῖς πρὸς αὐτὰ ἀντιστρέφουσι τιθεῖν τὰ ὀνόματα, ὥσπερ ἐπὶ τῶν προειρημένων ἀπὸ τοῦ πτεροῦ τὸ πτερωτόν καὶ ἀπὸ τοῦ πηδαλίου τὸ πηδαλιωτόν. πάντα οὖν τὰ πρὸς τι, ἐάνπερ οἰκείως ἀποδιδῶται, πρὸς ἀντιστρέφοντα λέγεται· ἐπεὶ, ἐάν γε πρὸς τὸ τυχόν ἀποδιδῶται καὶ μὴ πρὸς αὐτὸ ὃ λέγεται, οὐκ ἀντιστρέφει. — λέγω δὲ ὅτι οὐδὲ τῶν ὁμολογουμένως πρὸς ἀντιστρέφοντα λεγομένων καὶ ὀνομάτων αὐτοῖς κειμένων οὐδὲν ἀντιστρέφει, ἐὰν πρὸς τι τῶν συμβεβηκότων ἀποδιδῶται καὶ μὴ πρὸς αὐτὸ ὃ λέγεται· οἷον ὁ δοῦλος ἐὰν μὴ δεσπότου ἀποδοθῇ ἀλλ' ἀνθρώπου ἢ δίποδος ἢ ὅτουοῦν τῶν τοιούτων, οὐκ ἀντιστρέφει· οὐ γὰρ οἰκεία ἢ ἀπόδοσις. — ἔτι ἐὰν μὲν οἰκείως ἀποδεδομένον ἢ πρὸς ὃ λέγεται, πάντων περιαιρουμένων τῶν ἄλλων ὅσα συμβεβηκότα ἐστίν, καταλειπομένου δὲ τούτου μόνου πρὸς ὃ ἀπεδόθη οἰκείως, αἰὲ πρὸς αὐτὸ ῥηθήσεται· οἷον εἰ ὁ δοῦλος πρὸς δεσπότην λέγεται, περιαιρουμένων ἀπάντων ὅσα συμβεβηκότα ἐστὶ τῷ δεσπότῃ, οἷον τὸ δίποδι εἶναι, τὸ ἐπιστήμης δεκτικῶ, τὸ ἀνθρώπῳ, καταλειπο — μένου δὲ μόνου τοῦ δεσπότην εἶναι, αἰὲ ὁ δοῦλος πρὸς αὐτὸ ῥηθήσεται· ὁ γὰρ δοῦλος δεσπότου δοῦλος [7b] λέγεται. ἐὰν δέ γε μὴ

οἰκείως ἀποδοθῇ πρὸς ὃ ποτε λέγεται, περιαιρουμένων μὲν τῶν ἄλλων καταλειπομένου δὲ μόνου τοῦ πρὸς ὃ ἀπεδόθη, οὐ ρηθήσεται πρὸς αὐτό· ἀποδεδόσθω γὰρ ὁ δοῦλος ἀνθρώπου καὶ τὸ πτερὸν ὄρνιθος, καὶ περιηρήσθω τοῦ ἀνθρώπου τὸ δεσπότη αὐτῷ εἶναι· οὐ γὰρ ἔτι ὁ δοῦλος πρὸς ἄνθρωπον ρηθήσεται, — μὴ γὰρ ὄντος δεσπότου οὐδὲ δοῦλός ἐστιν· — ὡσαύτως δὲ καὶ τοῦ ὄρνιθος περιηρήσθω τὸ πτερωτῷ εἶναι· οὐ γὰρ ἔτι ἔσται τὸ πτερὸν τῶν πρὸς τι· μὴ γὰρ ὄντος πτερωτοῦ οὐδὲ πτερὸν ἔσται τινός, — ὥστε δεῖ μὲν ἀποδιδόναι πρὸς ὃ ποτε οἰκείως λέγεται· κὰν μὲν ὄνομα ἦ κείμενον ῥαδία ἢ ἀπόδοσις γίγνεται, μὴ ὄντος δὲ ἀναγκαῖον ἴσως ὀνοματοποιεῖν. οὕτω δὲ ἀποδιδομένων φανερόν ὅτι πάντα τὰ πρὸς τι πρὸς ἀντιστρέφοντα ρηθήσεται.

Δοκεῖ δὲ τὰ πρὸς τι ἅμα τῇ φύσει εἶναι. καὶ ἐπὶ μὲν τῶν πλείστων ἀληθές ἐστιν· ἅμα γὰρ διπλάσιόν τέ ἐστι καὶ ἡμισυ, καὶ ἡμίσεος ὄντος διπλάσιόν ἐστιν, καὶ δούλου ὄντος δεσπότης ἐστίν· ὁμοίως δὲ τούτοις καὶ τὰ ἄλλα. καὶ συναναιρεῖ δὲ ταῦτα ἄλληλα· μὴ γὰρ ὄντος διπλάσιον οὐκ ἔστιν ἡμισυ, καὶ ἡμίσεος μὴ ὄντος οὐκ ἔστι διπλάσιον· ὡσαύτως δὲ καὶ ἐπὶ τῶν ἄλλων ὅσα τοιαῦτα. — οὐκ ἐπὶ πάντων δὲ τῶν πρὸς τι ἀληθές δοκεῖ τὸ ἅμα τῇ φύσει εἶναι· τὸ γὰρ ἐπιστητὸν τῆς ἐπιστήμης πρότερον ἢ δόξειεν εἶναι· ὥς γὰρ ἐπὶ τὸ πολὺ προὔπαρχόντων τῶν πραγμάτων τὰς ἐπιστήμας λαμβάνομεν· ἐπ' ὀλίγων γὰρ ἢ ἐπ' οὐδενὸς ἴδοι τις ἂν ἅμα τῷ ἐπιστητῷ τὴν ἐπιστήμην γιγνομένην. ἔτι τὸ μὲν ἐπιστητὸν ἀναιρεθὲν συναναιρεῖ τὴν ἐπιστήμην, ἢ δὲ ἐπιστήμη τὸ ἐπιστητὸν οὐ συν — ἀναιρεῖ· ἐπιστητοῦ γὰρ μὴ ὄντος οὐκ ἔστιν ἐπιστήμη, — οὐδενὸς γὰρ ἔτι ἔσται ἐπιστήμη, — ἐπιστήμης δὲ μὴ οὔσης οὐδὲν κωλύει ἐπιστητὸν εἶναι· οἷον καὶ ὁ τοῦ κύκλου τετραγωνισμὸς εἶγε ἔστιν ἐπιστητόν, ἐπιστήμη μὲν αὐτοῦ οὐκ ἔστιν οὐδέπω, αὐτὸ δὲ τὸ ἐπιστητὸν ἔστιν. ἔτι ζῶου μὲν ἀναιρεθέντος οὐκ ἔστιν ἐπιστήμη, τῶν δ' ἐπιστητῶν πολλὰ ἐνδέχεται εἶναι. — ὁμοίως δὲ τούτοις καὶ τὰ ἐπὶ τῆς αἰσθήσεως ἔχει· τὸ γὰρ αἰσθητὸν πρότερον τῆς αἰσθήσεως δοκεῖ εἶναι· τὸ μὲν γὰρ αἰσθητὸν ἀναιρεθὲν συναναιρεῖ τὴν αἴσθησιν, ἢ δὲ αἴσθησις τὸ αἰσθητὸν οὐ συναναιρεῖ. αἱ γὰρ αἰσθήσεις περὶ σῶμα καὶ ἐν σώματι εἰσιν, αἰσθητοῦ δὲ ἀναιρεθέντος [8a] ἀνήρηται καὶ σῶμα, — τῶν γὰρ αἰσθητῶν καὶ τὸ σῶμα, — σώματος δὲ μὴ ὄντος ἀνήρηται καὶ ἡ αἴσθησις, ὥστε συναναιρεῖ τὸ αἰσθητὸν τὴν αἴσθησιν. ἢ δέ γε αἴσθησις τὸ αἰσθητὸν οὐ· ζῶου γὰρ ἀναιρεθέντος αἴσθησις

μὲν ἀνήρηται, αἰσθητὸν δὲ ἔσται, οἷον σῶμα, θερμόν, γλυκύ, πικρόν, καὶ τὰ ἄλλα πάντα ὅσα ἐστὶν αἰσθητά. ἔτι ἢ μὲν αἰσθησις ἅμα τῷ αἰσθητικῷ γίγνεται, — ἅμα γὰρ ζῶόν τε γίγνεται καὶ αἰσθησις, — τὸ δὲ γε αἰσθητὸν ἐστὶ καὶ πρὸ τοῦ αἰσθησιν εἶναι, — πῦρ γὰρ καὶ ὕδωρ καὶ τὰ τοιαῦτα, ἐξ ὧν καὶ τὸ ζῶον συνίσταται, ἐστὶ καὶ πρὸ τοῦ ζῶον ὅλως εἶναι ἢ αἰσθησιν, — ὥστε πρότερον ἂν τῆς αἰσθήσεως τὸ αἰσθητὸν εἶναι δόξειεν.

Ἔχει δὲ ἀπορίαν πότερον οὐδεμία οὐσία τῶν πρὸς τι λέγεται, καθάπερ δοκεῖ, ἢ τοῦτο ἐνδέχεται κατὰ τινὰς τῶν δευτέρων οὐσιῶν. ἐπὶ μὲν γὰρ τῶν πρώτων οὐσιῶν ἀληθές ἐστίν· οὔτε γὰρ τὰ ὅλα οὔτε τὰ μέρη πρὸς τι λέγεται· ὁ γὰρ τις ἄνθρωπος οὐ λέγεται τινός τις ἄνθρωπος, οὐδὲ ὁ τις βοῦς τινός τις βοῦς· ὡσαύτως δὲ καὶ τὰ μέρη· ἢ γὰρ τις χεὶρ οὐ λέγεται τινός τις χεὶρ ἀλλὰ τινὸς χεὶρ, καὶ ἢ τις κεφαλὴ οὐ λέγεται τινός τις κεφαλὴ ἀλλὰ τινὸς κεφαλὴ. ὡσαύτως δὲ καὶ ἐπὶ τῶν δευτέρων οὐσιῶν, ἐπὶ γε τῶν πλείστων· οἷον ὁ ἄνθρωπος οὐ λέγεται τινὸς ἄνθρωπος, οὐδὲ ὁ βοῦς τινὸς βοῦς, οὐδὲ τὸ ξύλον τινὸς ξύλον, ἀλλὰ τινὸς κτῆμα λέγεται. ἐπὶ μὲν οὖν τῶν τοιούτων φανερόν ὅτι οὐκ ἔστι τῶν πρὸς τι, ἐπ' ἐνίων δὲ τῶν δευτέρων οὐσιῶν ἔχει ἀμφισβήτησιν· οἷον ἢ κεφαλὴ τινὸς λέγεται κεφαλὴ καὶ ἢ χεὶρ τινὸς λέγεται χεὶρ καὶ ἕκαστον τῶν τοιούτων, ὥστε ταῦτα τῶν πρὸς τι δόξειεν ἂν εἶναι. — εἰ μὲν οὖν ἰκανῶς ὁ τῶν πρὸς τι ὁρισμὸς ἀποδέδοται, ἢ τῶν πάνυ χαλεπῶν ἢ τῶν ἀδυνάτων ἐστὶ τὸ λῦσαι ὡς οὐδεμία οὐσία τῶν πρὸς τι λέγεται· εἰ δὲ μὴ ἰκανῶς, ἀλλ' ἔστι τὰ πρὸς τι οἷς τὸ εἶναι ταυτόν ἐστι τῷ πρὸς τί πως ἔχειν, ἴσως ἂν ῥηθείη τι πρὸς αὐτά. ὁ δὲ πρότερος ὁρισμὸς παρακολουθεῖ μὲν πᾶσι τοῖς πρὸς τι, οὐ μὴν τοῦτό γε ἐστὶ τὸ πρὸς τι αὐτοῖς εἶναι τὸ αὐτὰ ἅπερ ἐστὶν ἐτέρων λέγεσθαι. ἐκ δὲ τούτων δηλόν ἐστίν ὅτι ἐάν τις εἰδῇ τι ὠρισμένως τῶν πρὸς τι, κάκεῖνο πρὸς ὃ λέγεται ὠρισμένως εἴσεται. φανερόν μὲν οὖν καὶ ἐξ αὐτοῦ ἐστίν· εἰ γὰρ οἶδέ τις τόδε τι ὅτι τῶν πρὸς τί ἐστιν, ἔστι δὲ τὸ εἶναι τοῖς πρὸς τι ταὐτὸ τῷ [8b] πρὸς τί πως ἔχειν, κάκεῖνο οἶδε πρὸς ὃ τοῦτό πως ἔχει· εἰ γὰρ οὐκ οἶδεν ὅλως πρὸς ὃ τοῦτό πως ἔχει, οὐδ' εἰ πρὸς τί πως ἔχει εἴσεται. καὶ ἐπὶ τῶν καθ' ἕκαστα δὲ δηλόν τὸ τοιοῦτον· οἷον τόδε τι εἰ οἶδεν ἀφωρισμένως ὅτι ἔστι διπλάσιον, καὶ ὅτου διπλάσιόν ἐστιν εὐθύς ἀφωρισμένως οἶδεν, — εἰ γὰρ μηδενὸς τῶν ἀφωρισμένων οἶδεν αὐτὸ διπλάσιον, οὐδ' εἰ ἔστι διπλάσιον ὅλως οἶδεν· — ὡσαύτως δὲ καὶ τόδε τι εἰ οἶδεν ὅτι κάλλιόν ἐστι, καὶ ὅτου κάλλιόν ἐστιν

ἀφωρισμένως ἀναγκαῖον εἰδέναι διὰ ταῦτα, (οὐκ ἀορίστως δὲ εἴσεται ὅτι τοῦτό ἐστι χείρονος κάλλιον· ὑπόληψις γὰρ τὸ τοιοῦτο γίγνεται, οὐκ ἐπιστήμη· οὐ γὰρ ἔτι εἴσεται ἀκριβῶς ὅτι ἐστὶ χείρονος κάλλιον· εἰ γὰρ οὕτως ἔτυχεν, οὐδὲν ἐστὶ χείρον αὐτοῦ)· ὥστε φανερόν ὅτι ἀναγκαῖόν ἐστιν, ὃ ἂν εἰδῇ τις τῶν πρὸς τι ὠρισμένως, κακεῖνο πρὸς ὃ λέγεται ὠρισμένως εἰδέναι. τὴν δέ γε κεφαλὴν καὶ τὴν χεῖρα καὶ ἕκαστον τῶν τοιούτων αἱ εἰσιν οὐσίαι αὐτὸ μὲν ὅπερ ἐστὶν ὠρισμένως ἔστιν εἰδέναι, πρὸς ὃ δὲ λέγεται οὐκ ἀναγκαῖον· τίνος γὰρ αὕτη ἢ κεφαλὴ ἢ τίνος ἢ χεῖρ οὐκ ἔστιν εἰδέναι ὠρισμένως· ὥστε οὐκ ἂν εἴη ταῦτα τῶν πρὸς τι· εἰ δὲ μὴ ἐστὶ τῶν πρὸς τι, ἀληθὲς ἂν εἴη λέγειν ὅτι οὐδεμία οὐσία τῶν πρὸς τί ἐστιν. ἴσως δὲ χαλεπὸν περὶ τῶν τοιούτων σφοδρῶς ἀποφαίνεσθαι μὴ πολλάκις ἐπεσκεμμένον, τὸ μέντοι διηπορηκέναι ἐφ' ἕκαστον αὐτῶν οὐκ ἄχρηστόν ἐστιν.

Κεφάλαιο 8

Ποιότητα δὲ λέγω καθ' ἣν ποιοί τινες λέγονται· ἔστι δὲ ἡ ποιότης τῶν πλεοναχῶς λεγομένων. ἐν μὲν οὖν εἶδος ποιότητος ἕξις καὶ διάθεσις λεγέσθωσαν. διαφέρει δὲ ἕξις διαθέσεως τῷ μονιμώτερον καὶ πολυχρονιώτερον εἶναι· τοιαῦται δὲ αἱ τε ἐπιστήμαι καὶ αἱ ἀρεταί· ἢ τε γὰρ ἐπιστήμη δοκεῖ τῶν παραμονίμων εἶναι καὶ δυσκινήτων, ἐὰν καὶ μετρίως τις ἐπιστήμην λάβῃ, ἐάνπερ μὴ μεγάλη μεταβολὴ γένηται ὑπὸ νόσου ἢ ἄλλου τινὸς τοιούτου· ὡσαύτως δὲ καὶ ἡ ἀρετὴ· οἷον ἡ δικαιοσύνη καὶ ἡ σωφροσύνη καὶ ἕκαστον τῶν τοιούτων οὐκ εὐκίνητον δοκεῖ εἶναι οὐδ' εὐμετάβολον. διαθέσεις δὲ λέγονται ἃ ἔστιν εὐκίνητα καὶ ταχὺ μεταβάλλοντα, οἷον θερμότης καὶ κατάψυξις καὶ νόσος καὶ ὑγίεια καὶ ὅσα ἄλλα τοιαῦτα· διάκειται μὲν γὰρ πῶς κατὰ ταύτας ὁ ἄνθρωπος, ταχὺ δὲ μεταβάλλει ἐκ θερμοῦ ψυχρὸς γιγνόμενος καὶ ἐκ τοῦ ὑγιαίνειν εἰς τὸ νο[9a] σεῖν· ὡσαύτως δὲ καὶ ἐπὶ τῶν ἄλλων, εἰ μὴ τις καὶ αὐτὸ — τῶν τούτων τυγχάνοι διὰ χρόνου πλῆθος ἤδη πεφυσιωμένη καὶ ἀνίατος ἢ πάνυ δυσκίνητος οὔσα, ἣν ἂν τις ἴσως ἕξιν ἤδη προσαγορεύοι. φανερόν δὲ ὅτι ταῦτα βούλονται ἕξεις λέγειν ἃ ἔστι πολυχρονιώτερα καὶ δυσκινήτοτερα· τοὺς γὰρ τῶν ἐπιστημῶν μὴ πάνυ κατέχοντας ἀλλ' εὐκινήτους ὄντας οὐ φασιν ἕξιν ἔχειν, καίτοι διάκεινται γέ πῶς κατὰ τὴν ἐπιστήμην ἢ χειρὸν ἢ βέλτιον. ὥστε διαφέρει ἕξις διαθέσεως τῷ τὸ μὲν εὐκίνητον εἶναι τὸ δὲ πολυχρονιώτερόν τε καὶ δυσκινήτοτερον. — εἰσὶ δὲ αἱ μὲν ἕξεις καὶ διαθέσεις, αἱ δὲ διαθέσεις οὐκ ἐξ ἀνάγκης ἕξεις· οἱ μὲν γὰρ ἕξεις ἔχοντες καὶ διάκεινται πῶς κατὰ ταύτας, οἱ δὲ διακείμενοι οὐ πάντως καὶ ἕξιν ἔχουσιν.

Ἔτερον δὲ γένος ποιότητος καθ' ὃ πυκτικούς ἢ δρομικούς ἢ ὑγιεινοὺς ἢ νοσώδεις λέγομεν, καὶ ἀπλῶς ὅσα κατὰ δύναμιν φυσικὴν ἢ ἀδυναμίαν λέγεται. οὐ γὰρ τῷ διακεῖσθαι πῶς ἕκαστον τῶν τοιούτων λέγεται, ἀλλὰ τῷ δύναμιν ἔχειν φυσικὴν τοῦ ποιῆσαι τι ῥαδίως ἢ μηδὲν πάσχειν· οἷον πυκτικοὶ ἢ δρομικοὶ λέγονται οὐ τῷ διακεῖσθαι πῶς ἀλλὰ τῷ δύναμιν ἔχειν φυσικὴν τοῦ ποιῆσαι τι ῥαδίως, ὑγιεῖνοι δὲ λέγονται τῷ δύναμιν ἔχειν φυσικὴν τοῦ μηδὲν πάσχειν ὑπὸ τῶν τυχόντων ῥαδίως, νοσώδεις δὲ τῷ ἀδυναμίαν ἔχειν τοῦ μηδὲν πάσχειν. ὁμοίως δὲ τούτοις καὶ τὸ σκληρὸν καὶ τὸ μαλακὸν ἔχει· τὸ μὲν γὰρ σκληρὸν λέγεται τῷ δύναμιν ἔχειν τοῦ μὴ

ῥαδίως διαιρεῖσθαι, τὸ δὲ μαλακὸν τῷ ἀδυναμίαν ἔχειν τοῦ αὐτοῦ τούτου.

Τρίτον δὲ γένος ποιότητος παθητικαὶ ποιότητες καὶ πάθη· ἔστι δὲ τὰ τοιάδε οἷον γλυκύτης τε καὶ πικρότης καὶ στρυφνότης καὶ πάντα τὰ τούτοις συγγενῇ, ἔτι δὲ θερμότης καὶ ψυχρότης καὶ λευκότης καὶ μελανία. ὅτι μὲν οὖν αὖ — ται ποιότητές εἰσιν φανερόν· τὰ γὰρ δεδεγμένα ποιὰ λέγεται κατ' αὐτάς· οἷον τὸ μέλι τῷ γλυκύτητα δεδέχθαι λέγεται γλυκύ, καὶ τὸ σῶμα λευκὸν τῷ λευκότητα δεδέχθαι· ὡσαύτως δὲ καὶ ἐπὶ τῶν ἄλλων ἔχει. παθητικαὶ δὲ ποιότητες λέγονται οὐ τῷ αὐτὰ τὰ δεδεγμένα τὰς [9b] ποιότητος πεπονθέναι τι· οὔτε γὰρ τὸ μέλι τῷ πεπονθέναι τι λέγεται γλυκύ, οὔτε τῶν ἄλλων τῶν τοιούτων οὐδέν· ὁμοίως δὲ τούτοις καὶ ἡ θερμότης καὶ ἡ ψυχρότης παθητικαὶ ποιότητες λέγονται οὐ τῷ αὐτὰ τὰ δεδεγμένα πεπονθέναι τι, τῷ δὲ κατὰ τὰς αἰσθήσεις ἐκάστην τῶν εἰρημένων ποιότητων πάθους εἶναι ποιητικὴν παθητικαὶ ποιότητες λέγονται· ἢ τε γὰρ γλυκύτης πάθος τι κατὰ τὴν γεῦσιν ἐμποιεῖ καὶ ἡ θερμότης κατὰ τὴν ἀφήν, ὁμοίως δὲ καὶ αἱ ἄλλαι. λευκότης δὲ καὶ μελανία καὶ αἱ ἄλλαι χροιαὶ οὐ τὸν αὐτὸν τρόπον τοῖς εἰρημένοις παθητικαὶ ποιότητες λέγονται, ἀλλὰ τῷ αὐτὰς ἀπὸ πάθους γεγενῆσθαι. ὅτι μὲν οὖν γίνονται διὰ πάθος πολλὰ μεταβολαὶ χρωμάτων, δηλον· αἰσχυνθεὶς γὰρ τις ἐρυθρὸς ἐγένετο καὶ φοβηθεὶς ὠχρὸς καὶ ἕκαστον τῶν τοιούτων· ὥστε καὶ εἴ τις φύσει τῶν τοιούτων τι παθὼν πέπονθεν, τὴν ὁμοίαν χροιάν εἰκὸς ἔστιν ἔχειν αὐτόν· ἥτις γὰρ νῦν ἐν τῷ αἰσχυνθῆναι διάθεσις τῶν περὶ τὸ σῶμα ἐγένετο, καὶ κατὰ φυσικὴν σύστασιν ἡ αὐτὴ γένοιτ' ἂν διάθεσις, ὥστε φύσει καὶ τὴν χροιάν ὁμοίαν γίνεσθαι. — ὅσα μὲν οὖν τῶν τοιούτων συμπτωμάτων ἀπὸ τινων παθῶν δυσκινήτων καὶ παραμονίμων τὴν ἀρχὴν εἴληφε ποιότητες λέγονται· εἴτε γὰρ ἐν τῇ κατὰ φύσιν συστάσει ὠχρότης ἢ μελανία γεγένηται, ποιότης λέγεται, — ποιοὶ γὰρ κατὰ ταύτας λεγόμεθα, — εἴτε διὰ νόσον μακρὰν ἢ διὰ καῦμα [τὸ αὐτὸ] συμβέβηκεν ὠχρότης ἢ μελανία, καὶ μὴ ῥαδίως ἀποκαθ — ἴστανται ἢ καὶ διὰ βίου παραμένουσι, ποιότητες καὶ αὐταὶ λέγονται, — ὁμοίως γὰρ ποιοὶ κατὰ ταύτας λεγόμεθα. — ὅσα δὲ ἀπὸ ῥαδίως διαλυομένων καὶ ταχὺ ἀποκαθισταμένων γίγνεται πάθη λέγεται· οὐ γὰρ λέγονται ποιοὶ τινες κατὰ ταῦτα· οὔτε γὰρ ὁ ἐρυθριῶν διὰ τὸ αἰσχυνθῆναι ἐρυθρίας λέγεται, οὔτε ὁ ὠχριῶν διὰ τὸ φοβεῖσθαι ὠχρίας, ἀλλὰ μᾶλλον πεπονθέναι τι· ὥστε πάθη μὲν τὰ τοιαῦτα

λέγεται, ποιότητες δὲ οὐ. — ὁμοίως δὲ τούτοις καὶ κατὰ τὴν ψυχὴν παθητικαὶ ποιότητες καὶ πάθη λέγεται. ὅσα τε γὰρ ἐν τῇ γενέσει εὐθὺς ἀπὸ τινων παθῶν γεγένηται ποιότητες λέγονται, οἷον ἢ τε μανικὴ [10a] ἔκστασις καὶ ἡ ὀργὴ καὶ τὰ τοιαῦτα· ποιοὶ γὰρ κατὰ ταύτας λέγονται, ὀργίλοι τε καὶ μανικοί. ὁμοίως δὲ καὶ ὅσαι ἐκστάσεις μὴ φυσικαί, ἀλλ' ἀπὸ τινων ἄλλων συμπτωμάτων γεγένηται δυσαπάλλακτοι ἢ καὶ ὅλως ἀκίνητοι, ποιότητες καὶ τὰ τοιαῦτα· ποιοὶ γὰρ κατὰ ταύτας λέγονται. ὅσα δὲ ἀπὸ ταχὺ καθισταμένων γίγνεται πάθη λέγεται, οἷον εἰ λυπούμενος ὀργιλώτερός ἐστιν· οὐ γὰρ λέγεται ὀργίλος ὁ ἐν τῷ τοιούτῳ πάθει ὀργιλώτερος ὢν, ἀλλὰ μᾶλλον πεπονθέναι τι· ὥστε πάθη μὲν λέγεται τὰ τοιαῦτα, ποιότητες δὲ οὐ.

Τέταρτον δὲ γένος ποιότητος σχῆμά τε καὶ ἡ περὶ ἕκαστον ὑπάρχουσα μορφή, ἔτι δὲ πρὸς τούτοις εὐθύτης καὶ καμπυλότης καὶ εἴ τι τούτοις ὁμοίον ἐστίν· καθ' ἕκαστον γὰρ τούτων ποιόν τι λέγεται· τῷ γὰρ τρίγωνον ἢ τετράγωνον εἶναι ποιόν τι λέγεται, καὶ τῷ εὐθὺ ἢ καμπύλον. καὶ κατὰ τὴν μορφήν δὲ ἕκαστον ποιόν τι λέγεται. τὸ δὲ μανὸν καὶ τὸ πυκνὸν καὶ τὸ τραχὺ καὶ τὸ λεῖον δόξειε μὲν ἂν ποιὸν σημαίνειν, ἔοικε δὲ ἀλλότρια τὰ τοιαῦτα εἶναι τῆς περὶ τὸ ποιὸν διαιρέσεως· θέσιν γὰρ τινα μᾶλλον φαίνεται τῶν μορίων ἑκάτερον δηλοῦν· πυκνὸν μὲν γὰρ τῷ τὰ μόρια σύνεγγυς εἶναι ἀλλήλοις, μανὸν δὲ τῷ διεστάναι ἀπ' ἀλλήλων· καὶ λεῖον μὲν τῷ ἐπ' εὐθείας πως τὰ μόρια κεῖσθαι, τραχὺ δὲ τῷ τὸ μὲν ὑπερέχειν τὸ δὲ ἐλλείπειν. — ἴσως μὲν οὖν καὶ ἄλλος ἂν τις φανείη τρόπος ποιότητος, ἀλλ' οἱ γε μάλιστα λεγόμενοι σχεδὸν τοσοῦτοί εἰσιν.

Ποιότητες μὲν οὖν εἰσὶν αἱ εἰρημέναι, ποῖα δὲ τὰ κατὰ ταύτας παρωνύμως λεγόμενα ἢ ὅπως οὖν ἄλλως ἀπ' αὐτῶν. ἐπὶ μὲν οὖν τῶν πλείστων καὶ σχεδὸν ἐπὶ πάντων παρωνύμως λέγεται, οἷον ἀπὸ τῆς λευκότητος ὁ λευκὸς καὶ ἀπὸ τῆς γραμματικῆς ὁ γραμματικὸς καὶ ἀπὸ τῆς δικαιοσύνης ὁ δίκαιος, ὡσαύτως δὲ καὶ ἐπὶ τῶν ἄλλων. ἐπ' ἐνίων δὲ διὰ τὸ μὴ κεῖσθαι ταῖς ποιότησιν ὀνόματα οὐκ ἐνδέχεται παρωνύμως ἀπ' αὐτῶν λέγεσθαι· οἷον ὁ δρομικὸς ἢ ὁ πυκτικὸς ὁ κατὰ δύνάμιν φυσικὴν λεγόμενος ἀπ' οὐδεμιᾶς ποιότητος [10b] παρωνύμως λέγεται· οὐ γὰρ κεῖται ὀνόματα ταῖς δυνάμεσι καθ' ἃς οὗτοι ποιοὶ λέγονται, ὥσπερ καὶ ταῖς ἐπιστήμαις καθ' ἃς πυκτικοὶ ἢ παλαιστρικοὶ οἱ κατὰ διάθεσιν λέγονται, — πυκτικὴ γὰρ ἐπιστήμη λέγεται καὶ παλαιστρική, ποιοὶ δὲ ἀπὸ τούτων παρωνύμως οἱ

διακείμενοι λέγονται. — ἐνίστε δὲ καὶ ὀνόματος κειμένου οὐ λέγεται παρωνύμως τὸ κατ' αὐτὴν ποιὸν λεγόμενον, οἷον ἀπὸ τῆς ἀρετῆς ὁ σπουδαῖος· τῷ γὰρ ἀρετὴν ἔχειν σπουδαῖος λέγεται, ἀλλ' οὐ παρωνύμως ἀπὸ τῆς ἀρετῆς· οὐκ ἐπὶ πολλῶν δὲ τὸ τοιοῦτόν ἐστιν. ποιά οὖν λέγεται τὰ παρωνύμως ἀπὸ τῶν εἰρημένων ποιότητων λεγόμενα ἢ ὅπως οὖν ἄλλως ἀπ' αὐτῶν.

Ὑπάρχει δὲ καὶ ἐναντιότης κατὰ τὸ ποιόν, οἷον δικαιοσύνη ἀδικία ἐναντίον καὶ λευκότης μελανία καὶ τᾶλλα ὡσαύτως, καὶ τὰ κατ' αὐτάς δὲ ποιά λεγόμενα, οἷον τὸ ἄδικον τῷ δικαίῳ καὶ τὸ λευκὸν τῷ μέλανι. οὐκ ἐπὶ πάν — των δὲ τὸ τοιοῦτον· τῷ γὰρ πυρρῷ ἢ ὥχρῳ ἢ ταῖς τοιαύταις χροιαῖς οὐδὲν ἐστὶν ἐναντίον ποιοῖς οὓσιν. — ἔτι ἐὰν τῶν ἐναντίων θάτερον ἢ ποιόν, καὶ τὸ λοιπὸν ἔσται ποιόν. τοῦτο δὲ δῆλον προχειρίζομένῳ τὰς ἄλλας κατηγορίας, οἷον εἰ ἔστιν ἡ δικαιοσύνη τῇ ἀδικίᾳ ἐναντίον, ποιὸν δὲ ἡ δικαιοσύνη, ποιὸν ἄρα καὶ ἡ ἀδικία· οὐδεμία γὰρ τῶν ἄλλων κατηγοριῶν ἐφαρμόζει τῇ ἀδικίᾳ, οὔτε ποσὸν οὔτε πρὸς τι οὔτε πού, οὐδ' ὅλως τι τῶν τοιούτων οὐδὲν ἀλλ' ἢ ποιόν· ὡσαύτως δὲ καὶ ἐπὶ τῶν ἄλλων κατὰ τὸ ποιὸν ἐναντίων.

Ἐπιδέχεται δὲ καὶ τὸ μᾶλλον καὶ τὸ ἥττον τὰ ποιά· λευκὸν γὰρ μᾶλλον καὶ ἥττον ἕτερον ἐτέρου λέγεται, καὶ δίκαιον ἕτερον ἐτέρου μᾶλλον. καὶ αὐτὸ δὲ ἐπίδοσιν λαμβάνει, — λευκὸν γὰρ ὃν ἔτι ἐνδέχεται λευκότερον γενέσθαι· — οὐ πάντα δέ, ἀλλὰ τὰ πλεῖστα· δικαιοσύνη γὰρ δικαιοσύνης εἰ λέγεται μᾶλλον ἀπορήσειεν ἂν τις, ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων διαθέσεων. ἐνιοὶ γὰρ διαμφισβητοῦσι περὶ τῶν τοιούτων· δικαιοσύνην μὲν γὰρ δικαιοσύνης οὐ πάνυ φασὶ μᾶλλον καὶ ἥττον λέγεσθαι, οὐδὲ ὑγίειαν ὑγείας, ἥττον μέντοι ἔχειν ἕτερον ἐτέρου ὑγείαν φασι, καὶ [11a] δικαιοσύνην ἥττον ἕτερον ἐτέρου, ὡσαύτως δὲ καὶ γραμματικὴν καὶ τὰς ἄλλας διαθέσεις. ἀλλ' οὖν τά γε κατὰ ταύτας λεγόμενα ἀναμφισβητήτως ἐπιδέχεται τὸ μᾶλλον καὶ ἥττον· γραμματικώτερος γὰρ ἕτερος ἐτέρου λέγεται καὶ δικαιοτέρος καὶ ὑγιεινότερος, καὶ ἐπὶ τῶν ἄλλων ὡσαύτως. τρίγωνον δὲ καὶ τετράγωνον οὐ δοκεῖ τὸ μᾶλλον ἐπιδέχεσθαι, οὐδὲ τῶν ἄλλων σχημάτων οὐδέν· τὰ μὲν γὰρ ἐπιδεχόμενα τὸν τοῦ τριγώνου λόγον καὶ τὸν τοῦ κύκλου πάνθ' ὁμοίως τρίγωνα ἢ κύκλοι εἰσὶν, τῶν δὲ μὴ ἐπιδεχομένων οὐδὲν ἕτερον ἐτέρου μᾶλλον ρηθήσεται· οὐδὲν γὰρ μᾶλλον τὸ τετράγωνον τοῦ ἔτε — ρομήκους κύκλος ἐστίν· οὐδέτερον γὰρ ἐπιδέχεται τὸν τοῦ κύκλου λόγον. ἀπλῶς δέ, ἐὰν μὴ

ἐπιδέχεται ἀμφοτέρα τὸν τοῦ προκειμένου λόγον, οὐ ῥηθήσεται τὸ ἕτερον τοῦ ἑτέρου μᾶλλον. οὐ πάντα οὖν τὰ ποιὰ ἐπιδέχεται τὸ μᾶλλον καὶ τὸ ἥττον.

Τῶν μὲν οὖν εἰρημένων οὐδὲν ἴδιον ποιότητος, ὅμοια δὲ καὶ ἀνόμοια κατὰ μόνας τὰς ποιότητας λέγεται· ὅμοιον γὰρ ἕτερον ἐτέρῳ οὐκ ἔστι κατ' ἄλλο οὐδὲν ἢ καθ' ὃ ποιόν ἐστιν. ὥστε ἴδιον ἂν εἴη ποιότητος τὸ ὅμοιον ἢ ἀνόμοιον λέγεσθαι κατ' αὐτήν.

Οὐ δεῖ δὲ ταράττεσθαι μή τις ἡμᾶς φήσῃ ὑπὲρ ποιότητος τὴν πρόθεσιν ποιησαμένους πολλὰ τῶν πρὸς τι συγκαταριθμεῖσθαι· τὰς γὰρ ἔξεις καὶ τὰς διαθέσεις τῶν πρὸς τι εἶναι. σχεδὸν γὰρ ἐπὶ πάντων τῶν τοιούτων τὰ γένη πρὸς τι λέγεται, τῶν δὲ καθ' ἕκαστα οὐδέν· ἢ μὲν γὰρ ἐπιστήμη, γένος οὔσα, αὐτὸ ὅπερ ἐστὶν ἑτέρου λέγεται, — τινὸς γὰρ ἐπιστήμη λέγεται. — τῶν δὲ καθ' ἕκαστα οὐδὲν αὐτὸ ὅπερ ἐστὶν ἑτέρου λέγεται, οἶον ἢ γραμματικὴ οὐ λέγεται τινὸς γραμματικὴ οὐδ' ἢ μουσικὴ τινὸς μουσικὴ, ἀλλ' εἰ ἄρα κατὰ τὸ γένος καὶ αὗται πρὸς τι λέγεται· οἶον ἢ γραμματικὴ λέγεται τινὸς ἐπιστήμη, οὐ τινὸς γραμματικὴ, καὶ ἢ μουσικὴ τινὸς ἐπιστήμη, οὐ τινὸς μουσικὴ· ὥστε αἱ καθ' ἕκαστα οὐκ εἰσὶ τῶν πρὸς τι. λεγόμεθα δὲ ποιοὶ ταῖς καθ' ἕκαστα· ταύτας γὰρ καὶ ἔχομεν, — ἐπιστήμονες γὰρ λεγόμεθα τῷ ἔχειν τῶν καθ' ἕκαστα ἐπιστημῶν τινά· — ὥστε αὗται ἂν καὶ ποιότητες εἴησαν αἱ καθ' ἕκαστα, καθ' ἃς ποτε καὶ ποιοὶ λεγόμεθα· αὗται δὲ οὐκ εἰσὶ τῶν πρὸς τι. — ἔτι εἰ τυγχάνει τὸ αὐτὸ ποιὸν καὶ πρὸς τι ὄν, οὐδὲν ἄτοπον ἐν ἀμφοτέροις τοῖς γένεσιν αὐτὸ καταριθμεῖσθαι. <.....>

Κεφάλαιο 9

Ἐπιδέχεται δὲ καὶ τὸ ποιεῖν καὶ πάσχειν ἐναντιό — τητα καὶ τὸ μᾶλλον καὶ τὸ ἥττον· τὸ γὰρ θερμαίνειν τῷ ψύχειν ἐναντίον καὶ τὸ θερμαίνεσθαι τῷ ψύχεσθαι καὶ τὸ ἥδεσθαι τῷ λυπεῖσθαι· ὥστε ἐπιδέχεται ἐναντιότητα. καὶ τὸ μᾶλλον δὲ καὶ τὸ ἥττον· θερμαίνειν γὰρ μᾶλλον καὶ ἥττον ἔστι, καὶ θερμαίνεσθαι μᾶλλον καὶ ἥττον, καὶ λυπεῖσθαι μᾶλλον καὶ ἥττον· ἐπιδέχεται οὖν τὸ μᾶλλον καὶ τὸ ἥττον τὸ ποιεῖν καὶ τὸ πάσχειν. <.....>

[Ἐπεὶ μὲν οὖν τούτων τοσαῦτα λέγεται· εἴρηται δὲ καὶ ὑπὲρ τοῦ κεῖσθαι ἐν τοῖς πρόσ τι, ὅτι παρωνύμως ἀπὸ τῶν θέσεων λέγεται. ὑπὲρ δὲ τῶν λοιπῶν, τοῦ τε ποτὲ καὶ τοῦ πού καὶ τοῦ ἔχειν, διὰ τὸ προφανῆ εἶναι οὐδὲν ὑπὲρ αὐτῶν ἄλλο λέγεται ἢ ὅσα ἐν ἀρχῇ ἐρρήθη, ὅτι τὸ ἔχειν μὲν σημαίνει τὸ ὑποδεδέσθαι, τὸ ὠπλίσθαι, τὸ δὲ πού οἶον ἐν Λυκείῳ, καὶ τὰ ἄλλα δὲ ὅσα ὑπὲρ αὐτῶν ἐρρήθη. — ὑπὲρ μὲν οὖν τῶν προτεθέντων γενῶν ἱκανὰ τὰ εἰρημένα· περὶ δὲ τῶν ἀντικειμένων, ποσαχῶς εἴωθε ἀντιτίθεσθαι, ρητέον.]

Κεφάλαιο 10

Λέγεται δὲ ἕτερον ἐτέρῳ ἀντικειῖσθαι τετραχῶς, ἢ ὡς τὰ πρὸς τι, ἢ ὡς τὰ ἐναντία, ἢ ὡς στέρησις καὶ ἕξις, ἢ ὡς κατάφασις καὶ ἀπόφασις. ἀντίκειται δὲ ἕκαστον τῶν τοιούτων, ὡς τύπῳ εἰπεῖν, ὡς μὲν τὰ πρὸς τι οἶον τὸ διπλάσιον τῷ ἡμίσει, ὡς δὲ τὰ ἐναντία οἶον τὸ κακὸν τῷ ἀγαθῷ, ὡς δὲ κατὰ στέρησιν καὶ ἕξιν οἶον τυφλότης καὶ ὄψις, ὡς δὲ κατάφασις καὶ ἀπόφασις οἶον κάθηται — οὐ κάθηται.

Ὅσα μὲν οὖν ὡς τὰ πρὸς τι ἀντίκειται αὐτὰ ἅπερ ἐστὶ τῶν ἀντικειμένων λέγεται ἢ ὁπωσοῦν ἄλλως πρὸς αὐτά· οἶον τὸ διπλάσιον τοῦ ἡμίσεος αὐτὸ ὅπερ ἐστὶ διπλάσιον λέγεται· καὶ ἡ ἐπιστήμη δὲ τῷ ἐπιστητῷ ὡς τὰ πρὸς τι ἀντίκειται, καὶ λέγεται γε ἡ ἐπιστήμη αὐτὸ ὅπερ ἐστὶ τοῦ ἐπιστητοῦ· καὶ τὸ ἐπιστητὸν δὲ αὐτὸ ὅπερ ἐστὶ πρὸς τὸ ἀντικείμενον λέγεται τὴν ἐπιστήμην· τὸ γὰρ ἐπιστητὸν τινὶ λέγεται ἐπιστητὸν τῇ ἐπιστήμῃ.

Ὅσα οὖν ἀντίκειται ὡς τὰ πρὸς τι αὐτὰ ἅπερ ἐστὶ τῶν ἀντικειμένων ἢ ὁπωσδήποτε πρὸς ἄλληλα λέγεται· τὰ δὲ ὡς τὰ ἐναντία, αὐτὰ μὲν ἅπερ ἐστὶν οὐδαμῶς πρὸς ἄλληλα λέγεται, ἐναντία μέντοι ἀλλήλων λέγεται· οὔτε γὰρ τὸ ἀγαθὸν τοῦ κακοῦ λέγεται ἀγαθόν, ἀλλ' ἐναντίον, οὔτε τὸ λευκὸν τοῦ μέλανος λευκόν, ἀλλ' ἐναντίον. ὥστε διαφέρουσιν αὗται αἱ ἀντιθέσεις ἀλλήλων. — ὅσα δὲ τῶν ἐναντίων τοιαῦτά ἐστίν [12a] ὥστε ἐν οἷς πέφυκε γίγνεσθαι ἢ ὧν κατηγορεῖται ἀναγκαῖον αὐτῶν θάτερον ὑπάρχειν, τούτων οὐδὲν ἐστὶν ἀνὰ μέσον· [ὧν δέ γε μὴ ἀναγκαῖον θάτερον ὑπάρχειν, τούτων ἔστι τι ἀνὰ μέσον πάντως.] οἶον νόσος καὶ ὑγίεια ἐν σώματι ζῶον πέφυκε γίγνεσθαι, καὶ ἀναγκαῖόν γε θάτερον ὑπάρχειν τῷ τοῦ ζῶου σώματι ἢ νόσον ἢ ὑγίειαν· καὶ περιττὸν δὲ καὶ ἄρτιον ἀριθμοῦ κατηγορεῖται, καὶ ἀναγκαῖόν γε θάτερον τῷ ἀριθμῷ ὑπάρχειν ἢ περιττὸν ἢ ἄρτιον· καὶ οὐκ ἔστι γε τούτων οὐδὲν ἀνὰ μέσον, οὔτε νόσου καὶ ὑγείας οὔτε περιττοῦ καὶ ἀρτίου. ὧν δέ γε μὴ ἀναγκαῖον θάτερον ὑπάρχειν, τούτων ἔστι τι ἀνὰ μέσον· οἶον μέλαν καὶ λευκὸν ἐν σώματι πέφυκε γίγνεσθαι, καὶ οὐκ ἀναγκαῖόν γε θάτερον αὐτῶν ὑπάρχειν τῷ σώματι, — οὐ γὰρ πᾶν ἦτοι λευκὸν ἢ μέλαν ἐστίν· — καὶ φαῦλον δὲ καὶ σπουδαῖον κατηγορεῖται μὲν καὶ κατ' ἀνθρώπου καὶ κατ' ἄλλων πολλῶν, οὐκ ἀναγκαῖον δὲ θάτερον αὐτῶν ὑπάρχειν ἐκείνοις ὧν κατηγορεῖται· οὐ γὰρ πάντα ἦτοι φαῦλα ἢ σπουδαῖα

ἐστιν. καὶ ἔστι γέ τι τούτων ἀνὰ μέσον, οἷον τοῦ μὲν λευκοῦ καὶ τοῦ μέλανος τὸ φαιὸν καὶ ὠχρὸν καὶ ὅσα ἄλλα χρώματα, τοῦ δὲ φαύλου καὶ τοῦ σπουδαίου τὸ οὔτε φαῦλον οὔτε σπουδαῖον. ἐπ' ἐνίων μὲν οὖν ὀνόματα κεῖται τοῖς ἀνὰ μέσον, οἷον λευκοῦ καὶ μέλανος τὸ φαιὸν καὶ ὠχρὸν· ἐπ' ἐνίων δὲ ὀνόματι μὲν οὐκ εὐπορον τὸ ἀνὰ μέσον ἀποδοῦναι, τῇ δὲ ἐκατέρου τῶν ἄκρων ἀποφάσει τὸ ἀνὰ μέσον ὀρίζεται, οἷον τὸ οὔτε ἀγαθὸν οὔτε κακὸν καὶ οὔτε δίκαιον οὔτε ἄδικον.

Στέρησις δὲ καὶ ἕξις λέγεται μὲν περὶ ταυτὸν τι, οἷον ἡ ὄψις καὶ ἡ τυφλότης περὶ ὀφθαλμόν· καθόλου δὲ εἰπεῖν, ἐν ᾧ πέφυκεν ἡ ἕξις γίνεσθαι, περὶ τοῦτο λέγεται ἐκάτερον αὐτῶν. ἐστερηῆσθαι δὲ τότε λέγομεν ἕκαστον τῶν τῆς ἕξεως δεκτικῶν, ὅταν ἐν ᾧ πέφυκεν ὑπάρχειν καὶ ὅτε πέφυκεν ἔχειν μηδαμῶς ὑπάρχει· νωδὸν τε γὰρ λέγομεν οὐ τὸ μὴ ἔχον ὀδόντας, καὶ τυφλὸν οὐ τὸ μὴ ἔχον ὄψιν, ἀλλὰ τὸ μὴ ἔχον ὅτε πέφυκεν ἔχειν· τινὰ γὰρ ἐκ γενετῆς οὔτε ὄψιν οὔτε ὀδόντας ἔχει, ἀλλ' οὐ λέγεται νωδὰ οὐδὲ τυφλὰ. τὸ δὲ ἐστερηῆσθαι καὶ τὸ ἔχειν τὴν ἕξιν οὐκ ἔστι στέρησις καὶ ἕξις· ἕξις μὲν γὰρ ἐστὶν ἡ ὄψις, στέρησις δὲ ἡ τυφλότης, τὸ δὲ ἔχειν τὴν ὄψιν οὐκ ἔστιν ὄψις, οὐδὲ τὸ τυφλὸν εἶναι τυφλότης· στέρησις γὰρ τις ἡ τυφλότης ἐστίν, τὸ δὲ τυφλὸν εἶναι ἐστερηῆσθαι, οὐ στέρησις ἐστίν. ἔτι εἰ ἦν ἡ τυφλότης ταυτὸν τῷ τυφλὸν εἶναι, κατηγορεῖτο ἂν ἀμφοτέρω κατὰ τοῦ αὐτοῦ· ἀλλὰ τυφλὸς μὲν λέγεται ὁ ἄνθρωπος, τυφλότης [12b] δὲ ὁ ἄνθρωπος οὐδαμῶς λέγεται. ἀντικεῖσθαι δὲ καὶ ταῦτα δοκεῖ, τὸ ἐστερηῆσθαι καὶ τὸ τὴν ἕξιν ἔχειν ὡς στέρησις καὶ ἕξις· ὁ γὰρ τρόπος τῆς ἀντιθέσεως ὁ αὐτός· ὡς γὰρ ἡ τυφλότης τῇ ὄψει ἀντίκειται, οὕτω καὶ τὸ τυφλὸν εἶναι τῷ ὄψιν ἔχειν ἀντίκειται. (οὐκ ἔστι δὲ οὐδὲ τὸ ὑπὸ τὴν κατάφασιν καὶ ἀπόφασιν κατάφασις καὶ ἀπόφασις· ἡ μὲν γὰρ κατάφασις λόγος ἐστὶ καταφατικὸς καὶ ἡ ἀπόφασις λόγος ἀποφατικὸς, τῶν δὲ ὑπὸ τὴν κατάφασιν ἢ ἀπόφασιν οὐδέν ἐστι λόγος. λέγεται δὲ καὶ ταῦτα ἀντικεῖσθαι ἀλλήλοις ὡς κατάφασις καὶ ἀπόφασις· καὶ γὰρ ἐπὶ τούτων ὁ τρόπος τῆς ἀντιθέσεως ὁ αὐτός· ὡς γὰρ ποτε ἡ κατάφασις πρὸς τὴν ἀπόφασιν ἀντίκειται, οἷον τὸ κάθηται — οὐ κάθηται, οὕτω καὶ τὸ ὑφ' ἐκάτερον πρᾶγμα ἀντίκειται, τὸ καθῆσθαι — μὴ καθῆσθαι.) — ὅτι δὲ ἡ στέρησις καὶ ἡ ἕξις οὐκ ἀντίκειται ὡς τὰ πρὸς τι, φανερόν· οὐ γὰρ λέγεται αὐτὸ ὅπερ ἐστὶ τοῦ ἀντικειμένου· ἡ γὰρ ὄψις οὐκ ἔστι τυφλότητος ὄψις, οὐδ' ἄλλως οὐδαμῶς πρὸς αὐτὸ λέγεται· ὡσαύτως δὲ οὐδὲ ἡ τυφλότης λέγοιτ' ἂν

τυφλότης ὄψεως, ἀλλὰ στέρησις μὲν ὄψεως ἢ τυφλότης λέγεται, τυφλότης δὲ ὄψεως οὐ λέγεται. ἔτι τὰ πρὸς τι πάντα πρὸς ἀντιστρέφοντα λέγεται, ὥστε καὶ ἡ τυφλότης εἶπερ ἦν τῶν πρὸς τι, ἀντέστρεφεν ἂν κακεῖνο πρὸς ὃ λέγεται· ἀλλ' οὐκ ἀντιστρέφει· οὐ γὰρ λέγεται ἡ ὄψις τυφλότητος ὄψις.

Ὅτι δὲ οὐδ' ὥς τὰ ἐναντία ἀντίκειται τὰ κατὰ στέρησιν λεγόμενα καὶ ἕξιν ἐκ τῶνδε δῆλον. τῶν μὲν γὰρ ἐναντίων, ὧν μηδὲν ἐστὶν ἀνὰ μέσον, ἀναγκαῖον, ἐν οἷς πέφυκε γίγνεσθαι ἢ ὧν κατηγορεῖται, θάτερον αὐτῶν ὑπάρχειν ἀεὶ· τούτων γὰρ οὐδὲν ἦν ἀνὰ μέσον, ὧν θάτερον ἀναγκαῖον ἦν τῷ δεκτικῷ ὑπάρχειν, οἷον ἐπὶ νόσου καὶ ὑγείας καὶ περιττοῦ καὶ ἄρτιου· ὧν δὲ ἐστὶ τι ἀνὰ μέσον, οὐδέποτε ἀνάγκη παντὶ ὑπάρχειν θάτερον· οὔτε γὰρ λευκὸν ἢ μέλαν ἀνάγκη πᾶν εἶναι τὸ δεκτικόν, οὔτε θερμὸν ἢ ψυχρόν, — τούτων γὰρ ἀνὰ μέσον τι οὐδὲν κωλύει ὑπάρχειν· — ἔτι δὲ καὶ τούτων ἦν τι ἀνὰ μέσον ὧν μὴ ἀναγκαῖον ἦν θάτερον ὑπάρχειν τῷ δεκτικῷ, εἰ μὴ οἷς φύσει τὸ ἐν ὑπάρχει, οἷον τῷ πυρὶ τὸ θερμῷ εἶναι καὶ τῇ χιόνι τὸ λευκῇ· — ἐπὶ δὲ τούτων ἀφωρισμένως ἀναγκαῖον θάτερον ὑπάρχειν, καὶ οὐχ ὁπότερον ἔτυχεν· οὐ γὰρ ἐνδέχεται τὸ πῦρ ψυχρὸν εἶναι οὐδὲ τὴν χιόνα μέλαιναν· — ὥστε παντὶ μὲν οὐκ ἀνάγκη [13a] τῷ δεκτικῷ θάτερον αὐτῶν ὑπάρχειν, ἀλλὰ μόνον οἷς φύσει τὸ ἐν ὑπάρχει, καὶ τούτοις ἀφωρισμένως τὸ ἐν καὶ οὐχ ὁπότερον ἔτυχεν. ἐπὶ δὲ τῆς στερήσεως καὶ τῆς ἕξεως οὐδέ — τερον τῶν εἰρημένων ἀληθές· οὐδὲ γὰρ ἀεὶ τῷ δεκτικῷ ἀναγκαῖον θάτερον αὐτῶν ὑπάρχειν, — τὸ γὰρ μήπω πεφυκὸς ὄψιν ἔχειν οὔτε τυφλὸν οὔτε ὄψιν ἔχειν λέγεται, ὥστε οὐκ ἂν εἴη ταῦτα τῶν τοιούτων ἐναντίων ὧν οὐδὲν ἐστὶν ἀνὰ μέσον· — ἀλλ' οὐδὲ ὧν τι ἐστὶν ἀνὰ μέσον· ἀναγκαῖον γὰρ ποτε παντὶ τῷ δεκτικῷ θάτερον αὐτῶν ὑπάρχειν· ὅταν γὰρ ἤδη πεφυκὸς ἢ ἔχειν ὄψιν, τότε ἢ τυφλὸν ἢ ἔχον ὄψιν ῥηθήσεται, καὶ τούτων οὐκ ἀφωρισμένως θάτερον, ἀλλ' ὁπότερον ἔτυχεν, — οὐ γὰρ ἀναγκαῖον ἢ τυφλὸν ἢ ὄψιν ἔχον εἶναι, ἀλλ' ὁπότερον ἔτυχεν· — ἐπὶ δὲ γε τῶν ἐναντίων, ὧν ἐστὶν ἀνὰ μέσον τι, οὐδέποτε ἀναγκαῖον ἦν παντὶ θάτερον ὑπάρχειν, ἀλλὰ τισίν, καὶ τούτοις ἀφωρισμένως τὸ ἐν. ὥστε δῆλον ὅτι κατ' οὐδέτερον τῶν τρόπων ὡς τὰ ἐναντία ἀντίκειται τὰ κατὰ στέρησιν καὶ ἕξιν ἀντικείμενα. — ἔτι ἐπὶ μὲν τῶν ἐναντίων ὑπάρχοντος τοῦ δεκτικοῦ δυνατόν εἰς ἄλληλα μεταβολὴν γενέσθαι, εἰ μὴ τι φύσει τὸ ἐν ὑπάρχει, οἷον τῷ πυρὶ τὸ θερμῷ εἶναι· καὶ γὰρ τὸ ὑγιαῖνον δυνατόν νοσῆσαι καὶ τὸ λευκὸν μέλαν γενέσθαι καὶ τὸ

ψυχρὸν θερμόν, καὶ ἐκ σπουδαίου γε φαῦλον καὶ ἐκ φαύλου σπουδαῖον δυνατόν γενέσθαι· — ὁ γὰρ φαῦλος εἰς βελτίους διατριβὰς ἀγόμενος καὶ λόγους κἂν μικρόν γέ τι ἐπιδοίῃ εἰς τὸ βελτίω εἶναι· ἐὰν δὲ ἅπαξ κἂν μικρὰν ἐπίδοσιν λάβῃ, φανερόν ὅτι ἡ τελείως ἂν μεταβάλῃ ἢ πάνυ πολλὴν ἂν ἐπίδοσιν λάβῃ· αἰ γὰρ εὐκίνητοτερος πρὸς ἀρετὴν γίγνεται, κἂν ἡντινοῦν ἐπίδοσιν εἰληφώς ἐξ ἀρχῆς ἦ, ὥστε καὶ πλείω εἰκὸς ἐπίδοσιν λαμβάνειν· καὶ τοῦτο αἰ γιγνόμενον τελείως εἰς τὴν ἐναντίαν ἔξιν ἀποκαθίστησιν, ἐάνπερ μὴ χρόνῳ ἐξείρηται· — ἐπὶ δέ γε τῆς στερήσεως καὶ τῆς ἔξεως ἀδύνατον εἰς ἄλληλα μεταβολὴν γενέσθαι· ἀπὸ μὲν γὰρ τῆς ἔξεως ἐπὶ τὴν στέρησιν γίγνεται μεταβολή, ἀπὸ δὲ τῆς στερήσεως ἐπὶ τὴν ἔξιν ἀδύνατον· οὔτε γὰρ τυφλὸς γενόμενός τις πάλιν ἔβλεπεν, οὔτε φαλακρὸς ὢν κομήτης ἐγένετο, οὔτε νωδὸς ὢν ὀδόντας ἔφυσεν.

Ὅσα δὲ ὡς κατάφασις καὶ ἀπόφασις ἀντίκειται, [13b] φανερόν ὅτι κατ' οὐδένα τῶν εἰρημένων τρόπων ἀντίκειται· ἐπὶ μόνων γὰρ τούτων ἀναγκαῖον αἰ τὸ μὲν ἀληθὲς τὸ δὲ ψεῦδος αὐτῶν εἶναι. οὔτε γὰρ ἐπὶ τῶν ἐναντίων ἀναγκαῖον αἰ θάτερον μὲν ἀληθὲς εἶναι θάτερον δὲ ψεῦδος, οὔτε ἐπὶ τῶν πρὸς τι, οὔτε ἐπὶ τῆς ἔξεως καὶ στερήσεως· οἷον ὑγίεια καὶ νόσος ἐναντία, καὶ οὐδέτερόν γε οὔτε ἀληθὲς οὔτε ψεῦδος ἐστίν· ὡσαύτως δὲ καὶ τὸ διπλάσιον καὶ τὸ ἥμισυ ὡς τὰ πρὸς τι ἀντίκειται, καὶ οὐκ ἔστιν αὐτῶν οὐδέτερον οὔτε ἀληθὲς οὔτε ψεῦδος· οὐδὲ γε τὰ κατὰ στέρησιν καὶ ἔξιν, οἷον ἡ ὄψις καὶ ἡ τυφλότης· ὅλως δὲ τῶν κατὰ μηδεμίαν συμπλοκὴν λεγομένων οὐδὲν οὔτε ἀληθὲς οὔτε ψεῦδος ἐστίν· πάντα δὲ τὰ εἰρημένα ἄνευ συμπλοκῆς λέγεται. οὐ μὴν ἀλλὰ μάλιστα δόξειεν ἂν τὸ τοιοῦτο συμβαίνειν ἐπὶ τῶν κατὰ συμπλοκὴν ἐναντίων λεγομένων, — τὸ γὰρ ὑγιαίνειν Σωκράτῃ τῷ νοσεῖν Σωκράτῃ ἐναντίον ἐστίν, — ἀλλ' οὐδ' ἐπὶ τούτων ἀναγκαῖον αἰ θάτερον μὲν ἀληθὲς θάτερον δὲ ψεῦδος εἶναι· ὄντος μὲν γὰρ Σωκράτους ἔσται τὸ μὲν ἀληθὲς τὸ δὲ ψεῦδος, μὴ ὄντος δὲ ἀμφοτέρα ψευδῆ· οὔτε γὰρ τὸ νοσεῖν Σωκράτῃ οὔτε τὸ ὑγιαίνειν ἀληθὲς αὐτοῦ μὴ ὄντος ὅλως τοῦ Σωκράτους. ἐπὶ δὲ τῆς στερήσεως καὶ τῆς ἔξεως μὴ ὄντος γε ὅλως οὐδέτερον ἀληθὲς, ὄντος δὲ οὐκ αἰ θάτερον ἀληθές· τὸ γὰρ ὄψιν ἔχειν Σωκράτῃ τῷ τυφλὸν εἶναι Σωκράτῃ ἀντίκειται ὡς στέρησις καὶ ἔξις, καὶ ὄντος γε οὐκ ἀναγκαῖον θάτερον ἀληθὲς εἶναι ἢ ψεῦδος, — ὅτε γὰρ μήπω πέφυκεν ἔχειν, ἀμφοτέρα ψευδῆ, — μὴ ὄντος δὲ ὅλως τοῦ Σωκράτους καὶ οὕτω ψευδῆ ἀμφοτέρα, καὶ τὸ ὄψιν αὐτὸν ἔχειν καὶ τὸ τυφλὸν εἶναι.

ἐπὶ δέ γε τῆς καταφάσεως καὶ τῆς ἀποφάσεως αἰεί, ἐάν τε ἢ ἐάν τε μὴ ἢ, τὸ μὲν ἕτερον ἔσται ψεῦδος τὸ δὲ ἕτερον ἀληθές· τὸ γὰρ νοσεῖν Σωκράτη καὶ τὸ μὴ νοσεῖν Σωκράτη, ὄντος τε αὐτοῦ φανερόν ὅτι τὸ ἕτερον αὐτῶν ἀληθές ἢ ψεῦδος, καὶ μὴ ὄντος ὁμοίως· τὸ μὲν γὰρ νοσεῖν μὴ ὄντος ψεῦδος, τὸ δὲ μὴ νοσεῖν ἀληθές· ὥστε ἐπὶ μόνων τούτων ἴδιον ἂν εἴη τὸ αἰεὶ θάτερον αὐτῶν ἀληθές ἢ ψεῦδος εἶναι, ὅσα ὡς κατάφασις καὶ ἀπόφασις ἀντίκειται.

Κεφάλαιο 11

Ἐναντίον δέ ἐστιν ἀγαθὸν μὲν ἐξ ἀνάγκης κακόν, — τοῦτο δὲ δῆλον τῇ καθ' ἑκάστον ἐπαγωγῇ, οἷον ὑγεία νόσος καὶ δικαιοσύνη [14a] ἀδικία καὶ ἀνδρεία δειλία, ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων, — κακὸν δὲ ὅτε μὲν ἀγαθὸν ἐναντίον ἐστίν, ὅτε δὲ κακόν· τῇ γὰρ ἐνδεία κακῶ ὄντι ἢ ὑπερβολὴ ἐναντίον κακὸν ὄν· ὁμοίως δὲ καὶ ἡ μεσότης ἐναντία ἐκατέρω οὔσα ἀγαθόν. ἐπ' ὀλίγων δ' ἂν τὸ τοιοῦτον ἴδοι τις, ἐπὶ δὲ τῶν πλείστων αἰὶ τῷ κακῷ τὸ ἀγαθὸν ἐναντίον ἐστίν. — ἔτι τῶν ἐναντίων οὐκ ἀναγκαῖον, ἐὰν θάτερον ἦ, καὶ τὸ λοιπὸν εἶναι· ὑγιαίνοντων γὰρ ἀπάντων ὑγεία μὲν ἔσται, νόσος δὲ οὐ· ὁμοίως δὲ καὶ λευκῶν ὄντων ἀπάντων λευκότης μὲν ἔσται, μελανία δὲ οὐ. ἔτι εἰ τὸ Σωκράτη ὑγιαίνειν τῷ Σωκράτη νοσεῖν ἐναντίον ἐστίν, μὴ ἐνδέχεται δὲ ἅμα ἀμφοτέρω τῷ αὐτῷ ὑπάρχειν, οὐκ ἂν ἐνδέχοιτο τοῦ ἐτέρου τῶν ἐναντίων ὄντος καὶ τὸ λοιπὸν εἶναι· ὄντος γὰρ τοῦ Σωκράτη ὑγιαίνειν οὐκ ἂν εἴη τὸ νοσεῖν Σωκράτη.

Δῆλον δὲ ὅτι καὶ περὶ ταῦτόν ἡ εἶδει ἡ γένει πέφυκε γίγνεσθαι τὰ ἐναντία· νόσος μὲν γὰρ καὶ ὑγεία ἐν σώματι ζῶον, λευκότης δὲ καὶ μελανία ἀπλῶς ἐν σώματι, δικαιοσύνη δὲ καὶ ἀδικία ἐν ψυχῇ. ἀνάγκη δὲ πάντα τὰ ἐναντία ἢ ἐν τῷ αὐτῷ γένει εἶναι ἢ ἐν τοῖς ἐναντίοις γένεσιν, ἢ αὐτὰ γένη εἶναι· λευκὸν μὲν γὰρ καὶ μέλαν ἐν τῷ αὐτῷ γένει, — χρῶμα γὰρ αὐτῶν τὸ γένος, — δικαιοσύνη δὲ καὶ ἀδικία ἐν τοῖς ἐναντίοις γένεσιν, — τοῦ μὲν γὰρ ἀρετῇ, τοῦ δὲ κακία τὸ γένος, — ἀγαθὸν δὲ καὶ κακὸν οὐκ ἔστιν ἐν γένει, ἀλλ' αὐτὰ τυγχάνει γένη τινῶν ὄντα.

Κεφάλαιο 12

Πρότερον ἕτερον ἐτέρου λέγεται τετραχῶς· πρῶτον μὲν καὶ κυριώτατα κατὰ χρόνον, καθ' ὃ πρεσβύτερον ἕτερον ἐτέρου καὶ παλαιότερον λέγεται, — τῷ γὰρ τὸν χρόνον πλείω εἶναι καὶ πρεσβύτερον καὶ παλαιότερον λέγεται· — δεύτερον δὲ τὸ μὴ ἀντιστρέφον κατὰ τὴν τοῦ εἶναι ἀκολουθήσιν, οἷον τὸ ἐν τῶν δύο πρότερον· δυεῖν μὲν γὰρ ὄντων ἀκολουθεῖ εὐθὺς τὸ ἐν εἶναι, ἐνὸς δὲ ὄντος οὐκ ἀναγκαῖον δύο εἶναι, ὥστε οὐκ ἀντιστρέφει ἀπὸ τοῦ ἐνὸς ἢ ἀκολουθήσιν τοῦ εἶναι τὸ λοιπόν, πρότερον δὲ δοκεῖ τὸ τοιοῦτον εἶναι ἀφ' οὗ μὴ ἀντιστρέφει ἢ τοῦ εἶναι ἀκολουθήσιν. τρίτον δὲ κατὰ τινα τάξιν πρότερον λέγεται, καθάπερ ἐπὶ τῶν ἐπιστημῶν καὶ τῶν λόγων· ἐν τε γὰρ ταῖς ἀποδεικτικαῖς ἐπιστήμαις ὑπάρχει τὸ πρότερον καὶ τὸ ὕστερον τῇ τάξει, — τὰ γὰρ στοιχεῖα πρότερα τῶν [14b] διαγραμμαμάτων τῇ τάξει, καὶ ἐπὶ τῆς γραμματικῆς τὰ στοιχεῖα πρότερα τῶν συλλαβῶν, — ἐπὶ τε τῶν λόγων ὁμοίως, — τὸ γὰρ προοίμιον τῆς διηγήσεως πρότερον τῇ τάξει ἐστίν. — ἔτι παρὰ τὰ εἰρημένα τὸ βέλτιον καὶ τὸ τιμιώτερον πρότερον εἶναι τῇ φύσει δοκεῖ· εἰώθασι δὲ καὶ οἱ πολλοὶ τοὺς ἐντιμότερους καὶ μᾶλλον ἀγαπωμένους ὑπ' αὐτῶν προτέρους φάσκειν εἶναι· ἔστι μὲν δὴ σχεδὸν ἀλλοτριώτατος τῶν τρόπων οὗτος.

Οἱ μὲν οὖν λεγόμενοι τοῦ προτέρου τρόποι τοσοῦτοί εἰσιν. δόξειε δ' ἂν καὶ παρὰ τοὺς εἰρημένους ἕτερος εἶναι προτέρου τρόπος· τῶν γὰρ ἀντιστρεφόντων κατὰ τὴν τοῦ εἶναι ἀκολουθήσιν τὸ αἴτιον ὁπωσοῦν θατέρῳ τοῦ εἶναι πρότερον εἰκότως φύσει λέγοιτ' ἂν. ὅτι δ' ἔστι τινὰ τοιαῦτα, δηλόν· τὸ γὰρ εἶναι ἄνθρωπον ἀντιστρέφει κατὰ τὴν τοῦ εἶ — ναι ἀκολουθήσιν πρὸς τὸν ἀληθῆ περι αὐτοῦ λόγον· εἰ γὰρ ἔστιν ἄνθρωπος, ἀληθὴς ὁ λόγος ᾧ λέγομεν ὅτι ἔστιν ἄνθρωπος· καὶ ἀντιστρέφει γε, — εἰ γὰρ ἀληθὴς ὁ λόγος ᾧ λέγομεν ὅτι ἔστιν ἄνθρωπος, ἔστιν ἄνθρωπος· — ἔστι δὲ ὁ μὲν ἀληθὴς λόγος οὐδαμῶς αἴτιος τοῦ εἶναι τὸ πρᾶγμα, τὸ μέντοι πρᾶγμα φαίνεται πως αἴτιον τοῦ εἶναι ἀληθῆ τὸν λόγον· τῷ γὰρ εἶναι τὸ πρᾶγμα ἢ μὴ ἀληθὴς ὁ λόγος ἢ ψευδὴς λέγεται. ὥστε κατὰ πέντε τρόπους πρότερον ἕτερον ἐτέρου λέγοιτ' ἂν.

Κεφάλαιο 13

Ἄμα δὲ λέγεται ἀπλῶς μὲν καὶ κυριώτατα ὧν ἡ γένεσις ἐν τῷ αὐτῷ χρόνῳ· οὐδέτερον γὰρ πρότερον οὐδὲ ὕστερόν ἐστιν· ἅμα δὲ κατὰ τὸν χρόνον ταῦτα λέγεται. φύσει δὲ ἅμα ὅσα ἀντιστρέφει μὲν κατὰ τὴν τοῦ εἶναι ἀκολουθήσιν, μηδαμῶς δὲ αἴτιον θάτερον θατέρῳ τοῦ εἶναι ἐστιν, οἷον ἐπὶ τοῦ διπλασίου καὶ τοῦ ἡμίσεος· ἀντιστρέφει μὲν γὰρ ταῦτα, — διπλασίου γὰρ ὄντος ἐστὶν ἡμισυ, καὶ ἡμίσεος ὄντος διπλάσιόν ἐστιν, — οὐδέτερον δὲ οὐδετέρῳ αἴτιον τοῦ εἶναι ἐστιν. καὶ τὰ ἐκ τοῦ αὐτοῦ γένους ἀντιδιηρημένα ἀλλήλοις ἅμα τῇ φύσει λέγεται. ἀντιδιηρησθαι δὲ λέγεται ἀλλήλοις τὰ κατὰ τὴν αὐτὴν διαίρεσιν, οἷον τὸ πτηνὸν τῷ πεζῷ καὶ τῷ ἐνύδρῳ· ταῦτα γὰρ ἀλλήλοις ἀντιδιήρηται ἐκ τοῦ αὐτοῦ γένους ὄντα· τὸ γὰρ ζῷον διαιρεῖται εἰς ταῦτα, εἷς τε τὸ πτηνὸν καὶ τὸ πεζὸν καὶ τὸ ἐνύδρον, καὶ οὐδέν γε τούτων πρότερον ἢ ὕστερόν ἐστιν, ἀλλ' ἅμα τῇ φύσει τὰ [15a] τοιαῦτα δοκεῖ εἶναι· (διαιρεθείη δ' ἂν καὶ ἕκαστον τούτων εἰς εἶδη πάλιν, οἷον τὸ πεζὸν καὶ τὸ πτηνὸν καὶ τὸ ἐνύδρον.) ἔσται οὖν κακεῖνα ἅμα τῇ φύσει, ὅσα ἐκ τοῦ αὐτοῦ γένους κατὰ τὴν αὐτὴν διαίρεσιν ἐστιν· τὰ δὲ γένη τῶν εἰδῶν αἰεὶ πρότερα· οὐ γὰρ ἀντιστρέφει κατὰ τὴν τοῦ εἶναι ἀκολουθήσιν· οἷον ἐνύδρου μὲν ὄντος ἔστι ζῷον, ζῶου δὲ ὄντος οὐκ ἀνάγκη ἐνύδρον εἶναι. — ἅμα οὖν τῇ φύσει λέγεται ὅσα ἀντιστρέφει μὲν κατὰ τὴν τοῦ εἶναι ἀκολουθήσιν, μηδαμῶς δὲ αἴτιον τὸ ἕτερον τῷ ἑτέρῳ τοῦ εἶναι ἐστιν, καὶ τὰ ἐκ τοῦ αὐτοῦ γένους ἀντιδιηρημένα ἀλλήλοις· ἀπλῶς δὲ ἅμα, ὧν ἡ γένεσις ἐν τῷ αὐτῷ χρόνῳ.

Κεφάλαιο 14

Κινήσεως δέ ἐστιν εἶδη ἕξ· γένεσις, φθορά, αὔξησις, μείωσις, ἀλλοίωσις, κατὰ τόπον μεταβολή. αἱ μὲν οὖν ἄλλαι κινήσεις φανερόν ὅτι ἕτεραι ἀλλήλων εἰσίν· οὐ γάρ ἐστιν ἡ γένεσις φθορά οὐδὲ γε ἡ αὔξησις μείωσις οὐδὲ ἡ κατὰ τόπον μεταβολή, ὡσαύτως δὲ καὶ αἱ ἄλλαι· ἐπὶ δὲ τῆς ἀλλοιώσεως ἔχει τινὰ ἀπορίαν, μήποτε ἀναγκαῖον ἢ τὸ ἀλλοιούμενον κατὰ τινὰ τῶν λοιπῶν κινήσεων ἀλλοιοῦσθαι. τοῦτο δὲ οὐκ ἀληθές ἐστιν· σχεδὸν γὰρ κατὰ πάντα τὰ πάθη ἢ τὰ πλεῖστα ἀλλοιοῦσθαι συμβέβηκεν ἡμῖν οὐδεμιᾶς τῶν ἄλλων κινήσεων κοινωνοῦσιν· οὔτε γὰρ αὔξεσθαι ἀναγκαῖον τὸ κατὰ πάθος κινούμενον οὔτε μειοῦσθαι, ὡσαύτως δὲ καὶ ἐπὶ τῶν ἄλλων, ὥσθ' ἑτέρα ἂν εἴη παρὰ τὰς ἄλλας κινήσεις ἡ ἀλλοίωσις· εἰ γὰρ ἦν ἡ αὐτή, ἔδει τὸ ἀλλοιούμενον εὐθὺς καὶ αὔξεσθαι ἢ μειοῦσθαι ἢ τινὰ τῶν ἄλλων ἀκολουθεῖν κινήσεων· ἀλλ' οὐκ ἀνάγκη. ὡσαύτως δὲ καὶ τὸ αὐξόμενον ἢ τινὰ ἄλλην κίνησιν κινούμενον ἀλλοιοῦσθαι· ἀλλ' ἔστι τινὰ αὐξανόμενα ἃ οὐκ ἀλλοιοῦνται· οἷον τὸ τετράγωνον γνώμονος περιτεθέντος ηὔξεται μὲν, ἀλλοιότερον δὲ οὐδὲν γεγένηται· ὡσαύτως δὲ καὶ ἐπὶ τῶν ἄλλων τῶν τοιούτων. ὥσθ' ἕτεραι ἂν εἴησαν αἱ κινήσεις ἀλλήλων. [15b]

Ἔστι δὲ ἀπλῶς μὲν κίνησις ἡρεμία ἐναντίον· ταῖς δὲ καθ' ἕκαστα, γενέσει μὲν φθορά, αὐξήσει δὲ μείωσις· τῇ δὲ κατὰ τόπον μεταβολῇ ἢ κατὰ τόπον ἡρεμία μάλιστα ἔοικεν ἀντικεῖσθαι, καὶ εἰ ἄρα ἡ εἰς τὸν ἐναντίον τόπον μεταβολή, οἷον τῇ κάτωθεν ἢ ἄνω, τῇ ἄνωθεν ἢ κάτω. τῇ δὲ λοιπῇ τῶν ἀποδοθεισῶν κινήσεων οὐ ῥάδιον ἀποδοῦναι τί ποτέ ἐστιν ἐναντίον, ἔοικε δὲ οὐδὲν εἶναι αὐτῇ ἐναντίον, εἰ μὴ τις καὶ ἐπὶ ταύτης τὴν κατὰ τὸ ποιὸν ἡρεμίαν ἀντιθεῖν <ἦ> τῇ<v> εἰς τὸ ἐναντίον τοῦ ποιοῦ μεταβολή<v>, καθάπερ καὶ ἐπὶ τῆς κατὰ τόπον μεταβολῆς τὴν κατὰ τόπον ἡρεμίαν ἢ τὴν εἰς τὸ ἐναντίον τόπον μεταβολήν, — ἔστι γὰρ ἡ ἀλλοίωσις μεταβολή κατὰ τὸ ποιόν· — ὥστε ἀντίκειται τῇ <κατὰ τὸ ποιὸν κινήσει ἢ> κατὰ τὸ ποιὸν ἡρεμία <ἦ> ἢ εἰς τὸ ἐναντίον τοῦ ποιοῦ μεταβολή, οἷον τὸ λευκὸν γίγνεσθαι τῷ μέλαν γίγνεσθαι· ἀλλοιοῦται γὰρ εἰς τὰ ἐναντία τοῦ ποιοῦ μεταβολῆς γιγνομένης.

Κεφάλαιο 15

Τὸ ἔχειν κατὰ πλείονας τρόπους λέγεται· ἢ γὰρ ὥς ἔξιν καὶ διάθεσιν ἢ ἄλλην τινὰ ποιότητα, — λεγόμεθα γὰρ ἐπιστήμην ἔχειν καὶ ἀρετήν· — ἢ ὥς ποσόν, οἷον ὃ τυγχάνει τις ἔχων μέγεθος, — λέγεται γὰρ τρίπηχυ μέγεθος ἔχειν ἢ τετράπηχυ· — ἢ ὥς τὰ περὶ τὸ σῶμα, οἷον ἱμάτιον ἢ χιτῶνα· ἢ ὥς ἐν μορίῳ, οἷον ἐν χειρὶ δακτύλιον· ἢ ὥς μέρος, οἷον χεῖρα ἢ πόδα· ἢ ὥς ἐν ἀγγείῳ, οἷον ὁ μέδιμνος τοὺς πυροὺς ἢ τὸ κεράμιον τὸν οἶνον, — οἶνον γὰρ ἔχειν τὸ κεράμιον λέγεται, καὶ ὁ μέδιμνος πυρούς· ταῦτ' οὖν ἔχειν λέγεται ὥς ἐν ἀγγείῳ· — ἢ ὥς κτῆμα· ἔχειν γὰρ οἰκίαν καὶ ἀγρὸν λεγόμεθα. λεγόμεθα δὲ καὶ γυναῖκα ἔχειν καὶ ἡ γυνὴ ἄνδρα· εἴκει δὲ ἀλλοτριώτατος ὁ νῦν ῥηθεὶς τρόπος τοῦ ἔχειν εἶναι· οὐδὲν γὰρ ἄλλο τῷ ἔχειν γυναῖκα σημαίνομεν ἢ ὅτι συνοικεῖ. ἴσως δ' ἂν καὶ ἄλλοι τινὲς φανείησαν τοῦ ἔχειν τρόποι, οἱ δὲ εἰωθότες λέγεσθαι σχεδὸν ἅπαντες κατηρίθμηνται.

Κεφάλαιο 1

[16a] Πρῶτον δεῖ θέσθαι τί ὄνομα καὶ τί ῥῆμα, ἔπειτα τί ἐστὶν ἀπόφασις καὶ κατὰφασις καὶ ἀπόφανσις καὶ λόγος.

Ἔστι μὲν οὖν τὰ ἐν τῇ φωνῇ τῶν ἐν τῇ ψυχῇ παθημάτων σύμβολα, καὶ τὰ γραφόμενα τῶν ἐν τῇ φωνῇ. καὶ ὥσπερ οὐδὲ γράμματα πᾶσι τὰ αὐτά, οὐδὲ φωναὶ αἱ αὐταί· ὧν μέντοι ταῦτα σημεῖα πρώτων, ταὐτὰ πᾶσι παθήματα τῆς ψυχῆς, καὶ ὧν ταῦτα ὁμοιώματα πράγματα ἤδη ταῦτά. περὶ μὲν οὖν τούτων εἴρηται ἐν τοῖς περὶ ψυχῆς, — ἄλλης γὰρ πραγματείας· — ἔστι δέ, ὥσπερ ἐν τῇ ψυχῇ ὅτε μὲν νόημα ἄνευ τοῦ ἀληθεύειν ἢ ψεύδεσθαι ὅτε δὲ ἤδη ὦ ἀνάγκη τούτων ὑπάρχειν θάτερον, οὕτω καὶ ἐν τῇ φωνῇ· περὶ γὰρ σύνθεσιν καὶ διαίρεσίν ἐστι τὸ ψεῦδός τε καὶ τὸ ἀληθές. τὰ μὲν οὖν ὀνόματα αὐτὰ καὶ τὰ ῥήματα ἔοικε τῷ ἄνευ συνθέσεως καὶ διαίρεσεως νοήματι, οἷον τὸ ἄνθρωπος ἢ λευκόν, ὅταν μὴ προστεθῇ τι· οὔτε γὰρ ψεῦδος οὔτε ἀληθές πω. σημεῖον δ' ἐστὶ τοῦδε· καὶ γὰρ ὁ τραγέλαφος σημαίνει μὲν τι, οὕπω δὲ ἀληθές ἢ ψεῦδος, ἐὰν μὴ τὸ εἶναι ἢ μὴ εἶναι προστεθῇ ἢ ἀπλῶς ἢ κατὰ χρόνον.

Κεφάλαιο 2

Ὅνομα μὲν οὖν ἐστὶ φωνὴ σημαντικὴ κατὰ συνθήκην ἄνευ χρόνου, ἧς μηδὲν μέρος ἐστὶ σημαντικὸν κεχωρισμένον· ἐν γὰρ τῷ Κάλλιππος τὸ ἵππος οὐδὲν καθ' αὐτὸ σημαίνει, ὥσπερ ἐν τῷ λόγῳ τῷ καλὸς ἵππος. οὐ μὴν οὐδ' ὥσπερ ἐν τοῖς ἀπλοῖς ὀνόμασιν, οὕτως ἔχει καὶ ἐν τοῖς πεπλεγμένοις· ἐν ἐκείνοις μὲν γὰρ οὐδαμῶς τὸ μέρος σημαντικόν, ἐν δὲ τούτοις βούλεται μὲν, ἀλλ' οὐδενὸς κεχωρισμένον, οἷον ἐν τῷ ἐπακτροκέλης τὸ κέλης. τὸ δὲ κατὰ συνθήκην, ὅτι φύσει τῶν ὀνομάτων οὐδὲν ἐστίν, ἀλλ' ὅταν γένηται σύμβολον· ἐπεὶ δηλοῦσί γέ τι καὶ οἱ ἀγράμματοι ψόφοι, οἷον θηρίων, ὧν οὐδὲν ἐστὶν ὄνομα. — τὸ δ' οὐκ ἄνθρωπος οὐκ ὄνομα· οὐ μὴν οὐδὲ κεῖται ὄνομα ὃ τι δεῖ καλεῖν αὐτό, — οὔτε γὰρ λόγος οὔτε ἀπόφασίς ἐστίν· — ἀλλ' ἔστω ὄνομα ἀόριστον. τὸ δὲ Φίλωνος ἢ Φίλωνι καὶ ὅσα [16b] τοιαῦτα οὐκ ὀνόματα ἀλλὰ πτώσεις ὀνόματος. λόγος δὲ ἐστὶν αὐτοῦ τὰ μὲν ἄλλα κατὰ τὰ αὐτά, ὅτι δὲ μετὰ τοῦ ἐστίν ἢ ἦν ἢ ἔσται οὐκ ἀληθεύει ἢ ψεύδεται, — τὸ δ' ὄνομα ἀεί, — οἷον Φίλωνός ἐστίν ἢ οὐκ ἐστίν· οὐδὲν γὰρ πῶ οὔτε ἀληθεύει οὔτε ψεύδεται.

Κεφάλαιο 3

Ῥῆμα δέ ἐστι τὸ προσσημαῖνον χρόνον, οὗ μέρος οὐδὲν σημαίνει χωρίς· ἔστι δὲ τῶν καθ' ἑτέρου λεγομένων σημείων. λέγω δ' ὅτι προσσημαίνει χρόνον, οἷον ὑγίεια μὲν ὄνομα, τὸ δ' ὑγιαίνει ῥῆμα· προσσημαίνει γὰρ τὸ νῦν ὑπάρχειν. καὶ ἀεὶ τῶν ὑπαρχόντων σημείον ἐστίν, οἷον τῶν καθ' ὑποκειμένου. — τὸ δὲ οὐχ ὑγιαίνει καὶ τὸ οὐ κάμνει οὐ ῥῆμα λέγω· προσσημαίνει μὲν γὰρ χρόνον καὶ ἀεὶ κατὰ τινος ὑπάρχει, τῇ διαφορᾷ δὲ ὄνομα οὐ κεῖται· ἀλλ' ἔστω ἀόριστον ῥῆμα, ὅτι ὁμοίως ἐφ' ὅτου οὖν ὑπάρχει καὶ ὄντος καὶ μὴ ὄντος. ὁμοίως δὲ καὶ τὸ ὑγίανεν ἢ τὸ ὑγιανεῖ οὐ ῥῆμα, ἀλλὰ πτωσις ῥήματος· διαφέρει δὲ τοῦ ῥήματος, ὅτι τὸ μὲν τὸν παρόντα προσσημαίνει χρόνον, τὰ δὲ τὸν πέριξ. — αὐτὰ μὲν οὖν καθ' αὐτὰ λεγόμενα τὰ ῥήματα ὀνόματά ἐστι καὶ σημαίνει τι, — ἴστησι γὰρ ὁ λέγων τὴν διάνοιαν, καὶ ὁ ἀκούσας ἡρέμησεν, — ἀλλ' εἰ ἔστιν ἢ μὴ οὕτω σημαίνει· οὐ γὰρ τὸ εἶναι ἢ μὴ εἶναι σημείον ἐστὶ τοῦ πράγματος, οὐδ' ἐὰν τὸ ὄν εἴπῃς ψιλόν. αὐτὸ μὲν γὰρ οὐδέν ἐστιν, προσσημαίνει δὲ σύνθεσιν τινα, ἣν ἄνευ τῶν συγκειμένων οὐκ ἔστι νοῆσαι.

Κεφάλαιο 4

Λόγος δέ ἐστι φωνὴ σημαντική, ἥς τῶν μερῶν τι σημαντικόν ἐστι κεχωρισμένον, ὡς φάσις ἀλλ' οὐχ ὡς κατάφασις. λέγω δέ, οἷον ἄνθρωπος σημαίνει τι, ἀλλ' οὐχ ὅτι ἔστιν ἢ οὐκ ἔστιν (ἀλλ' ἔσται κατάφασις ἢ ἀπόφασις ἐάν τι προστεθῇ)· ἀλλ' οὐχ ἡ τοῦ ἀνθρώπου συλλαβὴ μία· οὐδὲ γὰρ ἐν τῷ μῦς τὸ υς σημαντικόν, ἀλλὰ φωνὴ ἐστι νῦν μόνον. ἐν δὲ τοῖς διπλοῖς σημαίνει μὲν, ἀλλ' οὐ καθ' αὐτό, ὥσπερ εἴρηται. ἔστι δὲ λόγος ἅπας μὲν [17a] σημαντικός, οὐχ ὡς ὄργανον δέ, ἀλλ' ὥσπερ εἴρηται κατὰ συνθήκην· ἀποφαντικός δὲ οὐ πᾶς, ἀλλ' ἐν ᾧ τὸ ἀληθεύειν ἢ ψεύδεσθαι ὑπάρχει· οὐκ ἐν ἅπασιν δὲ ὑπάρχει, οἷον ἡ εὐχὴ λόγος μὲν, ἀλλ' οὐτ' ἀληθὴς οὔτε ψευδής. οἱ μὲν οὖν ἄλλοι ἀφείσθωσαν, — ῥητορικῆς γὰρ ἢ ποιητικῆς οἰκειότερα ἢ σκέψις, — ὁ δὲ ἀποφαντικός τῆς νῦν θεωρίας.

Κεφάλαιο 5

Ἔστι δὲ εἷς πρῶτος λόγος ἀποφαντικὸς κατάφασις, εἴτα ἀπόφασις· οἱ δὲ ἄλλοι συνδέσμῳ εἷς. ἀνάγκη δὲ πάντα λόγον ἀποφαντικὸν ἐκ ῥήματος εἶναι ἢ πτώσεως· καὶ γὰρ ὁ τοῦ ἀνθρώπου λόγος, ἐὰν μὴ τὸ ἔστιν ἢ ἔσται ἢ ἦν ἢ τι τοιοῦτο προστεθῇ, οὕπῳ λόγος ἀποφαντικὸς (διότι δὲ ἓν τί ἐστιν ἄλλ' οὐ πολλὰ τὸ ζῶον πεζὸν δίπουν, — οὐ γὰρ δὴ τῷ σύνεγγυς εἰρησθαι εἷς ἔσται, — ἔστι δὲ ἄλλης τοῦτο πραγματείας εἰπεῖν). ἔστι δὲ εἷς λόγος ἀποφαντικὸς ἢ ὁ ἐν δηλῶν ἢ ὁ συνδέσμῳ εἷς, πολλοὶ δὲ οἱ πολλὰ καὶ μὴ ἐν ἢ οἱ ἀσύνδετοι. τὸ μὲν οὖν ὄνομα καὶ τὸ ῥῆμα φάσις ἔστω μόνον, ἐπεὶ οὐκ ἔστιν εἰπεῖν οὕτω δηλοῦντά τι τῇ φωνῇ ὥστ' ἀποφαίνεσθαι, ἢ ἐρωτῶντός τινος, ἢ μὴ ἄλλ' αὐτὸν προαιρούμενον. τούτων δ' ἡ μὲν ἀπλὴ ἐστὶν ἀπόφανσις, οἷον τί κατὰ τινὸς ἢ τί ἀπὸ τινός, ἢ δ' ἐκ τούτων συγκειμένη, οἷον λόγος τις ἥδη σύνθετος.

Κεφάλαιο 6

Ἔστι δ' ἡ μὲν ἀπλῆ ἀπόφανσις φωνὴ σημαντικὴ περὶ τοῦ εἰ
ὑπάρχει τι ἢ μὴ ὑπάρχει, ὥς οἱ χρόνοι διήρηνται· κατάφασις δέ ἐστιν
ἀπόφανσις τινὸς κατὰ τινός, ἀπόφασις δέ ἐστιν ἀπόφανσις τινὸς ἀπὸ
τινός. ἐπεὶ δὲ ἔστι καὶ τὸ ὑπάρχον ἀποφαίνεσθαι ὥς μὴ ὑπάρχον καὶ
τὸ μὴ ὑπάρχον ὥς ὑπάρχον καὶ τὸ ὑπάρχον ὥς ὑπάρχον καὶ τὸ μὴ
ὑπάρχον ὥς μὴ ὑπάρχον, καὶ περὶ τοὺς ἐκτὸς δὲ τοῦ νῦν χρόνους
ὡσαύτως, ἅπαν ἂν ἐνδέχοιτο καὶ ὁ κατέφησέ τις ἀποφῆσαι καὶ ὁ
ἀπέφησε καταφῆσαι· ὥστε δῆλον ὅτι πάση καταφάσει ἐστὶν
ἀπόφασις ἀντικειμένη καὶ πάση ἀποφάσει κατάφασις. καὶ ἔστω
ἀντίφασις τοῦτο, κατάφασις καὶ ἀπόφασις αἱ ἀντικείμεναι· λέγω δὲ
ἀντικεῖσθαι τὴν τοῦ αὐτοῦ κατὰ τοῦ αὐτοῦ, — μὴ ὁμωνύμως δέ, καὶ
ὅσα ἄλλα τῶν τοιούτων προσδιορίζομεθα πρὸς τὰς σοφιστικὰς
ἐνοχλήσεις.

Κεφάλαιο 7

Ἐπεὶ δὲ ἐστὶ τὰ μὲν καθόλου τῶν πραγμάτων τὰ δὲ καθ' ἕκαστον, — λέγω δὲ καθόλου μὲν ὃ ἐπὶ πλείονων ἐφύκε κατηγορεῖσθαι, καθ' ἕκαστον δὲ ὃ μὴ, οἷον ἄνθρωπος μὲν [17b] τῶν καθόλου Καλλίας δὲ τῶν καθ' ἕκαστον, — ἀνάγκη δ' ἀποφαίνεσθαι ὡς ὑπάρχει τι ἢ μὴ, ὅτε μὲν τῶν καθόλου τινί, ὅτε δὲ τῶν καθ' ἕκαστον. ἐὰν μὲν οὖν καθόλου ἀποφαίνεται ἐπὶ τοῦ καθόλου ὅτι ὑπάρχει ἢ μὴ, ἔσονται ἐναντίαι ἀποφάνσεις, — λέγω δὲ ἐπὶ τοῦ καθόλου ἀποφαίνεσθαι καθόλου, οἷον πᾶς ἄνθρωπος λευκός, οὐδεὶς ἄνθρωπος λευκός· — ὅταν δὲ ἐπὶ τῶν καθόλου μὲν, μὴ καθόλου δέ, οὐκ εἰσὶν ἐναντίαι, τὰ μέντοι δηλούμενα ἔστιν εἶναι ἐναντία, — λέγω δὲ τὸ μὴ καθόλου ἀποφαίνεσθαι ἐπὶ τῶν καθόλου, οἷον ἔστι λευκὸς ἄνθρωπος, οὐκ ἔστι λευκὸς ἄνθρωπος· καθόλου γὰρ ὄντος τοῦ ἄνθρωπος οὐχ ὡς καθόλου χρῆται τῇ ἀποφάνσει· τὸ γὰρ πᾶς οὐ τὸ καθόλου σημαίνει ἀλλ' ὅτι καθόλου. — ἐπὶ δὲ τοῦ κατηγορουμένου τὸ καθόλου κατηγορεῖν καθόλου οὐκ ἔστιν ἀληθές· οὐδεμία γὰρ κατάφασις ἔσται, ἐν ἧ τοῦ κατηγορουμένου καθόλου τὸ καθόλου κατηγορηθήσεται, οἷον ἔστι πᾶς ἄνθρωπος πᾶν ζῶον.

Ἀντικεῖσθαι μὲν οὖν κατάφασιν ἀποφάσει λέγω ἀντιφατικῶς τὴν τὸ καθόλου σημαίνουσαν τῷ αὐτῷ ὅτι οὐ καθόλου, οἷον πᾶς ἄνθρωπος λευκός — οὐ πᾶς ἄνθρωπος λευκός, οὐδεὶς ἄνθρωπος λευκός — ἔστι τις ἄνθρωπος λευκός· ἐναντίως δὲ τὴν τοῦ καθόλου κατάφασιν καὶ τὴν τοῦ καθόλου ἀπόφασιν, οἷον πᾶς ἄνθρωπος δίκαιος — οὐδεὶς ἄνθρωπος δίκαιος· διὸ ταύτας μὲν οὐχ οἷον τε ἅμα ἀληθεῖς εἶναι, τὰς δὲ ἀντικειμένας αὐταῖς ἐνδέχεται ἐπὶ τοῦ αὐτοῦ, οἷον οὐ πᾶς ἄνθρωπος λευκός, καὶ ἔστι τις ἄνθρωπος λευκός. ὅσαι μὲν οὖν ἀντιφάσεις τῶν καθόλου εἰσὶ καθόλου, ἀνάγκη τὴν ἑτέραν ἀληθῆ εἶναι ἢ ψευδῇ, καὶ ὅσαι ἐπὶ τῶν καθ' ἕκαστα, οἷον ἔστι Σωκράτης λευκός — οὐκ ἔστι Σωκράτης λευκός· ὅσαι δ' ἐπὶ τῶν καθόλου μὴ καθόλου, οὐκ αἰεὶ ἢ μὲν ἀληθὴς ἢ δὲ ψευδής· — ἅμα γὰρ ἀληθές ἐστιν εἰπεῖν ὅτι ἔστιν ἄνθρωπος λευκός καὶ ὅτι οὐκ ἔστιν ἄνθρωπος λευκός, καὶ ἔστιν ἄνθρωπος καλὸς καὶ οὐκ ἔστιν ἄνθρωπος καλός· εἰ γὰρ αἰσchrός, καὶ οὐ καλός· καὶ εἰ γίγνεται τι, καὶ οὐκ ἔστιν. — δόξειε δ' ἂν ἐξαίφνης ἄτοπον εἶναι διὰ τὸ φαίνεσθαι σημαίνειν τὸ οὐκ ἔστιν ἄνθρωπος λευκός ἅμα καὶ ὅτι οὐδεὶς

ἄνθρωπος λευκός· τὸ δὲ οὕτε ταὐτὸν σημαίνει οὕθ' ἅμα ἐξ ἀνάγκης.
— φανερόν δ' ὅτι καὶ μία ἀπόφασις μιᾶς καταφάσεως· τὸ γὰρ αὐτὸ
δεῖ ἀποφῆσαι τὴν ἀπόφασιν ὅπερ κατέφησεν ἢ κατάφασις, καὶ ἀπὸ
τοῦ αὐτοῦ, ἢ τῶν καθ' ἕκαστά [18a] τινος ἢ ἀπὸ τῶν καθόλου τινός,
ἢ ὡς καθόλου ἢ ὡς μὴ καθόλου· λέγω δὲ οἷον ἔστι Σωκράτης λευκός
— οὐκ ἔστι Σωκράτης λευκός (ἐὰν δὲ ἄλλο τι ἢ ἀπ' ἄλλου τὸ αὐτό,
οὐχ ἢ ἀντικειμένη ἀλλ' ἔσται ἐκείνης ἐτέρα), τῇ δὲ πᾶς ἄνθρωπος
λευκός ἢ οὐ πᾶς ἄνθρωπος λευκός, τῇ δὲ τις ἄνθρωπος λευκός ἢ
οὐδεὶς ἄνθρωπος λευκός, τῇ δὲ ἔστιν ἄνθρωπος λευκός ἢ οὐκ ἔστιν
ἄνθρωπος λευκός.

Ὅτι μὲν οὖν μία κατάφασις μιᾶ ἀποφάσει ἀντίκειται ἀντιφατικῶς,
καὶ τίνες εἰσὶν αὗται, εἴρηται, καὶ ὅτι αἱ ἐναντίαι ἄλλαι, καὶ τίνες
εἰσὶν αὗται, καὶ ὅτι οὐ πᾶσα ἀληθὴς ἢ ψευδὴς ἀντίφασις, καὶ διὰ τί,
καὶ πότε ἀληθὴς ἢ ψευδής.

Κεφάλαιο 8

μία δέ ἐστι κατάφασις καὶ ἀπόφασις ἢ ἓν καθ' ἑνὸς σημαίνουσα, ἢ καθόλου ὄντος καθόλου ἢ μὴ ὁμοίως, οἷον πᾶς ἄνθρωπος λευκός ἐστιν — οὐκ ἔστι πᾶς ἄνθρωπος λευκός, ἔστιν ἄνθρωπος λευκός — οὐκ ἔστιν ἄνθρωπος λευκός, οὐδεὶς ἄνθρωπος λευκός — ἔστι τις ἄνθρωπος λευκός, εἰ τὸ λευκὸν ἓν σημαίνει. εἰ δὲ δυεῖν ἓν ὄνομα κεῖται, ἐξ ὧν μὴ ἐστιν ἓν, οὐ μία κατὰ φασις· οἷον εἴ τις θεῖτο ὄνομα ἱμάτιον ἵππῳ καὶ ἀνθρώπῳ, τὸ ἔστιν ἱμάτιον λευκόν, αὕτη οὐ μία κατάφασις [οὐδὲ ἀπόφασις μία]· οὐδὲν γὰρ διαφέρει τοῦτο εἰπεῖν ἢ ἔστιν ἵππος καὶ ἄνθρωπος λευκός, τοῦτο δ' οὐδὲν διαφέρει τοῦ εἰπεῖν ἔστιν ἵππος λευκός καὶ ἔστιν ἄνθρωπος λευκός. εἰ οὖν αὗται πολλὰ σημαίνουσι καὶ εἰσὶ πολλάί, δῆλον ὅτι καὶ ἡ πρώτη ἦτοι πολλὰ ἢ οὐδὲν σημαίνει, — οὐ γάρ ἐστιν τις ἄνθρωπος ἵππος· — ὥστε οὐδ' ἐν ταύταις ἀνάγκη τὴν μὲν ἀληθεῖ τὴν δὲ ψευδεῖ εἶναι ἀντίφασιν.

Κεφάλαιο 9

Ἐπὶ μὲν οὖν τῶν ὄντων καὶ γενομένων ἀνάγκη τὴν κατάφασιν ἢ τὴν ἀπόφασιν ἀληθῆ ἢ ψευδῆ εἶναι· καὶ ἐπὶ μὲν τῶν καθόλου ὡς καθόλου αἰεὶ τὴν μὲν ἀληθῆ τὴν δὲ ψευδῆ καὶ ἐπὶ τῶν καθ' ἕκαστα, ὥσπερ εἴρηται· ἐπὶ δὲ τῶν καθόλου μὴ καθόλου λεχθέντων οὐκ ἀνάγκη· εἴρηται δὲ καὶ περὶ τούτων. — ἐπὶ δὲ τῶν καθ' ἕκαστα καὶ μελλόντων οὐχ ὁμοίως· εἰ γὰρ πᾶσα κατάφασις ἢ ἀπόφασις ἀληθὴς ἢ ψευδής, καὶ ἅπαν ἀνάγκη ἢ ὑπάρχειν ἢ μὴ ὑπάρχειν· εἰ γὰρ ὁ μὲν φήσῃ ἔσσεσθαι τι ὁ δὲ μὴ φήσῃ τὸ αὐτὸ τοῦτο, δηλὸν ὅτι ἀνάγκη ἀληθεύειν τὸν ἕτερον αὐτῶν, εἰ πᾶσα κατάφασις ἀληθὴς ἢ ψευδής· ἄμφω γὰρ οὐχ ὑπάρξει ἅμα ἐπὶ τοῖς τοιοῦτοις· εἰ γὰρ ἀληθὲς εἰπεῖν ὅτι λευκὸν ἢ οὐ [18b] λευκὸν ἐστίν, ἀνάγκη εἶναι λευκὸν ἢ οὐ λευκόν, καὶ εἰ ἔστι λευκὸν ἢ οὐ λευκόν, ἀληθὲς ἦν φάναι ἢ ἀποφάναι· καὶ εἰ μὴ ὑπάρχει, ψεύδεται, καὶ εἰ ψεύδεται, οὐχ ὑπάρχει· ὥστ' ἀνάγκη τὴν κατάφασιν ἢ τὴν ἀπόφασιν ἀληθῆ εἶναι. οὐδὲν ἄρα οὔτε ἐστίν οὔτε γίνεσθαι οὔτε ἀπὸ τύχης οὔθ' ὁπότερ' ἔτυχεν, οὐδ' ἔσται ἢ οὐκ ἔσται, ἀλλ' ἐξ ἀνάγκης ἅπαντα καὶ οὐχ ὁπότερ' ἔτυχεν (ἢ γὰρ ὁ φὰς ἀληθεύει ἢ ὁ ἀποφάς)· ὁμοίως γὰρ ἂν ἐγίγνετο ἢ οὐκ ἐγίγνετο· τὸ γὰρ ὁπότερ' ἔτυχεν οὐδὲν μᾶλλον οὕτως ἢ μὴ οὕτως ἔχει ἢ ἔξει. — ἔτι εἰ ἔστι λευκὸν νῦν, ἀληθὲς ἦν εἰπεῖν πρότερον ὅτι ἔσται λευκόν, ὥστε αἰεὶ ἀληθὲς ἦν εἰπεῖν ὅτι οὖν τῶν γενομένων ὅτι ἔσται· εἰ δ' αἰεὶ ἀληθὲς ἦν εἰπεῖν ὅτι ἔστιν ἢ ἔσται, οὐχ οἷόν τε τοῦτο μὴ εἶναι οὐδὲ μὴ ἔσσεσθαι. ὁ δὲ μὴ οἷόν τε μὴ γενέσθαι, ἀδύνατον μὴ γενέσθαι· ὁ δὲ ἀδύνατον μὴ γενέσθαι, ἀνάγκη γενέσθαι· ἅπαντα οὖν τὰ ἐσόμενα ἀναγκαῖον γενέσθαι. οὐδὲν ἄρα ὁπότερ' ἔτυχεν οὐδ' ἀπὸ τύχης ἔσται· εἰ γὰρ ἀπὸ τύχης, οὐκ ἐξ ἀνάγκης. — ἀλλὰ μὴν οὐδ' ὡς οὐδέτερόν γε ἀληθὲς ἐνδέχεται λέγειν, οἷον ὅτι οὔτ' ἔσται οὔτε οὐκ ἔσται. πρῶτον μὲν γὰρ οὔσης τῆς καταφάσεως ψευδοῦς ἢ ἀπόφασις οὐκ ἀληθὴς, καὶ ταύτης ψευδοῦς οὔσης τὴν κατάφασιν συμβαίνει μὴ ἀληθῆ εἶναι. καὶ πρὸς τούτοις, εἰ ἀληθὲς εἰπεῖν ὅτι λευκὸν καὶ μέλαν, δεῖ ἄμφω ὑπάρχειν, εἰ δὲ ὑπάρξῃν εἰς αὔριον, ὑπάρξει εἰς αὔριον· εἰ δὲ μήτ' ἔσται μήτε μὴ ἔσται αὔριον, οὐκ ἂν εἴη τὸ ὁπότερ' ἔτυχεν, οἷον ναυμαχία· δεοὶ γὰρ ἂν μήτε γενέσθαι ναυμαχίαν μήτε μὴ γενέσθαι.

Τὰ μὲν δὴ συμβαίνοντα ἄτοπα ταῦτα καὶ τοιαῦθ' ἕτερα, εἴπερ

πάσης καταφάσεως καὶ ἀποφάσεως, ἥ ἐπὶ τῶν καθόλου λεγομένων ὡς καθόλου ἢ ἐπὶ τῶν καθ' ἕκαστα, ἀνάγκη τῶν ἀντικειμένων εἶναι τὴν μὲν ἀληθῆ τὴν δὲ ψευδῇ, μηδὲν δὲ ὁπότερ' ἔτυχεν εἶναι ἐν τοῖς γιγνομένοις, ἀλλὰ πάντα εἶναι καὶ γίνεσθαι ἐξ ἀνάγκης. ὥστε οὔτε βουλευέσθαι δεοὶ ἂν οὔτε πραγματεύεσθαι, ὡς ἐὰν μὲν τοδὶ ποιήσωμεν, ἔσται τοδί, ἐὰν δὲ μὴ τοδί, οὐκ ἔσται. οὐδὲν γὰρ κωλύει εἰς μυριοστὸν ἔτος τὸν μὲν φάναι τοῦτ' ἔσεσθαι τὸν δὲ μὴ φάναι, ὥστε ἐξ ἀνάγκης ἔσεσθαι ὁπότερον αὐτῶν ἀληθὲς ἦν εἰπεῖν τότε. ἀλλὰ μὴν οὐδὲ τοῦτο διαφέρει, εἴ τινες εἶπον τὴν ἀντίφασιν ἢ μὴ εἶπον· δηλὸν γὰρ ὅτι οὕτως ἔχει τὰ πράγματα, κἂν μὴ ὁ μὲν καταφήσῃ ὁ δὲ ἀποφήσῃ· οὐ γὰρ διὰ τὸ καταφάναι ἢ ἀποφάναι ἔσται ἢ οὐκ ἔσται, οὐδ' εἰς [19a] μυριοστὸν ἔτος μᾶλλον ἢ ἐν ὀποσφοῦν χρόνῳ. ὥστ' εἰ ἐν ἅπαντι τῷ χρόνῳ οὕτως εἶχεν ὥστε τὸ ἕτερον ἀληθεύεσθαι, ἀναγκαῖον ἦν τοῦτο γενέσθαι, καὶ ἕκαστον τῶν γενομένων αἰεὶ οὕτως ἔχειν ὥστε ἐξ ἀνάγκης γενέσθαι· ὃ τε γὰρ ἀληθῶς εἶπέ τις ὅτι ἔσται, οὐχ οἷόν τε μὴ γενέσθαι· καὶ τὸ γενόμενον ἀληθὲς ἦν εἰπεῖν αἰεὶ ὅτι ἔσται.

Εἰ δὴ ταῦτα ἀδύνατα, — ὁρῶμεν γὰρ ὅτι ἔστιν ἀρχὴ τῶν ἐσομένων καὶ ἀπὸ τοῦ βουλευέσθαι καὶ ἀπὸ τοῦ πρᾶξαι τι, καὶ ὅτι ὅλως ἔστιν ἐν τοῖς μὴ αἰεὶ ἐνεργοῦσι τὸ δυνατόν εἶναι καὶ μὴ, ἐν οἷς ἄμφω ἐνδέχεται καὶ τὸ εἶναι καὶ τὸ μὴ εἶναι, ὥστε καὶ τὸ γενέσθαι καὶ τὸ μὴ γενέσθαι· καὶ πολλὰ ἡμῖν δηλὰ ἔστιν οὕτως ἔχοντα, οἷον ὅτι τουτὶ τὸ ἰμάτιον δυνατόν ἐστι διατμηθῆναι καὶ οὐ διατμηθήσεται, ἀλλ' ἐμπροσθεν κατατριβήσεται· ὁμοίως δὲ καὶ τὸ μὴ διατμηθῆναι δυνατόν· οὐ γὰρ ἂν ὑπῆρχε τὸ ἐμπροσθεν αὐτὸ κατατριβῆναι, εἴγε μὴ δυνατόν ἦν τὸ μὴ διατμηθῆναι· ὥστε καὶ ἐπὶ τῶν ἄλλων γενέσεων, ὅσαι κατὰ δύναμιν λέγονται τὴν τοιαύτην· — φανερόν ἄρα ὅτι οὐχ ἅπαντα ἐξ ἀνάγκης οὔτ' ἔστιν οὔτε γίγνεται, ἀλλὰ τὰ μὲν ὁπότερ' ἔτυχε καὶ οὐδὲν μᾶλλον ἢ ἡ κατάφασις ἢ ἡ ἀπόφασις ἀληθής, τὰ δὲ μᾶλλον μὲν καὶ ὡς ἐπὶ τὸ πολὺ θάτερον, οὐ μὴν ἀλλ' ἐνδέχεται γενέσθαι καὶ θάτερον, θάτερον δὲ μὴ.

Τὸ μὲν οὖν εἶναι τὸ ὄν ὅταν ᾖ, καὶ τὸ μὴ ὄν μὴ εἶναι ὅταν μὴ ᾖ, ἀνάγκη· οὐ μέντοι οὔτε τὸ ὄν ἅπαν ἀνάγκη εἶναι οὔτε τὸ μὴ ὄν μὴ εἶναι· — οὐ γὰρ ταῦτόν ἐστι τὸ ὄν ἅπαν εἶναι ἐξ ἀνάγκης ὅτε ἔστιν, καὶ τὸ ἀπλῶς εἶναι ἐξ ἀνάγκης· ὁμοίως δὲ καὶ ἐπὶ τοῦ μὴ ὄντος. — καὶ ἐπὶ τῆς ἀντιφάσεως ὁ αὐτὸς λόγος· εἶναι μὲν ἢ μὴ εἶναι ἅπαν ἀνάγκη, καὶ ἔσεσθαι γε ἢ μὴ· οὐ μέντοι διελόντα γε εἰπεῖν θάτερον

ἀναγκαῖον. λέγω δὲ οἷον ἀνάγκη μὲν ἔσεσθαι ναυμαχίαν αὖριον ἢ μὴ ἔσεσθαι, οὐ μέντοι γενέσθαι αὖριον ναυμαχίαν ἀναγκαῖον οὐδὲ μὴ γενέσθαι· γενέσθαι μέντοι ἢ μὴ γενέσθαι ἀναγκαῖον. ὥστε, ἐπεὶ ὁμοίως οἱ λόγοι ἀληθεῖς ὥσπερ τὰ πράγματα, δῆλον ὅτι ὅσα οὕτως ἔχει ὥστε ὁπότερ' ἔτυχε καὶ τὰ ἐναντία ἐνδέχεσθαι, ἀνάγκη ὁμοίως ἔχειν καὶ τὴν ἀντίφασιν· ὅπερ συμβαίνει ἐπὶ τοῖς μὴ αἰεὶ οὖσιν ἢ μὴ αἰεὶ μὴ οὖσιν· τούτων γὰρ ἀνάγκη μὲν θάτερον μῶριον τῆς ἀντιφάσεως ἀληθὲς εἶναι ἢ ψεῦδος, οὐ μέντοι τόδε ἢ τόδε ἀλλ' ὁπότερ' ἔτυχεν, καὶ μᾶλλον μὲν ἀληθῆ τὴν ἐτέραν, οὐ μέντοι ἤδη ἀληθῆ ἢ ψευδῆ. ὥστε δῆλον [19b] ὅτι οὐκ ἀνάγκη πάσης καταφάσεως καὶ ἀποφάσεως τῶν ἀντικειμένων τὴν μὲν ἀληθῆ τὴν δὲ ψευδῆ εἶναι· οὐ γὰρ ὥσπερ ἐπὶ τῶν ὄντων οὕτως ἔχει καὶ ἐπὶ τῶν μὴ ὄντων, δυνατῶν δὲ εἶναι ἢ μὴ εἶναι, ἀλλ' ὥσπερ εἴρηται.

Κεφάλαιο 10

Ἐπεὶ δέ ἐστι τὶ κατὰ τινὸς ἢ κατάφασις σημαίνουσα, τοῦτο δ' ἐστὶν ἢ ὄνομα ἢ τὸ ἀνώνυμον, ἐν δὲ δεῖ εἶναι καὶ καθ' ἑνὸς τὸ ἐν τῇ καταφάσει (τὸ δὲ ὄνομα εἴρηται καὶ τὸ ἀνώνυμον πρότερον· τὸ γὰρ οὐκ ἄνθρωπος ὄνομα μὲν οὐ λέγω ἀλλὰ ἀόριστον ὄνομα, — ἐν γὰρ πῶς σημαίνει ἀόριστον, — ὥσπερ καὶ τὸ οὐχ ὑγιαίνει οὐ ῥῆμα), ἔσται πᾶσα κατάφασις ἢ ἐξ ὀνόματος καὶ ῥήματος ἢ ἐξ ἀορίστου ὀνόματος καὶ ῥήματος. ἄνευ δὲ ῥήματος οὐδεμία κατάφασις οὐδ' ἀπόφασις· τὸ γὰρ ἔστιν ἢ ἔσται ἢ ἦν ἢ γίγνεται ἢ ὅσα ἄλλα τοιαῦτα, ῥήματα ἐκ τῶν κειμένων ἐστίν· προσσημαίνει γὰρ χρόνον. ὥστε πρώτη κατάφασις καὶ ἀπόφασις τὸ ἔστιν ἄνθρωπος — οὐκ ἔστιν ἄνθρωπος, εἴτα ἔστιν οὐκ ἄνθρωπος — οὐκ ἔστιν οὐκ ἄνθρωπος, πάλιν ἔστι πᾶς ἄνθρωπος — οὐκ ἔστι πᾶς ἄνθρωπος, ἔστι πᾶς οὐκ ἄνθρωπος — οὐκ ἔστι πᾶς οὐκ ἄνθρωπος· καὶ ἐπὶ τῶν ἐκτὸς δὲ χρόνων ὁ αὐτὸς λόγος.

Ὅταν δὲ τὸ ἔστι τρίτον προσκατηγορηθῇ, διχῶς λέγονται αἱ ἀντιθέσεις. λέγω δὲ οἷον ἔστι δίκαιος ἄνθρωπος, τὸ ἔστι τρίτον φημὶ συγκεῖσθαι ὄνομα ἢ ῥῆμα ἐν τῇ καταφάσει. ὥστε διὰ τοῦτο τέτταρα ἔσται ταῦτα, ὧν τὰ μὲν δύο πρὸς τὴν κατάφασιν καὶ ἀπόφασιν ἔξει κατὰ τὸ στοιχοῦν ὡς αἱ στερήσεις, τὰ δὲ δύο οὐ· λέγω δὲ ὅτι τὸ ἔστιν ἢ τῷ δικαίῳ προσκείσεται ἢ τῷ οὐ δικαίῳ, ὥστε καὶ ἡ ἀπόφασις. τέτταρα οὖν ἔσται. νοῶμεν δὲ τὸ λεγόμενον ἐκ τῶν ὑπογεγραμμένων· ἔστι δίκαιος ἄνθρωπος — ἀπόφασις τούτου, οὐκ ἔστι δίκαιος ἄνθρωπος· ἔστιν οὐ δίκαιος ἄνθρωπος — τούτου ἀπόφασις, οὐκ ἔστιν οὐ δίκαιος ἄνθρωπος. τὸ γὰρ ἔστιν ἐνταῦθα καὶ τὸ οὐκ ἔστιν τῷ δικαίῳ καὶ τῷ οὐ δικαίῳ πρόσκειται. ταῦτα μὲν οὖν, ὥσπερ ἐν τοῖς Ἀναλυτικοῖς λέγεται, οὕτω τέτακται. ὁμοίως δὲ ἔχει καὶ καθόλου τοῦ ὀνόματος ἢ ἡ κατάφασις, οἷον πᾶς ἔστιν ἄνθρωπος δίκαιος — [ἀπόφασις] οὐ πᾶς ἔστιν ἄνθρωπος δίκαιος, πᾶς ἔστιν ἄνθρωπος οὐ δίκαιος — οὐ πᾶς ἔστιν ἄνθρωπος οὐ δίκαιος. πλὴν οὐχ ὁμοίως τὰς κατὰ διάμετρον ἐνδέχεται συναληθεύεσθαι, ἐνδέχεται δὲ ποτέ. αὗται μὲν οὖν δύο ἀντίκεινται, ἄλλαι δὲ πρὸς τὸ οὐκ ἄνθρωπος ὡς ὑποκείμενόν τι προστεθέντος· ἔστι δίκαιος οὐκ ἄνθρωπος — οὐκ ἔστι δίκαιος οὐκ ἄνθρωπος, ἔστιν οὐ δίκαιος οὐκ ἄνθρωπος — οὐκ ἔστιν οὐ δίκαιος [20a] οὐκ ἄνθρωπος. πλείους δὲ τούτων οὐκ ἔσονται

ἀντιθέσεις· αὐται δὲ χωρὶς ἐκείνων αὐταὶ καθ' αὐτάς εἰσιν, ὡς ὀνόματι τῷ οὐκ ἄνθρωπος χρώμεναι.

Ἐφ' ὅσων δὲ τὸ ἔστι μὴ ἀρμόττει, οἷον ἐπὶ τοῦ ὑγιαίνειν καὶ βαδίζειν, ἐπὶ τούτων τὸ αὐτὸ ποιεῖ οὕτω τιθέμενα ὡς ἂν εἰ τὸ ἔστι προσήπτετο· οἷον ὑγιαίνει πᾶς ἄνθρωπος — οὐχ ὑγιαίνει πᾶς ἄνθρωπος, ὑγιαίνει πᾶς οὐκ ἄνθρωπος — οὐχ ὑγιαίνει πᾶς οὐκ ἄνθρωπος· οὐ γάρ ἐστι τὸ οὐ πᾶς ἄνθρωπος λεκτέον, ἀλλὰ τὸ οὐ, τὴν ἀπόφασιν, τῷ ἄνθρωπος προσθετέον· τὸ γὰρ πᾶς οὐ τὸ καθόλου σημαίνει, ἀλλ' ὅτι καθόλου· δῆλον δὲ ἐκ τοῦδε, ὑγιαίνει ἄνθρωπος — οὐχ ὑγιαίνει ἄνθρωπος, ὑγιαίνει οὐκ ἄνθρωπος — οὐχ ὑγιαίνει οὐκ ἄνθρωπος· ταῦτα γὰρ ἐκείνων διαφέρει τῷ μὴ καθόλου· ὥστε τὸ πᾶς ἢ μηδεὶς οὐδὲν ἄλλο προσσημαίνει ἢ ὅτι καθόλου τοῦ ὀνόματος κατάφησιν ἢ ἀπόφησιν· τὰ οὖν ἄλλα τὰ αὐτὰ δεῖ προστιθέναι.

Ἐπεὶ δ' ἐναντία ἀπόφασίς ἐστι τῇ ἅπαν ἐστὶ ζῶον δίκαιον ἢ σημαίνουσα ὅτι οὐδὲν ἐστὶ ζῶον δίκαιον, αὐται μὲν φανερόν ὅτι οὐδέποτε ἔσονται οὔτε ἀληθεῖς ἅμα οὔτε ἐπὶ τοῦ αὐτοῦ, αἱ δὲ ἀντικείμεναι ταύταις ἔσονται ποτε· οἷον οὐ πᾶν ζῶον δίκαιον καὶ ἔστι τι ζῶον δίκαιον. ἀκολουθοῦσι δ' αὐται, τῇ μὲν πᾶς ἐστὶν ἄνθρωπος οὐ δίκαιος ἢ οὐδεὶς ἐστὶν ἄνθρωπος δίκαιος, τῇ δὲ ἔστι τις δίκαιος ἄνθρωπος ἢ ἀντικειμένη ὅτι οὐ πᾶς ἐστὶν ἄνθρωπος οὐ δίκαιος· ἀνάγκη γὰρ εἶναι τινα. φανερόν δὲ ὅτι καὶ ἐπὶ μὲν τῶν καθ' ἕκαστον, εἰ ἀληθὲς ἐρωτηθέντα ἀποφῆσαι, ὅτι καὶ καταφῆσαι ἀληθές, οἷον ἄρα γε Σωκράτης σοφός; οὐ· Σωκράτης ἄρα οὐ σοφός. ἐπὶ δὲ τῶν καθόλου οὐκ ἀληθὴς ἢ ὁμοίως λεγομένη, ἀληθὴς δὲ ἢ ἀπόφασις, οἷον· ἄρα γε πᾶς ἄνθρωπος σοφός; οὐ· πᾶς ἄρα ἄνθρωπος οὐ σοφός· τοῦτο γὰρ ψεῦδος, ἀλλὰ τὸ οὐ πᾶς ἄρα ἄνθρωπος σοφός ἀληθές· αὕτη δὲ ἐστὶν ἡ ἀντικειμένη, ἐκείνη δὲ ἡ ἐναντία.

Αἱ δὲ κατὰ τὰ ἀόριστα ἀντικείμεναι ὀνόματα καὶ ῥήματα, οἷον ἐπὶ τοῦ μὴ ἄνθρωπος καὶ μὴ δίκαιος, ὥσπερ ἀποφάσεις ἄνευ ὀνόματος καὶ ῥήματος δόξαιεν ἂν εἶναι· οὐκ εἰσὶ δέ· αἰεὶ γὰρ ἀληθεύειν ἀνάγκη ἢ ψεύδεσθαι τὴν ἀπόφασιν, ὃ δ' εἰπὼν οὐκ ἄνθρωπος οὐδὲν μᾶλλον τοῦ ἄνθρωπος ἀλλὰ καὶ ἦττον ἡλήθευκέ τι ἢ ἔψευσται, ἐὰν μὴ τι προστεθῇ. σημαίνει δὲ τὸ ἔστι πᾶς οὐκ ἄνθρωπος δίκαιος οὐδεμιᾷ ἐκείνων ταυτόν, οὐδ' ἢ ἀντικειμένη ταύτη ἢ οὐκ ἔστι πᾶς οὐκ ἄνθρωπος δίκαιος· τὸ δὲ πᾶς οὐ δίκαιος οὐκ ἄνθρωπος τῷ οὐδεὶς δίκαιος οὐκ ἄνθρωπος ταυτόν σημαίνει. [20b]

Μετατιθέμενα δὲ τὰ ὀνόματα καὶ τὰ ῥήματα ταυτόν σημαίνει,

οἷον ἔστι λευκὸς ἄνθρωπος — ἔστιν ἄνθρωπος λευκός· εἰ γὰρ μὴ τοῦτό ἐστιν, τοῦ αὐτοῦ πλείους ἔσονται ἀποφάσεις, ἀλλ' ἐδέδεικτο ὅτι μία μιᾶς. τοῦ μὲν γὰρ ἔστι λευκὸς ἄνθρωπος ἀπόφασις τὸ οὐκ ἔστι λευκὸς ἄνθρωπος· τοῦ δὲ ἔστιν ἄνθρωπος λευκός, εἰ μὴ ἡ αὐτὴ ἔστι τῇ ἔστι λευκὸς ἄνθρωπος, ἔσται ἀπόφασις ἥτοι τὸ οὐκ ἔστιν οὐκ ἄνθρωπος λευκός ἢ τὸ οὐκ ἔστιν ἄνθρωπος λευκός. ἀλλ' ἡ ἑτέρα μὲν ἔστιν ἀπόφασις τοῦ ἔστιν οὐκ ἄνθρωπος λευκός, ἡ ἑτέρα δὲ τοῦ ἔστι λευκὸς ἄνθρωπος, ὥστε ἔσονται δύο μιᾶς. ὅτι μὲν οὖν μετατιθεμένου τοῦ ὀνόματος καὶ τοῦ ῥήματος ἡ αὐτὴ γίγνεται κατάφασις καὶ ἀπόφασις, δῆλον.

τὸ δὲ ἐν κατὰ πολλῶν ἢ πολλὰ καθ' ἐνὸς καταφάναι ἢ ἀποφάναι, ἐὰν μὴ ἐν τι ἢ τὸ ἐκ τῶν πολλῶν συγκείμενον, οὐκ ἔστι κατάφασις μία οὐδὲ ἀπόφασις. λέγω δὲ ἐν οὐκ ἐὰν ὄνομα ἐν ἢ κείμενον, μὴ ἢ δὲ ἐν τι ἐξ ἐκείνων, οἷον ὁ ἄνθρωπος ἴσως ἐστὶ καὶ ζῶον καὶ δίπουν καὶ ἡμερον, ἀλλὰ καὶ ἐν τι γίνεταί ἐκ τούτων· ἐκ δὲ τοῦ λευκοῦ καὶ τοῦ ἀνθρώπου καὶ τοῦ βαδίζειν οὐχ ἓν. ὥστε οὐτ' ἐὰν ἐν τι κατὰ τούτων καταφήσῃ τις μία κατάφασις, ἀλλὰ φωνὴ μὲν μία καταφάσεις δὲ πολλαί, οὐτ' ἐὰν καθ' ἐνὸς ταῦτα, ἀλλ' ὁμοίως πολλαί. εἰ οὖν ἡ ἐρώτησις ἡ διαλεκτικὴ ἀποκρίσεως ἐστὶν αἴτησις, ἡ τῆς προτάσεως ἡ θατέρου μορίου τῆς ἀντιφάσεως, ἡ δὲ πρότασις ἀντιφάσεως μιᾶς μόριον, οὐκ ἂν εἴη μία ἀποκρίσις πρὸς ταῦτα· οὐδὲ γὰρ ἡ ἐρώτησις μία, οὐδ' ἂν ἢ ἀληθής. εἴρηται δὲ ἐν τοῖς Τοπικοῖς περὶ αὐτῶν. ἅμα δὲ δῆλον ὅτι οὐδὲ τὸ τί ἐστὶν ἐρωτήσις ἐστὶ διαλεκτικὴ· δεῖ γὰρ δεδόσθαι ἐκ τῆς ἐρωτήσεως ἐλέσθαι ὁπότερον βούλεται τῆς ἀντιφάσεως μόριον ἀποφύνασθαι. ἀλλὰ δεῖ τὸν ἐρωτῶντα προσδιορίσαι πότερον τόδε ἐστὶν ὁ ἄνθρωπος ἢ οὐ τοῦτο.

Ἐπεὶ δὲ τὰ μὲν κατηγορεῖται συντιθέμενα, ὥς ἐν τὸ πᾶν κατηγορήμα τῶν χωρὶς κατηγορουμένων, τὰ δὲ οὐ, τίς ἡ διαφορά; κατὰ γὰρ τοῦ ἀνθρώπου ἀληθὲς εἰπεῖν καὶ χωρὶς ζῶον καὶ χωρὶς δίπουν, καὶ ὥς ἓν, καὶ ἄνθρωπον καὶ λευκόν, καὶ ταῦθ' ὥς ἓν· ἀλλ' οὐχί, εἰ σκυτεὺς καὶ ἀγαθός, καὶ σκυτεὺς ἀγαθός. εἰ γάρ, ὅτι ἐκάτερον, καὶ τὸ συνάμφω, πολλὰ καὶ ἄτοπα ἔσται. κατὰ γὰρ τοῦ ἀνθρώπου καὶ τὸ ἄνθρωπος ἀληθὲς καὶ τὸ λευκόν, ὥστε καὶ τὸ ἅπαν· πάλιν εἰ τὸ λευκόν, καὶ τὸ ἅπαν, ὥστε ἔσται ἄνθρωπος λευκός λευκός, καὶ τοῦτο εἰς ἄπειρον· καὶ πάλιν [21a] μουσικὸς λευκὸς βαδίζων, καὶ ταῦτα πολλάκις πεπλεγμένα. ἔτι εἰ ὁ Σωκράτης Σωκράτης καὶ ἄνθρωπος, καὶ Σωκράτης ἄνθρωπος, καὶ εἰ ἄνθρωπος καὶ δίπους, καὶ ἄνθρωπος δίπους.

Ὅτι μὲν οὖν, εἴ τις ἀπλῶς θήσῃ τὰς συμπλοκάς γίνεσθαι, πολλὰ συμβαίνει λέγειν ἄτοπα, δῆλον· ὅπως δὲ θετέον, λέγομεν νῦν. τῶν δὲ κατηγορουμένων, καὶ ἐφ' οἷς κατηγορεῖσθαι συμβαίνει, ὅσα μὲν λέγεται κατὰ συμβεβηκός ἢ κατὰ τοῦ αὐτοῦ ἢ θάτερον κατὰ θατέρου, ταῦτα οὐκ ἔσται ἓν· οἷον ἄνθρωπος λευκός ἐστὶ καὶ μουσικός, ἀλλ' οὐχ ἓν τὸ λευκόν καὶ τὸ μουσικόν· συμβεβηκότα γὰρ

ἄμφω τῷ αὐτῷ. οὐδ' εἰ τὸ λευκὸν μουσικὸν ἀληθὲς εἶπεῖν, ὅμως οὐκ ἔσται τὸ μουσικὸν λευκὸν ἔν τι· κατὰ συμβεβηκὸς γὰρ τὸ μουσικὸν λευκόν, ὥστε οὐκ ἔσται τὸ λευκὸν μουσικόν. διὸ οὐδ' ὁ σκυτεὺς ἀπλῶς ἀγαθός, ἀλλὰ ζῶον δίπουν· οὐ γὰρ κατὰ συμβεβηκός. ἔτι οὐδ' ὅσα ἐνυπάρχει ἐν τῷ ἐτέρῳ· διὸ οὔτε τὸ λευκὸν πολλακίς οὔτε ὁ ἄνθρωπος ἄνθρωπος ζῶον ἢ δίπουν· ἐνυπάρχει γὰρ ἐν τῷ ἀνθρώπῳ τὸ δίπουν καὶ τὸ ζῶον. ἀληθὲς δ' ἐστὶν εἶπεῖν κατὰ τοῦ τινὸς καὶ ἀπλῶς, οἷον τὸν τινὰ ἄνθρωπον ἄνθρωπον ἢ τὸν τινὰ λευκὸν ἄνθρωπον λευκόν· οὐκ ἀεὶ δέ, ἀλλ' ὅταν μὲν ἐν τῷ προσκειμένῳ τῶν ἀντικειμένων τι ἐνυπάρχη οἷς ἔπεται ἀντίφασις, οὐκ ἀληθὲς ἀλλὰ ψεῦδος, — οἷον τὸν τεθνεῶτα ἄνθρωπον ἄνθρωπον εἶπεῖν, — ὅταν δὲ μὴ ἐνυπάρχη, ἀληθὲς. ἢ ὅταν μὲν ἐνυπάρχη, ἀεὶ οὐκ ἀληθὲς, ὅταν δὲ μὴ ἐνυπάρχη, οὐκ ἀεὶ ἀληθὲς· ὥσπερ Ὅμηρός ἐστί τι, οἷον ποιητής· ἄρ' οὐ καὶ ἔστιν, ἢ οὐ; κατὰ συμβεβηκὸς γὰρ κατηγορεῖται τὸ ἔστιν τοῦ Ὀμήρου· ὅτι γὰρ ποιητής ἐστίν, ἀλλ' οὐ καθ' αὐτό, κατηγορεῖται κατὰ τοῦ Ὀμήρου τὸ ἔστιν. ὥστ' ἐν ὅσαις κατηγορίαις μήτε ἐναντιότης ἔνεστιν, ἐὰν λόγοι ἀντ' ὀνομάτων λέγωνται, καὶ καθ' αὐτὰ κατηγορῇται καὶ μὴ κατὰ συμβεβηκός, ἐπὶ τούτων τὸ τι καὶ ἀπλῶς ἀληθὲς ἔσται εἶπεῖν. τὸ δὲ μὴ ὄν, ὅτι δοξαστόν, οὐκ ἀληθὲς εἶπεῖν ὄν τι· δόξα γὰρ αὐτοῦ οὐκ ἔστιν ὅτι ἔστιν, ἀλλ' ὅτι οὐκ ἔστιν.

Τούτων δὲ διωρισμένων σκεπτέον ὅπως ἔχουσιν αἱ ἀποφάσεις καὶ καταφάσεις πρὸς ἀλλήλας αἱ τοῦ δυνατόν εἶναι καὶ μὴ δυνατόν, καὶ ἐνδεχόμενον καὶ μὴ ἐνδεχόμενον, καὶ περὶ τοῦ ἀδυνάτου τε καὶ ἀναγκαίου· ἔχει γὰρ ἀπορίας τινάς. εἰ γὰρ τῶν συμπλεκομένων αὐται ἀλλήλαις ἀντίκεινται αἱ ἀντιφάσεις, ὅσαι κατὰ τὸ εἶναι καὶ μὴ εἶναι τάττονται, οἷον [21b] τοῦ εἶναι ἄνθρωπον ἀπόφασις τὸ μὴ εἶναι ἄνθρωπον, οὐ τὸ εἶναι μὴ ἄνθρωπον, καὶ τοῦ εἶναι λευκὸν ἄνθρωπον τὸ μὴ εἶναι λευκὸν ἄνθρωπον, ἀλλ' οὐ τὸ εἶναι μὴ λευκὸν ἄνθρωπον, — εἰ γὰρ κατὰ παντὸς ἡ κατάφασις ἢ ἡ ἀπόφασις, τὸ ξύλον ἔσται ἀληθές εἰπεῖν εἶναι μὴ λευκὸν ἄνθρωπον· εἰ δὲ οὕτως, καὶ ὅσοις τὸ εἶναι μὴ προστίθεται, τὸ αὐτὸ ποιήσει τὸ ἀντὶ τοῦ εἶναι λεγόμενον, οἷον τοῦ ἄνθρωπος βαδίζει οὐ τὸ οὐκ ἄνθρωπος βαδίζει ἀπόφασις, ἀλλὰ τὸ οὐ βαδίζει ἄνθρωπος· οὐδὲν γὰρ διαφέρει εἰπεῖν ἄνθρωπον βαδίζειν ἢ ἄνθρωπον βαδίζοντα εἶναι· — ὥστε εἰ οὕτω πανταχοῦ, καὶ τοῦ δυνατόν εἶναι ἀπόφασις τὸ δυνατόν μὴ εἶναι, ἀλλ' οὐ τὸ μὴ δυνατόν εἶναι. δοκεῖ δὲ τὸ αὐτὸ δύνασθαι καὶ εἶναι καὶ μὴ εἶναι· πᾶν γὰρ τὸ δυνατόν τέμνεσθαι ἢ βαδίζειν καὶ μὴ βαδίζειν καὶ μὴ τέμνεσθαι δυνατόν· λόγος δ' ὅτι ἅπαν τὸ οὕτω δυνατόν οὐκ αἰεὶ ἐνεργεῖ, ὥστε ὑπάρξει αὐτῷ καὶ ἡ ἀπόφασις· δύναται γὰρ καὶ μὴ βαδίζειν τὸ βαδιστικὸν καὶ μὴ ὁρᾶσθαι τὸ ὁρατόν. ἀλλὰ μὴν ἀδύνατον κατὰ τοῦ αὐτοῦ ἀληθεύεσθαι τὰς ἀντικειμένους φάσεις· οὐκ ἄρα αὕτη ἀπόφασις· συμβαίνει γὰρ ἐκ τούτων ἢ τὸ αὐτὸ φάναι καὶ ἀποφάναι ἅμα κατὰ τοῦ αὐτοῦ, ἢ μὴ κατὰ τὸ εἶναι καὶ μὴ εἶναι τὰ προστιθέμενα γίνεσθαι φάσεις καὶ ἀποφάσεις. εἰ οὖν ἐκεῖνο ἀδύνατον, τοῦτ' ἂν εἴη αἰρετόν. ἔστιν ἄρα ἀπόφασις τοῦ δυνατόν εἶναι τὸ μὴ δυνατόν εἶναι. ὁ δ' αὐτὸς λόγος καὶ περὶ τοῦ ἐνδεχόμενον εἶναι· καὶ γὰρ τούτου ἀπόφασις τὸ μὴ ἐνδεχόμενον εἶναι. καὶ ἐπὶ τῶν ἄλλων δὲ ὁμοιοτρόπως, οἷον ἀναγκαίου τε καὶ ἀδυνάτου. γίγνεται γάρ, ὥσπερ ἐπ' ἐκείνων τὸ εἶναι καὶ μὴ εἶναι προσθέσεις, τὰ δ' ὑποκείμενα πράγματα τὸ μὲν λευκὸν τὸ δὲ ἄνθρωπος, οὕτως ἐνταῦθα τὸ μὲν εἶναι ὡς ὑποκείμενον γίγνεται, τὸ δὲ δύνασθαι καὶ ἐνδέχεσθαι προσθέσεις διορίζουσαι, ὥσπερ ἐπ' ἐκείνων τὸ εἶναι καὶ μὴ εἶναι τὸ ἀληθές, ὁμοίως αὐται ἐπὶ τοῦ εἶναι δυνατόν καὶ εἶναι οὐ δυνατόν.

Τοῦ δὲ δυνατόν μὴ εἶναι ἀπόφασις τὸ οὐ δυνατόν μὴ εἶναι. διὸ καὶ

ἀκολουθεῖν ἂν δόξαιεν ἀλλήλαις αἱ δυνατόν εἶναι — δυνατόν μὴ εἶναι· τὸ γὰρ αὐτὸ δυνατόν εἶναι καὶ μὴ εἶναι· οὐ γὰρ ἀντιφάσεις ἀλλήλων αἱ τοιαῦται. ἀλλὰ τὸ δυνατόν εἶναι καὶ [22a] μὴ δυνατόν εἶναι οὐδέποτε ἅμα· ἀντίκεινται γάρ. οὐδέ γε τὸ δυνατόν μὴ εἶναι καὶ οὐ δυνατόν μὴ εἶναι οὐδέποτε ἅμα. ὁμοίως δὲ καὶ τοῦ ἀναγκαῖον εἶναι ἀπόφασις οὐ τὸ ἀναγκαῖον μὴ εἶναι, ἀλλὰ τὸ μὴ ἀναγκαῖον εἶναι· τοῦ δὲ ἀναγκαῖον μὴ εἶναι τὸ μὴ ἀναγκαῖον μὴ εἶναι. καὶ τοῦ ἀδύνατον εἶναι οὐ τὸ ἀδύνατον μὴ εἶναι, ἀλλὰ τὸ μὴ ἀδύνατον εἶναι· τοῦ δὲ ἀδύνατον μὴ εἶναι τὸ οὐκ ἀδύνατον μὴ εἶναι. — καὶ καθόλου δέ, ὥσπερ εἴρηται, τὸ μὲν εἶναι καὶ μὴ εἶναι δεῖ τιθέναι ὥς τὰ ὑποκείμενα, κατάφασιν δὲ καὶ ἀπόφασιν ταῦτα ποιοῦντα πρὸς τὸ εἶναι καὶ μὴ εἶναι συνάπτειν. καὶ ταύτας οἶεσθαι χρή εἶναι τὰς ἀντικειμένας φάσεις, δυνατόν — οὐ δυνατόν, ἐνδεχόμενον — οὐκ ἐνδεχόμενον, ἀδύνατον — οὐκ ἀδύνατον, ἀναγκαῖον — οὐκ ἀναγκαῖον, ἀληθές — οὐκ ἀληθές.

Κεφάλαιο 13

Καὶ αἱ ἀκολουθήσεις δὲ κατὰ λόγον γίνονται οὕτω τιθεμένοις· τῷ μὲν γὰρ δυνατῷ εἶναι τὸ ἐνδέχεσθαι εἶναι, καὶ τοῦτο ἐκείνῳ ἀντιστρέφει, καὶ τὸ μὴ ἀδύνατον εἶναι καὶ τὸ μὴ ἀναγκαῖον εἶναι· τῷ δὲ δυνατῷ μὴ εἶναι καὶ ἐνδεχομένῳ μὴ εἶναι τό τε μὴ ἀναγκαῖον μὴ εἶναι καὶ οὐκ ἀδύνατον μὴ εἶναι, τῷ δὲ μὴ δυνατῷ εἶναι καὶ μὴ ἐνδεχομένῳ εἶναι τὸ ἀναγκαῖον μὴ εἶναι καὶ τὸ ἀδύνατον εἶναι, τῷ δὲ μὴ δυνατῷ μὴ εἶναι καὶ μὴ ἐνδεχομένῳ μὴ εἶναι τὸ ἀναγκαῖον εἶναι καὶ τὸ ἀδύνατον μὴ εἶναι. θεωρεῖσθω δὲ ἐκ τῆς ὑπογραφῆς ὡς λέγομεν·

δυνατὸν εἶναι οὐ δυνατὸν εἶναι

ἐνδεχόμενον εἶναι οὐκ ἐνδεχόμενον εἶναι

οὐκ ἀδύνατον εἶναι ἀδύνατον εἶναι

οὐκ ἀναγκαῖον εἶναι ἀναγκαῖον εἶναι

δυνατὸν μὴ εἶναι οὐ δυνατὸν μὴ εἶναι

δυνατὸν μὴ εἶναι οὐ δυνατὸν μὴ εἶναι

ἐνδεχόμενον μὴ εἶναι οὐκ ἐνδεχόμενον μὴ εἶναι

οὐκ ἀδύνατον μὴ εἶναι ἀδύνατον μὴ εἶναι

οὐκ ἀναγκαῖον μὴ εἶναι ἀναγκαῖον εἶναι.

Τὸ μὲν οὖν ἀδύνατον καὶ οὐκ ἀδύνατον τῷ ἐνδεχομένῳ καὶ δυνατῷ καὶ οὐκ ἐνδεχομένῳ καὶ μὴ δυνατῷ ἀκολουθεῖ μὲν ἀντιφατικῶς, ἀντεστραμμένως δέ· τῷ μὲν γὰρ δυνατῷ εἶναι ἢ ἀπόφασις τοῦ ἀδυνάτου, τῇ δὲ ἀποφάσει ἢ κατάφασις· τῷ γὰρ οὐ δυνατῷ εἶναι τὸ ἀδύνατον εἶναι· κατάφασις γὰρ τὸ ἀδύνατον εἶναι, τὸ δὲ οὐκ ἀδύνατον ἀπόφασις.

Τὸ δ' ἀναγκαῖον πῶς, ὁπότεον. φανερόν δὴ ὅτι οὐχ οὕτως, ἀλλ' αἱ ἐναντίαι ἔπονται, αἱ δ' ἀντιφάσεις χωρὶς. οὐ γάρ ἐστιν [22b]

ἀπόφασις τοῦ ἀνάγκη μὴ εἶναι τὸ οὐκ ἀνάγκη εἶναι· ἐνδέχεται γὰρ ἀληθεύεσθαι ἐπὶ τοῦ αὐτοῦ ἀμφοτέρως· τὸ γὰρ ἀναγκαῖον μὴ εἶναι οὐκ ἀναγκαῖον εἶναι. αἴτιον δὲ τοῦ μὴ ἀκολουθεῖν ὁμοίως τοῖς ἑτέροις ὅτι ἐναντίως τὸ ἀδύνατον τῷ ἀναγκαίῳ ἀποδίδοται, τὸ αὐτὸ δυνάμενον· εἰ γὰρ ἀδύνατον εἶναι, ἀναγκαῖον τοῦτο οὐχὶ εἶναι ἀλλὰ μὴ εἶναι· εἰ δὲ ἀδύνατον μὴ εἶναι, τοῦτο ἀνάγκη εἶναι· ὥστ' εἰ ἐκεῖνα ὁμοίως τῷ δυνατῷ καὶ μὴ, ταῦτα ἐξ ἐναντίας, ἐπεὶ σημαίνει γε ταῦτόν τό τε ἀναγκαῖον καὶ τὸ ἀδύνατον, ἀλλ' ὥσπερ εἴρηται, ἀντεστραμμένως. ἢ ἀδύνατον οὕτω κεῖσθαι τὰς τοῦ ἀναγκαίου ἀντιφάσεις; τὸ μὲν γὰρ ἀναγκαῖον εἶναι δυνατόν εἶναι· εἰ γὰρ μὴ, ἢ ἀπόφασις ἀκολουθήσει· ἀνάγκη γὰρ ἢ φάναι ἢ ἀποφάναι· ὥστ' εἰ μὴ δυνατόν εἶναι, ἀδύνατον εἶναι· ἀδύνατον ἄρα εἶναι τὸ ἀναγκαῖον εἶναι, ὅπερ ἄτοπον. ἀλλὰ μὴν τῷ γε δυνατόν εἶναι τὸ οὐκ ἀδύνατον εἶναι ἀκολουθεῖ, τούτῳ δὲ τὸ μὴ ἀναγκαῖον εἶναι· ὥστε συμβαίνει τὸ ἀναγκαῖον εἶναι μὴ ἀναγκαῖον εἶναι, ὅπερ ἄτοπον. ἀλλὰ μὴν οὐδὲ τὸ ἀναγκαῖον εἶναι ἀκολουθεῖ τῷ δυνατόν εἶναι, οὐδὲ τὸ ἀναγκαῖον μὴ εἶναι· τῷ μὲν γὰρ ἅμφω ἐνδέχεται συμβαίνειν, τούτων δ' ὀπότερον ἂν ἀληθὲς ᾖ, οὐκέτι ἔσται ἐκεῖνα ἀληθὴ· ἅμα γὰρ δυνατόν εἶναι καὶ μὴ εἶναι· εἰ δ' ἀνάγκη εἶναι ἢ μὴ εἶναι, οὐκ ἔσται δυνατόν ἅμφω. λείπεται τοίνυν τὸ οὐκ ἀναγκαῖον μὴ εἶναι ἀκολουθεῖν τῷ δυνατόν εἶναι· τοῦτο γὰρ ἀληθὲς καὶ κατὰ τοῦ ἀναγκαῖον εἶναι. καὶ γὰρ αὕτη γίγνεται ἀντίφασις τῇ ἐπομένῃ τῷ οὐ δυνατῷ εἶναι· ἐκεῖνῳ γὰρ ἀκολουθεῖ τὸ ἀδύνατον εἶναι καὶ ἀναγκαῖον μὴ εἶναι, οὗ ἀπόφασις τὸ οὐκ ἀναγκαῖον μὴ εἶναι. ἀκολουθοῦσιν ἄρα καὶ αὗται αἱ ἀντιφάσεις κατὰ τὸν εἰρημένον τρόπον, καὶ οὐδὲν ἀδύνατον συμβαίνει τιθεμένων οὕτως.

Ἀπορήσειε δ' ἂν τις εἰ τῷ ἀναγκαῖον εἶναι τὸ δυνατόν εἶναι ἔπεται. εἴ τε γὰρ μὴ ἔπεται, ἢ ἀντίφασις ἀκολουθήσει, τὸ μὴ δυνατόν εἶναι· καὶ εἴ τις ταύτην μὴ φήσειεν εἶναι ἀντίφασιν, ἀνάγκη λέγειν τὸ δυνατόν μὴ εἶναι· ἅπερ ἅμφω ψευδὴ κατὰ τοῦ ἀναγκαῖον εἶναι. ἀλλὰ μὴν πάλιν τὸ αὐτὸ εἶναι δοκεῖ δυνατόν τέμνεσθαι καὶ μὴ τέμνεσθαι, καὶ εἶναι καὶ μὴ εἶναι, ὥστε ἔσται τὸ ἀναγκαῖον εἶναι ἐνδεχόμενον μὴ εἶναι· τοῦτο δὲ ψεῦδος. φανερόν δὴ ὅτι οὐ πᾶν τὸ δυνατόν ἢ εἶναι ἢ βαδίζειν καὶ τὰ ἀντικείμενα δύναται, ἀλλ' ἔστιν ἐφ' ὧν οὐκ ἀληθές· πρῶτον μὲν ἐπὶ τῶν μὴ κατὰ λόγον δυνατῶν, οἷον τὸ πῦρ θερμαντικὸν καὶ ἔχει δύναμιν ἄλογον, — αἱ μὲν οὖν μετὰ λόγου [23a] δυνάμεις αἱ αὗται πλειόνων καὶ τῶν ἐναντίων, αἱ δ' ἄλογοι οὐ

πᾶσαι, ἀλλ' ὥσπερ εἴρηται, τὸ πῦρ οὐ δυνατόν θερμαίνειν καὶ μῆ, οὐδ' ὅσα ἄλλα ἐνεργεῖ ἀεί· ἓνια μέντοι δύναται καὶ τῶν κατὰ τὰς ἀλόγους δυνάμεις ἅμα τὰ ἀντικείμενα· ἀλλὰ τοῦτο μὲν τούτου χάριν εἴρηται, ὅτι οὐ πᾶσα δύναμις τῶν ἀντικειμένων, οὐδ' ὅσαι λέγονται κατὰ τὸ αὐτὸ εἶδος, — ἓναι δὲ δυνάμεις ὁμώνυμοί εἰσιν· τὸ γὰρ δυνατόν οὐχ ἀπλῶς λέγεται, ἀλλὰ τὸ μὲν ὅτι ἀληθές ὡς ἐνεργεῖα ὄν, οἷον δυνατόν βαδίζειν ὅτι βαδίζει, καὶ ὅλως δυνατόν εἶναι ὅτι ἤδη ἔστι κατ' ἐνέργειαν ὃ λέγεται δυνατόν, τὸ δὲ ὅτι ἐνεργήσειεν ἄν, οἷον δυνατόν βαδίζειν ὅτι βαδίσειεν ἄν. καὶ αὕτη μὲν ἐπὶ τοῖς κινητοῖς ἐστὶ μόνοις ἢ δυνάμεις, ἐκείνη δὲ καὶ ἐπὶ τοῖς ἀκινήτοις· ἅμφω δὲ ἀληθές εἶπεῖν τὸ μὴ ἀδύνατον εἶναι βαδίζειν ἢ εἶναι, καὶ τὸ βαδίζον ἤδη καὶ ἐνεργοῦν καὶ τὸ βαδιστικόν. τὸ μὲν οὖν οὕτω δυνατόν οὐκ ἀληθές κατὰ τοῦ ἀναγκαίου ἀπλῶς εἶπεῖν, θάτερον δὲ ἀληθές. ὥστε, ἐπεὶ τῷ ἐν μέρει τὸ καθόλου ἔπεται, τῷ ἐξ ἀνάγκης ὄντι ἔπεται τὸ δύνασθαι εἶναι, οὐ μέντοι πᾶν. καὶ ἔστι δὴ ἀρχὴ ἴσως τὸ ἀναγκαῖον καὶ μὴ ἀναγκαῖον πάντων ἢ εἶναι ἢ μὴ εἶναι, καὶ τὰ ἄλλα ὡς τούτοις ἀκολουθοῦντα ἐπισκοπεῖν δεῖ. Φανερόν δὴ ἐκ τῶν εἰρημένων ὅτι τὸ ἐξ ἀνάγκης ὄν κατ' ἐνέργειάν ἐστιν, ὥστε εἰ πρότερα τὰ αἰδία, καὶ ἐνέργεια δυνάμεως προτέρα. καὶ τὰ μὲν ἄνευ δυνάμεως ἐνέργειαι εἰσιν, οἷον αἱ πρῶται οὐσίαι, τὰ δὲ μετὰ δυνάμεως, ἃ τῇ μὲν φύσει πρότερα, τῷ χρόνῳ δὲ ὕστερα, τὰ δὲ οὐδέποτε ἐνέργειαι εἰσιν ἀλλὰ δυνάμεις μόνον.

Κεφάλαιο 14

Πότερον δὲ ἐναντία ἐστὶν ἡ κατάφασις τῇ ἀποφάσει ἢ ἡ κατάφασις τῇ καταφάσει, καὶ ὁ λόγος τῷ λόγῳ ὁ λέγων ὅτι πᾶς ἄνθρωπος δίκαιος τῷ οὐδεὶς ἄνθρωπος δίκαιος, ἢ τὸ πᾶς ἄνθρωπος δίκαιος τῷ πᾶς ἄνθρωπος ἄδικος; οἷον ἔστι Καλλίας δίκαιος — οὐκ ἔστι Καλλίας δίκαιος — Καλλίας ἄδικός ἐστιν, ποτέρα ἐναντία τούτων; — εἰ γὰρ τὰ μὲν ἐν τῇ φωνῇ ἀκολουθεῖ τοῖς ἐν τῇ διανοίᾳ, ἐκεῖ δ' ἐναντία δόξα ἢ τοῦ ἐναντίου, οἷον ὅτι πᾶς ἄνθρωπος δίκαιος τῇ πᾶς ἄνθρωπος ἄδικος, καὶ ἐπὶ τῶν ἐν τῇ φωνῇ καταφάσεων ἀνάγκη ὁμοίως ἔχειν. εἰ δὲ μηδὲ ἐκεῖ ἢ τοῦ ἐναντίου δόξα ἐναντία ἐστίν, οὐδ' ἡ κατάφασις τῇ καταφάσει ἔσται ἐναντία, ἀλλ' ἡ εἰρημένη ἀπόφασις. ὥστε σκεπτέον ποία δόξα ἀληθὴς ψευδεῖ δόξῃ ἐναντία, πότερον ἡ τῆς ἀποφάσεως ἢ ἡ τὸ ἐναντίον εἶναι δοξάζουσα. λέγω δὲ ὧδε· ἔστι τις δόξα ἀληθὴς τοῦ ἀγαθοῦ ὅτι ἀγαθόν, ἄλλη δὲ [23b] ὅτι οὐκ ἀγαθὸν ψευδής, ἐτέρα δὲ ὅτι κακόν· ποτέρα δὴ τούτων ἐναντία τῇ ἀληθεῖ; καὶ εἰ ἔστι μία, κατὰ ποτέραν ἐναντία; (τὸ μὲν δὴ τούτῳ οἶσθαι τὰς ἐναντίας δόξας ὀρίσθαι, τῷ τῶν ἐναντίων εἶναι, ψεῦδος· τοῦ γὰρ ἀγαθοῦ ὅτι ἀγαθὸν καὶ τοῦ κακοῦ ὅτι κακόν ἢ αὐτὴ ἴσως καὶ ἀληθής, εἴτε πλείους εἴτε μία ἐστίν· ἐναντία δὲ ταῦτα· ἀλλ' οὐ τῷ ἐναντίων εἶναι ἐναντία, ἀλλὰ μᾶλλον τῷ ἐναντίως.)

Εἰ δὴ ἔστι μὲν τοῦ ἀγαθοῦ ὅτι ἐστὶν ἀγαθὸν δόξα, ἔστι δ' ὅτι οὐκ ἀγαθόν, ἔστι δὲ ὅτι ἄλλο τι ὃ οὐχ ὑπάρχει οὐδ' οἷόν τε ὑπάρξει (τῶν μὲν δὴ ἄλλων οὐδεμίαν θετέον, οὐθ' ὅσαι ὑπάρχειν τὸ μὴ ὑπάρχον δοξάζουσιν οὐθ' ὅσαι μὴ ὑπάρχειν τὸ ὑπάρχον, — ἄπειροι γὰρ ἀμφοτέραι, καὶ ὅσαι ὑπάρχειν δοξάζουσι τὸ μὴ ὑπάρχον καὶ ὅσαι μὴ ὑπάρχειν τὸ ὑπάρχον, — ἀλλ' ἐν ὅσαις ἐστὶν ἡ ἀπάτη· αὗται δὲ ἐξ ὧν αἱ γενέσεις· ἐκ τῶν ἀντικειμένων δὲ αἱ γενέσεις, ὥστε καὶ αἱ ἀπάται), εἰ οὖν τὸ ἀγαθὸν καὶ ἀγαθὸν καὶ οὐ κακόν ἐστὶν, καὶ τὸ μὲν καθ' αὐτὸ τὸ δὲ κατὰ συμβεβηκός (συμβέβηκε γὰρ αὐτῷ οὐ κακῷ εἶναι), μᾶλλον δ' ἐκάστου ἀληθὴς ἢ καθ' αὐτό, καὶ ψευδὴς εἴπερ καὶ ἀληθής. — ἡ μὲν οὖν ὅτι οὐκ ἀγαθὸν τὸ ἀγαθὸν τοῦ καθ' αὐτὸ ὑπάρχοντος ψευδής, ἢ δὲ τοῦ ὅτι κακόν τοῦ κατὰ συμβεβηκός, ὥστε μᾶλλον ἂν εἴη ψευδὴς τοῦ ἀγαθοῦ ἢ τῆς ἀποφάσεως ἢ ἡ τοῦ ἐναντίου. διέψευσται δὲ μάλιστα περὶ ἑκάστον ὁ τὴν ἐναντίαν ἔχων δόξαν· τὰ γὰρ ἐναντία τῶν πλείστον διαφερόντων περὶ τὸ αὐτό. εἰ

οὖν ἐναντία μὲν τούτων ἡ ἑτέρα, ἐναντιωτέρα δὲ ἡ τῆς ἀντιφάσεως, δῆλον ὅτι αὕτη ἂν εἴη ἡ ἐναντία. ἡ δὲ τοῦ ὅτι κακὸν τὸ ἀγαθὸν συμπεπλεγμένη ἐστίν· καὶ γὰρ ὅτι οὐκ ἀγαθὸν ἀνάγκη ἴσως ὑπολαμβάνειν τὸν αὐτόν.

Ἔτι δ' εἰ καὶ ἐπὶ τῶν ἄλλων ὁμοίως δεῖ ἔχειν, καὶ ταύτη ἂν δόξειε καλῶς εἰρησθαι· ἡ γὰρ παν — ταχοῦ τὸ τῆς ἀντιφάσεως ἢ οὐδαμοῦ· ὅσοις δὲ μὴ ἐστὶν ἐναντία, περὶ τούτων ἔστι μὲν ψευδὴς ἡ τῇ ἀληθεῖ ἀντικειμένη, οἷον ὁ τὸν ἄνθρωπον μὴ ἄνθρωπον οἰόμενος διέψευσται. εἰ οὖν αὗται ἐναντίαι, καὶ αἱ ἄλλαι αἱ τῆς ἀντιφάσεως.

Ἔτι ὁμοίως ἔχει ἡ τοῦ ἀγαθοῦ ὅτι ἀγαθὸν καὶ ἡ τοῦ μὴ ἀγαθοῦ ὅτι οὐκ ἀγαθόν, καὶ πρὸς ταύταις ἡ τοῦ ἀγαθοῦ ὅτι οὐκ ἀγαθὸν καὶ ἡ τοῦ μὴ ἀγαθοῦ ὅτι ἀγαθόν. τῇ οὖν τοῦ μὴ ἀγαθοῦ ὅτι οὐκ ἀγαθὸν ἀληθεῖ οὔση δόξη τίς ἐναντία; οὐ γὰρ δὴ ἡ λέγουσα ὅτι κακόν· ἅμα γὰρ ἂν ποτε εἴη ἀληθὴς, οὐδέποτε δὲ ἀληθὴς ἀληθεῖ ἐναντία· ἔστι γάρ τι μὴ ἀγαθὸν κακόν, ὥστε ἐνδέχεται ἅμα ἀληθεῖς εἶναι. οὐδ' αὖ ἡ ὅτι οὐ κακόν· [ἀληθὴς γὰρ καὶ αὕτη·] ἅμα γὰρ καὶ ταῦτα ἂν εἴη. λείπεται δὴ τῇ τοῦ μὴ ἀγαθοῦ [24a] ὅτι οὐκ ἀγαθὸν ἐναντία ἡ τοῦ μὴ ἀγαθοῦ ὅτι ἀγαθόν [ψευδὴς· ἀληθὴς γὰρ αὕτη]. ὥστε καὶ ἡ τοῦ ἀγαθοῦ ὅτι οὐκ ἀγαθὸν τῇ τοῦ ἀγαθοῦ ὅτι ἀγαθόν.

Φανερόν δὲ ὅτι οὐδὲν διοίσει οὐδ' ἂν καθόλου τιθώμεν τὴν κατάφασιν· ἡ γὰρ καθόλου ἀποφασὶς ἐναντία ἔσται, οἷον τῇ δόξῃ τῇ δοξαζούσῃ ὅτι πᾶν ἀγαθὸν ἀγαθόν ἢ ὅτι οὐδὲν τῶν ἀγαθῶν ἀγαθόν. ἡ γὰρ τοῦ ἀγαθοῦ ὅτι ἀγαθόν, εἰ καθόλου τὸ ἀγαθόν, ἡ αὕτη ἐστὶ τῇ ὅτι πᾶν ἢ ἀγαθὸν δοξαζούσῃ ὅτι ἀγαθόν· τοῦτο δὲ οὐδὲν διαφέρει τοῦ ὅτι πᾶν ὃ ἂν ἢ ἀγαθὸν ἀγαθόν ἐστίν. ὁμοίως δὲ καὶ ἐπὶ τοῦ μὴ [24b] ἀγαθοῦ.

Ὡστ' εἵπερ ἐπὶ δόξης οὕτως ἔχει, εἰσὶ δὲ αἱ ἐν τῇ φωνῇ καταφάσεις καὶ ἀποφάσεις σύμβολα τῶν ἐν τῇ ψυχῇ, δῆλον ὅτι καὶ καταφάσει ἐναντία μὲν ἀπόφασις ἢ περὶ τοῦ αὐτοῦ καθόλου, οἷον <τῇ> ὅτι πᾶν ἀγαθὸν ἀγαθόν ἢ ὅτι πᾶς ἄνθρωπος ἀγαθός ἢ ὅτι οὐδὲν ἢ οὐδεὶς, ἀντιφατικῶς δὲ ὅτι ἢ οὐ πᾶν ἢ οὐ πᾶς. φανερόν δὲ καὶ ὅτι ἀληθῇ ἀληθεῖ οὐκ ἐνδέχεται ἐναντίαν εἶναι οὔτε δόξαν οὔτε ἀντίφασιν· ἐναντίαι μὲν γὰρ αἱ περὶ τὰ ἀντικείμενα, περὶ ταῦτα δ' ἐνδέχεται ἀληθεύειν τὸν αὐτόν· ἅμα δὲ οὐκ ἐνδέχεται τὰ ἐναντία ὑπάρχειν τῷ αὐτῷ.

Κεφάλαιο 1

[24a] Πρῶτον εἰπεῖν περὶ τί καὶ τίνος ἐστὶν ἡ σκέψις, ὅτι περὶ ἀπόδειξιν καὶ ἐπιστήμης ἀποδεικτικῆς· εἴτα διορίσαι τί ἐστὶ πρότασις καὶ τί ὅρος καὶ τί συλλογισμός, καὶ ποῖος τέλειος καὶ ποῖος ἀτελής, μετὰ δὲ ταῦτα τί τὸ ἐν ὅλῳ εἶναι ἢ μὴ εἶναι τότε τῷδε, καὶ τί λέγομεν τὸ κατὰ παντὸς ἢ μηδενὸς κατηγορεῖσθαι.

Πρότασις μὲν οὖν ἐστὶ λόγος καταφατικὸς ἢ ἀποφατικὸς τινος κατὰ τινος· οὗτος δὲ ἢ καθόλου ἢ ἐν μέρει ἢ ἀδιόριστος. λέγω δὲ καθόλου μὲν τὸ παντὶ ἢ μηδενὶ ὑπάρχειν, ἐν μέρει δὲ τὸ τινὶ ἢ μὴ τινὶ ἢ μὴ παντὶ ὑπάρχειν, ἀδιόριστον δὲ τὸ ὑπάρχειν ἢ μὴ ὑπάρχειν ἄνευ τοῦ καθόλου ἢ κατὰ μέρος, οἷον τὸ τῶν ἐναντίων εἶναι τὴν αὐτὴν ἐπιστήμην ἢ τὸ τὴν ἡδονὴν μὴ εἶναι ἀγαθόν. διαφέρει δὲ ἡ ἀποδεικτικὴ πρότασις τῆς διαλεκτικῆς, ὅτι ἡ μὲν ἀποδεικτικὴ λήψις θατέρου μορίου τῆς ἀντιφάσεως ἐστὶν (οὐ γὰρ ἐρωτᾷ ἀλλὰ λαμβάνει ὁ ἀποδεικνύων), ἡ δὲ διαλεκτικὴ ἐρώτησις ἀντιφάσεως ἐστὶν. οὐδὲν δὲ διοίσει πρὸς τὸ γενέσθαι τὸν ἑκατέρου συλλογισμόν· καὶ γὰρ ὁ ἀποδεικνύων καὶ ὁ ἐρωτῶν συλλογίζεται λαβὼν τι κατὰ τινος ὑπάρχειν ἢ μὴ ὑπάρχειν. ὥστε ἔσται συλλογιστικὴ μὲν πρότασις ἀπλῶς κατάφασις ἢ ἀπόφασις τινος κατὰ τινος τὸν εἰρημένον τρόπον, ἀποδεικτικὴ δέ, ἐὰν ἀληθὴς ἢ καὶ διὰ τῶν ἐξ ἀρχῆς [24b] ὑποθέσεων εἰλημμένη, διαλεκτικὴ δὲ πυνθανομένῳ μὲν ἐρώτησις ἀντιφάσεως, συλλογιζομένῳ δὲ λήψις τοῦ φαινομένου καὶ ἐνδόξου, καθάπερ ἐν τοῖς Τοπικοῖς εἴρηται. τί μὲν οὖν ἐστὶ πρότασις, καὶ τί διαφέρει συλλογιστικὴ καὶ ἀποδεικτικὴ καὶ διαλεκτικὴ, δι' ἀκριβείας μὲν ἐν τοῖς ἐπομένοις ῥηθήσεται, πρὸς δὲ τὴν παροῦσαν χρεῖαν ἱκανῶς ἡμῖν διωρίσθω τὰ νῦν.

Ὅρον δὲ καλῶ εἰς ὃν διαλύεται ἡ πρότασις, οἷον τό τε κατηγορούμενον καὶ τὸ καθ' οὗ κατηγορεῖται, προστιθεμένου [ἢ διαιρουμένου] τοῦ εἶναι ἢ μὴ εἶναι. συλλογισμὸς δὲ ἐστὶ λόγος ἐνῶ τεθέντων τινῶν ἕτερόν τι τῶν κειμένων ἐξ ἀνάγκης συμβαίνει τῷ ταῦτα εἶναι. λέγω δὲ τῷ ταῦτα εἶναι τὸ διὰ ταῦτα συμβαίνειν, τὸ δὲ διὰ ταῦτα συμβαίνειν τὸ μηδενὸς ἐξωθεν ὅρου προσδεῖν πρὸς τὸ γενέσθαι τὸ ἀναγκαῖον. τέλειον μὲν οὖν καλῶ συλλογισμόν τὸν μηδενὸς ἄλλου προσδεόμενον παρὰ τὰ εἰλημμένα πρὸς τὸ φανῆναι τὸ ἀναγκαῖον, ἀτελεῖ δὲ τὸν προσδεόμενον ἢ ἐνὸς ἢ πλειόνων, ἃ ἔστι

μὲν ἀναγκαῖα διὰ τῶν ὑποκειμένων ὅρων, οὐ μὴν εἴληπται διὰ
προτάσεων. τὸ δὲ ἐν ὅλῳ εἶναι ἕτερον ἐτέρῳ καὶ τὸ κατὰ παντὸς
κατηγορεῖσθαι θατέρου θάτερον ταὐτόν ἐστιν. λέγομεν δὲ τὸ κατὰ
παντὸς κατηγορεῖσθαι ὅταν μηδὲν ἢ λαβεῖν [τοῦ ὑποκειμένου] καθ’
οὗ θάτερον οὐ λεχθήσεται· καὶ τὸ κατὰ μηδενὸς ὡσαύτως. [25a]

Κεφάλαιο 2

Ἐπεὶ δὲ πᾶσα πρότασις ἐστὶν ἢ τοῦ ὑπάρχειν ἢ τοῦ ἐξ ἀνάγκης ὑπάρχειν ἢ τοῦ ἐνδέχεσθαι ὑπάρχειν, τούτων δὲ αἱ μὲν καταφατικαὶ αἱ δὲ ἀποφατικαὶ καθ' ἐκάστην πρόσρῃσιν, πάλιν δὲ τῶν καταφατικῶν καὶ ἀποφατικῶν αἱ μὲν καθόλου αἱ δὲ ἐν μέρει αἱ δὲ ἀδιόριστοι, τὴν μὲν ἐν τῷ ὑπάρχειν καθόλου στερητικὴν ἀνάγκη τοῖς ὅροις ἀντιστρέφειν, οἷον εἰ μηδεμία ἡδονὴ ἀγαθόν, οὐδ' ἀγαθόν οὐδὲν ἔσται ἡδονή· τὴν δὲ κατηγορικὴν ἀντιστρέφειν μὲν ἀναγκαῖον, οὐ μὴν καθόλου ἀλλ' ἐν μέρει, οἷον εἰ πᾶσα ἡδονὴ ἀγαθόν, καὶ ἀγαθόν τι εἶναι ἡδονήν· τῶν δὲ ἐν μέρει τὴν μὲν καταφατικὴν ἀντιστρέφειν ἀνάγκη κατὰ μέρος (εἰ γὰρ ἡδονή τις ἀγαθόν, καὶ ἀγαθόν τι ἔσται ἡδονή), τὴν δὲ στερητικὴν οὐκ ἀναγκαῖον· (οὐ γὰρ εἰ ἄνθρωπος μὴ ὑπάρχει τινὶ ζῳῷ, καὶ ζῷον οὐχ ὑπάρχει τινὶ ἀνθρώπῳ).

Πρῶτον μὲν οὖν ἔστω στερητικὴ καθόλου ἢ $A \supset B$ πρότασις. εἰ οὖν μηδενὶ τῷ B τὸ A ὑπάρχει, οὐδὲ τῷ A οὐδενὶ ὑπάρξει τὸ B · εἰ γὰρ τινι, οἷον τῷ Γ , οὐκ ἀληθὲς ἔσται τὸ μηδενὶ τῷ B τὸ A ὑπάρχειν· τὸ γὰρ Γ τῶν B τί ἐστίν. εἰ δὲ παντὶ τὸ A τῷ B , καὶ τὸ B τινὶ τῷ A ὑπάρξει· εἰ γὰρ μηδενί, οὐδὲ τὸ A οὐδενὶ τῷ B ὑπάρξει· ἀλλ' ὑπέκειτο παντὶ ὑπάρχειν. ὁμοίως δὲ καὶ εἰ κατὰ μέρος ἐστὶν ἡ πρότασις. εἰ γὰρ τὸ A τινὶ τῷ B , καὶ τὸ B τινὶ τῷ A ἀνάγκη ὑπάρχειν· εἰ γὰρ μηδενί, οὐδὲ τὸ A οὐδενὶ τῷ B . εἰ δέ γε τὸ A τινὶ τῷ B μὴ ὑπάρχει, οὐκ ἀνάγκη καὶ τὸ B τινὶ τῷ A μὴ ὑπάρχειν, οἷον εἰ τὸ μὲν B ἐστὶ ζῷον, τὸ δὲ A ἄνθρωπος· ἄνθρωπος μὲν γὰρ οὐ παντὶ ζῳῷ, ζῷον δὲ παντὶ ἀνθρώπῳ ὑπάρχει.

Κεφάλαιο 3

Τὸν αὐτὸν δὲ τρόπον ἔξει καὶ ἐπὶ τῶν ἀναγκαίων προτάσεων. ἡ μὲν γὰρ καθόλου στερητικὴ καθόλου ἀντιστρέφει, τῶν δὲ καταφατικῶν ἑκατέρα κατὰ μέρος. εἰ μὲν γὰρ ἀνάγκη τὸ Α τῷ Β μηδενὶ ὑπάρχειν, ἀνάγκη καὶ τὸ Β τῷ Α μηδενὶ ὑπάρχειν· εἰ γὰρ τινὶ ἐνδέχεται, καὶ τὸ Α τῷ Β τινὶ ἐνδέχοιτο ἄν. εἰ δὲ ἐξ ἀνάγκης τὸ Α παντὶ ἢ τινὶ τῷ Β ὑπάρχει, καὶ τὸ Β τινὶ τῷ Α ἀνάγκη ὑπάρχειν· εἰ γὰρ μὴ ἀνάγκη, οὐδ' ἂν τὸ Α τινὶ τῷ Β ἐξ ἀνάγκης ὑπάρχοι. τὸ δ' ἐν μέρει στερητικὸν οὐκ ἀντιστρέφει, διὰ τὴν αὐτὴν αἰτίαν δι' ἣν καὶ πρότερον ἔφαμεν.

Ἐπὶ δὲ τῶν ἐνδεχομένων, ἐπειδὴ πολλαχῶς λέγεται τὸ ἐνδέχεσθαι (καὶ γὰρ τὸ ἀναγκαῖον καὶ τὸ μὴ ἀναγκαῖον καὶ τὸ δυνατόν ἐνδέχεσθαι λέγομεν), ἐν μὲν τοῖς καταφατικοῖς ὁμοίως ἔξει κατὰ τὴν ἀντιστροφὴν ἐν ἅπασιν. εἰ γὰρ τὸ Α [25b] παντὶ ἢ τινὶ τῷ Β ἐνδέχεται, καὶ τὸ Β τινὶ τῷ Α ἐνδέχοιτο ἄν· εἰ γὰρ μηδενί, οὐδ' ἂν τὸ Α οὐδενὶ τῷ Β· δέδεικται γὰρ τοῦτο πρότερον. ἐν δὲ τοῖς ἀποφατικοῖς οὐχ ὡσαύτως, ἀλλ' ὅσα μὲν ἐνδέχεσθαι λέγεται τῷ ἐξ ἀνάγκης ὑπάρχειν ἢ τῷ μὴ ἐξ ἀνάγκης μὴ ὑπάρχειν, ὁμοίως, οἷον εἴ τις φαίη τὸν ἄνθρωπον ἐνδέχεσθαι μὴ εἶναι ἵππον ἢ τὸ λευκὸν μηδενὶ ἱματίῳ ὑπάρχειν (τούτων γὰρ τὸ μὲν ἐξ ἀνάγκης οὐχ ὑπάρχει, τὸ δὲ οὐκ ἀνάγκη ὑπάρχειν, καὶ ὁμοίως ἀντιστρέφει ἡ πρότασις· εἰ γὰρ ἐνδέχεται μηδενὶ ἀνθρώπῳ ἵππον, καὶ ἄνθρωπον ἐγχωρεῖ μηδενὶ ἵππῳ· καὶ εἰ τὸ λευκὸν ἐγχωρεῖ μηδενὶ ἱματίῳ, καὶ τὸ ἱμάτιον ἐγχωρεῖ μηδενὶ λευκῷ· εἰ γὰρ τινὶ ἀνάγκη, καὶ τὸ λευκὸν ἱματίῳ τινὶ ἔσται ἐξ ἀνάγκης· τοῦτο γὰρ δέδεικται πρότερον), ὁμοίως δὲ καὶ ἐπὶ τῆς ἐν μέρει ἀποφατικῆς· ὅσα δὲ τῷ ὡς ἐπὶ τὸ πολὺ καὶ τῷ πεφυκέναι λέγεται ἐνδέχεσθαι, καθ' ὃν τρόπον διορίζομεν τὸ ἐνδεχόμενον, οὐχ ὁμοίως ἔξει ἐν ταῖς στερητικαῖς ἀντιστροφαῖς, ἀλλ' ἡ μὲν καθόλου στερητικὴ πρότασις οὐκ ἀντιστρέφει, ἡ δὲ ἐν μέρει ἀντιστρέφει. τοῦτο δὲ ἔσται φανερόν ὅταν περὶ τοῦ ἐνδεχομένου λέγωμεν. νῦν δὲ τοσοῦτον ἡμῖν ἔστω πρὸς τοῖς εἰρημένοις δῆλον, ὅτι τὸ ἐνδέχεσθαι μηδενὶ ἢ τινὶ μὴ ὑπάρχειν καταφατικὸν ἔχει τὸ σχῆμα (τὸ γὰρ ἐνδέχεται τῷ ἔστιν ὁμοίως τάττεται, τὸ δὲ ἔστιν, οἷς ἂν προσκατηγορηῇται, κατάφασιν ἀεὶ ποιεῖ καὶ πάντως, οἷον τὸ ἔστιν οὐκ ἀγαθόν ἢ ἔστιν οὐ λευκόν ἢ ἀπλῶς τὸ ἔστιν οὐ τοῦτο· δειχθήσεται δὲ

καὶ τοῦτο διὰ τῶν ἐπομένων), κατὰ δὲ τὰς ἀντιστροφὰς ὁμοίως
ἔξουσιν αἱ ἄλλαι.

Κεφάλαιο 4

Διωρισμένων δὲ τούτων λέγωμεν ἤδη διὰ τίνων καὶ πότε καὶ πῶς γίνεται πᾶς συλλογισμός· ὕστερον δὲ λεκτέον περὶ ἀποδείξεως. πρότερον δὲ περὶ συλλογισμοῦ λεκτέον ἢ περὶ ἀποδείξεως διὰ τὸ καθόλου μᾶλλον εἶναι τὸν συλλογισμόν· ἢ μὲν γὰρ ἀπόδειξις συλλογισμός τις, ὁ συλλογισμὸς δὲ οὐ πᾶς ἀπόδειξις.

Ὅταν οὖν ὅροι τρεῖς οὕτως ἔχωσι πρὸς ἀλλήλους ὥστε τὸν ἔσχατον ἐν ὅλῳ εἶναι τῷ μέσῳ καὶ τὸν μέσον ἐν ὅλῳ τῷ πρώτῳ ἢ εἶναι ἢ μὴ εἶναι, ἀνάγκη τῶν ἄκρων εἶναι συλλογισμόν τέλειον. καλῶ δὲ μέσον μὲν ὃ καὶ αὐτὸ ἐν ἄλλῳ καὶ ἄλλο ἐν τούτῳ ἐστίν, ὃ καὶ τῇ θέσει γίνεται μέσον· ἄκρα δὲ τὸ αὐτὸ τε ἐν ἄλλῳ ὄν καὶ ἐν ᾧ ἄλλο ἐστίν. εἰ γὰρ τὸ Α κατὰ παντὸς τοῦ Β καὶ τὸ Β κατὰ παντὸς τοῦ Γ, ἀνάγκη τὸ Α κατὰ παντὸς τοῦ Γ κατηγορεῖσθαι· πρότερον γὰρ εἴρηται πῶς τὸ κατὰ παντὸς λέγομεν. ὁμοίως δὲ καὶ εἰ τὸ μὲν Α κατὰ μη[26a] δενὸς τοῦ Β, τὸ δὲ Β κατὰ παντὸς τοῦ Γ, ὅτι τὸ Α οὐδενὶ τῷ Γ ὑπάρξει. εἰ δὲ τὸ μὲν πρῶτον παντὶ τῷ μέσῳ ἀκολουθεῖ, τὸ δὲ μέσον μηδενὶ τῷ ἐσχάτῳ ὑπάρχει, οὐκ ἔσται συλλογισμὸς τῶν ἄκρων· οὐδὲν γὰρ ἀναγκαῖον συμβαίνει τῷ ταῦτα εἶναι· καὶ γὰρ παντὶ καὶ μηδενὶ ἐνδέχεται τὸ πρῶτον τῷ ἐσχάτῳ ὑπάρχειν, ὥστε οὔτε τὸ κατὰ μέρος οὔτε τὸ καθόλου γίνεται ἀναγκαῖον· μηδενὸς δὲ ὄντος ἀναγκαίου διὰ τούτων οὐκ ἔσται συλλογισμός. ὅροι τοῦ παντὶ ὑπάρχειν ζῶον — ἄνθρωπος — ἵππος, τοῦ μηδενὶ ζῶον — ἄνθρωπος — λίθος. οὐδ' ὅταν μήτε τὸ πρῶτον τῷ μέσῳ μήτε τὸ μέσον τῷ ἐσχάτῳ μηδενὶ ὑπάρχη, οὐδ' οὕτως ἔσται συλλογισμός. ὅροι τοῦ ὑπάρχειν ἐπιστήμη — γραμμὴ — ἰατρικὴ, τοῦ μὴ ὑπάρχειν ἐπιστήμη — γραμμὴ — μονάς. καθόλου μὲν οὖν ὄντων τῶν ὄρων, δῆλον ἐν τούτῳ τῷ σχήματι πότε ἔσται καὶ πότε οὐκ ἔσται συλλογισμός, καὶ ὅτι ὄντος τε συλλογισμοῦ τοὺς ὅρους ἀναγκαῖον ἔχειν ὡς εἵπομεν, ἂν θ' οὕτως ἔχωσιν, ὅτι ἔσται συλλογισμός.

Εἰ δ' ὁ μὲν καθόλου τῶν ὄρων ὁ δ' ἐν μέρει πρὸς τὸν ἕτερον, ὅταν μὲν τὸ καθόλου τεθῇ πρὸς τὸ μείζον ἄκρον ἢ κατηγορικὸν ἢ στερητικόν, τὸ δὲ ἐν μέρει πρὸς τὸ ἔλαττον κατηγορικόν, ἀνάγκη συλλογισμόν εἶναι τέλειον, ὅταν δὲ πρὸς τὸ ἔλαττον ἢ καὶ ἄλλως πῶς ἔχωσιν οἱ ὅροι, ἀδύνατον. λέγω δὲ μείζον μὲν ἄκρον ἐν ᾧ τὸ μέσον ἐστίν, ἔλαττον δὲ τὸ ὑπὸ τὸ μέσον ὄν. ὑπαρχέτω γὰρ τὸ μὲν Α παντὶ

τῷ Β, τὸ δὲ Β τινὶ τῷ Γ. οὐκοῦν εἰ ἔστι παντὸς κατηγορεῖσθαι τὸ ἐν ἀρχῇ λεχθέν, ἀνάγκη τὸ Α τινὶ τῷ Γ ὑπάρχειν. καὶ εἰ τὸ μὲν Α μηδενὶ τῷ Β ὑπάρχει, τὸ δὲ Β τινὶ τῷ Γ, ἀνάγκη τὸ Α τινὶ τῷ Γ μὴ ὑπάρχειν· ὥριστα γὰρ καὶ τὸ κατὰ μηδενὸς πῶς λέγομεν· ὥστε ἔσται συλλογισμὸς τέλειος. ὁμοίως δὲ καὶ εἰ ἀδιόριστον εἴη τὸ Β Γ, κατηγορικὸν ὄν· ὁ γὰρ αὐτὸς ἔσται συλλογισμὸς ἀδιορίστου τε καὶ ἐν μέρει ληφθέντος.

Ἐὰν δὲ πρὸς τὸ ἐλάττον ἄκρον τὸ καθόλου τεθῇ ἢ κατηγορικὸν ἢ στερητικόν, οὐκ ἔσται συλλογισμὸς, οὔτε καταφατικοῦ οὔτε ἀποφατικοῦ τοῦ ἀδιορίστου ἢ κατὰ μέρος ὄντος, οἷον εἰ τὸ μὲν Α τινὶ τῷ Β ὑπάρχει ἢ μὴ ὑπάρχει, τὸ δὲ Β παντὶ τῷ Γ ὑπάρχει· ὅροι τοῦ ὑπάρχειν ἀγαθόν — ἕξις — φρόνησις, τοῦ μὴ ὑπάρχειν ἀγαθόν — ἕξις — ἀμαθία. πάλιν εἰ τὸ μὲν Β μηδενὶ τῷ Γ, τὸ δὲ Α τινὶ τῷ Β ἢ ὑπάρχει ἢ μὴ ὑπάρχει ἢ μὴ παντὶ ὑπάρχει, οὐδ' οὕτως ἔσται συλλογισμὸς. ὅροι λευκόν — ἵππος — κύκνος, λευκόν — ἵππος — κόραξ. οἱ αὐτοὶ δὲ καὶ εἰ τὸ Α Β ἀδιόριστον. Οὐδ' ὅταν τὸ μὲν πρὸς [26b] τῷ μείζονι ἄκρῳ καθόλου γένηται ἢ κατηγορικὸν ἢ στερητικόν, τὸ δὲ πρὸς τῷ ἐλάττονι στερητικόν κατὰ μέρος, οὐκ ἔσται συλλογισμὸς [ἀδιορίστου τε καὶ ἐν μέρει ληφθέντος], οἷον εἰ τὸ μὲν Α παντὶ τῷ Β ὑπάρχει, τὸ δὲ Β τινὶ τῷ Γ μὴ, ἢ εἰ μὴ παντὶ ὑπάρχει· ὃ γὰρ ἂν τινι μὴ ὑπάρχῃ τὸ μέσον, τοῦτω καὶ παντὶ καὶ οὐδενὶ ἀκολουθήσει τὸ πρῶτον. ὑποκείσθωσαν γὰρ οἱ ὅροι ζῶον — ἄνθρωπος — λευκόν· εἴτα καὶ ὢν μὴ κατηγορεῖται λευκῶν ὁ ἄνθρωπος, εὐλήφθω κύκνος καὶ χιών· οὐκοῦν τὸ ζῶον τοῦ μὲν παντὸς κατηγορεῖται, τοῦ δὲ οὐδενός, ὥστε οὐκ ἔσται συλλογισμὸς. πάλιν τὸ μὲν Α μηδενὶ τῷ Β ὑπαρχέτω, τὸ δὲ Β τινὶ τῷ Γ μὴ ὑπαρχέτω· καὶ οἱ ὅροι ἔστωσαν ἄψυχον — ἄνθρωπος — λευκόν· εἴτα εὐλήφθωσαν, ὢν μὴ κατηγορεῖται λευκῶν ὁ ἄνθρωπος, κύκνος καὶ χιών· τὸ γὰρ ἄψυχον τοῦ μὲν παντὸς κατηγορεῖται, τοῦ δὲ οὐδενός. ἔτι ἐπεὶ ἀδιόριστον τὸ τινὶ τῷ Γ τὸ Β μὴ ὑπάρχειν, ἀληθεύεται δέ, καὶ εἰ μηδενὶ ὑπάρχει καὶ εἰ μὴ παντί, ὅτι τινὶ οὐχ ὑπάρχει, ληφθέντων δὲ τοιούτων ὅρων ὥστε μηδενὶ ὑπάρχειν οὐ γίνεται συλλογισμὸς (τοῦτο γὰρ εἴρηται πρότερον), φανερόν οὖν ὅτι τῷ οὕτως ἔχειν τοὺς ὅρους οὐκ ἔσται συλλογισμὸς· ἦν γὰρ ἂν καὶ ἐπὶ τούτων. ὁμοίως δὲ δειχθήσεται καὶ εἰ τὸ καθόλου τεθείη στερητικόν. Οὐδὲ ἐὰν ἄμφω τὰ διαστήματα κατὰ μέρος ἢ κατηγορικῶς ἢ στερητικῶς, ἢ τὸ μὲν κατηγορικῶς τὸ δὲ στερητικῶς λέγηται, ἢ τὸ

μὲν ἀδιόριστον τὸ δὲ διωρισμένον, ἢ ἄμφω ἀδιόριστα, οὐκ ἔσται συλλογισμὸς οὐδαμῶς. ὅροι δὲ κοινοὶ πάντων ζῶον — λευκόν — ἵππος, ζῶον — λευκόν — λίθος.

Φανερόν οὖν ἐκ τῶν εἰρημένων ὡς ἐὰν ἡ συλλογισμὸς ἐν τούτῳ τῷ σχήματι κατὰ μέρος, ὅτι ἀνάγκη τοὺς ὅρους οὕτως ἔχειν ὡς εἵπομεν· ἄλλως γὰρ ἐχόντων οὐδαμῶς γίνεται. δῆλον δὲ καὶ ὅτι πάντες οἱ ἐν αὐτῷ συλλογισμοὶ τέλειοί εἰσι· (πάντες γὰρ ἐπιτελοῦνται διὰ τῶν ἐξ ἀρχῆς ληφθέντων), καὶ ὅτι πάντα τὰ προβλήματα δείκνυται διὰ τούτου τοῦ σχήματος· καὶ γὰρ τὸ παντὶ καὶ τὸ μηδενὶ καὶ τὸ τινὶ καὶ τὸ μὴ τινὶ ὑπάρχειν. καλῶ δὲ τὸ τοιοῦτον σχῆμα πρῶτον.

Όταν δὲ τὸ αὐτὸ τῷ μὲν παντὶ τῷ δὲ μηδενὶ ὑπάρχει, ἢ ἐκατέρῳ παντὶ ἢ μηδενί, τὸ μὲν σχῆμα τὸ τοιοῦτον καλῶ δεύτερον, μέσον δὲ ἐν αὐτῷ λέγω τὸ κατηγορούμενον ἀμφοῖν, ἅκρα δὲ καθ' ὧν λέγεται τοῦτο, μεῖζον δὲ ἄκρον τὸ πρὸς τῷ μέσῳ κείμενον· ἔλαττον δὲ τὸ πορρωτέρω τοῦ μέσου. τίθεται δὲ τὸ μέσον ἔξω μὲν τῶν ἁκρῶν, πρῶτον δὲ τῇ θέσει. Ἐὰν δὲ τῷ αὐτῷ τὸ μὲν παντὶ τὸ δὲ μηδενὶ ὑπάρχει, ἢ ἄμφω παντὶ ἢ μηδενὶ, τὸ μὲν σχῆμα τὸ τοιοῦτον καλῶ τρίτον, μέσον δ' ἐν αὐτῷ λέγω καθ' οὗ ἄμφω τὰ κατηγορούμενα, ἄκρα δὲ τὰ κατηγορούμενα, μεῖζον δ' ἄκρον τὸ πορρώτερον τοῦ μέσου, ἔλαττον δὲ τὸ ἐγγύτερον. τίθεται δὲ τὸ μέσον ἔξω μὲν τῶν ἄκρων, ἔσχατον δὲ τῇ θέσει. τέλειος μὲν οὖν οὐ γίνεται συλλογισμὸς οὐδ' ἐν τούτῳ τῷ σχήματι, δυνατὸς δ' ἔσται καὶ καθόλου καὶ μὴ καθόλου τῶν ὄρων ὄντων πρὸς τὸ μέσον.

Καθόλου μὲν οὖν ὄντων, ὅταν καὶ τὸ Π καὶ τὸ Ρ παντὶ τῷ Σ ὑπάρχει, ὅτι τινὶ τῷ Ρ τὸ Π ὑπάρξει ἐξ ἀνάγκης· ἐπεὶ γὰρ ἀντιστρέφει τὸ κατηγορικόν, ὑπάρξει τὸ Σ τινὶ τῷ Ρ, ὥστ' ἐπεὶ τῷ μὲν Σ παντὶ τὸ Π, τῷ δὲ Ρ τινὶ τὸ Σ, ἀνάγκη τὸ Π τινὶ τῷ Ρ ὑπάρχειν· γίνεται γὰρ συλλογισμὸς διὰ τοῦ πρώτου σχήματος. ἔστι δὲ καὶ διὰ τοῦ ἀδυνάτου καὶ τῷ ἐκθέσθαι ποιεῖν τὴν ἀπόδειξιν· εἰ γὰρ ἄμφω παντὶ τῷ Σ ὑπάρχει, ἂν ληφθῇ τι τῶν Σ οἷον τὸ Ν, τούτῳ καὶ τὸ Π καὶ τὸ Ρ ὑπάρξει, ὥστε τινὶ τῷ Ρ τὸ Π ὑπάρξει. καὶ ἂν τὸ μὲν Ρ παντὶ τῷ Σ, τὸ δὲ Π μηδενὶ ὑπάρχει, ἔσται συλλογισμὸς ὅτι τὸ Π τινὶ τῷ Ρ οὐχ ὑπάρξει ἐξ ἀνάγκης· ὁ γὰρ αὐτὸς τρόπος τῆς ἀποδείξεως ἀντιστραφείσης τῆς Ρ Σ προτάσεως. δειχθεῖν δ' ἂν καὶ διὰ τοῦ ἀδυνάτου, καθάπερ ἐπὶ τῶν πρότερον. ἐὰν δὲ τὸ μὲν Ρ μηδενὶ τὸ δὲ Π παντὶ ὑπάρχει τῷ Σ, οὐκ ἔσται συλλογισμὸς. ὅροι τοῦ ὑπάρχειν ζῶον — ἵππος — ἄνθρωπος, τοῦ μὴ ὑπάρχειν ζῶον — ἄψυχον — ἄνθρωπος. οὐδ' ὅταν ἄμφω κατὰ μηδενὸς τοῦ Σ λέγηται, οὐκ ἔσται συλλογισμὸς. ὅροι τοῦ ὑπάρχειν ζῶον — ἵππος — ἄψυχον, τοῦ μὴ ὑπάρχειν ἄνθρωπος — ἵππος — ἄψυχον· μέσον ἄψυχον. φανερόν οὖν καὶ ἐν τούτῳ τῷ σχήματι πότ' ἔσται καὶ πότ' οὐκ ἔσται συλλογισμὸς καθόλου τῶν ὄρων ὄντων. ὅταν μὲν γὰρ ἀμφοτέρω οἱ ὅροι ὥσι κατηγορικοί, ἔσται συλλογισμὸς ὅτι τινὶ ὑπάρχει τὸ ἄκρον τῷ ἄκρῳ, ὅταν δὲ στερητικοί, οὐκ [28b] ἔσται. ὅταν δ' ὁ μὲν ἢ στερητικὸς ὁ δὲ καταφατικὸς, ἐὰν μὲν ὁ μεῖζον γένηται στερητικὸς ἄτερος δὲ καταφατικὸς, ἔσται συλλογισμὸς ὅτι τινὶ οὐχ ὑπάρχει τὸ ἄκρον τῷ ἄκρῳ, ἐὰν δ' ἀνάπαλιν, οὐκ ἔσται.

Ἐὰν δ' ὁ μὲν ἢ καθόλου πρὸς τὸ μέσον ὁ δ' ἐν μέρει, κατηγορικῶν μὲν ὄντων ἀμφοῖν ἀνάγκη γίνεσθαι συλλογισμόν, ἂν

ὅποτεροσοῦν ἢ καθόλου τῶν ὄρων. εἰ γὰρ τὸ μὲν P παντὶ τῷ Σ τὸ δὲ Π τινί, ἀνάγκη τὸ Π τινὶ τῷ P ὑπάρχειν. ἐπεὶ γὰρ ἀντιστρέφει τὸ καταφατικόν, ὑπάρξει τὸ Στινὶ τῷ Π, ὥστ' ἐπεὶ τὸ μὲν P παντὶ τῷ Σ, τὸ δὲ Σ τινὶ τῷ Π, καὶ τὸ P τινὶ τῷ Π ὑπάρξει· ὥστε τὸ Π τινὶ τῷ P. πάλιν εἰ τὸ μὲν P τινὶ τῷ Σ τὸ δὲ Π παντὶ ὑπάρχει, ἀνάγκη τὸ Π τινὶ τῷ P ὑπάρχειν· ὁ γὰρ αὐτὸς τρόπος τῆς ἀποδείξεως. ἔστι δ' ἀποδείξαι καὶ διὰ τοῦ ἀδυνάτου καὶ τῇ ἐκθέσει, καθάπερ ἐπὶ τῶν πρότερον.

Ἐὰν δ' ὁ μὲν ἢ κατηγορικὸς ὁ δὲ στερητικὸς, καθόλου δὲ ὁ κατηγορικὸς, ὅταν μὲν ὁ ἐλάττων ἢ κατηγορικὸς, ἔσται συλλογισμὸς. εἰ γὰρ τὸ P παντὶ τῷ Σ, τὸ δὲ Π τινὶ μὴ ὑπάρχει, ἀνάγκη τὸ Π τινὶ τῷ P μὴ ὑπάρχειν. εἰ γὰρ παντί, καὶ τὸ P παντὶ τῷ Σ, καὶ τὸ Π παντὶ τῷ Σ ὑπάρξει· ἀλλ' οὐχ ὑπῆρχεν. δεικνυται δὲ καὶ ἄνευ τῆς ἀπαγωγῆς, ἐὰν ληφθῇ τι τῶν Σ ᾧ τὸ Π μὴ ὑπάρχει. ὅταν δ' ὁ μείζων ἢ κατηγορικὸς, οὐκ ἔσται συλλογισμὸς, οἷον εἰ τὸ μὲν Π παντὶ τῷ Σ, τὸ δὲ P τινὶ τῷ Σ μὴ ὑπάρχει. ὅροι τοῦ παντὶ ὑπάρχειν ἔμψυχον — ἄνθρωπος — ζῶον. τοῦ δὲ μηδενὶ οὐκ ἔστι λαβεῖν ὅρους, εἰ τινὶ μὲν ὑπάρχει τῷ Σ τὸ P, τινὶ δὲ μὴ· εἰ γὰρ παντὶ τὸ Π τῷ Σ ὑπάρχει, τὸ δὲ P τινὶ τῷ Σ, καὶ τὸ Π τινὶ τῷ P ὑπάρξει· ὑπέκειτο δὲ μηδενὶ ὑπάρχειν. ἀλλ' ὥσπερ ἐν τοῖς πρότερον ληπτέον· ἀδιορίστου γὰρ ὄντος τοῦ τινὶ μὴ ὑπάρχειν καὶ τὸ μηδενὶ ὑπάρχον ἀληθὲς εἰπεῖν τινὶ μὴ ὑπάρχειν· μηδενὶ δὲ ὑπάρχοντος οὐκ ἦν συλλογισμὸς. φανερόν οὖν ὅτι οὐκ ἔσται συλλογισμὸς. ἐὰν δ' ὁ στερητικὸς ἢ καθόλου τῶν ὄρων, ὅταν μὲν ὁ μείζων ἢ στερητικὸς ὁ δὲ ἐλάττων κατηγορικὸς, ἔσται συλλογισμὸς. εἰ γὰρ τὸ Π μηδενὶ τῷ Σ, τὸ δὲ P τινὶ ὑπάρχει τῷ Σ, τὸ Π τινὶ τῷ P οὐχ ὑπάρξει· πάλιν γὰρ ἔσται τὸ πρῶτον σχῆμα τῆς P Σ προτάσεως ἀντιστραφείσης. ὅταν δὲ ὁ ἐλάττων ἢ στερητικὸς, οὐκ ἔσται συλλογισμὸς. ὅροι τοῦ ὑπάρχειν ζῶον — ἄνθρωπος — ἄγριον, τοῦ μὴ ὑπάρχειν ζῶον — ἐπιστήμη — ἄγριον· μέσον ἐν ἀμφοῖν τὸ ἄγριον. οὐδ' ὅταν ἀμφοτέρω στερητικοὶ θεῶσιν, ἢ δ' ὁ μὲν καθόλου ὁ δ' ἐν μέρει. ὅροι [29a] ὅταν ὁ ἐλάττων ἢ καθόλου πρὸς τὸ μέσον, ζῶον — ἐπιστήμη — ἄγριον, ζῶον — ἄνθρωπος — ἄγριον· ὅταν δ' ὁ μείζων, τοῦ μὲν μὴ ὑπάρχειν κόραξ — χιών — λευκόν. τοῦ δ' ὑπάρχειν οὐκ ἔστι λαβεῖν, εἰ τὸ P τινὶ μὲν ὑπάρχει τῷ Σ, τινὶ δὲ μὴ ὑπάρχει. εἰ γὰρ τὸ Π παντὶ τῷ P, τὸ δὲ P τινὶ τῷ Σ, καὶ τὸ Π τινὶ τῷ Σ· ὑπέκειτο δὲ μηδενί. ἀλλ' ἐκ τοῦ ἀδιορίστου δεικτέον.

Οὐδ' ἂν ἑκάτερος τινὶ τῷ μέσῳ ὑπάρχει ἢ μὴ ὑπάρχει, ἢ ὁ μὲν

Φανερόν οὖν καὶ ἐν τούτῳ τῷ σχήματι πότ' ἔσται καὶ πότ' οὐκ ἔσται συλλογισμὸς, καὶ ὅτι ἐχόντων τε τῶν ὅρων ὡς ἐλέχθη γίνεται συλλογισμὸς ἐξ ἀνάγκης, ἂν τ' ἢ συλλογισμὸς, ἀνάγκη τοὺς ὅρους οὕτως ἔχειν. φανερόν δὲ καὶ ὅτι πάντες ἀτελεῖς εἰσὶν οἱ ἐν τούτῳ τῷ σχήματι συλλογισμοί (πάντες γὰρ τελειοῦνται προσλαμβανομένων τινῶν) καὶ ὅτι συλλογίσασθαι τὸ καθόλου διὰ τούτου τοῦ σχήματος οὐκ ἔσται, οὔτε στερητικὸν οὔτε καταφατικόν.

Κεφάλαιο 7

Δήλον δὲ καὶ ὅτι ἐν ἅπασι τοῖς σχήμασιν, ὅταν μὴ γίνηται συλλογισμός, κατηγορικῶν μὲν ἢ στερητικῶν ἀμφοτέρων ὄντων τῶν ὄρων οὐδὲν ὅλως γίνεται ἀναγκαῖον, κατηγορικοῦ δὲ καὶ στερητικοῦ, καθόλου ληφθέντος τοῦ στερητικοῦ αἰεὶ γίνεται συλλογισμός τοῦ ἐλάττονος ἄκρου πρὸς τὸ μεῖζον, οἷον εἰ τὸ μὲν Α παντὶ τῷ Β ἢ τινί, τὸ δὲ Β μηδενὶ τῷ Γ· ἀντιστρεφομένων γὰρ τῶν προτάσεων ἀνάγκη τὸ Γ τινὶ τῷ Α μὴ ὑπάρχειν. ὁμοίως δὲ ἀπὸ τῶν ἐτέρων σχημάτων· αἰεὶ γὰρ γίνεται διὰ τῆς ἀντιστροφῆς συλλογισμός. δῆλον δὲ καὶ ὅτι τὸ ἀδιόριστον ἀντὶ τοῦ κατηγορικοῦ τοῦ ἐν μέρει τιθέμενον τὸν αὐτὸν ποιήσει συλλογισμὸν ἐν ἅπασι τοῖς σχήμασιν.

Φανερόν δὲ καὶ ὅτι πάντες οἱ ἀτελεῖς συλλογισμοὶ τελειοῦνται διὰ τοῦ πρώτου σχήματος. ἢ γὰρ δεικτικῶς ἢ διὰ τοῦ ἀδυνάτου περαίνονται πάντες· ἀμφοτέρως δὲ γίνεται τὸ πρῶτον σχῆμα, δεικτικῶς μὲν τελειουμένων, ὅτι διὰ τῆς ἀντιστροφῆς ἐπεραίνοντο πάντες, ἢ δ' ἀντιστροφή τὸ πρῶτον ἐποίει σχῆμα, διὰ δὲ τοῦ ἀδυνάτου δεικνυμένων, ὅτι τεθέντος τοῦ ψεύδους ὁ συλλογισμὸς γίνεται διὰ τοῦ πρώτου σχήματος, οἷον ἐν τῷ τελευταίῳ σχήματι, εἰ τὸ Α καὶ τὸ Β παντὶ τῷ Γ ὑπάρχει, ὅτι τὸ Α τινὶ τῷ Β ὑπάρχει· εἰ γὰρ μηδενί, τὸ δὲ Β παντὶ τῷ Γ, οὐδενὶ τῷ Γ τὸ Α· ἀλλ' ἦν παντί. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων. [29b]

Ἔστι δὲ καὶ ἀναγαγεῖν πάντας τοὺς συλλογισμοὺς εἰς τοὺς ἐν τῷ πρώτῳ σχήματι καθόλου συλλογισμοῦς. οἱ μὲν γὰρ ἐν τῷ δευτέρῳ φανερόν ὅτι δι' ἐκείνων τελειοῦνται, πλὴν οὐχ ὁμοίως πάντες, ἀλλ' οἱ μὲν καθόλου τοῦ στερητικοῦ ἀντιστραφέντος, τῶν δ' ἐν μέρει ἐκάτερος διὰ τῆς εἰς τὸ ἀδύνατον ἀπαγωγῆς. οἱ δ' ἐν τῷ πρώτῳ, οἱ κατὰ μέρος, ἐπιτελοῦνται μὲν καὶ δι' αὐτῶν, ἔστι δὲ καὶ διὰ τοῦ δευτέρου σχήματος δεικνύναι εἰς ἀδύνατον ἀπάγοντας, οἷον εἰ τὸ Α παντὶ τῷ Β, τὸ δὲ Β τινὶ τῷ Γ, ὅτι τὸ Α τινὶ τῷ Γ· εἰ γὰρ μηδενί, τῷ δὲ Β παντί, οὐδενὶ τῷ Γ τὸ Β ὑπάρξει· τοῦτο γὰρ ἴσμεν διὰ τοῦ δευτέρου σχήματος. ὁμοίως δὲ καὶ ἐπὶ τοῦ στερητικοῦ ἔσται ἡ ἀπόδειξις. εἰ γὰρ τὸ Α μηδενὶ τῷ Β, τὸ δὲ Β τινὶ τῷ Γ ὑπάρχει, τὸ Α τινὶ τῷ Γ οὐχ ὑπάρξει· εἰ γὰρ παντί, τῷ δὲ Β μηδενὶ ὑπάρχει, οὐδενὶ τῷ Γ τὸ Β ὑπάρξει· τοῦτο δ' ἦν τὸ μέσον σχῆμα. ὥστ' ἐπεὶ οἱ μὲν ἐν τῷ μέσῳ σχήματι συλλογισμοὶ πάντες ἀνάγονται εἰς τοὺς ἐν τῷ

πρώτῳ καθόλου συλλογισμούς, οἱ δὲ κατὰ μέρος ἐν τῷ πρώτῳ εἰς τοὺς ἐν τῷ μέσῳ, φανερόν ὅτι καὶ οἱ κατὰ μέρος ἀναχθήσονται εἰς τοὺς ἐν τῷ πρώτῳ σχήματι καθόλου συλλογισμούς. οἱ δ' ἐν τῷ τρίτῳ καθόλου μὲν ὄντων τῶν ὄρων εὐθὺς ἐπιτελοῦνται δι' ἐκείνων τῶν συλλογισμῶν, ὅταν δ' ἐν μέρει ληφθῶσι, διὰ τῶν ἐν μέρει συλλογισμῶν τῶν ἐν τῷ πρώτῳ σχήματι· οὗτοι δὲ ἀνήχθησαν εἰς ἐκείνους, ὥστε καὶ οἱ ἐν τῷ τρίτῳ σχήματι, οἱ κατὰ μέρος. φανερόν οὖν ὅτι πάντες ἀναχθήσονται εἰς τοὺς ἐν τῷ πρώτῳ σχήματι καθόλου συλλογισμούς.

Οἱ μὲν οὖν τῶν συλλογισμῶν ὑπάρχειν ἢ μὴ ὑπάρχειν δεικνύντες εἴρηται πῶς ἔχουσι, καὶ καθ' ἑαυτοὺς οἱ ἐκ τοῦ αὐτοῦ σχήματος καὶ πρὸς ἀλλήλους οἱ ἐκ τῶν ἐτέρων.

Κεφάλαιο 8

Ἐπεὶ δ' ἕτερόν ἐστιν ὑπάρχειν τε καὶ ἐξ ἀνάγκης ὑπάρχειν καὶ ἐνδέχεσθαι ὑπάρχειν (πολλὰ γὰρ ὑπάρχει μὲν, οὐ μέντοι ἐξ ἀνάγκης· τὰ δ' οὐτ' ἐξ ἀνάγκης οὐθ' ὑπάρχει ὅλως, ἐνδέχεται δ' ὑπάρχειν), δηλὸν ὅτι καὶ συλλογισμὸς ἐκάστου τούτων ἕτερος ἔσται, καὶ οὐχ ὁμοίως ἐχόντων τῶν ὄρων, ἀλλ' ὁ μὲν ἐξ ἀναγκαίων, ὁ δ' ἐξ ὑπαρχόντων, ὁ δ' ἐξ ἐνδεχομένων.

Ἐπὶ μὲν οὖν τῶν ἀναγκαίων σχεδὸν ὁμοίως ἔχει καὶ ἐπὶ τῶν ὑπαρχόντων· ὡσαύτως γὰρ τιθεμένων τῶν ὄρων ἐν τε τῷ ὑπάρχειν καὶ τῷ ἐξ ἀνάγκης ὑπάρχειν ἢ μὴ ὑπάρχειν ἔσται τε καὶ οὐκ ἔσται συλλογισμὸς, πλὴν διοίσει τῷ [30a] προσκεῖσθαι τοῖς ὄροις τὸ ἐξ ἀνάγκης ὑπάρχειν ἢ μὴ ὑπάρχειν. τό τε γὰρ στερητικὸν ὡσαύτως ἀντιστρέφει, καὶ τὸ ἐν ὅλῳ εἶναι καὶ τὸ κατὰ παντὸς ὁμοίως ἀποδώσομεν. ἐν μὲν οὖν τοῖς ἄλλοις τὸν αὐτὸν τρόπον δειχθήσεται διὰ τῆς ἀντιστροφῆς τὸ συμπέρασμα ἀναγκαῖον, ὥσπερ ἐπὶ τοῦ ὑπάρχειν· ἐν δὲ τῷ μέσῳ σχήματι, ὅταν ἢ τὸ καθόλου καταφατικὸν τὸ δ' ἐν μέρει στερητικόν, καὶ πάλιν ἐν τῷ τρίτῳ, ὅταν τὸ μὲν καθόλου κατηγορικὸν τὸ δ' ἐν μέρει στερητικόν, οὐχ ὁμοίως ἔσται ἢ ἀπόδειξις, ἀλλ' ἀνάγκη ἐκθεμένων ὧς τινὶ ἐκάτερον μὴ ὑπάρχει, κατὰ τούτου ποιεῖν τὸν συλλογισμόν· ἔσται γὰρ ἀναγκαῖος ἐπὶ τούτων· εἰ δὲ κατὰ τοῦ ἐκτεθέντος ἐστὶν ἀναγκαῖος, καὶ κατ' ἐκείνου τινός· τὸ γὰρ ἐκτεθὲν ὅπερ ἐκεῖνό τί ἐστίν. γίνεται δὲ τῶν συλλογισμῶν ἐκάτερος ἐν τῷ οἰκείῳ σχήματι.

Κεφάλαιο 9

Συμβαίνει δέ ποτε καὶ τῆς ἐτέρας προτάσεως ἀναγκαίᾳς οὔσης ἀναγκαῖον γίνεσθαι τὸν συλλογισμόν, πλὴν οὐχ ὅποτέρας ἔτυχεν, ἀλλὰ τῆς πρὸς τὸ μείζον ἄκρον, οἷον εἰ τὸ μὲν Α τῷ Β ἐξ ἀνάγκης εἴληπται ὑπάρχον ἢ μὴ ὑπάρχον, τὸ δὲ Β τῷ Γ ὑπάρχον μόνον· οὕτως γὰρ εἰλημμένων τῶν προτάσεων ἐξ ἀνάγκης τὸ Α τῷ Γ ὑπάρξει ἢ οὐχ ὑπάρξει. ἐπεὶ γὰρ παντὶ τῷ Β ἐξ ἀνάγκης ὑπάρχει ἢ οὐχ ὑπάρχει τὸ Α, τὸ δὲ Γ τι τῶν Β ἐστὶ, φανερόν ὅτι καὶ τῷ Γ ἐξ ἀνάγκης ἔσται θάτερον τούτων. εἰ δὲ τὸ μὲν Α Β μὴ ἔστιν ἀναγκαῖον, τὸ δὲ Β Γ ἀναγκαῖον, οὐκ ἔσται τὸ συμπέρασμα ἀναγκαῖον. εἰ γὰρ ἔστι, συμβήσεται τὸ Α τινὶ τῷ Β ὑπάρχειν ἐξ ἀνάγκης διὰ τε τοῦ πρώτου καὶ διὰ τοῦ τρίτου σχήματος. τοῦτο δὲ ψεῦδος· ἐνδέχεται γὰρ τοιοῦτον εἶναι τὸ Β ὃ ἐγχωρεῖ τὸ Α μηδενὶ ὑπάρχειν. ἔτι καὶ ἐκ τῶν ὄρων φανερόν ὅτι οὐκ ἔσται τὸ συμπέρασμα ἀναγκαῖον, οἷον εἰ τὸ μὲν Α εἴη κίνησις, τὸ δὲ Β ζῶον, ἐφ' ὃ δὲ τὸ Γ ἄνθρωπος· ζῶον μὲν γὰρ ὁ ἄνθρωπος ἐξ ἀνάγκης ἐστὶ, κινεῖται δὲ τὸ ζῶον οὐκ ἐξ ἀνάγκης, οὐδ' ὁ ἄνθρωπος. ὁμοίως δὲ καὶ εἰ στερητικὸν εἴη τὸ Α Β· ἢ γὰρ αὐτὴ ἀπόδειξις. ἐπὶ δὲ τῶν ἐν μέρει συλλογισμῶν, εἰ μὲν τὸ καθόλου ἐστὶν ἀναγκαῖον, καὶ τὸ συμπέρασμα ἔσται ἀναγκαῖον, εἰ δὲ τὸ κατὰ μέρος, οὐκ ἀναγκαῖον, οὔτε στερητικῆς οὔτε κατηγορικῆς οὔσης τῆς καθόλου προτάσεως. ἔστω δὴ πρῶτον τὸ καθόλου ἀναγκαῖον, καὶ τὸ μὲν Α παντὶ τῷ Β ὑπαρχέτω ἐξ ἀνάγκης, τὸ δὲ Β τινὶ τῷ Γ ὑπαρχέτω μόνον· ἀνάγκη δὴ τὸ Α τινὶ τῷ Γ ὑπάρχειν ἐξ ἀνάγκης· τὸ γὰρ Γ ὑπὸ τὸ Β ἐστὶ, τῷ δὲ Β παντὶ $\{\chi\}$ [40][30b] ὑπῆρχεν ἐξ ἀνάγκης, ὁμοίως δὲ καὶ εἰ στερητικὸς εἴη ὁ συλλογισμὸς· ἢ γὰρ αὐτὴ ἔσται ἀπόδειξις. εἰ δὲ τὸ κατὰ μέρος ἐστὶν ἀναγκαῖον, οὐκ ἔσται τὸ συμπέρασμα ἀναγκαῖον (οὐδὲν γὰρ ἀδύνατον συμπίπτει), καθάπερ οὐδ' ἐν τοῖς καθόλου συλλογισμοῖς. ὁμοίως δὲ καὶ τῶν στερητικῶν. ὅροι κίνησις — ζῶον — λευκόν.

Κεφάλαιο 10

Ἐπὶ δὲ τοῦ δευτέρου σχήματος, εἰ μὲν ἡ στερητικὴ πρότασις ἐστὶν ἀναγκαία, καὶ τὸ συμπέρασμα ἔσται ἀναγκαῖον, εἰ δ' ἡ κατηγορικὴ, οὐκ ἀναγκαῖον. ἔστω γὰρ πρῶτον ἡ στερητικὴ ἀναγκαία, καὶ τὸ Α τῷ μὲν Β μηδενὶ ἐνδεχέσθω, τῷ δὲ Γ ὑπαρχέτω μόνον. ἐπεὶ οὖν ἀντιστρέφει τὸ στερητικόν, οὐδὲ τὸ Β τῷ Α οὐδενὶ ἐνδέχεται· τὸ δὲ Α παντὶ τῷ Γ ὑπάρχει, ὥστ' οὐδενὶ τῷ Γ τὸ Β ἐνδέχεται· τὸ γὰρ Γ ὑπὸ τὸ Α ἐστίν. ὡσαύτως δὲ καὶ εἰ πρὸς τῷ Γ τεθείη τὸ στερητικόν· εἰ γὰρ τὸ Α μηδενὶ τῷ Γ ἐνδέχεται, οὐδὲ τὸ Γ οὐδενὶ τῷ Α ἐγγωρεῖ· τὸ δὲ Α παντὶ τῷ Β ὑπάρχει, ὥστ' οὐδενὶ τῷ Β τὸ Γ ἐνδέχεται· γίνεται γὰρ τὸ πρῶτον σχῆμα πάλιν. οὐκ ἄρα οὐδὲ τὸ Β τῷ Γ ἀντιστρέφει γὰρ ὁμοίως.

Εἰ δὲ ἡ κατηγορικὴ πρότασις ἐστὶν ἀναγκαία, οὐκ ἔσται τὸ συμπέρασμα ἀναγκαῖον. ὑπαρχέτω γὰρ τὸ Α παντὶ τῷ Β ἐξ ἀνάγκης, τῷ δὲ Γ μηδενὶ ὑπαρχέτω μόνον. ἀντιστραφέντος οὖν τοῦ στερητικοῦ τὸ πρῶτον γίνεται σχῆμα· δέδεικται δ' ἐν τῷ πρώτῳ ὅτι μὴ ἀναγκαίως οὔσης τῆς πρὸς τὸ μείζον στερητικῆς οὐδὲ τὸ συμπέρασμα ἔσται ἀναγκαῖον, ὥστ' οὐδ' ἐπὶ τούτων ἔσται ἐξ ἀνάγκης. ἔτι δ' εἰ τὸ συμπέρασμα ἐστὶν ἀναγκαῖον, συμβαίνει τὸ Γ τινὶ τῷ Α μὴ ὑπάρχειν ἐξ ἀνάγκης. εἰ γὰρ τὸ Β τῷ Γ μηδενὶ ὑπάρχει ἐξ ἀνάγκης, οὐδὲ τὸ Γ τῷ Β οὐδενὶ ὑπάρξει ἐξ ἀνάγκης. τὸ δέ γε Β τινὶ τῷ Α ἀνάγκη ὑπάρχειν, εἶπερ καὶ τὸ Α παντὶ τῷ Β ἐξ ἀνάγκης ὑπῆρχεν. ὥστε τὸ Γ ἀνάγκη τινὶ τῷ Α μὴ ὑπάρχειν. ἀλλ' οὐδὲν κωλύει τὸ Α τοιοῦτον ληφθῆναι ὅ παντὶ τὸ Γ ἐνδέχεται ὑπάρχειν. ἔτι καὶ ὅρους ἐκθέμενον εἴη δεῖξαι ὅτι τὸ συμπέρασμα οὐκ ἔστιν ἀναγκαῖον ἀπλῶς, ἀλλὰ τούτων ὄντων ἀναγκαῖον. οἷον ἔστω τὸ Α ζῶον, τὸ δὲ Β ἄνθρωπος, τὸ δὲ Γ λευκόν, καὶ αἱ προτάσεις ὁμοίως εἰλήφθωσαν· ἐνδέχεται γὰρ τὸ ζῶον μηδενὶ λευκῷ ὑπάρχειν. οὐχ ὑπάρξει δὴ οὐδ' ὁ ἄνθρωπος οὐδενὶ λευκῷ, ἀλλ' οὐκ ἐξ ἀνάγκης· ἐνδέχεται γὰρ ἄνθρωπον γενέσθαι λευκόν, οὐ μέντοι ἕως ἂν ζῶον μηδενὶ λευκῷ ὑπάρχη. ὥστε τούτων μὲν ὄντων ἀναγκαῖον ἔσται τὸ συμπέρασμα, ἀπλῶς δ' οὐκ ἀναγκαῖον. [31a]

Ὅμοίως δ' ἔξει καὶ ἐπὶ τῶν ἐν μέρει συλλογισμῶν. ὅταν μὲν γὰρ ἡ στερητικὴ πρότασις καθόλου τ' ᾗ καὶ ἀναγκαία, καὶ τὸ συμπέρασμα ἔσται ἀναγκαῖον· ὅταν δὲ ἡ κατηγορικὴ καθόλου, ἡ δὲ στερητικὴ

κατὰ μέρος, οὐκ ἔσται τὸ συμπέρασμα ἀναγκαῖον. ἔστω δὴ πρῶτον ἡ
στερητικὴ καθόλου τε καὶ ἀναγκαία, καὶ τὸ Α τῷ μὲν Β μηδενὶ
ἐνδεχέσθω ὑπάρχειν, τῷ δὲ Γ τινὶ ὑπαρχέτω. ἐπεὶ οὖν ἀντιστρέφει τὸ
στερητικόν, οὐδὲ τὸ Β τῷ Α οὐδενὶ ἐνδέχοιτ' ἂν ὑπάρχειν· τὸ δέ γε Α
τινὶ τῷ Γ ὑπάρχει, ὥστ' ἐξ ἀνάγκης τινὶ τῷ Γ οὐχ ὑπάρξει τὸ Β. πάλιν
ἔστω ἡ κατηγορικὴ καθόλου τε καὶ ἀναγκαία, καὶ κείσθω πρὸς τῷ Β
τὸ κατηγορικόν. εἰ δὴ τὸ Α παντὶ τῷ Β ἐξ ἀνάγκης ὑπάρχει, τῷ δὲ Γ
τινὶ μὴ ὑπάρχει, ὅτι μὲν οὐχ ὑπάρξει τὸ Β τινὶ τῷ Γ, φανερόν, ἀλλ'
οὐκ ἐξ ἀνάγκης· οἱ γὰρ αὐτοὶ ὅροι ἔσονται πρὸς τὴν ἀπόδειξιν οὔτε
ἐπὶ τῶν καθόλου συλλογισμῶν. ἀλλ' οὐδ' εἰ τὸ στερητικὸν
ἀναγκαῖόν ἐστιν ἐν μέρει ληφθέν, οὐκ ἔσται τὸ συμπέρασμα
ἀναγκαῖον· διὰ γὰρ τῶν αὐτῶν ὅρων ἡ ἀπόδειξις.

Κεφάλαιο 11

Ἐν δὲ τῷ τελευταίῳ σχήματι καθόλου μὲν ὄντων τῶν ὄρων πρὸς τὸ μέσον καὶ κατηγορικῶν ἀμφοτέρων τῶν προτάσεων, ἐὰν ὁποτερονοῦν ἢ ἀναγκαῖον, καὶ τὸ συμπέρασμα ἔσται ἀναγκαῖον. ἐὰν δὲ τὸ μὲν ἢ στερητικὸν τὸ δὲ κατηγορικόν, ὅταν μὲν τὸ στερητικὸν ἀναγκαῖον ἢ, καὶ τὸ συμπέρασμα ἔσται ἀναγκαῖον, ὅταν δὲ τὸ κατηγορικόν, οὐκ ἔσται ἀναγκαῖον. ἔστωσαν γὰρ ἀμφοτέραι κατηγορικαὶ πρῶτον αἱ προτάσεις, καὶ τὸ Α καὶ τὸ Β παντὶ τῷ Γ ὑπαρχέτω, ἀναγκαῖον δ' ἔστω τὸ Α Γ. ἐπεὶ οὖν τὸ Β παντὶ τῷ Γ ὑπάρχει, καὶ τὸ Γ τινὶ τῷ Β ὑπάρξει διὰ τὸ ἀντιστρέφειν τὸ καθόλου τῷ κατὰ μέρος, ὥστ' εἰ παντὶ τῷ Γ τὸ Α ἐξ ἀνάγκης ὑπάρχει καὶ τὸ Γ τῷ Β τινί, καὶ τῷ Β τινὶ ἀναγκαῖον ὑπάρχειν τὸ Α· τὸ γὰρ Β ὑπὸ τὸ Γ ἐστίν. γίγνεται οὖν τὸ πρῶτον σχῆμα. ὁμοίως δὲ δειχθήσεται καὶ εἰ τὸ Β Γ ἐστὶν ἀναγκαῖον· ἀντιστρέφει γὰρ τὸ Γ τῷ Α τινί, ὥστ' εἰ παντὶ τῷ Γ τὸ Β ἐξ ἀνάγκης ὑπάρχει, καὶ τῷ Α τινὶ ὑπάρξει ἐξ ἀνάγκης.

Πάλιν ἔστω τὸ μὲν Α Γ στερητικόν, τὸ δὲ Β Γ καταφατικόν, ἀναγκαῖον δὲ τὸ στερητικόν. ἐπεὶ οὖν ἀντιστρέφει τινὶ τῷ Β τὸ Γ, τὸ δὲ Α οὐδενὶ τῷ Γ ἐξ ἀνάγκης, οὐδὲ τῷ Β τινὶ ὑπάρξει ἐξ ἀνάγκης τὸ Α· τὸ γὰρ Β ὑπὸ τὸ Γ ἐστίν. εἰ δὲ τὸ κατηγορικὸν ἀναγκαῖον, οὐκ ἔσται τὸ συμπέρασμα ἀναγκαῖον. ἔστω γὰρ τὸ Β Γ κατηγορικόν καὶ ἀναγκαῖον, τὸ δὲ Α Γ στερητικὸν καὶ μὴ ἀναγκαῖον. ἐπεὶ οὖν ἀντιστρέφει τὸ καταφατικόν, ὑπάρξει καὶ τὸ Γ τινὶ τῷ Β ἐξ ἀνάγκης, ὥστ' εἰ τὸ μὲν Α μηδενὶ τῷ Γ τὸ [31b] δὲ Γ τινὶ τῷ Β, τὸ Α τινὶ τῷ Β οὐχ ὑπάρξει· ἀλλ' οὐκ ἐξ ἀνάγκης· δέδεικται γὰρ ἐν τῷ πρώτῳ σχήματι ὅτι τῆς στερητικῆς προτάσεως μὴ ἀναγκαίᾳ οὐσης οὐδὲ τὸ συμπέρασμα ἔσται ἀναγκαῖον. ἔτι κἀν διὰ τῶν ὄρων εἴη φανερόν. ἔστω γὰρ τὸ μὲν Α ἀγαθόν, τὸ δ' ἐφ' ᾧ Β ζῶον, τὸ δὲ Γ ἵππος. τὸ μὲν οὖν ἀγαθὸν ἐνδέχεται μηδενὶ ἵππῳ ὑπάρχειν, τὸ δὲ ζῶον ἀνάγκη παντὶ ὑπάρχειν· ἀλλ' οὐκ ἀνάγκη ζῶόν τι μὴ εἶναι ἀγαθόν, εἴπερ ἐνδέχεται πᾶν εἶναι ἀγαθόν. ἢ εἰ μὴ τοῦτο δυνατόν, ἀλλὰ τὸ ἐγγηγορέναι ἢ τὸ καθεύδειν ὄρον θετέον· ἅπαν γὰρ ζῶον δεκτικὸν τούτων.

Εἰ μὲν οὖν οἱ ὅροι καθόλου πρὸς τὸ μέσον εἰσὶν, εἴρηται πότε ἔσται τὸ συμπέρασμα ἀναγκαῖον· εἰ δ' ὁ μὲν καθόλου ὁ δ' ἐν μέρει,

κατηγορικῶν μὲν ὄντων ἀμφοτέρων, ὅταν τὸ καθόλου γένηται ἀναγκαῖον, καὶ τὸ συμπέρασμα ἔσται ἀναγκαῖον. ἀπόδειξις δ' ἡ αὐτὴ ἢ καὶ πρότερον· ἀντιστρέφει γὰρ καὶ τὸ ἐν μέρει κατηγορικόν. εἰ οὖν ἀνάγκη τὸ Β παντὶ τῷ Γ ὑπάρχειν, τὸ δὲ Α ὑπὸ τὸ Γ ἐστίν, ἀνάγκη τὸ Β τινὶ τῷ Α ὑπάρχειν. εἰ δὲ τὸ Β τῷ Α τινί, καὶ τὸ Α τῷ Β τινὶ ὑπάρχειν ἀναγκαῖον· ἀντιστρέφει γάρ. ὁμοίως δὲ καὶ εἰ τὸ Α Γ εἴη ἀναγκαῖον καθόλου ὄν· τὸ γὰρ Β ὑπὸ τὸ Γ ἐστίν. εἰ δὲ τὸ ἐν μέρει ἐστὶν ἀναγκαῖον, οὐκ ἔσται τὸ συμπέρασμα ἀναγκαῖον. ἔστω γὰρ τὸ Β Γ ἐν μέρει τε καὶ ἀναγκαῖον, τὸ δὲ Α παντὶ τῷ Γ ὑπαρχέτω, μὴ μέντοι ἐξ ἀνάγκης. ἀντιστραφέντος οὖν τοῦ Β Γ τὸ πρῶτον γίγνεται σχῆμα, καὶ ἡ μὲν καθόλου πρότασις οὐκ ἀναγκαία, ἡ δ' ἐν μέρει ἀναγκαία. ὅτε δ' οὕτως ἔχοιεν αἱ προτάσεις, οὐκ ἦν τὸ συμπέρασμα ἀναγκαῖον, ὥστ' οὐδ' ἐπὶ τούτων. ἔτι δὲ καὶ ἐκ τῶν ὅρων φανερόν. ἔστω γὰρ τὸ μὲν Α ἐγγήγορσις, τὸ δὲ Β δίπουν, ἐφ' ᾧ δὲ τὸ Γ ζῶον. τὸ μὲν οὖν Β τινὶ τῷ Γ ἀνάγκη ὑπάρχειν, τὸ δὲ Α τῷ Γ ἐνδέχεται, καὶ τὸ Α τῷ Β οὐκ ἀναγκαῖον· οὐ γὰρ ἀνάγκη δίπουν τι καθεύδειν ἢ ἐγγηγορέναι. ὁμοίως δὲ καὶ διὰ τῶν αὐτῶν ὅρων δειχθήσεται καὶ εἰ τὸ Α Γ εἴη ἐν μέρει τε καὶ ἀναγκαῖον.

Εἰ δ' ὁ μὲν κατηγορικὸς ὁ δὲ στερητικὸς τῶν ὅρων, ὅταν μὲν ἢ τὸ καθόλου στερητικόν τε καὶ ἀναγκαῖον, καὶ τὸ συμπέρασμα ἔσται ἀναγκαῖον· εἰ γὰρ τὸ Α τῷ Γ μηδενὶ ἐνδέχεται, τὸ δὲ Β τινὶ τῷ Γ ὑπάρχει, τὸ Α τινὶ τῷ Β ἀνάγκη μὴ ὑπάρχειν. ὅταν δὲ τὸ καταφατικὸν ἀναγκαῖον τεθῇ, ἢ καθόλου ὄν ἢ ἐν μέρει, ἢ τὸ στερητικὸν κατὰ μέρος, οὐκ ἔσται τὸ συμπέρασμα ἀναγκαῖον. τὰ μὲν γὰρ ἄλλα ταῦτα ἃ καὶ ἐπὶ τῶν πρότερον ἐροῦμεν, ὅροι δ' ὅταν μὲν ἢ καθόλου τὸ κατηγορικὸν ἀναγκαῖον, ἐγγήγορσις — ζῶον — ἄνθρωπος, μέσον [32a] ἄνθρωπος, ὅταν δ' ἐν μέρει τὸ κατηγορικὸν ἀναγκαῖον, ἐγγήγορσις — ζῶον — λευκόν· ζῶον μὲν γὰρ ἀνάγκη τινὶ λευκῷ ὑπάρχειν, ἐγγήγορσις δ' ἐνδέχεται μηδενί, καὶ οὐκ ἀνάγκη τινὶ ζῳῳ μὴ ὑπάρχειν ἐγγήγορσιν. ὅταν δὲ τὸ στερητικὸν ἐν μέρει ὄν ἀναγκαῖον ἢ, δίπουν — κινούμενον — ζῶον, μέσον ζῶον.

Κεφάλαιο 12

Φανερόν οὖν ὅτι τοῦ μὲν ὑπάρχειν οὐκ ἔστι συλλογισμός, ἐὰν μὴ ἀμφοτέραι ὧσιν αἱ προτάσεις ἐν τῷ ὑπάρχειν, τοῦ δ' ἀναγκαίου ἔστι καὶ τῆς ἐτέρας μόνον ἀναγκαίας οὕσης. ἐν ἀμφοτέροις δέ, καὶ καταφατικῶν καὶ στερητικῶν ὄντων τῶν συλλογισμῶν, ἀνάγκη τὴν ἐτέραν πρότασιν ὁμοίαν εἶναι τῷ συμπεράσματι. λέγω δὲ τὸ ὁμοίαν, εἰ μὲν ὑπάρχον, ὑπάρχουσαν, εἰ δ' ἀναγκαῖον, ἀναγκαίαν. ὥστε καὶ τοῦτο δῆλον, ὅτι οὐκ ἔστι τὸ συμπέρασμα οὔτ' ἀναγκαῖον οὔθ' ὑπάρχον εἶναι μὴ ληφθείσης ἀναγκαίας ἢ ὑπαρχούσης προτάσεως.

Κεφάλαιο 13

Περὶ μὲν οὖν τοῦ ἀναγκαίου, πῶς γίνεται καὶ τίνα διαφορὰν ἔχει πρὸς τὸ ὑπάρχον, εἴρηται σχεδὸν ἱκανῶς· περὶ δὲ τοῦ ἐνδεχομένου μετὰ ταῦτα λέγωμεν πότε καὶ πῶς καὶ διὰ τίνων ἔσται συλλογισμός. λέγω δ' ἐνδέχεσθαι καὶ τὸ ἐνδεχόμενον, οὗ μὴ ὄντος ἀναγκαίου, τεθέντος δ' ὑπάρχειν, οὐδὲν ἔσται διὰ τοῦτ' ἀδύνατον· τὸ γὰρ ἀναγκαῖον ὁμωνύμως ἐνδέχεσθαι λέγομεν. [ὅτι δὲ τοῦτ' ἔστι τὸ ἐνδεχόμενον, φανερόν ἐκ τε τῶν ἀποφάσεων καὶ τῶν καταφάσεων τῶν ἀντικειμένων· τὸ γὰρ οὐκ ἐνδέχεται ὑπάρχειν καὶ ἀδύνατον ὑπάρχειν καὶ ἀνάγκη μὴ ὑπάρχειν ἤτοι ταῦτά ἐστιν ἢ ἀκολουθεῖ ἀλλήλοις, ὥστε καὶ τὰ ἀντικείμενα, τὸ ἐνδέχεται ὑπάρχειν καὶ οὐκ ἀδύνατον ὑπάρχειν καὶ οὐκ ἀνάγκη μὴ ὑπάρχειν, ἤτοι ταῦτά ἐσται ἢ ἀκολουθοῦντα ἀλλήλοις· κατὰ παντὸς γὰρ ἢ φάσις ἢ ἡ ἀπόφασις. ἔσται ἄρα τὸ ἐνδεχόμενον οὐκ ἀναγκαῖον καὶ τὸ μὴ ἀναγκαῖον ἐνδεχόμενον.] συμβαίνει δὲ πάσας τὰς κατὰ τὸ ἐνδέχεσθαι προτάσεις ἀντιστρέφειν ἀλλήλαις. λέγω δὲ οὐ τὰς καταφατικὰς ταῖς ἀποφατικαῖς, ἀλλ' ὅσαι καταφατικὸν ἔχουσι τὸ σχῆμα κατὰ τὴν ἀντίθεσιν, οἷον τὸ ἐνδέχεσθαι ὑπάρχειν τῷ ἐνδέχεσθαι μὴ ὑπάρχειν, καὶ τὸ παντὶ ἐνδέχεσθαι τῷ ἐνδέχεσθαι μηδενὶ καὶ μὴ παντί, καὶ τὸ τινὶ τῷ μὴ τινί. τὸν αὐτὸν δὲ τρόπον καὶ ἐπὶ τῶν ἄλλων. ἐπεὶ γὰρ τὸ ἐνδεχόμενον οὐκ ἔστιν ἀναγκαῖον, τὸ δὲ μὴ ἀναγκαῖον ἐγκωρεῖ μὴ ὑπάρχειν, φανερόν ὅτι, εἰ ἐνδέχεται τὸ Α τῷ Β ὑπάρχειν, ἐνδέχεται καὶ μὴ ὑπάρχειν· καὶ εἰ παντὶ ἐνδέχεται ὑπάρχειν, καὶ παντὶ ἐνδέχεται μὴ ὑπάρχειν. ὁμοίως δὲ κατὰ τῶν ἐν μέρει καταφάσεων· ἢ γὰρ αὕτη [32b] ἀπόδειξις. εἰσὶ δ' αἱ τοιαῦται προτάσεις κατηγορικαὶ καὶ οὐ στερητικαί· τὸ γὰρ ἐνδέχεσθαι τῷ εἶναι ὁμοίως τάττεται, καθάπερ ἐλέχθη πρότερον.

Διωρισμένων δὲ τούτων πάλιν λέγωμεν ὅτι τὸ ἐνδέχεσθαι κατὰ δύο λέγεται τρόπους, ἓνα μὲν τὸ ὡς ἐπὶ τὸ πολὺ γίνεσθαι καὶ διαλείπειν τὸ ἀναγκαῖον, οἷον τὸ πολιοῦσθαι ἄνθρωπον ἢ τὸ αὐξάνεσθαι ἢ φθίνειν, ἢ ὅλως τὸ πεφυκὸς ὑπάρχειν (τοῦτο γὰρ οὐ συνεχὲς μὲν ἔχει τὸ ἀναγκαῖον διὰ τὸ μὴ ἀεὶ εἶναι ἄνθρωπον, ὄντος μέντοι ἀνθρώπου ἢ ἐξ ἀνάγκης ἢ ὡς ἐπὶ τὸ πολὺ ἐστίν), ἄλλον δὲ τὸ ἀόριστον, ὃ καὶ οὕτως καὶ μὴ οὕτως δυνατόν, οἷον τὸ βαδίζειν ζῶον ἢ βαδίζοντος γενέσθαι σεισμόν, ἢ ὅλως τὸ ἀπὸ τύχης γινόμενον·

οὐδὲν γὰρ μᾶλλον οὕτως πέφυκεν ἢ ἐναντίως. ἀντιστρέφει μὲν οὖν καὶ κατὰ τὰς ἀντικειμένας προτάσεις ἐκάτερον τῶν ἐνδεχομένων, οὐ μὴν τὸν αὐτόν γε τρόπον, ἀλλὰ τὸ μὲν πεφυκὸς εἶναι τῷ μὴ ἐξ ἀνάγκης ὑπάρχειν (οὕτω γὰρ ἐνδέχεται μὴ πολιουῖσθαι ἄνθρωπον), τὸ δ' ἀόριστον τῷ μηδὲν μᾶλλον οὕτως ἢ ἐκείνως. ἐπιστήμη δὲ καὶ συλλογισμὸς ἀποδεικτικὸς τῶν μὲν ἀορίστων οὐκ ἔστι διὰ τὸ ἄτακτον εἶναι τὸ μέσον, τῶν δὲ πεφυκόντων ἔστι, καὶ σχεδὸν οἱ λόγοι καὶ αἱ σκέψεις γίνονται περὶ τῶν οὕτως ἐνδεχομένων· ἐκείνων δ' ἐγχωρεῖ μὲν γενέσθαι συλλογισμόν, οὐ μὴν εἰσθῆ γέ ζητεῖσθαι.

Ταῦτα μὲν οὖν διορισθήσεται μᾶλλον ἐν τοῖς ἐπομένοις· νῦν δὲ λέγωμεν πότε καὶ πῶς καὶ τίς ἔσται συλλογισμὸς ἐκ τῶν ἐνδεχομένων προτάσεων. ἐπεὶ δὲ τὸ ἐνδέχεσθαι τόδε τῷδε ὑπάρχειν διχῶς ἔστιν ἐκλαβεῖν· ἢ γὰρ ὅ ὑπάρχει τόδε ἢ ὅ ἐνδέχεται αὐτὸ ὑπάρχειν — τὸ γάρ, καθ' οὗ τὸ Β, τὸ Α ἐνδέχεσθαι τούτων σημαίνει θάτερον, ἢ καθ' οὗ λέγεται τὸ Β ἢ καθ' οὗ ἐνδέχεται λέγεσθαι· τὸ δέ, καθ' οὗ τὸ Β, τὸ Α ἐνδέχεσθαι ἢ παντὶ τῷ Β τὸ Α ἐγχωρεῖν οὐδὲν διαφέρει — φανερόν ὅτι διχῶς ἂν λέγοιτο τὸ Α τῷ Β παντὶ ἐνδέχεσθαι ὑπάρχειν. πρῶτον οὖν εἵπωμεν, εἰ καθ' οὗ τὸ Γ τὸ Β ἐνδέχεται, καὶ καθ' οὗ τὸ Β τὸ Α, τίς ἔσται καὶ ποῖος συλλογισμὸς· οὕτω γὰρ αἱ προτάσεις ἀμφοτέραι λαμβάνονται κατὰ τὸ ἐνδέχεσθαι, ὅταν δὲ καθ' οὗ τὸ Β ὑπάρχει τὸ Α ἐνδέχεται, ἢ μὲν ὑπάρχουσα ἢ δ' ἐνδεχομένη. ὥστ' ἀπὸ τῶν ὁμοιοσημόνων ἀρκτέον, καθάπερ καὶ ἐν τοῖς ἄλλοις.

Κεφάλαιο 14

Όταν οὖν τὸ Α παντὶ τῷ Β ἐνδέχεται καὶ τὸ Β παντὶ τῷ Γ, συλλογισμὸς ἔσται τέλειος ὅτι τὸ Α παντὶ τῷ Γ ἐνδέχεται ὑπάρχειν. τοῦτο δὲ φανερόν ἐκ τοῦ ὁρισμοῦ· τὸ γὰρ [33a] ἐνδέχεσθαι παντὶ ὑπάρχειν οὕτως ἐλέγομεν. ὁμοίως δὲ καὶ εἰ τὸ μὲν Α ἐνδέχεται μηδενὶ τῷ Β, τὸ δὲ Β παντὶ τῷ Γ, ὅτι τὸ Α ἐνδέχεται μηδενὶ τῷ Γ· τὸ γὰρ καθ' οὗ τὸ Β ἐνδέχεται, τὸ Α μὴ ἐνδέχεσθαι, τοῦτ' ἦν τὸ μηδὲν ἀπολείπειν τῶν ὑπὸ τὸ Β ἐνδεχομένων. ὅταν δὲ τὸ Α παντὶ τῷ Β ἐνδέχεται, τὸ δὲ Β ἐνδέχεται μηδενὶ τῷ Γ, διὰ μὲν τῶν εἰλημμένων προτάσεων οὐδεὶς γίνεται συλλογισμὸς, ἀντιστραφεῖσιν δὲ τῆς Β Γ κατὰ τὸ ἐνδέχεσθαι γίνεται ὁ αὐτὸς ὅσπερ πρότερον. ἐπεὶ γὰρ ἐνδέχεται τὸ Β μηδενὶ τῷ Γ ὑπάρχειν, ἐνδέχεται καὶ παντὶ ὑπάρχειν· τοῦτο δ' εἴρηται πρότερον. ὥστ' εἰ τὸ μὲν Β παντὶ τῷ Γ, τὸ δ' Α παντὶ τῷ Β, πάλιν ὁ αὐτὸς γίνεται συλλογισμὸς. ὁμοίως δὲ καὶ εἰ πρὸς ἀμφοτέρας τὰς προτάσεις ἢ ἀπόφασις τεθεῖη μετὰ τοῦ ἐνδέχεσθαι. λέγω δ' οἷον εἰ τὸ Α ἐνδέχεται μηδενὶ τῷ Β καὶ τὸ Β μηδενὶ τῷ Γ· διὰ μὲν γὰρ τῶν εἰλημμένων προτάσεων οὐδεὶς γίνεται συλλογισμὸς, ἀντιστρεφομένων δὲ πάλιν ὁ αὐτὸς ἔσται ὅσπερ καὶ πρότερον. φανερόν οὖν ὅτι τῆς ἀποφάσεως τιθεμένης πρὸς τὸ ἔλαττον ἄκρον ἢ πρὸς ἀμφοτέρας τὰς προτάσεις ἢ οὐ γίνεται συλλογισμὸς ἢ γίνεται μὲν ἀλλ' οὐ τέλειος· ἐκ γὰρ τῆς ἀντιστροφῆς περαίνεται τὸ ἀναγκαῖον.

Ἐὰν δ' ἡ μὲν καθόλου τῶν προτάσεων ἢ δ' ἐν μέρει ληφθῇ, πρὸς μὲν τὸ μείζον ἄκρον κειμένης τῆς καθόλου συλλογισμὸς ἔσται [τέλειος]. εἰ γὰρ τὸ Α παντὶ τῷ Β ἐνδέχεται, τὸ δὲ Β τινὶ τῷ Γ, τὸ Α τινὶ τῷ Γ ἐνδέχεται. τοῦτο δὲ φανερόν ἐκ τοῦ ὁρισμοῦ τοῦ ἐνδέχεσθαι. πάλιν εἰ τὸ Α ἐνδέχεται μηδενὶ τῷ Β, τὸ δὲ Β τινὶ τῷ Γ ἐνδέχεται ὑπάρχειν, ἀνάγκη τὸ Α ἐνδέχεσθαι τινὶ τῶν Γ μὴ ὑπάρχειν. ἀπόδειξις δ' ἡ αὐτή. ἐὰν δὲ στερητικὴ ληφθῇ ἢ ἐν μέρει πρότασις, ἢ δὲ καθόλου καταφατικὴ, τῇ δὲ θέσει ὁμοίως ἔχωσιν (οἷον τὸ μὲν Α παντὶ τῷ Β ἐνδέχεται, τὸ δὲ Β τινὶ τῷ Γ ἐνδέχεται μὴ ὑπάρχειν), διὰ μὲν τῶν εἰλημμένων προτάσεων οὐ γίνεται φανερὸς συλλογισμὸς, ἀντιστραφεῖσιν δὲ τῆς ἐν μέρει καὶ τεθέντος τοῦ Β τινὶ τῷ Γ ἐνδέχεσθαι ὑπάρχειν τὸ αὐτὸ ἔσται συμπέρασμα ὃ καὶ πρότερον, καθάπερ ἐν τοῖς ἐξ ἀρχῆς.

Ἐὰν δ' ἡ πρὸς τὸ μεῖζον ἄκρον ἐν μέρει ληφθῇ, ἡ δὲ πρὸς τὸ ἔλαττον καθόλου, ἐὰν τ' ἀμφοτέραι καταφατικαὶ τεθῶσιν ἐὰν τε στερητικαὶ ἐὰν τε μὴ ὁμοιοσχήμονες, ἐὰν τ' ἀμφοτέραι ἀδιόριστοι ἢ κατὰ μέρος, οὐδαμῶς ἔσται συλλογισμός· οὐδὲν γὰρ κωλύει τὸ Β ὑπερτείνειν τοῦ Α καὶ μὴ κατηγορεῖσθαι ἐπ' ἴσων· ὃ δ' ὑπερτείνει τὸ Β τοῦ Α, εἰλήφθω τὸ Γ· τούτῳ γὰρ οὔτε παντὶ [33b] οὔτε μηδενὶ οὔτε τινὶ οὔτε μὴ τινὶ ἐνδέχεται τὸ Α ὑπάρχειν, εἴπερ ἀντιστρέφουσιν αἱ κατὰ τὸ ἐνδέχεσθαι προτάσεις καὶ τὸ Β πλείοσιν ἐνδέχεται ἢ τὸ Α ὑπάρχειν. ἔτι δὲ καὶ ἐκ τῶν ὅρων φανερόν· οὕτω γὰρ ἐχουσῶν τῶν προτάσεων τὸ πρῶτον τῷ ἐσχάτῳ καὶ οὐδενὶ ἐνδέχεται καὶ παντὶ ὑπάρχειν ἀναγκαῖον. ὅροι δὲ κοινοὶ πάντων τοῦ μὲν ὑπάρχειν ἐξ ἀνάγκης ζῶον — λευκόν — ἄνθρωπος, τοῦ δὲ μὴ ἐνδέχεσθαι ζῶον — λευκόν — ἱμάτιον. φανερόν οὖν τοῦτον τὸν τρόπον ἐχόντων τῶν ὅρων ὅτι οὐδεὶς γίνεται συλλογισμός, ἢ γὰρ τοῦ ὑπάρχειν ἢ τοῦ ἐξ ἀνάγκης ἢ τοῦ ἐνδέχεσθαι πᾶς ἐστὶ συλλογισμός. τοῦ μὲν οὖν ὑπάρχειν καὶ τοῦ ἀναγκαίου φανερόν ὅτι οὐκ ἔστιν· ὁ μὲν γὰρ καταφατικὸς ἀναιρεῖται τῷ στερητικῷ, ὁ δὲ στερητικὸς τῷ καταφατικῷ. λείπεται δὴ τοῦ ἐνδέχεσθαι εἶναι· τοῦτο δ' ἀδύνατον· δέδεικται γὰρ ὅτι οὕτως ἐχόντων τῶν ὅρων καὶ παντὶ τῷ ἐσχάτῳ τὸ πρῶτον ἀνάγκη καὶ οὐδενὶ ἐνδέχεται ὑπάρχειν. ὥστ' οὐκ ἂν εἴη τοῦ ἐνδέχεσθαι συλλογισμός· τὸ γὰρ ἀναγκαῖον οὐκ ἦν ἐνδεχόμενον.

Φανερόν δὲ ὅτι καθόλου τῶν ὅρων ὄντων ἐν ταῖς ἐνδεχομέναις προτάσεσιν αἰεὶ γίνεται συλλογισμὸς ἐν τῷ πρώτῳ σχήματι, καὶ κατηγορικῶν καὶ στερητικῶν ὄντων, πλὴν κατηγορικῶν μὲν τέλειος, στερητικῶν δὲ ἀτελής. δεῖ δὲ τὸ ἐνδέχεσθαι λαμβάνειν μὴ ἐν τοῖς ἀναγκαίοις, ἀλλὰ κατὰ τὸν εἰρημένον διορισμόν. ἐνίστε δὲ λανθάνει τὸ τοιοῦτον.

Κεφάλαιο 15

Ἐὰν δ' ἡ μὲν ὑπάρχειν ἡ δ' ἐνδέχεσθαι λαμβάνηται τῶν προτάσεων, ὅταν μὲν ἡ πρὸς τὸ μείζον ἄκρον ἐνδέχεσθαι σημαίνει, τέλειοί τ' ἔσονται πάντες οἱ συλλογισμοὶ καὶ τοῦ ἐνδέχεσθαι κατὰ τὸν εἰρημένον διορισμόν, ὅταν δ' ἡ πρὸς τὸ ἔλαττον, ἀτελεῖς τε πάντες, καὶ οἱ στερητικοὶ τῶν συλλογισμῶν οὐ τοῦ κατὰ τὸν διορισμόν ἐνδεχομένου, ἀλλὰ τοῦ μηδενὶ ἢ μὴ παντὶ ἐξ ἀνάγκης ὑπάρχειν· εἰ γὰρ μηδενὶ ἢ μὴ παντὶ ἐξ ἀνάγκης, ἐνδέχεσθαι φαμεν καὶ μηδενὶ καὶ μὴ παντὶ ὑπάρχειν. ἐνδέχεσθω γὰρ τὸ Α παντὶ τῷ Β, τὸ δὲ Β παντὶ τῷ Γ κείσθω ὑπάρχειν. ἐπεὶ οὖν ὑπὸ τὸ Β ἐστὶ τὸ Γ, τῷ δὲ Β παντὶ ἐνδέχεται τὸ Α, φανερόν ὅτι καὶ τῷ Γ παντὶ ἐνδέχεται. γίνεται δὴ τέλειος συλλογισμός· ὁμοίως δὲ καὶ στερητικῆς οὔσης τῆς Α Β προτάσεως, τῆς δὲ Β Γ καταφατικῆς, καὶ τῆς μὲν ἐνδέχεσθαι τῆς δ' ὑπάρχειν λαμβανομένης, τέλειος ἔσται συλλογισμός ὅτι τὸ Α ἐνδέχεται μηδενὶ τῷ Γ ὑπάρχειν. [34a]

Ὅτι μὲν οὖν τοῦ ὑπάρχειν τιθεμένου πρὸς τὸ ἔλαττον ἄκρον τέλειοι γίνονται συλλογισμοί, φανερόν· ὅτι δ' ἐναντίως ἔχοντος ἔσονται συλλογισμοί, διὰ τοῦ ἀδυνάτου δεικτέον. ἅμα δ' ἔσται δῆλον καὶ ὅτι ἀτελεῖς· ἡ γὰρ δεῖξις οὐκ ἐκ τῶν εἰλημμένων προτάσεων. πρῶτον δὲ λεκτέον ὅτι εἰ τοῦ Α ὄντος ἀνάγκη τὸ Β εἶναι, καὶ δυνατοῦ ὄντος τοῦ Α δυνατόν ἔσται καὶ τὸ Β ἐξ ἀνάγκης. ἔστω γὰρ οὕτως ἐχόντων τὸ μὲν ἐφ' ᾧ τὸ Α δυνατόν, τὸ δ' ἐφ' ᾧ τὸ Β ἀδύνατον. εἰ οὖν τὸ μὲν δυνατόν, ὅτε δυνατόν εἶναι, γένοιτ' ἂν, τὸ δ' ἀδύνατον, ὅτ' ἀδύνατον, οὐκ ἂν γένοιτο, ἅμα δ' εἴη τὸ Α δυνατόν καὶ τὸ Β ἀδύνατον, ἐνδέχοιτ' ἂν τὸ Α γενέσθαι ἄνευ τοῦ Β, εἰ δὲ γενέσθαι, καὶ εἶναι· τὸ γὰρ γεγονός, ὅτε γέγονεν, ἔστιν. δεῖ δὲ λαμβάνειν μὴ μόνον ἐν τῇ γενέσει τὸ ἀδύνατον καὶ δυνατόν, ἀλλὰ καὶ ἐν τῷ ἀληθεύεσθαι καὶ ἐν τῷ ὑπάρχειν, καὶ ὁσαυῶς ἄλλως λέγεται τὸ δυνατόν· ἐν ᾗπασι γὰρ ὁμοίως ἔξει. ἔτι τὸ ὄντος τοῦ Α τὸ Β εἶναι, οὐχ ὥς ἐνός τινος ὄντος τοῦ Α τὸ Β ἔσται δεῖ ὑπολαβεῖν· οὐ γὰρ ἔστιν οὐδὲν ἐξ ἀνάγκης ἐνός τινος ὄντος, ἀλλὰ δυοῖν ἐλαχίστοις, οἷον ὅταν αἱ προτάσεις οὕτως ἔχωσιν ὥς ἐλέχθη κατὰ τὸν συλλογισμόν. εἰ γὰρ τὸ Γ κατὰ τοῦ Δ, τὸ δὲ Δ κατὰ τοῦ Ζ, καὶ τὸ Γ κατὰ τοῦ Ζ ἐξ ἀνάγκης· καὶ εἰ δυνατόν ἐκάτερον, καὶ τὸ συμπέρασμα δυνατόν. ὥσπερ οὖν εἴ τις θεΐη τὸ μὲν Α τὰς προτάσεις, τὸ δὲ Β τὸ

συμπέρασμα, συμβαίνει ἂν οὐ μόνον ἀναγκαῖον τοῦ Α ὄντος ἅμα καὶ τὸ Β εἶναι ἀναγκαῖον, ἀλλὰ καὶ δυνατοῦ δυνατόν.

Τούτου δὲ δειχθέντος, φανερόν ὅτι ψεύδους ὑποτεθέντος καὶ μὴ ἀδυνάτου καὶ τὸ συμβαῖνον διὰ τὴν ὑπόθεσιν ψεῦδος ἔσται καὶ οὐκ ἀδύνατον. οἷον εἰ τὸ Α ψεῦδος μὲν ἔστι μὴ μέντοι ἀδύνατον, ὄντος δὲ τοῦ Α τὸ Β ἔστι, καὶ τὸ Β ἔσται ψεῦδος μὲν οὐ μέντοι ἀδύνατον. ἐπεὶ γὰρ δέδεικται ὅτι εἰ τοῦ Α ὄντος τὸ Β ἔστι, καὶ δυνατοῦ ὄντος τοῦ Α ἔσται τὸ Β δυνατόν, ὑπόκειται δὲ τὸ Α δυνατόν εἶναι, καὶ τὸ Β ἔσται δυνατόν· εἰ γὰρ ἀδύνατον, ἅμα δυνατόν ἔσται τὸ αὐτὸ καὶ ἀδύνατον. Διωρισμένων δὴ τούτων ὑπαρχέτω τὸ Α παντὶ τῷ Β, τὸ δὲ Β παντὶ τῷ Γ ἐνδεχέσθω· ἀνάγκη οὖν τὸ Α παντὶ τῷ Γ ἐνδέχεσθαι ὑπάρχειν. μὴ γὰρ ἐνδεχέσθω, τὸ δὲ Β παντὶ τῷ Γ κείσθω ὡς ὑπάρχον· τοῦτο δὲ ψεῦδος μὲν, οὐ μέντοι ἀδύνατον. εἰ οὖν τὸ μὲν Α μὴ ἐνδέχεται παντὶ τῷ Γ, τὸ δὲ Β παντὶ ὑπάρχει τῷ Γ, τὸ Α οὐ παντὶ τῷ Β ἐνδέχεται· γίνεται γὰρ συλλογισμὸς διὰ τοῦ τρίτου σχήματος. ἀλλ' ὑπέκειτο παντὶ ἐνδέχεσθαι ὑπάρχειν. ἀνάγκη ἄρα τὸ Α παντὶ [34b] τῷ Γ ἐνδέχεσθαι· ψεύδους γὰρ τεθέντος καὶ οὐκ ἀδυνάτου τὸ συμβαῖνόν ἐστιν ἀδύνατον. [ἐγχωρεῖ δὲ καὶ διὰ τοῦ πρώτου σχήματος ποιῆσαι τὸ ἀδύνατον, θέντας τῷ Γ τὸ Β ὑπάρχειν. εἰ γὰρ τὸ Β παντὶ τῷ Γ ὑπάρχει, τὸ δὲ Α παντὶ τῷ Β ἐνδέχεται, κἂν τῷ Γ παντὶ ἐνδέχοιτο τὸ Α. ἀλλ' ὑπέκειτο μὴ παντὶ ἐγχωρεῖν.]

Δεῖ δὲ λαμβάνειν τὸ παντὶ ὑπάρχον μὴ κατὰ χρόνον ὀρίσαντας, οἷον νῦν ἢ ἐν τῷδε τῷ χρόνῳ, ἀλλ' ἀπλῶς· διὰ τοιούτων γὰρ προτάσεων καὶ τοὺς συλλογισμοὺς ποιοῦμεν, ἐπεὶ κατὰ γε τὸ νῦν λαμβανομένης τῆς προτάσεως οὐκ ἔσται συλλογισμὸς· οὐδὲν γὰρ ἴσως κωλύει ποτὲ καὶ παντὶ κινουμένῳ ἄνθρωπον ὑπάρχειν, οἷον εἰ μηδὲν ἄλλο κινοῖτο· τὸ δὲ κινούμενον ἐνδέχεται παντὶ ἵππῳ· ἀλλ' ἄνθρωπον οὐδενὶ ἵππῳ ἐνδέχεται. ἔτι ἔστω τὸ μὲν πρῶτον ζῶον, τὸ δὲ μέσον κινούμενον, τὸ δ' ἔσχατον ἄνθρωπος. αἱ μὲν οὖν προτάσεις ὁμοίως ἔξουσιν, τὸ δὲ συμπέρασμα ἀναγκαῖον, οὐκ ἐνδεχόμενον· ἐξ ἀνάγκης γὰρ ὁ ἄνθρωπος ζῶον. φανερόν οὖν ὅτι τὸ καθόλου ληπτέον ἀπλῶς, καὶ οὐ χρόνῳ διορίζοντας.

Πάλιν ἔστω στερητικὴ πρότασις καθόλου ἢ Α Β, καὶ εἰλήφθω τὸ μὲν Α μηδενὶ τῷ Β ὑπάρχειν, τὸ δὲ Β παντὶ ἐνδεχέσθω ὑπάρχειν τῷ Γ. τούτων οὖν τεθέντων ἀνάγκη τὸ Α ἐνδέχεσθαι μηδενὶ τῷ Γ ὑπάρχειν. μὴ γὰρ ἐνδεχέσθω, τὸ δὲ Β τῷ Γ κείσθω ὑπάρχον, καθάπερ πρότερον. ἀνάγκη δὴ τὸ Α τινὶ τῷ Β ὑπάρχειν· γίνεται γὰρ

συλλογισμὸς διὰ τοῦ τρίτου σχήματος· τοῦτο δὲ ἀδύνατον. ὥστ' ἐνδέχοιτ' ἂν τὸ Α μηδενὶ τῷ Γ· ψεύδους γὰρ τεθέντος ἀδύνατον τὸ συμβαῖνον. οὗτος οὖν ὁ συλλογισμὸς οὐκ ἔστι τοῦ κατὰ τὸν διορισμὸν ἐνδεχομένου, ἀλλὰ τοῦ μηδενὶ ἐξ ἀνάγκης (αὕτη γὰρ ἐστὶν ἡ ἀντίφασις τῆς γενομένης ὑποθέσεως· ἐτέθη γὰρ ἐξ ἀνάγκης τὸ Α τινὶ τῷ Γ ὑπάρχειν, ὁ δὲ διὰ τοῦ ἀδυνάτου συλλογισμὸς τῆς ἀντικειμένης ἐστὶν φάσεως). ἔτι δὲ καὶ ἐκ τῶν ὅρων φανερόν ὅτι οὐκ ἔσται τὸ συμπέρασμα ἐνδεχόμενον. ἔστω γὰρ τὸ μὲν Α κόραξ, τὸ δ' ἐφ' ᾧ Β διανοούμενον, ἐφ' ᾧ δὲ Γ ἄνθρωπος. οὐδενὶ δὴ τῷ Β τὸ Α ὑπάρχει· οὐδὲν γὰρ διανοούμενον κόραξ. τὸ δὲ Β παντὶ ἐνδέχεται τῷ Γ· παντὶ γὰρ ἀνθρώπῳ τὸ διανοεῖσθαι. ἀλλὰ τὸ Α ἐξ ἀνάγκης οὐδενὶ τῷ Γ· οὐκ ἄρα τὸ συμπέρασμα ἐνδεχόμενον. ἀλλ' οὐδ' ἀναγκαῖον αἰεὶ. ἔστω γὰρ τὸ μὲν Α κινούμενον, τὸ δὲ Β ἐπιστήμη, τὸ δ' ἐφ' ᾧ Γ ἄνθρωπος. τὸ μὲν οὖν Α οὐδενὶ τῷ Β ὑπάρξει, τὸ δὲ Β παντὶ τῷ Γ ἐνδέχεται, καὶ οὐκ ἔσται τὸ συμπέρασμα ἀναγκαῖον· οὐ γὰρ ἀνάγκη μηδένα κινεῖσθαι ἄνθρωπον, ἀλλ' [35a] οὐκ ἀνάγκη τινά. δηλον οὖν ὅτι τὸ συμπέρασμά ἐστι τοῦ μηδενὶ ἐξ ἀνάγκης ὑπάρχειν. ληπτέον δὲ βέλτιον τοὺς ὅρους.

Ἐὰν δὲ τὸ στερητικὸν τεθῇ πρὸς τὸ ἔλαττον ἄκρον ἐνδέχεσθαι σημαῖνον, ἐξ αὐτῶν μὲν τῶν εἰλημμένων προτάσεων οὐδεὶς ἔσται συλλογισμὸς, ἀντιστραφείσης δὲ τῆς κατὰ τὸ ἐνδέχεσθαι προτάσεως ἔσται, καθάπερ ἐν τοῖς πρότερον. ὑπαρχέτω γὰρ τὸ Α παντὶ τῷ Β, τὸ δὲ Β ἐνδεχέσθω μηδενὶ τῷ Γ. οὕτω μὲν οὖν ἐχόντων τῶν ὅρων οὐδὲν ἔσται ἀναγκαῖον· ἐὰν δ' ἀντιστραφῇ τὸ Β Γ καὶ ληθῇ τὸ Β παντὶ τῷ Γ ἐνδέχεσθαι, γίνεται συλλογισμὸς ὥσπερ πρότερον· ὁμοίως γὰρ ἔχουσιν οἱ ὅροι τῇ θέσει. τὸν αὐτὸν δὲ τρόπον καὶ στερητικῶν ὄντων ἀμφοτέρων τῶν διαστημάτων, ἐὰν τὸ μὲν Α Β μὴ ὑπάρχειν, τὸ δὲ Β Γ μηδενὶ ἐνδέχεσθαι σημαίνῃ· δι' αὐτῶν μὲν γὰρ τῶν εἰλημμένων οὐδαμῶς γίνεται τὸ ἀναγκαῖον, ἀντιστραφείσης δὲ τῆς κατὰ τὸ ἐνδέχεσθαι προτάσεως ἔσται συλλογισμὸς. εἰλήφθω γὰρ τὸ μὲν Α μηδενὶ τῷ Β ὑπάρχειν, τὸ δὲ Β ἐνδέχεσθαι μηδενὶ τῷ Γ. διὰ μὲν οὖν τούτων οὐδὲν ἀναγκαῖον· ἐὰν δὲ ληθῇ τὸ Β παντὶ τῷ Γ ἐνδέχεσθαι, ὅπερ ἐστὶν ἀληθές, ἡ δὲ Α Β πρότασις ὁμοίως ἔχη, πάλιν ὁ αὐτὸς ἔσται συλλογισμὸς. ἐὰν δὲ μὴ ὑπάρχειν τεθῇ τὸ Β παντὶ τῷ Γ καὶ μὴ ἐνδέχεσθαι μὴ ὑπάρχειν, οὐκ ἔσται συλλογισμὸς οὐδαμῶς, οὔτε στερητικῆς οὔσης οὔτε καταφατικῆς τῆς Α Β προτάσεως. ὅροι δὲ κοινοὶ τοῦ μὲν ἐξ ἀνάγκης ὑπάρχειν λευκόν — ζῶον — χιών, τοῦ δὲ

μη ἐνδέχεσθαι λευκόν — ζῶον — πίττα. Φανερόν οὖν ὅτι καθόλου τῶν ὄρων ὄντων, καὶ τῆς μὲν ὑπάρχειν τῆς δ' ἐνδέχεσθαι λαμβανομένης τῶν προτάσεων, ὅταν ἢ πρὸς τὸ ἔλαττον ἄκρον ἐνδέχεσθαι λαμβάνηται πρότασις, αἰεὶ γίνεται συλλογισμός, πλὴν ὅτε μὲν ἐξ αὐτῶν ὅτε δ' ἀντιστραφείσης τῆς προτάσεως. πότε δὲ τούτων ἐκάτερος καὶ διὰ τίν' αἰτίαν, εἰρήκαμεν.

Ἐὰν δὲ τὸ μὲν καθόλου τὸ δ' ἐν μέρει ληφθῇ τῶν διαστημάτων, ὅταν μὲν τὸ πρὸς τὸ μείζον ἄκρον καθόλου τεθῇ καὶ ἐνδεχόμενον, εἴτ' ἀποφατικὸν εἴτε καταφατικόν, τὸ δ' ἐν μέρει καταφατικόν καὶ ὑπάρχον, ἔσται συλλογισμὸς τέλειος, καθάπερ καὶ καθόλου τῶν ὄρων ὄντων. ἀπόδειξις δ' ἢ αὐτὴ ἢ καὶ πρότερον. ὅταν δὲ καθόλου μὲν ἦ τὸ πρὸς τὸ μείζον ἄκρον, ὑπάρχον δὲ καὶ μὴ ἐνδεχόμενον, θάτερον δ' ἐν μέρει καὶ ἐνδεχόμενον, ἐὰν τ' ἀποφατικαὶ ἐὰν τε καταφατικαὶ τεθῶσιν ἀμφοτέραι, ἐὰν τε ἢ μὲν ἀποφατικὴ ἢ δὲ καταφατικὴ, πάντως ἔσται συλλογισμὸς ἀτελής. πλὴν οἱ μὲν διὰ τοῦ ἀδυνάτου δειχθήσονται, [35b] οἱ δὲ καὶ διὰ τῆς ἀντιστροφῆς τῆς τοῦ ἐνδέχεσθαι, καθάπερ ἐν τοῖς πρότερον. ἔσται δὲ συλλογισμὸς διὰ τῆς ἀντιστροφῆς [καὶ] ὅταν ἢ μὲν καθόλου πρὸς τὸ μείζον ἄκρον τεθεῖσα σημαίνει τὸ ὑπάρχειν [ἢ μὴ ὑπάρχειν], ἢ δ' ἐν μέρει στερητικὴ οὕσα τὸ ἐνδέχεσθαι λαμβάνη, οἷον εἰ τὸ μὲν Α παντὶ τῷ Β ὑπάρχει ἢ μὴ ὑπάρχει, τὸ δὲ Β τινὶ τῷ Γ ἐνδέχεται μὴ ὑπάρχειν· ἀντιστραφέντος γὰρ τοῦ Β Γ κατὰ τὸ ἐνδέχεσθαι γίνεται συλλογισμός. ὅταν δὲ τὸ μὴ ὑπάρχειν λαμβάνη ἢ κατὰ μέρος τεθεῖσα, οὐκ ἔσται συλλογισμός. ὅροι τοῦ μὲν ὑπάρχειν λευκόν — ζῶον — χιών, τοῦ δὲ μὴ ὑπάρχειν λευκόν — ζῶον — πίττα· διὰ γὰρ τοῦ ἀδιορίστου ληπτέον τὴν ἀπόδειξιν. ἐὰν δὲ τὸ καθόλου τεθῇ πρὸς τὸ ἔλαττον ἄκρον, τὸ δ' ἐν μέρει πρὸς τὸ μείζον, ἐὰν τε στερητικὸν ἐὰν τε καταφατικόν, ἐὰν τ' ἐνδεχόμενον ἐὰν θ' ὑπάρχον ὅποτερονοῦν, οὐδαμῶς ἔσται συλλογισμός.

Οὐδ' ὅταν ἐν μέρει ἢ ἀδιορίστοι τεθῶσιν αἱ προτάσεις, εἴτ' ἐνδέχεσθαι λαμβάνουσαι εἴθ' ὑπάρχειν εἴτ' ἐναλλάξ, οὐδ' οὕτως ἔσται συλλογισμός. ἀπόδειξις δ' ἢ αὐτὴ ἢ περὶ κάπιν τῶν πρότερον. ὅροι δὲ κοινοὶ τοῦ μὲν ὑπάρχειν ἐξ ἀνάγκης ζῶον — λευκόν — ἄνθρωπος, τοῦ δὲ μὴ ἐνδέχεσθαι ζῶον — λευκόν — ἱμάτιον. φανερόν οὖν ὅτι τοῦ μὲν πρὸς τὸ μείζον ἄκρον καθόλου τεθέντος αἰεὶ γίνεται συλλογισμός, τοῦ δὲ πρὸς τὸ ἔλαττον οὐδέποτε· οὐδένος.

Κεφάλαιο 16

Όταν δ' ἡ μὲν ἐξ ἀνάγκης ὑπάρχειν ἢ δ' ἐνδέχεσθαι σημαίνει τῶν προτάσεων, ὁ μὲν συλλογισμὸς ἔσται τὸν αὐτὸν τρόπον ἐχόντων τῶν ὅρων, καὶ τέλειος ὅταν πρὸς τῷ ἐλάττονι ἄκρῳ τεθῇ τὸ ἀναγκαῖον· τὸ δὲ συμπέρασμα κατηγορικῶν μὲν ὄντων τῶν ὅρων τοῦ ἐνδέχεσθαι καὶ οὐ τοῦ ὑπάρχειν ἔσται, καὶ καθόλου καὶ μὴ καθόλου τιθεμένων, ἐὰν δ' ἢ τὸ μὲν καταφατικὸν τὸ δὲ στερητικόν, ὅταν μὲν ἢ τὸ καταφατικὸν ἀναγκαῖον, τοῦ ἐνδέχεσθαι καὶ οὐ τοῦ μὴ ὑπάρχειν, ὅταν δὲ τὸ στερητικόν, καὶ τοῦ ἐνδέχεσθαι μὴ ὑπάρχειν καὶ τοῦ μὴ ὑπάρχειν, καὶ καθόλου καὶ μὴ καθόλου τῶν ὅρων ὄντων· τὸ δ' ἐνδέχεσθαι ἐν τῷ συμπεράσματι τὸν αὐτὸν τρόπον ληπτέον ὥνπερ καὶ ἐν τοῖς πρότερον. τοῦ δ' ἐξ ἀνάγκης μὴ ὑπάρχειν οὐκ ἔσται συλλογισμὸς· ἕτερον γὰρ τὸ μὴ ἐξ ἀνάγκης ὑπάρχειν καὶ τὸ ἐξ ἀνάγκης μὴ ὑπάρχειν.

Ὅτι μὲν οὖν καταφατικῶν ὄντων τῶν ὅρων οὐ γίνεται τὸ συμπέρασμα ἀναγκαῖον, φανερόν. ὑπαρχέτω γὰρ τὸ μὲν Α παντὶ τῷ Β ἐξ ἀνάγκης, τὸ δὲ Β ἐνδεχέσθω παντὶ τῷ Γ. ἔσται δὴ συλλογισμὸς ἀτελὴς ὅτι ἐνδέχεται τὸ Α παντὶ τῷ Γ [36a] ὑπάρχειν. ὅτι δ' ἀτελὴς, ἐκ τῆς ἀποδείξεως δῆλον· τὸν αὐτὸν γὰρ τρόπον δειχθήσεται ὥνπερ κάπὶ τῶν πρότερον. πάλιν τὸ μὲν Α ἐνδεχέσθω παντὶ τῷ Β, τὸ δὲ Β παντὶ τῷ Γ ὑπαρχέτω ἐξ ἀνάγκης. ἔσται δὴ συλλογισμὸς ὅτι τὸ Α παντὶ τῷ Γ ἐνδέχεται ὑπάρχειν, ἀλλ' οὐχ ὅτι ὑπάρχει, καὶ τέλειος, ἀλλ' οὐκ ἀτελὴς· εὐθὺς γὰρ ἐπιτελεῖται διὰ τῶν ἐξ ἀρχῆς προτάσεων.

Εἰ δὲ μὴ ὁμοιοσχήμονες αἱ προτάσεις, ἔστω πρῶτον ἡ στερητικὴ ἀναγκαῖα, καὶ τὸ μὲν Α μηδενὶ ἐνδεχέσθω τῷ Β, τὸ δὲ Β παντὶ τῷ Γ ἐνδεχέσθω. ἀνάγκη δὴ τὸ Α μηδενὶ τῷ Γ ὑπάρχειν. κείσθω γὰρ ὑπάρχειν ἢ παντὶ ἢ τινί· τῷ δὲ Β ὑπέκειτο μηδενὶ ἐνδέχεσθαι. ἐπεὶ οὖν ἀντιστρέφει τὸ στερητικόν, οὐδὲ τὸ Β τῷ Α οὐδενὶ ἐνδέχεται· τὸ δὲ Α τῷ Γ ἢ παντὶ ἢ τινὶ κεῖται ὑπάρχειν· ὥστ' οὐδενὶ ἢ οὐ παντὶ τῷ Γ τὸ Β ἐνδέχεται ἂν ὑπάρχειν· ὑπέκειτο δὲ παντὶ ἐξ ἀρχῆς. φανερόν δ' ὅτι καὶ τοῦ ἐνδέχεσθαι μὴ ὑπάρχειν γίνεται συλλογισμὸς, εἴπερ καὶ τοῦ μὴ ὑπάρχειν. πάλιν ἔστω ἡ καταφατικὴ πρότασις ἀναγκαῖα, καὶ τὸ μὲν Α ἐνδεχέσθω μηδενὶ τῷ Β ὑπάρχειν, τὸ δὲ Β παντὶ τῷ Γ ὑπαρχέτω ἐξ ἀνάγκης. ὁ μὲν οὖν συλλογισμὸς ἔσται τέλειος, ἀλλ' οὐ τοῦ μὴ ὑπάρχειν ἀλλὰ τοῦ ἐνδέχεσθαι μὴ ὑπάρχειν· ἢ τε γὰρ

πρότασις οὕτως ἐλήφθη ἢ ἀπὸ τοῦ μείζονος ἄκρου, καὶ εἰς τὸ ἀδύνατον οὐκ ἔστιν ἀγαγεῖν· εἰ γὰρ ὑποτεθεῖν τὸ Α τῷ Γ τινὶ ὑπάρχειν, κεῖται δὲ καὶ τῷ Β ἐνδέχεσθαι μηδενὶ ὑπάρχειν, οὐδὲν συμβαίνει διὰ τούτων ἀδύνατον. ἐὰν δὲ πρὸς τῷ ἐλάττονι ἄκρῳ τεθῇ τὸ στερητικόν, ὅταν μὲν ἐνδέχεσθαι σημαίνει, συλλογισμὸς ἔσται διὰ τῆς ἀντιστροφῆς, καθάπερ ἐν τοῖς πρότερον, ὅταν δὲ μὴ ἐνδέχεσθαι, οὐκ ἔσται. οὐδ' ὅταν ἄμφω μὲν τεθῇ στερητικά, μὴ ἢ δ' ἐνδεχόμενον τὸ πρὸς τὸ ἐλάττον. ὅροι δ' οἱ αὐτοί, τοῦ μὲν ὑπάρχειν λευκόν — ζῶον — χιών, τοῦ δὲ μὴ ὑπάρχειν λευκόν — ζῶον — πίττα.

Τὸν αὐτὸν δὲ τρόπον ἔξει καὶ πᾶσι τῶν ἐν μέρει συλλογισμῶν. ὅταν μὲν γὰρ ἢ τὸ στερητικὸν ἀναγκαῖον, καὶ τὸ συμπέρασμα ἔσται τοῦ μὴ ὑπάρχειν. οἷον εἰ τὸ μὲν Α μηδενὶ τῷ Β ἐνδέχεται ὑπάρχειν, τὸ δὲ Β τινὶ τῷ Γ ἐνδέχεται ὑπάρχειν, ἀνάγκη τὸ Α τινὶ τῷ Γ μὴ ὑπάρχειν. εἰ γὰρ παντὶ ὑπάρχει, τῷ δὲ Β μηδενὶ ἐνδέχεται, οὐδὲ τὸ Β οὐδενὶ τῷ Α ἐνδέχεται ὑπάρχειν. ὥστ' εἰ τὸ Α παντὶ τῷ Γ ὑπάρχει, οὐδενὶ τῷ Γ τὸ Β ἐνδέχεται. ἀλλ' ὑπέκειτό τινι ἐνδέχεσθαι. ὅταν δὲ τὸ ἐν μέρει καταφατικὸν ἀναγκαῖον ἦ, τὸ ἐν τῷ στερητικῷ συλλογισμῷ, οἷον τὸ Β Γ, ἢ τὸ [36b] καθόλου τὸ ἐν τῷ κατηγορικῷ, οἷον τὸ Α Β, οὐκ ἔσται τοῦ ὑπάρχειν συλλογισμὸς. ἀπόδειξις δ' ἡ αὐτὴ ἢ καὶ ἐπὶ τῶν πρότερον. ἐὰν δὲ τὸ μὲν καθόλου τεθῇ πρὸς τὸ ἐλάττον ἄκρον, ἢ καταφατικὸν ἢ στερητικόν, ἐνδεχόμενον, τὸ δ' ἐν μέρει ἀναγκαῖον [πρὸς τῷ μείζονι ἄκρῳ], οὐκ ἔσται συλλογισμὸς (ὅροι δὲ τοῦ μὲν ὑπάρχειν ἐξ ἀνάγκης ζῶον — λευκόν — ἄνθρωπος, τοῦ δὲ μὴ ἐνδέχεσθαι ζῶον — λευκόν — ἱμάτιον)· ὅταν δ' ἀναγκαῖον ἦ τὸ καθόλου, τὸ δ' ἐν μέρει ἐνδεχόμενον, στερητικοῦ μὲν ὄντος τοῦ καθόλου τοῦ μὲν ὑπάρχειν ὅροι ζῶον — λευκόν — κόραξ, τοῦ δὲ μὴ ὑπάρχειν ζῶον — λευκόν — πίττα, καταφατικοῦ δὲ τοῦ μὲν ὑπάρχειν ζῶον — λευκόν — κύκνος, τοῦ δὲ μὴ ἐνδέχεσθαι ζῶον — λευκόν — χιών. οὐδ' ὅταν ἀδιόριστοι ληφθῶσιν αἱ προτάσεις ἢ ἀμφοτέραι κατὰ μέρος, οὐδ' οὕτως ἔσται συλλογισμὸς. ὅροι δὲ κοινοὶ τοῦ μὲν ὑπάρχειν ζῶον — λευκόν — ἄνθρωπος, τοῦ δὲ μὴ ὑπάρχειν ζῶον — λευκόν — ἄψυχον. καὶ γὰρ τὸ ζῶον τινὶ λευκῷ καὶ τὸ λευκὸν ἀψύχῳ τινὶ καὶ ἀναγκαῖον ὑπάρχειν καὶ οὐκ ἐνδέχεται ὑπάρχειν. καὶ πᾶσι τοῦ ἐνδέχεσθαι ὁμοίως, ὥστε πρὸς ἅπαντα χρήσιμοι οἱ ὅροι.

Φανερόν οὖν ἐκ τῶν εἰρημένων ὅτι ὁμοίως ἐχόντων τῶν ὁρῶν ἐν τε τῷ ὑπάρχειν καὶ ἐν τοῖς ἀναγκαίοις γίνεται τε καὶ οὐ γίνεται συλλογισμὸς, πλὴν κατὰ μὲν τὸ ὑπάρχειν τιθεμένης τῆς στερητικῆς

προτάσεως τοῦ ἐνδέχεσθαι ἢν ὁ συλλογισμός, κατὰ δὲ τὸ ἀναγκαῖον
τῆς στερητικῆς καὶ τοῦ ἐνδέχεσθαι καὶ τοῦ μὴ ὑπάρχειν. [δῆλον δὲ

Κεφάλαιο 17

Ἐν δὲ τῷ δευτέρῳ σχήματι ὅταν μὲν ἐνδέχῃσθαι λαμβάνωσιν ἀμφοτέραι αἱ προτάσεις, οὐδεὶς ἔσται συλλογισμός, οὔτε κατηγορικῶν οὔτε στερητικῶν τιθεμένων, οὔτε καθόλου οὔτε κατὰ μέρος· ὅταν δὲ ἡ μὲν ὑπάρχειν ἢ δ' ἐνδέχῃσθαι σημαίνει, τῆς μὲν καταφατικῆς ὑπάρχειν σημαίνουσης οὐδέποτ' ἔσται, τῆς δὲ στερητικῆς τῆς καθόλου ἀεί. τὸν αὐτὸν δὲ τρόπον καὶ ὅταν ἡ μὲν ἐξ ἀνάγκης ἢ δ' ἐνδέχῃσθαι λαμβάνηται τῶν προτάσεων. δεῖ δὲ καὶ ἐν τούτοις λαμβάνειν τὸ ἐν τοῖς συμπεράσμασιν ἐνδεχόμενον ὥσπερ ἐν τοῖς πρότερον.

Πρῶτον οὖν δεικτέον ὅτι οὐκ ἀντιστρέφει τὸ ἐν τῷ ἐνδέχῃσθαι στερητικόν, οἷον εἰ τὸ Α ἐνδέχεται μηδενὶ τῷ Β, οὐκ ἀνάγκη καὶ τὸ Β ἐνδέχῃσθαι μηδενὶ τῷ Α. κείσθω γὰρ τοῦτο, καὶ ἐνδεχέσθω τὸ Β μηδενὶ τῷ Α ὑπάρχειν. οὐκοῦν ἐπεὶ ἀντιστρέφουσιν αἱ ἐν τῷ ἐνδέχῃσθαι καταφάσεις ταῖς ἀποφάσεσι, καὶ αἱ ἐναντία καὶ αἱ ἀντικείμεναι, τὸ δὲ Β τῷ Α ἐνδέχεται μηδενὶ [37a] ὑπάρχειν, φανερόν ὅτι καὶ παντὶ ἂν ἐνδέχοιτο τῷ Α ὑπάρχειν. τοῦτο δὲ ψεῦδος· οὐ γὰρ εἰ τότε τῷδε παντὶ ἐνδέχεται, καὶ τότε τῷδε ἀναγκαῖον· ὥστ' οὐκ ἀντιστρέφει τὸ στερητικόν. ἔτι δ' οὐδὲν κωλύει τὸ μὲν Α τῷ Β ἐνδέχῃσθαι μηδενί, τὸ δὲ Β τινὶ τῶν Α ἐξ ἀνάγκης μὴ ὑπάρχειν, οἷον τὸ μὲν λευκὸν παντὶ ἀνθρώπῳ ἐνδέχεται μὴ ὑπάρχειν (καὶ γὰρ ὑπάρχειν), ἄνθρωπον δ' οὐκ ἀληθὲς εἰπεῖν ὥς ἐνδέχεται μηδενὶ λευκῷ· πολλοῖς γὰρ ἐξ ἀνάγκης οὐχ ὑπάρχει, τὸ δ' ἀναγκαῖον οὐκ ἦν ἐνδεχόμενον.

Ἀλλὰ μὴν οὐδ' ἐκ τοῦ ἀδυνάτου δειχθήσεται ἀντιστρέφον, οἷον εἴ τις ἀξιώσειν, ἐπεὶ ψεῦδος τὸ ἐνδέχῃσθαι τὸ Β τῷ Α μηδενὶ ὑπάρχειν, ἀληθὲς τὸ μὴ ἐνδέχῃσθαι μηδενί (φάσις γὰρ καὶ ἀπόφασις), εἰ δὲ τοῦτ', ἀληθὲς ἐξ ἀνάγκης τινὶ τῷ Α ὑπάρχειν· ὥστε καὶ τὸ Α τινὶ τῷ Β· τοῦτο δ' ἀδύνατον. οὐ γὰρ εἰ μὴ ἐνδέχεται μηδενὶ τὸ Β τῷ Α, ἀνάγκη τινὶ ὑπάρχειν. τὸ γὰρ μὴ ἐνδέχῃσθαι μηδενὶ διχῶς λέγεται, τὸ μὲν εἰ ἐξ ἀνάγκης τινὶ ὑπάρχει, τὸ δ' εἰ ἐξ ἀνάγκης τινὶ μὴ ὑπάρχει· τὸ γὰρ ἐξ ἀνάγκης τινὶ τῶν Α μὴ ὑπάρχον οὐκ ἀληθὲς εἰπεῖν ὥς παντὶ ἐνδέχεται μὴ ὑπάρχειν, ὥσπερ οὐδὲ τὸ τινὶ ὑπάρχον ἐξ ἀνάγκης ὅτι παντὶ ἐνδέχεται ὑπάρχειν. εἰ οὖν τις ἀξιοίῃ, ἐπεὶ οὐκ ἐνδέχεται τὸ Γ τῷ Δ παντὶ ὑπάρχειν, ἐξ ἀνάγκης τινὶ μὴ ὑπάρχειν

αυτό, ψεύδος ἂν λαμβάνοι· παντὶ γὰρ ὑπάρχει, ἀλλ' ὅτι ἐνίοις ἐξ ἀνάγκης ὑπάρχει, διὰ τοῦτο φαμεν οὐ παντὶ ἐνδέχεσθαι. ὥστε τῷ ἐνδέχεσθαι παντὶ ὑπάρχειν τό τ' ἐξ ἀνάγκης τινὶ ὑπάρχειν ἀντίκειται καὶ τὸ ἐξ ἀνάγκης τινὶ μὴ ὑπάρχειν. ὁμοίως δὲ καὶ τῷ ἐνδέχεσθαι μηδενί. δηλὸν οὖν ὅτι πρὸς τὸ οὕτως ἐνδεχόμενον καὶ μὴ ἐνδεχόμενον ὡς ἐν ἀρχῇ διωρίσαμεν οὐ τὸ ἐξ ἀνάγκης τινὶ ὑπάρχειν ἀλλὰ τὸ ἐξ ἀνάγκης τινὶ μὴ ὑπάρχειν ληπτέον. τούτου δὲ ληφθέντος οὐδὲν συμβαίνει ἀδύνατον, ὥστ' οὐ γίνεται συλλογισμός. φανερόν οὖν ἐκ τῶν εἰρημένων ὅτι οὐκ ἀντιστρέφει τὸ στερητικόν.

Τούτου δὲ δειχθέντος κείσθω τὸ Α τῷ μὲν Β ἐνδέχεσθαι μηδενί, τῷ δὲ Γ παντί. διὰ μὲν οὖν τῆς ἀντιστροφῆς οὐκ ἔσται συλλογισμός· εἴρηται γὰρ ὅτι οὐκ ἀντιστρέφει ἡ τοιαύτη πρότασις. ἀλλ' οὐδὲ διὰ τοῦ ἀδυνάτου· τεθέντος γὰρ τοῦ Β <μὴ> παντὶ τῷ Γ ἐνδέχεσθαι <μὴ> ὑπάρχειν οὐδὲν συμβαίνει ψεύδος· ἐνδέχοιτο γὰρ ἂν τὸ Α τῷ Γ καὶ παντὶ καὶ μηδενὶ ὑπάρχειν. ὅλως δ' εἰ ἔστι συλλογισμός, δηλὸν ὅτι τοῦ ἐνδέχεσθαι ἀνείη διὰ τὸ μηδετέραν τῶν προτάσεων εἰληφθαι ἐν τῷ ὑπάρχειν, καὶ οὗτος ἢ καταφατικὸς ἢ στερητικὸς· οὐδετέρως δ' [37b] ἐγχωρεῖ. καταφατικοῦ μὲν γὰρ τεθέντος δειχθήσεται διὰ τῶν ὄρων ὅτι οὐκ ἐνδέχεται ὑπάρχειν, στερητικοῦ δέ, ὅτι τὸ συμπέρασμα οὐκ ἐνδεχόμενον ἀλλ' ἀναγκαῖόν ἐστιν. ἔστω γὰρ τὸ μὲν Α λευκόν, τὸ δὲ Β ἄνθρωπος, ἐφ' ᾧ δὲ Γ ἵππος. τὸ δὴ Α, τὸ λευκόν, ἐνδέχεται τῷ μὲν παντὶ τῷ δὲ μηδενὶ ὑπάρχειν. ἀλλὰ τὸ Β τῷ Γ οὔτε ὑπάρχειν ἐνδέχεται οὔτε μὴ ὑπάρχειν. ὅτι μὲν οὖν ὑπάρχειν οὐκ ἐγχωρεῖ, φανερόν· οὐδεὶς γὰρ ἵππος ἄνθρωπος. ἀλλ' οὐδ' ἐνδέχεσθαι μὴ ὑπάρχειν· ἀνάγκη γὰρ μηδένα ἵππον ἄνθρωπον εἶναι, τὸ δ' ἀναγκαῖον οὐκ ἦν ἐνδεχόμενον. οὐκ ἄρα γίνεται συλλογισμός. ὁμοίως δὲ δειχθήσεται καὶ ἂν ἀνάπαλιν τεθῇ τὸ στερητικόν, κἂν ἀμφοτέραι καταφατικαὶ ληφθῶσιν ἢ στερητικαί (διὰ γὰρ τῶν αὐτῶν ὄρων ἔσται ἢ ἀπόδειξις)· καὶ ὅταν ἢ μὲν καθόλου ἢ δ' ἐν μέρει, ἢ ἀμφοτέραι κατὰ μέρος ἢ ἀδιόριστοι, ἢ ὅσαχῶς ἄλλως ἐνδέχεται μεταλαβεῖν τὰς προτάσεις· αἰεὶ γὰρ ἔσται διὰ τῶν αὐτῶν ὄρων ἢ ἀπόδειξις. φανερόν οὖν ὅτι ἀμφοτέρων τῶν προτάσεων κατὰ τὸ ἐνδέχεσθαι τιθεμένων οὐδεὶς γίνεται συλλογισμός.

Κεφάλαιο 18

Εἰ δ' ἡ μὲν ὑπάρχειν ἡ δ' ἐνδέχεσθαι σημαίνει, τῆς μὲν κατηγορικῆς ὑπάρχειν τεθείσης τῆς δὲ στερητικῆς ἐνδέχεσθαι οὐδέποτε ἔσται συλλογισμός, οὔτε καθόλου τῶν ὄρων οὐτ' ἐν μέρει λαμβανομένων (ἀπόδειξις δ' ἡ αὐτὴ καὶ διὰ τῶν αὐτῶν ὄρων)· ὅταν δ' ἡ μὲν καταφατικὴ ἐνδέχεσθαι ἡ δὲ στερητικὴ ὑπάρχειν, ἔσται συλλογισμός. εἰλήφθω γὰρ τὸ Α τῷ μὲν Β μηδενὶ ὑπάρχειν, τῷ δὲ Γ παντὶ ἐνδέχεσθαι. ἀντιστραφέντος οὖν τοῦ στερητικοῦ τὸ Β τῷ Α οὐδενὶ ὑπάρξει· τὸ δὲ Α παντὶ τῷ Γ ἐνδέχεται· γίνεται δὴ συλλογισμός ὅτι ἐνδέχεται τὸ Β μηδενὶ τῷ Γ διὰ τοῦ πρώτου σχήματος. ὁμοίως δὲ καὶ εἰ πρὸς τῷ Γ τεθεῖη τὸ στερητικόν. ἐὰν δ' ἀμφότεραι μὲν ᾧσι στερητικαί, σημαίνει δ' ἡ μὲν μὴ ὑπάρχειν ἡ δ' ἐνδέχεσθαι, δι' αὐτῶν μὲν τῶν εἰλημμένων οὐδὲν συμβαίνει ἀναγκαῖον, ἀντιστραφείσης δὲ τῆς κατὰ τὸ ἐνδέχεσθαι προτάσεως γίνεται συλλογισμός ὅτι τὸ Β τῷ Γ ἐνδέχεται μηδενὶ ὑπάρχειν, καθάπερ ἐν τοῖς πρότερον· ἔσται γὰρ πάλιν τὸ πρῶτον σχῆμα. ἐὰν δ' ἀμφότεραι τεθῶσι κατηγορικαί, οὐκ ἔσται συλλογισμός. ὅροι τοῦ μὲν ὑπάρχειν ὑγίεια — ζῶον — ἄνθρωπος, τοῦ δὲ μὴ ὑπάρχειν ὑγίεια — ἵππος — ἄνθρωπος.

Τὸν αὐτὸν δὲ τρόπον ἔξει καὶ πὶ τῶν ἐν μέρει συλλογισμῶν. ὅταν μὲν γὰρ ἡ τὸ καταφατικὸν ὑπάρχον, εἴτε [38a] καθόλου εἴτ' ἐν μέρει ληφθὲν, οὐδεὶς ἔσται συλλογισμός (τοῦτο δ' ὁμοίως καὶ διὰ τῶν αὐτῶν ὄρων δείκνυται τοῖς πρότερον), ὅταν δὲ τὸ στερητικόν, ἔσται διὰ τῆς ἀντιστροφῆς, καθάπερ ἐν τοῖς πρότερον. πάλιν ἐὰν ἄμφω μὲν τὰ διαστήματα στερητικὰ ληφθῇ, καθόλου δὲ τὸ μὴ ὑπάρχειν, ἐξ αὐτῶν μὲν τῶν προτάσεων οὐκ ἔσται τὸ ἀναγκαῖον, ἀντιστραφέντος δὲ τοῦ ἐνδέχεσθαι καθάπερ ἐν τοῖς πρότερον ἔσται συλλογισμός. ἐὰν δὲ ὑπάρχον μὲν ἡ τὸ στερητικόν, ἐν μέρει δὲ ληφθῇ, οὐκ ἔσται συλλογισμός, οὔτε καταφατικῆς οὔτε στερητικῆς οὔσης τῆς ἐτέρας προτάσεως. οὐδ' ὅταν ἀμφότεραι ληφθῶσιν ἀδιόριστοι — ἡ καταφατικαὶ ἡ ἀποφατικαί — ἡ κατὰ μέρος. ἀπόδειξις δ' ἡ αὐτὴ καὶ διὰ τῶν αὐτῶν ὄρων.

Κεφάλαιο 19

Ἐὰν δ' ἡ μὲν ἐξ ἀνάγκης ἡ δ' ἐνδέχεσθαι σημαίνει τῶν προτάσεων, τῆς μὲν στερητικῆς ἀναγκαίως οὐσης ἔσται συλλογισμός, οὐ μόνον ὅτι ἐνδέχεται μὴ ὑπάρχειν, ἀλλὰ καὶ ὅτι οὐχ ὑπάρχει, τῆς δὲ καταφατικῆς οὐκ ἔσται. κείσθω γὰρ τὸ Α τῷ μὲν Β ἐξ ἀνάγκης μηδενὶ ὑπάρχειν, τῷ δὲ Γ παντὶ ἐνδέχεσθαι. ἀντιστραφείσης οὖν τῆς στερητικῆς οὐδὲ τὸ Β τῷ Α οὐδενὶ ὑπάρξει· τὸ δὲ Α παντὶ τῷ Γ ἐνεδέχεται· γίνεται δὴ πάλιν διὰ τοῦ πρώτου σχήματος ὁ συλλογισμὸς ὅτι τὸ Β τῷ Γ ἐνδέχεται μηδενὶ ὑπάρχειν. ἅμα δὲ δηλὸν ὅτι οὐδ' ὑπάρξει τὸ Β οὐδενὶ τῷ Γ. κείσθω γὰρ ὑπάρχειν· οὐκοῦν εἰ τὸ Α τῷ Β μηδενὶ ἐνδέχεται, τὸ δὲ Β ὑπάρχει τινὶ τῷ Γ, τὸ Α τῷ Γ τινὶ οὐκ ἐνδέχεται· ἀλλὰ παντὶ ὑπέκειτο ἐνδέχεσθαι. τὸν αὐτὸν δὲ τρόπον δειχθήσεται καὶ εἰ πρὸς τῷ Γ τεθείη τὸ στερητικόν.

Πάλιν ἔστω τὸ κατηγορικὸν ἀναγκαῖον, θάτερον δ' ἐνδεχόμενον, καὶ τὸ Α τῷ μὲν Β ἐνδεχέσθω μηδενί, τῷ δὲ Γ παντὶ ὑπαρχέτω ἐξ ἀνάγκης. οὕτως οὖν ἐχόντων τῶν ὅρων οὐδεὶς ἔσται συλλογισμός. συμβαίνει γὰρ τὸ Β τῷ Γ ἐξ ἀνάγκης μὴ ὑπάρχειν. ἔστω γὰρ τὸ μὲν Α λευκόν, ἐφ' ᾧ δὲ τὸ Β ἄνθρωπος, ἐφ' ᾧ δὲ τὸ Γ κύκνος. τὸ δὴ λευκὸν κύκνω μὲν ἐξ ἀνάγκης ὑπάρχει, ἀνθρώπῳ δ' ἐνδέχεται μηδενί· καὶ ἄνθρωπος οὐδενὶ κύκνω ἐξ ἀνάγκης. ὅτι μὲν οὖν τοῦ ἐνδέχεσθαι οὐκ ἔστι συλλογισμός, φανερόν· τὸ γὰρ ἐξ ἀνάγκης οὐκ ἦν ἐνδεχόμενον. ἀλλὰ μὴν οὐδὲ τοῦ ἀναγκαίου· τὸ γὰρ ἀναγκαῖον ἢ ἐξ ἀμφοτέρων ἀναγκαίων ἢ ἐκ τῆς στερητικῆς συνέβαινεν. ἔτι δὲ καὶ ἐγχωρεῖ τούτων κειμένων τὸ Β τῷ Γ ὑπάρχειν· οὐδὲν γὰρ κωλύει τὸ μὲν Γ ὑπὸ τὸ Β εἶναι, τὸ δὲ Α τῷ μὲν Β παντὶ ἐνδέχεσθαι, τῷ δὲ Γ ἐξ ἀνάγκης ὑπάρχειν, οἷον εἰ τὸ μὲν Γ εἴη ἐγρηγορός, τὸ δὲ Β ζῷον, τὸ δ' ἐφ' ᾧ τὸ Α κίνησις. τῷ μὲν γὰρ ἐγρηγορότι ἐξ [38b] ἀνάγκης κίνησις, ζῳῷ δὲ παντὶ ἐνδέχεται· καὶ πᾶν τὸ ἐγρηγορὸς ζῷον. φανερόν οὖν ὅτι οὐδὲ τοῦ μὴ ὑπάρχειν, εἴπερ οὕτως ἐχόντων ἀνάγκη ὑπάρχειν. οὐδὲ δὴ τῶν ἀντικειμένων καταφάσεων, ὥστ' οὐδεὶς ἔσται συλλογισμός. ὁμοίως δὲ δειχθήσεται καὶ ἀνάπαλιν τεθείσης τῆς καταφατικῆς.

Ἐὰν δ' ὁμοιοσχήμονες ὦσιν αἱ προτάσεις, στερητικῶν μὲν οὐσῶν ἀεὶ γίνεται συλλογισμὸς ἀντιστραφείσης τῆς κατὰ τὸ ἐνδέχεσθαι

προτάσεως καθάπερ ἐν τοῖς πρότερον. εἰλήφθω γὰρ τὸ Α τῷ μὲν Β ἐξ ἀνάγκης μὴ ὑπάρχειν, τῷ δὲ Γ ἐνδέχεσθαι μὴ ὑπάρχειν· ἀντιστραφείσων οὖν τῶν προτάσεων τὸ μὲν Β τῷ Α οὐδενὶ ὑπάρχει, τὸ δὲ Α παντὶ τῷ Γ ἐνδέχεται· γίνεται δὴ τὸ πρῶτον σχῆμα. κἂν εἰ πρὸς τῷ Γ τεθείη τὸ στερητικόν, ὡσαύτως. ἐὰν δὲ κατηγορικαὶ τεθῶσιν, οὐκ ἔσται συλλογισμός. τοῦ μὲν γὰρ μὴ ὑπάρχειν ἢ τοῦ ἐξ ἀνάγκης μὴ ὑπάρχειν φανερόν ὅτι οὐκ ἔσται διὰ τὸ μὴ εἰληφθαι στερητικὴν πρότασιν μήτ' ἐν τῷ ὑπάρχειν μήτ' ἐν τῷ ἐξ ἀνάγκης ὑπάρχειν. ἀλλὰ μὴν οὐδὲ τοῦ ἐνδέχεσθαι μὴ ὑπάρχειν· ἐξ ἀνάγκης γὰρ οὕτως ἐχόντων τὸ Β τῷ Γ οὐχ ὑπάρξει, οἷον εἰ τὸ μὲν Α τεθείη λευκόν, ἐφ' ᾧ δὲ τὸ Β κύκνος, τὸ δὲ Γ ἄνθρωπος. οὐδέ γε τῶν ἀντικειμένων καταφάσεων, ἐπεὶ δέδεικται τὸ Β τῷ Γ ἐξ ἀνάγκης οὐχ ὑπάρχον. οὐκ ἄρα γίνεται συλλογισμὸς ὅλως.

Ὅμοίως δ' ἔξει κατὰ τῶν ἐν μέρει συλλογισμῶν· ὅταν μὲν γὰρ ἢ τὸ στερητικόν καθόλου τε καὶ ἀναγκαῖον, αἰεὶ συλλογισμὸς ἔσται καὶ τοῦ ἐνδέχεσθαι καὶ τοῦ μὴ ὑπάρχειν (ἀπόδειξις δὲ διὰ τῆς ἀντιστροφῆς), ὅταν δὲ τὸ καταφατικόν, οὐδέποτε· τὸν αὐτὸν γὰρ τρόπον δειχθήσεται ὃν καὶ ἐν τοῖς καθόλου, καὶ διὰ τῶν αὐτῶν ὄρων. οὐδ' ὅταν ἀμφοτέραι ληφθῶσι καταφατικά· καὶ γὰρ τούτου ἡ αὐτὴ ἀπόδειξις ἢ καὶ πρότερον. ὅταν δὲ ἀμφοτέραι μὲν στερητικά, καθόλου δὲ καὶ ἀναγκαῖα ἢ τὸ μὴ ὑπάρχειν σημαίνουσα, δι' αὐτῶν μὲν τῶν εἰλημμένων οὐκ ἔσται τὸ ἀναγκαῖον, ἀντιστραφείσης δὲ τῆς κατὰ τὸ ἐνδέχεσθαι προτάσεως ἔσται συλλογισμὸς, καθάπερ ἐν τοῖς πρότερον. ἐὰν δ' ἀμφοτέραι ἀδιόριστοι ἢ ἐν μέρει τεθῶσιν, οὐκ ἔσται συλλογισμὸς. ἀπόδειξις δ' ἡ αὐτὴ καὶ διὰ τῶν αὐτῶν ὄρων.

Φανερόν οὖν ἐκ τῶν εἰρημένων ὅτι τῆς μὲν στερητικῆς τῆς καθόλου τιθεμένης ἀναγκαίας αἰεὶ γίνεται συλλογισμὸς οὐ μόνον τοῦ ἐνδέχεσθαι μὴ ὑπάρχειν, ἀλλὰ καὶ τοῦ μὴ ὑπάρχειν, τῆς δὲ καταφατικῆς οὐδέποτε. καὶ ὅτι τὸν αὐτὸν τρόπον ἐχόντων ἐν τε τοῖς ἀναγκαίοις καὶ ἐν τοῖς [39a] ὑπάρχουσι γίνεται τε καὶ οὐ γίνεται συλλογισμός. δηλὸν δὲ καὶ ὅτι πάντες ἀτελεῖς οἱ συλλογισμοί, καὶ ὅτι τελειοῦνται διὰ τῶν προειρημένων σχημάτων.

Κεφάλαιο 20

Ἐν δὲ τῷ τελευταίῳ σχήματι καὶ ἀμφοτέρων ἐνδεχομένων καὶ τῆς ἐτέρας ἔσται συλλογισμός. ὅταν μὲν οὖν ἐνδέχεσθαι σημαίνωσιν αἱ προτάσεις, καὶ τὸ συμπέρασμα ἔσται ἐνδεχόμενον· καὶ ὅταν ἡ μὲν ἐνδέχεσθαι ἢ δ' ὑπάρχειν. ὅταν δ' ἡ ἐτέρα τεθῇ ἀναγκαία, ἐὰν μὲν ἡ καταφατική, οὐκ ἔσται τὸ συμπέρασμα οὔτε ἀναγκαῖον οὔθ' ὑπάρχον, ἐὰν δ' ἡ στερητική, τοῦ μὴ ὑπάρχειν ἔσται συλλογισμός, καθάπερ καὶ ἐν τοῖς πρότερον· ληπτέον δὲ καὶ ἐν τούτοις ὁμοίως τὸ ἐν τοῖς συμπεράσμασιν ἐνδεχόμενον.

Ἔστωσαν δὴ πρῶτον ἐνδεχόμεναι, καὶ τὸ Α καὶ τὸ Β παντὶ τῷ Γ ἐνδέχεσθω ὑπάρχειν. ἐπεὶ οὖν ἀντιστρέφει τὸ καταφατικὸν ἐπὶ μέρους, τὸ δὲ Β παντὶ τῷ Γ ἐνδέχεται, καὶ τὸ Γ τινὶ τῷ Β ἐνδέχεται ἄν. ὥστ' εἰ τὸ μὲν Α παντὶ τῷ Γ ἐνδέχεται, τὸ δὲ Γ τινὶ τῷ Β, ἀνάγκη καὶ τὸ Α τινὶ τῷ Β ἐνδέχεσθαι· γίγνεται γὰρ τὸ πρῶτον σχῆμα. καὶ εἰ τὸ μὲν Α ἐνδέχεται μηδενὶ τῷ Γ ὑπάρχειν, τὸ δὲ Β παντὶ τῷ Γ, ἀνάγκη τὸ Α τινὶ τῷ Β ἐνδέχεσθαι μὴ ὑπάρχειν· ἔσται γὰρ πάλιν τὸ πρῶτον σχῆμα διὰ τῆς ἀντιστροφῆς. εἰ δ' ἀμφοτέραι στερητικαὶ τεθείησαν, ἐξ αὐτῶν μὲν τῶν εἰλημμένων οὐκ ἔσται τὸ ἀναγκαῖον, ἀντιστραφείσων δὲ τῶν προτάσεων ἔσται συλλογισμός, καθάπερ ἐν τοῖς πρότερον. εἰ γὰρ τὸ Α καὶ τὸ Β τῷ Γ ἐνδέχεται μὴ ὑπάρχειν, ἐὰν μεταληφθῇ τὸ ἐνδέχεσθαι ὑπάρχειν, πάλιν ἔσται τὸ πρῶτον σχῆμα διὰ τῆς ἀντιστροφῆς. εἰ δ' ὁ μὲν ἐστὶ καθόλου τῶν ὄρων ὁ δ' ἐν μέρει, τὸν αὐτὸν τρόπον ἐχόντων τῶν ὄρων ὅνπερ ἐπὶ τοῦ ὑπάρχειν, ἔσται τε καὶ οὐκ ἔσται συλλογισμός. ἐνδέχεσθω γὰρ τὸ μὲν Α παντὶ τῷ Γ, τὸ δὲ Β τινὶ τῷ Γ ὑπάρχειν. ἔσται δὴ πάλιν τὸ πρῶτον σχῆμα τῆς ἐν μέρει προτάσεως ἀντιστραφείσης· εἰ γὰρ τὸ Α παντὶ τῷ Γ, τὸ δὲ Γ τινὶ τῷ Β, τὸ Α τινὶ τῷ Β ἐνδέχεται. καὶ εἰ πρὸς τῷ Β Γ τεθείη τὸ καθόλου, ὡσαύτως. ὁμοίως δὲ καὶ εἰ τὸ μὲν Α Γ στερητικὸν εἴη, τὸ δὲ Β Γ καταφατικόν· ἔσται γὰρ πάλιν τὸ πρῶτον σχῆμα διὰ τῆς ἀντιστροφῆς. εἰ δ' ἀμφοτέραι στερητικαὶ τεθείησαν, ἡ μὲν καθόλου ἢ δ' ἐν μέρει, δι' αὐτῶν μὲν τῶν [39b] εἰλημμένων οὐκ ἔσται συλλογισμός, ἀντιστραφείσων δ' ἔσται, καθάπερ ἐν τοῖς πρότερον. ὅταν δὲ ἀμφοτέραι ἀδιόριστοι ἢ ἐν μέρει ληφθῶσιν, οὐκ ἔσται συλλογισμός· καὶ γὰρ παντὶ ἀνάγκη τὸ Α τῷ Β καὶ μηδενὶ ὑπάρχειν. ὅροι τοῦ ὑπάρχειν ζῶον — ἄνθρωπος — λευκόν, τοῦ μὴ ὑπάρχειν

ἵππος — ἄνθρωπος — λευκόν, μέσον λευκόν.

Κεφάλαιο 21

Ἐὰν δὲ ἡ μὲν ὑπάρχειν ἡ δ' ἐνδέχεσθαι σημαίνει τῶν προτάσεων, τὸ μὲν συμπέρασμα ἔσται ὅτι ἐνδέχεται καὶ οὐχ ὅτι ὑπάρχει, συλλογισμὸς δ' ἔσται τὸν αὐτὸν τρόπον ἐχόντων τῶν ὄρων ὃν καὶ ἐν τοῖς πρότερον. ἔστωσαν γὰρ πρῶτον κατηγοριοί, καὶ τὸ μὲν Α παντὶ τῷ Γ ὑπαρχέτω, τὸ δὲ Β παντὶ ἐνδεχέσθω ὑπάρχειν. ἀντιστραφέντος οὖν τοῦ Β Γ τὸ πρῶτον ἔσται σχῆμα, καὶ τὸ συμπέρασμα ὅτι ἐνδέχεται τὸ Α τινὶ τῷ Β ὑπάρχειν· ὅτε γὰρ ἡ ἑτέρα τῶν προτάσεων ἐν τῷ πρώτῳ σχήματι σημαίνει ἐνδέχεσθαι, καὶ τὸ συμπέρασμα ἦν ἐνδεχόμενον. ὁμοίως δὲ καὶ εἰ τὸ μὲν Β Γ ὑπάρχειν τὸ δὲ Α Γ ἐνδέχεσθαι, καὶ εἰ τὸ μὲν Α Γ στερητικὸν τὸ δὲ Β Γ κατηγορικόν, ὑπάρχοι δ' ὅποτερονοῦν, ἀμφοτέρως ἐνδεχόμενον ἔσται τὸ συμπέρασμα· γίνεται γὰρ πάλιν τὸ πρῶτον σχῆμα, δέδεικται δ' ὅτι τῆς ἑτέρας προτάσεως ἐνδέχεσθαι σημαίνουσιν ἐν αὐτῷ καὶ τὸ συμπέρασμα ἔσται ἐνδεχόμενον. εἰ δὲ τὸ στερητικὸν τεθείη πρὸς τὸ ἔλαττον ἄκρον, ἢ καὶ ἄμφω ληφθεῖ στερητικά, δι' αὐτῶν μὲν τῶν κειμένων οὐκ ἔσται συλλογισμὸς, ἀντιστραφέντων δ' ἔσται, καθάπερ ἐν τοῖς πρότερον.

Εἰ δ' ἡ μὲν καθόλου τῶν προτάσεων ἡ δ' ἐν μέρει, κατηγορικῶν μὲν οὐσῶν ἀμφοτέρων, ἢ τῆς μὲν καθόλου στερητικῆς τῆς δ' ἐν μέρει καταφατικῆς, ὁ αὐτὸς τρόπος ἔσται τῶν συλλογισμῶν· πάντες γὰρ περαίνονται διὰ τοῦ πρώτου σχήματος. ὥστε φανερόν ὅτι τοῦ ἐνδέχεσθαι καὶ οὐ τοῦ ὑπάρχειν ἔσται ὁ συλλογισμὸς. εἰ δ' ἡ μὲν καταφατικὴ καθόλου ἡ δὲ στερητικὴ ἐν μέρει, διὰ τοῦ ἀδυνάτου ἔσται ἡ ἀπόδειξις. ὑπαρχέτω γὰρ τὸ μὲν Β παντὶ τῷ Γ, τὸ δὲ Α ἐνδεχέσθω τινὶ τῷ Γ μὴ ὑπάρχειν· ἀνάγκη δὴ τὸ Α ἐνδέχεσθαι τινὶ τῷ Β μὴ ὑπάρχειν. εἰ γὰρ παντὶ τῷ Β τὸ Α ὑπάρχει ἐξ ἀνάγκης, τὸ δὲ Β παντὶ τῷ Γ κεῖται ὑπάρχειν, τὸ Α παντὶ τῷ Γ ἐξ ἀνάγκης ὑπάρξει· τοῦτο γὰρ δέδεικται πρότερον. ἀλλ' ὑπέκειτο τινὶ ἐνδέχεσθαι μὴ ὑπάρχειν. [40a]

Ὅταν δ' ἀδιόριστοι ἢ ἐν μέρει ληφθῶσιν ἀμφοτέρας, οὐκ ἔσται συλλογισμὸς. ἀπόδειξις δ' ἡ αὐτὴ ἢ καὶ ἐν τοῖς πρότερον, καὶ διὰ τῶν αὐτῶν ὄρων.

Κεφάλαιο 22

Εἰ δ' ἐστὶν ἡ μὲν ἀναγκαῖα τῶν προτάσεων ἡ δ' ἐνδεχομένη, κατηγορικῶν μὲν ὄντων τῶν ὄρων αἰ τοῦ ἐνδέχεσθαι ἔσται συλλογισμός, ὅταν δ' ἢ τὸ μὲν κατηγορικὸν τὸ δὲ στερητικόν, ἐὰν μὲν ἢ τὸ καταφατικὸν ἀναγκαῖον, τοῦ ἐνδέχεσθαι μὴ ὑπάρχειν, ἐὰν δὲ τὸ στερητικόν, καὶ τοῦ ἐνδέχεσθαι καὶ τοῦ μὴ ὑπάρχειν. τοῦ δ' ἐξ ἀνάγκης μὴ ὑπάρχειν οὐκ ἔσται συλλογισμός, ὥσπερ οὐδ' ἐν τοῖς ἐτέροις σχήμασιν.

Ἐστῶσαν δὴ κατηγορικοὶ πρῶτον οἱ ὅροι, καὶ τὸ μὲν Α παντὶ τῷ Γ ὑπαρχέτω ἐξ ἀνάγκης, τὸ δὲ Β παντὶ ἐνδεχέσθω ὑπάρχειν. ἐπεὶ οὖν τὸ μὲν Α παντὶ τῷ Γ ἀνάγκη, τὸ δὲ Γ τινὶ τῷ Β ἐνδέχεται, καὶ τὸ Α τινὶ τῷ Β ἐνδεχόμενον ἔσται καὶ οὐχ ὑπάρχον· οὕτω γὰρ συνέπιπτεν ἐπὶ τοῦ πρώτου σχήματος. ὁμοίως δὲ δειχθήσεται καὶ εἰ τὸ μὲν Β Γ τεθείη ἀναγκαῖον, τὸ δὲ Α Γ ἐνδεχόμενον. πάλιν ἔστω τὸ μὲν κατηγορικὸν τὸ δὲ στερητικόν, ἀναγκαῖον δὲ τὸ κατηγορικόν· καὶ τὸ μὲν Α ἐνδεχέσθω μηδενὶ τῷ Γ ὑπάρχειν, τὸ δὲ Β παντὶ ὑπαρχέτω ἐξ ἀνάγκης. ἔσται δὴ πάλιν τὸ πρῶτον σχῆμα· καὶ γὰρ ἡ στερητικὴ πρότασις ἐνδέχεσθαι σημαίνει· φανερόν οὖν ὅτι τὸ συμπέρασμα ἔσται ἐνδεχόμενον· ὅτε γὰρ οὕτως ἔχοιεν αἱ προτάσεις ἐν τῷ πρώτῳ σχήματι, καὶ τὸ συμπέρασμα ἦν ἐνδεχόμενον. εἰ δ' ἡ στερητικὴ πρότασις ἀναγκαῖα, τὸ συμπέρασμα ἔσται καὶ ὅτι ἐνδέχεται τινὶ μὴ ὑπάρχειν καὶ ὅτι οὐχ ὑπάρχει. κείσθω γὰρ τὸ Α τῷ Γ μὴ ὑπάρχειν ἐξ ἀνάγκης, τὸ δὲ Β παντὶ ἐνδέχεσθαι. ἀντιστραφέντος οὖν τοῦ Β Γ καταφατικοῦ τὸ πρῶτον ἔσται σχῆμα, καὶ ἀναγκαῖα ἡ στερητικὴ πρότασις. ὅτε δ' οὕτως ἔχοιεν αἱ προτάσεις, συνέβαινε τὸ Α τῷ Γ καὶ ἐνδέχεσθαι τινὶ μὴ ὑπάρχειν καὶ μὴ ὑπάρχειν, ὥστε καὶ τὸ Α τῷ Β ἀνάγκη τινὶ μὴ ὑπάρχειν. ὅταν δὲ τὸ στερητικὸν τεθῇ πρὸς τὸ ἔλαττον ἄκρον, ἐὰν μὲν ἐνδεχόμενον, ἔσται συλλογισμὸς μεταληφθείσης τῆς προτάσεως, καθάπερ ἐν τοῖς πρότερον, ἐὰν δ' ἀναγκαῖον, οὐκ ἔσται· καὶ γὰρ παντὶ ἀνάγκη καὶ οὐδενὶ ἐνδέχεται ὑπάρχειν. ὅροι τοῦ παντὶ ὑπάρχειν ὕπνος — ἵππος καθεύδων — ἄνθρωπος, τοῦ μηδενὶ ὕπνος — ἵππος ἐγρηγορώς — ἄνθρωπος.

Ὅμοίως δ' ἔξει καὶ εἰ ὁ μὲν καθόλου τῶν ὄρων ὁ δ' ἐν μέρει πρὸς τὸ μέσον· κατηγορικῶν μὲν γὰρ ὄντων [40b] ἀμφοτέρων τοῦ

ἐνδέχεσθαι καὶ οὐ τοῦ ὑπάρχειν ἔσται συλλογισμός, καὶ ὅταν τὸ μὲν στερητικὸν ληφθῇ τὸ δὲ καταφατικόν, ἀναγκαῖον δὲ τὸ καταφατικόν. ὅταν δὲ τὸ στερητικὸν ἀναγκαῖον, καὶ τὸ συμπέρασμα ἔσται τοῦ μὴ ὑπάρχειν· ὁ γὰρ αὐτὸς τρόπος ἔσται τῆς δείξεως καὶ καθόλου καὶ μὴ καθόλου τῶν ὅρων ὄντων. ἀνάγκη γὰρ διὰ τοῦ πρώτου σχήματος τελειοῦσθαι τοὺς συλλογισμούς, ὥστε καθάπερ ἐν ἐκείνοις, καὶ ἐπὶ τούτων ἀναγκαῖον συμπίπτειν. ὅταν δὲ τὸ στερητικὸν καθόλου ληφθὲν τεθῇ πρὸς τὸ ἔλαττον ἄκρον, ἐὰν μὲν ἐνδεχόμενον, ἔσται συλλογισμὸς διὰ τῆς ἀντιστροφῆς, ἐὰν δ' ἀναγκαῖον, οὐκ ἔσται. δειχθήσεται δὲ τὸν αὐτὸν τρόπον ὃν καὶ ἐν τοῖς καθόλου, καὶ διὰ τῶν αὐτῶν ὅρων. φανερόν οὖν καὶ ἐν τούτῳ τῷ σχήματι πότε καὶ πῶς ἔσται συλλογισμός, καὶ πότε τοῦ ἐνδέχεσθαι καὶ πότε τοῦ ὑπάρχειν. δῆλον δὲ καὶ ὅτι πάντες ἀτελεῖς, καὶ ὅτι τελειοῦνται διὰ τοῦ πρώτου σχήματος.

Κεφάλαιο 23

Ὅτι μὲν οὖν οἱ ἐν τούτοις τοῖς σχήμασι συλλογισμοὶ τελειοῦνται τε διὰ τῶν ἐν τῷ πρώτῳ σχήματι καθόλου συλλογισμῶν καὶ εἰς τούτους ἀνάγονται, δῆλον ἐκ τῶν εἰρημένων· ὅτι δ' ἀπλῶς πᾶς συλλογισμὸς οὕτως ἔξει, νῦν ἔσται φανερόν, ὅταν δειχθῇ πᾶς γινόμενος διὰ τούτων τινὸς τῶν σχημάτων. Ἀνάγκη δὴ πᾶσαν ἀπόδειξεν καὶ πάντα συλλογισμὸν ἢ ὑπάρχον τι ἢ μὴ ὑπάρχον δεικνύναι, καὶ τοῦτο ἢ καθόλου ἢ κατὰ μέρος, ἔτι ἢ δεικτικῶς ἢ ἐξ ὑποθέσεως. τοῦ δ' ἐξ ὑποθέσεως μέρος τὸ διὰ τοῦ ἀδύνατου. πρῶτον οὖν εἴπωμεν περὶ τῶν δεικτικῶν· τούτων γὰρ δειχθέντων φανερόν ἔσται καὶ ἐπὶ τῶν εἰς τὸ ἀδύνατον καὶ ὅλως τῶν ἐξ ὑποθέσεως.

Εἰ δὴ δέοι τὸ Α κατὰ τοῦ Β συλλογίσασθαι ἢ ὑπάρχον ἢ μὴ ὑπάρχον, ἀνάγκη λαβεῖν τι κατὰ τινος. εἰ μὲν οὖν τὸ Α κατὰ τοῦ Β ληφθῇ, τὸ ἐξ ἀρχῆς ἔσται εἰλημμένον. εἰ δὲ κατὰ τοῦ Γ, τὸ δὲ Γ κατὰ μηδενός, μὴδ' ἄλλο κατ' ἐκείνου, μὴδὲ κατὰ τοῦ Α ἕτερον, οὐδεὶς ἔσται συλλογισμὸς· τῷ γὰρ ἐν καθ' ἑνὸς ληφθῆναι οὐδὲν συμβαίνει ἐξ ἀνάγκης. ὥστε προσληπτέον καὶ ἑτέραν πρότασιν. ἐὰν μὲν οὖν ληφθῇ τὸ Α κατ' ἄλλου ἢ ἄλλο κατὰ τοῦ Α, ἢ κατὰ τοῦ Γ ἕτερον, εἶναι μὲν συλλογισμὸν οὐδὲν κωλύει, πρὸς μέντοι τὸ Β οὐκ ἔσται διὰ τῶν εἰλημμένων. οὐδ' ὅταν τὸ Γ ἐτέρῳ, κάκεινο ἄλλῳ, καὶ τοῦτο ἐτέρῳ, μὴ [41a] συνάπτῃ δὲ πρὸς τὸ Β, οὐδ' οὕτως ἔσται πρὸς τὸ Β συλλογισμὸς. ὅλως γὰρ εἴπομεν ὅτι οὐδεὶς οὐδέποτε ἔσται συλλογισμὸς ἄλλου κατ' ἄλλου μὴ ληφθέντος τινὸς μέσου, ὃ πρὸς ἑκάτερον ἔχει πῶς ταῖς κατηγορίαις· ὁ μὲν γὰρ συλλογισμὸς ἀπλῶς ἐκ προτάσεων ἐστίν, ὁ δὲ πρὸς τόδε συλλογισμὸς ἐκ τῶν πρὸς τόδε προτάσεων, ὁ δὲ τοῦδε πρὸς τόδε διὰ τῶν τοῦδε πρὸς τόδε προτάσεων. ἀδύνατον δὲ πρὸς τὸ Β λαβεῖν πρότασιν μὴδὲν μήτε κατηγοροῦντας αὐτοῦ μήτ' ἀπαρνουμένους, ἢ πάλιν τοῦ Α πρὸς τὸ Β μὴδὲν κοινὸν λαμβάνοντας ἀλλ' ἑκατέρου ἴδια ἅττα κατηγοροῦντας ἢ ἀπαρνουμένους. ὥστε ληπτέον τι μέσον ἀμφοῖν, ὃ συνάψει τὰς κατηγορίας, εἴπερ ἔσται τοῦδε πρὸς τόδε συλλογισμὸς. εἰ οὖν ἀνάγκη μὲν τι λαβεῖν πρὸς ἄμφω κοινόν, τοῦτο δ' ἐνδέχεται τριχῶς (ἢ γὰρ τὸ Α τοῦ Γ καὶ τὸ Γ τοῦ Β κατηγορήσαντας, ἢ τὸ Γ κατ' ἀμφοῖν, ἢ ἄμφω κατὰ τοῦ Γ), ταῦτα δ' ἐστὶ τὰ εἰρημένα σχήματα, φανερόν ὅτι πάντα συλλογισμὸν ἀνάγκη γίνεσθαι διὰ τούτων τινὸς

τῶν σχημάτων. ὁ γὰρ αὐτὸς λόγος καὶ εἰ διὰ πλειόνων συνάπτοι πρὸς τὸ Β· ταὐτὸ γὰρ ἔσται σχῆμα καὶ ἐπὶ τῶν πολλῶν.

Ὅτι μὲν οὖν οἱ δεικτικοὶ περαίνονται διὰ τῶν προειρημένων σχημάτων, φανερόν· ὅτι δὲ καὶ οἱ εἰς τὸ ἀδύνατον, δῆλον ἔσται διὰ τούτων. πάντες γὰρ οἱ διὰ τοῦ ἀδυνάτου περαίνοντες τὸ μὲν ψεῦδος συλλογίζονται, τὸ δ' ἐξ ἀρχῆς ἐξυποθέσεως δεικνύουσιν, ὅταν ἀδύνατόν τι συμβαίνει τῆς ἀντιφάσεως τεθείσης, οἷον ὅτι ἀσύμμετρος ἢ διάμετρος διὰ τὸ γίνεσθαι τὰ περιττὰ ἴσα τοῖς ἀρτίοις συμμέτρου τεθείσης. τὸ μὲν οὖν ἴσα γίνεσθαι τὰ περιττὰ τοῖς ἀρτίοις συλλογίζεται, τὸ δ' ἀσύμμετρον εἶναι τὴν διάμετρον ἐξ ὑποθέσεως δείκνυσιν, ἐπεὶ ψεῦδος συμβαίνει διὰ τὴν ἀντίφασιν. τοῦτο γὰρ ἦν τὸ διὰ τοῦ ἀδυνάτου συλλογίσασθαι, τὸ δεῖξαί τι ἀδύνατον διὰ τὴν ἐξ ἀρχῆς ὑπόθεσιν. ὥστ' ἐπεὶ τοῦ ψεύδους γίνεται συλλογισμὸς δεικτικὸς ἐν τοῖς εἰς τὸ ἀδύνατον ἀπαγομένοις, τὸ δ' ἐξ ἀρχῆς ἐξ ὑποθέσεως δείκνυται, τοὺς δὲ δεικτικούς πρότερον εἵπομεν ὅτι διὰ τούτων περαίνονται τῶν σχημάτων, φανερόν ὅτι καὶ οἱ διὰ τοῦ ἀδυνάτου συλλογισμοὶ διὰ τούτων ἔσονται τῶν σχημάτων. ὡσαύτως δὲ καὶ οἱ ἄλλοι πάντες οἱ ἐξ ὑποθέσεως· ἐν ἅπασιν γὰρ ὁ μὲν συλλογισμὸς γίνεται πρὸς τὸ μεταλαμβανόμενον, τὸ δ' ἐξ ἀρχῆς περαίνεται δι' ὁμολογίας ἢ τινος ἄλλης [41b] ὑποθέσεως. εἰ δὲ τοῦτ' ἀληθές, πᾶσαν ἀπόδειξιν καὶ πάντα συλλογισμὸν ἀνάγκη γίνεσθαι διὰ τριῶν τῶν προειρημένων σχημάτων. τούτου δὲ δειχθέντος δῆλον ὥς ἅπας τε συλλογισμὸς ἐπιτελεῖται διὰ τοῦ πρώτου σχήματος καὶ ἀνάγεται εἰς τοὺς ἐν τούτῳ καθόλου συλλογισμούς.

Κεφάλαιο 24

Ἔτι τε ἐν ἅπαντι δεῖ κατηγορικόν τινα τῶν ὄρων εἶναι καὶ τὸ καθόλου ὑπάρχειν· ἄνευ γὰρ τοῦ καθόλου ἢ οὐκ ἔσται συλλογισμός ἢ οὐ πρὸς τὸ κείμενον, ἢ τὸ ἐξ ἀρχῆς αἰτήσεται. κείσθω γὰρ τὴν μουσικὴν ἡδονὴν εἶναι σπουδαίαν. εἰ μὲν οὖν ἀξιῶσιεν ἡδονὴν εἶναι σπουδαίαν μὴ προσθεῖς τὸ πᾶσαν, οὐκ ἔσται συλλογισμός· εἰ δὲ τινὰ ἡδονὴν, εἰ μὲν ἄλλην, οὐδὲν πρὸς τὸ κείμενον, εἰ δ' αὐτὴν ταύτην, τὸ ἐξ ἀρχῆς λαμβάνει. μᾶλλον δὲ γίνεται φανερόν ἐν τοῖς διαγράμμασιν, οἷον ὅτι τοῦ ἰσοσκελοῦς ἴσαι αἱ πρὸς τῇ βάσει. ἔστωσαν εἰς τὸ κέντρον ἡγμέναι αἱ $A B$. εἰ οὖν ἴσην λαμβάνοι τὴν $A \Gamma$ γωνίαν τῇ $B \Delta$ μὴ ὅλως ἀξιῶσας ἴσας τὰς τῶν ἡμικυκλίων, καὶ πάλιν τὴν Γ τῇ Δ μὴ πᾶσαν προσλαβὼν τὴν τοῦ τμήματος, ἔτι δ' ἀπ' ἴσων οὐσῶν τῶν ὅλων γωνιῶν καὶ ἴσων ἀφηρημένων ἴσας εἶναι τὰς λοιπὰς τὰς $E Z$, τὸ ἐξ ἀρχῆς αἰτήσεται, ἐὰν μὴ λάβῃ ἀπὸ τῶν ἴσων ἴσων ἀφαιρουμένων ἴσα λείπεσθαι. φανερόν οὖν ὅτι ἐν ἅπαντι δεῖ τὸ καθόλου ὑπάρχειν, καὶ ὅτι τὸ μὲν καθόλου ἐξ ἀπάντων τῶν ὄρων καθόλου δείκνυται, τὸ δ' ἐν μέρει καὶ οὕτως ἀκείνως, ὥστ' ἐὰν μὲν ἢ τὸ συμπέρασμα καθόλου, καὶ τοὺς ὄρους ἀνάγκη καθόλου εἶναι, ἐὰν δ' οἱ ὅροι καθόλου, ἐνδέχεται τὸ συμπέρασμα μὴ εἶναι καθόλου. δῆλον δὲ καὶ ὅτι ἐν ἅπαντι συλλογισμῷ ἢ ἀμφοτέρως ἢ τὴν ἐτέραν πρότασιν ὁμοίαν ἀνάγκη γίνεσθαι τῷ συμπεράσματι. λέγω δ' οὐ μόνον τῷ καταφατικῇ εἶναι ἢ στερητικῇ, ἀλλὰ καὶ τῷ ἀναγκαίαν ἢ ὑπάρχουσαν ἢ ἐνδεχομένην. ἐπισκέψασθαι δὲ δεῖ καὶ τὰς ἄλλας κατηγορίας.

Φανερόν δὲ καὶ ἀπλῶς πότ' ἔσται καὶ πότ' οὐκ ἔσται συλλογισμός, καὶ πότε δυνατός καὶ πότε τέλειος, καὶ ὅτι συλλογισμοῦ ὄντος ἀναγκαῖον ἔχειν τοὺς ὄρους κατὰ τινα τῶν εἰρημένων τρόπων.

Κεφάλαιο 25

Δήλον δὲ καὶ ὅτι πᾶσα ἀπόδειξις ἔσται διὰ τριῶν ὄρων καὶ οὐ πλειόνων, ἐὰν μὴ δι' ἄλλων καὶ ἄλλων τὸ αὐτὸ συμπέρασμα γίνηται, οἷον τὸ Ε διὰ τε τῶν Α Β καὶ διὰ τῶν Γ Δ, ἢ διὰ τῶν Α Β καὶ Α Γ Δ· πλείω γὰρ μέσα τῶν αὐτῶν οὐδὲν εἶναι κωλύει. τούτων δ' ὄντων οὐχ εἰς ἀλλὰ [42a] πλείους εἰσὶν οἱ συλλογισμοί. ἢ πάλιν ὅταν ἐκάτερον τῶν Α Β διὰ συλλογισμοῦ ληφθῇ (οἷον τὸ Α διὰ τῶν Δ Ε καὶ πάλιν τὸ Β διὰ τῶν Ζ Θ), ἢ τὸ μὲν ἐπαγωγῇ, τὸ δὲ συλλογισμῷ. ἀλλὰ καὶ οὕτως πλείους οἱ συλλογισμοί· πλείω γάρ τε συμπεράσματα ἐστίν, οἷον τό τε Α καὶ τὸ Β καὶ τὸ Γ. Εἰ δ' οὖν μὴ πλείους ἀλλ' εἷς, οὕτω μὲν ἐνδέχεται γενέσθαι διὰ πλειόνων τὸ αὐτὸ συμπέρασμα, ὥς δὲ τὸ Γ διὰ τῶν Α Β, ἀδύνατον. ἔστω γὰρ τὸ Ε συμπεπερασμένον ἐκ τῶν Α Β Γ Δ. οὐκοῦν ἀνάγκη τι αὐτῶν ἄλλο πρὸς ἄλλο εἰληφθαι, τὸ μὲν ὡς ὅλον τὸ δ' ὡς μέρος· τοῦτο γὰρ δέδεικται πρότερον, ὅτι ὄντος συλλογισμοῦ ἀναγκαῖον οὕτως τινὰς ἔχειν τῶν ὄρων. ἐχέτω οὖν τὸ Α οὕτως πρὸς τὸ Β. ἔστιν ἄρα τι ἐξ αὐτῶν συμπέρασμα. οὐκοῦν ἦτοι τὸ Ε ἢ τῶν Γ Δ θάτερον ἢ ἄλλο τι παρὰ ταῦτα. καὶ εἰ μὲν τὸ Ε, ἐκ τῶν Α Β μόνον ἂν εἴη ὁ συλλογισμός. τὰ δὲ Γ Δ εἰ μὲν ἔχει οὕτως ὥστ' εἶναι τὸ μὲν ὡς ὅλον τὸ δ' ὡς μέρος, ἔσται τι καὶ ἐξ ἐκείνων, καὶ ἦτοι τὸ Ε ἢ τῶν Α Β θάτερον ἢ ἄλλο τι παρὰ ταῦτα. καὶ εἰ μὲν τὸ Ε ἢ τῶν Α Β θάτερον, ἢ πλείους ἔσονται οἱ συλλογισμοί, ἢ ὡς ἐνεδέχετο ταῦτ' διὰ πλειόνων ὄρων περαίνεσθαι συμβαίνει· εἰ δ' ἄλλο τι παρὰ ταῦτα, πλείους ἔσονται καὶ ἀσύναπτοι οἱ συλλογισμοί πρὸς ἀλλήλους. εἰ δὲ μὴ οὕτως ἔχοι τὸ Γ πρὸς τὸ Δ ὥστε ποιεῖν συλλογισμόν, μάτην ἔσται εἰλημμένα, εἰ μὴ ἐπαγωγῆς ἢ κρύψεως ἢ τινος ἄλλου τῶν τοιούτων χάριν.

Εἰ δ' ἐκ τῶν Α Β μὴ τὸ Ε ἀλλ' ἄλλο τι γίνεται συμπέρασμα, ἐκ δὲ τῶν Γ Δ ἢ τούτων θάτερον ἢ ἄλλο παρὰ ταῦτα, πλείους τε οἱ συλλογισμοί γίνονται καὶ οὐ τοῦ ὑποκειμένου· ὑπέκειτο γὰρ εἶναι τοῦ Ε τὸν συλλογισμόν. εἰ δὲ μὴ γίνεται ἐκ τῶν Γ Δ μηδὲν συμπέρασμα, μάτην τε εἰληφθαι αὐτὰ συμβαίνει καὶ μὴ τοῦ ἐξ ἀρχῆς εἶναι τὸν συλλογισμόν. ὥστε φανερόν ὅτι πᾶσα ἀπόδειξις καὶ πᾶς συλλογισμὸς ἔσται διὰ τριῶν ὄρων μόνον.

Τούτου δ' ὄντος φανεροῦ, δήλον ὡς καὶ ἐκ δύο προτάσεων καὶ οὐ πλειόνων (οἱ γὰρ τρεῖς ὅροι δύο προτάσεις), εἰμὴ προσλαμβάνοιτό τι,

καθάπερ ἐν τοῖς ἐξ ἀρχῆς ἐλέχθη, πρὸς τὴν τελείωσιν τῶν συλλογισμῶν. φανερόν οὖν ὡς ἐν ᾧ λόγῳ συλλογιστικῷ μὴ ἄρτιαί εἰσιν αἱ προτάσεις δι' ὧν γίνεται τὸ συμπέρασμα τὸ κύριον (ἐνια γὰρ τῶν ἄνωθεν συμπερασμάτων ἀναγκαῖον εἶναι προτάσεις), οὗτος ὁ λόγος ἢ οὐ συλλελογίσται ἢ πλείω τῶν ἀναγκαίων ἠρώτηκε πρὸς τὴν θέσιν. [42b]

Κατὰ μὲν οὖν τὰς κυρίας προτάσεις λαμβανομένων τῶν συλλογισμῶν, ἅπας ἔσται συλλογισμὸς ἐκ προτάσεων μὲν ἀρτίων ἐξ ὄρων δὲ περιττῶν· ἐνὶ γὰρ πλείους οἱ ὅροι τῶν προτάσεων. ἔσται δὲ καὶ τὰ συμπεράσματα ἡμίση τῶν προτάσεων. ὅταν δὲ διὰ προσυλλογισμῶν περαίνεται ἢ διὰ πλειόνων μέσων συνεχῶν, οἷον τὸ $A B$ διὰ τῶν $\Gamma \Delta$, τὸ μὲν πλῆθος τῶν ὄρων ὡσαύτως ἐνὶ ὑπερέξει τὰς προτάσεις (ἢ γὰρ ἐξῶθεν ἢ εἰς τὸ μέσον τεθήσεται ὁ παρεμπίπτων ὅρος· ἀμφοτέρως δὲ συμβαίνει ἐνὶ ἐλάττω εἶναι τὰ διαστήματα τῶν ὄρων), αἱ δὲ προτάσεις ἴσαι τοῖς διαστήμασιν· οὐ μέντοι αἰεὶ αἱ μὲν ἄρτια ἔσονται οἱ δὲ περιττοί, ἀλλ' ἐναλλάξ, ὅταν μὲν αἱ προτάσεις ἄρτια, περιττοὶ οἱ ὅροι, ὅταν δ' οἱ ὅροι ἄρτιοι, περιτταὶ αἱ προτάσεις· ἅμα γὰρ τῷ ὄρῳ μία προστίθεται πρότασις, ἂν ὀποθενοῦν προστεθῇ ὁ ὅρος, ὥστ' ἐπεὶ αἱ μὲν ἄρτια οἱ δὲ περιττοὶ ἦσαν, ἀνάγκη παραλλάττειν τῆς αὐτῆς προσθέσεως γινομένης. τὰ δὲ συμπεράσματα οὐκέτι τὴν αὐτὴν ἔξει τάξιν οὔτε πρὸς τοὺς ὄρους οὔτε πρὸς τὰς προτάσεις· ἐνὸς γὰρ ὅρου προστιθεμένου συμπεράσματα προστεθήσεται ἐνὶ ἐλάττω τῶν προϋπαρχόντων ὄρων· πρὸς μόνον γὰρ τὸν ἔσχατον οὐ ποιεῖ συμπέρασμα, πρὸς δὲ τοὺς ἄλλους πάντας, οἷον εἰ τῷ $A B \Gamma$ πρόσκειται τὸ Δ , εὐθὺς καὶ συμπεράσματα δύο πρόσκειται, τό τε πρὸς τὸ A καὶ τὸ πρὸς τὸ B . ὁμοίως δὲ κατὰ τῶν ἄλλων. καὶ εἰς τὸ μέσον δὲ παρεμπίπτῃ, τὸν αὐτὸν τρόπον· πρὸς ἓνα γὰρ μόνον οὐ ποιήσει συλλογισμόν. ὥστε πολὺ πλείω τὰ συμπεράσματα καὶ τῶν ὄρων ἔσται καὶ τῶν προτάσεων.

Κεφάλαιο 26

Ἐπεὶ δ' ἔχομεν περὶ ὧν οἱ συλλογισμοί, καὶ ποῖον ἐν ἐκάστῳ σχήματι καὶ ποσαχῶς δείκνυται, φανερόν ἡμῖν ἐστὶ καὶ ποῖον πρόβλημα χαλεπὸν καὶ ποῖον εὐεπιχειρήτον· τὸ μὲν γὰρ ἐν πλείοσι σχήμασι καὶ διὰ πλειόνων πτώσεων περαινόμενον ῥῶον, τὸ δ' ἐν ἐλάττοσι καὶ δι' ἐλαττόνων δυσεπιχειρητότερον. τὸ μὲν οὖν καταφατικὸν τὸ καθόλου διὰ τοῦ πρώτου σχήματος δείκνυται μόνου, καὶ διὰ τούτου μοναχῶς· τὸ δὲ στερητικὸν διὰ τε τοῦ πρώτου καὶ διὰ τοῦ μέσου, καὶ διὰ μὲν τοῦ πρώτου μοναχῶς, διὰ δὲ τοῦ μέσου διχῶς· τὸ δ' ἐν μέρει καταφατικὸν διὰ τοῦ πρώτου καὶ διὰ τοῦ ἐσχάτου, μοναχῶς μὲν διὰ τοῦ πρώτου, τριχῶς δὲ διὰ τοῦ ἐσχάτου. τὸ δὲ στερητικὸν τὸ κατὰ μέρος ἐν ἅπασι τοῖς σχήμασι δείκνυται, πλην ἐν μὲν τῷ πρώτῳ μοναχῶς, ἐν δὲ τῷ μέσῳ καὶ τῷ ἐσχάτῳ ἐν τῷ μὲν διχῶς ἐν τῷ δὲ τριχῶς. [43a] φανερόν οὖν ὅτι τὸ καθόλου κατηγορικὸν κατασκευάσαι μὲν χαλεπώτατον, ἀνασκευάσαι δὲ ῥᾶστον. ὅλως δ' ἐστὶν ἀναιροῦντι μὲν τὰ καθόλου τῶν ἐν μέρει ῥάω· καὶ γὰρ ἦν μηδενὶ καὶ ἦν τινὶ μὴ ὑπάρχει, ἀνήρηται· τούτων δὲ τὸ μὲν τινὶ μὴ ἐν ἅπασι τοῖς σχήμασι δείκνυται, τὸ δὲ μηδενὶ ἐν τοῖς δυσὶν. τὸν αὐτὸν δὲ τρόπον καπὶ τῶν στερητικῶν· καὶ γὰρ εἰ παντὶ καὶ εἰ τινί, ἀνήρηται τὸ ἐξ ἀρχῆς· τοῦτο δ' ἦν ἐν δύο σχήμασιν. ἐπὶ δὲ τῶν ἐν μέρει μοναχῶς, ἢ παντὶ ἢ μηδενὶ δείξαντα ὑπάρχειν. κατασκευάζοντι δὲ ῥάω τὰ ἐν μέρει· καὶ γὰρ ἐν πλείοσι σχήμασι καὶ διὰ πλειόνων τρόπων. ὅλως τε οὐ δεῖ λανθάνειν ὅτι ἀνασκευάσαι μὲν δι' ἀλλήλων ἔστι καὶ τὰ καθόλου διὰ τῶν ἐν μέρει καὶ ταῦτα διὰ τῶν καθόλου, κατασκευάσαι δ' οὐκ ἔστι διὰ τῶν κατὰ μέρος τὰ καθόλου, δι' ἐκείνων δὲ ταῦτ' ἔστιν. ἅμα δὲ δῆλον ὅτι καὶ τὸ ἀνασκευάζειν ἐστὶ τοῦ κατασκευάζειν ῥᾶον.

Πῶς μὲν οὖν γίνεται πᾶς συλλογισμὸς καὶ διὰ πόσων ὄρων καὶ προτάσεων, καὶ πῶς ἐχουσῶν πρὸς ἀλλήλας, ἔτι δὲ ποῖον πρόβλημα ἐν ἐκάστῳ σχήματι καὶ ποῖον ἐν πλείοσι καὶ ποῖον ἐν ἐλάττοσι δείκνυται, δῆλον ἐκ τῶν εἰρημένων.

Κεφάλαιο 27

πῶς δ' εὐπορήσομεν αὐτοὶ πρὸς τὸ τιθέμενον ἀεὶ συλλογισμῶν, καὶ διὰ ποίας ὁδοῦ ληψόμεθα τὰς περὶ ἕκαστον ἀρχάς, νῦν ἤδη λεκτέον· οὐ γὰρ μόνον ἴσως δεῖ τὴν γένεσιν θεωρεῖν τῶν συλλογισμῶν, ἀλλὰ καὶ τὴν δύναμιν ἔχειν τοῦ ποιεῖν. Ἀπάντων δὴ τῶν ὄντων τὰ μὲν ἐστὶ τοιαῦτα ὥστε κατὰ μηδενὸς ἄλλου κατηγορεῖσθαι ἀληθῶς καθόλου (οἷον Κλέων καὶ Καλλίας καὶ τὸ καθ' ἕκαστον καὶ αἰσθητόν), κατὰ δὲ τούτων ἄλλα (καὶ γὰρ ἄνθρωπος καὶ ζῷον ἑκάτερος τούτων ἐστὶ)· τὰ δ' αὐτὰ μὲν κατ' ἄλλων κατηγορεῖται, κατὰ δὲ τούτων ἄλλα πρότερον οὐ κατηγορεῖται· τὰ δὲ καὶ αὐτὰ ἄλλων καὶ αὐτῶν ἕτερα, οἷον ἄνθρωπος Καλλίου καὶ ἀνθρώπου ζῶον. ὅτι μὲν οὖν ἓνια τῶν ὄντων κατ' οὐδενὸς πέφυκε λέγεσθαι, δηλόν· τῶν γὰρ αἰσθητῶν σχεδὸν ἕκαστόν ἐστὶ τοιοῦτον ὥστε μὴ κατηγορεῖσθαι κατὰ μηδενός, πλὴν ὡς κατὰ συμβεβηκός· φαμὲν γάρ ποτε τὸ λευκὸν ἐκεῖνο Σωκράτην εἶναι καὶ τὸ προσιὸν Καλλίαν. ὅτι δὲ καὶ ἐπὶ τὸ ἄνω πορευομένοις ἴσταται ποτε, πάλιν ἐροῦμεν· νῦν δ' ἔστω τοῦτο κείμενον. κατὰ μὲν οὖν τούτων οὐκ ἔστιν ἀποδειξαι κατηγορούμενον ἕτερον, πλὴν εἰ μὴ κατὰ δόξαν, ἀλλὰ ταῦτα κατ' ἄλλων· οὐδὲ τὰ καθ' ἕκαστα κατ' ἄλλων, ἀλλ' ἕτερα κατ' ἐκείνων. τὰ δὲ μεταξὺ δηλόν ὡς ἀμφοτέρως ἐνδέχεται (καὶ γὰρ αὐτὰ κατ' ἄλλων καὶ ἄλλα κατὰ τούτων λεχθήσεται)· καὶ σχεδὸν οἱ λόγοι καὶ αἱ σκέψεις εἰσὶ μάλιστα περὶ τούτων.[43b] Δεῖ δὴ τὰς προτάσεις περὶ ἕκαστον οὕτως ἐκλαμβάνειν, ὑποθέμενον αὐτὸ πρῶτον καὶ τοὺς ὁρισμούς τε καὶ ὅσα ἴδια τοῦ πράγματός ἐστιν, εἴτα μετὰ τοῦτο ὅσα ἔπεται τῷ πράγματι, καὶ πάλιν οἷς τὸ πρᾶγμα ἀκολουθεῖ, καὶ ὅσα μὴ ἐνδέχεται αὐτῷ ὑπάρχειν. οἷς δ' αὐτὸ μὴ ἐνδέχεται, οὐκ ἐκληπτέον διὰ τὸ ἀντιστρέφειν τὸ στερητικόν. διαιρετέον δὲ καὶ τῶν ἐπομένων ὅσα τε ἐν τῷ τί ἐστὶ καὶ ὅσα ἴδια καὶ ὅσα ὡς συμβεβηκότα κατηγορεῖται, καὶ τούτων ποῖα δοξαστικῶς καὶ ποῖα κατ' ἀλήθειαν· ὅσω μὲν γὰρ ἂν πλειόνων τοιούτων εὐπορῇ τις, θάττον ἐντεύξεται συμπεράσмати, ὅσω δ' ἂν ἀληθεστέρων, μᾶλλον ἀποδειξεί.

Δεῖ δ' ἐκλέγειν μὴ τὰ ἐπόμενα τινί, ἀλλ' ὅσα ὅλῳ τῷ πράγματι ἔπεται, οἷον μὴ τί τινὶ ἀνθρώπῳ ἀλλὰ τί παντὶ ἀνθρώπῳ ἔπεται· διὰ γὰρ τῶν καθόλου προτάσεων ὁ συλλογισμός. ἀδιορίστου μὲν οὖν

ὄντος ἁδηλον εἰ καθόλου ἢ πρότασις, διωρισμένου δὲ φανερόν. ὁμοίως δ' ἐκλεκτέον καὶ οἷς αὐτὸ ἔπεται ὅλοις, διὰ τὴν εἰρημένην αἰτίαν. αὐτὸ δὲ τὸ ἐπόμενον οὐ ληπτέον ὅλον ἔπεσθαι, λέγω δ' οἷον ἀνθρώπῳ πᾶν ζῶον ἢ μουσικῇ πᾶσαν ἐπιστήμην, ἀλλὰ μόνον ἀπλῶς ἀκολουθεῖν, καθάπερ καὶ προτεινόμεθα· καὶ γὰρ ἄχρηστον θάτερον καὶ ἀδύνατον, οἷον πάντα ἄνθρωπον εἶναι πᾶν ζῶον ἢ δικαιοσύνην ἅπαν ἀγαθόν. ἀλλ' ὃ ἔπεται, ἐπ' ἐκείνου τὸ παντὶ λέγεται. ὅταν δ' ὑπὸ τινος περιέχεται τὸ ὑποκείμενον ὃ τὰ ἐπόμενα δεῖ λαβεῖν, τὰ μὲν τῷ καθόλου ἐπόμενα ἢ μὴ ἐπόμενα οὐκ ἐκλεκτέον ἐν τούτοις (εἵληπται γὰρ ἐν ἐκείνοις· ὅσα γὰρ ζῶα, καὶ ἀνθρώπῳ ἔπεται, καὶ ὅσα μὴ ὑπάρχει, ὡσαύτως), τὰ δὲ περὶ ἕκαστον ἴδια ληπτέον· ἔστι γὰρ ἅττα τῷ εἶδει ἴδια παρὰ τὸ γένος· ἀνάγκη γὰρ τοῖς ἐτέροις εἶδεσιν ἴδια ἅττα ὑπάρχειν. οὐδὲ δὴ τῷ καθόλου ἐκλεκτέον οἷς ἔπεται τὸ περιεχόμενον, οἷον ζῶα οἷς ἔπεται ἄνθρωπος· ἀνάγκη γάρ, εἰ ἀνθρώπῳ ἀκολουθεῖ τὸ ζῶον, καὶ τούτοις ἅπασιν ἀκολουθεῖν, οἰκειότερα δὲ ταῦτα τῆς τοῦ ἀνθρώπου ἐκλογῆς. ληπτέον δὲ καὶ τὰ ὡς ἐπὶ τὸ πολὺ ἐπόμενα καὶ οἷς ἔπεται· τῶν γὰρ ὡς ἐπὶ τὸ πολὺ προβλημάτων καὶ ὁ συλλογισμὸς ἐκ τῶν ὡς ἐπὶ τὸ πολὺ προτάσεων, ἢ πασῶν ἢ τινῶν· ὅμοιον γὰρ ἐκάστου τὸ συμπέρασμα ταῖς ἀρχαῖς. ἔτι τὰ πᾶσιν ἐπόμενα οὐκ ἐκλεκτέον· οὐ γὰρ ἔσται συλλογισμὸς ἐξ αὐτῶν. δι' ἣν δ' αἰτίαν, ἐν τοῖς ἐπομένοις ἔσται δῆλον.

Κεφάλαιο 28

Κατασκευάζειν μὲν οὖν βουλομένοις κατὰ τινος ὅλου τοῦ μὲν κατασκευαζομένου βλέπτεον εἰς τὰ ὑποκείμενα καθ' ὧν αὐτὸ τυγχάνει λεγόμενον, οὗ δὲ δεῖ κατηγορεῖσθαι, ὅσα τούτῳ ἔπεται· ἂν γάρ τι τούτων ἦ ταυτόν, ἀνάγκη θάτερον θατέρῳ ὑπάρχειν. ἦν δὲ μὴ ὅτι παντὶ ἀλλ' ὅτι τινί, οἷς [44a] ἔπεται ἐκάτερον· εἰ γάρ τι τούτων ταυτόν, ἀνάγκη τινὶ ὑπάρχειν. ὅταν δὲ μηδενὶ δέη ὑπάρχειν, ᾧ μὲν οὐ δεῖ ὑπάρχειν, εἰς τὰ ἐπόμενα, ὃ δὲ δεῖ μὴ ὑπάρχειν, εἰς ἃ μὴ ἐνδέχεται αὐτῷ παρεῖναι· ἢ ἀνάπαλιν, ᾧ μὲν δεῖ μὴ ὑπάρχειν, εἰς ἃ μὴ ἐνδέχεται αὐτῷ παρεῖναι, ὃ δὲ μὴ ὑπάρχειν, εἰς τὰ ἐπόμενα. τούτων γὰρ ὄντων τῶν αὐτῶν ὅποτερωνοῦν, οὐδενὶ ἐνδέχεται θατέρῳ θάτερον ὑπάρχειν· γίνεται γὰρ ὅτε μὲν ὁ ἐν τῷ πρώτῳ σχήματι συλλογισμός, ὅτε δ' ὁ ἐν τῷ μέσῳ. ἐὰν δὲ τινὶ μὴ ὑπάρχειν, ᾧ μὲν δεῖ μὴ ὑπάρχειν, οἷς ἔπεται, ὃ δὲ μὴ ὑπάρχειν, ἃ μὴ δυνατόν αὐτῷ ὑπάρχειν· εἰ γάρ τι τούτων εἴη ταυτόν, ἀνάγκη τινὶ μὴ ὑπάρχειν.

Μᾶλλον δ' ἴσως ᾧδ' ἔσται τῶν λεγομένων ἕκαστον φανερόν. ἔστω γὰρ τὰ μὲν ἐπόμενα τῷ Α ἐφ' ὧν Β, οἷς δ' αὐτὸ ἔπεται, ἐφ' ὧν Γ, ἃ δὲ μὴ ἐνδέχεται αὐτῷ ὑπάρχειν, ἐφ' ὧν Δ· πάλιν δὲ τῷ Ε τὰ μὲν ὑπάρχοντα, ἐφ' οἷς Ζ, οἷς δ' αὐτὸ ἔπεται, ἐφ' οἷς Η, ἃ δὲ μὴ ἐνδέχεται αὐτῷ ὑπάρχειν, ἐφ' οἷς Θ. εἰ μὲν οὖν ταυτό τί ἐστι τῶν Γ τινὶ τῶν Ζ, ἀνάγκη τὸ Α παντὶ τῷ Ε ὑπάρχειν· τὸ μὲν γὰρ Ζ παντὶ τῷ Ε, τῷ δὲ Γ παντὶ τὸ Α, ὥστε παντὶ τῷ Ε τὸ Α. εἰ δὲ τὸ Γ καὶ τὸ Η ταυτόν, ἀνάγκη τινὶ τῷ Ε τὸ Α ὑπάρχειν· τῷ μὲν γὰρ Γ τὸ Α, τῷ δὲ Η τὸ Ε παντὶ ἀκολουθεῖ. εἰ δὲ τὸ Ζ καὶ τὸ Δ ταυτόν, οὐδενὶ τῶν Ε τὸ Α ὑπάρξει ἐκ προσυλλογισμοῦ· ἐπεὶ γὰρ ἀντιστρέφει τὸ στερητικὸν καὶ τὸ Ζ τῷ Δ ταυτόν, οὐδενὶ τῶν Ζ ὑπάρξει τὸ Α, τὸ δὲ Ζ παντὶ τῷ Ε. πάλιν εἰ τὸ Β καὶ τὸ Θ ταυτόν, οὐδενὶ τῶν Ε τὸ Α ὑπάρξει· τὸ γὰρ Β τῷ μὲν Α παντί, τῷ δ' ἐφ' ᾧ τὸ Ε οὐδενὶ ὑπάρξει· ταυτό γὰρ ἦν τῷ Θ, τὸ δὲ Θ οὐδενὶ τῶν Ε ὑπῆρχεν. εἰ δὲ τὸ Δ καὶ τὸ Η ταυτόν, τὸ Α τινὶ τῷ Ε οὐχ ὑπάρξει· τῷ γὰρ Η οὐχ ὑπάρξει, ὅτι οὐδὲ τῷ Δ· τὸ δὲ Η ἐστὶν ὑπὸ τὸ Ε, ὥστε τινὶ τῶν Ε οὐχ ὑπάρξει. εἰ δὲ τῷ Η τὸ Β ταυτόν, ἀντεστραμμένος ἔσται συλλογισμός· τὸ μὲν γὰρ Ε τῷ Α ὑπάρξει παντί — τὸ γὰρ Β τῷ Α, τὸ δὲ Ε τῷ Β (ταυτό γὰρ ἦν τῷ Η) — τὸ δὲ Α τῷ Ε παντὶ μὲν οὐκ ἀνάγκη ὑπάρχειν, τινὶ δ' ἀνάγκη διὰ τὸ ἀντιστρέφειν τὴν καθόλου κατηγορίαν τῇ κατὰ μέρος.

Φανερόν οὖν ὅτι εἰς τὰ προειρημένα βλέπτεον ἑκατέρου καθ' ἑκαστον πρόβλημα· διὰ τούτων γὰρ ἅπαντες οἱ συλλογισμοί. δεῖ δὲ καὶ τῶν ἐπομένων, καὶ οἷς ἔπεται ἑκαστον, εἰς τὰ πρῶτα καὶ τὰ καθόλου μάλιστα βλέπειν, οἷον τοῦ μὲν E μᾶλλον εἰς τὸ K Z ἢ εἰς τὸ Z μόνον, τοῦ δὲ A εἰς [44b] τὸ K Γ ἢ εἰς τὸ Γ μόνον. εἰ μὲν γὰρ τῷ K Z ὑπάρχει τὸ A, καὶ τῷ Z καὶ τῷ E ὑπάρχει· εἰ δὲ τούτῳ μὴ ἔπεται, ἐγχωρεῖ τῷ Z ἔπεσθαι. ὁμοίως δὲ καὶ ἐφ' ὧν αὐτὸ ἀκολουθεῖ σκεπτέον· εἰ μὲν γὰρ τοῖς πρώτοις, καὶ τοῖς ὑπ' ἐκείνα ἔπεται, εἰ δὲ μὴ τούτοις, ἀλλὰ τοῖς ὑπὸ ταῦτα ἐγχωρεῖ.

Δῆλον δὲ καὶ ὅτι διὰ τῶν τριῶν ὄρων καὶ τῶν δύο προτάσεων ἡ σκέψις, καὶ διὰ τῶν προειρημένων σχημάτων οἱ συλλογισμοὶ πάντες. δείκνυται γὰρ ὑπάρχειν μὲν παντὶ τῷ E τὸ A, ὅταν τῶν Γ καὶ Z ταυτὸν τι ληφθῇ. τοῦτο δ' ἔσται μέσον, ἄκρα δὲ τὸ A καὶ E· γίνεται οὖν τὸ πρῶτον σχῆμα. τινὶ δέ, ὅταν τὸ Γ καὶ τὸ H ληφθῇ ταυτὸν. τοῦτο δὲ τὸ ἔσχατον σχῆμα· μέσον γὰρ τὸ H γίνεται. μηδενὶ δέ, ὅταν τὸ Δ καὶ Z ταυτὸν. οὕτω δὲ καὶ τὸ πρῶτον σχῆμα καὶ τὸ μέσον, τὸ μὲν πρῶτον ὅτι οὐδενὶ τῷ Z ὑπάρχει τὸ A (εἵπερ ἀντιστρέφει τὸ στερητικόν), τὸ δὲ Z παντὶ τῷ E, τὸ δὲ μέσον ὅτι τὸ Δ τῷ μὲν A οὐδενὶ τῷ δὲ E παντὶ ὑπάρχει. τινὶ δὲ μὴ ὑπάρχειν, ὅταν τὸ Δ καὶ H ταυτὸν ᾗ. τοῦτο δὲ τὸ ἔσχατον σχῆμα· τὸ μὲν γὰρ A οὐδενὶ τῷ H ὑπάρξει, τὸ δὲ E παντὶ τῷ H. φανερόν οὖν ὅτι διὰ τῶν προειρημένων σχημάτων οἱ συλλογισμοὶ πάντες, καὶ ὅτι οὐκ ἐκλεκτέον ὅσα πᾶσιν ἔπεται, διὰ τὸ μηδένα γίνεσθαι συλλογισμόν ἐξ αὐτῶν. κατασκευάζειν μὲν γὰρ ὅλως οὐκ ἦν ἐκ τῶν ἐπομένων, ἀποστερεῖν δ' οὐκ ἐνδέχεται διὰ τοῦ πᾶσιν ἐπομένου· δεῖ γὰρ τῷ μὲν ὑπάρχειν τῷ δὲ μὴ ὑπάρχειν.

Φανερόν δὲ καὶ ὅτι αἱ ἄλλαι σκέψεις τῶν κατὰ τὰς ἐκλογὰς ἄχρηστοι πρὸς τὸ ποιεῖν συλλογισμόν, οἷον εἰ τὰ ἐπόμενα ἑκατέρῳ ταυτὰ ἔστιν, ἢ εἰ οἷς ἔπεται τὸ A καὶ ἂ μὴ ἐνδέχεται τῷ E, ἢ ὅσα πάλιν μὴ ἐγχωρεῖ ἑκατέρῳ ὑπάρχειν· οὐ γὰρ γίνεται συλλογισμὸς διὰ τούτων. εἰ μὲν γὰρ τὰ ἐπόμενα ταυτὰ, οἷον τὸ B καὶ τὸ Z, τὸ μέσον γίνεται σχῆμα κατηγορικῶς ἔχον τὰς προτάσεις· εἰ δ' οἷς ἔπεται τὸ A καὶ ἂ μὴ ἐνδέχεται τῷ E, οἷον τὸ Γ καὶ τὸ Θ, τὸ πρῶτον σχῆμα στερητικὴν ἔχον τὴν πρὸς τὸ ἔλαττον ἄκρον πρότασιν. εἰ δ' ὅσα μὴ ἐνδέχεται ἑκατέρῳ, οἷον τὸ Δ καὶ τὸ Θ, στερητικαὶ ἀμφοτέραι αἱ προτάσεις, ἢ ἐν τῷ πρώτῳ ἢ ἐν τῷ μέσῳ σχήματι. οὕτως δ' οὐδαμῶς συλλογισμός.

Δήλον δὲ καὶ ὅτι ὅποια ταῦτὰ ληπτέον τὰ κατὰ τὴν ἐπίσκεψιν, καὶ οὐχ ὅποια ἕτερα ἢ ἐναντία, πρῶτον μὲν ὅτι τοῦ μέσου χάριν ἢ ἐπίβλεψις, τὸ δὲ μέσον οὐχ ἕτερον [45a] ἀλλὰ ταυτόν δεῖ λαβεῖν. εἴτα ἐν ὅσοις καὶ συμβαίνει γίνεσθαι συλλογισμόν τῷ ληφθῆναι ἐναντία ἢ μὴ ἐνδεχόμενα τῷ αὐτῷ ὑπάρχειν, εἰς τοὺς προειρημένους ἅπαντα ἀναχθήσεται τρόπους, οἷον εἰ τὸ B καὶ τὸ Z ἐναντία ἢ μὴ ἐνδέχεται τῷ αὐτῷ ὑπάρχειν· ἔσται μὲν γὰρ τούτων ληφθέντων συλλογισμὸς ὅτι οὐδενὶ τῶν E τὸ A ὑπάρχει, ἀλλ' οὐκ ἐξ αὐτῶν ἀλλ' ἐκ τοῦ προειρημένου τρόπου· τὸ γὰρ B τῷ μὲν A παντὶ τῷ δὲ E οὐδενὶ ὑπάρξει· ὥστ' ἀνάγκη ταὐτὸ εἶναι τὸ B τινὶ τῷ Θ. [πάλιν εἰ τὸ B καὶ H μὴ ἐγχωρεῖ τῷ αὐτῷ παρεῖναι, ὅτι τινὶ τῷ E οὐχ ὑπάρξει τὸ A· καὶ γὰρ οὕτως τὸ μέσον ἔσται σχῆμα· τὸ γὰρ B τῷ μὲν A παντὶ τῷ δὲ E οὐδενὶ ὑπάρξει· ὥστ' ἀνάγκη τὸ B ταυτόν τινι εἶναι τῶν Θ. τὸ γὰρ μὴ ἐνδέχεσθαι τὸ B καὶ τὸ H τῷ αὐτῷ ὑπάρχειν οὐδὲν διαφέρει ἢ τὸ B τῶν Θ τινὶ ταυτόν εἶναι· πάντα γὰρ εἴληπται τὰ μὴ ἐνδεχόμενα τῷ E ὑπάρχειν.]

Φανερόν οὖν ὅτι ἐξ αὐτῶν μὲν τούτων τῶν ἐπιβλέψεων οὐδεὶς γίνεται συλλογισμός, ἀνάγκη δ' εἰ τὸ B καὶ τὸ Z ἐναντία, ταυτόν τινι εἶναι τὸ B τῶν Θ καὶ τὸν συλλογισμόν γίνεσθαι διὰ τούτων. συμβαίνει δὴ τοῖς οὕτως ἐπισκοποῦσι προσεπιβλέπειν ἄλλην ὁδὸν τῆς ἀναγκαίας διὰ τὸ λανθάνειν τὴν ταυτότητα τῶν B καὶ τῶν Θ.

Κεφάλαιο 29

Τὸν αὐτὸν δὲ τρόπον ἔχουσι καὶ οἱ εἰς τὸ ἀδύνατον ἄγοντες συλλογισμοὶ τοῖς δεικτικοῖς· καὶ γὰρ οὗτοι γίνονται διὰ τῶν ἐπομένων καὶ οἷς ἔπεται ἐκάτερον. καὶ ἡ αὐτὴ ἐπίσκεψις ἐν ἀμφοῖν· ὁ γὰρ δείκνυται δεικτικῶς, καὶ διὰ τοῦ ἀδυνάτου ἔστι συλλογίσασθαι διὰ τῶν αὐτῶν ὅρων, καὶ ὁ διὰ τοῦ ἀδυνάτου, καὶ δεικτικῶς, οἷον ὅτι τὸ Α οὐδενὶ τῷ Ε ὑπάρχει. κείσθω γὰρ τινὶ ὑπάρχειν· οὐκοῦν ἐπεὶ τὸ Β παντὶ τῷ Α, τὸ δὲ Α τινὶ τῷ Ε, τὸ Β τινὶ τῶν Ε ὑπάρξει· ἀλλ' οὐδενὶ ὑπῆρχεν. πάλιν ὅτι τινὶ ὑπάρχει· εἰ γὰρ μηδενὶ τῷ Ε τὸ Α, τὸ δὲ Ε παντὶ τῷ Η, οὐδενὶ τῶν Η ὑπάρξει τὸ Α· ἀλλὰ παντὶ ὑπῆρχεν. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων προβλημάτων· αἰεὶ γὰρ ἔσται καὶ ἐν ἅπασιν ἡ διὰ τοῦ ἀδυνάτου δεῖξις ἐκ τῶν ἐπομένων καὶ οἷς ἔπεται ἐκάτερον. καὶ καθ' ἕκαστον πρόβλημα ἡ αὐτὴ σκέψις δεικτικῶς τε βουλομένῳ συλλογίσασθαι καὶ εἰς ἀδύνατον ἀγαγεῖν· ἐκ γὰρ τῶν αὐτῶν ὅρων ἀμφοτέραι αἱ ἀποδείξεις, οἷον εἰ δέδεικται μηδενὶ ὑπάρχειν τῷ Ε τὸ Α, ὅτι συμβαίνει καὶ τὸ Β τινὶ τῷ Ε ὑπάρχειν, ὅπερ ἀδύνατον· ἐὰν ληθῇ τῷ μὲν Ε μηδενὶ τῷ δὲ Α παντὶ ὑπάρχειν τὸ Β, φανερόν [45b] ὅτι οὐδενὶ τῷ Ε τὸ Α ὑπάρξει. πάλιν εἰ δεικτικῶς συλλελόγισται τὸ Α τῷ Ε μηδενὶ ὑπάρχειν, ὑποθεμένοις ὑπάρχειν τινὶ διὰ τοῦ ἀδυνάτου δειχθήσεται οὐδενὶ ὑπάρχον. ὁμοίως δὲ καπὶ τῶν ἄλλων· ἐν ἅπασιν γὰρ ἀνάγκη κοινόν τινα λαβεῖν ὅρον ἄλλον τῶν ὑποκειμένων, πρὸς ὃν ἔσται τοῦ ψεύδους ὁ συλλογισμὸς, ὥστ' ἀντιστραφείσης ταύτης τῆς προτάσεως, τῆς δ' ἐτέρας ὁμοίως ἐχούσης, δεικτικὸς ἔσται ὁ συλλογισμὸς διὰ τῶν αὐτῶν ὅρων. διαφέρει γὰρ ὁ δεικτικὸς τοῦ εἰς τὸ ἀδύνατον, ὅτι ἐν μὲν τῷ δεικτικῷ κατ' ἀλήθειαν ἀμφοτέραι τίθενται αἱ προτάσεις, ἐν δὲ τῷ εἰς τὸ ἀδύνατον ψευδῶς ἢ μία.

Ταῦτα μὲν οὖν ἔσται μᾶλλον φανερά διὰ τῶν ἐπομένων, ὅταν περὶ τοῦ ἀδυνάτου λέγωμεν· νῦν δὲ τοσοῦτον ἡμῖν ἔστω δῆλον, ὅτι εἰς ταῦτα βλεπτέον δεικτικῶς τε βουλομένῳ συλλογίζεσθαι καὶ εἰς τὸ ἀδύνατον ἄγειν. ἐν δὲ τοῖς ἄλλοις συλλογισμοῖς τοῖς ἐξ ὑποθέσεως, οἷον ὅσοι κατὰ μετάληψιν ἢ κατὰ ποιότητα, ἐν τοῖς ὑποκειμένοις, οὐκ ἐν τοῖς ἐξ ἀρχῆς ἀλλ' ἐν τοῖς μεταλαμβανομένοις, ἔσται ἡ σκέψις, ὁ δὲ τρόπος ὁ αὐτὸς τῆς ἐπιβλέψεως. ἐπισκέπασθαι δὲ δεῖ καὶ διελεῖν ποσαχῶς οἱ ἐξ ὑποθέσεως.

Δείκνυται μὲν οὖν ἕκαστον τῶν προβλημάτων οὕτως, ἔστι δὲ καὶ ἄλλον τρόπον ἔνια συλλογίσασθαι τούτων, οἷον τὰ καθόλου διὰ τῆς κατὰ μέρος ἐπιβλέψεως ἐξ ὑποθέσεως. εἰ γὰρ τὸ Γ καὶ τὸ Η ταυτὰ εἴη, μόνοις δὲ ληφθεῖη τοῖς Η τὸ Ε ὑπάρχειν, παντὶ ἂν τῷ Ε τὸ Α ὑπάρχοι· καὶ πάλιν εἰ τὸ Δ καὶ Η ταυτὰ, μόνων δὲ τῶν Η τὸ Ε κατηγοροῖτο, ὅτι οὐδενὶ τῷ Ε τὸ Α ὑπάρξει. φανερόν οὖν ὅτι καὶ οὕτως ἐπιβλεπτέον. τὸν αὐτὸν δὲ τρόπον καὶ ἐπὶ τῶν ἀναγκαίων καὶ τῶν ἐνδεχομένων· ἢ γὰρ αὐτὴ σκέψις, καὶ διὰ τῶν αὐτῶν ὅρων ἔσται τῇ τάξει τοῦ τ' ἐνδέχεσθαι καὶ τοῦ ὑπάρχειν ὁ συλλογισμός. ληπτέον δ' ἐπὶ τῶν ἐνδεχομένων καὶ τὰ μὴ ὑπάρχοντα δυνατὰ δ' ὑπάρχειν· δέδεικται γὰρ ὅτι καὶ διὰ τούτων γίνεται ὁ τοῦ ἐνδέχεσθαι συλλογισμός. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων κατηγοριῶν.

Φανερόν οὖν ἐκ τῶν εἰρημένων οὐ μόνον ὅτι ἐγχωρεῖ διὰ ταύτης τῆς ὁδοῦ γίνεσθαι πάντα τοὺς συλλογισμούς, ἀλλὰ καὶ ὅτι δι' ἄλλης ἀδύνατον. ἅπας μὲν γὰρ συλλογισμὸς δέδεικται διὰ τινος τῶν προειρημένων σχημάτων γινόμενος, ταῦτα δ' οὐκ ἐγχωρεῖ δι' ἄλλων συσταθῆναι πλὴν διὰ τῶν ἐπομένων καὶ οἷς ἔπεται ἕκαστον· ἐκ τούτων γὰρ [46a] αἱ προτάσεις καὶ ἡ τοῦ μέσου λήψις, ὥστ' οὐδὲ συλλογισμὸν ἐγχωρεῖ γίνεσθαι δι' ἄλλων.

Κεφάλαιο 30

Ἡ μὲν οὖν ὁδὸς κατὰ πάντων ἡ αὐτὴ καὶ περὶ φιλοσοφίαν καὶ περὶ τέχνην ὅποιαν οὖν καὶ μάθημα· δεῖ γὰρ τὰ ὑπάρχοντα καὶ οἷς ὑπάρχει περὶ ἑκάτερον ἀθρεῖν, καὶ τούτων ὡς πλείστων εὐπορεῖν, καὶ ταῦτα διὰ τῶν τριῶν ὅρων σκοπεῖν, ἀνασκευάζοντα μὲν ὥδι, κατασκευάζοντα δὲ ὥδί, κατὰ μὲν ἀλήθειαν ἐκ τῶν κατ' ἀλήθειαν διαγεγραμμένων ὑπάρχειν, εἰς δὲ τοὺς διαλεκτικούς συλλογισμούς ἐκ τῶν κατὰ δόξαν προτάσεων. αἱ δ' ἀρχαὶ τῶν συλλογισμῶν καθόλου μὲν εἴρηνται, ὃν τρόπον τ' ἔχουσι καὶ ὃν τρόπον δεῖ θηρεῖν αὐτάς, ὅπως μὴ βλέπωμεν εἰς ἅπαντα τὰ λεγόμενα, μηδ' εἰς ταῦτα κατασκευάζοντες καὶ ἀνασκευάζοντες, μηδὲ κατασκευάζοντές τε κατὰ παντὸς ἢ τινὸς καὶ ἀνασκευάζοντες ἀπὸ πάντων ἢ τινῶν, ἀλλ' εἰς ἐλάττω καὶ ὠρισμένα, καθ' ἕκαστον δὲ ἐκλέγειν τῶν ὄντων, οἷον περὶ ἀγαθοῦ ἢ ἐπιστήμης, ἴδια δὲ καθ' ἑκάστην αἱ πλείσται. διὸ τὰς μὲν ἀρχὰς τὰς περὶ ἕκαστον ἐμπειρίας ἐστὶ παραδοῦναι, λέγω δ' οἷον τὴν ἀστρολογικὴν μὲν ἐμπειρίαν τῆς ἀστρολογικῆς ἐπιστήμης (ληφθέντων γὰρ ἱκανῶς τῶν φαινομένων οὕτως εὐρέθησαν αἱ ἀστρολογικαὶ ἀποδείξεις), ὁμοίως δὲ καὶ περὶ ἄλλην ὅποιαν οὖν ἔχει τέχνην τε καὶ ἐπιστήμην· ὥστ' ἐὰν ληφθῇ τὰ ὑπάρχοντα περὶ ἕκαστον, ἡμέτερον ἤδη τὰς ἀποδείξεις ἐτοίμως ἐμφανίζειν. εἰ γὰρ μηδὲν κατὰ τὴν ἱστορίαν παραλειφθεῖ τῶν ἀληθῶς ὑπαρχόντων τοῖς πράγμασιν, ἔξομεν περὶ ἅπαντος οὗ μὲν ἔστιν ἀπόδειξις, ταύτην εὐρεῖν καὶ ἀποδεικνύναι, οὗ δὲ μὴ πέφυκεν ἀπόδειξις, τοῦτο ποιεῖν φανερόν.

Καθόλου μὲν οὖν, ὃν δεῖ τρόπον τὰς προτάσεις ἐκλέγειν, εἴρηται σχεδόν· δι' ἀκριβείας δὲ διεληλύθαμεν ἐν τῇ πραγματείᾳ τῇ περὶ τὴν διαλεκτικὴν.

Κεφάλαιο 31

Ὅτι δ' ἡ διὰ τῶν γενῶν διαίρεσις μικρόν τι μόνον ἐστὶ τῆς εἰρημένης μεθόδου, ῥάδιον ἰδεῖν· ἔστι γὰρ ἡ διαίρεσις οἷον ἀσθενῆς συλλογισμός· ὁ μὲν γὰρ δεῖ δεῖξαι αἰτεῖται, συλλογίζεται δ' αἰεὶ τὶ τῶν ἄνωθεν. πρῶτον δ' αὐτὸ τοῦτο ἐλελήθει τοὺς χρωμένους αὐτῇ πάντας, καὶ πείθειν ἐπεχειροῦν ὡς ὄντος δυνατοῦ περὶ οὐσίας ἀπόδειξιν γενέσθαι καὶ τοῦ τί ἐστίν. ὥστ' οὔτε ὁ τι ἐνδέχεται συλλογίσασθαι διαιρουμένοις ξυνίεσαν, οὔτε ὅτι οὕτως ἐνεδέχετο ὥσπερ εἰρήκαμεν. ἐν μὲν οὖν ταῖς ἀποδείξεσιν, ὅταν δέῃ τι συλλογίσασθαι ὑπάρχειν, δεῖ τὸ μέσον, δι' οὗ γίνεται ὁ συλλογισμός, καὶ ἦττον αἰεὶ εἶναι καὶ μὴ καθόλου τοῦ πρώτου τῶν ἄκρων· ἡ δὲ διαίρεσις τούναντίον βούλεται· τὸ γὰρ καθόλου λαμβάνει μέσον. ἔστω γὰρ ζῶον ἐφ' οὗ Α, τὸ δὲ θνητὸν ἐφ' οὗ Β, καὶ ἀθάνατον ἐφ' οὗ Γ, ὁ δ' ἄνθρωπος, οὗ τὸν λόγον δεῖ λαβεῖν, ἐφ' οὗ τὸ Δ. ἅπαν δὴ ζῶον λαμβάνει ἢ θνητὸν ἢ ἀθάνατον· τοῦτο δ' ἐστίν, ὁ ἂν ἦ Α, ἅπαν εἶναι ἢ Β ἢ Γ. πάλιν τὸν ἄνθρωπον αἰεὶ διαιρούμενος τίθεται ζῶον εἶναι, ὥστε κατὰ τοῦ Δ τὸ Α λαμβάνει ὑπάρχειν. ὁ μὲν οὖν συλλογισμός ἐστίν ὅτι τὸ Δ ἢ Β ἢ Γ ἅπαν ἔσται, ὥστε τὸν ἄνθρωπον ἢ θνητὸν μὲν ἢ ἀθάνατον ἀναγκαῖον εἶναι, ζῶον θνητὸν δὲ οὐκ ἀναγκαῖον, ἀλλ' αἰτεῖται· τοῦτο δ' ἦν ὁ ἔδει συλλογίσασθαι. καὶ πάλιν θέμενος τὸ μὲν Α ζῶον θνητόν, ἐφ' οὗ δὲ τὸ Β ὑπόπουν, ἐφ' οὗ δὲ τὸ Γ ἄπουν, τὸν δ' ἄνθρωπον τὸ Δ, ὡσαύτως λαμβάνει τὸ μὲν Α ἦτοι ἐν τῷ Β ἢ ἐν τῷ Γ εἶναι (ἅπαν γὰρ ζῶον θνητὸν ἢ ὑπόπουν ἢ ἄπουν ἐστὶ), κατὰ δὲ τοῦ Δ τὸ Α (τὸν γὰρ ἄνθρωπον ζῶον θνητὸν εἶναι ἔλαβεν)· ὥστ' ὑπόπουν μὲν ἢ ἄπουν εἶναι ζῶον ἀνάγκη τὸν ἄνθρωπον, ὑπόπουν δ' οὐκ ἀνάγκη, ἀλλὰ λαμβάνει· τοῦτο δ' ἦν ὁ ἔδει πάλιν δεῖξαι. καὶ τοῦτον δὴ τὸν τρόπον αἰεὶ διαιρουμένοις τὸ μὲν καθόλου συμβαίνει αὐτοῖς μέσον λαμβάνειν, καθ' οὗ δ' ἔδει δεῖξαι καὶ τὰς διαφορὰς ἄκρα. τέλος δέ, ὅτι τοῦτ' ἐστὶν ἄνθρωπος ἢ ὁ τι ποτ' ἂν ἦ τὸ ζητούμενον, οὐδὲν λέγουσι σαφὲς ὥστ' ἀναγκαῖον εἶναι· καὶ γὰρ τὴν ἄλλην ὁδὸν ποιοῦνται πᾶσαν, οὐδὲ τὰς ἐνδεχομένας εὐπορίας ὑπολαμβάνοντες ὑπάρχειν.

Φανερόν δ' ὅτι οὗτ' ἀνασκευάσαι ταύτη τῇ μεθόδῳ ἔστιν, οὔτε περὶ συμβεβηκότος ἢ ἰδίου συλλογίσασθαι, οὔτε περὶ γένους, οὗτ' ἐν οἷς ἀγνοεῖται τὸ πότερον ὡδὶ ἢ ὡδὶ ἔχει, οἷον ἄρ' ἡ διάμετρος

ἀσύμμετρος ἢ σύμμετρος. ἐὰν γὰρ λάβῃ ὅτι ἅπαν μῆκος ἢ σύμμετρον ἢ ἀσύμμετρον, ἡ δὲ διάμετρος μῆκος, συλλελογίσταί ὅτι ἀσύμμετρος ἢ σύμμετρος ἢ διάμετρος. εἰ δὲ λήψεται ἀσύμμετρον, ὃ ἔδει συλλογίσασθαι λήψεται. οὐκ ἄρα ἔστι δεῖξαι· ἡ μὲν γὰρ ὁδὸς αὕτη, διὰ ταύτης δ' οὐκ ἔστιν. τὸ ἀσύμμετρον ἢ σύμμετρον ἐφ' οὗ Α, μῆκος Β, διάμετρος Γ. φανερόν οὖν ὅτι οὔτε πρὸς πᾶσαν σκέψιν ἀρμόζει τῆς ζητήσεως ὁ τρόπος, οὔτ' ἐν οἷς μάλιστα δοκεῖ πρέπειν, ἐν τούτοις ἐστὶ χρήσιμος.

Ἐκ τίνων μὲν οὖν αἱ ἀποδείξεις γίνονται καὶ πῶς, καὶ εἰς ὅποια βλεπτέον καθ' ἕκαστον πρόβλημα, φανερόν ἐκ τῶν εἰρημένων·

Κεφάλαιο 32

πῶς δ' ἀνάξομεν τοὺς συλλογισμοὺς εἰς [47a] τὰ προειρημένα σχήματα, λεκτέον ἂν εἴη μετὰ ταῦτα· λοιπὸν γὰρ ἔτι τοῦτο τῆς σκέψεως. εἰ γὰρ τὴν τε γένεσιν τῶν συλλογισμῶν θεωροῖμεν καὶ τοῦ εὐρίσκειν ἔχοιμεν δύναμιν, ἔτι δὲ τοὺς γεγεννημένους ἀναλύοιμεν εἰς τὰ προειρημένα σχήματα, τέλος ἂν ἔχοι ἡ ἐξ ἀρχῆς πρόθεσις. συμβήσεται δ' ἅμα καὶ τὰ πρότερον εἰρημένα ἐπιβεβαιοῦσθαι καὶ φανερώτερα εἶναι ὅτι οὕτως ἔχει, διὰ τῶν νῦν λεχθησομένων· δεῖ γὰρ πᾶν τὸ ἀληθὲς αὐτὸ ἐαυτῷ ὁμολογούμενον εἶναι πάντη.

Πρῶτον μὲν οὖν δεῖ πειρᾶσθαι τὰς δύο προτάσεις ἐκλαμβάνειν τοῦ συλλογισμοῦ (ῥᾶον γὰρ εἰς τὰ μείζω διελεῖν ἢ τὰ ἐλάττω, μείζω δὲ τὰ συγκείμενα ἢ ἐξ ὧν), εἴτα σκοπεῖν ποτέρα ἐν ὅλῳ καὶ ποτέρα ἐν μέρει, καί, εἰμὴ ἄμφω εἰλημμέναι εἶεν, αὐτὸν τιθέναι τὴν ἑτέραν. ἐνίστε γὰρ τὴν καθόλου προτείναντες τὴν ἐν ταύτῃ οὐ λαμβάνουσιν, οὔτε γράφοντες οὔτ' ἐρωτῶντες· ἢ ταύτας μὲν προτείνουσι, δι' ὧν δ' αὖται περαίνονται, παραλείπουσιν, ἄλλα δὲ μάτην ἐρωτῶσιν. σκεπτέον οὖν εἴ τι περίεργον εἴληπται καὶ εἴ τι τῶν ἀναγκαῖων παραλέλειπται, καὶ τὸ μὲν θετέον τὸ δ' ἀφαιρετέον, ἕως ἂν ἔλθῃ εἰς τὰς δύο προτάσεις· ἄνευ γὰρ τούτων οὐκ ἔστιν ἀναγαγεῖν τοὺς οὕτως ἠρωτημένους λόγους. ἐνίων μὲν οὖν ῥᾶδιον ἰδεῖν τὸ ἐνδεές, ἐνιοὶ δὲ λανθάνουσι καὶ δοκοῦσι συλλογίζεσθαι διὰ τὸ ἀναγκαῖόν τι συμβαίνειν ἐκ τῶν κειμένων, οἷον εἰ ληφθεῖη μὴ οὐσίας ἀναιρουμένης μὴ ἀναιρεῖσθαι οὐσίαν, ἐξ ὧν δ' ἐστὶν ἀναιρουμένων, καὶ τὸ ἐκ τούτων φθείρεσθαι· τούτων γὰρ τεθέντων ἀναγκαῖον μὲν τὸ οὐσίας μέρος εἶναι οὐσίαν, οὐ μὴν συλλελόγισται διὰ τῶν εἰλημμένων, ἀλλ' ἐλλείπουσι προτάσεις. πάλιν εἰ ἀνθρώπου ὄντος ἀνάγκη ζῶον εἶναι καὶ ζῶου οὐσίαν, ἀνθρώπου ὄντος ἀνάγκη οὐσίαν εἶναι· ἀλλ' οὕτω συλλελόγισται· οὐ γὰρ ἔχουσιν αἱ προτάσεις ὡς εἴπομεν.

Ἀπατώμεθα δ' ἐν τοῖς τοιούτοις διὰ τὸ ἀναγκαῖόν τι συμβαίνειν ἐκ τῶν κειμένων, ὅτι καὶ ὁ συλλογισμὸς ἀναγκαῖόν ἐστιν. ἐπὶ πλέον δὲ τὸ ἀναγκαῖον ἢ ὁ συλλογισμός· ὁ μὲν γὰρ συλλογισμὸς πᾶς ἀναγκαῖον, τὸ δ' ἀναγκαῖον οὐ πᾶν συλλογισμός. ὥστ' οὐκ εἴ τι συμβαίνει τεθέντων τινῶν, πειρατέον ἀνάγειν εὐθύς, ἀλλὰ πρῶτον ληπτέον τὰς δύο προτάσεις, εἴθ' οὕτω διαιρετέον εἰς τοὺς ὅρους,

μέσον δὲ θετέον τῶν ὄρων τὸν ἐν ἀμφοτέραις ταῖς προτάσεσι λεγόμενον· ἀνάγκη γὰρ τὸ μέσον ἐν ἀμφοτέραις ὑπάρχειν ἐν ἅπασιν τοῖς σχήμασιν.

Ἐὰν μὲν οὖν [47b] κατηγορῇ καὶ κατηγορῇται τὸ μέσον, ἢ αὐτὸ μὲν κατηγορῇ, ἄλλο δ' ἐκείνου ἀπαρνήται, τὸ πρῶτον ἔσται σχῆμα· ἐὰν δὲ καὶ κατηγορῇ καὶ ἀπαρνήται ἀπὸ τινος, τὸ μέσον· ἐὰν δ' ἄλλα ἐκείνου κατηγορῇται, ἢ τὸ μὲν ἀπαρνήται τὸ δὲ κατηγορῇται, τὸ ἔσχατον. οὕτω γὰρ εἶχεν ἐν ἐκάστῳ σχήματι τὸ μέσον. ὁμοίως δὲ καὶ ἐὰν μὴ καθόλου ὧσιν αἱ προτάσεις· ὁ γὰρ αὐτὸς διορισμὸς τοῦ μέσου. φανερόν οὖν ὡς ἐν ᾧ λόγῳ μὴ λέγεται ταὐτὸ πλεονάκις, ὅτι οὐ γίνεται συλλογισμὸς· οὐ γὰρ εἴληπται μέσον. ἐπεὶ δ' ἔχομεν ποῖον ἐν ἐκάστῳ σχήματι περαίνεται τῶν προβλημάτων, καὶ ἐν τίνι τὸ καθόλου καὶ ἐν ποίῳ τὸ ἐν μέρει, φανερόν ὡς οὐκ εἰς ἅπαντα τὰ σχήματα βλέπτεον, ἀλλ' ἐκάστου προβλήματος εἰς τὸ οἰκεῖον. ὅσα δ' ἐν πλείοσι περαίνεται, τῇ τοῦ μέσου θέσει γνωριοῦμεν τὸ σχῆμα.

Κεφάλαιο 33

Πολλάκις μὲν οὖν ἀπατᾶσθαι συμβαίνει περὶ τοὺς συλλογισμοὺς διὰ τὸ ἀναγκαῖον, ὥσπερ εἴρηται πρότερον, ἐνίοτε δὲ παρὰ τὴν ὁμοιότητα τῆς τῶν ὅρων θέσεως· ὅπερ οὐ χρὴ λανθάνειν ἡμᾶς. οἷον εἰ τὸ Α κατὰ τοῦ Β λέγεται καὶ τὸ Β κατὰ τοῦ Γ· δόξειε γὰρ ἂν οὕτως ἐχόντων τῶν ὅρων εἶναι συλλογισμός, οὐ γίνεται δ' οὐτ' ἀναγκαῖον οὐδὲν οὔτε συλλογισμός. ἔστω γὰρ ἐφ' ᾧ Α τὸ ἀεὶ εἶναι, ἐφ' ᾧ δὲ Β διανοητὸς Ἀριστομένης, τὸ δ' ἐφ' ᾧ Γ Ἀριστομένης. ἀληθὲς δὴ τὸ Α τῷ Β ὑπάρχειν· ἀεὶ γάρ ἐστι διανοητὸς Ἀριστομένης. ἀλλὰ καὶ τὸ Β τῷ Γ· ὁ γὰρ Ἀριστομένης ἐστὶ διανοητὸς Ἀριστομένης. τὸ δ' Α τῷ Γ οὐχ ὑπάρχει· φθαρτὸς γάρ ἐστιν ὁ Ἀριστομένης. οὐ γὰρ ἐγένετο συλλογισμὸς οὕτως ἐχόντων τῶν ὅρων, ἀλλ' ἔδει καθόλου τὴν Α Β ληφθῆναι πρότασιν. τοῦτο δὲ ψεῦδος, τὸ ἀξιοῦν πάντα τὸν διανοητὸν Ἀριστομένην ἀεὶ εἶναι, φθαρτοῦ ὄντος Ἀριστομένου. πάλιν ἔστω τὸ μὲν ἐφ' ᾧ Γ Μίκαλος, τὸ δ' ἐφ' ᾧ Β μουσικὸς Μίκαλος, ἐφ' ᾧ δὲ τὸ Α τὸ φθείρεσθαι αὐρίον. ἀληθὲς δὴ τὸ Β τοῦ Γ κατηγορεῖν· ὁ γὰρ Μίκαλός ἐστι μουσικὸς Μίκαλος. ἀλλὰ καὶ τὸ Α τοῦ Β· φθείροιτο γὰρ ἂν αὐρίον μουσικὸς Μίκαλος. τὸ δέ γε Α τοῦ Γ ψεῦδος. τοῦτο δὴ ταυτὸν ἐστὶ τῷ πρότερον· οὐ γὰρ ἀληθὲς καθόλου, Μίκαλος μουσικὸς ὅτι φθείρεται αὐρίον· τούτου δὲ μὴ ληφθέντος οὐκ ἦν συλλογισμός.

Αὕτη μὲν οὖν ἡ ἀπάτη γίνεται ἐν τῷ παρὰ μικρόν· ὥς γὰρ οὐδὲν διαφέρον εἶπεῖν τόδε τῷδε ὑπάρχειν ἢ τόδε τῷδε παντὶ ὑπάρχειν, συγχωροῦμεν.

Κεφάλαιο 34

πολλάκις δὲ [48a] διαψεύδεσθαι συμπεσεῖται παρὰ τὸ μὴ καλῶς ἐκτίθεσθαι τοὺς κατὰ τὴν πρότασιν ὅρους, οἷον εἰ τὸ μὲν Α εἶη ὑγίεια, τὸ δ' ἐφ' ᾧ Β νόσος, ἐφ' ᾧ δὲ Γ ἄνθρωπος. ἀληθὲς γὰρ εἰπεῖν ὅτι τὸ Α οὐδενὶ τῷ Β ἐνδέχεται ὑπάρχειν (οὐδεμιᾷ γὰρ νόσῳ ὑγίεια ὑπάρχει), καὶ πάλιν ὅτι τὸ Β παντὶ τῷ Γ ὑπάρχει (πᾶς γὰρ ἄνθρωπος δεκτικὸς νόσου). δόξειεν ἂν οὖν συμβαίνειν μηδενὶ ἀνθρώπῳ ἐνδέχεσθαι ὑγίειαν ὑπάρχειν. τούτου δ' αἴτιον τὸ μὴ καλῶς ἐκκεῖσθαι τοὺς ὅρους κατὰ τὴν λέξιν, ἐπεὶ μεταληφθέντων τῶν κατὰ τὰς ἑξεῖς οὐκ ἔσται συλλογισμός, οἷον ἀντὶ μὲν τῆς ὑγιείας εἰ τεθείη τὸ ὑγιαῖνον, ἀντὶ δὲ τῆς νόσου τὸ νοσοῦν. οὐ γὰρ ἀληθὲς εἰπεῖν ὡς οὐκ ἐνδέχεται τῷ νοσοῦντι τὸ ὑγιαίνειν ὑπάρξαι. τούτου δὲ μὴ ληφθέντος οὐ γίνεται συλλογισμός, εἰ μὴ τοῦ ἐνδέχεσθαι· τοῦτο δ' οὐκ ἀδύνατον· ἐνδέχεται γὰρ μηδενὶ ἀνθρώπῳ ὑπάρχειν ὑγίειαν. πάλιν ἐπὶ τοῦ μέσου σχήματος ὁμοίως ἔσται τὸ ψεῦδος· τὴν γὰρ ὑγίειαν νόσῳ μὲν οὐδεμιᾷ ἀνθρώπῳ δὲ παντὶ ἐνδέχεται ὑπάρχειν, ὥστ' οὐδενὶ ἀνθρώπῳ νόσον. ἐν δὲ τῷ τρίτῳ σχήματι κατὰ τὸ ἐνδέχεσθαι συμβαίνει τὸ ψεῦδος, καὶ γὰρ ὑγίειαν καὶ νόσον καὶ ἐπιστήμην καὶ ἄγνοιαν καὶ ὅλως τὰ ἐναντία τῷ αὐτῷ ἐνδέχεται ὑπάρχειν, ἀλλήλοις δ' ἀδύνατον. τοῦτο δ' ἀνομολογούμενον τοῖς προειρημένοις· ὅτε γὰρ τῷ αὐτῷ πλείω ἐνεδέχετο ὑπάρχειν, ἐνεδέχετο καὶ ἀλλήλοις.

Φανερόν οὖν ὅτι ἐν ἅπασιν τούτοις ἡ ἀπάτη γίνεται παρὰ τὴν τῶν ὅρων ἐκθεσιν· μεταληφθέντων γὰρ τῶν κατὰ τὰς ἑξεῖς οὐδὲν γίνεται ψεῦδος. δῆλον οὖν ὅτι κατὰ τὰς τοιαύτας προτάσεις αἰεὶ τὸ κατὰ τὴν ἑξὶν ἀντὶ τῆς ἑξέως μεταληπτέον καὶ θετέον ὅρον.

Κεφάλαιο 35

Οὐ δεῖ δὲ τοὺς ὅρους ἀεὶ ζητεῖν ὀνόματι ἐκτίθεσθαι· πολλάκις γὰρ ἔσονται λόγοι οἷς οὐ κεῖται ὄνομα· διὸ χαλεπὸν ἀνάγειν τοὺς τοιούτους συλλογισμούς. ἐνίοτε δὲ καὶ ἀπατᾶσθαι συμβήσεται διὰ τὴν τοιαύτην ζήτησιν, οἷον ὅτι τῶν ἀμέσων ἔστι συλλογισμός. ἔστω τὸ Α δύο ὀρθαί, τὸ ἐφ' ᾧ Β τρίγωνον, ἐφ' ᾧ δὲ Γ ἰσοσκελές. τῷ μὲν οὖν Γ ὑπάρχει τὸ Α διὰ τὸ Β, τῷ δὲ Β οὐκέτι δι' ἄλλο (καθ' αὐτὸ γὰρ τὸ τρίγωνον ἔχει δύο ὀρθάς), ὥστ' οὐκ ἔσται μέσον τοῦ Α Β, ἀποδεικτοῦ ὄντος. φανερόν γὰρ ὅτι τὸ μέσον οὐχ οὕτως ἀεὶ ληπτέον ὡς τότε τι, ἀλλ' ἐνίοτε λόγον, ὅπερ συμβαίνει κατὰ τοῦ λεχθέντος.

Κεφάλαιο 36

Τὸ δὲ ὑπάρχειν τὸ πρῶτον τῷ μέσῳ καὶ τοῦτο τῷ ἄκρῳ οὐ δεῖ λαμβάνειν ὡς αἰεὶ κατηγορηθησομένων [48b] ἀλλήλων ἢ ὁμοίως τότε πρῶτον τοῦ μέσου καὶ τοῦτο τοῦ ἐσχάτου. καὶ ἐπὶ τοῦ μὴ ὑπάρχειν δ' ὡσαύτως. ἀλλ' ὅσαχῶς τὸ εἶναι λέγεται καὶ τὸ ἀληθὲς εἰπεῖν αὐτὸ τοῦτο, τοσαυταχῶς οἶσθαι χρὴ σημαίνειν καὶ τὸ ὑπάρχειν. οἷον ὅτι τῶν ἐναντίων ἔστι μία ἐπιστήμη. ἔστω γὰρ τὸ Α τὸ μίαν εἶναι ἐπιστήμην, τὰ ἐναντία ἀλλήλοις ἐφ' οὗ Β. τὸ δὲ Α τῷ Β ὑπάρχει οὐχ ὥστε τὰ ἐναντία [τὸ] μίαν εἶναι [αὐτῶν] ἐπιστήμην, ἀλλ' ὅτι ἀληθὲς εἰπεῖν κατ' αὐτῶν μίαν εἶναι αὐτῶν ἐπιστήμην.

Συμβαίνει δ' ὅτε μὲν ἐπὶ τοῦ μέσου τὸ πρῶτον λέγεσθαι, τὸ δὲ μέσον ἐπὶ τοῦ τρίτου μὴ λέγεσθαι, οἷον εἰ ἡ σοφία ἐστὶν ἐπιστήμη, τοῦ δ' ἀγαθοῦ ἐστὶν ἡ σοφία, συμπέρασμα ὅτι τοῦ ἀγαθοῦ ἔστιν ἐπιστήμη· τὸ μὲν δὲ ἀγαθὸν οὐκ ἔστιν ἐπιστήμη, ἡ δὲ σοφία ἐστὶν ἐπιστήμη. ὅτε δὲ τὸ μὲν μέσον ἐπὶ τοῦ τρίτου λέγεται, τὸ δὲ πρῶτον ἐπὶ τοῦ μέσου οὐ λέγεται, οἷον εἰ τοῦ ποιοῦ παντὸς ἔστιν ἐπιστήμη ἢ ἐναντίου, τὸ δ' ἀγαθὸν καὶ ἐναντίον καὶ ποιόν, συμπέρασμα μὲν ὅτι τοῦ ἀγαθοῦ ἔστιν ἐπιστήμη, οὐκ ἔστι δὲ τὸ ἀγαθὸν ἐπιστήμη οὐδὲ τὸ ποιὸν οὐδὲ τὸ ἐναντίον, ἀλλὰ τὸ ἀγαθὸν ταῦτα. ἔστι δὲ μήτε τὸ πρῶτον κατὰ τοῦ μέσου μήτε τοῦτο κατὰ τοῦ τρίτου, τοῦ πρώτου κατὰ τοῦ τρίτου ὅτε μὲν λεγομένου ὅτε δὲ μὴ λεγομένου. οἷον εἰ οὗ ἐπιστήμη ἔστιν, ἔστι τούτου γένος, τοῦ δ' ἀγαθοῦ ἔστιν ἐπιστήμη, συμπέρασμα ὅτι τοῦ ἀγαθοῦ ἔστι γένος· κατηγορεῖται δ' οὐδὲν κατ' οὐδενός. εἰ δ' οὗ ἔστιν ἐπιστήμη, γένος ἐστὶ τοῦτο, τοῦ δ' ἀγαθοῦ ἔστιν ἐπιστήμη, συμπέρασμα ὅτι τὰγαθὸν ἐστὶ γένος· κατὰ μὲν δὲ τοῦ ἄκρου κατηγορεῖται τὸ πρῶτον, κατ' ἀλλήλων δ' οὐ λέγεται.

Τὸν αὐτὸν δὲ {χλ27} τρόπον καὶ ἐπὶ τοῦ μὴ ὑπάρχειν ληπτέον. οὐ γὰρ αἰεὶ σημαίνει τὸ μὴ ὑπάρχειν τότε τῷδε μὴ εἶναι τότε τότε, ἀλλ' ἐνίστε τὸ μὴ εἶναι τότε τοῦδε ἢ τότε τῷδε, οἷον ὅτι οὐκ ἔστι κινήσεως κίνησις ἢ γενέσεως γενεσις, ἡδονῆς δ' ἔστιν· οὐκ ἄρα ἡ ἡδονὴ γενεσις. ἢ πάλιν ὅτι γέλωτος μὲν ἔστι σημεῖον, σημείου δ' οὐκ ἔστι σημεῖον, ὥστ' οὐ σημεῖον ὁ γέλως. ὁμοίως δὲ καὶ τοῖς ἄλλοις ἐν ὅσοις ἀναιρεῖται τὸ πρόβλημα τῷ λέγεσθαί πως πρὸς αὐτὸ τὸ γένος. πάλιν ὅτι ὁ καιρὸς οὐκ ἔστι χρόνος δέων· θεῷ γὰρ καιρὸς μὲν ἔστι, χρόνος δ' οὐκ ἔστι δέων διὰ τὸ μηδὲν εἶναι θεῷ ὠφέλιμον. ὄρους μὲν

γὰρ θετέον καιρὸν καὶ χρόνον δέοντα καὶ θεόν, τὴν δὲ πρότασιν ληπτέον κατὰ τὴν τοῦ ὀνόματος πτώσιν. ἀπλῶς γὰρ τοῦτολέγομεν κατὰ πάντων, ὅτι τοὺς μὲν ὄρους ἀεὶ θετέον κατὰ τὰς κλήσεις τῶν ὀνομάτων, οἷον ἄνθρωπος ἢ ἀγαθόν ἢ [49a] ἐναντία, οὐκ ἀνθρώπου ἢ ἀγαθοῦ ἢ ἐναντίων, τὰς δὲ προτάσεις ληπτέον κατὰ τὰς ἐκάστου πτώσεις· ἢ γὰρ ὅτι τούτῳ, οἷον τὸ ἴσον, ἢ ὅτι τούτου, οἷον τὸ διπλάσιον, ἢ ὅτι τοῦτο, οἷον τὸ τύπτον ἢ ὀρῶν, ἢ ὅτι οὗτος, οἷον ὁ ἄνθρωπος ζῶν, ἢ εἴ πως ἄλλως πίπτει τοῦνομα κατὰ τὴν πρότασιν.

Κεφάλαιο 37

Τὸ δ' ὑπάρχειν τόδε τῷδε καὶ τὸ ἀληθεύεσθαι τόδε κατὰ τοῦδε τοσαυταχῶς ληπτέον ὅσαχῶς αἱ κατηγορίαι διήρηνται, καὶ ταύτας ἢ πῇ ἢ ἀπλῶς, ἔτι ἢ ἀπλᾶς ἢ συμπεπλεγμένας· ὁμοίως δὲ καὶ τὸ μὴ ὑπάρχειν. ἐπισκεπτέον δὲ ταῦτα καὶ διοριστέον βέλτιον.

Κεφάλαιο 38

Τὸ δ' ἐπαναδιπλούμενον ἐν ταῖς προτάσεσι πρὸς τῷ πρώτῳ ἄκρῳ θετέον, οὐ πρὸς τῷ μέσῳ. λέγω δ' οἷον εἰ γένοιτο συλλογισμὸς ὅτι τῆς δικαιοσύνης ἔστιν ἐπιστήμη ὅτι ἀγαθόν, τὸ ὅτι ἀγαθόν ἢ ἡ ἀγαθὸν πρὸς τῷ πρώτῳ θετέον. ἔστω γὰρ τὸ Α ἐπιστήμη ὅτι ἀγαθόν, ἐφ' ᾧ δὲ Β ἀγαθόν, ἐφ' ᾧ δὲ Γ δικαιοσύνη. τὸ δὲ Α ἀληθὲς τοῦ Β κατηγορησai· τοῦ γὰρ ἀγαθοῦ ἔστιν ἐπιστήμη ὅτι ἀγαθόν. ἀλλὰ καὶ τὸ Β τοῦ Γ· ἢ γὰρ δικαιοσύνη ὅπερ ἀγαθόν. οὕτω μὲν οὖν γίνεται ἀνάλυσις. εἰ δὲ πρὸς τῷ Β τεθείη τὸ ὅτι ἀγαθόν, οὐκ ἔσται· τὸ μὲν γὰρ Α κατὰ τοῦ Β ἀληθὲς ἔσται, τὸ δὲ Β κατὰ τοῦ Γ οὐκ ἀληθὲς ἔσται· τὸ γὰρ ἀγαθόν ὅτι ἀγαθόν κατηγορεῖν τῆς δικαιοσύνης ψεῦδος καὶ οὐ συνετόν. ὁμοίως δὲ καὶ εἰ τὸ ὑγεινὸν δειχθείη ὅτι ἔστιν ἐπιστητὸν ἢ ἀγαθόν, ἢ τραγέλαφος ἢ μὴ ὄν, ἢ ὁ ἄνθρωπος φθαρτὸν ἢ αἰσθητόν· ἐν ἅπασιν γὰρ τοῖς ἐπικατηγορουμένοις πρὸς τῷ ἄκρῳ τὴν ἐπαναδίπλωσιν θετέον.

Οὐχ ἡ αὐτὴ δὲ θέσις τῶν ὄρων ὅταν ἀπλῶς τι συλλογισθῇ καὶ ὅταν τόδε τι ἢ πῆ ἢ πῶς, λέγω δ' οἷον ὅταν τὰ ἀγαθὸν ἐπιστητὸν δειχθῇ καὶ ὅταν ἐπιστητὸν ὅτι ἀγαθόν· ἀλλ' εἰ μὲν ἀπλῶς ἐπιστητὸν δέδεικται, μέσον θετέον τὸ ὄν, εἰ δ' ὅτι ἀγαθόν, τὸ τί ὄν. ἔστω γὰρ τὸ μὲν Α ἐπιστήμη ὅτι τί ὄν, ἐφ' ᾧ δὲ Β ὄν τι, τὸ δ' ἐφ' ᾧ Γ ἀγαθόν. ἀληθὲς δὲ τὸ Α τοῦ Β κατηγορεῖν· ἦν γὰρ ἐπιστήμη τοῦ τινὸς ὄντος ὅτι τί ὄν. ἀλλὰ καὶ τὸ Β τοῦ Γ· τὸ γὰρ ἐφ' ᾧ Γ ὄν τι. ὥστε καὶ τὸ Α τοῦ Γ· ἔσται ἄρα ἐπιστήμη τὰ ἀγαθοῦ ὅτι ἀγαθόν· ἦν γὰρ τὸ τί ὄν τῆς ἰδίου σημείου οὐσίας. εἰ δὲ τὸ ὄν μέσον ἐτέθη καὶ πρὸς τῷ ἄκρῳ τὸ ὄν ἀπλῶς καὶ μὴ τὸ τί ὄν ἐλέχθη, οὐκ ἂν ἦν συλλογισμὸς ὅτι ἔστιν ἐπιστήμη τὰ ἀγαθοῦ ὅτι ἀγαθόν, ἀλλ' ὅτι ὄν, οἷον ἐφ' ᾧ τὸ Α ἐπιστήμη [49b] ὅτι ὄν, ἐφ' ᾧ Β ὄν, ἐφ' ᾧ Γ ἀγαθόν. φανερόν οὖν ὅτι ἐν τοῖς ἐν μέρει συλλογισμοῖς οὕτως ληπτέον τοὺς ὅρους.

Κεφάλαιο 39

Δεῖ δὲ καὶ μεταλαμβάνειν ἃ τὸ αὐτὸ δύναται, ὀνόματα ἀντ' ὀνομάτων καὶ λόγους ἀντὶ λόγων καὶ ὄνομα καὶ λόγον, καὶ ἀεὶ ἀντὶ τοῦ λόγου τοῦνομα λαμβάνειν· ῥάων γὰρ ἢ τῶν ὄρων ἔκθεσις. οἷον εἰ μηδὲν διαφέρει εἰπεῖν τὸ ὑποληπτὸν τοῦ δοξαστοῦ μὴ εἶναι γένος ἢ μὴ εἶναι ὅπερ ὑποληπτὸν τι τὸ δοξαστόν (ταὐτὸν γὰρ τὸ σημανόμενον), ἀντὶ τοῦ λόγου τοῦ λεχθέντος τὸ ὑποληπτὸν καὶ τὸ δοξαστόν ὅρους θετέον.

Κεφάλαιο 40

Ἐπεὶ δ' οὐ ταὐτόν ἐστι τὸ εἶναι τὴν ἡδονὴν ἀγαθὸν καὶ τὸ εἶναι τὴν ἡδονὴν τὸ ἀγαθόν, οὐχ ὁμοίως θετέον τοὺς ὅρους, ἀλλ' εἰ μὲν ἐστὶν ὁ συλλογισμὸς ὅτι ἡ ἡδονὴ τὰγαθόν, τὰγαθόν, εἰ δ' ὅτι ἀγαθόν, ἀγαθόν. οὕτως καὶ τῶν ἄλλων.

Κεφάλαιο 41

Οὐκ ἔστι δὲ ταὐτὸν οὐτ' εἶναι οὐτ' εἰπεῖν, ὅτι ὃ τὸ Β ὑπάρχει, τούτῳ παντὶ τὸ Α ὑπάρχει, καὶ τὸ εἰπεῖν τὸ ὅ παντὶ τὸ Β ὑπάρχει, καὶ τὸ Α παντὶ ὑπάρχει· οὐδὲν γὰρ κωλύει τὸ Β τῷ Γ ὑπάρχειν, μὴ παντὶ δέ. οἷον ἔστω τὸ Β καλόν, τὸ δὲ Γ λευκόν. εἰ δὴ λευκῷ τινὶ ὑπάρχει καλόν, ἀληθὲς εἰπεῖν ὅτι τῷ λευκῷ ὑπάρχει καλόν· ἀλλ' οὐ παντὶ ἴσως. εἰ μὲν οὖν τὸ Α τῷ Β ὑπάρχει, μὴ παντὶ δὲ καθ' οὗ τὸ Β, οὐτ' εἰ παντὶ τῷ Γ τὸ Β, οὐτ' εἰ μόνον ὑπάρχει, ἀνάγκη τὸ Α οὐχ ὅτι οὐ παντί, ἀλλ' οὐδ' ὑπάρχειν. εἰ δὲ καθ' οὗ ἂν τὸ Β λέγηται ἀληθῶς, τούτῳ παντὶ ὑπάρχει, συμβήσεται τὸ Α, καθ' οὗ παντός τὸ Β λέγεται, κατὰ τούτου παντός λέγεσθαι. εἰ μέντοι τὸ Α λέγεται καθ' οὗ ἂν τὸ Β λέγηται κατὰ παντός, οὐδὲν κωλύει τῷ Γ ὑπάρχειν τὸ Β, μὴ παντὶ δὲ τὸ Α ἢ ὅλως μὴ ὑπάρχειν. ἐν δὴ τοῖς τρισὶν ὅροις δῆλον ὅτι τὸ καθ' οὗ τὸ Β παντός τὸ Α λέγεσθαι τοῦτ' ἔστι, καθ' ὅσων τὸ Β λέγεται, κατὰ πάντων λέγεσθαι καὶ τὸ Α. καὶ εἰ μὲν κατὰ παντός τὸ Β, καὶ τὸ Α οὕτως· εἰ δὲ μὴ κατὰ παντός, οὐκ ἀνάγκη τὸ Α κατὰ παντός.

Οὐ δεῖ δ' οἶεσθαι παρὰ τὸ ἐκτίθεσθαι τι συμβαίνειν ἄτοπον· οὐδὲν γὰρ προσχρώμεθα τῷ τόδε τι εἶναι, ἀλλ' ὥσπερ ὁ γεωμέτρης τὴν ποδιαίαν καὶ εὐθεῖαν τήνδε καὶ ἀπλατῇ εἶναι λέγει οὐκ οὔσας, ἀλλ' οὐχ οὕτως χρῆται ὥς ἐκ τούτων συλλογίζομενος. ὅλως γὰρ ὁ μὴ ἔστιν ὥς ὅλον πρὸς μέρος καὶ ἄλλο πρὸς τοῦτο ὥς μέρος πρὸς ὅλον, ἐξ οὐδενὸς τῶν τοιούτων δείκνυσιν ὁ δεικνύων, ὥστε οὐδὲ γίνεται [50a] συλλογισμός. τῷ δ' ἐκτίθεσθαι οὕτω χρώμεθα ὥσπερ καὶ τῷ αἰσθάνεσθαι, τὸν μανθάνοντ' ἀλέγοντες· οὐ γὰρ οὕτως ὥς ἄνευ τούτων οὐχ οἷόν τ' ἀποδειχθῆναι, ὥσπερ ἐξ ὧν ὁ συλλογισμός.

Κεφάλαιο 42

Μὴ λανθανέτω δ' ἡμᾶς ὅτι ἐν τῷ αὐτῷ συλλογισμῷ οὐχ ἅπαντα τὰ συμπεράσματα δι' ἐνὸς σχήματός ἐστιν, ἀλλὰ τὸ μὲν διὰ τούτου τὸ δὲ δι' ἄλλου. δῆλον οὖν ὅτι καὶ τὰς ἀναλύσεις οὕτω ποιητέον. ἐπεὶ δ' οὐ πᾶν πρόβλημα ἐν ἅπαντι σχήματι ἀλλ' ἐν ἐκάστῳ τεταγμένα, φανερόν ἐκ τοῦ συμπεράσματος ἐν ᾧ σχήματι ζητητέον.

Κεφάλαιο 43

Τούς τε πρὸς ὀρισμὸν τῶν λόγων, ὅσοι πρὸς ἓν τι τυγχάνουσι διειλεγμένοι τῶν ἐν τῷ ὄρω, πρὸς ὃ διείλεκται θετέον ὅρον, καὶ οὐ τὸν ἅπαντα λόγον· ἦττον γὰρ συμβήσεται ταραττεσθαι διὰ τὸ μῆκος, οἷον εἰ τὸ ὕδωρ ἔδειξεν ὅτι ὕγρὸν ποτόν, τὸ ποτόν καὶ τὸ ὕδωρ ὄρους θετέον.

Κεφάλαιο 44

Ἔτι δὲ τοὺς ἐξ ὑποθέσεως συλλογισμοὺς οὐ πειρατέον ἀνάγειν· οὐ γὰρ ἔστιν ἐκ τῶν κειμένων ἀνάγειν. οὐ γὰρ διὰ συλλογισμοῦ δεδειγμένοι εἰσίν, ἀλλὰ διὰ συνθήκης ὁμολογημένοι πάντες. οἷον εἰ ὑποθέμενος, ἂν δυνάμεις τις μία μὴ ἦ τῶν ἐναντίων, μὴδ' ἐπιστήμην μίαν εἶναι, εἴτα διαλεχθείη ὅτι οὐκ ἔστι πᾶσα δύναμις τῶν ἐναντίων, οἷονεὶ τοῦ ὑγιεινοῦ καὶ τοῦ νοσώδους· ἅμα γὰρ ἔσται τὸ αὐτὸ ὑγιεινὸν καὶ νοσῶδες. ὅτι μὲν οὖν οὐκ ἔστι μία πάντων τῶν ἐναντίων δύναμις, ἐπιδέδεικται, ὅτι δ' ἐπιστήμη οὐκ ἔστιν, οὐ δέδεικται. καίτοι ὁμολογεῖν ἀναγκαῖον· ἀλλ' οὐκ ἐκ συλλογισμοῦ, ἀλλ' ἐξ ὑποθέσεως. τοῦτον μὲν οὖν οὐκ ἔστιν ἀναγαγεῖν, ὅτι δ' οὐ μία δύναμις, ἔστιν· οὗτος γὰρ ἴσως καὶ ἦν συλλογισμός, ἐκεῖνο δ' ὑπόθεσις.

Ὅμοίως δὲ καὶ ἐπὶ τῶν διὰ τοῦ ἀδυνάτου περαινομένων· οὐδὲ γὰρ τούτους οὐκ ἔστιν ἀναλύειν, ἀλλὰ τὴν μὲν εἰς τὸ ἀδύνατον ἀπαγωγὴν ἔστι (συλλογισμῷ γὰρ δείκνυται), θάτερον δ' οὐκ ἔστιν· ἐξ ὑποθέσεως γὰρ περαίνεται. διαφέρουσι δὲ τῶν προειρημένων ὅτι ἐν ἐκείνοις μὲν δεῖ προδιομολογήσασθαι, εἰ μέλλει συμφῆσειν, οἷον ἂν δειχθῇ μία δύναμις τῶν ἐναντίων, καὶ ἐπιστήμην εἶναι τὴν αὐτήν· ἐνταῦθα δὲ καὶ μὴ προδιομολογησάμενοι συγχωροῦσι διὰ τὸ φανερόν εἶναι τὸ ψεῦδος, οἷον τεθείσης τῆς διαμέτρου συμμετρου τὸ τὰ περιττὰ ἴσα εἶναι τοῖς ἀρτίοις.

Πολλοὶ δὲ καὶ ἕτεροι περαίνονται ἐξ ὑποθέσεως, οὓς ἐπισκέψασθαι δεῖ καὶ διασημῆναι καθαρῶς. τίνες μὲν οὖν αἱ [50b] διαφοραὶ τούτων, καὶ ποσαχῶς γίνεται τὸ ἐξ ὑποθέσεως, ὕστερον ἐροῦμεν· νῦν δὲ τοσοῦτον ἡμῖν ἔστω φανερόν, ὅτι οὐκ ἔστιν ἀναλύειν εἰς τὰ σχήματα τοὺς τοιοῦτους συλλογισμούς. καὶ δι' ἣν αἰτίαν, εἰρήκαμεν.

Κεφάλαιο 45

Όσα δ' ἐν πλείοσι σχήμασι δέικνυται τῶν προβλημάτων, ἦν ἐν θατέρῳ συλλογισθῇ, ἔστιν ἀναγαγεῖν τὸν συλλογισμὸν εἰς θάτερον, οἷον τὸν ἐν τῷ πρώτῳ στερητικὸν εἰς τὸ δεύτερον, καὶ τὸν ἐν τῷ μέσῳ εἰς τὸ πρῶτον, οὐχ ἅπαντας δὲ ἀλλ' ἐνίους. ἔσται δὲ φανερόν ἐν τοῖς ἐπομένοις. εἰ γὰρ τὸ Α μηδενὶ τῷ Β, τὸ δὲ Β παντὶ τῷ Γ, τὸ Α οὐδενὶ τῷ Γ. οὕτω μὲν οὖν τὸ πρῶτον σχῆμα, ἐὰν δ' ἀντιστραφῇ τὸ στερητικόν, τὸ μέσον ἔσται· τὸ γὰρ Β τῷ μὲν Α οὐδενί, τῷ δὲ Γ παντὶ ὑπάρχει. ὁμοίως δὲ καὶ εἰ μὴ καθόλου ἀλλ' ἐν μέρει ὁ συλλογισμός, οἷον εἰ τὸ μὲν Α μηδενὶ τῷ Β, τὸ δὲ Β τινὶ τῷ Γ· ἀντιστραφέντος γὰρ τοῦ στερητικοῦ τὸ μέσον ἔσται σχῆμα.

Τῶν δ' ἐν τῷ δευτέρῳ συλλογισμῶν οἱ μὲν καθόλου ἀναγθῆσονται εἰς τὸ πρῶτον, τῶν δ' ἐν μέρει ἄτερος μόνος. ἔστω γὰρ τὸ Α τῷ μὲν Β μηδενὶ τῷ δὲ Γ παντὶ ὑπάρχον. ἀντιστραφέντος οὖν τοῦ στερητικοῦ τὸ πρῶτον ἔσται σχῆμα· τὸ μὲν γὰρ Β οὐδενὶ τῷ Α, τὸ δὲ Α παντὶ τῷ Γ ὑπάρξει. ἐὰν δὲ τὸ κατηγορικὸν ᾗ πρὸς τῷ Β, τὸ δὲ στερητικὸν πρὸς τῷ Γ, πρῶτον ὅρον θετέον τὸ Γ· τοῦτο γὰρ οὐδενὶ τῷ Α, τὸ δὲ Α παντὶ τῷ Β· ὥστ' οὐδενὶ τῷ Β τὸ Γ. οὐδ' ἄρα τὸ Β τῷ Γ οὐδενί· ἀντιστρέφει γὰρ τὸ στερητικόν. ἐὰν δ' ἐν μέρει ᾗ ὁ συλλογισμός, ὅταν μὲν ᾗ τὸ στερητικὸν πρὸς τῷ μείζονι ἄκρῳ, ἀναγθῆσεται εἰς τὸ πρῶτον, οἷον εἰ τὸ Α μηδενὶ τῷ Β, τῷ δὲ Γ τινί· ἀντιστραφέντος γὰρ τοῦ στερητικοῦ τὸ πρῶτον ἔσται σχῆμα· τὸ μὲν γὰρ Β οὐδενὶ τῷ Α, τὸ δὲ Α τινὶ τῷ Γ. ὅταν δὲ τὸ κατηγορικόν, οὐκ ἀναλυθήσεται, οἷον εἰ τὸ Α τῷ μὲν Β παντί, τῷ δὲ Γ οὐ παντί· οὔτε γὰρ δέχεται ἀντιστροφὴν τὸ Α Β, οὔτε γενομένης ἔσται συλλογισμός.

Πάλιν οἱ μὲν ἐν τῷ τρίτῳ σχήματι οὐκ ἀναλυθήσονται πάντες εἰς τὸ πρῶτον, οἱ δ' ἐν τῷ πρώτῳ πάντες εἰς τὸ τρίτον. ὑπαρχέτω γὰρ τὸ Α παντὶ τῷ Β, τὸ δὲ Β τινὶ τῷ Γ. οὐκοῦν ἐπειδὴ ἀντιστρέφει τὸ ἐν μέρει κατηγορικόν, ὑπάρξει τὸ Γ τινὶ τῷ Β· τὸ δὲ Α παντὶ ὑπῆρχεν, ὥστε γίνεται τὸ τρίτον σχῆμα. καὶ εἰ στερητικὸς ὁ συλλογισμός, ὡσαύτως· ἀντιστρέφει γὰρ τὸ ἐν μέρει κατηγορικόν, ὥστε τὸ μὲν Α οὐδενὶ τῷ Β, τὸ δὲ Γ τινὶ ὑπάρξει. [51a]

Τῶν δ' ἐν τῷ τελευταίῳ σχήματι συλλογισμῶν εἷς μόνος οὐκ ἀναλύεται εἰς τὸ πρῶτον, ὅταν μὴ καθόλου τεθῇ τὸ στερητικόν, οἱ δ'

ἄλλοι πάντες ἀναλύονται. κατηγορεῖσθω γὰρ παντὸς τοῦ Γ τὸ Α καὶ τὸ Β· οὐκοῦν ἀντιστρέψει τὸ Γ πρὸς ἐκάτερον ἐπὶ μέρους· ὑπάρχει ἄρα τινὶ τῷ Β. ὥστ' ἔσται τὸ πρῶτον σχῆμα, εἰ τὸ μὲν Α παντὶ τῷ Γ, τὸ δὲ Γ τινὶ τῷ Β. καὶ εἰ τὸ μὲν Α παντὶ τῷ Γ, τὸ δὲ Β τινί, ὁ αὐτὸς λόγος· ἀντιστρέφει γὰρ πρὸς τὸ Β τὸ Γ. ἐὰν δὲ τὸ μὲν Β παντὶ τῷ Γ, τὸ δὲ Α τινὶ τῷ Γ, πρῶτος ὅρος θετέος τὸ Β· τὸ γὰρ Β παντὶ τῷ Γ, τὸ δὲ Γ τινὶ τῷ Α, ὥστε τὸ Β τινὶ τῷ Α. ἐπεὶ δ' ἀντιστρέφει τὸ ἐν μέρει, καὶ τὸ Α τινὶ τῷ Β ὑπάρξει. καὶ εἰ στερητικὸς ὁ συλλογισμὸς, καθόλου τῶν ὄρων ὄντων, ὁμοίως ληπτέον. ὑπαρχέτω γὰρ τὸ Β παντὶ τῷ Γ, τὸ δὲ Α μηδενί· οὐκοῦν τινὶ τῷ Β ὑπάρξει τὸ Γ, τὸ δὲ Α οὐδενὶ τῷ Γ, ὥστ' ἔσται μέσον τὸ Γ. ὁμοίως δὲ καὶ εἰ τὸ μὲν στερητικὸν καθόλου, τὸ δὲ κατηγορικὸν ἐν μέρει· τὸ μὲν γὰρ Α οὐδενὶ τῷ Γ, τὸ δὲ Γ τινὶ τῶν Β ὑπάρξει. ἐὰν δ' ἐν μέρει ληφθῇ τὸ στερητικόν, οὐκ ἔσται ἀνάλυσις, οἷον εἰ τὸ μὲν Β παντὶ τῷ Γ, τὸ δὲ Α τινὶ μὴ ὑπάρχει· ἀντιστραφέντος γὰρ τοῦ Β Γ ἀμφοτέραι αἱ προτάσεις ἔσονται κατὰ μέρος.

Φανερόν δὲ καὶ ὅτι πρὸς τὸ ἀναλύειν εἰς ἄλληλα τὰ σχήματα ἢ πρὸς τῷ ἐλάττονι ἄκρῳ πρότασις ἀντιστρεπτέα ἐν ἀμφοτέροις τοῖς σχήμασι· ταύτης γὰρ μετατιθεμένης ἢ μετάβασις ἐγίνετο.

Τῶν δ' ἐν τῷ μέσῳ σχήματι ἄτερος μὲν ἀναλύεται, ἄτερος δ' οὐκ ἀναλύεται, εἰς τὸ τρίτον. ὅταν μὲν γὰρ ἦ τὸ καθόλου στερητικόν, ἀναλύεται. εἰ γὰρ τὸ Α μηδενὶ τῷ Β, τῷ δὲ Γ τινί, ἀμφοτέρα ὁμοίως ἀντιστρέφει πρὸς τὸ Α, ὥστε τὸ μὲν Β οὐδενὶ τῷ Α, τὸ δὲ Γ τινί· μέσον ἄρα τὸ Α. ὅταν δὲ τὸ Α παντὶ τῷ Β, τῷ δὲ Γ τινὶ μὴ ὑπάρχει, οὐκ ἔσται ἀνάλυσις· οὐδετέρα γὰρ τῶν προτάσεων ἐκ τῆς ἀντιστροφῆς καθόλου. Καὶ οἱ ἐκ τοῦ τρίτου δὲ σχήματος ἀναλυθήσονται εἰς τὸ μέσον, ὅταν ἦ καθόλου τὸ στερητικόν, οἷον εἰ τὸ Α μηδενὶ τῷ Γ, τὸ δὲ Β τινὶ ἢ παντί. καὶ γὰρ τὸ Γ τῷ μὲν Α οὐδενί, τῷ δὲ Β τινὶ ὑπάρξει. ἐὰν δ' ἐπὶ μέρους ἦ τὸ στερητικόν, οὐκ ἀναλυθήσεται· οὐ γὰρ δέχεται ἀντιστροφήν τὸ ἐν μέρει ἀποφατικόν.

Φανερόν οὖν ὅτι οἱ αὐτοὶ συλλογισμοὶ οὐκ ἀναλύονται ἐν τούτοις τοῖς σχήμασιν οἵπερ οὐδ' εἰς τὸ πρῶτον ἀνελύοντο, [51b] καὶ ὅτι εἰς τὸ πρῶτον σχῆμα τῶν συλλογισμῶν ἀναγομένων οὗτοι μόνοι διὰ τοῦ ἀδυνάτου περαίνονται.

Πῶς μὲν οὖν δεῖ τοὺς συλλογισμοὺς ἀνάγειν, καὶ ὅτι ἀναλύεται τὰ σχήματα εἰς ἄλληλα, φανερόν ἐκ τῶν εἰρημένων.

Διαφέρει δέ τι ἐν τῷ κατασκευάζειν ἢ ἀνασκευάζειν τὸ ὑπολαμβάνειν ἢ ταυτὸν ἢ ἕτερον σημαίνειν τὸ μὴ εἶναι τοδι καὶ εἶναι μὴ τοῦτο, οἷον τὸ μὴ εἶναι λευκὸν τῷ εἶναι μὴ λευκόν. οὐ γὰρ ταυτὸν σημαίνει, οὐδ' ἔστιν ἀπόφασις τοῦ εἶναι λευκόν τὸ εἶναι μὴ λευκόν, ἀλλὰ τὸ μὴεῖναι λευκόν. λόγος δὲ τούτου ὅδε. ὁμοίως γὰρ ἔχει τὸ δύναται βαδίζειν πρὸς τὸ δύναται οὐ βαδίζειν τῷ ἔστι λευκόν πρὸς τὸ ἔστιν οὐ λευκόν, καὶ ἐπίσταται τὰγαθὸν πρὸς τὸ ἐπίσταται τὸ οὐκ ἀγαθόν. τὸ γὰρ ἐπίσταται τὰγαθόν ἢ ἔστιν ἐπιστάμενος τὰγαθόν οὐδὲν διαφέρει, οὐδὲ τὸ δύναται βαδίζειν ἢ ἔστι δυνάμενος βαδίζειν· ὥστε καὶ τὰ ἀντικείμενα, οὐ δύναται βαδίζειν — οὐκ ἔστι δυνάμενος βαδίζειν. εἰ οὖν τὸ οὐκ ἔστι δυνάμενος βαδίζειν ταυτὸ σημαίνει καὶ ἔστι δυνάμενος οὐ βαδίζειν ἢ μὴ βαδίζειν, ταῦτά γε ἅμα ὑπάρξει ταυτῷ (ὁ γὰρ αὐτὸς δύναται καὶ βαδίζειν καὶ μὴ βαδίζειν, καὶ ἐπιστήμων τὰγαθοῦ καὶ τοῦ μὴ ἀγαθοῦ ἐστὶ), φάσις δὲ καὶ ἀπόφασις οὐχ ὑπάρχουσιν αἱ ἀντικείμενα ἅμα τῷ αὐτῷ. ὥσπερ οὖν οὐ ταυτό ἐστι τὸ μὴ ἐπίστασθαι τὰγαθὸν καὶ ἐπίστασθαι τὸ μὴ ἀγαθόν, οὐδ' εἶναι μὴ ἀγαθὸν καὶ μὴ εἶναι ἀγαθὸν ταυτὸν. τῶν γὰρ ἀνάλογον ἐὰν θάτερα ἢ ἕτερα, καὶ θάτερα. οὐδὲ τὸ εἶναι μὴ ἴσον καὶ τὸ μὴ εἶναι ἴσον· τῷ μὲν γὰρ ὑπόκειται τι, τῷ ὄντι μὴ ἴσῳ, καὶ τοῦτ' ἔστι τὸ ἄνισον, τῷ δ' οὐδέν. διόπερ ἴσον μὲν ἢ ἄνισον οὐ πᾶν, ἴσον δ' ἢ οὐκ ἴσον πᾶν. ἔτι τὸ ἔστιν οὐ λευκὸν ξύλον καὶ οὐκ ἔστι λευκὸν ξύλον οὐχ ἅμα ὑπάρχει. εἰ γάρ ἐστι ξύλον οὐ λευκόν, ἔσται ξύλον· τὸ δὲ μὴ ὄν λευκὸν ξύλον οὐκ ἀνάγκη ξύλον εἶναι. ὥστε φανερόν ὅτι οὐκ ἔστι τοῦ ἔστιν ἀγαθόν τὸ ἔστιν οὐκ ἀγαθόν ἀπόφασις. εἰ οὖν κατὰ παντὸς ἐνὸς ἢ φάσις ἢ ἀπόφασις ἀληθής, εἰ μὴ ἔστιν ἀπόφασις, δηλὸν ὡς κατάφασις ἂν πῶς εἴη. καταφάσεως δὲ πάσης ἀπόφασις ἔστιν· καὶ ταύτης ἄρα τὸ οὐκ ἔστιν οὐκ ἀγαθόν.

Ἐχει δὲ τάξιν τήνδε πρὸς ἄλληλα. ἔστω τὸ εἶναι ἀγαθὸν ἐφ' οὗ Α, τὸ δὲ μὴ εἶναι ἀγαθὸν ἐφ' οὗ Β, τὸ δὲ εἶναι μὴ ἀγαθὸν ἐφ' οὗ Γ, ὑπὸ τὸ Β, τὸ δὲ μὴ εἶναι μὴ ἀγαθὸν ἐφ' οὗ Δ, ὑπὸ τὸ Α. παντὶ δὴ ὑπάρξει ἢ τὸ Α ἢ τὸ Β, καὶ οὐδενὶ τῷ αὐτῷ· καὶ ἢ τὸ Γ ἢ τὸ Δ, καὶ οὐδενὶ τῷ αὐτῷ. καὶ ὅ τὸ Γ, ἀνάγκη τὸ Β παντὶ ὑπάρχειν (εἰ [52a] γὰρ ἀληθὲς εἰπεῖν ὅτι ἔστιν οὐ λευκόν, καὶ ὅτι οὐκ ἔστι λευκὸν ἀληθές· ἀδύνατον γὰρ ἅμα εἶναι λευκὸν καὶ εἶναι μὴ λευκόν, ἢ εἶναι ξύλον οὐ λευκόν

καὶ εἶναι ξύλον λευκόν, ὥστ' εἰ μὴ ἢ κατάφασις, ἢ ἀπόφασις

ξύλου οὐκ ἀληθὲς τὸ A εἰπεῖν, ὥς ἔστι ξύλον λευκόν, ὥστε τὸ Δ
ἀληθὲς, τὸ δ' A οὐκ ἀληθὲς, ὅτι ξύλον λευκόν). δῆλον δ' ὅτι καὶ τὸ A

Ὅμοίως δ' ἔχουσι καὶ αἱ στέρησεις πρὸς τὰς κατηγορίας ταύτη τῇ
θέσει. ἴσον ἐφ' οὗ τὸ A, οὐκ ἴσον ἐφ' οὗ B, ἄνισον ἐφ' οὗ Γ, οὐκ
ἄνισον ἐφ' οὗ Δ.

Καὶ ἐπὶ πολλῶν δέ, ὧν τοῖς μὲν ὑπάρχει τοῖς δ' οὐχ ὑπάρχει

ζῷον λευκὸν οὐ τὸ ἔστιν οὐ λευκὸν ἅπαν ζῷον ἀπόφασις (ἅμφω γὰρ
ψευδεῖς), ἀλλὰ τὸ οὐκ ἔστι πᾶν ζῷον λευκόν.

Ἐπεὶ δὲ δῆλον ὅτι ἕτερον σημαίνει τὸ ἔστιν οὐ λευκόν καὶ οὐκ
ἔστι λευκόν, καὶ τὸ μὲν κατάφασις τὸ δ' ἀπόφασις, φανερόν ὥς οὐχ ὁ
αὐτὸς τρόπος τοῦ δεικνύναι ἐκάτερον, οἷον ὅτι ὁ ἂν ἢ ζῷον οὐκ ἔστι
λευκόν ἢ ἐνδέχεται μὴ εἶναι λευκόν, καὶ ὅτι ἀληθὲς εἰπεῖν μὴ
λευκόν· τοῦτο γάρ ἔστιν εἶναι μὴ λευκόν. ἀλλὰ τὸ μὲν ἀληθὲς εἰπεῖν
ἔστι λευκόν εἴτε μὴ λευκόν ὁ αὐτὸς τρόπος· κατασκευαστικῶς γὰρ
ἅμφω διὰ τοῦ πρώτου δεικνύται σχήματος· τὸ γὰρ ἀληθὲς τῷ ἔστιν
ὁμοίως τάττεται· τοῦ γὰρ ἀληθὲς εἰπεῖν λευκὸν οὐ τὸ ἀληθὲς εἰπεῖν
μὴ λευκὸν ἀπόφασις, ἀλλὰ τὸ μὴ ἀληθὲς εἰπεῖν λευκόν. εἰ δὴ ἔσται
ἀληθὲς εἰπεῖν ὁ ἂν ἢ ἄνθρωπος μουσικὸν εἶναι ἢ μὴ μουσικὸν εἶναι,
ὁ ἂν ἢ ζῷον ληπτέον ἢ εἶναι μουσικὸν ἢ εἶναι μὴ μουσικόν, καὶ
δέδεικται. τὸ δὲ μὴ εἶναι μουσικόν ὁ ἂν ἢ ἄνθρωπος,
ἀνασκευαστικῶς δεικνύται κατὰ τοὺς εἰρημένους τρόπους τρεῖς.
Ἀπλῶς δ' ὅταν οὕτως ἔχη τὸ A καὶ τὸ B ὥσθ' ἅμα μὲν τῷ αὐτῷ μὴ
ἐνδέχεσθαι, παντὶ δὲ ἐξ ἀνάγκης [52b] θάτερον, καὶ πάλιν τὸ Γ καὶ τὸ

αὐτῷ, τὸ δὲ B καὶ Γ οὐκ ἐνδέχεται. πρῶτον μὲν οὖν ὅτι τῷ B τὸ Δ

ἀνάγκης, ὃ δὲ τὸ Β, οὐκ ἐνδέχεται τὸ Γ διὰ τὸ συνεπιφέρειν τὸ Α, τὸ δὲ Α καὶ Β μὴ ἐνδέχεσθαι τῷ αὐτῷ, φανερόν ὅτι τὸ Δ ἀκολουθήσει. πάλιν ἐπεὶ τῷ Α τὸ Γ οὐκ ἀντιστρέφει, παντὶ δὲ τὸ Γ ἢ τὸ Δ, ἐνδέχεται τὸ Α καὶ τὸ Δ τῷ αὐτῷ ὑπάρχειν. τὸ δέ γε Β καὶ τὸ Γ οὐκ ἐνδέχεται διὰ τὸ συνακολουθεῖν τῷ Γ τὸ Α· συμβαίνει γάρ τι ἀδύνατον. φανερόν οὖν ὅτι οὐδὲ τῷ Δ τὸ Β ἀντιστρέφει, ἐπεὶ περ ἐγχωρεῖ ἅμα τὸ Δ καὶ τὸ Α ὑπάρχειν.

Συμβαίνει δ' ἐνίοτε καὶ ἐν τῇ τοιαύτῃ τάξει τῶν ὅρων ἀπατᾶσθαι διὰ τὸ μὴ τὰ ἀντικείμενα λαμβάνειν ὀρθῶς ὧν ἀνάγκη παντὶ θάτερον ὑπάρχειν· οἷον εἰ τὸ Α καὶ τὸ Β μὴ ἐνδέχεται ἅμα τῷ αὐτῷ, ἀνάγκη δ' ὑπάρχειν, ὃ μὴ θάτερον, θάτερον, καὶ πάλιν τὸ Γ καὶ τὸ Δ ὡσαύτως, ὃ δὲ τὸ Γ, παντὶ ἔπεται τὸ Α. συμβήσεται γὰρ ὃ τὸ Δ, τὸ Β ὑπάρχειν ἐξ ἀνάγκης, ὅπερ ἐστὶ ψεῦδος. εἰλήφθω γὰρ ἀπόφασις τῶν Α Β ἢ ἐφ' ὃ Ζ, καὶ πάλιν τῶν Γ Δ ἢ ἐφ' ὃ Θ. ἀνάγκη δὴ παντὶ ἢ τὸ Α ἢ τὸ Ζ· ἢ γὰρ τὴν φάσιν ἢ τὴν ἀπόφασιν. καὶ πάλιν ἢ τὸ Γ ἢ τὸ Θ· φάσις γὰρ καὶ ἀπόφασις. καὶ ὃ τὸ Γ, παντὶ τὸ Α ὑπόκειται. ὥστε ὃ τὸ Ζ, παντὶ τὸ Θ. πάλιν ἐπεὶ τῶν Ζ Β παντὶ θάτερον καὶ τῶν Θ Δ ὡσαύτως, ἀκολουθεῖ δὲ τῷ Ζ τὸ Θ, καὶ τῷ Δ ἀκολουθήσει τὸ Β· τοῦτο γὰρ ἴσμεν. εἰ ἄρα τῷ Γ τὸ Α, καὶ τῷ Δ τὸ Β. τοῦτο δὲ ψεῦδος· ἀνάπαλιν γὰρ ἦν ἐν τοῖς οὕτως ἔχουσιν ἢ ἀκολουθήσις. οὐ γὰρ ἴσως ἀνάγκη παντὶ τὸ Α ἢ τὸ Ζ, οὐδὲ τὸ Ζ ἢ τὸ Β· οὐ γὰρ ἐστὶν ἀπόφασις τοῦ Α τὸ Ζ. τοῦ γὰρ ἀγαθοῦ τὸ οὐκ ἀγαθὸν ἀπόφασις· οὐ ταὐτὸ δ' ἐστὶ τὸ οὐκ ἀγαθὸν τῷ οὐτ' ἀγαθὸν οὐτ' οὐκ ἀγαθόν. ὁμοίως δὲ καὶ ἐπὶ τῶν Γ Δ· αἱ γὰρ ἀποφάσεις αἱ εἰλημμέναι δύο εἰσίν.

Κεφάλαιο 1

Ἐν πόσοις μὲν οὖν σχήμασι καὶ διὰ ποίων καὶ πόσων προτάσεων καὶ πότε καὶ πῶς γίνεται συλλογισμός, ἔτι δ' εἰς ποῖα βλέπτεον ἀνασκευάζοντι καὶ κατασκευά[53a] ζοντι, καὶ πῶς δεῖ ζητεῖν περὶ τοῦ προκειμένου καθ' ὅποιαν οὖν μέθοδον, ἔτι δὲ διὰ ποίας ὁδοῦ ληψόμεθα τὰς περὶ ἕκαστον ἀρχάς, ἥδη διεληλύθαμεν. ἐπεὶ δ' οἱ μὲν καθόλου τῶν συλλογισμῶν εἰσὶν οἱ δὲ κατὰ μέρος, οἱ μὲν καθόλου πάντες αἰεὶ πλείω συλλογίζονται, τῶν δ' ἐν μέρει οἱ μὲν κατηγορικοὶ πλείω, οἱ δ' ἀποφατικοὶ τὸ συμπέρασμα μόνον. αἱ μὲν γὰρ ἄλλαι προτάσεις ἀντιστρέφουσιν, ἡ δὲ στερητικὴ οὐκ ἀντιστρέφει. τὸ δὲ συμπέρασμα τί κατὰ τινός ἐστιν, ὥσθ' οἱ μὲν ἄλλοι συλλογισμοὶ πλείω συλλογίζονται, οἷον εἰ τὸ Α δέδεικται παντὶ τῷ Β ἢ τινί, καὶ τὸ Β τινὶ τῷ Α ἀναγκαῖον ὑπάρχειν, καὶ εἰ μηδενὶ τῷ Β τὸ Α, οὐδὲ τὸ Β οὐδενὶ τῷ Α, τοῦτο δ' ἕτερον τοῦ ἔμπροσθεν· εἰ δὲ τινὶ μὴ ὑπάρχει, οὐκ ἀνάγκη καὶ τὸ Β τινὶ τῷ Α μὴ ὑπάρχειν· ἐνδέχεται γὰρ παντὶ ὑπάρχειν.

Αὕτη μὲν οὖν κοινὴ πάντων αἰτία, τῶν τε καθόλου καὶ τῶν κατὰ μέρος· ἔστι δὲ περὶ τῶν καθόλου καὶ ἄλλως εἰπεῖν. ὅσα γὰρ ἢ ὑπὸ τὸ μέσον ἢ ὑπὸ τὸ συμπέρασμα ἐστίν, ἀπάντων ἔσται ὁ αὐτὸς συλλογισμός, ἐὰν τὰ μὲν ἐν τῷ μέσῳ τὰ δ' ἐν τῷ συμπεράσματι τεθῇ, οἷον εἰ τὸ Α Β συμπέρασμα διὰ τοῦ Γ, ὅσα ὑπὸ τὸ Β ἢ τὸ Γ ἐστίν, ἀνάγκη κατὰ πάντων λέγεσθαι τὸ Α· εἰ γὰρ τὸ Δ ἐν ὅλῳ τῷ Β, τὸ δὲ Β ἐν τῷ Α, καὶ τὸ Δ ἔσται ἐν τῷ Α· πάλιν εἰ τὸ Ε ἐν ὅλῳ τῷ Γ, τὸ δὲ Γ ἐν τῷ Α, καὶ τὸ Ε ἐν τῷ Α ἔσται. ὁμοίως δὲ καὶ εἰ στερητικὸς ὁ συλλογισμός. ἐπὶ δὲ τοῦ δευτέρου σχήματος τὸ ὑπὸ τὸ συμπέρασμα μόνον ἔσται συλλογίσασθαι, οἷον εἰ τὸ Α τῷ Β μηδενί, τῷ δὲ Γ παντί· συμπέρασμα ὅτι οὐδενὶ τῷ Γ τὸ Β. εἰ δὴ τὸ Δ ὑπὸ τὸ Γ ἐστί, φανερόν ὅτι οὐχ ὑπάρχει αὐτῷ τὸ Β· τοῖς δ' ὑπὸ τὸ Α ὅτι οὐχ ὑπάρχει, οὐ δῆλον διὰ τοῦ συλλογισμοῦ. καίτοι οὐχ ὑπάρχει τῷ Ε, εἰ ἔστιν ὑπὸ τὸ Α· ἀλλὰ τὸ μὲν τῷ Γ μηδενὶ ὑπάρχειν τὸ Β διὰ τοῦ συλλογισμοῦ δέδεικται, τὸ δὲ τῷ Α μὴ ὑπάρχειν ἀναπόδεικτον εἴληπται, ὥστ' οὐ διὰ τὸν συλλογισμὸν συμβαίνει τὸ Β τῷ Ε μὴ ὑπάρχειν. ἐπὶ δὲ τῶν ἐν μέρει τῶν μὲν ὑπὸ τὸ συμπέρασμα οὐκ ἔσται τὸ ἀναγκαῖον (οὐ γὰρ γίνεται συλλογισμός, ὅταν αὕτη ληφθῇ ἐν μέρει), τῶν δ' ὑπὸ τὸ μέσον ἔσται πάντων, πλὴν οὐ διὰ τὸν

συλλογισμόν· οἷον εἰ τὸ Α παντὶ τῷ Β, τὸ δὲ Β τινὶ τῷ Γ· τοῦ μὲν γὰρ ὑπὸ τὸ Γ τεθέντος οὐκ ἔσται συλλογισμός, τοῦ δ' ὑπὸ τὸ Β ἔσται, ἀλλ' οὐ διὰ τὸν προγεγενημένον. ὁμοίως δὲ καπὶ τῶν ἄλλων σχημάτων· τοῦ μὲν γὰρ ὑπὸ τὸ συμπέρασμα οὐκ ἔσται, [53b] θατέρου δ' ἔσται, πλὴν οὐ διὰ τὸν συλλογισμόν, ἥ καὶ ἐν τοῖς καθόλου ἐξ ἀναποδείκτου τῆς προτάσεως τὰ ὑπὸ τὸ μέσον ἐδείκνυτο· ὥστ' ἢ οὐδ' ἐκεῖ ἔσται ἢ καὶ ἐπὶ τούτων.

Κεφάλαιο 2

Ἔστι μὲν οὖν οὕτως ἔχειν ὥστ' ἀληθεῖς εἶναι τὰς προτάσεις δι' ὧν ὁ συλλογισμός, ἔστι δ' ὥστε ψευδεῖς, ἔστι δ' ὥστε τὴν μὲν ἀληθῆ τὴν δὲ ψευδῇ. τὸ δὲ συμπέρασμα ἢ ἀληθές ἢ ψεῦδος ἐξ ἀνάγκης. ἐξ ἀληθῶν μὲν οὖν οὐκ ἔστι ψεῦδος συλλογίσασθαι, ἐκ ψευδῶν δ' ἔστιν ἀληθές, πλὴν οὐ διότι ἀλλ' ὅτι· τοῦ γὰρ διότι οὐκ ἔστιν ἐκ ψευδῶν συλλογισμός· δι' ἣν δ' αἰτίαν, ἐν τοῖς ἐπομένοις λεχθήσεται.

Πρῶτον μὲν οὖν ὅτι ἐξ ἀληθῶν οὐχ οἷόν τε ψεῦδος συλλογίσασθαι, ἐντεῦθεν δηλον. εἰ γὰρ τοῦ Α ὄντος ἀνάγκη τὸ Β εἶναι, τοῦ Β μὴ ὄντος ἀνάγκη τὸ Α μὴ εἶναι. εἰ οὖν ἀληθές ἐστι τὸ Α, ἀνάγκη τὸ Β ἀληθές εἶναι, ἢ συμβήσεται τὸ αὐτὸ ἅμα εἶναί τε καὶ οὐκ εἶναι· τοῦτο δ' ἀδύνατον. μὴ ὅτι δὲ κεῖται τὸ Α εἰς ὅρος, ὑποληφθήτω ἐνδέχεσθαι ἐνός τινος ὄντος ἐξ ἀνάγκης τι συμβαίνειν· οὐ γὰρ οἷόν τε· τὸ μὲν γὰρ συμβαῖνον ἐξ ἀνάγκης τὸ συμπέρασμα ἐστι, δι' ὧν δὲ τοῦτο γίνεται ἐλαχίστων, τρεῖς ὅροι, δύο δὲ διαστήματα καὶ προτάσεις. εἰ οὖν ἀληθές, ᾧ τὸ Β ὑπάρχει, τὸ Α παντί, ᾧ δὲ τὸ Γ, τὸ Β, ᾧ τὸ Γ, ἀνάγκη τὸ Α ὑπάρχειν καὶ οὐχ οἷόν τε τοῦτο ψεῦδος εἶναι· ἅμα γὰρ ὑπάρξει ταῦτό καὶ οὐχ ὑπάρξει. τὸ οὖν Α ὥσπερ ἐν κεῖται, δύο προτάσεις συλληφθεῖσαι. ὁμοίως δὲ καὶ ἐπὶ τῶν στερητικῶν ἔχει· οὐ γὰρ ἔστιν ἐξ ἀληθῶν δεῖξαι ψεῦδος.

Ἐκ ψευδῶν δ' ἀληθές ἐστι συλλογίσασθαι καὶ ἀμφοτέρων τῶν προτάσεων ψευδῶν οὐσῶν καὶ τῆς μιᾶς, ταύτης δ' οὐχ ὁποτέρας ἔτυχεν ἀλλὰ τῆς δευτέρας, ἐάνπερ ὅλην λαμβάνῃ ψευδῇ· μὴ ὅλης δὲ λαμβανομένης ἔστιν ὁποτερασοῦν. ἔστω γὰρ τὸ Α ὅλω τῷ Γ ὑπάρχον, τῷ δὲ Β μηδενί, μηδὲ τὸ Β τῷ Γ. ἐνδέχεται δὲ τοῦτο, οἷον λίθῳ οὐδενὶ ζῶον, οὐδὲ λίθος οὐδενὶ ἀνθρώπῳ. ἐὰν οὖν ληφθῇ τὸ Α παντὶ τῷ Β καὶ τὸ Β παντὶ τῷ Γ, τὸ Α παντὶ τῷ Γ ὑπάρξει, ὥστ' ἐξ ἀμφοῖν ψευδῶν ἀληθές τὸ συμπέρασμα· πᾶς γὰρ ἄνθρωπος ζῶον. ὡσαύτως δὲ καὶ τὸ στερητικόν. ἔστι γὰρ τῷ Γ μήτε τὸ Α ὑπάρχειν μηδενὶ μήτε τὸ Β, τὸ μέντοι Α τῷ Β παντί, οἷον ἐὰν τῶν αὐτῶν ὄρων ληφθέντων μέσον τεθῇ ὁ ἄνθρωπος· λίθῳ γὰρ οὔτε ζῶον οὔτε ἄνθρωπος οὐδενὶ ὑπάρχει, ἀνθρώπῳ δὲ παντὶ ζῶον. ὥστ' ἐὰν ᾧ μὲν ὑπάρχει, λάβῃ μηδενὶ ὑπάρχειν, ᾧ δὲ μὴ ὑπάρχει, παντὶ ὑπάρχειν, ἐκ ψευδῶν ἀμφοῖν ἀληθές ἔσται τὸ [54a] συμπέρασμα. ὁμοίως δὲ δειχθήσεται καὶ ἐὰν ἐπὶ τι ψευδῆς ἑκάτερα ληφθῇ. Ἐὰν δ' ἡ ἑτέρα

τεθῆ ψευδής, τῆς μὲν πρώτης ὅλης ψευδοῦς οὔσης, οἷον τῆς A B, οὐκ ἔσται τὸ συμπέρασμα ἀληθές, τῆς δὲ B Γ ἔσται. λέγω δ' ὅλην ψευδῆ τὴν ἐναντίαν, οἷον εἰ μηδενὶ ὑπάρχον παντὶ εἴληπται ἢ εἰ παντὶ μηδενὶ ὑπάρχειν. ἔστω γὰρ τὸ A τῷ B μηδενὶ ὑπάρχον, τὸ δὲ B τῷ Γ παντί. ἂν δὴ τὴν μὲν B Γ πρότασιν λάβω ἀληθῆ, τὴν δὲ τὸ A B ψευδῆ ὅλην, καὶ παντὶ ὑπάρχειν τῷ B τὸ A, ἀδύνατον τὸ συμπέρασμα ἀληθές εἶναι· οὐδενὶ γὰρ ὑπῆρχε τῶν Γ, εἴπερ ᾧ τὸ B, μηδενὶ τὸ A, τὸ δὲ B παντὶ τῷ Γ. ὁμοίως δ' οὐδ' εἰ τὸ A τῷ B παντὶ ὑπάρχει καὶ τὸ B τῷ Γ, ἐλήφθη δ' ἡ μὲν τὸ B Γ ἀληθὴς πρότασις, ἡ δὲ τὸ A B ψευδὴς ὅλη, καὶ μηδενὶ ᾧ τὸ B, τὸ A — τὸ συμπέρασμα ψεῦδος ἔσται· παντὶ γὰρ ὑπάρξει τῷ Γ τὸ A, εἴπερ ᾧ τὸ B, παντὶ τὸ A, τὸ δὲ B παντὶ τῷ Γ. φανερόν οὖν ὅτι τῆς πρώτης ὅλης λαμβανομένης ψευδοῦς, ἐάν τε καταφατικῆς ἐάν τε στερητικῆς, τῆς δ' ἐτέρας ἀληθοῦς, οὐ γίνεται ἀληθές τὸ συμπέρασμα.

Μὴ ὅλης δὲ λαμβανομένης ψευδοῦς ἔσται. εἰ γὰρ τὸ A τῷ μὲν Γ παντὶ ὑπάρχει τῷ δὲ B τινί, τὸ δὲ B παντὶ τῷ Γ, οἷον ζῶον κύκνῳ μὲν παντὶ λευκῷ δὲ τινί, τὸ δὲ λευκὸν παντὶ κύκνῳ, ἐάν ληφθῇ τὸ A παντὶ τῷ B καὶ τὸ B παντὶ τῷ Γ, τὸ A παντὶ τῷ Γ ὑπάρξει ἀληθῶς· πᾶς γὰρ κύκνος ζῶον. ὁμοίως δὲ καὶ εἰ στερητικὸν εἴη τὸ A B· ἐγχωρεῖ γὰρ τὸ A τῷ μὲν B τινὶ ὑπάρχειν τῷ δὲ Γ μηδενί, τὸ δὲ B παντὶ τῷ Γ, οἷον ζῶον τινὶ λευκῷ χιόνι δ' οὐδεμιᾷ, λευκὸν δὲ πάση χιόνι. εἰ οὖν ληφθῇ τὸ μὲν A μηδενὶ τῷ B, τὸ δὲ B παντὶ τῷ Γ, τὸ A οὐδενὶ τῷ Γ ὑπάρξει. Ἐάν δ' ἡ μὲν A B πρότασις ὅλη ληφθῇ (28) ἀληθὴς, ἡ δὲ B Γ ὅλη ψευδής, ἔσται συλλογισμὸς ἀληθής· οὐδὲν γὰρ κωλύει τὸ A τῷ B καὶ τῷ Γ παντὶ ὑπάρχειν, τὸ μέντοι B μηδενὶ τῷ Γ, οἷον ὅσα τοῦ αὐτοῦ γένους εἶδη μὴ ὑπ' ἄλληλα· τὸ γὰρ ζῶον καὶ ἵπῳ καὶ ἀνθρώπῳ ὑπάρχει, ἵππος δ' οὐδενὶ ἀνθρώπῳ. ἐάν οὖν ληφθῇ τὸ A παντὶ τῷ B καὶ τὸ B παντὶ τῷ Γ, ἀληθές ἔσται τὸ συμπέρασμα, ψευδοῦς ὅλης οὔσης τῆς B Γ προτάσεως. ὁμοίως δὲ καὶ στερητικῆς οὔσης τῆς A B προτάσεως. ἐνδέχεται γὰρ τὸ A μήτε τῷ B μήτε τῷ Γ μηδενὶ ὑπάρχειν, μηδὲ τὸ B μηδενὶ τῷ Γ, οἷον τοῖς ἐξ ἄλλου γένους εἶδεσι τὸ γένος· τὸ γὰρ ζῶον οὔτε μουσικῇ οὔτ' ἰατρικῇ ὑπάρχει, οὐδ' [54b] ἡ μουσικὴ ἰατρικῇ. ληφθέντος οὖν τοῦ μὲν A μηδενὶ τῷ B, τοῦ δὲ B παντὶ τῷ Γ, ἀληθές ἔσται τὸ συμπέρασμα. καὶ εἰ μὴ ὅλη ψευδὴς ἡ B Γ ἀλλ' ἐπὶ τι, καὶ οὕτως ἔσται τὸ συμπέρασμα ἀληθές. οὐδὲν γὰρ κωλύει τὸ A καὶ τῷ B καὶ τῷ Γ ὅλῳ ὑπάρχειν, τὸ μέντοι B τινὶ τῷ Γ, οἷον τὸ γένος τῷ εἶδει καὶ

τῇ διαφορᾷ· τὸ γὰρ ζῶον παντὶ ἀνθρώπῳ καὶ παντὶ πεζῷ, ὁ δ' ἄνθρωπος τινὶ πεζῷ καὶ οὐ παντί. εἰ οὖν τὸ Α παντὶ τῷ Β καὶ τὸ Β παντὶ τῷ Γ ληφθεῖη, τὸ Α παντὶ τῷ Γ ὑπάρξει· ὅπερ ἦν ἀληθές. ὁμοίως δὲ καὶ στερητικῆς οὔσης τῆς Α Β προτάσεως. ἐνδέχεται γὰρ τὸ Α μήτε τῷ Β μήτε τῷ Γ μηδενὶ ὑπάρχειν, τὸ μέντοι Β τινὶ τῷ Γ, οἷον τὸ γένος τῷ ἐξ ἄλλου γένους εἶδει καὶ διαφορᾷ· τὸ γὰρ ζῶον οὔτε φρονήσει οὐδεμιᾷ ὑπάρχει οὔτε θεωρητικῇ, ἡ δὲ φρόνησις τινὶ θεωρητικῇ. εἰ οὖν ληφθεῖη τὸ μὲν Α μηδενὶ τῷ Β, τὸ δὲ Β παντὶ τῷ Γ, οὐδενὶ τῷ Γ τὸ Α ὑπάρξει· τοῦτο δ' ἦν ἀληθές.

Ἐπὶ δὲ τῶν ἐν μέρει συλλογισμῶν ἐνδέχεται καὶ τῆς πρώτης προτάσεως ὅλης οὔσης ψευδοῦς τῆς δ' ἐτέρας ἀληθοῦς ἀληθὲς εἶναι τὸ συμπέρασμα, καὶ ἐπὶ τι ψευδοῦς οὔσης τῆς πρώτης τῆς δ' ἐτέρας ἀληθοῦς, καὶ τῆς μὲν ἀληθοῦς τῆς δ' ἐν μέρει ψευδοῦς, καὶ ἀμφοτέρων ψευδῶν. οὐδὲν γὰρ κωλύει τὸ Α τῷ μὲν Β μηδενὶ ὑπάρχειν τῷ δὲ Γ τινί, καὶ τὸ Β τῷ Γ τινί, οἷον ζῶον οὐδεμιᾷ χιόνι λευκῷ δὲ τινὶ ὑπάρχει, καὶ ἡ χιών λευκῷ τινί. εἰ οὖν μέσον τεθείη ἡ χιών, πρῶτον δὲ τὸ ζῶον, καὶ ληφθεῖη τὸ μὲν Α ὅλῳ τῷ Β ὑπάρχειν, τὸ δὲ Β τινὶ τῷ Γ, ἡ μὲν Α Β ὅλη ψευδής, ἡ δὲ Β Γ ἀληθής, καὶ τὸ συμπέρασμα ἀληθές. ὁμοίως δὲ καὶ στερητικῆς οὔσης τῆς Α Β προτάσεως· ἐγγωρεῖ γὰρ τὸ Α τῷ μὲν Β ὅλῳ ὑπάρχειν τῷ δὲ Γ τινὶ μὴ ὑπάρχειν, τὸ μέντοι Β τινὶ τῷ Γ ὑπάρχειν, οἷον τὸ ζῶον ἀνθρώπῳ μὲν παντὶ ὑπάρχει, λευκῷ δὲ τινὶ οὐχ ἔπεται, ὁ δ' ἄνθρωπος τινὶ λευκῷ ὑπάρχει, ὥστ' εἰ μέσου τεθέντος τοῦ ἀνθρώπου ληφθεῖη τὸ Α μηδενὶ τῷ Β ὑπάρχειν, τὸ δὲ Β τινὶ τῷ Γ ὑπάρχειν, ἀληθὲς ἔσται τὸ συμπέρασμα ψευδοῦς οὔσης ὅλης τῆς Α Β προτάσεως. καὶ εἰ ἐπὶ τι ψευδῆς ἡ Α Β πρότασις, ἔσται τὸ συμπέρασμα ἀληθές. οὐδὲν γὰρ κωλύει τὸ Α καὶ τῷ Β καὶ τῷ Γ τινὶ ὑπάρχειν, καὶ τὸ Β τῷ Γ τινὶ ὑπάρχειν, οἷον τὸ ζῶον τινὶ καλῷ καὶ τινὶ μεγάλῳ, καὶ τὸ καλὸν τινὶ μεγάλῳ ὑπάρχειν. ἐὰν οὖν ληφθῇ τὸ Α παντὶ τῷ Β καὶ τὸ Β τινὶ τῷ Γ, [55a] ἡ μὲν Α Β πρότασις ἐπὶ τι ψευδῆς ἔσται, ἡ δὲ Β Γ ἀληθής, καὶ τὸ συμπέρασμα ἀληθές. ὁμοίως δὲ καὶ στερητικῆς οὔσης τῆς Α Β προτάσεως· οἱ γὰρ αὐτοὶ ὅροι ἔσονται καὶ ὡσαύτως κείμενοι πρὸς τὴν ἀπόδειξιν.

Πάλιν εἰ ἡ μὲν Α Β ἀληθής ἡ δὲ Β Γ ψευδής, ἀληθὲς ἔσται τὸ συμπέρασμα. οὐδὲν γὰρ κωλύει τὸ Α τῷ μὲν Β ὅλῳ ὑπάρχειν τῷ δὲ Γ τινί, καὶ τὸ Β τῷ Γ μηδενὶ ὑπάρχειν, οἷον ζῶον κύκνῳ μὲν παντὶ μέλανι δὲ τινί, κύκνος δὲ οὐδενὶ μέλανι. ὥστ' εἰ ληφθεῖη παντὶ τῷ Β

Ἐν δὲ τῷ μέσῳ σχήματι πάντως ἐγχωρεῖ διὰ ψευδῶν ἀληθὲς συλλογίσασθαι, καὶ ἀμφοτέρων τῶν προτάσεων ὅλων ψευδῶν λαμβανομένων καὶ ἐπὶ τι ἐκατέρας, καὶ τῆς μὲν ἀληθοῦς τῆς δὲ ψευδοῦς οὕσης [ὅλης] ὅποτερασοῦν ψευδοῦς τιθεμένης, [καὶ εἰ ἀμφοτέραι ἐπὶ τι ψευδεῖς, καὶ εἰ ἡ μὲν ἀπλῶς ἀληθὴς ἡ δ' ἐπὶ τι ψευδῆς, καὶ εἰ ἡ μὲν ὅλη ψευδῆς ἡ δ' ἐπὶ τι ἀληθὴς,] καὶ ἐν τοῖς καθόλου καὶ ἐπὶ τῶν ἐν μέρει συλλογισμῶν. εἰ γὰρ τὸ Α τῷ μὲν Β μηδενὶ ὑπάρχει τῷ δὲ Γ παντί, οἷον ζῶον λίθῳ μὲν οὐδενὶ ἵππῳ δὲ παντί, ἐὰν ἐναντίως τεθῶσιν αἱ προτάσεις καὶ ληφθῇ τὸ Α τῷ μὲν Β παντί τῷ δὲ Γ μηδενί, ἐκ ψευδῶν ὅλων τῶν προτάσεων ἀληθὲς ἔσται τὸ συμπέρασμα. ὁμοίως δὲ καὶ εἰ τῷ μὲν Β παντί τῷ δὲ Γ μηδενὶ ὑπάρχει τὸ Α· ὁ γὰρ αὐτὸς ἔσται συλλογισμός.

Κεφάλαιο 4

Ἔσται δὲ καὶ ἐν τῷ ἐσχάτῳ σχήματι διὰ ψευδῶν ἀληθές, καὶ ἀμφοτέρων ψευδῶν οὐσῶν ὅλων καὶ ἐπὶ τι ἑκατέρας, καὶ τῆς μὲν ἑτέρας ἀληθοῦς ὅλης τῆς δ' ἑτέρας ψευδοῦς, καὶ τῆς μὲν ἐπὶ τι ψευδοῦς τῆς δ' ὅλης ἀληθοῦς, καὶ ἀνάπαλιν, καὶ ὅσαχῶς ἄλλως ἐγχωρεῖ μεταλαβεῖν τὰς προτάσεις. οὐδὲν γὰρ κωλύει μήτε τὸ Α μήτε τὸ Β μηδενὶ τῷ Γ ὑπάρχειν, τὸ μέντοι Α τινὶ τῷ Β ὑπάρχειν, οἷον οὗτ' ἄνθρωπος οὔτε πεζὸν οὐδενὶ ἀψύχῳ ἔπεται, ἄνθρωπος μέντοι τινὶ πεζῷ ὑπάρχει. ἐὰν οὖν ληφθῇ τὸ Α καὶ τὸ Β παντὶ τῷ Γ ὑπάρχειν, αἱ μὲν προτάσεις ὅλαι ψευδεῖς, τὸ δὲ συμπέρασμα ἀληθές. ὡσαύτως δὲ καὶ τῆς μὲν στερητικῆς τῆς δὲ καταφατικῆς οὔσης. ἐγχωρεῖ γὰρ τὸ μὲν Β μηδενὶ τῷ Γ ὑπάρχειν, τὸ δὲ Α παντί, καὶ τὸ Α τινὶ τῷ Β μὴ ὑπάρχειν, οἷον τὸ μέλαν οὐδενὶ κύκνῳ, ζῶον δὲ παντί, καὶ τὸ ζῶον οὐ παντὶ μέλανι. ὥστ' ἂν ληφθῇ τὸ μὲν Β παντὶ τῷ Γ, τὸ δὲ Α μηδενί, τὸ Α τινὶ τῷ Β οὐχ ὑπάρξει· καὶ τὸ μὲν συμπέρασμα ἀληθές, αἱ δὲ προτάσεις ψευδεῖς. καὶ εἰ ἐπὶ τι ἑκατέρα ψευδής, ἔσται τὸ συμπέρασμα ἀληθές. οὐδὲν γὰρ κωλύει καὶ τὸ Α καὶ τὸ Β τινὶ τῷ Γ ὑπάρχειν, καὶ τὸ Α τινὶ τῷ Β, οἷον τὸ λευκὸν καὶ τὸ καλὸν τινὶ ζῷῳ ὑπάρχει, καὶ τὸ λευκὸν τινὶ καλῷ. ἐὰν οὖν τεθῇ τὸ Α καὶ τὸ Β παντὶ τῷ Γ ὑπάρχειν, αἱ μὲν προτάσεις ἐπὶ τι ψευδεῖς, τὸ δὲ συμπέρασμα ἀληθές. καὶ στερητικῆς δὲ τῆς Α Γ τιθεμένης ὁμοίως. οὐδὲν γὰρ κωλύει τὸ μὲν Α τινὶ τῷ Γ μὴ ὑπάρχειν, τὸ δὲ Β τινὶ ὑπάρχειν, καὶ τὸ Α τῷ Β μὴ παντὶ ὑπάρχειν, οἷον τὸ λευκὸν τινὶ ζῷῳ οὐχ ὑπάρχει, τὸ δὲ καλὸν τινὶ ὑπάρχει, καὶ τὸ λευκὸν οὐ παντὶ καλῷ. ὥστ' ἂν ληφθῇ τὸ μὲν Α μηδενὶ τῷ Γ, τὸ δὲ Β παντί, ἀμφοτέραι μὲν αἱ προτάσεις ἐπὶ τι ψευδεῖς, τὸ δὲ συμπέρασμα ἀληθές.

Ὡσαύτως δὲ καὶ τῆς μὲν ὅλης ψευδοῦς τῆς δ' ὅλης (33) ἀληθοῦς λαμβανομένης. ἐγχωρεῖ γὰρ καὶ τὸ Α καὶ τὸ Β παντὶ τῷ Γ ἔπεσθαι, τὸ μέντοι Α τινὶ τῷ Β μὴ ὑπάρχειν, οἷον ζῶον καὶ λευκὸν παντὶ κύκνῳ ἔπεται, τὸ μέντοι ζῶον οὐ παντὶ ὑπάρχει λευκῷ. τεθέντων οὖν ὅρων τοιούτων, ἐὰν ληφθῇ τὸ μὲν Β ὅλῳ τῷ Γ ὑπάρχειν, τὸ δὲ Α ὅλῳ μὴ ὑπάρχειν, ἢ μὲν Β Γ ὅλη ἔσται ἀληθής, ἢ δὲ Α Γ ὅλη ψευδής, καὶ τὸ συμπέρασμα ἀληθές. ὁμοίως δὲ καὶ εἰ τὸ μὲν Β Γ ψεῦδος, τὸ δὲ Α Γ ἀληθές· οἱ γὰρ αὐτοὶ ὅροι πρὸς τὴν ἀπό[57a] δειξιν [μέλαν — κύκνος — ἄψυχον]. ἀλλὰ καὶ εἰ ἀμφοτέραι λαμβάνονται

καταφατικά. οὐδὲν γὰρ κωλύει τὸ μὲν Β παντὶ τῷ Γ ἔπεσθαι, τὸ δὲ Α ὅλῳ μὴ ὑπάρχειν, καὶ τὸ Α τινὶ τῷ Β ὑπάρχειν, οἷον κύκλῳ παντὶ ζῶν, μέλαν δ' οὐδενὶ κύκλῳ, καὶ τὸ μέλαν ὑπάρχει τινὶ ζῳῷ. ὥστ' ἂν ληφθῇ τὸ Α καὶ τὸ Β παντὶ τῷ Γ ὑπάρχειν, ἢ μὲν Β Γ ὅλη ἀληθής, ἢ δὲ Α Γ ὅλη ψευδής, καὶ τὸ συμπέρασμα ἀληθές. ὁμοίως δὲ καὶ τῆς Α Γ ληφθείσης ἀληθοῦς· διὰ γὰρ τῶν αὐτῶν ὅρων ἡ ἀπόδειξις.

Πάλιν τῆς μὲν ὅλης ἀλη(9)θοῦς οὔσης, τῆς δ' ἐπὶ τι ψευδοῦς. ἐγχωρεῖ γὰρ τὸ μὲν Β παντὶ τῷ Γ ὑπάρχειν, τὸ δὲ Α τινί, καὶ τὸ Α τινὶ τῷ Β, οἷον δίπουν μὲν παντὶ ἀνθρώπῳ, καλὸν δ' οὐ παντί, καὶ τὸ καλὸν τινὶ δίποδι ὑπάρχει. ἐὰν οὖν ληφθῇ καὶ τὸ Α καὶ τὸ Β ὅλῳ τῷ Γ ὑπάρχειν, ἢ μὲν Β Γ ὅλη ἀληθής, ἢ δὲ Α Γ ἐπὶ τι ψευδής, τὸ δὲ συμπέρασμα ἀληθές. ὁμοίως δὲ καὶ τῆς μὲν Α Γ ἀληθοῦς τῆς δὲ Β Γ ἐπὶ τι ψευδοῦς λαμβανομένης· μετατεθέντων γὰρ τῶν αὐτῶν ὅρων ἔσται ἡ ἀπόδειξις. καὶ τῆς μὲν στερητικῆς τῆς δὲ καταφατικῆς οὔσης. ἐπεὶ γὰρ ἐγχωρεῖ τὸ μὲν Β ὅλῳ τῷ Γ ὑπάρχειν, τὸ δὲ Α τινί, καὶ ὅταν οὕτως ἔχωσιν, οὐ παντὶ τῷ Β τὸ Α, ἐὰν οὖν ληφθῇ τὸ μὲν Β ὅλῳ τῷ Γ ὑπάρχειν, τὸ δὲ Α μηδενί, ἢ μὲν στερητικὴ ἐπὶ τι ψευδής, ἢ δ' ἑτέρα ὅλη ἀληθής καὶ τὸ συμπέρασμα. πάλιν ἐπεὶ δέδεικται ὅτι τοῦ μὲν Α μηδενὶ ὑπάρχοντος τῷ Γ, τοῦ δὲ Β τινί, ἐγχωρεῖ τὸ Α τινὶ τῷ Β μὴ ὑπάρχειν, φανερόν ὅτι καὶ τῆς μὲν Α Γ ὅλης ἀληθοῦς οὔσης, τῆς δὲ Β Γ ἐπὶ τι ψευδοῦς, ἐγχωρεῖ τὸ συμπέρασμα εἶναι ἀληθές. ἐὰν γὰρ ληφθῇ τὸ μὲν Α μηδενὶ τῷ Γ, τὸ δὲ Β παντί, ἢ μὲν Α Γ ὅλη ἀληθής, ἢ δὲ Β Γ ἐπὶ τι ψευδής.

Φανερόν δὲ καὶ ἐπὶ τῶν ἐν μέρει συλλογισμῶν ὅτι πάντως ἔσται διὰ ψευδῶν ἀληθές. οἱ γὰρ αὐτοὶ ὅροι ληπτέοι καὶ ὅταν καθόλου ὦσιν αἱ προτάσεις, οἱ μὲν ἐν τοῖς κατηγορικοῖς κατηγορικοί, οἱ δ' ἐν τοῖς στερητικοῖς στερητικοί. οὐδὲν γὰρ διαφέρει μηδενὶ ὑπάρχοντος παντὶ λαβεῖν ὑπάρχειν, καὶ τινὶ ὑπάρχοντος καθόλου λαβεῖν ὑπάρχειν, πρὸς τὴν τῶν ὅρων ἐκθεσιν· ὁμοίως δὲ καὶ ἐπὶ τῶν στερητικῶν.

Φανερόν οὖν ὅτι ἂν μὲν ἦ τὸ συμπέρασμα ψεῦδος, ἀνάγκη, ἐξ ὧν ὁ λόγος, ψευδῇ εἶναι ἢ πάντα ἢ ἓν, ὅταν δ' ἀληθές, οὐκ ἀνάγκη ἀληθές εἶναι οὔτε τι οὔτε πάντα, ἀλλ' ἔστι μηδενὸς ὄντος ἀληθοῦς τῶν ἐν τῷ συλλογισμῷ τὸ συμπέρασμα ὁμοίως εἶναι ἀληθές· οὐ μὴν ἐξ ἀνάγκης. αἴτιον δ' [57b] ὅτι ὅταν δύο ἔχῃ οὕτω πρὸς ἄλληλα ὥστε θατέρου ὄντος ἐξ ἀνάγκης εἶναι θάτερον, τούτου μὴ ὄντος μὲν οὐδὲ θάτερον ἔσται, ὄντος δ' οὐκ ἀνάγκη εἶναι θάτερον· τοῦ δ' αὐτοῦ

ὄντος καὶ μὴ ὄντος ἀδύνατον ἐξ ἀνάγκης εἶναι τὸ αὐτό· λέγω δ' οἷον τοῦ Α ὄντος λευκοῦ τὸ Β εἶναι μέγα ἐξ ἀνάγκης, καὶ μὴ ὄντος λευκοῦ τοῦ Α τὸ Β εἶναι μέγα ἐξ ἀνάγκης. ὅταν γὰρ τουδὶ ὄντος λευκοῦ, τοῦ Α, τοδὶ ἀνάγκη μέγα εἶναι, τὸ Β, μεγάλου δὲ τοῦ Β ὄντος τὸ Γ μὴ λευκόν, ἀνάγκη, εἰ τὸ Α λευκόν, τὸ Γ μὴ εἶναι λευκόν. καὶ ὅταν δύο ὄντων θατέρου ὄντος ἀνάγκη θάτερον εἶναι, τούτου μὴ ὄντος ἀνάγκη τὸ πρῶτον μὴ εἶναι. τοῦ δὴ Β μὴ ὄντος μεγάλου τὸ Α οὐχ οἷόν τε λευκόν εἶναι. τοῦ δὲ Α μὴ ὄντος λευκοῦ εἰ ἀνάγκη τὸ Β μέγα εἶναι, συμβαίνει ἐξ ἀνάγκης τοῦ Β μεγάλου μὴ ὄντος αὐτὸ τὸ Β εἶναι μέγα· τοῦτο δ' ἀδύνατον. εἰ γὰρ τὸ Β μὴ ἔστι μέγα, τὸ Α οὐκ ἔσται λευκόν ἐξ ἀνάγκης. εἰ οὖν μὴ ὄντος τούτου λευκοῦ τὸ Β ἔσται μέγα, συμβαίνει, εἰ τὸ Β μὴ ἔστι μέγα, εἶναι μέγα, ὥς διὰ τριῶν.

Κεφάλαιο 5

Τὸ δὲ κύκλω καὶ ἐξ ἀλλήλων δείκνυσθαι ἐστὶ τὸ διὰ τοῦ συμπεράσματος καὶ τοῦ ἀνάπαλιν τῇ κατηγορίᾳ τὴν ἑτέραν λαβόντα πρότασιν συμπεράνασθαι τὴν λοιπὴν, ἣν ἐλάμβανεν ἐν θατέρῳ συλλογισμῷ. οἷον εἰ ἔδει δεῖξαι ὅτι τὸ Α τῷ Γ παντὶ ὑπάρχει, ἔδειξε δὲ διὰ τοῦ Β, πάλιν εἰ δεικνύοι ὅτι τὸ Α τῷ Β ὑπάρχει, λαβὼν τὸ μὲν Α τῷ Γ ὑπάρχειν τὸ δὲ Γ τῷ Β [καὶ τὸ Α τῷ Β]· πρότερον δ' ἀνάπαλιν ἔλαβε τὸ Β τῷ Γ ὑπάρχον. ἢ εἰ [ὅτι] τὸ Β τῷ Γ δεῖ δεῖξαι ὑπάρχον, εἰ λάβοι τὸ Α κατὰ τοῦ Γ, ὃ ἦν συμπέρασμα, τὸ δὲ Β κατὰ τοῦ Α ὑπάρχειν· πρότερον δ' ἐλήφθη ἀνάπαλιν τὸ Α κατὰ τοῦ Β. ἄλλως δ' οὐκ ἔστιν ἐξ ἀλλήλων δεῖξαι. εἴτε γὰρ ἄλλο μέσον λήψεται, οὐ κύκλω· οὐδὲν γὰρ λαμβάνεται τῶν αὐτῶν· εἴτε τούτων τι, ἀνάγκη θάτερον μόνον· εἰ γὰρ ἄμφω, ταὐτὸν ἔσται συμπέρασμα, δεῖ δ' ἕτερον.

Ἐν μὲν οὖν τοῖς μὴ ἀντιστρέφουσιν ἐξ ἀναποδείκτου τῆς ἑτέρας προτάσεως γίνεται ὁ συλλογισμός· οὐ γὰρ ἔστιν ἀποδεῖξαι διὰ τούτων τῶν ὄρων ὅτι τῷ μέσῳ τὸ τρίτον ὑπάρχει ἢ τῷ πρώτῳ τὸ μέσον. ἐν δὲ τοῖς ἀντιστρέφουσιν ἔστι πάντα δεικνύναι δι' ἀλλήλων, οἷον εἰ τὸ Α καὶ τὸ Β καὶ τὸ Γ ἀντιστρέφουσιν ἀλλήλοις. δεδειχθῶ γὰρ τὸ Α Γ διὰ μέσου τοῦ Β, καὶ πάλιν τὸ Α Β διὰ τε τοῦ συμπεράσματος καὶ διὰ τῆς Β Γ προτάσεως ἀντιστραφείσης, ὡσαύτως δὲ καὶ τὸ Β Γ διὰ τε τοῦ συμπεράσματος καὶ τῆς Α Β [58a] προτάσεως ἀντεστραμμένης. δεῖ δὲ τὴν τε Γ Β καὶ τὴν Β Α πρότασιν ἀποδεῖξαι· ταύταις γὰρ ἀναποδείκτοις κεκρήμεθα μόναις. ἐὰν οὖν ληφθῇ τὸ Β παντὶ τῷ Γ ὑπάρχειν καὶ τὸ Γ παντὶ τῷ Α, συλλογισμός ἔσται τοῦ Β πρὸς τὸ Α. πάλιν ἐὰν ληφθῇ τὸ μὲν Γ παντὶ τῷ Α, τὸ δὲ Α παντὶ τῷ Β, παντὶ τῷ Β τὸ Γ ἀνάγκη ὑπάρχειν. ἐν ἀμφοτέροις δὴ τούτοις τοῖς συλλογισμοῖς ἢ Γ Α πρότασις εἰληπτα ἀναπόδεικτος· αἱ γὰρ ἕτεραι δεδειγμέναι ἦσαν. ὥστ' ἂν ταύτην ἀποδείξωμεν, ἅπασαι ἔσσονται δεδειγμέναι δι' ἀλλήλων. ἐὰν οὖν ληφθῇ τὸ Γ παντὶ τῷ Β καὶ τὸ Β παντὶ τῷ Α ὑπάρχειν, ἀμφοτέραί τε αἱ προτάσεις ἀποδεδειγμέναι λαμβάνονται, καὶ τὸ Γ τῷ Α ἀνάγκη ὑπάρχειν. φανερόν οὖν ὅτι ἐν μόνοις τοῖς ἀντιστρέφουσιν κύκλω καὶ δι' ἀλλήλων ἐνδέχεται γίνεσθαι τὰς ἀποδείξεις, ἐν δὲ τοῖς ἄλλοις ὡς πρότερον εἵπομεν. συμβαίνει δὲ καὶ ἐν τούτοις αὐτῷ τῷ δεικνυμένῳ

χρησθαι πρὸς τὴν ἀποδείξιν· τὸ μὲν γὰρ Γ κατὰ τοῦ Β καὶ τὸ Β κατὰ τοῦ Α δείκνυται ληφθέντος τοῦ Γ κατὰ τοῦ Α λέγεσθαι, τὸ δὲ Γ κατὰ τοῦ Α διὰ τούτων δείκνυται τῶν προτάσεων, ὥστε τῷ συμπεράσματι χρώμεθα πρὸς τὴν ἀποδείξιν.

Ἐπὶ δὲ τῶν στερητικῶν συλλογισμῶν ὧδε δείκνυται ἐξ ἀλλήλων. ἔστω τὸ μὲν Β παντὶ τῷ Γ ὑπάρχειν, τὸ δὲ Α οὐδενὶ τῷ Β· συμπεράσμα ὅτι τὸ Α οὐδενὶ τῷ Γ. εἰ δὴ πάλιν δεῖ συμπεράνασθαι ὅτι τὸ Α οὐδενὶ τῷ Β, ὃ πάλαι ἔλαβεν, ἔστω τὸ μὲν Α μηδενὶ τῷ Γ, τὸ δὲ Γ παντὶ τῷ Β· οὕτω γὰρ ἀνάπαλιν ἢ πρότασις. εἰ δ' ὅτι τὸ Β τῷ Γ δεῖ συμπεράνασθαι, οὐκέθ' ὁμοίως ἀντιστρεπτέον τὸ Α Β (ἢ γὰρ αὐτὴ πρότασις, τὸ Β μηδενὶ τῷ Α καὶ τὸ Α μηδενὶ τῷ Β ὑπάρχειν), ἀλλὰ ληπτέον, ὃ τὸ Α μηδενὶ ὑπάρχει, τὸ Β παντὶ ὑπάρχειν. ἔστω τὸ Α μηδενὶ τῷ Γ ὑπάρχειν, ὅπερ ἦν τὸ συμπεράσμα· ὃ δὲ τὸ Α μηδενί, τὸ Β εἰλήφθω παντὶ ὑπάρχειν· ἀνάγκη οὖν τὸ Β παντὶ τῷ Γ ὑπάρχειν. ὥστε τριῶν ὄντων ἕκαστον συμπεράσμα γέγονε, καὶ τὸ κύκλῳ ἀποδεικνύναι τοῦτ' ἔστι, τὸ τὸ συμπεράσμα λαμβάνοντα καὶ ἀνάπαλιν τὴν ἐτέραν πρότασιν τὴν λοιπὴν συλλογίζεσθαι.

Ἐπὶ δὲ τῶν ἐν μέρει συλλογισμῶν τὴν μὲν καθόλου πρότασιν οὐκ ἔστιν ἀποδείξαι διὰ τῶν ἐτέρων, τὴν δὲ κατὰ μέρος ἔστιν. ὅτι μὲν οὖν οὐκ ἔστιν ἀποδείξαι τὴν καθόλου, φανερόν· τὸ μὲν γὰρ καθόλου δείκνυται διὰ τῶν καθόλου, τὸ δὲ συμπεράσμα οὐκ ἔστι καθόλου, δεῖ δ' ἐκ τοῦ συμπεράσματος δεῖξαι καὶ τῆς ἐτέρας προτάσεως. ἔτι ὅλως οὐδὲ γίνεται [58b] συλλογισμὸς ἀντιστραφείσης τῆς προτάσεως· ἐν μέρει γὰρ ἀμφοτέραι γίνονται αἱ προτάσεις. τὴν δ' ἐπὶ μέρους ἔστιν. δεδείχθω γὰρ τὸ Α κατὰ τινὸς τοῦ Γ διὰ τοῦ Β. ἐὰν οὖν ληφθῇ τὸ Β παντὶ τῷ Α καὶ τὸ συμπεράσμα μένη, τὸ Β τινὶ τῷ Γ ὑπάρξει· γίνεται γὰρ τὸ πρῶτον σχῆμα, καὶ τὸ Α μέσον. εἰ δὲ στερητικὸς ὁ συλλογισμὸς, τὴν μὲν καθόλου πρότασιν οὐκ ἔστι δεῖξαι, δι' ὃ καὶ πρότερον ἐλέχθη· τὴν δ' ἐν μέρει ἔστιν, ἐὰν ὁμοίως ἀντιστραφῇ τὸ Α Β ὥσπερ κατὰ τῶν καθόλου, [οὐκ ἔστι, διὰ προσλήψεως δ' ἔστιν,] οἷον ὃ τὸ Α τινὶ μὴ ὑπάρχει, τὸ Β τινὶ ὑπάρχειν· ἄλλως γὰρ οὐ γίνεται συλλογισμὸς διὰ τὸ ἀποφατικὴν εἶναι τὴν ἐν μέρει πρότασιν.

Κεφάλαιο 6

Ἐν δὲ τῷ δευτέρῳ σχήματι τὸ μὲν καταφατικὸν οὐκ ἔστι δεῖξαι διὰ τούτου τοῦ τρόπου, τὸ δὲ στερητικὸν ἔστιν. τὸ μὲν οὖν κατηγορικὸν οὐ δείκνυται διὰ τὸ μὴ ἀμφοτέρας εἶναι τὰς προτάσεις καταφατικάς· τὸ γὰρ συμπέρασμα στερητικὸν ἔστι, τὸ δὲ κατηγορικὸν ἐξ ἀμφοτέρων ἐδείκνυτο καταφατικῶν. τὸ δὲ στερητικὸν ὧδε δείκνυται. ὑπαρχέτω τὸ Α παντὶ τῷ Β, τῷ δὲ Γ μηδενί· συμπέρασμα τὸ Β οὐδενὶ τῷ Γ. ἐὰν οὖν ληθῇ τὸ Β παντὶ τῷ Α ὑπάρχον, [τῷ δὲ Γ μηδενί,] ἀνάγκη τὸ Α μηδενὶ τῷ Γ ὑπάρχειν· γίνεται γὰρ τὸ δεύτερον σχῆμα· μέσον τὸ Β. εἰ δὲ τὸ Α Β στερητικὸν ἐλήφθη, θάτερον δὲ κατηγορικόν, τὸ πρῶτον ἔσται σχῆμα. τὸ μὲν γὰρ Γ παντὶ τῷ Α, τὸ δὲ Β οὐδενὶ τῷ Γ, ὥστ' οὐδενὶ τῷ Α τὸ Β· οὐδ' ἄρα τὸ Α τῷ Β. διὰ μὲν οὖν τοῦ συμπεράσματος καὶ τῆς μιᾶς προτάσεως οὐ γίνεται συλλογισμός, προσληφθείσης δ' ἐτέρας ἔσται. εἰ δὲ μὴ καθόλου ὁ συλλογισμός, ἢ μὲν ἐν ὅλῳ πρότασις οὐ δείκνυται διὰ τὴν αὐτὴν αἰτίαν ἥνπερ εἵπομεν καὶ πρότερον, ἢ δ' ἐν μέρει δείκνυται, ὅταν ἦ τὸ καθόλου κατηγορικόν· ὑπαρχέτω γὰρ τὸ Α παντὶ τῷ Β, τῷ δὲ Γ μὴ παντί· συμπέρασμα Β Γ. ἐὰν οὖν ληθῇ τὸ Β παντὶ τῷ Α, τῷ δὲ Γ οὐ παντί, τὸ Α τινὶ τῷ Γ οὐχ ὑπάρξει· μέσον Β. εἰ δ' ἔστιν ἡ καθόλου στερητική, οὐ δειχθήσεται ἡ Α Γ πρότασις ἀντιστραφέντος τοῦ Α Β· συμβαίνει γὰρ ἡ ἀμφοτέρας ἢ τὴν ἐτέραν πρότασιν γίνεσθαι ἀποφατικήν, ὥστ' οὐκ ἔσται συλλογισμός. ἀλλ' ὁμοίως δειχθήσεται ὡς καὶ ἐπὶ τῶν καθόλου, ἐὰν ληθῇ, ὃ τὸ Β τινὶ μὴ ὑπάρχει, τὸ Α τινὶ ὑπάρχειν.

Κεφάλαιο 7

Ἐπὶ δὲ τοῦ τρίτου σχήματος ὅταν μὲν ἀμφότεραι αἱ προτάσεις καθόλου ληφθῶσιν, οὐκ ἐνδέχεται δεῖξαι δι' ἀλλήλων· τὸ μὲν γὰρ καθόλου δείκνυται διὰ τῶν καθόλου, τὸ [59a] δ' ἐν τούτῳ συμπέρασμα αἰετὰ κατὰ μέρος, ὥστε φανερόν ὅτι ὅλως οὐκ ἐνδέχεται δεῖξαι διὰ τούτου τοῦ σχήματος τὴν καθόλου πρότασιν. Ἐὰν δ' ἡ μὲν ἢ καθόλου ἢ δ' ἐν μέρει, (3) ποτὲ μὲν ἔσται ποτὲ δ' οὐκ ἔσται. ὅταν μὲν οὖν ἀμφότεραι κατηγορικαὶ ληφθῶσι καὶ τὸ καθόλου γένηται πρὸς τῷ ἐλάττωι ἄκρῳ, ἔσται, ὅταν δὲ πρὸς θατέρῳ, οὐκ ἔσται. ὑπαρχέτω γὰρ τὸ Α παντὶ τῷ Γ, τὸ δὲ Β τινί· συμπέρασμα τὸ Α Β. ἐὰν οὖν ληφθῇ τὸ Γ παντὶ τῷ Α ὑπάρχειν, τὸ μὲν Γ δέδεικται τινὶ τῷ Β ὑπάρχον, τὸ δὲ Β τινὶ τῷ Γ οὐ δέδεικται. καίτοι ἀνάγκη, εἰ τὸ Γ τινὶ τῷ Β, καὶ τὸ Β τινὶ τῷ Γ ὑπάρχειν. ἀλλ' οὐ ταυτόν ἐστι τόδε τῷδε καὶ τόδε τῷδε ὑπάρχειν· ἀλλὰ προσληπτέον, εἰ τόδε τινὶ τῷδε, καὶ θάτερον τινὶ τῷδε. τούτου δὲ ληφθέντος οὐκέτι γίνεται ἐκ τοῦ συμπεράσματος καὶ τῆς ἐτέρας προτάσεως ὁ συλλογισμός. εἰ δὲ τὸ Β παντὶ τῷ Γ, τὸ δὲ Α τινὶ τῷ Γ, ἔσται δεῖξαι τὸ Α Γ, ὅταν ληφθῇ τὸ μὲν Γ παντὶ τῷ Β ὑπάρχειν, τὸ δὲ Α τινί. εἰ γὰρ τὸ Γ παντὶ τῷ Β, τὸ δὲ Α τινὶ τῷ Β, ἀνάγκη τὸ Α τινὶ τῷ Γ ὑπάρχειν· μέσον τὸ Β. καὶ ὅταν ἡ ἢ μὲν κατηγορικὴ ἢ δὲ στερητικὴ, καθόλου δ' ἢ κατηγορικὴ, δειχθήσεται ἡ ἐτέρα. ὑπαρχέτω γὰρ τὸ Β παντὶ τῷ Γ, τὸ δὲ Α τινὶ μὴ ὑπαρχέτω· συμπέρασμα ὅτι τὸ Α τινὶ τῷ Β οὐχ ὑπάρχει. ἐὰν οὖν προσληφθῇ τὸ Γ παντὶ τῷ Β ὑπάρχειν, ἀνάγκη τὸ Α τινὶ τῷ Γ μὴ ὑπάρχειν· μέσον τὸ Β. ὅταν δ' ἡ στερητικὴ καθόλου γένηται, οὐ δείκνυται ἡ ἐτέρα, εἰ μὴ ὥσπερ ἐπὶ τῶν πρότερον, ἐὰν ληφθῇ, ὅ τοῦτο τινὶ μὴ ὑπάρχει, θάτερον τινὶ ὑπάρχειν, οἷον εἰ τὸ μὲν Α μηδενὶ τῷ Γ, τὸ δὲ Β τινί· συμπέρασμα ὅτι τὸ Α τινὶ τῷ Β οὐχ ὑπάρχει. ἐὰν οὖν ληφθῇ, ὅ τὸ Α τινὶ μὴ ὑπάρχει, τὸ Γ τινὶ ὑπάρχειν, ἀνάγκη τὸ Γ τινὶ τῷ Β ὑπάρχειν. ἄλλως δ' οὐκ ἔστιν ἀντιστρέφοντα τὴν καθόλου πρότασιν δεῖξαι τὴν ἐτέραν· οὐδαμῶς γὰρ ἔσται συλλογισμός.

[Φανερόν οὖν ὅτι ἐν μὲν τῷ πρώτῳ σχήματι ἡ δι' ἀλλήλων δεῖξις διὰ τε τοῦ τρίτου καὶ διὰ τοῦ πρώτου γίνεται σχήματος. κατηγορικοῦ μὲν γὰρ ὄντος τοῦ συμπεράσματος διὰ τοῦ πρώτου, στερητικοῦ δὲ διὰ τοῦ ἐσχάτου· λαμβάνεται γάρ, ὅ τοῦτο μηδενί, θάτερον παντὶ ὑπάρχειν. ἐν δὲ τῷ μέσῳ καθόλου μὲν ὄντος τοῦ συλλογισμοῦ δι'

ἢ οὐκ εἰσὶ κατὰ τὴν κύκλῳ δεῖξιν ἢ ἀτελεῖς.] [59b]

Κεφάλαιο 8

Τὸ δ' ἀντιστρέφειν ἐστὶ τὸ μετατιθέντα τὸ συμπέρασμα ποιεῖν τὸν συλλογισμὸν ὅτι ἢ τὸ ἄκρον τῷ μέσῳ οὐχ ὑπάρξει ἢ τοῦτο τῷ τελευταίῳ. ἀνάγκη γὰρ τοῦ συμπεράσματος ἀντιστραφέντος καὶ τῆς ἐτέρας μενούσης προτάσεως ἀναιρεῖσθαι τὴν λοιπήν· εἰ γὰρ ἔσται, καὶ τὸ συμπέρασμα ἔσται. διαφέρει δὲ τὸ ἀντικειμένως ἢ ἐναντίως ἀντιστρέφειν τὸ συμπέρασμα· οὐ γὰρ ὁ αὐτὸς γίνεται συλλογισμὸς ἐκατέρως ἀντιστραφέντος· δηλὸν δὲ τοῦτ' ἔσται διὰ τῶν ἐπομένων. λέγω δ' ἀντικεῖσθαι μὲν τὸ παντὶ τῷ οὐ παντὶ καὶ τὸ τινὶ τῷ οὐδενί, ἐναντίως δὲ τὸ παντὶ τῷ οὐδενί καὶ τὸ τινὶ τῷ οὐ τινὶ ὑπάρχειν. ἔστω γὰρ δεδειγμένον τὸ Α κατὰ τοῦ Γ διὰ μέσου τοῦ Β. εἰ δὴ τὸ Α ληφθεῖη μηδενὶ τῷ Γ ὑπάρχειν, τῷ δὲ Β παντί, οὐδενὶ τῷ Γ ὑπάρξει τὸ Β. καὶ εἰ τὸ μὲν Α μηδενὶ τῷ Γ, τὸ δὲ Β παντὶ τῷ Γ, τὸ Α οὐ παντὶ τῷ Β καὶ οὐχ ἁπλῶς οὐδενί· οὐ γὰρ ἐδείκνυτο τὸ καθόλου διὰ τοῦ ἐσχάτου σχήματος. ὅλως δὲ τὴν πρὸς τῷ μείζονι ἄκρῳ πρότασιν οὐκ ἔστιν ἀνασκευάσαι καθόλου διὰ τῆς ἀντιστροφῆς· αἰεὶ γὰρ ἀναιρεῖται διὰ τοῦ τρίτου σχήματος· ἀνάγκη γὰρ πρὸς τὸ ἔσχατον ἄκρον ἀμφοτέρας λαβεῖν τὰς προτάσεις. καὶ εἰ στερητικὸς ὁ συλλογισμὸς, ὡσαύτως, δεδείχθω γὰρ τὸ Α μηδενὶ τῷ Γ ὑπάρχον διὰ τοῦ Β. οὐκοῦν ἂν ληφθῇ τὸ Α τῷ Γ παντὶ ὑπάρχειν, τῷ δὲ Β μηδενί, οὐδενὶ τῷ Γ τὸ Β ὑπάρξει. καὶ εἰ τὸ Α καὶ τὸ Β παντὶ τῷ Γ, τὸ Α τινὶ τῷ Β· ἀλλ' οὐδενὶ ὑπῆρχεν.

Ἐὰν δ' ἀντικειμένως ἀντιστραφῇ τὸ συμπέρασμα, καὶ οἱ συλλογισμοὶ ἀντικείμενοι καὶ οὐ καθόλου ἔσσονται. γίνεται γὰρ ἡ ἐτέρα πρότασις ἐν μέρει, ὥστε καὶ τὸ συμπέρασμα ἔσται κατὰ μέρος. ἔστω γὰρ κατηγορικὸς ὁ συλλογισμὸς, καὶ ἀντιστρεφέσθω οὕτως. οὐκοῦν εἰ τὸ Α οὐ παντὶ τῷ Γ, τῷ δὲ Β παντί, τὸ Β οὐ παντὶ τῷ Γ· καὶ εἰ τὸ μὲν Α μὴ παντὶ τῷ Γ, τὸ δὲ Β παντί, τὸ Α οὐ παντὶ τῷ Β. ὁμοίως δὲ καὶ εἰ στερητικὸς ὁ συλλογισμὸς. εἰ γὰρ τὸ Α τινὶ τῷ Γ ὑπάρχει, τῷ δὲ Β μηδενί, τὸ Β τινὶ τῷ Γ οὐχ ὑπάρξει, οὐχ ἁπλῶς οὐδενί· καὶ εἰ τὸ μὲν Α τῷ Γ τινί, τὸ δὲ Β παντί, ὥσπερ ἐν ἀρχῇ ἐλήφθη, τὸ Α τινὶ τῷ Β ὑπάρξει.

Ἐπὶ δὲ τῶν ἐν μέρει συλλογισμῶν ὅταν μὲν ἀντικειμένως ἀντιστρέφηται τὸ συμπέρασμα, ἀναιροῦνται ἀμφοτέραι αἱ προτάσεις, ὅταν δ' ἐναντίως, οὐδετέρα. οὐ γὰρ ἔτι συμβαίνει, καθάπερ ἐν τοῖς

καθόλου, ἀναιρεῖν ἐλλείποντος τοῦ συμπεράσματος κατὰ τὴν ἀντιστροφήν, ἀλλ' οὐδ' ὅλως [60a] ἀναιρεῖν. δεδείχθω γὰρ τὸ Α κατὰ τινὸς τοῦ Γ. οὐκοῦν ἂν ληφθῇ τὸ Α μηδενὶ τῷ Γ ὑπάρχειν, τὸ δὲ Β τινί, τὸ Α τῷ Β τινὶ οὐχ ὑπάρξει· καὶ εἰ τὸ Α μηδενὶ τῷ Γ, τῷ δὲ Β παντί, οὐδενὶ τῷ Γ τὸ Β. ὥστ' ἀναιροῦνται ἀμφοτέραι. ἐὰν δ' ἐναντίως ἀντιστραφῇ, οὐδετέρα. εἰ γὰρ τὸ Α τινὶ τῷ Γ μὴ ὑπάρχει, τῷ δὲ Β παντί, τὸ Β τινὶ τῷ Γ οὐχ ὑπάρξει, ἀλλ' οὕτω ἀναιρεῖται τὸ ἐξ ἀρχῆς· ἐνδέχεται γὰρ τινὶ ὑπάρχειν καὶ τινὶ μὴ ὑπάρχειν. τῆς δὲ καθόλου, τῆς Α Β, ὅλως οὐδὲ γίνεται συλλογισμός· εἰ γὰρ τὸ μὲν Α τινὶ τῷ Γ μὴ ὑπάρχει, τὸ δὲ Β τινὶ ὑπάρχει, οὐδετέρα καθόλου τῶν προτάσεων. ὁμοίως δὲ καὶ εἰ στερητικὸς ὁ συλλογισμός· εἰ μὲν γὰρ ληφθῇ τὸ Α παντὶ τῷ Γ ὑπάρχειν, ἀναιροῦνται ἀμφοτέραι, εἰ δὲ τινί, οὐδετέρα. ἀπόδειξις δ' ἡ αὕτη.

Κεφάλαιο 9

Ἐν δὲ τῷ δευτέρῳ σχήματι τὴν μὲν πρὸς τῷ μείζονι ἄκρῳ πρότασιν οὐκ ἔστιν ἀνελεῖν ἐναντίως, ὅποτερωσοῦν τῆς ἀντιστροφῆς γινομένης· αἰ γὰρ ἔσται τὸ συμπέρασμα ἐν τῷ τρίτῳ σχήματι, καθόλου δ' οὐκ ἦν ἐν τούτῳ συλλογισμός. τὴν δ' ἑτέραν ὁμοίως ἀναιρήσομεν τῇ ἀντιστροφῇ. λέγω δὲ τὸ ὁμοίως, εἰ μὲν ἐναντίως ἀντιστρέφεται, ἐναντίως, εἰ δ' ἀντικειμένως, ἀντικειμένως. ὑπαρχέτω γὰρ τὸ Α παντὶ τῷ Β, τῷ δὲ Γ μηδενί· συμπέρασμα Β Γ. ἐὰν οὖν ληφθῇ τὸ Β παντὶ τῷ Γ ὑπάρχειν καὶ τὸ Α Β μένη, τὸ Α παντὶ τῷ Γ ὑπάρξει· γίνεται γὰρ τὸ πρῶτον σχῆμα. εἰ δὲ τὸ Β παντὶ τῷ Γ, τὸ δὲ Α μηδενὶ τῷ Γ, τὸ Α οὐ παντὶ τῷ Β· σχῆμα τὸ ἔσχατον. ἐὰν δ' ἀντικειμένως ἀντιστραφῇ τὸ Β Γ, ἢ μὲν Α Β ὁμοίως δειχθήσεται, ἢ δὲ Α Γ ἀντικειμένως. εἰ γὰρ τὸ Β τινὶ τῷ Γ, τὸ δὲ Α μηδενὶ τῷ Γ, τὸ Α τινὶ τῷ Β οὐχ ὑπάρξει. πάλιν εἰ τὸ Β τινὶ τῷ Γ, τὸ δὲ Α παντὶ τῷ Β, τὸ Α τινὶ τῷ Γ, ὥστ' ἀντικείμενος γίνεται ὁ συλλογισμός. ὁμοίως δὲ δειχθήσεται καὶ εἰ ἀνάπαλιν ἔχοιεν αἱ προτάσεις. εἰ δ' ἐστὶν ἐπὶ μέρους ὁ συλλογισμός, ἐναντίως μὲν ἀντιστρεφομένου τοῦ συμπεράσματος οὐδετέρα τῶν προτάσεων ἀναιρεῖται, καθάπερ οὐδ' ἐν τῷ πρώτῳ σχήματι, ἀντικειμένως δ' ἀμφοτέραι. κείσθω γὰρ τὸ Α τῷ μὲν Β μηδενὶ ὑπάρχειν, τῷ δὲ Γ τινί· συμπέρασμα Β Γ. ἐὰν οὖν τεθῇ τὸ Β τινὶ τῷ Γ ὑπάρχειν καὶ τὸ Α Β μένη, συμπέρασμα ἔσται ὅτι τὸ Α τινὶ τῷ Γ οὐχ ὑπάρχει, ἀλλ' οὐκ ἀνήρηται τὸ ἐξ ἀρχῆς· ἐνδέχεται γὰρ τινὶ ὑπάρχειν καὶ μὴ ὑπάρχειν. πάλιν εἰ τὸ Β τινὶ τῷ Γ καὶ τὸ Α τινὶ τῷ Γ, οὐκ ἔσται συλλογισμός· οὐδέτερον γὰρ καθόλου τῶν εἰλημμένων. [60b] ὥστ' οὐκ ἀναιρεῖται τὸ Α Β. ἐὰν δ' ἀντικειμένως ἀντιστρέφηται, ἀναιροῦνται ἀμφοτέραι. εἰ γὰρ τὸ Β παντὶ τῷ Γ, τὸ δὲ Α μηδενὶ τῷ Β, οὐδενὶ τῷ Γ τὸ Α· ἦν δὲ τινί. πάλιν εἰ τὸ Β παντὶ τῷ Γ, τὸ δὲ Α τινὶ τῷ Γ, τινὶ τῷ Β τὸ Α. ἢ αὐτὴ δ' ἀπόδειξις καὶ εἰ τὸ καθόλου κατηγορικόν.

Κεφάλαιο 10

Ἐπὶ δὲ τοῦ τρίτου σχήματος ὅταν μὲν ἐναντίως ἀντιστρέφηται τὸ συμπέρασμα, οὐδετέρα τῶν προτάσεων ἀναιρεῖται κατ' οὐδένα τῶν συλλογισμῶν, ὅταν δ' ἀντικειμένως, ἀμφοτέραι καὶ ἐν ἅπασιν. δεδείχθω γὰρ τὸ Α τινὶ τῷ Β ὑπάρχον, μέσον δ' εἰλήφθω τὸ Γ, ἔστωσαν δὲ καθόλου αἱ προτάσεις. οὐκοῦν ἐὰν ληφθῇ τὸ Α τινὶ τῷ Β μὴ ὑπάρχειν, τὸ δὲ Β παντὶ τῷ Γ, οὐ γίνεται συλλογισμὸς τοῦ Α καὶ τοῦ Γ. οὐδ' εἰ τὸ Α τῷ μὲν Β τινὶ μὴ ὑπάρχει, τῷ δὲ Γ παντί, οὐκ ἔσται τοῦ Β καὶ τοῦ Γ συλλογισμὸς. ὁμοίως δὲ δειχθήσεται καὶ εἰ μὴ καθόλου αἱ προτάσεις. ἢ γὰρ ἀμφοτέρας ἀνάγκη κατὰ μέρος εἶναι διὰ τῆς ἀντιστροφῆς, ἢ τὸ καθόλου πρὸς τῷ ἐλάττονι ἄκρῳ γίνεσθαι· οὕτω δ' οὐκ ἦν συλλογισμὸς οὗτ' ἐν τῷ πρώτῳ σχήματι οὗτ' ἐν τῷ μέσῳ. ἐὰν δ' ἀντικειμένως ἀντιστρέφηται, αἱ προτάσεις ἀναιροῦνται ἀμφοτέραι. εἰ γὰρ τὸ Α μηδενὶ τῷ Β, τὸ δὲ Β παντὶ τῷ Γ, τὸ Α οὐδενὶ τῷ Γ· πάλιν εἰ τὸ Α τῷ μὲν Β μηδενί, τῷ δὲ Γ παντί, τὸ Β οὐδενὶ τῷ Γ. καὶ εἰ ἡ ἐτέραμὴ καθόλου, ὡσαύτως. εἰ γὰρ τὸ Α μηδενὶ τῷ Β, τὸ δὲ Β τινὶ τῷ Γ, τὸ Α τινὶ τῷ Γ οὐχ ὑπάρξει· εἰ δὲ τὸ Α τῷ μὲν Β μηδενί, τῷ δὲ Γ παντί, οὐδενὶ τῷ Γ τὸ Β.

Ὁμοίως δὲ καὶ εἰ στερητικὸς ὁ συλλογισμὸς. δεδείχθω γὰρ τὸ Α τινὶ τῷ Β μὴ ὑπάρχον, ἔστω δὲ κατηγορικὸν μὲν τὸ Β Γ, ἀποφατικὸν δὲ τὸ Α Γ· οὕτω γὰρ ἐγίνετο ὁ συλλογισμὸς. ὅταν μὲν οὖν τὸ ἐναντίον ληφθῇ τῷ συμπεράσματι, οὐκ ἔσται συλλογισμὸς. εἰ γὰρ τὸ Α τινὶ τῷ Β, τὸ δὲ Β παντὶ τῷ Γ, οὐκ ἦν συλλογισμὸς τοῦ Α καὶ τοῦ Γ. οὐδ' εἰ τὸ Α τινὶ τῷ Β, τῷ δὲ Γ μηδενί, οὐκ ἦν τοῦ Β καὶ τοῦ Γ συλλογισμὸς. ὥστε οὐκ ἀναιροῦνται αἱ προτάσεις. ὅταν δὲ τὸ ἀντικείμενον, ἀναιροῦνται. εἰ γὰρ τὸ Α παντὶ τῷ Β καὶ τὸ Β τῷ Γ, τὸ Α παντὶ τῷ Γ· ἄλλ' οὐδενὶ ὑπῆρχεν. πάλιν εἰ τὸ Α παντὶ τῷ Β, τῷ δὲ Γ μηδενί, τὸ Β οὐδενὶ τῷ Γ· ἄλλὰ παντὶ ὑπῆρχεν. ὁμοίως δὲ δείκνυται καὶ εἰ μὴ καθόλου εἰσὶν αἱ προτάσεις. γίνεται γὰρ τὸ Α Γ καθόλου τε καὶ στερητικόν, θάτερον δ' ἐπὶ μέρους καὶ κατηγορικόν. εἰ μὲν οὖν τὸ Α παντὶ τῷ Β, τὸ δὲ Β τινὶ τῷ Γ, τὸ Α τινὶ τῷ Γ συμβαίνει· ἄλλ' οὐδενὶ ὑπῆρχεν. πάλιν εἰ τὸ Α παντὶ τῷ Β, τῷ δὲ Γ [61a] μηδενί, τὸ Β οὐδενὶ τῷ Γ· ἔκειτο δὲ τινί. εἰ δὲ τὸ Α τινὶ τῷ Β καὶ τὸ Β τινὶ τῷ Γ, οὐ γίνεται συλλογισμὸς· οὐδ' εἰ τὸ Α τινὶ τῷ Β, τῷ δὲ Γ μηδενί, οὐδ' οὕτως. ὥστ' ἐκείνως μὲν ἀναιροῦνται, οὕτω δ' οὐκ

ἀναιρουῦνται αἱ προτάσεις.

Φανερόν οὖν διὰ τῶν εἰρημένων πῶς ἀντιστρεφομένου τοῦ συμπεράσματος ἐν ἐκάστῳ σχήματι γίνεται συλλογισμός, καὶ πότ' ἐναντίος τῇ προτάσει καὶ πότ' ἀντικείμενος, καὶ ὅτι ἐν μὲν τῷ πρώτῳ σχήματι διὰ τοῦ μέσου καὶ τοῦ ἐσχάτου γίνονται οἱ συλλογισμοί, καὶ ἢ μὲν πρὸς τῷ ἐλάττονι ἄκρῳ ἀεὶ διὰ τοῦ μέσου ἀναιρεῖται, ἢ δὲ πρὸς τῷ μείζονι διὰ τοῦ ἐσχάτου· ἐν δὲ τῷ δευτέρῳ διὰ τοῦ πρώτου καὶ τοῦ ἐσχάτου, ἢ μὲν πρὸς τῷ ἐλάττονι ἄκρῳ ἀεὶ διὰ τοῦ πρώτου σχήματος, ἢ δὲ πρὸς τῷ μείζονι διὰ τοῦ ἐσχάτου· ἐν δὲ τῷ τρίτῳ διὰ τοῦ πρώτου καὶ διὰ τοῦ μέσου, καὶ ἢ μὲν πρὸς τῷ μείζονι διὰ τοῦ πρώτου ἀεὶ, ἢ δὲ πρὸς τῷ ἐλάττονι διὰ τοῦ μέσου.

Κεφάλαιο 11

Τί μὲν οὖν ἐστὶ τὸ ἀντιστρέφειν καὶ πῶς ἐν ἐκάστῳ σχήματι καὶ τίς γίνεται συλλογισμός, φανερόν. ὁ δὲ διὰ τοῦ ἀδυνάτου συλλογισμὸς δεικνύται μὲν ὅταν ἡ ἀντίφασις τεθῇ τοῦ συμπεράσματος καὶ προσληφθῇ ἄλλη πρότασις, γίνεται δ' ἐν ἅπασιν τοῖς σχήμασιν· ὅμοιον γάρ ἐστι τῇ ἀντιστροφῇ, πλὴν διαφέρει τοσοῦτον ὅτι ἀντιστρέφεται μὲν γεγενημένου συλλογισμοῦ καὶ εἰλημμένων ἀμφοῖν τῶν προτάσεων, ἀπάγεται δ' εἰς ἀδύνατον οὐ προομολογηθέντος τοῦ ἀντικειμένου πρότερον, ἀλλὰ φανεροῦ ὄντος ὅτι ἀληθές. οἱ δ' ὅροι ὁμοίως ἔχουσιν ἐν ἀμφοῖν, καὶ ἡ αὐτὴ λήψις ἀμφοτέρων. οἷον εἰ τὸ Α τῷ Β παντὶ ὑπάρχει, μέσον δὲ τὸ Γ, ἐὰν ὑποτεθῇ τὸ Α ἢ μὴ παντὶ ἢ μηδενὶ τῷ Β ὑπάρχειν, τῷ δὲ Γ παντί, ὅπερ ἦν ἀληθές, ἀνάγκη τὸ Γ τῷ Β ἢ μηδενὶ ἢ μὴ παντὶ ὑπάρχειν. τοῦτο δ' ἀδύνατον, ὥστε ψεῦδος τὸ ὑποτεθέν· ἀληθές ἄρα τὸ ἀντικείμενον. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων σχημάτων· ὅσα γὰρ ἀντιστροφὴν δέχεται, καὶ τὸν διὰ τοῦ ἀδυνάτου συλλογισμόν.

Τὰ μὲν οὖν ἄλλα προβλήματα πάντα δεικνύται διὰ τοῦ ἀδυνάτου ἐν ἅπασιν τοῖς σχήμασι, τὸ δὲ καθόλου κατηγορικὸν ἐν μὲν τῷ μέσῳ καὶ τῷ τρίτῳ δεικνύται, ἐν δὲ τῷ πρώτῳ οὐ δεικνύται. ὑποκείσθω γὰρ τὸ Α τῷ Β μὴ παντὶ ἢ μηδενὶ ὑπάρχειν, καὶ προσειλήφθω ἄλλη πρότασις ὁποτέρωθεν, εἴτε τῷ Α παντὶ ὑπάρχειν τὸ Γ εἴτε τὸ Β παντὶ τῷ Δ· οὕτω γὰρ ἂν εἴη τὸ πρῶτον σχῆμα. εἰ μὲν οὖν ὑπόκειται μὴ παντὶ ὑπάρχειν τὸ Α τῷ Β, οὐ γίνεται [61b] συλλογισμὸς ὁποτέρωθεν τῆς προτάσεως λαμβανομένης, εἰ δὲ μηδενὶ, ὅταν μὲν ἡ Β Δ προσληφθῇ, συλλογισμὸς μὲν ἔσται τοῦ ψεύδους, οὐ δεικνύται δὲ τὸ προκείμενον. εἰ γὰρ τὸ Α μηδενὶ τῷ Β, τὸ δὲ Β παντὶ τῷ Δ, τὸ Α οὐδενὶ τῷ Δ. τοῦτο δ' ἔστω ἀδύνατον· ψεῦδος ἄρα τὸ μηδενὶ τῷ Β τὸ Α ὑπάρχειν. ἀλλ' οὐκ εἰ τὸ μηδενὶ ψεῦδος, τὸ παντὶ ἀληθές. ἐὰν δ' ἡ Γ Α προσληφθῇ, οὐ γίνεται συλλογισμὸς, οὐδ' ὅταν ὑποτεθῇ μὴ παντὶ τῷ Β τὸ Α ὑπάρχειν. ὥστε φανερόν ὅτι τὸ παντὶ ὑπάρχειν οὐ δεικνύται ἐν τῷ πρώτῳ σχήματι διὰ τοῦ ἀδυνάτου. Τὸ δὲ γε τινὶ καὶ τὸ μηδενὶ καὶ μὴ παντὶ δεικνύται. ὑποκείσθω γὰρ τὸ Α μηδενὶ τῷ Β ὑπάρχειν, τὸ δὲ Β εἰλήφθω παντὶ ἢ τινὶ τῷ Γ. οὐκοῦν ἀνάγκη τὸ Α μηδενὶ ἢ μὴ παντὶ τῷ Γ ὑπάρχειν. τοῦτο δ' ἀδύνατον — ἔστω γὰρ ἀληθές καὶ φανερόν ὅτι παντὶ ὑπάρχει τῷ Γ τὸ Α — ὥστ'

εἰ τοῦτο ψεῦδος, ἀνάγκη τὸ Α τινὶ τῷ Β ὑπάρχειν. ἐὰν δὲ πρὸς τῷ Α ληφθῇ ἡ ἑτέρα πρότασις, οὐκ ἔσται συλλογισμός. οὐδ' ὅταν τὸ ἐναντίον τῷ συμπεράσματι ὑποτεθῇ, οἷον τὸ τινὶ μὴ ὑπάρχειν. φανερόν οὖν ὅτι τὸ ἀντικείμενον ὑποθετέον.

Πάλιν ὑποκείσθω τὸ Α τινὶ τῷ Β ὑπάρχειν, εἰλήφθω δὲ τὸ Γ παντὶ τῷ Α. ἀνάγκη οὖν τὸ Γ τινὶ τῷ Β ὑπάρχειν. τοῦτο δ' ἔστω ἀδύνατον, ὥστε ψεῦδος τὸ ὑποτεθέν. εἰ δ' οὕτως, ἀληθὲς τὸ μηδενὶ ὑπάρχειν. ὁμοίως δὲ καὶ εἰ στερητικὸν ἐλήφθῃ τὸ Γ Α. εἰ δ' ἡ πρὸς τῷ Β εἴληπται πρότασις, οὐκ ἔσται συλλογισμός. ἐὰν δὲ τὸ ἐναντίον ὑποτεθῇ, συλλογισμὸς μὲν ἔσται καὶ τὸ ἀδύνατον, οὐ δείκνυται δὲ τὸ προτεθέν. ὑποκείσθω γὰρ παντὶ τῷ Β τὸ Α ὑπάρχειν, καὶ τὸ Γ τῷ Α εἰλήφθω παντί. οὐκοῦν ἀνάγκη τὸ Γ παντὶ τῷ Β ὑπάρχειν. τοῦτο δ' ἀδύνατον, ὥστε ψεῦδος τὸ παντὶ τῷ Β τὸ Α ὑπάρχειν. ἀλλ' οὕτω γε ἀναγκαῖον, εἰ μὴ παντί, μηδενὶ ὑπάρχειν. ὁμοίως δὲ καὶ εἰ πρὸς τῷ Β ληφθεῖ ἡ ἑτέρα πρότασις· συλλογισμὸς μὲν γὰρ ἔσται καὶ τὸ ἀδύνατον, οὐκ ἀναιρεῖται δ' ἡ ὑπόθεσις· ὥστε τὸ ἀντικείμενον ὑποθετέον.

Πρὸς δὲ τὸ μὴ παντὶ δεῖξαι ὑπάρχον τῷ Β τὸ Α, ὑποθετέον παντὶ ὑπάρχειν· εἰ γὰρ τὸ Α παντὶ τῷ Β καὶ τὸ Γ παντὶ τῷ Α, τὸ Γ παντὶ τῷ Β, ὥστ' εἰ τοῦτο ἀδύνατον, ψεῦδος τὸ ὑποτεθέν. ὁμοίως δὲ καὶ εἰ πρὸς τῷ Β ἐλήφθῃ ἡ ἑτέρα πρότασις. καὶ εἰ στερητικὸν ἦν τὸ Γ Α, ὡσαύτως· καὶ γὰρ οὕτω γίνεται συλλογισμός. ἐὰν δὲ πρὸς τῷ Β ἡ τὸ στερητικόν, οὐδὲν δείκνυται. ἐὰν δὲ μὴ παντὶ ἀλλὰ τινὶ ὑπάρχειν ὑποτεθῇ, οὐ δείκνυται ὅτι οὐ παντὶ ἀλλ' ὅτι οὐδενί. εἰ γὰρ τὸ Α τινὶ τῷ Β, τὸ δὲ Γ παντὶ τῷ Α, τινὶ [62a] τῷ Β τὸ Γ ὑπάρξει. εἰ οὖν τοῦτ' ἀδύνατον, ψεῦδος τὸ τινὶ ὑπάρχειν τῷ Β τὸ Α, ὥστ' ἀληθὲς τὸ μηδενί. τούτου δὲ δειχθέντος προσαναιρεῖται τὸ ἀληθές· τὸ γὰρ Α τῷ Β τινὶ μὲν ὑπῆρχε, τινὶ δ' οὐχ ὑπῆρχεν. ἔτι οὐδὲν παρὰ τὴν ὑπόθεσιν συμβαίνει [τὸ] ἀδύνατον· ψεῦδος γὰρ ἂν εἴη, εἴπερ ἐξ ἀληθῶν μὴ ἔστι ψεῦδος συλλογίσασθαι· νῦν δ' ἐστὶν ἀληθές· ὑπάρχει γὰρ τὸ Α τινὶ τῷ Β. ὥστ' οὐχ ὑποθετέον τινὶ ὑπάρχειν, ἀλλὰ παντί. ὁμοίως δὲ καὶ εἰ τινὶ μὴ ὑπάρχον τῷ Β τὸ Α δεικνύοιμεν· εἰ γὰρ ταῦτο τὸ τινὶ μὴ ὑπάρχειν καὶ μὴ παντὶ ὑπάρχειν, ἡ αὐτὴ ἀμφοῖν ἀπόδειξις.

Φανερόν οὖν ὅτι οὐ τὸ ἐναντίον ἀλλὰ τὸ ἀντικείμενον ὑποθετέον ἐν ἅπασι τοῖς συλλογισμοῖς. οὕτω γὰρ τό τε ἀναγκαῖον ἔσται καὶ τὸ ἀξίωμα ἔνδοξον. εἰ γὰρ κατὰ παντὸς ἡ φάσις ἢ ἡ ἀπόφασις, δειχθέντος ὅτι οὐχ ἡ ἀπόφασις, ἀνάγκη τὴν κατάφασιν ἀληθεύεσθαι.

πάλιν εἰ μὴ τίθησιν ἀληθεύεσθαι τὴν κατάφασιν, ἔνδοξον τὸ ἀξιῶσαι τὴν ἀπόφασιν. τὸ δ' ἐναντίον οὐδετέρως ἀρμόττει ἀξιοῦν· οὔτε γὰρ ἀναγκαῖον, εἰ τὸ μηδενὶ ψεῦδος, τὸ παντὶ ἀληθές, οὔτ' ἔνδοξον ὡς εἰ θάτερον ψεῦδος, ὅτι θάτερον ἀληθές.

Κεφάλαιο 12

Φανερόν οὖν ὅτι ἐν τῷ πρώτῳ σχήματι τὰ μὲν ἄλλα προβλήματα πάντα δείκνυται διὰ τοῦ ἀδυνάτου, τὸ δὲ καθόλου καταφατικὸν οὐ δείκνυται. ἐν δὲ τῷ μέσῳ καὶ τῷ ἐσχάτῳ καὶ τοῦτο δείκνυται. κείσθω γὰρ τὸ Α μὴ παντὶ τῷ Β ὑπάρχειν, εἰλήφθω δὲ τῷ Γ παντὶ ὑπάρχειν τὸ Α. οὐκοῦν εἰ τῷ μὲν Β μὴ παντί, τῷ δὲ Γ παντί, οὐ παντὶ τῷ Β τὸ Γ. τοῦτο δ' ἀδύνατον· ἔστω γὰρ φανερόν ὅτι παντὶ τῷ Β ὑπάρχει τὸ Γ, ὥστε ψεῦδος τὸ ὑποκείμενον. ἀληθὲς ἄρα τὸ παντὶ ὑπάρχειν. ἐὰν δὲ τὸ ἐναντίον ὑποτεθῇ, συλλογισμὸς μὲν ἔσται καὶ τὸ ὀδύνατον, οὐ μὴν δείκνυται τὸ προτεθέν. εἰ γὰρ τὸ Α μηδενὶ τῷ Β, τῷ δὲ Γ παντί, οὐδενὶ τῷ Β τὸ Γ. τοῦτο δ' ἀδύνατον, ὥστε ψεῦδος τὸ μηδενὶ ὑπάρχειν. ἀλλ' οὐκ εἰ τοῦτο ψεῦδος, τὸ παντὶ ἀληθές. ὅτι δὲ τινὶ τῷ Β ὑπάρχει τὸ Α, ὑποκείσθω τὸ Α μηδενὶ τῷ Β ὑπάρχειν, τῷ δὲ Γ παντὶ ὑπαρχέτω. ἀνάγκη οὖν τὸ Γ μηδενὶ τῷ Β. ὥστ' εἰ τοῦτ' ἀδύνατον, ἀνάγκη τὸ Α τινὶ τῷ Β ὑπάρχειν. ἐὰν δ' ὑποτεθῇ τινὶ μὴ ὑπάρχειν, ταὐτ' ἔσται ἅπερ ἐπὶ τοῦ πρώτου σχήματος. πάλιν ὑποκείσθω τὸ Α τινὶ τῷ Β ὑπάρχειν, τῷ δὲ Γ μηδενὶ ὑπαρχέτω. ἀνάγκη οὖν τὸ Γ τινὶ τῷ Β μὴ ὑπάρχειν. ἀλλὰ παντὶ ὑπῆρχεν, ὥστε ψεῦδος τὸ ὑποτεθέν· οὐδενὶ ἄρα τῷ Β τὸ Α ὑπάρξει. ὅτι δ' οὐ παντὶ τὸ Α τῷ Β, ὑποκείσθω παντὶ ὑπάρχειν, τῷ [62b] δὲ Γ μηδενί. ἀνάγκη οὖν τὸ Γ μηδενὶ τῷ Β ὑπάρχειν. τοῦτο δ' ἀδύνατον, ὥστ' ἀληθὲς τὸ μὴ παντὶ ὑπάρχειν. φανερόν οὖν ὅτι πάντες οἱ συλλογισμοὶ γίνονται διὰ τοῦ μέσου σχήματος.

Κεφάλαιο 13

Ὅμοίως δὲ καὶ διὰ τοῦ ἐσχάτου. κείσθω γὰρ τὸ Α τινὶ τῷ Β μὴ ὑπάρχειν, τὸ δὲ Γ παντί· τὸ ἄρα Α τινὶ τῷ Γ οὐχ ὑπάρχει. εἰ οὖν τοῦτ' ἀδύνατον, ψεῦδος τὸ τινὶ μὴ ὑπάρχειν, ὥστ' ἀληθὲς τὸ παντί. ἐὰν δ' ὑποτεθῇ μηδενὶ ὑπάρχειν, συλλογισμὸς μὲν ἔσται καὶ τὸ ἀδύνατον, οὐ δείκνυται δὲ τὸ προτεθέν· ἐὰν γὰρ τὸ ἐναντίον ὑποτεθῇ, ταῦτ' ἔσται ἄπερ ἐπὶ τῶν πρότερον. ἀλλὰ πρὸς τὸ τινὶ ὑπάρχειν αὕτη ληπτέα ἢ ὑπόθεσις. εἰ γὰρ τὸ Α μηδενὶ τῷ Β, τὸ δὲ Γ τινὶ τῷ Β, τὸ Α οὐ παντὶ τῷ Γ. εἰ οὖν τοῦτο ψεῦδος, ἀληθὲς τὸ Α τινὶ τῷ Β ὑπάρχειν. ὅτι δ' οὐδενὶ τῷ Β ὑπάρχει τὸ Α, ὑποκείσθω τινὶ ὑπάρχειν, εἰλήφθω δὲ καὶ τὸ Γ παντὶ τῷ Β ὑπάρχον. οὐκοῦν ἀνάγκη τῷ Γ τινὶ τὸ Α ὑπάρχειν. ἀλλ' οὐδενὶ ὑπῆρχεν, ὥστε ψεῦδος τὸ τινὶ τῷ Β ὑπάρχειν τὸ Α. ἐὰν δ' ὑποτεθῇ παντὶ τῷ Β ὑπάρχειν τὸ Α, οὐ δείκνυται τὸ προτεθέν, ἀλλὰ πρὸς τὸ μὴ παντὶ ὑπάρχειν αὕτη ληπτέα ἢ ὑπόθεσις. εἰ γὰρ τὸ Α παντὶ τῷ Β καὶ τὸ Γ παντὶ τῷ Β, τὸ Α ὑπάρχει τινὶ τῷ Γ. τοῦτο δὲ οὐκ ἦν, ὥστε ψεῦδος τὸ παντὶ ὑπάρχειν. εἰ δ' οὕτως, ἀληθὲς τὸ μὴ παντί. ἐὰν δ' ὑποτεθῇ τινὶ ὑπάρχειν, ταῦτ' ἔσται ἃ καὶ ἐπὶ τῶν προειρημένων.

Φανερόν οὖν ὅτι ἐν ἅπασι τοῖς διὰ τοῦ ἀδυνάτου συλλογισμοῖς τὸ ἀντικείμενον ὑποθετέον. δηλὸν δὲ καὶ ὅτι ἐν τῷ μέσῳ σχήματι δείκνυταί πως τὸ καταφατικὸν καὶ ἐν τῷ ἐσχάτῳ τὸ καθόλου.

Κεφάλαιο 14

Διαφέρει δ' ἡ εἰς τὸ ἀδύνατον ἀπόδειξις τῆς δεικτικῆς τῷ τιθέναι ὃ βούλεται ἀναιρεῖν ἀπάγουσα εἰς ὁμολογούμενον ψεῦδος· ἡ δὲ δεικτική ἄρχεται ἐξ ὁμολογουμένων θέσεων. λαμβάνουσι μὲν οὖν ἀμφοτέραι δύο προτάσεις ὁμολογουμένας· ἀλλ' ἡ μὲν ἐξ ὧν ὁ συλλογισμός, ἡ δὲ μίαν μὲν τούτων, μίαν δὲ τὴν ἀντίφασιν τοῦ συμπεράσματος. καὶ ἔνθα μὲν οὐκ ἀνάγκη γνώριμον εἶναι τὸ συμπεράσμα, οὐδὲ προϋπολαμβάνειν ὡς ἔστιν ἢ οὐ· ἔνθα δὲ ἀνάγκη ὡς οὐκ ἔστιν. διαφέρει δ' οὐδὲν φάσιν ἢ ἀπόφασιν εἶναι τὸ συμπεράσμα, ἀλλ' ὁμοίως ἔχει περὶ ἀμφοῖν. Ἄπαν (38) δὲ τὸ δεικτικῶς περαινόμενον καὶ διὰ τοῦ ἀδυνάτου δειχθήσεται, καὶ τὸ διὰ τοῦ ἀδυνάτου δεικτικῶς διὰ τῶν αὐτῶν ὅρων [οὐκ ἐν τοῖς αὐτοῖς δὲ σχήμασιν]. ὅταν μὲν γὰρ ὁ [63a] συλλογισμὸς ἐν τῷ πρώτῳ σχήματι γένηται, τὸ ἀληθὲς ἔσται ἐν τῷ μέσῳ ἢ τῷ ἐσχάτῳ, τὸ μὲν στερητικὸν ἐν τῷ μέσῳ, τὸ δὲ κατηγορικὸν ἐν τῷ ἐσχάτῳ. ὅταν δ' ἐν τῷ μέσῳ ὁ συλλογισμὸς, τὸ ἀληθὲς ἐν τῷ πρώτῳ ἐπὶ πάντων τῶν προβλημάτων. ὅταν δ' ἐν τῷ ἐσχάτῳ ὁ συλλογισμὸς, τὸ ἀληθὲς ἐν τῷ πρώτῳ καὶ τῷ μέσῳ, τὰ μὲν καταφατικὰ ἐν τῷ πρώτῳ, τὰ δὲ στερητικὰ ἐν τῷ μέσῳ. ἔστω γὰρ δεδειγμένον τὸ Α μηδενὶ ἢ μὴ παντὶ τῷ Β διὰ τοῦ πρώτου σχήματος. οὐκοῦν ἡ μὲν ὑπόθεσις ἦν τινὶ τῷ Β ὑπάρχειν τὸ Α, τὸ δὲ Γ ἐλαμβάνετο τῷ μὲν Α παντὶ ὑπάρχειν, τῷ δὲ Β οὐδενί· οὕτω γὰρ ἐγένετο ὁ συλλογισμὸς καὶ τὸ ἀδύνατον. τοῦτο δὲ τὸ μέσον σχῆμα, εἰ τὸ Γ τῷ μὲν Α παντὶ τῷ δὲ Β μηδενὶ ὑπάρχει. καὶ φανερόν ἐκ τούτων ὅτι οὐδενὶ τῷ Β ὑπάρχει τὸ Α. ὁμοίως δὲ καὶ εἰ μὴ παντὶ δέδεικται ὑπάρχον. ἡ μὲν γὰρ ὑπόθεσις ἐστὶ παντὶ ὑπάρχειν, τὸ δὲ Γ ἐλαμβάνετο τῷ μὲν Α παντί, τῷ δὲ Β οὐ παντί. καὶ εἰ στερητικὸν λαμβάνοιτο τὸ Γ Α, ὡσαύτως· καὶ γὰρ οὕτω γίνεται τὸ μέσον σχῆμα. πάλιν δεδείχθω τινὶ ὑπάρχον τῷ Β τὸ Α. ἡ μὲν οὖν ὑπόθεσις μηδενὶ ὑπάρχειν, τὸ δὲ Β ἐλαμβάνετο παντὶ τῷ Γ ὑπάρχειν καὶ τὸ Α ἢ παντὶ ἢ τινὶ τῷ Γ· οὕτω γὰρ ἔσται τὸ ἀδύνατον. τοῦτο δὲ τὸ ἔσχατον σχῆμα, εἰ τὸ Α καὶ τὸ Β παντὶ τῷ Γ. καὶ φανερόν ἐκ τούτων ὅτι ἀνάγκη τὸ Α τινὶ τῷ Β ὑπάρχειν. ὁμοίως δὲ καὶ εἰ τινὶ τῷ Γ ληφθεὶ ὑπάρχον τὸ Β ἢ τὸ Α.

Πάλιν ἐν τῷ μέσῳ σχήματι δεδείχθω τὸ Α παντὶ τῷ Β ὑπάρχον. οὐκοῦν ἡ μὲν ὑπόθεσις ἦν μὴ παντὶ τῷ Β τὸ Α ὑπάρχειν, εἴληπται δὲ

τὸ Α παντὶ τῷ Γ καὶ τὸ Γ παντὶ τῷ Β· οὕτω γὰρ ἔσται τὸ ἀδύνατον. τοῦτο δὲ τὸ πρῶτον σχῆμα, τὸ Α παντὶ τῷ Γ καὶ τὸ Γ παντὶ τῷ Β. ὁμοίως δὲ καὶ εἰ τινὶ δέδεικται ὑπάρχον· ἡ μὲν γὰρ ὑπόθεσις ἦν μηδενὶ τῷ Β τὸ Α ὑπάρχειν, εἴληπται δὲ τὸ Α παντὶ τῷ Γ καὶ τὸ Γ τινὶ τῷ Β. εἰ δὲ στερητικὸς ὁ συλλογισμὸς, ἡ μὲν ὑπόθεσις τὸ Α τινὶ τῷ Β ὑπάρχειν, εἴληπται δὲ τὸ Α μηδενὶ τῷ Γ καὶ τὸ Γ παντὶ τῷ Β, ὥστε γίνεται τὸ πρῶτον σχῆμα. καὶ εἰ μὴ καθόλου ὁ συλλογισμὸς, ἀλλὰ τὸ Α τινὶ τῷ Β δέδεικται μὴ ὑπάρχειν, ὡσαύτως. ὑπόθεσις μὲν γὰρ παντὶ τῷ Β τὸ Α ὑπάρχειν, εἴληπται δὲ τὸ Α μηδενὶ τῷ Γ καὶ τὸ Γ τινὶ τῷ Β· οὕτω γὰρ τὸ πρῶτον σχῆμα.

Πάλιν ἐν τῷ τρίτῳ σχήματι δεδείχθω τὸ Α παντὶ τῷ Β ὑπάρχειν. οὐκοῦν ἡ μὲν ὑπόθεσις ἦν μὴ παντὶ τῷ Β τὸ [63b] Α ὑπάρχειν, εἴληπται δὲ τὸ Γ παντὶ τῷ Β καὶ τὸ Α παντὶ τῷ Γ· οὕτω γὰρ ἔσται τὸ ἀδύνατον. τοῦτο δὲ τὸ πρῶτον σχῆμα. ὡσαύτως δὲ καὶ εἰ ἐπὶ τινὸς ἡ ἀπόδειξις· ἡ μὲν γὰρ ὑπόθεσις μηδενὶ τῷ Β τὸ Α ὑπάρχειν, εἴληπται δὲ τὸ Γ τινὶ τῷ Β καὶ τὸ Α παντὶ τῷ Γ. εἰ δὲ στερητικὸς ὁ συλλογισμὸς, ὑπόθεσις μὲν τὸ Α τινὶ τῷ Β ὑπάρχειν, εἴληπται δὲ τὸ Γ τῷ μὲν Α μηδενί, τῷ δὲ Β παντί· τοῦτο δὲ τὸ μέσον σχῆμα. ὁμοίως δὲ καὶ εἰ μὴ καθόλου ἡ ἀπόδειξις. ὑπόθεσις μὲν γὰρ ἔσται παντὶ τῷ Β τὸ Α ὑπάρχειν, εἴληπται δὲ τὸ Γ τῷ μὲν Α μηδενί, τῷ δὲ Β τινί· τοῦτο δὲ τὸ μέσον σχῆμα. Φανερόν οὖν ὅτι διὰ τῶν αὐτῶν ὅρων καὶ δεικτικῶς ἔστι δεικνύναι τῶν προβλημάτων ἕκαστον [καὶ διὰ τοῦ ἀδυνάτου]. ὁμοίως δ' ἔσται καὶ δεικτικῶν ὄντων τῶν συλλογισμῶν εἰς ἀδύνατον ἀπάγειν ἐν τοῖς εἰλημμένοις ὅροις, ὅταν ἡ ἀντικειμένη πρότασις τῷ συμπεράσματι ληφθῇ. γίνονται γὰρ οἱ αὐτοὶ συλλογισμοὶ τοῖς διὰ τῆς ἀντιστροφῆς, ὥστ' εὐθὺς ἔχομεν καὶ τὰ σχήματα δι' ὧν ἕκαστον ἔσται. δηλὸν οὖν ὅτι πᾶν πρόβλημα δείκνυται κατ' ἀμφοτέρους τοὺς τρόπους, διὰ τε τοῦ ἀδυνάτου καὶ δεικτικῶς, καὶ οὐκ ἐνδέχεται χωρίζεσθαι τὸν ἕτερον.

Κεφάλαιο 15

Ἐν ποίῳ δὲ σχήματι ἔστιν ἐξ ἀντικειμένων προτάσεων συλλογίσασθαι καὶ ἐν ποίῳ οὐκ ἔστιν, ὧδ' ἔσται φανερόν. λέγω δ' ἀντικειμένας εἶναι προτάσεις κατὰ μὲν τὴν λέξιν τέτταρας, οἷον τὸ παντὶ τῷ οὐδενί, καὶ τὸ παντὶ τῷ οὐ παντί, καὶ τὸ τινὶ τῷ οὐδενί, καὶ τὸ τινὶ τῷ οὐ τινί, κατ' ἀλήθειαν δὲ τρεῖς· τὸ γὰρ τινὶ τῷ οὐ τινὶ κατὰ τὴν λέξιν ἀντίκειται μόνον. τούτων δ' ἐναντίας μὲν τὰς καθόλου, τὸ παντὶ τῷ μηδενὶ ὑπάρχειν, οἷον τὸ πᾶσαν ἐπιστήμην εἶναι σπουδαίαν τῷ μηδεμίαν εἶναι σπουδαίαν, τὰς δ' ἄλλας ἀντικειμένας.

Ἐν μὲν οὖν τῷ πρώτῳ σχήματι οὐκ ἔστιν ἐξ ἀντικειμένων προτάσεων συλλογισμός, οὔτε καταφατικὸς οὔτε ἀποφατικὸς, καταφατικὸς μὲν ὅτι ἀμφοτέρας δεῖ καταφατικὰς εἶναι τὰς προτάσεις, αἱ δ' ἀντικείμεναι φάσις καὶ ἀπόφασις, στερητικὸς δὲ ὅτι αἱ μὲν ἀντικείμεναι τὸ αὐτὸ τοῦ αὐτοῦ κατηγοροῦσι καὶ ἀπαρνοῦνται, τὸ δ' ἐν τῷ πρώτῳ μέσον οὐ λέγεται κατ' ἀμφοῖν, ἀλλ' ἐκείνου μὲν ἄλλο ἀπαρνεῖται, αὐτὸ δὲ ἄλλου κατηγορεῖται· αὐταὶ δ' οὐκ ἀντίκεινται.

Ἐν δὲ τῷ μέσῳ σχήματι καὶ ἐκ τῶν ἀντικειμένων καὶ ἐκ τῶν ἐναντίων ἐνδέχεται γίνεσθαι συλλογισμόν. ἔστω γὰρ [64a] ἀγαθὸν μὲν ἐφ' οὗ Α, ἐπιστήμη δὲ ἐφ' οὗ Β καὶ Γ. εἰ δὴ πᾶσαν ἐπιστήμην σπουδαίαν ἔλαβε καὶ μηδεμίαν, τὸ Α τῷ Β παντὶ ὑπάρχει καὶ τῷ Γ οὐδενί, ὥστε τὸ Β τῷ Γ οὐδενί· οὐδεμία ἄρα ἐπιστήμη ἐπιστήμη ἐστίν. ὁμοίως δὲ καὶ εἰ πᾶσαν λαβὼν σπουδαίαν τὴν ἱατρικὴν μὴ σπουδαίαν ἔλαβε· τῷ μὲν γὰρ Β παντὶ τὸ Α, τῷ δὲ Γ οὐδενί, ὥστε ἢ τις ἐπιστήμη οὐκ ἔσται ἐπιστήμη. καὶ εἰ τῷ μὲν Γ παντὶ τὸ Α, τῷ δὲ Β μηδενί, ἔστι δὲ τὸ μὲν Β ἐπιστήμη, τὸ δὲ Γ ἱατρικὴ, τὸ δὲ Α ὑπόληψις· οὐδεμίαν γὰρ ἐπιστήμην ὑπόληψιν λαβὼν εἴληφε τινὰ εἶναι ὑπόληψιν. διαφέρει δὲ τοῦ πάλαι τῷ ἐπὶ τῶν ὄρων ἀντιστρέφεσθαι· πρότερον μὲν γὰρ πρὸς τῷ Β, νῦν δὲ πρὸς τῷ Γ τὸ καταφατικόν. καὶ ἂν ἦ δὲ μὴ καθόλου ἢ ἑτέρα πρότασις, ὡσαύτως· αἰεὶ γὰρ τὸ μέσον ἐστὶν ὃ ἀπὸ θατέρου μὲν ἀποφατικῶς λέγεται, κατὰ θατέρου δὲ καταφατικῶς. ὥστ' ἐνδέχεται τὰντικείμενα περαίνεσθαι, πλὴν οὐκ αἰεὶ οὐδὲ πάντως, ἀλλ' ἐὰν οὕτως ἔχη τὰ ὑπὸ τὸ μέσον ὥστ' ἢ ταῦτά εἶναι ἢ ὅλον πρὸς μέρος. ἄλλως δ' ἀδύνατον· οὐ γὰρ ἔσονται οὐδαμῶς αἱ προτάσεις οὔτ' ἐναντίαι οὔτ' ἀντικείμεναι.

Ἐν δὲ τῷ τρίτῳ σχήματι καταφατικὸς μὲν συλλογισμὸς οὐδέποτε ἔσται ἐξ ἀντικειμένων προτάσεων διὰ τὴν εἰρημένην αἰτίαν καὶ ἐπὶ τοῦ πρώτου σχήματος, ἀποφατικὸς δ' ἔσται, καὶ καθόλου καὶ μὴ καθόλου τῶν ὄρων ὄντων. ἔστω γὰρ ἐπιστήμη ἐφ' οὗ τὸ Β καὶ Γ, ἰατρικὴ δ' ἐφ' οὗ Α. εἰ οὖν λάβοι πᾶσαν ἰατρικὴν ἐπιστήμην καὶ μηδεμίαν ἰατρικὴν ἐπιστήμην, τὸ Β παντὶ τῷ Α εἴληφε καὶ τὸ Γ οὐδενί, ὥστ' ἔσται τις ἐπιστήμη οὐκ ἐπιστήμη. ὁμοίως δὲ καὶ ἂν μὴ καθόλου ληφθῇ ἡ Β Α προτάσις· εἰ γὰρ ἐστὶ τις ἰατρικὴ ἐπιστήμη καὶ πάλιν μηδεμία ἰατρικὴ ἐπιστήμη, συμβαίνει ἐπιστήμην τινὰ μὴ εἶναι ἐπιστήμην. εἰσὶ δὲ καθόλου μὲν τῶν ὄρων λαμβανομένων ἐναντία αἱ προτάσεις, ἐὰν δ' ἐν μέρει ἄτερος, ἀντικείμεναι. Δεῖ δὲ κατανοεῖν ὅτι ἐνδέχεται μὲν οὕτω τὰ ἀντικείμενα λαμβάνειν ὥσπερ εἵπομεν πᾶσαν ἐπιστήμην σπουδαίαν εἶναι καὶ πάλιν μηδεμίαν, ἢ τινὰ μὴ σπουδαίαν· ὅπερ οὐκ εἴωθε λανθάνειν. ἔστι δὲ δι' ἄλλων ἐρωτημάτων συλλογίσασθαι θάτερον, ἢ ὥς ἐν τοῖς Τοπικοῖς ἐλέγχῃ λαβεῖν. ἐπεὶ δὲ τῶν καταφάσεων αἱ ἀντιθέσεις τρεῖς, ἐξαχῶς συμβαίνει τὰ ἀντικείμενα λαμβάνειν, ἢ παντὶ καὶ μηδενί, ἢ παντὶ καὶ μὴ παντί, ἢ τινὶ καὶ μηδενί, καὶ τοῦτο ἀντιστρέψαι ἐπὶ [64b] τῶν ὄρων, οἷον τὸ Α παντὶ τῷ Β, τῷ δὲ Γ μηδενί, ἢ τῷ Γ παντί, τῷ δὲ Β μηδενί, ἢ τῷ μὲν παντί, τῷ δὲ μὴ παντί, καὶ πάλιν τοῦτο ἀντιστρέψαι κατὰ τοὺς ὅρους. ὁμοίως δὲ καὶ ἐπὶ τοῦ τρίτου σχήματος. ὥστε φανερόν ὅσαχῶς τε καὶ ἐν ποίοις σχήμασιν ἐνδέχεται διὰ τῶν ἀντικειμένων προτάσεων γενέσθαι συλλογισμὸν.

Φανερόν δὲ καὶ ὅτι ἐκ ψευδῶν μὲν ἔστιν ἀληθὲς συλλογίσασθαι, καθάπερ εἴρηται πρότερον, ἐκ δὲ τῶν ἀντικειμένων οὐκ ἔστιν· αἰεὶ γὰρ ἐναντίος ὁ συλλογισμὸς γίνεται τῷ πράγματι, οἷον εἰ ἔστιν ἀγαθόν, μὴ εἶναι ἀγαθόν, ἢ εἰ ζῶν, μὴ ζῶν, διὰ τὸ ἐξ ἀντιφάσεως εἶναι τὸν συλλογισμὸν καὶ τοὺς ὑποκειμένους ὅρους ἢ τοὺς αὐτοὺς εἶναι ἢ τὸν μὲν ὅλον τὸν δὲ μέρος. δῆλον δὲ καὶ ὅτι ἐν τοῖς παραλογισμοῖς οὐδὲν κωλύει γίνεσθαι τῆς ὑποθέσεως ἀντίφασιν, οἷον εἰ ἔστι περιττόν, μὴ εἶναι περιττόν. ἐκ γὰρ τῶν ἀντικειμένων προτάσεων ἐναντίος ἦν ὁ συλλογισμὸς· ἐὰν οὖν λάβῃ τοιαύτας, ἔσται τῆς ὑποθέσεως ἀντίφασις, δεῖ δὲ κατανοεῖν ὅτι οὕτω μὲν οὐκ ἔστιν ἐναντία συμπεράνασθαι ἐξ ἐνὸς συλλογισμοῦ ὥστ' εἶναι τὸ συμπέρασμα τὸ μὴ ὂν ἀγαθὸν ἀγαθὸν ἢ ἄλλο τι τοιοῦτον, ἐὰν μὴ εὐθὺς ἢ πρότασις τοιαύτη ληφθῇ (οἷον πᾶν ζῶν λευκὸν εἶναι καὶ μὴ λευκόν, τὸν δ' ἄνθρωπον ζῶν), ἀλλ' ἢ προσλαβεῖν δεῖ τὴν

ἀντίφασιν (οἷον ὅτι πᾶσα ἐπιστήμη ὑπόληψις [καὶ οὐχ ὑπόληψις],
εἴτα λαβεῖν ὅτι ἡ ἰατρικὴ ἐπιστήμη μὲν ἐστίν, οὐδεμία δ' ὑπόληψις,
ὥσπερ οἱ ἔλεγχοι γίνονται), ἢ ἐκ δύο συλλογισμῶν. ὥστε δ' εἶναι
ἐναντία κατ' ἀλήθειαν τὰ εἰλημμένα, οὐκ ἔστιν ἄλλον τρόπον ἢ
τοῦτον, καθάπερ εἴρηται πρότερον.

Κεφάλαιο 16

Τὸ δ' ἐν ἀρχῇ αἰτεῖσθαι καὶ λαμβάνειν ἐστὶ μὲν, ὥς ἐν γένει λαβεῖν, ἐν τῷ μὴ ἀποδεικνύειν τὸ προκείμενον, τοῦτο δὲ συμβαίνει πολλαχῶς· καὶ γὰρ εἰ ὅλως μὴ συλλογίζεται, καὶ εἰ δι' ἀγνωστοτέρων ἢ ὁμοίως ἀγνώστων, καὶ εἰ διὰ τῶν ὑστέρων τὸ πρότερον· ἢ γὰρ ἀπόδειξις ἐκ πιστοτέρων τε καὶ προτέρων ἐστίν. τούτων μὲν οὖν οὐδέν ἐστι τὸ αἰτεῖσθαι τὸ ἐξ ἀρχῆς· ἀλλ' ἐπεὶ τὰ μὲν δι' αὐτῶν πέφυκε γνωρίζεσθαι τὰ δὲ δι' ἄλλων (αἱ μὲν γὰρ ἀρχαὶ δι' αὐτῶν, τὰ δ' ὑπὸ τὰς ἀρχὰς δι' ἄλλων), ὅταν μὴ τὸ δι' αὐτοῦ γνωστόν δι' αὐτοῦ τις ἐπιχειρῇ δεικνύειν, τότε αἰτεῖται τὸ ἐξ ἀρχῆς. τοῦτο δ' ἔστι μὲν οὕτω ποιεῖν ὥστ' εὐθὺς ἀξιῶσαι τὸ προκείμενον, ἐνδέχεται δὲ καὶ μεταβάοντας ἐπ' ἄλλα ἅττα τῶν πεφυκότων δι' ἐκείνου δεικνύσθαι διὰ τούτων [65a] ἀποδεικνύειν τὸ ἐξ ἀρχῆς, οἷον εἰ τὸ Α δεικνύοιτο διὰ τοῦ Β, τὸ δὲ Β διὰ τοῦ Γ, τὸ δὲ Γ πεφυκὸς εἶη δεικνύσθαι διὰ τοῦ Α· συμβαίνει γὰρ αὐτὸ δι' αὐτοῦ τὸ Α δεικνύειν τοὺς οὕτω συλλογιζομένους. ὅπερ ποιοῦσιν οἱ τὰς παραλλήλους οἰόμενοι γράφειν· λανθάνουσι γὰρ αὐτοὶ ἑαυτοὺς τοιαῦτα λαμβάνοντες ἃ οὐχ οἷόν τε ἀποδείξαι μὴ οὐσῶν τῶν παραλλήλων. ὥστε συμβαίνει τοῖς οὕτω συλλογιζομένοις ἕκαστον εἶναι λέγειν, εἰ ἔστιν ἕκαστον· οὕτω δ' ἅπαν ἔσται δι' αὐτοῦ γνωστόν· ὅπερ ἀδύνατον.

Εἰ οὖν τις ἀδήλου ὄντος ὅτι τὸ Α ὑπάρχει τῷ Γ, ὁμοίως δὲ καὶ ὅτι τῷ Β, αἰτοῖτο τῷ Β ὑπάρχειν τὸ Α, οὕτω δηλὸν εἰ τὸ ἐν ἀρχῇ αἰτεῖται, ἀλλ' ὅτι οὐκ ἀποδείκνυσιν, δηλὸν· οὐ γὰρ ἀρχὴ ἀποδείξεως τὸ ὁμοίως ἀδήλον. εἰ μέντοι τὸ Β πρὸς τὸ Γ οὕτως ἔχει ὥστε ταυτὸν εἶναι, ἢ δηλὸν ὅτι ἀντιστρέφουσιν, ἢ ἐνυπάρχει θάτερον θατέρῳ, τὸ ἐν ἀρχῇ αἰτεῖται. καὶ γὰρ ἂν ὅτι τῷ Β τὸ Α ὑπάρχει δι' ἐκείνων δεικνύοι, εἰ ἀντιστρέφοι (νῦν δὲ τοῦτο κωλύει, ἀλλ' οὐχ ὁ τρόπος). εἰ δὲ τοῦτο ποιοῖ, τὸ εἰρημένον ἂν ποιοῖ καὶ ἀντιστρέφοι διὰ τριῶν. ὡσαύτως δὲ καὶ εἰ τὸ Β τῷ Γ λαμβάνει ὑπάρχειν, ὁμοίως ἀδήλον ὂν καὶ εἰ τὸ Α, οὕτω τὸ ἐξ ἀρχῆς, ἀλλ' οὐκ ἀποδείκνυσιν. ἐὰν δὲ ταυτὸν ἦ τὸ Α καὶ Β ἢ τῷ ἀντιστρέφειν ἢ τῷ ἔπεσθαι τῷ Β τὸ Α, τὸ ἐξ ἀρχῆς αἰτεῖται διὰ τὴν αὐτὴν αἰτίαν· τὸ γὰρ ἐξ ἀρχῆς τί δύναται, εἴρηται ἡμῖν, ὅτι τὸ δι' αὐτοῦ δεικνύειν τὸ μὴ δι' αὐτοῦ δηλόν.

Εἰ οὖν ἐστὶ τὸ ἐν ἀρχῇ αἰτεῖσθαι τὸ δι' αὐτοῦ δεικνύειν τὸ μὴ δι'

αὐτοῦ δῆλον, τοῦτο δ' ἐστὶ τὸ μὴ δεικνύναι, ὅταν ὁμοίως ἀδήλων ὄντων τοῦ δεικνυμένου καὶ δι' οὗ δείκνυσιν ἢ τῷ ταῦτά τῷ αὐτῷ ἢ τῷ ταῦτόν τοις αὐτοῖς ὑπάρχειν, ἐν μὲν τῷ μέσῳ σχήματι καὶ τρίτῳ ἀμφοτέρως ἂν ἐνδέχοιτο τὸ ἐν ἀρχῇ αἰτεῖσθαι, ἐν δὲ κατηγορικῷ συλλογισμῷ ἔν τε τῷ τρίτῳ καὶ τῷ πρώτῳ. ὅταν δ' ἀποφατικῶς, ὅταν τὰ αὐτὰ ἀπὸ τοῦ αὐτοῦ· καὶ οὐχ ὁμοίως ἀμφοτέραι αἱ προτάσεις (ὡσαύτως δὲ καὶ ἐν τῷ μέσῳ), διὰ τὸ μὴ ἀντιστρέφειν τοὺς ὅρους κατὰ τοὺς ἀποφατικούς συλλογισμούς. ἔστι δὲ τὸ ἐν ἀρχῇ αἰτεῖσθαι ἐν μὲν ταῖς ἀποδείξεσι τὰ κατ' ἀλήθειαν οὕτως ἔχοντα, ἐν δὲ τοῖς διαλεκτικοῖς τὰ κατὰ δόξαν.

Κεφάλαιο 17

Τὸ δὲ μὴ παρὰ τοῦτο συμβαίνειν τὸ ψεῦδος, ὃ πολλάκις ἐν τοῖς λόγοις εἰώθαμεν λέγειν, πρῶτον μὲν ἔστιν ἐν τοῖς εἰς τὸ ἀδύνατον συλλογισμοῖς, ὅταν πρὸς ἀντίφασιν ἢ [65b] τούτου ὃ ἐδείκνυτο τῇ εἰς τὸ ἀδύνατον. οὔτε γὰρ μὴ ἀντιφίησας ἐρεῖ τὸ οὐ παρὰ τοῦτο, ἀλλ' ὅτι ψευδός τι ἐτέθη τῶν πρότερον, οὔτ' ἐν τῇ δεικνυούσῃ· οὐ γὰρ τίθησι ὁ ἀντίφησιν. ἔτι δ' ὅταν ἀναιρεθῇ τι δεικτικῶς διὰ τῶν Α Β Γ, οὐκ ἔστιν εἰπεῖν ὡς οὐ παρὰ τὸ κείμενον γεγένηται ὁ συλλογισμός. τὸ γὰρ μὴ παρὰ τοῦτο γίνεσθαι τότε λέγομεν, ὅταν ἀναιρεθέντος τούτου μηδὲν ἦττον περαίνεται ὁ συλλογισμός, ὅπερ οὐκ ἔστιν ἐν τοῖς δεικτικοῖς· ἀναιρεθείσης γὰρ τῆς θέσεως οὐδ' ὁ πρὸς ταύτην ἔσται συλλογισμός. φανερόν οὖν ὅτι ἐν τοῖς εἰς τὸ ἀδύνατον λέγεται τὸ μὴ παρὰ τοῦτο, καὶ ὅταν οὕτως ἔχη πρὸς τὸ ἀδύνατον ἢ ἐξ ἀρχῆς ὑπόθεσις ὥστε καὶ οὔσης καὶ μὴ οὔσης ταύτης οὐδὲν ἦττον συμβαίνειν τὸ ἀδύνατον.

Ὁ μὲν οὖν φανερώτατος τρόπος ἐστὶ τοῦ μὴ παρὰ τὴν θέσιν εἶναι τὸ ψεῦδος, ὅταν ἀπὸ τῆς ὑποθέσεως ἀσύναπτος ἢ ἀπὸ τῶν μέσων πρὸς τὸ ἀδύνατον ὁ συλλογισμός, ὅπερ εἴρηται καὶ ἐν τοῖς Τοπικοῖς. τὸ γὰρ τὸ ἀναίτιον ὡς αἷτιον τιθέναι τοῦτό ἐστιν, οἷον εἰ βουλόμενος δεῖξαι ὅτι ἀσύμμετρος ἢ διάμετρος, ἐπιχειροῖ τὸν Ζήνωνος λόγον, ὡς οὐκ ἔστι κινεῖσθαι, καὶ εἰς τοῦτο ἀπάγοι τὸ ἀδύνατον· οὐδαμῶς γὰρ οὐδαμῇ συνεχές ἐστὶ τὸ ψεῦδος τῇ φάσει τῇ ἐξ ἀρχῆς. ἄλλος δὲ τρόπος, εἰ συνεχές μὲν εἴη τὸ ἀδύνατον τῇ ὑποθέσει, μὴ μέντοι δι' ἐκείνην συμβαίνειν. τοῦτο γὰρ ἐγχωρεῖ γενέσθαι καὶ ἐπὶ τὸ ἄνω καὶ ἐπὶ τὸ κάτω λαμβάνοντι τὸ συνεχές, οἷον εἰ τὸ Α τῷ Β κεῖται ὑπάρχον, τὸ δὲ Β τῷ Γ, τὸ δὲ Γ τῷ Δ, τοῦτο δ' εἴη ψεῦδος, τὸ τὸ Β τῷ Δ ὑπάρχειν. εἰ γὰρ ἀφαιρεθέντος τοῦ Α μηδὲν ἦττον ὑπάρχοι τὸ Β τῷ Γ καὶ τὸ Γ τῷ Δ, οὐκ ἂν εἴη τὸ ψεῦδος διὰ τὴν ἐξ ἀρχῆς ὑπόθεσιν. ἢ πάλιν εἴ τις ἐπὶ τὸ ἄνω λαμβάνοι τὸ συνεχές, οἷον εἰ τὸ μὲν Α τῷ Β, τῷ δὲ Α τὸ Ε καὶ τῷ Ε τὸ Ζ, ψεῦδος δ' εἴη τὸ ὑπάρχειν τῷ (30) Α τὸ Ζ· καὶ γὰρ οὕτως οὐδὲν ἂν ἦττον εἴη τὸ ἀδύνατον ἀναιρεθείσης τῆς ἐξ ἀρχῆς ὑποθέσεως. ἀλλὰ δεῖ πρὸς τοὺς ἐξ ἀρχῆς ὅρους συνάπτειν τὸ ἀδύνατον· οὕτω γὰρ ἔσται διὰ τὴν ὑπόθεσιν, οἷον ἐπὶ μὲν τὸ κάτω λαμβάνοντι τὸ συνεχές πρὸς τὸν κατηγορούμενον τῶν ὁρῶν (εἰ γὰρ ἀδύνατον τὸ Α τῷ Δ ὑπάρχειν, ἀφαιρεθέντος τοῦ Α οὐκέτι ἔσται τὸ

ψεῦδος)· ἐπὶ δὲ τὸ ἄνω, καθ' οὗ κατηγορεῖται (εἰ γὰρ τῷ B μὴ ἐγγωρεῖ τὸ Z ὑπάρχειν, ἀφαιρεθέντος τοῦ B οὐκέτι ἔσται τὸ ἀδύνατον). ὁμοίως δὲ καὶ στερητικῶν τῶν συλλογισμῶν ὄντων. [66a]

Φανερόν οὖν ὅτι τοῦ ἀδυνάτου μὴ πρὸς τοὺς ἐξ ἀρχῆς ὄρους ὄντος οὐ παρὰ τὴν θέσιν συμβαίνει τὸ ψεῦδος. ἢ οὐδ' οὕτως αἰεὶ διὰ τὴν ὑπόθεσιν ἔσται τὸ ψεῦδος; καὶ γὰρ εἰ μὴ τῷ B ἀλλὰ τῷ K ἐτέθη τὸ A ὑπάρχειν, τὸ δὲ K τῷ Γ καὶ τοῦτο τῷ Δ, καὶ οὕτω μένει τὸ ἀδύνατον (ὁμοίως δὲ καὶ ἐπὶ τὸ ἄνω λαμβάνοντι τοὺς ὄρους), ὥστ' ἐπεὶ καὶ ὄντος καὶ μὴ ὄντος τούτου συμβαίνει τὸ ἀδύνατον, οὐκ ἂν εἷη παρὰ τὴν θέσιν. ἢ τὸ μὴ ὄντος τούτου μηδὲν ἦττον γίνεσθαι τὸ ψεῦδος οὐχ οὕτω ληπτέον ὥστ' ἄλλου τιθεμένου συμβαίνειν τὸ ἀδύνατον, ἀλλ' ὅταν ἀφαιρεθέντος τούτου διὰ τῶν λοιπῶν προτάσεων ταὐτὸ περαίνεται ἀδύνατον, ἐπεὶ ταὐτό γε ψεῦδος συμβαίνειν διὰ πλειόνων ὑποθέσεων οὐδὲν ἴσως ἄτοπον, οἷον τὰς παραλλήλους συμπίπτειν καὶ εἰ μείζων ἐστὶν ἢ ἐντὸς τῆς ἐκτὸς καὶ εἰ τὸ τρίγωνον ἔχει πλείους ὀρθὰς δυεῖν;

Κεφάλαιο 18

Ὁ δὲ ψευδὴς λόγος γίνεται παρὰ τὸ πρῶτον ψεῦδος. ἢ γὰρ ἐκ τῶν δύο προτάσεων ἢ ἐκ πλειόνων πᾶς ἐστὶ συλλογισμός. εἰ μὲν οὖν ἐκ τῶν δύο, τούτων ἀνάγκη τὴν ἑτέραν ἢ καὶ ἀμφοτέρας εἶναι ψευδεῖς· ἐξ ἀληθῶν γὰρ οὐκ ἦν ψευδὴς συλλογισμός. εἰ δ' ἐκ πλειόνων, οἷον τὸ μὲν Γ διὰ τῶν (20) Α Β, ταῦτα δὲ διὰ τῶν Δ Ε Ζ Η, τούτων τι ἔσται τῶν ἐπάνω ψεῦδος, καὶ παρὰ τοῦτο ὁ λόγος· τὸ γὰρ Α καὶ Β δι' ἐκείνων περαίνονται. ὥστε παρ' ἐκείνων τι συμβαίνει τὸ συμπέρασμα καὶ τὸ ψεῦδος.

Κεφάλαιο 19

Πρὸς δὲ τὸ μὴ κατασυλλογίζεσθαι παρατηρητέον, ὅταν ἄνευ τῶν συμπερασμάτων ἐρωτᾷ τὸν λόγον, ὅπως μὴ δοθῇ δις ταὐτὸν ἐν ταῖς προτάσεσιν, ἐπειδήπερ ἴσμεν ὅτι ἄνευ μέσου συλλογισμὸς οὐ γίνεται, μέσον δ' ἐστὶ τὸ πλεονάκις λεγόμενον. ὥς δὲ δεῖ πρὸς ἕκαστον συμπέρασμα τηρεῖν τὸ μέσον, φανερόν ἐκ τοῦ εἰδέναι ποῖον ἐν ἐκάστῳ σχήματι δείκνυται. τοῦτο δ' ἡμᾶς οὐ λήσεται διὰ τὸ εἰδέναι πῶς ὑπέχομεν τὸν λόγον.

Χρὴ δ' ὅπερ φυλάττεσθαι παραγγέλλομεν ἀποκρινομένους, αὐτοὺς ἐπιχειροῦντας πειρᾶσθαι λανθάνειν. τοῦτο δ' ἔσται πρῶτον, ἐὰν τὰ συμπεράσματα μὴ προσυλλογίζωνται ἀλλ' εἰλημμένων τῶν ἀναγκαίων ἄδηλα ἦ, ἔτι δὲ ἂν μὴ τὰ σύνεγγυς ἐρωτᾷ, ἀλλ' ὅτι μάλιστα ἄμεσα. οἷον ἔστω δέον συμπεραίνεσθαι τὸ Α κατὰ τοῦ Ζ· μέσα Β Γ Δ Ε. δεῖ οὖν ἐρωτᾶν εἰ τὸ Α τῷ Β, καὶ πάλιν μὴ εἰ τὸ Β τῷ Γ, ἀλλ' εἰ τὸ Δ τῷ Ε, κάπεται εἰ τὸ Β τῷ Γ, καὶ οὕτω [66b] τὰ λοιπά. καὶ δι' ἐνὸς μέσου γίνηται ὁ συλλογισμὸς, ἀπὸ τοῦ μέσου ἄρχεσθαι· μάλιστα γὰρ ἂν οὕτω λανθάνοι τὸν ἀποκρινόμενον.

Κεφάλαιο 20

Ἐπεὶ δ' ἔχομεν πότε καὶ πῶς ἐχόντων τῶν ὅρων γίνεται συλλογισμός, φανερόν καὶ πότ' ἔσται καὶ πότ' οὐκ ἔσται ἔλεγχος. πάντων μὲν γὰρ συγχωρουμένων, ἢ ἐναλλάξ τιθεμένων τῶν ἀποκρίσεων, οἷον τῆς μὲν ἀποφατικῆς τῆς δὲ καταφατικῆς, ἐγχωρεῖ γίνεσθαι ἔλεγχον. ἦν γὰρ συλλογισμὸς καὶ οὕτω καὶ ἐκείνως ἐχόντων τῶν ὅρων, ὥστ' εἰ τὸ κείμενον ἐναντίον τῷ συμπεράσματι, ἀνάγκη γίνεσθαι ἔλεγχον· ὁ γὰρ ἔλεγχος ἀντιφάσεως συλλογισμός. εἰ δὲ μηδὲν συγχωροῖτο, ἀδύνατον γενέσθαι ἔλεγχον· οὐ γὰρ ἦν συλλογισμὸς πάντων τῶν ὅρων στερητικῶν ὄντων, ὥστ' οὐδ' ἔλεγχος· εἰ μὲν γὰρ ἔλεγχος, ἀνάγκη συλλογισμὸν εἶναι, συλλογισμοῦ δ' ὄντος οὐκ ἀνάγκη ἔλεγχον. ὡσαύτως δὲ καὶ εἰ μηδὲν τεθείη κατὰ τὴν ἀπόκρισιν ἐν ὅλῳ· ὁ γὰρ αὐτὸς ἔσται διορισμὸς ἐλέγχου καὶ συλλογισμοῦ.

Κεφάλαιο 21

Συμβαίνει δ' ἐνίοτε, καθάπερ ἐν τῇ θέσει τῶν ὄρων ἀπατώμεθα, καὶ κατὰ τὴν ὑπόληψιν γίνεσθαι τὴν ἀπάτην, οἷον εἰ ἐνδέχεται τὸ αὐτὸ πλείοσι πρώτοις ὑπάρχειν, καὶ τὸ μὲν λεληθέναι τινὰ καὶ οἶεσθαι μηδενὶ ὑπάρχειν, τὸ δὲ εἰδέναι. ἔστω τὸ Α τῷ Β καὶ τῷ Γ καθ' αὐτὰ ὑπάρχον, καὶ ταῦτα παντὶ τῷ Δ ὡσαύτως. εἰ δὴ τῷ μὲν Β τὸ Α παντὶ οἶεται ὑπάρχειν, καὶ τοῦτο τῷ Δ, τῷ δὲ Γ τὸ Α μηδενί, καὶ τοῦτο τῷ Δ παντί, τοῦ αὐτοῦ κατὰ ταυτὸν ἔξει ἐπιστήμην καὶ ἄγνοιαν. πάλιν εἴ τις ἀπατηθεῖη περὶ τὰ ἐκ τῆς αὐτῆς συστοιχίας, οἷον εἰ τὸ Α ὑπάρχει τῷ Β, τοῦτο δὲ τῷ Γ καὶ τὸ Γ τῷ Δ, ὑπολαμβάνοι δὲ τὸ Α παντὶ τῷ Β ὑπάρχειν καὶ πάλιν μηδενὶ τῷ Γ· ἅμα γὰρ εἴσεται τε καὶ οὐχ ὑπολήψεται ὑπάρχειν. ἅρ' οὖν οὐδὲν ἄλλο ἀξιοῖ ἐκ τούτων ἢ ὃ ἐπίσταται, τοῦτο μὴ ὑπολαμβάνειν; ἐπίσταται γὰρ πως ὅτι τὸ Α τῷ Γ ὑπάρχει διὰ τοῦ Β, ὡς τῇ καθόλου τὸ κατὰ μέρος, ὥστε ὃ πως ἐπίσταται, τοῦτο ὅλως ἀξιοῖ μὴ ὑπολαμβάνειν· ὅπερ ἀδύνατον.

Ἐπὶ δὲ τοῦ πρότερον λεχθέντος, εἰ μὴ ἐκ τῆς αὐτῆς συστοιχίας τὸ μέσον, καθ' ἑκάτερον μὲν τῶν μέσων ἀμφοτέρας τὰς προτάσεις οὐκ ἐγγωρεῖ ὑπολαμβάνειν, οἷον τὸ Α τῷ μὲν Β παντί, τῷ δὲ Γ μηδενί, ταῦτα δ' ἀμφοτέρα παντὶ τῷ Δ. συμβαίνει γὰρ ἢ ἀπλῶς ἢ ἐπὶ τι ἐναντίαν λαμβάνεσθαι τὴν πρώτην πρότασιν. εἰ γὰρ ᾧ τὸ Β ὑπάρχει, παντὶ τὸ Α ὑπολαμβάνει [67a] ὑπάρχειν, τὸ δὲ Β τῷ Δ οἶδε, καὶ ὅτι τῷ Δ τὸ Α οἶδεν. ὥστ' εἰ πάλιν, ᾧ τὸ Γ, μηδενὶ οἶεται τὸ Α ὑπάρχειν, ᾧ τὸ Β τινὶ ὑπάρχει, τούτῳ οὐκ οἶεται τὸ Α ὑπάρχειν. τὸ δὲ παντὶ οἰόμενον ᾧ τὸ Β, πάλιν τινὶ μὴ οἶεσθαι ᾧ τὸ Β, ἢ ἀπλῶς ἢ ἐπὶ τι ἐναντίον ἐστίν.

Οὕτω μὲν οὖν οὐκ ἐνδέχεται ὑπολαβεῖν, καθ' ἑκάτερον δὲ τὴν μίαν ἢ κατὰ θάτερον ἀμφοτέρας οὐδὲν κωλύει, οἷον τὸ Α παντὶ τῷ Β καὶ τὸ Β τῷ Δ, καὶ πάλιν τὸ Α μηδενὶ τῷ Γ. ὁμοία γὰρ ἡ τοιαύτη ἀπάτη καὶ ὡς ἀπατώμεθα περὶ τὰς ἐν μέρει, οἷον εἰ ᾧ τὸ Β, παντὶ τὸ Α ὑπάρχει, τὸ δὲ Β τῷ Γ παντί, τὸ Α παντὶ τῷ Γ ὑπάρξει. εἰ οὖν τις οἶδεν ὅτι τὸ Α, ᾧ τὸ Β, ὑπάρχει παντί, οἶδε καὶ ὅτι τῷ Γ. ἀλλ' οὐδὲν κωλύει ἀγνοεῖν τὸ Γ ὅτι ἔστιν, οἷον εἰ τὸ μὲν Α δύο ὀρθαί, τὸ δ' ἐφ' ᾧ Β τρίγωνον, τὸ δ' ἐφ' ᾧ Γ αἰσθητὸν τρίγωνον. ὑπολάβοι γὰρ ἂν τις μὴ εἶναι τὸ Γ, εἰδὼς ὅτι πᾶν τρίγωνον ἔχει δύο ὀρθάς, ὥσθ' ἅμα

εἴσεται καὶ ἀγνοήσει ταυτόν. τὸ γὰρ εἰδέναι πᾶν τρίγωνον ὅτι δύο ὀρθαῖς οὐχ ἀπλοῦν ἐστίν, ἀλλὰ τὸ μὲν τῷ τὴν καθόλου ἔχειν ἐπιστήμην, τὸ δὲ τὴν καθ' ἕκαστον. οὕτω μὲν οὖν ὡς τῇ καθόλου οἶδε τὸ Γ ὅτι δύο ὀρθαί, ὡς δὲ τῇ καθ' ἕκαστον οὐκ οἶδεν, ὥστ' οὐχ ἕξει τὰς ἐναντίας. ὁμοίως δὲ καὶ ὁ ἐν τῷ Μένωνι λόγος, ὅτι ἡ μάθησις ἀνάμνησις. οὐδαμοῦ γὰρ συμβαίνει προεπίστασθαι τὸ καθ' ἕκαστον, ἀλλ' ἅμα τῇ ἐπαγωγῇ λαμβάνειν τὴν τῶν κατὰ μέρος ἐπιστήμην ὥσπερ ἀναγνωρίζοντας. ἔνια γὰρ εὐθὺς ἴσμεν, οἷον ὅτι δύο ὀρθαῖς, ἐὰν ἴδωμεν ὅτι τρίγωνον. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων.

Τῇ μὲν οὖν καθόλου θεωροῦμεν τὰ ἐν μέρει, τῇ δ' οἰκεία οὐκ ἴσμεν, ὥστ' ἐνδέχεται καὶ ἀπατᾶσθαι περὶ αὐτά, πλὴν οὐκ ἐναντίως, ἀλλ' ἔχειν μὲν τὴν καθόλου, ἀπατᾶσθαι δὲ τὴν κατὰ μέρος. ὁμοίως οὖν καὶ ἐπὶ τῶν προειρημένων· οὐ γὰρ ἐναντία ἢ κατὰ τὸ μέσον ἀπάτη τῇ κατὰ τὸν συλλογισμόν ἐπιστήμη, οὐδ' ἡ καθ' ἑκάτερον τῶν μέσων ὑπόληψις. οὐδὲν δὲ κωλύει εἰδότα καὶ ὅτι τὸ Α ὄλφ τῷ Β ὑπάρχει καὶ πάλιν τοῦτο τῷ Γ, οἰηθῆναι μὴ ὑπάρχειν τὸ Α τῷ Γ, οἷον ὅτι πᾶσα ἡμίονος ἄτοκος καὶ αὕτη ἡμίονος οἶεσθαι κύειν ταύτην· οὐ γὰρ ἐπίσταται ὅτι τὸ Α τῷ Γ, μὴ συνθεωρῶν τὸ καθ' ἑκάτερον. ὥστε δῆλον ὅτι καὶ εἰ τὸ μὲν οἶδε τὸ δὲ μὴ οἶδεν, ἀπατηθήσεται· ὅπερ ἔχουσιν αἱ καθόλου πρὸς τὰς κατὰ μέρος ἐπιστήμας. οὐδὲν γὰρ τῶν [67b] αἰσθητῶν ἔξω τῆς αἰσθήσεως γενόμενον ἴσμεν, οὐδ' ἂν ἠσθημένοι τυγχάνωμεν, εἰ μὴ ὡς τῷ καθόλου καὶ τῷ ἔχειν τὴν οἰκείαν ἐπιστήμην, ἀλλ' οὐχ ὡς τῷ ἐνεργεῖν. τὸ γὰρ ἐπίστασθαι λέγεται τριχῶς, ἢ ὡς τῇ καθόλου ἢ ὡς τῇ οἰκεία ἢ ὡς τῷ ἐνεργεῖν, ὥστε καὶ τὸ ἠπατῆσθαι τοσαυταχῶς. οὐδὲν οὖν κωλύει καὶ εἰδέναι καὶ ἠπατῆσθαι περὶ ταυτό, πλὴν οὐκ ἐναντίως. ὅπερ συμβαίνει καὶ τῷ καθ' ἑκατέραν εἰδοῖσι τὴν πρότασιν καὶ μὴ ἐπεσκεμμένῳ πρότερον. ὑπολαμβάνων γὰρ κύειν τὴν ἡμίονον οὐκ ἔχει τὴν κατὰ τὸ ἐνεργεῖν ἐπιστήμην, οὐδ' αὖ διὰ τὴν ὑπόληψιν ἐναντίαν ἀπάτην τῇ ἐπιστήμῃ· συλλογισμὸς γὰρ ἢ ἐναντία ἀπάτη τῇ καθόλου.

Ὁ δ' ὑπολαμβάνων τὸ ἀγαθὸ εἶναι κακὸ εἶναι, τὸ αὐτὸ ὑπολήπεται ἀγαθὸ εἶναι καὶ κακὸ. ἔστω γὰρ τὸ μὲν ἀγαθὸ εἶναι ἐφ' οὗ Α, τὸ δὲ κακὸ εἶναι ἐφ' οὗ Β, πάλιν δὲ τὸ ἀγαθὸ εἶναι ἐφ' οὗ Γ. ἐπεὶ οὖν ταυτόν ὑπολαμβάνει τὸ Β καὶ τὸ Γ, καὶ εἶναι τὸ Γ τὸ Β ὑπολήπεται, καὶ πάλιν τὸ Β τὸ Α εἶναι ὡσαύτως, ὥστε καὶ τὸ Γ τὸ Α. ὥσπερ γὰρ εἰ ἦν ἀληθές, καθ' οὗ τὸ Γ, τὸ Β, καὶ καθ' οὗ τὸ Β, τὸ Α, καὶ κατὰ τοῦ Γ τὸ Α ἀληθές ἦν, οὕτω καὶ ἐπὶ τοῦ ὑπολαμβάνειν.

ὁμοίως δὲ καὶ ἐπὶ τοῦ εἶναι· ταῦτοῦ γὰρ ὄντος τοῦ Γ καὶ Β, καὶ πάλιν τοῦ Β καὶ Α, καὶ τὸ Γ τῷ Α ταὐτὸν ἦν· ὥστε καὶ ἐπὶ τοῦ δοξάζειν ὁμοίως. ἄρ' οὖν τοῦτο μὲν ἀναγκαῖον, εἴ τις δώσει τὸ πρῶτον; ἀλλ' ἴσως ἐκεῖνο ψεῦδος, τὸ ὑπολαβεῖν τινὰ κακῶ εἶναι τὸ ἀγαθῶ εἶναι, εἰ μὴ κατὰ συμβεβηκός· πολλαχῶς γὰρ ἐγχωρεῖ τοῦθ' ὑπολαμβάνειν. ἐπισκεπτέον δὲ τοῦτο βέλτιον.

Κεφάλαιο 22

Όταν δ' αντιστρέφῃ τὰ ἄκρα, ἀνάγκη καὶ τὸ μέσον αντιστρέφειν πρὸς ἅμωφ. εἰ γὰρ τὸ Α κατὰ τοῦ Γ διὰ τοῦ Β ὑπάρχει, εἰ αντιστρέφει καὶ ὑπάρχει, ᾧ τὸ Α, παντὶ τὸ Γ, καὶ τὸ Β τῷ Α αντιστρέφει καὶ ὑπάρξει, ᾧ τὸ Α, παντὶ τὸ Β διὰ μέσου τοῦ Γ· καὶ τὸ Γ τῷ Β αντιστρέφει διὰ μέσου τοῦ Α. καὶ ἐπὶ τοῦ μὴ ὑπάρχειν ὡσαύτως, οἷον εἰ τὸ Β τῷ Γ ὑπάρχει, τῷ δὲ Β τὸ Α οὐχ ὑπάρχει, οὐδὲ τὸ Α τῷ Γ οὐχ ὑπάρξει. εἰ δὲ τὸ Β τῷ Α αντιστρέφει, καὶ τὸ Γ τῷ Α αντιστρέφει. ἔστω γὰρ τὸ Β μὴ ὑπάρχον τῷ Α· οὐδ' ἄρα τὸ Γ· παντὶ γὰρ τῷ Γ τὸ Β ὑπῆρχεν. καὶ εἰ τῷ Β τὸ Γ αντιστρέφει, καὶ τὸ Α αντιστρέφει· καθ' οὗ γὰρ ἅπαντος τὸ Β, καὶ τὸ Γ. καὶ εἰ τὸ Γ <καὶ> πρὸς τὸ Α αντιστρέφει, καὶ τὸ Β αντιστρέφει. ᾧ γὰρ τὸ Β, [68a] τὸ Γ· ᾧ δὲ τὸ Α, τὸ Γ οὐχ ὑπάρχει. καὶ μόνον τοῦτο ἀπὸ τοῦ συμπεράσματος ἄρχεται, τὰ δ' ἄλλα οὐχ ὁμοίως καὶ ἐπὶ τοῦ κατηγορικοῦ συλλογισμοῦ. Πάλιν εἰ τὸ Α καὶ τὸ Β αντιστρέφει, καὶ τὸ Γ καὶ τὸ Δ ὡσαύτως, ἅπαντι δ' ἀνάγκη τὸ Α ἢ τὸ Γ ὑπάρχειν, καὶ τὸ Β καὶ Δ οὕτως ἔξει ὥστε παντὶ θάτερον ὑπάρχειν. ἐπεὶ γὰρ ᾧ τὸ Α, τὸ Β, καὶ ᾧ τὸ Γ, τὸ Δ, παντὶ δὲ τὸ Α ἢ τὸ Γ καὶ οὐχ ἅμα, φανερόν ὅτι καὶ τὸ Β ἢ τὸ Δ παντὶ καὶ οὐχ ἅμα [οἷον ... γεγονέναι]· δύο γὰρ συλλογισμοὶ σύγκεινται. πάλιν εἰ παντὶ (11) μὲν τὸ Α ἢ τὸ Β καὶ τὸ Γ ἢ τὸ Δ, ἅμα δὲ μὴ ὑπάρχει, εἰ αντιστρέφει τὸ Α καὶ τὸ Γ, καὶ τὸ Β καὶ τὸ Δ αντιστρέφει. εἰ γὰρ τινὶ μὴ ὑπάρχει τὸ Β, ᾧ τὸ Δ, δηλὸν ὅτι τὸ Α ὑπάρχει. εἰ δὲ τὸ Α, καὶ τὸ Γ· αντιστρέφει γάρ. ὥστε ἅμα τὸ Γ καὶ τὸ Δ. τοῦτο δ' ἀδύνατον. <οἷον εἰ τὸ ἀγέννητον ἀφθαρτον καὶ τὸ ἀφθαρτον ἀγέννητον, ἀνάγκη τὸ γενόμενον φθαρτὸν καὶ τὸ φθαρτὸν γεγονέναι>.

Όταν δὲ τὸ Α ὅλῳ τῷ Β καὶ τῷ Γ ὑπάρχη καὶ μηδενὸς ἄλλου κατηγορῇται, ὑπάρχη δὲ καὶ τὸ Β παντὶ τῷ Γ, ἀνάγκη τὸ Α καὶ Β αντιστρέφειν· ἐπεὶ γὰρ κατὰ μόνων τῶν Β Γ λέγεται τὸ Α, κατηγορεῖται δὲ τὸ Β καὶ αὐτὸ αὐτοῦ καὶ τοῦ Γ, φανερόν ὅτι καθ' ὧν τὸ Α, καὶ τὸ Β λεχθήσεται πάντων πλὴν αὐτοῦ τοῦ Α. πάλιν ὅταν τὸ Α καὶ τὸ Β ὅλῳ τῷ Γ ὑπάρχη, αντιστρέφῃ δὲ τὸ Γ τῷ Β, ἀνάγκη τὸ Α παντὶ τῷ Β ὑπάρχειν· ἐπεὶ γὰρ παντὶ τῷ Γ τὸ Α, τὸ δὲ Γ τῷ Β διὰ τὸ αντιστρέφειν, καὶ τὸ Α παντὶ τῷ Β.

Όταν δὲ δυοῖν ὄντοι τὸ Α τοῦ Β αἰρετώτερον ἢ, ὄντων

ἀντικειμένων, καὶ τὸ Δ τοῦ Γ ὡσαύτως, εἰ αἰρετώτερα τὰ Α Γ τῶν Β Δ, τὸ Α τοῦ Δ αἰρετώτερον. ὁμοίως γὰρ διωκτὸν τὸ Α καὶ φευκτὸν τὸ Β (ἀντικείμενα γάρ), καὶ τὸ Γ τῷ Δ (καὶ γὰρ ταῦτα ἀντίκειται). εἰ οὖν τὸ Α τῷ Δ ὁμοίως αἰρετόν, καὶ τὸ Β τῷ Γ φευκτόν· ἐκάτερον γὰρ ἐκατέρῳ ὁμοίως, φευκτὸν διωκτῷ. ὥστε καὶ τὰ ἄμφω τὰ Α Γ τοῖς Β Δ. ἐπεὶ δὲ μᾶλλον, οὐχ οἷόν τε ὁμοίως· καὶ γὰρ ἂν τὰ Β Δ ὁμοίως ἦσαν. εἰ δὲ τὸ Δ τοῦ Α αἰρετώτερον, καὶ τὸ Β τοῦ Γ ἥττον φευκτόν· τὸ γὰρ ἔλαττον τῷ ἐλάττονι ἀντίκειται. αἰρετώτερον δὲ τὸ μείζον ἀγαθὸν καὶ ἔλαττον κακὸν ἢ τὸ ἔλαττον ἀγαθὸν καὶ μείζον κακόν· καὶ τὸ ἅπαν ἄρα, τὸ Β Δ, αἰρετώτερον τοῦ Α Γ· νῦν δ' οὐκ ἔστιν. τὸ Α ἄρα αἰρετώτερον τοῦ Δ, καὶ τὸ Γ ἄρα τοῦ Β ἥττον φευκτόν. εἰ δὴ ἔλοιτο πᾶς ὁ ἐρῶν κατὰ τὸν ἔρωτα τὸ Α τὸ οὕτως ἔχειν ὥστε χαρίζεσθαι, καὶ τὸ μὴ χαρίζεσθαι τὸ ἐφ' οὗ Γ, ἢ τὸ χαρίζεσθαι τὸ ἐφ' οὗ Δ, καὶ [68b] τὸ μὴ τοιοῦτον εἶναι οἷον χαρίζεσθαι τὸ ἐφ' οὗ Β, δῆλον ὅτι τὸ Α τὸ τοιοῦτον εἶναι αἰρετώτερόν ἐστιν ἢ τὸ χαρίζεσθαι. τὸ ἄρα φιλεῖσθαι τῆς συνουσίας αἰρετώτερον κατὰ τὸν ἔρωτα. μᾶλλον ἄρα ὁ ἔρως ἐστὶ τῆς φιλίας ἢ τοῦ συνεῖναι. εἰ δὲ μάλιστα τούτου, καὶ τέλος τοῦτο. τὸ ἄρα συνεῖναι ἢ οὐκ ἔστιν ὅλως ἢ τοῦ φιλεῖσθαι ἔνεκεν· καὶ γὰρ αἱ ἄλλαι ἐπιθυμίαι καὶ τέχναι οὕτως.

Κεφάλαιο 23

Πῶς μὲν οὖν ἔχουσιν οἱ ὅροι κατὰ τὰς ἀντιστροφὰς καὶ τὸ αἰρετώτεροι ἢ φευκτότεροι εἶναι, φανερόν· ὅτι δ' οὐ μόνον οἱ διαλεκτικοὶ καὶ ἀποδεικτικοὶ συλλογισμοὶ διὰ τῶν προειρημένων γίνονται σχημάτων, ἀλλὰ καὶ οἱ ῥητορικοὶ καὶ ἀπλῶς ἡτίσουν πίστις καὶ ἡ καθ' ὅποιανοῦν μέθοδον, νῦν ἂν εἴη λεκτέον. ἅπαντα γὰρ πιστεύομεν ἢ διὰ συλλογισμοῦ ἢ ἐξ ἐπαγωγῆς.

Ἐπαγωγή μὲν οὖν ἐστὶ καὶ ὁ ἐξ ἐπαγωγῆς συλλογισμὸς τὸ διὰ τοῦ ἐτέρου θάτερον ἄκρον τῷ μέσῳ συλλογίσασθαι, οἷον εἰ τῶν Α Γ μέσον τὸ Β, διὰ τοῦ Γ δεῖξαι τὸ Α τῷ Β ὑπάρχον· οὕτω γὰρ ποιούμεθα τὰς ἐπαγωγάς. οἷον ἔστω τὸ Α μακρόβιον, τὸ δ' ἐφ' ᾧ Β τὸ χολὴν μὴ ἔχον, ἐφ' ᾧ δὲ Γ τὸ καθ' ἑκάστον μακρόβιον, οἷον ἄνθρωπος καὶ ἵππος καὶ ἡμίονος. τῷ δὲ Γ ὅλῳ ὑπάρχει τὸ Α (πᾶν γὰρ τὸ Γ μακρόβιον)· ἀλλὰ καὶ τὸ Β, τὸ μὴ ἔχειν χολήν, παντὶ ὑπάρχει τῷ Γ. εἰ οὖν ἀντιστρέφει τὸ Γ τῷ Β καὶ μὴ ὑπερτείνει τὸ μέσον, ἀνάγκη τὸ Α τῷ Β ὑπάρχειν. δέδεικται γὰρ πρότερον ὅτι ἂν δύο ἄττα τῷ αὐτῷ ὑπάρχη καὶ πρὸς θάτερον αὐτῶν ἀντιστρέφη τὸ ἄκρον, ὅτι τῷ ἀντιστρέφοντι καὶ θάτερον ὑπάρξει τῶν κατηγορουμένων. δεῖ δὲ νοεῖν τὸ Γ τὸ ἐξ ἀπάντων τῶν καθ' ἑκάστον συγκείμενον· ἡ γὰρ ἐπαγωγή διὰ πάντων.

Ἔστι δ' ὁ τοιοῦτος συλλογισμὸς τῆς πρώτης καὶ ἀμέσου προτάσεως· ὧν μὲν γὰρ ἔστι μέσον, διὰ τοῦ μέσου ὁ συλλογισμὸς, ὧν δὲ μὴ ἔστι, δι' ἐπαγωγῆς. καὶ τρόπον τινὰ ἀντίκειται ἡ ἐπαγωγή τῷ συλλογισμῷ· ὁ μὲν γὰρ διὰ τοῦ μέσου τὸ ἄκρον τῷ τρίτῳ δείκνυσιν, ἡ δὲ διὰ τοῦ τρίτου τὸ ἄκρον τῷ μέσῳ. φύσει μὲν οὖν πρότερος καὶ γνωριμώτερος ὁ διὰ τοῦ μέσου συλλογισμὸς, ἡμῖν δ' ἐναργέστερος ὁ διὰ τῆς ἐπαγωγῆς.

Κεφάλαιο 24

Παράδειγμα δ' ἐστὶν ὅταν τῷ μέσῳ τὸ ἄκρον ὑπάρχον δειχθῇ διὰ τοῦ ὁμοίου τῷ τρίτῳ. δεῖ δὲ καὶ τὸ μέσον τῷ τρίτῳ καὶ τὸ πρῶτον τῷ ὁμοίῳ γνώριμον εἶναι ὑπάρχον. οἷον ἔστω τὸ Α κακόν, τὸ δὲ Β πρὸς ὁμόρους ἀναιρεῖσθαι [69a] πόλεμον, ἐφ' ᾧ δὲ Γ τὸ Ἀθηναίους πρὸς Θηβαίους, τὸ δ' ἐφ' ᾧ Δ Θηβαίους πρὸς Φωκεῖς. ἐὰν οὖν βουλώμεθα δεῖξαι ὅτι τὸ Θηβαίοις πολεμεῖν κακόν ἐστὶ, ληπτέον ὅτι τὸ πρὸς τοὺς ὁμόρους πολεμεῖν κακόν. τούτου δὲ πίστις ἐκ τῶν ὁμοίων, οἷον ὅτι Θηβαίοις ὁ πρὸς Φωκεῖς. ἐπεὶ οὖν τὸ πρὸς τοὺς ὁμόρους κακόν, τὸ δὲ πρὸς Θηβαίους πρὸς ὁμόρους ἐστί, φανερόν ὅτι τὸ πρὸς Θηβαίους πολεμεῖν κακόν. ὅτι μὲν οὖν τὸ Β τῷ Γ καὶ τῷ Δ ὑπάρχει, φανερόν (ἄμφω γὰρ ἐστὶ πρὸς τοὺς ὁμόρους ἀναιρεῖσθαι πόλεμον), καὶ ὅτι τὸ Α τῷ Δ (Θηβαίοις γὰρ οὐ συνήνεγκεν ὁ πρὸς Φωκεῖς πόλεμος)· ὅτι δὲ τὸ Α τῷ Β ὑπάρχει, διὰ τοῦ Δ δειχθήσεται. τὸν αὐτὸν δὲ τρόπον καὶ εἰ διὰ πλειόνων τῶν ὁμοίων ἢ πίστις γένοιτο τοῦ μέσου πρὸς τὸ ἄκρον. φανερόν οὖν ὅτι τὸ παράδειγμά ἐστιν οὔτε ὥς μέρος πρὸς ὅλον οὔτε ὥς ὅλον πρὸς μέρος, ἀλλ' ὥς μέρος πρὸς μέρος, ὅταν ἄμφω μὲν ἢ ὑπὸ ταυτό, γνώριμον δὲ θάτερον. καὶ διαφέρει τῆς ἐπαγωγῆς, ὅτι ἢ μὲν ἐξ ἀπάντων τῶν ἀτόμων τὸ ἄκρον ἐδείκνυνεν ὑπάρχειν τῷ μέσῳ καὶ πρὸς τὸ ἄκρον οὐ συνῆπτε τὸν συλλογισμόν, τὸ δὲ καὶ συνάπτει καὶ οὐκ ἐξ ἀπάντων δείκνυσιν.

Κεφάλαιο 25

Απαγωγή δ' ἐστὶν ὅταν τῷ μὲν μέσῳ τὸ πρῶτον δῆλον ᾗ ὑπάρχον, τῷ δ' ἐσχάτῳ τὸ μέσον ἄδηλον μὲν, ὁμοίως δὲ πιστὸν ἢ μᾶλλον τοῦ συμπεράσματος· ἔτι ἂν ὀλίγα ᾗ τὰ μέσα τοῦ ἐσχάτου καὶ τοῦ μέσου· πάντως γὰρ ἐγγύτερον εἶναι συμβαίνει τῆς ἐπιστήμης. οἷον ἔστω τὸ Α τὸ διδακτόν, ἐφ' οὗ Β ἐπιστήμη, τὸ Γ δικαιοσύνη. ἡ μὲν οὖν ἐπιστήμη ὅτι διδακτόν, φανερόν· ἡ δ' ἀρετὴ εἰ ἐπιστήμη, ἄδηλον. εἰ οὖν ὁμοίως ἢ μᾶλλον πιστὸν τὸ Β Γ τοῦ Α Γ, ἀπαγωγή ἐστίν· ἐγγύτερον γὰρ τοῦ ἐπίστασθαι διὰ τὸ προσειληφέναι τὴν Α Β ἐπιστήμην, πρότερον οὐκ ἔχοντας. ἢ πάλιν εἰ ὀλίγα τὰ μέσα τῶν Β Γ· καὶ γὰρ οὕτως ἐγγύτερον τοῦ εἰδέναι. οἷον εἰ τὸ Δ εἴη τετραγωνίζεσθαι, τὸ δ' ἐφ' ᾧ Ε εὐθύγραμμον, τὸ δ' ἐφ' ᾧ Ζ κύκλος· εἰ τοῦ Ε Ζ ἔν μόνον εἴη μέσον, τὸ μετὰ μηνίσκων ἴσον γίνεσθαι εὐθυγράμμῳ τὸν κύκλον, ἐγγὺς ἂν εἴη τοῦ εἰδέναι. ὅταν δὲ μήτε πιστότερον ᾗ τὸ Β Γ τοῦ Α Γ μήτ' ὀλίγα τὰ μέσα, οὐ λέγω ἀπαγωγὴν. οὐδ' ὅταν ἄμεσον ᾗ τὸ Β Γ· ἐπιστήμη γὰρ τὸ τοιοῦτον.

Κεφάλαιο 26

Ἐνστασις δ' ἐστὶ πρότασις προτάσει ἐναντία. διαφέρει δὲ τῆς προτάσεως, ὅτι τὴν μὲν ἔνστασιν ἐνδέχεται εἶναι ἐπὶ μέρους, τὴν δὲ πρότασιν ἢ ὅλως οὐκ ἐνδέχεται ἢ οὐκ ἐν τοῖς [69b] καθόλου συλλογισμοῖς. φέρεται δὲ ἡ ἔνστασις διχῶς καὶ διὰ δύο σχημάτων, διχῶς μὲν ὅτι ἢ καθόλου ἢ ἐν μέρει πᾶσα ἔνστασις, ἐκ δύο δὲ σχημάτων ὅτι ἀντικείμενα φέρονται τῇ προτάσει, τὰ δ' ἀντικείμενα ἐν τῷ πρώτῳ καὶ τῷ τρίτῳ σχήματι περαίνονται μόνοις. ὅταν γὰρ ἀξιῶση παντὶ ὑπάρχειν, ἐνιστάμεθα ἢ ὅτι οὐδενὶ ἢ ὅτι τινὶ οὐχ ὑπάρχει· τούτων δὲ τὸ μὲν μηδενὶ ἐκ τοῦ πρώτου σχήματος, τὸ δὲ τινὶ μὴ ἐκ τοῦ ἐσχάτου. οἷον ἔστω τὸ Α μίαν εἶναι ἐπιστήμην, ἐφ' ᾧ τὸ Β ἐναντία. προτείναντος δὲ μίαν εἶναι τῶν ἐναντίων ἐπιστήμην, ἢ ὅτι ὅλως οὐχ ἡ αὐτὴ τῶν ἀντικειμένων ἐνίσταται, τὰ δ' ἐναντία ἀντικείμενα, ὥστε γίνεται τὸ πρῶτον σχῆμα, ἢ ὅτι τοῦ γνωστοῦ καὶ ἀγνωστοῦ οὐ μία· τοῦτο δὲ τὸ τρίτον· κατὰ γὰρ τοῦ Γ, τοῦ γνωστοῦ καὶ ἀγνωστοῦ, τὸ μὲν ἐναντία εἶναι ἀληθές, τὸ δὲ μίαν αὐτῶν ἐπιστήμην εἶναι ψεῦδος. πάλιν ἐπὶ τῆς στερητικῆς προτάσεως ὡσαύτως. ἀξιοῦντος γὰρ μὴ εἶναι μίαν τῶν ἐναντίων, ἢ ὅτι πάντων τῶν ἀντικειμένων ἢ ὅτι τινῶν ἐναντίων ἢ αὐτὴ λέγομεν, οἷον ὑγιεινοῦ καὶ νοσώδους· τὸ μὲν οὖν πάντων ἐκ τοῦ πρώτου, τὸ δὲ τινῶν ἐκ τοῦ τρίτου σχήματος.

Ἀπλῶς γὰρ ἐν πᾶσι καθόλου μὲν ἐνιστάμενον ἀνάγκη πρὸς τὸ καθόλου τῶν προτεινομένων τὴν ἀντίφασιν εἰπεῖν, οἷον εἰ μὴ τὴν αὐτὴν ἀξιοῖ τῶν ἐναντίων, πάντων εἰπόντα τῶν ἀντικειμένων μίαν. οὕτω δ' ἀνάγκη τὸ πρῶτον εἶναι σχῆμα· μέσον γὰρ γίνεται τὸ καθόλου πρὸς τὸ ἐξ ἀρχῆς. ἐν μέρει δέ, πρὸς ὃ ἐστὶ καθόλου καθ' οὗ λέγεται ἡ πρότασις, οἷον γνωστοῦ καὶ ἀγνωστοῦ μὴ τὴν αὐτήν· τὰ γὰρ ἐναντία καθόλου πρὸς ταῦτα. καὶ γίνεται τὸ τρίτον σχῆμα· μέσον γὰρ τὸ ἐν μέρει λαμβανόμενον, οἷον τὸ γνωστὸν καὶ τὸ ἀγνωστον. ἐξ ὧν γὰρ ἔστι συλλογίσασθαι τοῦναντίον, ἐκ τούτων καὶ τὰς ἐνστάσεις ἐπιχειροῦμεν λέγειν. διὸ καὶ ἐκ μόνων τούτων τῶν σχημάτων φέρομεν· ἐν μόνοις γὰρ οἱ ἀντικείμενοι συλλογισμοί· διὰ γὰρ τοῦ μέσου οὐκ ἦν καταφατικῶς. ἔτι δὲ κἂν λόγου δέοιτο πλείονος ἢ διὰ τοῦ μέσου σχήματος, οἷον εἰ μὴ δοῖη τὸ Α τῷ Β ὑπάρχειν διὰ τὸ μὴ ἀκολουθεῖν αὐτῷ τὸ Γ. τοῦτο γὰρ δι' ἄλλων προτάσεων δῆλον· οὐ

δεῖ δὲ εἰς ἄλλα ἐκτρέπεσθαι τὴν ἔνστασιν, ἀλλ' εὐθὺς φανεράν ἔχειν τὴν ἑτέραν πρότασιν. [διὸ καὶ τὸ σημεῖον ἐκ μόνου τούτου τοῦ σχήματος οὐκ ἔστιν.]

Ἐπισκεπτέον δὲ καὶ περὶ τῶν ἄλλων ἐνστάσεων, οἷον περὶ τῶν ἐκ τοῦ ἐναντίου καὶ τοῦ ὁμοίου καὶ τοῦ κατὰ δόξαν, καὶ [70a] εἰ τὴν ἐν μέρει ἐκ τοῦ πρώτου ἢ τὴν στερητικὴν ἐκ τοῦ μέσου δυνατὸν λαβεῖν.

Κεφάλαιο 27

<Ενθύμημα δὲ ἐστὶ συλλογισμὸς ἐξ εἰκότων ἢ σημείων,> εἰκὸς δὲ καὶ σημεῖον οὐ ταῦτόν ἐστιν, ἀλλὰ τὸ μὲν εἰκὸς ἐστὶ πρότασις (3) ἔνδοξος· ὁ γὰρ ὡς ἐπὶ τὸ πολὺ ἴσασιν οὕτω γινόμενον ἢ μὴ γινόμενον ἢ ὄν ἢ μὴ ὄν, τοῦτ' ἐστὶν εἰκὸς, οἷον τὸ μισεῖν τοὺς φθονοῦντας ἢ τὸ φιλεῖν τοὺς ἐρωμένους. σημεῖον δὲ βούλεται εἶναι πρότασις ἀποδεικτική ἢ ἀναγκαία ἢ ἔνδοξος· οὗ γὰρ ὄντος ἔστιν ἢ οὐ γενομένου πρότερον ἢ ὕστερον γέγονε τὸ πρᾶγμα, τοῦτο σημεῖον ἐστὶ τοῦ γεγονέναι ἢ εἶναι. [ἐνθύμημα . . . σημείων] λαμβάνεται δὲ τὸ σημεῖον τριχῶς, ὁσαυχῶς (11) καὶ τὸ μέσον ἐν τοῖς σχήμασιν· ἢ γὰρ ὡς ἐν τῷ πρώτῳ ἢ ὡς ἐν τῷ μέσῳ ἢ ὡς ἐν τῷ τρίτῳ, οἷον τὸ μὲν δεῖξαι κύουσιν διὰ τὸ γάλα ἔχειν ἐκ τοῦ πρώτου σχήματος· μέσον γὰρ τὸ γάλα ἔχειν. ἐφ' ᾧ τὸ Α κύειν, τὸ Β γάλα ἔχειν, γυνὴ ἐφ' ᾧ Γ. τὸ δ' ὅτι οἱ σοφοὶ σπουδαῖοι, Πιττακὸς γὰρ σπουδαῖος, διὰ τοῦ ἐσχάτου. ἐφ' ᾧ Α τὸ σπουδαῖον, ἐφ' ᾧ Β οἱ σοφοί, ἐφ' ᾧ Γ Πιττακός. ἀληθὲς δὴ καὶ τὸ Α καὶ τὸ Β τοῦ Γ κατηγορῆσαι· πλὴν τὸ μὲν οὐ λέγουσι διὰ τὸ εἰδέναι, τὸ δὲ λαμβάνουσιν. τὸ δὲ κύειν, ὅτι ὠχρά, διὰ τοῦ μέσου σχήματος βούλεται εἶναι· ἐπεὶ γὰρ ἔπεται ταῖς κυούσαις τὸ ὠχρόν, ἀκολουθεῖ δὲ καὶ ταύτῃ, δεδειχθαι οἷοντα ὅτι κύει. τὸ ὠχρόν ἐφ' οὗ τὸ Α, τὸ κύειν ἐφ' οὗ Β, γυνὴ ἐφ' οὗ Γ.

Ἐὰν μὲν οὖν ἡ μία λεχθῇ πρότασις, σημεῖον γίνεται μόνον, ἐὰν δὲ καὶ ἡ ἐτέρα προσληφθῇ, συλλογισμὸς, οἷον ὅτι Πιττακὸς ἐλευθέριος· οἱ γὰρ φιλότιμοι ἐλευθέριοι, Πιττακὸς δὲ φιλότιμος. ἢ πάλιν ὅτι οἱ σοφοὶ ἀγαθοί· Πιττακὸς γὰρ ἀγαθός, ἀλλὰ καὶ σοφός. οὕτω μὲν οὖν γίνονται συλλογισμοί, πλὴν ὁ μὲν διὰ τοῦ πρώτου σχήματος ἄλυτος, ἂν ἀληθὴς ᾖ (καθόλου γάρ ἐστιν), ὁ δὲ διὰ τοῦ ἐσχάτου λύσιμος, κἂν ἀληθὲς ᾖ τὸ συμπέρασμα, διὰ τὸ μὴ εἶναι καθόλου μηδὲ πρὸς τὸ πρᾶγμα τὸν συλλογισμόν· οὐ γὰρ εἰ Πιττακὸς σπουδαῖος, διὰ τοῦτο καὶ τοὺς ἄλλους ἀνάγκη σοφοὺς. ὁ δὲ διὰ τοῦ μέσου σχήματος ἀεὶ καὶ πάντως λύσιμος· οὐδέποτε γὰρ γίνεται συλλογισμὸς οὕτως ἐχόντων τῶν ὄρων· οὐ γὰρ εἰ ἡ κύουσα ὠχρά, ὠχρά δὲ καὶ ἡδε, κύειν ἀνάγκη ταύτην. ἀληθὲς μὲν οὖν ἐν ἅπασιν ὑπάρξει τοῖς σημείοις, διαφορὰς δ' ἔχουσι τὰς εἰρημένας. [70b]

Ἡ δὴ οὕτω διαιρετέον τὸ σημεῖον, τούτων δὲ τὸ μέσον τεκμήριον ληπτέον (τὸ γὰρ τεκμήριον τὸ εἰδέναι ποιοῦν φασὶν εἶναι, τοιοῦτο δὲ

μάλιστα τὸ μέσον), ἢ τὰ μὲν ἐκ τῶν ἄκρων σημείων λεκτέον, τὰ δ' ἐκ τοῦ μέσου τεκμήριον· ἐνδοξότατον γὰρ καὶ μάλιστα ἀληθές τὸ διὰ τοῦ πρώτου σχήματος.

Τὸ δὲ φυσιογνωμονεῖν δυνατόν ἐστιν, εἴ τις δίδωσιν ἅμα μεταβάλλειν τὸ σῶμα καὶ τὴν ψυχὴν ὅσα φυσικά ἐστι παθήματα· μαθὼν γὰρ ἴσως μουσικὴν μεταβέβληκέ τι τὴν ψυχὴν, ἀλλ' οὐ τῶν φύσει ἡμῖν ἐστὶ τοῦτο τὸ πάθος, ἀλλ' οἷον ὀργαὶ καὶ ἐπιθυμίαι τῶν φύσει κινήσεων. εἰ δὴ τοῦτό τε δοθείη καὶ ἐν ἐνὸς σημείων εἶναι, καὶ δυναίμεθα λαμβάνειν τὸ ἴδιον ἐκάστου γένους πάθος καὶ σημεῖον, δυνησόμεθα φυσιογνωμονεῖν. εἰ γάρ ἐστιν ἰδίᾳ τινὶ γένει ὑπάρχον ἀτόμῳ πάθος, οἷον τοῖς λέουσιν ἀνδρεία, ἀνάγκη καὶ σημεῖον εἶναί τι· συμπάσχειν γὰρ ἀλλήλοις ὑπόκειται. καὶ ἔστω τοῦτο τὸ μέγαλα τὰ ἀκρωτήρια ἔχειν· ὃ καὶ ἄλλοις ὑπάρχειν γένεσι μὴ ὅλοις ἐνδέχεται. τὸ γὰρ σημεῖον οὕτως ἴδιόν ἐστιν, ὅτι ὅλου γένους ἴδιόν ἐστι [πάθος], καὶ οὐ μόνου ἴδιον, ὥσπερ εἰώθαμεν λέγειν. ὑπάρξει δὴ καὶ ἐν ἄλλῳ γένει τοῦτο, καὶ ἔσται ἀνδρεῖος [ὁ] ἄνθρωπος καὶ ἄλλο τι ζῷον. ἔξει ἄρα τὸ σημεῖον· ἐν γὰρ ἐνὸς ἦν. εἰ τοίνυν ταῦτ' ἐστί, καὶ δυνησόμεθα τοιαῦτα σημεῖα συλλέξαι ἐπὶ τούτων τῶν ζώων ἃ μόνον ἐν πάθος ἔχει τι ἴδιον, ἕκαστον δ' ἔχει σημεῖον, ἐπεὶ περ ἐν ἔχει ἀνάγκη, δυνησόμεθα φυσιογνωμονεῖν. εἰ δὲ δύο ἔχει ἴδια ὅλον τὸ γένος, οἷον ὁ λέων ἀνδρεῖον καὶ μεταδοτικόν, πῶς γνωσόμεθα πότερον ποτέρου σημεῖον τῶν ἰδίᾳ ἀκολουθούντων σημείων; ἢ εἰ ἄλλῳ τινὶ μὴ ὅλῳ ἅμφω, καὶ ἐν οἷς μὴ ὅλοις ἐκάτερον, ὅταν τὸ μὲν ἔχη τὸ δὲ μὴ· εἰ γὰρ ἀνδρεῖος μὲν ἐλευθέριος δὲ μὴ, ἔχει δὲ τῶν δύο τοδί, δῆλον ὅτι καὶ ἐπὶ τοῦ λέοντος τοῦτο σημεῖον τῆς ἀνδρείας.

Ἔστι δὴ τὸ φυσιογνωμονεῖν τῷ ἐν τῷ πρώτῳ σχήματι τὸ μέσον τῷ μὲν πρώτῳ ἄκρῳ ἀντιστρέφειν, τοῦ δὲ τρίτου ὑπερτείνειν καὶ μὴ ἀντιστρέφειν, οἷον ἀνδρεία τὸ Α, τὰ ἀκρωτήρια μέγαλα ἐφ' οὗ Β, τὸ δὲ Γ λέων. ᾧ δὴ τὸ Γ, τὸ Β παντί, ἀλλὰ καὶ ἄλλοις. ᾧ δὲ τὸ Β, τὸ Α παντί καὶ οὐ πλείοσιν, ἀλλ' ἀντιστρέφει· εἰ δὲ μὴ, οὐκ ἔσται ἐν ἐνὸς σημεῖον.

(71a.) Πᾶσα διδασκαλία καὶ πᾶσα μάθησις διανοητικὴ ἐκ προϋπαρχούσης γίνεται γνώσεως. φανερόν δὲ τοῦτο θεωροῦσιν ἐπὶ πασῶν· αἱ τε γὰρ μαθηματικαὶ τῶν ἐπιστημῶν διὰ τούτου τοῦ τρόπου παραγίνονται καὶ τῶν ἄλλων ἐκάστη τεχνῶν. ὁμοίως δὲ καὶ περὶ τοὺς λόγους οἱ τε διὰ συλλογισμῶν καὶ οἱ δι' ἐπαγωγῆς· ἀμφοτέρω γὰρ διὰ προγινωσκομένων ποιοῦνται τὴν διδασκαλίαν, οἱ μὲν λαμβάνοντες ὡς παρὰ ξυνιέντων, οἱ δὲ δεικνύντες τὸ καθόλου διὰ τοῦ δηλῶν εἶναι τὸ καθ' ἕκαστον. ὡς δ' αὐτῶς καὶ οἱ ῥητορικοὶ συμπεύθουσιν· ἡ γὰρ διὰ παραδειγμάτων, ὃ ἐστὶν ἐπαγωγή, ἡ δι' ἐνθυμημάτων, ὅπερ ἐστὶ συλλογισμός. διχῶς δ' ἀναγκαῖον προγινώσκειν· τὰ μὲν γάρ, ὅτι ἔστι, προϋπολαμβάνειν ἀναγκαῖον, τὰ δέ, τί τὸ λεγόμενόν ἐστι, ξυνιέναι δεῖ, τὰ δ' ἄμφω, οἷον ὅτι μὲν ἅπαν ἢ φῆσαι ἢ ἀποφῆσαι ἀληθές, ὅτι ἔστι, τὸ δὲ τρίγωνον, ὅτι τοδὶ σημαίνει, τὴν δὲ μονάδα ἄμφω, καὶ τί σημαίνει καὶ ὅτι ἔστιν· οὐ γὰρ ὁμοίως τούτων ἕκαστον δηλῶν ἡμῖν.

Ἔστι δὲ γνωρίζειν τὰ μὲν πρότερον γνωρίσαντα, τῶν δὲ καὶ ἅμα λαμβάνοντα τὴν γνῶσιν, οἷον ὅσα τυγχάνει ὄντα ὑπὸ τὸ καθόλου οὗ ἔχει τὴν γνῶσιν. ὅτι μὲν γὰρ πᾶν τρίγωνον ἔχει δυσὶν ὀρθαῖς ἴσας, προήδει· ὅτι δὲ τόδε τὸ ἐν τῷ ἡμικυκλίῳ τρίγωνόν ἐστιν, ἅμα ἐπαγόμενος ἐγνώρισεν. (ἐνίων γὰρ τοῦτον τὸν τρόπον ἢ μάθησίς ἐστι, καὶ οὐ διὰ τοῦ μέσου τὸ ἔσχατον γνωρίζεται, ὅσα ἤδη τῶν καθ' ἕκαστα τυγχάνει ὄντα καὶ μὴ καθ' ὑποκειμένου τινός.) πρὶν δ' ἐπαχθῆναι ἢ λαβεῖν συλλογισμὸν τρόπον μὲν τινα ἴσως φατέον ἐπίστασθαι, τρόπον δ' ἄλλον οὐ. ὁ γὰρ μὴ ἤδει εἰ ἔστιν ἀπλῶς, τοῦτο πῶς ἤδει ὅτι δύο ὀρθὰς ἔχει ἀπλῶς; ἀλλὰ δηλῶν ὡς ὠδὶ μὲν ἐπίσταται, ὅτι καθόλου ἐπίσταται, ἀπλῶς δ' οὐκ ἐπίσταται. εἰ δὲ μή, τὸ ἐν τῷ Μένωνι ἀπόρημα συμβήσεται· ἡ γὰρ οὐδὲν μαθήσεται ἢ ἂ οἶδεν. οὐ γὰρ δὴ, ὥς γέ τινες ἐγχειροῦσι λύειν, λεκτέον. ἄρ' οἶδας ἅπασαν δυάδα ὅτι ἀρτία ἢ οὐ; φήσαντος δὲ προήνεγκάν τινα δυάδα ἦν οὐκ ᾤετ' εἶναι, ὥστ' οὐδ' ἀρτίαν. λύουσι γὰρ οὐ φάσκοντες εἰδέναι πᾶσαν δυάδα ἀρτίαν οὔσαν, ἀλλ' ἦν ἴσασιν ὅτι δυάς. καίτοι (71b.) ἴσασιν μὲν οὐπὲρ τὴν ἀπόδειξιν ἔχουσι καὶ οὐ ἔλαβον, ἔλαβον δ' οὐχὶ παντὸς οὗ ἂν εἰδῶσιν ὅτι τρίγωνον ἢ ὅτι ἀριθμός, ἀλλ' ἀπλῶς κατὰ παντὸς ἀριθμοῦ καὶ τριγώνου· οὐδεμία γὰρ πρότασις

λαμβάνεται τοιαύτη, ὅτι ὄν σὺ οἶδας ἀριθμὸν ἢ ὃ σὺ οἶδας
εὐθύγραμμον, ἀλλὰ κατὰ παντός. ἀλλ' οὐδέν (οἶμαι) κωλύει, ὃ
μανθάνει, ἔστιν ὡς ἐπίστασθαι, ἔστι δ' ὡς ἀγνοεῖν· ἄτοπον γὰρ οὐκ
εἰ οἶδέ πως ὃ μανθάνει, ἀλλ' εἰ ὠδί, οἷον ἢ μανθάνει καὶ ὥς.

Κεφάλαιο 2

Ἐπίστασθαι δὲ οἰόμεθ' ἕκαστον ἀπλῶς, ἀλλὰ μὴ τὸν σοφιστικὸν τρόπον τὸν κατὰ συμβεβηκός, ὅταν τὴν τ' αἰτίαν οἰώμεθα γινώσκειν δι' ἣν τὸ πρᾶγμα ἐστίν, ὅτι ἐκείνου αἰτία ἐστὶ, καὶ μὴ ἐνδέχεσθαι τοῦτ' ἄλλως ἔχειν. δῆλον τοίνυν ὅτι τοιοῦτόν τι τὸ ἐπίστασθαι ἐστὶ· καὶ γὰρ οἱ μὴ ἐπιστάμενοι καὶ οἱ ἐπιστάμενοι οἱ μὲν οἴονται αὐτοὶ οὕτως ἔχειν, οἱ δ' ἐπιστάμενοι καὶ ἔχουσιν, ὥστε οὗ ἀπλῶς ἐστὶν ἐπιστήμη, τοῦτ' ἀδύνατον ἄλλως ἔχειν.

Εἰ μὲν οὖν καὶ ἕτερος ἐστὶ τοῦ ἐπίστασθαι τρόπος, ὕστερον ἐροῦμεν, φαμέν δὲ καὶ δι' ἀποδείξεως εἰδέναι. ἀπόδειξιν δὲ λέγω συλλογισμὸν ἐπιστημονικόν· ἐπιστημονικὸν δὲ λέγω καθ' ὃν τῷ ἔχειν αὐτὸν ἐπιστάμεθα. εἰ τοίνυν ἐστὶ τὸ ἐπίστασθαι οἷον ἔθεμεν, ἀνάγκη καὶ τὴν ἀποδεικτικὴν ἐπιστήμην ἐξ ἀληθῶν τ' εἶναι καὶ πρώτων καὶ ἀμέσων καὶ γνωριμωτέρων καὶ προτέρων καὶ αἰτίων τοῦ συμπεράσματος· οὕτω γὰρ ἔσονται καὶ αἱ ἀρχαὶ οἰκεῖαι τοῦ δεικνυμένου. συλλογισμὸς μὲν γὰρ ἐστὶ καὶ ἄνευ τούτων, ἀπόδειξις δ' οὐκ ἐστὶ· οὐ γὰρ ποιήσει ἐπιστήμην. ἀληθῆ μὲν οὖν δεῖ εἶναι, ὅτι οὐκ ἐστὶ τὸ μὴ ὃν ἐπίστασθαι, οἷον ὅτι ἡ διάμετρος σύμμετρος. ἐκ πρώτων δ' ἀναποδείκτων, ὅτι οὐκ ἐπιστήσεται μὴ ἔχων ἀπόδειξιν αὐτῶν· τὸ γὰρ ἐπίστασθαι ὧν ἀπόδειξις ἐστὶ μὴ κατὰ συμβεβηκός, τὸ ἔχειν ἀπόδειξιν ἐστίν. αἰτία τε καὶ γνωριμώτερα δεῖ εἶναι καὶ πρότερα, αἷτια μὲν ὅτι τότε ἐπιστάμεθα ὅταν τὴν αἰτίαν εἰδῶμεν, καὶ πρότερα, εἵπερ αἷτια, καὶ προγινωσκόμενα οὐ μόνον τὸν ἕτερον τρόπον τῷ ξυνιέναι, ἀλλὰ καὶ τῷ εἰδέναι ὅτι ἐστίν. πρότερα δ' ἐστὶ καὶ γνωριμώτερα διχῶς· οὐ γὰρ ταῦτόν πρότερον τῇ φύσει καὶ πρὸς ἡμᾶς πρότερον, (72a.) οὐδὲ γνωριμώτερον καὶ ἡμῖν γνωριμώτερον. λέγω δὲ πρὸς ἡμᾶς μὲν πρότερα καὶ γνωριμώτερα τὰ ἐγγύτερον τῆς αἰσθήσεως, ἀπλῶς δὲ πρότερα καὶ γνωριμώτερα τὰ πορρώτερον. ἐστὶ δὲ πορρωτάτω μὲν τὰ καθόλου μάλιστα, ἐγγυτάτω δὲ τὰ καθ' ἕκαστα· καὶ ἀντίκειται ταῦτ' ἀλλήλοις. ἐκ πρώτων δ' ἐστὶ τὸ ἐξ ἀρχῶν οἰκεῖον· ταῦτό γὰρ λέγω πρῶτον καὶ ἀρχήν. ἀρχὴ δ' ἐστὶν ἀποδείξεως πρότασις ἄμεσος, ἄμεσος δὲ ἥς μὴ ἐστὶν ἄλλη προτέρα. πρότασις δ' ἐστὶν ἀποφάνσεως τὸ ἕτερον μόριον, ἔν καθ' ἐνός, διαλεκτικὴ μὲν ἢ ὁμοίως λαμβάνουσα ὁποτερονοῦν, ἀποδεικτικὴ δὲ ἢ ὠρισμένως θάτερον, ὅτι ἀληθές. ἀπόφανσις δὲ ἀντιφάσεως

ὅποτερονοῦν μόριον, ἀντίφασις δὲ ἀντίθεσις ἥς οὐκ ἔστι μεταξὺ καθ' αὐτήν, μόριον δ' ἀντιφάσεως τὸ μὲν τι κατὰ τινὸς κατάφασις, τὸ δὲ τι ἀπὸ τινὸς ἀπόφασις.

Ἀμέσου δ' ἀρχῆς συλλογιστικῆς θέσιν μὲν λέγω ἢν μὴ ἔστι δεῖξαι, μῆδ' ἀνάγκη ἔχειν τὸν μαθησόμενόν τι· ἢν δ' ἀνάγκη ἔχειν τὸν ὁτιοῦν μαθησόμενον, ἀξίωμα· ἔστι γὰρ ἓνια τοιαῦτα· τοῦτο γὰρ μάλιστ' ἐπὶ τοῖς τοιούτοις εἰώθαμεν ὄνομα λέγειν. θέσεως δ' ἡ μὲν ὅποτερονοῦν τῶν μορίων τῆς ἀντιφάσεως λαμβάνουσα, οἷον λέγω τὸ εἶναί τι ἢ τὸ μὴ εἶναί τι, ὑπόθεσις, ἡ δ' ἄνευ τούτου ὀρισμός. ὁ γὰρ ὀρισμὸς θέσις μὲν ἔστι· τίθεται γὰρ ὁ ἀριθμητικὸς μονάδα τὸ ἀδιαίρετον εἶναι κατὰ τὸ ποσόν· ὑπόθεσις δ' οὐκ ἔστι· τὸ γὰρ τί ἔστι μονὰς καὶ τὸ εἶναι μονάδα οὐ ταῦτόν.

Ἐπεὶ δὲ δεῖ πιστεύειν τε καὶ εἰδέναι τὸ πρᾶγμα τῷ τοιούτῳ ἔχειν συλλογισμὸν ὃν καλοῦμεν ἀποδείξιν, ἔστι δ' οὗτος τῷ ταδὶ εἶναι ἐξ ὧν ὁ συλλογισμὸς, ἀνάγκη μὴ μόνον προγινώσκειν τὰ πρῶτα, ἢ πάντα ἢ ἓνια, ἀλλὰ καὶ μᾶλλον· αἰεὶ γὰρ δι' ὃ ὑπάρχει ἕκαστον, ἐκείνῳ μᾶλλον ὑπάρχει, οἷον δι' ὃ φιλοῦμεν, ἐκεῖνο φίλον μᾶλλον. ὥστ' εἴπερ ἴσμεν διὰ τὰ πρῶτα καὶ πιστεύομεν, κακεῖνα ἴσμεν τε καὶ πιστεύομεν μᾶλλον, ὅτι δι' ἐκεῖνα καὶ τὰ ὕστερα. οὐχ οἷόν τε δὲ πιστεύειν μᾶλλον ὧν οἶδεν ἢ μὴ τυγχάνει μήτε εἰδὼς μήτε βέλτιον διακείμενος ἢ εἰ ἐτύγχανεν εἰδὼς. συμβήσεται δὲ τοῦτο, εἰ μὴ τις προγινώσεται τῶν δι' ἀποδείξιν πιστευόντων· μᾶλλον γὰρ ἀνάγκη πιστεύειν ταῖς ἀρχαῖς ἢ πάσαις ἢ τισὶ τοῦ συμπεράσματος. τὸν δὲ μέλλοντα ἔξιν τὴν ἐπιστήμην τὴν δι' ἀποδείξεως οὐ μόνον δεῖ τὰς ἀρχὰς μᾶλλον γνωρίζειν καὶ μᾶλλον αὐταῖς πιστεύειν ἢ τῷ δεικνυμένῳ, (72b.) ἀλλὰ μῆδ' ἄλλο αὐτῷ πιστότερον εἶναι μῆδὲ γνωριμώτερον τῶν ἀντικειμένων ταῖς ἀρχαῖς ἐξ ὧν ἔσται συλλογισμὸς ὁ τῆς ἐναντίας ἀπάτης, εἴπερ δεῖ τὸν ἐπιστάμενον ἀπλῶς ἀμετάπειστον εἶναι.

Κεφάλαιο 3

Ἐνίοις μὲν οὖν διὰ τὸ δεῖν τὰ πρῶτα ἐπίστασθαι οὐ δοκεῖ ἐπιστήμη εἶναι, τοῖς δ' εἶναι μὲν, πάντων μέντοι ἀπόδειξις εἶναι· ὣν οὐδέτερον οὐτ' ἀληθές οὐτ' ἀναγκαῖον. οἱ μὲν γὰρ ὑποθέμενοι μὴ εἶναι ὅλως ἐπίστασθαι, οὗτοι εἰς ἄπειρον ἀξιοῦσιν ἀνάγεσθαι ὡς οὐκ ἂν ἐπισταμένους τὰ ὕστερα διὰ τὰ πρότερα, ὧν μὴ ἔστι πρῶτα, ὀρθῶς λέγοντες· ἀδύνατον γὰρ τὰ ἄπειρα διελθεῖν. εἴ τε ἴσταται καὶ εἰσὶν ἀρχαί, ταύτας ἀγνώστους εἶναι ἀποδείξεώς γε μὴ οὔσης αὐτῶν, ὅπερ φασὶν εἶναι τὸ ἐπίστασθαι μόνον· εἰ δὲ μὴ ἔστι τὰ πρῶτα εἰδέναι, οὐδὲ τὰ ἐκ τούτων εἶναι ἐπίστασθαι ἀπλῶς οὐδὲ κυρίως, ἀλλ' ἐξ ὑποθέσεως, εἰ ἐκεῖνα ἔστιν. οἱ δὲ περὶ μὲν τοῦ ἐπίστασθαι ὁμολογοῦσι· δι' ἀποδείξεως γὰρ εἶναι μόνον· ἀλλὰ πάντων εἶναι ἀπόδειξιν οὐδὲν κωλύειν· ἐνδέχεσθαι γὰρ κύκλῳ γίνεσθαι τὴν ἀπόδειξιν καὶ ἐξ ἀλλήλων.

Ἡμεῖς δέ φαμεν οὔτε πᾶσαν ἐπιστήμην ἀποδεικτικὴν εἶναι, ἀλλὰ τὴν τῶν ἀμέσων ἀναπόδεικτον (καὶ τοῦθ' ὅτι ἀναγκαῖον, φανερόν· εἰ γὰρ ἀνάγκη μὲν ἐπίστασθαι τὰ πρότερα καὶ ἐξ ὧν ἡ ἀπόδειξις, ἴσταται δέ ποτε τὰ ἄμεσα, ταῦτ' ἀναπόδεικτα ἀνάγκη εἶναι)- ταῦτά τ' οὖν οὕτω λέγομεν, καὶ οὐ μόνον ἐπιστήμην ἀλλὰ καὶ ἀρχὴν ἐπιστήμης εἶναι τινά φαμεν, ἥ τοὺς ὅρους γνωρίζομεν. κύκλῳ τε ὅτι ἀδύνατον ἀποδείκνυσθαι ἀπλῶς, δηλον, εἴπερ ἐκ προτέρων δεῖ τὴν ἀπόδειξιν εἶναι καὶ γνωριμωτέρων· ἀδύνατον γὰρ ἔστι τὰ αὐτὰ τῶν αὐτῶν ἅμα πρότερα καὶ ὕστερα εἶναι, εἰ μὴ τὸν ἕτερον τρόπον, οἷον τὰ μὲν πρὸς ἡμᾶς τὰ δ' ἀπλῶς, ὅνπερ τρόπον ἡ ἐπαγωγὴ ποιεῖ γνωρίμον. εἰ δ' οὕτως, οὐκ ἂν εἴη τὸ ἀπλῶς εἰδέναι καλῶς ὠριμένον, ἀλλὰ διττόν· ἢ οὐχ ἀπλῶς ἢ ἐτέρα ἀπόδειξις, γινομένη γ' ἐκ τῶν ἡμῖν γνωριμωτέρων.

συμβαίνει δὲ τοῖς λέγουσι κύκλῳ τὴν ἀπόδειξιν εἶναι οὐ μόνον τὸ νῦν εἰρημένον, ἀλλ' οὐδὲν ἄλλο λέγειν ἢ ὅτι τοῦτ' ἔστιν εἰ τοῦτ' ἔστιν· οὕτω δὲ πάντα ῥάδιον δεῖξαι. δηλον δ' ὅτι τοῦτο συμβαίνει τριῶν ὅρων τεθέντων. τὸ μὲν γὰρ διὰ πολλῶν ἢ δι' ὀλίγων ἀνακάμπτειν φάναι οὐδὲν διαφέρει, δι' ὀλίγων δ' ἢ δυοῖν. ὅταν γὰρ τοῦ Α ὄντος ἐξ ἀνάγκης ἢ τὸ Β, τούτου δὲ τὸ Γ, τοῦ Α ὄντος ἔσται τὸ Γ. εἰ δὴ τοῦ Α ὄντος ἀνάγκη τὸ Β εἶναι, τούτου δ' (73a.) ὄντος τὸ Α (τοῦτο γὰρ ἦν τὸ κύκλῳ), κείσθω τὸ Α ἐφ' οὗ τὸ Γ. τὸ οὖν τοῦ Β

ὄντος τὸ Α εἶναι λέγειν ἐστὶ τὸ Γ εἶναι λέγειν, τοῦτο δ' ὅτι τοῦ Α ὄντος τὸ Γ ἔστι· τὸ δὲ Γ τῷ Α τὸ αὐτό. ὥστε συμβαίνει λέγειν τοὺς κύκλῳ φάσκοντας εἶναι τὴν ἀπόδειξιν οὐδὲν ἕτερον πλὴν ὅτι τοῦ Α ὄντος τὸ Α ἔστιν. οὕτω δὲ πάντα δεῖξαι ράδιον.

Οὐ μὴν ἀλλ' οὐδὲ τοῦτο δυνατόν, πλὴν ἐπὶ τούτων ὅσα ἀλλήλοις ἔπεται, ὥσπερ τὰ ἴδια. ἐνὸς μὲν οὖν κειμένου δέδεικται ὅτι οὐδέποτ' ἀνάγκη τι εἶναι ἕτερον (λέγω δ' ἐνός, ὅτι οὔτε ὅρου ἐνός οὔτε θέσεως μιᾶς τεθείσης), ἐκ δύο δὲ θέσεων πρώτων καὶ ἐλαχίστων ἐνδέχεται, εἴπερ καὶ συλλογίσασθαι. ἐὰν μὲν οὖν τό τε Α τῷ Β καὶ τῷ Γ ἔπεται, καὶ ταῦτ' ἀλλήλοις καὶ τῷ Α, οὕτω μὲν ἐνδέχεται ἐξ ἀλλήλων δεικνύναι πάντα τὰ αἰτηθέντα ἐν τῷ πρώτῳ σχήματι, ὥς δέδεικται ἐν τοῖς περὶ συλλογισμοῦ. δέδεικται δὲ καὶ ὅτι ἐν τοῖς ἄλλοις σχήμασιν ἢ οὐ γίνεται συλλογισμὸς ἢ οὐ περὶ τῶν ληφθέντων. τὰ δὲ μὴ ἀντικατηγορούμενα οὐδαμῶς ἔστι δεῖξαι κύκλῳ, ὥστ' ἐπειδὴ ὀλίγα τοιαῦτα ἐν ταῖς ἀποδείξεσι, φανερόν ὅτι κενόν τε καὶ ἀδύνατον τὸ λέγειν ἐξ ἀλλήλων εἶναι τὴν ἀπόδειξιν καὶ διὰ τοῦτο πάντων ἐνδέχεσθαι εἶναι ἀπόδειξιν.

Κεφάλαιο 4

Ἐπεὶ δ' ἀδύνατον ἄλλως ἔχειν οὐ ἔστιν ἐπιστήμη ἀπλῶς, ἀναγκαῖον ἂν εἴη τὸ ἐπιστητὸν τὸ κατὰ τὴν ἀποδεικτικὴν ἐπιστήμην· ἀποδεικτικὴ δ' ἐστὶν ἣν ἔχομεν τῷ ἔχειν ἀπόδειξιν. ἐξ ἀναγκαιῶν ἄρα συλλογισμὸς ἐστὶν ἡ ἀπόδειξις. ληπτέον ἄρα ἐκ τίνων καὶ ποίων αἱ ἀποδείξεις εἰσὶν. πρῶτον δὲ διορίσωμεν τί λέγομεν τὸ κατὰ παντὸς καὶ τί τὸ καθ' αὐτὸ καὶ τί τὸ καθόλου.

Κατὰ παντὸς μὲν οὖν τοῦτο λέγω ὃ ἂν ἦ μὴ ἐπὶ τινὸς μὲν τινὸς δὲ μὴ, μηδὲ ποτὲ μὲν ποτὲ δὲ μὴ, οἷον εἰ κατὰ παντὸς ἀνθρώπου ζῶν, εἰ ἀληθὲς τόνδ' εἰπεῖν ἄνθρωπον, ἀληθὲς καὶ ζῶν, καὶ εἰ νῦν θάτερον, καὶ θάτερον, καὶ εἰ ἐν πάσῃ γραμμῇ στιγμή, ὡσαύτως. σημεῖον δέ· καὶ γὰρ τὰς ἐνστάσεις οὕτω φέρομεν ὥς κατὰ παντὸς ἐρωτώμενοι, ἢ εἰ ἐπὶ τινὶ μὴ, ἢ εἰ ποτὲ μὴ. Καθ' αὐτὰ δ' ὅσα ὑπάρχει τε ἐν τῷ τί ἐστὶν, οἷον τριγώνῳ γραμμῇ καὶ γραμμῇ στιγμή (γὰρ οὐσία αὐτῶν ἐκ τούτων ἐστί, καὶ ἐν τῷ λόγῳ τῷ λέγοντι τί ἐστὶν ἐνυπάρχει), καὶ ὅσοις τῶν ὑπαρχόντων αὐτοῖς αὐτὰ ἐν τῷ λόγῳ ἐνυπάρχουσι τῷ τί ἐστὶ δηλοῦντι, οἷον τὸ εὐθὺ ὑπάρχει γραμμῇ καὶ τὸ περιφερές, καὶ τὸ περιττὸν καὶ ἄρτιον ἀριθμῷ, καὶ τὸ πρῶτον καὶ σύνθετον, καὶ ἰσόπλευρον (73b.) καὶ ἐτερόμηκες· καὶ πᾶσι τούτοις ἐνυπάρχουσιν ἐν τῷ λόγῳ τῷ τί ἐστὶ λέγοντι ἔνθα μὲν γραμμῇ ἔνθα δ' ἀριθμός. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων τὰ τοιαῦθ' ἐκάστοις καθ' αὐτὰ λέγω, ὅσα δὲ μηδετέρως ὑπάρχει, συμβεβηκότα, οἷον τὸ μουσικὸν ἢ λευκὸν τῷ ζῳῳ.

ἔτι ὃ μὴ καθ' ὑποκειμένου λέγεται ἄλλου τινός, οἷον τὸ βαδίζον ἕτερόν τι ὃν βαδίζον ἐστὶ καὶ τὸ λευκόν, ἢ δ' οὐσία, καὶ ὅσα τότε τι σημαίνει, οὐχ ἕτερόν τι ὄντα ἐστὶν ὅπερ ἐστίν. τὰ μὲν δὴ μὴ καθ' ὑποκειμένου καθ' αὐτὰ λέγω, τὰ δὲ καθ' ὑποκειμένου συμβεβηκότα. ἔτι δ' ἄλλον τρόπον τὸ μὲν δι' αὐτὸ ὑπάρχον ἐκάστῳ καθ' αὐτό, τὸ δὲ μὴ δι' αὐτὸ συμβεβηκός, οἷον εἰ βαδίζοντος ἤστραψε, συμβεβηκός· οὐ γὰρ διὰ τὸ βαδίζειν ἤστραπεν, ἀλλὰ συνέβη, φασμέν, τοῦτο. εἰ δὲ δι' αὐτό, καθ' αὐτό, οἷον εἴ τι σφαττόμενον ἀπέθανε, καὶ κατὰ τὴν σφαγὴν, ὅτι διὰ τὸ σφάττεσθαι, ἀλλ' οὐ συνέβη σφαττόμενον ἀποθανεῖν.

τὰ ἄρα λεγόμενα ἐπὶ τῶν ἀπλῶς ἐπιστητῶν καθ' αὐτὰ οὕτως ὡς ἐνυπάρχειν τοῖς κατηγορουμένοις ἢ ἐνυπάρχεσθαι δι' αὐτὰ τέ ἐστι

καὶ ἐξ ἀνάγκης. οὐ γὰρ ἐνδέχεται μὴ ὑπάρχειν ἢ ἀπλῶς ἢ τὰ ἀντικείμενα, οἷον γραμμῇ τὸ εὐθύ ἢ τὸ καμπύλον καὶ ἀριθμῷ τὸ περιττὸν ἢ τὸ ἄρτιον. ἔστι γὰρ τὸ ἐναντίον ἢ στέρησις ἢ ἀντίφασις ἐν τῷ αὐτῷ γένει, οἷον ἄρτιον τὸ μὴ περιττὸν ἐν ἀριθμοῖς ἢ ἔπεται. ὥστ' εἰ ἀνάγκη φάναι ἢ ἀποφάναι, ἀνάγκη καὶ τὰ καθ' αὐτὰ ὑπάρχειν.

Τὸ μὲν οὖν κατὰ παντὸς καὶ καθ' αὐτὸ διωρίσθω τὸν τρόπον τοῦτον· καθόλου δὲ λέγω ὃ ἂν κατὰ παντός τε ὑπάρχει καὶ καθ' αὐτὸ καὶ ἡ αὐτό. φανερόν ἄρα ὅτι ὅσα καθόλου, ἐξ ἀνάγκης ὑπάρχει τοῖς πράγμασιν. τὸ καθ' αὐτὸ δὲ καὶ ἡ αὐτὸ ταυτόν, οἷον καθ' αὐτὴν τῇ γραμμῇ ὑπάρχει στιγμή καὶ τὸ εὐθύ (καὶ γὰρ ἡ γραμμὴ), καὶ τῷ τριγώνῳ ἢ τρίγωνον δύο ὀρθαί (καὶ γὰρ καθ' αὐτὸ τὸ τρίγωνον δύο ὀρθαῖς ἴσον). τὸ καθόλου δὲ ὑπάρχει τότε, ὅταν ἐπὶ τοῦ τυχόντος καὶ πρώτου δεικνύηται. οἷον τὸ δύο ὀρθὰς ἔχειν οὔτε τῷ σχήματι ἔστι καθόλου (καίτοι ἔστι δεῖξαι κατὰ σχήματος ὅτι δύο ὀρθὰς ἔχει, ἀλλ' οὐ τοῦ τυχόντος σχήματος, οὐδὲ χρῆται τῷ τυχόντι σχήματι δεικνύς· τὸ γὰρ τετράγωνον σχῆμα μὲν, οὐκ ἔχει δὲ δύο ὀρθαῖς ἴσας)- τὸ δ' ἰσοσκελὲς ἔχει μὲν τὸ τυχὸν δύο ὀρθαῖς ἴσας, ἀλλ' οὐ πρῶτον, ἀλλὰ τὸ τρίγωνον πρότερον. ὃ τοίνυν τὸ τυχὸν πρῶτον δείκνυται δύο ὀρθὰς ἔχον ἢ ὅτιοῦν ἄλλο, τούτῳ πρώτῳ (74a.) ὑπάρχει καθόλου, καὶ ἢ ἀπόδειξις καθ' αὐτὸ τούτου καθόλου ἐστὶ, τῶν δ' ἄλλων τρόπον τινὰ οὐ καθ' αὐτό, οὐδὲ τοῦ ἰσοσκελοῦς οὐκ ἔστι καθόλου ἀλλ' ἐπὶ πλέον.

Κεφάλαιο 5

Δεῖ δὲ μὴ λανθάνειν ὅτι πολλάκις συμβαίνει διαμαρτάνειν καὶ μὴ ὑπάρχειν τὸ δεικνύμενον πρῶτον καθόλου, ἢ δοκεῖ δεικνυσθαι καθόλου πρῶτον. ἀπατώμεθα δὲ ταύτην τὴν ἀπάτην, ὅταν ἡ μηδὲν ἢ λαβεῖν ἀνώτερον παρὰ τὸ καθ' ἕκαστον [ἢ τὰ καθ' ἕκαστα], ἢ ἡ μὲν, ἀλλ' ἀνώνυμον ἢ ἐπὶ διαφοροῖς εἶδει πράγμασιν, ἢ τυγχάνη ὄν ὡς ἐν μέρει ὅλον ἐφ' ᾧ δεικνύται· τοῖς γὰρ ἐν μέρει ὑπάρξει μὲν ἢ ἀπόδειξις, καὶ ἔσται κατὰ παντός, ἀλλ' ὅμως οὐκ ἔσται τούτου πρῶτου καθόλου ἢ ἀπόδειξις. λέγω δὲ τούτου πρῶτου, ἢ τοῦτο, ἀπόδειξιν, ὅταν ἢ πρῶτου καθόλου. εἰ οὖν τις δείξειεν ὅτι αἱ ὀρθαὶ οὐ συμπίπτουσι, δόξειεν ἂν τούτου εἶναι ἢ ἀπόδειξις διὰ τὸ ἐπὶ πασῶν εἶναι τῶν ὀρθῶν. οὐκ ἔστι δέ, εἴπερ μὴ ὅτι ὠδὶ ἴσαι γίνεται τοῦτο, ἀλλ' ἢ ὅπως οὖν ἴσαι. καὶ εἰ τρίγωνον μὴ ἦν ἄλλο ἢ ἰσοσκελές, ἢ ἰσοσκελές ἂν ἐδόκει ὑπάρχειν. καὶ τὸ ἀνάλογον ὅτι καὶ ἐναλλάξ, ἢ ἀριθμοὶ καὶ ἢ γραμμαὶ καὶ ἢ στερεὰ καὶ ἢ χρόνοι, ὥσπερ ἐδείκνυτο ποτε χωρὶς, ἐνδεχόμενόν γε κατὰ πάντων μιᾷ ἀποδείξει δειχθῆναι· ἀλλὰ διὰ τὸ μὴ εἶναι ὠνομασμένον τι ταῦτα πάντα ἐν, ἀριθμοὶ μήκη χρόνοι στερεά, καὶ εἶδει διαφέρειν ἀλλήλων, χωρὶς ἐλαμβάνετο. νῦν δὲ καθόλου δεικνύται· οὐ γὰρ ἢ γραμματῆ ἢ ἀριθμοὶ ὑπῆρχεν, ἀλλ' ἢ τοδί, ὃ καθόλου ὑποτίθενται ὑπάρχειν. διὰ τοῦτο οὐδ' ἂν τις δείξῃ καθ' ἕκαστον τὸ τρίγωνον ἀποδείξει ἢ μιᾷ ἢ ἑτέρᾳ ὅτι δύο ὀρθὰς ἔχει ἕκαστον, τὸ ἰσόπλευρον χωρὶς καὶ τὸ σκαληνές καὶ τὸ ἰσοσκελές, οὐπω οἶδε τὸ τρίγωνον ὅτι δύο ὀρθαῖς, εἰ μὴ τὸν σοφιστικὸν τρόπον, οὐδὲ καθ' ὅλου τριγώνου, οὐδ' εἰ μηδὲν ἔστι παρὰ ταῦτα τρίγωνον ἕτερον. οὐ γὰρ ἢ τρίγωνον οἶδεν, οὐδὲ πᾶν τρίγωνον, ἀλλ' ἢ κατ' ἀριθμόν· κατ' εἶδος δ' οὐ πᾶν, καὶ εἰ μηδὲν ἔστιν ὃ οὐκ οἶδεν.

Πότ' οὖν οὐκ οἶδε καθόλου, καὶ πότ' οἶδεν ἀπλῶς; δηλον δὴ ὅτι εἰ ταυτὸν ἦν τριγώνῳ εἶναι καὶ ἰσοπλεύρῳ ἢ ἐκάστω ἢ πᾶσιν. εἰ δὲ μὴ ταυτὸν ἀλλ' ἕτερον, ὑπάρχει δ' ἢ τρίγωνον, οὐκ οἶδεν. πότερον δ' ἢ τρίγωνον ἢ ἢ ἰσοσκελές ὑπάρχει; καὶ πότε κατὰ τοῦθ' ὑπάρχει πρῶτον; καὶ καθόλου τίνος ἢ ἀπόδειξις; δηλον ὅτι ὅταν ἀφαιρουμένων ὑπάρχη πρῶτῳ. οἶον τῷ ἰσοσκελεῖ χαλκῷ τριγώνῳ ὑπάρξουσι δύο ὀρθαί, ἀλλὰ καὶ τοῦ χαλκοῦν εἶναι ἀφαιρεθέντος (74b.) καὶ τοῦ ἰσοσκελές. ἀλλ' οὐ τοῦ σχήματος ἢ πέρατος. ἀλλ' οὐ

πρώτων. τίνας οὖν πρώτου; εἰ δὴ τριγώνου, κατὰ τοῦτο ὑπάρχει καὶ τοῖς ἄλλοις, καὶ τούτου καθόλου ἐστὶν ἡ ἀπόδειξις. Εἰ οὖν ἐστὶν ἡ ἀποδεικτικὴ ἐπιστήμη ἐξ ἀναγκαίων ἀρχῶν (ὃ γὰρ ἐπίσταται, οὐ δυνατόν ἄλλως ἔχειν), τὰ δὲ καθ' αὐτὰ ὑπάρχοντα ἀναγκαῖα τοῖς πράγμασιν (τὰ μὲν γὰρ ἐν τῷ τί ἐστὶν ὑπάρχει· τοῖς δ' αὐτὰ ἐν τῷ τί ἐστὶν ὑπάρχει κατηγορουμένοις αὐτῶν, ὧν θάτερον τῶν ἀντικειμένων ἀνάγκη ὑπάρχειν), φανερόν ὅτι ἐκ τοιούτων τινῶν ἂν εἴη ὁ ἀποδεικτικὸς συλλογισμὸς· ἅπαν γὰρ ἢ οὕτως ὑπάρχει ἢ κατὰ συμβεβηκός, τὰ δὲ συμβεβηκότα οὐκ ἀναγκαῖα.

Κεφάλαιο 6

Ἡ δὴ οὕτω λεκτέον, ἡ ἀρχὴν θεμένοις ὅτι ἡ ἀπόδειξις ἀναγκαίων ἐστὶ, καὶ εἰ ἀποδεδείκται, οὐχ οἷόν τ' ἄλλως ἔχειν· ἐξ ἀναγκαίων ἄρα δεῖ εἶναι τὸν συλλογισμόν. ἐξ ἀληθῶν μὲν γὰρ ἔστι καὶ μὴ ἀποδεικνύντα συλλογίσασθαι, ἐξ ἀναγκαίων δ' οὐκ ἔστιν ἄλλ' ἢ ἀποδεικνύντα· τοῦτο γὰρ ἤδη ἀποδείξεώς ἐστιν. σημεῖον δ' ὅτι ἡ ἀπόδειξις ἐξ ἀναγκαίων, ὅτι καὶ τὰς ἐνστάσεις οὕτω φέρομεν πρὸς τοὺς οἰομένους ἀποδεικνύναι, ὅτι οὐκ ἀνάγκη, ἂν οἰώμεθα ἢ ὅλως ἐνδέχεσθαι ἄλλως ἢ ἔνεκά γε τοῦ λόγου. δηλὸν δ' ἐκ τούτων καὶ ὅτι εὐήθεις οἱ λαμβάνειν οἰόμενοι καλῶς τὰς ἀρχάς, ἐὰν ἐνδοξος ἦ ἢ πρότασις καὶ ἀληθής, οἷον οἱ σοφισταὶ ὅτι τὸ ἐπίστασθαι τὸ ἐπιστήμην ἔχειν. οὐ γὰρ τὸ ἐνδοξὸν ἡμῖν ἀρχή ἐστιν, ἀλλὰ τὸ πρῶτον τοῦ γένους περὶ ὃ δείκνυται· καὶ τάληθές οὐ πᾶν οἰκεῖον. ὅτι δ' ἐξ ἀναγκαίων εἶναι δεῖ τὸν συλλογισμόν, φανερόν καὶ ἐκ τῶνδε. εἰ γὰρ ὁ μὴ ἔχων λόγον τοῦ διὰ τί οὕσης ἀποδείξεως οὐκ ἐπιστήμων, εἴη δ' ἂν ὥστε τὸ Α κατὰ τοῦ Γ ἐξ ἀνάγκης ὑπάρχειν, τὸ δὲ Β τὸ μέσον, δι' οὗ ἀπεδείχθη, μὴ ἐξ ἀνάγκης, οὐκ οἶδε διότι. οὐ γὰρ ἐστὶ τοῦτο διὰ τὸ μέσον· τὸ μὲν γὰρ ἐνδέχεται μὴ εἶναι, τὸ δὲ συμπέρασμα ἀναγκαῖον. ἔτι εἴ τις μὴ οἶδε νῦν ἔχων τὸν λόγον καὶ σφῶζόμενος, σφῶζόμενου τοῦ πράγματος, μὴ ἐπιλελησμένος, οὐδὲ πρότερον ἦδει. φθαρείη δ' ἂν τὸ μέσον, εἰ μὴ ἀναγκαῖον, ὥστε ἔξει μὲν τὸν λόγον σφῶζόμενος σφῶζόμενου τοῦ πράγματος, οὐκ οἶδε δέ. οὐδ' ἄρα πρότερον ἦδει. εἰ δὲ μὴ ἔφθαρται, ἐνδέχεται δὲ φθαρῆναι, τὸ συμβαῖνον ἂν εἴη δυνατόν καὶ ἐνδεχόμενον. ἀλλ' ἔστιν ἀδύνατον οὕτως ἔχοντα εἰδέναι.

(75a.) Ὅταν μὲν οὖν τὸ συμπέρασμα ἐξ ἀνάγκης ἦ, οὐδὲν κωλύει τὸ μέσον μὴ ἀναγκαῖον εἶναι δι' οὗ ἐδείχθη (ἔστι γὰρ τὸ ἀναγκαῖον καὶ μὴ ἐξ ἀναγκαίων συλλογίσασθαι, ὥσπερ καὶ ἀληθές μὴ ἐξ ἀληθῶν)· ὅταν δὲ τὸ μέσον ἐξ ἀνάγκης, καὶ τὸ συμπέρασμα ἐξ ἀνάγκης, ὥσπερ καὶ ἐξ ἀληθῶν ἀληθές ἀεί (ἔστω γὰρ τὸ Α κατὰ τοῦ Β ἐξ ἀνάγκης, καὶ τοῦτο κατὰ τοῦ Γ· ἀναγκαῖον τοίνυν καὶ τὸ Α τῷ Γ ὑπάρχειν)· ὅταν δὲ μὴ ἀναγκαῖον ἦ τὸ συμπέρασμα, οὐδὲ τὸ μέσον ἀναγκαῖον οἷόν τ' εἶναι (ἔστω γὰρ τὸ Α τῷ Γ μὴ ἐξ ἀνάγκης ὑπάρχειν, τῷ δὲ Β, καὶ τοῦτο τῷ Γ ἐξ ἀνάγκης· καὶ τὸ Α ἄρα τῷ Γ ἐξ ἀνάγκης ὑπάρξει· ἀλλ' οὐχ ὑπέκειτο).

Ἐπεὶ τοίνυν εἰ ἐπίσταται ἀποδεικτικῶς, δεῖ ἐξ ἀνάγκης ὑπάρχειν, δῆλον ὅτι καὶ διὰ μέσου ἀναγκαίου δεῖ ἔχειν τὴν ἀπόδειξιν· ἢ οὐκ ἐπιστήσεται οὔτε διότι οὔτε ὅτι ἀνάγκη ἐκεῖνο εἶναι, ἀλλ' ἢ οἰήσεται οὐκ εἰδώς, ἐὰν ὑπολάβῃ ὡς ἀναγκαῖον τὸ μὴ ἀναγκαῖον, ἢ οὐδ' οἰήσεται, ὁμοίως ἐὰν τε τὸ ὅτι εἰδῇ διὰ μέσων ἐὰν τε τὸ διότι καὶ δι' ἀμέσων.

Τῶν δὲ συμβεβηκότων μὴ καθ' αὐτά, ὃν τρόπον διωρίσθη τὰ καθ' αὐτά, οὐκ ἔστιν ἐπιστήμη ἀποδεικτική. οὐ γὰρ ἔστιν ἐξ ἀνάγκης δεῖξαι τὸ συμπέρασμα· τὸ συμβεβηκὸς γὰρ ἐνδέχεται μὴ ὑπάρχειν· περὶ τοῦ τοιούτου γὰρ λέγω συμβεβηκός. καίτοι ἀπορήσειεν ἂν τις ἴσως τίνος ἔνεκα ταῦτα δεῖ ἐρωτᾶν περὶ τούτων, εἰ μὴ ἀνάγκη τὸ συμπέρασμα εἶναι· οὐδὲν γὰρ διαφέρει εἴ τις ἐρόμενος τὰ τυχόντα εἶτα εἴπειεν τὸ συμπέρασμα. δεῖ δ' ἐρωτᾶν οὐχ ὡς ἀναγκαῖον εἶναι διὰ τὰ ἡρωτημένα, ἀλλ' ὅτι λέγειν ἀνάγκη τῷ ἐκεῖνα λέγοντι, καὶ ἀληθῶς λέγειν, ἐὰν ἀληθῶς ἦ ὑπάρχοντα.

Ἐπεὶ δ' ἐξ ἀνάγκης ὑπάρχει περὶ ἕκαστον γένος ὅσα καθ' αὐτὰ ὑπάρχει καὶ ἡ ἕκαστον, φανερόν ὅτι περὶ τῶν καθ' αὐτὰ ὑπαρχόντων αἱ ἐπιστημονικαὶ ἀποδείξεις καὶ ἐκ τῶν τοιούτων εἰσὶν. τὰ μὲν γὰρ συμβεβηκότα οὐκ ἀναγκαῖα, ὥστ' οὐκ ἀνάγκη τὸ συμπέρασμα εἰδέναι διότι ὑπάρχει, οὐδ' εἰ ἀεὶ εἶη, μὴ καθ' αὐτὸ δέ, οἷον οἱ διὰ σημείων συλλογισμοί. τὸ γὰρ καθ' αὐτὸ οὐ καθ' αὐτὸ ἐπιστήσεται, οὐδὲ διότι (τὸ δὲ διότι ἐπίστασθαι ἐστὶ τὸ διὰ τοῦ αἰτίου ἐπίστασθαι), δι' αὐτὸ ἄρα δεῖ καὶ τὸ μέσον τῷ τρίτῳ καὶ τὸ πρῶτον τῷ μέσῳ ὑπάρχειν.

Κεφάλαιο 7

Οὐκ ἄρα ἔστιν ἐξ ἄλλου γένους μεταβάντα δεῖξαι, οἷον τὸ γεωμετρικὸν ἀριθμητικῇ. τρία γάρ ἐστι τὰ ἐν ταῖς ἀποδείξεσιν, ἐν μὲν τὸ ἀποδεικνύμενον, τὸ συμπέρασμα (τοῦτο δ' ἐστὶ τὸ ὑπάρχον γένει τινὶ καθ' αὐτό), ἐν δὲ τὰ ἐξιώματα (ἀξιώματα δ' ἐστὶν ἐξ ὧν)· τρίτον τὸ γένος τὸ ὑποκείμενον, (75b.) οὗ τὰ πάθη καὶ τὰ καθ' αὐτὰ συμβεβηκότα δηλοῖ ἡ ἀπόδειξις. ἐξ ὧν μὲν οὖν ἡ ἀπόδειξις, ἐνδέχεται τὰ αὐτὰ εἶναι· ὧν δὲ τὸ γένος ἕτερον, ὥσπερ ἀριθμητικῆς καὶ γεωμετρίας, οὐκ ἔστι τὴν ἀριθμητικὴν ἀπόδειξιν ἐφαρμόσαι ἐπὶ τὰ τοῖς μεγέθεσι συμβεβηκότα, εἰ μὴ τὰ μεγέθη ἀριθμοὶ εἴσι· τοῦτο δ' ὡς ἐνδέχεται ἐπὶ τινων, ὕστερον λεχθήσεται. ἡ δ' ἀριθμητικὴ ἀπόδειξις αἰετῶς ἔχει τὸ γένος περὶ ὃ ἡ ἀπόδειξις, καὶ αἱ ἄλλαι ὁμοίως. ὥστ' ἡ ἀπλῶς ἀνάγκη τὸ αὐτὸ εἶναι γένος ἢ πῆ, εἰ μέλλει ἡ ἀπόδειξις μεταβαίνειν. ἄλλως δ' ὅτι ἀδύνατον, δηλόν· ἐκ γὰρ τοῦ αὐτοῦ γένους ἀνάγκη τὰ ἄκρα καὶ τὰ μέσα εἶναι. εἰ γὰρ μὴ καθ' αὐτά, συμβεβηκότα ἔσται. διὰ τοῦτο τῇ γεωμετρίᾳ οὐκ ἔστι δεῖξαι ὅτι τῶν ἐναντίων μία ἐπιστήμη, ἀλλ' οὐδ' ὅτι οἱ δύο κύβοι κύβος· οὐδ' ἄλλη ἐπιστήμη τὸ ἐτέρας, ἀλλ' ἡ ὅσα οὕτως ἔχει πρὸς ἄλληλα ὥστ' εἶναι θάτερον ὑπὸ θάτερον, οἷον τὰ ὀπτικά πρὸς γεωμετρίαν καὶ τὰ ἀρμονικὰ πρὸς ἀριθμητικὴν. οὐδ' εἴ τι ὑπάρχει ταῖς γραμμαῖς μὴ ἢ γραμμαὶ καὶ ἢ ἐκ τῶν ἀρχῶν τῶν ἰδίων, οἷον εἰ καλλίστη τῶν γραμμῶν ἢ εὐθεῖα ἢ εἰ ἐναντίως ἔχει τῇ περιφερεῖ· οὐ γὰρ ἢ τὸ ἴδιον γένος αὐτῶν, ὑπάρχει, ἀλλ' ἢ κοινόν τι.

Κεφάλαιο 8

Φανερόν δὲ καὶ ἐὰν ὧσιν αἱ προτάσεις καθόλου ἐξ ὧν ὁ συλλογισμός, ὅτι ἀνάγκη καὶ τὸ συμπέρασμα ἄδιον εἶναι τῆς τοιαύτης ἀποδείξεως καὶ τῆς ἀπλῶς εἰπεῖν ἀποδείξεως. οὐκ ἔστιν ἄρα ἀπόδειξις τῶν φθαρτῶν οὐδ' ἐπιστήμη ἀπλῶς, ἀλλ' οὕτως ὥσπερ κατὰ συμβεβηκός, ὅτι οὐ καθ' ὅλου αὐτοῦ ἐστὶν ἀλλὰ ποτὲ καὶ πῶς. ὅταν δ' ἦ, ἀνάγκη τὴν ἑτέραν μὴ καθόλου εἶναι πρότασιν καὶ φθαρτὴν-φθαρτὴν μὲν ὅτι ἔσται καὶ τὸ συμπέρασμα οὔσης, μὴ καθόλου δὲ ὅτι τῷ μὲν ἔσται τῷ δ' οὐκ ἔσται ἐφ' ὧν-ὥστ' οὐκ ἔστι συλλογίσασθαι καθόλου, ἀλλ' ὅτι νῦν. ὁμοίως δ' ἔχει καὶ περὶ ὁρισμούς, ἐπεὶ ἐστὶν ὁ ὁρισμὸς ἢ ἀρχὴ ἀποδείξεως ἢ ἀπόδειξις θέσει διαφέρουσα ἢ συμπέρασμά τι ἀποδείξεως. αἱ δὲ τῶν πολλάκις γινομένων ἀποδείξεις καὶ ἐπιστήμαι, οἷον σελήνης ἐκλείψεως, δῆλον ὅτι ἡ μὲν τοιοῦδ' εἰσὶν, ἀεὶ εἰσὶν, ἡ δ' οὐκ ἀεὶ, κατὰ μέρος εἰσὶν. ὥσπερ δ' ἡ ἐκλειψις, ὡσαύτως τοῖς ἄλλοις.

Κεφάλαιο 9

Ἐπεὶ δὲ φανερόν ὅτι ἕκαστον ἀποδείξαι οὐκ ἔστιν ἄλλ' ἢ ἐκ τῶν ἐκάστου ἀρχῶν, ἂν τὸ δεικνύμενον ὑπάρχη ἢ ἐκείνο, οὐκ ἔστι τὸ ἐπίστασθαι τοῦτο, ἂν ἐξ ἀληθῶν καὶ ἀναποδείκτων δειχθῇ καὶ ἀμέσων. ἔστι γὰρ οὕτω δεῖξαι, ὥσπερ Βρύσων τὸν τετραγωνισμόν. κατὰ κοινόν τε γὰρ δεικνύουσιν οἱ τοιοῦτοι λόγοι, ὃ καὶ ἐτέρῳ ὑπάρξει· διὸ καὶ ἐπ' ἄλλων ἐφαρμόττουσιν (76a.) οἱ λόγοι οὐ συγγενῶν. οὐκοῦν οὐχ ἢ ἐκείνο ἐπίσταται, ἀλλὰ κατὰ συμβεβηκός· οὐ γὰρ ἂν ἐφήρμοστέν ἢ ἀπόδειξις καὶ ἐπ' ἄλλο γένος.

Ἐκαστον δ' ἐπιστάμεθα μὴ κατὰ συμβεβηκός, ὅταν κατ' ἐκείνο γινώσκωμεν καθ' ὃ ὑπάρχει, ἐκ τῶν ἀρχῶν τῶν ἐκείνου ἢ ἐκείνο, οἷον τὸ δυσὶν ὀρθαῖς ἴσας ἔχειν, ὃ ὑπάρχει καθ' αὐτὸ τὸ εἰρημένον, ἐκ τῶν ἀρχῶν τῶν τούτου. ὥστ' εἰ καθ' αὐτὸ καὶ ἐκείνο ὑπάρχει ὃ ὑπάρχει, ἀνάγκη τὸ μέσον ἐν τῇ αὐτῇ συγγενείᾳ εἶναι. εἰ δὲ μή, ἄλλ' ὥς τὰ ἀρμονικὰ δι' ἀριθμητικῆς. τὰ δὲ τοιαῦτα δείκνυται μὲν ὡσαύτως, διαφέρει δέ· τὸ μὲν γὰρ ὅτι ἐτέρας ἐπιστήμης (τὸ γὰρ ὑποκείμενον γένος ἕτερον), τὸ δὲ διότι τῆς ἄνω, ἥς καθ' αὐτὰ τὰ πάθη ἐστίν. ὥστε καὶ ἐκ τούτων φανερόν ὅτι οὐκ ἔστιν ἀποδείξαι ἕκαστον ἀπλῶς ἄλλ' ἢ ἐκ τῶν ἐκάστου ἀρχῶν. ἀλλὰ τούτων αἱ ἀρχαὶ ἔχουσι τὸ κοινόν.

Εἰ δὲ φανερόν τοῦτο, φανερόν καὶ ὅτι οὐκ ἔστι τὰς ἐκάστου ἰδίας ἀρχὰς ἀποδείξαι· ἔσονται γὰρ ἐκεῖναι ἀπάντων ἀρχαί, καὶ ἐπιστήμη ἢ ἐκείνων κυρία πάντων. καὶ γὰρ ἐπίσταται μᾶλλον ὁ ἐκ τῶν ἀνώτερον αἰτίων εἰδώς· ἐκ τῶν προτέρων γὰρ οἶδεν, ὅταν ἐκ μὴ αἰτιατῶν εἰδῇ αἰτίων. ὥστ' εἰ μᾶλλον οἶδε καὶ μάλιστα, κἂν ἐπιστήμη ἐκείνη εἴη καὶ μᾶλλον καὶ μάλιστα. ἢ δ' ἀπόδειξις οὐκ ἐφαρμόττει ἐπ' ἄλλο γένος, ἄλλ' ἢ ὡς εἴρηται αἱ γεωμετρικαὶ ἐπὶ τὰς μηχανικὰς ἢ ὀπτικὰς καὶ αἱ ἀριθμητικαὶ ἐπὶ τὰς ἀρμονικὰς.

Χαλεπὸν δ' ἐστὶ τὸ γνῶναι εἰ οἶδεν ἢ μή. χαλεπὸν γὰρ τὸ γνῶναι εἰ ἐκ τῶν ἐκάστου ἀρχῶν ἴσμεν ἢ μή· ὅπερ ἐστὶ τὸ εἰδέναι. οἰόμεθα δ', ἂν ἔχωμεν ἐξ ἀληθινῶν τινῶν συλλογισμόν καὶ πρώτων, ἐπίστασθαι. τὸ δ' οὐκ ἔστιν, ἀλλὰ συγγενῇ δεῖ εἶναι τοῖς πρώτοις.

Κεφάλαιο 10

Λέγω δ' ἀρχὰς ἐν ἐκάστῳ γένει ταύτας ἃς ὅτι ἔστι μὴ ἐνδέχεται δεῖξαι. τί μὲν οὖν σημαίνει καὶ τὰ πρῶτα καὶ τὰ ἐκ τούτων, λαμβάνεται, ὅτι δ' ἔστι, τὰς μὲν ἀρχὰς ἀνάγκη λαμβάνειν, τὰ δ' ἄλλα δεικνύναι· οἷον τί μονὰς ἢ τί τὸ εὐθὺ καὶ τρίγωνον, εἶναι δὲ τὴν μονάδα λαβεῖν καὶ μέγεθος, τὰ δ' ἕτερα δεικνύναι.

Ἔστι δ' ὧν χρῶνται ἐν ταῖς ἀποδεικτικαῖς ἐπιστήμαις τὰ μὲν ἴδια ἐκάστης ἐπιστήμης τὰ δὲ κοινὰ, κοινὰ δὲ κατ' ἀναλογίαν, ἐπεὶ χρήσιμόν γε ὅσον ἐν τῷ ὑπὸ τὴν ἐπιστήμην γένει· ἴδια μὲν οἷον γραμμὴν εἶναι τοιανδί καὶ τὸ εὐθύ, κοινὰ δὲ οἷον τὸ ἴσα ἀπὸ ἴσων ἂν ἀφέλῃ, ὅτι ἴσα τὰ λοιπά. ἱκανὸν δ' ἕκαστον τούτων ὅσον ἐν τῷ γένει· ταῦτὸ γὰρ ποιήσει, (76b.) κἂν μὴ κατὰ πάντων λάβῃ ἀλλ' ἐπὶ μεγεθῶν μόνον, τῷ δ' ἀριθμητικῷ ἐπ' ἀριθμῶν.

Ἔστι δ' ἴδια μὲν καὶ ἃ λαμβάνεται εἶναι, περὶ ἃ ἡ ἐπιστήμη θεωρεῖ τὰ ὑπάρχοντα καθ' αὐτά, οἷον μονάδας ἢ ἀριθμητική, ἢ δὲ γεωμετρία σημεῖα καὶ γραμμάς. ταῦτα γὰρ λαμβάνουσι τὸ εἶναι καὶ τοδὶ εἶναι. τὰ δὲ τούτων πάθη καθ' αὐτά, τί μὲν σημαίνει ἕκαστον, λαμβάνουσιν, οἷον ἢ μὲν ἀριθμητικὴ τί περιττὸν ἢ ἄρτιον ἢ τετράγωνον ἢ κύβος, ἢ δὲ γεωμετρία τί τὸ ἄλογον ἢ τὸ κεκλάσθαι ἢ νεύειν, ὅτι δ' ἔστι, δεικνύουσι διὰ τε τῶν κοινῶν καὶ ἐκ τῶν ἀποδεδειγμένων. καὶ ἡ ἀστρολογία ὡσαύτως. πᾶσα γὰρ ἀποδεικτικὴ ἐπιστήμη περὶ τρία ἐστίν, ὅσα τε εἶναι τίθεται (ταῦτα δ' ἐστὶ τὸ γένος, οὗ τῶν καθ' αὐτὰ παθημάτων ἐστὶ θεωρητική), καὶ τὰ κοινὰ λεγόμενα ἀξιώματα, ἐξ ὧν πρώτων ἀποδείκνυσι, καὶ τρίτον τὰ πάθη, ὧν τί σημαίνει ἕκαστον λαμβάνει. ἐνίας μέντοι ἐπιστήμας οὐδὲν κωλύει ἔνια τούτων παρορᾶν, οἷον τὸ γένος μὴ ὑποτίθεσθαι εἶναι, ἂν ἢ φανερόν ὅτι ἔστιν (οὐ γὰρ ὁμοίως δηλὸν ὅτι ἀριθμὸς ἔστι καὶ ὅτι ψυχρὸν καὶ θερμόν), καὶ τὰ πάθη μὴ λαμβάνειν τί σημαίνει, ἂν ἢ δηλα· ὥσπερ οὐδὲ τὰ κοινὰ οὐ λαμβάνει τί σημαίνει τὸ ἴσα ἀπὸ ἴσων ἀφελεῖν, ὅτι γνώριμον. ἀλλ' οὐδὲν ἦττον τῇ γε φύσει τρία ταυτὰ ἐστὶ, περὶ ὃ τε δείκνυσι καὶ ἃ δείκνυσι καὶ ἐξ ὧν.

Οὐκ ἔστι δ' ὑπόθεσις οὐδ' αἴτημα, ὃ ἀνάγκη εἶναι δι' αὐτὸ καὶ δοκεῖν ἀνάγκη. οὐ γὰρ πρὸς τὸν ἔξω λόγον ἢ ἀπόδειξις, ἀλλὰ πρὸς τὸν ἐν τῇ ψυχῇ, ἐπεὶ οὐδὲ συλλογισμός. αἰεὶ γὰρ ἔστιν ἐνστήναι πρὸς τὸν ἔξω λόγον, ἀλλὰ πρὸς τὸν ἔσω λόγον οὐκ αἰεὶ. ὅσα μὲν οὖν

δεικτὰ ὄντα λαμβάνει αὐτὸς μὴ δείξας, ταῦτ', ἐὰν μὲν δοκοῦντα λαμβάνῃ τῷ μανθάνοντι, ὑποτίθεται, καὶ ἔστιν οὐχ ἀπλῶς ὑπόθεσις ἀλλὰ πρὸς ἐκεῖνον μόνον, ἂν δὲ ἢ μηδεμιᾶς ἐνούσης δόξης ἢ καὶ ἐναντίας ἐνούσης λαμβάνῃ τὸ αὐτό, αἰτεῖται. καὶ τούτῳ διαφέρει ὑπόθεσις καὶ αἴτημα· ἔστι γὰρ αἴτημα τὸ ὑπεναντίον τοῦ μανθάνοντος τῇ δόξει, ἢ ὃ ἂν τις ἀποδεικτὸν ὄν λαμβάνῃ καὶ χρῆται μὴ δείξας.

Οἱ μὲν οὖν ὅροι οὐκ εἰσὶν ὑποθέσεις (οὐδὲν γὰρ εἶναι ἢ μὴ λέγεται), ἀλλ' ἐν ταῖς προτάσεσιν αἱ ὑποθέσεις, τοὺς δ' ὅρους μόνον ξυνίεσθαι δεῖ· τοῦτο δ' οὐχ ὑπόθεσις (εἰ μὴ καὶ τὸ ἀκούειν ὑπόθεσιν τις εἶναι φήσῃ), ἀλλ' ὅσων ὄντων τῷ ἐκεῖνα εἶναι γίνεται τὸ συμπέρασμα. (οὐδ' ὁ γεωμέτρης ψευδῇ ὑποτίθεται, ὥσπερ τινὲς ἔφασαν, λέγοντες ὡς οὐ δεῖ τῷ ψεύδει χρῆσθαι, τὸν δὲ γεωμέτρην ψεύδεσθαι λέγοντα ποδιαίαν τὴν οὐ ποδιαίαν ἢ εὐθεῖαν τὴν γεγραμμένην οὐκ εὐθεῖαν (77a.) οὔσαν. ὁ δὲ γεωμέτρης οὐδὲν συμπεραίνεται τῷ τήνδε εἶναι γραμμὴν ἣν αὐτὸς ἔφθεγκται, ἀλλὰ τὰ διὰ τούτων δηλούμενα.) ἔτι τὸ αἴτημα καὶ ὑπόθεσις πᾶσα ἢ ὡς ὅλον ἢ ὡς ἐν μέρει, οἱ δ' ὅροι οὐδέτερον τούτων.

Κεφάλαιο 11

Εἶδη μὲν οὖν εἶναι ἢ ἔν τι παρὰ τὰ πολλὰ οὐκ ἀνάγκη, εἰ ἀπόδειξις ἔσται, εἶναι μέντοι ἔν κατὰ πολλῶν ἀληθὲς εἰπεῖν ἀνάγκη - οὐ γὰρ ἔσται τὸ καθόλου, ἂν μὴ τοῦτο ἦ - ἐὰν δὲ τὸ καθόλου μὴ ἦ, τὸ μέσον οὐκ ἔσται, ὥστ' οὐδ' ἀπόδειξις. δεῖ ἄρα τι ἔν καὶ τὸ αὐτὸ ἐπὶ πλειόνων εἶναι μὴ ὁμόνυμον. τὸ δὲ μὴ ἐνδέχεσθαι ἅμα φάναι καὶ ἀποφάναι οὐδεμία λαμβάνει ἀπόδειξις, ἀλλ' ἢ ἐὰν δέη δεῖξαι καὶ τὸ συμπέρασμα οὕτως. δείκνυται δὲ λαβοῦσι τὸ πρῶτον κατὰ τοῦ μέσου, ὅτι ἀληθές, ἀποφάναι δ' οὐκ ἀληθές. τὸ δὲ μέσον οὐδὲν διαφέρει εἶναι καὶ μὴ εἶναι λαβεῖν, ὡς δ' αὐτως καὶ τὸ τρίτον. εἰ γὰρ ἐδόθη, καθ' οὗ ἄνθρωπον ἀληθὲς εἰπεῖν, εἰ καὶ μὴ ἄνθρωπον ἀληθές, ἀλλ' εἰ μόνον ἄνθρωπον ζῶν εἶναι, μὴ ζῶν δὲ μή, ἔσται [γὰρ] ἀληθὲς εἰπεῖν Καλλίαν, εἰ καὶ μὴ Καλλίαν, ὅμως ζῶν, μὴ ζῶν δ' οὐ. αἴτιον δ' ὅτι τὸ πρῶτον οὐ μόνον κατὰ τοῦ μέσου λέγεται ἀλλὰ καὶ κατ' ἄλλου διὰ τὸ εἶναι ἐπὶ πλειόνων, ὥστ' οὐδ' εἰ τὸ μέσον καὶ αὐτὸ ἐστὶ καὶ μὴ αὐτό, πρὸς τὸ συμπέρασμα οὐδὲν διαφέρει. τὸ δ' ἅπαν φάναι ἢ ἀποφάναι ἢ εἰς τὸ ἀδύνατον ἀπόδειξις λαμβάνει, καὶ ταῦτα οὐδ' ἀεὶ καθόλου, ἀλλ' ὅσον ἰκανόν, ἰκανὸν δ' ἐπὶ τοῦ γένους. λέγω δ' ἐπὶ τοῦ γένους οἷον περὶ ὃ γένος τὰς ἀποδείξεις φέρει, ὥσπερ εἴρηται καὶ πρότερον.

Ἐπικοινωνοῦσι δὲ πᾶσαι αἱ ἐπιστῆμαι ἀλλήλαις κατὰ τὰ κοινά (κοινὰ δὲ λέγω οἷς χρῶνται ὡς ἐκ τούτων ἀποδεικνύντες, ἀλλ' οὐ περὶ ὧν δεικνύουσιν οὐδ' ὃ δεικνύουσιν), καὶ ἡ διαλεκτικὴ πάσαις, καὶ εἴ τις καθόλου πειρῶτο δεικνύναι τὰ κοινά, οἷον ὅτι ἅπαν φάναι ἢ ἀποφάναι, ἢ ὅτι ἴσα ἀπὸ ἴσων, ἢ τῶν τοιούτων ἅττα. ἡ δὲ διαλεκτικὴ οὐκ ἔστιν οὕτως ὠρισμένων τινῶν, οὐδὲ γένους τινὸς ἐνός. οὐ γὰρ ἂν ἡρώτατο ἀποδεικνύντα γὰρ οὐκ ἔστιν ἐρωτᾶν διὰ τὸ τῶν ἀντικειμένων ὄντων μὴ δείκνυσθαι τὸ αὐτό. δέδεικται δὲ τοῦτο ἐν τοῖς περὶ συλλογισμοῦ.

Κεφάλαιο 12

Εἰ δὲ τὸ αὐτὸ ἐστὶν ἐρώτημα συλλογιστικὸν καὶ πρότασις ἀντιφάσεως, προτάσεις δὲ καθ' ἐκάστην ἐπιστήμην ἐξ ὧν ὁ συλλογισμὸς ὁ καθ' ἐκάστην, εἴη ἂν τι ἐρώτημα ἐπιστημονικόν, ἐξ ὧν ὁ καθ' ἐκάστην οἰκεῖος γίνεται συλλογισμὸς. δῆλον ἄρα ὅτι οὐ πᾶν ἐρώτημα γεωμετρικὸν ἂν εἴη οὐδ' ἱατρικόν, ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων· ἀλλ' ἐξ (77b.) ὧν δείκνυται τι περὶ ὧν ἡ γεωμετρία ἐστίν, ἢ ἃ ἐκ τῶν αὐτῶν δείκνυται τῇ γεωμετρίᾳ, ὥσπερ τὰ ὀπτικά. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων. καὶ περὶ μὲν τούτων καὶ λόγον ὑφεκτέον ἐκ τῶν γεωμετρικῶν ἀρχῶν καὶ συμπερασμάτων, περὶ δὲ τῶν ἀρχῶν λόγον οὐχ ὑφεκτέον τῷ γεωμέτρῃ ἢ γεωμέτρῃς· ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων ἐπιστημῶν. οὔτε πᾶν ἄρα ἕκαστον ἐπιστήμονα ἐρώτημα ἐρωτητέον, οὔθ' ἅπαν τὸ ἐρωτώμενον ἀποκριτέον περὶ ἐκάστου, ἀλλὰ τὰ κατὰ τὴν ἐπιστήμην διορισθέντα. εἰ δὲ διαλέξεται γεωμέτρῃ ἢ γεωμέτρῃς οὕτως, φανερόν ὅτι καὶ καλῶς, ἐὰν ἐκ τούτων τι δεικνύῃ· εἰ δὲ μὴ, οὐ καλῶς. δῆλον δ' ὅτι οὐδ' ἐλέγχει γεωμέτρην ἀλλ' ἢ κατὰ συμβεβηκός· ὥστ' οὐκ ἂν εἴη ἐν ἀγεωμετρήτοις περὶ γεωμετρίας διαλεκτέον· λήσει γὰρ ὁ φαύλως διαλεγόμενος. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων ἔχει ἐπιστημῶν.

Ἐπεὶ δ' ἔστι γεωμετρικὰ ἐρωτήματα, ἅρ' ἔστι καὶ ἀγεωμέτρητα; καὶ παρ' ἐκάστην ἐπιστήμην τὰ κατὰ τὴν ἄγνοιαν τὴν ποίαν γεωμετρικὰ ἐστίν; καὶ πότερον ὁ κατὰ τὴν ἄγνοιαν συλλογισμὸς ὁ ἐκ τῶν ἀντικειμένων συλλογισμὸς, ἢ ὁ παραλογισμὸς, κατὰ γεωμετρίαν δέ, ἢ <ὁ> ἐξ ἄλλης τέχνης, οἷον τὸ μουσικόν ἐστὶν ἐρώτημα ἀγεωμέτρητον περὶ γεωμετρίας, τὸ δὲ τὰς παραλλήλους συμπίπτειν οἶεσθαι γεωμετρικόν πως καὶ ἀγεωμέτρητον ἄλλον τρόπον; διττὸν γὰρ τοῦτο, ὥσπερ τὸ ἄρρυθμον, καὶ τὸ μὲν ἕτερον ἀγεωμέτρητον τῷ μὴ ἔχειν [ὥσπερ τὸ ἄρρυθμον], τὸ δ' ἕτερον τῷ φαύλως ἔχειν· καὶ ἡ ἄγνοια αὕτη καὶ ἡ ἐκ τῶν τοιούτων ἀρχῶν ἐναντία. ἐν δὲ τοῖς μαθήμασιν οὐκ ἔστιν ὁμοίως ὁ παραλογισμὸς, ὅτι τὸ μέσον ἐστὶν αἰεὶ τὸ διττόν· κατὰ τε γὰρ τούτου παντός, καὶ τοῦτο πάλιν κατ' ἄλλου λέγεται παντός (τὸ δὲ κατηγορούμενον οὐ λέγεται πᾶν), ταῦτα δ' ἔστιν οἷον ὅρᾶν τῇ νοήσει, ἐν δὲ τοῖς λόγοις λανθάνει. ἄρα πᾶς κύκλος σχῆμα; ἂν δὲ γράψῃ, δῆλον. τί δέ; τὰ ἔπη κύκλος; φανερόν ὅτι οὐκ ἔστιν.

Οὐ δεῖ δ' ἔνστασιν εἰς αὐτὸ φέρειν, ἂν ἢ ἡ πρότασις ἐπακτική. ὥσπερ γὰρ οὐδὲ πρότασις ἐστὶν ἢ μὴ ἔστιν ἐπὶ πλειόνων (οὐ γὰρ ἔσται ἐπὶ πάντων, ἐκ τῶν καθόλου δ' ὁ συλλογισμός), δηλὸν ὅτι οὐδ' ἔνστασις. αἱ αὐταὶ γὰρ προτάσεις καὶ ἐνστάσεις· ἦν γὰρ φέρει ἐνστασιν, αὕτη γένοιτ' ἂν πρότασις ἢ ἀποδεικτική ἢ διαλεκτική.

Συμβαίνει δ' ἐνίους ἀσυλλογίστως λέγειν διὰ τὸ λαμβάνειν ἀμφοτέροις τὰ ἐπόμενα, οἷον καὶ ὁ Καινεὺς ποιεῖ, (78a.) ὅτι τὸ πῦρ ἐν τῇ πολλαπλασίᾳ ἀναλογία· καὶ γὰρ τὸ πῦρ ταχὺ γεννᾶται, ὥς φησι, καὶ αὕτη ἡ ἀναλογία. οὕτω δ' οὐκ ἔστι συλλογισμός· ἀλλ' εἰ τῇ ταχίστῃ ἀναλογία ἔπεται ἡ πολλαπλασίωσις καὶ τῷ πυρὶ ἡ ταχίστη ἐν τῇ κινήσει ἀναλογία. ἐνίοτε μὲν οὖν οὐκ ἐνδέχεται συλλογίσασθαι ἐκ τῶν εἰλημμένων, ὅτε δ' ἐνδέχεται, ἀλλ' οὐχ ὁρᾶται.

Εἰ δ' ἦν ἀδύνατον ἐκ ψεύδους ἀληθὲς δεῖξαι, ῥάδιον ἂν ἦν τὸ ἀναλύειν· ἀντέστρεφε γὰρ ἂν ἐξ ἀνάγκης. ἔστω γὰρ τὸ Α ὄν· τούτου δ' ὄντος ταδὶ ἔστιν, ἃ οἶδα ὅτι ἔστιν, οἷον τὸ Β. ἐκ τούτων ἄρα δεῖξω ὅτι ἔστιν ἐκεῖνο. ἀντιστρέφει δὲ μᾶλλον τὰ ἐν τοῖς μαθήμασιν, ὅτι οὐδὲν συμβεβηκὸς λαμβάνουσιν (ἀλλὰ καὶ τούτῳ διαφέρουσι τῶν ἐν τοῖς διαλόγοις) ἀλλ' ὀρισμούς. Αὔξεται δ' οὐ διὰ τῶν μέσων, ἀλλὰ τῷ προσλαμβάνειν, οἷον τὸ Α τοῦ Β, τοῦτο δὲ τοῦ Γ, πάλιν τοῦτο τοῦ Δ, καὶ τοῦτ' εἰς ἄπειρον· καὶ εἰς τὸ πλάγιον, οἷον τὸ Α καὶ κατὰ τοῦ Γ καὶ κατὰ τοῦ Ε, οἷον ἔστιν ἀριθμὸς ποσὸς ἢ καὶ ἄπειρος τοῦτο ἐφ' ᾧ Α, ὁ περιττὸς ἀριθμὸς ποσὸς ἐφ' οὗ Β, ἀριθμὸς περιττὸς ἐφ' οὗ Γ· ἔστιν ἄρα τὸ Α κατὰ τοῦ Γ. καὶ ἔστιν ὁ ἄρτιος ποσὸς ἀριθμὸς ἐφ' οὗ Δ, ὁ ἄρτιος ἀριθμὸς ἐφ' οὗ Ε· ἔστιν ἄρα τὸ Α κατὰ τοῦ Ε.

Κεφάλαιο 13

Τὸ δ' ὅτι διαφέρει καὶ τὸ διότι ἐπίστασθαι, πρῶτον μὲν ἐν τῇ αὐτῇ ἐπιστήμῃ, καὶ ἐν ταύτῃ διχῶς, ἓνα μὲν τρόπον ἐὰν μὴ δι' ἀμέσων γίνηται ὁ συλλογισμός (οὐ γὰρ λαμβάνεται τὸ πρῶτον αἴτιον, ἡ δὲ τοῦ διότι ἐπιστήμη κατὰ τὸ πρῶτον αἴτιον), ἄλλον δὲ εἰ δι' ἀμέσων μὲν, ἀλλὰ μὴ διὰ τοῦ αἰτίου ἀλλὰ τῶν ἀντιστρεφόντων διὰ τοῦ γνωριμωτέρου. κωλύει γὰρ οὐδὲν τῶν ἀντικατηγορουμένων γνωριμώτερον εἶναι ἐνίοτε τὸ μὴ αἴτιον, ὥστ' ἔσται διὰ τούτου ἡ ἀπόδειξις, οἷον ὅτι ἐγγὺς οἱ πλάνητες διὰ τοῦ μὴ στίλβειν. ἔστω ἐφ' ᾧ Γ πλάνητες, ἐφ' ᾧ Β τὸ μὴ στίλβειν, ἐφ' ᾧ Α τὸ ἐγγὺς εἶναι. ἀληθὲς δὴ τὸ Β κατὰ τοῦ Γ εἰπεῖν· οἱ γὰρ πλάνητες οὐ στίλβουσιν. ἀλλὰ καὶ τὸ Α κατὰ τοῦ Β· τὸ γὰρ μὴ στίλβον ἐγγὺς ἐστὶ· τοῦτο δ' εἰλήφθω δι' ἐπαγωγῆς ἢ δι' αἰσθήσεως. ἀνάγκη οὖν τὸ Α τῷ Γ ὑπάρχειν, ὥστ' ἀποδέδεικται ὅτι οἱ πλάνητες ἐγγὺς εἰσιν. οὗτος οὖν ὁ συλλογισμὸς οὐ τοῦ διότι ἀλλὰ τοῦ ὅτι ἐστίν· οὐ γὰρ διὰ τὸ μὴ στίλβειν ἐγγὺς εἰσιν, ἀλλὰ διὰ τὸ ἐγγὺς εἶναι οὐ στίλβουσιν. ἐγχωρεῖ δὲ καὶ διὰ θατέρου θάτερον δειχθῆναι, καὶ ἔσται τοῦ διότι ἡ ἀπόδειξις, οἷον ἔστω τὸ Γ πλάνητες, ἐφ' ᾧ Β (78b.) τὸ ἐγγὺς εἶναι, τὸ Α τὸ μὴ στίλβειν· ὑπάρχει δὴ καὶ τὸ Β τῷ Γ καὶ τὸ Α τῷ Β, ὥστε καὶ τῷ Γ τὸ Α [τὸ μὴ στίλβειν]. καὶ ἔστι τοῦ διότι ὁ συλλογισμὸς· εἴληπται γὰρ τὸ πρῶτον αἴτιον. πάλιν ὡς τὴν σελήνην δεικνύουσιν ὅτι σφαιροειδῆς, διὰ τῶν αὐξήσεων· εἰ γὰρ τὸ αὐξανόμενον οὕτω σφαιροειδές, αὐξάνει δ' ἡ σελήνη, φανερόν ὅτι σφαιροειδῆς· οὕτω μὲν οὖν τοῦ ὅτι γέγονεν ὁ συλλογισμὸς, ἀνάπαλιν δὲ τεθέντος τοῦ μέσου τοῦ διότι· οὐ γὰρ διὰ τὰς αὐξήσεις σφαιροειδῆς ἐστίν, ἀλλὰ διὰ τὸ σφαιροειδῆς εἶναι λαμβάνει τὰς αὐξήσεις τοιαύτας. σελήνη ἐφ' ᾧ Γ, σφαιροειδῆς ἐφ' ᾧ Β, αὐξήσις ἐφ' ᾧ Α. ἐφ' ᾧ δὲ τὰ μέσα μὴ ἀντιστρέφει καὶ ἔστι γνωριμώτερον τὸ ἀναίτιον, τὸ ὅτι μὲν δείκνυται, τὸ διότι δ' οὐ.

Ἔτι ἐφ' ᾧ τὸ μέσον ἔξω τίθεται. καὶ γὰρ ἐν τούτοις τοῦ ὅτι καὶ οὐ τοῦ διότι ἡ ἀπόδειξις· οὐ γὰρ λέγεται τὸ αἴτιον. οἷον διὰ τί οὐκ ἀναπνεῖ ὁ τοῖχος; ὅτι οὐ ζῶν. εἰ γὰρ τοῦτο τοῦ μὴ ἀναπνεῖν αἴτιον, ἔδει τὸ ζῶν εἶναι αἴτιον τοῦ ἀναπνεῖν, οἷον εἰ ἡ ἀπόφασις αἰτία τοῦ μὴ ὑπάρχειν, ἡ κατὰφασις τοῦ ὑπάρχειν, ὥσπερ εἰ τὸ ἀσύμμετρα εἶναι τὰ θερμὰ καὶ τὰ ψυχρὰ τοῦ μὴ ὑγιαίνειν, τὸ σύμμετρα εἶναι τοῦ

ὕγιαίνειν, -ὁμοίως δὲ καὶ εἰ ἡ κατάφασις τοῦ ὑπάρχειν, ἡ ἀπόφασις τοῦ μὴ ὑπάρχειν. ἐπὶ δὲ τῶν οὕτως ἀποδοδεομένων οὐ συμβαίνει τὸ λεχθέν· οὐ γὰρ ἅπαν ἀναπνεῖ ζῶον. ὁ δὲ συλλογισμὸς γίνεται τῆς τοιαύτης αἰτίας ἐν τῷ μέσῳ σχήματι. οἷον ἔστω τὸ Α ζῶον, ἐφ' ᾧ Β τὸ ἀναπνεῖν, ἐφ' ᾧ Γ τοῖχος. τῷ μὲν οὖν Β παντὶ ὑπάρχει τὸ Α (πᾶν γὰρ τὸ ἀναπνέον ζῶον), τῷ δὲ Γ οὐθενί, ὥστε οὐδὲ τὸ Β τῷ Γ οὐθενί· οὐκ ἄρα ἀναπνεῖ ὁ τοῖχος. εἰκότασι δ' αἱ τοιαῦται τῶν αἰτιῶν τοῖς καθ' ὑπερβολὴν εἰρημένους· τοῦτο δ' ἔστι τὸ πλέον ἀποστήσαντα τὸ μέσον εἰπεῖν, οἷον τὸ τοῦ Ἀναχάρσιος, ὅτι ἐν Σκύθαις οὐκ εἰσὶν αὐλητρίδες, οὐδὲ γὰρ ἄμπελοι.

Κατὰ μὲν δὴ τὴν αὐτὴν ἐπιστήμην καὶ κατὰ τὴν τῶν μέσων θέσιν αὐταὶ διαφοραὶ εἰσι τοῦ ὅτι πρὸς τὸν τοῦ διότι συλλογισμόν· ἄλλον δὲ τρόπον διαφέρει τὸ διότι τοῦ ὅτι τῷ δι' ἄλλης ἐπιστήμης ἐκάτερον θεωρεῖν. τοιαῦτα δ' ἐστὶν ὅσα οὕτως ἔχει πρὸς ἄλληλα ὥστ' εἶναι θάτερον ὑπὸ θάτερον, οἷον τὰ ὀπτικά πρὸς γεωμετρίαν καὶ τὰ μηχανικὰ πρὸς στερεομετρίαν καὶ τὰ ἁρμονικὰ πρὸς ἀριθμητικὴν καὶ τὰ φαινόμενα πρὸς ἀστρολογικὴν. σχεδὸν δὲ συνώνυμοί εἰσιν ἔναια τούτων τῶν ἐπιστημῶν, οἷον ἀστρολογία ἢ τε μαθηματικὴ (79a.) καὶ ἡ ναυτικὴ, καὶ ἁρμονικὴ ἢ τε μαθηματικὴ καὶ ἡ κατὰ τὴν ἀκοήν. ἐνταῦθα γὰρ τὸ μὲν ὅτι τῶν αἰσθητικῶν εἰδέναι, τὸ δὲ διότι τῶν μαθηματικῶν· οὗτοι γὰρ ἔχουσι τῶν αἰτίων τὰς ἀποδείξεις, καὶ πολλάκις οὐκ ἴσασι τὸ ὅτι, καθάπερ οἱ τὸ καθόλου θεωροῦντες πολλάκις ἔνια τῶν καθ' ἕκαστον οὐκ ἴσασι δι' ἀνεπισκεψίαν. ἔστι δὲ ταῦτα ὅσα ἕτερόν τι ὄντα τὴν οὐσίαν κέχρηται τοῖς εἶδεσιν. τὰ γὰρ μαθήματα περὶ εἶδη ἐστίν· οὐ γὰρ καθ' ὑποκειμένου τινός· εἰ γὰρ καὶ καθ' ὑποκειμένου τινὸς τὰ γεωμετρικὰ ἐστίν, ἀλλ' οὐχ ἢ γε καθ' ὑποκειμένου. ἔχει δὲ καὶ πρὸς τὴν ὀπτικὴν, ὡς αὕτη πρὸς τὴν γεωμετρίαν, ἄλλη πρὸς ταύτην, οἷον τὸ περὶ τῆς ἱριδος· τὸ μὲν γὰρ ὅτι φυσικοῦ εἰδέναι, τὸ δὲ διότι ὀπτικοῦ, ἢ ἀπλῶς ἢ τοῦ κατὰ τὸ μάθημα. πολλαὶ δὲ καὶ τῶν μὴ ὑπ' ἀλλήλας ἐπιστημῶν ἔχουσιν οὕτως, οἷον ἰατρικὴ πρὸς γεωμετρίαν· ὅτι μὲν γὰρ τὰ ἔλκη τὰ περιφερῆ βραδύτερον ὑγιάζεται, τοῦ ἱατροῦ εἰδέναι, διότι δὲ τοῦ γεωμέτρου.

Κεφάλαιο 14

Τῶν δὲ σχημάτων ἐπιστημονικὸν μάλιστα τὸ πρῶτόν ἐστιν. αἱ τε γὰρ μαθηματικαὶ τῶν ἐπιστημῶν διὰ τούτου φέρουσι τὰς ἀποδείξεις, οἷον ἀριθμητικὴ καὶ γεωμετρία καὶ ὀπτική, καὶ σχεδὸν ὡς εἰπεῖν ὅσαι τοῦ διότι ποιοῦνται τὴν σκέψιν· ἢ γὰρ ὅλως ἢ ὡς ἐπὶ τὸ πολὺ καὶ ἐν τοῖς πλείστοις διὰ τούτου τοῦ σχήματος ὁ τοῦ διότι συλλογισμός. ὥστε κἂν διὰ τοῦτ' εἴη μάλιστα ἐπιστημονικόν· κυριώτατον γὰρ τοῦ εἰδέναι τὸ διότι θεωρεῖν. εἴτα τὴν τοῦ τί ἐστὶν ἐπιστήμην διὰ μόνου τούτου θηρεῦσαι δυνατόν. ἐν μὲν γὰρ τῷ μέσῳ σχήματι οὐ γίνεται κατηγορικὸς συλλογισμός, ἡ δὲ τοῦ τί ἐστὶν ἐπιστήμη καταφάσεως· ἐν δὲ τῷ ἐσχάτῳ γίνεται μὲν ἀλλ' οὐ καθόλου, τὸ δὲ τί ἐστὶ τῶν καθόλου ἐστίν· οὐ γὰρ πῃ ἐστὶ ζῶον δίπουν ὁ ἄνθρωπος. ἔτι τοῦτο μὲν ἐκείνων οὐδὲν προσδεῖται, ἐκεῖνα δὲ διὰ τούτου καταπυκνοῦται καὶ αὖξεται, ἕως ἂν εἰς τὰ ἄμεσα ἔλθῃ. φανερόν οὖν ὅτι κυριώτατον τοῦ ἐπίστασθαι τὸ πρῶτον σχῆμα.

Κεφάλαιο 15

Ὡςπερ δὲ ὑπάρχειν τὸ Α τῷ Β ἐνεδέχεται ἀτόμως, οὕτω καὶ μὴ ὑπάρχειν ἐγγωρεῖ. λέγω δὲ τὸ ἀτόμως ὑπάρχειν ἢ μὴ ὑπάρχειν τὸ μὴ εἶναι αὐτῶν μέσον· οὕτω γὰρ οὐκέτι ἔσται κατ' ἄλλο τὸ ὑπάρχειν ἢ μὴ ὑπάρχειν. ὅταν μὲν οὖν ἢ τὸ Α ἢ τὸ Β ἐν ὅλῳ τινὶ ἦ, ἢ καὶ ἄμφω, οὐκ ἐνδέχεται τὸ Α τῷ Β πρώτως μὴ ὑπάρχειν. ἔστω γὰρ τὸ Α ἐν ὅλῳ τῷ Γ. οὐκοῦν εἰ τὸ Β μὴ ἔστιν ἐν ὅλῳ τῷ Γ (ἐγγωρεῖ γὰρ τὸ μὲν Α εἶναι ἐν τινὶ ὅλῳ, τὸ δὲ Β μὴ εἶναι ἐν τούτῳ), συλλογισμὸς ἔσται τοῦ μὴ ὑπάρχειν τὸ Α τῷ Β· εἰ γὰρ τῷ μὲν (79b.) Α παντὶ τὸ Γ, τῷ δὲ Β μηδενί, οὐδενὶ τῷ Β τὸ Α. ὁμοίως δὲ καὶ εἰ τὸ Β ἐν ὅλῳ τινὶ ἔστιν, οἷον ἐν τῷ Δ· τὸ μὲν γὰρ Δ παντὶ τῷ Β ὑπάρχει, τὸ δὲ Α οὐδενὶ τῷ Δ, ὥστε τὸ Α οὐδενὶ τῷ Β ὑπάρξει διὰ συλλογισμοῦ. τὸν αὐτὸν δὲ τρόπον δειχθήσεται καὶ εἰ ἄμφω ἐν ὅλῳ τινὶ ἔστιν. ὅτι δ' ἐνδέχεται τὸ Β μὴ εἶναι ἐν ᾧ ὅλῳ ἐστὶ τὸ Α, ἢ πάλιν τὸ Α ἐν ᾧ τὸ Β, φανερόν ἐκ τῶν συστοιχιῶν, ὅσαι μὴ ἐπαλλάττουσιν ἀλλήλαις. εἰ γὰρ μηδὲν τῶν ἐν τῇ Α Γ Δ συστοιχία κατὰ μηδενὸς κατηγορεῖται τῶν ἐν τῇ Β Ε Ζ, τὸ δ' Α ἐν ὅλῳ ἐστὶ τῷ Θ συστοίχῳ ὄντι, φανερόν ὅτι τὸ Β οὐκ ἔσται ἐν τῷ Θ· ἐπαλλάξουσιν γὰρ αἱ συστοιχίαι. ὁμοίως δὲ καὶ εἰ τὸ Β ἐν ὅλῳ τινὶ ἔστιν. ἐὰν δὲ μηδέτερον ἢ ἐν ὅλῳ μηδενί, μὴ ὑπάρχει δὲ τὸ Α τῷ Β, ἀνάγκη ἀτόμως μὴ ὑπάρχειν. εἰ γὰρ ἔσται τι μέσον, ἀνάγκη θάτερον αὐτῶν ἐν ὅλῳ τινὶ εἶναι. ἢ γὰρ ἐν τῷ πρώτῳ σχήματι ἢ ἐν τῷ μέσῳ ἔσται ὁ συλλογισμὸς. εἰ μὲν οὖν ἐν τῷ πρώτῳ, τὸ Β ἔσται ἐν ὅλῳ τινὶ (καταφατικὴν γὰρ δεῖ τὴν πρὸς τοῦτο γενέσθαι πρότασιν), εἰ δ' ἐν τῷ μέσῳ, ὁπότερον ἔτυχεν (πρὸς ἀμφοτέροις γὰρ ληφθέντος τοῦ στερητικοῦ γίνεται συλλογισμὸς· ἀμφοτέρων δ' ἀποφατικῶν οὐσῶν οὐκ ἔσται).

Φανερόν οὖν ὅτι ἐνδέχεται τε ἄλλο ἄλλῳ μὴ ὑπάρχειν ἀτόμως, καὶ πότ' ἐνδέχεται καὶ πῶς, εἰρήκαμεν.

Κεφάλαιο 16

Ἄγνοια δ' ἢ μὴ κατ' ἀπόφασιν ἀλλὰ κατὰ διάθεσιν λεγομένη ἔστι μὲν ἢ διὰ συλλογισμοῦ γινομένη ἀπάτη, αὕτη δ' ἐν μὲν τοῖς πρώτως ὑπάρχουσιν ἢ μὴ ὑπάρχουσι συμβαίνει διχῶς· ἢ γὰρ ὅταν ἀπλῶς ὑπολάβῃ ὑπάρχειν ἢ μὴ ὑπάρχειν, ἢ ὅταν διὰ συλλογισμοῦ λάβῃ τὴν ὑπόληψιν. τῆς μὲν οὖν ἀπλῆς ὑπολήψεως ἀπλῇ ἢ ἀπάτῃ, τῆς δὲ διὰ συλλογισμοῦ πλείους, μὴ ὑπαρχέτω γὰρ τὸ Α μὴδενὶ τῷ Β ἀτόμως· οὐκοῦν ἐὰν συλλογίζεται ὑπάρχειν τὸ Α τῷ Β, μέσον λαβὼν τὸ Γ, ἡπατημένος ἔσται διὰ συλλογισμοῦ. ἐνδέχεται μὲν οὖν ἀμφοτέρας τὰς προτάσεις εἶναι ψευδεῖς, ἐνδέχεται δὲ τὴν ἑτέραν μόνον. εἰ γὰρ μήτε τὸ Α μὴδενὶ τῶν Γ ὑπάρχει μήτε τὸ Γ μὴδενὶ τῶν Β, εἴληπται δ' ἑκατέρα ἀνάπαλιν, ἄμφω ψευδεῖς ἔσονται. ἐγχωρεῖ δ' οὕτως ἔχειν τὸ Γ πρὸς τὸ Α καὶ Β ὥστε μήτε ὑπὸ τὸ Α εἶναι μήτε καθόλου τῷ Β. τὸ μὲν γὰρ Β ἀδύνατον εἶναι ἐν ὅλῳ τινί (πρώτως γὰρ ἐλέγετο αὐτῷ τὸ Α μὴ ὑπάρχειν), τὸ δὲ Α οὐκ ἀνάγκη πᾶσι τοῖς οὖσιν εἶναι καθόλου, ὥστ' ἀμφοτέραι ψευδεῖς. ἀλλὰ καὶ τὴν ἑτέραν ἐνδέχεται ἀληθῆ λαμβάνειν, οὐ μέντοι ὁποτέραν ἔτυχεν, ἀλλὰ τὴν (80a.) Α Γ· ἢ γὰρ Γ Β πρότασις αἰεὶ ψευδὴς ἔσται διὰ τὸ ἐν μὴδενὶ εἶναι τὸ Β, τὴν δὲ Α Γ ἐγχωρεῖ, οἷον εἰ τὸ Α καὶ τῷ Γ καὶ τῷ Β ὑπάρχει ἀτόμως (ὅταν γὰρ πρώτως κατηγορητῇ ταὐτὸ πλειόνων, οὐδέτερον ἐν οὐδετέρῳ ἔσται). διαφέρει δ' οὐδέν, οὐδ' εἰ μὴ ἀτόμως ὑπάρχει.

Ἡ μὲν οὖν τοῦ ὑπάρχειν ἀπάτη διὰ τούτων τε καὶ οὕτω γίνεται μόνως (οὐ γὰρ ἦν ἐν ἄλλῳ σχήματι τοῦ ὑπάρχειν συλλογισμός), ἢ δὲ τοῦ μὴ ὑπάρχειν ἐν τε τῷ πρώτῳ καὶ ἐν τῷ μέσῳ σχήματι. πρῶτον οὖν εἵπωμεν ποσαχῶς ἐν τῷ πρώτῳ γίνεται, καὶ πῶς ἐχουσῶν τῶν προτάσεων. ἐνδέχεται μὲν οὖν ἀμφοτέρων ψευδῶν οὐσῶν, οἷον εἰ τὸ Α καὶ τῷ Γ καὶ τῷ Β ὑπάρχει ἀτόμως· ἐὰν γὰρ ληφθῇ τὸ μὲν Α τῷ Γ μὴδενί, τὸ δὲ Γ παντὶ τῷ Β, ψευδεῖς αἱ προτάσεις. ἐνδέχεται δὲ καὶ τῆς ἑτέρας ψευδοῦς οὔσης, καὶ ταύτης ὁποτέρας ἔτυχεν. ἐγχωρεῖ γὰρ τὴν μὲν Α Γ ἀληθῆ εἶναι, τὴν δὲ Γ Β ψευδῆ, τὴν μὲν Α Γ ἀληθῆ ὅτι οὐ πᾶσι τοῖς οὖσιν ὑπάρχει τὸ Α, τὴν δὲ Γ Β ψευδῆ ὅτι ἀδύνατον ὑπάρχειν τῷ Β τὸ Γ, ὃ μὴδενὶ ὑπάρχει τὸ Α· οὐ γὰρ ἔτι ἀληθὴς ἔσται ἢ Α Γ πρότασις· ἅμα δέ, εἰ καὶ εἰσὶν ἀμφοτέραι ἀληθεῖς, καὶ τὸ συμπέρασμα ἔσται ἀληθές, ἀλλὰ καὶ τὴν Γ Β ἐνδέχεται ἀληθῆ εἶναι τῆς ἑτέρας οὔσης ψευδοῦς, οἷον εἰ τὸ Β καὶ ἐν τῷ Γ καὶ ἐν τῷ Α

ἐστίν· ἀνάγκη γὰρ θάτερον ὑπὸ θάτερον εἶναι, ὥστ' ἂν λάβῃ τὸ Α μηδενὶ τῷ Γ ὑπάρχειν, ψευδὴς ἔσται ἡ πρότασις. φανερὸν οὖν ὅτι καὶ τῆς ἐτέρας ψευδοῦς οὔσης καὶ ἀμφοῖν ἔσται ψευδὴς ὁ συλλογισμὸς.

Ἐν δὲ τῷ μέσῳ σχήματι ὅλας μὲν εἶναι τὰς προτάσεις ἀμφοτέρας ψευδεῖς οὐκ ἐνδέχεται· ὅταν γὰρ τὸ Α παντὶ τῷ Β ὑπάρχῃ, οὐδὲν ἔσται λαβεῖν ὃ τῷ μὲν ἐτέρῳ παντὶ θατέρῳ δ' οὐδενὶ ὑπάρξῃ· δεῖ δ' οὕτω λαμβάνειν τὰς προτάσεις ὥστε τῷ μὲν ὑπάρχειν τῷ δὲ μὴ ὑπάρχειν, εἴπερ ἔσται συλλογισμὸς. εἰ οὖν οὕτω λαμβανόμεναι ψευδεῖς, δῆλον ὡς ἐναντίως ἀνάπαλιν ἔξουσιν· τοῦτο δ' ἀδύνατον. ἐπὶ τι δ' ἐκατέραν οὐδὲν κωλύει ψευδῇ εἶναι, οἷον εἰ τὸ Γ καὶ τῷ Α καὶ τῷ Β τινὶ ὑπάρχοι· ἂν γὰρ τῷ μὲν Α παντὶ ληφθῇ ὑπάρχον, τῷ δὲ Β μηδενί, ψευδεῖς μὲν ἀμφοτέραι αἱ προτάσεις, οὐ μέντοι ὅλαι ἀλλ' ἐπὶ τι. καὶ ἀνάπαλιν δὲ τεθέντος τοῦ στερητικοῦ ὡσαύτως. τὴν δ' ἐτέραν εἶναι ψευδῇ καὶ ὅποτερανοῦν ἐνδέχεται. ὃ γὰρ ὑπάρχει τῷ Α παντί, καὶ τῷ Β ὑπάρχει· ἐὰν οὖν ληφθῇ τῷ μὲν Α ὅλῳ ὑπάρχειν (80b.) τὸ Γ, τῷ δὲ Β ὅλῳ μὴ ὑπάρχειν, ἡ μὲν Γ Α ἀληθὴς ἔσται, ἡ δὲ Γ Β ψευδής. πάλιν ὃ τῷ Β μηδενὶ ὑπάρχει, οὐδὲ τῷ Α παντὶ ὑπάρξῃ· εἰ γὰρ τῷ Α, καὶ τῷ Β· ἀλλ' οὐχ ὑπῆρχεν. ἐὰν οὖν ληφθῇ τὸ Γ τῷ μὲν Α ὅλῳ ὑπάρχειν, τῷ δὲ Β μηδενί, ἡ μὲν Γ Β πρότασις ἀληθὴς, ἡ δ' ἐτέρα ψευδής. ὁμοίως δὲ καὶ μετατεθέντος τοῦ στερητικοῦ. ὃ γὰρ μηδενὶ ὑπάρχει τῷ Α, οὐδὲ τῷ Β οὐδενὶ ὑπάρξῃ· ἐὰν οὖν ληφθῇ τὸ Γ τῷ μὲν Α ὅλῳ μὴ ὑπάρχειν, τῷ δὲ Β ὅλῳ ὑπάρχειν, ἡ μὲν Γ Α πρότασις ἀληθὴς ἔσται, ἡ ἐτέρα δὲ ψευδής. καὶ πάλιν, ὃ παντὶ τῷ Β ὑπάρχει, μηδενὶ λαβεῖν τῷ Α ὑπάρχον ψεῦδος. ἀνάγκη γάρ, εἰ τῷ Β παντί, καὶ τῷ Α τινὶ ὑπάρχειν· ἐὰν οὖν ληφθῇ τῷ μὲν Β παντὶ ὑπάρχειν τὸ Γ, τῷ δὲ Α μηδενί, ἡ μὲν Γ Β ἀληθὴς ἔσται, ἡ δὲ Γ Α ψευδής. φανερὸν οὖν ὅτι καὶ ἀμφοτέρων οὐσῶν ψευδῶν καὶ τῆς ἐτέρας μόνον ἔσται συλλογισμὸς ἀπατητικὸς ἐν τοῖς ἀτόμοις.

Κεφάλαιο 17

Ἐν δὲ τοῖς μὴ ἀτόμως ὑπάρχουσιν [ἢ μὴ ὑπάρχουσιν], ὅταν μὲν διὰ τοῦ οἰκείου μέσου γίνηται τοῦ ψεύδους ὁ συλλογισμός, οὐχ οἷόν τε ἀμφοτέρας ψευδεῖς εἶναι τὰς προτάσεις, ἀλλὰ μόνον τὴν πρὸς τῷ μείζονι ἄκρῳ. (λέγω δ' οἰκεῖον μέσον δι' οὗ γίνεται τῆς ἀντιφάσεως ὁ συλλογισμός.) ὑπαρχέτω γὰρ τὸ Α τῷ Β διὰ μέσου τοῦ Γ. ἐπεὶ οὖν ἀνάγκη τὴν Γ Β καταφατικὴν λαμβάνεσθαι συλλογισμοῦ γινομένου, δῆλον ὅτι ἀεὶ αὕτη ἔσται ἀληθής· οὐ γὰρ ἀντιστρέφεται. ἡ δὲ Α Γ ψευδής· ταύτης γὰρ ἀντιστρεφομένης ἐναντίος γίνεται ὁ συλλογισμός. ὁμοίως δὲ καὶ εἰ ἐξ ἄλλης συστοιχίας ληφθεῖν τὸ μέσον, οἷον τὸ Δ εἰ καὶ ἐν τῷ Α ὅλῳ ἐστι καὶ κατὰ τοῦ Β κατηγορεῖται παντός· ἀνάγκη γὰρ τὴν μὲν Δ Β πρότασιν μένειν, τὴν δ' ἑτέραν ἀντιστρέφεσθαι, ὥσθ' ἡ μὲν ἀεὶ ἀληθής, ἡ δ' ἀεὶ ψευδής. καὶ σχεδὸν ἢ γε τοιαύτη ἀπάτη ἡ αὕτη ἐστι τῇ διὰ τοῦ οἰκείου μέσου. ἐὰν δὲ μὴ διὰ τοῦ οἰκείου μέσου γίνηται ὁ συλλογισμός, ὅταν μὲν ὑπὸ τὸ Α ἢ τὸ μέσον, τῷ δὲ Β μηδενὶ ὑπάρχη, ἀνάγκη ψευδεῖς εἶναι ἀμφοτέρας. ληπτέαι γὰρ ἐναντίως ἢ ὡς ἔχουσιν αἱ προτάσεις, εἰ μέλλει συλλογισμὸς ἔσεσθαι· οὕτω δὲ λαμβανομένων ἀμφοτέραι γίνονται ψευδεῖς, οἷον εἰ τὸ μὲν Α ὅλῳ τῷ Δ ὑπάρχει, τὸ δὲ Δ μηδενὶ τῶν Β· ἀντιστραφέντων γὰρ τούτων συλλογισμὸς τ' ἔσται καὶ αἱ προτάσεις ἀμφοτέραι ψευδεῖς. ὅταν δὲ μὴ ἢ ὑπὸ τὸ Α τὸ μέσον, οἷον τὸ Δ, ἢ (81a.) μὲν Α Δ ἀληθής ἔσται, ἡ δὲ Δ Β ψευδής. ἡ μὲν γὰρ Α Δ ἀληθής, ὅτι οὐκ ἦν ἐν τῷ Α τὸ Δ, ἡ δὲ Δ Β ψευδής, ὅτι εἰ ἦν ἀληθής, κἂν τὸ συμπέρασμα ἦν ἀληθές· ἀλλ' ἦν ψεῦδος.

Διὰ δὲ τοῦ μέσου σχήματος γινομένης τῆς ἀπάτης, ἀμφοτέρας μὲν οὐκ ἐνδέχεται ψευδεῖς εἶναι τὰς προτάσεις ὅλας (ὅταν γὰρ ἢ τὸ Β ὑπὸ τὸ Α, οὐδὲν ἐνδέχεται τῷ μὲν παντὶ τῷ δὲ μηδενὶ ὑπάρχειν, καθάπερ ἐλέχθη καὶ πρότερον), τὴν ἑτέραν δ' ἐγκωρεῖ, καὶ ὁποτέραν ἔτυχεν. εἰ γὰρ τὸ Γ καὶ τῷ Α καὶ τῷ Β ὑπάρχει, ἐὰν ληφθῇ τῷ μὲν Α ὑπάρχειν τῷ δὲ Β μὴ ὑπάρχειν, ἡ μὲν Γ Α ἀληθής ἔσται, ἡ δ' ἑτέρα ψευδής. πάλιν δ' εἰ τῷ μὲν Β ληφθεῖν τὸ Γ ὑπάρχον, τῷ δὲ Α μηδενί, ἡ μὲν Γ Β ἀληθής ἔσται, ἡ δ' ἑτέρα ψευδής.

Ἐὰν μὲν οὖν στερητικὸς ἢ τῆς ἀπάτης ὁ συλλογισμός, εἴρηται πότε καὶ διὰ τίνων ἔσται ἡ ἀπάτη· ἐὰν δὲ καταφατικὸς, ὅταν μὲν διὰ τοῦ οἰκείου μέσου, ἀδύνατον ἀμφοτέρας εἶναι ψευδεῖς· ἀνάγκη γὰρ

τὴν Γ B μένειν, εἴπερ ἔσται συλλογισμός, καθάπερ ἐλέχθη καὶ πρότερον. ὥστε ἡ A Γ ἀεὶ ἔσται ψευδής· αὕτη γὰρ ἐστὶν ἡ ἀντιστρεφόμενη. ὁμοίως δὲ καὶ εἰ ἐξ ἄλλης συστοιχίας λαμβάνοιτο τὸ μέσον, ὥσπερ ἐλέχθη καὶ ἐπὶ τῆς στερητικῆς ἀπάτης· ἀνάγκη γὰρ τὴν μὲν Δ B μένειν, τὴν δ' A Δ ἀντιστρέφεσθαι, καὶ ἡ ἀπάτη ἡ αὕτη τῇ πρότερον. ὅταν δὲ μὴ διὰ τοῦ οἰκείου, ἐὰν μὲν ἦ τὸ Δ ὑπὸ τὸ A , αὕτη μὲν ἔσται ἀληθής, ἡ ἑτέρα δὲ ψευδής· ἐγχωρεῖ γὰρ τὸ A πλείοσιν ὑπάρχειν ἢ οὐκ ἔστιν ὑπ' ἄλληλα. ἐὰν δὲ μὴ ἦ τὸ Δ ὑπὸ τὸ A , αὕτη μὲν ἀεὶ δῆλον ὅτι ἔσται ψευδής (καταφατικὴ γὰρ λαμβάνεται), τὴν δὲ Δ B ἐνδέχεται καὶ ἀληθῆ εἶναι καὶ ψευδῇ· οὐδὲν γὰρ κωλύει τὸ μὲν A τῷ Δ μηδενὶ ὑπάρχειν, τὸ δὲ Δ τῷ B παντί, οἷον ζῶον ἐπιστήμη, ἐπιστήμη δὲ μουσικῇ. οὐδ' αὖ μήτε τὸ A μηδενὶ τῶν Δ μήτε τὸ Δ μηδενὶ τῶν B . [φανερὸν οὖν ὅτι μὴ ὄντος τοῦ μέσου ὑπὸ τὸ A καὶ ἀμφοτέρως ἐγχωρεῖ ψευδεῖς εἶναι καὶ ὁποτέραν ἔτυχεν.]

Ποσαχῶς μὲν οὖν καὶ διὰ τίνων ἐγχωρεῖ γίνεσθαι τὰς κατὰ συλλογισμὸν ἀπάτας ἐν τε τοῖς ἀμέσοις καὶ ἐν τοῖς δι' ἀποδείξεως, φανερὸν.

Κεφάλαιο 18

Φανερόν δὲ καὶ ὅτι, εἴ τις αἰσθησις ἐκλέλοιπεν, ἀνάγκη καὶ ἐπιστήμην τινὰ ἐκλέλοιπέναι, ἣν ἀδύνατον λαβεῖν, εἴπερ μανθάνομεν ἢ ἐπαγωγῇ ἢ ἀποδείξει, ἔστι δ' ἡ μὲν ἀπόδειξις (81b.) ἐκ τῶν καθόλου, ἡ δ' ἐπαγωγῇ ἐκ τῶν κατὰ μέρος, ἀδύνατον δὲ τὰ καθόλου θεωρῆσαι μὴ δι' ἐπαγωγῆς (ἐπεὶ καὶ τὰ ἐξ ἀφαιρέσεως λεγόμενα ἔσται δι' ἐπαγωγῆς γνώριμα ποιεῖν, ὅτι ὑπάρχει ἐκάστω γενεῇ ἓνια, καὶ εἰ μὴ χωριστά ἐστίν, ἧ τοιονδὶ ἕκαστον), ἐπαχθῆναι δὲ μὴ ἔχοντας αἰσθησιν ἀδύνατον. τῶν γὰρ καθ' ἕκαστον ἡ αἰσθησις· οὐ γὰρ ἐνδέχεται λαβεῖν αὐτῶν τὴν ἐπιστήμην· οὔτε γὰρ ἐκ τῶν καθόλου ἄνευ ἐπαγωγῆς, οὔτε δι' ἐπαγωγῆς ἄνευ τῆς αἰσθήσεως.

Κεφάλαιο 19

Ἔστι δὲ πᾶς συλλογισμὸς διὰ τριῶν ὄρων, καὶ ὁ μὲν δεικνύει δύναμενος ὅτι ὑπάρχει τὸ Α τῷ Γ διὰ τὸ ὑπάρχειν τῷ Β καὶ τοῦτο τῷ Γ, ὁ δὲ στερητικός, τὴν μὲν ἐτέραν πρότασιν ἔχων ὅτι ὑπάρχει τι ἄλλο ἄλλῳ, τὴν δ' ἐτέραν ὅτι οὐχ ὑπάρχει. φανερόν οὖν ὅτι αἱ μὲν ἀρχαὶ καὶ αἱ λεγόμεναι ὑποθέσεις αὐταὶ εἰσι· λαβόντα γὰρ ταῦτα οὕτως ἀνάγκη δεικνύειν, οἷον ὅτι τὸ Α τῷ Γ ὑπάρχει διὰ τοῦ Β, πάλιν δ' ὅτι τὸ Α τῷ Β δι' ἄλλου μέσου, καὶ ὅτι τὸ Β τῷ Γ ὡσαύτως. κατὰ μὲν οὖν δόξαν συλλογιζομένοις καὶ μόνον διαλεκτικῶς δηλον ὅτι τοῦτο μόνον σκεπτέον, εἰ ἐξ ὧν ἐνδέχεται ἐνδοξοτάτων γίνεται ὁ συλλογισμὸς, ὥστ' εἰ καὶ μὴ ἔστι τι τῇ ἀληθείᾳ τῶν Α Β μέσον, δοκεῖ δὲ εἶναι, ὁ διὰ τούτου συλλογιζόμενος συλλελόγισται διαλεκτικῶς· πρὸς δ' ἀλήθειαν ἐκ τῶν ὑπαρχόντων δεῖ σκοπεῖν. ἔχει δ' οὕτως· ἐπειδὴ ἔστιν ὃ αὐτὸ μὲν κατ' ἄλλου κατηγορεῖται μὴ κατὰ συμβεβηκός· λέγω δὲ τὸ κατὰ συμβεβηκός, οἷον τὸ λευκὸν ποτ' ἐκεῖνό φαμεν εἶναι ἄνθρωπον, οὐχ ὁμοίως λέγοντες καὶ τὸν ἄνθρωπον λευκόν· ὁ μὲν γὰρ οὐχ ἕτερόν τι ὦν λευκός ἐστι, τὸ δὲ λευκόν, ὅτι συμβέβηκε τῷ ἀνθρώπῳ εἶναι λευκῷ· ἔστιν οὖν ἓνια τοιαῦτα ὥστε καθ' αὐτὰ κατηγορεῖσθαι.

Ἔστω δὴ τὸ Γ τοιοῦτον ὃ αὐτὸ μὲν μηκέτι ὑπάρχει ἄλλῳ, τούτῳ δὲ τὸ Β πρώτῳ, καὶ οὐκ ἔστιν ἄλλο μεταξύ. καὶ πάλιν τὸ Ε τῷ Ζ ὡσαύτως, καὶ τοῦτο τῷ Β. ἄρ' οὖν τοῦτο ἀνάγκη στήναι, ἢ ἐνδέχεται εἰς ἄπειρον ἰέναι; καὶ πάλιν εἰ τοῦ μὲν Α μηδὲν κατηγορεῖται καθ' αὐτό, τὸ δὲ Α τῷ Θ ὑπάρχει πρώτῳ, μεταξύ δὲ μηδενὶ προτέρῳ, καὶ τὸ Θ τῷ Η, καὶ τοῦτο τῷ Β, ἄρα καὶ τοῦτο ἵστασθαι ἀνάγκη, ἢ καὶ τοῦτ' ἐνδέχεται εἰς ἄπειρον ἰέναι; διαφέρει δὲ τοῦτο τοῦ πρότερον τοσοῦτον, ὅτι τὸ μὲν ἐστίν, ἄρα ἐνδέχεται ἀρξαμένῳ ἀπὸ τοιούτου ὃ μηδενὶ ὑπάρχει ἐτέρῳ ἄλλ' ἄλλο ἐκείνῳ, ἐπὶ τὸ ἄνω εἰς ἄπειρον ἰέναι, θάτερον δὲ ἀρξάμενον ἀπὸ τοιούτου (82a.) ὃ αὐτὸ μὲν ἄλλου, ἐκείνου δὲ μηδὲν κατηγορεῖται, ἐπὶ τὸ κάτω σκοπεῖν εἰ ἐνδέχεται εἰς ἄπειρον ἰέναι. Ἔτι τὰ μεταξύ ἄρ' ἐνδέχεται ἄπειρα εἶναι ὀρισμένων τῶν ἄκρων; λέγω δ' οἷον εἰ τὸ Α τῷ Γ ὑπάρχει, μέσον δ' αὐτῶν τὸ Β, τοῦ δὲ Β καὶ τοῦ Α ἕτερα, τούτων δ' ἄλλα, ἄρα καὶ ταῦτα εἰς ἄπειρον ἐνδέχεται ἰέναι, ἢ ἀδύνατον; ἔστι δὲ τοῦτο σκοπεῖν ταῦτόν καὶ εἰ αἱ ἀποδείξεις εἰς ἄπειρον ἔρχονται, καὶ εἰ ἔστιν ἀπόδειξις ἅπαντος, ἢ

πρὸς ἄλληλα περαίνεται.

Ὅμοίως δὲ λέγω καὶ ἐπὶ τῶν στερητικῶν συλλογισμῶν καὶ προτάσεων, οἷον εἰ τὸ Α μὴ ὑπάρχει τῷ Β μηδενί, ἤτοι πρώτῳ, ἢ ἔσται τι μεταξὺ ᾧ προτέρῳ οὐχ ὑπάρχει (οἷον εἰ τῷ Η, ὃ τῷ Β ὑπάρχει παντί), καὶ πάλιν τούτου ἔτι ἄλλῳ προτέρῳ, οἷον εἰ τῷ Θ, ὃ τῷ Η παντὶ ὑπάρχει. καὶ γὰρ ἐπὶ τούτων ἢ ἄπειρα οἷς ὑπάρχει προτέροις, ἢ ἴσεται.

Ἐπὶ δὲ τῶν ἀντιστρεφόντων οὐχ ὁμοίως ἔχει. οὐ γὰρ ἔστιν ἐν τοῖς ἀντικατηγορουμένοις οὗ πρώτου κατηγορεῖται ἢ τελευταίου πάντα γὰρ πρὸς πάντα ταύτῃ γε ὁμοίως ἔχει, εἴτ' ἐστὶν ἄπειρα τὰ κατ' αὐτοῦ κατηγορούμενα, εἴτ' ἀμφοτέρᾳ ἐστὶ τὰ ἀπορηθέντα ἄπειρα· πλὴν εἰ μὴ ὁμοίως ἐνδέχεται ἀντιστρέφειν, ἀλλὰ τὸ μὲν ὥς συμβεβηκός, τὸ δ' ὥς κατηγορίαν.

Κεφάλαιο 20

Ὅτι μὲν οὖν τὰ μεταξὺ οὐκ ἐνδέχεται ἄπειρα εἶναι, εἰ ἐπὶ τὸ κάτω καὶ τὸ ἄνω ἴστανται αἱ κατηγορίαι, δῆλον. λέγω δ' ἄνω μὲν τὴν ἐπὶ τὸ καθόλου μᾶλλον, κάτω δὲ τὴν ἐπὶ τὸ κατὰ μέρος. εἰ γὰρ τοῦ Α κατηγορουμένου κατὰ τοῦ Ζ ἄπειρα τὰ μεταξὺ, ἐφ' ὧν Β, δῆλον ὅτι ἐνδέχοιτ' ἂν ὥστε καὶ ἀπὸ τοῦ Α ἐπὶ τὸ κάτω ἕτερον ἐτέρου κατηγορεῖσθαι εἰς ἄπειρον (πρὶν γὰρ ἐπὶ τὸ Ζ ἐλθεῖν, ἄπειρα τὰ μεταξὺ) καὶ ἀπὸ τοῦ Ζ ἐπὶ τὸ ἄνω ἄπειρα, πρὶν ἐπὶ τὸ Α ἐλθεῖν. ὥστ' εἰ ταῦτα ἀδύνατα, καὶ τοῦ Α καὶ Ζ ἀδύνατον ἄπειρα εἶναι μεταξὺ. οὐδὲ γὰρ εἴ τις λέγοι ὅτι τὰ μὲν ἐστὶ τῶν Α Β Ζ ἐχόμενα ἀλλήλων ὥστε μὴ εἶναι μεταξὺ, τὰ δ' οὐκ ἔστι λαβεῖν, οὐδὲν διαφέρει. ὁ γὰρ ἂν λάβω τῶν Β, ἔσται πρὸς τὸ Α ἢ πρὸς τὸ Ζ ἢ ἄπειρα τὰ μεταξὺ ἢ οὐ. ἀφ' οὗ δὴ πρῶτον ἄπειρα, εἴτ' εὐθύς εἴτε μὴ εὐθύς, οὐδὲν διαφέρει· τὰ γὰρ μετὰ ταῦτα ἄπειρά ἐστιν.

Κεφάλαιο 21

Φανερόν δὲ καὶ ἐπὶ τῆς στερητικῆς ἀποδείξεως ὅτι στήσεται, εἴπερ ἐπὶ τῆς κατηγορικῆς ἴσταται ἐπ' ἀμφοτέρα. ἔστω γὰρ μὴ ἐνδεχόμενον μήτε ἐπὶ τὸ ἄνω ἀπὸ τοῦ ὑστάτου εἰς ἄπειρον ἰέναι (λέγω δ' ὑστάτον ὃ αὐτὸ μὲν ἄλλω (82b.) μηδενὶ ὑπάρχει, ἐκείνῳ δὲ ἄλλο, οἷον τὸ Ζ) μήτε ἀπὸ τοῦ πρώτου ἐπὶ τὸ ὑστάτον (λέγω δὲ πρῶτον ὃ αὐτὸ μὲν κατ' ἄλλου, κατ' ἐκείνου δὲ μηδὲν ἄλλο). εἰ δὴ ταῦτ' ἔστι, καὶ ἐπὶ τῆς ἀποφάσεως στήσεται. τριχῶς γὰρ δείκνυται μὴ ὑπάρχον. ἢ γὰρ ᾧ μὲν τὸ Γ, τὸ Β ὑπάρχει παντί, ᾧ δὲ τὸ Β, οὐδενὶ τὸ Α. τοῦ μὲν τοίνυν Β Γ, καὶ αἰεὶ τοῦ ἐτέρου διαστήματος, ἀνάγκη βαδίζειν εἰς ἅμεσα· κατηγορικὸν γὰρ τοῦτο τὸ διάστημα. τὸ δ' ἕτερον δῆλον ὅτι εἰ ἄλλω οὐχ ὑπάρχει προτέρῳ, οἷον τῷ Δ, τοῦτο δεήσει τῷ Β παντὶ ὑπάρχειν. καὶ εἰ πάλιν ἄλλω τοῦ Δ προτέρῳ οὐχ ὑπάρχει, ἐκεῖνο δεήσει τῷ Δ παντὶ ὑπάρχειν. ὥστ' ἐπεὶ ἢ ἐπὶ τὸ ἄνω ἴσταται ὁδός, καὶ ἢ ἐπὶ τὸ Α στήσεται, καὶ ἔσται τι πρῶτον ᾧ οὐχ ὑπάρχει.

Πάλιν εἰ τὸ μὲν Β παντὶ τῷ Α, τῷ δὲ Γ μηδενί, τὸ Α τῶν Γ οὐδενὶ ὑπάρχει. πάλιν τοῦτο εἰ δεῖ δεῖξαι, δῆλον ὅτι ἢ διὰ τοῦ ἄνω τρόπου δειχθήσεται ἢ διὰ τούτου ἢ τοῦ τρίτου. ὁ μὲν οὖν πρῶτος εἴρηται, ὁ δὲ δευτέρος δειχθήσεται. οὕτω δ' ἂν δεικνύοι, οἷον τὸ Δ τῷ μὲν Β παντὶ ὑπάρχει, τῷ δὲ Γ οὐδενί, εἰ ἀνάγκη ὑπάρχειν τι τῷ Β. καὶ πάλιν εἰ τοῦτο τῷ Γ μὴ ὑπάρξει, ἄλλο τῷ Δ ὑπάρχει, ὃ τῷ Γ οὐχ ὑπάρχει. οὐκοῦν ἐπεὶ τὸ ὑπάρχειν αἰεὶ τῷ ἀνωτέρῳ ἴσταται, στήσεται καὶ τὸ μὴ ὑπάρχειν.

Ὁ δὲ τρίτος τρόπος ἦν· εἰ τὸ μὲν Α τῷ Β παντὶ ὑπάρχει, τὸ δὲ Γ μὴ ὑπάρχει, οὐ παντὶ ὑπάρχει τὸ Γ ᾧ τὸ Α. πάλιν δὲ τοῦτο ἢ διὰ τῶν ἄνω εἰρημένων ἢ ὁμοίως δειχθήσεται. ἐκείνως μὲν δὴ ἴσταται, εἰ δ' οὕτω, πάλιν λήψεται τὸ Β τῷ Ε ὑπάρχειν, ᾧ τὸ Γ μὴ παντὶ ὑπάρχει. καὶ τοῦτο πάλιν ὁμοίως. ἐπεὶ δ' ὑπόκειται ἴστασθαι καὶ ἐπὶ τὸ κάτω, δῆλον ὅτι στήσεται καὶ τὸ Γ οὐχ ὑπάρχον.

Φανερόν δ' ὅτι καὶ ἐὰν μὴ μιᾷ ὁδῷ δεικνύηται ἀλλὰ πάσαις, ὅτε μὲν ἐκ τοῦ πρώτου σχήματος, ὅτε δὲ ἐκ τοῦ δευτέρου ἢ τρίτου, ὅτι καὶ οὕτω στήσεται· πεπερασμένα γάρ εἰσιν αἱ ὁδοί, τὰ δὲ πεπερασμένα πεπερασμενάκις ἀνάγκη πεπεράνθαι πάντα.

Ὅτι μὲν οὖν ἐπὶ τῆς στερήσεως, εἴπερ καὶ ἐπὶ τοῦ ὑπάρχειν,

ἴσταται, δηλον. ὅτι δ' ἐπ' ἐκείνων, λογικῶς μὲν θεωροῦσιν ὧδε φανερόν. Ἐπὶ μὲν οὖν τῶν ἐν τῷ τί ἐστι κατηγορουμένων δηλον· εἰ γὰρ ἔστιν ὀρίσασθαι ἢ εἰ γνωστὸν τὸ τί ἦν εἶναι, τὰ δ' ἄπειρα μὴ ἔστι διελθεῖν, ἀνάγκη πεπεράνθαι τὰ ἐν τῷ τί (83a.) ἐστι κατηγορούμενα. καθόλου δὲ ὧδε λέγομεν. ἔστι γὰρ εἰπεῖν ἀληθῶς τὸ λευκὸν βαδίζειν καὶ τὸ μέγα ἐκεῖνο ξύλον εἶναι, καὶ πάλιν τὸ ξύλον μέγα εἶναι καὶ τὸν ἄνθρωπον βαδίζειν. ἕτερον δὲ ἐστι τὸ οὕτως εἰπεῖν καὶ τὸ ἐκείνως. ὅταν μὲν γὰρ τὸ λευκὸν εἶναι φῶ ξύλον, τότε λέγω ὅτι ᾧ συμβέβηκε λευκῷ εἶναι ξύλον ἐστίν, ἀλλ' οὐχ ὥς τὸ ὑποκείμενον τῷ ξύλῳ τὸ λευκὸν ἐστι· καὶ γὰρ οὔτε λευκὸν ὃν οὔθ' ὅπερ λευκὸν τι ἐγένετο ξύλον, ὥστ' οὐκ ἔστιν ἀλλ' ἢ κατὰ συμβεβηκός. ὅταν δὲ τὸ ξύλον λευκὸν εἶναι φῶ, οὐχ ὅτι ἕτερόν τί ἐστι λευκόν, ἐκεῖνῳ δὲ συμβέβηκε ξύλῳ εἶναι, οἷον ὅταν τὸ μουσικὸν λευκὸν εἶναι φῶ (τότε γὰρ ὅτι ὁ ἄνθρωπος λευκός ἐστιν, ᾧ συμβέβηκεν εἶναι μουσικῷ, λέγω), ἀλλὰ τὸ ξύλον ἐστὶ τὸ ὑποκείμενον, ὅπερ καὶ ἐγένετο, οὐχ ἕτερόν τι ὃν ἢ ὅπερ ξύλον ἢ ξύλον τί. εἰ δὴ δεῖ νομοθετῆσαι, ἔστω τὸ οὕτω λέγειν κατηγορεῖν, τὸ δ' ἐκείνως ἤτοι μηδαμῶς κατηγορεῖν, ἢ κατηγορεῖν μὲν μὴ ἀπλῶς, κατὰ συμβεβηκός δὲ κατηγορεῖν. ἔστι δ' ὥς μὲν τὸ λευκὸν τὸ κατηγορούμενον, ὥς δὲ τὸ ξύλον τὸ οὗ κατηγορεῖται. ὑποκείσθω δὴ τὸ κατηγορούμενον κατηγορεῖσθαι ἀεί, οὗ κατηγορεῖται, ἀπλῶς, ἀλλὰ μὴ κατὰ συμβεβηκός· οὕτω γὰρ αἱ ἀποδείξεις ἀποδεικνύουσιν. ὥστε ἢ ἐν τῷ τί ἐστιν ἢ ὅτι ποιὸν ἢ ποσὸν ἢ πρὸς τι ἢ ποιοῦν τι ἢ πάσχον ἢ ποὺ ἢ ποτέ, ὅταν ἐν καθ' ἐνὸς κατηγορηθῇ.

Κεφάλαιο 22

Ἔτι τὰ μὲν οὐσίαν σημαίνοντα ὅπερ ἐκεῖνο ἢ ὅπερ ἐκεῖνό τι σημαίνει καθ' οὗ κατηγορεῖται· ὅσα δὲ μὴ οὐσίαν σημαίνει, ἀλλὰ καθ' ἄλλου ὑποκειμένου λέγεται ὃ μὴ ἔστι μήτε ὅπερ ἐκεῖνο μήτε ὅπερ ἐκεῖνό τι, συμβεβηκότα, οἷον κατὰ τοῦ ἀνθρώπου τὸ λευκόν. οὐ γάρ ἐστιν ὁ ἄνθρωπος οὔτε ὅπερ λευκόν οὔτε ὅπερ λευκόν τι, ἀλλὰ ζῶον ἴσως· ὅπερ γὰρ ζῶόν ἐστιν ὁ ἄνθρωπος. ὅσα δὲ μὴ οὐσίαν σημαίνει, δεῖ κατὰ τινος ὑποκειμένου κατηγορεῖσθαι, καὶ μὴ εἶναι τι λευκόν ὃ οὐχ ἕτερόν τι ὃν λευκόν ἐστιν. τὰ γὰρ εἶδη χαιρέτω· τερετίσματά τε γάρ ἐστι, καὶ εἰ ἔστιν, οὐδὲν πρὸς τὸν λόγον ἐστίν· αἱ γὰρ ἀποδείξεις περὶ τῶν τοιούτων εἰσίν.

Ἔτι εἰ μὴ ἔστι τόδε τοῦδε ποιότης κάκεῖνο τούτου, μηδὲ ποιότητος ποιότης, ἀδύνατον ἀντικατηγορεῖσθαι ἀλλήλων οὕτως, ἀλλ' ἀληθὲς μὲν ἐνδέχεται εἰπεῖν, ἀντικατηγορεῖσθαι δ' ἀληθῶς οὐκ ἐνδέχεται. ἢ γὰρ τοι ὡς οὐσία κατηγορηθήσεται, (83b.) οἷον ἢ γένος ὃν ἢ διαφορὰ τοῦ κατηγορουμένου. ταῦτα δὲ δέδεικται ὅτι οὐκ ἔστι ἀπειρα, οὐτ' ἐπὶ τὸ κάτω οὐτ' ἐπὶ τὸ ἄνω (οἷον ἄνθρωπος δίπουν, τοῦτο ζῶον, τοῦτο δ' ἕτερον· οὐδὲ τὸ ζῶον καθ' ἀνθρώπου, τοῦτο δὲ κατὰ Καλλίου, τοῦτο δὲ καθ' ἄλλου ἐν τῷ τί ἐστιν), τὴν μὲν γὰρ οὐσίαν ἅπασαν ἔστιν ὀρίσασθαι τὴν τοιαύτην, τὰ δ' ἀπειρα οὐκ ἔστι διεξελεῖν νοοῦντα. ὥστ' οὐτ' ἐπὶ τὸ ἄνω οὐτ' ἐπὶ τὸ κάτω ἀπειρα· ἐκείνην γὰρ οὐκ ἔστιν ὀρίσασθαι ἥς τὰ ἀπειρα κατηγορεῖται. ὡς μὲν δὴ γένη ἀλλήλων οὐκ ἀντικατηγορηθήσεται· ἔσται γὰρ αὐτὸ ὅπερ αὐτό τι. οὐδὲ μὴν τοῦ ποιοῦ ἢ τῶν ἄλλων οὐδέν, ἂν μὴ κατὰ συμβεβηκὸς κατηγορηθῇ· πάντα γὰρ ταῦτα συμβέβηκε καὶ κατὰ τῶν οὐσιῶν κατηγορεῖται. ἀλλὰ διὸ οὐδ' εἰς τὸ ἄνω ἀπειρα ἔσται· ἐκάστου γὰρ κατηγορεῖται ὃ ἂν σημαίνῃ ἢ ποιόν τι ἢ ποσόν τι ἢ τι τῶν τοιούτων ἢ τὰ ἐν τῇ οὐσίᾳ· ταῦτα δὲ πεπέρανται, καὶ τὰ γένη τῶν κατηγοριῶν πεπέρανται· ἢ γὰρ ποιόν ἢ ποσόν ἢ πρὸς τι ἢ ποιοῦν ἢ πάσχον ἢ πού ἢ ποτέ. Ὑπόκειται διὸ ἐν καθ' ἑνὸς κατηγορεῖσθαι, αὐτὰ δὲ αὐτῶν, ὅσα μὴ τί ἐστι, μὴ κατηγορεῖσθαι. συμβεβηκότα γὰρ ἐστι πάντα, ἀλλὰ τὰ μὲν καθ' αὐτά, τὰ δὲ καθ' ἕτερον τρόπον· ταῦτα δὲ πάντα καθ' ὑποκειμένου τινὸς κατηγορεῖσθαί φαμεν, τὸ δὲ συμβεβηκὸς οὐκ εἶναι ὑποκειμένον τι· οὐδὲν γὰρ τῶν τοιούτων τίθεμεν εἶναι ὃ οὐχ ἕτερόν τι ὃν λέγεται ὃ λέγεται, ἀλλ' αὐτὸ ἄλλου

καὶ τοῦτο καθ' ἑτέρου. οὐτ' εἰς τὸ ἄνω ἄρα ἔνός οὐτ' εἰς τὸ κάτω ὑπάρχειν λεχθήσεται. καθ' ὧν μὲν γὰρ λέγεται τὰ συμβεβηκότα, ὅσα ἐν τῇ οὐσίᾳ ἐκάστου, ταῦτα δὲ οὐκ ἄπειρα· ἄνω δὲ ταῦτά τε καὶ τὰ συμβεβηκότα, ἀμφοτέρω οὐκ ἄπειρα. ἀνάγκη ἄρα εἶναι τι οὐ πρῶτόν τι κατηγορεῖται καὶ τούτου ἄλλο, καὶ τοῦτο ἴστασθαι καὶ εἶναι τι ὃ οὐκέτι οὔτε κατ' ἄλλου προτέρου οὔτε κατ' ἐκείνου ἄλλο πρότερον κατηγορεῖται.

Εἷς μὲν οὖν τρόπος λέγεται ἀποδείξεως οὗτος, ἔτι δ' ἄλλος, εἰ ὧν πρότερα ἅττα κατηγορεῖται, ἔστι τούτων ἀπόδειξις, ὧν δ' ἔστιν ἀπόδειξις, οὔτε βέλτιον ἔχειν ἐγγωρεῖ πρὸς αὐτὰ τοῦ εἰδέναι, οὐτ' εἰδέναι ἀνευ ἀποδείξεως, εἰ δὲ τόδε διὰ τῶνδε γνώριμον, τάδε δὲ μὴ ἴσμεν μηδὲ βέλτιον ἔχομεν πρὸς αὐτὰ τοῦ εἰδέναι, οὐδὲ τὸ διὰ τούτων γνώριμον ἐπιστησόμεθα. εἰ οὖν ἔστι τι εἰδέναι δι' ἀποδείξεως ἀπλῶς καὶ μὴ ἐκ τινῶν μηδ' ἐξ ὑποθέσεως, ἀνάγκη ἴστασθαι τὰς (84a.) κατηγορίας τὰς μεταξὺ. εἰ γὰρ μὴ ἴστανται, ἀλλ' ἔστιν αἰετὸς τοῦ ληφθέντος ἐπάνω, ἀπάντων ἔσται ἀπόδειξις· ὥστ' εἰ τὰ ἄπειρα μὴ ἐγγωρεῖ διελθεῖν, ὧν ἔστιν ἀπόδειξις, ταῦτ' οὐκ εἰσόμεθα δι' ἀποδείξεως. εἰ οὖν μηδὲ βέλτιον ἔχομεν πρὸς αὐτὰ τοῦ εἰδέναι, οὐκ ἔσται οὐδὲν ἐπίστασθαι δι' ἀποδείξεως ἀπλῶς, ἀλλ' ἐξ ὑποθέσεως.

Λογικῶς μὲν οὖν ἐκ τούτων ἂν τις πιστεύσειε περὶ τοῦ λεχθέντος, ἀναλυτικῶς δὲ διὰ τῶνδε φανερόν συντομώτερον, ὅτι οὐτ' ἐπὶ τὸ ἄνω οὐτ' ἐπὶ τὸ κάτω ἄπειρα τὰ κατηγορούμενα ἐνδέχεται εἶναι ἐν ταῖς ἀποδεικτικαῖς ἐπιστήμαις, περὶ ὧν ἡ σκέψις ἐστίν. ἡ μὲν γὰρ ἀπόδειξις ἐστὶ τῶν ὅσα ὑπάρχει καθ' αὐτὰ τοῖς πράγμασιν. καθ' αὐτὰ δὲ διττῶς· ὅσα τε γὰρ [ἐν] ἐκείνοις ἐνυπάρχει ἐν τῷ τί ἐστι, καὶ οἷς αὐτὰ ἐν τῷ τί ἐστὶν ὑπάρχουσιν αὐτοῖς· οἷον τῷ ἀριθμῷ τὸ περιττόν, ὃ ὑπάρχει μὲν ἀριθμῷ, ἐνυπάρχει δ' αὐτὸς ὁ ἀριθμὸς ἐν τῷ λόγῳ αὐτοῦ, καὶ πάλιν πληθος ἢ τὸ διαιρετόν ἐν τῷ λόγῳ τῷ τοῦ ἀριθμοῦ ἐνυπάρχει. τούτων δ' οὐδέτερα ἐνδέχεται ἄπειρα εἶναι, οὐθ' ὥς τὸ περιττόν τοῦ ἀριθμοῦ (πάλιν γὰρ ἂν τῷ περιττῷ ἄλλο εἴη ὃ ἐνυπῆρχεν ὑπάρχοντι· τοῦτο δ' εἰ ἔστι, πρῶτον ὁ ἀριθμὸς ἐνυπάρξει ὑπάρχουσιν αὐτῷ· εἰ οὖν μὴ ἐνδέχεται ἄπειρα τοιαῦτα ὑπάρχειν ἐν τῷ ἐνί, οὐδ' ἐπὶ τὸ ἄνω ἔσται ἄπειρα· ἀλλὰ μὴν ἀνάγκη γε πάντα ὑπάρχειν τῷ πρώτῳ, οἷον τῷ ἀριθμῷ, κακείνοις τὸν ἀριθμόν, ὥστ' ἀντιστρέφοντα ἔσται, ἀλλ' οὐχ ὑπερτείνοντα)· οὐδὲ μὴν ὅσα ἐν τῷ τί ἐστὶν ἐνυπάρχει, οὐδὲ ταῦτα ἄπειρα· οὐδὲ γὰρ ἂν εἴη ὀρίσασθαι. ὥστ' εἰ τὰ μὲν κατηγορούμενα καθ' αὐτὰ πάντα λέγεται, ταῦτα δὲ μὴ

ἄπειρα, ἴσταιτο ἂν τὰ ἐπὶ τὸ ἄνω, ὥστε καὶ ἐπὶ τὸ κάτω.

Εἰ δ' οὕτω, καὶ τὰ ἐν τῷ μεταξὺ δύο ὅρων ἀεὶ πεπερασμένα. εἰ δὲ τοῦτο, δηλὸν ἤδη καὶ τῶν ἀποδείξεων ὅτι ἀνάγκη ἀρχάς τε εἶναι, καὶ μὴ πάντων εἶναι ἀπόδειξιν, ὅπερ ἔφαμέν τινας λέγειν κατ' ἀρχάς. εἰ γὰρ εἰσὶν ἀρχαί, οὔτε πάντ' ἀποδεικτὰ οὔτ' εἰς ἄπειρον οἷόν τε βαδίζειν· τὸ γὰρ εἶναι τούτων ὀποτερονοῦν οὐδὲν ἄλλο ἐστὶν ἢ τὸ εἶναι μηδὲν διάστημα ἄμεσον καὶ ἀδιαίρετον, ἀλλὰ πάντα διαιρετά. τῷ γὰρ ἐντὸς ἐμβάλλεσθαι ὅρον, ἀλλ' οὐ τῷ προσλαμβάνεσθαι ἀποδείκνυται τὸ ἀποδεικνύμενον, ὥστ' εἰ τοῦτ' εἰς ἄπειρον ἐνδέχεται ἰέναι, ἐνδέχοιτ' ἂν δύο ὅρων ἄπειρα μεταξὺ εἶναι μέσα. ἀλλὰ τοῦτ' ἀδύνατον, εἰ ἴστανται αἱ κατηγορίαι (84b.) ἐπὶ τὸ ἄνω καὶ τὸ κάτω. ὅτι δὲ ἴστανται, δέδεικται λογικῶς μὲν πρότερον, ἀναλυτικῶς δὲ νῦν.

Κεφάλαιο 23

Δεδειγμένων δὲ τούτων φανερόν ὅτι, ἐάν τι τὸ αὐτὸ δυσὶν ὑπάρχη, οἷον τὸ Α τῷ τε Γ καὶ τῷ Δ, μὴ κατηγορουμένου θατέρου κατὰ θατέρου, ἢ μηδαμῶς ἢ μὴ κατὰ παντός, ὅτι οὐκ αἰεὶ κατὰ κοινόν τι ὑπάρξει. οἷον τῷ ἰσοσκελεῖ καὶ τῷ σκαληνεῖ τὸ δυσὶν ὀρθαῖς ἴσας ἔχειν κατὰ κοινόν τι ὑπάρχει (ἢ γὰρ σχῆμά τι, ὑπάρχει, καὶ οὐχ ἢ ἕτερον), τοῦτο δ' οὐκ αἰεὶ οὕτως ἔχει. ἔστω γὰρ τὸ Β καθ' ὃ τὸ Α τῷ Γ Δ ὑπάρχει. δῆλον τοίνυν ὅτι καὶ τὸ Β τῷ Γ καὶ Δ κατ' ἄλλο κοινόν, κάκεῖνο καθ' ἕτερον, ὥστε δύο ὅρων μεταξὺ ἄπειροι ἂν ἐμπίπτοιεν ὅροι. ἀλλ' ἀδύνατον. κατὰ μὲν τοίνυν κοινόν τι ὑπάρχειν οὐκ ἀνάγκη αἰεὶ τὸ αὐτὸ πλείοσιν, εἴπερ ἔσται ἄμεσα διαστήματα. ἐν μέντοι τῷ αὐτῷ γένει καὶ ἐκ τῶν αὐτῶν ἀτόμων ἀνάγκη τοὺς ὅρους εἶναι, εἴπερ τῶν καθ' αὐτὸ ὑπαρχόντων ἔσται τὸ κοινόν· οὐ γὰρ ἦν ἐξ ἄλλου γένους εἰς ἄλλο διαβῆναι τὰ δεικνύμενα.

Φανερόν δὲ καὶ ὅτι, ὅταν τὸ Α τῷ Β ὑπάρχη, εἰ μὲν ἔστι τι μέσον, ἔστι δεῖξαι ὅτι τὸ Α τῷ Β ὑπάρχει, καὶ στοιχεῖα τούτου ἔστι ταυτὰ καὶ τοσαῦθ' ὅσα μέσα ἐστίν· αἱ γὰρ ἄμεσοι προτάσεις στοιχεῖα, ἢ πᾶσαι ἢ αἱ καθόλου. εἰ δὲ μὴ ἔστιν, οὐκέτι ἔστιν ἀποδείξις, ἀλλ' ἢ ἐπὶ τὰς ἀρχὰς ὁδὸς αὕτη ἐστίν. ὁμοίως δὲ καὶ εἰ τὸ Α τῷ Β μὴ ὑπάρχει, εἰ μὲν ἔστιν ἢ μέσον ἢ πρότερον ᾧ οὐχ ὑπάρχει, ἔστιν ἀποδείξις, εἰ δὲ μὴ, οὐκ ἔστιν, ἀλλ' ἀρχή, καὶ στοιχεῖα τοσαῦτ' ἔστιν ὅσοι ὅροι· αἱ γὰρ τούτων προτάσεις ἀρχαὶ τῆς ἀποδείξεώς εἰσιν. καὶ ὥσπερ ἔναι ἀρχαὶ εἰσιν ἀναπόδεικτοι, ὅτι ἐστὶ τόδε τοδὶ καὶ ὑπάρχει τόδε τωδί, οὕτω καὶ ὅτι οὐκ ἔστι τόδε τοδὶ οὐδ' ὑπάρχει τόδε τωδί, ὥσθ' αἱ μὲν εἶναι τι, αἱ δὲ μὴ εἶναι τι ἔσονται ἀρχαί.

Ὅταν δὲ δέη δεῖξαι, ληπτέον ὃ τοῦ Β πρῶτον κατηγορεῖται. ἔστω τὸ Γ, καὶ τούτου ὁμοίως τὸ Δ. καὶ οὕτως αἰεὶ βαδίζοντι οὐδέποτε' ἐξωτέρω πρότασις οὐδ' ὑπάρχον λαμβάνεται τοῦ Α ἐν τῷ δεικνύναι, ἀλλ' αἰεὶ τὸ μέσον πυκνουῖται, ἕως ἀδιαίρετα γένηται καὶ ἔν. ἔστι δ' ἐν ὅταν ἄμεσον γένηται, καὶ μία πρότασις ἀπλῶς ἢ ἄμεσος. καὶ ὥσπερ ἐν τοῖς ἄλλοις ἢ ἀρχὴ ἀπλοῦν, τοῦτο δ' οὐ ταυτὸ πανταχοῦ, ἀλλ' ἐν βάρει μὲν μνᾶ, ἐν δὲ μέλει δίεςις, ἄλλο δ' ἐν ἄλλω, οὕτως ἐν συλλογισμῷ τὸ ἐν (85a.) πρότασις ἄμεσος, ἐν δ' ἀποδείξει καὶ ἐπιστήμῃ ὁ νοῦς. ἐν μὲν οὖν τοῖς δεικτικοῖς συλλογισμοῖς τοῦ ὑπαρχόντος οὐδὲν ἔξω πίπτει, ἐν δὲ τοῖς στερητικοῖς, ἔνθα μὲν ὃ δεῖ

ὕπάρχειν, οὐδὲν τούτου ἔξω πίπτει, οἷον εἰ τὸ Α τῷ Β διὰ τοῦ Γ μή (εἰ γὰρ τῷ μὲν Β παντὶ τὸ Γ, τῷ δὲ Γ μηδενὶ τὸ Α)· πάλιν ἂν δέη ὅτι τῷ Γ τὸ Α οὐδενὶ ὑπάρχει, μέσον ληπτέον τοῦ Α καὶ Γ, καὶ οὕτως ἀεὶ πορεύσεται. ἐὰν δὲ δέη δεῖξαι ὅτι τὸ Δ τῷ Ε οὐχ ὑπάρχει τῷ τὸ Γ τῷ μὲν Δ παντὶ ὑπάρχειν, τῷ δὲ Ε μηδενί [ἢ μὴ παντί], τοῦ Ε οὐδέποτ' ἔξω πεσεῖται· τοῦτο δ' ἐστὶν ὃ δεῖ ὑπάρχειν. ἐπὶ δὲ τοῦ τρίτου τρόπου, οὔτε ἀφ' οὗ δεῖ οὔτε ὃ δεῖ στερῆσαι οὐδέποτ' ἔξω βαδιεῖται.

Κεφάλαιο 24

Οὔσης δ' ἀποδείξεως τῆς μὲν καθόλου τῆς δὲ κατὰ μέρος, καὶ τῆς μὲν κατηγορικῆς τῆς δὲ στερητικῆς, ἀμφισβητεῖται ποτέρα βελτίων· ὥς δ' αὐτως καὶ περὶ τῆς ἀποδεικνύναι λεγομένης καὶ τῆς εἰς τὸ ἀδύνατον ἀγούσης ἀποδείξεως. πρῶτον μὲν οὖν ἐπισκεψώμεθα περὶ τῆς καθόλου καὶ τῆς κατὰ μέρος· δηλώσαντες δὲ τοῦτο, καὶ περὶ τῆς δεικνύναι λεγομένης καὶ τῆς εἰς τὸ ἀδύνατον εἰπωμεν. Δόξειε μὲν οὖν τάχ' ἂν τισιν ὥδι σκοποῦσιν ἢ κατὰ μέρος εἶναι βελτίων. εἰ γὰρ καθ' ἣν μᾶλλον ἐπιστάμεθα ἀπόδειξιν βελτίων ἀπόδειξις (αὕτη γὰρ ἀρετὴ ἀποδείξεως), μᾶλλον δ' ἐπιστάμεθα ἕκαστον ὅταν αὐτὸ εἰδῶμεν καθ' αὐτὸ ἢ ὅταν κατ' ἄλλο (οἷον τὸν μουσικὸν Κορίσκον ὅταν ὅτι ὁ Κορίσκος μουσικὸς ἢ ὅταν ὅτι ἄνθρωπος μουσικός· ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων), ἢ δὲ καθόλου ὅτι ἄλλο, οὐχ ὅτι αὐτὸ τετύχηκεν ἐπιδείκνυσιν (οἷον ὅτι τὸ ἰσοσκελὲς οὐχ ὅτι ἰσοσκελὲς ἀλλ' ὅτι τρίγωνον), ἢ δὲ κατὰ μέρος ὅτι αὐτό· -εἰ δὴ βελτίων μὲν ἢ καθ' αὐτό, τοιαύτη δ' ἢ κατὰ μέρος τῆς καθόλου μᾶλλον, καὶ βελτίων ἂν ἢ κατὰ μέρος ἀπόδειξις εἴη. ἔτι εἰ τὸ μὲν καθόλου μὴ ἔστι τι παρὰ τὰ καθ' ἕκαστα, ἢ δ' ἀπόδειξις δόξαν ἐμποιεῖ εἶναί τι τοῦτο καθ' ὃ ἀποδείκνυσιν, καὶ τινα φύσιν ὑπάρχειν ἐν τοῖς οὗσι ταύτην, οἷον τριγώνου παρὰ τὰ τινὰ καὶ σχήματος παρὰ τὰ τινὰ καὶ ἀριθμοῦ παρὰ τοὺς τινὰς ἀριθμούς, βελτίων δ' ἢ περὶ ὄντος ἢ μὴ ὄντος καὶ δι' ἣν μὴ ἀπατηθῇσεται ἢ δι' ἣν, ἔστι δ' ἢ μὲν καθόλου τοιαύτη (προϊόντες γὰρ δεικνύουσιν ὥσπερ περὶ τοῦ ἀνὰ λόγον, οἷον ὅτι ὃ ἂν ἦ τι τοιοῦτον ἔσται ἀνὰ λόγον ὃ οὔτε γραμμὴ οὔτ' ἀριθμὸς οὔτε στερεὸν οὔτ' ἐπίπεδον, (85b.) ἀλλὰ παρὰ ταῦτά τι)· -εἰ οὖν καθόλου μὲν μᾶλλον αὕτη, περὶ ὄντος δ' ἥττον τῆς κατὰ μέρος καὶ ἐμποιεῖ δόξαν ψευδῆ, χείρων ἂν εἴη ἢ καθόλου τῆς κατὰ μέρος.

Ἡ πρῶτον μὲν οὐδὲν μᾶλλον ἐπὶ τοῦ καθόλου ἢ τοῦ κατὰ μέρος ἄτερος λόγος ἐστίν; εἰ γὰρ τὸ δυσὶν ὀρθαῖς ὑπάρχει μὴ ἢ ἰσοσκελὲς ἀλλ' ἢ τρίγωνον, ὁ εἰδὼς ὅτι ἰσοσκελὲς ἥττον οἶδεν ἢ αὐτὸ ἢ ὁ εἰδὼς ὅτι τρίγωνον. ὅλως τε, εἰ μὲν μὴ ὄντος ἢ τρίγωνον εἴτα δείκνυσιν, οὐκ ἂν εἴη ἀπόδειξις, εἰ δὲ ὄντος, ὁ εἰδὼς ἕκαστον ἢ ἕκαστον ὑπάρχει μᾶλλον οἶδεν. εἰ δὴ τὸ τρίγωνον ἐπὶ πλεον ἐστί, καὶ ὁ αὐτὸς λόγος, καὶ μὴ καθ' ὁμωνυμίαν τὸ τρίγωνον, καὶ ὑπάρχει παντὶ τριγώνῳ τὸ δύο, οὐκ ἂν τὸ τρίγωνον ἢ ἰσοσκελὲς, ἀλλὰ τὸ ἰσοσκελὲς

ἢ τρίγωνον, ἔχοι τοιαύτας τὰς γωνίας. ὥστε ὁ καθόλου εἰδὼς μᾶλλον οἶδεν ἢ ὑπάρχει ἢ ὁ κατὰ μέρος. βελτίων ἄρα ἢ καθόλου τῆς κατὰ μέρος. ἔτι εἰ μὲν εἴη τις λόγος εἰς καὶ μὴ ὁμωνυμία τὸ καθόλου, εἴη τ' ἂν οὐδὲν ἦττον ἐνίων τῶν κατὰ μέρος, ἀλλὰ καὶ μᾶλλον, ὅσῳ τὰ ἄφθαρτα ἐν ἐκείνοις ἐστί, τὰ δὲ κατὰ μέρος φθαρτὰ μᾶλλον, ἔτι τε οὐδεμία ἀνάγκη ὑπολαμβάνειν τι εἶναι τοῦτο παρὰ ταῦτα, ὅτι ἐν δηλοῖ, οὐδὲν μᾶλλον ἢ ἐπὶ τῶν ἄλλων ὅσα μὴ τι σημαίνει ἄλλ' ἢ ποιὸν ἢ πρὸς τι ἢ ποιεῖν. εἰ δὲ ἄρα, οὐχ ἢ ἀπόδειξις αἰτία ἄλλ' ὁ ἀκούων.

Ἐτι εἰ ἢ ἀπόδειξις μὲν ἐστὶ συλλογισμὸς δεικτικὸς αἰτίας καὶ τοῦ διὰ τί, τὸ καθόλου δ' αἰτιώτερον (ὃ γὰρ καθ' αὐτὸ ὑπάρχει τι, τοῦτο αὐτὸ αὐτῷ αἰτιον· τὸ δὲ καθόλου πρῶτον· αἰτιον ἄρα τὸ καθόλου)· ὥστε καὶ ἢ ἀπόδειξις βελτίων· μᾶλλον γὰρ τοῦ αἰτίου καὶ τοῦ διὰ τί ἐστίν.

Ἐτι μέχρι τούτου ζητοῦμεν τὸ διὰ τί, καὶ τότε οἰόμεθα εἰδέναι, ὅταν μὴ ἢ ὅτι τι ἄλλο τοῦτο ἢ γινόμενον ἢ ὄν· τέλος γὰρ καὶ πέρας τὸ ἔσχατον ἤδη οὕτως ἐστίν. οἷον τίνος ἔνεκα ἦλθεν; ὅπως λάβη τὰργύριον, τοῦτο δ' ὅπως ἀποδῶ ὃ ὠφείλε, τοῦτο δ' ὅπως μὴ ἀδικήσῃ· καὶ οὕτως ἰόντες, ὅταν μηκέτι δι' ἄλλο μὴδ' ἄλλου ἔνεκα, διὰ τοῦτο ὡς τέλος φαμὲν ἐλθεῖν καὶ εἶναι καὶ γίνεσθαι, καὶ τότε εἰδέναι μάλιστα διὰ τί ἦλθεν. εἰ δὴ ὁμοίως ἔχει ἐπὶ πασῶν τῶν αἰτιῶν καὶ τῶν διὰ τί, ἐπὶ δὲ τῶν ὅσα αἰτία οὕτως ὡς οὐ ἔνεκα οὕτως ἴσμεν μάλιστα, καὶ ἐπὶ τῶν ἄλλων ἄρα τότε μάλιστα ἴσμεν, ὅταν μηκέτι ὑπάρχῃ τοῦτο ὅτι ἄλλο. ὅταν μὲν οὖν γινώσκωμεν ὅτι τέτταρσιν αἰ ἐξῶ ἴσαι ὅτι ἰσοσκελές, ἔτι λείπεται διὰ (86a.) τί τὸ ἰσοσκελές-ὅτι τρίγωνον, καὶ τοῦτο, ὅτι σχῆμα εὐθύγραμμον. εἰ δὲ τοῦτο μηκέτι διότι ἄλλο, τότε μάλιστα ἴσμεν. καὶ καθόλου δὲ τότε· ἢ καθόλου ἄρα βελτίων.

Ἐτι ὅσῳ ἂν μᾶλλον κατὰ μέρος ἦ, εἰς τὰ ἄπειρα ἐμπίπτει, ἢ δὲ καθόλου εἰς τὸ ἀπλοῦν καὶ τὸ πέρας. ἐστὶ δ', ἢ μὲν ἄπειρα, οὐκ ἐπιστητά, ἢ δὲ πεπέρανται, ἐπιστητά. ἢ ἄρα καθόλου, μᾶλλον ἐπιστητά ἢ ἢ κατὰ μέρος. ἀποδεικτὰ ἄρα μᾶλλον τὰ καθόλου. τῶν δ' ἀποδεικτῶν μᾶλλον μᾶλλον ἀπόδειξις· ἅμα γὰρ μᾶλλον τὰ πρὸς τι. βελτίων ἄρα ἢ καθόλου, ἐπεῖπερ καὶ μᾶλλον ἀπόδειξις. Ἐτι εἰ αἰρετωτέρα καθ' ἣν τοῦτο καὶ ἄλλο ἢ καθ' ἣν τοῦτο μόνον οἶδεν· ὁ δὲ τὴν καθόλου ἔχων οἶδε καὶ τὸ κατὰ μέρος, οὗτος δὲ τὴν καθόλου οὐκ οἶδεν· ὥστε κἂν οὕτως αἰρετωτέρα εἴη. Ἐτι δὲ ὧδε. τὸ γὰρ

καθόλου μᾶλλον δεικνύναι ἐστὶ τὸ διὰ μέσου δεικνύναι ἐγγυτέρω ὄντος τῆς ἀρχῆς. ἐγγυτάτω δὲ τὸ ἄμεσον· τοῦτο δ' ἀρχή. εἰ οὖν ἡ ἐξ ἀρχῆς τῆς μὴ ἐξ ἀρχῆς, ἡ μᾶλλον ἐξ ἀρχῆς τῆς ἥττον ἀκριβεστέρα ἀπόδειξις. ἔστι δὲ τοιαύτη ἡ καθόλου μᾶλλον· κρείττων <ἄρ' > ἂν εἴη ἡ καθόλου. οἷον εἰ ἔδει ἀποδείξαι τὸ Α κατὰ τοῦ Δ· μέσα τὰ ἐφ' ὧν Β Γ· ἀνωτέρω δὲ τὸ Β, ὥστε ἡ διὰ τούτου καθόλου μᾶλλον.

Ἀλλὰ τῶν μὲν εἰρημένων ἓνια λογικά ἐστι· μάλιστα δὲ δηλόν ὅτι ἡ καθόλου κυριωτέρα, ὅτι τῶν προτάσεων τὴν μὲν προτέραν ἔχοντες ἴσμεν πως καὶ τὴν ὑστέραν καὶ ἔχομεν δυνάμει, οἷον εἴ τις οἶδεν ὅτι πᾶν τρίγωνον δυσὶν ὀρθαῖς, οἶδέ πως καὶ τὸ ἰσοσκελὲς ὅτι δύο ὀρθαῖς, δυνάμει, καὶ εἰ μὴ οἶδε τὸ ἰσοσκελὲς ὅτι τρίγωνον· ὁ δὲ ταύτην ἔχων τὴν πρότασιν τὸ καθόλου οὐδαμῶς οἶδεν, οὔτε δυνάμει οὔτ' ἐνεργείᾳ. καὶ ἡ μὲν καθόλου νοητή, ἡ δὲ κατὰ μέρος εἰς αἴσθησιν τελευτᾷ.

Ὅτι μὲν οὖν ἡ καθόλου βελτίων τῆς κατὰ μέρος, τοσαῦθ' ἡμῖν εἰρήσθω· ὅτι δ' ἡ δεικτική τῆς στερητικῆς, ἐντεῦθεν δῆλον. ἔστω γὰρ αὕτη ἡ ἀποδείξις βελτίων τῶν ἄλλων τῶν αὐτῶν ὑπαρχόντων, ἡ ἐξ ἐλαττόνων αἰτημάτων ἢ ὑποθέσεων ἢ προτάσεων. εἰ γὰρ γνώριμοι ὁμοίως, τὸ θᾶπτον γινῶναι διὰ τούτων ὑπάρξει· τοῦτο δ' αἰρετώτερον. λόγος δὲ τῆς προτάσεως, ὅτι βελτίων ἡ ἐξ ἐλαττόνων, καθόλου ὅδε· εἰ γὰρ ὁμοίως εἴη τὸ γνώριμα εἶναι τὰ μέσα, τὰ δὲ πρότερα γνωριμώτερα, ἔστω ἡ μὲν διὰ μέσων ἀποδείξις τῶν (86b.) Β Γ Δ ὅτι τὸ Α τῷ Ε ὑπάρχει, ἡ δὲ διὰ τῶν Ζ Η ὅτι τὸ Α τῷ Ε. ὁμοίως δὴ ἔχει τὸ ὅτι τὸ Α τῷ Δ ὑπάρχει καὶ τὸ Α τῷ Ε. τὸ δ' ὅτι τὸ Α τῷ Δ πρότερον καὶ γνωριμώτερον ἢ ὅτι τὸ Α τῷ Ε· διὰ γὰρ τούτου ἐκεῖνο ἀποδείκνυται, πιστότερον δὲ τὸ δι' οὗ. καὶ ἡ διὰ τῶν ἐλαττόνων ἄρα ἀποδείξις βελτίων τῶν ἄλλων τῶν αὐτῶν ὑπαρχόντων. ἀμφοτέραι μὲν οὖν διὰ τε ὄρων τριῶν καὶ προτάσεων δύο δείκνυνται, ἀλλ' ἡ μὲν εἶναι τι λαμβάνει, ἡ δὲ καὶ εἶναι καὶ μὴ εἶναι τι· διὰ πλειόνων ἄρα, ὥστε χείρων.

Ἐτι ἐπειδὴ δέδεικται ὅτι ἀδύνατον ἀμφοτέρων οὐσῶν στερητικῶν τῶν προτάσεων γενέσθαι συλλογισμόν, ἀλλὰ τὴν μὲν δεῖ τοιαύτην εἶναι, τὴν δ' ὅτι ὑπάρχει, ἔτι πρὸς τούτῳ δεῖ τόδε λαβεῖν. τὰς μὲν γὰρ κατηγορικὰς αὐξανομένης τῆς ἀποδείξεως ἀναγκαῖον γίνεσθαι πλείους, τὰς δὲ στερητικὰς ἀδύνατον πλείους εἶναι μιᾶς ἐν ἅπαντι συλλογισμῷ. ἔστω γὰρ μηδενὶ ὑπάρχον τὸ Α ἐφ' ὅσων τὸ Β, τῷ δὲ Γ ὑπάρχον παντὶ τὸ Β. ἂν δὴ δέη πάλιν αὔξειν ἀμφοτέρας τὰς προτάσεις, μέσον ἐμβλητέον. τοῦ μὲν Α Β ἔστω τὸ Δ, τοῦ δὲ Β Γ τὸ Ε. τὸ μὲν δὴ Ε φανερόν ὅτι κατηγορικόν, τὸ δὲ Δ τοῦ μὲν Β κατηγορικόν, πρὸς δὲ τὸ Α στερητικὸν κεῖται. τὸ μὲν γὰρ Δ παντὸς τοῦ Β, τὸ δὲ Α οὐδενὶ δεῖ τῶν Δ ὑπάρχειν. γίνεται οὖν μία στερητικὴ πρότασις ἡ τὸ Α Δ. ὁ δ' αὐτὸς τρόπος καὶ ἐπὶ τῶν ἐτέρων συλλογισμῶν. αἰ γὰρ τὸ μέσον τῶν κατηγορικῶν ὄρων κατηγορικὸν ἐπ' ἀμφοτέρα· τοῦ δὲ στερητικοῦ ἐπὶ θάτερα στερητικὸν ἀναγκαῖον εἶναι, ὥστε αὕτη μία τοιαύτη γίνεται πρότασις, αἱ δ' ἄλλαι κατηγορικαί. εἰ δὴ γνωριμώτερον δι' οὗ δείκνυται καὶ πιστότερον, δείκνυνται δ' ἡ μὲν στερητικὴ διὰ τῆς κατηγορικῆς, αὕτη δὲ δι' ἐκείνης οὐ δείκνυται, προτέρα καὶ γνωριμωτέρα οὖσα καὶ πιστοτέρα

βελτίων ἂν εἴη. ἔτι εἰ ἀρχὴ συλλογισμοῦ ἢ καθόλου πρότασις ἄμεσος, ἔστι δ' ἐν μὲν τῇ δεικτικῇ καταφατικῇ ἐν δὲ τῇ στερητικῇ ἀποφατικῇ ἢ καθόλου πρότασις, ἢ δὲ καταφατικῇ τῆς ἀποφατικῆς προτέρα καὶ γνωριμωτέρα (διὰ γὰρ τὴν κατάφασιν ἢ ἀπόφασιν γνώριμος, καὶ προτέρα ἢ κατάφασις, ὥσπερ καὶ τὸ εἶναι τοῦ μὴ εἶναι)· ὥστε βελτίων ἢ ἀρχὴ τῆς δεικτικῆς ἢ τῆς στερητικῆς· ἢ δὲ βελτίοσιν ἀρχαῖς χρωμένῃ βελτίων. ἔτι ἀρχοειδεστέρα· ἄνευ γὰρ τῆς δεικνυούσης οὐκ ἔστιν ἡ στερητική.

Ἐπεὶ δ' ἡ κατηγορικὴ τῆς στερητικῆς βελτίων, δῆλον ὅτι καὶ τῆς εἰς τὸ ἀδύνατον ἀγούσης. δεῖ δ' εἰδέναι τίς ἡ διαφορὰ αὐτῶν. ἔστω δὴ τὸ Α μηδενὶ ὑπάρχον τῷ Β, τῷ δὲ Γ τὸ Β παντί· ἀνάγκη δὴ τῷ Γ μηδενὶ ὑπάρχειν τὸ Α. οὕτω μὲν οὖν ληφθέντων δεικτικὴ ἡ στερητικὴ ἂν εἴη ἀπόδειξις ὅτι τὸ Α τῷ Γ οὐχ ὑπάρχει. ἡ δ' εἰς τὸ ἀδύνατον ὧδ' ἔχει. εἰ δεοὶ δεῖξαι ὅτι τὸ Α τῷ Β οὐχ ὑπάρχει, ληπτέον ὑπάρχειν, καὶ τὸ Β τῷ Γ, ὥστε συμβαίνει τὸ Α τῷ Γ ὑπάρχειν. τοῦτο δ' ἔστω γνώριμον καὶ ὁμολογούμενον ὅτι ἀδύνατον. οὐκ ἄρα οἷόν τε τὸ Α τῷ Β ὑπάρχειν. εἰ οὖν τὸ Β τῷ Γ ὁμολογεῖται ὑπάρχειν, τὸ Α τῷ Β ἀδύνατον ὑπάρχειν. οἱ μὲν οὖν ὅροι ὁμοίως τάττονται, διαφέρει δὲ τὸ ὁποτέρα ἂν ἡ γνωριμωτέρα ἢ πρότασις ἡ στερητικὴ, πότερον ὅτι τὸ Α τῷ Β οὐχ ὑπάρχει ἢ ὅτι τὸ Α τῷ Γ. ὅταν μὲν οὖν ἡ τὸ συμπέρασμα γνωριμώτερον ὅτι οὐκ ἔστιν, ἡ εἰς τὸ ἀδύνατον γίνεται ἀπόδειξις, ὅταν δ' ἡ ἐν τῷ συλλογισμῷ, ἡ ἀποδεικτικὴ. φύσει δὲ προτέρα ἡ ὅτι τὸ Α τῷ Β ἢ ὅτι τὸ Α τῷ Γ. πρότερα γάρ ἐστι τοῦ συμπεράσματος ἐξ ὧν τὸ συμπέρασμα· ἔστι δὲ τὸ μὲν Α τῷ Γ μὴ ὑπάρχειν συμπέρασμα, τὸ δὲ Α τῷ Β ἐξ οὗ τὸ συμπέρασμα. οὐ γὰρ εἰ συμβαίνει ἀναιρεῖσθαι τι, τοῦτο συμπέρασμα ἐστίν, ἐκεῖνα δὲ ἐξ ὧν, ἀλλὰ τὸ μὲν ἐξ οὗ συλλογισμός ἐστίν ὃ ἂν οὕτως ἔχη ὥστε ἢ ὅλον πρὸς μέρος ἢ μέρος πρὸς ὅλον ἔχειν, αἱ δὲ τὸ Α Γ καὶ Β Γ προτάσεις οὐκ ἔχουσιν οὕτω πρὸς ἀλλήλας. εἰ οὖν ἡ ἐκ γνωριμωτέρων καὶ προτέρων κρείττων, εἰσὶ δ' ἀμφοτέραι ἐκ τοῦ μὴ εἶναι τι πισταί, ἀλλ' ἡ μὲν ἐκ προτέρου ἢ δ' ἐξ ὑστέρου, βελτίων ἀπλῶς ἂν εἴη τῆς εἰς τὸ ἀδύνατον ἢ στερητικὴ ἀπόδειξις, ὥστε καὶ ἡ ταύτης βελτίων ἢ κατηγορικὴ δῆλον ὅτι καὶ τῆς εἰς τὸ ἀδύνατόν ἐστι βελτίων.

Κεφάλαιο 28

Μία δ' ἐπιστήμη ἐστὶν ἡ ἐνὸς γένους, ὅσα ἐκ τῶν πρώτων σύγκειται καὶ μέρη ἐστὶν ἢ πάθη τούτων καθ' αὐτά. ἑτέρα δ' ἐπιστήμη ἐστὶν ἑτέρας, ὅσων αἱ ἀρχαὶ μὴτ' ἐκ τῶν αὐτῶν (87b.) μὴθ' ἄτεραι ἐκ τῶν ἐτέρων. τούτου δὲ σημεῖον, ὅταν εἰς τὰ ἀναπόδευκτα ἔλθῃ· δεῖ γὰρ αὐτὰ ἐν τῷ αὐτῷ γένει εἶναι τοῖς ἀποδεδειγμένοις. σημεῖον δὲ καὶ τούτου, ὅταν τὰ δεικνύμενα δι' αὐτῶν ἐν ταὐτῷ γένει ᾧσι καὶ συγγενῇ.

Πλείους δ' αποδείξεις εἶναι τοῦ αὐτοῦ ἐγχωρεῖ οὐ μόνον ἐκ τῆς αὐτῆς συστοιχίας λαμβάνοντι μὴ τὸ συνεχὲς μέσον, οἷον τῶν Α Β τὸ Γ καὶ Δ καὶ Ζ, ἀλλὰ καὶ ἐξ ἐτέρας. οἷον ἔστω τὸ Α μεταβάλλειν, τὸ δ' ἐφ' ᾧ Δ κινεῖσθαι, τὸ δὲ Β ἥδεσθαι, καὶ πάλιν τὸ Η ἡρεμίζεσθαι. ἀληθὲς οὖν καὶ τὸ Δ τοῦ Β καὶ τὸ Α τοῦ Δ κατηγορεῖν· ὁ γὰρ ἡδόμενος κινεῖται καὶ τὸ κινούμενον μεταβάλλει. πάλιν τὸ Α τοῦ Η καὶ τὸ Η τοῦ Β ἀληθὲς κατηγορεῖν· πᾶς γὰρ ὁ ἡδόμενος ἡρεμίζεται καὶ ὁ ἡρεμιζόμενος μεταβάλλει. ὥστε δι' ἐτέρων μέσων καὶ οὐκ ἐκ τῆς αὐτῆς συστοιχίας ὁ συλλογισμός. οὐ μὴν ὥστε μηδέτερον κατὰ μηδετέρου λέγεσθαι τῶν μέσων· ἀνάγκη γὰρ τῷ αὐτῷ τινι ἄμφω ὑπάρχειν. ἐπισκέψασθαι δὲ καὶ διὰ τῶν ἄλλων σχημάτων ὅσαχῶς ἐνδέχεται τοῦ αὐτοῦ γενέσθαι συλλογισμόν.

Κεφάλαιο 30

Τοῦ δ' ἀπὸ τύχης οὐκ ἔστιν ἐπιστήμη δι' ἀποδείξεως. οὔτε γὰρ ὡς ἀναγκαῖον οὔθ' ὡς ἐπὶ τὸ πολὺ τὸ ἀπὸ τύχης ἐστίν, ἀλλὰ τὸ παρὰ ταῦτα γινόμενον· ἢ δ' ἀπόδειξις θατέρου τούτων. πᾶς γὰρ συλλογισμὸς ἢ δι' ἀναγκαίων ἢ διὰ τῶν ὡς ἐπὶ τὸ πολὺ προτάσεων· καὶ εἰ μὲν αἱ προτάσεις ἀναγκαῖαι, καὶ τὸ συμπέρασμα ἀναγκαῖον, εἰ δ' ὡς ἐπὶ τὸ πολὺ, καὶ τὸ συμπέρασμα τοιοῦτον. ὥστ' εἰ τὸ ἀπὸ τύχης μήθ' ὡς ἐπὶ τὸ πολὺ μήτ' ἀναγκαῖον, οὐκ ἂν εἴη αὐτοῦ ἀπόδειξις.

Κεφάλαιο 31

Οὐδὲ δι' αἰσθήσεως ἔστιν ἐπίστασθαι. εἰ γὰρ καὶ ἔστιν ἡ αἴσθησις τοῦ τοιοῦδε καὶ μὴ τοῦδέ τινος, ἀλλ' αἰσθάνεσθαι γε ἀναγκαῖον τόδε τι καὶ ποῦ καὶ νῦν. τὸ δὲ καθόλου καὶ ἐπὶ πᾶσιν ἀδύνατον αἰσθάνεσθαι· οὐ γὰρ τόδε οὐδὲ νῦν· οὐ γὰρ ἂν ἦν καθόλου· τὸ γὰρ ἀεὶ καὶ πανταχοῦ καθόλου φαμέν εἶναι. ἐπεὶ οὖν αἱ μὲν ἀποδείξεις καθόλου, ταῦτα δ' οὐκ ἔστιν αἰσθάνεσθαι, φανερόν ὅτι οὐδ' ἐπίστασθαι δι' αἰσθήσεως ἔστιν, ἀλλὰ δῆλον ὅτι καὶ εἰ ἦν αἰσθάνεσθαι τὸ τρίγωνον ὅτι δυσὶν ὀρθαῖς ἴσας ἔχει τὰς γωνίας, ἐζητοῦμεν ἂν ἀποδείξιν καὶ οὐχ ὥσπερ φασί τινες ἠπιστάμεθα· αἰσθάνεσθαι μὲν γὰρ ἀνάγκη καθ' ἕκαστον, ἡ δ' ἐπιστήμη τὸ τὸ καθόλου γνωρίζειν ἐστίν. διὸ καὶ εἰ ἐπὶ τῆς σελήνης ὄντες ἐωρῶμεν ἀντιφράττουσαν τὴν γῆν, οὐκ ἂν ἤδειμεν τὴν αἰτίαν (88a.) τῆς ἐκλείψεως. ἡσθανόμεθα γὰρ ἂν ὅτι νῦν ἐκλείπει, καὶ οὐ διότι ὅλως· οὐ γὰρ ἦν τοῦ καθόλου αἴσθησις. οὐ μὴν ἀλλ' ἐκ τοῦ θεωρεῖν τοῦτο πολλάκις συμβαῖνον τὸ καθόλου ἂν θηρεύσαντες ἀποδείξιν εἶχομεν· ἐκ γὰρ τῶν καθ' ἕκαστα πλειόνων τὸ καθόλου δῆλον. τὸ δὲ καθόλου τίμιον, ὅτι δηλοῖ τὸ αἴτιον· ὥστε περὶ τῶν τοιούτων ἡ καθόλου τιμιωτέρα τῶν αἰσθήσεων καὶ τῆς νοήσεως, ὅσων ἕτερον τὸ αἴτιον· περὶ δὲ τῶν πρώτων ἄλλος λόγος.

Φανερόν οὖν ὅτι ἀδύνατον τῷ αἰσθάνεσθαι ἐπίστασθαι τι τῶν ἀποδεικτῶν, εἰ μὴ τις τὸ αἰσθάνεσθαι τοῦτο λέγει, τὸ ἐπιστήμην ἔχειν δι' ἀποδείξεως. ἔστι μέντοι ἓνια ἀναγόμενα εἰς αἰσθήσεως ἐκλειψιν ἐν τοῖς προβλήμασιν. ἓνια γὰρ εἰ ἐωρῶμεν οὐκ ἂν ἐζητοῦμεν, οὐχ ὥς εἰδότες τῷ ὁρᾶν, ἀλλ' ὥς ἔχοντες τὸ καθόλου ἐκ τοῦ ὁρᾶν. οἷον εἰ τὴν ὕαλον τετρυπημένην ἐωρῶμεν καὶ τὸ φῶς διόν, δῆλον ἂν ἦν καὶ διὰ τί καίει, τῷ ὁρᾶν μὲν χωρὶς ἐφ' ἐκάστης, νοῆσαι δ' ἅμα ὅτι ἐπὶ πασῶν οὕτως.

Κεφάλαιο 32

Τὰς δ' αὐτὰς ἀρχὰς ἀπάντων εἶναι τῶν συλλογισμῶν ἀδύνατον, πρῶτον μὲν λογικῶς θεωροῦσιν. οἱ μὲν γὰρ ἀληθεῖς εἰσι τῶν συλλογισμῶν, οἱ δὲ ψευδεῖς. καὶ γὰρ εἰ ἔστιν ἀληθὲς ἐκ ψευδῶν συλλογίσασθαι, ἀλλ' ἅπαξ τοῦτο γίνεται, οἷον εἰ τὸ Α κατὰ τοῦ Γ ἀληθές, τὸ δὲ μέσον τὸ Β ψεῦδος· οὔτε γὰρ τὸ Α τῷ Β ὑπάρχει οὔτε τὸ Β τῷ Γ. ἀλλ' ἐὰν τούτων μέσα λαμβάνηται τῶν προτάσεων, ψευδεῖς ἔσονται διὰ τὸ πᾶν συμπέρασμα ψεῦδος ἐκ ψευδῶν εἶναι, τὰ δ' ἀληθῆ ἐξ ἀληθῶν, ἕτερα δὲ τὰ ψευδῆ καὶ τὰ ληθῆ. εἴτα οὐδὲ τὰ ψευδῆ ἐκ τῶν αὐτῶν ἑαυτοῖς· ἔστι γὰρ ψευδῆ ἀλλήλοις καὶ ἐναντία καὶ ἀδύνατα ἅμα εἶναι, οἷον τὸ τὴν δικαιοσύνην εἶναι ἀδικίαν ἢ δειλίαν, καὶ τὸν ἄνθρωπον ἵππον ἢ βοῦν, ἢ τὸ ἴσον μεῖζον ἢ ἔλαττον.

Ἐκ δὲ τῶν κειμένων ὧδε· οὐδὲ γὰρ τῶν ἀληθῶν αἱ αὐταὶ ἀρχαὶ πάντων. ἕτεραι γὰρ πολλῶν τῷ γένει αἱ ἀρχαί, καὶ οὐδ' ἐφαρμόττουσαι, οἷον αἱ μονάδες ταῖς στιγμαῖς οὐκ ἐφαρμόττουσιν· αἱ μὲν γὰρ οὐκ ἔχουσι θέσιν, αἱ δὲ ἔχουσιν. ἀνάγκη δέ γε ἢ εἰς μέσα ἀρμόττειν ἢ ἄνωθεν ἢ κάτωθεν, ἢ τοὺς μὲν εἶσω ἔχειν τοὺς δ' ἔξω τῶν ὅρων. ἀλλ' οὐδὲ τῶν κοινῶν ἀρχῶν οἷόν τ' εἶναι τινὰς ἐξ ὧν ἅπαντα δειχθήσεται· λέγω δὲ κοινὰς (88b.) οἷον τὸ πᾶν φάναι ἢ ἀποφάναι. τὰ γὰρ γένη τῶν ὄντων ἕτερα, καὶ τὰ μὲν τοῖς ποσοῖς τὰ δὲ τοῖς ποιοῖς ὑπάρχει μόνοις, μεθ' ὧν δεικνυταὶ διὰ τῶν κοινῶν. ἔτι αἱ ἀρχαὶ οὐ πολλῷ ἐλάττους τῶν συμπερασμάτων· ἀρχαὶ μὲν γὰρ αἱ προτάσεις, αἱ δὲ προτάσεις ἢ προσλαμβανομένου ὅρου ἢ ἐμβαλλομένου εἰσίν. ἔτι τὰ συμπεράσματα ἄπειρα, οἱ δ' ὅροι πεπερασμένοι. ἔτι αἱ ἀρχαὶ αἱ μὲν ἐξ ἀνάγκης, αἱ δ' ἐνδεχόμεναι.

Οὕτω μὲν οὖν σκοποῦμένοις ἀδύνατον τὰς αὐτὰς εἶναι πεπερασμένας, ἀπείρων ὄντων τῶν συμπερασμάτων. εἰ δ' ἄλλως πως λέγοι τις, οἷον ὅτι αἰδὶ μὲν γεωμετρίας αἰδὶ δὲ λογισμῶν αἰδὶ δὲ ἱατρικῆς, τί ἂν εἴη τὸ λεγόμενον ἄλλο πλὴν ὅτι εἰσὶν ἀρχαὶ τῶν ἐπιστημῶν; τὸ δὲ τὰς αὐτὰς φάναι γελοῖον, ὅτι αὐταὶ αὐταῖς αἱ αὐταί· πάντα γὰρ οὕτω γίγνεται ταυτά. ἀλλὰ μὴν οὐδὲ τὸ ἐξ ἀπάντων δεικνυσθαι ὅτιοῦν, τοῦτ' ἐστὶ τὸ ζητεῖν ἀπάντων εἶναι τὰς αὐτὰς ἀρχάς· λίαν γὰρ εὐηθες. οὔτε γὰρ ἐν τοῖς φανεροῖς μαθήμασι τοῦτο γίνεται, οὔτ' ἐν τῇ ἀναλύσει δυνατόν· αἱ γὰρ ἄμεσοι προτάσεις ἀρχαί, ἕτερον δὲ συμπέρασμα προσληφθείσης γίνεται προτάσεως

ἀμέσου. εἰ δὲ λέγοι τις τὰς πρώτας ἀμέσους προτάσεις, ταύτας εἶναι ἀρχάς, μία ἐν ἐκάστῳ γένει ἐστίν. εἰ δὲ μήτ' ἐξ ἀπασῶν ὥς δέον δείκνυσθαι ὅτιοῦν μήθ' οὕτως ἑτέρας ὥσθ' ἐκάστης ἐπιστήμης εἶναι ἑτέρας, λείπεται εἰ συγγενεῖς αἱ ἀρχαὶ πάντων, ἀλλ' ἐκ τωνδὶ μὲν ταδί, ἐκ δὲ τωνδὶ ταδί. φανερόν δὲ καὶ τοῦθ' ὅτι οὐκ ἐνδέχεται· δέδεικται γὰρ ὅτι ἄλλαι ἀρχαὶ τῷ γένει εἰσὶν αἱ τῶν διαφορῶν τῷ γένει. αἱ γὰρ ἀρχαὶ διτταί, ἐξ ὧν τε καὶ περὶ ὅ· αἱ μὲν οὖν ἐξ ὧν κοιναί, αἱ δὲ περὶ ὃ ἴδιαι, οἷον ἀριθμός, μέγεθος.

Κεφάλαιο 33

Τὸ δ' ἐπιστητὸν καὶ ἐπιστήμη διαφέρει τοῦ δοξαστοῦ καὶ δόξης, ὅτι ἡ μὲν ἐπιστήμη καθόλου καὶ δι' ἀναγκαίων, τὸ δ' ἀναγκαῖον οὐκ ἐνδέχεται ἄλλως ἔχειν. ἔστι δέ τινα ἀληθῆ μὲν καὶ ὄντα, ἐνδεχόμενα δὲ καὶ ἄλλως ἔχειν. δῆλον οὖν ὅτι περὶ μὲν ταῦτα ἐπιστήμη οὐκ ἔστιν· εἴη γὰρ ἂν ἀδύνατα ἄλλως ἔχειν τὰ δυνατὰ ἄλλως ἔχειν. ἀλλὰ μὴν οὐδὲ νοῦς (λέγω γὰρ νοῦν ἀρχὴν ἐπιστήμης) οὐδ' ἐπιστήμη ἀναπόδεικτος· τοῦτο δ' ἐστὶν ὑπόληψις τῆς ἀμέσου προτάσεως. ἀληθῆς δ' (89a.) ἐστὶ νοῦς καὶ ἐπιστήμη καὶ δόξα καὶ τὸ διὰ τούτων λεγόμενον· ὥστε λείπεται δόξαν εἶναι περὶ τὸ ἀληθές μὲν ἢ ψεῦδος, ἐνδεχόμενον δὲ καὶ ἄλλως ἔχειν. τοῦτο δ' ἐστὶν ὑπόληψις τῆς ἀμέσου προτάσεως καὶ μὴ ἀναγκαίας. καὶ ὁμολογούμενον δ' οὕτω τοῖς φαινομένοις· ἢ τε γὰρ δόξα ἀβέβαιον, καὶ ἡ φύσις ἡ τοιαύτη. πρὸς δὲ τούτοις οὐδεὶς οἶεται δοξάζειν, ὅταν οἴηται ἀδύνατον ἄλλως ἔχειν, ἀλλ' ἐπίστασθαι· ἀλλ' ὅταν εἶναι μὲν οὕτως, οὐ μὴν ἀλλὰ καὶ ἄλλως οὐδὲν κωλύειν, τότε δοξάζειν, ὡς τοῦ μὲν τοιούτου δόξαν οὔσαν, τοῦ δ' ἀναγκαίου ἐπιστήμην.

Πῶς οὖν ἔστι τὸ αὐτὸ δοξάσαι καὶ ἐπίστασθαι, καὶ διὰ τί οὐκ ἔσται ἡ δόξα ἐπιστήμη, εἴ τις θήσῃ ἅπαν ὃ οἶδεν ἐνδέχεσθαι δοξάζειν; ἀκολουθήσῃ γὰρ ὁ μὲν εἰδὼς ὃ δὲ δοξάζων διὰ τῶν μέσων, ἕως εἰς τὰ ἄμεσα ἔλθῃ, ὥστ' εἴπερ ἐκεῖνος οἶδε, καὶ ὃ δοξάζων οἶδεν. ὥσπερ γὰρ καὶ τὸ ὅτι δοξάζειν ἔστι, καὶ τὸ διότι· τοῦτο δὲ τὸ μέσον. ἢ εἰ μὲν οὕτως ὑπολήψεται τὰ μὴ ἐνδεχόμενα ἄλλως ἔχειν ὥσπερ [ἔχει] τοὺς ὀρισμοὺς δι' ὧν αἱ ἀποδείξεις, οὐ δοξάσει ἀλλ' ἐπιστήσεται· εἰ δ' ἀληθῆ μὲν εἶναι, οὐ μέντοι ταῦτά γε αὐτοῖς ὑπάρχειν κατ' οὐσίαν καὶ κατὰ τὸ εἶδος, δοξάσει καὶ οὐκ ἐπιστήσεται ἀληθῶς, καὶ τὸ ὅτι καὶ τὸ διότι, ἐὰν μὲν διὰ τῶν ἀμέσων δοξάσῃ· ἐὰν δὲ μὴ διὰ τῶν ἀμέσων, τὸ ὅτι μόνον δοξάσει; τοῦ δ' αὐτοῦ δόξα καὶ ἐπιστήμη οὐ πάντως ἐστίν, ἀλλ' ὥσπερ καὶ ψευδῆς καὶ ἀληθῆς τοῦ αὐτοῦ τρόπον τινά, οὕτω καὶ ἐπιστήμη καὶ δόξα τοῦ αὐτοῦ. καὶ γὰρ δόξαν ἀληθῆ καὶ ψευδῆ ὡς μὲν τινες λέγουσι τοῦ αὐτοῦ εἶναι, ἄτοπα συμβαίνει αἰρεῖσθαι ἄλλα τε καὶ μὴ δοξάζειν ὃ δοξάζει ψευδῶς· ἐπεὶ δὲ τὸ αὐτὸ πλεοναχῶς λέγεται, ἔστιν ὡς ἐνδέχεται, ἔστι δ' ὡς οὐ. τὸ μὲν γὰρ σύμμετρον εἶναι τὴν διάμετρον ἀληθῶς δοξάζειν ἄτοπον· ἀλλ' ὅτι ἡ διάμετρος, περὶ ἣν αἱ δόξαι, τὸ αὐτό, οὕτω τοῦ αὐτοῦ, τὸ

δὲ τί ἦν εἶναι ἐκατέρω κατὰ τὸν λόγον οὐ τὸ αὐτό. ὁμοίως δὲ καὶ ἐπιστήμη καὶ δόξα τοῦ αὐτοῦ. ἡ μὲν γὰρ οὕτως τοῦ ζῴου ὥστε μὴ ἐνδέχεσθαι μὴ εἶναι ζῶον, ἡ δ' ὥστ' ἐνδέχεσθαι, οἷον εἰ ἡ μὲν ὅπερ ἀνθρώπου ἐστίν, ἡ δ' ἀνθρώπου μὲν, μὴ ὅπερ δ' ἀνθρώπου. τὸ αὐτὸ γὰρ ὅτι ἄνθρωπος, τὸ δ' ὡς οὐ τὸ αὐτό.

Φανερόν δ' ἐκ τούτων ὅτι οὐδὲ δοξάζειν ἅμα τὸ αὐτὸ καὶ ἐπίστασθαι ἐνδέχεται. ἅμα γὰρ ἂν ἔχοι ὑπόληψιν τοῦ (89b.) ἄλλως ἔχειν καὶ μὴ ἄλλως τὸ αὐτό· ὅπερ οὐκ ἐνδέχεται. ἐν ἄλλῳ μὲν γὰρ ἐκότερον εἶναι ἐνδέχεται τοῦ αὐτοῦ ὡς εἴρηται, ἐν δὲ τῷ αὐτῷ οὐδ' οὕτως οἷόν τε· ἔξει γὰρ ὑπόληψιν ἅμα, οἷον ὅτι ὁ ἄνθρωπος ὅπερ ζῶον (τοῦτο γὰρ ἦν τὸ μὴ ἐνδέχεσθαι εἶναι μὴ ζῶον) καὶ μὴ ὅπερ ζῶον· τοῦτο γὰρ ἔστω τὸ ἐνδέχεσθαι.

Τὰ δὲ λοιπὰ πῶς δεῖ διανεῖμαι ἐπὶ τε διανοίας καὶ νοῦ καὶ ἐπιστήμης καὶ τέχνης καὶ φρονήσεως καὶ σοφίας, τὰ μὲν φυσικῆς τὰ δὲ ἠθικῆς θεωρίας μᾶλλον ἐστίν.

Κεφάλαιο 34

Ἡ δ' ἀγχίνουα ἐστὶν εὐστοχία τις ἐν ἀσκέπτῳ χρόνῳ τοῦ μέσου, οἷον εἴ τις ἰδὼν ὅτι ἡ σελήνη τὸ λαμπρὸν αἰεὶ ἔχει πρὸς τὸν ἥλιον, ταχὺ ἐνενόησε διὰ τί τοῦτο, ὅτι διὰ τὸ λάμπειν ἀπὸ τοῦ ἡλίου· ἢ διαλεγόμενον πλουσίῳ ἔγνω διότι δανείζεται· ἢ διότι φίλοι, ὅτι ἐχθροὶ τοῦ αὐτοῦ. πάντα γὰρ τὰ αἷτια τὰ μέσα [ό] ἰδὼν τὰ ἄκρα ἐγνώρισεν. τὸ λαμπρὸν εἶναι τὸ πρὸς τὸν ἥλιον ἐφ' οὗ Α, τὸ λάμπειν ἀπὸ τοῦ ἡλίου Β, σελήνη τὸ Γ. ὑπάρχει δὴ τῇ μὲν σελήνῃ τῷ Γ τὸ Β, τὸ λάμπειν ἀπὸ τοῦ ἡλίου· τῷ δὲ Β τὸ Α, τὸ πρὸς τοῦτ' εἶναι τὸ λαμπρὸν, ἀφ' οὗ λάμπει· ὥστε καὶ τῷ Γ τὸ Α διὰ τοῦ Β.

Κεφάλαιο 1

Τὰ ζητούμενά ἐστιν ἴσα τὸν ἀριθμὸν ὅσαπερ ἐπιστάμεθα. ζητοῦμεν δὲ τέτταρα, τὸ ὅτι, τὸ διότι, εἰ ἔστι, τί ἐστίν. ὅταν μὲν γὰρ πότερον τόδε ἢ τόδε ζητῶμεν, εἰς ἀριθμὸν θέντες, οἷον πότερον ἐκλείπει ὁ ἥλιος ἢ οὐ, τὸ ὅτι ζητοῦμεν. σημεῖον δὲ τούτου· εὐρόντες γὰρ ὅτι ἐκλείπει πεπαύμεθα· καὶ ἐὰν ἐξ ἀρχῆς εἰδῶμεν ὅτι ἐκλείπει, οὐ ζητοῦμεν πότερον. ὅταν δὲ εἰδῶμεν τὸ ὅτι, τὸ διότι ζητοῦμεν, οἷον εἰδότες ὅτι ἐκλείπει καὶ ὅτι κινεῖται ἡ γῆ, τὸ διότι ἐκλείπει ἢ διότι κινεῖται ζητοῦμεν. ταῦτα μὲν οὖν οὕτως, ἓνια δ' ἄλλον τρόπον ζητοῦμεν, οἷον εἰ ἔστιν ἢ μὴ ἔστι κένταυρος ἢ θεός· τὸ δ' εἰ ἔστιν ἢ μὴ ἀπλῶς λέγω, ἀλλ' οὐκ εἰ λευκὸς ἢ μὴ. γνόντες δὲ ὅτι ἔστι, τί ἐστι ζητοῦμεν, οἷον τί οὖν ἐστι θεός, ἢ τί ἐστιν ἄνθρωπος;

Κεφάλαιο 2

Ἄ μὲν οὖν ζητοῦμεν καὶ ἃ εὐρόντες ἴσμεν, ταῦτα καὶ τοσαῦτά ἐστιν. ζητοῦμεν δέ, ὅταν μὲν ζητῶμεν τὸ ὅτι ἢ τὸ εἰ ἔστιν ἀπλῶς, ἄρ' ἔστι μέσον αὐτοῦ ἢ οὐκ ἔστιν· ὅταν δὲ γνόντες ἢ τὸ ὅτι ἢ εἰ ἔστιν, ἢ τὸ ἐπὶ μέρους ἢ τὸ ἀπλῶς, πάλιν [90a] τὸ διὰ τί ζητῶμεν ἢ τὸ τί ἐστι, τότε ζητοῦμεν τί τὸ μέσον. λέγω δὲ τὸ ὅτι ἔστιν ἐπὶ μέρους καὶ ἀπλῶς, ἐπὶ μέρους μὲν, ἄρ' ἐκλείπει ἢ σελήνη ἢ αὕξειται; εἰ γὰρ ἐστι τί ἢ μὴ ἔστι τί, ἐν τοῖς τοιούτοις ζητοῦμεν· ἀπλῶς δ', εἰ ἔστιν ἢ μὴ σελήνη ἢ νύξ. συμβαίνει ἄρα ἐν ἀπάσαις ταῖς ζητήσεσι ζητεῖν ἢ εἰ ἔστι μέσον ἢ τί ἐστι τὸ μέσον. τὸ μὲν γὰρ αἴτιον τὸ μέσον, ἐν ἅπασιν δὲ τοῦτο ζητεῖται. ἄρ' ἐκλείπει; ἄρ' ἔστι τι αἴτιον ἢ οὐ; μετὰ ταῦτα γνόντες ὅτι ἔστι τι, τί οὖν τοῦτ' ἔστι ζητοῦμεν. τὸ γὰρ αἴτιον τοῦ εἶναι μὴ τοδὶ ἢ τοδὶ ἀλλ' ἀπλῶς τὴν οὐσίαν, ἢ τοῦ μὴ ἀπλῶς ἀλλὰ τι τῶν καθ' αὐτὸ ἢ κατὰ συμβεβηκός, τὸ μέσον ἐστίν. λέγω δὲ τὸ μὲν ἀπλῶς τὸ ὑποκείμενον, οἷον σελήνην ἢ γῆν ἢ ἥλιον ἢ τρίγωνον, τὸ δὲ τί ἐκλειψιν, ἰσότητα ἀνισότητα, εἰ ἐν μέσῳ ἢ μὴ. ἐν ἅπασιν γὰρ τούτοις φανερόν ἐστιν ὅτι τὸ αὐτὸ ἐστι τὸ τί ἐστι καὶ διὰ τί ἔστιν. τί ἐστιν ἔκλειψις; στέρησις φωτὸς ἀπὸ σελήνης ὑπὸ γῆς ἀντιφράξεως. διὰ τί ἔστιν ἔκλειψις, ἢ διὰ τί ἐκλείπει ἢ σελήνη; διὰ τὸ ἀπολείπειν τὸ φῶς ἀντιφραττούσης τῆς γῆς. τί ἐστι συμφωνία; λόγος ἀριθμῶν ἐν ὀξεῖ καὶ βαρεῖ. διὰ τί συμφωνεῖ τὸ ὀξὺ τῷ βαρεῖ; διὰ τὸ λόγον ἔχειν ἀριθμῶν τὸ ὀξὺ καὶ τὸ βαρὺ. ἄρ' ἔστι συμφωνεῖν τὸ ὀξὺ καὶ τὸ βαρὺ; ἄρ' ἐστὶν ἐν ἀριθμοῖς ὁ λόγος αὐτῶν; λαβόντες δ' ὅτι ἔστι, τίς οὖν ἐστὶν ὁ λόγος;

Κεφάλαιο 3

Ὅτι δ' ἐστὶ τοῦ μέσου ἡ ζήτησις, δηλοῖ ὅσων τὸ μέσον αἰσθητόν. ζητοῦμεν γὰρ μὴ ἡσθημένοι, οἷον τῆς ἐκλείψεως, εἰ ἔστιν ἢ μὴ. εἰ δ' ἡμεν ἐπὶ τῆς σελήνης, οὐκ ἂν ἐζητοῦμεν οὗτ' εἰ γίνεται οὔτε διὰ τί, ἀλλ' ἅμα δηλον ἂν ἦν. ἐκ γὰρ τοῦ αἰσθέσθαι καὶ τὸ καθόλου ἐγένετο ἂν ἡμῖν εἰδέναι. ἡ μὲν γὰρ αἴσθησις ὅτι νῦν ἀντιφράττει (καὶ γὰρ δηλον ὅτι νῦν ἐκλείπει)· ἐκ δὲ τούτου τὸ καθόλου ἂν ἐγένετο.

Ὡσπερ οὖν λέγομεν, τὸ τί ἐστὶν εἰδέναι ταυτό ἐστι καὶ διὰ τί ἔστιν, τοῦτο δ' ἢ ἀπλῶς καὶ μὴ τῶν ὑπαρχόντων τι, ἢ τῶν ὑπαρχόντων, οἷον ὅτι δύο ὀρθαί, ἢ ὅτι μείζον ἢ ἔλαττον.

Ὅτι μὲν οὖν πάντα τὰ ζητούμενα μέσου ζήτησίς ἐστι, δηλον· πῶς δὲ τὸ τί ἐστὶ δείκνυται, καὶ τίς ὁ τρόπος τῆς ἀναγωγῆς, καὶ τί ἐστὶν ὀρισμὸς καὶ τίνων, εἵπωμεν, διαπορήσαντες πρῶτον περὶ αὐτῶν. ἀρχὴ δ' ἔστω τῶν μελλόντων [90b] ἥπερ ἐστὶν οἰκειοτάτη τῶν ἐχομένων λόγων. ἀπορήσειε γὰρ ἂν τις, ἅρ' ἐστὶ τὸ αὐτὸ καὶ κατὰ τὸ αὐτὸ ὀρισμῷ εἰδέναι καὶ ἀποδείξει, ἢ ἀδύνατον; ὁ μὲν γὰρ ὀρισμὸς τοῦ τί ἐστὶν εἶναι δοκεῖ, τὸ δὲ τί ἐστὶν ἅπαν καθόλου καὶ κατηγορικόν· συλλογισμοὶ δ' εἰσὶν οἱ μὲν στερητικοί, οἱ δ' οὐ καθόλου, οἷον οἱ μὲν ἐν τῷ δευτέρῳ σχήματι στερητικοὶ πάντες, οἱ δ' ἐν τῷ τρίτῳ οὐ καθόλου. εἴτα οὐδὲ τῶν ἐν τῷ πρώτῳ σχήματι κατηγορικῶν ἀπάντων ἔστιν ὀρισμὸς, οἷον ὅτι πᾶν τρίγωνον δυσὶν ὀρθαῖς ἴσας ἔχει. τούτου δὲ λόγος, ὅτι τὸ ἐπίστασθαί ἐστι τὸ ἀποδεικτὸν τὸ ἀπόδειξιν ἔχειν, ὥστ' ἐπεὶ τῶν τοιούτων ἀπόδειξις ἔστι, δηλον ὅτι οὐκ ἂν εἴη αὐτῶν καὶ ὀρισμὸς· ἐπίσταται γὰρ ἂν τις καὶ κατὰ τὸν ὀρισμόν, οὐκ ἔχων τὴν ἀπόδειξιν· οὐδὲν γὰρ κωλύει μὴ ἅμα ἔχειν. ἰκανὴ δὲ πίστις καὶ ἐκ τῆς ἐπαγωγῆς· οὐδὲν γὰρ πώποτε ὀρισάμενοι ἔγνωμεν, οὔτε τῶν καθ' αὐτὸ ὑπαρχόντων οὔτε τῶν συμβεβηκότων. ἔτι εἰ ὁ ὀρισμὸς οὐσίας τινὸς γνωρισμὸς, τά γε τοιαῦτα φανερόν ὅτι οὐκ οὐσίαι.

Ὅτι μὲν οὖν οὐκ ἔστιν ὀρισμὸς ἅπαντος οὔπερ καὶ ἀπόδειξις, δηλον. τί δαί, οὗ ὀρισμὸς, ἅρα παντὸς ἀπόδειξις ἔστιν ἢ οὐ; εἷς μὲν δὴ λόγος καὶ περὶ τούτου ὁ αὐτός. τοῦ γὰρ ἐνός, ἢ ἐν, μία ἐπιστήμη. ὥστ' εἴπερ τὸ ἐπίστασθαί τὸ ἀποδεικτὸν ἐστὶ τὸ τὴν ἀπόδειξιν ἔχειν, συμβήσεται τι ἀδύνατον· ὁ γὰρ τὸν ὀρισμόν ἔχων ἄνευ τῆς ἀποδείξεως ἐπιστήσεται. ἔτι αἱ ἀρχαὶ τῶν ἀποδείξεων ὀρισμοί, ὧν

ὅτι οὐκ ἔσονται ἀποδείξεις δέδεικται πρότερον-ἢ ἔσονται αἱ ἀρχαὶ ἀποδεικταὶ καὶ τῶν ἀρχῶν ἀρχαί, καὶ τοῦτ' εἰς ἄπειρον βαδιεῖται, ἢ τὰ πρῶτα ὀρίσμοι ἔσονται ἀναπόδεικτοι.

Ἀλλ' ἄρα, εἰ μὴ παντὸς τοῦ αὐτοῦ, ἀλλὰ τινὸς τοῦ αὐτοῦ ἔστιν ὀρισμὸς καὶ ἀπόδειξις; ἢ ἀδύνατον; οὐ γὰρ ἔστιν ἀπόδειξις οὗ ὀρισμὸς. ὀρισμὸς μὲν γὰρ τοῦ τί ἐστὶ καὶ οὐσίας· αἱ δ' ἀποδείξεις φαίνονται πᾶσαι ὑποτιθέμεναι καὶ λαμβάνουσαι τὸ τί ἐστίν, οἷον αἱ μαθηματικαὶ τί μονὰς καὶ τί τὸ περιττόν, καὶ αἱ ἄλλαι ὁμοίως. ἔτι πᾶσα ἀπόδειξις τί κατὰ τινὸς δείκνυσιν, οἷον ὅτι ἔστιν ἢ οὐκ ἔστιν· ἐν δὲ τῷ ὀρισμῷ οὐδὲν ἕτερον ἐτέρου κατηγορεῖται, οἷον οὔτε τὸ ζῶον κατὰ τοῦ δίποδος οὔτε τοῦτο κατὰ τοῦ ζῴου, οὐδὲ δὴ κατὰ τοῦ ἐπιπέδου τὸ σχῆμα· οὐ γὰρ ἐστὶ τὸ ἐπίπεδον σχῆμα, οὐδὲ τὸ σχῆμα ἐπίπεδον. ἔτι ἕτερον τὸ τί ἐστὶ καὶ ὅτι ἔστι δεῖξαι. [91a] ὁ μὲν οὖν ὀρισμὸς τί ἐστὶ δηλοῖ, ἢ δὲ ἀπόδειξις ὅτι ἔστι τόδε κατὰ τοῦδε ἢ οὐκ ἔστιν. ἐτέρου δὲ ἐτέρα ἀπόδειξις, ἐὰν μὴ ὥς μέρος ἢ τι τῆς ὅλης. τοῦτο δὲ λέγω, ὅτι δέδεικται τὸ ἰσοσκελὲς δύο ὀρθαί, εἰ πᾶν τρίγωνον δέδεικται· μέρος γάρ, τὸ δ' ὅλον. ταῦτα δὲ πρὸς ἄλληλα οὐκ ἔχει οὕτως, τὸ ὅτι ἔστι καὶ τί ἐστίν· οὐ γὰρ ἐστὶ θατέρου θάτερον μέρος.

Φανερόν ἄρα ὅτι οὔτε οὗ ὀρισμὸς, τούτου παντὸς ἀπόδειξις, οὔτε οὗ ἀπόδειξις, τούτου παντὸς ὀρισμὸς, οὔτε ὅλως τοῦ αὐτοῦ οὐδενὸς ἐνδέχεται ἄμφω ἔχειν. ὥστε δηλὸν ὡς οὐδὲ ὀρισμὸς καὶ ἀπόδειξις οὔτε τὸ αὐτὸ ἂν εἴη οὔτε θάτερον ἐν θατέρῳ· καὶ γὰρ ἂν τὰ ὑποκείμενα ὁμοίως εἶχεν.

Κεφάλαιο 4

Ταῦτα μὲν οὖν μέχρι τούτου διηπορήσθω· τοῦ δὲ τί ἐστὶ πότερον ἔστι συλλογισμὸς καὶ ἀπόδειξις ἢ οὐκ ἔστι, καθάπερ νῦν ὁ λόγος ὑπέθετο; ὁ μὲν γὰρ συλλογισμὸς τί κατὰ τινὸς δείκνυσι διὰ τοῦ μέσου· τὸ δὲ τί ἐστὶν ἰδίον τε, καὶ ἐν τῷ τί ἐστὶ κατηγορεῖται. ταῦτα δ' ἀνάγκη ἀντιστρέφειν. εἰ γὰρ τὸ Α τοῦ Γ ἴδιον, δηλὸν ὅτι καὶ τοῦ Β καὶ τοῦτο τοῦ Γ, ὥστε πάντα ἀλλήλων. ἀλλὰ μὴν καὶ εἰ τὸ Α ἐν τῷ τί ἐστὶν ὑπάρχει παντὶ τῷ Β, καὶ καθόλου τὸ Β παντὸς τοῦ Γ ἐν τῷ τί ἐστὶ λέγεται, ἀνάγκη καὶ τὸ Α ἐν τῷ τί ἐστὶ τοῦ Γ λέγεσθαι. εἰ δὲ μὴ οὕτω τις λήψεται διπλῶσας, οὐκ ἀνάγκη ἔσται τὸ Α τοῦ Γ κατηγορεῖσθαι ἐν τῷ τί ἐστὶν, εἰ τὸ μὲν Α τοῦ Β ἐν τῷ τί ἐστὶ, μὴ καθ' ὅσων δὲ τὸ Β, ἐν τῷ τί ἐστὶν. τὸ δὲ τί ἐστὶν ἄμφω ταῦτα ἔξει· ἔσται ἄρα καὶ τὸ Β κατὰ τοῦ Γ τὸ τί ἐστὶν. εἰ δὴ τὸ τί ἐστὶ καὶ τὸ τί ἦν εἶναι ἄμφω ἔχει, ἐπὶ τοῦ μέσου ἔσται πρότερον τὸ τί ἦν εἶναι. ὅλως τε, εἰ ἔστι δεῖξαι τί ἐστὶν ἄνθρωπος, ἔστω τὸ Γ ἄνθρωπος, τὸ δὲ Α τὸ τί ἐστὶν, εἴτε ζῶον δίπουν εἴτ' ἄλλο τι. εἰ τοῖνυν συλλογιεῖται, ἀνάγκη κατὰ τοῦ Β τὸ Α παντὸς κατηγορεῖσθαι. τοῦτο δ' ἔσται ἄλλος λόγος μέσος, ὥστε καὶ τοῦτο ἔσται τί ἐστὶν ἄνθρωπος. λαμβάνει οὖν ὁ δεῖ δεῖξαι· καὶ γὰρ τὸ Β ἔσται τί ἐστὶν ἄνθρωπος.

Δεῖ δ' ἐν ταῖς δυσὶ προτάσεσι καὶ τοῖς πρώτοις καὶ ἀμέσοις σκοπεῖν· μάλιστα γὰρ φανερόν τὸ λεγόμενον γίνεται. οἱ μὲν οὖν διὰ τοῦ ἀντιστρέφειν δεικνύντες τί ἐστὶ ψυχὴ, ἢ τί ἐστὶν ἄνθρωπος ἢ ἄλλο ὅτιοῦν τῶν ὄντων, τὸ ἐξ ἀρχῆς αἰτοῦνται, οἷον εἰ τις ἀξιώσει ψυχὴν εἶναι τὸ αὐτὸ αὐτῷ αἴτιον τοῦ ζῆν, τοῦτο δ' ἀριθμὸν αὐτὸν αὐτὸν κινοῦντα· ἀνάγκη γὰρ αἰτῆσαι τὴν ψυχὴν ὅπερ ἀριθμὸν εἶναι αὐτὸν αὐτὸν κινοῦντα, οὕτως ὡς τὸ αὐτὸ ὄν. οὐ γὰρ εἰ ἀκολουθεῖ τὸ Α τῷ Β καὶ τοῦτο τῷ Γ, ἔσται τῷ Γ τὸ Α τὸ τί ἦν εἶναι, ἀλλ' ἀληθὲς εἰπεῖν ἔσται μόνον· οὐδ' εἰ ἔστι τὸ Α ὅπερ τι καὶ κατὰ τοῦ Β κατηγορεῖται παντός. καὶ γὰρ τὸ ζῶν εἶναι κατηγορεῖται κατὰ τοῦ ἀνθρώπου εἶναι (ἀληθὲς γὰρ πᾶν τὸ ἀνθρώπου εἶναι ζῶν εἶναι, ὥσπερ καὶ πάντα ἄνθρωπον ζῶον), ἀλλ' οὐχ οὕτως ὥστε ἔν εἶναι. ἐὰν μὲν οὖν μὴ οὕτω λάβῃ, οὐ συλλογιεῖται ὅτι τὸ Α ἐστὶ τῷ Γ τὸ τί ἦν εἶναι καὶ ἡ οὐσία· ἐὰν δὲ οὕτω λάβῃ, πρότερον ἔσται εἰληφώς τῷ Γ τί ἐστὶ τὸ τί ἦν εἶναι [τὸ Β]. ὥστ' οὐκ ἀποδέδεικται· τὸ γὰρ ἐν ἀρχῇ εἴληφεν.

Κεφάλαιο 5

Ἀλλὰ μὴν οὐδ' ἡ διὰ τῶν διαιρέσεων ὁδὸς συλλογίζεται, καθάπερ ἐν τῇ ἀναλύσει τῇ περὶ τὰ σχήματα εἴρηται. οὐδαμοῦ γὰρ ἀνάγκη γίνεται τὸ πρᾶγμα ἐκεῖνο εἶναι τωνδὶ ὄντων, ἀλλ' ὥσπερ οὐδ' ὁ ἐπάγων ἀποδείκνυσιν. οὐ γὰρ δεῖ τὸ συμπέρασμα ἐρωτᾶν, οὐδὲ τῷ δοῦναι εἶναι, ἀλλ' ἀνάγκη εἶναι ἐκείνων ὄντων, κἂν μὴ φῇ ὁ ἀποκρινόμενος. ἄρ' ὁ ἄνθρωπος ζῶν ἢ ἄψυχον; εἴτ' ἔλαβε ζῶν, οὐ συλλελόγισται. πάλιν ἅπαν ζῶν ἢ πεζόν ἢ ἔνυδρον· ἔλαβε πεζόν. καὶ τὸ εἶναι τὸν ἄνθρωπον τὸ ὅλον, ζῶν πεζόν, οὐκ ἀνάγκη ἐκ τῶν εἰρημένων, ἀλλὰ λαμβάνει καὶ τοῦτο. διαφέρει δ' οὐδὲν ἐπὶ πολλῶν ἢ ὀλίγων οὕτω ποιεῖν· τὸ αὐτὸ γάρ ἐστιν. (ἀσυλλόγιστος μὲν οὖν καὶ ἡ χρῆσις γίνεται τοῖς οὕτω μετιοῦσι καὶ τῶν ἐνδεχομένων συλλογισθῆναι.) τί γὰρ κωλύει τοῦτο ἀληθὲς μὲν τὸ πᾶν εἶναι κατὰ τοῦ ἀνθρώπου, μὴ μέντοι τὸ τί ἐστὶ μηδὲ τὸ τί ἦν εἶναι δηλοῦν; ἔτι τί κωλύει ἢ προσθεῖναι τι ἢ ἀφελεῖν ἢ ὑπερβεβηκέναι τῆς οὐσίας; Ταῦτα μὲν οὖν παρίεται μὲν, ἐνδέχεται δὲ λῦσαι τῷ λαμβάνειν ἐν τῷ τί ἐστὶ πάντα, καὶ τὸ ἐφεξῆς τῇ διαιρέσει ποιεῖν, αἰτούμενον τὸ πρῶτον, καὶ μηδὲν παραλείπειν. τοῦτο δ' ἀναγκαῖον, εἰ ἅπαν εἰς τὴν διαίρεσιν ἐμπίπτει καὶ μηδὲν ἐλλείπει· [τοῦτο δ' ἀναγκαῖον,] ἄτομον γὰρ ἤδη δεῖ εἶναι. ἀλλὰ συλλογισμὸς ὅμως οὐκ ἔστι, ἀλλ' εἴπερ, ἄλλον τρόπον γνωρίζειν ποιεῖ. καὶ τοῦτο μὲν οὐδὲν ἄτοπον· οὐδὲ γὰρ ὁ ἐπάγων ἴσως ἀποδείκνυσιν, ἀλλ' ὅμως δηλοῖ τι. συλλογισμὸν δ' οὐ λέγει ὁ ἐκ τῆς διαιρέσεως λέγων τὸν ὀρισμὸν. ὥσπερ γὰρ ἐν τοῖς συμπεράσμασι τοῖς ἄνευ τῶν μέσων, ἐάν τις εἴπῃ ὅτι τούτων ὄντων ἀνάγκη τοδὶ εἶναι, ἐνδέχεται ἐρωτῆσαι διὰ τί, οὕτως καὶ ἐν τοῖς διαιρετικοῖς ὅροις. τί ἐστὶν [92a] ἄνθρωπος; ζῶν θνητόν, ὑπόπουν, δίπουν, ἅπτερον. διὰ τί, παρ' ἐκάστην πρόσθεσιν; ἐρεῖ γάρ, καὶ δείξει τῇ διαιρέσει, ὡς οἶεται, ὅτι πᾶν ἢ θνητόν ἢ ἀθάνατον. ὁ δὲ τοιοῦτος λόγος ἅπας οὐκ ἔστιν ὀρισμός, ὥστ' εἰ καὶ ἀπεδείκνυτο τῇ διαιρέσει, ἀλλ' ὁ γ' ὀρισμὸς οὐ συλλογισμὸς γίνεται.

Κεφάλαιο 6

Ἀλλ' ἄρα ἔστι καὶ ἀποδείξαι τὸ τί ἐστὶ κατ' οὐσίαν, ἐξ ὑποθέσεως δέ, λαβόντα τὸ μὲν τί ἦν εἶναι τὸ ἐκ τῶν ἐν τῷ τί ἐστὶν ἴδιον, ταδὶ δὲ ἐν τῷ τί ἐστὶ μόνον, καὶ ἴδιον τὸ πᾶν; τοῦτο γάρ ἐστι τὸ εἶναι ἐκεῖνον. ἢ πάλιν εἴληφε τὸ τί ἦν εἶναι καὶ ἐν τούτῳ; ἀνάγκη γὰρ διὰ τοῦ μέσου δεῖξαι. ἔτι ὥσπερ οὐδ' ἐν συλλογισμῷ λαμβάνεται τί ἐστὶ τὸ συλλελογίσθαι (ἀεὶ γὰρ ὅλη ἢ μέρος ἢ πρότασις, ἐξ ὧν ὁ συλλογισμός), οὕτως οὐδὲ τὸ τί ἦν εἶναι δεῖ ἐνεῖναι ἐν τῷ συλλογισμῷ, ἀλλὰ χωρὶς τοῦτο τῶν κειμένων εἶναι, καὶ πρὸς τὸν ἀμφισβητοῦντα εἰ συλλελόγισται ἢ μή, τοῦτο ἀπαντᾷ ὅτι “τοῦτο γὰρ ἦν συλλογισμός”, καὶ πρὸς τὸν ὅτι οὐ τὸ τί ἦν εἶναι συλλελόγισται, ὅτι “ναί· τοῦτο γὰρ ἔκειτο ἡμῖν τὸ τί ἦν εἶναι”. ὥστε ἀνάγκη καὶ ἄνευ τοῦ τί συλλογισμὸς ἢ τὸ τί ἦν εἶναι συλλελογίσθαι τι.

Κἂν ἐξ ὑποθέσεως δὲ δεικνύη, οἷον εἰ τὸ κακῷ ἐστὶ τὸ διαιρετῷ εἶναι, τὸ δ' ἐναντίῳ τὸ τῷ ἐναντίῳ <ἐναντίῳ> εἶναι, ὅσοις ἔστι τι ἐναντίον· τὸ δ' ἀγαθὸν τῷ κακῷ ἐναντίον καὶ τὸ ἀδιαίρετον τῷ διαιρετῷ· ἔστιν ἄρα τὸ ἀγαθῷ εἶναι τὸ ἀδιαίρετῳ εἶναι. καὶ γὰρ ἐνταῦθα λαβὼν τὸ τί ἦν εἶναι δείκνυσι· λαμβάνει δ' εἰς τὸ δεῖξαι τὸ τί ἦν εἶναι. “ἕτερον μέντοι”. ἔστω· καὶ γὰρ ἐν ταῖς ἀποδείξεσιν, ὅτι ἐστὶ τόδε κατὰ τοῦδε· ἀλλὰ μὴ αὐτό, μηδὲ οὗ ὁ αὐτὸς λόγος, καὶ ἀντιστρέφει. πρὸς ἀμφοτέρους δέ, τὸν τε κατὰ διαίρεσιν δεικνύντα καὶ πρὸς τὸν οὕτω συλλογισμὸν, τὸ αὐτὸ ἀπόρημα· διὰ τί ἔσται ὁ ἄνθρωπος ζῶν πεζὸν δίπουν, ἀλλ' οὐ ζῶν καὶ πεζὸν <καὶ δίπουν>; ἐκ γὰρ τῶν λαμβανομένων οὐδεμία ἀνάγκη ἐστὶν ἐν γίνεσθαι τὸ κατηγορούμενον, ἀλλ' ὥσπερ ἂν ἄνθρωπος ὁ αὐτὸς εἴη μουσικὸς καὶ γραμματικὸς.

Κεφάλαιο 7

>Πῶς οὖν δὴ ὁ ὀριζόμενος δείξει τὴν οὐσίαν ἢ τὸ τί ἐστίν; οὔτε γὰρ ὡς ἀποδεικνὺς ἐξ ὁμολογουμένων εἶναι δῆλον ποιήσει ὅτι ἀνάγκη ἐκείνων ὄντων ἑτερόν τι εἶναι (ἀπόδειξις γὰρ τοῦτο), οὔθ' ὡς ὁ ἐπάγων διὰ τῶν καθ' ἕκαστα δῆλων ὄντων, ὅτι πᾶν οὕτως τῷ μηδὲν ἄλλως· οὐ γὰρ τί [92b] ἐστὶ δεικνυσιν, ἀλλ' ὅτι ἢ ἔστιν ἢ οὐκ ἔστιν. τίς οὖν ἄλλος τρόπος λοιπός; οὐ γὰρ δὴ δείξει γε τῇ αἰσθήσει ἢ τῷ δακτύλῳ.

Ἔτι πῶς δείξει τὸ τί ἐστίν; ἀνάγκη γὰρ τὸν εἰδότα τὸ τί ἐστίν ἄνθρωπος ἢ ἄλλο ὅτιον, εἰδέναι καὶ ὅτι ἔστιν (τὸ γὰρ μὴ ὄν οὐδεὶς οἶδεν ὅ τι ἐστίν, ἀλλὰ τί μὲν σημαίνει ὁ λόγος ἢ τὸ ὄνομα, ὅταν εἴπω τραγέλαφος, τί δ' ἐστὶ τραγέλαφος ἀδύνατον εἰδέναι). ἀλλὰ μὴν εἰ δείξει τί ἐστὶ καὶ ὅτι ἔστι, πῶς τῷ αὐτῷ λόγῳ δείξει; ὅ τε γὰρ ὀρισμὸς ἐν τι δηλοῖ καὶ ἡ ἀπόδειξις· τὸ δὲ τί ἐστίν ἄνθρωπος καὶ τὸ εἶναι ἄνθρωπον ἄλλο.

Εἴτα καὶ δι' ἀποδείξεώς φαμεν ἀναγκαῖον εἶναι δεικνυσθαι ἅπαν ὅ τι ἐστίν, εἰ μὴ οὐσία εἴη. τὸ δ' εἶναι οὐκ οὐσία οὐδενί· οὐ γὰρ γένος τὸ ὄν. ἀπόδειξις ἄρ' ἔσται ὅτι ἔστιν. ὅπερ καὶ νῦν ποιοῦσιν αἱ ἐπιστῆμαι. τί μὲν γὰρ σημαίνει τὸ τρίγωνον, ἔλαβεν ὁ γεωμέτρης, ὅτι δ' ἔστι, δεικνυσιν. τί οὖν δείξει ὁ ὀριζόμενος ἢ τί ἐστὶ τὸ τρίγωνον; εἰδὼς ἄρα τις ὀρισμῷ τί ἐστίν, εἰ ἔστιν οὐκ εἴσεται. ἀλλ' ἀδύνατον.

Φανερόν δὲ καὶ κατὰ τοὺς νῦν τρόπους τῶν ὄρων ὡς οὐ δεικνύουσιν οἱ ὀριζόμενοι ὅτι ἔστιν. εἰ γὰρ καὶ ἔστιν ἐκ τοῦ μέσου τι ἴσον, ἀλλὰ διὰ τί ἔστι τὸ ὀρισθέν; καὶ διὰ τί τοῦτ' ἔστι κύκλος; εἴη γὰρ ἂν καὶ ὀρειχάλκου φάναι εἶναι αὐτόν. οὔτε γὰρ ὅτι δυνατόν εἶναι τὸ λεγόμενον προσδηλοῦσιν οἱ ὅροι, οὔτε ὅτι ἐκεῖνο οὐ φασὶν εἶναι ὀρισμοί, ἀλλ' ἀεὶ ἔξεστι λέγειν τὸ διὰ τί.

Εἰ ἄρα ὁ ὀριζόμενος δεικνυσιν ἢ τί ἐστίν ἢ τί σημαίνει τοῦνομα, εἰ μὴ ἔστι μηδαμῶς τοῦ τί ἐστίν, εἴη ἂν ὁ ὀρισμὸς λόγος ὀνόματι τὸ αὐτὸ σημαίνων. ἀλλ' ἄτοπον. πρῶτον μὲν γὰρ καὶ μὴ οὐσιῶν ἂν εἴη καὶ τῶν μὴ ὄντων· σημαίνειν γὰρ ἔστι καὶ τὰ μὴ ὄντα. ἔτι πάντες οἱ λόγοι ὀρισμοὶ ἂν εἴεν· εἴη γὰρ ἂν ὄνομα θέσθαι ὁποιοῦν λόγῳ, ὥστε ὅρους ἂν διαλεγόμεθα πάντες καὶ ἡ Ἰλιάς ὀρισμὸς ἂν εἴη. ἔτι οὐδεμία ἀπόδειξις ἀποδείξειεν ἂν ὅτι τοῦτο τοῦνομα τουτὶ δηλοῖ· οὐδ' οἱ ὀρισμοὶ τοίνυν τοῦτο προσδηλοῦσιν.

Ἐκ μὲν τοίνυν τούτων οὔτε ὁρισμὸς καὶ συλλογισμὸς φαίνεται
ταὐτὸν ὄν, οὔτε ταὐτοῦ συλλογισμὸς καὶ ὁρισμός· πρὸς δὲ τούτοις,
ὅτι οὔτε ὁ ὁρισμὸς οὐδὲν οὔτε ἀποδείκνυσιν οὔτε δείκνυσιν, οὔτε τὸ
τί ἐστὶν οὔθ' ὁρισμῷ οὔτ' ἀποδείξει ἔστι γινῶναι.

[93a] Πάλιν δὲ σκεπτέον τί τούτων λέγεται καλῶς καὶ τί οὐ καλῶς, καὶ τί ἐστὶν ὁ ὀρισμός, καὶ τοῦ τί ἐστὶν ἄρά πως ἔστιν ἀποδείξεις καὶ ὀρισμὸς ἢ οὐδαμῶς. ἐπεὶ δ' ἐστίν, ὥς ἔφαμεν, ταῦτόν τὸ εἰδέναι τί ἐστὶ καὶ τὸ εἰδέναι τὸ αἴτιον τοῦ εἰ ἐστὶ (λόγος δὲ τούτου, ὅτι ἐστὶ τι τὸ αἴτιον, καὶ τοῦτο ἢ τὸ αὐτὸ ἢ ἄλλο, κἂν ἢ ἄλλο, ἢ ἀποδεικτὸν ἢ ἀναπόδεικτον)-εἰ τοίνυν ἐστὶν ἄλλο καὶ ἐνδέχεται ἀποδείξαι, ἀνάγκη μέσον εἶναι τὸ αἴτιον καὶ ἐν τῷ σχήματι τῷ πρώτῳ δείκνυσθαι· καθόλου τε γὰρ καὶ κατηγορικὸν τὸ δεικνύμενον. εἷς μὲν δὴ τρόπος ἂν εἴη ὁ νῦν ἐζητασμένος, τὸ δι' ἄλλου τοῦ τί ἐστὶ δείκνυσθαι. τῶν τε γὰρ τί ἐστὶν ἀνάγκη τὸ μέσον εἶναι τί ἐστὶ, καὶ τῶν ἰδίων ἴδιον. ὥστε τὸ μὲν δείξει, τὸ δ' οὐ δείξει τῶν τί ἦν εἶναι τῷ αὐτῷ πράγματι.

Οὗτος μὲν οὖν ὁ τρόπος ὅτι οὐκ ἂν εἴη ἀποδείξεις, εἴρηται πρότερον· ἀλλ' ἐστὶ λογικὸς συλλογισμὸς τοῦ τί ἐστὶν. ὃν δὲ τρόπον ἐνδέχεται, λέγωμεν, εἰπόντες πάλιν ἐξ ἀρχῆς. ὥσπερ γὰρ τὸ διότι ζητοῦμεν ἔχοντες τὸ ὅτι, ἐνίοτε δὲ καὶ ἅμα δῆλα γίνεται, ἀλλ' οὔτι πρότερόν γε τὸ διότι δυνατὸν γνωρίσαι τοῦ ὅτι, δῆλον ὅτι ὁμοίως καὶ τὸ τί ἦν εἶναι οὐκ ἄνευ τοῦ ὅτι ἐστὶν· ἀδύνατον γὰρ εἰδέναι τί ἐστὶν, ἀγνοοῦντας εἰ ἐστὶν. τὸ δ' εἰ ἐστὶν ὅτε μὲν κατὰ συμβεβηκὸς ἔχομεν, ὅτε δ' ἔχοντές τι αὐτοῦ τοῦ πράγματος, οἷον βροντήν, ὅτι ψόφος τις νεφῶν, καὶ ἐκλειψιν, ὅτι στέρησίς τις φωτός, καὶ ἄνθρωπον, ὅτι ζῶόν τι, καὶ ψυχὴν, ὅτι αὐτὸ αὐτὸ κινοῦν. ὅσα μὲν οὖν κατὰ συμβεβηκὸς οἶδαμεν ὅτι ἐστὶν, ἀναγκαῖον μηδαμῶς ἔχειν πρὸς τὸ τί ἐστὶν· οὐδὲ γὰρ ὅτι ἐστὶν ἴσμεν· τὸ δὲ ζητεῖν τί ἐστὶ μὴ ἔχοντας ὅτι ἐστὶ, μηδὲν ζητεῖν ἐστὶν. καθ' ὅσων δ' ἔχομέν τι, ῥᾶον. ὥστε ὡς ἔχομεν ὅτι ἐστὶν, οὕτως ἔχομεν καὶ πρὸς τὸ τί ἐστὶν. ὧν οὖν ἔχομέν τι τοῦ τί ἐστὶν, ἔστω πρῶτον μὲν ὧδε· ἐκλειψις ἐφ' οὗ τὸ Α, σελήνη ἐφ' οὗ Γ, ἀντίφραξις γῆς ἐφ' οὗ Β. τὸ μὲν οὖν πότερον ἐκλείπει ἢ οὐ, τὸ Β ζητεῖν ἐστὶν, ἅρ' ἐστὶν ἢ οὐ. τοῦτο δ' οὐδὲν διαφέρει ζητεῖν ἢ εἰ ἐστὶ λόγος αὐτοῦ· καὶ ἐὰν ἢ τοῦτο, κάκεϊνό φαμεν εἶναι. ἢ ποτέρας τῆς ἀντιφάσεώς ἐστὶν ὁ λόγος, πότερον τοῦ ἔχειν δύο ὀρθὰς ἢ τοῦ μὴ ἔχειν. ὅταν δ' εὗρωμεν, ἅμα τὸ ὅτι καὶ τὸ διότι ἴσμεν, ἂν δι' ἀμέσων ἢ· εἰ δὲ μή, τὸ ὅτι, τὸ διότι δ' οὐ. σελήνη Γ, ἐκλειψις Α, τὸ πανσελήνου σκιὰν μὴ δύνασθαι ποιεῖν μηδενοῦς ἡμῶν μεταξύ ὄντος φανεροῦ, ἐφ' οὗ Β. εἰ τοίνυν τῷ Γ ὑπάρχει τὸ Β τὸ μὴ δύνασθαι

ποιεῖν [93b] σκιὰν μηδενὸς μεταξὺ ἡμῶν ὄντος, τούτῳ δὲ τὸ Α τὸ ἐκλειπέναι, ὅτι μὲν ἐκλείπει δῆλον, διότι δ' οὐπω, καὶ ὅτι μὲν ἔστιν ἔκλειψις ἴσμεν, τί δ' ἔστιν οὐκ ἴσμεν. δῆλου δ' ὄντος ὅτι τὸ Α τῷ Γ ὑπάρχει, ἀλλὰ διὰ τί ὑπάρχει, τὸ ζητεῖν τὸ Β τί ἐστι, πότερον ἀντίφραξις ἢ στροφή τῆς σελήνης ἢ ἀπόσβεσις. τοῦτο δ' ἔστιν ὁ λόγος τοῦ ἐτέρου ἄκρου, οἷον ἐν τούτοις τοῦ Α· ἔστι γὰρ ἡ ἔκλειψις ἀντίφραξις ὑπὸ γῆς. τί ἐστι βροντή; πυρὸς ἀπόσβεσις ἐν νέφει. διὰ τί βροντᾷ; διὰ τὸ ἀποσβέννυσθαι τὸ πῦρ ἐν τῷ νέφει. νέφος Γ, βροντή Α, ἀπόσβεσις πυρὸς τὸ Β. τῷ δὲ Γ τῷ νέφει ὑπάρχει τὸ Β (ἀποσβέννυται γὰρ ἐν αὐτῷ τὸ πῦρ), τούτῳ δὲ τὸ Α, ψόφος· καὶ ἔστι γε λόγος τὸ Β τοῦ Α τοῦ πρώτου ἄκρου. ἂν δὲ πάλιν τούτου ἄλλο μέσον ᾗ, ἐκ τῶν παραλοίπων ἔσται λόγων.

Ὡς μὲν τοίνυν λαμβάνεται τὸ τί ἐστι καὶ γίνεται γνῶριμον, εἴρηται, ὥστε συλλογισμὸς μὲν τοῦ τί ἐστιν οὐ γίνεται οὐδ' ἀπόδειξις, δῆλον μέντοι διὰ συλλογισμοῦ καὶ δι' ἀποδείξεως· ὥστ' οὔτ' ἄνευ ἀποδείξεως ἔστι γινῶναι τὸ τί ἐστιν, οὔ ἔστιν αἴτιον ἄλλο, οὔτ' ἔστιν ἀπόδειξις αὐτοῦ, ὥσπερ καὶ ἐν τοῖς διαφορήμασιν εἴπομεν.

Κεφάλαιο 9

Ἔστι δὲ τῶν μὲν ἕτερόν τι αἷτιον, τῶν δ' οὐκ ἔστιν. ὥστε δῆλον ὅτι καὶ τῶν τί ἐστὶ τὰ μὲν ἄμεσα καὶ ἀρχαί εἰσιν, ἃ καὶ εἶναι καὶ τί ἐστὶν ὑποθέσθαι δεῖ ἢ ἄλλον τρόπον φανερά ποιῆσαι (ὅπερ ὁ ἀριθμητικὸς ποιεῖ· καὶ γὰρ τί ἐστὶ τὴν μονάδα ὑποτίθεται, καὶ ὅτι ἔστιν)· τῶν δ' ἐχόντων μέσον, καὶ ὧν ἔστι τι ἕτερον αἷτιον τῆς οὐσίας, ἔστι δι' ἀποδείξεως, ὥσπερ εἶπομεν, δηλῶσαι, μὴ τὸ τί ἐστὶν ἀποδεικνύοντας.

Κεφάλαιο 10

Ὁρισμός δ' ἐπειδὴ λέγεται εἶναι λόγος τοῦ τί ἐστὶ, φανερόν ὅτι ὁ μὲν τις ἔσται λόγος τοῦ τί σημαίνει τὸ ὄνομα ἢ λόγος ἕτερος ὀνοματώδης, οἷον τί σημαίνει [τί ἐστὶ] τρίγωνον. ὅπερ ἔχοντες ὅτι ἔστι, ζητοῦμεν διὰ τί ἔστιν· χαλεπὸν δ' οὕτως ἐστὶ λαβεῖν ἂ μὴ ἴσμεν ὅτι ἔστιν. ἡ δ' αἰτία εἴρηται πρότερον τῆς χαλεπότητος, ὅτι οὐδ' εἰ ἔστιν ἢ μὴ ἴσμεν, ἀλλ' ἢ κατὰ συμβεβηκός. (λόγος δ' εἷς ἐστὶ διχῶς, ὁ μὲν συνδέσμῳ, ὥσπερ ἡ Ἰλιάς, ὁ δὲ τῷ ἐν καθ' ἐνὸς δηλοῦν μὴ κατὰ συμβεβηκός.)

Εἷς μὲν δὴ ὅρος ἐστὶν ὅρου ὁ εἰρημένος, ἄλλος δ' ἐστὶν ὅρος λόγος ὁ δηλῶν διὰ τί ἔστιν. ὥστε ὁ μὲν πρότερος σημαί[94a] νει μὲν, δείκνυσι δ' οὐ, ὁ δ' ὕστερος φανερόν ὅτι ἔσται οἷον ἀποδείξεις τοῦ τί ἐστὶ, τῇ θέσει διαφέρων τῆς ἀποδείξεως. διαφέρει γὰρ εἰπεῖν διὰ τί βροντᾷ καὶ τί ἐστὶ βροντή· ἐρεῖ γὰρ οὕτω μὲν “διότι ἀποσβέννυται τὸ πῦρ ἐν τοῖς νέφεσι”· τί δ' ἐστὶ βροντή; ψόφος ἀποσβεννυμένου πυρὸς ἐν νέφεσιν. ὥστε ὁ αὐτὸς λόγος ἄλλον τρόπον λέγεται, καὶ ὡδὶ μὲν ἀπόδειξις συνεχῆς, ὡδὶ δὲ ὁρισμός. (ἔτι ἐστὶν ὅρος βροντῆς ψόφος ἐν νέφεσι· τοῦτο δ' ἐστὶ τῆς τοῦ τί ἐστὶν ἀποδείξεως συμπέρασμα.) ὁ δὲ τῶν ἀμέσων ὁρισμὸς θέσις ἐστὶ τοῦ τί ἐστὶν ἀναπόδεικτος.

Ἔστιν ἄρα ὁρισμὸς εἷς μὲν λόγος τοῦ τί ἐστὶν ἀναπόδεικτος, εἷς δὲ συλλογισμὸς τοῦ τί ἐστὶ, πτώσει διαφέρων τῆς ἀποδείξεως, τρίτος δὲ τῆς τοῦ τί ἐστὶν ἀποδείξεως συμπέρασμα. φανερόν οὖν ἐκ τῶν εἰρημένων καὶ πῶς ἔστι τοῦ τί ἐστὶν ἀπόδειξις καὶ πῶς οὐκ ἔστι, καὶ τίνων ἔστι καὶ τίνων οὐκ ἔστι, ἔτι δ' ὁρισμὸς ποσαχῶς τε λέγεται καὶ πῶς τὸ τί ἐστὶ δείκνυσι καὶ πῶς οὐ, καὶ τίνων ἔστι καὶ τίνων οὐ, ἔτι δὲ πρὸς ἀπόδειξιν πῶς ἔχει, καὶ πῶς ἐνδέχεται τοῦ αὐτοῦ εἶναι καὶ πῶς οὐκ ἐνδέχεται.

Κεφάλαιο 11

Ἐπεὶ δὲ ἐπίστασθαι οἰόμεθα ὅταν εἰδῶμεν τὴν αἰτίαν, αἰτίαι δὲ τέτταρες, μία μὲν τὸ τί ἦν εἶναι, μία δὲ τὸ τίνων ὄντων ἀνάγκη τοῦτ' εἶναι, ἑτέρα δὲ ἢ τί πρῶτον ἐκίνησε, τετάρτη δὲ τὸ τίνος ἔνεκα, πᾶσαι αὗται διὰ τοῦ μέσου δείκνυνται. τό τε γὰρ οὗ ὄντος τοδὶ ἀνάγκη εἶναι μιᾶς μὲν προτάσεως ληφθείσης οὐκ ἔστι, δυοῖν δὲ τοῦλάχιστον· τοῦτο δ' ἐστίν, ὅταν ἐν μέσον ἔχωσιν. τούτου οὖν ἐνὸς ληφθέντος τὸ συμπέρασμα ἀνάγκη εἶναι. δῆλον δὲ καὶ ὧδε. διὰ τί ὀρθή ἢ ἐν ἡμικυκλίῳ; τίνος ὄντος ὀρθή; ἔστω δὴ ὀρθή ἐφ' ἧς Α, ἡμίσεια δυοῖν ὀρθαῖν ἐφ' ἧς Β, ἢ ἐν ἡμικυκλίῳ ἐφ' ἧς Γ. τοῦ δὴ τὸ Α τὴν ὀρθὴν ὑπάρχειν τῷ Γ τῇ ἐν τῷ ἡμικυκλίῳ αἴτιον τὸ Β. αὕτη μὲν γὰρ τῇ Α ἴση, ἢ δὲ τὸ Γ τῇ Β· δύο γὰρ ὀρθῶν ἡμίσεια. τοῦ Β οὖν ὄντος ἡμίσεος δύο ὀρθῶν τὸ Α τῷ Γ ὑπάρχει (τοῦτο δ' ἦν τὸ ἐν ἡμικυκλίῳ ὀρθὴν εἶναι). τοῦτο δὲ ταυτόν ἐστι τῷ τί ἦν εἶναι, τῷ τοῦτο σημαίνειν τὸν λόγον. ἀλλὰ μὴν καὶ τὸ τί ἦν εἶναι αἴτιον δέδεικται τὸ μέσον <ὄν>.

Τὸ δὲ διὰ τί ὁ Μηδικὸς πόλεμος ἐγένετο Ἀθηναίους; τίς αἰτία τοῦ πολεμεῖσθαι Ἀθηναίους; ὅτι [94b] εἰς Σάρδεις μετ' Ἑρετριέων ἐνέβαλον· τοῦτο γὰρ ἐκίνησε πρῶτον. πόλεμος ἐφ' οὗ Α, προτέρους εἰσβαλεῖν Β, Ἀθηναῖοι τὸ Γ. ὑπάρχει δὴ τὸ Β τῷ Γ, τὸ προτέροις ἐμβαλεῖν τοῖς Ἀθηναίοις, τὸ δὲ Α τῷ Β· πολεμοῦσι γὰρ τοῖς πρότερον ἀδικήσασιν. ὑπάρχει ἄρα τῷ μὲν Β τὸ Α, τὸ πολεμεῖσθαι τοῖς προτέροις ἄρξασιν· τοῦτο δὲ τὸ Β τοῖς Ἀθηναίοις· πρότεροι γὰρ ἦρξαν. μέσον ἄρα καὶ ἐνταῦθα τὸ αἴτιον, τὸ πρῶτον κινήσαν.

Ὅσων δ' αἴτιον τὸ ἔνεκα τίνος - οἷον διὰ τί περιπατεῖ; ὅπως ὑγιαίνει· διὰ τί οἰκία ἔστιν; ὅπως σῶζεται τὰ σκευή-τὸ μὲν ἔνεκα τοῦ ὑγιαίνειν, τὸ δ' ἔνεκα τοῦ σῶζεσθαι. διὰ τί δὲ ἀπὸ δείπνου δεῖ περιπατεῖν, καὶ ἔνεκα τίνος δεῖ, οὐδὲν διαφέρει. περίπατος ἀπὸ δείπνου Γ, τὸ μὴ ἐπιπολάζειν τὰ σιτία ἐφ' οὗ Β, τὸ ὑγιαίνειν ἐφ' οὗ Α. ἔστω δὴ τῷ ἀπὸ δείπνου περιπατεῖν ὑπάρχον τὸ ποιεῖν μὴ ἐπιπολάζειν τὰ σιτία πρὸς τῷ στόματι τῆς κοιλίας, καὶ τοῦτο ὑγιεινόν. δοκεῖ γὰρ ὑπάρχειν τῷ περιπατεῖν τῷ Γ τὸ Β τὸ μὴ ἐπιπολάζειν τὰ σιτία, τούτῳ δὲ τὸ Α τὸ ὑγιεινόν. τί οὖν αἴτιον τῷ Γ τοῦ τὸ Α ὑπάρχειν τὸ οὗ ἔνεκα; τὸ Β τὸ μὴ ἐπιπολάζειν. τοῦτο δ' ἐστὶν ὥσπερ ἐκείνου λόγος· τὸ γὰρ Α οὕτως ἀποδοθήσεται. διὰ τί δὲ

τὸ Β τῷ Γ ἔστιν; ὅτι τοῦτ' ἔστι τὸ ὑγιαίνειν, τὸ οὕτως ἔχειν. δεῖ δὲ μεταλαμβάνειν τοὺς λόγους, καὶ οὕτως μᾶλλον ἕκαστα φανεῖται. αἱ δὲ γενέσεις ἀνάπαλιν ἐνταῦθα καὶ ἐπὶ τῶν κατὰ κίνησιν αἰτίων· ἐκεῖ μὲν γὰρ τὸ μέσον δεῖ γενέσθαι πρῶτον, ἐνταῦθα δὲ τὸ Γ, τὸ ἔσχατον, τελευταῖον δὲ τὸ οὗ ἕνεκα.

Ἐνδέχεται δὲ τὸ αὐτὸ καὶ ἕνεκά τινος εἶναι καὶ ἐξ ἀνάγκης, οἷον διὰ τοῦ λαμπτήρος τὸ φῶς· καὶ γὰρ ἐξ ἀνάγκης διέρχεται τὸ μικρομερέστερον διὰ τῶν μειζόνων πόρων, εἴπερ φῶς γίνεται τῷ διέναι, καὶ ἕνεκά τινος, ὅπως μὴ πταίωμεν. ἄρ' οὖν εἰ εἶναι ἐνδέχεται, καὶ γίνεσθαι ἐνδέχεται· ὥσπερ εἰ βροντᾷ <ὅτι> ἀποσβεννυμένου τε τοῦ πυρὸς ἀνάγκη σίζειν καὶ ψοφεῖν καί, εἰ ὥς οἱ Πυθαγόρειοί φασιν, ἀπειλῆς ἕνεκα τοῖς ἐν τῷ ταρτάρῳ, ὅπως φοβῶνται; πλεῖστα δὲ τοιαῦτ' ἔστι, καὶ μάλιστα ἐν τοῖς κατὰ φύσιν συνισταμένοις καὶ συνεστῶσιν· ἢ μὲν γὰρ ἕνεκά του ποιεῖ φύσις, ἢ δ' ἐξ ἀνάγκης. ἢ δ' ἀνάγκη διττή· ἢ μὲν γὰρ κατὰ φύσιν [95a] καὶ τὴν ὁρμήν, ἢ δὲ βίᾳ ἢ παρὰ τὴν ὁρμήν, ὥσπερ λίθος ἐξ ἀνάγκης καὶ ἄνω καὶ κάτω φέρεται, ἀλλ' οὐ διὰ τὴν αὐτὴν ἀνάγκην. ἐν δὲ τοῖς ἀπὸ διανοίας τὰ μὲν οὐδέποτε ἀπὸ τοῦ αὐτομάτου ὑπάρχει, οἷον οἰκία ἢ ἀνδριάς, οὐδ' ἐξ ἀνάγκης, ἀλλ' ἕνεκά του, τὰ δὲ καὶ ἀπὸ τύχης, οἷον ὑγίεια καὶ σωτηρία. μάλιστα δὲ ἐν ὅσοις ἐνδέχεται καὶ ὧδε καὶ ἄλλως, ὅταν, μὴ ἀπὸ τύχης, ἢ γένεσις ἢ ὥστε τὸ τέλος ἀγαθόν, ἕνεκά του γίνεται, καὶ ἢ φύσει ἢ τέχνῃ. ἀπὸ τύχης δ' οὐδὲν ἕνεκά του γίνεται.

Κεφάλαιο 12

Τὸ δ' αὐτὸ αἰτίον ἐστὶ τοῖς γινομένοις καὶ τοῖς γεγενημένοις καὶ τοῖς ἐσομένοις ὅπερ καὶ τοῖς οὖσι (τὸ γὰρ μέσον αἴτιον), πλὴν τοῖς μὲν οὖσιν ὄν, τοῖς δὲ γινομένοις γινόμενον, τοῖς δὲ γεγενημένοις γεγενημένον καὶ ἐσομένοις ἐσόμενον. οἷον διὰ τί γέγονεν ἔκλειψις; διότι ἐν μέσῳ γέγονεν ἡ γῆ· γίνεται δὲ διότι γίνεται, ἔσται δὲ διότι ἔσται ἐν μέσῳ, καὶ ἔστι διότι ἔστιν. τί ἐστὶ κρύσταλλος; εἰλήφθω δὴ ὅτι ὕδωρ πεπηγός. ὕδωρ ἐφ' οὗ Γ, πεπηγός ἐφ' οὗ Α, αἴτιον τὸ μέσον ἐφ' οὗ Β, ἔκλειψις θερμοῦ παντελῆς. ὑπάρχει δὴ τῷ Γ τὸ Β, τούτῳ δὲ τὸ πεπηγέναι τὸ ἐφ' οὗ Α. γίνεται δὲ κρύσταλλος γινομένου τοῦ Β, γεγένηται δὲ γεγενημένου, ἔσται δ' ἐσόμενου.

Τὸ μὲν οὖν οὕτως αἴτιον καὶ οὗ αἴτιον ἅμα γίνεται, ὅταν γίνηται, καὶ ἔστιν, ὅταν ᾗ· καὶ ἐπὶ τοῦ γεγονέναι καὶ ἔσεσθαι ὡσαύτως. ἐπὶ δὲ τῶν μὴ ἅμα ἄρ' ἔστιν ἐν τῷ συνεχεῖ χρόνῳ, ὥσπερ δοκεῖ ἡμῖν, ἄλλα ἄλλων αἴτια εἶναι, τοῦ τότε γενέσθαι ἕτερον γενόμενον, καὶ τοῦ ἔσεσθαι ἕτερον ἐσόμενον, καὶ τοῦ γίνεσθαι δέ, εἴ τι ἔμπροσθεν ἐγένετο; ἔστι δὴ ἀπὸ τοῦ ὕστερον γεγονότος ὁ συλλογισμός (ἀρχὴ δὲ καὶ τούτων τὰ γεγονότα)· διὸ καὶ ἐπὶ τῶν γινομένων ὡσαύτως. ἀπὸ δὲ τοῦ προτέρου οὐκ ἔστιν, οἷον ἐπεὶ τότε γέγονεν, ὅτι τόδ' ὕστερον γέγονεν· καὶ ἐπὶ τοῦ ἔσεσθαι ὡσαύτως. οὔτε γὰρ ἀορίστου οὐθ' ὀρισθέντος ἔσται τοῦ χρόνου ὥστ' ἐπεὶ τοῦτ' ἀληθὲς εἰπεῖν γεγονέναι, τόδ' ἀληθὲς εἰπεῖν γεγονέναι τὸ ὕστερον. ἐν γὰρ τῷ μεταξύ ψεῦδος ἔσται τὸ εἰπεῖν τοῦτο, ἥδη θατέρου γεγονότος. ὁ δ' αὐτὸς λόγος καὶ ἐπὶ τοῦ ἐσόμενου, οὐδ' ἐπεὶ τότε γέγονε, τόδ' ἔσται. τὸ γὰρ μέσον ὁμόγονον δεῖ εἶναι, τῶν γενομένων γενόμενον, τῶν ἐσομένων ἐσόμενον, τῶν γινομένων γινόμενον, τῶν ὄντων ὄν· τοῦ δὲ γέγονε καὶ τοῦ ἔσται οὐκ ἐνδέχεται εἶναι ὁμόγονον. ἔτι οὔτε ἀόριστον ἐνδέχεται εἶναι τὸν χρόνον τὸν μεταξύ οὐθ' ὀρισμένον· [95b] ψεῦδος γὰρ ἔσται τὸ εἰπεῖν ἐν τῷ μεταξύ. ἐπισκεπτέον δὲ τί τὸ συνέχον ὥστε μετὰ τὸ γεγονέναι τὸ γίνεσθαι ὑπάρχειν ἐν τοῖς πράγμασιν. ἡ δὴλον ὅτι οὐκ ἔστιν ἐχόμενον γεγονότος γινόμενον; οὐδὲ γὰρ γενόμενον γενομένου· πέρατα γὰρ καὶ ἄτομα· ὥσπερ οὖν οὐδὲ στιγμαί εἰσιν ἀλλήλων ἐχόμεναι, οὐδὲ γενόμενα· ἄμφω γὰρ ἀδιαίρετα. οὐδὲ δὴ γινόμενον γεγενημένου διὰ τὸ αὐτό· τὸ μὲν γὰρ γινόμενον διαιρετόν, τὸ δὲ γεγονὸς ἀδιαίρετον. ὥσπερ οὖν γραμμὴ

πρὸς στιγμὴν ἔχει, οὕτω τὸ γινόμενον πρὸς τὸ γεγονός· ἐνυπάρχει γὰρ ἅπειρα γεγονότα ἐν τῷ γινομένῳ. μᾶλλον δὲ φανερώς ἐν τοῖς καθόλου περὶ κινήσεως δεῖ λεχθῆναι περὶ τούτων.

Περὶ μὲν οὖν τοῦ πῶς ἂν ἐφεξῆς γινομένης τῆς γενέσεως ἔχει τὸ μέσον τὸ αἴτιον ἐπὶ τοσοῦτον εἰλήφθω. ἀνάγκη γὰρ καὶ ἐν τούτοις τὸ μέσον καὶ τὸ πρῶτον ἅμεσα εἶναι. οἷον τὸ Α γέγονεν, ἐπεὶ τὸ Γ γέγονεν (ὕστερον δὲ τὸ Γ γέγονεν, ἔμπροσθεν δὲ τὸ Α· ἀρχὴ δὲ τὸ Γ διὰ τὸ ἐγγύτερον τοῦ νῦν εἶναι, ὃ ἐστὶν ἀρχὴ τοῦ χρόνου). τὸ δὲ Γ γέγονεν, εἰ τὸ Δ γέγονεν. τοῦ δὴ Δ γενομένου ἀνάγκη τὸ Α γεγονέναι. αἴτιον δὲ τὸ Γ· τοῦ γὰρ Δ γενομένου τὸ Γ ἀνάγκη γεγονέναι, τοῦ δὲ Γ γεγονότος ἀνάγκη πρότερον τὸ Α γεγονέναι. οὕτω δὲ λαμβάνοντι τὸ μέσον στήσεται που εἰς ἅμεσον, ἢ αἰὶ παρεμπεσεῖται διὰ τὸ ἅπειρον; οὐ γὰρ ἐστὶν ἐχόμενον γεγονός· γεγονότος, ὥσπερ ἐλέχθη. ἀλλ' ἄρξασθαί γε ὁμῶς ἀνάγκη ἀπ' ἀμέσου καὶ ἀπὸ τοῦ νῦν πρώτου. ὁμοίως δὲ (25) καὶ ἐπὶ τοῦ ἔσται. εἰ γὰρ ἀληθὲς εἰπεῖν ὅτι ἔσται τὸ Δ, ἀνάγκη πρότερον ἀληθὲς εἰπεῖν ὅτι τὸ Α ἔσται. τούτου δ' αἴτιον τὸ Γ· εἰ μὲν γὰρ τὸ Δ ἔσται, πρότερον τὸ Γ ἔσται· εἰ δὲ τὸ Γ ἔσται, πρότερον τὸ Α ἔσται. ὁμοίως δ' ἅπειρος ἡ τομὴ καὶ ἐν τούτοις· οὐ γὰρ ἔστιν ἐσόμενα ἐχόμενα ἀλλήλων. ἀρχὴ δὲ καὶ ἐν τούτοις ἅμεσος ληπτέα. ἔχει δὲ οὕτως ἐπὶ τῶν ἔργων· εἰ γέγονεν οἰκία, ἀνάγκη τετμηθῆναι λίθους καὶ γεγονέναι. τοῦτο διὰ τί; ὅτι ἀνάγκη θεμέλιον γεγονέναι, εἴπερ καὶ οἰκία γέγονεν· εἰ δὲ θεμέλιον, πρότερον λίθους γεγονέναι ἀνάγκη. πάλιν εἰ ἔσται οἰκία, ὡσαύτως πρότερον ἔσονται λίθοι. δείκνυται δὲ διὰ τοῦ μέσου ὁμοίως· ἔσται γὰρ θεμέλιος πρότερον.

Ἐπεὶ δ' ὁρῶμεν ἐν τοῖς γινομένοις κύκλῳ τινὰ γενέσιν οὔσαν, ἐνδέχεται τοῦτο εἶναι, εἴπερ ἔποιντο ἀλλήλοις τὸ μέσον καὶ οἱ ἄκροι· ἐν γὰρ τούτοις τὸ ἀντιστρέφειν ἐστίν.

Δέδεικται [96a] δὲ τοῦτο ἐν τοῖς πρώτοις, ὅτι ἀντιστρέφει τὰ συμπεράσματα· τὸ δὲ κύκλῳ τοῦτό ἐστιν. ἐπὶ δὲ τῶν ἔργων φαίνεται ὧδε· βεβρεγμένης τῆς γῆς ἀνάγκη ἀτμίδα γενέσθαι, τούτου δὲ γενομένου νέφος, τούτου δὲ γενομένου ὕδωρ· τούτου δὲ γενομένου ἀνάγκη βεβρέχθαι τὴν γῆν· τοῦτο δ' ἦν τὸ ἐξ ἀρχῆς, ὥστε κύκλῳ περιελήλυθεν· ἐνὸς γὰρ αὐτῶν ὅτου οὖν ὄντος ἕτερον ἔστι, κάκείνου ἄλλο, καὶ τούτου τὸ πρῶτον.

Ἔστι δ' ἓνα μὲν γινόμενα καθόλου (αἰεὶ τε γὰρ καὶ ἐπὶ παντός οὕτως ἢ ἔχει ἢ γίνεται), τὰ δὲ αἰεὶ μὲν οὐ, ὥς ἐπὶ τὸ πολὺ δέ, οἷον οὐ

πᾶς ἄνθρωπος ἄρρηγ τὸ γένειον τριχοῦται, ἀλλ' ὥς ἐπὶ τὸ πολὺ. τῶν δὴ τοιούτων ἀνάγκη καὶ τὸ μέσον ὥς ἐπὶ τὸ πολὺ εἶναι. εἰ γὰρ τὸ Α κατὰ τοῦ Β καθόλου κατηγορεῖται, καὶ τοῦτο κατὰ τοῦ Γ καθόλου, ἀνάγκη καὶ τὸ Α κατὰ τοῦ Γ ἀεὶ καὶ ἐπὶ παντὸς κατηγορεῖσθαι· τοῦτο γάρ ἐστι τὸ καθόλου, τὸ ἐπὶ παντὶ καὶ ἀεὶ. ἀλλ' ὑπέκειτο ὥς ἐπὶ τὸ πολὺ· ἀνάγκη ἄρα καὶ τὸ μέσον ὥς ἐπὶ τὸ πολὺ εἶναι τὸ ἐφ' οὗ τὸ Β. ἔσονται τοίνυν καὶ τῶν ὥς ἐπὶ τὸ πολὺ ἀρχαὶ ἄμεσοι, ὅσα ὥς ἐπὶ τὸ πολὺ οὕτως ἔστιν ἢ γίνεται.

Κεφάλαιο 13

Πῶς μὲν οὖν τὸ τί ἐστὶν εἰς τοὺς ὅρους ἀποδίδεται, καὶ τίνα τρόπον ἀπόδειξις ἢ ὁρισμὸς ἔστιν αὐτοῦ ἢ οὐκ ἔστιν, εἴρηται πρότερον· πῶς δὲ δεῖ θηρεύειν τὰ ἐν τῷ τί ἐστὶ κατηγορούμενα, νῦν λέγωμεν. Τῶν δὴ ὑπαρχόντων ἀεὶ ἐκάστῳ ἔνια ἐπεκτείνει ἐπὶ πλεόν, οὐ μέντοι ἔξω τοῦ γένους. λέγω δὲ ἐπὶ πλεόν ὑπάρχειν ὅσα ὑπάρχει μὲν ἐκάστῳ καθόλου, οὐ μὴν ἀλλὰ καὶ ἄλλῳ. οἷον ἔστι τι ὃ πάση τριάδι ὑπάρχει, ἀλλὰ καὶ μὴ τριάδι, ὥσπερ τὸ ὄν ὑπάρχει τῇ τριάδι, ἀλλὰ καὶ μὴ ἀριθμῷ, ἀλλὰ καὶ τὸ περιττὸν ὑπάρχει τε πάση τριάδι καὶ ἐπὶ πλεόν ὑπάρχει (καὶ γὰρ τῇ πεντάδι ὑπάρχει), ἀλλ' οὐκ ἔξω τοῦ γένους· ἡ μὲν γὰρ πεντὰς ἀριθμὸς, οὐδὲν δὲ ἔξω ἀριθμοῦ περιττόν. τὰ δὴ τοιαῦτα ληπτέον μέχρι τούτου, ἕως τοσαῦτα ληφθῇ πρῶτον ὧν ἕκαστον μὲν ἐπὶ πλεόν ὑπάρξει, ἅπαντα δὲ μὴ ἐπὶ πλεόν· ταύτην γὰρ ἀνάγκη οὐσίαν εἶναι τοῦ πράγματος. οἷον τριάδι ὑπάρχει πάση ἀριθμὸς, τὸ περιττόν, τὸ πρῶτον ἀμφοτέρως, καὶ ὥς μὴ μετρεῖσθαι ἀριθμῷ καὶ ὥς μὴ συγκεῖσθαι ἐξ ἀριθμῶν. τοῦτο τοίνυν ἤδη ἐστὶν ἡ τριάς, ἀριθμὸς περιττὸς πρῶτος καὶ ὠδὶ πρῶτος. τούτων γὰρ ἕκαστον, τὰ μὲν καὶ τοῖς περιττοῖς πᾶσιν ὑπάρχει, [96b] τὸ δὲ τελευταῖον καὶ τῇ δυάδι, πάντα δὲ οὐδενί. ἐπεὶ δὲ δεδήλωται ἡμῖν ἐν τοῖς ἄνω ὅτι καθόλου μὲν ἐστὶ τὰ ἐν τῷ τί ἐστὶ κατηγορούμενα (τὰ καθόλου δὲ ἀναγκαῖα), τῇ δὲ τριάδι, καὶ ἐφ' οὗ ἄλλου οὕτω λαμβάνεται, ἐν τῷ τί ἐστὶ τὰ λαμβανόμενα, οὕτως ἐξ ἀνάγκης μὲν ἂν εἴη τριάς ταῦτα. ὅτι δ' οὐσία, ἐκ τῶνδε δῆλον. ἀνάγκη γάρ, εἰ μὴ τοῦτο ἦν τριάδι εἶναι, οἷον γένος τι εἶναι τοῦτο, ἢ ὀνομασμένον ἢ ἀνώνυμον. ἔσται τοίνυν ἐπὶ πλεόν ἢ τῇ τριάδι ὑπάρχον. ὑποκείσθω γὰρ τοιοῦτον εἶναι τὸ γένος ὥστε ὑπάρχειν κατὰ δύναμιν ἐπὶ πλεόν. εἰ τοίνυν μηδενὶ ὑπάρχει ἄλλῳ ἢ ταῖς ἀτόμοις τριάσι, τοῦτ' ἂν εἴη τὸ τριάδι εἶναι (ὑποκείσθω γὰρ καὶ τοῦτο, ἡ οὐσία ἢ ἐκάστου εἶναι ἢ ἐπὶ τοῖς ἀτόμοις ἔσχατος τοιαύτη κατηγορία)· ὥστε ὁμοίως καὶ ἄλλῳ ὁτφοῦν τῶν οὕτω δειχθέντων τὸ αὐτῷ εἶναι ἔσται.

Χρὴ δέ, ὅταν ὅλον τι πραγματεύηται τις, διελεῖν τὸ γένος εἰς τὰ ἅτομα τῷ εἶδει τὰ πρῶτα, οἷον ἀριθμὸν εἰς τριάδα καὶ δυάδα, εἴθ' οὕτως ἐκείνων ὁρισμοὺς πειρᾶσθαι λαμβάνειν, οἷον εὐθείας γραμμῆς καὶ κύκλου, καὶ ὀρθῆς γωνίας, μετὰ δὲ τοῦτο λαβόντα τί τὸ γένος, οἷον πότερον τῶν ποσῶν ἢ τῶν ποιῶν, τὰ ἴδια πάθη θεωρεῖν διὰ τῶν

κοινῶν πρώτων. τοῖς γὰρ συντιθεμένοις ἐκ τῶν ἀτόμων τὰ συμβαίνοντα ἐκ τῶν ὀρισμῶν ἔσται δῆλα, διὰ τὸ ἀρχὴν εἶναι πάντων τὸν ὀρισμὸν καὶ τὸ ἀπλοῦν καὶ τοῖς ἀπλοῖς καθ' αὐτὰ ὑπάρχειν τὰ συμβαίνοντα μόνοις, τοῖς δ' ἄλλοις κατ' ἐκεῖνα. αἱ δὲ διαιρέσεις αἱ κατὰ τὰς διαφορὰς χρήσιμοι εἰσιν εἰς τὸ οὕτω μετιέναι· ὥς μέντοι δεικνύουσιν, εἴρηται ἐν τοῖς πρότερον. χρήσιμοι δ' ἂν εἶεν ὧδε μόνον πρὸς τὸ συλλογίζεσθαι τὸ τί ἐστίν. καίτοι δόξειεν γ' ἂν οὐδέν, ἀλλ' εὐθὺς λαμβάνειν ἅπαντα, ὥσπερ ἂν εἰ ἐξ ἀρχῆς ἐλάμβανέ τις ἄνευ τῆς διαιρέσεως. διαφέρει δέ τι τὸ πρῶτον καὶ ὕστερον τῶν κατηγορουμένων κατηγορεῖσθαι, οἷον εἰπεῖν ζῶον ἡμερον δίπουν ἢ δίπουν ζῶον ἡμερον. εἰ γὰρ ἅπαν ἐκ δύο ἐστί, καὶ ἔν τι τὸ ζῶον ἡμερον, καὶ πάλιν ἐκ τούτου καὶ τῆς διαφορᾶς ὁ ἄνθρωπος ἢ ὁ τι δήποτ' ἐστὶ τὸ ἐν γινόμενον, ἀναγκαῖον διελόμενον αἰτεῖσθαι.

Ἔτι πρὸς τὸ μηδὲν παραλιπεῖν ἐν τῷ τί ἐστίν οὕτω μόνως ἐνδέχεται. ὅταν γὰρ τὸ πρῶτον ληφθῇ γένος, ἂν μὲν τῶν κάτωθεν τινα διαιρέσεων λαμβάνῃ, οὐκ ἐμπεσεῖται ἅπαν εἰς τοῦτο, οἷον οὐ πᾶν ζῶον ἢ ὀλόπτερον ἢ σχιζόπτερον, ἀλλὰ πτηνὸν ζῶον ἅπαν· τούτου [97a] γὰρ διαφορὰ αὕτη. πρώτη δὲ διαφορὰ ἐστὶ ζώου εἰς ἣν ἅπαν ζῶον ἐμπίπτει. ὁμοίως δὲ καὶ τῶν ἄλλων ἐκάστου, καὶ τῶν ἔξω γενῶν καὶ τῶν ὑπ' αὐτό, οἷον ὄρνιθος, εἰς ἣν ἅπας ὄρνις, καὶ ἰχθύος, εἰς ἣν ἅπας ἰχθύς. οὕτω μὲν οὖν βαδίζοντι ἔστιν εἰδέναι ὅτι οὐδὲν παραλείπεται· ἄλλως δὲ καὶ παραλιπεῖν ἀναγκαῖον καὶ μὴ εἰδέναι. οὐδὲν δὲ δεῖ τὸν ὀριζόμενον καὶ διαιρούμενον ἅπαντα εἰδέναι τὰ ὄντα. καίτοι ἀδύνατόν φασί τινες εἶναι τὰς διαφορὰς εἰδέναι τὰς πρὸς ἕκαστον μὴ εἰδότα ἕκαστον· ἄνευ δὲ τῶν διαφορῶν οὐκ εἶναι ἕκαστον εἰδέναι· οὗ γὰρ μὴ διαφέρει, ταῦτόν εἶναι τούτῳ, οὗ δὲ διαφέρει, ἕτερον τούτου. πρῶτον μὲν οὖν τοῦτο ψεῦδος· οὐ γὰρ κατὰ πᾶσαν διαφορὰν ἕτερον· πολλαὶ γὰρ διαφοραὶ ὑπάρχουσι τοῖς αὐτοῖς τῷ εἶδει, ἀλλ' οὐ κατ' οὐσίαν οὐδὲ καθ' αὐτά. εἴτα ὅταν λάβῃ τάντικείμενα καὶ τὴν διαφορὰν καὶ ὅτι πᾶν ἐμπίπτει ἐνταῦθα ἢ ἐνταῦθα, καὶ λάβῃ ἐν θατέρῳ τὸ ζητούμενον εἶναι, καὶ τοῦτο γινώσκῃ, οὐδὲν διαφέρει εἰδέναι ἢ μὴ εἰδέναι ἐφ' ὅσων κατηγοροῦνται ἄλλων αἱ διαφοραί. φανερόν γὰρ ὅτι ἂν οὕτω βαδίζων ἔλθῃ εἰς ταῦτα ὧν μηκέτι ἔστι διαφορὰ, ἔξει τὸν λόγον τῆς οὐσίας. τὸ δ' ἅπαν ἐμπίπτειν εἰς τὴν διαίρεσιν, ἂν ἢ ἀντικείμενα ὧν μὴ ἔστι μεταξύ, οὐκ αἴτημα· ἀνάγκη γὰρ ἅπαν ἐν θατέρῳ αὐτῶν εἶναι, εἴπερ ἐκεῖνου διαφορὰ ἐστί.

Εἰς δὲ τὸ κατασκευάζειν ὅρον διὰ τῶν διαιρέσεων τριῶν δεῖ στοχάζεσθαι, τοῦ λαβεῖν τὰ κατηγορούμενα ἐν τῷ τί ἐστὶ, καὶ ταῦτα τάξαι τί πρῶτον ἢ δεύτερον, καὶ ὅτι ταῦτα πάντα. ἔστι δὲ τούτων ἐν πρῶτον διὰ τοῦ δύνασθαι, ὥσπερ πρὸς συμβεβηκὸς συλλογίσασθαι ὅτι ὑπάρχει, καὶ διὰ τοῦ γένους κατασκευάσαι. τὸ δὲ τάξαι ὡς δεῖ ἔσται, ἐὰν τὸ πρῶτον λάβῃ. τοῦτο δ' ἔσται, ἐὰν ληφθῇ ὁ πᾶσιν ἀκολουθεῖ, ἐκείνῳ δὲ μὴ πάντα· ἀνάγκη γὰρ εἶναι τι τοιοῦτον. ληφθέντος δὲ τούτου ἤδη ἐπὶ τῶν κάτω ὁ αὐτὸς τρόπος· δεύτερον γὰρ τὸ τῶν ἄλλων πρῶτον ἔσται, καὶ τρίτον τὸ τῶν ἐχομένων· ἀφαιρεθέντος γὰρ τοῦ ἄνωθεν τὸ ἐχόμενον τῶν ἄλλων πρῶτον ἔσται. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων. ὅτι δ' ἅπαντα ταῦτα, φανερόν ἐκ τοῦ λαβεῖν τό τε πρῶτον κατὰ διαίρεσιν, ὅτι ἅπαν ἢ τόδε ἢ τόδε ζῶον, ὑπάρχει δὲ τόδε, καὶ πάλιν τούτου ὅλου τὴν διαφοράν, τοῦ δὲ τελευταίου μηκέτι εἶναι διαφοράν, ἢ καὶ εὐθὺς μετὰ τῆς τελευταίας διαφορᾶς τοῦ συνόλου μὴ διαφέρειν εἶδει ἔτι τοῦτο. [97b] δῆλον γὰρ ὅτι οὔτε πλεῖον πρόσκειται (πάντα γὰρ ἐν τῷ τί ἐστὶν εἰληπται τούτων) οὔτε ἀπολείπει οὐδέν· ἢ γὰρ γένος ἢ διαφορὰ ἂν εἴη. γένος μὲν οὖν τό τε πρῶτον, καὶ μετὰ τῶν διαφορῶν τοῦτο προσλαμβανόμενον· αἱ διαφοραὶ δὲ πᾶσαι ἔχονται· οὐ γὰρ ἔτι ἔστιν ὑστέρα· εἶδει γὰρ ἂν διέφερε τὸ τελευταῖον, τοῦτο δ' εἴρηται μὴ διαφέρειν.

Ζητεῖν δὲ δεῖ ἐπιβλέποντα ἐπὶ τὰ ὅμοια καὶ ἀδιάφορα, πρῶτον τί ἅπαντα ταῦτὸν ἔχουσιν, εἴτα πάλιν ἐφ' ἐτέροις, ἃ ἐν ταῦτῳ μὲν γένει ἐκείνοις, εἰσὶ δὲ αὐτοῖς μὲν ταῦτὰ τῷ εἶδει, ἐκείνων δ' ἕτερα. ὅταν δ' ἐπὶ τούτων ληφθῇ τί πάντα ταῦτόν, καὶ ἐπὶ τῶν ἄλλων ὁμοίως, ἐπὶ τῶν εἰλημμένων πάλιν σκοπεῖν εἰ ταῦτόν, ἕως ἂν εἰς ἓνα ἔλθῃ λόγον· οὗτος γὰρ ἔσται τοῦ πράγματος ὁρισμός. ἐὰν δὲ μὴ βαδίξῃ εἰς ἓνα ἀλλ' εἰς δύο ἢ πλείους, δῆλον ὅτι οὐκ ἂν εἴη ἓν τι εἶναι τὸ ζητούμενον, ἀλλὰ πλείω. οἷον λέγω, εἰ τί ἐστὶ μεγαλοψυχία ζητοῖμεν, σκεπτέον ἐπὶ τινων μεγαλοψύχων, οὓς ἴσμεν, τί ἔχουσιν ἐν πάντες ἢ τοιοῦτοι. οἷον εἰ Ἀλκιβιάδης μεγαλόψυχος ἢ ὁ Ἀχιλλεὺς καὶ ὁ Αἴας, τί ἐν ἅπαντες; τὸ μὴ ἀνέχεσθαι ὑβριζόμενοι· ὁ μὲν γὰρ ἐπολέμησεν, ὁ δ' ἐμήνισεν, ὁ δ' ἀπέκτεινεν ἑαυτόν. πάλιν ἐφ' ἐτέρων, οἷον Λυσάνδρου ἢ Σωκράτους. εἰ δὴ τὸ ἀδιάφοροι εἶναι εὐτυχοῦντες καὶ ἀτυχοῦντες, ταῦτα δύο λαβὼν σκοπῶ τί τὸ αὐτὸ ἔχουσιν ἢ τε ἀπάθεια ἢ περὶ τὰς τύχας καὶ ἢ μὴ ὑπομονὴ ἀτιμαζομένων. εἰ δὲ μηδέν, δύο εἶδη ἂν εἴη τῆς μεγαλοψυχίας. αἰεὶ δ' ἐστὶ πᾶς ὁρος καθόλου· οὐ γάρ

τινι ὀφθαλμῷ λέγει τὸ ὑγιεινὸν ὁ ἰατρός, ἀλλ' ἢ παντὶ ἢ εἶδει ἀφορίσας. ῥᾷόν τε τὸ καθ' ἕκαστον ὀρίσασθαι ἢ τὸ καθόλου, διὸ δεῖ ἀπὸ τῶν καθ' ἕκαστα ἐπὶ τὰ καθόλου μεταβαίνειν· καὶ γὰρ αἱ ὁμωνυμῖαι λανθάνουσι μᾶλλον ἐν τοῖς καθόλου ἢ ἐν τοῖς ἀδιαφόροις. ὥσπερ δὲ ἐν ταῖς ἀποδείξεσι δεῖ τό γε συλλελογίσθαι ὑπάρχειν, οὕτω καὶ ἐν τοῖς ὅροις τὸ σαφές. τοῦτο δ' ἔσται, ἐὰν διὰ τῶν καθ' ἕκαστον εἰλημμένων ἢ τὸ ἐν ἐκάστῳ γένει ὀρίζεσθαι χωρὶς, οἷον τὸ ὅμοιον μὴ πᾶν ἀλλὰ τὸ ἐν χρώμασι καὶ σχήμασι, καὶ ὅξυ τὸ ἐν φωνῇ, καὶ οὕτως ἐπὶ τὸ κοινὸν βαδίζειν, εὐλαβούμενον μὴ ὁμωνυμία ἐντύχη. εἰ δὲ μὴ διαλέγεσθαι δεῖ μεταφοραῖς, δῆλον ὅτι οὐδ' ὀρίζεσθαι οὔτε μεταφοραῖς οὔτε ὅσα λέγεται μεταφοραῖς· διαλέγεσθαι γὰρ ἀνάγκη ἔσται μεταφοραῖς.

Κεφάλαιο 14

[98a] Πρὸς δὲ τὸ ἔχειν τὰ προβλήματα ἐκλέγειν δεῖ τὰς τε ἀνατομὰς καὶ τὰς διαιρέσεις, οὕτω δὲ ἐκλέγειν, ὑποθέμενον τὸ γένος τὸ κοινὸν ἀπάντων, οἷον εἰ ζῷα εἴη τὰ τεθεωρημένα, ποῖα παντὶ ζῷῳ ὑπάρχει, ληφθέντων δὲ τούτων, πάλιν τῶν λοιπῶν τῷ πρώτῳ ποῖα παντὶ ἔπεται, οἷον εἰ τοῦτο ὄρνις, ποῖα παντὶ ἔπεται ὄρνιθι, καὶ οὕτως αἰεὶ τῷ ἐγγύτατα· δηλὸν γὰρ ὅτι ἔξομεν ἤδη λέγειν τὸ διὰ τί ὑπάρχει τὰ ἐπόμενα τοῖς ὑπὸ τὸ κοινόν, οἷον διὰ τί ἀνθρώπῳ ἢ ἵππῳ ὑπάρχει. ἔστω δὲ ζῷον ἐφ' οὗ Α, τὸ δὲ Β τὰ ἐπόμενα παντὶ ζῷῳ, ἐφ' ὧν δὲ Γ Δ Ε τὰ τινὰ ζῷα. δηλὸν δὴ διὰ τί τὸ Β ὑπάρχει τῷ Δ· διὰ γὰρ τὸ Α. ὁμοίως δὲ καὶ τοῖς ἄλλοις· καὶ αἰεὶ ἐπὶ τῶν κάτω ὁ αὐτὸς λόγος.

Νῦν μὲν οὖν κατὰ τὰ παραδεδομένα κοινὰ ὀνόματα λέγομεν, δεῖ δὲ μὴ μόνον ἐπὶ τούτων σκοπεῖν, ἀλλὰ καὶ ἂν ἄλλο τι ὁφθῇ ὑπάρχον κοινόν, ἐκλαμβάνοντα, εἴτα τίσι τοῦτ' ἀκολουθεῖ καὶ ποῖα τούτῳ ἔπεται, οἷον τοῖς κέρατα ἔχουσι τὸ ἔχειν ἐχῖνον, τὸ μὴ ἀμφώδοντ' εἶναι· πάλιν τὸ κέρατ' ἔχειν τίσιν ἔπεται. δηλὸν γὰρ διὰ τί ἐκείνοις ὑπάρξει τὸ εἰρημένον· διὰ γὰρ τὸ κέρατ' ἔχειν ὑπάρξει.

Ἔτι δ' ἄλλος τρόπος ἐστὶ κατὰ τὸ ἀνάλογον ἐκλέγειν. ἐν γὰρ λαβεῖν οὐκ ἔστι τὸ αὐτό, ὃ δεῖ καλέσαι σήπιον καὶ ἄκανθαν καὶ ὀστοῦν· ἔσται δ' ἐπόμενα καὶ τούτοις ὥσπερ μιᾶς τινος φύσεως τῆς τοιαύτης οὐσης.

Τὰ δ' αὐτὰ προβλήματα ἐστὶ τὰ μὲν τῷ τὸ αὐτὸ μέσον ἔχειν, οἷον ὅτι πάντα ἀντιπερίστασις. τούτων δ' ἓν τῷ γένει ταῦτά, ὅσα ἔχει διαφορὰς τῷ ἄλλων ἢ ἄλλως εἶναι, οἷον διὰ τί ἡχεῖ, ἢ διὰ τί ἐμφαίνεται, καὶ διὰ τί ἴρις· ἅπαντα γὰρ ταῦτα τὸ αὐτὸ πρόβλημά ἐστι γένει (πάντα γὰρ ἀνάκλασις), ἀλλ' εἶδει ἕτερα. τὰ δὲ τῷ τὸ μέσον ὑπὸ τὸ ἕτερον μέσον εἶναι διαφέρει τῶν προβλημάτων, οἷον διὰ τί ὁ Νεῖλος φθίνοντος τοῦ μηνὸς μᾶλλον ῥεῖ; διότι χειμεριώτερος φθίνων ὁ μείζ. διὰ τί δὲ χειμεριώτερος φθίνων; διότι ἡ σελήνη ἀπολείπει. ταῦτα γὰρ οὕτως ἔχει πρὸς ἄλληλα.

Περὶ δ' αἰτίου καὶ οὗ αἴτιον ἀπορήσειε μὲν ἂν τις, ἄρα ὅτε ὑπάρχει τὸ αἰτιατόν, καὶ τὸ αἴτιον ὑπάρχει (ὥσπερ εἰ φυλλορροεῖ ἢ ἐκλείπει, καὶ τὸ αἴτιον τοῦ ἐκλείπειν ἢ φυλλορροεῖν ἔσται· οἷον εἰ τοῦτ' ἔστι τὸ πλατέα ἔχειν τὰ [98b] φύλλα, τοῦ δ' ἐκλείπειν τὸ τὴν γῆν ἐν μέσῳ εἶναι· εἰ γὰρ μὴ ὑπάρχει, ἄλλο τι ἔσται τὸ αἴτιον αὐτῶν), εἴ τε τὸ αἴτιον ὑπάρχει, ἅμα καὶ τὸ αἰτιατόν (οἷον εἰ ἐν μέσῳ ἢ γῆ, ἐκλείπει, ἢ εἰ πλατύφυλλον, φυλλορροεῖ). εἰ δ' οὕτως, ἅμ' ἂν εἴη καὶ δεικνύοιτο δι' ἀλλήλων. ἔστω γὰρ τὸ φυλλορροεῖν ἐφ' οὗ A, τὸ δὲ πλατύφυλλον ἐφ' οὗ B, ἄμπελος δὲ ἐφ' οὗ Γ. εἰ δὴ τῷ B ὑπάρχει τὸ A (πᾶν γὰρ πλατύφυλλον φυλλορροεῖ), τῷ δὲ Γ ὑπάρχει τὸ B (πᾶσα γὰρ ἄμπελος πλατύφυλλος), τῷ Γ ὑπάρχει τὸ A, καὶ πᾶσα ἄμπελος φυλλορροεῖ. αἴτιον δὲ τὸ B τὸ μέσον. ἀλλὰ καὶ ὅτι πλατύφυλλον ἢ ἄμπελος, ἔστι διὰ τοῦ φυλλορροεῖν ἀποδειξαι. ἔστω γὰρ τὸ μὲν Δ πλατύφυλλον, τὸ δὲ E τὸ φυλλορροεῖν, ἄμπελος δὲ ἐφ' οὗ Z. τῷ δὴ Z ὑπάρχει τὸ E (φυλλορροεῖ γὰρ πᾶσα ἄμπελος), τῷ δὲ E τὸ Δ (ἅπαν γὰρ τὸ φυλλορροοῦν πλατύφυλλον). πᾶσα ἄρα ἄμπελος πλατύφυλλον. αἴτιον δὲ τὸ φυλλορροεῖν. εἰ δὲ μὴ ἐνδέχεται αἴτια εἶναι ἀλλήλων (τὸ γὰρ αἴτιον πρότερον οὗ αἴτιον, καὶ τοῦ μὲν ἐκλείπειν αἴτιον τὸ ἐν μέσῳ τὴν γῆν εἶναι, τοῦ δ' ἐν μέσῳ τὴν γῆν εἶναι οὐκ αἴτιον τὸ ἐκλείπειν)-εἰ οὖν ἢ μὲν διὰ τοῦ αἰτίου ἀπόδειξις τοῦ διὰ τί, ἢ δὲ μὴ διὰ τοῦ αἰτίου τοῦ ὅτι, ὅτι μὲν ἐν μέσῳ, οἶδε, διότι δ' οὐ. ὅτι δ' οὐ τὸ ἐκλείπειν αἴτιον τοῦ ἐν μέσῳ, ἀλλὰ τοῦτο τοῦ ἐκλείπειν, φανερόν· ἐν γὰρ τῷ λόγῳ τῷ τοῦ ἐκλείπειν ἐνυπάρχει τὸ ἐν μέσῳ, ὥστε δηλὸν ὅτι διὰ τούτου ἐκεῖνο γνωρίζεται, ἀλλ' οὐ τοῦτο δι' ἐκείνου.

Ἡ ἐνδέχεται ἐνὸς πλείω αἴτια εἶναι; καὶ γὰρ εἰ ἔστι τὸ αὐτὸ πλείονων πρώτων κατηγορεῖσθαι, ἔστω τὸ A τῷ B πρώτῳ ὑπάρχον, καὶ τῷ Γ ἄλλῳ πρώτῳ, καὶ ταῦτα τοῖς Δ E. ὑπάρξει ἄρα τὸ A τοῖς Δ E· αἴτιον δὲ τῷ μὲν Δ τὸ B, τῷ δὲ E τὸ Γ· ὥστε τοῦ μὲν αἰτίου ὑπάρχοντος ἀνάγκη τὸ πρᾶγμα ὑπάρχειν, τοῦ δὲ πράγματος ὑπάρχοντος οὐκ ἀνάγκη πᾶν ὃ ἂν ᾖ αἴτιον, ἀλλ' αἴτιον μὲν, οὐ μέντοι πᾶν. ἢ εἰ ἀεὶ καθόλου τὸ πρόβλημά ἐστι, καὶ τὸ αἴτιον ὅλον τι, καὶ οὗ αἴτιον, καθόλου; οἷον τὸ φυλλορροεῖν ὅλῳ τινὶ ἀφωρισμένον, κἂν εἶδη αὐτοῦ ἢ, καὶ τοισδὶ καθόλου, ἢ φυτοῖς ἢ τοιοισδὶ φυτοῖς· ὥστε

καὶ τὸ μέσον ἴσον δεῖ εἶναι ἐπὶ τούτων καὶ οὗ αἴτιον, καὶ ἀντιστρέφειν. οἷον διὰ τί τὰ δένδρα φυλλορροεῖ; εἰ δὴ διὰ πῆξιν τοῦ ὑγροῦ, εἴτε φυλλορροεῖ δένδρον, δεῖ ὑπάρχειν πῆξιν, εἴτε πῆξις ὑπάρχει, μὴ ὅτ' αὖθις ἀλλὰ δένδρῳ, φυλλορροεῖν.

[99a] Πότερον δ' ἐνδέχεται μὴ τὸ αὐτὸ αἴτιον εἶναι τοῦ αὐτοῦ πᾶσιν ἄλλ' ἕτερον, ἢ οὐ; ἢ εἰ μὲν καθ' αὐτὸ ἀποδέδεικται καὶ μὴ κατὰ σημεῖον ἢ συμβεβηκός, οὐχ οἷόν τε· ὁ γὰρ λόγος τοῦ ἄκρου τὸ μέσον ἐστίν· εἰ δὲ μὴ οὕτως, ἐνδέχεται. ἔστι δὲ καὶ οὗ αἴτιον καὶ ᾧ σκοπεῖν κατὰ συμβεβηκός· οὐ μὴν δοκεῖ προβλήματα εἶναι. εἰ δὲ μή, ὁμοίως ἕξει τὸ μέσον· εἰ μὲν ὁμώνυμα, ὁμώνυμον τὸ μέσον, εἰ δ' ὥς ἐν γένει, ὁμοίως ἕξει. οἷον διὰ τί καὶ ἐναλλαξ ἀνάλογον; ἄλλο γὰρ αἴτιον ἐν γραμμαῖς καὶ ἀριθμοῖς καὶ τὸ αὐτὸ γε, ἢ μὲν γραμμὴ, ἄλλο, ἢ δ' ἔχον αὐξησιν τοιανδί, τὸ αὐτό. οὕτως ἐπὶ πάντων. τοῦ δ' ὅμοιον εἶναι χρῶμα χρώματι καὶ σχῆμα σχήματι ἄλλο ἄλλω. ὁμώνυμον γὰρ τὸ ὅμοιον ἐπὶ τούτων· ἔνθα μὲν γὰρ ἴσως τὸ ἀνάλογον ἔχειν τὰς πλευρὰς καὶ ἴσας τὰς γωνίας, ἐπὶ δὲ χρωμάτων τὸ τὴν αἴσθησιν μίαν εἶναι ἢ τι ἄλλο τοιοῦτον. τὰ δὲ κατ' ἀναλογίαν τὰ αὐτὰ καὶ τὸ μέσον ἕξει κατ' ἀναλογίαν. Ἐχει δ' οὕτω τὸ παρακολουθεῖν τὸ αἴτιον ἀλλήλοις καὶ οὗ αἴτιον καὶ ᾧ αἴτιον· καθ' ἕκαστον μὲν λαμβάνοντι τὸ οὗ αἴτιον ἐπὶ πλεόν, οἷον τὸ τέτταρσιν ἴσας τὰς ἕξω ἐπὶ πλεόν ἢ τρίγωνον ἢ τετράγωνον, ἅπασιν δὲ ἐπ' ἴσον (ὅσα γὰρ τέτταρσιν ὀρθαῖς ἴσας τὰς ἕξω)· καὶ τὸ μέσον ὁμοίως. ἔστι δὲ τὸ μέσον λόγος τοῦ πρώτου ἄκρου, διὸ πᾶσαι αἱ ἐπιστῆμαι δι' ὀρισμοῦ γίνονται. οἷον τὸ φυλλορροεῖν ἅμα ἀκολουθεῖ τῇ ἀμπέλῳ καὶ ὑπερέχει, καὶ συκῇ, καὶ ὑπερέχει· ἄλλ' οὐ πάντων, ἀλλ' ἴσον. εἰ δὴ λάβοις τὸ πρῶτον μέσον, λόγος τοῦ φυλλορροεῖν ἐστίν. ἔσται γὰρ πρῶτον μὲν ἐπὶ θάτερα μέσον, ὅτι τοιαδὶ ἅπαντα· εἴτα τούτου μέσον, ὅτι ὁπὸς πηγνυται ἢ τι ἄλλο τοιοῦτον. τί δ' ἐστὶ τὸ φυλλορροεῖν; τὸ πηγνυσθαι τὸν ἐν τῇ συνάψει τοῦ σπέρματος ὁπόν.

Ἐπὶ δὲ τῶν σχημάτων ὧδε ἀποδώσει ζητοῦσι τὴν παρακολούθησιν τοῦ αἰτίου καὶ οὗ αἴτιον. ἔστω τὸ Α τῷ Β ὑπάρχειν παντί, τὸ δὲ Β ἐκάστῳ τῶν Δ, ἐπὶ πλεόν δέ. τὸ μὲν δὴ Β καθόλου ἂν εἴη τοῖς Δ· τοῦτο γὰρ λέγω καθόλου ᾧ μὴ ἀντιστρέφει, πρῶτον δὲ καθόλου ᾧ ἕκαστον μὲν μὴ ἀντιστρέφει, ἅπαντα δὲ ἀντιστρέφει καὶ παρεκτείνει. τοῖς δὴ Δ αἴτιον τοῦ Α τὸ Β. δεῖ ἄρα τὸ Α ἐπὶ πλεόν τοῦ Β ἐπεκτείνειν· εἰ δὲ μή, τί μᾶλλον αἴτιον ἔσται τοῦτο ἐκείνου; εἰ δὴ πᾶσιν ὑπάρχει τοῖς Ε τὸ Α, ἔσται τι ἐκείνα ἐν ἅπαντα ἄλλο τοῦ Β. εἰ γὰρ μή, πῶς ἔσται εἰπεῖν ὅτι ᾧ τὸ Ε, τὸ [99b] Α παντί, ᾧ δὲ τὸ Α, οὐ

παντὶ τὸ Ε; διὰ τί γὰρ οὐκ ἔσται τι αἴτιον οἷον [τὸ Α] ὑπάρχει πᾶσι τοῖς Δ; ἀλλ' ἄρα καὶ τὰ Ε ἔσται τι ἓν; ἐπισκέψασθαι δεῖ τοῦτο, καὶ ἔστω τὸ Γ. ἐνδέχεται δὴ τοῦ αὐτοῦ πλείω αἴτια εἶναι, ἀλλ' οὐ τοῖς αὐτοῖς τῷ εἶδει, οἷον τοῦ μακρόβια εἶναι τὰ μὲν τετράποδα τὸ μὴ ἔχειν χολήν, τὰ δὲ πτηνὰ τὸ ξηρὰ εἶναι ἢ ἕτερόν τι.

Κεφάλαιο 19

Περὶ μὲν οὖν συλλογισμοῦ καὶ ἀποδείξεως, τί τε ἐκάτερόν ἐστι καὶ πῶς γίνεται, φανερόν, ἅμα δὲ καὶ περὶ ἐπιστήμης ἀποδεικτικῆς· ταῦτόν γάρ ἐστιν. περὶ δὲ τῶν ἀρχῶν, πῶς τε γίνονται γνώριμοι καὶ τίς ἡ γνωρίζουσα ἕξις, ἐντεῦθεν ἔσται δῆλον προαπορήσασι πρῶτον.

Ὅτι μὲν οὖν οὐκ ἐνδέχεται ἐπίστασθαι δι’ ἀποδείξεως μὴ γινώσκοντι τὰς πρώτας ἀρχὰς τὰς ἀμέσους, εἴρηται πρότερον. τῶν δ’ ἀμέσων τὴν γνῶσιν, καὶ πότερον ἢ αὐτὴ ἐστὶν ἢ οὐχ ἢ αὐτὴ, διαπορήσειεν ἂν τις, καὶ πότερον ἐπιστήμη ἐκατέρου ἢ οὐ, ἢ τοῦ μὲν ἐπιστήμη τοῦ δ’ ἑτερόν τι γένος, καὶ πότερον οὐκ ἐνοῦσαι αἱ ἕξεις ἐγγίνονται ἢ ἐνοῦσαι λελήθασιν. εἰ μὲν δὴ ἔχομεν αὐτάς, ἄτοπον· συμβαίνει γὰρ ἀκριβεστέρας ἔχοντας γνώσεις ἀποδείξεως λανθάνειν. εἰ δὲ λαμβάνομεν μὴ ἔχοντες πρότερον, πῶς ἂν γνωρίζοιμεν καὶ μανθάνοιμεν ἐκ μὴ προϋπαρχούσης γνώσεως; ἀδύνατον γάρ, ὥσπερ καὶ ἐπὶ τῆς ἀποδείξεως ἐλέγομεν. φανερόν τοίνυν ὅτι οὐτ’ ἔχειν οἶόν τε, οὐτ’ ἀγνοοῦσι καὶ μηδεμίαν ἔχουσιν ἕξιν ἐγγίγνεσθαι. ἀνάγκη ἄρα ἔχειν μὲν τινα δύναμιν, μὴ τοιαύτην δ’ ἔχειν ἢ ἔσται τούτων τιμιωτέρα κατ’ ἀκρίβειαν. φαίνεται δὲ τοῦτό γε πᾶσιν ὑπάρχον τοῖς ζώοις. ἔχει γὰρ δύναμιν σύμφυτον κριτικὴν, ἣν καλοῦσιν αἴσθησιν· ἐνούσης δ’ αἰσθήσεως τοῖς μὲν τῶν ζώων ἐγγίγνεται μονὴ τοῦ αἰσθήματος, τοῖς δ’ οὐκ ἐγγίγνεται. ὅσοις μὲν οὖν μὴ ἐγγίγνεται, ἢ ὅλως ἢ περὶ ἃ μὴ ἐγγίγνεται, οὐκ ἔστι τούτοις γνῶσις ἕξω τοῦ αἰσθάνεσθαι· ἐν οἷς δ’ ἔνεστιν αἰσθομένοις ἔχειν [100a] ἔτι ἐν τῇ ψυχῇ. πολλῶν δὲ τοιούτων γινομένων ἤδη διαφορὰ τις γίνεται, ὥστε τοῖς μὲν γίνεσθαι λόγον ἐκ τῆς τῶν τοιούτων μονῆς, τοῖς δὲ μή.

Ἐκ μὲν οὖν αἰσθήσεως γίνεται μνήμη, ὥσπερ λέγομεν, ἐκ δὲ μνήμης πολλάκις τοῦ αὐτοῦ γινομένης ἐμπειρία· αἱ γὰρ πολλαὶ μνήμαι τῷ ἀριθμῷ ἐμπειρία μία ἐστίν. ἐκ δ’ ἐμπειρίας ἢ ἐκ παντὸς ἡρεμήσαντος τοῦ καθόλου ἐν τῇ ψυχῇ, τοῦ ἐνὸς παρὰ τὰ πολλά, ὃ ἂν ἐν ἅπασιν ἐν ἐνῇ ἐκείνοις τὸ αὐτό, τέχνης ἀρχὴ καὶ ἐπιστήμης, ἐὰν μὲν περὶ γένεσιν, τέχνης, ἐὰν δὲ περὶ τὸ ὄν, ἐπιστήμης. οὔτε δὴ ἐνυπάρχουσιν ἀφωρισμένοι αἱ ἕξεις, οὐτ’ ἀπ’ ἄλλων ἕξεων γίνονται γνωστικωτέρων, ἀλλ’ ἀπὸ αἰσθήσεως, οἷον ἐν μάχῃ τροπῆς γενομένης ἐνὸς στάντος ἑτερος ἔστη, εἴθ’ ἑτερος, ἕως ἐπὶ ἀρχὴν ἦλθεν. ἢ δὲ ψυχὴ ὑπάρχει τοιαύτη οὔσα οἷα δύνασθαι πάσχειν τοῦτο.

ὁ δ' ἐλέχθη μὲν πάλαι, οὐ σαφῶς δὲ ἐλέχθη, πάλιν εἶπωμεν. στάντος γὰρ τῶν ἀδιαφόρων ἐνός, πρῶτον μὲν ἐν τῇ ψυχῇ καθόλου (καὶ γὰρ αἰσθάνεται μὲν τὸ καθ' ἕκαστον, ἢ δ' αἰσθησις τοῦ καθόλου [100b] ἐστίν, οἷον ἀνθρώπου, ἀλλ' οὐ Καλλίου ἀνθρώπου)· πάλιν ἐν τούτοις ἴσταται, ἕως ἂν τὰ ἀμερῇ στῇ καὶ τὰ καθόλου, οἷον τοιονδὶ ζῶον, ἕως ζῶον, καὶ ἐν τούτῳ ὡσαύτως. δῆλον δὲ ὅτι ἡμῖν τὰ πρῶτα ἐπαγωγῇ γνωρίζειν ἀναγκαῖον· καὶ γὰρ ἡ αἰσθησις οὕτω τὸ καθόλου ἐμποιεῖ.

Ἐπεὶ δὲ τῶν περὶ τὴν διάνοιαν ἔξεων αἷς ἀληθεύομεν αἱ μὲν ἀεὶ ἀληθεῖς εἰσιν, αἱ δὲ ἐπιδέχονται τὸ ψεῦδος, οἷον δόξα καὶ λογισμός, ἀληθὴ δ' ἀεὶ ἐπιστήμη καὶ νοῦς, καὶ οὐδὲν ἐπιστήμης ἀκριβέστερον ἄλλο γένος ἢ νοῦς, αἱ δ' ἀρχαὶ τῶν ἀποδείξεων γνωριμώτεραι, ἐπιστήμη δ' ἅπαντα μετὰ λόγου ἐστί, τῶν ἀρχῶν ἐπιστήμη μὲν οὐκ ἂν εἴη, ἐπεὶ δ' οὐδὲν ἀληθέστερον ἐνδέχεται εἶναι ἐπιστήμης ἢ νοῦν, νοῦς ἂν εἴη τῶν ἀρχῶν, ἕκ τε τούτων σκοποῦσι καὶ ὅτι ἀποδείξεως ἀρχὴ οὐκ ἀπόδειξις, ὥστ' οὐδ' ἐπιστήμης ἐπιστήμη. εἰ οὖν μηδὲν ἄλλο παρ' ἐπιστήμην γένος ἔχομεν ἀληθές, νοῦς ἂν εἴη ἐπιστήμης ἀρχή. καὶ ἡ μὲν ἀρχὴ τῆς ἀρχῆς εἴη ἂν, ἢ δὲ πᾶσα ὁμοίως ἔχει πρὸς τὸ πᾶν πρᾶγμα.

[100a] Ἡ μὲν πρόθεσις τῆς πραγματείας μέθοδον εὐρεῖν ἀφ’ ἧς δυνησόμεθα συλλογίζεσθαι περὶ παντὸς τοῦ προτεθέντος προβλήματος ἐξ ἐνδόξων, καὶ αὐτοὶ λόγον ὑπέχοντες μηθὲν ἐροῦμεν ὑπεναντίον. πρῶτον οὖν ῥητέον τί ἐστὶ συλλογισμὸς καὶ τίνες αὐτοῦ διαφοραί, ὅπως ληφθῇ ὁ διαλεκτικὸς συλλογισμὸς· τοῦτον γὰρ ζητοῦμεν κατὰ τὴν προκειμένην πραγματείαν.

Ἔστι δὴ συλλογισμὸς λόγος ἐν ᾧ τεθέντων τινῶν ἕτερόν τι τῶν κειμένων ἐξ ἀνάγκης συμβαίνει διὰ τῶν κειμένων. ἀποδείξεις μὲν οὖν ἐστίν, ὅταν ἐξ ἀληθῶν καὶ πρώτων ὁ συλλογισμὸς ᾗ, ἡ ἐκ τοιούτων ἂν διὰ τινων πρώτων καὶ ἀληθῶν τῆς περὶ αὐτὰ γνώσεως τὴν ἀρχὴν εἴληφεν, διαλεκτικὸς δὲ συλλογισμὸς ὁ ἐξ ἐνδόξων συλλογιζόμενος. ἐστὶ [100b] δὲ ἀληθὴ μὲν καὶ πρῶτα τὰ μὴ δι’ ἐτέρων ἀλλὰ δι’ αὐτῶν ἔχοντα τὴν πίστιν (οὐ δεῖ γὰρ ἐν ταῖς ἐπιστημονικαῖς ἀρχαῖς ἐπιζητεῖσθαι τὸ διὰ τί, ἀλλ’ ἐκάστην τῶν ἀρχῶν αὐτὴν καθ’ ἑαυτὴν εἶναι πιστήν), ἔνδοξα δὲ τὰ δοκοῦντα πᾶσιν ἢ τοῖς πλείστοις ἢ τοῖς σοφοῖς, καὶ τούτοις ἢ πᾶσιν ἢ τοῖς πλείστοις ἢ τοῖς μάλιστα γνωρίμοις καὶ ἐνδόξοις. ἐριστικὸς δ’ ἐστὶ συλλογισμὸς ὁ ἐκ φαινομένων ἐνδόξων μὴ ὄντων δέ, καὶ ὁ ἐξ ἐνδόξων ἢ φαινομένων ἐνδόξων φαινόμενος· οὐ γὰρ πᾶν τὸ φαινόμενον ἐνδοξον καὶ ἔστιν ἐνδοξον. οὐθὲν γὰρ τῶν λεγομένων ἐνδόξων ἐπιπόλαιον ἔχει παντελῶς τὴν φαντασίαν, καθάπερ περὶ τὰς τῶν ἐριστικῶν λόγων ἀρχὰς συμβέβηκεν ἔχειν· παραχρῆμα γὰρ καὶ ὥς ἐπὶ τὸ πολὺ τοῖς καὶ μικρὰ συνορᾶν δυναμένοις κατάδηλος ἐν αὐτοῖς ἢ τοῦ [101a] ψεύδους ἐστὶ φύσις. ὁ μὲν οὖν πρότερος τῶν ῥηθέντων ἐριστικῶν συλλογισμῶν καὶ συλλογισμὸς λεγέσθω, ὁ δὲ λοιπὸς ἐριστικὸς μὲν συλλογισμὸς, συλλογισμὸς δ’ οὐ, ἐπειδὴ φαίνεται μὲν συλλογίζεσθαι, συλλογίζεται δ’ οὐ.

Ἔτι δὲ παρὰ τοὺς εἰρημένους ἅπαντας συλλογισμοὺς οἱ ἐκ τῶν περὶ τινὰς ἐπιστήμας οἰκείων γινόμενοι παραλογισμοί, καθάπερ ἐπὶ τῆς γεωμετρίας καὶ τῶν ταύτῃ συγγενῶν συμβέβηκεν ἔχειν. ἔοικε γὰρ ὁ τρόπος οὗτος διαφέρειν τῶν εἰρημένων συλλογισμῶν· οὔτε γὰρ ἐξ ἀληθῶν καὶ πρώτων συλλογίζεται ὁ ψευδογραφῶν οὔτ’ ἐξ ἐνδόξων. εἰς γὰρ τὸν ὅρον οὐκ ἐμπίπτει· οὔτε γὰρ τὰ πᾶσι δοκοῦντα λαμβάνει οὔτε τὰ τοῖς πλείστοις οὔτε τὰ τοῖς σοφοῖς, καὶ τούτοις

οὔτε πᾶσιν οὔτε τοῖς πλείστοις οὔτε τοῖς ἐνδοξοτάτοις, ἀλλ' ἐκ τῶν οἰκείων μὲν τῇ ἐπιστήμῃ λημμάτων οὐκ ἀληθῶν δὲ τὸν συλλογισμόν ποιεῖται. τῷ γὰρ ἢ τὰ ἡμικύκλια περιγράφειν μὴ ὥς δεῖ ἢ γραμμάς τινας ἄγειν μὴ ὥς ἂν ἀχθείησαν τὸν παραλογισμόν ποιεῖται.

Εἶδη μὲν οὖν τῶν συλλογισμῶν ὥς τύπῳ περιλαβεῖν ἔστω τὰ εἰρημένα. καθόλου δ' εἰπεῖν περὶ πάντων τῶν εἰρημένων καὶ τῶν μετὰ ταῦτα ῥηθησομένων ἐπὶ τοσοῦτον ἡμῖν διωρίσθω, διότι περὶ οὐδενὸς αὐτῶν τὸν ἀκριβῆ λόγον ἀποδοῦναι προαιρούμεθα, ἀλλ' ὅσον τύπῳ περὶ αὐτῶν βουλόμεθα διελθεῖν, παντελῶς ἱκανὸν ἡγούμενοι κατὰ τὴν προκειμένην μέθοδον τὸ δύνασθαι γνωρίζειν ὁπωσοῦν ἕκαστον αὐτῶν.

Ἐπόμενον δ' ἂν εἴη τοῖς εἰρημένοις εἰπεῖν πρὸς πόσα τε καὶ τίνα χρήσιμος ἢ πραγματεία. ἔστι δὴ πρὸς τρία, πρὸς γυμνασίαν, πρὸς τὰς ἐντεύξεις, πρὸς τὰς κατὰ φιλοσοφίαν ἐπιστήμας. ὅτι μὲν οὖν πρὸς γυμνασίαν χρήσιμος, ἐξ αὐτῶν καταφανές ἐστι· μέθοδον γὰρ ἔχοντες ῥᾶον περὶ τοῦ προτεθέντος ἐπιχειρεῖν δυνησόμεθα· πρὸς δὲ τὰς ἐντεύξεις, διότι τὰς τῶν πολλῶν κατηριθμημένοι δόξας οὐκ ἐκ τῶν ἀλλοτρίων ἀλλ' ἐκ τῶν οἰκείων δογμάτων ὁμιλήσομεν πρὸς αὐτούς, μεταβιβάζοντες ὃ τι ἂν μὴ καλῶς φαίνωνται λέγειν ἡμῖν· πρὸς δὲ τὰς κατὰ φιλοσοφίαν ἐπιστήμας, ὅτι δυνάμενοι πρὸς ἀμφοτέρα διαπορῆσαι ῥᾶον ἐν ἐκάστοις κατοψόμεθα τάληθές τε καὶ τὸ ψεῦδος· ἔτι δὲ πρὸς τὰ πρῶτα τῶν περὶ ἐκάστην ἐπιστήμην. ἐκ μὲν γὰρ τῶν οἰκείων τῶν κατὰ τὴν προτεθεῖσαν ἐπιστήμην ἀρχῶν ἀδύνατον εἰπεῖν τι περὶ αὐτῶν, ἐπειδὴ πρῶται αἱ ἀρχαὶ πάντων [101b] εἰσὶ, διὰ δὲ τῶν περὶ ἕκαστα ἐνδόξων ἀνάγκη περὶ αὐτῶν διελθεῖν. τοῦτο δ' ἴδιον ἢ μάλιστα οἰκεῖον τῆς διαλεκτικῆς ἐστίν· ἐξεταστικὴ γὰρ οὕσα πρὸς τὰς ἀπασῶν τῶν μεθόδων ἀρχὰς ὁδὸν ἔχει.

Ἐξομεν δὲ τελέως τὴν μέθοδον ὅταν ὁμοίως ἔχωμεν ὥσπερ ἐπὶ ῥητορικῆς καὶ ἱατρικῆς καὶ τῶν τοιούτων δυνάμεων· τοῦτο δ' ἐστὶ τὸ ἐκ τῶν ἐνδεχομένων ποιεῖν ἅ προαιρούμεθα. οὔτε γὰρ ὁ ῥητορικὸς ἐκ παντὸς τρόπου πείσει οὔθ' ὁ ἱατρικὸς ὑγιάσει, ἀλλ' ἐὰν τῶν ἐνδεχομένων μηδὲν παραλίπη, ἱκανῶς αὐτὸν ἔχειν τὴν ἐπιστήμην φήσομεν.

Πρῶτον οὖν θεωρητέον ἐκ τίνων ἢ μέθοδος. εἰ δὴ λάβοιμεν πρὸς πόσα καὶ ποῖα καὶ ἐκ τίνων οἱ λόγοι, καὶ πῶς τούτων εὐπορήσομεν, ἔχοιμεν ἂν ἱκανῶς τὸ προκείμενον. ἔστι δ' ἀριθμῷ ἴσα

καὶ τὰ αὐτὰ ἐξ ὧν τε οἱ λόγοι καὶ περὶ ὧν οἱ συλλογισμοί. γίνονται μὲν γὰρ οἱ λόγοι ἐκ τῶν προτάσεων· περὶ ὧν δὲ οἱ συλλογισμοί, τὰ προβλήματα ἐστὶ. πᾶσα δὲ πρότασις καὶ πᾶν πρόβλημα ἢ ἴδιον ἢ γένος ἢ συμβεβηκὸς δηλοῖ· καὶ γὰρ τὴν διαφορὰν ὡς οὕσαν γενικὴν ὁμοῦ τῷ γένει τακτέον. ἐπεὶ δὲ τοῦ ἰδίου τὸ μὲν τὸ τί ἦν εἶναι σημαίνει, τὸ δ' οὐ σημαίνει, διηρήσθω τὸ ἴδιον εἰς ἄμφω τὰ προειρημένα μέρη, καὶ καλείσθω τὸ μὲν τὸ τί ἦν εἶναι σημαῖνον ὅρος, τὸ δὲ λοιπὸν κατὰ τὴν κοινὴν περὶ αὐτῶν ἀποδοθεῖσαν ὀνομασίαν προσαγορευέσθω ἴδιον. δῆλον οὖν ἐκ τῶν εἰρημένων ὅτι κατὰ τὴν νῦν διαίρεσιν τέτταρα τὰ πάντα συμβαίνει γίνεσθαι, ἢ ὅρον ἢ ἴδιον ἢ γένος ἢ συμβεβηκός. μηδεὶς δ' ἡμᾶς ὑπολάβῃ λέγειν ὡς ἕκαστον τούτων καθ' αὐτὸ λεγόμενον πρότασις ἢ πρόβλημά ἐστιν, ἀλλ' ὅτι ἀπὸ τούτων καὶ τὰ προβλήματα καὶ αἱ προτάσεις γίνονται. διαφέρει δὲ τὸ πρόβλημα καὶ ἡ πρότασις τῷ τρόπῳ. οὕτω μὲν γὰρ ῥηθέντος, “ἄρά γε τὸ ζῶον πεζὸν δίπουν ὁρισμός ἐστιν ἀνθρώπου;” καὶ “ἄρά γε τὸ ζῶον γένος τοῦ ἀνθρώπου;”, πρότασις γίνεται· ἐὰν δὲ “πότερον τὸ ζῶον πεζὸν δίπουν ὁρισμός ἐστιν ἀνθρώπου ἢ οὐ;”, πρόβλημα γίνεται· ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων. ὥστ' εἰκότως ἴσα τῷ ἀριθμῷ τὰ προβλήματα καὶ αἱ προτάσεις εἰσὶν· ἀπὸ πάσης γὰρ προτάσεως πρόβλημα ποιήσεις μεταβάλλων τῷ τρόπῳ.

Λεκτέον δὲ τί ὅρος, τί ἴδιον, τί γένος, τί συμβεβηκός. ἔστι δ' ὅρος μὲν λόγος ὁ τὸ τί ἦν εἶναι σημαίνων, ἀποδίδεται [102a] δὲ ἡ λόγος ἀντ' ὀνόματος ἢ λόγος ἀντὶ λόγου· δυνατόν γὰρ καὶ τῶν ὑπὸ λόγου τινὰ σημαινομένων ὀρίσασθαι. ὅσοι δ' ὁπωσοῦν ὀνόματι τὴν ἀπόδοσιν ποιοῦνται, δῆλον ὡς οὐκ ἀποδιδόασιν οὗτοι τὸν τοῦ πράγματος ὁρισμόν, ἐπειδὴ πᾶς ὁρισμὸς λόγος τίς ἐστιν. ὀρικὸν μέντοι καὶ τὸ τοιοῦτον θετέον, οἷον ὅτι <τὸ> καλόν ἐστι τὸ πρέπον. ὁμοίως δὲ καὶ τὸ πότερον ταῦτὸν αἴσθησις καὶ ἐπιστήμη ἢ ἕτερον· καὶ γὰρ περὶ τοὺς ὁρισμοὺς πότερον ταῦτὸν ἢ ἕτερον ἢ πλείστη γίνεται διατριβή. ἀπλῶς δὲ ὀρικά πάντα λεγέσθω τὰ ὑπὸ τὴν αὐτὴν ὄντα μέθοδον τοῖς ὀρισμοῖς. ὅτι δὲ πάντα τὰ νῦν ῥηθέντα τοιαῦτ' ἐστί, δῆλον ἐξ αὐτῶν. δυνάμενοι γὰρ ὅτι ταῦτὸν καὶ ὅτι ἕτερον διαλέγεσθαι, τῷ αὐτῷ τρόπῳ καὶ πρὸς τοὺς ὁρισμοὺς ἐπιχειρεῖν εὐπορήσομεν· δείξαντες γὰρ ὅτι οὐ ταῦτόν ἐστιν ἀνηρηκότες ἐσόμεθα τὸν ὁρισμόν. οὐ μὴν ἀντιστρέφει γε τὸ νῦν ῥηθέν· οὐ γὰρ ἱκανὸν πρὸς τὸ κατασκευάσαι τὸν ὁρισμόν τὸ δεῖξαι ταῦτὸν ὄν. πρὸς μέντοι τὸ ἀνασκευάσαι αὐταρκες τὸ δεῖξαι ὅτι οὐ ταῦτόν.

Ἰδιον δ' ἐστὶν ὃ μὴ δηλοῖ μὲν τὸ τί ἦν εἶναι, μόνῳ δ' ὑπάρχει καὶ ἀντικατηγορεῖται τοῦ πράγματος. οἷον ἴδιον ἀνθρώπου τὸ γραμματικῆς εἶναι δεκτικόν· εἰ γὰρ ἄνθρωπός ἐστι, γραμματικῆς δεκτικός ἐστι, καὶ εἰ γραμματικῆς δεκτικός ἐστίν, ἄνθρωπός ἐστιν. οὐθεις γὰρ ἴδιον λέγει τὸ ἐνδεχόμενον ἄλλῳ ὑπάρχειν, οἷον τὸ καθεύδειν ἀνθρώπῳ, οὐδ' ἂν τύχῃ κατὰ τινα χρόνον μόνῳ ὑπάρχον. εἰ δ' ἄρα τι καὶ λέγοιτο τῶν τοιούτων ἴδιον, οὐχ ἀπλῶς ἀλλὰ ποτὲ ἢ πρὸς τι ἴδιον ῥηθήσεται· τὸ μὲν γὰρ ἐκ δεξιῶν εἶναι ποτὲ ἰδίον ἐστι, τὸ δὲ δίπουν πρὸς τι ἴδιον τυγχάνει λεγόμενον, οἷον τῷ ἀνθρώπῳ πρὸς ἵππον καὶ κύνα. ὅτι δὲ τῶν ἐνδεχομένων ἄλλῳ ὑπάρχειν οὐθὲν ἀντικατηγορεῖται, δηλόν· οὐ γὰρ ἀναγκαῖον, εἴ τι καθεύδει, ἄνθρωπον εἶναι.

Γένος δ' ἐστὶ τὸ κατὰ πλειόνων καὶ διαφερόντων τῷ εἶδει ἐν τῷ τί ἐστὶ κατηγορούμενον. ἐν τῷ τί ἐστὶ δὲ κατηγορεῖσθαι τὰ τοιαῦτα λεγέσθω ὅσα ἀρμόττει ἀποδοῦναι ἐρωτηθέντα τί ἐστὶ τὸ προκείμενον· καθάπερ ἐπὶ τοῦ ἀνθρώπου ἀρμόττει, ἐρωτηθέντα τί ἐστίν, εἰπεῖν ὅτι ζῶν. γενικὸν δὲ καὶ τὸ πότερον ἐν τῷ αὐτῷ γένει ἄλλο ἄλλῳ ἢ ἐν ἐτέρῳ· καὶ γὰρ τὸ τοιοῦτον ὑπὸ τὴν αὐτὴν μέθοδον πίπτει τῷ γένει. διαλεχθέντες γὰρ ὅτι τὸ ζῶν γένος τοῦ ἀνθρώπου, ὁμοίως δὲ καὶ τοῦ βοός, διειλεγμένοι ἐσόμεθα ὅτι ἐν τῷ αὐτῷ [102b] γένει· ἐὰν δὲ τοῦ μὲν ἐτέρου δείξωμεν ὅτι γένος ἐστί, τοῦ δὲ ἐτέρου ὅτι οὐκ ἔστι, διειλεγμένοι ἐσόμεθα ὅτι οὐκ ἐν τῷ αὐτῷ γένει ταῦτ' ἐστίν.

Συμβεβηκὸς δὲ ἐστὶν ὃ μὴδὲν μὲν τούτων ἐστί, μήτε ὅρος μήτε ἴδιον μήτε γένος, ὑπάρχει δὲ τῷ πράγματι, καὶ ὃ ἐνδέχεται ὑπάρχειν ὁτῶσιν ἐνὶ καὶ τῷ αὐτῷ καὶ μὴ ὑπάρχειν· οἷον τὸ καθῆσθαι ἐνδέχεται ὑπάρχειν τινὶ τῷ αὐτῷ καὶ μὴ ὑπάρχειν· ὁμοίως δὲ καὶ τὸ λευκόν· τὸ γὰρ αὐτὸ οὐθὲν κωλύει ὅτε μὲν λευκὸν ὅτε δὲ μὴ λευκὸν εἶναι. ἔστι δὲ τῶν τοῦ συμβεβηκότος ὀρισμῶν ὁ δεῦτερος βελτίων· τοῦ μὲν γὰρ πρώτου ῥηθέντος ἀναγκαῖον, εἰ μέλλει τις συνήσειν, προειδέναι τί ἐστὶν ὅρος καὶ ἴδιον καὶ γένος· ὁ δὲ δεῦτερος αὐτοτελής ἐστὶ πρὸς τὸ γνωρίζειν τί ποτ' ἐστὶ τὸ λεγόμενον καθ' αὐτό. προσκείθωσαν δὲ τῷ συμβεβηκότι καὶ αἱ πρὸς ἄλληλα συγκρίσεις ὅπως οὖν ἀπὸ τοῦ συμβεβηκότος λεγόμεναι, οἷον πότερον τὸ καλὸν ἢ τὸ συμφέρον αἰρετώτερον, καὶ πότερον ὁ κατ' ἀρετὴν ἢ ὁ κατ' ἀπόλαυσιν ἡδίων βίος, καὶ εἴ τι ἄλλο παραπλησίως τυγχάνει τούτοις λεγόμενον· ἐπὶ πάντων γὰρ τῶν τοιούτων ποτέρῳ μᾶλλον τὸ

κατηγορούμενον συμβέβηκεν ἡ ζήτησις γίνεται. δῆλον δ' ἐξ αὐτῶν ὅτι τὸ συμβεβηκὸς οὐθὲν κωλύει ποτὲ καὶ πρὸς τι ἴδιον γίνεσθαι· οἷον τὸ καθῆσθαι, συμβεβηκὸς ὄν, ὅταν τις μόνος καθῆται, τότε ἴδιον ἔσται, μὴ μόνου δὲ καθημένου πρὸς τοὺς μὴ καθημένους ἴδιον. ὥστε καὶ πρὸς τι καὶ ποτὲ οὐθὲν κωλύει τὸ συμβεβηκὸς ἴδιον γίνεσθαι. ἀπλῶς δ' ἴδιον οὐκ ἔσται.

Μὴ λανθανέτω δ' ἡμᾶς ὅτι τὰ πρὸς τὸ ἴδιον καὶ τὸ γένος καὶ τὸ συμβεβηκὸς πάντα καὶ πρὸς τοὺς ὀρισμοὺς ἀρμόσει λέγεσθαι. δείξαντες γὰρ ὅτι οὐ μόνῳ ὑπάρχει τῷ ὑπὸ τὸν ὀρισμὸν, ὥσπερ καὶ ἐπὶ τοῦ ἰδίου, ἢ ὅτι οὐ γένος τὸ ἀποδοθὲν ἐν τῷ ὀρισμῷ, ἢ ὅτι οὐχ ὑπάρχει τι τῶν ἐν τῷ λόγῳ ῥηθέντων, ὅπερ καὶ ἐπὶ τοῦ συμβεβηκότητος ἂν ῥηθείη, ἀνηρηκότες ἐσόμεθα τὸν ὀρισμὸν· ὥστε κατὰ τὸν ἔμπροσθεν ἀποδοθέντα λόγον ἅπαντ' ἂν εἴη τρόπον τινὰ ὀρικὰ τὰ κατηριθμημένα. ἀλλ' οὐ διὰ τοῦτο μίαν ἐπὶ πάντων καθόλου μέθοδον ζητητέον· οὔτε γὰρ ῥάδιον εὑρεῖν τοῦτ' ἐστίν, εἴ θ' εὑρεθείη, παντελῶς ἀσαφὴς καὶ δύσχρηστος ἂν εἴη πρὸς τὴν προκειμένην πραγματείαν. ιδίας δὲ καθ' ἕκαστον τῶν διορισθέντων γενῶν ἀποδοθείσης μεθόδου ῥᾶον ἐκ τῶν περὶ ἕκαστον [103a] οἰκείων ἢ διέξοδος τοῦ προκειμένου γίνοιτ' ἂν. ὥστε τύπῳ μὲν, καθάπερ εἴρηται πρότερον, διαιρετέον, τῶν δὲ λοιπῶν τὰ μάλισθ' ἐκάστοις οἰκεῖα προσαπτέον, ὀρικά τε καὶ γενικὰ προσαγορεύοντας αὐτά. σχεδὸν δὲ προσῆπται τὰ ῥηθέντα πρὸς ἐκάστοις.

Πρῶτον δὲ πάντων περὶ ταῦτοιο διοριστέον ποσαχῶς λέγεται. δόξειε δ' ἂν τὸ ταῦτόν ὡς τύπῳ λαβεῖν τριχῇ διαιρεῖσθαι. ἢ γὰρ ἀριθμῷ ἢ εἴδει ἢ γένει τὸ ταῦτόν εἰώθαμεν προσαγορεύειν· ἀριθμῷ μὲν ὧν ὀνόματα πλείω τὸ δὲ πρᾶγμα ἓν, οἷον λῶπιον καὶ ἱμάτιον· εἴδει δὲ ὅσα πλείω ὄντα ἀδιάφορα κατὰ τὸ εἶδος ἐστί, καθάπερ ἄνθρωπος ἀνθρώπῳ καὶ ἵππος ἵππῳ· τὰ γὰρ τοιαῦτα τῷ εἴδει λέγεται ταῦτά ὅσα ὑπὸ ταῦτό εἶδος ἐστίν· ὁμοίως δὲ καὶ γένει ταῦτά ὅσα ὑπὸ ταῦτό γένος ἐστίν, οἷον ἵππος ἀνθρώπῳ. δόξειε δ' ἂν τὸ ἀπὸ τῆς αὐτῆς κρήνης ὕδωρ ταῦτόν λεγόμενον ἔχειν τινὰ διαφορὰν παρὰ τοὺς εἰρημένους τρόπους. οὐ μὴν ἀλλὰ καὶ τὸ τοιοῦτόν γε ἐν τῷ αὐτῷ τετάχθω τοῖς καθ' ἓν εἶδος ὁπωσοῦν λεγομένοις· ἅπαντα γὰρ τὰ τοιαῦτα συγγενῇ καὶ παραπλήσια ἀλλήλοις ἔοικεν εἶναι. πᾶν μὲν γὰρ ὕδωρ παντὶ ταῦτόν τῷ εἴδει λέγεται διὰ τὸ ἔχειν τινὰ ὁμοιότητα· τὸ δ' ἀπὸ τῆς αὐτῆς κρήνης ὕδωρ οὐδενὶ ἄλλῳ διαφέρει ἀλλ' ἢ τῷ σφοδροτέραν εἶναι τὴν ὁμοιότητα, διὸ οὐ χωρίζομεν αὐτὸ τῶν καθ'

ἐν εἶδος ὅπως οὖν λεγομένων. μάλιστα δ' ὁμολογουμένως τὸ ἐν ἀριθμῷ ταῦτόν παρὰ πᾶσι δοκεῖ λέγεσθαι. εἶωθε δὲ καὶ τοῦτο ἀποδίδοσθαι πλεοναχῶς· κυριώτατα μὲν καὶ πρώτως ὅταν ὀνόματι ἢ ὄρφ τὸ ταῦτόν ἀποδοθῇ, καθάπερ ἱμάτιον λωπὶφ καὶ ζῶον πεζὸν δίπουν ἀνθρώπῳ· δεύτερον δ' ὅταν τῷ ἰδίῳ, καθάπερ τὸ ἐπιστήμης δεκτικὸν ἀνθρώπῳ καὶ τὸ τῇ φύσει ἄνω φερόμενον πυρί· τρίτον δ' ὅταν ἀπὸ τοῦ συμβεβηκότος, οἷον τὸ καθήμενον ἢ τὸ μουσικὸν Σωκράτει· πάντα γὰρ ταῦτα τὸ ἐν ἀριθμῷ βούλεται σημαίνειν. ὅτι δ' ἀληθὲς τὸ νῦν ῥηθέν ἐστίν, ἐκ τῶν μεταβαλλόντων τὰς προσηγορίας μάλιστ' ἂν τις καταμάθοι· πολλάκις γάρ, ἐπιτάσσοντες ὀνόματι καλέσαι τινὰ τῶν καθημένων, μεταβάλλομεν ὅταν τύχη μὴ συνιείς ᾧ τὴν πρόσταξιν ποιούμεθα, ὥς ἀπὸ τοῦ συμβεβηκότος αὐτοῦ μᾶλλον συνήσοντος, καὶ κελεύομεν τὸν καθήμενον ἢ διαλεγόμενον καλέσαι πρὸς ἡμᾶς, δῆλον ὥς ταῦτόν ὑπολαμβάνοντες κατὰ τε τοῦνομα καὶ κατὰ τὸ συμβεβηκὸς σημαίνειν.

[103b] Τὸ μὲν οὖν ταῦτόν, καθάπερ εἴρηται, τριχῇ διηρήσθω. ὅτι δ' ἐκ τῶν πρότερον εἰρημένων οἱ λόγοι καὶ διὰ τούτων καὶ πρὸς ταῦτα, μία μὲν πίστις ἢ διὰ τῆς ἐπαγωγῆς· εἰ γάρ τις ἐπισκοποίῃ ἐκάστην τῶν προτάσεων καὶ τῶν προβλημάτων, φαίνοيت' ἂν ἢ ἀπὸ τοῦ ὅρου ἢ ἀπὸ τοῦ ἰδίου ἢ ἀπὸ τοῦ γένους ἢ ἀπὸ τοῦ συμβεβηκότος γεγενημένη. ἄλλη δὲ πίστις ἢ διὰ συλλογισμοῦ. ἀνάγκη γὰρ πᾶν τι περὶ τινος κατηγορούμενον ἤτοι ἀντικατηγορεῖσθαι τοῦ πράγματος ἢ μὴ. καὶ εἰ μὲν ἀντικατηγορεῖται, ὅρος ἢ ἴδιον ἂν εἴῃ (εἰ μὲν γὰρ σημαίνει τὸ τί ἦν εἶναι, ὅρος, εἰ δὲ μὴ σημαίνει, ἴδιον· τοῦτο γὰρ ἦν ἴδιον, τὸ ἀντικατηγορούμενον μὲν μὴ σημαῖνον δὲ τὸ τί ἦν εἶναι). εἰ δὲ μὴ ἀντικατηγορεῖται τοῦ πράγματος, ἤτοι τῶν ἐν τῷ ὀρισμῷ τοῦ ὑποκειμένου λεγομένων ἐστίν ἢ οὐ. καὶ εἰ μὲν τῶν ἐν τῷ ὀρισμῷ λεγομένων, γένος ἢ διαφορὰ ἂν εἴῃ, ἐπειδὴ ὁ ὀρισμὸς ἐκ γένους καὶ διαφορῶν ἐστίν· εἰ δὲ μὴ τῶν ἐν τῷ ὀρισμῷ λεγομένων ἐστί, δῆλον ὅτι συμβεβηκὸς ἂν εἴῃ· τὸ γὰρ συμβεβηκὸς ἐλέγετο ὃ μήτε ὅρος μήτε ἴδιον μήτε γένος ἐστίν, ὑπάρχει δὲ τῷ πράγματι.

Μετὰ τοῖνυν ταῦτα δεῖ διορίσασθαι τὰ γένη τῶν κατηγοριῶν, ἐν οἷς ὑπάρχουσιν αἱ ῥηθεῖσαι τέτταρες. ἔστι δὲ ταῦτα τὸν ἀριθμὸν δέκα, τί ἐστι, ποσόν, ποιόν, πρὸς τι, ποῦ, ποτέ, κεῖσθαι, ἔχειν, ποιεῖν, πάσχειν. αἰ γὰρ τὸ συμβεβηκὸς καὶ τὸ γένος καὶ τὸ ἴδιον καὶ ὁ ὀρισμὸς ἐν μιᾷ τούτων τῶν κατηγοριῶν ἔσται· πᾶσαι γὰρ αἱ διὰ τούτων προτάσεις ἢ τί ἐστίν ἢ ποσόν ἢ ποιόν ἢ τῶν ἄλλων τινὰ

κατηγοριῶν σημαίνουσιν. δῆλον δ' ἐξ αὐτῶν ὅτι ὁ τὸ τί ἐστι σημαίνων ὅτε μὲν οὐσίαν σημαίνει, ὅτε δὲ ποσόν, ὅτε δὲ ποιόν, ὅτε δὲ τῶν ἄλλων τινὰ κατηγοριῶν. ὅταν μὲν γὰρ ἐκκειμένου ἀνθρώπου φῇ τὸ ἐκκείμενον ἄνθρωπον εἶναι ἢ ζῶν, τί ἐστι λέγει καὶ οὐσίαν σημαίνει· ὅταν δὲ χρώματος λευκοῦ ἐκκειμένου φῇ τὸ ἐκκείμενον λευκὸν εἶναι ἢ χρῶμα, τί ἐστι λέγει καὶ ποιόν σημαίνει. ὁμοίως δὲ καὶ ἐὰν πηχυαίου μεγέθους ἐκκειμένου φῇ τὸ ἐκκείμενον πηχυαῖον εἶναι μέγεθος, τί ἐστι λέγει καὶ ποσόν σημαίνει. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων· ἕκαστον γὰρ τῶν τοιούτων, ἐὰν τε αὐτὸ περὶ αὐτοῦ λέγεται ἐὰν τε τὸ γένος περὶ τούτου, τί ἐστι σημαίνει· ὅταν δὲ περὶ ἑτέρου, οὐ τί ἐστι σημαίνει ἀλλὰ ποσόν ἢ ποιόν ἢ τινα τῶν ἄλλων κατηγοριῶν. ὥστε περὶ ὧν μὲν οἱ λόγοι καὶ ἐξ ὧν, [104a] ταῦτα καὶ τοσαῦτά ἐστι· πῶς δὲ ληψόμεθα καὶ δι' ὧν εὐπορήσομεν, μετὰ ταῦτα λεκτέον.

Πρῶτον τοίνυν διωρίσθω τί ἐστι πρότασις διαλεκτική καὶ τί πρόβλημα διαλεκτικόν. οὐ γὰρ πᾶσαν πρότασιν οὐδὲ πᾶν πρόβλημα διαλεκτικὸν θετέον· οὐδεὶς γὰρ ἂν προτείνειε νοῦν ἔχων τὸ μηδενὶ δοκοῦν οὐδὲ προβάλῃ τὸ πᾶσι φανερόν ἢ τοῖς πλείστοις· τὰ μὲν γὰρ οὐκ ἔχει ἀπορίαν, τὰ δ' οὐδεὶς ἂν θείῃ. ἔστι δὲ πρότασις διαλεκτική ἐρώτησις ἐνδοξος ἢ πᾶσιν ἢ τοῖς πλείστοις ἢ τοῖς σοφοῖς, καὶ τούτοις ἢ πᾶσιν ἢ τοῖς πλείστοις ἢ τοῖς μάλιστα γνωρίμοις, μὴ παράδοξος· θείῃ γὰρ ἂν τις τὸ δοκοῦν τοῖς σοφοῖς, ἐὰν μὴ ἐναντίον ταῖς τῶν πολλῶν δόξαις ᾗ. εἰσὶ δὲ προτάσεις διαλεκτικαὶ καὶ τὰ τοῖς ἐνδόξοις ὅμοια, καὶ τὰναντία τοῖς δοκοῦσιν ἐνδόξοις εἶναι, κατ' ἀντίφασιν προτεινόμενα, καὶ ὅσαι δόξαι κατὰ τέχνας εἰσὶ τὰς εὐρημένας. εἰ γὰρ ἐνδοξον τὸ τὴν αὐτὴν εἶναι τῶν ἐναντίων ἐπιστήμην, καὶ τὸ αἰσθησιν τὴν αὐτὴν εἶναι τῶν ἐναντίων ἐνδοξον ἂν φανείη· καὶ εἰ μίαν ἀριθμῶ γραμματικὴν εἶναι, καὶ αὐλητικὴν μίαν, εἰ δὲ πλείους γραμματικάς, καὶ αὐλητικάς πλείους· πάντα γὰρ ὅμοια καὶ συγγενῇ ταῦτ' ἔοικεν εἶναι. ὁμοίως δὲ καὶ τὰ τοῖς ἐνδόξοις ἐναντία, κατ' ἀντίφασιν προτεινόμενα, ἐνδοξὰ φανεῖται· εἰ γὰρ ἐνδοξον ὅτι δεῖ τοὺς φίλους εὖ ποιεῖν, καὶ ὅτι οὐ δεῖ κακῶς ποιεῖν ἐνδοξον. ἔστι δ' ἐναντίον μὲν ὅτι δεῖ κακῶς ποιεῖν τοὺς φίλους, κατ' ἀντίφασιν δὲ ὅτι οὐ δεῖ κακῶς ποιεῖν. ὁμοίως δὲ καὶ εἰ δεῖ τοὺς φίλους εὖ ποιεῖν, τοὺς ἐχθροὺς οὐ δεῖ. ἔστι δὲ καὶ τοῦτο κατ' ἀντίφασιν τῶν ἐναντίων· τὸ γὰρ ἐναντίον ἐστὶν ὅτι δεῖ τοὺς ἐχθροὺς εὖ ποιεῖν. ὡσαύτως δὲ καὶ ἐπὶ τῶν ἄλλων. ἐνδοξον δὲ ἐν παραβολῇ φανεῖται καὶ τὸ ἐναντίον περὶ τοῦ ἐναντίου·

οἷον εἰ τοὺς φίλους δεῖ εὖ ποιεῖν, καὶ τοὺς ἐχθροὺς δεῖ κακῶς. φανείη δ' ἂν καὶ ἐναντίον τὸ τοὺς φίλους εὖ ποιεῖν τῷ τοὺς ἐχθροὺς κακῶς· πότερον δὲ καὶ κατ' ἀλήθειαν οὕτως ἔχει ἢ οὐ, ἐν τοῖς ὑπὲρ τῶν ἐναντίων λεγομένοις ῥηθήσεται. δῆλον δ' ὅτι καὶ ὅσαι δόξαι κατὰ τέχνας εἰσὶ, διαλεκτικαὶ προτάσεις εἰσὶ· θεῖη γὰρ ἂν τις τὰ δοκοῦντα τοῖς ὑπὲρ τούτων ἐπεσκεμμένοις, οἷον περὶ μὲν τῶν ἐν ἱατρικῇ ὡς ὁ ἱατρός, περὶ δὲ τῶν ἐν γεωμετρίᾳ ὡς ὁ γεωμετρικός· ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων.

[104b] Πρόβλημα δ' ἐστὶ διαλεκτικὸν θεώρημα τὸ συντεῖνον ἢ πρὸς αἴρεσιν καὶ φυγὴν ἢ πρὸς ἀλήθειαν καὶ γνῶσιν, ἢ αὐτὸ ἢ ὡς συνεργὸν πρὸς τι ἕτερον τῶν τοιούτων, περὶ οὗ ἢ οὐδετέρως δοξάζουσιν ἢ ἐναντίως [οἱ πολλοὶ τοῖς σοφοῖς ἢ] οἱ σοφοὶ τοῖς πολλοῖς ἢ ἑκάτεροι αὐτοὶ ἑαυτοῖς. ἔνια μὲν γὰρ τῶν προβλημάτων χρήσιμον εἰδέναι πρὸς τὸ ἐλέσθαι ἢ φυγεῖν, οἷον πότερον ἡ ἡδονὴ αἰρετὸν ἢ οὐ· ἔνια δὲ πρὸς τὸ εἰδέναι μόνον, οἷον πότερον ὁ κόσμος αἰδῖος ἢ οὐ. ἔνια δὲ αὐτὰ μὲν καθ' αὐτὰ πρὸς οὐδέτερον τούτων, συνεργὰ δὲ ἐστὶ πρὸς τινα τῶν τοιούτων· πολλὰ γὰρ αὐτὰ μὲν καθ' αὐτὰ οὐ βουλόμεθα γνωρίζειν, ἐτέρων δ' ἔνεκα, ὅπως διὰ τούτων ἄλλο τι γνωρίσωμεν. ἔστι δὲ προβλήματα καὶ ὧν ἐναντίοι εἰσὶ συλλογισμοὶ (ἀπορίαν γὰρ ἔχει πότερον οὕτως ἔχει ἢ οὐχ οὕτως, διὰ τὸ περὶ ἀμφοτέρων εἶναι λόγους πιθανούς), καὶ περὶ ὧν λόγον μὴ ἔχομεν, ὄντων μεγάλων, χαλεπὸν οἰόμενοι εἶναι τὸ διὰ τί ἀποδοῦναι, οἷον πότερον ὁ κόσμος αἰδῖος ἢ οὐ· καὶ γὰρ τὰ τοιαῦτα ζητήσκειν ἂν τις.

Τὰ μὲν οὖν προβλήματα καὶ αἱ προτάσεις καθάπερ εἴρηται διωρίσθω. θέσις δὲ ἐστὶν ὑπόληψις παράδοξος τῶν γνωρίμων τινὸς κατὰ φιλοσοφίαν, οἷον ὅτι οὐκ ἔστιν ἀντιλέγειν, καθάπερ ἔφη Ἀντισθένης, ἢ ὅτι πάντα κινεῖται, καθ' Ἡράκλειτον, ἢ ὅτι ἐν τὸ ὄν, καθάπερ Μέλισσός φησιν (τὸ γὰρ τοῦ τυχόντος ἐναντία ταῖς δόξαις ἀποφηναμένου φροντίζειν εὐηθες)· ἢ περὶ ὧν λόγον ἔχομεν ἐναντίον ταῖς δόξαις, οἷον ὅτι οὐ πᾶν τὸ ὄν ἤτοι γενόμενόν ἐστιν ἢ αἰδῖον, καθάπερ οἱ σοφισταὶ φασιν· μουσικὸν γὰρ ὄντα γραμματικὸν εἶναι οὔτε γενόμενον οὔτε αἰδῖον ὄντα· τοῦτο γάρ, εἰ καὶ τινι μὴ δοκεῖ, δόξειεν ἂν διὰ τὸ λόγον ἔχειν.

Ἔστι μὲν οὖν καὶ ἡ θέσις πρόβλημα· οὐ πᾶν δὲ πρόβλημα θέσις, ἐπειδὴ ἔνια τῶν προβλημάτων τοιαῦτ' ἐστὶ περὶ ὧν οὐδετέρως δοξάζομεν. ὅτι δὲ ἐστὶ καὶ ἡ θέσις πρόβλημα, δῆλον· ἀνάγκη γὰρ ἐκ

τῶν εἰρημένων ἢ τοὺς πολλοὺς τοῖς σοφοῖς περὶ τὴν θέσιν ἀμφισβητεῖν ἢ ὅποτερουσὸν ἑαυτοῖς, ἐπειδὴ ὑπόληψις τις παράδοξος ἢ θέσις ἐστίν. σχεδὸν δὲ νῦν πάντα τὰ διαλεκτικὰ προβλήματα θέσεις καλοῦνται. διαφερέτω δὲ μηδὲν ὅπως οὖν λεγόμενον· οὐ γὰρ ὀνοματοποιῆσαι βουλόμενοι διείλομεν οὕτως αὐτά, ἀλλ' ἵνα [105a] μὴ λανθάνωσιν ἡμᾶς τίνες αὐτῶν τυγχάνουσιν οὕσαι διαφοραί.

Οὐ δεῖ δὲ πᾶν πρόβλημα οὐδὲ πᾶσαν θέσιν ἐπισκοπεῖν, ἀλλ' ἢν ἀπορήσειεν ἄν τις τῶν λόγου δεομένων καὶ μὴ κολάσεως ἢ αἰσθήσεως· οἱ μὲν γὰρ ἀποροῦντες “πότερον δεῖ τοὺς θεοὺς τιμᾶν καὶ τοὺς γονεῖς ἀγαπᾶν ἢ οὐ” κολάσεως δέονται, οἱ δὲ “πότερον ἢ χιῶν λευκὴ ἢ οὐ” αἰσθήσεως. οὐδὲ δὴ ὧν σύνεγγυς ἢ ἀπόδειξις, οὐδ' ὧν λίαν πόρρω· τὰ μὲν γὰρ οὐκ ἔχει ἀπορίαν, τὰ δὲ πλείω ἢ κατὰ γυμναστικήν.

Διωρισμένων δὲ τούτων χρὴ διελέσθαι πόσα τῶν λόγων εἶδη τῶν διαλεκτικῶν. ἔστι δὲ τὸ μὲν ἐπαγωγή, τὸ δὲ συλλογισμός. καὶ συλλογισμὸς μὲν τί ἐστιν, εἴρηται πρότερον. ἐπαγωγή δὲ ἢ ἀπὸ τῶν καθ' ἕκαστα ἐπὶ τὸ καθόλου ἔφοδος· οἷον εἰ ἔστι κυβερνήτης ὁ ἐπιστάμενος κράτιστος, καὶ ἡνίοχος, καὶ ὅλως ἐστὶν ὁ ἐπιστάμενος περὶ ἕκαστον ἄριστος. ἔστι δ' ἢ μὲν ἐπαγωγή πιθανώτερον καὶ σαφέστερον καὶ κατὰ τὴν αἴσθησιν γνωριμώτερον καὶ τοῖς πολλοῖς κοινόν, ὁ δὲ συλλογισμὸς βιαστικώτερον καὶ πρὸς τοὺς ἀντιλογικοὺς ἐνεργέστερον.

Τὰ μὲν οὖν γένη περὶ ὧν τε οἱ λόγοι καὶ ἐξ ὧν καθάπερ ἔμπροσθεν εἴρηται διωρίσθω. τὰ δ' ὄργανα δι' ὧν εὐπορήσομεν τῶν συλλογισμῶν ἐστὶ τέτταρα, ἐν μὲν τὸ προτάσεις λαβεῖν, δεύτερον δὲ τὸ ποσαχῶς ἕκαστον λέγεται δύνασθαι διελεῖν, τρίτον <δὲ> τὸ τὰς διαφορὰς εὐρεῖν, τέταρτον δὲ ἢ τοῦ ὁμοίου σκέψις. ἔστι δὲ τρόπον τινὰ καὶ τὰ τρία τούτων προτάσεις· ἔστι γὰρ καθ' ἕκαστον αὐτῶν ποιῆσαι πρότασιν, οἷον ὅτι αἰρετόν ἐστι τὸ καλὸν ἢ τὸ ἡδὺ ἢ τὸ συμφέρον, καὶ ὅτι διαφέρει αἴσθησις ἐπιστήμης τῷ τὴν μὲν ἀποβαλόντα δυνατόν εἶναι πάλιν λαβεῖν, τὴν δ' ἀδύνατον, καὶ ὅτι ὁμοίως ἔχει τὸ ὑγιεινὸν πρὸς ὑγίειαν καὶ τὸ εὐεκτικὸν πρὸς εὐεξίαν. ἔστι δ' ἢ μὲν πρώτη πρότασις ἀπὸ τοῦ πολλαχῶς λεγομένου, ἢ δὲ δευτέρα ἀπὸ τῶν διαφορῶν, ἢ δὲ τρίτη ἀπὸ τῶν ὁμοίων.

Τὰς μὲν οὖν προτάσεις ἐκλεκτέον ὅσαχῶς διωρίσθῃ περὶ προτάσεως, ἢ τὰς πάντων δόξας προχειριζόμενον ἢ τὰς τῶν πλείστων

ἢ τὰς τῶν σοφῶν, καὶ τούτων ἢ πάντων ἢ τῶν πλείστων ἢ τῶν γνωριμωτάτων, ἢ τὰς «μὴ» ἐναντίας ταῖς [105b] φαινομέναις, καὶ ὅσαι δόξαι κατὰ τέχνας εἰσὶν. δεῖ δὲ προτείνειν καὶ τὰς ἐναντίας ταῖς φαινομέναις ἐνδόξοις κατ' ἀντίφασιν, καθάπερ εἴρηται πρότερον. χρήσιμον δὲ καὶ τὸ ποιεῖν αὐτὰς ἐν τῷ ἐκλέγειν μὴ μόνον τὰς οὐσας ἐνδόξους ἀλλὰ καὶ τὰς ὁμοίας ταύταις, οἷον ὅτι τῶν ἐναντίων ἢ αὐτῇ αἴσθησις (καὶ γὰρ ἡ ἐπιστήμη), καὶ ὅτι ὁρῶμεν εἰσδεχόμενοι τι, οὐκ ἐκπέμποντες· καὶ γὰρ ἐπὶ τῶν ἄλλων αἰσθήσεων οὕτως· ἀκούομέν τε γὰρ εἰσδεχόμενοι τι, οὐκ ἐκπέμποντες, καὶ γευόμεθα ὡσαύτως· ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων. ἔτι ὅσα ἐπὶ πάντων ἢ τῶν πλείστων φαίνεται, ληπτέον ὡς ἀρχὴν καὶ δοκοῦσαν θέσιν· τιθέασι γὰρ οἱ μὴ συννοῶντες ἐπὶ τίνος οὐχ οὕτως. ἐκλέγειν δὲ χρὴ καὶ ἐκ τῶν γεγραμμένων λόγων, τὰς δὲ διαγραφὰς ποιεῖσθαι περὶ ἐκάστου γένους ὑποτιθέντας χωρὶς, οἷον περὶ ἀγαθοῦ ἢ περὶ ζῴου, καὶ περὶ ἀγαθοῦ παντός, ἀρξάμενον ἀπὸ τοῦ τί ἐστίν. παρασημαίνεσθαι δὲ καὶ τὰς ἐκάστων δόξας, οἷον ὅτι Ἐμπεδοκλῆς τέτταρα ἔφησε τῶν σωμάτων στοιχεῖα εἶναι· θεῖη γὰρ ἂν τις τὸ ὑπὸ τινος εἰρημένον ἐνδόξου.

Ἔστι δ' ὡς τύπῳ περιλαβεῖν τῶν προτάσεων καὶ τῶν προβλημάτων μέρη τρία· αἱ μὲν γὰρ ἠθικαὶ προτάσεις εἰσὶν, αἱ δὲ φυσικαί, αἱ δὲ λογικαί. ἠθικαὶ μὲν οὖν αἱ τοιαῦται, οἷον πότερον δεῖ τοῖς γονεῦσι μᾶλλον ἢ τοῖς νόμοις πειθαρχεῖν, ἐὰν διαφωνῶσιν· λογικαὶ δὲ οἷον πότερον τῶν ἐναντίων ἢ αὐτῇ ἐπιστήμῃ ἢ οὐ· φυσικαὶ δὲ οἷον πότερον ὁ κόσμος αἰδίδιος ἢ οὐ. ὁμοίως δὲ καὶ τὰ προβλήματα. ποῖαι δ' ἕκασται τῶν προειρημένων, ὁρισμῷ μὲν οὐκ εὐπετέες ἀποδοῦναι περὶ αὐτῶν· τῇ δὲ διὰ τῆς ἐπαγωγῆς συνηθείᾳ πειρατέον γνωρίζειν ἐκάστην αὐτῶν, κατὰ τὰ προειρημένα παραδείγματα ἐπισκοποῦντα.

Πρὸς μὲν οὖν φιλοσοφίαν κατ' ἀλήθειαν περὶ αὐτῶν πραγματευτέον, διαλεκτικῶς δὲ πρὸς δόξαν. ληπτέον δ' ὅτι μάλιστα καθόλου πάσας τὰς προτάσεις, καὶ τὴν μίαν πολλὰς ποιητέον, οἷον ὅτι τῶν ἀντικειμένων ἢ αὐτῇ ἐπιστήμῃ, εἴθ' ὅτι τῶν ἐναντίων καὶ ὅτι τῶν πρὸς τι. τὸν αὐτὸν δὲ τρόπον καὶ ταύτας πάλιν διαιρετέον, ἕως ἂν ἐνδέχεται διαιρεῖν, οἷον ὅτι ἀγαθοῦ καὶ κακοῦ, καὶ λευκοῦ καὶ μέλανος, καὶ ψυχροῦ καὶ θερμοῦ. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων.

[106a] Περὶ μὲν οὖν προτάσεως ἱκανὰ τὰ προειρημένα. τὸ δὲ ποσαχῶς, πραγματευτέον μὴ μόνον ὅσα λέγεται καθ' ἕτερον τρόπον,

ἀλλὰ καὶ τοὺς λόγους αὐτῶν πειρατέον ἀποδιδόναι, οἷον μὴ μόνον ὅτι ἀγαθὸν καθ' ἕτερον μὲν τρόπον λέγεται δικαιοσύνη καὶ ἀνδρεία, εὐεκτικὸν δὲ καὶ ὑγιεινὸν καθ' ἕτερον, ἀλλ' ὅτι καὶ τὰ μὲν τῷ αὐτῷ ποιῶντι εἶναι, τὰ δὲ τῷ ποιητικῷ τινος καὶ οὐ τῷ αὐτῷ ποιῶντι εἶναι. ὡσαύτως δὲ καὶ ἐπὶ τῶν ἄλλων.

Πότερον δὲ πολλαχῶς ἢ μοναχῶς τῷ εἶδει λέγεται, διὰ τῶνδε θεωρητέον. πρῶτον μὲν ἐπὶ τοῦ ἐναντίου σκοπεῖν εἰ πολλαχῶς λέγεται, ἐάν τε τῷ εἶδει ἐάν τε τῷ ὀνόματι διαφωνῇ. ἔνια γὰρ εὐθὺς καὶ τοῖς ὀνόμασιν ἑτέρα ἐστίν· οἷον τῷ ὀξεῖ ἐν φωνῇ μὲν ἐναντίον τὸ βαρὺ, ἐν ὄγκῳ δὲ τὸ ἀμβλύ. δηλὸν οὖν ὅτι τὸ ἐναντίον τῷ ὀξεῖ πολλαχῶς λέγεται. εἰ δὲ τοῦτο, καὶ τὸ ὀξύ· καθ' ἑκάτερον γὰρ ἐκείνων ἕτερον ἔσται τὸ ἐναντίον. οὐ γὰρ τὸ αὐτὸ ὀξύ τῷ ἀμβλεῖ καὶ τῷ βαρεῖ ἔσται ἐναντίον· ἐκατέρῳ δὲ τὸ ὀξύ ἐναντίον. πάλιν τῷ βαρεῖ ἐν φωνῇ μὲν τὸ ὀξύ ἐναντίον, ἐν ὄγκῳ δὲ τὸ κοῦφον· ὥστε πολλαχῶς τὸ βαρὺ λέγεται, ἐπειδὴ καὶ τὸ ἐναντίον. ὁμοίως δὲ καὶ τῷ καλῷ τῷ μὲν ἐπὶ τοῦ ζώου τὸ αἰσχρόν, τῷ δ' ἐπὶ τῆς οἰκίας τὸ μοχθηρόν, ὥστε ὁμώνυμον τὸ καλόν.

Ἐπ' ἐνίων δὲ τοῖς μὲν ὀνόμασιν οὐδαμῶς διαφωνεῖ, τῷ δ' εἶδει κατάδηλος ἐν αὐτοῖς εὐθέως ἢ διαφορά ἐστίν, οἷον ἐπὶ τοῦ λευκοῦ καὶ μέλανος. φωνὴ γὰρ λευκὴ καὶ μέλαινα λέγεται, ὁμοίως δὲ καὶ χρῶμα. τοῖς μὲν οὖν ὀνόμασιν οὐδὲν διαφωνεῖ· τῷ δ' εἶδει κατάδηλος ἐν αὐτοῖς εὐθέως ἢ διαφορά· οὐ γὰρ ὁμοίως τό τε χρῶμα λευκὸν λέγεται καὶ ἡ φωνή. δηλὸν δὲ τοῦτο καὶ διὰ τῆς αἰσθήσεως· τῶν γὰρ αὐτῶν τῷ εἶδει ἢ αὐτῇ αἰσθησις· τὸ δὲ λευκὸν τὸ ἐπὶ τῆς φωνῆς καὶ τοῦ χρώματος οὐ τῇ αὐτῇ αἰσθήσει κρίνομεν, ἀλλὰ τὸ μὲν ὄψει τὸ δ' ἀκοῇ. ὁμοίως δὲ καὶ τὸ ὀξύ καὶ τὸ ἀμβλύ ἐν χυμοῖς καὶ ἐν ὄγκοις, ἀλλὰ τὸ μὲν ἀφῇ, τὸ δὲ γεύσει. οὐδὲ γὰρ ταῦτα διαφωνεῖ τοῖς ὀνόμασιν, οὔτ' ἐπ' αὐτῶν οὔτ' ἐπὶ τῶν ἐναντίων· ἀμβλύ γὰρ καὶ τὸ ἐναντίον ἐκατέρῳ.

Ἐτι εἰ τῷ μὲν ἔστι τι ἐναντίον τῷ δ' ἀπλῶς μηδέν· οἷον τῇ μὲν ἀπὸ τοῦ πίνειν ἡδονῇ ἢ ἀπὸ τοῦ διψῆν λύπη ἐναντίον, τῇ δ' ἀπὸ τοῦ θεωρεῖν ὅτι ἡ διάμετρος τῇ πλευρᾷ [106b] ἀσύμμετρος οὐδέν, ὥστε πλεοναχῶς ἢ ἡδονὴ λέγεται. καὶ τῷ μὲν κατὰ τὴν διάνοιαν φιλεῖν τὸ μισεῖν ἐναντίον, τῷ δὲ κατὰ τὴν σωματικὴν ἐνέργειαν οὐδέν· δηλὸν οὖν ὅτι τὸ φιλεῖν ὁμώνυμον. ἔτι ἐπὶ τῶν ἀνὰ μέσον, εἰ τῶν μὲν ἔστι τι ἀνὰ μέσον τῶν δὲ μηδέν, ἢ εἰ ἀμφοῖν μὲν ἔστι <τι>, μὴ ταὐτὸν δέ· οἷον λευκοῦ καὶ μέλανος ἐν χρώμασι μὲν τὸ φαιόν, ἐν φωνῇ δ'

οὐδέν, ἢ εἰ ἄρα, τὸ σομφόν, καθάπερ τινές φασι σομφὴν φωνὴν ἀνὰ μέσον εἶναι· ὥσθ' ὁμώνυμον τὸ λευκόν, ὁμοίως δὲ καὶ τὸ μέλαν. ἔτι εἰ τῶν μὲν πλείω τὰ ἀνὰ μέσον, τῶν δὲ ἓν, καθάπερ ἐπὶ τοῦ λευκοῦ καὶ μέλανος· ἐπὶ μὲν γὰρ τῶν χρωμάτων πολλὰ τὰ ἀνὰ μέσον, ἐπὶ δὲ τῆς φωνῆς ἓν, τὸ σομφόν.

Πάλιν ἐπὶ τοῦ κατ' ἀντίφασιν ἀντικειμένου σκοπεῖν εἰ πλεοναχῶς λέγεται· εἰ γὰρ τοῦτο πλεοναχῶς λέγεται, καὶ τὸ τούτῳ ἀντικείμενον πλεοναχῶς ῥηθήσεται. οἷον τὸ μὴ βλέπειν πλεοναχῶς λέγεται, ἐν μὲν τὸ μὴ ἔχειν ὄψιν, ἐν δὲ τὸ μὴ ἐνεργεῖν τῇ ὄψει· εἰ δὲ τοῦτο πλεοναχῶς, ἀναγκαῖον καὶ τὸ βλέπειν πλεοναχῶς λέγεσθαι· ἐκατέρῳ γὰρ τῷ μὴ βλέπειν ἀντικεῖσεται τι, οἷον τῷ μὲν μὴ ἔχειν ὄψιν τὸ ἔχειν, τῷ δὲ μὴ ἐνεργεῖν τῇ ὄψει τὸ ἐνεργεῖν.

Ἔτι ἐπὶ τῶν κατὰ στέρησιν καὶ ἔξιν λεγομένων ἐπισκοπεῖν· εἰ γὰρ θάτερον πλεοναχῶς λέγεται, καὶ τὸ λοιπόν. οἷον εἰ τὸ αἰσθάνεσθαι πλεοναχῶς λέγεται, κατὰ τε τὴν ψυχὴν καὶ τὸ σῶμα, καὶ τὸ ἀναίσθητον εἶναι πλεοναχῶς ῥηθήσεται, κατὰ τε τὴν ψυχὴν καὶ τὸ σῶμα. ὅτι δὲ κατὰ στέρησιν καὶ ἔξιν ἀντίκειται τὰ νῦν λεγόμενα, δῆλον, ἐπειδὴ πέφυκεν ἐκατέραν τῶν αἰσθήσεων ἔχειν τὰ ζῶα, καὶ κατὰ τὴν ψυχὴν καὶ κατὰ τὸ σῶμα.

Ἔτι δ' ἐπὶ τῶν πτώσεων ἐπισκεπτέον. εἰ γὰρ τὸ δικαίως πλεοναχῶς λέγεται, καὶ τὸ δίκαιον πλεοναχῶς ῥηθήσεται· καθ' ἐκάτερον γὰρ τῶν δικαίως ἔστι δίκαιον· οἷον εἰ τὸ δικαίως λέγεται τό τε κατὰ τὴν ἑαυτοῦ γνώμην κρῖναι καὶ τὸ ὡς δεῖ, ὁμοίως καὶ τὸ δίκαιον. ὡσαύτως δὲ καὶ εἰ τὸ ὑγιεινὸν πλεοναχῶς, καὶ τὸ ὑγιεινῶς πλεοναχῶς ῥηθήσεται· οἷον εἰ ὑγιεινὸν τὸ μὲν ὑγιείας ποιητικὸν τὸ δὲ φυλακτικὸν τὸ δὲ σημαντικόν, καὶ τὸ ὑγιεινῶς ἢ ποιητικῶς ἢ φυλακτικῶς ἢ σημαντικῶς ῥηθήσεται. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων, ὅταν αὐτὸ πλεοναχῶς λέγηται, καὶ [107a] ἢ πτῶσις ἢ ἀπ' αὐτοῦ πλεοναχῶς ῥηθήσεται, καὶ εἰ ἢ πτῶσις, καὶ αὐτό.

Σκοπεῖν δὲ καὶ τὰ γένη τῶν κατὰ τοῦνομα κατηγοριῶν, εἰ ταῦτά ἐστιν ἐπὶ πάντων· εἰ γὰρ μὴ ταῦτά, δῆλον ὅτι ὁμώνυμον τὸ λεγόμενον. οἷον τὸ ἀγαθὸν ἐν ἐδέσματι μὲν τὸ ποιητικὸν ἡδονῆς, ἐν ἱατρικῇ δὲ τὸ ποιητικὸν ὑγιείας, ἐπὶ δὲ ψυχῆς τὸ ποιᾶν εἶναι, οἷον σῶφρονα ἢ ἀνδρείαν ἢ δικαίαν· ὁμοίως δὲ καὶ ἐπὶ ἀνθρώπου. ἐνιαχοῦ δὲ τὸ ποτέ, οἷον τὸ ἐν τῷ καιρῷ ἀγαθόν· ἀγαθὸν γὰρ λέγεται τὸ ἐν τῷ καιρῷ. πολλάκις δὲ τὸ ποσόν, οἷον ἐπὶ τοῦ μετρίου· λέγεται γὰρ καὶ τὸ μέτριον ἀγαθόν. ὥστε ὁμώνυμον τὸ ἀγαθόν. ὡσαύτως δὲ

καὶ τὸ λευκὸν ἐπὶ σώματος μὲν χρῶμα, ἐπὶ δὲ φωνῆς τὸ εὐήκοον. παραπλησίως δὲ καὶ τὸ ὀξύ· οὐ γὰρ ὡσαύτως ἐπὶ πάντων τὸ αὐτὸ λέγεται· φωνὴ μὲν γὰρ ὀξεῖα ἢ ταχεῖα, καθάπερ φασὶν οἱ κατὰ τοὺς ἀριθμοὺς ἀρμονικοί, γωνία δ' ὀξεῖα ἢ ἐλάσσων ὀρθῆς, μάχαιρα δὲ ἢ ὀξυγώνιος.

Σκοπεῖν δὲ καὶ τὰ γένη τῶν ὑπὸ τὸ αὐτὸ ὄνομα, εἰ ἕτερα καὶ μὴ ὑπ' ἄλληλα. οἷον ὄνος τό τε ζῶον καὶ τὸ σκεῦος· ἕτερος γὰρ ὁ κατὰ τοῦνομα λόγος αὐτῶν· τὸ μὲν γὰρ ζῶον ποιόν τι ῥηθήσεται, τὸ δὲ σκεῦος ποιόν τι. ἐὰν δὲ ὑπ' ἄλληλα τὰ γένη ᾗ, οὐκ ἀναγκαῖον ἑτέρους τοὺς λόγους εἶναι. οἷον τοῦ κόρακος τὸ ζῶον καὶ τὸ ὄρνειον γένος ἐστίν· ὅταν οὖν λέγωμεν τὸν κόρακα ὄρνειον εἶναι, καὶ ζῶον ποιόν τί φαμεν αὐτὸν εἶναι, ὥστ' ἀμφοτέρω τὰ γένη περὶ αὐτοῦ κατηγορεῖται. ὁμοίως δὲ καὶ ὅταν ζῶον πτηνὸν δίπουν τὸν κόρακα λέγωμεν, ὄρνειον φαμεν αὐτὸν εἶναι· καὶ οὕτως οὖν ἀμφοτέρω τὰ γένη κατηγορεῖται κατὰ τοῦ κόρακος, καὶ ὁ λόγος αὐτῶν. ἐπὶ δὲ τῶν μὴ ὑπ' ἄλληλα γενῶν οὐ συμβαίνει τοῦτο· οὔτε γὰρ ὅταν σκεῦος λέγωμεν, ζῶον λέγομεν, οὔθ' ὅταν ζῶον, σκεῦος.

Σκοπεῖν δὲ μὴ μόνον ἐπὶ τοῦ προκειμένου εἰ ἕτερα τὰ γένη καὶ μὴ ὑπ' ἄλληλα, ἀλλὰ καὶ ἐπὶ τοῦ ἐναντίου· εἰ γὰρ τὸ ἐναντίον πολλαχῶς λέγεται, δηλὸν ὅτι καὶ τὸ προκειμένον.

Χρήσιμον δὲ καὶ τὸ ἐπὶ τὸν ὀρισμὸν ἐπιβλέπειν τὸν τοῦ συντιθεμένου γιγνόμενον, οἷον λευκοῦ σώματος καὶ λευκῆς φωνῆς· ἀφαιρουμένου γὰρ τοῦ ἰδίου τὸν αὐτὸν λόγον δεῖ λείπεσθαι. τοῦτο δ' οὐ συμβαίνει ἐπὶ τῶν ὁμωνύμων, οἷον [107b] ἐπὶ τῶν νῦν εἰρημένων· τὸ μὲν γὰρ ἔσται σῶμα τοιόνδε χρῶμα ἔχον, τὸ δὲ φωνὴ εὐήκοος. ἀφαιρεθέντος οὖν τοῦ σώματος καὶ τῆς φωνῆς οὐ ταῦτ' ἐν ἑκατέρῳ τὸ λειπόμενον· ἔδει δὲ γε, εἴπερ συνώνυμον ᾗν τὸ λευκὸν τὸ ἐφ' ἑκατέρου λεγόμενον.

Πολλάκις δὲ καὶ ἐν αὐτοῖς τοῖς λόγοις λανθάνει παρακολουθοῦν τὸ ὁμώνυμον· διὸ καὶ ἐπὶ τῶν λόγων σκεπτέον. οἷον ἐάν τις τὸ σημαντικὸν καὶ τὸ ποιητικὸν ὑγείας τὸ συμμέτρως ἔχον πρὸς ὑγίαν φῆ εἶναι, οὐκ ἀποστατέον ἀλλ' ἐπισκεπτέον τί τὸ συμμέτρως καθ' ἑκατέρου εἴρηκεν, οἷον εἰ τὸ μὲν τὸ τοιοῦτον εἶναι ὥστε ποιεῖν ὑγίαν, τὸ δὲ τὸ τοιοῦτον οἷον σημαίνειν ποία τις ἢ ἕξις.

Ἔτι εἰ μὴ συμβλητὰ κατὰ τὸ μᾶλλον ἢ ὁμοίως, οἷον λευκὴ φωνὴ καὶ λευκὸν ἱμάτιον, καὶ ὀξύς χυμὸς καὶ ὀξεῖα φωνή· ταῦτα γὰρ οὔθ' ὁμοίως λέγεται λευκὰ ἢ ὀξέα, οὔτε μᾶλλον θάτερον. ὥσθ'

ὁμώνυμον τὸ λευκὸν καὶ τὸ ὀξύ. τὸ γὰρ συνώνυμον πᾶν συμβλητόν· ἢ γὰρ ὁμοίως ῥηθήσεται ἢ μᾶλλον θάτερον.

Ἐπεὶ δὲ τῶν ἐτέρων γενῶν καὶ μὴ ὑπ' ἄλληλα ἕτεραι τῷ εἶδει καὶ αἱ διαφοραί, οἷον ζώου καὶ ἐπιστήμης (ἕτεραι γὰρ τούτων αἱ διαφοραί), σκοπεῖν εἰ τὰ ὑπὸ τὸ αὐτὸ ὄνομα ἐτέρων γενῶν καὶ μὴ ὑπ' ἄλληλα διαφοραὶ εἰσιν, οἷον τὸ ὀξύ φωνῆς καὶ ὄγκου· διαφέρει γὰρ φωνὴ φωνῆς τῷ ὀξεῖα εἶναι, ὁμοίως δὲ καὶ ὄγκος ὄγκου. ὥστε ὁμώνυμον τὸ ὀξύ· ἐτέρων γὰρ γενῶν καὶ οὐχ ὑπ' ἄλληλα διαφοραὶ εἰσιν.

Πάλιν εἰ αὐτῶν τῶν ὑπὸ τὸ αὐτὸ ὄνομα ἕτεραι αἱ διαφοραί, οἷον χρώματος τοῦ τε ἐπὶ τῶν σωμάτων καὶ τοῦ ἐν τοῖς μέλεσιν· τοῦ μὲν γὰρ ἐπὶ τῶν σωμάτων διακριτικὸν καὶ συγκριτικὸν ὄψεως, τοῦ δ' ἐπὶ τῶν μελῶν οὐχ αἱ αὐταὶ διαφοραί. ὥστε ὁμώνυμον τὸ χρῶμα· τῶν γὰρ αὐτῶν αἱ αὐταὶ διαφοραί.

Ἔτι ἐπεὶ τὸ εἶδος οὐδενός ἐστι διαφορά, σκοπεῖν τῶν ὑπὸ τὸ αὐτὸ ὄνομα εἰ τὸ μὲν εἶδος ἐστὶ τὸ δὲ διαφορά· οἷον τὸ λευκὸν τὸ μὲν ἐπὶ τοῦ σώματος εἶδος χρώματος, τὸ δ' ἐπὶ τῆς φωνῆς διαφορά· διαφέρει γὰρ φωνὴ φωνῆς τῷ λευκῇ εἶναι.

Περὶ μὲν οὖν τοῦ πολλαχῶς διὰ τούτων καὶ τῶν τοιούτων σκεπτέον. τὰς δὲ διαφορὰς ἐν αὐτοῖς τε τοῖς γένεσι [108a] πρὸς ἄλληλα θεωρητέον, οἷον τίνι διαφέρει δικαιοσύνη ἀνδρείας καὶ φρόνησις σωφροσύνης (ταῦτα γὰρ ἅπαντα ἐκ τοῦ αὐτοῦ γένους ἐστίν), καὶ ἐξ ἄλλου πρὸς ἄλλο τῶν μὴ πολὺ λίαν διεσθηκόντων, οἷον τίνι αἴσθησις ἐπιστήμης· ἐπὶ μὲν γὰρ τῶν πολὺ διεσθηκόντων κατὰδηλοι παντελῶς αἱ διαφοραί.

Τὴν δὲ ὁμοιότητα σκεπτέον ἐπὶ τε τῶν ἐν ἐτέροις γένεσιν, ὡς ἕτερον πρὸς ἕτερόν τι, οὕτως ἄλλο πρὸς ἄλλο (οἷον ὡς ἐπιστήμη πρὸς ἐπιστητόν, οὕτως αἴσθησις πρὸς αἰσθητόν), καὶ ὡς ἕτερον ἐν ἐτέρῳ τινί, οὕτως ἄλλο ἐν ἄλλῳ (οἷον ὡς ὄψις ἐν ὀφθαλμῷ, νοῦς ἐν ψυχῇ, καὶ ὡς γαλήνη ἐν θαλάσσῃ, νηνεμία ἐν ἀέρι). μάλιστα δ' ἐν τοῖς πολὺ διεσθῶσι γυμνάζεσθαι δεῖ· ῥῆον γὰρ ἐπὶ τῶν λοιπῶν δυνησόμεθα τὰ ὅμοια συνορᾶν. σκεπτέον δὲ καὶ τὰ ἐν τῷ αὐτῷ γένει ὄντα, εἴ τι ἅπασιν ὑπάρχει ταυτόν, οἷον ἀνθρώπῳ καὶ ἵππῳ καὶ κυνί· ἢ γὰρ ὑπάρχει τι αὐτοῖς ταυτόν, ταύτη ὁμοιά ἐστίν.

Χρήσιμον δὲ τὸ μὲν ποσαχῶς λέγεται ἐπεσκέφθαι πρὸς τε τὸ σαφές (μᾶλλον γὰρ ἂν τις εἰδείῃ τί τίησιν, ἐμφανισθέντος ποσαχῶς λέγεται) καὶ πρὸς τὸ γίνεσθαι κατ' αὐτὸ τὸ πρᾶγμα καὶ μὴ πρὸς τὸ

ὄνομα τοὺς συλλογισμούς· ἀδήλου γὰρ ὄντος ποσαχῶς λέγεται, ἐνδέχεται μὴ ἐπὶ ταὐτὸν τὸν τε ἀποκρινόμενον καὶ τὸν ἐρωτῶντα φέρειν τὴν διάνοιαν· ἐμφανισθέντος δὲ ποσαχῶς λέγεται καὶ ἐπὶ τί φέρων τίθησι, γελοῖος ἂν φαίνοιτο ὁ ἐρωτῶν, εἰ μὴ πρὸς τοῦτο τὸν λόγον ποιοῖτο. χρήσιμον δὲ καὶ πρὸς τὸ μὴ παραλογισθῆναι καὶ πρὸς τὸ παραλογίσασθαι. εἰδότες γὰρ ποσαχῶς λέγεται οὐ μὴ παραλογισθῶμεν, ἀλλ' εἰδήσομεν ἂν μὴ πρὸς τὸ αὐτὸ τὸν λόγον ποιῇται ὁ ἐρωτῶν· αὐτοὶ τε ἐρωτῶντες δυνησόμεθα παραλογίσασθαι, ἂν μὴ τυγχάνῃ εἰδῶς ὁ ἀποκρινόμενος ποσαχῶς λέγεται. τοῦτο δ' οὐκ ἐπὶ πάντων δυνατόν, ἀλλ' ὅταν ἡ τῶν πολλαχῶς λεγομένων τὰ μὲν ἀληθῇ τὰ δὲ ψευδῇ. ἔστι δὲ οὐκ οἰκείος ὁ τρόπος οὗτος τῆς διαλεκτικῆς· διὸ παντελῶς εὐλαβητέον τοῖς διαλεκτικοῖς τὸ τοιοῦτον, τὸ πρὸς τοῦνομα διαλέγεσθαι, ἂν μή τις ἄλλως ἐξαδυνατῇ περὶ τοῦ προκειμένου διαλέγεσθαι.

Τὸ δὲ τὰς διαφορὰς εὐρεῖν χρήσιμον πρὸς τε τοὺς συλλογισμούς τοὺς περὶ ταῦτο καὶ ἐτέρου καὶ πρὸς τὸ γνωρίζειν τί ἕκαστόν ἐστιν. ὅτι μὲν οὖν πρὸς τοὺς συλλογισμούς τοὺς περὶ ταῦτο καὶ ἐτέρου χρήσιμον, δῆλον (εὐρόντες γὰρ διαφορὰν τῶν προκειμένων ὅποια οὖν δεδειχότες ἐσόμεθα ὅτι οὐ ταυτόν)· πρὸς δὲ τὸ γνωρίζειν τί ἐστὶ, διότι τὸν ἴδιον τῆς οὐσίας ἑκάστου λόγον ταῖς περὶ ἕκαστον οἰκείαις διαφοραῖς χωρίζειν εἰώθαμεν.

Ἡ δὲ τοῦ ὁμοίου θεωρία χρήσιμος πρὸς τε τοὺς ἐπακτικούς λόγους καὶ πρὸς τοὺς ἐξ ὑποθέσεως συλλογισμούς καὶ πρὸς τὴν ἀπόδοσιν τῶν ὀρισμῶν. πρὸς μὲν οὖν τοὺς ἐπακτικούς λόγους, διότι τῇ καθ' ἕκαστα ἐπὶ τῶν ὁμοίων ἐπαγωγῇ τὸ καθόλου ἀξιοῦμεν ἐπάγειν· οὐ γὰρ ῥαδιόν ἐστιν ἐπάγειν μὴ εἰδότας τὰ ὅμοια. πρὸς δὲ τοὺς ἐξ ὑποθέσεως συλλογισμούς, διότι ἔνδοξόν ἐστιν, ὥς ποτε ἐφ' ἑνὸς τῶν ὁμοίων ἔχει, οὕτως καὶ ἐπὶ τῶν λοιπῶν. ὥστε πρὸς ὃ τι ἂν αὐτῶν εὐπορῶμεν διαλέγεσθαι, προδιομολογησόμεθα, ὥς ποτε ἐπὶ τούτων ἔχει, οὕτω καὶ ἐπὶ τοῦ προκειμένου ἔχειν, δείξαντες δὲ ἐκεῖνο καὶ τὸ προκείμενον ἐξ ὑποθέσεως δεδειχότες ἐσόμεθα· ὑποθέμενοι γάρ, ὥς ποτε ἐπὶ τούτων ἔχει, οὕτω καὶ ἐπὶ τοῦ προκειμένου ἔχειν, τὴν ἀπόδειξιν πεποιήμεθα. πρὸς δὲ τὴν τῶν ὀρισμῶν ἀπόδοσιν, διότι δυνάμενοι συννοῶν τί ἐν ἑκάστῳ ταυτόν οὐκ ἀπορήσομεν εἰς τί δεῖ γένος ὀριζομένους τὸ προκείμενον τιθέναι· τῶν γὰρ κοινῶν τὸ μάλιστα ἐν τῷ τί ἐστὶ κατηγορούμενον γένος ἂν εἴῃ. ὁμοίως δὲ καὶ ἐν τοῖς πολὺ διεστῶσι χρήσιμος πρὸς τοὺς ὀρισμούς ἢ τοῦ ὁμοίου

θεωρία, οἷον ὅτι ταὐτὸν γαλήνη μὲν ἐν θαλάσσῃ, νηνεμία δ' ἐν ἀέρι (ἐκάτερον γὰρ ἡσυχία), καὶ στιγμή ἐν γραμμῇ καὶ μονὰς ἐν ἀριθμῷ (ἐκάτερον γὰρ ἀρχή). ὥστε τὸ κοινὸν ἐπὶ πάντων γένος ἀποδιδόντες δόξομεν οὐκ ἄλλοτρίως ὀρίζεσθαι. σχεδὸν δὲ καὶ οἱ ὀριζόμενοι οὕτως εἰώθασιν ἀποδιδόναι· τὴν τε γὰρ μονάδα ἀρχὴν ἀριθμοῦ φασιν εἶναι καὶ τὴν στιγμήν ἀρχὴν γραμμῆς. δῆλον οὖν ὅτι εἰς τὸ κοινὸν ἀμφοτέρων γένος τιθέασιν.

Τὰ μὲν οὖν ὄργανα δι' ὧν οἱ συλλογισμοὶ ταῦτ' ἐστίν· οἱ δὲ τόποι πρὸς οὓς χρήσιμα τὰ λεχθέντα οἶδε εἰσίν.

B

Ἔστι δὲ τῶν προβλημάτων τὰ μὲν καθόλου τὰ δ' ἐπὶ μέρους. καθόλου μὲν οὖν οἶον ὅτι πᾶσα ἡδονὴ ἀγαθὸν καὶ ὅτι οὐδεμία ἡδονὴ ἀγαθόν· ἐπὶ μέρους δὲ οἶον ὅτι ἔστι τις ἡδονὴ [109a] ἀγαθὸν καὶ ὅτι ἔστι τις ἡδονὴ οὐκ ἀγαθόν. ἔστι δὲ πρὸς ἀμφοτέρω τὰ γένη τῶν προβλημάτων κοινὰ τὰ καθόλου κατασκευαστικὰ καὶ ἀνασκευαστικά· δείξαντες γὰρ ὅτι παντὶ ὑπάρχει, καὶ ὅτι τινὶ ὑπάρχει δεδειχότες ἐσόμεθα· ὁμοίως δὲ κἂν ὅτι οὐδενὶ ὑπάρχει δείξωμεν, καὶ ὅτι οὐ παντὶ ὑπάρχει δεδειχότες ἐσόμεθα. πρῶτον οὖν περὶ τῶν καθόλου ἀνασκευαστικῶν ῥητέον διὰ τε τὸ κοινὰ εἶναι τὰ τοιαῦτα πρὸς τὰ καθόλου καὶ τὰ ἐπὶ μέρους, καὶ διὰ τὸ μᾶλλον τὰς θέσεις κομίζειν ἐν τῷ ὑπάρχειν ἢ μὴ, τοὺς δὲ διαλεγόμενους ἀνασκευάζειν. ἔστι δὲ χαλεπώτατον τὸ ἀντιστρέφειν τὴν ἀπὸ τοῦ συμβεβηκότος οἰκείαν ὀνομασίαν· τὸ γὰρ πῇ καὶ μὴ καθόλου ἐπὶ μόνων ἐνδέχεται τῶν συμβεβηκότων. ἀπὸ μὲν γὰρ τοῦ ὅρου καὶ τοῦ ἰδίου καὶ τοῦ γένους ἀναγκαῖον ἀντιστρέφειν. οἶον εἰ ὑπάρχει τινὶ ζῶν πεζῷ δίποδι εἶναι, ἀντιστρέψαντι ἀληθὲς ἔσται λέγειν ὅτι ζῶν πεζὸν δίπουν ἔστιν. ὁμοίως δὲ καὶ ἀπὸ τοῦ γένους· εἰ γὰρ ζῶν ὑπάρχει τινὶ εἶναι, ζῶν ἔστιν. τὰ δ' αὐτὰ καὶ ἐπὶ τοῦ ἰδίου· εἰ γὰρ ὑπάρχει τινὶ γραμματικῆς δεκτικῷ εἶναι, γραμματικῆς δεκτικὸν ἔσται. οὐδὲν γὰρ τούτων ἐνδέχεται κατὰ τι ὑπάρχειν ἢ μὴ ὑπάρχειν, ἀλλ' ἀπλῶς ὑπάρχειν ἢ μὴ ὑπάρχειν. ἐπὶ δὲ τῶν συμβεβηκότων οὐδὲν κωλύει κατὰ τι ὑπάρχειν, οἶον λευκότητα ἢ δικαιοσύνην, ὥστε οὐκ ἀπόχρη τὸ δεῖξαι ὅτι ὑπάρχει λευκότης ἢ δικαιοσύνη πρὸς τὸ δεῖξαι ὅτι λευκὸς ἢ δίκαιός ἐστιν· ἔχει γὰρ ἀμφισβήτησιν ὅτι κατὰ τι λευκὸς ἢ δίκαιός ἐστιν. ὥστ' οὐκ ἀναγκαῖον ἐπὶ τῶν συμβεβηκότων τὸ ἀντιστρέφειν.

Διορίσασθαι δὲ δεῖ καὶ τὰς ἁμαρτίας τὰς ἐν τοῖς προβλήμασιν, ὅτι εἰσὶ διτταί, ἢ τῷ ψεῦδεσθαι ἢ τῷ παραβαίνειν τὴν κειμένην λέξιν· οἱ τε γὰρ ψευδόμενοι καὶ τὸ μὴ ὑπάρχον ὑπάρχειν τινὶ λέγοντες ἁμαρτάνουσι, καὶ οἱ, τοῖς ἀλλοτρίοις ὀνόμασι τὰ πράγματα προσαγορεύοντες, οἶον τὴν πλάτανον ἄνθρωπον, παραβαίνουσι τὴν κειμένην ὀνομασίαν.

Εἷς μὲν δὴ τόπος τὸ ἐπιβλέπειν εἰ τὸ κατ' ἄλλον τινὰ τρόπον ὑπάρχον ὡς συμβεβηκὸς ἀποδέδωκεν. ἁμαρτάνεται δὲ μάλιστα τοῦτο

περὶ τὰ γένη, οἷον εἴ τις τῷ λευκῷ φαίῃ συμβεβηκέναι χρώματι εἶναι· οὐ γὰρ συμβέβηκε τῷ λευκῷ χρώματι εἶναι, ἀλλὰ γένος αὐτοῦ τὸ χρῶμά ἐστιν. ἐνδέχεται μὲν οὖν καὶ κατὰ τὴν ὀνομασίαν διορίσαι τὸν τιθέμενον, [109b] οἷον ὅτι συμβέβηκε τῇ δικαιοσύνῃ ἀρετῇ εἶναι· πολλάκις δὲ καὶ μὴ διορίσαντος κατάδηλον ὅτι τὸ γένος ὡς συμβεβηκὸς ἀποδέδωκεν, οἷον εἴ τις τὴν λευκότητα κεχρῶσθαι φήσειεν ἢ τὴν βάδισιν κινεῖσθαι. ἀπ’ οὐδενὸς γὰρ γένους παρωνύμως ἡ κατηγορία κατὰ τοῦ εἶδους λέγεται, ἀλλὰ πάντα συνωνύμως τὰ γένη τῶν εἰδῶν κατηγορεῖται· καὶ γὰρ τοῦνομα καὶ τὸν λόγον ἐπιδέχεται τὸν τῶν γενῶν τὰ εἶδη. ὁ οὖν κεχρωσμένον εἶπας τὸ λευκὸν οὔτε ὡς γένος ἀποδέδωκεν, ἐπειδὴ παρωνύμως εἴρηκεν, οὔθ’ ὡς ἴδιον ἢ ὡς ὀρισμὸν· ὁ γὰρ ὀρισμὸς καὶ τὸ ἴδιον οὐδενὶ ἄλλῳ ὑπάρχει, κέχρωσται δὲ πολλὰ καὶ τῶν ἄλλων, οἷον ξύλον λίθος ἄνθρωπος ἵππος. δῆλον οὖν ὅτι ὡς συμβεβηκὸς ἀποδέδωκεν.

Ἄλλος τὸ ἐπιβλέπειν οἷς ὑπάρχειν ἢ πᾶσιν ἢ μηδενὶ εἴρηται. σκοπεῖν δὲ κατ’ εἶδη καὶ μὴ ἐν τοῖς ἀπείροις· ὁδῷ γὰρ μᾶλλον καὶ ἐν ἐλάττωσιν ἢ σκέψις. δεῖ δὲ σκοπεῖν καὶ ἄρχεσθαι ἀπὸ τῶν πρώτων, εἴτ’ ἐφεξῆς ἕως τῶν ἀτόμων. οἷον εἰ τῶν ἀντικειμένων τὴν αὐτὴν ἐπιστήμην ἔφησεν εἶναι, σκεπτέον εἰ τῶν πρὸς τι καὶ τῶν ἐναντίων καὶ τῶν κατὰ στέρησιν καὶ ἔξιν καὶ τῶν κατ’ ἀντίφασιν λεγομένων ἢ αὐτῇ ἐπιστήμῃ. καὶ ἐπὶ τούτων μήπω φανερόν ἤ, πάλιν ταῦτα διαιρετέον μέχρι τῶν ἀτόμων· οἷον εἰ τῶν δικαίων καὶ ἀδίκων, ἢ τοῦ διπλασίου καὶ ἡμίσεος, ἢ τυφλότητος καὶ ὄψεως, ἢ τοῦ εἶναι καὶ μὴ εἶναι. ἐὰν γὰρ ἐπὶ τινὸς δειχθῇ ὅτι οὐχ ἡ αὐτὴ, ἀνηρηκότεες ἐσόμεθα τὸ πρόβλημα· ὁμοίως δὲ καὶ ἐὰν μηδενὶ ὑπάρχη. οὗτος δ’ ὁ τόπος ἀντιστρέφει πρὸς τὸ κατασκευάζειν καὶ ἀνασκευάζειν. ἐὰν γὰρ ἐπὶ πάντων φαίνηται διαίρεσιν προενέγκασιν ἢ ἐπὶ πολλῶν, ἀξιοτέον καὶ καθόλου τιθέναι ἢ ἔνστασιν φέρειν ἐπὶ τίνος οὐχ οὕτως· ἐὰν γὰρ μηδέτερον τούτων ποιῇ, ἄτοπος φανεῖται μὴ τιθεῖς.

Ἄλλος τὸ λόγους ποιεῖν τοῦ τε συμβεβηκόντος καὶ ὃ συμβέβηκεν, ἢ ἀμφοτέρων καθ’ ἑκάτερον ἢ τοῦ ἐτέρου, εἴτα σκοπεῖν εἴ τι μὴ ἀληθὲς ἐν τοῖς λόγοις ὡς ἀληθὲς εἴληπται. οἷον εἰ ἔστι θεὸν ἀδικεῖν, τί τὸ ἀδικεῖν; εἰ γὰρ τὸ βλάπτειν ἐκουσίως, δῆλον ὡς οὐκ ἔστι θεὸν ἀδικεῖσθαι· οὐ γὰρ ἐνδέχεται βλάπτεσθαι τὸν θεόν. καὶ εἰ φθονερὸς ὁ σπουδαῖος, τίς ὁ φθονερὸς καὶ τί ὁ φθόνος; εἰ γὰρ ὁ φθόνος ἐστὶ λύπη ἐπὶ φαινομένη εὐπραγία τῶν ἐπιεικῶν τινος, δῆλον ὅτι ὁ σπουδαῖος οὐ φθονερὸς· φαῦλος γὰρ ἂν εἴη. καὶ εἰ ὁ

νεμεσητικὸς φθονερός, τίς ἐκάτερος αὐτῶν; οὕτω γὰρ καταφανὲς [110a] ἔσται πότερον ἀληθὲς ἢ ψεῦδος τὸ ρηθέν· οἷον εἰ φθονερός μὲν ὁ λυπούμενος ἐπὶ ταῖς τῶν ἀγαθῶν εὐπραγίαις, νεμεσητικὸς δ' ὁ λυπούμενος ἐπὶ ταῖς τῶν κακῶν εὐπραγίαις, δηλὸν ὅτι οὐκ ἂν εἴη φθονερός ὁ νεμεσητικὸς. λαμβάνειν δὲ καὶ ἀντὶ τῶν ἐν τοῖς λόγοις ὀνομάτων λόγους, καὶ μὴ προαφίστασθαι ἕως ἂν εἷς τι γνώριμον ἔλθῃ· πολλάκις γὰρ ὅλου μὲν τοῦ λόγου ἀποδοθέντος οὕτω δηλὸν τὸ ζητούμενον, ἀντὶ δὲ τινος τῶν ἐν τῷ λόγῳ ὀνομάτων λόγου ρηθέντος κατάδηλον γίνεται.

Ἔτι τὸ πρόβλημα πρότασιν ἑαυτῷ ποιούμενον ἐνίστασθαι· ἡ γὰρ ἔνστασις ἔσται ἐπιχείρημα πρὸς τὴν θέσιν. ἔστι δ' ὁ τόπος οὗτος σχεδὸν ὁ αὐτὸς τῷ ἐπιβλέπειν οἷς ὑπάρχειν ἢ πᾶσιν ἢ μηδενὶ εἴρηται· διαφέρει δὲ τῷ τρόπῳ.

Ἔτι διορίζεσθαι ποῖα δεῖ καλεῖν ὥς οἱ πολλοὶ καὶ ποῖα οὐ· χρήσιμον γὰρ καὶ πρὸς τὸ κατασκευάζειν καὶ πρὸς τὸ ἀνασκευάζειν· οἷον ὅτι ταῖς μὲν ὀνομασίαις τὰ πράγματα προσαγορευτέον καθάπερ οἱ πολλοί, ποῖα δὲ τῶν πραγμάτων ἐστὶ τοιαῦτα ἢ οὐ τοιαῦτα, οὐκέτι προσεκτέον τοῖς πολλοῖς. οἷον ὑγιεινὸν μὲν ρητέον τὸ ποιητικὸν ὑγιείας, ὥς οἱ πολλοὶ λέγουσιν· πότερον δὲ τὸ προκείμενον ποιητικὸν ὑγιείας ἢ οὐ, οὐκέτι ὥς οἱ πολλοὶ κλητέον ἀλλ' ὥς ὁ ἱατρός.

Ἔτι ἐὰν πολλαχῶς λέγηται, κείμενον δὲ ἢ ὥς ὑπάρχει ἢ ὥς οὐχ ὑπάρχει, θάτερον δεικνύει τῶν πλεοναχῶς λεγομένων, ἐὰν μὴ ἄμφω ἐνδέχεται. χρηστέον δ' ἐπὶ τῶν λανθανόντων· ἐὰν γὰρ μὴ λανθάνῃ πολλαχῶς λεγόμενον, ἐνστήσεται ὅτι οὐ διείλεκται ὅπερ αὐτὸς ἠπόρει ἀλλὰ θάτερον. οὗτος δ' ὁ τόπος ἀντιστρέφει καὶ πρὸς τὸ κατασκευάσαι καὶ πρὸς τὸ ἀνασκευάσαι. κατασκευάζειν μὲν γὰρ βουλόμενοι δείξομεν ὅτι θάτερον ὑπάρχει, ἐὰν μὴ ἄμφω δυνώμεθα· ἀνασκευάζοντες δὲ ὅτι οὐχ ὑπάρχει θάτερον δείξομεν, ἐὰν μὴ ἄμφω δυνώμεθα. πλὴν ἀνασκευάζοντι μὲν οὐδὲν δεῖ ἐξ ὁμολογίας διαλέγεσθαι, οὗτ' εἰ παντὶ οὗτ' εἰ μηδενὶ ὑπάρχειν εἴρηται· ἐὰν γὰρ δείξωμεν ὅτι οὐχ ὑπάρχει ὁτῶν, ἀνηρηκότες ἐσόμεθα τὸ παντὶ ὑπάρχειν· ὁμοίως δὲ καὶ ἐνὶ δείξωμεν ὑπάρχον, ἀναιρήσομεν τὸ μηδενὶ ὑπάρχειν. κατασκευάζουσι δὲ προδιομολογητέον ὅτι, εἰ ὁτῶν ὑπάρχει, παντὶ ὑπάρχει, ἂν πιθανὸν ἦ τὸ ἀξίωμα. οὐ γὰρ [110b] ἀπόχρη πρὸς τὸ δείξαι ὅτι παντὶ ὑπάρχει τὸ ἐφ' ἐνὸς διαλεχθῆναι, οἷον εἰ ἡ τοῦ ἀνθρώπου ψυχὴ ἀθάνατος, ὅτι ψυχὴ πᾶσα

ἀθάνατος· ὥστε προομολογητέον ὅτι, εἰ ἥτισοῦν ψυχὴ ἀθάνατος, πᾶσα ἀθάνατος. τοῦτο δ' οὐκ ἀεὶ ποιητέον, ἀλλ' ὅταν μὴ εὐπορῶμεν κοινὸν ἐπὶ πάντων ἓνα λόγον εἰπεῖν, καθάπερ ὁ γεωμέτρης ὅτι τὸ τρίγωνον δυσὶν ὀρθαῖς ἴσας ἔχει.

Ἐὰν δὲ μὴ λανθάνῃ πολλαχῶς λεγόμενον, διελόμενον ὡσαυχῶς λέγεται καὶ ἀναιρεῖν καὶ κατασκευάζειν. οἷον εἰ τὸ δέον ἐστὶ τὸ συμφέρον ἢ τὸ καλόν, πειρατέον ἄμφω κατασκευάζειν ἢ ἀναιρεῖν περὶ τοῦ προκειμένου, οἷον ὅτι καλὸν καὶ συμφέρον, ἢ ὅτι οὔτε καλὸν οὔτε συμφέρον. ἐὰν δὲ μὴ ἐνδέχεται ἀμφοτέρω, θάτερον δεικτέον, ἐπισημαινόμενον ὅτι τὸ μὲν τὸ δ' οὐ. ὁ δ' αὐτὸς λόγος κἂν πλείω ἢ εἰς ἃ διαιρεῖται.

Πάλιν ὅσα μὴ καθ' ὁμωνυμίαν λέγεται πολλαχῶς ἀλλὰ κατ' ἄλλον τρόπον, οἷον ἐπιστήμη μία πλειόνων ἢ ὡς τοῦ τέλους καὶ τῶν πρὸς τὸ τέλος, οἷον ἰατρικὴ τοῦ ὑγίειαν ποιῆσαι καὶ τοῦ διαιτῆσαι, ἢ ὡς ἀμφοτέρων τελῶν, καθάπερ τῶν ἐναντίων ἢ αὐτὴ λέγεται ἐπιστήμη (οὐδὲν γὰρ μᾶλλον τέλος τὸ ἕτερον τοῦ ἑτέρου), ἢ ὡς τοῦ καθ' αὐτὸ καὶ τοῦ κατὰ συμβεβηκός, οἷον καθ' αὐτὸ μὲν ὅτι τὸ τρίγωνον δυσὶν ὀρθαῖς ἴσας ἔχει, κατὰ συμβεβηκός δὲ ὅτι τὸ ἰσόπλευρον· ὅτι γὰρ συμβέβηκε τῷ ἰσοπλεύρῳ τριγώνῳ εἶναι, κατὰ τοῦτο γνωρίζομεν ὅτι δυσὶν ὀρθαῖς ἴσας ἔχει. εἰ οὖν μηδαμῶς ἐνδέχεται τὴν αὐτὴν εἶναι πλειόνων ἐπιστήμην, δῆλον ὅτι ὅλως οὐκ ἐνδέχεται εἶναι, ἢ εἰ πῶς ἐνδέχεται, δῆλον ὅτι ἐνδέχεται. διαιρεῖσθαι δὲ ὡσαυχῶς χρήσιμον. οἷον ἐὰν βουλώμεθα κατασκευάσαι, τὰ τοιαῦτα προοιστέον ὅσα ἐνδέχεται, καὶ διαιρετέον εἰς ταῦτα μόνον ὅσα καὶ χρήσιμα πρὸς τὸ κατασκευάσαι· ἂν δ' ἀνασκευάσαι, ὅσα μὴ ἐνδέχεται, τὰ δὲ λοιπὰ παραλείπτον. ποιητέον δὲ καὶ ἐπὶ τούτων, ὅταν λανθάνῃ ποσαυχῶς λέγεται. καὶ εἶναι δὲ τόδε τοῦδε ἢ μὴ εἶναι ἐκ τῶν αὐτῶν τόπων κατασκευαστέον, οἷον ἐπιστήμην τήνδε τοῦδε ἢ ὡς τέλους ἢ ὡς τῶν πρὸς τὸ τέλος ἢ ὡς τῶν κατὰ συμβεβηκός, ἢ πάλιν μὴ εἶναι κατὰ μηδένα τῶν ῥηθέντων τρόπων. ὁ δ' αὐτὸς λόγος καὶ περὶ ἐπιθυμίας καὶ ὅσα ἄλλα λέγεται πλειόνων· ἔστι γὰρ ἡ [111a] ἐπιθυμία τούτου ἢ ὡς τέλους, οἷον ὑγείας, ἢ ὡς τῶν πρὸς τὸ τέλος, οἷον τοῦ φαρμακευθῆναι, ἢ ὡς τοῦ κατὰ συμβεβηκός, καθάπερ ἐπὶ τοῦ οἴνου ὁ φιλόγλυκος, οὐχ ὅτι οἶνος ἀλλ' ὅτι γλυκύς ἐστιν. καθ' αὐτὸ μὲν γὰρ τοῦ γλυκεὸς ἐπιθυμεῖ, τοῦ δ' οἴνου κατὰ συμβεβηκός· ἐὰν γὰρ αὐστηρὸς ᾖ, οὐκέτι ἐπιθυμεῖ. κατὰ συμβεβηκός οὖν ἐπιθυμεῖ. χρήσιμος δ' ὁ τόπος οὗτος ἐν τοῖς πρὸς τι· σχεδὸν γὰρ τὰ

τοιαῦτα τῶν πρὸς τί ἐστιν.

Ἔτι τὸ μεταλαμβάνειν εἰς τὸ γνωριμώτερον ὄνομα, οἷον ἀντὶ τοῦ ἀκριβοῦς ἐν ὑπολήψει τὸ σαφές καὶ ἀντὶ τῆς πολυπραγμοσύνης τὴν φιλοπραγμοσύνην· γνωριμωτέρου γὰρ γενομένου τοῦ ῥηθέντος εὐεπιχειρητοτέρα ἢ θέσις. ἔστι δὲ καὶ οὗτος ὁ τόπος πρὸς ἄμφω κοινός, καὶ πρὸς τὸ κατασκευάζειν καὶ πρὸς τὸ ἀνασκευάζειν.

Πρὸς δὲ τὸ δεῖξαι τὰ ἐναντία τῷ αὐτῷ ὑπάρχοντα σκοπεῖν ἐπὶ τοῦ γένους, οἷον, ἐὰν βουλώμεθα δεῖξαι ὅτι ἔστι περὶ αἰσθησιν ὀρθότης καὶ ἁμαρτία, “ἐπεὶ τὸ αἰσθάνεσθαι κρίνειν ἐστί, κρίνειν δ’ ἔστιν ὀρθῶς καὶ μὴ ὀρθῶς, καὶ περὶ αἰσθησιν ἂν εἴη ὀρθότης καὶ ἁμαρτία”. νῦν μὲν οὖν ἐκ τοῦ γένους περὶ τὸ εἶδος ἢ ἀπόδειξις· τὸ γὰρ κρίνειν γένος τοῦ αἰσθάνεσθαι· ὁ γὰρ αἰσθανόμενος κρίνει πως. πάλιν δ’ ἐκ τοῦ εἶδους τῷ γένει· ὅσα γὰρ τῷ εἶδει ὑπάρχει, καὶ τῷ γένει· οἷον εἰ ἔστιν ἐπιστήμη φαύλη καὶ σπουδαία, καὶ διάθεσις φαύλη καὶ σπουδαία· ἡ γὰρ διάθεσις τῆς ἐπιστήμης γένος. ὁ μὲν οὖν πρότερος τόπος ψευδής ἐστι πρὸς τὸ κατασκευάσαι, ὁ δὲ δεύτερος ἀληθής. οὐ γὰρ ἀναγκαῖον, ὅσα τῷ γένει ὑπάρχει, καὶ τῷ εἶδει ὑπάρχειν· ζῶον μὲν γὰρ ἔστι πτηνὸν καὶ τετράπουν, ἄνθρωπος δ’ οὔ. ὅσα δὲ τῷ εἶδει ὑπάρχει, ἀναγκαῖον καὶ τῷ γένει· εἰ γὰρ ἔστιν ἄνθρωπος σπουδαῖος, καὶ ζῶον ἔστι σπουδαῖον. πρὸς δὲ τὸ ἀνασκευάζειν ὁ μὲν πρότερος ἀληθής, ὁ δὲ ὕστερος ψευδής· ὅσα γὰρ τῷ γένει οὐχ ὑπάρχει, οὐδὲ τῷ εἶδει· ὅσα δὲ τῷ εἶδει μὴ ὑπάρχει, οὐκ ἀνάγκη τῷ γένει μὴ ὑπάρχειν.

Ἐπεὶ δ’ ἀναγκαῖον, ὣν τὸ γένος κατηγορεῖται, καὶ τῶν εἰδῶν τι κατηγορεῖσθαι, καὶ ὅσα ἔχει τὸ γένος ἢ παρωνύμως ἀπὸ τοῦ γένους λέγεται, καὶ τῶν εἰδῶν τι ἀναγκαῖον ἔχειν ἢ παρωνύμως ἀπὸ τινος τῶν εἰδῶν λέγεσθαι (οἷον εἴ τινος ἐπιστήμη κατηγορεῖται, καὶ γραμματικὴ ἢ μουσικὴ ἢ τῶν ἄλλων τις ἐπιστημὴν κατηγορηθήσεται, καὶ εἴ τις ἔχει [111b] ἐπιστήμην ἢ παρωνύμως ἀπὸ τῆς ἐπιστήμης λέγεται, καὶ γραμματικὴν ἔξει ἢ μουσικὴν ἢ τίνα τῶν ἄλλων ἐπιστημῶν ἢ παρωνύμως ἀπὸ τινος αὐτῶν ῥηθήσεται, οἷον γραμματικὸς ἢ μουσικός)· ἐὰν οὖν τι τεθῇ λεγόμενον ἀπὸ τοῦ γένους ὁπωσοῦν, οἷον τὴν ψυχὴν κινεῖσθαι, σκοπεῖν εἰ κατὰ τι τῶν εἰδῶν τῶν τῆς κινήσεως ἐνδέχεται τὴν ψυχὴν κινεῖσθαι, οἷον αὔξεσθαι ἢ φθεῖρεσθαι ἢ γίγνεσθαι ἢ ὅσα ἄλλα κινήσεως εἶδη· εἰ γὰρ κατὰ μηδέν, δηλὸν ὅτι οὐ κινεῖται. οὗτος δ’ ὁ τόπος κοινὸς πρὸς ἄμφω, πρὸς τε τὸ ἀνασκευάζειν καὶ κατασκευάζειν· εἰ γὰρ κατὰ τι τῶν

εἰδῶν κινεῖται, δῆλον ὅτι κινεῖται, καὶ εἰ κατὰ μηδὲν τῶν εἰδῶν κινεῖται, δῆλον ὅτι οὐ κινεῖται. Μὴ εὐποροῦντι δὲ ἐπιχειρήματος πρὸς τὴν θέσιν σκοπεῖν ἐκ τῶν ὀρισμῶν, ἢ τῶν ὄντων τοῦ προκειμένου πράγματος ἢ τῶν δοκούντων, καὶ εἰ μὴ ἀφ' ἐνός, ἀλλ' ἀπὸ πλειόνων. ῥᾶον γὰρ ὀρισσαμένοις ἐπιχειρεῖν ἔσται· πρὸς γὰρ τοὺς ὀρισμοὺς ῥᾶων ἢ ἐπιχειρήσις.

Σκοπεῖν δὲ ἐπὶ τοῦ προκειμένου, τίνος ὄντος τὸ προκείμενον ἔστιν, ἢ τί ἔστιν ἐξ ἀνάγκης εἰ τὸ προκείμενον ἔστι - κατασκευάζειν μὲν βουλομένῳ, τίνος ὄντος τὸ προκείμενον ἔσται (ἐὰν γὰρ ἐκεῖνο δειχθῇ ὑπάρχον, καὶ τὸ προκείμενον δεδειγμένον ἔσται), ἀνασκευάζειν δὲ βουλομένῳ, τί ἔστιν εἰ τὸ προκείμενον ἔστιν· ἐὰν γὰρ δείξωμεν τὸ ἀκόλουθον τῷ προκειμένῳ μὴ ὄν, ἀνηρηκότες ἐσόμεθα τὸ προκείμενον.

Ἔτι ἐπὶ τὸν χρόνον ἐπιβλέπειν, εἴ που διαφωνεῖ, οἷον εἰ τὸ τρεφόμενον ἔφησεν ἐξ ἀνάγκης αὔξεσθαι· τρέφεται μὲν γὰρ ἀεὶ τὰ ζῷα, αὔξεται δ' οὐκ ἀεὶ. ὁμοίως δὲ καὶ εἰ τὸ ἐπίστασθαι ἔφησε μεμνησθαι· τὸ μὲν γὰρ τοῦ παρεληλυθότος χρόνου ἐστί, τὸ δὲ καὶ τοῦ παρόντος καὶ τοῦ μέλλοντος. ἐπίστασθαι μὲν γὰρ λεγόμεθα τὰ παρόντα καὶ τὰ μέλλοντα, οἷον ὅτι ἔσται ἔκλειψις· μνημονεύειν δ' οὐκ ἐνδέχεται ἄλλο ἢ τὸ παρεληλυθός.

Ἔτι ὁ σοφιστικὸς τρόπος, τὸ ἄγειν εἰς τοιοῦτον πρὸς ὃ εὐπορήσομεν ἐπιχειρημάτων· τοῦτο δ' ἔσται ὅτε μὲν ἀναγκαῖον, ὅτε δὲ φαινόμενον ἀναγκαῖον, ὅτε δ' οὔτε φαινόμενον οὔτ' ἀναγκαῖον. ἀναγκαῖον μὲν οὖν ὅταν, ἀρνησαμένου τοῦ ἀποκρινομένου τῶν πρὸς τὴν θέσιν τι χρησίμων, πρὸς τοῦτο τοὺς λόγους ποιῇται, τυγχάνη δὲ τοῦτο τῶν τοιούτων ὃν πρὸς ᾧ εὐπορεῖν ἔστιν ἐπιχειρημάτων. ὁμοίως δὲ καὶ ὅταν, ἐπαγωγὴν [112a] πρὸς τι διὰ τοῦ κειμένου ποιησαμένου, ἀναιρεῖν ἐπιχειρῇ· τούτου γὰρ ἀναιρεθέντος καὶ τὸ προκείμενον ἀναιρεῖται. φαινόμενον δ' ἀναγκαῖον, ὅταν φαίνεται μὲν χρήσιμον καὶ οἰκεῖον τῆς θέσεως, μὴ ἢ δέ, πρὸς ὃ γίνονται οἱ λόγοι, εἴτε ἀρνησαμένου τοῦ τὸν λόγον ὑπέχοντος, εἴτε ἐπαγωγῆς ἐνδόξου διὰ τῆς θέσεως πρὸς αὐτὸ γενομένης, ἀναιρεῖν ἐπιχειροῖ αὐτό. τὸ δὲ λοιπόν, ὅταν μήτ' ἀναγκαῖον ἢ μήτε φαινόμενον πρὸς ὃ γίνονται οἱ λόγοι, ἄλλως δὲ παρεξελέγχεσθαι συμβαίνει τῷ ἀποκρινομένῳ. δεῖ δ' εὐλαβεῖσθαι τὸν ἔσχατον τῶν ῥηθέντων τρόπων· παντελῶς γὰρ ἀπηρητημένος καὶ ἀλλότριος ἔοικεν εἶναι τῆς διαλεκτικῆς. διὸ δεῖ καὶ τὸν ἀποκρινόμενον μὴ δυσκολαίνειν, ἀλλὰ τιθέναι τὰ μὴ χρήσιμα

πρὸς τὴν θέσιν, ἐπισημαινόμενον ὅσα μὴ δοκεῖ μὲν τίθησι δέ. μᾶλλον γὰρ ἀπορεῖν ὥς ἐπὶ τὸ πολὺ συμβαίνει τοῖς ἐρωτῶσι πάντων τιθεμένων αὐτοῖς τῶν τοιούτων, ἐὰν μὴ περαίνωσιν.

Ἔτι πᾶς ὁ εἰρηκῶς ὁτιοῦν τρόπον τινὰ πολλὰ εἴρηκεν, ἐπειδὴ πλείω ἐκάστω ἐξ ἀνάγκης ἀκόλουθά ἐστιν· οἷον ὁ εἰρηκῶς ἄνθρωπον εἶναι καὶ ὅτι ζῷον ἐστὶν εἴρηκε καὶ ὅτι ἔμψυχον καὶ ὅτι δίπουν καὶ ὅτι νοῦ καὶ ἐπιστήμης δεκτικόν, ὥστε ὅποιουοῦν ἐνὸς τῶν ἀκολουθῶν ἀναιρεθέντος ἀναιρεῖται καὶ τὸ ἐν ἀρχῇ. εὐλαβεῖσθαι δὲ χρὴ εἰς τὸ χαλεπότερον τὴν μετάληψιν ποιεῖσθαι· ἐνίστε μὲν γὰρ ῥᾶον τὸ ἀκόλουθον ἀνελεῖν, ἐνίστε δ' αὐτὸ τὸ προκείμενον.

Ὅσοις δ' ἀνάγκη θάτερον μόνον ὑπάρχειν, οἷον τῷ ἀνθρώπῳ τὴν νόσον ἢ τὴν ὑγίειαν, ἐὰν πρὸς θάτερον εὐπορῶμεν διαλέγεσθαι ὅτι ὑπάρχει ἢ οὐχ ὑπάρχει, καὶ πρὸς τὸ λοιπὸν εὐπορήσομεν. τοῦτο δ' ἀντιστρέφει πρὸς ἄμφω· δεῖξαντες μὲν γὰρ ὅτι ὑπάρχει θάτερον, ὅτι οὐχ ὑπάρχει τὸ λοιπὸν δεδειχότες ἐσόμεθα· ἐὰν δ' ὅτι οὐχ ὑπάρχει δεῖξωμεν, τὸ λοιπὸν ὅτι ὑπάρχει δεδειχότες ἐσόμεθα. δηλὸν οὖν ὅτι πρὸς ἄμφω χρήσιμος ὁ τόπος.

Ἔτι τὸ ἐπιχειρεῖν, μεταφέροντα τοῦνομα κατὰ τὸν λόγον, ὥς μᾶλλον προσῆκον ἐκλαμβάνειν ἢ ὥς κεῖται τοῦνομα, οἷον εὐψυχον μὴ τὸν ἀνδρεῖον, καθάπερ νῦν κεῖται, ἀλλὰ τὸν εὖ τὴν ψυχὴν ἔχοντα, καθάπερ καὶ εὐέλπιν τὸν ἀγαθὰ ἐλπίζοντα· ὁμοίως δὲ καὶ εὐδαίμονα οὗ ἂν ὁ δαίμων ἢ σπουδαῖος, καθάπερ Ξενοκράτης φησὶν εὐδαίμονα εἶναι τὸν τὴν ψυχὴν ἔχοντα σπουδαίαν· ταύτην γὰρ ἐκάστου εἶναι δαίμονα.

[112b] Ἐπεὶ δὲ τῶν πραγμάτων τὰ μὲν ἐξ ἀνάγκης ἐστί, τὰ δ' ὥς ἐπὶ τὸ πολὺ, τὰ δ' ὁπότερ' ἔτυχεν, ἐὰν τὸ ἐξ ἀνάγκης ὥς ἐπὶ τὸ πολὺ τεθῇ ἢ τὸ ὥς ἐπὶ τὸ πολὺ ἐξ ἀνάγκης (ἢ αὐτὸ ἢ τὸ ἐναντίον τῷ ὥς ἐπὶ τὸ πολὺ), ἀεὶ δίδωσι τόπον ἐπιχειρήματος. ἐὰν γὰρ τὸ ἐξ ἀνάγκης ὥς ἐπὶ τὸ πολὺ τεθῇ, δηλὸν ὅτι οὐ παντὶ φησιν ὑπάρχειν, ὑπάρχοντος παντί, ὥστε ἡμάρτηκεν· εἴ τε τὸ ὥς ἐπὶ τὸ πολὺ λεγόμενον ἐξ ἀνάγκης ἔφησε· παντὶ γάρ φησιν ὑπάρχειν, οὐχ ὑπάρχοντος παντί. ὁμοίως δὲ καὶ εἰ τὸ ἐναντίον τῷ ὥς ἐπὶ τὸ πολὺ ἐξ ἀνάγκης εἴρηκεν· ἀεὶ γὰρ ἐπ' ἔλαττον λέγεται τὸ ἐναντίον τῷ ὥς ἐπὶ τὸ πολὺ· οἷον εἰ ὥς ἐπὶ τὸ πολὺ φαῦλοι οἱ ἄνθρωποι, ἀγαθοὶ ἐπ' ἔλαττον, ὥστ' ἔτι μᾶλλον ἡμάρτηκεν, εἰ ἀγαθοὺς ἐξ ἀνάγκης εἴρηκεν. ὡσαύτως δὲ καὶ εἰ τὸ ὁπότερ' ἔτυχεν ἐξ ἀνάγκης ἔφησεν ἢ ὥς ἐπὶ τὸ πολὺ· οὕτε γὰρ ἐξ ἀνάγκης τὸ ὁπότερ' ἔτυχεν οὐθ' ὥς ἐπὶ τὸ πολὺ. ἐνδέχεται δέ, καὶ

μη διορίσας εἶπη πότερον ὥς ἐπὶ τὸ πολὺ ἢ ἐξ ἀνάγκης εἶρηκεν, ἥ δὲ τὸ πρᾶγμα ὥς ἐπὶ τὸ πολὺ, διαλέγεσθαι ὥς ἐξ ἀνάγκης εἰρηκότος αὐτοῦ, οἷον, εἰ φαύλους τοὺς ἀποκλήρους ἔφησεν εἶναι μη διορίσας, ὥς ἐξ ἀνάγκης εἰρηκότος αὐτοῦ διαλέγεσθαι.

Ἔτι καὶ εἰ αὐτὸ αὐτῷ συμβεβηκὸς ἔθηκεν ὥς ἕτερον διὰ τὸ ἕτερον εἶναι ὄνομα, καθάπερ Πρόδικος διηρεῖτο τὰς ἡδονὰς εἰς χαρὰν καὶ τέρψιν καὶ εὐφροσύνην· ταῦτα γὰρ πάντα τοῦ αὐτοῦ, τῆς ἡδονῆς, ὀνόματά ἐστιν. εἰ οὖν τις τὸ χαίρειν τῷ εὐφραίνεσθαι φήσει συμβεβηκέναι, αὐτὸ ἂν αὐτῷ φαίη συμβεβηκέναι.

Ἐπεὶ δὲ τὰ ἐναντία συμπλέκεται μὲν ἀλλήλοις ἐξαχῶς, ἐναντίωσιν δὲ ποιεῖ τετραχῶς συμπλεκόμενα, δεῖ λαμβάνειν τὰ ἐναντία ὅπως ἂν χρήσιμον ἢ καὶ ἀναιροῦντι καὶ κατασκευάζοντι. ὅτι μὲν οὖν ἐξαχῶς συμπλέκεται, δῆλον. ἢ γὰρ ἐκάτερον τῶν ἐναντίων ἐκατέρῳ τῶν ἐναντίων συμπλακῆσεται (τοῦτο δὲ διχῶς, οἷον τὸ τοὺς φίλους εὖ ποιεῖν καὶ τὸ τοὺς ἐχθροὺς κακῶς, ἢ ἀνάπαλιν τὸ τοὺς φίλους κακῶς καὶ τὸ τοὺς ἐχθροὺς εὖ), ἢ ἀμφοτέρα περὶ τοῦ ἐνός (διχῶς δὲ καὶ τοῦτο, οἷον τὸ τοὺς φίλους εὖ καὶ τὸ τοὺς φίλους κακῶς, ἢ τὸ τοὺς ἐχθροὺς εὖ καὶ τὸ τοὺς ἐχθροὺς κακῶς), ἢ τὸ ἐν περὶ ἀμφοτέρων (διχῶς δὲ καὶ τοῦτο, οἷον τὸ τοὺς φίλους εὖ καὶ τὸ τοὺς ἐχθροὺς εὖ, ἢ τοὺς φίλους κακῶς καὶ τοὺς ἐχθροὺς κακῶς).

[113a] Αἱ μὲν οὖν πρῶται δύο ῥηθεῖσαι συμπλοκαὶ οὐ ποιοῦσιν ἐναντίωσιν. τὸ γὰρ τοὺς φίλους εὖ ποιεῖν τῷ τοὺς ἐχθροὺς κακῶς οὐκ ἔστιν ἐναντίον· ἀμφοτέρα γὰρ αἰρετὰ καὶ τοῦ αὐτοῦ ἦθους· οὐδὲ τὸ τοὺς φίλους κακῶς τῷ τοὺς ἐχθροὺς εὖ· καὶ γὰρ ταῦτα ἀμφοτέρα φευκτὰ καὶ τοῦ αὐτοῦ ἦθους. οὐ δοκεῖ δὲ φευκτὸν φευκτῷ ἐναντίον εἶναι, ἐὰν μὴ ἢ τὸ μὲν καθ' ὑπερβολὴν τὸ δὲ κατ' ἔνδειαν λεγόμενον· ἢ τε γὰρ ὑπερβολὴ τῶν φευκτῶν δοκεῖ εἶναι, ὁμοίως δὲ καὶ ἡ ἔνδεια. τὰ δὲ λοιπὰ πάντα τέτταρα ποιεῖ ἐναντίωσιν. τὸ γὰρ τοὺς φίλους εὖ ποιεῖν τῷ τοὺς φίλους κακῶς ἐναντίον· ἀπὸ τε γὰρ ἐναντίου ἦθους ἐστὶ, καὶ τὸ μὲν αἰρετὸν τὸ δὲ φευκτόν. ὡσαύτως δὲ καὶ ἐπὶ τῶν ἄλλων· καθ' ἐκάστην γὰρ συζυγίαν τὸ μὲν αἰρετὸν τὸ δὲ φευκτόν, καὶ τὸ μὲν ἐπικικοῦς ἦθους τὸ δὲ φαύλου. δῆλον οὖν ἐκ τῶν εἰρημένων ὅτι τῷ αὐτῷ πλείονα ἐναντία συμβαίνει γίνεσθαι· τῷ γὰρ τοὺς φίλους εὖ ποιεῖν καὶ τὸ τοὺς ἐχθροὺς εὖ ποιεῖν ἐναντίον καὶ τὸ τοὺς φίλους κακῶς, ὁμοίως δὲ καὶ τῶν ἄλλων ἐκάστῳ τὸν αὐτὸν τρόπον ἐπισκοποῦσι δύο τὰ ἐναντία φανήσεται. λαμβάνειν οὖν τῶν ἐναντίων ὁπότερον ἂν ἢ πρὸς τὴν θέσιν χρήσιμον.

Ἔτι εἰ ἔστι τι ἐναντίον τῷ συμβεβηκότι, σκοπεῖν εἰ ὑπάρχει ὥπερ τὸ συμβεβηκὸς εἶρηται ὑπάρχειν· εἰ γὰρ τοῦτο ὑπάρχει, ἐκεῖνο οὐκ ἂν ὑπάρχοι· ἀδύνατον γὰρ τὰ ἐναντία ἅμα τῷ αὐτῷ ὑπάρχειν.

Ἡ εἰ τι τοιοῦτον εἶρηται κατὰ τινος, οὗ ὄντος ἀνάγκη τὰ ἐναντία ὑπάρχειν· οἷον εἰ τὰς ιδέας ἐν ἡμῖν ἔφησεν εἶναι· κινεῖσθαι τε γὰρ καὶ ἡρεμεῖν αὐτὰς συμβήσεται, ἔτι δὲ αἰσθητὰς καὶ νοητὰς εἶναι. δοκοῦσι γὰρ αἱ ιδέαι ἡρεμεῖν καὶ νοηταὶ εἶναι τοῖς τιθεμένοις ιδέας εἶναι· ἐν ἡμῖν δὲ οὕσας ἀδύνατον ἀκινήτους εἶναι· κινουμένων γὰρ ἡμῶν ἀναγκαῖον καὶ τὰ ἐν ἡμῖν πάντα συγκινεῖσθαι. δηλὸν δ' ὅτι καὶ αἰσθηταί, εἴπερ ἐν ἡμῖν εἰσι· διὰ γὰρ τῆς περὶ τὴν ὄψιν αἰσθήσεως τὴν ἐν ἐκάστῳ μορφήν γνωρίζομεν.

Πάλιν εἰ κεῖται συμβεβηκὸς ὃ ἔστι τι ἐναντίον, σκοπεῖν εἰ καὶ τοῦ ἐναντίου δεκτικὸν ὅπερ καὶ τοῦ συμβεβηκότος· τὸ γὰρ αὐτὸ τῶν ἐναντίων δεκτικόν. οἷον εἰ τὸ μῖσος ἔπεσθαι ὀργῇ ἔφησεν, εἴη ἂν τὸ μῖσος ἐν τῷ θυμοειδεῖ· ἐκεῖ γὰρ [113b] ἡ ὀργή. σκεπτέον οὖν εἰ καὶ τὸ ἐναντίον ἐν τῷ θυμοειδεῖ· εἰ γὰρ μή, ἀλλ' ἐν τῷ ἐπιθυμητικῷ ἐστὶν ἡ φιλία, οὐκ ἂν ἔποιτο τὸ μῖσος ὀργῇ. ὁμοίως δὲ καὶ εἰ τὸ ἐπιθυμητικὸν ἀγνοεῖν ἔφησεν· εἴη γὰρ ἂν καὶ ἐπιστήμης δεκτικόν, εἴπερ καὶ ἀγνοίας· ὅπερ οὐ δοκεῖ, τὸ ἐπιθυμητικὸν δεκτικὸν εἶναι ἐπιστήμης. ἀνασκευάζοντι μὲν οὖν καθάπερ εἶρηται χρηστέον. κατασκευάζοντι δέ, ὅτι μὲν ὑπάρχει τὸ συμβεβηκὸς, οὐ χρήσιμος ὁ τόπος· ὅτι δ' ἐνδέχεται ὑπάρχειν, χρήσιμος. δεῖξαντες μὲν γὰρ ὅτι οὐ δεκτικὸν τοῦ ἐναντίου, δεδειχότες ἐσόμεθα ὅτι οὐτε ὑπάρχει τὸ συμβεβηκὸς οὐτ' ἐνδέχεται ὑπάρξαι· ἐὰν δὲ δεῖξωμεν ὅτι ὑπάρχει τὸ ἐναντίον ἢ ὅτι δεκτικὸν τοῦ ἐναντίου ἐστίν, οὐδέπω δεδειχότες ἐσόμεθα ὅτι καὶ τὸ συμβεβηκὸς ὑπάρχει, ἀλλ' ὅτι ἐνδέχεται ὑπάρχειν, ἐπὶ τοσοῦτον μόνον δεδειγμένον ἔσται.

Ἐπεὶ δ' αἱ ἀντιθέσεις τέτταρες, σκοπεῖν ἐπὶ μὲν τῶν ἀντιφάσεων ἀνάπαλιν ἐκ τῆς ἀκολουθήσεως, καὶ ἀναιροῦντα καὶ κατασκευάζοντα, λαμβάνειν δ' ἐξ ἐπαγωγῆς. οἷον εἰ ὁ ἄνθρωπος ζῶν, τὸ μὴ ζῶν οὐκ ἄνθρωπος· ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων. ἐνταῦθα γὰρ ἀνάπαλιν ἡ ἀκολουθήσις· τῷ μὲν γὰρ ἀνθρώπῳ τὸ ζῶν ἔπεται, τῷ δὲ μὴ ἀνθρώπῳ τὸ μὴ ζῶν οὐ, ἀλλ' ἀνάπαλιν τῷ μὴ ζῶν τὸ οὐκ ἄνθρωπος. ἐπὶ πάντων οὖν τὸ τοιοῦτον ἀξιοτέον· οἷον εἰ τὸ καλὸν ἡδύ, καὶ τὸ μὴ ἡδὺ οὐ καλόν· εἰ δὲ τοῦτο μὴ, οὐδ' ἐκεῖνο· ὁμοίως δὲ καὶ εἰ τὸ μὴ ἡδὺ οὐ καλόν, τὸ καλὸν ἡδύ. δηλὸν οὖν ὅτι πρὸς ἅμφω ἀντιστρέφει ἡ κατὰ τὴν ἀντίφασιν ἀκολουθήσις ἀνάπαλιν

γινόμενη.

Ἐπὶ δὲ τῶν ἐναντίων σκοπεῖν εἰ τῷ ἐναντίῳ τὸ ἐναντίον ἔπεται, ἢ ἐπὶ ταῦτα ἢ ἀνάπαλιν, καὶ ἀναιροῦντι καὶ κατασκευάζοντι· λαμβάνειν δὲ καὶ τὰ τοιαῦτα ἐξ ἐπαγωγῆς ἐφ' ὅσον χρήσιμον. ἐπὶ ταῦτα μὲν οὖν ἡ ἀκολούθησις, οἷον τῇ ἀνδρείᾳ καὶ τῇ δειλίᾳ· τῇ μὲν γὰρ ἀρετῇ ἀκολουθεῖ, τῇ δὲ κακίᾳ, καὶ τῇ μὲν ἀκολουθεῖ τὸ αἰρετόν, τῇ δὲ τὸ φευκτόν. ἐπὶ ταῦτα οὖν καὶ ἡ τούτων ἀκολούθησις· ἐναντίον γὰρ τὸ αἰρετόν τῷ φευκτῷ. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων. ἀνάπαλιν δὲ ἡ ἀκολούθησις, οἷον εὐεξία μὲν ὑγίεια ἀκολουθεῖ, καχεξία δὲ νόσος οὐ, ἀλλὰ νόσῳ καχεξία. δηλὸν οὖν ὅτι [114a] ἀνάπαλιν ἐπὶ τούτων ἡ ἀκολούθησις. σπάνιον δὲ τὸ ἀνάπαλιν ἐπὶ τῶν ἐναντίων συμβαίνει, ἀλλὰ τοῖς πλείστοις ἐπὶ ταῦτα ἡ ἀκολούθησις. εἰ οὖν μήτ' ἐπὶ ταῦτα τῷ ἐναντίῳ τὸ ἐναντίον ἀκολουθεῖ μήτε ἀνάπαλιν, δηλὸν ὅτι οὐδ' ἐπὶ τῶν ῥηθέντων ἀκολουθεῖ τὸ ἕτερον τῷ ἐτέρῳ. εἰ δ' ἐπὶ τῶν ἐναντίων, καὶ ἐπὶ τῶν ῥηθέντων ἀναγκαῖον τὸ ἕτερον τῷ ἐτέρῳ ἀκολουθεῖν.

Ὅμοίως δὲ τοῖς ἐναντίοις καὶ ἐπὶ τῶν στερήσεων καὶ ἔξεων σκεπτόεν· πλὴν οὐκ ἔστιν ἐπὶ τῶν στερήσεων τὸ ἀνάπαλιν, ἀλλ' ἐπὶ ταῦτα τὴν ἀκολούθησιν ἀναγκαῖον αἰεὶ γίνεσθαι, καθάπερ ὄψει μὲν αἰσθησιν, τυφλότῃ δ' ἀναισθησίαν. ἀντίκειται γὰρ ἡ αἰσθησις τῇ ἀναισθησίᾳ ὥς ἕξις καὶ στέρησις· τὸ μὲν γὰρ ἕξις αὐτῶν, τὸ δὲ στέρησις ἔστιν.

Ὅμοίως δὲ τῇ ἔξει καὶ τῇ στερήσει καὶ ἐπὶ τῶν πρὸς τι χρηστέον· ἐπὶ ταῦτα γὰρ καὶ τούτων ἡ ἀκολούθησις. οἷον εἰ τὸ τριπλάσιον πολλαπλάσιον, καὶ τὸ τριτημόριον πολλοστημόριον· λέγεται γὰρ τὸ μὲν τριπλάσιον πρὸς τὸ τριτημόριον, τὸ δὲ πολλαπλάσιον πρὸς τὸ πολλοστημόριον. πάλιν εἰ ἡ ἐπιστήμη ὑπόληψις, καὶ τὸ ἐπιστητὸν ὑποληπτόν· καὶ εἰ ἡ ὄρασις αἰσθησις, καὶ τὸ ὁρατὸν αἰσθητόν. (ἐνστασις ὅτι οὐκ ἀνάγκη ἐπὶ τῶν πρὸς τι τὴν ἀκολούθησιν γίνεσθαι καθάπερ εἴρηται· τὸ γὰρ αἰσθητὸν ἐπιστητόν ἐστιν, ἢ δ' αἰσθησις οὐκ ἐπιστήμη. οὐ μὴν ἀληθὴς γε ἡ ἐνστασις δοκεῖ εἶναι· πολλοὶ γὰρ οὐ φασι τῶν αἰσθητῶν ἐπιστήμην εἶναι.) ἔτι πρὸς τοῦναντίον οὐχ ἦττον χρήσιμον τὸ ῥηθέν, οἷον ὅτι τὸ αἰσθητὸν οὐκ ἔστιν ἐπιστητόν· οὐδὲ γὰρ ἡ αἰσθησις ἐπιστήμη.

Πάλιν ἐπὶ τῶν συστοίχων καὶ ἐπὶ τῶν πτώσεων, καὶ ἀναιροῦντα καὶ κατασκευάζοντα. λέγεται δὲ σύστοιχα μὲν τὰ τοιαῦτα οἷον τὰ δίκαια καὶ ὁ δίκαιος τῇ δικαιοσύνῃ, καὶ τὰ ἀνδρεῖα καὶ ὁ

ἀνδρεῖος τῇ ἀνδρείᾳ. ὁμοίως δὲ καὶ τὰ ποιητικὰ ἢ φυλακτικὰ σύστοιχα ἐκείνῳ οὐ ἔστι ποιητικὰ ἢ φυλακτικά, οἷον τὰ ὑγιεινὰ ὑγιείας καὶ τὰ εὐεκτικὰ εὐεξίας· τὸν αὐτὸν δὲ τρόπον καὶ ἐπὶ τῶν ἄλλων. σύστοιχα μὲν οὖν τὰ τοιαῦτα εἴωθε λέγεσθαι, πτώσεις δὲ οἷον τὸ δικαίως καὶ ἀνδρείως καὶ ὑγιεινῶς καὶ ὅσα τοῦτον τὸν τρόπον λέγεται. δοκεῖ δὲ καὶ τὰ κατὰ τὰς πτώσεις σύστοιχα εἶναι, οἷον τὸ μὲν δικαίως τῇ δικαιοσύνῃ, τὸ δὲ ἀνδρείως τῇ ἀνδρείᾳ. σύστοιχα δὲ λέγεται τὰ κατὰ τὴν αὐτὴν συστοιχίαν ἅπαντα, οἷον δικαιοσύνη, δίκαιος, δίκαιον, δικαίως. δηλὸν οὖν ὅτι ἐνὸς ὁποιοῦν δειχθέντος τῶν κατὰ τὴν αὐτὴν συστοιχίαν ἀγαθοῦ ἢ [114b] ἐπαινετοῦ καὶ τὰ λοιπὰ πάντα δεδειγμένα γίνεται· οἷον εἰ ἡ δικαιοσύνη τῶν ἐπαινετῶν, καὶ ὁ δίκαιος καὶ τὸ δίκαιον καὶ τὸ δικαίως τῶν ἐπαινετῶν. ῥηθήσεται δὲ τὸ [δικαίως καὶ] ἐπαινετῶς κατὰ τὴν αὐτὴν πτῶσιν ἀπὸ τοῦ ἐπαινετοῦ καθάπερ τὸ δικαίως ἀπὸ τῆς δικαιοσύνης.

Σκοπεῖν δὲ μὴ μόνον ἐπ' αὐτοῦ τοῦ εἰρημένου, ἀλλὰ καὶ ἐπὶ τοῦ ἐναντίου τὸ ἐναντίον, οἷον ὅτι τὸ ἀγαθὸν οὐκ ἐξ ἀνάγκης ἡδύ· οὐδὲ γὰρ τὸ κακὸν λυπηρόν· ἢ εἰ τοῦτο, κάκεῖνο. καὶ εἰ ἡ δικαιοσύνη ἐπιστήμη, καὶ ἡ ἀδικία ἄγνοια· καὶ εἰ τὸ δικαίως ἐπιστημονικῶς καὶ ἐμπείρως, τὸ ἀδίκως ἀγνοοῦντως καὶ ἀπείρως. εἰ δὲ ταῦτα μὴ, οὐδ' ἐκεῖνα, καθάπερ ἐπὶ τοῦ νῦν ῥηθέντος· μᾶλλον γὰρ ἂν φανεῖν τὸ ἀδίκως ἐμπείρως ἢ ἀπείρως. οὗτος δ' ὁ τόπος εἴρηται πρότερον ἐν ταῖς τῶν ἐναντίων ἀκολουθήσεσιν· οὐδὲν γὰρ ἄλλο νῦν ἀξιούμεν ἢ τὸ ἐναντίον τῷ ἐναντίῳ ἀκολουθεῖν.

Ἔτι ἐπὶ τῶν γενέσεων καὶ φθορῶν καὶ ποιητικῶν καὶ φθαρτικῶν, καὶ ἀναιροῦντι καὶ κατασκευάζοντι. ὧν γὰρ αἱ γενέσεις τῶν ἀγαθῶν, καὶ αὐτὰ ἀγαθὰ, καὶ εἰ αὐτὰ ἀγαθὰ, καὶ αἱ γενέσεις· εἰ δὲ αἱ γενέσεις τῶν κακῶν, καὶ αὐτὰ τῶν κακῶν, «καὶ εἰ αὐτὰ τῶν κακῶν, καὶ αἱ γενέσεις τῶν κακῶν». ἐπὶ δὲ τῶν φθορῶν ἀνάπαλιν· εἰ γὰρ αἱ φθοραὶ τῶν ἀγαθῶν, αὐτὰ τῶν κακῶν, εἰ δ' αἱ φθοραὶ τῶν κακῶν, αὐτὰ τῶν ἀγαθῶν. ὁ δ' αὐτὸς λόγος καὶ ἐπὶ ποιητικῶν καὶ φθαρτικῶν· ὧν μὲν γὰρ τὰ ποιητικὰ ἀγαθὰ, καὶ αὐτὰ τῶν ἀγαθῶν, ὧν δὲ τὰ φθαρτικὰ ἀγαθὰ, αὐτὰ τῶν κακῶν.

Πάλιν ἐπὶ τῶν ὁμοίων εἰ ὁμοίως ἔχει· οἷον εἰ ἐπιστήμη μία πλειόνων, καὶ δόξα, καὶ εἰ τὸ ὅψιν ἔχειν ὄραν, καὶ τὸ ἀκοῇ ἔχειν ἀκούειν. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων, καὶ τῶν ὄντων καὶ τῶν δοκούντων. χρήσιμος δ' ὁ τόπος πρὸς ἅμφω· εἰ μὲν γὰρ ἐπὶ τινος τῶν ὁμοίων οὕτως ἔχει, καὶ ἐπὶ τῶν ἄλλων τῶν ὁμοίων, εἰ δὲ ἐπὶ τινος μὴ,

οὐδ' ἐπὶ τῶν ἄλλων. σκοπεῖν δὲ καὶ εἰ ἐφ' ἐνὸς καὶ ἐπὶ πολλῶν ὁμοίως ἔχει· ἐνιαχοῦ γὰρ διαφωνεῖ. οἷον εἰ τὸ ἐπίστασθαι διανοεῖσθαι, καὶ τὸ πολλὰ ἐπίστασθαι πολλὰ διανοεῖσθαι· τοῦτο δ' οὐκ ἀληθές· ἐπίστασθαι μὲν γὰρ ἐνδέχεται πολλὰ, διανοεῖσθαι δ' οὐ. εἰ οὖν τοῦτο μὴ, οὐδ' ἐκεῖνο τὸ ἐφ' ἐνὸς, ὅτι τὸ ἐπίστασθαι διανοεῖσθαι ἐστίν.

Ἔτι ἐκ τοῦ μᾶλλον καὶ ἥττον. εἰσὶ δὲ τόποι τοῦ μᾶλλον καὶ ἥττον τέσσαρες· εἷς μὲν εἰ ἀκολουθεῖ τὸ μᾶλλον τῷ μᾶλλον, οἷον εἰ ἡδονὴ ἀγαθόν, καὶ ἡ μᾶλλον ἡδονὴ μᾶλλον [115a] ἀγαθόν, καὶ εἰ τὸ ἀδικεῖν κακόν, καὶ τὸ μᾶλλον ἀδικεῖν μᾶλλον κακόν. χρήσιμος δὲ πρὸς ἅμφω ὁ τόπος· εἰ μὲν γὰρ ἀκολουθεῖ τῇ τοῦ ὑποκειμένου ἐπιδόσει ἡ τοῦ συμβεβηκότος ἐπίδοσις, καθάπερ εἴρηται, δηλὸν ὅτι συμβέβηκεν· εἰ δὲ μὴ ἀκολουθεῖ, οὐ συμβέβηκεν. τοῦτο δ' ἐπαγωγὴ ληπτέον. ἄλλος ἐνὸς περὶ δύο λεγομένου, εἰ ὃ μᾶλλον εἰκὸς ὑπάρχειν μὴ ὑπάρχει, οὐδ' ὃ ἥττον, καὶ εἰ ὃ ἥττον εἰκὸς ὑπάρχειν ὑπάρχει, καὶ ὃ μᾶλλον. πάλιν δυοῖν περὶ ἐνὸς λεγομένων, εἰ τὸ μᾶλλον ὑπάρχειν δοκοῦν μὴ ὑπάρχει, οὐδὲ τὸ ἥττον, εἰ δὲ τὸ ἥττον δοκοῦν ὑπάρχειν ὑπάρχει, καὶ τὸ μᾶλλον. ἔτι δυοῖν περὶ δύο λεγομένων, εἰ τὸ θατέρω μᾶλλον ὑπάρχειν δοκοῦν μὴ ὑπάρχει, οὐδὲ τὸ λοιπὸν τῷ λοιπῷ, εἰ δὲ τὸ ἥττον δοκοῦν τῷ ἐτέρω ὑπάρχειν ὑπάρχει, καὶ τὸ λοιπὸν τῷ λοιπῷ.

Ἔτι ἐκ τοῦ ὁμοίως ὑπάρχειν ἢ δοκεῖν ὑπάρχειν τριχῶς, καθάπερ ἐκ τοῦ μᾶλλον ἐπὶ τῶν ὕστερον ῥηθέντων τριῶν τόπων ἐλέγετο. εἴτε γὰρ ἐν τι δυσὶν ὁμοίως ὑπάρχει ἢ δοκεῖ ὑπάρχειν, εἰ τῷ ἐτέρω μὴ ὑπάρχει, οὐδὲ τῷ ἐτέρω, εἰ δὲ θατέρω ὑπάρχει, καὶ τῷ λοιπῷ· εἴτε δύο τῷ αὐτῷ ὁμοίως, εἰ τὸ ἕτερον μὴ ὑπάρχει, οὐδὲ τὸ λοιπόν, εἰ δὲ θάτερον, καὶ τὸ λοιπόν. τὸν αὐτὸν δὲ τρόπον καὶ εἰ δύο δυσὶν ὁμοίως ὑπάρχει· εἰ γὰρ τὸ ἕτερον τῷ ἐτέρω μὴ ὑπάρχει, οὐδὲ τὸ λοιπὸν τῷ λοιπῷ· εἰ δὲ ὑπάρχει τὸ ἕτερον τῷ ἐτέρω, καὶ τὸ λοιπὸν τῷ λοιπῷ.

Ἐκ μὲν οὖν τοῦ μᾶλλον καὶ ἥττον καὶ τοῦ ὁμοίως τοσαυταχῶς ἐνδέχεται ἐπιχειρεῖν. ἔτι δ' ἐκ τῆς προσθέσεως, ἐὰν ἕτερον πρὸς ἕτερον προστεθὲν ποιῇ ἀγαθὸν ἢ λευκὸν μὴ ὄν πρότερον ἀγαθὸν ἢ λευκόν, τὸ προστεθὲν ἔσται ἀγαθὸν ἢ λευκόν, οἷόνπερ καὶ τὸ ὅλον ποιεῖ. ἔτι εἰ πρὸς τὸ ὑπάρχον προστεθὲν τι μᾶλλον ποιεῖ τοιοῦτον οἷον ὑπῆρχε, καὶ αὐτὸ ἔσται τοιοῦτον. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων. χρήσιμος δὲ οὐκ ἐν ἅπασιν ὁ τόπος, ἀλλ' ἐν οἷς τὴν τοῦ μᾶλλον

ὑπεροχὴν συμβαίνει γίνεσθαι. οὗτος δὲ ὁ τόπος οὐκ ἀντιστρέφει πρὸς τὸ ἀνασκευάζειν. εἰ γὰρ μὴ ποιεῖ τὸ προστιθέμενον ἀγαθόν, οὐδέπω δῆλον εἰ αὐτὸ μὴ ἀγαθόν· τὸ γὰρ [115b] ἀγαθὸν κακῶ προστιθέμενον οὐκ ἐξ ἀνάγκης ἀγαθὸν τὸ ὅλον ποιεῖ, οὐδὲ λευκὸν τὸ λευκὸν μέλανι.

Πάλιν εἴ τι μᾶλλον καὶ ἥττον λέγεται, καὶ ἀπλῶς ὑπάρχει· τὸ γὰρ μὴ ὄν ἀγαθὸν ἢ λευκὸν οὐδὲ μᾶλλον ἢ ἥττον ἀγαθὸν ἢ λευκὸν ῥηθήσεται· τὸ γὰρ κακὸν οὐδενὸς μᾶλλον ἢ ἥττον ἀγαθὸν ἀλλὰ μᾶλλον κακὸν ἢ ἥττον ῥηθήσεται. οὐκ ἀντιστρέφει δ' οὐδ' οὗτος ὁ τόπος πρὸς τὸ ἀνασκευάσαι· πολλὰ γὰρ τῶν μὴ λεγομένων μᾶλλον καὶ ἥττον ἀπλῶς ὑπάρχει· ἄνθρωπος γὰρ οὐ λέγεται μᾶλλον καὶ ἥττον, ἀλλ' οὐ διὰ τοῦτο οὐκ ἔστιν ἄνθρωπος.

Τὸν αὐτὸν δὲ τρόπον σκεπτέον καὶ ἐπὶ τοῦ κατὰ τι καὶ ποτὲ καὶ πού· εἰ γὰρ κατὰ τι ἐνδέχεται, καὶ ἀπλῶς ἐνδέχεται· ὁμοίως δὲ καὶ τὸ ποτὲ ἢ πού· τὸ γὰρ ἀπλῶς ἀδύνατον οὔτε κατὰ τι οὔτε ποτὲ οὔτε πού ἐνδέχεται. (ἐνστασις ὅτι κατὰ τι μὲν εἰσι φύσει σπουδαῖοι, οἷον ἐλευθέριοι ἢ σωφρονικοί, ἀπλῶς δὲ οὐκ εἰσὶ φύσει σπουδαῖοι. ὁμοίως δὲ καὶ ποτὲ μὲν ἐνδέχεται τῶν φθαρτῶν τι μὴ φθαρῆναι, ἀπλῶς δ' οὐκ ἐνδέχεται μὴ φθαρῆναι. τὸν αὐτὸν δὲ τρόπον καὶ πού μὲν συμφέρει τοιαύτη διαίτη χρῆσθαι, οἷον ἐν τοῖς νοσώδεσι τόποις, ἀπλῶς δ' οὐ συμφέρει. ἔτι δὲ πού μὲν ἓνα μόνον δυνατόν εἶναι, ἀπλῶς δὲ οὐ δυνατόν ἓνα μόνον εἶναι. τὸν αὐτὸν δὲ τρόπον καὶ πού μὲν καλὸν τὸν πατέρα θύειν, οἷον ἐν Τριβαλλοῖς, ἀπλῶς δ' οὐ καλόν. ἢ τοῦτο μὲν οὐ πού σημαίνει ἀλλὰ τισίν· οὐδὲν γὰρ διαφέρει ὅπου ἂν ᾧσιν· πανταχοῦ γὰρ αὐτοῖς ἔσται καλόν, οὔσι Τριβαλλοῖς. πάλιν ποτὲ μὲν συμφέρει φαρμακεύεσθαι, οἷον ὅταν νοσῇ, ἀπλῶς δ' οὐ. ἢ οὐδὲ τοῦτο ποτὲ σημαίνει ἀλλὰ τῷ διακειμένῳ πως· οὐδὲν γὰρ διαφέρει ὅποτεοῦν, ἐὰν οὕτω μόνον διακείμενος ᾗ.) τὸ δ' ἀπλῶς ἐστὶν ὁ μηδενὸς προστεθέντος ἐρεῖς ὅτι καλόν ἐστὶν ἢ τὸ ἐναντίον· οἷον τὸ τὸν πατέρα θύειν οὐκ ἐρεῖς καλόν εἶναι ἀλλὰ τισὶ καλόν εἶναι· οὐκ ἄρα ἀπλῶς καλόν· ἀλλὰ τὸ τοὺς θεοὺς τιμᾶν ἐρεῖς καλόν οὐδὲν προσθεῖς· ἀπλῶς γὰρ καλόν ἐστὶν. ὥστε ὁ ἂν μηδενὸς προστιθεμένου δοκῇ εἶναι καλόν ἢ αἰσχρὸν ἢ ἄλλο τι τῶν τοιούτων, ἀπλῶς ῥηθήσεται.

[116a] Πότερον δ' αἰρετώτερον ἢ βέλτιον δυεῖν ἢ πλείονων, ἐκ τῶνδε σκεπτέον. πρῶτον δὲ διωρίσθω ὅτι τὴν σκέψιν ποιούμεθα οὐχ ὑπὲρ τῶν πολλῶν διεστώτων καὶ μεγάλην πρὸς ἄλληλα διαφορὰν ἔχοντων (οὐδεὶς γὰρ ἀπορεῖ πότερον ἢ εὐδαιμονία ἢ ὁ πλοῦτος αἰρετώτερον), ἀλλ' ὑπὲρ τῶν σύνεγγυς, καὶ περὶ ὧν ἀμφισβητοῦμεν ποτέρῳ δεῖ προσθέσθαι μᾶλλον, διὰ τὸ μηδεμίαν ὁρᾶν τοῦ ἑτέρου πρὸς τὸ ἕτερον ὑπεροχὴν. δῆλον οὖν ἐπὶ τῶν τοιούτων ὅτι δειχθείσης ὑπεροχῆς ἢ μιᾶς ἢ πλείονων συγκαταθήσεται ἡ διάνοια ὅτι τοῦτ' ἐστὶν αἰρετώτερον, ὁπότερον τυγχάνει αὐτῶν ὑπερέχον.

Πρῶτον μὲν οὖν τὸ πολυχρονιώτερον ἢ βεβαιότερον αἰρετώτερον τοῦ ἥττον τοιούτου. καὶ ὁ μᾶλλον ἂν ἔλοιτο ὁ φρόνιμος ἢ ὁ ἀγαθὸς ἀνὴρ ἢ ὁ νόμος ὁ ὀρθὸς ἢ οἱ σπουδαῖοι περὶ ἕκαστα αἰρούμενοι ἢ τοιοῦτοὶ εἰσιν ἢ οἱ ἐν ἐκάστῳ γένει ἐπιστήμονες, ἢ οἱ πλείους ἢ πάντες, οἷον ἐν ἱατρικῇ ἢ τεκτονικῇ ἢ οἱ πλείους τῶν ἱατρῶν ἢ πάντες, ἢ ὅσα ὅλως οἱ πλείους ἢ πάντες ἢ πάντα, οἷον τὰγαθόν· πάντα γὰρ τὰγαθοῦ ἐφίεται. δεῖ δ' ἄγειν πρὸς ὃ τι ἂν ἢ χρήσιμον τὸ ῥηθησόμενον. ἔστι δ' ἀπλῶς μὲν βέλτιον καὶ αἰρετώτερον τὸ κατὰ τὴν βελτίῳ ἐπιστήμην, τινὶ δὲ τὸ κατὰ τὴν οἰκίαν.

Ἔπειτα δὲ τὸ ὅπερ τόδε τι τοῦ μὴ ἐν γένει, οἷον ἡ δικαιοσύνη τοῦ δικαίου· τὸ μὲν γὰρ ἐν γένει τῷ ἀγαθῷ, τὸ δ' οὐ, καὶ τὸ μὲν ὅπερ ἀγαθόν, τὸ δ' οὐ. οὐδὲν γὰρ λέγεται ὅπερ τὸ γένος ὃ μὴ τυγχάνει ἐν τῷ γένει ὄν· οἷον ὁ λευκὸς ἄνθρωπος οὐκ ἔστιν ὅπερ χρῶμα. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων.

Καὶ τὸ δι' αὐτὸ αἰρετὸν τοῦ δι' ἕτερον αἰρετοῦ αἰρετώτερον, οἷον τὸ ὑγιαίνειν τοῦ γυμνάζεσθαι· τὸ μὲν γὰρ δι' αὐτὸ αἰρετόν, τὸ δὲ δι' ἕτερον. καὶ τὸ καθ' αὐτὸ τοῦ κατὰ συμβεβηκός, οἷον τὸ τοὺς φίλους δικαίους εἶναι τοῦ τοὺς ἐχθρούς. τὸ μὲν γὰρ καθ' αὐτὸ αἰρετόν, τὸ δὲ κατὰ συμβεβηκός· τὸ γὰρ τοὺς ἐχθροὺς δικαίους εἶναι κατὰ συμβεβηκός αἰρούμεθα, ὅπως μηδὲν ἡμᾶς βλάπτωσιν. ἔστι δὲ τοῦτο ταὐτὸ τῷ πρὸ αὐτοῦ, διαφέρει δὲ τῷ τρόπῳ· τὸ μὲν γὰρ τοὺς φίλους δικαίους εἶναι δι' αὐτὸ αἰρούμεθα, καὶ εἰ μηδὲν ἡμῖν μέλλει ἔσσεσθαι, κἂν ἐν Ἰνδοῖς ὣσιν· τὸ δὲ τοὺς ἐχθροὺς δι' ἕτερον, ὅπως μηθὲν ἡμᾶς βλάπτωσιν.

[116b] Καὶ τὸ αἴτιον ἀγαθοῦ καθ' αὐτὸ τοῦ κατὰ συμβεβηκὸς αἰτίου, καθάπερ ἡ ἀρετὴ τῆς τύχης (ἡ μὲν γὰρ καθ' αὐτήν, ἡ δὲ κατὰ συμβεβηκός, αἰτία τῶν ἀγαθῶν) καὶ εἴ τι ἄλλο τοιοῦτον. ὁμοίως δὲ καὶ ἐπὶ τοῦ ἐναντίου· τὸ γὰρ καθ' αὐτὸ κακοῦ αἴτιον φευκτότερον τοῦ κατὰ συμβεβηκός, οἷον ἡ κακία καὶ ἡ τύχη· τὸ μὲν γὰρ καθ' αὐτὸ κακόν, ἡ δὲ τύχη κατὰ συμβεβηκός.

Καὶ τὸ ἀπλῶς ἀγαθὸν τοῦ τινὶ αἰρετώτερον, οἷον τὸ ὑγιαίνειν τοῦ τέμνεσθαι· τὸ μὲν γὰρ ἀπλῶς ἀγαθόν, τὸ δὲ τινί, τῷ δεομένῳ τομῆς. καὶ τὸ φύσει τοῦ μὴ φύσει, οἷον ἡ δικαιοσύνη τοῦ δικαίου· τὸ μὲν γὰρ φύσει, τὸ δ' ἐπίκτητον. καὶ τὸ τῷ βελτίονι καὶ τιμιωτέρῳ ὑπάρχον αἰρετώτερον, οἷον θεῷ ἢ ἀνθρώπῳ, καὶ ψυχῇ ἢ σώματι. καὶ τὸ τοῦ βελτίονος ἴδιον βέλτιον ἢ τὸ τοῦ χείρονος, οἷον τὸ τοῦ θεοῦ ἢ τὸ τοῦ ἀνθρώπου· κατὰ μὲν γὰρ τὰ κοινὰ ἐν ἀμφοτέροις οὐδὲν διαφέρει ἀλλήλων, τοῖς δ' ἰδίοις τὸ ἕτερον τοῦ ἑτέρου ὑπερέχει. καὶ τὸ ἐν βελτίοισιν ἢ προτέροις ἢ τιμιωτέροις βέλτιον, οἷον ὑγεία ἰσχύος καὶ κάλλους· ἡ μὲν γὰρ ἐν ὑγροῖς καὶ ξηροῖς καὶ θερμοῖς καὶ ψυχροῖς, ἀπλῶς δ' εἰπεῖν ἐξ ὧν πρώτων συνέστηκε τὸ ζῶν, τὰ δ' ἐν τοῖς ὑστέροις. ἡ μὲν γὰρ ἰσχύς ἐν τοῖς νεύροις καὶ ὀστοῖς, τὸ δὲ κάλλος τῶν μελῶν τις συμμετρία δοκεῖ εἶναι. καὶ τὸ τέλος τῶν πρὸς τὸ τέλος αἰρετώτερον δοκεῖ εἶναι, καὶ δυοῖν τὸ ἕγγιον τοῦ τέλους. καὶ ὅλως τὸ πρὸς τὸ τοῦ βίου τέλος αἰρετώτερον μᾶλλον ἢ τὸ πρὸς ἄλλο τι, οἷον τὸ πρὸς εὐδαιμονίαν συντεῖνον ἢ τὸ πρὸς φρόνησιν. καὶ τὸ δυνατόν τοῦ ἀδυνάτου. ἔτι δύο ποιητικῶν οὗ τὸ τέλος βέλτιον· ποιητικοῦ δὲ καὶ τέλους ἐκ τοῦ ἀνάλογον, ὅταν πλείονι ὑπερέχη τὸ τέλος τοῦ τέλους ἢ ἐκεῖνο τοῦ οἰκείου ποιητικοῦ, οἷον εἰ ἡ εὐδαιμονία πλείονι ὑπερέχει ὑγείας ἢ ὑγεία ὑγεινοῦ, τὸ ποιητικὸν εὐδαιμονίας βέλτιον ὑγείας. ὅσῳ γὰρ ἡ εὐδαιμονία ὑγείας ὑπερέχει, τοσοῦτῳ καὶ τὸ ποιητικὸν τὸ τῆς εὐδαιμονίας τοῦ ὑγεινοῦ ὑπερέχει· ἡ δὲ ὑγεία τοῦ ὑγεινοῦ ἐλάττονι ὑπερεῖχεν· ὥστε πλείονι ὑπερέχει τὸ ποιητικὸν εὐδαιμονίας τοῦ ὑγεινοῦ ἢ ἡ ὑγεία τοῦ ὑγεινοῦ. δηλον ἄρα ὅτι αἰρετώτερον τὸ ποιητικὸν εὐδαιμονίας τῆς ὑγείας· τοῦ γὰρ αὐτοῦ πλείονι ὑπερέχει.

Ἔτι τὸ κάλλιον καθ' αὐτὸ καὶ τιμιώτερον καὶ ἐπαινετώτερον, οἷον φιλία πλούτου καὶ δικαιοσύνη ἰσχύος· τὰ μὲν γὰρ καθ' αὐτὰ τῶν τιμίων καὶ ἐπαινετῶν, τὰ δ' [117a] οὐ καθ' αὐτὰ ἀλλὰ δι' ἕτερον. οὐδεὶς γὰρ τιμᾷ τὸν πλοῦτον δι' ἑαυτόν, ἀλλὰ δι' ἕτερον· τὴν δὲ φιλίαν καθ' αὐτό, καὶ εἰ μηδὲν μέλλει ἡμῖν ἕτερον ἀπ' αὐτῆς

ἔσεσθαι.

Ἦτι ὅταν δύο τινὰ ἢ σφόδρα αὐτοῖς παραπλήσια καὶ μὴ δυνάμεθα ὑπεροχὴν μηδεμίαν συνιδεῖν τοῦ ἐτέρου πρὸς τὸ ἕτερον, ὁρᾶν ἀπὸ τῶν παρεπομένων. ὥ γὰρ ἔπεται μείζον ἀγαθόν, τοῦθ' αἰρετώτερον· ἂν δ' ἢ τὰ ἐπόμενα κακά, ὥ τὸ ἔλαττον ἀκολουθεῖ κακόν, τοῦθ' αἰρετώτερον· ὄντων γὰρ ἀμφοτέρων αἰρετῶν οὐδὲν κωλύει δυσχερές τι παρέπεσθαι. διχῶς δ' ἀπὸ τοῦ ἔπεσθαι ἢ σκέψις· καὶ γὰρ πρότερον καὶ ὕστερον ἔπεται, οἷον τῷ μανθάνοντι τὸ μὲν ἀγνοεῖν πρότερον, τὸ δ' ἐπίστασθαι ὕστερον. βέλτιον δ' ὡς ἐπὶ πολὺ τὸ ὕστερον ἐπόμενον. λαμβάνειν οὖν τῶν ἐπομένων ὁπότερον ἂν ἢ χρήσιμον.

Ἦτι τὰ πλείω ἀγαθὰ τῶν ἐλαττόνων, ἢ ἀπλῶς ἢ ὅταν τὰ ἕτερα ἐν τοῖς ἐτέροις ἐνυπάρχη, τὰ ἐλάττω ἐν τοῖς πλείοσιν. (ἐνστασις, εἴ που θάτερον θατέρου χάριν· οὐδὲν γὰρ αἰρετώτερον τὰ ἄμφω τοῦ ἐνός, οἷον τὸ ὑγιαίνειν καὶ ἡ ὑγίεια τῆς ὑγιείας, ἐπειδὴ τὸ ὑγιαίνειν τῆς ὑγιείας ἔνεκεν αἰρούμεθα.) καὶ μὴ ἀγαθὰ δὲ ἀγαθῶν οὐδὲν κωλύει εἶναι αἰρετώτερα, οἷον εὐδαιμονίαν καὶ ἄλλο τι ὃ μὴ ἔστιν ἀγαθὸν δικαιοσύνης καὶ ἀνδρείας. καὶ ταῦτα μεθ' ἡδονῆς μᾶλλον ἢ ἄνευ ἡδονῆς. καὶ ταῦτα μετ' ἀλυπίας ἢ μετὰ λύπης.

Καὶ ἕκαστον ἐν ᾧ καιρῷ μείζον δύναται, ἐν τούτῳ καὶ αἰρετώτερον, οἷον τὸ ἀλύπως ἐν τῷ γήρᾳ μᾶλλον ἢ ἐν τῇ νεότητι· μείζον γὰρ ἐν τῷ γήρᾳ δύναται. κατὰ ταῦτα δὲ καὶ ἡ φρόνησις ἐν τῷ γήρᾳ αἰρετώτερον· οὐδεὶς γὰρ τοὺς νέους αἰρεῖται ἡγεμόνας, διὰ τὸ μὴ ἀξιῶν φρονίμους εἶναι. ἢ δ' ἀνδρεία ἀνάπαλιν· ἐν τῇ νεότητι γὰρ ἀναγκαιότερα ἢ κατὰ τὴν ἀνδρείαν ἐνέργεια. ὁμοίως δὲ καὶ ἡ σωφροσύνη· μᾶλλον γὰρ οἱ νέοι τῶν πρεσβυτέρων ὑπὸ τῶν ἐπιθυμιῶν ἐνοχλοῦνται.

Καὶ ὃ ἐν παντὶ καιρῷ ἢ ἐν τοῖς πλείστοις χρησιμώτερον, οἷον δικαιοσύνη καὶ σωφροσύνη ἀνδρείας· αἱ μὲν γὰρ ἀεί, ἢ δὲ ποτὲ χρησίμη. καὶ ὃ πάντων ἐχόντων μηδὲν θατέρου δεόμεθα ἢ ὃ ἐχόντων προσδεόμεθα τοῦ λοιποῦ, καθάπερ ἐπὶ δικαιοσύνης καὶ ἀνδρείας· δικαίων μὲν γὰρ πάντων [117b] ὄντων οὐδὲν χρήσιμος ἢ ἀνδρεία, ἀνδρείων δὲ πάντων ὄντων χρήσιμος ἢ δικαιοσύνη.

Ἦτι ἐκ τῶν φθορῶν καὶ τῶν ἀποβολῶν, καὶ τῶν γενέσεων καὶ τῶν λήψεων, καὶ τῶν ἐναντίων. ὧν γὰρ αἱ φθοραὶ φευκτότεραι, αὐτὰ αἰρετώτερα. ὁμοίως δὲ καὶ ἐπὶ τῶν ἀποβολῶν καὶ τῶν ἐναντίων· εἰ γὰρ ἡ ἀποβολὴ ἢ τὸ ἐναντίον φευκτότερον, αὐτὸ αἰρετώτερον. ἐπὶ δὲ

τῶν γενέσεων καὶ τῶν λήψεων ἀνάπαλιν· ὧν γὰρ αἱ λήψεις καὶ αἱ γενέσεις αἰρετώτεραι, καὶ αὐτὰ αἰρετώτερα.

Ἄλλος τόπος, τὸ ἐγγύτερον τὰγαθοῦ βέλτιον καὶ αἰρετώτερον, καὶ τὸ ὁμοιότερον τὰγαθῷ, οἷον ἡ δικαιοσύνη δικαίου. καὶ τὸ τῷ βελτίονι αὐτοῦ ὁμοιότερον, καθάπερ τὸν Αἴαντα τοῦ Ὀδυσσεῶς φασὶ βελτίῳ τινὲς εἶναι, διότι ὁμοιότερος τῷ Ἀχιλλεῖ. (ἐνστασις τούτου ὅτι οὐκ ἀληθές· οὐδὲν γὰρ κωλύει μὴ ἢ βέλτιστος ὁ Ἀχιλλεύς, ταύτῃ ὁμοιότερον εἶναι τὸν Αἴαντα, τοῦ ἐτέρου ὄντος μὲν ἀγαθοῦ μὴ ὁμοίου δέ.) σκοπεῖν δὲ καὶ εἰ ἐπὶ τὰ γελοιότερα εἴη ὅμοιον, καθάπερ ὁ πίθηκος τῷ ἀνθρώπῳ, τοῦ ἵππου μὴ ὄντος ὁμοίου· οὐ γὰρ κάλλιον ὁ πίθηκος, ὁμοιότερον δὲ τῷ ἀνθρώπῳ. πάλιν ἐπὶ δυοῖν, εἰ τὸ μὲν τῷ βελτίονι τὸ δὲ τῷ χείρονι ὁμοιότερον, εἴη ἂν βέλτιον τὸ τῷ βελτίονι ὁμοιότερον. (ἔχει δὲ καὶ τοῦτο ἐνστασιν· οὐδὲν γὰρ κωλύει τὸ μὲν τῷ βελτίονι ἡρέμα ὅμοιον εἶναι, τὸ δὲ τῷ χείρονι σφόδρα, οἷον εἰ ὁ μὲν Αἴας τῷ Ἀχιλλεῖ ἡρέμα, ὁ δ' Ὀδυσσεὺς τῷ Νέστορι σφόδρα. καὶ εἰ τὸ μὲν τῷ βελτίονι ἐπὶ τὰ χεῖρῳ ὅμοιον εἴη, τὸ δὲ τῷ χείρονι ἐπὶ τὰ βελτίῳ, καθάπερ ἵππος ὄνῳ καὶ πίθηκος ἀνθρώπῳ.)

Ἄλλος, τὸ ἐπιφανέστερον τοῦ ἥττον τοιούτου, καὶ τὸ χαλεπώτερον· μᾶλλον γὰρ ἀγαπῶμεν ἔχοντες ἢ μὴ ἔστι ῥαδίως λαβεῖν. καὶ τὸ ἰδιαίτερον τοῦ κοινοτέρου. καὶ τὸ τοῖς κακοῖς ἀκοινωνητότερον· αἰρετώτερον γὰρ ᾧ μηδεμία δυσχέρεια ἀκολουθεῖ ἢ ᾧ ἀκολουθεῖ.

Ἔτι εἰ ἀπλῶς τοῦτο τούτου βέλτιον, καὶ τὸ βέλτιστον τῶν ἐν τούτῳ βέλτιον τοῦ ἐν τῷ ἐτέρῳ βελτίστου· οἷον εἰ βέλτιον ἄνθρωπος ἵππου, καὶ ὁ βέλτιστος ἄνθρωπος τοῦ βελτίστου ἵππου βελτίων. καὶ εἰ τὸ βέλτιστον τοῦ βελτίστου βέλτιον, καὶ ἀπλῶς τοῦτο τούτου βέλτιον· οἷον εἰ ὁ βέλτιστος ἄνθρωπος τοῦ βελτίστου ἵππου βελτίων, καὶ ἀπλῶς ἄνθρωπος ἵππου βελτίων.

[118a] Ἔτι ὧν ἔστι τοὺς φίλους μετασχεῖν, αἰρετώτερα ἢ ὧν μὴ. καὶ ἢ πρὸς τὸν φίλον πρᾶξαι μᾶλλον βουλόμεθα ἢ ἢ πρὸς τὸν τυχόντα, ταῦτα αἰρετώτερα, οἷον τὸ δικαιοπραγεῖν καὶ εὖ ποιεῖν μᾶλλον ἢ τὸ δοκεῖν· τοὺς γὰρ φίλους εὖ ποιεῖν βουλόμεθα μᾶλλον ἢ δοκεῖν, τοὺς δὲ τυχόντας ἀνάπαλιν.

Καὶ τὰ ἐκ περιουσίας τῶν ἀναγκαίων βελτίῳ, ἐνίστε δὲ καὶ αἰρετώτερα· βέλτιον γὰρ τοῦ ζῆν τὸ εὖ ζῆν, τὸ δὲ εὖ ζῆν ἐστὶν ἐκ περιουσίας, αὐτὸ δὲ τὸ ζῆν ἀναγκαῖον. ἐνίστε δὲ τὰ βελτίῳ οὐχὶ καὶ

αίρετώτερα· οὐ γὰρ εἰ βέλτιον, ἀναγκαῖον καὶ αἰρετώτερα· τὸ γοῦν φιλοσοφεῖν βέλτιον τοῦ χρηματίζεσθαι, ἀλλ' οὐχ αἰρετώτερον τῷ ἐνδεεῖ τῶν ἀναγκαίων. τὸ δ' ἐκ περιουσίας ἐστὶν ὅταν ὑπαρχόντων τῶν ἀναγκαίων ἄλλα τινὰ προσκατασκευάζεται τις τῶν καλῶν. σχεδὸν δὲ ἴσως αἰρετώτερόν ἐστι τὸ ἀναγκαῖον, βέλτιον δὲ τὸ ἐκ περιουσίας.

Καὶ ὁ μὴ ἔστι παρ' ἄλλου πορίσασθαι ἢ ὁ ἔστι καὶ παρ' ἄλλου, οἷον πέπονθεν ἡ δικαιοσύνη πρὸς τὴν ἀνδρείαν. καὶ εἰ τότε μὲν ἄνευ τοῦδε αἰρετόν, τότε δὲ ἄνευ τοῦδε μή· οἷον δύναμις ἄνευ φρονήσεως οὐχ αἰρετόν, φρόνησις δ' ἄνευ δυνάμεως αἰρετόν. καὶ δυοῖν εἰ θάτερον ἀρνούμεθα, ἵνα τὸ λοιπὸν δόξῃ ἡμῖν ὑπάρχειν, ἐκεῖνο αἰρετώτερον ὁ βουλόμεθα δοκεῖν ὑπάρχειν· οἷον φιλοπονεῖν ἀρνούμεθα, ἴν' εὐφυνεῖς εἶναι δόξωμεν.

Ἔτι οὗ τῇ ἀπουσίᾳ ἦττον ἐπιτιμητέον δυσφοροῦσι, τοῦτο αἰρετώτερον. καὶ οὗ τῇ ἀπουσίᾳ μὴ δυσφοροῦσι μᾶλλον ἐπιτιμητέον, τοῦτο αἰρετώτερον.

Ἔτι τῶν ὑπὸ τὸ εἶδος τὸ ἔχον τὴν οἰκείαν ἀρετὴν τοῦ μὴ ἔχοντος· ἄμφω δ' ἐχόντων τὸ μᾶλλον ἔχον.

Ἔτι εἰ τὸ μὲν ποιεῖ ἀγαθὸν ἐκεῖνο ᾧ ἂν παρῇ, τὸ δὲ μὴ ποιεῖ, τὸ ποιοῦν αἰρετώτερον, καθάπερ καὶ θερμότερον τὸ θερμαῖνον τοῦ μή. εἰ δ' ἄμφω ποιεῖ, τὸ μᾶλλον ποιοῦν· ἢ εἰ τὸ βέλτιον καὶ κυριώτερον ποιεῖ ἀγαθόν, οἷον εἰ τὸ μὲν τὴν ψυχὴν τὸ δὲ τὸ σῶμα.

Ἔτι ἀπὸ τῶν πτώσεων καὶ τῶν χρήσεων καὶ τῶν πράξεων καὶ τῶν ἔργων. καὶ ταῦτα δὲ ἀπ' ἐκείνων· ἀκολουθεῖ γὰρ ἀλλήλοις. οἷον εἰ τὸ δικαίως αἰρετώτερον τοῦ ἀνδρείως, καὶ ἡ δικαιοσύνη τῆς ἀνδρείας αἰρετώτερον· καὶ εἰ ἡ δικαιοσύνη τῆς ἀνδρείας αἰρετώτερον, καὶ τὸ δικαίως τοῦ ἀνδρείως. παραπλησίως δὲ καὶ ἐπὶ τῶν ἄλλων.

[118b] Ἔτι εἴ τινος τοῦ αὐτοῦ τὸ μὲν μείζον ἀγαθόν ἐστι τὸ δὲ ἔλαττον, αἰρετώτερον τὸ μείζον. ἢ εἰ μείζονος μείζον θάτερον. ἀλλὰ καὶ εἰ δύο τινὰ ἐνός τινος εἶη αἰρετώτερα, τὸ μᾶλλον αἰρετώτερον τοῦ ἦττον αἰρετωτέρου αἰρετώτερον. ἔτι οὗ ἡ ὑπερβολὴ τῆς ὑπερβολῆς αἰρετωτέρα, καὶ αὐτὸ αἰρετώτερον· οἷον φιλία χρημάτων· αἰρετωτέρα γὰρ ἡ τῆς φιλίας ὑπερβολὴ τῆς τῶν χρημάτων. καὶ οὗ μᾶλλον ἂν ἔλοιτο αὐτὸς αὐτῷ αἴτιος εἶναι ἢ οὗ ἕτερον, οἷον τοὺς φίλους τῶν χρημάτων.

Ἔτι ἐκ τῆς προσθέσεως, εἰ τῷ αὐτῷ προστιθέμενόν τι τὸ ὅλον

αίρετώτερον ποιεῖ. εὐλαβεῖσθαι δὲ δεῖ προτείνειν ἐφ' ὧν τῷ μὲν ἑτέρῳ τῶν προστιθεμένων χρηται τὸ κοινὸν ἢ ἄλλως πως συνεργόν ἐστι, τῷ δὲ λοιπῷ μὴ χρηται μηδὲ συνεργόν ἐστιν, οἷον πρίονα καὶ δρέπανον μετὰ τεκτονικῆς· αἰρετώτερον γὰρ ὁ πρίων συνδυαζομένοιιν, ἀπλῶς δὲ οὐχ αἰρετώτερον. πάλιν εἰ ἐλάττονι προστεθὲν τι τὸ ὅλον μείζον ποιεῖ. ὁμοίως δὲ καὶ ἐκ τῆς ἀφαιρέσεως· οὗ γὰρ ἀφαιρεθέντος ἀπὸ τοῦ αὐτοῦ τὸ λειπόμενον ἔλαττον, ἐκεῖνο μείζον ἂν εἴη, ὃ ποτε ἀφαιρεθὲν τὸ λειπόμενον ἔλαττον ποιεῖ.

Καὶ εἰ τὸ μὲν δι' αὐτὸ τὸ δὲ διὰ τὴν δόξαν αἰρετόν, οἷον υἰγία κάλλους. ὅρος δὲ τοῦ πρὸς δόξαν τὸ μηδενὸς συνειδότος μὴ ἂν σπουδάσαι ὑπάρχειν. καὶ εἰ τὸ μὲν δι' αὐτὸ καὶ διὰ τὴν δόξαν αἰρετόν, τὸ δὲ διὰ θάτερον μόνον. καὶ ὁπότερον μᾶλλον δι' αὐτὸ τίμιον, τοῦτο καὶ βέλτιον καὶ αἰρετώτερον. τιμιώτερον δ' ἂν εἴη καθ' αὐτὸ ὃ μηδενὸς ἄλλου μέλλοντος ὑπάρξειν δι' αὐτὸ αἰρούμεθα μᾶλλον.

Ἔτι διελέσθαι ποσαχῶς τὸ αἰρετὸν λέγεται καὶ τίνων χάριν, οἷον τοῦ συμφέροντος ἢ τοῦ καλοῦ ἢ τοῦ ἡδέος· τὸ γὰρ πρὸς ἅπαντα ἢ πρὸς τὰ πλείω χρήσιμον αἰρετώτερον ἂν ὑπάρχοι τοῦ μὴ ὁμοίως. τῶν δ' αὐτῶν ἀμφοτέροις ὑπαρχόντων, ὁποτέρῳ μᾶλλον ὑπάρχει σκεπτέον, οἷον πότερον ἥδιον ἢ κάλλιον ἢ συμφορώτερον. πάλιν τὸ τοῦ βελτίονος ἔνεκεν αἰρετώτερον, οἷον τὸ ἀρετῆς ἔνεκεν ἢ ἡδονῆς. ὁμοίως δὲ καὶ ἐπὶ τῶν φευκτῶν· φευκτότερον γὰρ τὸ μᾶλλον ἐμποδιστικὸν τῶν αἰρετῶν, οἷον νόσος αἵσχους· καὶ γὰρ ἡδονῆς καὶ τοῦ σπουδαῖον εἶναι κωλυτικώτερον ἢ νόσος.

Ἔτι ἐκ τοῦ ὁμοίως δεικνύναι φευκτὸν καὶ αἰρετὸν τὸ προκειμένον· ἦττον γὰρ αἰρετὸν τὸ τοιοῦτον ὃ καὶ ἔλοιτ' ἂν τις ὁμοίως καὶ φύγοι, τοῦ ἑτέρου ὄντος αἰρετοῦ μόνον.

[119a] Τὰς μὲν οὖν πρὸς ἄλληλα συγκρίσεις καθάπερ εἴρηται ποιητέον. οἱ αὐτοὶ δὲ τόποι χρήσιμοι καὶ πρὸς τὸ δεικνύναι ὅτιοῦν αἰρετὸν ἢ φευκτόν· ἀφαιρεῖν γὰρ μόνον δεῖ τὴν πρὸς ἕτερον ὑπεροχὴν. εἰ γὰρ τὸ τιμιώτερον αἰρετώτερον, καὶ τὸ τίμιον αἰρετόν, καὶ εἰ τὸ χρησιμώτερον αἰρετώτερον, καὶ τὸ χρήσιμον αἰρετόν. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων, ὅσα τοιαύτην ἔχει τὴν σύγκρισιν. ἐπ' ἐνίων γὰρ εὐθέως κατὰ τὴν πρὸς ἕτερον σύγκρισιν καὶ ὅτι αἰρετὸν ἐκάτερον ἢ τὸ ἕτερον λέγομεν, οἷον ὅταν τὸ μὲν φύσει ἀγαθὸν τὸ δὲ μὴ φύσει λέγωμεν· τὸ γὰρ φύσει ἀγαθὸν δῆλον ὅτι αἰρετόν ἐστιν.

Ληπτέον δ' ὅτι μάλιστα καθόλου τοὺς τόπους περὶ τοῦ μᾶλλον

καὶ τοῦ μείζονος· ληφθέντες γὰρ οὕτως πρὸς πλείω χρήσιμοι ἂν εἶησαν. ἔστι δ' αὐτῶν τῶν εἰρημένων ἐνίους καθόλου μᾶλλον ποιεῖν μικρὸν παραλλάσσοντα τῇ προσηγορίᾳ, οἷον τὸ φύσει τοιοῦτο τοῦ μὴ φύσει τοιούτου μᾶλλον τοιοῦτο. καὶ εἰ τὸ μὲν ποιεῖ τὸ δὲ μὴ ποιεῖ τὸ ἔχον τοιόνδε ᾧ ἂν ὑπάρχη, μᾶλλον τοιοῦτο ὃ ποτε ποιεῖ ἢ ὃ μὴ ποιεῖ, εἰ δ' ἄμφω ποιεῖ, τὸ μᾶλλον ποιοῦν τοιοῦτο.

Ἔτι εἰ τοῦ αὐτοῦ τινος τὸ μὲν μᾶλλον τὸ δὲ ἥττον τοιοῦτο· καὶ εἰ τὸ μὲν τοιούτου μᾶλλον τοιοῦτο, τὸ δὲ μὴ τοιούτου, δῆλον ὅτι τὸ πρῶτον μᾶλλον τοιοῦτο. ἔτι ἐκ τῆς προσθέσεως, εἰ τῷ αὐτῷ προστιθέμενον τὸ ὅλον μᾶλλον ποιεῖ τοιοῦτο, ἢ εἰ τῷ ἥττον τοιούτῳ προστιθέμενον τὸ ὅλον μᾶλλον ποιεῖ τοιοῦτο. ὁμοίως δὲ καὶ ἐκ τῆς ἀφαιρέσεως· οὗ γὰρ ἀφαιρεθέντος τὸ λειπόμενον ἥττον τοιοῦτο, αὐτὸ μᾶλλον τοιοῦτο. καὶ τὰ τοῖς ἐναντίοις ἀμιγέστερα μᾶλλον τοιαῦτα, οἷον λευκότερον τὸ τῷ μέλανι ἀμιγέστερον. ἔτι παρὰ τὰ εἰρημένα πρότερον τὸ μᾶλλον ἐπιδεχόμενον τὸν οἰκεῖον τοῦ προκειμένου λόγον· οἷον εἰ τοῦ λευκοῦ ἐστὶ λόγος χρῶμα διακριτικὸν ὄψεως, λευκότερον ὃ ἐστὶ μᾶλλον χρῶμα διακριτικὸν ὄψεως.

Ἄν δ' ἐπὶ μέρους καὶ μὴ καθόλου τὸ πρόβλημα τεθῇ, πρῶτον μὲν οἱ εἰρημένοι καθόλου κατασκευαστικοὶ ἢ ἀνασκευαστικοὶ τόποι πάντες χρήσιμοι. καθόλου γὰρ ἀναιροῦντες ἢ κατασκευάζοντες καὶ ἐπὶ μέρους δείκνυμεν· εἰ γὰρ παντὶ ὑπάρχει, καὶ τινί, καὶ εἰ μηδενί, οὐδὲ τινί. μάλιστα δ' ἐπίκαιροι καὶ κοινοὶ τῶν τόπων οἱ τ' ἐκ τῶν ἀντικειμένων καὶ τῶν συστοίχων καὶ τῶν πτώσεων. ὁμοίως γὰρ ἔνδοξον τὸ ἀξιῶσαι, εἰ πᾶσα ἡδονὴ ἀγαθόν, καὶ λύπην πᾶσαν εἶναι κακόν, [119b] τῷ εἴ τις ἡδονὴ ἀγαθόν, καὶ λύπην εἶναι τινα κακόν. ἔτι εἴ τις αἴσθησις μὴ ἔστι δύναμις, καὶ ἀναισθησία τις οὐκ ἔστιν ἀδυναμία. καὶ εἴ τι ὑποληπτὸν ἐπιστητόν, καὶ ὑπόληψίς τις ἐπιστήμη. πάλιν εἴ τι τῶν ἀδίκων ἀγαθόν, καὶ τῶν δικαίων τι κακόν· πάλιν εἴ τι τῶν δικαίως κακόν, καὶ τῶν ἀδίκως τι ἀγαθόν. καὶ εἴ τι τῶν ἡδέων φευκτόν, ἡδονὴ τις φευκτόν. κατὰ ταῦτα δὲ καὶ εἴ τι τῶν ἡδέων ὠφέλιμον, ἡδονὴ τις ὠφέλιμον. καὶ ἐπὶ τῶν φθαρτικῶν δὲ καὶ τῶν γενέσεων καὶ φθορῶν ὡσαύτως. εἰ γὰρ τι φθαρτικὸν ἡδονῆς ἢ ἐπιστήμης ὃν ἀγαθόν ἐστίν, εἴη ἂν τις ἡδονὴ ἢ ἐπιστήμη τῶν κακῶν. ὁμοίως δὲ καὶ εἰ φθορά τις ἐπιστήμης τῶν ἀγαθῶν ἢ γενέσεις τῶν κακῶν, ἔσται τις ἐπιστήμη τῶν κακῶν· οἷον εἰ τὸ ἐπιλανθάνεσθαι ἃ τις αἰσχροῦ ἐπραξε τῶν ἀγαθῶν, ἢ τὸ ἀναμιμνήσκεσθαι τῶν κακῶν,

εἴη ἂν τὸ ἐπίστασθαι ἅ τις αἰσχροῦ ἐπραξε τῶν κακῶν. ὡσαύτως δὲ καὶ ἐπὶ τῶν ἄλλων· ἐν ἅπασιν γὰρ ὁμοίως τὸ ἔνδοξον.

Ἔτι ἐκ τοῦ μᾶλλον καὶ ἥττον καὶ ὁμοίως. εἰ γὰρ μᾶλλον μὲν τῶν ἐξ ἄλλου γένους τι τοιοῦτο, ἐκείνων δὲ μηδὲν ἐστίν, οὐδ' ἂν τὸ εἰρημένον εἴη τοιοῦτον· οἷον εἰ μᾶλλον μὲν ἐπιστήμη τις ἀγαθὸν ἢ ἡδονή, μηδεμία δ' ἐπιστήμη ἀγαθόν, οὐδ' ἂν ἡδονή εἴη. καὶ ἐκ τοῦ ὁμοίως δὲ καὶ ἥττον ὡσαύτως· ἔσται γὰρ καὶ ἀναιρεῖν καὶ κατασκευάζειν, πλὴν ἐκ μὲν τοῦ ὁμοίως ἀμφοτέρω, ἐκ δὲ τοῦ ἥττον κατασκευάζειν μόνον, ἀνασκευάζειν δὲ οὐ. εἰ γὰρ ὁμοίως δυνάμεις τις ἀγαθὸν καὶ ἐπιστήμη, ἔστι δὲ τις δύναμις ἀγαθόν, καὶ ἐπιστήμη ἐστίν· εἰ δὲ μηδεμία δύναμις, οὐδ' ἐπιστήμη. εἰ δ' ἥττον δυνάμεις τις ἀγαθὸν ἢ ἐπιστήμη, ἔστι δὲ τις δύναμις ἀγαθόν, καὶ ἐπιστήμη. εἰ δὲ μηδεμία δύναμις ἀγαθόν, οὐκ ἀνάγκη καὶ ἐπιστήμην μηδεμίαν εἶναι ἀγαθόν. δῆλον οὖν ὅτι κατασκευάζειν μόνον ἐκ τοῦ ἥττον ἔστιν.

Οὐ μόνον δ' ἐξ ἄλλου γένους ἔστιν ἀνασκευάζειν, ἀλλὰ καὶ ἐκ τοῦ αὐτοῦ, λαμβάνοντα τὸ μάλιστα τοιοῦτον· οἷον εἰ κεῖται ἐπιστήμη τις ἀγαθόν, δειχθεῖν δ' ὅτι φρόνησις οὐκ ἀγαθόν, οὐδ' ἄλλη οὐδεμία ἔσται, ἐπεὶ οὐδ' ἡ μάλιστα δοκοῦσα. ἔτι ἐξ ὑποθέσεως, ὁμοίως ἀξιῶσαντα, εἰ ἐνί, καὶ πᾶσιν ὑπάρχειν ἢ μὴ ὑπάρχειν, οἷον εἰ ἡ τοῦ ἀνθρώπου ψυχὴ ἀθάνατος, καὶ τὰς ἄλλας, εἰ δ' αὕτη μὴ, μηδὲ τὰς ἄλλας. εἰ μὲν οὖν ὑπάρχειν τινὶ κεῖται, δεικτέον ὅτι οὐχ ὑπάρχει τινί· ἀκολουθήσει γὰρ διὰ τὴν ὑπόθεσιν τὸ μηδενὶ ὑπάρχειν. εἰ δὲ [120a] τινὶ μὴ ὑπάρχειν κεῖται, δεικτέον ὅτι ὑπάρχει τινί· καὶ γὰρ οὕτως ἀκολουθήσει τὸ πᾶσιν ὑπάρχειν. δῆλον δ' ἐστὶν ὅτι ὁ ὑποτιθέμενος ποιεῖ τὸ πρόβλημα καθόλου, ἐπὶ μέρους τεθέντος· τὸν γὰρ ἐπὶ μέρους ὁμολογοῦντα καθόλου ἀξιοῖ ὁμολογεῖν, ἐπειδὴ, εἰ ἐνί, καὶ πᾶσιν ὁμοίως ἀξιοῖ ὑπάρχειν.

Ἀδιορίστου μὲν οὖν ὄντος τοῦ προβλήματος μοναχῶς ἀνασκευάζειν ἐνδέχεται, οἷον εἰ ἔφησεν ἡδονὴν ἀγαθὸν εἶναι ἢ μὴ ἀγαθὸν καὶ μηδὲν ἄλλο προσδιώρισεν. εἰ μὲν γὰρ τινὰ ἔφησεν ἡδονὴν ἀγαθὸν εἶναι, δεικτέον καθόλου ὅτι οὐδεμία, εἰ μέλλει ἀναιρεῖσθαι τὸ προκείμενον· ὁμοίως δὲ καὶ εἰ τινὰ ἔφησεν ἡδονὴν μὴ εἶναι ἀγαθόν, δεικτέον καθόλου ὅτι πᾶσα. ἄλλως δ' οὐκ ἐνδέχεται ἀναιρεῖν· ἐὰν γὰρ δείξωμεν ὅτι ἐστὶ τις ἡδονὴ οὐκ ἀγαθὸν ἢ ἀγαθόν, οὐπω ἀναιρεῖται τὸ προκείμενον. δῆλον οὖν ὅτι ἀναιρεῖν μὲν μοναχῶς ἐνδέχεται, κατασκευάζειν δὲ διχῶς· ἂν τε γὰρ καθόλου δείξωμεν ὅτι πᾶσα ἡδονὴ ἀγαθόν, ἂν τε ὅτι ἐστὶ τις ἡδονὴ ἀγαθόν,

δεδειγμένον ἔσται τὸ προκείμενον. ὁμοίως δὲ καὶ δέη διαλεχθῆναι ὅτι ἐστὶ τις ἡδονὴ οὐκ ἀγαθόν, ἐὰν δείξωμεν ὅτι οὐδεμία ἀγαθὸν ἢ ὅτι τις οὐκ ἀγαθόν, διειλεγμένοι ἐσόμεθα ἀμφοτέρως, καὶ καθόλου καὶ ἐπὶ μέρους, ὅτι ἐστὶ τις ἡδονὴ οὐκ ἀγαθόν. διωρισμένης δὲ τῆς θέσεως οὕσης, διχῶς ἀναιρεῖν ἔσται, οἷον εἰ τεθεῖη τινὶ μὲν ὑπάρχειν ἡδονῇ ἀγαθῷ εἶναι, τινὶ δ' οὐχ ὑπάρχειν· εἴτε γὰρ πᾶσα δειχθείη ἡδονὴ ἀγαθὸν εἴτε μηδεμία, ἀνηρημένον ἔσται τὸ προκείμενον. εἰ δὲ μίαν ἡδονὴν μόνην ἀγαθὸν ἔθηκεν εἶναι, τριχῶς ἐνδέχεται ἀναιρεῖν· δείξαντες γὰρ ὅτι πᾶσα ἢ ὅτι οὐδεμία ἢ ὅτι πλείους μιᾶς ἀγαθόν, ἀνηρηκότες ἐσόμεθα τὸ προκείμενον. ἐπὶ πλείον δὲ τῆς θέσεως διορισθείσης, οἷον ὅτι ἡ φρόνησις μόνη τῶν ἀρετῶν ἐπιστήμη, τετραχῶς ἔστιν ἀναιρεῖν· δειχθέντος γὰρ ὅτι πᾶσα ἀρετὴ ἐπιστήμη ἢ ὅτι οὐδεμία ἢ ὅτι καὶ ἄλλη τις, οἷον ἡ δικαιοσύνη, ἢ ὅτι αὐτὴ ἡ φρόνησις οὐκ ἐπιστήμη, ἀνηρημένον ἔσται τὸ προκείμενον.

Χρήσιμον δὲ καὶ τὸ ἐπιβλέπειν ἐπὶ τὰ καθ' ἕκαστα, ἐν οἷς ὑπάρχειν τι ἢ μὴ εἴρηται, καθάπερ ἐν τοῖς καθόλου προβλήμασιν. ἔτι δ' ἐν τοῖς γένεσιν ἐπιβλεπτέον διαιροῦντα κατ' εἶδη μέχρι τῶν ἀτόμων, καθάπερ εἴρηται πρότερον· ἂν τε γὰρ παντὶ φαίνεται ὑπάρχον ἂν τε μηδενί, πολλὰ προενέγκαντι ἀξιωτέον καθόλου ὁμολογεῖν ἢ φέρειν ἐνστασιν ἐπὶ τίνος οὐχ οὕτως. ἔτι ἐφ' ὧν ἔστιν ἢ εἶδει ἢ ἀριθμῷ διορίσαι τὸ συμβεβηκός, σκεπτέον εἰ μηδὲν τούτων ὑπάρχει, οἷον ὅτι ὁ χρόνος [120b] οὐ κινεῖται οὐδ' ἐστὶ κίνησις, καταριθμησάμενον πόσα εἶδη κινήσεως· εἰ γὰρ μηδὲν τούτων ὑπάρχει τῷ χρόνῳ, δῆλον ὅτι οὐ κινεῖται οὐδ' ἐστὶ κίνησις. ὁμοίως δὲ καὶ ὅτι ἡ ψυχὴ οὐκ ἀριθμός, διελόμενον ὅτι πᾶς ἀριθμὸς ἢ περιττὸς ἢ ἄρτιος· εἰ γὰρ ἡ ψυχὴ μῆτε περιττὸν μῆτε ἄρτιον, δῆλον ὅτι οὐκ ἀριθμός.

Πρὸς μὲν οὖν τὸ συμβεβηκὸς διὰ τῶν τοιούτων καὶ οὕτως ἐπιχειρητέον.

Δ

Μετὰ δὲ ταῦτα περὶ τῶν πρὸς τὸ γένος καὶ τὸ ἴδιον ἐπισκεπτέον. ἔστι δὲ ταῦτα στοιχεῖα τῶν πρὸς τοὺς ὅρους· περὶ αὐτῶν δὲ τούτων ὀλιγάκις αἱ σκέψεις γίνονται τοῖς διαλεγόμενοις. ἂν δὴ τεθῇ γένος τινὸς τῶν ὄντων, πρῶτον μὲν ἐπιβλέπειν ἐπὶ πάντα τὰ συγγενῇ τῷ λεχθέντι, εἴ τινος μὴ κατηγορεῖται, καθάπερ ἐπὶ τοῦ συμβεβηκότος, οἷον, εἰ τῆς ἡδονῆς τὰγαθὸν γένος κεῖται, εἴ τις ἡδονὴ μὴ ἀγαθόν· εἰ γὰρ τοῦτο, δῆλον ὅτι οὐ γένος τὰγαθὸν τῆς ἡδονῆς· τὸ γὰρ γένος κατὰ πάντων τῶν ὑπὸ τὸ αὐτὸ εἶδος κατηγορεῖται. εἴτα εἰ μὴ ἐν τῷ τί ἐστι κατηγορεῖται ἀλλ' ὡς συμβεβηκός, καθάπερ τὸ λευκὸν τῆς χιόνος, ἢ ψυχῆς τὸ κινούμενον ὑφ' αὐτοῦ· οὔτε γὰρ ἡ χιών ὅπερ λευκόν, διόπερ οὐ γένος τὸ λευκὸν τῆς χιόνος, οὔθ' ἡ ψυχὴ ὅπερ κινούμενον, συμβέβηκε δ' αὐτῇ κινεῖσθαι, καθάπερ καὶ τῷ ζῳῳ πολλάκις βαδίζειν τε καὶ βαδίζοντι εἶναι. ἔτι τὸ κινούμενον οὐ τί ἐστίν ἀλλὰ τι ποιοῦν ἢ πάσχον σημαίνειν ἔοικεν. ὁμοίως δὲ καὶ τὸ λευκόν· οὐ γὰρ τί ἐστίν ἢ χιών, ἀλλὰ ποῖόν τι, δηλοῖ. ὥστ' οὐδέτερον αὐτῶν ἐν τῷ τί ἐστι κατηγορεῖται, τὸ δὲ γένος ἐν τῷ τί ἐστι κατηγορεῖται.

Μάλιστα δ' ἐπὶ τὸν τοῦ συμβεβηκότος ὀρισμὸν ἐπιβλέπειν, εἰ ἐφαρμόττει ἐπὶ τὸ ῥηθὲν γένος, οἷον καὶ τὰ νῦν εἰρημένα· ἐνδέχεται γὰρ κινεῖν τι αὐτὸ ἑαυτὸ καὶ μὴ, ὁμοίως δὲ καὶ λευκὸν εἶναι καὶ μὴ, ὥστ' οὐδέτερον αὐτῶν γένος ἀλλὰ συμβεβηκός, ἐπειδὴ συμβεβηκός ἐλέγομεν ὃ ἐνδέχεται ὑπάρχειν τινὶ καὶ μὴ.

Ἔτι εἰ μὴ ἐν τῇ αὐτῇ διαίρεσει τὸ γένος καὶ τὸ εἶδος, ἀλλὰ τὸ μὲν οὐσία τὸ δὲ ποῖόν, ἢ τὸ μὲν πρὸς τι τὸ δὲ ποῖόν· οἷον ἢ μὲν χιών καὶ ὁ κύκνος οὐσία, τὸ δὲ λευκὸν οὐκ οὐσία ἀλλὰ ποῖόν, ὥστ' οὐ γένος τὸ λευκὸν τῆς χιόνος οὐδὲ τοῦ κύκνου.

[121a] πάλιν ἢ μὲν ἐπιστήμη τῶν πρὸς τι, τὸ δ' ἀγαθὸν καὶ τὸ καλὸν ποῖόν, ὥστ' οὐ γένος τὸ ἀγαθὸν ἢ τὸ καλὸν τῆς ἐπιστήμης· τὰ γὰρ τῶν πρὸς τι γένη καὶ αὐτὰ τῶν πρὸς τι δεῖ εἶναι, καθάπερ ἐπὶ τοῦ διπλασίου· καὶ γὰρ τὸ πολλαπλάσιον, γένος ὄν τοῦ διπλασίου, καὶ αὐτὸ τῶν πρὸς τί ἐστίν. καθόλου δ' εἰπεῖν ὑπὸ τὴν αὐτὴν διαίρεσιν δεῖ τὸ γένος τῷ εἶδει εἶναι· εἰ γὰρ τὸ εἶδος οὐσία, καὶ τὸ γένος, καὶ εἰ ποῖόν τι τὸ εἶδος, καὶ τὸ γένος ποῖόν τι· οἷον εἰ τὸ λευκὸν ποῖόν τι, καὶ τὸ χρῶμα. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων.

Πάλιν εἰ ἀνάγκη ἢ ἐνδέχεται τοῦ τεθέντος ἐν τῷ γένει μετέχειν τὸ γένος. ὅρος δὲ τοῦ μετέχειν τὸ ἐπιδέχασθαι τὸν τοῦ μετεχομένου λόγον. δηλον οὖν ὅτι τὰ μὲν εἶδη μετέχει τῶν γενῶν, τὰ δὲ γένη τῶν εἰδῶν οὐ· τὸ μὲν γὰρ εἶδος ἐπιδέχεται τὸν τοῦ γένους λόγον, τὸ δὲ γένος τὸν τοῦ εἶδους οὐ. σκεπτέον οὖν εἰ μετέχει ἢ ἐνδέχεται μετέχειν τοῦ εἶδους τὸ ἀποδοθὲν γένος, οἷον εἰ τις τοῦ ὄντος ἢ τοῦ ἐνὸς γένος τι ἀποδοίῃ· συμβήσεται γὰρ μετέχειν τὸ γένος τοῦ εἶδους· κατὰ πάντων γὰρ τῶν ὄντων τὸ ὄν καὶ τὸ ἐν κατηγορεῖται, ὥστε καὶ ὁ λόγος αὐτῶν.

Ἔτι εἰ κατὰ τινος τὸ ἀποδοθὲν εἶδος ἀληθεύεται, τὸ δὲ γένος μὴ, οἷον εἰ τὸ ὄν ἢ τὸ ἐπιστητὸν τοῦ δοξαστοῦ γένος τεθείη. κατὰ γὰρ τοῦ μὴ ὄντος τὸ δοξαστὸν κατηγορηθήσεται (πολλὰ γὰρ τῶν μὴ ὄντων δοξαστά), ὅτι δὲ τὸ ὄν ἢ τὸ ἐπιστητὸν οὐ κατηγορεῖται κατὰ τοῦ μὴ ὄντος, δηλον. ὥστ' οὐ γένος τὸ ὄν οὐδὲ τὸ ἐπιστητὸν τοῦ δοξαστοῦ· καθ' ὧν γὰρ τὸ εἶδος κατηγορεῖται, καὶ τὸ γένος δεῖ κατηγορεῖσθαι.

Πάλιν εἰ μηδενὸς τῶν εἰδῶν ἐνδέχεται μετέχειν τὸ τεθὲν ἐν τῷ γένει· ἀδύνατον γὰρ τοῦ γένους μετέχειν μηδενὸς τῶν εἰδῶν μετέχον, ἂν μὴ τι τῶν κατὰ τὴν πρώτην διαίρεσιν εἰδῶν ἦ· ταῦτα δὲ τοῦ γένους μόνον μετέχει. ἂν οὖν ἡ κίνησις γένος τῆς ἡδονῆς τεθῇ, σκεπτέον εἰ μήτε φορὰ μήτ' ἀλλοίωσις ἢ ἡδονὴ μήτε τῶν λοιπῶν τῶν ἀποδοθεισῶν κινήσεων μηδεμία. δηλον γὰρ ὅτι οὐδενὸς ἂν τῶν εἰδῶν μετέχοι· ὥστ' οὐδὲ τοῦ γένους, ἐπειδὴ ἀναγκαῖον ἐστὶ τὸ τοῦ γένους μετέχον καὶ τῶν εἰδῶν τινος μετέχειν. ὥστ' οὐκ ἂν εἴη εἶδος ἢ ἡδονὴ τῆς κινήσεως, οὐδὲ τῶν ἀτόμων οὐδὲν τῶν ὑπὸ τι εἶδος τῆς κινήσεως ὄντων· καὶ γὰρ τὰ ἄτομα μετέχει τοῦ γένους καὶ τοῦ εἶδους, οἷον ὁ τις ἄνθρωπος καὶ ἀνθρώπου μετέχει καὶ ζώου.

[121b] Ἔτι εἰ ἐπὶ πλέον λέγεται τοῦ γένους τὸ ἐν τῷ γένει τεθὲν, οἷον τὸ δοξαστὸν τοῦ ὄντος· καὶ γὰρ τὸ ὄν καὶ τὸ μὴ ὄν δοξαστόν, ὥστ' οὐκ ἂν εἴη τὸ δοξαστόν εἶδος τοῦ ὄντος· ἐπὶ πλέον γὰρ αἰεὶ τὸ γένος τοῦ εἶδους λέγεται. πάλιν εἰ ἐπ' ἴσων τὸ εἶδος καὶ τὸ γένος λέγεται, οἷον εἰ τῶν πᾶσιν ἐπομένων τὸ μὲν εἶδος τὸ δὲ γένος τεθείη, καθάπερ τὸ ὄν καὶ τὸ ἐν· παντὶ γὰρ τὸ ὄν καὶ τὸ ἐν· ὥστ' οὐδέτερον οὐδετέρου γένος, ἐπειδὴ ἐπ' ἴσων λέγεται. ὁμοίως δὲ καὶ εἰ τὸ πρῶτον καὶ ἡ ἀρχὴ εἰς ἄλληλα τεθείη· ἢ τε γὰρ ἀρχὴ πρῶτον καὶ τὸ πρῶτον ἀρχή, ὥστ' ἢ ἀμφοτέρω τὰ εἰρημένα ταυτὸν ἐστὶν ἢ οὐδέτερον οὐδετέρου γένος. στοιχεῖον δὲ πρὸς ἅπαντα τὰ τοιαῦτα τὸ

ἐπὶ πλεον τὸ γένος ἢ τὸ εἶδος καὶ τὴν διαφορὰν λέγεσθαι· ἐπ' ἔλαττον γὰρ καὶ ἡ διαφορὰ τοῦ γένους λέγεται.

Ὅρᾱν δὲ καὶ εἴ τινας τῶν ἀδιαφόρων εἶδει μὴ ἔστι τὸ εἰρημένον γένος ἢ μὴ δόξαι ἄν, κατασκευάζοντι δέ, εἰ ἔστι τινός. ταῦτόν γὰρ πάντων τῶν ἀδιαφόρων εἶδει γένος· ἄν οὖν ἐνὸς δειχθῇ, δηλὸν ὅτι πάντων, κἂν ἐνὸς μὴ, δηλὸν ὅτι οὐδενός. οἷον εἰ τις ἀτόμους τιθέμενος γραμμὰς τὸ ἀδιαίρετον γένος αὐτῶν φήσειεν εἶναι· τῶν γὰρ διαίρεσιν ἐχουσῶν γραμμῶν οὐκ ἔστι τὸ εἰρημένον γένος, ἀδιαφόρων οὐσῶν κατὰ τὸ εἶδος· ἀδιάφοροι γὰρ ἀλλήλαις κατὰ τὸ εἶδος αἱ εὐθεῖαι γραμμαὶ πᾶσαι.

Σκοπεῖν δὲ καὶ εἴ τι ἄλλο γένος ἐστὶ τοῦ ἀποδοθέντος εἶδους, ὃ μῆτε περιέχει τὸ ἀποδοθὲν γένος μὴθ' ὑπ' ἐκεῖνό ἐστιν. οἷον εἰ τις τῆς δικαιοσύνης τὴν ἐπιστήμην θεῖη γένος· ἔστι γὰρ καὶ ἡ ἀρετὴ γένος, καὶ οὐδέτερον τῶν γενῶν τὸ λοιπὸν περιέχει. ὥστ' οὐκ ἂν εἴη ἡ ἐπιστήμη γένος τῆς δικαιοσύνης· δοκεῖ γάρ, ὅταν ἐν εἶδος ὑπὸ δύο γένῃ ἦ, τὸ ἕτερον ὑπὸ τοῦ ἐτέρου περιέχεσθαι. ἔχει δ' ἀπορίαν ἐπ' ἐνίων τὸ τοιοῦτο· δοκεῖ γὰρ ἐνίοις ἡ φρόνησις ἀρετὴ τε καὶ ἐπιστήμη εἶναι καὶ οὐδέτερον τῶν γενῶν ὑπ' οὐδετέρου περιέχεσθαι. οὐ μὴν ὑπὸ πάντων γε συγχωρεῖται τὴν φρόνησιν ἐπιστήμην εἶναι. εἰ δ' οὖν τις συγχωροίη τὸ λεγόμενον ἀληθὲς εἶναι, ἀλλὰ τό γε ὑπ' ἄλληλα ἢ ὑπὸ ταῦτό ἄμφω γίγνεσθαι τὰ τοῦ αὐτοῦ γένῃ τῶν ἀναγκαίων δόξειεν ἂν εἶναι, καθάπερ καὶ ἐπὶ τῆς ἀρετῆς καὶ τῆς ἐπιστήμης συμβαίνει· ἄμφω γὰρ ὑπὸ τὸ αὐτὸ γένος ἐστίν· ἐκάτερον γὰρ αὐτῶν ἕξις καὶ διάθεσις ἐστίν. σκεπτέον οὖν εἰ μῆδέτερον ὑπάρχει τῷ ἀποδοθέντι γένει. εἰ [122a] γὰρ μὴθ' ὑπ' ἄλληλά ἐστι τὰ γένῃ μὴθ' ὑπὸ ταῦτόν ἄμφω, οὐκ ἂν εἴη τὸ ἀποδοθὲν γένος.

Σκοπεῖν δὲ καὶ τὸ γένος τοῦ ἀποδοθέντος γένους καὶ οὕτως αἰετὸ ἐπάνω γένος, εἰ πάντα κατηγορεῖται τοῦ εἶδους, καὶ εἰ ἐν τῷ τί ἐστὶ κατηγορεῖται· πάντα γὰρ τὰ ἐπάνω γένῃ κατηγορεῖσθαι δεῖ τοῦ εἶδους ἐν τῷ τί ἐστίν. εἰ οὖν που διαφωνεῖ, δηλὸν ὅτι οὐ γένος τὸ ἀποδοθὲν. πάλιν εἰ μετέχει τὸ γένος τοῦ εἶδους, ἢ αὐτὸ ἢ τῶν ἐπάνω τι γενῶν· οὐδενός γὰρ τῶν ὑποκάτω τὸ ἐπάνω μετέχει. ἀνασκευάζοντι μὲν οὖν καθάπερ εἴρηται χρηστέον. κατασκευάζοντι δέ, ὁμολογουμένου μὲν ὑπάρχειν τῷ εἶδει τοῦ ῥηθέντος γένους, ὅτι δ' ὥς γένος ὑπάρχει ἀμφισβητουμένου, ἀπόχρη τὸ δεῖξαι τι τῶν ἐπάνω γενῶν ἐν τῷ τί ἐστὶ τοῦ εἶδους κατηγορούμενον. ἐνὸς γὰρ ἐν τῷ τί ἐστὶ κατηγορουμένου πάντα καὶ τὰ ἐπάνω τούτου καὶ τὰ

ὑποκάτω, ἄνπερ κατηγορεῖται τοῦ εἶδους, ἐν τῷ τί ἐστι κατηγορηθήσεται· ὥστε καὶ τὸ ἀποδοθὲν γένος ἐν τῷ τί ἐστι κατηγορεῖται. ὅτι δ' ἐνὸς ἐν τῷ τί ἐστι κατηγορουμένου πάντα τὰ λοιπά, ἄνπερ κατηγορεῖται, ἐν τῷ τί ἐστι κατηγορηθήσεται, δι' ἐπαγωγῆς ληπτέον. εἰ δ' ἀπλῶς ὑπάρχειν ἀμφισβητεῖται τὸ ἀποδοθὲν γένος, οὐκ ἀπόχρη τὸ δεῖξαι τῶν ἐπάνω τι γενῶν ἐν τῷ τί ἐστι τοῦ εἶδους κατηγορούμενον. οἷον εἰ τις τῆς βαδίσσεως γένος ἀποδέδωκε τὴν φορὰν, οὐκ ἀπόχρη τὸ δεῖξαι ὅτι κινήσις ἐστὶν ἢ βάδισις πρὸς τὸ δεῖξαι ὅτι φορὰ ἐστὶν, ἐπειδὴ καὶ ἄλλαι κινήσεις εἰσὶν, ἀλλὰ προσδεικτέον ὅτι οὐδενὸς μετέχει ἢ βάδισις τῶν κατὰ τὴν αὐτὴν διαίρεσιν εἰ μὴ τῆς φορᾶς· ἀνάγκη γὰρ τὸ τοῦ γένους μετέχον καὶ τῶν εἰδῶν τινος μετέχειν τῶν κατὰ τὴν πρώτην διαίρεσιν. εἰ οὖν ἢ βάδισις μὴτ' αὐξήσεως μῆτε μειώσεως μῆτε τῶν ἄλλων κινήσεων μετέχει, δῆλον ὅτι τῆς φορᾶς ἂν μετέχοι· ὥστ' εἴη ἂν γένος ἢ φορὰ τῆς βαδίσσεως.

Πάλιν ἐφ' ὧν τὸ εἶδος τὸ τεθὲν ὡς γένος κατηγορεῖται, σκοπεῖν εἰ καὶ τὸ ἀποδοθὲν γένος ἐν τῷ τί ἐστὶν αὐτῶν τούτων κατηγορεῖται ὥνπερ καὶ τὸ εἶδος, ὁμοίως δὲ καὶ εἰ τὰ ἐπάνω τοῦ γένους πάντα. εἰ γὰρ που διαφωνεῖ, δῆλον ὅτι οὐ γένος τὸ ἀποδοθὲν· εἰ γὰρ ἦν γένος, ἅπαντ' ἂν καὶ τὰ ἐπάνω τούτου καὶ αὐτὸ ἐν τῷ τί ἐστι κατηγορεῖτο, ὥνπερ καὶ τὸ εἶδος ἐν τῷ τί ἐστι κατηγορεῖται. ἀνασκευάζοντι μὲν οὖν χρήσιμον, εἰ μὴ κατηγορεῖται τὸ γένος ἐν τῷ τί ἐστὶν ὥνπερ καὶ τὸ εἶδος κατηγορεῖται· κατασκευάζοντι δ', εἰ [122b] κατηγορεῖται ἐν τῷ τί ἐστι, χρήσιμον. συμβήσεται γὰρ τὸ γένος καὶ τὸ εἶδος τοῦ αὐτοῦ ἐν τῷ τί ἐστι κατηγορεῖσθαι, ὥστε τὸ αὐτὸ ὑπὸ δύο γένη γίνεται. ἀναγκαῖον οὖν ὑπ' ἄλληλα τὰ γένη εἶναι. ἂν οὖν δειχθῇ ὁ βουλόμεθα ὡς γένος κατασκευάσαι μὴ ὄν ὑπὸ τὸ εἶδος, δῆλον ὅτι τὸ εἶδος ὑπὸ τοῦτ' ἂν εἴη, ὥστε δεδειγμένον ἂν εἴη ὅτι γένος τοῦτο.

Σκοπεῖν δὲ καὶ τοὺς λόγους τῶν γενῶν, εἰ ἐφαρμόττουσιν ἐπὶ τε τὸ ἀποδοθὲν εἶδος καὶ ἐπὶ τὰ μετέχοντα τοῦ εἶδους· ἀνάγκη γὰρ τοὺς τῶν γενῶν λόγους κατηγορεῖσθαι τοῦ εἶδους καὶ τῶν μετεχόντων τοῦ εἶδους. εἰ οὖν που διαφωνεῖ, δῆλον ὅτι οὐ γένος τὸ ἀποδοθὲν.

Πάλιν εἰ τὴν διαφορὰν ὡς γένος ἀποδέδωκεν, οἷον εἰ τὸ ἀθάνατον γένος θεοῦ· διαφορὰ γὰρ ἐστὶ ζώου τὸ ἀθάνατον, ἐπειδὴ τῶν ζώων τὰ μὲν θνητὰ τὰ δ' ἀθάνατα. δῆλον οὖν ὅτι διημάρτηται· οὐδενὸς γὰρ ἢ διαφορὰ γένος ἐστίν. ὅτι δὲ τοῦτ' ἀληθές, δῆλον·

οὐδεμία γὰρ διαφορὰ σημαίνει τί ἐστὶν ἀλλὰ μᾶλλον ποιόν τι, καθάπερ τὸ πεζὸν καὶ τὸ δίπουν.

Καὶ εἰ τὴν διαφορὰν ὡς εἶδος εἰς τὸ γένος ἔθηκεν, οἷον τὸ περιττὸν ὅπερ ἀριθμὸν· διαφορὰ γὰρ ἀριθμοῦ τὸ περιττὸν, οὐκ εἶδός ἐστιν. οὐ δοκεῖ δὲ μετέχειν ἢ διαφορὰ τοῦ γένους· πᾶν γὰρ τὸ μετέχον τοῦ γένους ἢ εἶδος ἢ ἄτομόν ἐστιν, ἢ δὲ διαφορὰ οὔτε εἶδος οὔτε ἄτομόν ἐστιν. δῆλον οὖν ὅτι οὐ μετέχει τοῦ γένους ἢ διαφορὰ· ὥστ' οὐδὲ τὸ περιττὸν εἶδος ἂν εἴη ἀλλὰ διαφορὰ, ἐπειδὴ οὐ μετέχει τοῦ γένους.

Ἔτι εἰ τὸ γένος εἰς τὸ εἶδος ἔθηκεν, οἷον τὴν ἄψιν ὅπερ συνοχήν ἢ τὴν μεῖξιν ὅπερ κρᾶσιν, ἢ ὡς Πλάτων ὀρίζεται φορὰν τὴν κατὰ τόπον κίνησιν. οὐ γὰρ ἀναγκαῖον τὴν ἄψιν συνοχήν εἶναι, ἀλλ' ἀνάπαλιν τὴν συνοχήν ἄψιν· οὐ γὰρ πᾶν τὸ ἀπτόμενον συνέχεται, ἀλλὰ τὸ συνεχόμενον ἅπτεται. ὁμοίως δὲ καὶ ἐπὶ τῶν λοιπῶν· οὔτε γὰρ ἢ μεῖξις ἅπαντα κρᾶσις (ἢ γὰρ τῶν ξηρῶν μεῖξις οὐκ ἐστὶ κρᾶσις) οὔθ' ἢ κατὰ τόπον μεταβολὴ πᾶσα φορὰ· ἢ γὰρ βάδισις οὐ δοκεῖ φορὰ εἶναι· σχεδὸν γὰρ ἢ φορὰ ἐπὶ τῶν ἀκουσίως τόπον ἐκ τόπου μεταβαλλόντων λέγεται, καθάπερ ἐπὶ τῶν ἀψύχων συμβαίνει. δῆλον δ' ὅτι καὶ ἐπὶ πλεόν λέγεται τὸ εἶδος τοῦ γένους ἐν τοῖς ἀποδοθεῖσι, δέον ἀνάπαλιν γίνεσθαι.

Πάλιν εἰ τὴν διαφορὰν εἰς τὸ εἶδος ἔθηκεν, οἷον τὸ ἀθάνατον ὅπερ θεόν. συμβήσεται γὰρ ἐπ' ἴσης ἢ ἐπὶ πλεῖον τὸ εἶδος λέγεσθαι· ἀεὶ δ' ἢ διαφορὰ ἐπ' ἴσης ἢ ἐπὶ [123a] πλεῖον τοῦ εἶδους λέγεται. ἔτι εἰ τὸ γένος εἰς τὴν διαφορὰν, οἷον τὸ χρῶμα ὅπερ συγκριτικὸν ἢ τὸν ἀριθμὸν ὅπερ περιττὸν. καὶ εἰ τὸ γένος ὡς διαφορὰν εἶπεν· ἐγχωρεῖ γὰρ τινα καὶ τοιαύτην κομίσαι θέσιν, οἷον κράσεως τὴν μεῖξιν διαφορὰν ἢ φορᾶς τὴν κατὰ τόπον μεταβολήν. σκεπτέον δὲ πάντα τὰ τοιαῦτα διὰ τῶν αὐτῶν· ἐπικοινωνοῦσι γὰρ οἱ τόποι· ἐπὶ πλεόν τε γὰρ τὸ γένος τῆς διαφορᾶς δεῖ λέγεσθαι καὶ μὴ μετέχειν τῆς διαφορᾶς, οὕτω δ' ἀποδοθέντος οὐδέτερον τῶν εἰρημένων δυνατὸν συμβαίνειν· ἐπ' ἔλαττον τε γὰρ ῥηθήσεται καὶ μεθέξει τὸ γένος τῆς διαφορᾶς.

Πάλιν εἰ μηδεμία διαφορὰ κατηγορεῖται τῶν τοῦ γένους κατὰ τοῦ ἀποδοθέντος εἶδους, οὐδὲ τὸ γένος κατηγορηθήσεται· οἷον ψυχῆς οὔτε τὸ περιττὸν οὔτε τὸ ἄρτιον κατηγορεῖται, ὥστ' οὐδ' ἀριθμός. ἔτι εἰ πρότερον φύσει τὸ εἶδος καὶ συναναιρεῖ τὸ γένος· δοκεῖ γὰρ τὸ ἐναντίον. ἔτι εἰ ἐνδέχεται ἀπολιπεῖν τὸ εἰρημένον γένος

ἢ τὴν διαφοράν, οἷον ψυχὴν τὸ κινεῖσθαι ἢ δόξαν τὸ ἀληθὲς καὶ ψεῦδος, οὐκ ἂν εἴη τῶν εἰρημένων οὐδέτερον γένος οὐδὲ διαφορά· δοκεῖ γὰρ τὸ γένος καὶ ἡ διαφορὰ παρακολουθεῖν, ἕως ἂν ᾗ τὸ εἶδος.

Σκοπεῖν δὲ καὶ εἰ τὸ ἐν τῷ γένει κείμενον μετέχει τινὸς ἐναντίου τῷ γένει ἢ ἐνδέχεται μετέχειν· τὸ γὰρ αὐτὸ τῶν ἐναντίων ἅμα μεθεῖξει, ἐπεὶδὴ τὸ μὲν γένος οὐδέποτε ἀπολείπει, μετέχει δὲ καὶ τοῦ ἐναντίου ἢ ἐνδέχεται μετέχειν. ἔτι εἴ τινος κοινωνεῖ τὸ εἶδος ὃ ἀδύνατον ὅλως ὑπάρχειν τοῖς ὑπὸ τὸ γένος· οἷον εἰ ἡ ψυχὴ τῆς ζωῆς κοινωνεῖ, τῶν δ' ἀριθμῶν μηδένα δυνατόν ζῆν, οὐκ ἂν εἴη εἶδος ἀριθμοῦ ἢ ψυχῆ.

Σκεπτέον δὲ καὶ εἰ ὁμώνυμον τὸ εἶδος τῷ γένει, στοιχείοις χρώμενον τοῖς εἰρημένοις πρὸς τὸ ὁμώνυμον· συνώνυμον γὰρ τὸ γένος καὶ τὸ εἶδος.

Ἐπεὶ δὲ παντὸς γένους εἶδη πλείω, σκοπεῖν εἰ μὴ ἐνδέχεται ἕτερον εἶδος εἶναι τοῦ εἰρημένου γένους· εἰ γὰρ μὴ ἔστι, δηλὸν ὅτι οὐκ ἂν εἴη ὅλως γένος τὸ εἰρημένον.

Σκοπεῖν δὲ καὶ εἰ τὸ μεταφορᾷ λεγόμενον ὡς γένος ἀποδέδωκεν, οἷον τὴν σωφροσύνην συμφωνίαν· πᾶν γὰρ γένος κυρίως κατὰ τῶν εἰδῶν κατηγορεῖται, ἢ δὲ συμφωνία κατὰ τῆς σωφροσύνης οὐ κυρίως ἀλλὰ μεταφορᾷ· πᾶσα γὰρ συμφωνία ἐν φθόγγοις.

[123b] Ἐτι ἂν ᾗ ἐναντίον τι τῷ εἶδει, σκοπεῖν. ἔστι δὲ πλεοναχῶς ἢ σκέψις· πρῶτον μὲν εἰ ἐν τῷ αὐτῷ γένει καὶ τὸ ἐναντίον, μὴ ὄντος ἐναντίου τῷ γένει· δεῖ γὰρ τὰ ἐναντία ἐν τῷ αὐτῷ γένει εἶναι, ἂν μὴδὲν ἐναντίον τῷ γένει ᾗ. ὄντος δ' ἐναντίου τῷ γένει, σκοπεῖν εἰ τὸ ἐναντίον ἐν τῷ ἐναντίῳ· ἀνάγκη γὰρ τὸ ἐναντίον ἐν τῷ ἐναντίῳ εἶναι, ἄνπερ ᾗ ἐναντίον τι τῷ γένει. φανερόν δὲ τούτων ἕκαστον διὰ τῆς ἐπαγωγῆς. πάλιν εἰ ὅλως ἐν μηδενὶ γένει τὸ τῷ εἶδει ἐναντίον ἀλλ' αὐτὸ γένος, οἷον τἀγαθόν· εἰ γὰρ τοῦτο μὴ ἐν γένει, οὐδὲ τὸ ἐναντίον τούτου ἐν γένει ἔσται ἀλλ' αὐτὸ γένος, καθάπερ ἐπὶ τοῦ ἀγαθοῦ καὶ τοῦ κακοῦ συμβαίνει· οὐδέτερον γὰρ τούτων ἐν γένει, ἀλλ' ἑκάτερον αὐτὸ γένος. ἔτι εἰ ἐναντίον τινὶ καὶ τὸ γένος καὶ τὸ εἶδος, καὶ τῶν μὲν ἔστι τι μεταξύ, τῶν δὲ μή. εἰ γὰρ τῶν γενῶν ἔστι τι μεταξύ, καὶ τῶν εἰδῶν, καὶ εἰ τῶν εἰδῶν, καὶ τῶν γενῶν, καθάπερ ἐπ' ἀρετῆς καὶ κακίας καὶ δικαιοσύνης καὶ ἀδικίας· ἐκατέρων γὰρ ἔστι τι μεταξύ. (ἔνστασις τούτου ὅτι ὑγιείας καὶ νόσου οὐδὲν μεταξύ, κακοῦ δὲ καὶ ἀγαθοῦ.) ἢ εἰ ἔστι μὲν τι ἀμφοῖν ἀνὰ μέσον, καὶ τῶν εἰδῶν καὶ τῶν

γενῶν, μὴ ὁμοίως δέ, ἀλλὰ τῶν μὲν κατὰ ἀπόφασιν τῶν δ' ὡς ὑποκείμενον. ἔνδοξον γὰρ τὸ ὁμοίως ἀμφοῖν, καθάπερ ἐπ' ἀρετῆς καὶ κακίας, καὶ δικαιοσύνης καὶ ἀδικίας· ἀμφοῖν γὰρ κατὰ ἀπόφασιν τὰ ἀνὰ μέσον. ἔτι ὅταν μὴ ἢ ἐναντίον τῷ γένει, σκοπεῖν μὴ μόνον εἰ τὸ ἐναντίον ἐν τῷ αὐτῷ γένει, ἀλλὰ καὶ τὸ ἀνὰ μέσον· ἐν ᾧ γὰρ τὰ ἄκρα, καὶ τὸ ἀνὰ μέσον, οἷον ἐπὶ λευκοῦ καὶ μέλανος· τὸ γὰρ χρῶμα γένος τούτων τε καὶ τῶν ἀνὰ μέσον χρωμάτων ἀπάντων. (ἔνστασις ὅτι ἡ μὲν ἔνδεια καὶ ἡ ὑπερβολὴ ἐν τῷ αὐτῷ γένει - ἐν τῷ κακῷ γὰρ ἄμφω - τὸ δὲ μέτριον ἀνὰ μέσον ὃν τούτων οὐκ ἐν τῷ κακῷ ἀλλ' ἐν τῷ ἀγαθῷ.) σκοπεῖν δὲ καὶ εἰ τὸ μὲν γένος ἐναντίον τινί, τὸ δὲ εἶδος μηδενί. εἰ γὰρ τὸ γένος ἐναντίον τινί, καὶ τὸ εἶδος, καθάπερ ἀρετὴ κακία καὶ δικαιοσύνη ἀδικία. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων σκοποῦντι φανερόν ἂν δόξειεν εἶναι τὸ τοιοῦτον. (ἔνστασις ἐπὶ τῆς ὑγιείας καὶ νόσου· ἀπλῶς μὲν γὰρ ὑγίεια νόσῳ ἐναντίον, ἡ δὲ τις νόσος εἶδος οὔσα νόσου οὐδενί ἐναντίον, οἷον ὁ πυρετὸς καὶ ἡ ὀφθαλμία καὶ τῶν ἄλλων ἕκαστον.)

[124a] Ἀναιροῦντι μὲν οὖν τοσαυταχῶς ἐπισκεπτέον· εἰ γὰρ μὴ ὑπάρχει τὰ εἰρημένα, δηλὸν ὅτι οὐ γένος τὸ ἀποδοθέν. κατασκευάζοντι δὲ τριχῶς· πρῶτον μὲν εἰ τὸ ἐναντίον τῷ εἶδει ἐν τῷ εἰρημένῳ γένει, μὴ ὄντος ἐναντίου τῷ γένει· εἰ γὰρ τὸ ἐναντίον ἐν τούτῳ, δηλὸν ὅτι καὶ τὸ προκείμενον. ἔτι εἰ τὸ ἀνὰ μέσον ἐν τῷ εἰρημένῳ γένει· ἐν ᾧ γὰρ τὸ ἀνὰ μέσον, καὶ τὰ ἄκρα. πάλιν ἂν ἢ ἐναντίον τι τῷ γένει, σκοπεῖν εἰ καὶ τὸ ἐναντίον ἐν τῷ ἐναντίῳ· ἂν γὰρ ἢ, δηλὸν ὅτι καὶ τὸ προκείμενον ἐν τῷ προκειμένῳ.

Πάλιν ἐπὶ τῶν πτώσεων καὶ ἐπὶ τῶν συστοίχων, εἰ ὁμοίως ἀκολουθοῦσι, καὶ ἀναιροῦντι καὶ κατασκευάζοντι· ἅμα γὰρ ἐνὶ καὶ πᾶσιν ὑπάρχει ἢ οὐχ ὑπάρχει. οἷον εἰ ἡ δικαιοσύνη ἐπιστήμη τις, καὶ τὸ δικαίως ἐπιστημόνως καὶ ὁ δίκαιος ἐπιστήμων· εἰ δὲ τούτων τι μὴ, οὐδὲ τῶν λοιπῶν οὐδέν.

Πάλιν ἐπὶ τῶν ὁμοίως ἐχόντων πρὸς ἄλληλα· οἷον τὸ ἡδὺ ὁμοίως ἔχει πρὸς τὴν ἡδονὴν καὶ τὸ ὠφέλιμον πρὸς τὸ ἀγαθόν· ἐκάτερον γὰρ ἐκατέρου ποιητικόν. εἰ οὖν ἐστὶν ἡ ἡδονὴ ὅπερ ἀγαθόν, καὶ τὸ ἡδὺ ὅπερ ὠφέλιμον ἔσται· δηλὸν γὰρ ὅτι ἀγαθοῦ ἂν εἴη ποιητικόν, ἐπειδὴ ἡ ἡδονὴ ἀγαθόν. ὡσαύτως δὲ καὶ ἐπὶ τῶν γενέσεων καὶ φθορῶν· οἷον εἰ τὸ οἰκοδομεῖν ἐνεργεῖν, τὸ ᾠκοδομηκέναι ἐνηργηκέναι, καὶ εἰ τὸ μανθάνειν ἀναμνησκεισθαι, καὶ τὸ μεμαθηκέναι ἀναμνησθαι, καὶ εἰ τὸ διαλύεσθαι φθείρεσθαι,

καὶ τὸ διαλελῦσθαι ἐφθάρθαι καὶ ἡ διάλυσις φθορά τις. καὶ ἐπὶ τῶν γεννητικῶν δὲ καὶ φθαρτικῶν ὡσαύτως, καὶ ἐπὶ τῶν δυνάμεων καὶ χρήσεων, καὶ ὅλως καθ' ὅποιονοῦν ὁμοιότητα καὶ ἀναιροῦντι καὶ κατασκευάζοντι σκεπτέον καθάπερ ἐπὶ τῆς γενέσεως καὶ φθορᾶς ἐλέγομεν. εἰ γὰρ τὸ φθαρτικὸν διαλυτικόν, καὶ τὸ φθεῖρεσθαι διαλύεσθαι· καὶ εἰ τὸ γεννητικὸν ποιητικόν, καὶ τὸ γίνεσθαι ποιεῖσθαι καὶ ἡ γένεσις ποίησις. ὁμοίως δὲ καὶ ἐπὶ τῶν δυνάμεων καὶ χρήσεων· εἰ γὰρ ἡ δύναμις διάθεσις, καὶ τὸ δύνασθαι διακεῖσθαι, καὶ εἴ τινος ἡ χρῆσις ἐνέργεια, τὸ χρῆσθαι ἐνεργεῖν καὶ τὸ κεχρῆσθαι ἐνηργηκέναι.

Ἄν δὲ στέρησις ἢ τὸ ἀντικείμενον τῷ εἶδει, διχῶς ἔστιν ἀνελεῖν. πρῶτον μὲν, εἰ ἐν τῷ ἀποδοθέντι γένει τὸ ἀντικείμενον· ἢ γὰρ ἀπλῶς ἐν οὐδενὶ γένει τῷ αὐτῷ ἢ στέρησις ἢ οὐκ ἐν τῷ ἐσχάτῳ· οἷον εἰ ἡ ὄψις ἐν ἐσχάτῳ γένει τῇ αἰσθήσει, ἢ τυφλότης οὐκ ἔσται αἰσθησις. δεύτερον δ', εἰ καὶ τῷ γένει [124b] καὶ τῷ εἶδει ἀντίκειται στέρησις, μὴ ἔστι δὲ τὸ ἀντικείμενον ἐν τῷ ἀντικειμένῳ, οὐδ' ἂν τὸ ἀποδοθὲν ἐν τῷ ἀποδοθέντι εἴη. ἀναιροῦντι μὲν οὖν καθάπερ εἴρηται χρηστέον, κατασκευάζοντι δὲ μοναχῶς· εἰ γὰρ τὸ ἀντικείμενον ἐν τῷ ἀντικειμένῳ, καὶ τὸ προκείμενον ἐν τῷ προκειμένῳ ἂν εἴη· οἷον εἰ ἡ τυφλότης ἀναισθησία τις, ἢ ὄψις αἰσθησίς τις.

Πάλιν ἐπὶ τῶν ἀποφάσεων σκοπεῖν ἀνάπαλιν, καθάπερ ἐπὶ τοῦ συμβεβηκότος ἐλέγετο· οἷον εἰ τὸ ἡδὺ ὅπερ ἀγαθόν, τὸ μὴ ἀγαθὸν οὐχ ἡδύ. εἰ γὰρ μὴ οὕτως ἔχοι, εἴη ἂν τι καὶ οὐκ ἀγαθὸν ἡδύ, ἀδύνατον δέ, εἴπερ τὸ ἀγαθὸν γένος τοῦ ἡδέος, εἶναί τι μὴ ἀγαθὸν ἡδύ· ὦν γὰρ τὸ γένος μὴ κατηγορεῖται, οὐδὲ τῶν εἰδῶν οὐδέν. καὶ κατασκευάζοντι δὲ ὡσαύτως σκεπτέον· εἰ γὰρ τὸ μὴ ἀγαθὸν οὐχ ἡδύ, τὸ ἡδὺ ἀγαθόν, ὥστε γένος τὸ ἀγαθὸν τοῦ ἡδέος.

Ἐὰν δ' ἢ πρὸς τι τὸ εἶδος, σκοπεῖν εἰ καὶ τὸ γένος πρὸς τι· εἰ γὰρ τὸ εἶδος τῶν πρὸς τι, καὶ τὸ γένος, καθάπερ ἐπὶ τοῦ διπλασίου καὶ πολλαπλασίου· ἐκάτερον γὰρ τῶν πρὸς τι. εἰ δὲ τὸ γένος τῶν πρὸς τι, οὐκ ἀνάγκη καὶ τὸ εἶδος· ἢ μὲν γὰρ ἐπιστήμη τῶν πρὸς τι, ἢ δὲ γραμματικὴ οὐ. (ἢ οὐδὲ τὸ πρότερον ῥηθὲν ἀληθὲς ἂν δόξειεν εἶναι· ἢ γὰρ ἀρετὴ ὅπερ καλὸν καὶ ὅπερ ἀγαθόν, καὶ ἢ μὲν ἀρετὴ τῶν πρὸς τι, τὸ δ' ἀγαθὸν καὶ τὸ καλὸν οὐ τῶν πρὸς τι ἀλλὰ ποιά.)

Πάλιν εἰ μὴ πρὸς ταὐτὸ λέγεται τὸ εἶδος καθ' αὐτό τε καὶ κατὰ τὸ γένος· οἷον εἰ τὸ διπλάσιον ἡμίσεος λέγεται διπλάσιον, καὶ τὸ πολλαπλάσιον ἡμίσεος δεῖ λέγεσθαι. εἰ δὲ μή, οὐκ ἂν εἴη τὸ

πολλαπλάσιον γένος τοῦ διπλασίου.

Ἔτι εἰ μὴ πρὸς τὸ αὐτὸ κατὰ τε τὸ γένος λέγεται καὶ κατὰ πάντα τὰ τοῦ γένους γένη. εἰ γὰρ τὸ διπλάσιον ἡμίσεος πολλαπλάσιόν ἐστι, καὶ ὑπερέχον ἡμίσεος ῥηθήσεται, καὶ ἀπλῶς κατὰ πάντα τὰ ἐπάνω γένη πρὸς τὸ ἡμισυ ῥηθήσεται. (ἔνστασις ὅτι οὐκ ἀνάγκη καθ' αὐτὸ καὶ κατὰ τὸ γένος πρὸς ταὐτὸ λέγεσθαι· ἡ γὰρ ἐπιστήμη ἐπιστητοῦ λέγεται, ἕξις δὲ καὶ διάθεσις οὐκ ἐπιστητοῦ ἀλλὰ ψυχῆς.)

Πάλιν εἰ ὡσαύτως λέγεται τὸ γένος καὶ τὸ εἶδος κατὰ τὰς πτώσεις, οἷον εἰ τινὶ ἢ τινὸς ἢ ὡσαυχῶς ἄλλως. ὥς γὰρ τὸ εἶδος, καὶ τὸ γένος, καθάπερ ἐπὶ τοῦ διπλασίου καὶ τῶν ἐπάνω· τινὸς γὰρ καὶ τὸ διπλάσιον καὶ τὸ πολλαπλάσιον. ὁμοίως δὲ καὶ ἐπὶ τῆς ἐπιστήμης· τινὸς γὰρ [125a] καὶ αὐτὴ καὶ τὰ γένη, οἷον ἢ τε διάθεσις καὶ ἡ ἕξις. (ἔνστασις ὅτι ἐνιαχοῦ οὐχ οὕτως· τὸ μὲν γὰρ διάφορον καὶ τὸ ἐναντίον τινί, τὸ δ' ἕτερον, γένος ὃν τούτων, οὐ τινὶ ἀλλὰ τινὸς· ἕτερον γὰρ τινος λέγεται.)

Πάλιν εἰ ὁμοίως τὰ πρὸς τι κατὰ τὰς πτώσεις λεγόμενα μὴ ὁμοίως ἀντιστρέφει, καθάπερ ἐπὶ τοῦ διπλασίου καὶ τοῦ πολλαπλασίου. ἐκάτερον γὰρ τούτων τινὸς καὶ αὐτὸ καὶ κατὰ τὴν ἀντιστροφὴν λέγεται· τινὸς γὰρ καὶ τὸ ἡμισυ καὶ τὸ πολλοστημόριον. ὡσαύτως δὲ καὶ ἐπὶ τῆς ἐπιστήμης καὶ τῆς ὑπολήψεως· αὐταὶ τε γὰρ τινὸς καὶ ἀντιστρέφει ὁμοίως τό τε ἐπιστητὸν καὶ τὸ ὑποληπτὸν τινί. εἰ οὖν ἐπὶ τινων μὴ ὁμοίως ἀντιστρέφει, δῆλον ὅτι οὐ γένος θάτερον θατέρου.

Πάλιν εἰ μὴ πρὸς ἴσα τὸ εἶδος καὶ τὸ γένος λέγεται. ὁμοίως γὰρ καὶ ἰσαυχῶς ἐκάτερον δοκεῖ λέγεσθαι, καθάπερ ἐπὶ τῆς δωρεᾶς καὶ τῆς δόσεως· ἢ τε γὰρ δωρεὰ τινὸς καὶ τινὶ λέγεται, καὶ ἡ δόσις τινὸς καὶ τινί. ἔστι δὲ ἡ δόσις γένος τῆς δωρεᾶς· ἡ γὰρ δωρεὰ δόσις ἐστὶν ἀναπόδοτος. ἐπ' ἐνίων δ' οὐ συμβαίνει πρὸς ἴσα λέγεσθαι· τὸ μὲν γὰρ διπλάσιον τινὸς διπλάσιον, τὸ δ' ὑπερέχον καὶ τὸ μείζον τινὸς καὶ τινί· πᾶν γὰρ τὸ ὑπερέχον καὶ τὸ μείζον τινὶ ὑπερέχει καὶ τινὸς ὑπερέχει. ὥστ' οὐ γένη τὰ εἰρημένα τοῦ διπλασίου, ἐπειδὴ οὐ πρὸς ἴσα τῷ εἶδει λέγεται. (ἢ οὐ καθόλου ἀληθὲς τὸ πρὸς ἴσα τὸ εἶδος καὶ τὸ γένος λέγεσθαι.)

Ὅρᾶν δὲ καὶ εἰ τοῦ ἀντικειμένου τὸ ἀντικείμενον γένος· οἷον εἰ τοῦ διπλασίου τὸ πολλαπλάσιον, καὶ τοῦ ἡμίσεος τὸ πολλοστημόριον· δεῖ γὰρ τὸ ἀντικείμενον τοῦ ἀντικειμένου γένος

εἶναι. εἰ οὖν τις θεῖη τὴν ἐπιστήμην ὅπερ αἰσθησιν, δεήσει καὶ τὸ ἐπιστητὸν ὅπερ αἰσθητὸν εἶναι. οὐκ ἔστι δέ· οὐ γὰρ πᾶν τὸ ἐπιστητὸν αἰσθητόν· καὶ γὰρ τῶν νοητῶν ἓνια ἐπιστητά. ὥστ' οὐ γένος τὸ αἰσθητὸν τοῦ ἐπιστητοῦ. εἰ δὲ τοῦτο μή, οὐδ' αἰσθησις ἐπιστήμης.

Ἐπεὶ δὲ τῶν πρὸς τι λεγομένων τὰ μὲν ἐξ ἀνάγκης ἐν ἐκείνοις ἢ περὶ ἐκεῖνά ἐστι πρὸς ἃ ποτε τυγχάνει λεγόμενα (οἷον ἡ διάθεσις καὶ ἡ ἕξις καὶ ἡ συμμετρία· ἐν ἄλλῳ γὰρ οὐδενὶ δυνατὸν ὑπάρχειν τὰ εἰρημένα ἢ ἐν ἐκείνοις πρὸς ἃ λέγεται), τὰ δ' οὐκ ἀνάγκη μὲν ἐν ἐκείνοις ὑπάρχειν πρὸς ἃ ποτε λέγεται, ἐνδέχεται δέ (οἷον εἰ ἐπιστητὸν ἡ ψυχὴ· οὐδὲν γὰρ κωλύει τὴν αὐτῆς ἐπιστήμην ἔχειν τὴν ψυχὴν, οὐκ ἀναγκαῖον δέ· δυνατὸν γὰρ καὶ ἐν ἄλλῳ [125b] ὑπάρχειν τὴν αὐτὴν ταύτην), τὰ δ' ἀπλῶς οὐκ ἐνδέχεται ἐν ἐκείνοις ὑπάρχειν πρὸς ἃ ποτε τυγχάνει λεγόμενα (οἷον τὸ ἐναντίον ἐν τῷ ἐναντίῳ οὐδὲ τὴν ἐπιστήμην ἐν τῷ ἐπιστητῷ, ἐὰν μὴ τυγχάνῃ τὸ ἐπιστητὸν ψυχὴ ἢ ἄνθρωπος ὄν), σκοπεῖν οὖν χρὴ ἐὰν τις εἰς γένος θῇ τὸ τοιοῦτον εἰς τὸ μὴ τοιοῦτον. οἷον εἰ τὴν μνήμην μονὴν ἐπιστήμης εἶπεν· πᾶσα γὰρ μονὴ ἐν τῷ μένοντι καὶ περὶ ἐκεῖνο, ὥστε καὶ ἡ τῆς ἐπιστήμης μονὴ ἐν τῇ ἐπιστήμῃ. ἡ μνήμη ἄρα ἐν τῇ ἐπιστήμῃ, ἐπειδὴ μονὴ τῆς ἐπιστήμης ἐστίν. τοῦτο δ' οὐκ ἐνδέχεται· μνήμη γὰρ πᾶσα ἐν ψυχῇ. ἔστι δ' ὁ εἰρημένος τόπος καὶ πρὸς τὸ συμβεβηκὸς κοινός· οὐδὲν γὰρ διαφέρει τῆς μνήμης γένος τὴν μονὴν εἶπεν ἢ συμβεβηκέναι φάσκειν αὐτῇ τοῦτο· εἰ γὰρ ὅπως οὖν ἐστὶν ἡ μνήμη μονὴ ἐπιστήμης, ὁ αὐτὸς ἀρμόσει περὶ αὐτῆς λόγος.

Πάλιν εἰ τὴν ἕξιν εἰς τὴν ἐνέργειαν ἔθηκεν ἢ τὴν ἐνέργειαν εἰς τὴν ἕξιν, οἷον τὴν αἰσθησιν κίνησιν διὰ σώματος· ἡ μὲν γὰρ αἰσθησις ἕξις, ἡ δὲ κίνησις ἐνέργεια. ὁμοίως δὲ καὶ εἰ τὴν μνήμην ἕξιν καθεκτικὴν ὑπολήψεως εἶπεν· οὐδεμία γὰρ μνήμη ἕξις, ἀλλὰ μᾶλλον ἐνέργεια.

Διαμαρτάνουσι δὲ καὶ οἱ τὴν ἕξιν εἰς τὴν ἀκολουθοῦσαν δύναμιν τάττοντες, οἷον τὴν πραότητα ἐγκράτειαν ὀργῆς καὶ τὴν ἀνδρείαν καὶ τὴν δικαιοσύνην φόβων καὶ κερδῶν· ἀνδρείος μὲν γὰρ καὶ πρᾶος ὁ ἀπαθὴς λέγεται, ἐγκρατὴς δ' ὁ πάσχων καὶ μὴ ἀγόμενος. ἴσως μὲν οὖν ἀκολουθεῖ δύναμις ἐκατέρῳ τοιαύτῃ ὥστ', εἰ πάθοι, μὴ ἄγεσθαι ἀλλὰ κρατεῖν· οὐ μὴν τοῦτό γ' ἐστὶ τῷ μὲν <τὸ> ἀνδρείῳ τῷ δὲ <τὸ> πρᾶφ εἶναι, ἀλλὰ τὸ ὅλως μὴ πάσχειν ὑπὸ τῶν τοιούτων μηδέν.

Ἐνίστε δὲ καὶ τὸ παρακολουθοῦν ὅπως οὖν ὥς γένος τιθέασιν,

οἶον τὴν λύπην τῆς ὀργῆς καὶ τὴν ὑπόληψιν τῆς πίστεως· ἄμφω γὰρ τὰ εἰρημένα παρακολουθεῖ μὲν τρόπον τινὰ τοῖς ἀποδοθεῖσιν εἶδεσιν, οὐδέτερον δ' αὐτῶν γένος ἐστίν. ὁ μὲν γὰρ ὀργιζόμενος λυπεῖται προτέρας ἐν αὐτῷ τῆς λύπης γενομένης· οὐ γὰρ ἡ ὀργὴ τῆς λύπης ἀλλ' ἡ λύπη τῆς ὀργῆς αἰτία, ὥσθ' ἀπλῶς ἡ ὀργὴ οὐκ ἔστι λύπη. κατὰ ταῦτα δ' οὐδ' ἡ πίστις ὑπόληψις· ἐνδέχεται γὰρ τὴν αὐτὴν ὑπόληψιν καὶ μὴ πιστεύοντα ἔχειν, οὐκ ἐνδέχεται δ', εἴπερ εἶδος ἡ πίστις ὑπολήψεως· οὐ γὰρ ἐνδέχεται τὸ αὐτὸ ἔτι διαμένειν, ἅνπερ ἐκ τοῦ εἶδους ὅλως μεταβάλλῃ, καθάπερ οὐδὲ τὸ αὐτὸ ζῶον ὅτε μὲν ἄνθρωπον εἶναι ὅτε δὲ μή. ἂν δέ τις φῇ ἐξ ἀνάγκης τὸν ὑπολαμβάνοντα καὶ πιστεύειν, [126a] ἐπ' ἴσον ἡ ὑπόληψις καὶ ἡ πίστις ῥηθήσεται, ὥστ' οὐδ' ἂν οὕτως εἴη γένος· ἐπὶ πλεον γὰρ δεῖ λέγεσθαι τὸ γένος.

Ὅρᾶν δὲ καὶ εἰ ἐν τινι τῷ αὐτῷ πέφυκεν ἄμφω γίνεσθαι· ἐν ᾧ γὰρ τὸ εἶδος, καὶ τὸ γένος, οἶον ἐν ᾧ τὸ λευκόν, καὶ τὸ χρῶμα, καὶ ἐν ᾧ γραμματικὴ, καὶ ἐπιστήμη. ἐὰν οὖν τις τὴν αἰσχύνην φόβον εἴπῃ ἢ τὴν ὀργὴν λύπην, οὐ συμβήσεται ἐν τῷ αὐτῷ τὸ εἶδος καὶ τὸ γένος ὑπάρχειν· ἡ μὲν γὰρ αἰσχὺνὴ ἐν τῷ λογιστικῷ, ὁ δὲ φόβος ἐν τῷ θυμοειδεῖ· καὶ ἡ μὲν λύπη ἐν τῷ ἐπιθυμητικῷ (ἐν τούτῳ γὰρ καὶ ἡ ἡδονή), ἡ δὲ ὀργὴ ἐν τῷ θυμοειδεῖ. ὥστ' οὐ γένη τὰ ἀποδοθέντα, ἐπειδὴ οὐκ ἐν τῷ αὐτῷ τοῖς εἶδεσι πέφυκε γίνεσθαι. ὁμοίως δὲ καὶ εἰ ἡ φιλία ἐν τῷ ἐπιθυμητικῷ, οὐκ ἂν εἴη βούλησις τις· πᾶσα γὰρ βούλησις ἐν τῷ λογιστικῷ. χρήσιμος δ' ὁ τόπος καὶ πρὸς τὸ συμβεβηκός· ἐν τῷ αὐτῷ γὰρ τὸ συμβεβηκός καὶ ᾧ συμβέβηκεν, ὥστ' ἂν μὴ ἐν τῷ αὐτῷ φαίνηται, δῆλον ὅτι οὐ συμβέβηκεν.

Πάλιν εἰ κατὰ τι τὸ εἶδος τοῦ εἰρημένου γένους μετέχει· οὐ δοκεῖ γὰρ κατὰ τι μετέχεσθαι τὸ γένος. οὐ γάρ ἐστίν ὁ ἄνθρωπος κατὰ τι ζῶον, οὐδ' ἡ γραμματικὴ κατὰ τι ἐπιστήμη· ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων. σκοπεῖν οὖν εἰ ἐπὶ τινων κατὰ τι μετέχεται τὸ γένος, οἶον εἰ τὸ ζῶον ὅπερ αἰσθητὸν ἢ ὁρατὸν εἴρηται. κατὰ τι γὰρ αἰσθητὸν ἢ ὁρατὸν τὸ ζῶον· κατὰ τὸ σῶμα γὰρ αἰσθητὸν καὶ ὁρατόν, κατὰ δὲ τὴν ψυχὴν οὐ. ὥστ' οὐκ ἂν εἴη γένος τὸ ὁρατὸν καὶ τὸ αἰσθητὸν τοῦ ζώου.

Λανθάνουσι δ' ἐνίοτε καὶ τὸ ὅλον εἰς τὸ μέρος τιθέντες, οἶον τὸ ζῶον σῶμα ἔμψυχον. οὐδαμῶς δὲ τὸ μέρος τοῦ ὅλου κατηγορεῖται· ὥστ' οὐκ ἂν εἴη τὸ σῶμα γένος τοῦ ζώου, ἐπειδὴ μέρος ἐστίν.

Ὅρᾱν δὲ καὶ εἴ τι τῶν ψεκτῶν ἢ φευκτῶν εἰς δύναμιν ἢ τὸ δυνατόν ἔθηκεν, οἷον τὸν σοφιστὴν ἢ διάβολον ἢ κλέπτην τὸν δυνάμενον λάθρα τὰ ἀλλότρια κλέπτειν· οὐδεὶς γὰρ τῶν εἰρημένων τῷ δυνατός εἶναι τι τούτων τοιοῦτος λέγεται. δύναται μὲν γὰρ καὶ ὁ θεὸς καὶ ὁ σπουδαῖος τὰ φαῦλα δρᾶν, ἀλλ' οὐκ εἰσὶ τοιοῦτοι· πάντες γὰρ οἱ φαῦλοι κατὰ προαίρεσιν λέγονται. ἔτι πᾶσα δύναμις τῶν αἰρετῶν· καὶ γὰρ αἱ τῶν φαύλων δυνάμεις αἰρεταί, διὸ καὶ τὸν θεὸν καὶ τὸν σπουδαῖον ἔχειν φαμέν αὐτάς· δυνατοὺς γὰρ φαμεν εἶναι [126b] τὰ φαῦλα πράσσειν. ὥστ' οὐδενὸς ἂν εἴη ψεκτοῦ γένος ἡ δύναμις. εἰ δὲ μή, συμβήσεται τῶν ψεκτῶν τι αἰρετὸν εἶναι· ἔσται γάρ τις δύναμις ψεκτῆ.

Καὶ εἴ τι τῶν δι' αὐτὰ τιμίων ἢ αἰρετῶν εἰς δύναμιν ἢ τὸ δυνατόν ἢ τὸ ποιητικὸν ἔθηκεν· πᾶσα γὰρ δύναμις καὶ πᾶν τὸ δυνατόν ἢ τὸ ποιητικὸν δι' ἄλλο αἰρετόν.

Ἡ εἴ τι τῶν ἐν δύο γένεσιν ἢ πλείοσιν εἰς θάτερον ἔθηκεν. ἔνια γὰρ οὐκ ἔστιν εἰς ἓν γένος θεῖναι, οἷον τὸν φένακα καὶ τὸν διάβολον· οὔτε γὰρ ὁ προαιρούμενος ἀδυνατῶν δέ, οὔθ' ὁ δυνάμενος μὴ προαιρούμενος δέ, διάβολος ἢ φέναξ, ἀλλ' ὁ ἄμφω ταῦτα ἔχων. ὥστ' οὐ θετέον εἰς ἓν γένος ἀλλ' εἰς ἀμφοτέρα τὰ εἰρημένα.

Ἔτι ἐνίστε ἀνάπαλιν τὸ μὲν γένος ὡς διαφορὰν τὴν δὲ διαφορὰν ὡς γένος ἀποδιδόασιν, οἷον τὴν ἐκπληξιν ὑπερβολὴν θαυμασιότητος καὶ τὴν πίστιν σφοδρότητα ὑπολήψεως. οὔτε γὰρ ἡ ὑπερβολὴ οὔθ' ἡ σφοδρότης γένος, ἀλλὰ διαφορά· δοκεῖ γὰρ ἡ ἐκπληξὶς θαυμασιότης εἶναι ὑπερβάλλουσα καὶ ἡ πίστις ὑπόληψις σφοδρά, ὥστε γένος ἡ θαυμασιότης καὶ ἡ ὑπόληψις, ἡ δ' ὑπερβολὴ καὶ ἡ σφοδρότης διαφορά. ἔτι εἴ τις τὴν ὑπερβολὴν καὶ τὴν σφοδρότητα ὡς γένη ἀποδώσει, τὰ ἄψυχα πιστεύσει καὶ ἐκπλαγῆσεται. ἡ γὰρ ἐκάστου σφοδρότης καὶ ὑπερβολὴ πάρεστιν ἐκείνῳ οὗ ἔστι σφοδρότης καὶ ὑπερβολή. εἰ οὖν ἡ ἐκπληξὶς ὑπερβολὴ ἔστι θαυμασιότητος, παρέσται τῇ θαυμασιότητι ἡ ἐκπληξὶς, ὥστ' ἡ θαυμασιότης ἐκπλαγῆσεται. ὁμοίως δὲ καὶ ἡ πίστις παρέσται τῇ ὑπολήψει, εἴπερ σφοδρότης ὑπολήψεως ἔστιν, ὥστε ἡ ὑπόληψις πιστεύσει. ἔτι συμβήσεται τῷ οὕτως ἀποδιδόντι σφοδρότητα σφοδρὰν λέγειν καὶ ὑπερβολὴν ὑπερβάλλουσαν. ἔστι γὰρ πίστις σφοδρά [καὶ ἐκπληξὶς ὑπερβάλλουσα]· εἰ οὖν ἡ πίστις σφοδρότης ἐστί, σφοδρότης ἂν εἴη σφοδρά. ὁμοίως δὲ καὶ ἐκπληξὶς ἔστιν ὑπερβάλλουσα· εἰ οὖν ἡ ἐκπληξὶς ὑπερβολὴ ἔστιν, ὑπερβολὴ

ἂν εἴη ὑπερβάλλουσα. οὐ δοκεῖ δ' οὐδέτερον τούτων, ὥσπερ οὐδὲ ἡ ἐπιστήμη ἐπιστήμον οὐδ' ἡ κίνησις κινούμενον.

Ἐνίστε δὲ διαμαρτάνουσι καὶ τὸ πάθος εἰς γένος τὸ πεπονθὸς τιθέντες, οἷον ὅσοι τὴν ἀθανασίαν ζωὴν αἰδιὸν φασιν εἶναι· πάθος γάρ τι ζωῆς ἢ σύμπτωμα ἢ ἀθανασία ἔοικεν εἶναι. ὅτι δ' ἀληθὲς τὸ λεγόμενον, δῆλον ἂν γένοιτο εἰ τις συγχωρήσειεν ἐκ θνητοῦ τινα ἀθάνατον γίνεσθαι· οὐδεὶς γὰρ φήσει ἐτέραν αὐτὸν ζωὴν λαμβάνειν, ἀλλὰ σύμπτωμά τι [127a] ἢ πάθος αὐτῇ ταύτῃ παραγίνεσθαι. ὥστ' οὐ γένος ἢ ζωὴ τῆς ἀθανασίας.

Πάλιν εἰ τοῦ πάθους, οὗ ἐστὶ πάθος, ἐκεῖνο γένος φασὶν εἶναι, οἷον τὸ πνεῦμα ἀέρα κινούμενον. μᾶλλον γὰρ κίνησις ἀέρος τὸ πνεῦμα· ὁ γὰρ αὐτὸς ἀήρ διαμένει, ὅταν τε κινῆται καὶ ὅταν μένη. ὥστ' οὐκ ἔστιν ὅλως ἀήρ τὸ πνεῦμα· ἦν γὰρ ἂν καὶ μὴ κινουμένου τοῦ ἀέρος πνεῦμα, εἴπερ ὁ αὐτὸς ἀήρ διαμένει ὅσπερ ἦν πνεῦμα. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων τῶν τοιούτων. εἰ δ' ἄρα καὶ ἐπὶ τούτου δεῖ συγχωρῆσαι ὅτι ἀήρ ἐστὶ κινούμενος τὸ πνεῦμα, ἀλλ' οὔτε γε ἐπὶ πάντων τὸ τοιοῦτον ἀποδεκτέον καθ' ὧν μὴ ἀληθεύεται τὸ γένος, ἀλλ' ἐφ' ὅσων ἀληθῶς κατηγορεῖται τὸ ἀποδοθὲν γένος. ἐπ' ἐνίων γὰρ οὐ δοκεῖ ἀληθεύεσθαι, οἷον ἐπὶ τοῦ πηλοῦ καὶ τῆς χιόνος. τὴν μὲν γὰρ χιόνα φασὶν ὕδωρ εἶναι πεπηγός, τὸν δὲ πηλὸν γῆν ὑγρῷ πεφυραμένην· ἔστι δ' οὐθ' ἡ χιών ὕδωρ οὐθ' ὁ πηλὸς γῆ. ὥστ' οὐκ ἂν εἴη γένος οὐδέτερον τῶν ἀποδοθέντων· δεῖ γὰρ τὸ γένος ἀληθεύεσθαι ἀεὶ κατὰ τῶν εἰδῶν. ὁμοίως δ' οὐδ' ὁ οἶνός ἐστιν ὕδωρ σεσηπός, καθάπερ Ἐμπεδοκλῆς φησι “σαπὲν ἐν ξύλῳ ὕδωρ”· ἀπλῶς γὰρ οὐκ ἔστιν ὕδωρ.

Ἔτι εἰ ὅλως τὸ ἀποδοθὲν μηδενός ἐστὶ γένος· δῆλον γὰρ ὡς οὐδὲ τοῦ λεχθέντος. σκοπεῖν δ' ἐκ τοῦ μηδὲν διαφέρειν εἶδει τὰ μετέχοντα τοῦ ἀποδοθέντος γένους, οἷον τὰ λευκά· οὐδὲν γὰρ διαφέρει τῷ εἶδει ταῦτ' ἀλλήλων, παντὸς δὲ γένους ἔστιν εἶδη διάφορα· ὥστ' οὐκ ἂν εἴη τὸ λευκὸν γένος οὐδενός.

Πάλιν εἰ τὸ πᾶσιν ἀκολουθοῦν γένος ἢ διαφορὰν εἶπεν· πλείω γὰρ τὰ πᾶσιν ἐπόμενα, οἷον τὸ ὄν καὶ τὸ ἐν τῶν πᾶσιν ἐπομένων ἐστίν. εἰ οὖν τὸ ὄν γένος ἀποδέδωκε, δῆλον ὅτι πάντων ἂν εἴη γένος, ἐπειδὴ κατηγορεῖται αὐτῶν· κατ' οὐδενός γὰρ τὸ γένος ἀλλ' ἢ κατὰ τῶν εἰδῶν κατηγορεῖται. ὥστε καὶ τὸ ἐν εἶδος ἂν εἴη τοῦ ὄντος. συμβαίνει οὖν κατὰ πάντων ὧν τὸ γένος κατηγορεῖται καὶ τὸ εἶδος κατηγορεῖσθαι, ἐπειδὴ τὸ ὄν καὶ τὸ ἐν κατὰ πάντων ἀπλῶς

κατηγορεῖται, δέον ἐπ' ἔλαττον τὸ εἶδος κατηγορεῖσθαι. εἰ δὲ τὸ πᾶσιν ἐπόμενον διαφορὰν εἶπε, δῆλον ὅτι ἐπ' ἴσον ἢ ἐπὶ πλεόν ἢ διαφορὰ τοῦ γένους ῥηθήσεται· εἰ μὲν γὰρ καὶ τὸ γένος τῶν πᾶσιν ἐπομένων, ἐπ' ἴσον· εἰ δὲ μὴ πᾶσιν ἔπεται τὸ γένος, ἐπὶ πλεόν ἢ διαφορὰ λέγοιτ' ἂν αὐτοῦ.

[127b] Ἔτι εἰ ἐν ὑποκειμένῳ τῷ εἶδει τὸ ἀποδοθὲν γένος λέγεται, καθάπερ τὸ λευκὸν ἐπὶ τῆς χιόνος, ὥστε δῆλον ὅτι οὐκ ἂν εἴη γένος· καθ' ὑποκειμένου γὰρ τοῦ εἶδους μόνον τὸ γένος λέγεται.

Σκοπεῖν δὲ καὶ εἰ μὴ συνώνυμον τὸ γένος τῷ εἶδει· κατὰ πάντων γὰρ τῶν εἰδῶν συνωνύμως τὸ γένος κατηγορεῖται.

Ἔτι ὅταν ὄντος καὶ τῷ εἶδει καὶ τῷ γένει ἐναντίου τὸ βέλτιον τῶν ἐναντίων εἰς τὸ χεῖρον γένος θῇ· συμβήσεται γὰρ τὸ λοιπὸν ἐν τῷ λοιπῷ εἶναι, ἐπειδὴ τὰ ἐναντία ἐν τοῖς ἐναντίοις γένεσιν, ὥστε τὸ βέλτιον ἐν τῷ χείρονι ἔσται καὶ τὸ χεῖρον ἐν τῷ βελτίονι· δοκεῖ δὲ τοῦ βελτίονος καὶ τὸ γένος βέλτιον εἶναι. καὶ εἰ τοῦ αὐτοῦ εἶδους ὁμοίως πρὸς ἅμφω ἔχοντος εἰς τὸ χεῖρον καὶ μὴ εἰς τὸ βέλτιον γένος ἔθηκεν, οἷον τὴν ψυχὴν ὅπερ κίνησιν ἢ κινούμενον. ὁμοίως γὰρ αὕτη στατική καὶ κινητική δοκεῖ εἶναι· ὥστ' εἰ βέλτιον ἢ στάσις, εἰς τοῦτο ἔδει τὸ γένος θεῖναι.

Ἔτι ἐκ τοῦ μᾶλλον καὶ ἥττον, ἀνασκευάζοντι μὲν, εἰ τὸ γένος δέχεται τὸ μᾶλλον, τὸ δ' εἶδος μὴ δέχεται, μήτ' αὐτὸ μήτε τὸ κατ' ἐκεῖνο λεγόμενον. οἷον εἰ ἡ ἀρετὴ δέχεται τὸ μᾶλλον, καὶ ἡ δικαιοσύνη καὶ ὁ δίκαιος· λέγεται γὰρ δικαιότερος ἕτερος ἐτέρου. εἰ οὖν τὸ μὲν ἀποδοθὲν γένος τὸ μᾶλλον δέχεται, τὸ δ' εἶδος μὴ δέχεται, μήτ' αὐτὸ μήτε τὸ κατ' ἐκεῖνο λεγόμενον, οὐκ ἂν εἴη γένος τὸ ἀποδοθὲν.

Πάλιν εἰ τὸ μᾶλλον δοκοῦν ἢ ὁμοίως μὴ ἔστι γένος, δῆλον ὅτι οὐδὲ τὸ ἀποδοθὲν. χρήσιμος δ' ὁ τόπος ἐπὶ τῶν τοιούτων μάλιστα, ἐφ' ὧν πλείω φαίνεται τοῦ εἶδους ἐν τῷ τί ἐστι κατηγορούμενα καὶ μὴ διώριστα μηδ' ἔχομεν εἰπεῖν ποῖον αὐτῶν γένος. οἷον τῆς ὀργῆς καὶ ἡ λύπη καὶ ἡ ὑπόληψις ὀλιγωρίας ἐν τῷ τί ἐστι κατηγορεῖσθαι δοκεῖ· λυπεῖται τε γὰρ ὁ ὀργιζόμενος καὶ ὑπολαμβάνει ὀλιγωρεῖσθαι. ἡ αὕτη δὲ σκέψις καὶ ἐπὶ τοῦ εἶδους πρὸς ἄλλο τι συγκρίνοντι· εἰ γὰρ τὸ μᾶλλον ἢ τὸ ὁμοίως δοκοῦν εἶναι ἐν τῷ ἀποδοθέντι γένει μὴ ἔστιν ἐν τῷ γένει, δῆλον ὅτι οὐδὲ τὸ ἀποδοθὲν εἶδος εἴη ἂν ἐν τῷ γένει.

Ἀναιροῦντι μὲν οὖν καθάπερ εἴρηται χρηστέον. κατασκευάζοντι δέ, εἰ μὲν ἐπιδέχεται τὸ μᾶλλον τό τε ἀποδοθὲν

[128a] γένος καὶ τὸ εἶδος, οὐ χρήσιμος ὁ τόπος· οὐδὲν γὰρ κωλύει ἀμφοτέρων ἐπιδεχομένων μὴ εἶναι θάτερον θατέρου γένος· τό τε γὰρ καλὸν καὶ τὸ λευκὸν ἐπιδέχεται τὸ μᾶλλον, καὶ οὐδέτερον οὐδετέρου γένος. ἡ δὲ τῶν γενῶν καὶ τῶν εἰδῶν πρὸς ἄλληλα σύγκρισις χρήσιμος· οἷον εἰ ὁμοίως τότε καὶ τότε γένος, εἰ θάτερον γένος, καὶ θάτερον. ὁμοίως δὲ καὶ εἰ τὸ ἦττον, καὶ τὸ μᾶλλον· οἷον εἰ τῆς ἐγκρατείας μᾶλλον ἢ δύναμις ἢ ἡ ἀρετὴ γένος, ἢ δ' ἀρετὴ γένος, καὶ ἡ δύναμις. τὰ δ' αὐτὰ καὶ ἐπὶ τοῦ εἶδους ἀρμόσει λέγεσθαι· εἰ γὰρ ὁμοίως τότε καὶ τότε τοῦ προκειμένου εἶδος, εἰ θάτερον εἶδος, καὶ τὸ λοιπόν· καὶ εἰ τὸ ἦττον δοκοῦν εἰδός ἐστι, καὶ τὸ μᾶλλον.

Ἔτι πρὸς τὸ κατασκευάζειν σκεπτέον εἰ καθ' ὧν ἀπεδόθη τὸ γένος, ἐν τῷ τί ἐστι κατηγορεῖται, μὴ ὄντος ἐνὸς τοῦ ἀποδοθέντος εἶδους ἀλλὰ πλειόνων καὶ διαφορῶν· δηλον γὰρ ὅτι γένος ἔσται. εἰ δ' ἐν τὸ ἀποδοθὲν εἰδός ἐστι, σκοπεῖν εἰ καὶ κατ' ἄλλων εἰδῶν τὸ γένος ἐν τῷ τί ἐστι κατηγορεῖται· πάλιν γὰρ συμβήσεται κατὰ πλειόνων καὶ διαφορῶν αὐτὸ κατηγορεῖσθαι.

Ἐπεὶ δὲ δοκεῖ τισι καὶ ἡ διαφορὰ ἐν τῷ τί ἐστι τῶν εἰδῶν κατηγορεῖσθαι, χωριστέον τὸ γένος ἀπὸ τῆς διαφορᾶς χρώμενον τοῖς εἰρημένοις στοιχείοις, πρῶτον μὲν ὅτι τὸ γένος ἐπὶ πλεόν λέγεται τῆς διαφορᾶς, εἴθ' ὅτι κατὰ τὴν τοῦ τί ἐστὶν ἀπόδοσιν μᾶλλον ἀρμόττει τὸ γένος ἢ τὴν διαφορὰν εἰπεῖν (ὁ γὰρ ζῶον εἶπας τὸν ἄνθρωπον μᾶλλον δηλοῖ τί ἐστὶν ὁ ἄνθρωπος ἢ ὁ πεζόν), καὶ ὅτι ἡ μὲν διαφορὰ ποιότητα τοῦ γένους ἀεὶ σημαίνει, τὸ δὲ γένος τῆς διαφορᾶς οὐ· ὁ μὲν γὰρ εἶπας πεζὸν ποιόν τι ζῶον λέγει, ὁ δὲ ζῶον εἶπας οὐ λέγει ποιόν τι πεζόν.

Τὴν μὲν οὖν διαφορὰν ἀπὸ τοῦ γένους οὕτω χωριστέον. ἐπεὶ δὲ δοκεῖ, «εἰ» τὸ μουσικόν, ἢ μουσικόν ἐστίν, ἐπιστήμὸν τί ἐστι, καὶ ἡ μουσικὴ ἐπιστήμη τις εἶναι, καὶ εἰ τὸ βαδίζον τῷ βαδίζειν κινεῖται, ἢ βάδισις κίνησις τις εἶναι, σκοπεῖν, ἐν ᾧ ἂν γένει βούλῃ τι κατασκευάσαι, τὸν εἰρημένον τρόπον, οἷον εἰ τὴν ἐπιστήμην ὅπερ πίστιν, εἰ ὁ ἐπιστάμενος ἢ ἐπίσταται πιστεύει· δηλον γὰρ ὅτι ἡ ἐπιστήμη πίστις ἂν τις εἴη. τὸν αὐτὸν δὲ τρόπον καὶ ἐπὶ τῶν ἄλλων τῶν τοιούτων.

Ἔτι ἐπεὶ τὸ παρεπόμενόν τινι ἀεὶ καὶ μὴ ἀντιστρέφον χαλεπὸν χωρίσαι τοῦ μὴ γένος εἶναι, ἂν τότε μὲν τῷδ' ἔπηται [128b] παντί, τότε δὲ τῷδε μὴ παντί, οἷον τῇ νηνεμία ἢ ἡρεμία καὶ τῷ ἀριθμῷ τὸ διαιρετόν, ἀνάπαλιν δ' οὐ (τὸ γὰρ διαιρετόν οὐ πᾶν ἀριθμός, οὐδ' ἡ

ἡρεμία νηνεμία), αὐτὸν μὲν χρῆσθαι ὡς γένους ὄντος τοῦ ἀεὶ ἀκολουθοῦντος, ὅταν μὴ ἀντιστρέφῃ θάτερον, ἄλλου δὲ προτείνοντος μὴ ἐπὶ πάντων ὑπακούειν. ἔνστασις δ' αὐτοῦ ὅτι τὸ μὴ ὄν ἔπεται παντὶ τῷ γινομένῳ (τὸ γὰρ γινόμενον οὐκ ἔστι) καὶ οὐκ ἀντιστρέφει (οὐ γὰρ πᾶν τὸ μὴ ὄν γίνεται), ἀλλ' ὅμως οὐκ ἔστι γένος τὸ μὴ ὄν τοῦ γινομένου· ἀπλῶς γὰρ οὐκ ἔστι τοῦ μὴ ὄντος εἶδη.

Περὶ μὲν οὖν τοῦ γένους καθάπερ εἴρηται μετιτέον.

Ε

Πότερον δ' ἴδιον ἢ οὐκ ἴδιόν ἐστι τὸ εἰρημένον, διὰ τῶνδε σκεπτέον.

Ἀποδίδεται [δὲ] τὸ ἴδιον ἢ καθ' αὐτὸ καὶ αἰεί, ἢ πρὸς ἕτερον καὶ ποτέ, οἷον καθ' αὐτὸ μὲν ἀνθρώπου τὸ ζῶον ἡμερον φύσει, πρὸς ἕτερον δὲ οἷον ψυχῆς πρὸς σῶμα, ὅτι τὸ μὲν προστακτικὸν τὸ δ' ὑπηρετικόν ἐστιν, αἰεί δὲ οἷον θεοῦ τὸ ζῶον ἀθάνατον, ποτέ δ' οἷον τοῦ τινὸς ἀνθρώπου τὸ περιπατεῖν ἐν τῷ γυμνασίῳ.

Ἔστι δὲ τοῦ πρὸς ἕτερον ἰδίου ἀποδιδομένου ἢ δύο προβλήματα ἢ τέτταρα. ἐὰν μὲν γὰρ τοῦ μὲν ἀποδῶ τοῦ δ' ἀρνήσῃται ταῦτ' οὗτο, δύο μόνον προβλήματα γίνονται, καθάπερ τὸ ἀνθρώπου πρὸς ἵππον ἴδιον ὅτι δίπουν ἐστίν. καὶ γὰρ ὅτι ἄνθρωπος οὐ δίπουν ἐστίν ἐπιχειροῖ τις ἄν, καὶ ὅτι ὁ ἵππος δίπουν· ἀμφοτέρως δ' ἂν κινοῖτο τὸ ἴδιον. ἐὰν δ' ἑκατέρου ἑκάτερον ἀποδῶ καὶ ἑκατέρου ἀπαρνηθῇ, τέτταρα προβλήματα ἔσται, καθάπερ τὸ ἀνθρώπου ἴδιον πρὸς ἵππον, ὅτι τὸ μὲν δίπουν τὸ δὲ τετράπουν ἐστίν. καὶ γὰρ ὅτι ἄνθρωπος οὐ δίπουν καὶ ὅτι τετράπουν πέφυκεν ἔστιν ἐπιχειρεῖν, καὶ ὅτι ὁ ἵππος δίπουν καὶ ὅτι οὐ τετράπουν οἷόν τ' ἐπιχειρεῖν. ὅπως δ' οὖν δειχθέντος ἀναιρεῖται τὸ κείμενον.

Ἔστι δὲ τὸ μὲν καθ' αὐτὸ ἴδιον ὃ πρὸς ἅπαντα ἀποδίδεται καὶ παντὸς χωρίζει, καθάπερ ἀνθρώπου τὸ ζῶον θνητὸν ἐπιστήμης δεκτικόν· τὸ δὲ πρὸς ἕτερον ὃ μὴ ἀπὸ παντὸς ἀλλ' ἀπὸ τινος τακτοῦ διορίζει, καθάπερ ἀρετῆς πρὸς ἐπιστήμην, ὅτι τὸ μὲν ἐν πλείοσι, τὸ δ' ἐν λογιστικῷ μόνον καὶ τοῖς ἔχουσι λογιστικὸν πέφυκε γίνεσθαι. τὸ δ' αἰεί ὃ [129a] κατὰ πάντα χρόνον ἀληθεύεται καὶ μηδέποτε ἀπολείπεται, καθάπερ τοῦ ζώου τὸ ἐκ ψυχῆς καὶ σώματος συγκείμενον, τὸ δὲ ποτέ ὃ κατὰ τινα χρόνον ἀληθεύεται καὶ μὴ ἐξ ἀνάγκης αἰεί παρέπεται, καθάπερ τοῦ τινὸς ἀνθρώπου τὸ περιπατεῖν ἐν ἀγορᾷ.

Ἔστι δὲ τὸ πρὸς ἄλλο ἴδιον ἀποδοῦναι τὸ διαφορὰν εἰπεῖν ἢ ἐν ἅπασι καὶ αἰεί, ἢ ὡς ἐπὶ τὸ πολὺ καὶ ἐν τοῖς πλείστοις. οἷον ἐν ἅπασι μὲν καὶ αἰεί καθάπερ τὸ ἀνθρώπου ἴδιον πρὸς ἵππον ὅτι δίπουν· ἄνθρωπος μὲν γὰρ καὶ αἰεί καὶ πᾶς ἐστι δίπους, ἵππος δ' οὐδεὶς ἐστι δίπους οὐδέποτε. ὡς ἐπὶ τὸ πολὺ δὲ καὶ ἐν τοῖς πλείστοις καθάπερ τὸ λογιστικοῦ ἴδιον πρὸς ἐπιθυμητικὸν καὶ θυμικὸν τὸ τὸ μὲν

προσάττειν τὸ δ' ὑπηρετεῖν· οὔτε γὰρ τὸ λογιστικὸν πάντοτε προσάττει, ἀλλ' ἐνίοτε καὶ προσάττεται, οὔτε τὸ ἐπιθυμητικὸν καὶ θυμικὸν ἀεὶ προσάττεται, ἀλλὰ καὶ προσάττει ποτέ, ὅταν ἢ μοχθηρὰ ἢ ψυχὴ τοῦ ἀνθρώπου.

Τῶν δ' ἰδίων ἐστὶ λογικὰ μάλιστα τὰ τε καθ' αὐτὰ καὶ ἀεὶ καὶ τὰ πρὸς ἕτερον. τοῦ μὲν γὰρ πρὸς ἕτερον ἰδίου πλείω προβλήματα ἐστὶ, καθάπερ εἶπομεν καὶ πρότερον· ἢ γὰρ δύο ἢ τέτταρα ἐξ ἀνάγκης γίνονται τὰ προβλήματα. πλείους οὖν οἱ λόγοι γίνονται πρὸς ταῦτα. τὸ δὲ καθ' αὐτὸ καὶ τὸ ἀεὶ πρὸς πολλὰ ἔστιν ἐπιχειρεῖν ἢ πρὸς πλείους χρόνους παρατηρεῖν, τὸ μὲν καθ' αὐτὸ πρὸς πολλὰ (πρὸς ἕκαστον γὰρ τῶν ὄντων δεῖ ὑπάρχειν αὐτῷ τὸ ἴδιον, ὥστ' εἰ μὴ πρὸς ἅπαντα χωρίζεται, οὐκ ἂν εἴη καλῶς ἀποδοδεκόμενον τὸ ἴδιον), τὸ δ' ἀεὶ πρὸς πολλοὺς χρόνους παρατηρεῖν· κἂν εἰ γὰρ μὴ ὑπάρχει κἂν εἰ μὴ ὑπῆρξε κἂν εἰ μὴ ὑπάρξει, οὐκ ἔσται ἴδιον. τὸ δὲ ποτέ πρὸς τὸν νῦν μόνον χρόνον ἐπισκοποῦμεν· οὐκ οὖν εἰσὶ λόγοι πρὸς αὐτὸ πολλοί· λογικὸν δὲ τοῦτ' ἔστι πρόβλημα πρὸς ὃ λόγοι γένοιντ' ἂν καὶ συχνοὶ καὶ καλοί.

Τὸ μὲν οὖν πρὸς ἕτερον ἴδιον ῥηθὲν ἐκ τῶν περὶ τὸ συμβεβηκὸς τόπων ἐπισκεπτέον ἐστίν, εἰ τῷ μὲν συμβέβηκε τῷ δὲ μὴ συμβέβηκεν. περὶ δὲ τῶν ἀεὶ καὶ τῶν καθ' αὐτὸ διὰ τῶνδε θεωρητέον.

[129b] Πρῶτον μὲν εἰ μὴ καλῶς ἀποδέδοται τὸ ἴδιον ἢ καλῶς. τοῦ δὲ μὴ καλῶς ἢ καλῶς ἐστὶν ἓν μὲν, εἰ μὴ διὰ γνωριμωτέρων ἢ διὰ γνωριμωτέρων κεῖται τὸ ἴδιον, ἀνασκευάζοντα μὲν εἰ μὴ διὰ γνωριμωτέρων, κατασκευάζοντα δὲ εἰ διὰ γνωριμωτέρων. τοῦ δὲ μὴ διὰ γνωριμωτέρων ἐστὶ τὸ μὲν εἰ ὅλως ἀγνωστότερόν ἐστι τὸ ἴδιον ὃ ἀποδίδωσι τούτου οὗ τὸ ἴδιον εἴρηκεν· οὐ γὰρ ἔσται καλῶς κείμενον τὸ ἴδιον. γνώσεως γὰρ ἔνεκα τὸ ἴδιον ποιούμεθα· διὰ γνωριμωτέρων οὖν ἀποδοτέον· οὕτω γὰρ ἔσται κατανοεῖν ἱκανῶς μᾶλλον. οἷον ἐπεὶ ὁ θεὸς πυρὸς ἴδιον εἶναι τὸ ὁμοιότατον ψυχῇ ἀγνωστοτέρῳ κέχρηται τοῦ πυρὸς τῇ ψυχῇ (μᾶλλον γὰρ ἴσμεν τί ἐστὶ πῦρ ἢ ψυχὴ), οὐκ ἂν εἴη καλῶς κείμενον ἴδιον πυρὸς τὸ ὁμοιότατον ψυχῇ. τὸ δ' εἰ μὴ γνωριμωτέρόν ἐστι τόδε τῷδ' ὑπάρχον. δεῖ γὰρ μὴ μόνον εἶναι γνωριμώτερον τοῦ πράγματος, ἀλλὰ καὶ ὅτι τῷδ' ὑπάρχει γνωριμώτερον· ὃ μὴ γὰρ εἰδὼς εἰ τῷδ' ὑπάρχει οὐδ' εἰ τῷδε ὑπάρχει μόνῳ γνωριεῖ, ὥσθ' ὁποτέρου τούτων συμβάντος ἀσαφὲς γίνεται τὸ ἴδιον. οἷον ἐπεὶ ὁ θεὸς πυρὸς ἴδιον τὸ ἐν ᾧ πρώτῳ ψυχῇ πέφυκεν εἶναι

ἀγνωστοτέρῳ κέχρηται τοῦ πυρὸς τῷ εἰ ἐν τούτῳ ὑπάρχει ψυχὴ καὶ εἰ ἐν πρώτῳ ὑπάρχει, οὐκ ἂν εἴη καλῶς κείμενον ἴδιον πυρὸς τὸ ἐν ᾧ πρώτῳ ψυχὴ πέφυκεν εἶναι. κατασκευάζοντα δὲ εἰ διὰ γνωριμωτέρων κεῖται τὸ ἴδιον, καὶ εἰ διὰ γνωριμωτέρων καθ' ἑκάτερον τῶν τρόπων. ἔσται γὰρ καλῶς κατὰ τοῦτο κείμενον τὸ ἴδιον· τῶν γὰρ κατασκευαστικῶν τόπων τοῦ καλῶς οἱ μὲν κατὰ τοῦτο μόνον, οἱ δ' ἀπλῶς δείξουσιν ὅτι καλῶς. οἷον ἐπεὶ ὁ εἶπας ζῶου ἴδιον τὸ αἰσθησιν ἔχειν διὰ γνωριμωτέρων καὶ γνωριμώτερον ἀποδέδωκε τὸ ἴδιον καθ' ἑκάτερον τῶν τρόπων, εἴη ἂν καλῶς ἀποδοδομένον κατὰ τοῦτο τοῦ ζῶου ἴδιον τὸ αἰσθησιν ἔχειν.

Ἔπειτ' ἀνασκευάζοντα μὲν εἴ τι τῶν ὀνομάτων τῶν ἐν τῷ ἰδίῳ ἀποδοδομένων πλεοναχῶς λέγεται, ἢ καὶ ὅλος ὁ λόγος πλείω σημαίνει· οὐ γὰρ ἔσται καλῶς κείμενον τὸ ἴδιον. οἷον ἐπεὶ τὸ αἰσθάνεσθαι πλείω σημαίνει, ἐν μὲν τὸ αἰσθησιν ἔχειν ἐν δὲ τὸ αἰσθήσει χρῆσθαι, οὐκ ἂν εἴη τοῦ ζῶου ἴδιον καλῶς κείμενον τὸ αἰσθάνεσθαι πεφυκός. διὰ τοῦτο [130a] δ' οὐ χρηστὸν ἐστὶν οὗτ' ὀνόματι πλεοναχῶς λεγομένῳ οὔτε λόγῳ τῷ τὸ ἴδιον σημαίνοντι, διότι τὸ πλεοναχῶς λεγόμενον ἀσαφὲς ποιεῖ τὸ ῥηθέν, ἀποροῦντος τοῦ μέλλοντος ἐπιχειρεῖν πότερον λέγει τῶν πλεοναχῶς λεγομένων· τὸ γὰρ ἴδιον τοῦ μαθεῖν χάριν ἀποδίδοται. ἔτι δὲ πρὸς τούτοις ἀναγκαῖόν ἐστιν ἔλεγχόν τινα γίνεσθαι τοῖς οὕτως ἀποδιδούσι τὸ ἴδιον, ὅταν ἐπὶ τοῦ διαφωνοῦντός τις ποιῇ τὸν συλλογισμόν τοῦ πλεοναχῶς λεγομένου. κατασκευάζοντα δὲ εἰ μὴ πλείω σημαίνει μήτε τῶν ὀνομάτων μηδὲν μήθ' ὅλος ὁ λόγος· ἔσται γὰρ καλῶς κατὰ τοῦτο κείμενον τὸ ἴδιον. οἷον ἐπεὶ οὔτε τὸ σῶμα πολλὰ δηλοῖ οὔτε τὸ εὐκίνητότατον εἰς τὸν ἄνω τόπον οὔτε τὸ σύνολον τὸ ἐκ τούτων συντιθέμενον, εἴη ἂν καλῶς κείμενον κατὰ τοῦτο πυρὸς ἴδιον σῶμα τὸ εὐκίνητότατον εἰς τὸν ἄνω τόπον.

Ἔπειτ' ἀνασκευάζοντα μὲν εἰ πλεοναχῶς λέγεται τοῦτο οὐ τὸ ἴδιον ἀποδίδωσι, μὴ διώρισται δὲ τὸ τίνος αὐτῶν ἴδιον τίθησιν· οὐ γὰρ ἔσται καλῶς ἀποδοδομένον τὸ ἴδιον. δι' ἃς δ' αἰτίας, οὐκ ἄδηλόν ἐστιν ἐκ τῶν πρότερον εἰρημένων· τὰ γὰρ αὐτὰ συμβαίνειν ἀναγκαῖόν ἐστιν. οἷον ἐπεὶ τὸ ἐπίστασθαι τοῦτο πολλὰ σημαίνει (τὸ μὲν γὰρ ἐπιστήμην ἔχειν αὐτό, τὸ δ' ἐπιστήμη χρῆσθαι αὐτό, τὸ δ' ἐπιστήμην ἔχειν αὐτοῦ, τὸ δ' ἐπιστήμη χρῆσθαι αὐτοῦ), οὐκ ἂν εἴη τοῦ ἐπίστασθαι τοῦτο καλῶς ἴδιον ἀποδοδομένον, μὴ διορισθέντος τοῦ τίνος τίθησιν αὐτῶν τὸ ἴδιον. κατασκευάζοντα δὲ εἰ μὴ λέγεται

Ἐπειτ' ἀνασκευάζοντα μὲν εἰ πλεονάκεις εἴρηται τὸ αὐτὸ ἐν τῷ ἰδίῳ· πολλάκις γὰρ λανθάνουσι τοῦτο ποιοῦντες καὶ ἐν τοῖς ἰδίῳις, καθάπερ καὶ ἐν τοῖς ὅροις. οὐκ ἔσται δὲ καλῶς κείμενον τὸ τοῦτο πεπονθὸς ἴδιον· ταραττεῖ γὰρ τὸν ἀκούοντα πλεονάκεις λεχθέν. ἀσαφὲς οὖν ἀναγκαῖόν ἐστι γίνεσθαι, καὶ πρὸς τούτοις ἀδολεσχεῖν δοκοῦσιν. ἔσται δὲ συμπίπτον τὸ πλεονάκεις εἰπεῖν τὸ αὐτὸ κατὰ δύο τρόπους· καθ' ἓνα μὲν, ὅταν ὀνομάσῃ πλεονάκεις τὸ αὐτό, καθάπερ εἴ τις ἴδιον ἀποδοίῃ πυρὸς σῶμα τὸ λεπτότατον τῶν σωμάτων (οὗτος γὰρ πλεονάκεις εἴρηκε τὸ “σῶμα”)· δεύτερον δ', ἂν τις μεταλαμβάνῃ τοὺς λόγους ἀντὶ τῶν ὀνομάτων, καθάπερ εἴ [130b] τις ἀποδοίῃ γῆς ἴδιον “οὐσία ἢ μάλιστα κατὰ φύσιν φερομένη τῶν σωμάτων εἰς τὸν κάτω τόπον”, ἔπειτα μεταλάβοι ἀντὶ τῶν “σωμάτων” τὸ “οὐσιῶν τοιωνδί”· ἐν γὰρ καὶ ταυτὸν ἐστὶ σῶμα καὶ οὐσία τοιαδί· ἔσται γὰρ οὗτος τὸ “οὐσία” πλεονάκεις εἰρηκῶς. ὥστ' οὐδέτερον ἂν εἴη καλῶς κείμενον τῶν ἰδίων. κατασκευάζοντα δὲ εἰ μηδενὶ χρῆται πλεονάκεις ὀνόματι τῷ αὐτῷ· ἔσται γὰρ κατὰ τοῦτο καλῶς ἀποδεδομένον τὸ ἴδιον. οἷον ἐπεὶ ὁ εἶπας ἀνθρώπου ἴδιον ζῶον ἐπιστήμης δεκτικὸν οὐ κέχρηται τῷ αὐτῷ πλεονάκεις ὀνόματι, εἴη ἂν κατὰ τοῦτο καλῶς ἀποδεδομένον τοῦ ἀνθρώπου τὸ ἴδιον.

Ἐπειτ' ἀνασκευάζοντα μὲν εἰ τοιοῦτόν τι ἀποδέδωκεν ἐν τῷ ἰδίῳ ὃ πᾶσιν ὑπάρχει. ἀχρεῖον γὰρ ἔσται τὸ μὴ χωρίζον ἀπὸ τινων· τὸ δ' ἐν τοῖς ἰδίῳις λεγόμενον χωρίζειν δεῖ, καθάπερ καὶ τὸ ἐν τοῖς ὅροις. οὐκ οὖν ἔσται καλῶς κείμενον τὸ ἴδιον. οἷον ἐπεὶ ὁ θεὸς ἐπιστήμης ἴδιον ὑπόληψιν ἀμετάπειστον ὑπὸ λόγου ἓν οὖσαν τοιούτῳ τινὶ κέχρηται ἐν τῷ ἰδίῳ, τῷ ἐνί, ὃ πᾶσιν ὑπάρχει, οὐκ ἂν εἴη καλῶς κείμενον τὸ τῆς ἐπιστήμης ἴδιον. κατασκευάζοντα δὲ εἰ μηδενὶ κέχρηται κοινῷ ἀλλ' ἀπὸ τινος χωρίζοντι· ἔσται γὰρ καλῶς κείμενον κατὰ τοῦτο τὸ ἴδιον. οἷον ἐπεὶ ὁ εἶπας ζῶου ἴδιον τὸ ψυχὴν ἔχειν οὐδενὶ κέχρηται κοινῷ, εἴη ἂν κατὰ τοῦτο καλῶς κείμενον ζῶου ἴδιον τὸ ψυχὴν ἔχειν.

Ἐπειτ' ἀνασκευάζοντα μὲν εἰ τὸ ὑποκείμενον ἴδιον ἀποδέδωκε τοῦ ἐν τῷ ὑποκειμένῳ λεγομένου· οὐ γὰρ ἔσται ἴδιον τὸ κείμενον ἴδιον. οἷον ἐπεὶ ὁ ἀποδοὺς ἴδιον τοῦ λεπτομερεστάτου σώματος τὸ πῦρ τὸ ὑποκείμενον ἀποδέδωκε τοῦ κατηγορουμένου ἴδιον, οὐκ ἂν εἴη τὸ πῦρ σώματος τοῦ λεπτομερεστάτου ἴδιον. διὰ τοῦτο δ' οὐκ ἔσται τὸ ὑποκείμενον τοῦ ἐν τῷ ὑποκειμένῳ ἴδιον, ὅτι τὸ αὐτὸ πλειόνων ἔσται καὶ διαφόρων τῷ εἶδει ἴδιον. τῷ γὰρ αὐτῷ πλείω τινὰ διάφορα τῷ εἶδει ὑπάρχει κατὰ μόνου λεγόμενα, ὧν ἔσται πάντων ἴδιον τὸ ὑποκείμενον, ἐάν τις οὕτω τιθῇται τὸ ἴδιον. κατασκευάζοντα δ' εἰ τὸ τῷ ὑποκειμένῳ ἀποδέδωκεν ἴδιον τοῦ ὑποκειμένου· ἔσται γὰρ ἴδιον τὸ κείμενον μὴ εἶναι ἴδιον, ἐάνπερ κατὰ μόνων κατηγορῇται ὧν εἴρηται [τὸ] ἴδιον. οἷον ἐπεὶ ὁ εἶπας γῆς ἴδιον σῶμα τὸ βαρύτερον τῷ εἶδει τοῦ ὑποκειμένου ἀπέδωκε τὸ ἴδιον κατὰ μόνου λεγόμενον τοῦ πράγματος καὶ ὥς τὸ ἴδιον κατηγορεῖται, εἴη ἂν τὸ τῆς γῆς ἴδιον ὀρθῶς κείμενον.

Ἐπειτ' ἀνασκευάζοντα μὲν εἰ κατὰ μέθεξιν ἀποδέδωκε τὸ

ἴδιον· οὐ γὰρ ἔσται ἴδιον τὸ κείμενον εἶναι ἴδιον. τὸ γὰρ [133a] κατὰ μέθεξιν ὑπάρχον εἰς τὸ τί ἦν εἶναι συμβάλλεται· εἴη δ' ἂν τὸ τοιοῦτο διαφορὰ τις κατὰ τινος ἐνὸς εἶδους λεγομένη. οἷον ἐπεὶ ὁ εἶπας ἀνθρώπου ἴδιον τὸ πεζὸν δίπουν κατὰ μέθεξιν ἀποδέδωκε τὸ ἴδιον, οὐκ ἂν εἴη ἀνθρώπου ἴδιον τὸ πεζὸν δίπουν. κατασκευάζοντα δὲ εἰ μὴ κατὰ μέθεξιν ἀποδέδωκε τὸ ἴδιον μηδὲ τὸ τί ἦν εἶναι δηλοῦν, ἀντικατηγορουμένου τοῦ πράγματος· ἔσται γὰρ ἴδιον τὸ κείμενον μὴ εἶναι ἴδιον. οἷον ἐπεὶ ὁ θεὶς ζῶου ἴδιον τὸ αἰσθάνεσθαι πεφυκὸς οὔτε κατὰ μέθεξιν ἀποδέδωκεν ἴδιον οὔτε τὸ τί ἦν εἶναι δηλοῦν, ἀντικατηγορουμένου τοῦ πράγματος, εἴη ἂν ζῶου ἴδιον τὸ αἰσθάνεσθαι πεφυκός.

Ἔπειτ' ἀνασκευάζοντα μὲν εἰ ἐνδέχεται μὴ ἅμα ὑπάρχειν τὸ ἴδιον, ἀλλ' ἢ ὕστερον ἢ πρότερον ἢ [οὗ] τοῦνομα· οὐ γὰρ ἔσται ἴδιον τὸ κείμενον εἶναι ἴδιον, ἢ οὐδέποτε ἢ οὐκ ἀεὶ. οἷον ἐπεὶ ἐνδέχεται καὶ πρότερόν τινα ὑπάρξει καὶ ὕστερον τοῦ βαδίζειν διὰ τῆς ἀγορᾶς τὸ ἄνθρωπος, οὐκ ἂν εἴη τὸ βαδίζειν διὰ τῆς ἀγορᾶς τοῦ ἀνθρώπου ἴδιον, ἢ οὐδέποτ' ἢ οὐκ ἀεὶ. κατασκευάζοντα δὲ εἰ ἅμα ἐξ ἀνάγκης ἀεὶ ὑπάρχει, μήτε ὅρος ὄν μήτε διαφορὰ· ἔσται γὰρ ἴδιον τὸ κείμενον μὴ εἶναι ἴδιον. οἷον ἐπεὶ τὸ ζῶον ἐπιστήμης δεκτικὸν ἅμα ἐξ ἀνάγκης ἀεὶ ὑπάρχει καὶ τὸ ἄνθρωπος, οὔτε διαφορὰ ὄν οὔθ' ὅρος, εἴη ἂν τὸ ζῶον ἐπιστήμης δεκτικὸν τοῦ ἀνθρώπου ἴδιον.

Ἔπειτ' ἀνασκευάζοντα μὲν εἰ τῶν αὐτῶν, ἢ ταυτὰ ἐστὶ, μὴ ἔστι τὸ αὐτὸ ἴδιον· οὐ γὰρ ἔσται ἴδιον τὸ κείμενον εἶναι ἴδιον. οἷον ἐπεὶ οὐκ ἔστι διωκτοῦ τὸ φαίνεσθαι τισιν ἀγαθὸν ἴδιον, οὐδ' ἂν αἰρετοῦ εἴη ἴδιον τὸ φαίνεσθαι τισιν ἀγαθόν· ταυτὸν γὰρ ἐστὶ τὸ διωκτὸν καὶ τὸ αἰρετόν. κατασκευάζοντα δ' εἰ τοῦ αὐτοῦ, ἢ ταυτὸ ἐστὶ, ταυτὸ ἴδιον· ἔσται γὰρ ἴδιον τὸ κείμενον μὴ εἶναι ἴδιον. οἷον ἐπεὶ ἀνθρώπου, ἢ ἀνθρωπός ἐστι, λέγεται ἴδιον τὸ τριμερῆ ψυχὴν ἔχειν, καὶ βροτοῦ, ἢ βροτός ἐστιν, εἴη ἂν ἴδιον τὸ τριμερῆ ψυχὴν ἔχειν. χρήσιμος δ' ὁ τόπος οὗτος καὶ ἐπὶ τοῦ συμβεβηκότος· τοῖς γὰρ αὐτοῖς, ἢ ταυτὰ ἐστὶ, ταυτὰ δεῖ ὑπάρχειν ἢ μὴ ὑπάρχειν.

Ἔπειτ' ἀνασκευάζοντα μὲν εἰ τῶν αὐτῶν τῷ εἶδει μὴ ταυτὸν ἀεὶ τῷ εἶδει [τὸ] ἰδιόν ἐστιν· οὐδὲ γὰρ τοῦ εἰρημένου ἔσται [133b] ἴδιον τὸ κείμενον εἶναι ἴδιον. οἷον ἐπεὶ ταυτόν ἐστι τῷ εἶδει ἄνθρωπος καὶ ἵππος, οὐκ ἀεὶ δὲ τοῦ ἵππου ἐστὶν ἴδιον τὸ ἐστάναι ὑφ' αὐτοῦ, οὐκ ἂν εἴη τοῦ ἀνθρώπου ἴδιον τὸ κινεῖσθαι ὑφ' αὐτοῦ· ταυτὸν γὰρ ἐστὶ τῷ εἶδει τὸ κινεῖσθαι καὶ τὸ ἐστάναι ὑφ' αὐτοῦ, ἢ

ζῶον <δ> ἐστὶν ἐκατέρῳ αὐτῶν συμβέβηκεν. κατασκευάζοντα δ' εἰ τῶν αὐτῶν τῷ εἶδει ταὐτὸν ἀεὶ τῷ εἶδει τὸ ἴδιον· ἔσται γὰρ ἴδιον τὸ κείμενον μὴ εἶναι ἴδιον. οἷον ἐπεὶ ἀνθρώπου ἐστὶν ἴδιον τὸ εἶναι πεζὸν δίπουν, καὶ ὄρνιθος ἂν εἴη ἴδιον τὸ εἶναι πτηνὸν δίπουν· ἐκάτερον γὰρ τούτων ἐστὶ ταὐτὸν τῷ εἶδει, ἢ τὰ μὲν ὡς ὑπὸ τὸ αὐτὸ γένος ἐστὶν εἶδη, ὑπὸ τὸ ζῶον ὄντα, τὰ δὲ ὡς γένους διαφοραί, τοῦ ζώου. οὗτος δ' ὁ τόπος ψευδῆς ἐστὶν ὅταν τὸ μὲν ἕτερον τῶν λεχθέντων ἐνὶ τινὶ μόνῳ ὑπάρχῃ εἶδει, τὸ δ' ἕτερον πολλοῖς, καθάπερ τὸ πεζὸν τετράπουν.

Ἐπεὶ δὲ τὸ ταὐτὸν καὶ τὸ ἕτερον πολλαχῶς λέγεται, ἔργον ἐστὶ σοφιστικῶς λαμβάνοντι ἐνὸς ἀποδοῦναι καὶ μόνου τινὸς τὸ ἴδιον· τὸ γὰρ ὑπάρχον τινὶ ᾧ συμβέβηκε τι καὶ τῷ συμβεβηκότι ὑπάρξει λαμβανομένῳ μετὰ τοῦ ᾧ συμβέβηκεν. οἷον τὸ ὑπάρχον ἀνθρώπῳ καὶ λευκῷ ἀνθρώπῳ ὑπάρξει, ἂν ἢ λευκὸς ἄνθρωπος· καὶ τὸ λευκῷ δὲ ἀνθρώπῳ ὑπάρχον καὶ ἀνθρώπῳ ὑπάρξει. διαβάλλοι δ' ἂν τις τὰ πολλὰ τῶν ἰδίων τὸ ὑποκείμενον ἄλλο μὲν καθ' αὐτὸ ποιῶν ἄλλο δὲ μετὰ τοῦ συμβεβηκότος, οἷον ἄλλο μὲν ἄνθρωπον εἶναι λέγων ἄλλο δὲ λευκὸν ἄνθρωπον, ἔτι δὲ ἕτερον ποιῶν τὴν ἕξιν καὶ τὸ κατὰ τὴν ἕξιν λεγόμενον. τὸ γὰρ τῇ ἕξει ὑπάρχον καὶ τῷ κατὰ τὴν ἕξιν λεγομένῳ ὑπάρξει, καὶ τὸ τῷ κατὰ τὴν ἕξιν λεγομένῳ ὑπάρχον καὶ τῇ ἕξει ὑπάρξει. οἷον ἐπεὶ ὁ ἐπιστήμων κατὰ τὴν ἐπιστήμην λέγεται διακεῖσθαι, οὐκ ἂν εἴη τῆς ἐπιστήμης ἴδιον τὸ ἀμετάπειστον ὑπὸ λόγου· καὶ γὰρ ὁ ἐπιστήμων ἔσται ἀμετάπειστος ὑπὸ λόγου. κατασκευάζοντα δὲ ῥητέον ὅτι οὐκ ἔστιν ἕτερον ἀπλῶς τὸ ᾧ συμβέβηκε καὶ τὸ συμβεβηκὸς μετὰ τοῦ ᾧ συμβέβηκε λαμβανόμενον, ἀλλ' ἄλλο λέγεται τῷ ἕτερον εἶναι αὐτοῖς τὸ εἶναι· οὐ ταὐτὸν γὰρ ἐστὶν ἀνθρώπῳ τε τὸ εἶναι ἀνθρώπῳ καὶ λευκῷ ἀνθρώπῳ τὸ εἶναι ἀνθρώπῳ λευκῷ. ἔτι δὲ θεωρητέον ἐστὶ παρὰ τὰς πτώσεις, λέγοντα ὅτι [134a] οὐθ' ὁ ἐπιστήμων ἐστὶ τὸ ἀμετάπειστον ὑπὸ λόγου ἀλλ' ὁ ἀμετάπειστος ὑπὸ λόγου, οὐθ' ἡ ἐπιστήμη τὸ ἀμετάπειστον ὑπὸ λόγου ἀλλ' ἡ ἀμετάπειστος ὑπὸ λόγου· πρὸς γὰρ τὸν πάντα ἐνιστάμενον πάντως ἀντιτακτέον ἐστίν.

Ἐπειτ' ἀνασκευάζοντα μὲν εἰ τὸ φύσει ὑπάρχον βουλόμενος ἀποδοῦναι τοῦτον τὸν τρόπον τίθησι τῇ λέξει ὥστε τὸ ἀεὶ ὑπάρχον σημαίνει· δόξειε γὰρ ἂν κινεῖσθαι τὸ κείμενον εἶναι ἴδιον. οἷον ἐπεὶ ὁ εἴπας ἀνθρώπου ἴδιον τὸ δίπουν βούλεται μὲν τὸ φύσει ὑπάρχον ἀποδιδόναι, σημαίνει δὲ τῇ λέξει τὸ ἀεὶ ὑπάρχον, οὐκ ἂν εἴη

ἀνθρώπου ἴδιον τὸ δίπουν· οὐ γὰρ πᾶς ἄνθρωπός ἐστι δύο πόδας ἔχων. κατασκευάζοντα δ' εἰ βούλεται τὸ φύσει ὑπάρχον ἴδιον ἀποδιδόναι καὶ τῇ λέξει τοῦτον τὸν τρόπον σημαίνει· οὐ γὰρ κινήσεται κατὰ τοῦτο τὸ ἴδιον. οἷον ἐπεὶ ὁ ἀνθρώπου ἴδιον ἀποδιδούς τὸ ζῶον ἐπιστήμης δεκτικὸν καὶ βούλεται καὶ τῇ λέξει σημαίνει τὸ φύσει ὑπάρχον ἴδιον, οὐκ ἂν κινοῖτο κατὰ τοῦτο ὥς οὐκ ὄν ἀνθρώπου ἴδιον τὸ ζῶον ἐπιστήμης δεκτικόν.

Ἔτι ὅσα λέγεται ὡς κατ' ἄλλο τι πρῶτον ἢ ὡς πρῶτον αὐτό, ἔργον ἐστὶν ἀποδοῦναι τῶν τοιούτων τὸ ἴδιον· ἐὰν μὲν γὰρ τοῦ κατ' ἄλλο τι ἴδιον ἀποδῶς, καὶ κατὰ τοῦ πρώτου ἀληθεύσεται· ἐὰν δὲ τοῦ πρώτου θῆς, καὶ τοῦ κατ' ἄλλο κατηγορηθήσεται. οἷον ἐὰν μὲν τις ἐπιφανείας ἴδιον ἀποδῶ τὸ κεχρῶσθαι, καὶ κατὰ σώματος ἀληθεύσεται τὸ κεχρῶσθαι· ἐὰν δὲ σώματος, καὶ κατ' ἐπιφανείας κατηγορηθήσεται. ὥστε οὐ καθ' οὗ ὁ λόγος, καὶ τοῦνομα ἀληθεύεται.

Συμβαίνει δ' ἐν ἐνίοις τῶν ἰδίων ὡς ἐπὶ τὸ πολὺ γίνεσθαι τινα ἁμαρτίαν παρὰ τὸ μὴ διορίζεσθαι πῶς καὶ τίνων τίθησι τὸ ἴδιον. ἅπαντες γὰρ ἐπιχειροῦσιν ἀποδιδόναι [τὸ] ἴδιον ἢ τὸ φύσει ὑπάρχον, καθάπερ ἀνθρώπου τὸ δίπουν, ἢ τὸ ὑπάρχον, καθάπερ ἀνθρώπου τινὸς τὸ τέτταρας δακτύλους ἔχειν, ἢ εἶδει, καθάπερ πυρὸς τὸ λεπτομερέστατον, ἢ ἀπλῶς, καθάπερ ζώου τὸ ζῆν, ἢ κατ' ἄλλο, καθάπερ ψυχῆς τὸ φρόνιμον, ἢ ὡς τὸ πρῶτον, καθάπερ λογιστικοῦ τὸ φρόνιμον, ἢ ὡς τῷ ἔχειν, καθάπερ ἐπιστήμονος τὸ ἀμετάπειστον ὑπὸ λόγου (οὐδὲν γὰρ ἕτερον ἢ τῷ ἔχειν τι ἔσται ἀμετάπειστος ὑπὸ λόγου), ἢ τῷ ἔχεσθαι, [134b] καθάπερ ἐπιστήμης τὸ ἀμετάπειστον ὑπὸ λόγου, ἢ τῷ μετέχεσθαι, καθάπερ ζώου τὸ αἰσθάνεσθαι (αἰσθάνεται μὲν γὰρ καὶ ἄλλο τι, οἷον ἄνθρωπος, ἀλλ' <ὡς> μετέχον ἤδη τοῦτο αἰσθάνεται), ἢ τῷ μετέχειν, καθάπερ τοῦ τινὸς ζώου τὸ ζῆν. μὴ προσθεῖς μὲν οὖν τὸ φύσει ἁμαρτάνει, διότι ἐνδέχεται τὸ φύσει ὑπάρχον μὴ ὑπάρχειν ἐκείνῳ ᾧ φύσει ὑπάρχει, καθάπερ ἀνθρώπῳ τὸ δύο πόδας ἔχειν. μὴ διορίσας δ' ὅτι τὸ ὑπάρχον ἀποδίδωσιν, διότι οὐκ ἔστι τοιοῦτον οἷον ὑπάρχειν ἐκείνῳ, καθάπερ τὸ τέτταρας δακτύλους ἔχειν τὸν ἄνθρωπον. μὴ δηλώσας δὲ ὅτι ὡς πρῶτον ἢ ὡς κατ' ἄλλο τίθησιν, διότι οὐ καθ' οὗ ὁ λόγος, καὶ τοῦνομα ἀληθεύσεται, καθάπερ τὸ κεχρῶσθαι, εἴτε τῆς ἐπιφανείας εἴτε τοῦ σώματος ἀποδοθὲν ἴδιον. μὴ προείπας δὲ ὅτι ἢ τῷ ἔχειν ἢ τῷ ἔχεσθαι τὸ ἴδιον ἀποδέδωκε, διότι οὐκ ἔστιν ἴδιον· ὑπάρξει γάρ, ἐὰν

μὲν τῷ ἔχεσθαι ἀποδιδῶ τὸ ἴδιον, τῷ ἔχοντι, ἐὰν δὲ τῷ ἔχειν, τῷ ἐχομένῳ, καθάπερ τὸ ἀμετάπειστον ὑπὸ λόγου τῆς ἐπιστήμης ἢ τοῦ ἐπιστήμονος τεθὲν ἴδιον. μὴ προσσημήνας δὲ τῷ μετέχειν ἢ τῷ μετέχεσθαι, διότι καὶ ἄλλοις τισὶν ὑπάρξει τὸ ἴδιον· ἐὰν μὲν γὰρ τῷ μετέχεσθαι ἀποδῶ, τοῖς μετέχουσιν, ἐὰν δὲ τῷ μετέχειν, τοῖς μετεχομένοις, καθάπερ εἰ τοῦ τινὸς ζώου ἢ τοῦ ζώου τιθεῖν τὸ ζῆν ἴδιον. μὴ διαστείλας δὲ τὸ τῷ εἶδει, διότι ἐνὶ μόνῳ ὑπάρξει τῶν ὑπὸ τοῦτο ὄντων οὗ τὸ ἴδιον τίθησι· τὸ γὰρ καθ’ ὑπερβολὴν ἐνὶ μόνῳ ὑπάρχει, καθάπερ τοῦ πυρὸς τὸ κουφότατον. ἐνίστε δὲ καὶ τὸ τῷ εἶδει προσθεῖς διήμαρτεν. δεήσει γὰρ ἐν εἶδος εἶναι τῶν λεχθέντων, ὅταν τὸ τῷ εἶδει προστεθῇ· τοῦτο δ’ ἐπ’ ἐνίων οὐ συμπίπτει, καθάπερ οὐδ’ ἐπὶ τοῦ πυρός. οὐ γὰρ ἔστιν ἐν εἶδος τοῦ πυρός· ἕτερον γὰρ ἔστι τῷ εἶδει ἄνθραξ καὶ φλόξ καὶ φῶς, ἕκαστον αὐτῶν πῦρ ὄν. διὰ τοῦτο δ’ οὐ δεῖ, ὅταν τὸ τῷ εἶδει προστεθῇ, ἕτερον εἶναι εἶδος τοῦ λεχθέντος, ὅτι τοῖς μὲν μᾶλλον τοῖς δ’ ἦττον ὑπάρξει τὸ λεχθὲν ἴδιον, καθάπερ ἐπὶ τοῦ πυρὸς τὸ λεπτομερέστατον· λεπτομερέστερον γὰρ ἔστι τὸ φῶς τοῦ ἄνθρακος καὶ τῆς φλογός. τοῦτο δ’ οὐ δεῖ γίνεσθαι ὅταν μὴ καὶ τὸ ὄνομα μᾶλλον κατηγορῇται καθ’ οὗ ὁ λόγος μᾶλλον ἀληθεύεται· εἰ δὲ μή, οὐκ ἔσται, καθ’ οὗ ὁ λόγος μᾶλλον, καὶ [135a] τοῦνομα μᾶλλον. ἔτι δὲ πρὸς τούτοις ταῦτόν εἶναι συμβήσεται τὸ ἴδιον τοῦ τε ἀπλῶς καὶ τοῦ μάλιστα ὄντος ἐν τῷ ἀπλῶς τοιούτῳ, καθάπερ ἐπὶ τοῦ πυρὸς ἔχει τὸ λεπτομερέστατον· καὶ γὰρ τοῦ φωτός ἔσται ταῦτό τοῦτο ἴδιον· λεπτομερέστατον γὰρ ἔστι τὸ φῶς. ἄλλον μὲν οὖν οὕτως ἀποδιδόντος τὸ ἴδιον ἐπιχειρητέον· αὐτῷ δ’ οὐ δοτέον ἔστι ταύτην τὴν ἔνστασιν, ἀλλ’ εὐθύς τιθεμένῳ τὸ ἴδιον διοριστέον ὃν τρόπον τίθησι τὸ ἴδιον.

Ἐπειτ’ ἀνασκευάζοντα μὲν εἰ αὐτὸ αὐτοῦ ἴδιον ἔθηκεν· οὐ γὰρ ἔσται ἴδιον τὸ κείμενον εἶναι ἴδιον. αὐτὸ γὰρ αὐτῷ πᾶν τὸ εἶναι δηλοῖ· τὸ δὲ τὸ εἶναι δηλοῦν οὐκ ἴδιον ἀλλ’ ὅρος ἐστίν. οἷον ἐπεὶ ὁ εἶπας καλοῦ τὸ πρέπον ἴδιον εἶναι αὐτὸ ἑαυτοῦ ἴδιον ἀποδέδωκε (ταῦτόν γάρ ἐστι τὸ καλὸν καὶ τὸ πρέπον), οὐκ ἂν εἴη τὸ πρέπον τοῦ καλοῦ ἴδιον. κατασκευάζοντα δὲ εἰ μὴ αὐτὸ μὲν αὐτοῦ ἴδιον ἀποδέδωκεν, ἀντικατηγορούμενον δ’ ἔθηκεν· ἔσται γὰρ ἴδιον τὸ κείμενον μὴ εἶναι ἴδιον. οἷον ἐπεὶ ὁ θεὸς ζώου ἴδιον τὸ οὐσία ἔμψυχος οὐκ αὐτὸ μὲν αὐτοῦ ἴδιον ἔθηκεν, ἀντικατηγορούμενον δ’ ἀποδέδωκεν, εἴη ἂν ἴδιον τοῦ ζώου τὸ οὐσία ἔμψυχος.

Ἐπειτ’ ἐπὶ τῶν ὁμοιομερῶν σκεπτέον ἐστίν, ἀνασκευάζοντα

μὲν εἰ τὸ τοῦ συνόλου ἴδιον μὴ ἀληθεύεται κατὰ τοῦ μέρους, ἢ εἰ τὸ τοῦ μέρους μὴ λέγεται κατὰ τοῦ σύμπαντος· οὐ γὰρ ἔσται ἴδιον τὸ κείμενον ἴδιον εἶναι. συμβαίνει δ' ἐπ' ἐνίων τοῦτο γίνεσθαι· ἀποδοίη γὰρ ἂν τις ἐπὶ τῶν ὁμοιομερῶν ἴδιον ἐνίστε μὲν ἐπὶ τὸ σύμπαν βλέψας, ἐνίστε δ' ἐπὶ τὸ κατὰ μέρος λεγόμενον αὐτὸς αὐτὸν ἐπιστήσας. ἔσται δ' οὐδέτερον ὀρθῶς ἀποδομένον. οἷον ἐπὶ μὲν τοῦ σύμπαντος, ἐπεὶ ὁ εἶπας θαλάττης ἴδιον τὸ πλεῖστον ὕδωρ ἄλμυρὸν ὁμοιομεροῦς μὲν τινος ἔθηκε τὸ ἴδιον, τοιοῦτον δ' ἀποδέδωκε ὃ οὐκ ἀληθεύεται κατὰ τοῦ μέρους (οὐ γὰρ ἔστιν ἢ τις θάλαττα τὸ πλεῖστον ὕδωρ ἄλμυρόν), οὐκ ἂν εἴη τῆς θαλάττης ἴδιον τὸ πλεῖστον ὕδωρ ἄλμυρόν. ἐπὶ δὲ τοῦ μέρους, οἷον ἐπεὶ ὁ θεὸς ἀέρος ἴδιον τὸ ἀναπνευστὸν ὁμοιομεροῦς μὲν τινος εἴρηκε τὸ ἴδιον, τοιοῦτον δ' ἀποδέδωκεν ὃ κατὰ τοῦ τινὸς ἀέρος ἀληθεύεται, κατὰ δὲ τοῦ σύμπαντος οὐ λέγεται (οὐ γὰρ ἔστιν ὁ σύμπας ἀναπνευστός), οὐκ ἂν εἴη τοῦ ἀέρος ἴδιον τὸ ἀναπνευστόν.

[135b] κατασκευάζοντα δὲ εἰ ἀληθεύεται μὲν καθ' ἑκάστου τῶν ὁμοιομερῶν, ἔστι δ' ἴδιον αὐτῶν κατὰ τὸ σύμπαν· ἔσται γὰρ ἴδιον τὸ κείμενον μὴ εἶναι ἴδιον. οἷον ἐπεὶ ἀληθεύεται κατὰ πάσης γῆς τὸ κάτω φέρεσθαι κατὰ φύσιν, ἔστι δὲ τοῦτο ἴδιον καὶ τῆς τινὸς γῆς κατὰ τὴν γῆν εἶναι, εἴη ἂν τῆς γῆς ἴδιον τὸ κάτω φέρεσθαι κατὰ φύσιν.

Ἔπειτ' ἐκ τῶν ἀντικειμένων σκεπτέον ἐστὶ, πρῶτον μὲν ἐκ τῶν ἐναντίων, ἀνασκευάζοντα μὲν εἰ τοῦ ἐναντίου μὴ ἔστι τὸ ἐναντίον ἴδιον· οὐδὲ γὰρ τοῦ ἐναντίου ἔσται τὸ ἐναντίον ἴδιον. οἷον ἐπεὶ ἐναντίον ἐστὶ δικαιοσύνη μὲν ἀδικία, τῷ βελτίστῳ δὲ τὸ χεῖριστον, οὐκ ἔστι δὲ τῆς δικαιοσύνης ἴδιον τὸ βέλτιστον, οὐκ ἂν εἴη τῆς ἀδικίας ἴδιον τὸ χεῖριστον. κατασκευάζοντα δὲ εἰ τοῦ ἐναντίου τὸ ἐναντίον ἴδιον ἐστίν· καὶ γὰρ τοῦ ἐναντίου τὸ ἐναντίον ἴδιον ἔσται. οἷον ἐπεὶ ἐναντίον ἐστὶν ἀγαθὸν μὲν κακόν, αἰρετὸν δὲ φευκτόν, ἔστι δὲ τοῦ ἀγαθοῦ ἴδιον τὸ αἰρετόν, εἴη ἂν κακοῦ ἴδιον τὸ φευκτόν.

Δεύτερον δ' ἐκ τῶν πρὸς τι, ἀνασκευάζοντα μὲν εἰ τὸ πρὸς τι τοῦ πρὸς τι μὴ ἔστιν ἴδιον· οὐδὲ γὰρ τὸ πρὸς τι τοῦ πρὸς τι ἔσται ἴδιον. οἷον ἐπεὶ λέγεται διπλάσιον μὲν πρὸς ἡμῖς, ὑπερέχον δὲ πρὸς ὑπερεχόμενον, οὐκ ἔστι δὲ τοῦ διπλασίου τὸ ὑπερέχον ἴδιον, οὐκ ἂν εἴη τοῦ ἡμίσεος τὸ ὑπερεχόμενον ἴδιον. κατασκευάζοντα δὲ εἰ τοῦ πρὸς τι τὸ πρὸς τί ἐστίν ἴδιον· καὶ γὰρ τοῦ πρὸς τι τὸ πρὸς τι ἔσται ἴδιον. οἷον ἐπεὶ λέγεται τὸ μὲν διπλάσιον πρὸς τὸ ἡμῖς, τὸ δὲ δύο πρὸς ἓν πρὸς τὸ ἓν πρὸς δύο, ἔστι δὲ τοῦ διπλασίου ἴδιον τὸ ὡς δύο

πρὸς ἓν, εἴη ἂν τοῦ ἡμίσεος ἴδιον τὸ ὥς ἐν πρὸς δύο.

Τρίτον δ' ἀνασκευάζοντα μὲν εἰ τῆς ἕξεως τὸ καθ' ἕξιν λεγόμενον μὴ ἔστιν ἴδιον· οὐδὲ γὰρ τῆς στέρησεως τὸ κατὰ στέρησιν λεγόμενον ἔσται ἴδιον. κἂν εἰ δὲ τῆς στέρησεως τὸ κατὰ στέρησιν λεγόμενον μὴ ἔστιν ἴδιον, οὐδὲ τῆς ἕξεως τὸ κατὰ τὴν ἕξιν λεγόμενον ἴδιον ἔσται· οἷον ἐπεὶ οὐ λέγεται τῆς κωφότητος ἴδιον τὸ ἀναισθησίαν εἶναι, οὐδ' ἂν τῆς ἀκούσεως εἴη ἴδιον τὸ αἰσθησιν εἶναι. κατασκευάζοντα δὲ εἰ τὸ καθ' ἕξιν λεγόμενόν ἐστι τῆς ἕξεως ἴδιον· καὶ γὰρ τῆς στέρησεως τὸ κατὰ στέρησιν λεγόμενον ἔσται ἴδιον. κἂν εἰ τῆς στέρησεως τὸ κατὰ στέρησιν λεγόμενόν ἐστιν ἴδιον, καὶ τῆς ἕξεως [136a] τὸ καθ' ἕξιν λεγόμενον ἔσται ἴδιον. οἷον ἐπεὶ τῆς ὄψεως ἐστὶν ἴδιον τὸ βλέπειν, καθὼς ἔχομεν ὄψιν, εἴη ἂν τῆς τυφλότητος ἴδιον τὸ μὴ βλέπειν, καθὼς οὐκ ἔχομεν ὄψιν πεφυκότες ἔχουσιν.

Ἐπειτα ἐκ τῶν φάσεων καὶ τῶν ἀποφάσεων, πρῶτον μὲν ἐξ αὐτῶν τῶν κατηγορουμένων. ἔστι δ' ὁ τόπος οὗτος χρήσιμος ἀνασκευάζοντι μόνον. οἷον εἰ ἡ φάσις ἢ τὸ κατὰ τὴν φάσιν λεγόμενον αὐτοῦ ἴδιόν ἐστιν· οὐ γὰρ ἔσται αὐτοῦ ἡ ἀπόφασις οὐδὲ τὸ κατὰ τὴν ἀπόφασιν λεγόμενον ἴδιον. κἂν εἰ δ' ἡ ἀπόφασις ἢ τὸ κατὰ τὴν ἀπόφασιν λεγόμενόν ἐστιν αὐτοῦ ἴδιον, οὐκ ἔσται ἡ φάσις οὐδὲ τὸ κατὰ τὴν φάσιν λεγόμενον ἴδιον. οἷον ἐπεὶ τοῦ ζῶου ἐστὶν ἴδιον τὸ ἔμψυχον, οὐκ ἂν εἴη τοῦ ζῶου ἴδιον τὸ οὐκ ἔμψυχον.

Δεύτερον δ' ἐκ τῶν κατηγορουμένων ἢ μὴ κατηγορουμένων καὶ ἐξ ὧν κατηγορεῖται ἢ μὴ κατηγορεῖται, ἀνασκευάζοντα μὲν εἰ ἡ φάσις τῆς φάσεως μὴ ἔστιν ἴδιον· οὐδὲ γὰρ ἡ ἀπόφασις τῆς ἀποφάσεως ἔσται ἴδιον. κἂν εἰ δ' ἡ ἀπόφασις τῆς ἀποφάσεως μὴ ἔστιν ἴδιον, οὐδ' ἡ φάσις τῆς φάσεως ἔσται ἴδιον. οἷον ἐπεὶ οὐκ ἔστι τοῦ ἀνθρώπου ἴδιον τὸ ζῶον, οὐδ' ἂν τοῦ μὴ ἀνθρώπου εἴη ἴδιον τὸ μὴ ζῶον· κἂν εἰ δὲ τοῦ μὴ ἀνθρώπου φαίνεται μὴ ἴδιον τὸ μὴ ζῶον, οὐδὲ τοῦ ἀνθρώπου ἔσται ἴδιον τὸ ζῶον. κατασκευάζοντα δ' εἰ τῆς φάσεως ἢ φάσις ἐστὶν ἴδιον· καὶ γὰρ τῆς ἀποφάσεως ἢ ἀπόφασις ἔσται ἴδιον. κἂν εἰ δὲ τῆς ἀποφάσεως ἢ ἀπόφασις ἐστὶν ἴδιον, καὶ ἡ φάσις τῆς φάσεως ἔσται ἴδιον. οἷον ἐπεὶ τοῦ μὴ ζῶου ἴδιόν ἐστι τὸ μὴ ζῆν, εἴη ἂν τοῦ ζῶου ἴδιον τὸ ζῆν· κἂν εἰ δὲ τοῦ ζῶου φαίνεται ἴδιον τὸ ζῆν, καὶ τοῦ μὴ ζῶου φανεῖται ἴδιον τὸ μὴ ζῆν.

Τρίτον δὲ ἐξ αὐτῶν τῶν ὑποκειμένων, ἀνασκευάζοντα μὲν εἰ τὸ ἀποδοδομένον ἴδιον τῆς φάσεως ἐστὶν ἴδιον· οὐ γὰρ ἔσται τὸ αὐτὸ καὶ τῆς ἀποφάσεως ἴδιον. κἂν εἰ δὲ τῆς ἀποφάσεως ἐστὶν ἴδιον τὸ

ἀποδοθέν, οὐκ ἔσται τῆς φάσεως ἴδιον. οἷον ἐπεὶ τοῦ ζῶου ἴδιον τὸ ἔμψυχον, οὐκ ἂν εἴη τοῦ μὴ ζῶου ἴδιον τὸ ἔμψυχον. κατασκευάζοντα δέ, εἰ τὸ ἀποδοθέν μὴ ἔστι τῆς φάσεως ἴδιον, εἴη ἂν τῆς ἀποφάσεως. οὗτος δ' ὁ τόπος ψευδῆς ἐστίν· φάσις γὰρ ἀποφάσεως καὶ ἀπόφασις φάσεως οὐκ ἔστιν ἴδιον. φάσις μὲν γὰρ ἀποφάσει οὐδ' ὅλως ὑπάρχει, [136b] ἀπόφασις δὲ φάσει ὑπάρχει μὲν, οὐχ ὡς ἴδιον δὲ ὑπάρχει.

Ἐπεὶ δ' ἐκ τῶν ἀντιδιηρημένων, ἀνασκευάζοντα μὲν εἰ τῶν ἀντιδιηρημένων μηδὲν μηδενὸς τῶν λοιπῶν ἀντιδιηρημένων ἐστὶν ἴδιον· οὐδὲ γὰρ τὸ κείμενον ἔσται ἴδιον τούτου οὗ κεῖται ἴδιον. οἷον ἐπεὶ ζῶον αἰσθητὸν οὐδενὸς τῶν ἄλλων ζῶων ἐστὶν ἴδιον, οὐκ ἂν εἴη τὸ ζῶον νοητὸν τοῦ θεοῦ ἴδιον. κατασκευάζοντα δ' εἰ τῶν λοιπῶν τῶν ἀντιδιηρημένων ὅτιοῦν ἐστὶν ἴδιον τούτων ἐκάστου τῶν ἀντιδιηρημένων· καὶ γὰρ τὸ λοιπὸν ἔσται τούτου ἴδιον οὗ κεῖται μὴ εἶναι ἴδιον. οἷον ἐπεὶ φρονήσεως ἐστὶν ἴδιον τὸ καθ' αὐτὸ πεφυκέναι λογιστικοῦ ἀρετὴν εἶναι, καὶ τῶν ἄλλων ἀρετῶν οὕτως ἐκάστης λαμβανομένης, εἴη ἂν σωφροσύνης ἴδιον τὸ καθ' αὐτὸ πεφυκέναι ἐπιθυμητικοῦ ἀρετὴν εἶναι.

Ἐπεὶ δ' ἐκ τῶν πτώσεων, ἀνασκευάζοντα μὲν εἰ ἡ πτώσις τῆς πτώσεως μὴ ἔστιν ἴδιον· οὐδὲ γὰρ ἡ πτώσις τῆς πτώσεως ἔσται ἴδιον. οἷον ἐπεὶ οὐκ ἔστι τοῦ δικαίως ἴδιον τὸ καλῶς, οὐδ' ἂν τοῦ δικαίου εἴη ἴδιον τὸ καλόν. κατασκευάζοντα δὲ εἰ ἡ πτώσις τῆς πτώσεως ἐστὶν ἴδιον· καὶ γὰρ ἡ πτώσις τῆς πτώσεως ἔσται ἴδιον. οἷον ἐπεὶ τοῦ ἀνθρώπου ἐστὶν ἴδιον τὸ πεζὸν δίπουν, καὶ τοῦ ἀνθρώπου εἴη ἂν ἴδιον τὸ πεζῷ δίποδι λέγεσθαι. οὐ μόνον δ' ἐπ' αὐτοῦ τοῦ εἰρημένου κατὰ τὰς πτώσεις ἐστὶ σκεπτέον ἀλλὰ καὶ ἐπὶ τῶν ἀντικειμένων, καθάπερ καὶ ἐπὶ τῶν προτέρων τόπων εἴρηται, ἀνασκευάζοντα μὲν εἰ ἡ τοῦ ἀντικειμένου πτώσις μὴ ἔστιν ἴδιον τῆς τοῦ ἀντικειμένου πτώσεως· οὐδὲ γὰρ ἡ τοῦ ἀντικειμένου πτώσις ἔσται ἴδιον τῆς τοῦ ἀντικειμένου πτώσεως. οἷον ἐπεὶ οὐκ ἔστι τοῦ δικαίως ἴδιον τὸ ἀγαθῶς, οὐδ' ἂν τοῦ ἀδίκως εἴη ἴδιον τὸ κακῶς. κατασκευάζοντα δὲ εἰ ἡ τοῦ ἀντικειμένου πτώσις ἐστὶν ἴδιον τῆς τοῦ ἀντικειμένου πτώσεως· καὶ γὰρ ἡ τοῦ ἀντικειμένου πτώσις ἔσται ἴδιον τῆς τοῦ ἀντικειμένου πτώσεως. οἷον ἐπεὶ τοῦ ἀγαθοῦ ἐστὶν ἴδιον τὸ βέλτιστον, καὶ τοῦ κακοῦ ἂν εἴη ἴδιον τὸ χεῖριστον.

Ἐπεὶ δ' ἐκ τῶν ὁμοίως ἐχόντων, ἀνασκευάζοντα μὲν εἰ τὸ ὁμοίως ἔχον τοῦ ὁμοίως ἔχοντος μὴ ἔστιν ἴδιον· οὐδὲ γὰρ τὸ ὁμοίως ἔχον τοῦ ὁμοίως ἔχοντος ἔσται ἴδιον. οἷον ἐπεὶ ὁμοίως ἔχει ὁ

οικοδόμος πρὸς τὸ ποιεῖν οἰκίαν καὶ ὁ ἰατρός πρὸς τὸ ποιεῖν ὑγίειαν, οὐκ ἔστι δὲ ἰατροῦ ἴδιον τὸ ποιεῖν ὑγίειαν, [137a] οὐκ ἂν εἴη οἰκοδόμου ἴδιον τὸ ποιεῖν οἰκίαν. κατασκευάζοντα δὲ εἰ τὸ ὁμοίως ἔχον τοῦ ὁμοίως ἔχοντός ἐστιν ἴδιον· καὶ γὰρ τὸ ὁμοίως ἔχον τοῦ ὁμοίως ἔχοντος ἔσται ἴδιον. οἷον ἐπεὶ ὁμοίως ἔχει ἰατρός τε πρὸς τὸ ποιητικὸς ὑγείας εἶναι καὶ γυμναστής πρὸς τὸ ποιητικὸς εὐεξίας, ἔστι δ' ἴδιον γυμναστοῦ τὸ ποιητικὸν εἶναι εὐεξίας, εἴη ἂν ἴδιον ἰατροῦ τὸ ποιητικὸν εἶναι ὑγείας.

Ἐπειτ' ἐκ τῶν ὡσαύτως ἔχόντων, ἀνασκευάζοντα μὲν εἰ τὸ ὡσαύτως ἔχον τοῦ ὡσαύτως ἔχοντος μὴ ἔστιν ἴδιον· οὐδὲ γὰρ τὸ ὡσαύτως ἔχον τοῦ ὡσαύτως ἔχοντος ἔσται ἴδιον. εἰ δ' ἐστὶ τοῦ ὡσαύτως ἔχοντος τὸ ὡσαύτως ἔχον ἴδιον, τούτου οὐκ ἔσται ἴδιον οὐ κεῖται εἶναι ἴδιον. οἷον ἐπεὶ ὡσαύτως ἔχει φρόνησις πρὸς τὸ καλὸν καὶ τὸ αἰσχρόν, τῷ ἐπιστήμῃ ἑκατέρου αὐτῶν εἶναι, οὐκ ἔστι δ' ἴδιον φρονήσεως τὸ ἐπιστήμην εἶναι καλοῦ, οὐκ ἂν εἴη ἴδιον φρονήσεως τὸ ἐπιστήμην εἶναι αἰσχροῦ. [εἰ δ' ἐστὶν ἴδιον φρονήσεως τὸ ἐπιστήμην εἶναι καλοῦ, οὐκ ἂν εἴη ἴδιον αὐτῆς τὸ ἐπιστήμην εἶναι αἰσχροῦ· ἀδύνατον γὰρ εἶναι τὸ αὐτὸ πλείονων ἴδιον.] κατασκευάζοντι δὲ οὐδὲν οὗτος ὁ τρόπος ἐστὶ χρήσιμος· τὸ γὰρ ὡσαύτως ἔχον ἐν πρὸς πλείω συγκρίνεται.

Ἐπειτ' ἀνασκευάζοντα μὲν εἰ τὸ κατὰ τὸ εἶναι λεγόμενον μὴ ἔστι τοῦ κατὰ τὸ εἶναι λεγομένου ἴδιον· οὐδὲ γὰρ τὸ φθείρεσθαι τοῦ κατὰ τὸ φθείρεσθαι, οὐδὲ τὸ γίνεσθαι τοῦ κατὰ τὸ γίνεσθαι λεγομένου, ἔσται ἴδιον. οἷον ἐπεὶ οὐκ ἔστιν ἀνθρώπου ἴδιον τὸ εἶναι ζῶν, οὐδ' ἂν τοῦ ἀνθρώπου γίνεσθαι εἴη ἴδιον τὸ γίνεσθαι ζῶν, οὐδ' ἂν τοῦ ἀνθρώπου φθείρεσθαι εἴη ἴδιον τὸ φθείρεσθαι ζῶν. τὸν αὐτὸν δὲ τρόπον ληπτέον ἐστὶ καὶ ἐκ τοῦ γίνεσθαι πρὸς τὸ εἶναι καὶ φθείρεσθαι, καὶ ἐκ τοῦ φθείρεσθαι πρὸς τὸ εἶναι καὶ πρὸς τὸ γίνεσθαι, καθάπερ εἴρηται νῦν ἐκ τοῦ εἶναι πρὸς τὸ γίνεσθαι καὶ φθείρεσθαι. κατασκευάζοντα δὲ εἰ τοῦ κατὰ τὸ εἶναι τεταγμένου ἐστὶ τὸ κατ' αὐτὸ τεταγμένον ἴδιον· καὶ γὰρ τοῦ κατὰ τὸ γίνεσθαι λεγομένου ἔσται τὸ κατὰ τὸ γίνεσθαι λεγόμενον ἴδιον, καὶ τοῦ κατὰ τὸ φθείρεσθαι τὸ κατὰ τοῦτο ἀποδιδόμενον. οἷον ἐπεὶ τοῦ ἀνθρώπου ἐστὶν ἴδιον τὸ εἶναι βροτόν, καὶ τοῦ γίνεσθαι ἀνθρώπου εἴη ἂν ἴδιον τὸ γίνεσθαι βροτόν, καὶ τοῦ φθείρεσθαι ἀνθρώπου τὸ φθείρεσθαι βροτόν. τὸν αὐτὸν δὲ τρόπον ληπτέον [137b] ἐστὶ καὶ ἐκ τοῦ γίνεσθαι καὶ φθείρεσθαι πρὸς τὸ εἶναι καὶ πρὸς τὰ ἐξ αὐτῶν, καθάπερ

καὶ ἀνασκευάζοντι εἴρηται.

Ἐπειτ' ἐπιβλέπειν ἐπὶ τὴν ιδέαν τοῦ κειμένου, ἀνασκευάζοντα μὲν εἰ τῇ ιδέᾳ μὴ ὑπάρχει, ἢ εἰ μὴ κατὰ τοῦτο καθ' ὃ λέγεται τοῦτο οὗ τὸ ἴδιον ἀπεδόθη· οὐ γὰρ ἔσται ἴδιον τὸ κείμενον εἶναι ἴδιον· οἷον ἐπεὶ αὐτοανθρώπῳ οὐχ ὑπάρχει τὸ ἡρεμεῖν ἢ ἀνθρωπός ἐστιν, ἀλλ' ἢ ιδέα, οὐκ ἂν εἴη ἀνθρώπου ἴδιον τὸ ἡρεμεῖν. κατασκευάζοντα δὲ εἰ τῇ ιδέᾳ ὑπάρχει καὶ κατὰ τοῦτο ὑπάρχει ἢ λέγεται κατ' αὐτοῦ ἐκεῖνο οὗ κεῖται μὴ εἶναι ἴδιον· ἔσται γὰρ ἴδιον τὸ κείμενον μὴ εἶναι ἴδιον. οἷον ἐπεὶ ὑπάρχει τῷ αὐτοζῳφ τὸ ἐκ ψυχῆς καὶ σώματος συγκεῖσθαι, καὶ ἢ ζῶον αὐτῷ ὑπάρχει τοῦτο, εἴη ἂν ζῶου ἴδιον τὸ ἐκ ψυχῆς καὶ σώματος συγκεῖσθαι.

Ἐπειτα ἐκ τοῦ μᾶλλον καὶ ἥττον, πρῶτον μὲν ἀνασκευάζοντα εἰ τὸ μᾶλλον τοῦ μᾶλλον μὴ ἔστιν ἴδιον· οὐδὲ γὰρ τὸ ἥττον τοῦ ἥττον ἔσται ἴδιον, οὐδὲ τὸ ἥκιστα τοῦ ἥκιστα, οὐδὲ τὸ μάλιστα τοῦ μάλιστα, οὐδὲ τὸ ἀπλῶς τοῦ ἀπλῶς. οἷον ἐπεὶ οὐκ ἔστι τὸ μᾶλλον κεχρῶσθαι τοῦ μᾶλλον σώματος ἴδιον, οὐδὲ τὸ ἥττον κεχρῶσθαι τοῦ ἥττον σώματος εἴη ἂν ἴδιον, οὐδὲ τὸ κεχρῶσθαι σώματος ὅλως. κατασκευάζοντα δὲ εἰ τὸ μᾶλλον τοῦ μᾶλλον ἔστιν ἴδιον· καὶ γὰρ τὸ ἥττον τοῦ ἥττον ἔσται ἴδιον, καὶ τὸ ἥκιστα τοῦ ἥκιστα, καὶ τὸ μάλιστα τοῦ μάλιστα, καὶ τὸ ἀπλῶς τοῦ ἀπλῶς. οἷον ἐπεὶ τοῦ μᾶλλον ζῶντος τὸ μᾶλλον αἰσθάνεσθαι ἔστιν ἴδιον, καὶ τοῦ ἥττον ζῶντος τὸ ἥττον αἰσθάνεσθαι εἴη ἂν ἴδιον, καὶ τοῦ μάλιστα δὴ τὸ μάλιστα, καὶ τοῦ ἥκιστα τὸ ἥκιστα, καὶ τοῦ ἀπλῶς τὸ ἀπλῶς.

Καὶ ἐκ τοῦ ἀπλῶς δὲ πρὸς ταῦτα σκεπτέον ἐστίν, ἀνασκευάζοντα μὲν εἰ τὸ ἀπλῶς τοῦ ἀπλῶς μὴ ἔστιν ἴδιον· οὐδὲ γὰρ τὸ μᾶλλον τοῦ μᾶλλον, οὐδὲ τὸ ἥττον τοῦ ἥττον, οὐδὲ τὸ μάλιστα τοῦ μάλιστα, οὐδὲ τὸ ἥκιστα τοῦ ἥκιστα ἔσται ἴδιον. οἷον ἐπεὶ οὐκ ἔστι τοῦ ἀνθρώπου τὸ σπουδαῖον ἴδιον, οὐδ' ἂν τοῦ μᾶλλον ἀνθρώπου τὸ μᾶλλον σπουδαῖον ἴδιον εἴη. κατασκευάζοντα δὲ εἰ τὸ ἀπλῶς τοῦ ἀπλῶς ἔστιν ἴδιον· καὶ γὰρ τὸ μᾶλλον τοῦ μᾶλλον καὶ τὸ ἥττον τοῦ ἥττον καὶ τὸ ἥκιστα τοῦ ἥκιστα καὶ τὸ μάλιστα τοῦ μάλιστα ἔσται ἴδιον. οἷον ἐπεὶ τοῦ πυρός ἐστιν ἴδιον τὸ ἄνω φέρεσθαι κατὰ φύσιν, καὶ τοῦ μᾶλλον [138a] πυρὸς εἴη ἂν ἴδιον τὸ μᾶλλον ἄνω φέρεσθαι κατὰ φύσιν. τὸν αὐτὸν δὲ τρόπον σκεπτέον ἐστὶ καὶ ἐκ τῶν ἄλλων πρὸς ἅπαντα ταῦτα.

Δεύτερον δ' ἀνασκευάζοντα μὲν εἰ τὸ μᾶλλον οὗ μᾶλλον μὴ ἔστιν ἴδιον· οὐδὲ γὰρ τὸ ἥττον οὗ ἥττον ἔσται ἴδιον. οἷον ἐπεὶ

μᾶλλον ἔστιν ἴδιον ζώου τὸ αἰσθάνεσθαι ἢ ἀνθρώπου τὸ ἐπίστασθαι, οὐκ ἔστι δὲ ζώου ἴδιον τὸ αἰσθάνεσθαι, οὐκ ἂν εἴη ἀνθρώπου ἴδιον τὸ ἐπίστασθαι. κατασκευάζοντα δ' εἰ τὸ ἥττον οὗ ἥττον ἔστιν ἴδιον· καὶ γὰρ τὸ μᾶλλον οὗ μᾶλλον ἔσται ἴδιον. οἷον ἐπεὶ ἥττον ἔστιν ἴδιον ἀνθρώπου τὸ ἡμερον φύσει ἢ ζώου τὸ ζῆν, ἔστι δ' ἀνθρώπου ἴδιον τὸ ἡμερον φύσει, εἴη ἂν ζώου ἴδιον τὸ ζῆν.

Τρίτον δ' ἀνασκευάζοντα μὲν εἰ οὗ μᾶλλον ἔστιν ἴδιον μὴ ἔστιν ἴδιον· οὐδὲ γὰρ οὗ ἥττον ἔστιν ἴδιον, ἔσται τούτου ἴδιον. εἰ δ' ἐκείνου ἔστιν ἴδιον, οὐκ ἔσται τούτου ἴδιον. οἷον ἐπεὶ τὸ κεχρῶσθαι μᾶλλον τῆς ἐπιφανείας ἢ τοῦ σώματός ἐστιν ἴδιον, οὐκ ἔστι δὲ τῆς ἐπιφανείας ἴδιον, οὐκ ἂν εἴη τοῦ σώματος ἴδιον τὸ κεχρῶσθαι. εἰ δ' ἔστι τῆς ἐπιφανείας ἴδιον, οὐκ ἂν εἴη τοῦ σώματος ἴδιον. κατασκευάζοντι δὲ ὁ τόπος οὗτος οὐκ ἔστι χρήσιμος· ἀδύνατον γὰρ ἔστι ταῦτο πλείονων ἴδιον εἶναι.

Τέταρτον δ' ἀνασκευάζοντα μὲν εἰ τὸ μᾶλλον αὐτοῦ ἴδιον μὴ ἔστιν ἴδιον· οὐδὲ γὰρ τὸ ἥττον αὐτοῦ ἴδιον ἔσται ἴδιον. οἷον ἐπεὶ μᾶλλον ἔστι τοῦ ζώου ἴδιον τὸ αἰσθητὸν ἢ τὸ μεριστόν, οὐκ ἔστι δὲ τοῦ ζώου τὸ αἰσθητὸν ἴδιον, οὐκ ἂν εἴη τοῦ ζώου τὸ μεριστόν ἴδιον. κατασκευάζοντα δὲ εἰ τὸ ἥττον αὐτοῦ ὄν ἴδιον ἔστιν ἴδιον· καὶ γὰρ τὸ μᾶλλον αὐτοῦ ὄν ἴδιον ἔσται ἴδιον. οἷον ἐπεὶ ἥττον ἔστιν ἴδιον ζώου τὸ αἰσθάνεσθαι ἢ τὸ ζῆν, ἔστι δὲ τοῦ ζώου τὸ αἰσθάνεσθαι ἴδιον, εἴη ἂν τοῦ ζώου τὸ ζῆν ἴδιον.

Ἐπει' ἐκ τῶν ὁμοίως ὑπαρχόντων, πρῶτον μὲν ἀνασκευάζοντα εἰ τὸ ὁμοίως ὄν ἴδιον μὴ ἔστιν ἴδιον τούτου οὗ ὁμοίως ἔστιν ἴδιον· οὐδὲ γὰρ τὸ ὁμοίως ὄν ἴδιον ἔσται ἴδιον τούτου οὗ ὁμοίως ἔστιν ἴδιον. οἷον ἐπεὶ ὁμοίως ἔστιν ἴδιον ἐπιθυμητικοῦ τὸ ἐπιθυμεῖν καὶ λογιστικοῦ τὸ λογίζεσθαι, οὐκ ἔστι δ' ἴδιον ἐπιθυμητικοῦ τὸ ἐπιθυμεῖν, οὐκ ἂν εἴη ἴδιον λογιστικοῦ τὸ λογίζεσθαι. κατασκευάζοντα δὲ εἰ τὸ ὁμοίως ὄν ἴδιον ἔστι τούτου ἴδιον οὗ ὁμοίως ἔστιν ἴδιον· ἔσται γὰρ καὶ τὸ ὁμοίως ὄν [138b] ἴδιον τούτου ἴδιον οὗ ὁμοίως ἔστιν ἴδιον. οἷον ἐπεὶ ὁμοίως ἔστιν ἴδιον λογιστικοῦ τὸ πρῶτον φρόνιμον καὶ ἐπιθυμητικοῦ τὸ πρῶτον σῶφρον, ἔστι δὲ [τοῦ] λογιστικοῦ ἴδιον τὸ πρῶτον φρόνιμον, εἴη ἂν ἐπιθυμητικοῦ ἴδιον τὸ πρῶτον σῶφρον.

Δεύτερον δ' ἀνασκευάζοντα μὲν εἰ τὸ ὁμοίως ὄν ἴδιον μὴ ἔστιν ἴδιον αὐτοῦ· οὐδὲ γὰρ τὸ ὁμοίως ὄν ἴδιον ἔσται ἴδιον αὐτοῦ. οἷον ἐπεὶ ὁμοίως ἔστιν ἴδιον ἀνθρώπου τὸ ὁρᾶν καὶ τὸ ἀκούειν, οὐκ ἔστι δ'

ἀνθρώπου ἴδιον τὸ ὄρᾶν, οὐκ ἂν εἴη ἀνθρώπου ἴδιον τὸ ἀκούειν. κατασκευάζοντα δὲ εἰ τὸ ὁμοίως αὐτοῦ ὄν ἴδιόν ἐστιν ἴδιον· καὶ γὰρ τὸ ὁμοίως αὐτοῦ ὄν ἴδιον ἔσται ἴδιον. οἷον ἐπεὶ ὁμοίως ἐστὶν ἴδιον ψυχῆς τὸ μέρος αὐτῆς ἐπιθυμητικὸν εἶναι πρῶτον καὶ λογιστικὸν πρῶτον, ἔστι δὲ ψυχῆς ἴδιον τὸ μέρος αὐτῆς εἶναι ἐπιθυμητικὸν πρῶτον, εἴη ἂν ἴδιον ψυχῆς τὸ μέρος αὐτῆς εἶναι λογιστικὸν πρῶτον.

Τρίτον δ' ἀνασκευάζοντα μὲν εἰ οὗ ὁμοίως ἐστὶν ἴδιον μὴ ἔστιν ἴδιον· οὐδὲ γὰρ οὗ ὁμοίως ἐστὶν ἴδιον ἔσται ἴδιον. εἰ δ' ἐκείνου ἐστὶν ἴδιον, οὐκ ἔσται θατέρου ἴδιον. οἷον ἐπεὶ ὁμοίως ἐστὶν ἴδιον τὸ καίειν φλογὸς καὶ ἄνθρακος, οὐκ ἔστι δ' ἴδιον φλογὸς τὸ καίειν, οὐκ ἂν εἴη ἴδιον ἄνθρακος τὸ καίειν. εἰ δ' ἐστὶ φλογὸς ἴδιον, οὐκ ἂν εἴη ἄνθρακος ἴδιον. κατασκευάζοντι δὲ οὐδὲν οὗτος ὁ τόπος ἐστὶ χρήσιμος.

Διαφέρει δ' ὁ ἐκ τῶν ὁμοίως ἐχόντων τοῦ ἐκ τῶν ὁμοίως ὑπαρχόντων, ὅτι τὸ μὲν κατ' ἀναλογίαν λαμβάνεται, οὐκ ἐπὶ τοῦ ὑπάρχειν τι θεωρούμενον, τὸ δ' ἐκ τοῦ ὑπάρχειν τι συγκρίνεται.

Ἔπειτ' ἀνασκευάζοντα μὲν εἰ, δυνάμει τὸ ἴδιον ἀποδιδούς, καὶ πρὸς μὴ ὄν ἀποδέδωκε τὸ ἴδιον τῇ δυνάμει, μὴ ἐνδεχομένης τῆς δυνάμεως ὑπάρχειν τῷ μὴ ὄντι· οὐ γὰρ ἔσται ἴδιον τὸ κείμενον εἶναι ἴδιον. οἷον ἐπεὶ ὁ εἴπας ἀέρος ἴδιον τὸ ἀναπνευστὸν τῇ δυνάμει μὲν ἀποδέδωκε τὸ ἴδιον (τὸ γὰρ τοιοῦτον οἷον ἀναπνεῖσθαι ἀναπνευστόν ἐστιν), ἀποδέδωκε δὲ καὶ πρὸς τὸ μὴ ὄν τὸ ἴδιον (καὶ γὰρ μὴ ὄντος ζῶου οἷον ἀναπνεῖν πέφυκε τὸν ἀέρα ἐνδέχεται ἀέρα εἶναι· οὐ μέντοι μὴ ὄντος ζῶου δυνατόν ἐστιν ἀναπνεῖν· ὥστ' οὐδ' ἀέρος ἔσται ἴδιον τὸ τοιοῦτον οἷον ἀναπνεῖσθαι τότε ὅτε ζῶον οὐκ ἔσται τοιοῦτον οἷον ἀναπνεῖν), οὐκ ἂν οὖν εἴη ἀέρος ἴδιον τὸ ἀναπνευστόν.

[139a] κατασκευάζοντα δὲ εἰ τῇ δυνάμει ἀποδιδούς τὸ ἴδιον ἢ πρὸς ὄν ἀποδίδωσι τὸ ἴδιον ἢ πρὸς μὴ ὄν, ἐνδεχομένης τῆς δυνάμεως τῷ μὴ ὄντι ὑπάρχειν· ἔσται γὰρ ἴδιον τὸ κείμενον μὴ εἶναι ἴδιον. οἷον ἐπεὶ ὁ ἀποδιδούς ἴδιον τοῦ ὄντος τὸ δυνατόν παθεῖν ἢ ποιῆσαι, δυνάμει ἀποδιδούς τὸ ἴδιον, πρὸς ὄν ἀποδέδωκε τὸ ἴδιον (ὅτε γὰρ ὄν ἐστι, καὶ δυνατόν παθεῖν τι ἢ ποιῆσαι ἔσται) - ὥστε εἴη ἂν ἴδιον τοῦ ὄντος τὸ δυνατόν παθεῖν ἢ ποιῆσαι.

Ἔπειτ' ἀνασκευάζοντα μὲν εἰ ὑπερβολὴν τέθεικε τὸ ἴδιον· οὐ γὰρ ἔσται ἴδιον τὸ κείμενον εἶναι ἴδιον. συμβαίνει γὰρ τοῖς οὕτως ἀποδιδούσι τὸ ἴδιον μὴ, καθ' οὗ ὁ λόγος, τοῦνομα ἀληθεύεσθαι· φθαρέντος γὰρ τοῦ πράγματος οὐδὲν ἦττον ἔσται ὁ λόγος· τῶν γὰρ

ὄντων τινὶ μάλιστα ὑπάρξει. οἷον εἴ τις ἀποδοίῃ τοῦ πυρὸς ἴδιον σῶμα τὸ κουφότατον· φθαρέντος γὰρ τοῦ πυρὸς ἔσται τι τῶν σωμάτων ὃ κουφότατον ἔσται. ὥστ' οὐκ ἂν εἴη τοῦ πυρὸς ἴδιον σῶμα τὸ κουφότατον. κατασκευάζοντα δὲ εἰ μὴ ὑπερβολὴν τέθεικε τὸ ἴδιον· ἔσται γὰρ κατὰ τοῦτο καλῶς κείμενον τὸ ἴδιον. οἷον ἐπεὶ ὁ θεὸς ἀνθρώπου ἴδιον ζῶον ἡμερον φύσει οὐχ ὑπερβολῇ ἀποδέδωκε τὸ ἴδιον, εἴη ἂν κατὰ τοῦτο καλῶς κείμενον τὸ ἴδιον.

Z

Τῆς δὲ περὶ τοὺς ὅρους πραγματείας μέρη πέντε ἔστιν· ἡ γὰρ ὅτι ὅλως οὐκ ἀληθὲς εἰπεῖν, καθ' οὗ τοῦνομα, καὶ τὸν λόγον (δεῖ γὰρ τὸν τοῦ ἀνθρώπου ὀρισμὸν κατὰ παντὸς ἀνθρώπου ἀληθεύεσθαι), ἡ ὅτι ὄντος γένους οὐκ ἔθηκεν εἰς τὸ γένος, ἡ οὐκ εἰς τὸ οἰκεῖον γένος ἔθηκεν (δεῖ γὰρ τὸν ὀριζόμενον εἰς τὸ γένος θέντα τὰς διαφορὰς προσάπτειν· μάλιστα γὰρ τῶν ἐν τῷ ὀρισμῷ τὸ γένος δοκεῖ τὴν τοῦ ὀριζομένου οὐσίαν σημαίνειν), ἡ ὅτι οὐκ ἴδιος ὁ λόγος (δεῖ γὰρ τὸν ὀρισμὸν ἴδιον εἶναι, καθάπερ καὶ πρότερον εἴρηται), ἡ εἰ πάντα τὰ εἰρημένα πεποιηκῶς μὴ ὥριται μὴδ' εἴρηκε τὸ τί ἦν εἶναι τῷ ὀριζομένῳ. λοιπὸν δὲ παρὰ τὰ εἰρημένα, εἰ ὥριται μὲν, μὴ καλῶς δ' ὥριται.

Εἰ μὲν οὖν μὴ ἀληθεύεται, καθ' οὗ τοῦνομα, καὶ ὁ λόγος, ἐκ τῶν πρὸς τὸ συμβεβηκὸς τόπων ἐπισκεπτέον· καὶ γὰρ ἐκεῖ· πότερον ἀληθὲς ἡ οὐκ ἀληθὲς πᾶσα ἡ σκέψις [139b] γίνεται. ὅταν μὲν γὰρ ὅτι ὑπάρχει τὸ συμβεβηκὸς διαλεγώμεθα, ὅτι ἀληθὲς λέγομεν· ὅταν δ' ὅτι οὐχ ὑπάρχει, ὅτι οὐκ ἀληθές. εἰ δὲ μὴ ἐν τῷ οἰκείῳ γένει ἔθηκεν, ἡ εἰ μὴ ἴδιος ὁ ἀποδοθεὶς λόγος, ἐκ τῶν πρὸς τὸ γένος καὶ τὸ ἴδιον ῥηθέντων τόπων ἐπισκεπτέον.

Λοιπὸν δ', εἰ μὴ ὥριται ἡ εἰ μὴ καλῶς ὥριται, πῶς μετιτέον εἰπεῖν. πρῶτον μὲν οὖν ἐπισκεπτέον εἰ μὴ καλῶς ὥριται. ῥᾶον γὰρ ὁτιοῦν ποιῆσαι ἢ καλῶς ποιῆσαι· δηλὸν οὖν ὅτι ἡ ἀμαρτία περὶ τοῦτο πλείων, ἐπειδὴ ἐργωδέστερον· ὥσθ' ἡ ἐπιχείρησις ῥᾶον ἢ περὶ τοῦτο ἢ ἡ περὶ ἐκεῖνο γίνεται.

Ἔστι δὲ τοῦ μὴ καλῶς μέρη δύο· ἐν μὲν τὸ ἀσαφεῖ τῇ ἐρμηνείᾳ κεχρηῆσθαι (δεῖ γὰρ τὸν ὀριζόμενον ὡς ἐνδέχεται σαφεστάτῃ τῇ ἐρμηνείᾳ κεχρηῆσθαι, ἐπειδὴ τοῦ γνωρίσαι χάριν ἀποδίδοται ὁ ὀρισμός), δεῦτερον δ' εἰ ἐπὶ πλείον εἴρηκε τὸν λόγον τοῦ δέοντος· πᾶν γὰρ τὸ προσκείμενον ἐν τῷ ὀρισμῷ περιέργον. πάλιν δ' ἐκάτερον τῶν εἰρημένων εἰς πλείω μέρη διείληπται.

Εἷς μὲν οὖν τόπος τοῦ ἀσαφῶς, εἰ ὁμώνυμόν ἐστὶ τι τὸ εἰρημένον, οἷον ὅτι ἡ γένεσις ἀγωγή εἰς οὐσίαν καὶ ὅτι ἡ ὑγίεια συμμετρία θερμῶν καὶ ψυχρῶν· ὁμώνυμος γὰρ ἡ ἀγωγή καὶ ἡ συμμετρία. ἄδηλον οὖν ὁπότερον βούλεται λέγειν τῶν δηλουμένων ὑπὸ τοῦ πλεοναχῶς λεγομένου. ὁμοίως δὲ καὶ εἰ τοῦ ὀριζομένου

πλεοναχῶς λεγομένου μὴ διελὼν εἶπεν· ἄδηλον γὰρ ὁποτέρου τὸν ὅρον ἀποδέδωκεν, ἐνδέχεται τε συκοφαντεῖν ὥς οὐκ ἐφαρμόττοντος τοῦ λόγου ἐπὶ πάντα ὧν τὸν ὅρισμὸν ἀποδέδωκεν. μάλιστα δ' ἐνδέχεται τὸ τοιοῦτον ποιεῖν λανθανούσης τῆς ὁμωνυμίας. ἐνδέχεται δὲ καί, διελόμενον αὐτὸν ποσαχῶς λέγεται τὸ ἐν τῷ ὀρισμῷ ἀποδοθέν, συλλογισμὸν ποιῆσαι· εἰ γὰρ κατὰ μηδένα τῶν τρόπων ἱκανῶς εἴρηται, δῆλον ὅτι οὐκ ἂν ὠρισμένος εἴη κατὰ τρόπον.

Ἄλλος, εἰ κατὰ μεταφορὰν εἴρηκεν, οἷον εἰ τὴν ἐπιστήμην ἀμετάπτωτον ἢ τὴν γῆν τιθήνην ἢ τὴν σωφροσύνην συμφωνίαν· πᾶν γὰρ ἀσαφές τὸ κατὰ μεταφορὰν λεγόμενον. ἐνδέχεται δὲ καὶ τὸν μεταφορὰν εἰπόντα συκοφαντεῖν ὥς κυρίως εἰρηκότα· οὐ γὰρ ἐφαρμόσει ὁ λεχθεὶς ὅρος, οἷον ἐπὶ σωφροσύνης· πᾶσα γὰρ συμφωνία ἐν φθόγοις. ἔτι εἰ γένος ἢ συμφωνία τῆς σωφροσύνης, ἐν δύο γένεσιν [140a] ἔσται ταῦτόν οὐ περιέχουσιν ἄλληλα· οὔτε γὰρ ἡ συμφωνία τὴν ἀρετὴν οὔθ' ἡ ἀρετὴ τὴν συμφωνίαν περιέχει.

Ἔτι εἰ μὴ κειμένοις ὀνόμασι χρῆται, οἷον Πλάτων ὀφρυόσκιον τὸν ὀφθαλμόν, ἢ τὸ φαλάγγιον σηψιδακές, ἢ τὸν μυελὸν ὀστεογενές· πᾶν γὰρ ἀσαφές τὸ μὴ εἰωθός.

Ἔνια δ' οὔτε καθ' ὁμωνυμίαν οὔτε κατὰ μεταφορὰν οὔτε κυρίως εἴρηται, οἷον ὁ νόμος μέτρον ἢ εἰκὼν τῶν φύσει δικαίων. ἔστι δὲ τὰ τοιαῦτα χεῖρω τῆς μεταφορᾶς. ἡ μὲν γὰρ μεταφορὰ ποιεῖ πως γνώριμον τὸ σημαινόμενον διὰ τὴν ὁμοιότητα (πάντες γὰρ οἱ μεταφέροντες κατὰ τινὰ ὁμοιότητα μεταφέρουσιν), τὸ δὲ τοιοῦτον οὐ ποιεῖ γνώριμον· οὔτε γὰρ ὁμοιότης ὑπάρχει καθ' ἣν μέτρον ἢ εἰκὼν ὁ νόμος ἐστίν, οὔτε εἴωθε λέγεσθαι. ὥστε εἰ μὲν κυρίως μέτρον ἢ εἰκόνα τὸν νόμον φησὶν εἶναι, ψεύδεται (εἰκὼν γὰρ ἐστὶν οὗ ἢ γένεσις διὰ μιμήσεως· τοῦτο δ' οὐχ ὑπάρχει τῷ νόμῳ)· εἰ δὲ μὴ κυρίως, δῆλον ὅτι ἀσαφῶς εἴρηκε καὶ χεῖρον ὁτουοῦν τῶν κατὰ μεταφορὰν λεγομένων.

Ἔτι εἰ μὴ δῆλος ὁ τοῦ ἐναντίου λόγος ἐκ τοῦ λεχθέντος· οἱ γὰρ καλῶς ἀποδιδόμενοι καὶ τοὺς ἐναντίους προσσημαίνουσιν. ἢ εἰ καθ' αὐτὸν λεχθεὶς μὴ φανερός εἴη τίνος ἐστὶν ὀρισμός, ἀλλὰ καθάπερ τὰ τῶν ἀρχαίων γραφέων, εἰ μὴ τις ἐπέγραψεν, οὐκ ἐγνωρίζετο τί ἐστὶν ἕκαστον.

Εἰ μὲν οὖν μὴ σαφῶς, ἐκ τῶν τοιούτων ἐστὶν ἐπισκεπτέον. εἰ δ' ἐπὶ πλεῖον εἴρηκε τὸν ὅρον, πρῶτον μὲν σκοπεῖν εἴ τι νὶ κέρχρηται ὁ πᾶσιν ὑπάρχει, ἢ ὅλως τοῖς οὖσιν ἢ τοῖς ὑπὸ ταὐτὸ γένος τῷ

ὀρίζομεν· ἐπὶ πλεῖον γὰρ εἰρῆσθαι ἀναγκαῖον τοῦτο. δεῖ γὰρ τὸ μὲν γένος ἀπὸ τῶν ἄλλων χωρίζειν, τὴν δὲ διαφορὰν ἀπὸ τῶν ἐν τῷ αὐτῷ γένει. τὸ μὲν οὖν πᾶσιν ὑπάρχον ἀπλῶς ἀπ’ οὐδενὸς χωρίζει· τὸ δὲ τοῖς ὑπὸ ταῦτο γένος πᾶσιν ὑπάρχον οὐ χωρίζει ἀπὸ τῶν ἐν ταῦτῳ γένει, ὥστε μάταιον τὸ τοιοῦτον προσκείμενον.

“Ἡ εἰ ἔστι μὲν ἴδιον τὸ προσκείμενον, ἀφαιρεθέντος δὲ τούτου καὶ ὁ λοιπὸς λόγος ἴδιός ἐστι καὶ δηλοῖ τὴν οὐσίαν. οἷον ἐν τῷ τοῦ ἀνθρώπου λόγῳ τὸ ἐπιστήμης δεκτικὸν προστεθὲν περιέργον· καὶ γὰρ ἀφαιρεθέντος τούτου ὁ λοιπὸς λόγος ἴδιος καὶ δηλοῖ τὴν οὐσίαν. ἀπλῶς δ’ εἰπεῖν ἅπαν [140b] περιέργον οὗ ἀφαιρεθέντος τὸ λοιπὸν δῆλον ποιεῖ τὸ ὀρίζομενον. τοιοῦτος δὲ καὶ ὁ τῆς ψυχῆς ὅρος, εἴπερ “ἀριθμὸς αὐτὸς αὐτὸν κινῶν” ἐστίν· καὶ γὰρ τὸ αὐτὸ αὐτὸ κινοῦν ψυχή, καθάπερ Πλάτων ὥρισται. ἢ ἴδιον μὲν ἐστὶ τὸ εἰρημένον, οὐ δηλοῖ δὲ τὴν οὐσίαν ἀφαιρεθέντος τοῦ ἀριθμοῦ. ποτέρως μὲν οὖν ἔχει, χαλεπὸν διασαφῆσαι· χρηστέον δ’ ἐπὶ πάντων τῶν τοιούτων πρὸς τὸ συμφέρον· οἷον ὅτι ὁ τοῦ φλέγματος ὅρος “ὑγρὸν πρῶτον ἀπὸ τροφῆς ἄπεπτον”. ἐν γὰρ τὸ πρῶτον, οὐ πολλὰ, ὥστε περιέργον τὸ ἄπεπτον προσκείμενον· καὶ γὰρ τούτου ἀφαιρεθέντος ὁ λοιπὸς ἔσται ἴδιος λόγος· οὐ γὰρ ἐνδέχεται ἀπὸ τῆς τροφῆς καὶ τοῦτο καὶ ἄλλο τι πρῶτον εἶναι. ἢ οὐχ ἀπλῶς πρῶτον ἀπὸ τροφῆς τὸ φλέγμα ἀλλὰ τῶν ἀπέπτων πρῶτον, ὥστε προσθετέον τὸ “ἄπεπτον” (ἐκείνως μὲν γὰρ ῥηθέντος οὐκ ἀληθὴς ὁ λόγος, εἴπερ μὴ πάντων πρῶτόν ἐστιν);

“Ἐτι εἴ τι τῶν ἐν τῷ λόγῳ μὴ πᾶσιν ὑπάρχει τοῖς ὑπὸ ταῦτο εἶδος· ὁ γὰρ τοιοῦτος χεῖρον ὥρισται τῶν χρωμένων ὃ πᾶσιν ὑπάρχει τοῖς οὓσιν. ἐκείνως μὲν γάρ, ἂν ὁ λοιπὸς ἴδιος ἢ λόγος, καὶ ὁ πᾶς ἴδιος ἔσται· ἀπλῶς γὰρ πρὸς τὸ ἴδιον ὅτουοῦν προστεθέντος ἀληθοῦς ὅλος ὁ λόγος ἴδιος γίνεται. εἰ δέ τι τῶν ἐν τῷ λόγῳ μὴ πᾶσιν ὑπάρχει τοῖς ὑπὸ ταῦτο εἶδος, ἀδύνατον ὅλον τὸν λόγον ἴδιον εἶναι· οὐ γὰρ ἀντικατηγορηθήσεται τοῦ πράγματος. οἷον “ζῷον πεζὸν δίπουν τετράπηχυν”· ὁ γὰρ τοιοῦτος λόγος οὐκ ἀντικατηγορεῖται τοῦ πράγματος διὰ τὸ μὴ πᾶσιν ὑπάρχειν τοῖς ὑπὸ ταὐτὸν εἶδος τὸ τετράπηχυν.

Πάλιν εἰ ταὐτὸν πλεονάκεις εἴρηκεν, οἷον τὴν ἐπιθυμίαν ὄρεξιν ἡδέος εἰπών· πᾶσα γὰρ ἐπιθυμία ἡδέος ἐστίν, ὥστε καὶ τὸ ταὐτὸν τῇ ἐπιθυμίᾳ ἡδέος ἔσται. γίνεται οὖν ὅρος τῆς ἐπιθυμίας ὄρεξις ἡδέος ἡδέος· οὐδὲν γὰρ διαφέρει ἐπιθυμίαν εἰπεῖν ἢ ὄρεξιν ἡδέος, ὥσθ’

ἐκάτερον αὐτῶν ἡδέος ἔσται. ἢ τοῦτο μὲν οὐδὲν ἄτοπον· καὶ γὰρ ὁ ἄνθρωπος δίπουν ἐστίν, ὥστε καὶ τὸ ταῦτόν τῳ ἀνθρώπῳ δίπουν ἔσται, ἔστι δὲ ταῦτόν τῳ ἀνθρώπῳ ζῶον πεζὸν δίπουν, ὥστε ζῶον πεζὸν δίπουν δίπουν ἔσται, ἀλλ' οὐ διὰ τοῦτο ἄτοπὸν τι συμβαίνει· οὐ γὰρ κατὰ ζώου πεζοῦ τὸ δίπουν κατηγορεῖται (οὕτω μὲν γὰρ δις ἂν περὶ τοῦ αὐτοῦ τὸ δίπουν κατηγοροῖτο), ἀλλὰ περὶ ζώου πεζοῦ δίποδος [141a] τὸ δίπουν λέγεται, ὥστε ἅπαξ μόνον τὸ δίπουν κατηγορεῖται. ὁμοίως δὲ καὶ ἐπὶ τῆς ἐπιθυμίας· οὐ γὰρ κατὰ τῆς ὀρέξεως τὸ ἡδέος εἶναι κατηγορεῖται ἀλλὰ κατὰ τοῦ σύμπαντος, ὥστε ἅπαξ καὶ ἐνταῦθα ἡ κατηγορία γίνεται. οὐκ ἔστι δὲ τὸ δις φθέγγασθαι ταῦτόν ὄνομα τῶν ἀτόπων, ἀλλὰ τὸ πλεονάκις περὶ τινος τὸ αὐτὸ κατηγορῆσαι, ὡς Ξενοκράτης τὴν φρόνησιν ὀριστικὴν καὶ θεωρητικὴν τῶν ὄντων φησὶν εἶναι· ἢ γὰρ ὀριστικὴ θεωρητικὴ τίς ἐστίν, ὥστε δις τὸ αὐτὸ λέγει, προσθεὶς πάλιν καὶ θεωρητικὴν. ὁμοίως δὲ καὶ ὅσοι τὴν κατάψυξιν στέρησιν τοῦ κατὰ φύσιν θερμοῦ φασιν εἶναι· πᾶσα γὰρ στέρησις ἐστὶ τοῦ κατὰ φύσιν ὑπάρχοντος, ὥστε περιέργον τὸ προσθεῖναι τοῦ κατὰ φύσιν, ἀλλ' ἱκανὸν ἦν εἰπεῖν στέρησιν θερμοῦ, ἐπειδὴ αὐτὴ ἡ στέρησις γνώριμον ποιεῖ ὅτι τοῦ κατὰ φύσιν λέγεται.

Πάλιν εἰ τοῦ καθόλου εἰρημένου προσθεῖη καὶ ἐπὶ μέρους, οἶον εἰ τὴν ἐπιείκειαν ἐλάττωσιν τῶν συμφερόντων καὶ δικαίων· τὸ γὰρ δίκαιον συμφέρον τι, ὥστε περιέχεται ἐν τῷ συμφέροντι. περιττὸν οὖν τὸ δίκαιον· καθόλου γὰρ εἶπας ἐπὶ μέρους προσέθηκεν. καὶ εἰ τὴν ἱατρικὴν ἐπιστήμην τῶν ὑγιεινῶν ζῶν καὶ ἀνθρώπων, ἢ τὸν νόμον εἰκόνα τῶν φύσει καλῶν καὶ δικαίων· τὸ γὰρ δίκαιον καλόν τι, ὥστε πλεονάκις τὸ αὐτὸ λέγει.

Πότερον μὲν οὖν καλῶς ἢ οὐ καλῶς, διὰ τούτων καὶ τῶν τοιούτων ἐπισκεπτέον· πότερον δ' ὥριστα καὶ εἴρηκε τὸ τί ἦν εἶναι ἢ οὐχί, ἐκ τῶνδε.

Πρῶτον μὲν εἰ μὴ διὰ προτέρων καὶ γνωριμωτέρων πεποιήται τὸν ὀρισμόν. ἐπεὶ γὰρ ὁ ὅρος ἀποδίδεται τοῦ γνωρίσαι χάριν τὸ λεχθέν, γνωρίζομεν δ' οὐκ ἐκ τῶν τυχόντων ἀλλ' ἐκ τῶν προτέρων καὶ γνωριμωτέρων, καθάπερ ἐν ταῖς ἀποδείξεσιν (οὕτω γὰρ πᾶσα διδασκαλία καὶ μάθησις ἔχει), φανερόν ὅτι ὁ μὴ διὰ τοιούτων ὀριζόμενος οὐχ ὥριστα. εἰ δὲ μὴ, πλείους ἔσονται τοῦ αὐτοῦ ὀρισμοί· δηλὸν γὰρ ὅτι καὶ ὁ διὰ προτέρων καὶ γνωριμωτέρων βέλτιον ὥριστα, ὥστε ἀμφοτέροι ἂν εἶησαν ὅροι τοῦ αὐτοῦ. τὸ δὲ

τοιούτον οὐ δοκεῖ· ἐκάστῳ γὰρ τῶν ὄντων ἓν ἐστὶ τὸ εἶναι ὅπερ ἐστίν. ὥστ' εἰ πλείους ἔσονται τοῦ αὐτοῦ ὀρισμοί, ταὐτὸν ἔσται τῷ ὀριζομένῳ τὸ εἶναι ὅπερ καθ' ἐκάτερον τῶν ὀρισμῶν δηλοῦται. ταῦτα δ' [141b] οὐ ταῦτά ἐστιν, ἐπειδὴ οἱ ὀρισμοὶ ἕτεροι. δῆλον οὖν ὅτι οὐχ ὥριστα ὁ μὴ διὰ προτέρων καὶ γνωριμωτέρων ὀρισάμενος.

Τὸ μὲν οὖν μὴ διὰ γνωριμωτέρων εἰρησθαι τὸν ὅρον διχῶς ἔστιν ἐκλαβεῖν· ἢ γὰρ εἰ ἀπλῶς ἐξ ἀγνωστοτέρων ἢ ἡμῖν ἀγνωστοτέρων· ἐνδέχεται γὰρ ἀμφοτέρως. ἀπλῶς μὲν οὖν γνωριμώτερον τὸ πρότερον τοῦ ὑστέρου, οἷον στιγμὴ γραμμῆς καὶ γραμμὴ ἐπιπέδου καὶ ἐπίπεδον στερεοῦ, καθάπερ καὶ μονὰς ἀριθμοῦ· πρότερον γὰρ καὶ ἀρχὴ παντὸς ἀριθμοῦ. ὁμοίως δὲ καὶ στοιχεῖον συλλαβῆς. ἡμῖν δ' ἀνάπαλιν ἐνίοτε συμβαίνει· μάλιστα γὰρ τὸ στερεὸν ὑπὸ τὴν αἴσθησιν πίπτει, τὸ δ' ἐπίπεδον μᾶλλον τῆς γραμμῆς, γραμμὴ δὲ σημείου μᾶλλον. οἱ πολλοὶ γὰρ τὰ τοιαῦτα προγνωρίζουσιν· τὰ μὲν γὰρ τῆς τυχούσης, τὰ δ' ἀκριβοῦς καὶ περιττῆς διανοίας καταμαθεῖν ἐστιν.

Ἀπλῶς μὲν οὖν βέλτιον τὸ διὰ τῶν προτέρων τὰ ὕστερα πειρᾶσθαι γνωρίζειν· ἐπιστημονικώτερον γὰρ τὸ τοιοῦτόν ἐστιν. οὐ μὴν ἀλλὰ πρὸς τοὺς ἀδυνατοῦντας γνωρίζειν διὰ τῶν τοιούτων ἀναγκαῖον ἴσως διὰ τῶν ἐκείνοις γνωρίμων ποιεῖσθαι τὸν λόγον. εἰσὶ δὲ τῶν τοιούτων ὀρισμῶν ὃ τε τῆς στιγμῆς καὶ ὁ τῆς γραμμῆς καὶ ὁ τοῦ ἐπιπέδου· πάντες γὰρ διὰ τῶν ὑστέρων τὰ πρότερα δηλοῦσιν· τὸ μὲν γὰρ γραμμῆς, τὸ δ' ἐπίπεδου, τὸ δὲ στερεοῦ φασὶ πέρας εἶναι. οὐ δεῖ δὲ λανθάνειν ὅτι τοὺς οὕτως ὀριζομένους οὐκ ἐνδέχεται τὸ τί ἦν εἶναι τῷ ὀριζομένῳ δηλοῦν, ἐὰν μὴ τυγχάνῃ ταὐτὸν ἡμῖν τε γνωριμώτερον ὄν καὶ ἀπλῶς γνωριμώτερον, εἴπερ δεῖ μὲν διὰ τοῦ γένους καὶ τῶν διαφορῶν ὀρίζεσθαι τὸν καλῶς ὀριζόμενον, ταῦτα δὲ τῶν ἀπλῶς γνωριμωτέρων καὶ προτέρων τοῦ εἵδους ἐστίν. συναναιρεῖ γὰρ τὸ γένος καὶ ἡ διαφορὰ τὸ εἶδος, ὥστε πρότερα ταῦτα τοῦ εἵδους. ἔστι δὲ καὶ γνωριμώτερα· τοῦ μὲν γὰρ εἵδους γνωριζομένου ἀνάγκη καὶ τὸ γένος καὶ τὴν διαφορὰν γνωρίζεσθαι (ὁ γὰρ ἄνθρωπον γνωρίζων καὶ ζῶον καὶ πεζὸν γνωρίζει), τοῦ δὲ γένους ἢ τῆς διαφορᾶς γνωριζομένης οὐκ ἀνάγκη καὶ τὸ εἶδος γνωρίζεσθαι, ὥστε ἀγνωστότερον τὸ εἶδος. ἔτι τοῖς κατ' ἀλήθειαν τοὺς τοιούτους ὀρισμοὺς φάσκουσιν εἶναι, τοὺς ἐκ τῶν ἐκάστῳ γνωρίμων, πολλοὺς τοῦ αὐτοῦ συμβήσεται λέγειν ὀρισμοὺς εἶναι· ἕτερα γὰρ ἐτέροις καὶ οὐ ταῦτα πᾶσι τυγχάνει γνωριμώτερα ὄντα, ὥστε πρὸς ἕκαστον

[142a] ἕτερος ἂν εἴη ὁρισμὸς ἀποδοτέος, εἴπερ ἐκ τῶν ἐκάστῳ γνωριμωτέρων τὸν ὁρισμὸν ποιεῖσθαι χρή. ἔτι τοῖς αὐτοῖς ἄλλοτ' ἄλλα μᾶλλον γνώριμα, ἐξ ἀρχῆς μὲν τὰ αἰσθητά, ἀκριβεστέροις δὲ γενομένοις ἀνάπαλιν, ὥστ' οὐδὲ πρὸς τὸν αὐτὸν ἀεὶ ὁ αὐτὸς ὁρισμὸς ἀποδοτέος τοῖς διὰ τῶν ἐκάστοις γνωριμωτέρων τὸν ὁρισμὸν φάσκουσιν ἀποδοτέον εἶναι. δῆλον οὖν ὅτι οὐχ ὁριστέον διὰ τῶν τοιούτων ἀλλὰ διὰ τῶν ἀπλῶς γνωριμωτέρων· μόνως γὰρ ἂν οὕτως εἷς καὶ ὁ αὐτὸς ὁρισμὸς ἀεὶ γίνοιτο. ἴσως δὲ καὶ τὸ ἀπλῶς γνώριμον οὐ τὸ πᾶσι γνώριμόν ἐστιν ἀλλὰ τὸ τοῖς εὖ διακειμένοις τὴν διάνοιαν, καθάπερ καὶ τὸ ἀπλῶς ὑγιεινὸν τὸ τοῖς εὖ ἔχουσι τὸ σῶμα. δεῖ μὲν οὖν ἕκαστα τῶν τοιούτων ἐξακριβοῦν, χρῆσθαι δὲ διαλεγομένους πρὸς τὸ συμφέρον. μάλιστα δ' ὁμολογουμένως ἀναιρεῖν ἐνδέχεται τὸν ὁρισμὸν, ἐὰν μὴτ' ἐκ τῶν ἀπλῶς γνωριμωτέρων μὴτ' ἐκ τῶν ἡμῖν τυγχάνη τὸν λόγον πεποιημένος.

Εἷς μὲν οὖν τρόπος τοῦ μὴ διὰ γνωριμωτέρων ἐστὶ τὸ διὰ τῶν ὑστέρων τὰ πρότερα δηλοῦν, καθάπερ πρότερον εἵπαμεν· ἄλλος δὲ εἰ τοῦ ἐν ἡρεμίᾳ καὶ τοῦ ὀρισμένου διὰ τοῦ ἀορίστου καὶ τοῦ ἐν κινήσει ἀποδέδοται ὁ λόγος ἡμῖν· πρότερον γὰρ τὸ μένον καὶ τὸ ὀρισμένον τοῦ ἀορίστου καὶ ἐν κινήσει ὄντος.

Τοῦ δὲ μὴ ἐκ προτέρων τρεῖς εἰσι τρόποι· πρῶτος μὲν, εἰ διὰ τοῦ ἀντικειμένου τὸ ἀντικείμενον ὦρισται, οἷον διὰ τοῦ κακοῦ τὸ ἀγαθόν· ἅμα γὰρ τῇ φύσει τὰ ἀντικείμενα. ἐνίοις δὲ καὶ ἡ αὐτὴ ἐπιστήμη ἀμφοτέρων δοκεῖ εἶναι, ὥστ' οὐδὲ γνωριμώτερον τὸ ἕτερον τοῦ ἑτέρου. δεῖ δὲ μὴ λανθάνειν ὅτι ἕνια ἴσως οὐκ ἔστιν ὀρίσασθαι ἄλλως, οἷον τὸ διπλάσιον ἄνευ τοῦ ἡμίσεος, καὶ ὅσα καθ' αὐτὰ πρὸς τι λέγεται. πᾶσι γὰρ τοῖς τοιούτοις ταῦτόν τὸ εἶναι τῷ πρὸς τί πως ἔχειν, ὥστ' ἀδύνατον ἄνευ θατέρου θάτερον γνωρίζειν· διόπερ ἀναγκαῖον ἐν τῷ τοῦ ἑτέρου λόγῳ συμπεριελῆσθαι καὶ θάτερον. γνωρίζειν μὲν οὖν δεῖ τὰ τοιαῦτα πάντα, χρῆσθαι δ' αὐτοῖς ὡς ἂν δοκῇ συμφέρειν.

Ἄλλος, εἰ αὐτῷ κέχρηται τῷ ὀριζομένῳ. λανθάνει δ' ὅταν μὴ αὐτῷ τῷ τοῦ ὀριζομένου ὀνόματι χρήσῃται, οἷον εἰ [142b] τὸν ἥλιον ἄστρον ἡμεροφανὲς ὠρίσατο· ὁ γὰρ ἡμέρα χρώμενος ἡλίῳ χρήται. δεῖ δ', ὅπως φωραθῇ τὰ τοιαῦτα, μεταλαμβάνειν ἀντὶ τοῦ ὀνόματος τὸν λόγον, οἷον ὅτι ἡμέρα ἡλίου φορὰ ὑπὲρ γῆς ἐστίν· δῆλον γὰρ ὅτι ὁ τὴν φορὰν ἡλίου ὑπὲρ γῆς εἰρηκὼς τὸν ἥλιον εἴρηκεν, ὥστε χρήται τῷ ἡλίῳ ὁ τῇ ἡμέρᾳ χρησάμενος.

Πάλιν εἰ τῷ ἀντιδιηρημένῳ τὸ ἀντιδιηρημένον ὥριται, οἷον περιττὸν τὸ μονάδι μείζον ἀρτίου. ἅμα γὰρ τῇ φύσει τὰ ἐκ τοῦ αὐτοῦ γένους ἀντιδιηρημένα· τὸ δὲ περιττὸν καὶ τὸ ἄρτιον ἀντιδιήρηται· ἄμφω γὰρ ἀριθμοῦ διαφοραί.

Ὅμοιως δὲ καὶ εἰ διὰ τῶν ὑποκάτω τὸ ἐπάνω ὥριται, οἷον ἄρτιον ἀριθμὸν τὸν δίχα διαιρούμενον ἢ τὸ ἀγαθὸν ἔξιν ἀρετῆς· τό τε γὰρ δίχα ἀπὸ τῶν δύο εἴληπται, ἀρτίων ὄντων, καὶ ἡ ἀρετὴ ἀγαθόν τί ἐστιν, ὥσθ' ὑποκάτω ταῦτα ἐκείνων ἐστίν. ἔτι δ' ἀνάγκη τὸν τῷ ὑποκάτω χρώμενον καὶ αὐτῷ χρῆσθαι. ὃ τε γὰρ τῇ ἀρετῇ χρώμενος χρῆται τῷ ἀγαθῷ, ἐπειδὴ ἀγαθόν τι ἡ ἀρετὴ, ὁμοίως δὲ καὶ ὁ τῷ δίχα χρώμενος τῷ ἀρτίῳ χρῆται, ἐπειδὴ εἰς δύο διηρῆσθαι σημαίνει τὸ δίχα διηρῆσθαι, τὰ δὲ δύο ἄρτια ἐστίν.

Καθόλου μὲν οὖν εἰπεῖν εἷς ἐστὶ τόπος τὸ μὴ διὰ προτέρων καὶ γνωριμωτέρων πεποιῆσθαι τὸν λόγον, μέρη δ' αὐτοῦ τὰ εἰρημένα. δεύτερος δὲ εἰ ἐν γένει τοῦ πράγματος ὄντος μὴ κεῖται ἐν γένει. ἐν ἅπασιν δὲ τὸ τοιοῦτον ἀμάρτημα ἐστὶν ἐν οἷς οὐ πρόκειται τοῦ λόγου τὸ τί ἐστίν, οἷον ὁ τοῦ σώματος ὁρισμὸς “τὸ ἔχον τρεῖς διαστάσεις”, ἢ εἴ τις τὸν ἄνθρωπον ὀρίσαιο τὸ ἐπιστάμενον ἀριθμεῖν. οὐ γὰρ εἴρηται τί ὄν τρεῖς ἔχει διαστάσεις, ἢ τί ὄν ἐπίσταται ἀριθμεῖν· τὸ δὲ γένος βούλεται τὸ τί ἐστὶ σημαίνειν, καὶ πρῶτον ὑποτίθεται τῶν ἐν τῷ ὁρισμῷ λεγομένων.

Ἔτι εἰ πρὸς πλείω λεγομένου τοῦ ὀριζομένου μὴ πρὸς πάντα ἀποδέδωκεν, οἷον εἰ τὴν γραμματικὴν ἐπιστήμην τοῦ γράψαι τὸ ὑπαγορευθέν· προσδεῖται γὰρ ὅτι καὶ τοῦ ἀναγνῶναι. οὐδὲν γὰρ μᾶλλον <ὁ> τοῦ γράψαι ἢ <ὁ> τοῦ ἀναγνῶναι ἀποδοὺς ὥριται, ὥστ' οὐδέτερος, ἀλλ' ὁ ἄμφω ταῦτ' εἰπὼν, ἐπειδὴ πλείους οὐκ ἐνδέχεται ταυτοῦ ὁρισμοὺς εἶναι. ἐπ' ἐνίων [143a] μὲν οὖν κατ' ἀλήθειαν ἔχει καθάπερ εἴρηται, ἐπ' ἐνίων δ' οὐ, οἷον ἐφ' ὅσων μὴ καθ' αὐτὸ πρὸς ἄμφω λέγεται, καθάπερ ἡ ἱατρικὴ τοῦ ὑγίειαν καὶ νόσον ποιῆσαι· τοῦ μὲν γὰρ καθ' αὐτὴν λέγεται, τοῦ δὲ κατὰ συμβεβηκός· ἀπλῶς γὰρ ἀλλότριον τῆς ἱατρικῆς τὸ νόσον ποιεῖν. ὥστ' οὐδὲν μᾶλλον ὥριται ὁ πρὸς ἄμφω ἀποδοὺς τοῦ πρὸς θάτερον, ἀλλ' ἴσως καὶ χειρόν, ἐπειδὴ καὶ τῶν λοιπῶν ὅστισοῦν δυνατός ἐστι νόσον ποιῆσαι.

Ἔτι εἰ μὴ πρὸς τὸ βέλτιον ἀλλὰ πρὸς τὸ χειρόν ἀποδέδωκε, πλειόνων ὄντων πρὸς ἃ λέγεται τὸ ὀριζόμενον· πᾶσα γὰρ ἐπιστήμη καὶ δύναμις τοῦ βελτίστου δοκεῖ εἶναι.

Πάλιν εἰ μὴ κεῖται ἐν τῷ οἰκείῳ γένει τὸ λεχθέν, σκοπεῖν ἐκ

τῶν περὶ τὰ γένη στοιχείων, καθάπερ πρότερον εἴρηται.

Ἔτι εἰ ὑπερβαίνων λέγει τὰ γένη, οἷον τὴν δικαιοσύνην ἔξιν ισότητος ποιητικὴν ἢ διανεμητικὴν τοῦ ἴσου· ὑπερβαίνει γὰρ ὁ οὕτως ὀριζόμενος τὴν ἀρετὴν. ἀπολιπὼν οὖν τὸ τῆς δικαιοσύνης γένος οὐ λέγει τὸ τί ἦν εἶναι· ἡ γὰρ οὐσία ἐκάστω μετὰ τοῦ γένους. ἔστι δὲ τοῦτο ταῦτόν τῳ μὴ εἰς τὸ ἐγγυτάτω γένος θεῖναι· ὁ γὰρ εἰς τὸ ἐγγυτάτω θεὸς πάντα τὰ ἐπάνω εἴρηκεν, ἐπειδὴ πάντα τὰ ἐπάνω γένη τῶν ὑποκάτω κατηγορεῖται. ὥστ' ἡ εἰς τὸ ἐγγυτάτω γένος θετέον, ἢ πάσας τὰς διαφορὰς τῳ ἐπάνω γένει προσαπτέον δι' ὃν ὀρίζεται τὸ ἐγγυτάτω γένος· οὕτω γὰρ οὐδὲν ἂν εἴη παραλελοιπώς, ἀλλ' ἂντ' ὀνόματος λόγῳ εἰρηκὼς ἂν εἴη τὸ ὑποκάτω γένος. ὁ δ' αὐτὸ μόνον τὸ ἐπάνω γένος εἶπας οὐ λέγει καὶ τὸ ὑποκάτω γένος· ὁ γὰρ φυτὸν εἶπας οὐ λέγει δένδρον.

Πάλιν ἐπὶ τῶν διαφορῶν ὁμοίως σκεπτέον εἰ καὶ τὰς διαφορὰς εἶπε τὰς τοῦ γένους. εἰ γὰρ μὴ ταῖς τοῦ πράγματος ἰδίαις ὥρισται διαφοραῖς, ἢ καὶ παντελῶς τι τοιοῦτον εἴρηκεν ὁ μηδενὸς ἐνδέχεται διαφορὰν εἶναι, οἷον τὸ ζῶον ἢ τὴν οὐσίαν, δῆλον ὅτι οὐχ ὥρισται· οὐδενὸς γὰρ διαφοραὶ τὰ εἰρημένα. ὁρᾷν δὲ καὶ εἰ ἔστιν ἀντιδιηρημένον τι τῇ εἰρημένῃ διαφορᾷ. εἰ γὰρ μὴ ἔστι, δῆλον ὅτι οὐκ ἂν εἴη ἡ εἰρημένη τοῦ γένους διαφορά· πᾶν γὰρ γένος ταῖς ἀντιδιηρημέναις διαφοραῖς [143b] διαιρεῖται, καθάπερ τὸ ζῶον τῳ πεζῳ καὶ τῳ πτηνῳ καὶ <τῳ> ἐνύδρῳ [καὶ τῳ δίποδι]. ἢ εἰ ἔστι μὲν ἀντιδιηρημένη διαφορά, μὴ ἀληθεύεται δὲ κατὰ τοῦ γένους. δῆλον γὰρ ὅτι οὐδετέρα ἂν εἴη τοῦ γένους διαφορά· πᾶσαι γὰρ αἱ ἀντιδιηρημέναι διαφοραὶ ἀληθεύονται κατὰ τοῦ οἰκείου γένους. ὁμοίως δὲ καὶ εἰ ἀληθεύεται μὲν, μὴ ποιεῖ δὲ προστιθεμένη τῳ γένει εἶδος. δῆλον γὰρ ὅτι οὐκ ἂν εἴη αὕτη εἰδοποιὸς διαφορά τοῦ γένους· πᾶσα γὰρ εἰδοποιὸς διαφορά μετὰ τοῦ γένους εἶδος ποιεῖ. εἰ δ' αὕτη μὴ ἔστι διαφορά, οὐδ' ἡ λεχθεῖσα, ἐπεὶ ταύτη ἀντιδιήρηται.

Ἔτι ἐὰν ἀποφάσει διαιρῇ τὸ γένος, καθάπερ οἱ τὴν γραμμὴν ὀριζόμενοι μῆκος ἀπλατὲς εἶναι· οὐδὲν γὰρ ἄλλο σημαίνει ἢ ὅτι οὐκ ἔχει πλάτος. συμβήσεται οὖν τὸ γένος μετέχειν τοῦ εἶδους· πᾶν γὰρ μῆκος ἢ ἀπλατὲς ἢ πλάτος ἔχον ἐστίν, ἐπεὶ κατὰ παντὸς ἢ ἡ κατάφασις ἢ ἡ ἀπόφασις ἀληθεύεται, ὥστε καὶ τὸ γένος τῆς γραμμῆς, μῆκος ὄν, ἢ ἀπλατὲς ἢ πλάτος ἔχον ἔσται. μῆκος δ' ἀπλατὲς εἶδος ἐστὶ λόγος· ὁμοίως δὲ καὶ μῆκος πλάτος ἔχον. τὸ γὰρ ἀπλατὲς καὶ τὸ πλάτος ἔχον διαφοραὶ εἰσιν· ἐκ δὲ τῆς διαφορᾶς καὶ

τοῦ γένους ὁ τοῦ εἴδους ἐστὶ λόγος, ὥστε τὸ γένος ἐπιδέχεται ἂν τὸν τοῦ εἴδους λόγον. ὁμοίως δὲ καὶ τὸν τῆς διαφορᾶς, ἐπειδὴ ἡ ἐτέρα τῶν εἰρημένων διαφορῶν ἐξ ἀνάγκης κατηγορεῖται τοῦ γένους. ἔστι δ' ὁ εἰρημένος τόπος χρήσιμος πρὸς τοὺς τιθεμένους ιδέας εἶναι. εἰ γὰρ ἔστιν αὐτὸ μῆκος, πῶς κατηγορηθῆσεται κατὰ τοῦ γένους ὅτι πλάτος ἔχον ἐστὶν ἢ ἀπλατές ἐστιν; δεῖ γὰρ κατὰ παντὸς μήκους τὸ ἕτερον αὐτῶν ἀληθεύεσθαι, εἴπερ κατὰ τοῦ γένους ἀληθεύεσθαι μέλλει. τοῦτο δ' οὐ συμβαίνει· ἔστι γὰρ καὶ ἀπλατῇ καὶ πλάτος ἔχοντα μήκη. ὥστε πρὸς ἐκείνους μόνους χρήσιμος ὁ τόπος οἱ πᾶν γένος ἐν ἀριθμῷ φασιν εἶναι. τοῦτο δὲ ποιοῦσιν οἱ τὰς ιδέας τιθέμενοι· αὐτὸ γὰρ μῆκος καὶ αὐτὸ ζῶον γένος φασὶν εἶναι.

Ἴσως δ' ἐπ' ἐνίων ἀναγκαῖον καὶ ἀποφάσει χρῆσθαι τὸν ὀριζόμενον, οἷον ἐπὶ τῶν στερήσεων· τυφλὸν γὰρ ἐστὶ τὸ μὴ ἔχον ὄψιν, ὅτε πέφυκεν ἔχειν. διαφέρει δ' οὐδὲν ἀποφάσει διελεῖν τὸ γένος ἢ τοιαύτῃ καταφάσει ἢ ἀπόφασιν [144a] ἀναγκαῖον ἀντιδιαριεῖσθαι, οἷον εἰ μῆκος πλάτος ἔχον ὥριστα· τῷ γὰρ πλάτος ἔχοντι τὸ μὴ ἔχον πλάτος ἀντιδιήρηται, ἄλλο δ' οὐδέν, ὥστε ἀποφάσει πάλιν διαιρεῖται τὸ γένος.

Πάλιν εἰ τὸ εἶδος ὡς διαφορὰν ἀποδέδωκε, καθάπερ οἱ τὸν προπηλακισμόν ὕβριν μετὰ χλευασίας ὀριζόμενοι· ἡ γὰρ χλευασία ὕβρις τις, ὥστ' οὐ διαφορὰ ἀλλ' εἶδος ἡ χλευασία.

Ἔτι εἰ τὸ γένος ὡς διαφορὰν εἴρηκεν, οἷον τὴν ἀρετὴν ἔξιν ἀγαθὴν ἢ σπουδαίαν· γένος γὰρ τὰγαθὸν τῆς ἀρετῆς ἐστίν. ἢ οὐ γένος τὰγαθὸν ἀλλὰ διαφορὰ, εἴπερ ἀληθὲς ὅτι οὐκ ἐνδέχεται ταῦτόν ἐν δύο γένεσιν εἶναι μὴ περιέχουσιν ἀλληλα. οὔτε γὰρ τὰγαθὸν τὴν ἔξιν περιέχει οὔθ' ἡ ἔξις τὰγαθόν· οὐ γὰρ πᾶσα ἔξις ἀγαθόν, οὐδὲ πᾶν ἀγαθὸν ἔξις, ὥστ' οὐκ ἂν εἴη γένη ἀμφοτέρω. εἰ οὖν ἡ ἔξις τῆς ἀρετῆς γένος, δηλὸν ὅτι τὰγαθὸν οὐ γένος ἀλλὰ μᾶλλον διαφορὰ. ἔτι ἢ μὲν ἔξις τί ἐστὶ σημαίνει ἢ ἀρετή, τὸ δ' ἀγαθὸν οὐ τί ἐστὶν ἀλλὰ ποῖον· δοκεῖ δ' ἡ διαφορὰ ποῖον τι σημαίνειν.

Ὅρᾶν δὲ καὶ εἰ μὴ ποῖον τι ἀλλὰ τότε τι σημαίνει ἡ ἀποδοθεῖσα διαφορὰ· δοκεῖ γὰρ ποῖον τι πᾶσα διαφορὰ δηλοῦν.

Σκοπεῖν δὲ καὶ εἰ κατὰ συμβεβηκὸς ὑπάρχει τῷ ὀριζομένῳ ἡ διαφορὰ. οὐδεμία γὰρ διαφορὰ τῶν κατὰ συμβεβηκὸς ὑπαρχόντων ἐστὶ, καθάπερ οὐδὲ τὸ γένος· οὐ γὰρ ἐνδέχεται τὴν διαφορὰν ὑπάρχειν τινὶ καὶ μὴ ὑπάρχειν.

Ἔτι εἰ κατηγορεῖται τοῦ γένους ἡ διαφορὰ ἢ τὸ εἶδος ἢ τῶν

κάτωθέν τι τοῦ εἶδους, οὐκ ἂν εἴη ὠρισμένος· οὐδὲν γὰρ τῶν εἰρημένων ἐνδέχεται τοῦ γένους κατηγορεῖσθαι, ἐπειδὴ τὸ γένος ἐπὶ πλεῖστον πάντων λέγεται. πάλιν εἰ κατηγορεῖται τὸ γένος τῆς διαφορᾶς· οὐ γὰρ κατὰ τῆς διαφορᾶς, ἀλλὰ καθ' ὧν ἡ διαφορά, τὸ γένος δοκεῖ κατηγορεῖσθαι, οἷον τὸ ζῶον κατὰ τοῦ ἀνθρώπου καὶ τοῦ βοῦς καὶ τῶν ἄλλων πεζῶν ζῴων, οὐ κατ' αὐτῆς τῆς διαφορᾶς τῆς κατὰ τοῦ εἶδους λεγομένης. εἰ γὰρ καθ' ἐκάστης τῶν διαφορῶν τὸ ζῶον κατηγορηθήσεται, πολλὰ ζῶα τοῦ εἶδους ἂν κατηγοροῖτο· αἱ [144b] γὰρ διαφοραὶ τοῦ εἶδους κατηγοροῦνται. ἔτι αἱ διαφοραὶ πᾶσαι ἢ εἶδη ἢ ἄτομα ἔσονται, εἴπερ ζῶα· ἕκαστον γὰρ τῶν ζῴων ἢ εἶδος ἔστιν ἢ ἄτομον.

Ὅμοίως δὲ σκεπτέον καὶ εἰ τὸ εἶδος ἢ τῶν ὑποκάτω τι τοῦ εἶδους τῆς διαφορᾶς κατηγορεῖται· ἀδύνατον γάρ, ἐπειδὴ ἐπὶ πλεόν ἢ διαφορὰ τῶν εἰδῶν λέγεται. ἔτι συμβήσεται τὴν διαφορὰν εἶδος εἶναι, εἴπερ κατηγορεῖται τι αὐτῆς τῶν εἰδῶν· εἰ γὰρ κατηγορηθήσεται ἄνθρωπος, δηλὸν ὅτι ἡ διαφορὰ ἀνθρωπός ἐστιν. πάλιν εἰ μὴ πρότερον ἢ διαφορὰ τοῦ εἶδους· τοῦ μὲν γὰρ γένους ὕστερον, τοῦ δ' εἶδους πρότερον τὴν διαφορὰν δεῖ εἶναι.

Σκοπεῖν δὲ καὶ εἰ ἐτέρου γένους ἢ ῥηθεῖσα διαφορὰ μὴ περιεχομένου μηδὲ περιέχοντος· οὐ δοκεῖ γὰρ ἡ αὐτὴ διαφορά δύο γενῶν εἶναι μὴ περιεχόντων ἄλληλα. εἰ δὲ μή, συμβήσεται καὶ εἶδος τὸ αὐτὸ ἐν δύο γένεσιν εἶναι μὴ περιέχουσιν ἄλληλα. ἐπιφέρει γὰρ ἐκάστη τῶν διαφορῶν τὸ οἰκεῖον γένος, καθάπερ τὸ πεζὸν καὶ τὸ δίπουν τὸ ζῶον συνεπιφέρει. ὥστε καθ' οὗ ἡ διαφορά, καὶ τῶν γενῶν ἐκάτερον· δηλὸν οὖν ὅτι τὸ εἶδος ἐν δύο γένεσιν οὐ περιέχουσιν ἄλληλα. ἢ οὐκ ἀδύνατον τὴν αὐτὴν διαφορὰν δύο γενῶν εἶναι μὴ περιεχόντων ἄλληλα, ἀλλὰ προσθετέον “μηδ' ἄμφω ὑπὸ ταὐτὸν ὄντων”. τὸ γὰρ πεζὸν ζῶον καὶ τὸ πτηνὸν ζῶον γένη ἐστὶν οὐ περιέχοντα ἄλληλα, καὶ ἀμφοτέρων αὐτῶν ἐστὶ τὸ δίπουν διαφορά. ὥστε προσθετέον ὅτι μηδ' ὑπὸ ταὐτὸν ὄντων ἄμφω· ταῦτα γὰρ ἄμφω ὑπὸ τὸ ζῶόν ἐστιν. δηλὸν δὲ καὶ ὅτι οὐκ ἀνάγκη τὴν διαφορὰν πᾶν οἰκεῖον ἐπιφέρειν γένος, ἐπειδὴ ἐνδέχεται τὴν αὐτὴν δύο γενῶν εἶναι μὴ περιεχόντων ἄλληλα, ἀλλὰ τὸ ἕτερον μόνον ἀνάγκη συνεπιφέρειν καὶ τὰ ἐπάνω τούτου πάντα, καθάπερ τὸ δίπουν τὸ πτηνὸν ἢ τὸ πεζὸν συνεπιφέρει ζῶον.

Ὅρᾶν δὲ καὶ εἰ τὸ ἐν τινι διαφορὰν ἀποδέδωκεν οὐσίας· οὐ δοκεῖ γὰρ διαφέρειν οὐσία οὐσίας τῷ πού εἶναι. διὸ καὶ τοῖς τῷ πεζῷ

καὶ τῷ ἐνύδρῳ διαιροῦσι τὸ ζῆον ἐπιτιμῶσιν ὥς τὸ πεζὸν καὶ τὸ ἐνυδρον ποὺ σημαῖνον. ἢ ἐπὶ μὲν τούτων οὐκ ὀρθῶς ἐπιτιμῶσιν· οὐ γὰρ ἔν τινι οὐδὲ ποὺ σημαίνει τὸ ἐνυδρον, ἀλλὰ ποιόν τι. καὶ γὰρ ἂν ἢ ἐν τῷ ξηρῷ, ὁμοίως ἐνυδρον· ὁμοίως δὲ τὸ χερσαῖον, κἂν ἐν ὑγρῷ, χερσαῖον [145a] ἀλλ’ οὐκ ἐνυδρον ἔσται. ἀλλ’ ὅμως ἐάν ποτε σημαίῃ τὸ ἐν τινι ἢ διαφορά, δῆλον ὅτι διημαρτηκῶς ἔσται.

Πάλιν εἰ τὸ πάθος διαφορὰν ἀποδέδωκεν· πᾶν γὰρ πάθος μᾶλλον γινόμενον ἐξίστησι τῆς οὐσίας, ἢ δὲ διαφορὰ οὐ τοιοῦτον· μᾶλλον γὰρ σῶζειν δοκεῖ ἢ διαφορὰ οὗ ἔστι διαφορά, καὶ ἀπλῶς ἀδύνατον εἶναι ἄνευ τῆς οἰκείας διαφορᾶς ἕκαστον· πεζοῦ γὰρ μὴ ὄντος οὐκ ἔσται ἄνθρωπος. ἀπλῶς δ’ εἰπεῖν, καθ’ ὅσα ἀλλοιοῦται τὸ ἔχον, οὐδὲν τούτων διαφορὰ ἐκείνου· ἅπαντα γὰρ τὰ τοιαῦτα μᾶλλον γινόμενα ἐξίστησι τῆς οὐσίας. ὥστ’ εἴ τινα τοιαύτην διαφορὰν ἀποδέδωκεν, ἡμάρτηκεν· ἀπλῶς γὰρ οὐκ ἀλλοιούμεθα κατὰ τὰς διαφοράς.

Καὶ εἴ τινος τῶν πρὸς τι μὴ πρὸς ἄλλο τὴν διαφορὰν ἀποδέδωκεν· τῶν γὰρ πρὸς τι καὶ αἱ διαφοραὶ πρὸς τι, καθάπερ καὶ τῆς ἐπιστήμης. θεωρητικὴ γὰρ καὶ πρακτικὴ καὶ ποιητικὴ λέγεται· ἕκαστον δὲ τούτων πρὸς τι σημαίνει· θεωρητικὴ γὰρ τινὸς καὶ ποιητικὴ τινὸς καὶ πρακτικὴ τινός.

Σκοπεῖν δὲ καὶ εἰ πρὸς ὃ πέφυκεν ἕκαστον τῶν πρὸς τι ἀποδίδωσιν ὁ ὀριζόμενος. ἐνίοις μὲν γὰρ πρὸς ὃ πέφυκεν [ἕκαστον τῶν πρὸς τι] μόνον ἔστι χρῆσθαι, πρὸς ἄλλο δ’ οὐδέν, ἐνίοις δὲ καὶ πρὸς ἄλλο, οἷον τῇ ὅψει πρὸς τὸ ἰδεῖν μόνον, τῇ δὲ στλεγγίδι κἂν ἀρύσειέ τις. ἀλλ’ ὅμως εἴ τις ὀρίσαιτο τὴν στλεγγίδα ὄργανον πρὸς τὸ ἀρύειν, ἡμάρτηκεν· οὐ γὰρ πρὸς τοῦτο πέφυκεν. ὅρος δὲ τοῦ πρὸς ὃ πέφυκεν “ἐφ’ ὃ ἂν χρήσαιτο ὁ φρόνιμος ἢ φρόνιμος καὶ ἡ περὶ ἕκαστον οἰκεία ἐπιστήμη”.

Ἡ εἰ μὴ τοῦ πρώτου ἀποδέδωκεν, ὅταν τυγχάνῃ πρὸς πλείω λεγόμενον, οἷον τὴν φρόνησιν ἀρετὴν ἀνθρώπου ἢ ψυχῆς καὶ μὴ τοῦ λογιστικοῦ. πρώτου γὰρ τοῦ λογιστικοῦ ἀρετὴ ἢ φρόνησις· κατὰ γὰρ τοῦτο καὶ ἡ ψυχὴ καὶ ὁ ἄνθρωπος φρονεῖν λέγεται.

Ἔτι εἰ μὴ δεκτικόν ἐστιν οὗ εἴρηται τὸ ὀρισμένον πάθος ἢ [ἢ] διάθεσις ἢ ὅτιοῦν ἄλλο, ἡμάρτηκεν· πᾶσα γὰρ διάθεσις καὶ πᾶν πάθος ἐν ἐκείνῳ πέφυκε γίνεσθαι οὗ ἔστι διάθεσις ἢ πάθος, καθάπερ καὶ ἡ ἐπιστήμη ἐν ψυχῇ, διάθεσις οὗσα ψυχῆς. ἐνίοτε δὲ διαμαρτάνουσιν ἐν τοῖς τοιούτοις, οἷον ὅσοι [145b] λέγουσιν ὅτι ὁ

ὕπνος ἐστὶν ἀδυναμία αἰσθήσεως, καὶ ἡ ἀπορία ἰσότης ἐναντίων λογισμῶν, καὶ ἡ ἀληθῶν διάστασις τῶν συμφύτων μερῶν μετὰ βίας. οὕτε γὰρ ὁ ὕπνος ὑπάρχει τῇ αἰσθήσει (ἔδει δ', εἴπερ ἀδυναμία αἰσθήσεώς ἐστιν)· ὁμοίως δ' οὐδ' ἡ ἀπορία ὑπάρχει τοῖς ἐναντίοις λογισμοῖς, οὐδ' ἡ ἀληθῶν τοῖς συμφύτοις μέρεσιν· ἀλλήγει γὰρ τὰ ἄψυχα, εἴπερ ἀληθῶν αὐτοῖς παρέσται. τοιοῦτος δὲ καὶ ὁ τῆς ὑγιείας ὁρισμός, εἴπερ “συμμετρία θερμῶν καὶ ψυχρῶν” ἐστίν· ἀνάγκη γὰρ ὑγιαίνειν τὰ θερμὰ καὶ ψυχρά. ἡ γὰρ ἐκάστου συμμετρία ἐν ἐκείνοις ὑπάρχει ὧν ἐστὶ συμμετρία, ὥσθ' ἡ ὑγίεια ὑπάρχοι ἂν αὐτοῖς. ἔτι τὸ ποιούμενον εἰς τὸ ποιητικὸν ἢ ἀνάπαλιν συμβαίνει τιθέναι τοῖς οὕτως ὀριζομένοις. οὐ γὰρ ἐστὶν ἀληθῶν ἡ διάστασις τῶν συμφύτων μερῶν, ἀλλὰ ποιητικὸν ἀληθόνος· οὐδ' ἡ ἀδυναμία τῆς αἰσθήσεως ὕπνος, ἀλλὰ ποιητικὸν θάτερον θατέρου· ἥτοι γὰρ διὰ τὴν ἀδυναμίαν ὑπνώσσομεν ἢ διὰ τὸν ὕπνον ἀδυνατοῦμεν. ὁμοίως δὲ καὶ τῆς ἀπορίας δόξειεν ἂν ποιητικὸν εἶναι ἢ τῶν ἐναντίων ἰσότης λογισμῶν· ὅταν γὰρ ἐπ' ἀμφοτέρα λογιζομένοις ἡμῖν ὁμοίως ἅπαντα φαίνεται καθ' ἐκάτερον γίνεσθαι, ἀποροῦμεν ὁπότερον πράξωμεν.

Ἔτι κατὰ τοὺς χρόνους πάντας ἐπισκοπεῖν εἴ που διαφωνεῖ, οἷον εἰ τὸ ἀθάνατον ὠρίσατο ζῶον ἄφθαρτον νῦν εἶναι· τὸ γὰρ νῦν ἄφθαρτον ζῶον νῦν ἀθάνατον ἔσται. ἢ ἐπὶ μὲν τούτου οὐ συμβαίνει· ἀμφίβολον γὰρ τὸ νῦν ἄφθαρτον εἶναι· ἢ γὰρ ὅτι οὐκ ἔφθαρται νῦν σημαίνει, ἢ ὅτι οὐ δύναται φθαρῆναι νῦν, ἢ ὅτι τοιοῦτόν ἐστι νῦν οἷον μηδέποτε φθαρῆναι. ὅταν οὖν λέγωμεν ὅτι ἄφθαρτον νῦν ἐστὶ ζῶον, τοῦτο λέγομεν, ὅτι νῦν τοιοῦτόν ἐστὶ ζῶον οἷον μηδέποτε φθαρῆναι· τοῦτο δὲ τῷ ἀθανάτῳ τὸ αὐτὸ ἦν, ὥστ' οὐ συμβαίνει νῦν αὐτὸ ἀθάνατον εἶναι. ἀλλ' ὅμως, ἂν συμβαίνει τὸ μὲν κατὰ τὸν λόγον ἀποδοθὲν ὑπάρχειν νῦν ἢ πρότερον, τὸ δὲ κατὰ τοῦνομα μὴ ὑπάρχειν, οὐκ ἂν εἴη ταυτόν. χρηστέον οὖν τῷ τόπῳ καθάπερ εἴρηται.

Σκεπτέον δὲ καὶ εἰ καθ' ἕτερόν τι μᾶλλον λέγεται τὸ ὀρισθὲν ἢ κατὰ τὸν ἀποδοθέντα λόγον, οἷον εἰ ἡ δικαιοσύνη δύναμις τοῦ ἴσου διανεμητική. δίκαιος γὰρ μᾶλλον ὁ προαιρούμενος τὸ ἴσον διανεῖμαι τοῦ δυναμένου, ὥστ' οὐκ ἂν εἴη [146a] ἡ δικαιοσύνη δύναμις τοῦ ἴσου διανεμητική· καὶ γὰρ δίκαιος εἴη ἂν μάλιστα ὁ δυνάμενος μάλιστα τὸ ἴσον διανεῖμαι.

Ἔτι εἰ τὸ μὲν πρᾶγμα δέχεται τὸ μᾶλλον, τὸ δὲ κατὰ τὸν λόγον ἀποδοθὲν μὴ δέχεται, ἢ ἀνάπαλιν τὸ μὲν κατὰ τὸν λόγον ἀποδοθὲν

δέχεται, τὸ δὲ πρᾶγμα μὴ· δεῖ γὰρ ἢ ἀμφοτέρωθεν δέχεσθαι ἢ μηδέτερον, εἴπερ δὴ ταυτὸν ἐστὶ τὸ κατὰ τὸν λόγον ἀποδοθὲν τῷ πράγματι. ἔτι εἰ δέχεται μὲν ἀμφοτέρωθεν τὸ μᾶλλον, μὴ ἅμα δὲ τὴν ἐπίδοσιν ἀμφοτέρωθεν λαμβάνει, οἷον εἰ ὁ ἔρως ἐπιθυμία συνουσίας ἐστίν· ὁ γὰρ μᾶλλον ἐρῶν οὐ μᾶλλον ἐπιθυμεῖ τῆς συνουσίας, ὥστ' οὐχ ἅμα ἀμφοτέρωθεν τὸ μᾶλλον ἐπιδέχεται· ἔδει δὲ γε, εἴπερ ταυτὸν ἦν.

Ἔτι εἰ, δύο τινῶν προτεθέντων, καθ' οὗ τὸ πρᾶγμα μᾶλλον λέγεται τὸ κατὰ τὸν λόγον ἥττον λέγεται, οἷον εἰ τὸ πῦρ ἐστὶ σῶμα τὸ λεπτομερέστατον. πῦρ μὲν γὰρ μᾶλλον ἢ φλόξ ἐστὶ τοῦ φωτός, σῶμα δὲ τὸ λεπτομερέστατον ἥττον ἢ φλόξ τοῦ φωτός· ἔδει δ' ἀμφοτέρωθεν μᾶλλον τῷ αὐτῷ ὑπάρχειν, εἴπερ ταυτὰ ἦν. πάλιν εἰ τὸ μὲν ὁμοίως ἀμφοτέροις ὑπάρχει τοῖς προτεθεῖσι, τὸ δ' ἕτερον μὴ ὁμοίως ἀμφοτέροις ἀλλὰ τῷ ἑτέρῳ μᾶλλον.

Ἔτι ἐὰν πρὸς δύο τὸν ὁρισμὸν ἀποδῶ καθ' ἑκάτερον, οἷον τὸ καλὸν τὸ δι' ὅψεως ἢ δι' ἀκοῆς ἡδύ, καὶ τὸ ὄν τὸ δυνατόν παθεῖν ἢ ποιῆσαι· ἅμα γὰρ ταυτὸν καλὸν τε καὶ οὐ καλὸν ἔσται, ὁμοίως δὲ καὶ ὄν τε καὶ οὐκ ὄν. τὸ γὰρ δι' ἀκοῆς ἡδὺ ταυτὸν τῷ καλῷ ἔσται, ὥστε τὸ μὴ ἡδὺ δι' ἀκοῆς τῷ μὴ καλῷ ταυτὸν· τοῖς γὰρ αὐτοῖς καὶ τὰ ἀντικείμενα τὰ αὐτά· ἀντίκειται δὲ τῷ μὲν καλῷ τὸ οὐ καλόν, τῷ δὲ δι' ἀκοῆς ἡδεῖ τὸ δι' ἀκοῆς οὐχ ἡδύ. δηλὸν οὖν ὅτι ταυτὸν τὸ οὐχ ἡδὺ δι' ἀκοῆς τῷ οὐ καλῷ. εἰ οὖν τί ἐστὶ δι' ὅψεως μὲν ἡδὺ δι' ἀκοῆς δὲ μὴ, καλὸν τε καὶ οὐ καλὸν ἔσται. ὁμοίως δὲ δεῖξομεν καὶ ὅτι ταυτὸν ὄν τε καὶ οὐκ ὄν ἐστίν.

Ἔτι τῶν γενῶν καὶ τῶν διαφορῶν καὶ τῶν ἄλλων ἀπάντων τῶν ἐν τοῖς ὁρισμοῖς ἀποδιδιομένων λόγους ἀντὶ τῶν ὀνομάτων ποιοῦντα σκοπεῖν εἴ τι διαφωνεῖ.

Ἐὰν δ' ἢ πρὸς τι τὸ ὀριζόμενον ἢ καθ' αὐτὸ ἢ κατὰ τὸ γένος, σκοπεῖν εἰ μὴ εἴρηται ἐν τῷ ὁρισμῷ πρὸς ὃ λέγεται [146b] ἢ αὐτὸ ἢ κατὰ τὸ γένος, οἷον εἰ τὴν ἐπιστήμην ὥρισατο ὑπόληψιν ἀμετάπειστον, ἢ τὴν βούλησιν ὀρεξίν ἄλυπον· παντὸς γὰρ τοῦ πρὸς τι ἢ οὐσία πρὸς ἕτερον, ἐπειδὴ ταυτὸν ἦν ἐκάστω τῶν πρὸς τι τὸ εἶναι ὅπερ τὸ πρὸς τί πως ἔχειν. ἔδει οὖν τὴν ἐπιστήμην εἰπεῖν ὑπόληψιν ἐπιστητοῦ καὶ τὴν βούλησιν ὀρεξίν ἀγαθοῦ. ὁμοίως δὲ καὶ εἰ τὴν γραμματικὴν ὥρισατο ἐπιστήμην γραμμάτων· ἔδει γὰρ ἢ πρὸς ὃ αὐτὸ λέγεται, ἢ πρὸς ὃ τὸ γένος, ἐν τῷ ὁρισμῷ ἀποδίδοσθαι. ἢ εἰ πρὸς τι εἰρημένον μὴ πρὸς τὸ τέλος ἀποδέδοται· τέλος δ' ἐν ἐκάστω τὸ βέλτιστον ἢ οὗ χάριν τᾶλλα. ρητέον δὴ ἢ τὸ βέλτιστον ἢ τὸ

ἔσχατον, οἷον τὴν ἐπιθυμίαν οὐχ ἡδέος ἀλλ' ἡδονῆς· ταύτης γὰρ χάριν καὶ τὸ ἡδὺ αἰρούμεθα.

Σκοπεῖν δὲ καὶ εἰ γένεσίς ἐστι πρὸς ὃ ἀποδέδωκεν, ἡ ἐνέργεια· οὐδὲν γὰρ τῶν τοιούτων τέλος· μᾶλλον γὰρ τὸ ἐνηργηκεῖναι καὶ γεγενῆσθαι τέλος ἢ τὸ γίνεσθαι καὶ ἐνεργεῖν. (ἢ οὐκ ἐπὶ πάντων ἀληθές τὸ τοιοῦτον· σχεδὸν γὰρ οἱ πλεῖστοι ἡδεσθαι μᾶλλον βούλονται ἢ πεπαῦσθαι ἡδόμενοι, ὥστε τὸ ἐνεργεῖν μᾶλλον τέλος ἂν ποιοῖντο τοῦ ἐνηργηκεῖναι.)

Πάλιν ἐπ' ἐνίων εἰ μὴ διώρικε τὸ πόσου ἢ ποίου ἢ ποῦ ἢ κατὰ τὰς ἄλλας διαφοράς, οἷον φιλότιμος ὁ ποίας καὶ ὁ πόσης ὀρεγόμενος τιμῆς· πάντες γὰρ ὀρέγονται τιμῆς, ὥστ' οὐκ ἀπόχρη φιλότιμον εἰπεῖν τὸν ὀρεγόμενον τιμῆς, ἀλλὰ προσθετέον τὰς εἰρημένας διαφοράς. ὁμοίως δὲ καὶ φιλοχρήματος ὁ πόσων ὀρεγόμενος χρημάτων, ἡ ἀκρατὴς ὁ περὶ ποίας ἡδονάς· οὐ γὰρ ὁ ὕφ' οἴασποτοῦν ἡδονῆς κρατούμενος ἀκρατὴς λέγεται, ἀλλ' ὁ ὑπὸ τινός. ἢ πάλιν, ὡς ὀρίζονται τὴν νύκτα σκιὰν γῆς, ἢ τὸν σεισμὸν κίνησιν γῆς, ἢ τὸ νέφος πύκνωσιν ἀέρος, ἢ τὸ πνεῦμα κίνησιν ἀέρος· προσθετέον γὰρ πόσου καὶ ποίου καὶ ποῦ καὶ ὑπὸ τίνος. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων τῶν τοιούτων· ἀπολείπων γὰρ διαφορὰν ἡντινοῦν οὐ λέγει τὸ τί ἦν εἶναι. δεῖ δ' αἰεὶ πρὸς τὸ ἐνδεές ἐπιχειρεῖν· οὐ γὰρ ὅπως οὖν γῆς κινήσεισης οὐδ' ὅπως οὖν σεισμὸς ἔσται, ὁμοίως δ' οὐδ' ἀέρος ὅπως οὖν οὐδ' ὅπως οὖν κινήθέντος πνεῦμα.

Ἔτι ἐπὶ τῶν ὀρέξεων εἰ μὴ πρόσκειται τὸ φαινόμενον, καὶ ἐφ' ὅσων ἄλλων ἀρμόττει, οἷον ὅτι ἡ βούλησις [147a] ὀρεξίς ἀγαθοῦ, ἢ δ' ἐπιθυμία ὀρεξίς ἡδέος, ἀλλὰ μὴ φαινομένου ἀγαθοῦ ἢ ἡδέος. πολλάκις γὰρ λανθάνει τοὺς ὀρεγομένους ὃ τι ἀγαθὸν ἢ ἡδύ ἐστιν, ὥστ' οὐκ ἀναγκαῖον ἀγαθὸν ἢ ἡδὺ εἶναι ἀλλὰ φαινόμενον μόνον. ἔδει οὖν οὕτω καὶ τὴν ἀπόδοσιν ποιήσασθαι. ἐὰν δὲ καὶ προσαποδῶ τὸ εἰρημένον, ἐπὶ τὰ εἶδη ἀκτέον τὸν τιθέμενον ιδέας εἶναι. οὐ γὰρ ἔστιν ιδέα φαινομένου οὐδενός, τὸ δ' εἶδος πρὸς τὸ εἶδος δοκεῖ λέγεσθαι, οἷον αὐτὴ ἐπιθυμία αὐτοῦ ἡδέος καὶ αὐτὴ βούλησις αὐτοῦ ἀγαθοῦ. οὐκ ἔσται οὖν φαινομένου ἀγαθοῦ οὐδὲ φαινομένου ἡδέος· ἄτοπον γὰρ τὸ εἶναι αὐτὸ φαινόμενον ἀγαθὸν ἢ ἡδύ.

Ἔτι ἐὰν μὲν ἢ τῆς ἕξεως ὁ ὀρισμός, σκοπεῖν ἐπὶ τοῦ ἔχοντος, ἐὰν δὲ τοῦ ἔχοντος, ἐπὶ τῆς ἕξεως· ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων τῶν τοιούτων· οἷον εἰ τὸ ἡδὺ ὅπερ ὠφέλιμον, καὶ ὁ ἡδόμενος ὠφελούμενος. καθόλου δ' εἰπεῖν ἐν τοῖς τοιούτοις ὀρισμοῖς τρόπον

τινὰ πλείω ἐνὸς συμβαίνει τὸν ὀριζόμενον ὀρίζεσθαι. ὁ γὰρ τὴν ἐπιστήμην ὀριζόμενος τρόπον τινὰ καὶ τὴν ἄγνοιαν ὀρίζεται, ὁμοίως δὲ καὶ τὸ ἐπιστῆμον καὶ τὸ ἀνεπιστῆμον, καὶ τὸ ἐπίστασθαι καὶ τὸ ἀγνοεῖν· τοῦ γὰρ πρώτου δήλου γενομένου τρόπον τινὰ καὶ τὰ λοιπὰ δῆλα γίνεται. σκεπτέον οὖν ἐπὶ πάντων τῶν τοιούτων μὴ τι διαφωνῇ, στοιχείοις χρώμενον τοῖς ἐκ τῶν ἐναντίων καὶ τῶν συστοίχων.

Ἔτι ἐπὶ τῶν πρὸς τι σκοπεῖν εἰ πρὸς ὃ τὸ γένος ἀποδίδεται, τὸ εἶδος πρὸς ἐκεῖνό τι ἀποδίδεται. οἷον εἰ ἡ ὑπόληψις πρὸς τὸ ὑποληπτόν, ἢ τις ὑπόληψις πρὸς τὸ τι ὑποληπτόν, καὶ εἰ τὸ πολλαπλάσιον πρὸς τὸ πολλοστημόριον, τὸ τι πολλαπλάσιον πρὸς τὸ τι πολλοστημόριον· εἰ γὰρ μὴ οὕτως ἀποδέδοται, δῆλον ὅτι ἡμάρτητα.

Ὅραν δὲ καὶ εἰ τοῦ ἀντικειμένου ὁ ἀντικείμενος λόγος, οἷον τοῦ ἡμίσεος ὁ ἀντικείμενος τῷ τοῦ διπλασίου· εἰ γὰρ διπλάσιον τὸ ἴσῳ ὑπερέχον, ἡμῖς τὸ ἴσῳ ὑπερεχόμενον. καὶ ἐπὶ τῶν ἐναντίων δ' ὡσαύτως· ὁ γὰρ ἐναντίος τοῦ ἐναντίου λόγος ἔσται κατὰ μίαν τινὰ συμπλοκὴν τῶν ἐναντίων. οἷον εἰ ὠφέλιμον τὸ ποιητικὸν ἀγαθοῦ, βλαβερὸν τὸ ποιητικὸν κακοῦ ἢ τὸ φθαρτικὸν ἀγαθοῦ· θάτερον γὰρ τούτων ἀναγκαῖον ἐναντίον [147b] εἶναι τῷ ἐξ ἀρχῆς ῥηθέντι. εἰ οὖν μηδέτερον ἐναντίον τῷ ἐξ ἀρχῆς ῥηθέντι, δῆλον ὅτι οὐδέτερος ἂν εἴη τῶν ὕστερον ἀποδοθέντων τοῦ ἐναντίου λόγος, ὥστ' οὐδ' ὁ ἐξ ἀρχῆς ἀποδοθεὶς ὀρθῶς ἀποδέδοται. ἐπεὶ δ' ἓν τῶν ἐναντίων στέρησει θατέρου λέγεται, οἷον ἡ ἀνισότης στέρησις ἰσότητος δοκεῖ εἶναι (ἄνισα γὰρ τὰ μὴ ἴσα λέγεται), δῆλον οὖν ὅτι τὸ μὲν κατὰ στέρησιν λεγόμενον ἐναντίον ἀναγκαῖον ὀρίζεσθαι διὰ θατέρου, τὸ δὲ λοιπὸν οὐκέτι διὰ τοῦ κατὰ στέρησιν λεγομένου· συμβαίνοι γὰρ ἂν ἑκάτερον δι' ἑκατέρου γνωρίζεσθαι. ἐπισκεπτέον οὖν ἐν τοῖς ἐναντίοις τὴν τοιαύτην ἀμαρτίαν, οἷον εἴ τις ὀρίσαιτο τὴν ἰσότητα τὸ ἐναντίον ἀνισότητι· διὰ γὰρ τοῦ κατὰ στέρησιν λεγομένου ὀρίζεται. ἔτι τὸν οὕτως ὀριζόμενον ἀναγκαῖον αὐτῷ τῷ ὀριζομένῳ χρῆσθαι. δῆλον δὲ τοῦτο, ἐὰν μεταληφθῇ ἀντὶ τοῦ ὀνόματος ὁ λόγος· εἰπεῖν γὰρ ἢ ἀνισότητα οὐδὲν διαφέρει ἢ στέρησιν ἰσότητος. ἔσται οὖν ἢ ἰσότης τὸ ἐναντίον στέρησει ἰσότητος, ὥστ' αὐτῷ ἂν εἴη κεχρημένος. ἂν δὲ μηδέτερον τῶν ἐναντίων κατὰ στέρησιν λέγηται, ἀποδοθῇ δ' ὁ λόγος ὁμοίως, οἷον ἀγαθὸν τὸ ἐναντίον κακῷ, δῆλον ὅτι κακὸν τὸ ἐναντίον ἀγαθῷ ἔσται· τῶν γὰρ οὕτως ἐναντίων ὁμοίως ὁ λόγος ἀποδοτέος. ὥστε πάλιν αὐτῷ τῷ ὀριζομένῳ συμβαίνει χρῆσθαι.

ἐνυπάρχει γὰρ ἐν τῷ τοῦ κακοῦ λόγῳ τὸ ἀγαθόν. ὥστ' εἰ ἀγαθόν ἐστι τὸ κακῷ ἐναντίον, τὸ δὲ κακὸν οὐδὲν διαφέρει ἢ τὸ τῷ ἀγαθῷ ἐναντίον, ἔσται ἀγαθὸν τὸ ἐναντίον τῷ τοῦ ἀγαθοῦ ἐναντίῳ. δῆλον οὖν ὅτι αὐτῷ κέχρηται.

Ἔτι εἰ τὸ κατὰ στέρησιν λεγόμενον ἀποδιδούς μὴ ἀποδέδωκεν οὗ ἐστι στέρησις, οἷον τῆς ἕξεως ἢ τοῦ ἐναντίου ἢ οὐτουοῦν ἐστιν ἡ στέρησις. καὶ εἰ μὴ ἐν ᾧ πέφυκε γίνεσθαι προσέθηκεν, ἢ ἀπλῶς ἢ ἐν ᾧ πρώτῳ πέφυκε γίνεσθαι. οἷον εἰ τὴν ἄγνοιαν εἰπὼν στέρησιν μὴ ἐπιστήμης στέρησιν εἶπεν, ἢ μὴ προσέθηκεν ἐν ᾧ πέφυκε γίνεσθαι, ἢ προσθεῖς μὴ ἐν ᾧ πρώτῳ ἀπέδωκεν, οἷον ὅτι οὐκ ἐν τῷ λογιστικῷ ἀλλ' ἐν ἀνθρώπῳ ἢ ψυχῇ· ἐὰν γὰρ ὅτιοις τούτων μὴ ποιήσῃ, ἡμάρτηκεν. ὁμοίως δὲ καὶ εἰ τὴν τυφλότητα μὴ ὄψεως στέρησιν ἐν ὀφθαλμῷ εἶπεν· δεῖ γὰρ τὸν καλῶς ἀποδιδόντα τὸ [148a] τί ἐστι καὶ τίνος ἐστὶν ἡ στέρησις ἀποδιδόναι καὶ τί ἐστι τὸ ἐστερημένον.

Ὅρᾶν δὲ καὶ εἰ μὴ λεγομένου κατὰ στέρησιν στερήσῃ ὠρίσατο, οἷον καὶ ἐπὶ τῆς ἀγνοίας δόξειεν ἂν ὑπάρχειν ἡ τοιαύτη ἁμαρτία τοῖς μὴ κατ' ἀπόφασιν τὴν ἄγνοιαν λέγουσιν. τὸ γὰρ μὴ ἔχον ἐπιστήμην οὐ δοκεῖ ἀγνοεῖν, ἀλλὰ μᾶλλον τὸ διηπατημένον· διὸ οὔτε τὰ ἄψυχα οὔτε τὰ παιδιά φαμὲν ἀγνοεῖν. ὥστ' οὐ κατὰ στέρησιν ἐπιστήμης ἡ ἄγνοια λέγεται.

Ἔτι ἐπὶ τῶν ὁμοίων τοῦ ὀνόματος πτώσεων αἱ ὅμοιαι τοῦ λόγου πτώσεις ἐφαρμόττουσιν· οἷον εἰ ὠφελίμον τὸ ποιητικὸν ὑγείας, ὠφελίμως τὸ ποιητικῶς ὑγείας καὶ ὠφελικὸς τὸ πεποιηκὸς ὑγίαν.

Σκοπεῖν δὲ καὶ ἐπὶ τὴν ιδέαν εἰ ἐφαρμόσει ὁ λεχθεὶς ὅρος. ἐπ' ἐνίων γὰρ οὐ συμβαίνει, οἷον ὡς Πλάτων ὀρίζειται, τὸ θνητὸν προσάπτων ἐν τοῖς τῶν ζώων ὀρισμοῖς· ἡ γὰρ ιδέα οὐκ ἔσται θνητή, οἷον αὐτοάνθρωπος, ὥστ' οὐκ ἐφαρμόσει ὁ λόγος ἐπὶ τὴν ιδέαν. ἀπλῶς δ' ἐν οἷς πρόσκειται τὸ ποιητικὸν ἢ παθητικόν, ἀνάγκη διαφωνεῖν ἐπὶ τῆς ιδέας τὸν ὅρον· ἀπαθεῖς γὰρ καὶ ἀκίνητοι δοκοῦσιν εἶναι αἱ ιδέαι τοῖς λέγουσιν ιδέας εἶναι, πρὸς δὲ τούτους καὶ οἱ τοιοῦτοι λόγοι χρήσιμοι.

Ἔτι εἰ τῶν καθ' ὁμωνυμίαν λεγομένων ἓνα λόγον ἀπάντων κοινὸν ἀποδέδωκεν· συνώνυμα γὰρ ὧν εἷς ὁ κατὰ τοῦνομα λόγος· ὥστ' οὐδενὸς τῶν ὑπὸ τοῦνομα ὁ ἀποδοθεὶς ὅρος, εἰ δὴ ὁμοίως ἐπὶ πᾶν τὸ ὁμώνυμον ἐφαρμόττει. πέπονθε δὲ τοῦτο καὶ ὁ Διονυσίου τῆς ζωῆς ὅρος, εἵπερ ἐστὶ “κίνησις γένους θρεπτοῦ σύμφυτος

παρακολουθοῦσα”· οὐδὲν γὰρ μᾶλλον τοῦτο τοῖς ζώοις ἢ τοῖς φυτοῖς ὑπάρχει. ἡ δὲ ζωὴ οὐ καθ’ ἓν εἶδος δοκεῖ λέγεσθαι, ἀλλ’ ἑτέρα μὲν τοῖς ζώοις ἑτέρα δὲ τοῖς φυτοῖς ὑπάρχειν. ἐνδέχεται μὲν οὖν καὶ κατὰ προαίρεσιν οὕτως ἀποδοῦναι τὸν ὅρον ὥς συνωνύμου καὶ καθ’ ἓν εἶδος πάσης τῆς ζωῆς λεγομένης. οὐδὲν δὲ κωλύει καὶ συνωρῶντα τὴν ὁμωνυμίαν καὶ θατέρου βουλούμενον τὸν ὀρισμὸν ἀποδοῦναι λαθεῖν μὴ ἴδιον ἀλλὰ κοινὸν ἀμφοῖν λόγον ἀποδόντα. ἀλλ’ οὐδὲν ἦττον, εἰ ὁποτέρωσοῦν πεποίηκεν, ἡμάρτηκεν. ἐπεὶ δ’ ἔνια λανθάνει τῶν ὁμωνύμων, ἐρωτῶντι [148b] μὲν ὥς συνωνύμοις χρηστέον (οὐ γὰρ ἐφαρμόσει ὁ θατέρου ὅρος ἐπὶ θάτερον, ὥστε δόξει οὐχ ὠρίσθαι κατὰ τρόπον· δεῖ γὰρ ἐπὶ πᾶν τὸ συνώνυμον ἐφαρμόττειν), αὐτῷ δ’ ἀποκρινομένῳ διαιρετέον. ἐπεὶ δ’ ἔνιοι τῶν ἀποκρινομένων τὸ μὲν συνώνυμον ὁμώνυμόν φασιν εἶναι ὅταν μὴ ἐφαρμόττη ἐπὶ πᾶν ὁ ἀποδοθεὶς λόγος, τὸ δ’ ὁμώνυμον συνώνυμον ἐὰν ἐπ’ ἅμφω ἐφαρμόττη, προδιομολογητέον ὑπὲρ τῶν τοιούτων ἢ προσυλλογιστέον ὅτι ὁμώνυμον ἢ συνώνυμον, ὁπότερον ἂν ἦ· μᾶλλον γὰρ συγχωροῦσιν οὐ προορῶντες τὸ συμβησόμενον. ἂν δὲ μὴ γενομένης ὁμολογίας φῇ τις τὸ συνώνυμον ὁμώνυμον εἶναι διὰ τὸ μὴ ἐφαρμόττειν καὶ ἐπὶ τοῦτο τὸν ἀποδοθέντα λόγον, σκοπεῖν εἰ ὁ τούτου λόγος ἐφαρμόττει καὶ ἐπὶ τὰ λοιπὰ· δηλὸν γὰρ ὅτι συνώνυμον ἂν εἴη τοῖς λοιποῖς. εἰ δὲ μή, πλείους ἔσονται ὀρισμοὶ τῶν λοιπῶν· δύο γὰρ [οἱ] κατὰ τοῦνομα λόγοι ἐφαρμόττουσιν ἐπ’ αὐτά, ὁ τε πρότερον ἀποδοθεὶς καὶ ὁ ὕστερον. πάλιν εἴ τις, ὀρισάμενός τι τῶν πολλαχῶς λεγομένων, καὶ τοῦ λόγου μὴ ἐφαρμόττοντος ἐπὶ πάντα, ὅτι μὲν ὁμώνυμον μὴ λέγοι, τὸ δ’ ὄνομα μὴ φαίη ἐπὶ πάντα ἐφαρμόττειν, ὅτι οὐδ’ ὁ λόγος, ῥητέον πρὸς τὸν τοιοῦτον ὅτι τῇ μὲν ὀνομασίᾳ δεῖ χρῆσθαι τῇ παραδεδομένη καὶ παρεπομένη καὶ μὴ κινεῖν τὰ τοιαῦτα, ἔνια δ’ οὐ λεκτέον ὁμοίως τοῖς πολλοῖς.

Ἐὰν δὲ τῶν συμπεπλεγμένων τινὸς ἀποδοθῇ ὅρος, σκοπεῖν, ἀφαιροῦντα τὸν θατέρου τῶν συμπεπλεγμένων λόγον, εἰ καὶ ὁ λοιπὸς τοῦ λοιποῦ· εἰ γὰρ μή, δηλὸν ὅτι οὐδ’ ὁ ὅλος τοῦ ὅλου. οἷον εἰ ὀρίσαιο γραμμὴν πεπερασμένην εὐθεῖαν “πέρας ἐπιπέδου ἔχοντος πέρατα, οὗ τὸ μέσον ἐπιπροσθεῖ τοῖς πέρασιν”, εἰ τῆς πεπερασμένης γραμμῆς ὁ λόγος ἐστὶ “πέρας ἐπιπέδου ἔχοντος πέρατα”, τοῦ εὐθέος δεῖ εἶναι τὸ λοιπόν, “οὗ τὸ μέσον ἐπιπροσθεῖ τοῖς πέρασιν”. ἀλλ’ ἢ ἄπειρος οὔτε μέσον οὔτε πέρατα ἔχει, εὐθεῖα δ’ ἐστίν, ὥστ’ οὐκ ἔστιν ὁ λοιπὸς τοῦ λοιποῦ λόγος.

Ἔτι εἰ συνθέτου ὄντος τοῦ ὀρίζομένου ἰσόκωλος ὁ λόγος ἀπεδόθη τῷ ὀρίζομένῳ. ἰσόκωλος δὲ λέγεται ὁ λόγος εἶναι, ὅταν ὅσαπερ ἂν ἦ τὰ συγκείμενα, τοσαῦτα καὶ ἐν τῷ λόγῳ ὀνόματα καὶ ῥήματα ἦ. ἀνάγκη γὰρ αὐτῶν τῶν ὀνομάτων ἐν τοῖς τοιούτοις μεταλλαγῇ γίνεσθαι, ἢ πάντων ἢ τινῶν, ἐπειδὴ [149a] οὐδὲν πλείων νῦν ἢ πρότερον ὀνόματα εἴρηται. δεῖ δὲ τὸν ὀρίζομενον λόγον ἀντὶ τῶν ὀνομάτων ἀποδοῦναι, μάλιστα μὲν πάντων, εἰ δὲ μή, τῶν πλείστων. οὕτω γὰρ καὶ ἐπὶ τῶν ἀπλῶν ὁ τοῦνομα μεταλαβὼν ὀρισμένος ἂν εἴη, οἷον ἀντὶ λωπίου ἱμάτιον.

Ἔτι δὲ μεῖζον ἁμαρτία, εἰ καὶ ἀγνωστοτέρων ὀνομάτων τὴν μετάληψιν ἐποιήσατο, οἷον ἀντὶ ἀνθρώπου λευκοῦ βροτὸν ἀργόν· οὔτε γὰρ ὥρισταί ἦττόν τε σαφὲς οὕτω ῥηθέν.

Σκοπεῖν δὲ καὶ ἐν τῇ μεταλλαγῇ τῶν ὀνομάτων εἰ οὐ ταυτὸν ἔτι σημαίνει, οἷον ὁ τὴν θεωρητικὴν ἐπιστήμην ὑπόληψιν θεωρητικὴν εἰπών. ἢ γὰρ ὑπόληψις τῇ ἐπιστήμῃ οὐ ταυτόν· ἔδει δὲ γε, εἴπερ μέλλει καὶ τὸ ὅλον ταυτὸν εἶναι. τὸ μὲν γὰρ θεωρητικὸν κοινὸν ἐν ἀμφοτέροις τοῖς λόγοις ἐστί, τὸ δὲ λοιπὸν διάφορον.

Ἔτι εἰ θατέρου τῶν ὀνομάτων τὴν μετάληψιν ποιούμενος μὴ τῆς διαφορᾶς ἀλλὰ τοῦ γένους τὴν μεταλλαγῇ ἐποιήσατο, καθάπερ ἐπὶ τοῦ ἀρτίως ῥηθέντος. ἀγνωστότερον γὰρ ἢ θεωρητικὴ τῆς ἐπιστήμης· τὸ μὲν γὰρ γένος, τὸ δὲ διαφορά, πάντων δὲ γνωριμώτατον τὸ γένος. ὥστ' οὐ τοῦ γένους ἀλλὰ τῆς διαφορᾶς ἔδει τὴν μετάληψιν ποιήσασθαι, ἐπειδὴ ἀγνωστότερόν ἐστιν. (ἢ τοῦτο μὲν γελοῖον τὸ ἐπιτίμημα· οὐδὲν γὰρ κωλύει τὴν μὲν διαφορὰν τῷ γνωριμωτάτῳ ὀνόματι εἰρησθαι, τὸ δὲ γένος μή. οὕτω δ' ἐχόντων δηλὸν ὅτι τοῦ γένους καὶ οὐ τῆς διαφορᾶς κατὰ τοῦνομα τὴν μετάληψιν ποιητέον.) εἰ δὲ μὴ ὄνομα ἀντ' ὀνόματος ἀλλὰ λόγον ἀντ' ὀνόματος μεταλαμβάνει, δηλὸν ὅτι τῆς διαφορᾶς μᾶλλον ἢ τοῦ γένους ὀρισμὸν ἀποδοτέον, ἐπειδὴ τοῦ γνωρίσαι χάριν ὁ ὀρισμὸς ἀποδίδεται· ἦττον γὰρ ἢ διαφορά τοῦ γένους γνώριμον.

Εἰ δὲ τῆς διαφορᾶς τὸν ὅρον ἀποδέδωκε, σκοπεῖν εἰ καὶ ἄλλου τινὸς κοινὸς ὁ ἀποδοθεὶς ὀρισμὸς. οἷον ὅταν τὸν περιττὸν ἀριθμὸν ἀριθμὸν μέσον ἔχοντα εἴπῃ, ἐπιδιοριστέον τὸ πῶς μέσον ἔχοντα. ὁ μὲν γὰρ ἀριθμὸς κοινὸς ἐν ἀμφοτέροις τοῖς λόγοις ὑπάρχει, τοῦ δὲ περιττοῦ μετείληπται ὁ λόγος· ἔχει δὲ καὶ γραμμὴ καὶ σῶμα μέσον, οὐ περιττὰ ὄντα. ὥστ' οὐκ ἂν εἴη ὀρισμὸς οὗτος τοῦ περιττοῦ. εἰ δὲ πολλαχῶς λέγεται τὸ μέσον ἔχον, διοριστέον τὸ πῶς μέσον ἔχον.

ὥστ' ἢ ἐπιτίμησις ἔσται, ἢ συλλογισμὸς ὅτι οὐχ ὥρισταί.

Πάλιν εἰ οὗ μὲν τὸν λόγον ἀποδίδωσι τῶν ὄντων ἐστὶ, τὸ δ' ὑπὸ τὸν λόγον μὴ τῶν ὄντων, οἷον εἰ τὸ λευκὸν ὥρισατο [149b] χρῶμα πυρὶ μεμειγμένον· ἀδύνατον γὰρ τὸ ἀσώματον σώματι μεμειῖχθαι, ὥστ' οὐκ ἂν εἴη χρῶμα πυρὶ μεμειγμένον· λευκὸν δ' ἔστιν.

Ἔτι ὅσοι μὴ διαιροῦσιν ἐν τοῖς πρὸς τι πρὸς ὃ λέγεται, ἀλλ' ἐν πλείοσι περιλαβόντες εἶπαν, ἢ ὅλως ἢ ἐπὶ τι ψεύδονται, οἷον εἴ τις ἱατρικὴν ἐπιστήμην ὄντος εἶπεν. εἰ μὲν γὰρ μηδενὸς τῶν ὄντων ἢ ἱατρικὴ ἐπιστήμη, δῆλον ὅτι ὅλως ἔψευσται, εἰ δὲ τινὸς μὲν τινὸς δὲ μὴ, ἐπὶ τι ἔψευσται· δεῖ γὰρ παντός, εἴπερ καθ' αὐτὸ καὶ μὴ κατὰ συμβεβηκὸς ὄντος εἶναι λέγεται, καθάπερ ἐπὶ τῶν ἄλλων ἔχει τῶν πρὸς τι· πᾶν γὰρ ἐπιστητὸν πρὸς ἐπιστήμην λέγεται. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων, ἐπειδὴ ἀντιστρέφει πάντα τὰ πρὸς τι. ἔτι εἴπερ ὁ μὴ καθ' αὐτὸ ἀλλὰ κατὰ συμβεβηκὸς τὴν ἀπόδοσιν ποιούμενος ὀρθῶς ἀποδίδωσιν, οὐ πρὸς ἓν ἀλλὰ πρὸς πλείω ἕκαστον ἂν τῶν πρὸς τι λέγοιτο. οὐδὲν γὰρ κωλύει τὸ αὐτὸ καὶ ὃν καὶ λευκὸν καὶ ἀγαθὸν εἶναι, ὥστε πρὸς ὅποιονοῦν τούτων ἀποδοὺς ὀρθῶς ἂν εἴη ἀποδοῦς, εἴπερ ὁ κατὰ συμβεβηκὸς ἀποδιδούς ὀρθῶς ἀποδίδωσιν. ἔτι δ' ἀδύνατον τὸν τοιοῦτον λόγον ἴδιον τοῦ ἀποδοθέντος εἶναι· οὐ γὰρ μόνον ἢ ἱατρικὴ ἀλλὰ καὶ τῶν ἄλλων ἐπιστημῶν αἱ πολλαὶ πρὸς ὃν λέγονται, ὥστ' ἐκάστη ὄντος ἐπιστήμη ἔσται. δῆλον οὖν ὅτι ὁ τοιοῦτος οὐδεμιᾶς ἔστιν ἐπιστήμης ὀρισμός· ἴδιον γὰρ καὶ οὐ κοινὸν δεῖ τὸν ὀρισμὸν εἶναι.

Ἐνίστε δ' ὀρίζονται οὐ τὸ πρᾶγμα ἀλλὰ τὸ πρᾶγμα εὖ ἔχον ἢ τετελεσμένον. τοιοῦτος δ' ὁ τοῦ ρήτορος καὶ ὁ τοῦ κλέπτου ὅρος, εἴπερ ἐστὶ ρήτωρ μὲν ὁ δυνάμενος τὸ ἐν ἐκάστῳ πιθανὸν θεωρεῖν καὶ μηδὲν παραλείπων, κλέπτῃ δ' ὁ λάθρα λαμβάνων· δῆλον γὰρ ὅτι τοιοῦτος ὢν ἐκάτερος ὁ μὲν ἀγαθὸς ρήτωρ ὁ δ' ἀγαθὸς κλέπτῃς ἔσται. οὐ γὰρ ὁ λάθρα λαμβάνων ἀλλ' ὁ βουλόμενος λάθρα λαμβάνειν κλέπτῃς ἔστιν.

Πάλιν εἰ τὸ δι' αὐτὸ αἰρετὸν ὡς ποιητικὸν ἢ πρακτικὸν ἢ ὁπωσοῦν δι' ἄλλο αἰρετὸν ἀποδέδωκεν, οἷον τὴν δικαιοσύνην νόμων σφωστικὴν εἰπὼν ἢ τὴν σοφίαν ποιητικὴν εὐδαιμονίας· τὸ γὰρ ποιητικὸν ἢ σφωστικὸν τῶν δι' ἄλλο αἰρετῶν. ἢ οὐδὲν μὲν κωλύει τὸ δι' αὐτὸ αἰρετὸν καὶ δι' ἄλλο εἶναι αἰρετόν, οὐ μὴν ἀλλ' οὐδὲν ἤττον ἡμάρτηκεν ὁ οὕτως ὀρισάμενος τὸ δι' αὐτὸ αἰρετόν· ἐκάστου γὰρ τὸ

βέλτιστον ἐν τῇ οὐσίᾳ μάλιστα, βέλτιον δὲ τὸ δι' αὐτὸ αἰρετὸν εἶναι τοῦ δι' ἕτερον, ὥστε τοῦτο καὶ τὸν ὀρισμὸν ἔδει μᾶλλον σημαίνειν.

[150a] Σκοπεῖν δὲ καὶ εἴ τιнос ὀρισμὸν ἀποδιδούς τάδε ἢ τὸ ἐκ τούτων ἢ τόδε μετὰ τοῦδε ὠρίσατο. εἰ μὲν γὰρ τάδε, συμβήσεται ἀμφοῖν καὶ μηδετέρῳ ὑπάρχειν, οἷον εἰ τὴν δικαιοσύνην σωφροσύνην καὶ ἀνδρείαν ὠρίσατο· δύο γὰρ ὄντων ἐὰν ἐκάτερος θάτερον ἔχη, ἀμφοτέροι δίκαιοι ἔσονται καὶ οὐδέτερος, ἐπεὶ ἀμφοτέροι μὲν ἔχουσι δικαιοσύνην, ἐκάτερος δ' οὐκ ἔχει. εἰ δὲ μήπω τὸ εἰρημένον σφόδρα ἄτοπον διὰ τὸ καὶ ἐπ' ἄλλων συμβαίνειν τὸ τοιοῦτον (οὐδὲν γὰρ κωλύει ἀμφοτέρους ἔχειν μὲν μὴδετέρου ἔχοντος), ἀλλ' οὗν τό γε τάναντία ὑπάρχειν αὐτοῖς παντελῶς ἄτοπον ἂν δόξειεν εἶναι. συμβήσεται δὲ τοῦτο, ἐὰν ὁ μὲν αὐτῶν σωφροσύνην καὶ δειλίαν ἔχη, ὁ δὲ ἀνδρείαν καὶ ἀκολασίαν· ἄμφω γὰρ δικαιοσύνην καὶ ἀδικίαν ἔξουσιν· εἰ γὰρ ἡ δικαιοσύνη σωφροσύνη καὶ ἀνδρεία ἐστίν, ἡ ἀδικία δειλία καὶ ἀκολασία ἔσται. ὅλως τε ὅσα ἔστιν ἐπιχειρεῖν ὅτι οὐ ταῦτόν ἐστι τὰ μέρη καὶ τὸ ὅλον, πάντα χρήσιμα πρὸς τὸ νῦν εἰρημένον· ἔοικε γὰρ ὁ οὕτως ὀριζόμενος τὰ μέρη τῷ ὅλῳ ταῦτα φάσκειν εἶναι. μάλιστα δ' οἰκεῖοι γίνονται οἱ λόγοι ἐφ' ὅσων κατάδηλός ἐστιν ἡ τῶν μερῶν σύνθεσις, καθάπερ ἐπ' οἰκίας καὶ τῶν ἄλλων τῶν τοιούτων· δηλον γὰρ ὅτι τῶν μερῶν ὄντων οὐδὲν κωλύει τὸ ὅλον μὴ εἶναι, ὥστ' οὐ ταῦτόν τὰ μέρη τῷ ὅλῳ.

Εἰ δὲ μὴ ταῦτα ἀλλὰ τὸ ἐκ τούτων ἔφησεν εἶναι τὸ ὀριζόμενον, πρῶτον μὲν ἐπισκοπεῖν εἰ μὴ πέφυκεν ἐν γίνεσθαι ἐκ τῶν εἰρημένων· ἔνια γὰρ οὕτως ἔχει πρὸς ἀλλήλα ὥστε μὴδὲν ἐν ἐξ αὐτῶν γίνεσθαι, οἷον γραμμὴ καὶ ἀριθμός. ἔτι εἰ τὸ μὲν ὠρισμένον ἐν ἐνί τινι πέφυκε τῷ πρώτῳ γίνεσθαι, ἐξ ὧν δ' ἔφησεν αὐτὸ εἶναι μὴ ἐν ἐνί τῷ πρώτῳ ἀλλ' ἐκάτερον ἐν ἐκατέρῳ. δηλον γὰρ ὅτι οὐκ ἂν εἴη ἐκ τούτων ἐκεῖνο· ἐν οἷς γὰρ τὰ μέρη, καὶ τὸ ὅλον ἀνάγκη ὑπάρχειν, ὥστ' οὐκ ἐν ἐνί τὸ ὅλον πρώτῳ ἀλλ' ἐν πλείοσιν. εἰ δὲ καὶ τὰ μέρη καὶ τὸ ὅλον ἐν ἐνί τινι πρώτῳ, σκοπεῖν εἰ μὴ ἐν τῷ αὐτῷ, ἀλλ' ἐν ἐτέρῳ τὸ ὅλον καὶ ἐν ἐτέρῳ τὰ μέρη. πάλιν εἰ τῷ ὅλῳ συμφθίρεται τὰ μέρη· ἀνάπαλιν γὰρ δεῖ συμβαίνειν, τῶν μερῶν φθαρέντων φθείρεσθαι τὸ ὅλον, τοῦ δ' ὅλου φθαρέντος οὐκ ἀναγκαῖον καὶ τὰ μέρη ἐφθάρθαι. ἢ εἰ τὸ μὲν ὅλον ἀγαθὸν ἢ καλόν, τὰ δὲ μὴδέτερα, ἢ ἀνάπαλιν τὰ μὲν ἀγαθὰ ἢ κακὰ, τὸ δ' ὅλον μὴδέτερον· οὔτε γὰρ ἐκ μὴδετέρων δυνατὸν ἢ ἀγαθὸν τι ἢ κακὸν [150b] γενέσθαι, οὔτ' ἐκ κακῶν ἢ

ἀγαθῶν μηδέτερον. ἢ εἰ μᾶλλον μὲν θάτερον ἀγαθὸν ἢ θάτερον κακόν, τὸ δ' ἐκ τούτων μὴ μᾶλλον ἀγαθὸν ἢ κακόν, οἷον εἰ ἡ ἀναίδεια ἐξ ἀνδρείας καὶ ψευδοῦς δόξης· μᾶλλον γὰρ ἀγαθὸν ἢ ἀνδρεία ἢ κακὸν ἢ ψευδῆς δόξα. ἔδει οὖν καὶ τὸ ἐκ τούτων ἀκολουθεῖν τῷ μᾶλλον, καὶ εἶναι ἢ ἀπλῶς ἀγαθόν, ἢ μᾶλλον ἀγαθὸν ἢ κακόν. ἢ τοῦτο μὲν οὐκ ἀναγκαῖον, ἐὰν μὴ ἐκάτερον ἢ καθ' αὐτὸ ἀγαθὸν ἢ κακόν· πολλὰ γὰρ τῶν ποιητικῶν καθ' αὐτὰ μὲν οὐκ ἔστιν ἀγαθὰ, μειχθέντα δέ, ἢ ἀνάπαλιν ἐκάτερον μὲν ἀγαθόν, μειχθέντα δὲ κακὸν ἢ οὐδέτερον. μάλιστα δὲ καταφανὲς τὸ νῦν ρηθὲν ἐπὶ τῶν ὑγιεινῶν καὶ νοσωδῶν· ἔνια γὰρ τῶν φαρμάκων οὕτως ἔχει ὥσθ' ἐκάτερον μὲν εἶναι ἀγαθόν, ἐὰν δ' ἄμφω δοθῇ μειχθέντα, κακόν.

Πάλιν εἰ ἐκ βελτίονος καὶ χείρονος ὄν μὴ ἔστι τὸ ὅλον τοῦ μὲν βελτίονος χεῖρον, τοῦ δὲ χείρονος βέλτιον. (ἢ οὐδὲ τοῦτ' ἀναγκαῖον, ἐὰν μὴ καθ' αὐτὰ ἢ τὰ ἐξ ὧν σύγκειται ἀγαθὰ, ἀλλ' οὐδὲν κωλύει τὸ ὅλον μὴ γίνεσθαι ἀγαθόν, καθάπερ ἐπὶ τῶν ἀρτίως ρηθέντων.)

Ἔτι εἰ συνώνυμον τὸ ὅλον θατέρῳ· οὐ δεῖ γάρ, καθάπερ οὐδ' ἐπὶ τῶν συλλαβῶν· οὐδενὶ γὰρ τῶν στοιχείων ἐξ ὧν σύγκειται ἡ συλλαβὴ συνώνυμός ἐστιν.

Ἔτι εἰ μὴ εἴρηκε τὸν τρόπον τῆς συνθέσεως· οὐ γὰρ αὐταρκες πρὸς τὸ γνωρίσαι τὸ εἰπεῖν ἐκ τούτων. οὐ γὰρ τὸ ἐκ τούτων ἀλλὰ τὸ οὕτως ἐκ τούτων ἐκάστου τῶν συνθέτων ἢ οὐσία, καθάπερ ἐπ' οἰκίας· οὐ γάρ, ἂν ὅπως οὖν συντεθῇ ταῦτα, οἰκία ἐστίν.

Εἰ δὲ τότε μετὰ τοῦδε ἀποδέδωκε, πρῶτον μὲν ρητέον ὅτι τότε μετὰ τοῦδε ἢ τοῖσδε ταὐτὸν ἢ τῷ ἐκ τῶνδε· ὁ γὰρ λέγων μέλι μεθ' ὕδατος ἦτοι μέλι καὶ ὕδωρ λέγει ἢ τὸ ἐκ μέλιτος καὶ ὕδατος. ὥστ' ἐὰν ὁποτερωοῦν τῶν εἰρημένων ταὐτὸν ὁμολογήσῃ εἶναι τὸ τότε μετὰ τοῦδε, ταῦτ' ἀρμόσει λέγειν ἅπερ πρὸς ἐκάτερον τούτων ἔμπροσθεν εἴρηται. ἔτι διελόμενον ὅσαχῶς λέγεται ἕτερον μεθ' ἐτέρου σκοπεῖν εἰ μηδαμῶς τότε μετὰ τοῦδε. οἷον εἰ λέγεται ἕτερον μεθ' ἐτέρου ἢ ὡς ἐν τινι ταὐτῷ δεκτικῷ, καθάπερ ἡ δικαιοσύνη καὶ ἡ ἀνδρεία ἐν ψυχῇ, ἢ ἐν τόπῳ τῷ αὐτῷ ἢ ἐν χρόνῳ τῷ αὐτῷ, μηδαμῶς δ' ἀληθὲς τὸ εἰρημένον ἐπὶ τούτων, δηλὸν ὅτι οὐδενὸς ἂν εἴη ὁ ἀποδοθεὶς ὀρισμός, ἐπειδὴ οὐδαμῶς τότε μετὰ [151a] τοῦδέ ἐστιν. εἰ δὲ τῶν διαιρεθέντων ἀληθὲς τὸ ἐν ταὐτῷ χρόνῳ ἐκάτερον ὑπάρχειν, σκοπεῖν εἰ ἐνδέχεται μὴ πρὸς ταὐτὸν λέγεσθαι ἐκάτερον. οἷον εἰ τὴν ἀνδρείαν ὥριστο τόλμαν μετὰ διανοίας ὀρθῆς· ἐνδέχεται γὰρ τόλμαν μὲν ἔχειν τοῦ ἀποστερεῖν, ὀρθὴν δὲ διάνοιαν περὶ τὰ ὑγιεινά,

ἀλλ' οὐπω ἀνδρείος ὁ ἐν τῷ αὐτῷ χρόνῳ τότε μετὰ τοῦδε ἔχων. ἔτι εἰ καὶ πρὸς ταὐτὸν ἄμφω λέγεται, οἷον πρὸς τὰ ἱατρικά· οὐδὲν γὰρ κωλύει καὶ τόλμαν καὶ ὀρθὴν διάνοιαν ἔχειν πρὸς τὰ ἱατρικά· ἀλλ' ὅμως οὐδ' οὕτως ἀνδρείος ὁ τότε μετὰ τοῦδε ἔχων. οὔτε γὰρ πρὸς ἕτερον αὐτῶν ἐκάτερον δεῖ λέγεσθαι οὔτε πρὸς ταὐτὸν τὸ τυχόν, ἀλλὰ πρὸς τὸ τῆς ἀνδρείας τέλος, οἷον πρὸς τοὺς πολεμικοὺς κινδύνους ἢ εἴ τι μᾶλλον τούτου τέλος.

Ἔνια δὲ τῶν οὕτως ἀποδιδομένων οὐδαμῶς ὑπὸ τὴν εἰρημένην πίπτει διαίρεσιν, οἷον εἰ ἡ ὀργὴ λύπη μεθ' ὑπολήψεως τοῦ ὀλιγωρεῖσθαι. ὅτι γὰρ διὰ τὴν ὑπόληψιν τὴν τοιαύτην ἡ λύπη γίνεται, τοῦτο βούλεται δηλοῦν· τὸ δὲ διὰ τότε γίνεσθαι τι οὐκ ἔστι ταὐτὸ τῷ μετὰ τούτου τὸδ' εἶναι κατ' οὐδένα τῶν εἰρημένων τρόπων.

Πάλιν εἰ τὴν τούτων σύνθεσιν εἴρηκε τὸ ὅλον, οἷον τῆς ψυχῆς καὶ τοῦ σώματος σύνθεσιν ζῶον, πρῶτον μὲν σκοπεῖν εἰ μὴ εἴρηκε ποία σύνθεσις, καθάπερ εἰ σάρκα ὀριζόμενος ἢ ὅστουν τὴν πυρὸς καὶ γῆς καὶ ἀέρος εἶπε σύνθεσιν. οὐ γὰρ ἀπόχρη τὸ σύνθεσιν εἰπεῖν, ἀλλὰ καὶ ποία τις προσδιοριστέον· οὐ γὰρ ὅπως οὖν συντεθέντων τούτων σὰρξ γίνεται, ἀλλ' οὕτως μὲν συντεθέντων σὰρξ, οὕτως δ' ὅστουν. ἔοικε δ' οὐδ' εἶναι τὸ παράπαν συνθέσει ταὐτὸν οὐδέτερον τῶν εἰρημένων· συνθέσει μὲν γὰρ πάσῃ διάλυσιν ἐναντίον, τῶν δ' εἰρημένων οὐδετέρῳ οὐδέν. ἔτι εἰ ὁμοίως πιθανὸν πᾶν τὸ σύνθετον σύνθεσιν εἶναι ἢ μηδέν, τῶν δὲ ζώων ἕκαστον σύνθετον ὃν μὴ ἔστι σύνθεσις, οὐδὲ τῶν ἄλλων οὐδὲν τῶν συνθέτων σύνθεσις ἂν εἴη.

Πάλιν εἰ ὁμοίως ἐν τινι πέφυκεν ὑπάρχειν τὰναντία, ὥρισται δὲ διὰ θατέρου, δηλὸν ὅτι οὐχ ὥρισται. εἰ δὲ μή, πλείους τοῦ αὐτοῦ συμβήσεται ὀρισμοὺς εἶναι· τί γὰρ μᾶλλον ὁ διὰ τούτου ἢ ὁ διὰ τοῦ ἑτέρου ὀριστάμενος εἴρηκεν, ἐπεὶ ὁμοίως ἀμφοτέρω πέφυκε γίνεσθαι ἐν αὐτῷ; τοιοῦτος δ' ὁ [151b] τῆς ψυχῆς ὅρος, εἰ ἔστιν “οὐσία ἐπιστήμης δεκτική”· ὁμοίως γὰρ καὶ ἀγνοίας ἐστὶ δεκτική.

Δεῖ δὲ καὶ ἐὰν μὴ πρὸς ὅλον ἔχη τις ἐπιχειρεῖν τὸν ὀρισμὸν διὰ τὸ μὴ γνώριμον εἶναι τὸ ὅλον, πρὸς τῶν μερῶν τι ἐπιχειρεῖν, ἐὰν ἢ γνώριμον καὶ μὴ καλῶς ἀποδεδομένον φαίνεται· τοῦ γὰρ μέρους ἀναιρεθέντος καὶ ὁ πᾶς ὀρισμὸς ἀναιρεῖται. ὅσοι τ' ἀσαφεῖς τῶν ὀρισμῶν, συνδιорθώσαντα καὶ συσχηματίσαντα πρὸς τὸ δηλοῦν τι καὶ ἔχειν ἐπιχειρήματα οὕτως ἐπισκοπεῖν· ἀναγκαῖον γὰρ τῷ ἀποκρινομένῳ ἢ δέχεσθαι τὸ ἐκλαμβανόμενον ὑπὸ τοῦ ἐρωτῶντος ἢ αὐτὸν διασαφεῖσαι τί ποτε τυγχάνει τὸ δηλούμενον ὑπὸ τοῦ λόγου.

ἔτι καθάπερ ἐν ταῖς ἐκκλησίαις νόμον εἰώθασιν ἐπιδείκναι, καὶ ἢ βελτίων ὁ ἐπιδεικνόμενος, ἀναιροῦσι τὸν ἔμπροσθεν, οὕτω καὶ ἐπὶ τῶν ὁρισμῶν ποιητέον καὶ αὐτὸν ὁρισμὸν ἕτερον οἰστέον· ἐὰν γὰρ φαίνεται βελτίων καὶ μᾶλλον δηλῶν τὸ ὀριζόμενον, δῆλον ὅτι ἀναιρετέος ἔσται ὁ κείμενος, ἐπειδὴ οὐκ εἰσὶ πλείους τοῦ αὐτοῦ ὁρισμοί.

Πρὸς ἅπαντας δὲ τοὺς ὁρισμοὺς οὐκ ἐλάχιστον στοιχεῖον τὸ πρὸς αὐτὸν εὐστόχως ὀρίσασθαι τὸ προκείμενον ἢ καλῶς εἰρημένον ὅρον ἀναλαβεῖν· ἀνάγκη γὰρ ὥσπερ πρὸς παράδειγμα θεώμενον τό τ' ἐλλείπον ὧν προσῆκεν ἔχειν τὸν ὁρισμὸν καὶ τὸ προσκείμενον περιέργως καθορᾶν ὥστε μᾶλλον ἐπιχειρημάτων εὐπορεῖν.

Τὰ μὲν οὖν περὶ τοὺς ὁρισμοὺς ἐπὶ τοσοῦτον εἰρήσθω.

Πότερον δὲ ταῦτόν ἢ ἕτερον κατὰ τὸν κυριώτατον τῶν ῥηθέντων περὶ ταυτοῦ τρόπων (ἐλέγετο δὲ κυριώτατα ταῦτόν τὸ τῷ ἀριθμῷ ἓν) σκοπεῖν ἕκ τε τῶν πτώσεων καὶ τῶν συστοίχων καὶ τῶν ἀντικειμένων. εἰ γὰρ ἡ δικαιοσύνη ταῦτόν τῇ ἀνδρείᾳ, καὶ ὁ δίκαιος τῷ ἀνδρείῳ καὶ τὸ δικαίως τῷ ἀνδρείως. ὁμοίως δὲ καὶ ἐπὶ τῶν ἀντικειμένων· εἰ γὰρ τάδε ταῦτά, καὶ τὰ ἀντικείμενα τούτοις ταῦτα καθ' ὅποιαν οὖν τῶν λεγομένων ἀντιθέσεων· οὐδὲν γὰρ διαφέρει τὸ τούτῳ ἢ τούτῳ ἀντικείμενον λαβεῖν, ἐπειδὴ ταῦτόν ἐστιν. πάλιν ἐκ τῶν ποιητικῶν [152a] καὶ φθαρτικῶν καὶ γενέσεων καὶ φθορῶν καὶ ὅλως τῶν ὁμοίως ἐχόντων πρὸς ἐκάτερον· ὅσα γὰρ ἀπλῶς ταῦτά, καὶ αἱ γενέσεις αὐτῶν καὶ αἱ φθοραὶ αἱ αὐταὶ καὶ τὰ ποιητικά καὶ τὰ φθαρτικά.

Σκοπεῖν δὲ καὶ ὧν θάτερον μάλιστα λέγεται ὅτι οὖν, εἰ καὶ θάτερον τῶν αὐτῶν τούτων κατὰ τὸ αὐτὸ μάλιστα λέγεται, καθάπερ Ξενοκράτης τὸν εὐδαίμονα βίον καὶ τὸν σπουδαῖον ἀποδείκνυσι τὸν αὐτόν, ἐπειδὴ πάντων τῶν βίων αἰρετώτατος ὁ σπουδαῖος καὶ ὁ εὐδαίμων· ἓν γὰρ τὸ αἰρετώτατον καὶ μέγιστον. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων τῶν τοιούτων. δεῖ δ' ἐκάτερον ἓν ἀριθμῷ εἶναι τὸ λεγόμενον μέγιστον ἢ αἰρετώτατον· εἰ δὲ μή, οὐκ ἔσται δεδειγμένον ὅτι ταῦτόν. οὐ γὰρ ἀναγκαῖον, εἰ ἀνδρειότατοι τῶν Ἑλλήνων Πελοποννήσιοι καὶ Λακεδαιμόνιοι, τοὺς αὐτοὺς εἶναι Πελοποννησίους Λακεδαιμονίους, ἐπειδὴ οὐχ εἷς ἀριθμῷ Πελοποννήσιος καὶ Λακεδαιμόνιος, ἀλλὰ περιέχεσθαι μὲν τὸν ἕτερον ὑπὸ τοῦ ἑτέρου ἀναγκαῖον, καθάπερ οἱ Λακεδαιμόνιοι ὑπὸ τῶν Πελοποννησίων, εἰ δὲ μή, συμβήσεται ἀλλήλων εἶναι βελτίους, ἂν μὴ περιέχονται οἱ ἕτεροι ὑπὸ τῶν ἑτέρων. ἀναγκαῖον γὰρ τοὺς Πελοποννησίους βελτίους εἶναι τῶν Λακεδαιμονίων, εἴπερ μὴ περιέχονται οἱ ἕτεροι ὑπὸ τῶν ἑτέρων· πάντων γὰρ τῶν λοιπῶν εἰσι βελτίους. ὁμοίως δὲ καὶ τοὺς Λακεδαιμονίους ἀνάγκη βελτίους εἶναι τῶν Πελοποννησίων· καὶ γὰρ οὗτοι πάντων τῶν λοιπῶν εἰσι βελτίους. ὥστε ἀλλήλων βελτίους γίνονται. δηλὸν οὖν ὅτι ἓν ἀριθμῷ δεῖ εἶναι τὸ βέλτιστον καὶ μέγιστον λεγόμενον, εἰ μέλλει ὅτι ταῦτόν ἀποδείκνυσθαι. διὸ καὶ Ξενοκράτης οὐκ ἀποδείκνυσιν· οὐ γὰρ εἷς ἀριθμῷ ὁ εὐδαίμων καὶ ὁ σπουδαῖος βίος, ὥστ' οὐκ ἀναγκαῖον τὸν

αὐτὸν εἶναι, διότι ἄμφω αἰρετώτατοι, ἀλλὰ τὸν ἕτερον ὑπὸ τὸν ἕτερον.

Πάλιν σκοπεῖν εἰ ὃ θάτερον ταυτόν, καὶ θάτερον· εἰ γὰρ μὴ ἀμφοτέρω τῷ αὐτῷ ταυτά, δηλὸν ὅτι οὐδ' ἀλλήλοις.

Ἔτι ἐκ τῶν τούτοις συμβεβηκότων καὶ οἷς ταῦτα συμβέβηκεν ἐπισκοπεῖν· ὅσα γὰρ θατέρῳ συμβέβηκε, καὶ θατέρῳ δεῖ συμβεβηκέναι, καὶ οἷς θάτερον αὐτῶν συμβέβηκε, καὶ θάτερον δεῖ συμβεβηκέναι. εἰ δέ τι τούτων διαφωνεῖ, δηλὸν ὅτι οὐ ταυτά.

Ὅρᾶν δὲ καὶ εἰ μὴ ἐν ἐνὶ γένει κατηγορίας ἀμφοτέρω, ἀλλὰ τὸ μὲν ποιὸν τὸ δὲ ποσὸν ἢ πρὸς τι δηλοῖ. πάλιν εἰ [152b] τὸ γένος ἑκατέρου μὴ ταυτόν, ἀλλὰ τὸ μὲν ἀγαθὸν τὸ δὲ κακόν, ἢ τὸ μὲν ἀρετὴ τὸ δ' ἐπιστήμη. ἢ εἰ τὸ μὲν γένος ταυτόν, αἱ δὲ διαφοραὶ μὴ αἱ αὐταὶ ἑκατέρου κατηγοροῦνται, ἀλλὰ τοῦ μὲν ὅτι θεωρητικὴ ἐπιστήμη, τοῦ δ' ὅτι πρακτικὴ. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων.

Ἔτι ἐκ τοῦ μᾶλλον, εἰ τὸ μὲν δέχεται τὸ μᾶλλον τὸ δὲ μή, ἢ εἰ ἄμφω μὲν δέχεται μὴ ἅμα δέ· καθάπερ ὁ μᾶλλον ἐρῶν οὐ μᾶλλον ἐπιθυμεῖ τῆς συνουσίας, ὥστ' οὐ ταυτὸν ἔρως καὶ ἐπιθυμία συνουσίας.

Ἔτι ἐκ τῆς προσθέσεως, εἰ τῷ αὐτῷ ἑκάτερον προστιθέμενον μὴ ποιεῖ τὸ ὅλον ταυτόν. ἢ εἰ τοῦ αὐτοῦ ἀφ' ἑκατέρου ἀφαιρεθέντος τὸ λοιπὸν ἕτερον, οἷον εἰ διπλάσιον ἡμίσεος καὶ πολλαπλάσιον ἡμίσεος ταυτὸν ἔφησεν εἶναι. ἀφαιρεθέντος γὰρ ἀφ' ἑκατέρου τοῦ ἡμίσεος τὰ λοιπὰ ταυτὸν ἔδει δηλοῦν· οὐ δηλοῖ δέ· τὸ γὰρ διπλάσιον καὶ πολλαπλάσιον οὐ ταυτὸν δηλοῖ.

Σκοπεῖν δὲ μὴ μόνον εἰ ἤδη τι συμβαίνει ἀδύνατον διὰ τῆς θέσεως, ἀλλὰ καὶ εἰ δυνατόν ἐξ ὑποθέσεως ὑπάρξει, καθάπερ τοῖς τὸ κενὸν καὶ τὸ πληρὲς ἀέρος ταυτὸν φάσκουσιν· δηλὸν γὰρ ὅτι ἐὰν ἐξέλθῃ ὁ ἀήρ, κενὸν μὲν οὐχ ἦττον ἀλλὰ μᾶλλον ἔσται, πληρὲς δ' ἀέρος οὐκέτι ἔσται. ὥστε ὑποτεθέντος τινὸς εἴτε ψευδοῦς εἴτ' ἀληθοῦς (οὐδὲν γὰρ διαφέρει) τὸ μὲν ἕτερον ἀναιρεῖται αὐτῶν, τὸ δ' ἕτερον οὐ. ὥστ' οὐ ταυτόν.

Καθόλου δ' εἰπεῖν ἐκ τῶν ὁπωσοῦν ἑκατέρου κατηγορουμένων καὶ ὧν ταῦτα κατηγορεῖται σκοπεῖν εἴ που διαφωνεῖ· ὅσα γὰρ θατέρου κατηγορεῖται, καὶ θατέρου κατηγορεῖσθαι δεῖ, καὶ ὧν θάτερον κατηγορεῖται, καὶ θάτερον κατηγορεῖσθαι δεῖ.

Ἔτι ἐπεὶ πολλαχῶς τὸ ταυτὸν λέγεται, σκοπεῖν εἰ καθ' ἕτερόν τινα τρόπον ταυτά ἐστίν· τὰ γὰρ εἶδει ἢ γένει ταυτὰ ἢ οὐκ ἀνάγκη ἢ

οὐκ ἐνδέχεται ἀριθμῶ ταῦτα εἶναι· ἐπισκοποῦμεν δὲ πότερον οὕτω ταῦτα ἢ οὐχ οὕτως.

Ἔτι εἰ δυνατόν θάτερον ἄνευ θατέρου εἶναι· οὐ γὰρ ἂν εἴη ταυτόν.

Οἱ μὲν οὖν πρὸς τὸ ταυτόν τόποι τοσοῦτοι λέγονται. δῆλον δ' ἐκ τῶν εἰρημένων ὅτι ἅπαντες οἱ πρὸς τὸ ταυτόν ἀνασκευαστικοὶ τόποι καὶ πρὸς ὅρον χρήσιμοι, καθάπερ ἔμπροσθεν εἴρηται· εἰ γὰρ μὴ ταυτόν δηλοῖ τό τ' ὄνομα καὶ ὁ λόγος, [153a] δῆλον ὅτι οὐκ ἂν εἴη ὁρισμός ὁ ἀποδοθεὶς λόγος. τῶν δὲ κατασκευαστικῶν τόπων οὐδεὶς χρήσιμος πρὸς ὅρον· οὐ γὰρ ἀπόχρη δεῖξαι ταυτόν τὸ ὑπὸ τὸν λόγον καὶ τοῦνομα πρὸς τὸ κατασκευάσαι ὅτι ὁρισμός, ἀλλὰ καὶ τὰ ἄλλα πάντα δεῖ ἔχειν τὰ παρηγγελμένα τὸν ὁρισμόν.

Ἀναιρεῖν μὲν οὖν ὅρον οὕτως καὶ διὰ τούτων ἀεὶ πειρατέον. ἐὰν δὲ κατασκευάζειν βουλώμεθα, πρῶτον μὲν εἰδέναι δεῖ ὅτι οὐδεὶς ἢ ὀλίγοι τῶν διαλεγομένων ὅρον συλλογίζονται, ἀλλὰ πάντες ἀρχὴν τὸ τοιοῦτον λαμβάνουσιν, οἷον οἱ τε περὶ γεωμετρίαν καὶ ἀριθμοὺς καὶ τὰς ἄλλας τὰς τοιαύτας μαθήσεις. εἴθ' ὅτι δι' ἀκριβείας μὲν ἄλλης ἐστὶ πραγματείας ἀποδοῦναι καὶ τί ἐστὶν ὅρος καὶ πῶς ὀρίζεσθαι δεῖ, νῦν δ' ὅσον ἱκανὸν πρὸς τὴν παροῦσαν χρεῖαν, ὥστε τοσοῦτον μόνον λεκτέον ὅτι δυνατόν γενέσθαι ὁρισμοῦ καὶ τοῦ τί ἦν εἶναι συλλογισμόν. εἰ γὰρ ἐστὶν ὅρος λόγος ὁ τὸ τί ἦν εἶναι τῷ πράγματι δηλῶν, καὶ δεῖ τὰ ἐν τῷ ὅρῳ κατηγορούμενα ἐν τῷ τί ἐστὶ τοῦ πράγματος μόνον κατηγορεῖσθαι, κατηγορεῖται δ' ἐν τῷ τί ἐστὶ τὰ γένη καὶ αἱ διαφοραί, φανερόν ὥς εἴ τις λάβοι ταῦτα ἅ μόνον ἐν τῷ τί ἐστὶ τοῦ πράγματος κατηγορεῖται, ὅτι ὁ ταῦτα ἔχων λόγος ὅρος ἐξ ἀνάγκης ἂν εἴη· οὐ γὰρ ἐνδέχεται ἕτερον εἶναι ὅρον, ἐπειδὴ οὐδὲν ἕτερον ἐν τῷ τί ἐστὶ τοῦ πράγματος κατηγορεῖται.

Ὅτι μὲν οὖν ἐγχωρεῖ συλλογισμόν ὅρου γενέσθαι, φανερόν. ἐκ τίνων δὲ δεῖ κατασκευάζειν, διώρισται μὲν ἐν ἐτέροις ἀκριβέστερον, πρὸς δὲ τὴν προκειμένην μέθοδον οἱ αὐτοὶ τόποι χρήσιμοι. σκεπτέον γὰρ ἐπὶ τῶν ἐναντίων καὶ τῶν ἄλλων τῶν ἀντικειμένων, καὶ ὅλους τοὺς λόγους καὶ κατὰ μέρος ἐπισκοποῦντα· εἰ γὰρ ὁ ἀντικείμενος τοῦ ἀντικειμένου, καὶ τὸν εἰρημένον τοῦ προκειμένου ἀνάγκη εἶναι. ἐπεὶ δὲ τῶν ἐναντίων πλείους συμπλοκαί, ληπτέον τῶν ἐναντίων ὁποίου ἂν μάλιστα φανερὸς ἦ ὁ ἐναντίος ὁρισμός. ὅλους μὲν οὖν τοὺς λόγους καθάπερ εἴρηται σκεπτέον, κατὰ μέρος δ' ὧδε. πρῶτον μὲν οὖν ὅτι τὸ ἀποδοθὲν γένος ὀρθῶς ἀποδέδοται. εἰ γὰρ τὸ ἐναντίον ἐν

τῷ ἐναντίῳ, τὸ δὲ προκειμένον μὴ ἔστιν ἐν τῷ αὐτῷ, δῆλον ὅτι ἐν τῷ ἐναντίῳ ἂν εἴη, ἐπειδὴ ἀνάγκη τὰ ἐναντία ἐν τῷ αὐτῷ ἢ ἐν τοῖς ἐναντίοις γένεσιν εἶναι. καὶ τὰς διαφορὰς δὲ τὰς ἐναντίας τῶν ἐναντίων ἀξιοῦμεν κατηγορεῖσθαι, καθάπερ λευκοῦ καὶ μέλανος· τὸ μὲν γὰρ διακριτικὸν τὸ [153b] δὲ συγκριτικὸν ὄψεως. ὥστ' εἰ τοῦ ἐναντίου αἱ ἐναντίαι κατηγοροῦνται, τοῦ προκειμένου αἱ ἀποδοθεῖσαι κατηγοροῦντ' ἂν, ὥστ' ἐπεὶ καὶ τὸ γένος καὶ αἱ διαφοραὶ ὀρθῶς ἀποδέδονται, δῆλον ὅτι ὁρισμὸς ἂν εἴη ὁ ἀποδοθείς. ἢ οὐκ ἀναγκαῖον τῶν ἐναντίων τὰς ἐναντίας διαφορὰς κατηγορεῖσθαι, ἂν μὴ ἐν τῷ αὐτῷ γένει ἢ τὰ ἐναντία, ὧν δὲ τὰ γένη ἐναντία, οὐδὲν κωλύει τὴν αὐτὴν διαφορὰν κατ' ἀμφοῖν λέγεσθαι, οἷον κατὰ δικαιοσύνης καὶ ἀδικίας· τὸ μὲν γὰρ ἀρετὴ τὸ δὲ κακία ψυχῆς, ὥστε τὸ ψυχῆς διαφορὰ ἐν ἀμφοῖν λέγεται, ἐπειδὴ καὶ σώματος ἔστιν ἀρετὴ καὶ κακία. ἀλλ' οὖν τοῦτό γ' ἀληθές, ὅτι τῶν ἐναντίων ἢ ἐναντίαι ἢ αἱ αὐταὶ διαφοραὶ εἰσιν. εἰ οὖν τοῦ ἐναντίου ἢ ἐναντία κατηγορεῖται, τούτου δὲ μὴ, δῆλον ὅτι ἡ εἰρημένη τούτου ἂν κατηγοροῖτο. καθόλου δ' εἰπεῖν, ἐπεὶ ὁ ὁρισμὸς ἔστιν ἐκ γένους καὶ διαφορῶν, ἂν ὁ τοῦ ἐναντίου ὁρισμὸς φανερός ᾤη, καὶ ὁ τοῦ προκειμένου ὁρισμὸς φανερός ἔσται. ἐπεὶ γὰρ τὸ ἐναντίον ἢ ἐν τῷ αὐτῷ γένει ἢ ἐν τῷ ἐναντίῳ, ὁμοίως δὲ καὶ αἱ διαφοραὶ ἢ αἱ ἐναντίαι τῶν ἐναντίων ἢ αἱ αὐταὶ κατηγοροῦνται, δῆλον ὅτι τοῦ προκειμένου ἦτοι τὸ αὐτὸ γένος ἂν κατηγοροῖτο ὅπερ καὶ τοῦ ἐναντίου, αἱ δὲ διαφοραὶ ἐναντίαι, ἢ ἅπασαι ἢ τινές, αἱ δὲ λοιπαὶ αἱ αὐταί· ἢ ἀνάπαλιν αἱ μὲν διαφοραὶ αἱ αὐταὶ τὰ δὲ γένη ἐναντία· ἢ ἅμφω ἐναντία, καὶ τὰ γένη καὶ αἱ διαφοραί. ἀμφοτέρω γὰρ ταυτὰ εἶναι οὐκ ἐνδέχεται· εἰ δὲ μὴ, ὁ αὐτὸς ὁρισμὸς τῶν ἐναντίων ἔσται.

Ἔτι ἐκ τῶν πτώσεων καὶ τῶν συστοίχων· ἀνάγκη γὰρ ἀκολουθεῖν τὰ γένη τοῖς γένεσι καὶ τοὺς ὅρους τοῖς ὅροις. οἷον εἰ ἡ λήθη ἔστιν ἀποβολὴ ἐπιστήμης, καὶ τὸ ἐπιλανθάνεσθαι ἀποβάλλειν ἐπιστήμην ἔσται καὶ τὸ ἐπιλελῆσθαι ἀποβεβληκέναι ἐπιστήμην. ἐνὸς οὖν ὁποιοῦν τῶν εἰρημένων ὁμολογηθέντος ἀνάγκη καὶ τὰ λοιπὰ ὁμολογεῖσθαι. ὁμοίως δὲ καὶ εἰ ἡ φθορὰ διάλυσις οὐσίας, καὶ τὸ φθεῖρεσθαι διαλύεσθαι οὐσίαν καὶ τὸ φθαρτικῶς διαλυτικῶς, εἴ τε τὸ φθαρτικὸν διαλυτικὸν οὐσίας, καὶ ἡ φθορὰ διάλυσις οὐσίας. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων. ὥστ' ἐνὸς ὁποιοῦν ληφθέντος καὶ τὰ λοιπὰ πάντα ὁμολογεῖται.

Καὶ ἐκ τῶν ὁμοίως δ' ἐχόντων πρὸς ἄλληλα. εἰ γὰρ τὸ ὑγιεινὸν

ποιητικὸν ὑγείας, καὶ τὸ εὐεκτικὸν ποιητικὸν εὐεξίας ἔσται καὶ τὸ ὠφέλιμον ποιητικὸν ἀγαθοῦ. ὁμοίως [154a] γὰρ ἕκαστον τῶν εἰρημένων πρὸς τὸ οἰκεῖον τέλος ἔχει, ὥστ' εἰ ἐνὸς αὐτῶν ὀρισμός ἐστὶ τὸ ποιητικὸν εἶναι τοῦ τέλους, καὶ τῶν λοιπῶν ἐκάστου οὕτως ἂν εἴη ὀρισμός.

Ἔτι ἐκ τοῦ μᾶλλον καὶ τοῦ ὁμοίως, ὅσαχῶς ἐνδέχεται κατασκευάσαι δύο πρὸς δύο συγκρίνοντα. οἷον εἰ μᾶλλον ὅδε τοῦδε ἢ ὅδε τοῦδε ὀρισμός, ὁ δὲ ἦττον ὀρισμός, καὶ ὁ μᾶλλον. καὶ εἰ ὁμοίως ὅδε τοῦδε καὶ ὅδε τοῦδε, εἰ ὁ ἕτερος τοῦ ἑτέρου, καὶ ὁ λοιπὸς τοῦ λοιποῦ. ἐνὸς δ' ὀρισμοῦ πρὸς δύο συγκρινομένου ἢ δύο ὀρισμῶν πρὸς ἓν, οὐδὲν χρήσιμος ἢ ἐκ τοῦ μᾶλλον ἐπίσκεψις· οὔτε γὰρ ἓνα δυοῖν οὔτε δύο τοῦ αὐτοῦ ὅρους δυνατόν ἐστιν εἶναι.

Εἰσὶ δὲ [καὶ] ἐπικαιρότατοι τῶν τόπων οἱ τε νῦν εἰρημένοι καὶ οἱ ἐκ τῶν συστοίχων καὶ τῶν πτώσεων. διὸ καὶ δεῖ μάλιστα κατέχειν καὶ προχείρους ἔχειν τούτους· χρησιμώτατοι γὰρ πρὸς πλεῖστα. καὶ τῶν ἄλλων δὲ τοὺς μάλιστα κοινούς· οὗτοι γὰρ ἐνεργότατοι τῶν λοιπῶν, οἷον τό τ' ἐπιβλέπειν ἐπὶ τὰ καθ' ἕκαστα καὶ τὸ ἐπὶ τῶν εἰδῶν σκοπεῖν εἰ ἐφαρμόττει ὁ λόγος, ἐπειδὴ συνώνυμον τὸ εἶδος ἐστίν. ἔστι δὲ χρήσιμον τὸ τοιοῦτον πρὸς τοὺς τιθεμένους ιδέας εἶναι, καθάπερ πρότερον εἴρηται. ἔτι εἰ μεταφέρων εἴρηκε τοῦνομα ἢ αὐτὸ αὐτοῦ κατηγορήκεν ὥς ἕτερον. καὶ εἴ τις ἄλλος κοινὸς καὶ ἐνεργὸς τῶν τόπων ἐστί, τούτῳ χρηστέον.

Ὅτι δὲ χαλεπώτερον κατασκευάζειν ἢ ἀνασκευάζειν ὅρον, ἐκ τῶν μετὰ ταῦτα ῥηθησομένων φανερόν. καὶ γὰρ ἰδεῖν αὐτὸν καὶ λαβεῖν παρὰ τῶν ἐρωτωμένων τὰς τοιαύτας προτάσεις οὐκ εὐπετές, οἷον ὅτι τῶν ἐν τῷ ἀποδοθέντι λόγῳ τὸ μὲν γένος τὸ δὲ διαφορά, καὶ ὅτι ἐν τῷ τί ἐστὶ τὸ γένος καὶ αἱ διαφοραὶ κατηγοροῦνται· ἄνευ δὲ τούτων ἀδύνατον ὀρισμοῦ γενέσθαι συλλογισμόν. εἰ γάρ τινα καὶ ἄλλα ἐν τῷ τί ἐστὶ τοῦ πράγματος κατηγορεῖται, ἄδηλον πότερον ὁ ῥηθεὶς ἢ ἕτερος αὐτοῦ ὀρισμός ἐστίν, ἐπειδὴ ὀρισμός ἐστὶ λόγος ὁ τὸ τί ἦν εἶναι σημαίνων. δῆλον δὲ καὶ ἐκ τῶνδε. ῥᾶον γὰρ ἐν συμπεράνασθαι ἢ πολλὰ. ἀναιροῦντι μὲν οὖν ἀπόχρη πρὸς ἓν διαλεγεῖναι· ἐν γὰρ ὁποιοῦν ἀνασκευάσαντες ἀνηρηκότες ἐσόμεθα τὸν ὅρον· κατασκευάζοντι δὲ πάντα ἀνάγκη συμβιβάζειν ὅτι ὑπάρχει τὰ ἐν τῷ ὅρῳ. ἔτι κατασκευάζοντι μὲν καθόλου οἰστέον συλλογισμόν· δεῖ γὰρ κατὰ [154b] παντὸς οὗ τοῦνομα «κατηγορεῖται» κατηγορεῖσθαι τὸν ὅρον, καὶ ἔτι πρὸς τούτοις

ἀντιστρέφειν, εἰ μέλλει ἴδιος εἶναι ὁ ἀποδοθεὶς ὅρος. ἀνασκευάζοντα δ' οὐκέτι ἀνάγκη δεῖξαι τὸ καθόλου· ἀπόχρη γὰρ τὸ δεῖξαι ὅτι οὐκ ἀληθεύεται περὶ τινος τῶν ὑπὸ τοῦνομα ὁ λόγος. εἴ τε καὶ καθόλου δέοι ἀνασκευάσαι, οὐδ' ὥς τὸ ἀντιστρέφειν ἀναγκαῖον ἐπὶ τοῦ ἀνασκευάζειν· ἀπόχρη γὰρ ἀνασκευάζοντι καθόλου τὸ δεῖξαι ὅτι κατ' οὐδενὸς ὧν τοῦνομα κατηγορεῖται καὶ ὁ λόγος κατηγορεῖται. τὸ δ' ἀνάπαλιν οὐκ ἀναγκαῖον προσδεῖξαι, ὅτι καθ' ὧν ὁ λόγος μὴ κατηγορεῖται τοῦνομα κατηγορεῖται. ἔτι εἰ καὶ παντὶ ὑπάρχει τῷ ὑπὸ τοῦνομα μὴ μόνῳ δέ, ἀνηρημένος γίνεται ὁ ὀρισμός.

Ὅμοιως δὲ καὶ περὶ τὸ ἴδιον καὶ τὸ γένος ἔχει· ἐν ἀμφοτέροις γὰρ ἀνασκευάζειν ἢ κατασκευάζειν ῥᾶον. περὶ μὲν οὖν τοῦ ἰδίου φανερόν ἐκ τῶν εἰρημένων· ὥς γὰρ ἐπὶ τὸ πολὺ ἐν συμπλοκῇ τὸ ἴδιον ἀποδίδοται, ὥστ' ἀνασκευάζειν μὲν ἔστιν ἐν ἀνελόντα, κατασκευάζοντι δὲ ἀνάγκη πάντα συλλογίζεσθαι, σχεδὸν δὲ καὶ τὰ λοιπὰ πάντα, ὅσα πρὸς τὸν ὀρισμόν, καὶ πρὸς τὸ ἴδιον ἀρμόσει λέγεσθαι (παντὶ τε γὰρ δεῖ τῷ ὑπὸ τοῦνομα τὸν κατασκευάζοντα δεικνύναι ὅτι ὑπάρχει, ἀνασκευάζοντι δ' ἀπόχρη ἐνὶ δεῖξαι μὴ ὑπάρχον· εἴ τε καὶ παντὶ ὑπάρχει μὴ μόνῳ δέ, καὶ οὕτως ἀνεσκευασμένον γίνεται, καθάπερ ἐπὶ τοῦ ὀρισμοῦ ἐλέγετο)· περὶ δὲ τοῦ γένους, ὅτι κατασκευάζειν μὲν ἀνάγκη μοναχῶς παντὶ δείξαντα ὑπάρχον, ἀνασκευάζεται δὲ διχῶς· καὶ γὰρ εἰ μηδενὶ καὶ εἰ τινὶ δέδεικται μὴ ὑπάρχον, ἀνήρηται τὸ ἐν ἀρχῇ. ἔτι κατασκευάζοντι μὲν οὐκ ἀπόχρη ὅτι ὑπάρχει δεῖξαι, ἀλλὰ καὶ ὅτι ὥς γένος ὑπάρχει δεικτέον· ἀνασκευάζοντι δ' ἱκανὸν τὸ δεῖξαι μὴ ὑπάρχον ἢ τινὶ ἢ παντί. ἔοικε δ', ὥσπερ καὶ ἐν τοῖς ἄλλοις τὸ διαφθεῖραι τοῦ ποιῆσαι ῥᾶον, οὕτω καὶ ἐπὶ τούτων τὸ ἀνασκευάσαι τοῦ κατασκευάσαι.

Ἐπὶ δὲ τοῦ συμβεβηκότος τὸ μὲν καθόλου ῥᾶον ἀνασκευάζειν ἢ κατασκευάζειν· κατασκευάζοντι μὲν γὰρ δεικτέον ὅτι παντί, ἀνασκευάζοντι δ' ἀπόχρη ἐνὶ δεῖξαι μὴ ὑπάρχον. τὸ δ' ἐπὶ μέρους ἀνάπαλιν ῥᾶον κατασκευάσαι ἢ ἀνασκευάσαι· κατασκευάζοντι μὲν γὰρ ἀπόχρη δεῖξαι [155a] τινὶ ὑπάρχον, ἀνασκευάζοντι δὲ δεικτέον ὅτι οὐδενὶ ὑπάρχει.

Φανερόν δὲ καὶ ὅτι πάντων ῥᾶστον ὅρον ἀνασκευάσαι· πλεῖστα γὰρ ἐν αὐτῷ τὰ δεδομένα πολλῶν εἰρημένων, ἐκ δὲ τῶν πλειόνων θᾶττον γίνεται συλλογισμός· εἰκὸς γὰρ ἐν τοῖς πολλοῖς μᾶλλον ἢ ἐν τοῖς ὀλίγοις ἀμάρτημα γίνεσθαι. ἔτι πρὸς μὲν ὅρον ἐνδέχεται καὶ διὰ τῶν ἄλλων ἐπιχειρεῖν· εἴτε γὰρ μὴ ἴδιος ὁ λόγος,

εἴτε μὴ γένος τὸ ἀποδοθὲν, εἴτε μὴ ὑπάρχει τι τῶν ἐν τῷ λόγῳ, ἀνηρημένος γίνεται ὁ ὀρισμός. πρὸς δὲ τὰ ἄλλα οὔτε τὰ ἐκ τῶν ὄρων οὔτε τὰλλα ἐνδέχεται πάντ' ἐπιχειρεῖν· μόνα γὰρ τὰ πρὸς τὸ συμβεβηκὸς κοινὰ πάντων τῶν εἰρημένων ἐστίν. ὑπάρχειν μὲν γὰρ δεῖ ἕκαστον τῶν εἰρημένων· εἰ δὲ μὴ ὡς ἴδιον ὑπάρχει τὸ γένος, οὐδέπω ἀνήρηται τὸ γένος· ὁμοίως δὲ καὶ τὸ ἴδιον οὐκ ἀναγκαῖον ὡς γένος, οὐδὲ τὸ συμβεβηκὸς ὡς γένος ἢ ἴδιον, ἀλλ' ὑπάρχειν μόνον. ὥστ' οὐ δυνατόν ἐκ τῶν ἐτέρων πρὸς τὰ ἕτερα ἐπιχειρεῖν ἀλλ' ἢ ἐπὶ τοῦ ὀρισμοῦ. δῆλον οὖν ὅτι ῥᾶστον πάντων ὅρον ἀναιρεῖν, κατασκευάζειν δὲ χαλεπώτατον· ἐκεῖνά τε γὰρ δεῖ πάντα συλλογίσασθαι (καὶ γὰρ ὅτι ὑπάρχει τὰ εἰρημένα καὶ ὅτι γένος τὸ ἀποδοθὲν καὶ ὅτι ἴδιος ὁ λόγος), καὶ ἔτι παρὰ ταῦτα ὅτι δηλοῖ τὸ τί ἦν εἶναι ὁ λόγος, καὶ τοῦτο καλῶς δεῖ πεποιηκέναι.

Τῶν δ' ἄλλων τὸ ἴδιον μάλιστα τοιοῦτον· ἀναιρεῖν μὲν γὰρ ῥᾶον διὰ τὸ ἐκ πολλῶν ὡς ἐπὶ τὸ πολὺ· κατασκευάζειν δὲ χαλεπώτατον, ὅτι τε πολλὰ δεῖ συμβιβᾶσαι, καὶ πρὸς τοῦτ' ὅτι μόνῳ ὑπάρχει καὶ ἀντικατηγορεῖται τοῦ πράγματος.

Ῥᾶστον δὲ πάντων κατασκευάσαι τὸ συμβεβηκὸς· ἐν μὲν γὰρ τοῖς ἄλλοις οὐ μόνον ὑπάρχον, ἀλλὰ καὶ ὅτι οὔτως ὑπάρχει, δεικτέον· ἐπὶ δὲ τοῦ συμβεβηκότητος ὅτι ὑπάρχει μόνον ἱκανὸν δεῖξαι. ἀνασκευάζειν δὲ χαλεπώτατον τὸ συμβεβηκὸς, ὅτι ἐλάχιστα ἐν αὐτῷ δέδοται· οὐ γὰρ προσσημαίνεται ἐν τῷ συμβεβηκότητι πῶς ὑπάρχει. ὥστ' ἐπὶ μὲν τῶν ἄλλων διχῶς ἔστιν ἀνελεῖν, ἢ δείξαντα ὅτι οὐχ ὑπάρχει ἢ ὅτι οὐχ οὔτως ὑπάρχει· ἐπὶ δὲ τοῦ συμβεβηκότητος οὐκ ἔστιν ἀνελεῖν ἀλλ' ἢ δείξαντα ὅτι οὐχ ὑπάρχει.

Οἱ μὲν οὖν τόποι δι' ὧν εὐπορήσομεν πρὸς ἕκαστα τῶν προβλημάτων ἐπιχειρεῖν σχεδὸν ἱκανῶς ἐξηρίθμηνται.

[155b] Μετὰ δὲ ταῦτα περὶ τάξεως καὶ πῶς δεῖ ἐρωτᾶν λεκτέον. δεῖ δὲ πρῶτον μὲν ἐρωτηματίζειν μέλλοντα τὸν τόπον εὑρεῖν ὅθεν ἐπιχειρητέον, δεύτερον δὲ ἐρωτηματίσαι καὶ τάξαι καθ' ἕκαστα πρὸς ἑαυτόν, τὸ δὲ λοιπὸν καὶ τρίτον εἰπεῖν ἤδη ταῦτα πρὸς ἕτερον. μέχρι μὲν οὖν τοῦ εὑρεῖν τὸν τόπον ὁμοίως τοῦ φιλοσόφου καὶ τοῦ διαλεκτικοῦ ἢ σκέψις, τὸ δ' ἤδη ταῦτα τάττειν καὶ ἐρωτηματίζειν ἴδιον τοῦ διαλεκτικοῦ· πρὸς ἕτερον γὰρ πᾶν τὸ τοιοῦτον. τῷ δὲ φιλοσόφῳ καὶ ζητοῦντι καθ' ἑαυτὸν οὐδὲν μέλει, ἐὰν ἀληθῆ μὲν ἦ καὶ γνῶριμα δι' ὧν ὁ συλλογισμός, μὴ θῆ δ' αὐτὰ ὁ ἀποκρινόμενος διὰ τὸ σύνεγγυς εἶναι τοῦ ἐξ ἀρχῆς καὶ προορᾶν τὸ συμβησόμενον, ἀλλ' ἴσως κἂν σπουδάσειεν ὅτι μάλιστα γνῶριμα καὶ σύνεγγυς εἶναι τὰ ἀξιώματα· ἐκ τούτων γὰρ οἱ ἐπιστημονικοὶ συλλογισμοί.

Τοὺς μὲν οὖν τόπους ὅθεν δεῖ λαμβάνειν, εἴρηται πρότερον. περὶ τάξεως δὲ καὶ τοῦ ἐρωτηματίσαι λεκτέον διελόμενον τὰς προτάσεις, ὅσαι ληπτεαὶ παρὰ τὰς ἀναγκαίας· ἀναγκαῖαι δὲ λέγονται δι' ὧν ὁ συλλογισμὸς γίνεται. αἱ δὲ παρὰ ταύτας λαμβανόμεναι τέτταρές εἰσιν· ἡ γὰρ ἐπαγωγῆς χάριν «καὶ» τοῦ δοθῆναι τὸ καθόλου, ἡ εἰς ὄγκον τοῦ λόγου, ἡ πρὸς κρύψιν τοῦ συμπεράσματος, ἡ πρὸς τὸ σαφέστερον εἶναι τὸν λόγον. παρὰ δὲ ταύτας οὐδεμίαν ληπτέον πρότασιν, ἀλλὰ διὰ τούτων αὔξειν καὶ ἐρωτηματίζειν πειρατέον. εἰσι δ' αἱ πρὸς κρύψιν ἀγῶνος χάριν· ἀλλ' ἐπειδὴ πᾶσα ἡ τοιαύτη πραγματεία πρὸς ἕτερόν ἐστιν, ἀνάγκη καὶ ταύταις χρῆσθαι.

Τὰς μὲν οὖν ἀναγκαίας, δι' ὧν ὁ συλλογισμὸς, οὐκ εὐθὺς αὐτὰς προτατέον, ἀλλ' ἀποστατέον ὅτι ἀνωτάτω, οἷον μὴ τῶν ἐναντίων ἀξιοῦντα τὴν αὐτὴν ἐπιστήμην, ἂν τοῦτο βούληται λαβεῖν, ἀλλὰ τῶν ἀντικειμένων· θεθέντος γὰρ τούτου καὶ ὅτι τῶν ἐναντίων ἡ αὐτὴ συλλογιεῖται, ἐπειδὴ ἀντικείμενα τὰ ἐναντία. ἂν δὲ μὴ τιθῇ, δι' ἐπαγωγῆς ληπτέον προτείνοντα ἐπὶ τῶν κατὰ μέρος ἐναντίων. ἡ γὰρ διὰ συλλογισμοῦ ἡ δι' ἐπαγωγῆς τὰς ἀναγκαίας ληπτέον, ἡ τὰς μὲν ἐπαγωγῇ τὰς δὲ συλλογισμῷ, ὅσαι δὲ λίαν προφανεῖς εἰσι, καὶ αὐτὰς προτείνοντα· ἀδηλότερόν τε γὰρ αἰεὶ ἐν τῇ ἀποστάσει [156a] καὶ τῇ ἐπαγωγῇ τὸ συμβησόμενον, καὶ ἅμα τὸ αὐτὰς τὰς χρησίμους προτεῖναι μὴ δυνάμενον ἐκείνως λαβεῖν ἔτοιμον. τὰς δὲ παρὰ ταύτας εἰρημένας ληπτέον μὲν τούτων χάριν, ἐκάστη δ' ὥδε χρηστέον,

ἐπάγοντα μὲν ἀπὸ τῶν καθ' ἕκαστον ἐπὶ τὸ καθόλου καὶ ἀπὸ τῶν γνωρίμων ἐπὶ τὰ ἄγνωστα· γνώριμα δὲ μᾶλλον τὰ κατὰ τὴν αἴσθησιν, ἢ ἀπλῶς ἢ τοῖς πολλοῖς. κρύπτοντα δὲ προσυλλογίζεσθαι δι' ὧν ὁ συλλογισμὸς τοῦ ἐξ ἀρχῆς μέλλει γίνεσθαι, καὶ ταῦτα ὡς πλείστα. εἴη δ' ἂν τοῦτο, εἴ τις μὴ μόνον τὰς ἀναγκαίας ἀλλὰ καὶ τῶν πρὸς ταύτας χρησίμων τινὰ συλλογίζοιτο. ἔτι τὰ συμπεράσματα μὴ λέγειν ἀλλ' ὕστερον ἀθρόα συλλογίζεσθαι· οὕτω γὰρ ἂν πορρωτάτω ἀποστήσειε τῆς ἐξ ἀρχῆς θέσεως. καθόλου δ' εἰπεῖν οὕτω δεῖ ἐρωτᾶν τὸν κρυπτικῶς πυνθανόμενον, ὥστ' ἠρωτημένου τοῦ παντὸς λόγου καὶ εἰπόντος τὸ συμπεράσμα ζητεῖσθαι τὸ διὰ τί. τοῦτο δ' ἔσται μάλιστα διὰ τοῦ λεχθέντος ἔμπροσθεν τρόπου· μόνου γὰρ τοῦ ἐσχάτου ῥηθέντος συμπεράσματος ἄδηλον πῶς συμβαίνει, διὰ τὸ μὴ προορᾶν τὸν ἀποκρινόμενον ἐκ τίνων συμβαίνει, μὴ διαρθρωθέντων τῶν προτέρων συλλογισμῶν. ἥκιστα δ' ἂν διαρθροῖτο ὁ συλλογισμὸς τοῦ συμπεράσματος μὴ τὰ τούτου λήμματα ἡμῶν τιθέντων, ἀλλ' ἐκεῖνα ὅφ' ὧν ὁ συλλογισμὸς γίνεται.

Χρήσιμον δὲ καὶ τὸ μὴ συνεχῇ τὰ ἀξιώματα λαμβάνειν ἐξ ὧν οἱ συλλογισμοί, ἀλλ' ἐναλλάξ τὸ πρὸς ἕτερον καὶ ἕτερον συμπεράσμα· τιθεμένων γὰρ τῶν οἰκείων παρ' ἄλληλα μᾶλλον τὸ συμβησόμενον ἐξ αὐτῶν προφανές.

Χρὴ δὲ καὶ ὀρισμῷ λαμβάνειν, ἐφ' ὧν ἐνδέχεται, τὴν καθόλου πρότασιν μὴ ἐπ' αὐτῶν ἀλλ' ἐπὶ τῶν συστοίχων. παραλογίζονται γὰρ ἑαυτούς, ὅταν ἐπὶ τοῦ συστοίχου ληφθῇ ὁ ὀρισμὸς, ὡς οὐ τὸ καθόλου συγχωροῦντες, οἷον εἰ δέοι λαβεῖν ὅτι ὁ ὀργιζόμενος ὀρέγεται τιμωρίας διὰ φαινομένην ὀλιγωρίαν, ληφθεῖη δ' ἡ ὀργὴ ὀρεξις εἶναι τιμωρίας διὰ φαινομένην ὀλιγωρίαν· δῆλον γὰρ ὅτι τούτου ληφθέντος ἔχοιμεν ἂν καθόλου ὁ προαιρούμεθα. τοῖς δ' ἐπ' αὐτῶν προτείνουσι πολλάκις ἀνανεῦειν συμβαίνει τὸν ἀποκρινόμενον διὰ τὸ μᾶλλον ἔχειν ἐπ' αὐτοῦ τὴν ἔνστασιν, οἷον ὅτι ὁ ὀργιζόμενος οὐκ ὀρέγεται τιμωρίας· τοῖς γὰρ γονεῦσιν ὀργιζόμεθα μὲν, οὐκ ὀρεγόμεθα δὲ τιμωρίας. ἴσως μὲν οὖν οὐκ ἀληθὴς ἡ ἔνστασις· παρ' ἐνίων γὰρ ἰκανὴ τιμωρία τὸ λυπῆσαι μόνον καὶ [156b] ποιῆσαι μεταμέλεσθαι· οὐ μὴν ἀλλ' ἔχει τι πιθανὸν πρὸς τὸ μὴ δοκεῖν ἀλόγως ἀρνεῖσθαι τὸ προτεινόμενον. ἐπὶ δὲ τοῦ τῆς ὀργῆς ὀρισμοῦ οὐχ ὁμοίως ῥάδιόν ἐστιν εὑρεῖν ἔνστασιν.

Ἔτι τὸ προτείνειν μὴ ὡς δι' αὐτὸ ἀλλ' ἄλλου χάριν προτείνοντα· εὐλαβοῦνται γὰρ τὰ πρὸς τὴν θέσιν χρήσιμα. ἀπλῶς δ'

εἰπεῖν ὅτι μάλιστα ποιεῖν ἄδηλον πότερον τὸ προτεινόμενον ἢ τὸ ἀντικείμενον βούλεται λαβεῖν· ἀδήλου γὰρ ὄντος τοῦ πρὸς τὸν λόγον χρησίμου μᾶλλον τὸ δοκοῦν αὐτοῖς τιθέασιν.

Ἔτι διὰ τῆς ὁμοιότητος πυνθάνεσθαι· καὶ γὰρ πιθανὸν καὶ λανθάνει μᾶλλον τὸ καθόλου. οἷον ὅτι ὥσπερ ἐπιστήμη καὶ ἄγνοια τῶν ἐναντίων ἢ αὐτῇ, οὕτω καὶ αἰσθησις τῶν ἐναντίων ἢ αὐτῇ· ἢ ἀνάπαλιν, ἐπειδὴ αἰσθησις ἢ αὐτῇ, καὶ ἐπιστήμη. τοῦτο δ' ἐστὶν ὅμοιον ἐπαγωγῇ, οὐ μὴν ταυτόν γε· ἐκεῖ μὲν γὰρ ἀπὸ τῶν καθ' ἕκαστα τὸ καθόλου λαμβάνεται, ἐπὶ δὲ τῶν ὁμοίων οὐκ ἔστι τὸ λαμβανόμενον τὸ καθόλου ὑφ' ὃ πάντα τὰ ὁμοιά ἐστιν.

Δεῖ δὲ καὶ αὐτόν ποτε ἑαυτῷ ἔνστασιν φέρειν· ἀνυπόπτως γὰρ ἔχουσιν οἱ ἀποκρινόμενοι πρὸς τοὺς δοκοῦντας δικαίως ἐπιχειρεῖν. χρήσιμον δὲ καὶ τὸ ἐπιλέγειν ὅτι σύνηθες καὶ λεγόμενον τὸ τοιοῦτον· ὁκνοῦσι γὰρ κινεῖν τὸ εἰωθὸς ἔνστασιν μὴ ἔχοντες, ἅμα δὲ καὶ διὰ τὸ χρῆσθαι καὶ αὐτοὶ τοῖς τοιούτοις φυλάττονται κινεῖν αὐτά. ἔτι τὸ μὴ σπουδάζειν, κἂν ὅλως χρήσιμον ᾖ· πρὸς γὰρ τοὺς σπουδάζοντας μᾶλλον ἀντιτείνουσιν. καὶ τὸ ὥς ἐν παραβολῇ προτείνειν· τὸ γὰρ δι' ἄλλο προτεινόμενον καὶ μὴ δι' αὐτὸ χρήσιμον τιθέασι μᾶλλον. ἔτι μὴ αὐτὸ προτείνειν ὃ δεῖ ληφθῆναι, ἀλλ' ὃ τοῦτο ἔπεται ἐξ ἀνάγκης· μᾶλλον τε γὰρ συγχωροῦσι διὰ τὸ μὴ ὁμοίως ἐκ τούτου φανερόν εἶναι τὸ συμβησόμενον, καὶ ληφθέντος τούτου εἴληπται καὶ κεῖνο. καὶ τὸ ἐπ' ἐσχάτῳ ἐρωτᾶν ὃ μάλιστα βούλεται λαβεῖν· μάλιστα γὰρ τὰ πρῶτα ἀνανεοῦσι διὰ τὸ τοὺς πλείστους τῶν ἐρωτῶντων πρῶτα λέγειν περὶ ἧς μάλιστα σπουδάζουσιν. πρὸς ἐνίους δὲ πρῶτα τὰ τοιαῦτα προτείνειν· οἱ γὰρ δύσκολοι τὰ πρῶτα μάλιστα συγχωροῦσιν, ἂν μὴ παντελῶς φανερόν ᾖ τὸ συμβησόμενον, ἐπὶ τελευτῆς δὲ δυσκολαίνουσιν. ὁμοίως δὲ καὶ ὅσοι οἶονται ὀριμεῖς εἶναι ἐν τῷ ἀποκρίνεσθαι· θέντες γὰρ τὰ πρῶτα ἐπὶ τέλους τερθρεύονται ὥς οὐ συμβαίνοντος ἐκ τῶν κειμένων· τιθέασι δὲ προχείρως, πιστεύοντες τῇ ἕξει καὶ ὑπολαμβάνοντες [157a] οὐδὲν πείσεσθαι. ἔτι τὸ μηκύνειν καὶ παρεμβάλλειν τὰ μηδὲν χρήσιμα πρὸς τὸν λόγον, καθάπερ οἱ ψευδογραφοῦντες· πολλῶν γὰρ ὄντων ἄδηλον ἐν ὁποίῳ τὸ ψεῦδος. διὸ καὶ λανθάνουσιν ἐνίοτε οἱ ἐρωτῶντες ἐν παραβύστῳ προστιθέντες ἧς καθ' αὐτὰ προτεινόμενα οὐκ ἂν τεθεῖη.

Εἰς μὲν οὖν κρύψιν τοῖς εἰρημένοις χρηστέον, εἰς δὲ κόσμον ἐπαγωγῇ καὶ διαίρέσει τῶν συγγενῶν. ἡ μὲν οὖν ἐπαγωγή ὁποῖόν τί ἐστι, δηλόν. τὸ δὲ διαιρεῖσθαι τοιοῦτον, οἷον ὅτι ἐπιστήμη ἐπιστήμης

βελτίων ἢ τῷ ἀκριβεστέρα εἶναι ἢ τῷ βελτιόνων, καὶ ὅτι τῶν ἐπιστημῶν αἱ μὲν θεωρητικαὶ αἱ δὲ πρακτικαὶ αἱ δὲ ποιητικαί. τῶν γὰρ τοιούτων ἕκαστον συνεπικοσμεῖ μὲν τὸν λόγον, οὐκ ἀναγκαῖα δὲ ῥηθῆναι πρὸς τὸ συμπέρασμα.

Εἰς δὲ σαφήνειαν παραδείγματα καὶ παραβολὰς οἰστέον, παραδείγματα δὲ οἰκεῖα καὶ ἐξ ὧν ἴσμεν, οἷα Ὅμηρος, μὴ οἷα Χοιρίλος· οὕτω γὰρ ἂν σαφέστερον εἴη τὸ προτεινόμενον.

Χρηστέον δ' ἐν τῷ διαλέγεσθαι τῷ μὲν συλλογισμῷ πρὸς τοὺς διαλεκτικούς μᾶλλον ἢ πρὸς τοὺς πολλούς, τῇ δ' ἐπαγωγῇ τοὺναντίον πρὸς τοὺς πολλούς μᾶλλον· εἴρηται δ' ὑπὲρ τούτου καὶ πρότερον. ἔστι δὲ ἐπ' ἐνίων μὲν ἐπάγοντα δυνατὸν ἐρωτῆσαι τὸ καθόλου, ἐπ' ἐνίων δ' οὐ ῥάδιον διὰ τὸ μὴ κεῖσθαι ταῖς ὁμοιότησιν ὄνομα πάσαις κοινόν, ἀλλ' ὅταν δέη τὸ καθόλου λαβεῖν, “οὕτως ἐπὶ πάντων τῶν τοιούτων” φασίν· τοῦτο δὲ διορίσαι τῶν χαλεπωτάτων ἐστίν, ὅποια τῶν προφερομένων τοιαῦτα καὶ ὅποια οὐ. καὶ παρὰ τοῦτο πολλάκις ἀλλήλους παρακροῦνται κατὰ τοὺς λόγους, οἱ μὲν φάσκοντες ὅμοια εἶναι τὰ μὴ ὄντα ὅμοια, οἱ δ' ἀμφισβητοῦντες τὰ ὅμοια μὴ εἶναι ὅμοια. διὸ πειρατέον ἐπὶ πάντων τῶν τοιούτων ὀνοματοποιεῖν αὐτόν, ὅπως μήτε τῷ ἀποκρινομένῳ ἐξῆ ἀμφισβητεῖν ὥς οὐχ ὁμοίως τὸ ἐπιφερόμενον λέγεται, μήτε τῷ ἐρωτῶντι συκοφαντεῖν ὥς ὁμοίως λεγομένου, ἐπειδὴ πολλὰ τῶν οὐχ ὁμοίως λεγομένων ὁμοίως φαίνεται λέγεσθαι.

Ὅταν δ' ἐπάγοντος ἐπὶ πολλῶν μὴ διδῷ τὸ καθόλου, τότε δίκαιον ἀπαιτεῖν ἔνστασιν. μὴ εἰπόντα δ' αὐτόν ἐπὶ τίνων οὕτως, οὐ δίκαιον ἀπαιτεῖν ἐπὶ τίνων οὐχ οὕτως· δεῖ γὰρ ἐπαγαγόντα πρότερον οὕτω τὴν ἔνστασιν ἀπαιτεῖν. ἀξιωτέον τε τὰς ἐνστάσεις μὴ ἐπ' αὐτοῦ τοῦ προτεινομένου φέρειν, ἐὰν μὴ ἐν μόνον ἢ τὸ τοιοῦτον, καθάπερ ἢ δυὰς τῶν ἀρτίων μόνος [157b] ἀριθμὸς πρῶτος· δεῖ γὰρ τὸν ἐνιστάμενον ἐφ' ἐτέρου τὴν ἔνστασιν φέρειν, ἢ λέγειν ὅτι τοῦτο μόνον τοιοῦτο. πρὸς δὲ τοὺς ἐνισταμένους τῷ καθόλου, μὴ ἐν αὐτῷ δὲ τὴν ἔνστασιν φέροντας ἀλλ' ἐν τῷ ὁμωνύμῳ, οἷον ὅτι ἔχοι ἂν τις τὸ μὴ αὐτοῦ χρῶμα ἢ πόδα ἢ χεῖρα (ἔχοι γὰρ ἂν ὁ ζωγράφος χρῶμα καὶ ὁ μάγειρος πόδα τὸν μὴ αὐτοῦ) - διελόμενον οὖν ἐπὶ τῶν τοιούτων ἐρωτητέον· λανθανούσης γὰρ τῆς ὁμωνυμίας εὖ δόξει ἐνστήναι τῇ προτάσει. ἐὰν δὲ μὴ ἐν τῷ ὁμωνύμῳ ἀλλ' ἐν αὐτῷ ἐνιστάμενος κωλύῃ τὴν ἐρώτησιν, ἀφαιροῦντα δεῖ ἐν ᾧ ἢ ἐνστασις προτείνειν τὸ λοιπὸν καθόλου ποιοῦντα, ἕως ἂν λάβῃ τὸ χρήσιμον.

οἷον ἐπὶ τῆς λήθης καὶ τοῦ ἐπιλελῆσθαι· οὐ γὰρ συγχωροῦσι τὸν ἀποβεβληκότα ἐπιστήμην ἐπιλελῆσθαι, διότι μεταπεσόντος τοῦ πράγματος ἀποβέβληκε μὲν τὴν ἐπιστήμην, ἐπιλέλησται δ' οὐ. ῥητέον οὖν, ἀφελόντα ἐν ᾧ ἡ ἔνστασις, τὸ λοιπὸν, οἷον εἰ διαμένοντος τοῦ πράγματος ἀποβέβληκε τὴν ἐπιστήμην, ὅτι ἐπιλέλησται. ὁμοίως δὲ καὶ πρὸς τοὺς ἐνισταμένους ὅτι τῷ μείζονι ἀγαθῷ <οὐ> μείζον ἀντίκειται κακόν· προφέρουσι γὰρ ὅτι τῇ ὑγιείᾳ ἐλάττονι ὄντι ἀγαθῷ τῆς εὐεξίας μείζον κακὸν ἀντίκειται· τὴν γὰρ νόσον μείζον κακὸν εἶναι τῆς καχεξίας. ἀφαιρετέον οὖν καὶ ἐπὶ τούτου ἐν ᾧ ἡ ἔνστασις· ἀφαιρεθέντος γὰρ μᾶλλον ἂν θείη, οἷον ὅτι τῷ μείζονι ἀγαθῷ μείζον κακὸν ἀντίκειται, ἐὰν μὴ συνεπιφέρῃ θάτερον θάτερον, καθάπερ ἡ εὐεξία τὴν ὑγιείαν. οὐ μόνον δ' ἐνισταμένου τοῦτο ποιητέον, ἀλλὰ καὶ ἄνευ ἐνστάσεως ἀρνήται διὰ τὸ προορᾶν τι τῶν τοιούτων. ἀφαιρεθέντος γὰρ ἐν ᾧ ἡ ἔνστασις, ἀναγκασθήσεται τιθέναι διὰ τὸ μὴ προορᾶν ἐν τῷ λοιπῷ ἐπὶ τίνος οὐχ οὕτως· ἐὰν δὲ μὴ τιθῇ, ἀπαιτούμενος ἔνστασιν οὐ μὴ ἔχῃ ἀποδοῦναι. εἰσὶ δὲ τοιαῦται τῶν προτάσεων αἱ ἐπὶ τὶ μὲν ψευδεῖς ἐπὶ τὶ δ' ἀληθεῖς· ἐπὶ τούτων γὰρ ἔστι <τι> ἀφελόντα τὸ λοιπὸν ἀληθές καταλιπεῖν. ἐὰν δ' ἐπὶ πολλῶν προτείνοντος μὴ φέρῃ ἔνστασιν, ἀξιωτέον τιθέναι· διαλεκτικὴ γάρ ἐστι πρότασις πρὸς ἣν οὕτως ἐπὶ πολλῶν ἔχουσιν μὴ ἔστιν ἔνστασις.

Ὅταν δ' ἐνδέχεται τὸ αὐτὸ ἄνευ τε τοῦ ἀδυνάτου καὶ διὰ τοῦ ἀδυνάτου συλλογίσασθαι, ἀποδεικνύντι μὲν καὶ μὴ διαλεγομένῳ οὐδὲν διαφέρει οὕτως ἢ ἐκείνως συλλογίσασθαι, διαλεγομένῳ δὲ πρὸς ἄλλον οὐ χρηστέον τῷ διὰ τοῦ ἀδυνάτου συλλογισμῷ. ἄνευ μὲν γὰρ τοῦ ἀδυνάτου συλλογισαμένῳ οὐκ ἔστιν ἀμφισβητεῖν· ὅταν δὲ τὸ ἀδύνατον συλλογίσηται, [158a] ἂν μὴ λίαν ἤ περιφανὲς ψεῦδος ὦν, οὐκ ἀδύνατόν φασιν εἶναι, ὥστ' οὐ γίνεται τοῖς ἐρωτῶσιν ὁ βούλονται.

Δεῖ δὲ προτείνειν ὅσα ἐπὶ πολλῶν μὲν οὕτως ἔχει, ἔνστασις δὲ ἢ ὅλως μὴ ἔστιν ἢ μὴ ἐπιπολῆς τὸ συνιδεῖν· μὴ δυνάμενοι γὰρ συνορᾶν ἐφ' ὧν οὐχ οὕτως, ὥς ἀληθές ὦν τιθέασιν.

Οὐ δεῖ δὲ τὸ συμπέρασμα ἐρώτημα ποιεῖν· εἰ δὲ μή, ἀνανεύσαντος οὐ δοκεῖ γεγενῆσθαι συλλογισμός. πολλάκις γὰρ καὶ μὴ ἐρωτῶντος ἄλλ' ὥς συμβαῖνον ἐπιφέροντος ἀρνοῦνται, καὶ τοῦτο ποιοῦντες οὐ δοκοῦσιν ἐλέγχεσθαι τοῖς μὴ συνορῶσιν ὅ τι συμβαίνει ἐκ τῶν τεθέντων. ὅταν οὖν μηδὲ φήσας συμβαίνειν ἐρωτήσῃ, ὁ δ'

ἀρνηθῇ, παντελῶς οὐ δοκεῖ γεγονέναι συλλογισμός.

Οὐ δοκεῖ δὲ πᾶν τὸ καθόλου διαλεκτικὴ πρότασις εἶναι, οἷον “τί ἐστὶν ἄνθρωπος;” ἢ “ποσαχῶς λέγεται τἀγαθόν;” ἔστι γὰρ πρότασις διαλεκτικὴ πρὸς ἣν ἔστιν ἀποκρίνασθαι “ναί” ἢ “οὐ”. πρὸς δὲ τὰς εἰρημένας οὐκ ἔστιν. διὸ οὐ διαλεκτικά ἐστὶ τὰ τοιαῦτα τῶν ἐρωτημάτων, ἂν μὴ αὐτὸς διορίσας ἢ διελόμενος εἴπῃ, οἷον “ἄρά γε τὸ ἀγαθὸν οὕτως ἢ οὕτως λέγεται;” πρὸς γὰρ τὰ τοιαῦτα ῥαδία ἢ ἀπόκρισις ἢ καταφήσαντι ἢ ἀποφήσαντι. διὸ πειρατέον οὕτω προτείνειν τὰς τοιαύτας τῶν προτάσεων. ἅμα δὲ καὶ δίκαιον ἴσως παρ’ ἐκείνου ζητεῖν ποσαχῶς λέγεται τὸ ἀγαθόν, ὅταν αὐτοῦ διαιρουμένου καὶ προτείνοντος μηδαμῶς συγχωρῇ.

“Οστις δ’ ἓνα λόγον πολὺν χρόνον ἐρωτᾷ, κακῶς πυθνάνεται. εἰ μὲν γὰρ ἀποκρινομένου τοῦ ἐρωτωμένου τὸ ἐρωτώμενον, δηλὸν ὅτι πολλὰ ἐρωτήματα ἐρωτᾷ ἢ πολλάκις ταυτά, ὥστε ἢ ἀδολεσχεῖ ἢ οὐκ ἔχει συλλογισμὸν (ἐξ ὀλίγων γὰρ πᾶς συλλογισμός). εἰ δὲ μὴ ἀποκρινομένου, ὅτι οὐκ ἐπιτιμᾷ, ἢ ἀφίσταται.

“Ἔστι δ’ ἐπιχειρεῖν τε χαλεπὸν καὶ ὑπέχειν ῥάδιον τὰς αὐτὰς ὑποθέσεις. ἔστι δὲ τοιαῦτα τὰ τε φύσει πρῶτα καὶ τὰ ἔσχατα. τὰ μὲν γὰρ πρῶτα ὅρου δεῖται, τὰ δ’ ἔσχατα διὰ πολλῶν περαίνεται βουλομένων τὸ συνεχὲς λαμβάνειν ἀπὸ τῶν πρώτων, ἢ σοφισματώδη φαίνεται τὰ ἐπιχειρήματα· ἀδύνατον γὰρ ἀποδεῖξαι τι μὴ ἀρξάμενον ἀπὸ τῶν οἰκείων ἀρχῶν καὶ συνείραντα μέχρι τῶν ἐσχάτων. ὀρίζεσθαι μὲν οὖν οὐτ’ ἀξιοῦσιν οἱ ἀποκρινόμενοι οὐτ’, ἂν ὁ ἐρωτῶν ὀρίζεται, προσέχουσιν· μὴ γενομένου δὲ φανεροῦ τί ποτ’ ἐστὶ τὸ [158b] προκειμένον, οὐ ῥάδιον ἐπιχειρεῖν. μάλιστα δὲ τὸ τοιοῦτον περὶ τὰς ἀρχὰς συμβαίνει· τὰ μὲν γὰρ ἄλλα διὰ τούτων δείκνυται, ταῦτα δ’ οὐκ ἐνδέχεται δι’ ἐτέρων, ἀλλ’ ἀναγκαῖον ὀρισμῶ τῶν τοιούτων ἕκαστον γνωρίζειν.

“Ἔστι δὲ δυσεπιχειρήτα καὶ τὰ λίαν ἐγγὺς τῆς ἀρχῆς· οὐ γὰρ ἐνδέχεται πολλοὺς πρὸς αὐτὰ λόγους πορίσασθαι, ὀλίγων ὄντων τῶν ἀνὰ μέσον αὐτῶν τε καὶ τῆς ἀρχῆς, δι’ ὧν ἀνάγκη δείκνυσθαι τὰ μετὰ ταῦτα. τῶν δὲ ὅρων δυσεπιχειρητότατοι πάντων εἰσὶν ὅσοι κέκληνται τοιούτοις ὀνόμασιν ἃ πρῶτον μὲν ἁδηλὰ ἐστὶν εἴτε ἀπλῶς εἴτε πολλαχῶς λέγεται, πρὸς δὲ τούτοις μηδὲ γνώριμα πότερον κυρίως ἢ κατὰ μεταφορὰν ὑπὸ τοῦ ὀρισμένου λέγεται. διὰ μὲν γὰρ τὸ ἀσαφεῖ εἶναι οὐκ ἔχει ἐπιχειρήματα· διὰ δὲ τὸ ἀγνοεῖσθαι εἰ παρὰ τὸ κατὰ μεταφορὰν λέγεσθαι τοιαῦτ’ ἐστίν, οὐκ ἔχει ἐπιτίμησιν.

Ὅλως δὲ πᾶν πρόβλημα, ὅταν ἢ δυσεπιχείρητον, ἢ ὅρου δεῖσθαι ὑποληπτέον ἢ τῶν πολλαχῶς ἢ τῶν κατὰ μεταφορὰν εἶναι λεγομένων ἢ οὐ πόρρω τῶν ἀρχῶν, διὰ τὸ μὴ φανερόν εἶναι πρῶτον ἡμῖν τοῦτ' αὐτό, κατὰ τίνα ποτὲ τῶν εἰρημένων τρόπων ἐστὶν ὁ τὴν ἀπορίαν παρέχεται· φανεροῦ γὰρ ὄντος τοῦ τρόπου δῆλον ὅτι ἢ ὀρίζεσθαι ἂν δέοι ἢ διαιρεῖσθαι ἢ τὰς ἀνὰ μέσον προτάσεις πορίζεσθαι· διὰ τούτων γὰρ δέικνυται τὰ ἔσχατα.

Πολλαῖς τε τῶν θέσεων μὴ καλῶς ἀποδιδομένου τοῦ ὀρισμοῦ οὐ ῥάδιον διαλέγεσθαι καὶ ἐπιχειρεῖν, οἷον πότερον ἐν ἐνὶ ἐναντίον ἢ πλείω· ὀρισθέντων δὲ τῶν ἐναντίων κατὰ τρόπον ῥάδιον συμβιβάζει πότερον ἐνδέχεται πλείω τῷ αὐτῷ εἶναι ἐναντία ἢ οὐ. τὸν αὐτὸν δὲ τρόπον καὶ ἐπὶ τῶν ἄλλων τῶν ὀρισμοῦ δεομένων. ἔοικε δὲ καὶ ἐν τοῖς μαθήμασιν ἔνια δι' ὀρισμοῦ ἔλλειψιν οὐ ῥαδίως γράφεσθαι, οἷον ὅτι ἢ παρὰ τὴν πλευρὰν τέμνουσα τὸ ἐπίπεδον ὁμοίως διαιρεῖ τὴν τε γραμμὴν καὶ τὸ χωρίον. τοῦ δὲ ὀρισμοῦ ῥηθέντος εὐθέως φανερόν τὸ λεγόμενον· τὴν γὰρ αὐτὴν ἀνταναίρεσιν ἔχει τὰ χωρία καὶ αἱ γραμμαί· ἔστι δ' ὀρισμὸς τοῦ αὐτοῦ λόγου οὗτος. ἀπλῶς δὲ τὰ πρῶτα τῶν στοιχείων τιθεμένων μὲν τῶν ὀρισμῶν, οἷον τί γραμμὴ καὶ τί κύκλος, ῥᾶστα δεῖξαι (πλὴν οὐ πολλά γε πρὸς ἕκαστον ἔστι τούτων ἐπιχειρεῖν διὰ τὸ μὴ πολλὰ τὰ ἀνὰ μέσον εἶναι)· ἂν δὲ μὴ τιθῶνται οἱ τῶν ἀρχῶν ὀρισμοί, χαλεπόν, τάχα δ' ὅλως [159a] ἀδύνατον. ὁμοίως δὲ τούτοις καὶ ἐπὶ τῶν κατὰ τοὺς λόγους ἔχει.

Οὐκ οὖν δεῖ λανθάνειν, ὅταν δυσεπιχείρητος ἢ ἡ θέσις, ὅτι πέπονθέ τι τῶν εἰρημένων. ὅταν δ' ἢ πρὸς τὸ ἀξίωμα καὶ τὴν πρότασιν μεῖζον ἔργον διαλεγῆναι ἢ τὴν θέσιν, διαπορήσειεν ἂν τις πότερον θετέον τὰ τοιαῦτα ἢ οὐ. εἰ γὰρ μὴ θήσῃ ἀλλ' ἀξιώσει καὶ πρὸς τοῦτο διαλέγεσθαι, μεῖζον προστάζει τοῦ ἐν ἀρχῇ κειμένου· εἰ δὲ θήσῃ, πιστεύσει ἐξ ἥττον πιστῶν. εἰ μὲν οὖν δεῖ μὴ χαλεπώτερον τὸ πρόβλημα ποιεῖν, θετέον· εἰ δὲ διὰ γνωριμωτέρων συλλογίζεσθαι, οὐ θετέον. ἢ τῷ μὲν μαθάνοντι οὐ θετέον, ἂν μὴ γνωριμώτερον ἢ· τῷ δὲ γυμναζομένῳ θετέον, ἂν ἀληθὲς μόνον φαίνεται. ὥστε φανερόν ὅτι οὐχ ὁμοίως ἐρωτῶντί τε καὶ διδάσκοντι ἀξιωτέον τιθέναι.

Πῶς μὲν οὖν ἐρωτηματίζειν καὶ τάττειν δεῖ, σχεδὸν ἱκανὰ τὰ εἰρημένα. περὶ δ' ἀποκρίσεως πρῶτον μὲν διοριστέον τί ἐστὶν ἔργον τοῦ καλῶς ἀποκρινομένου, καθάπερ τοῦ καλῶς ἐρωτῶντος. ἔστι δὲ τοῦ μὲν ἐρωτῶντος τὸ οὕτως ἐπαγαγεῖν τὸν λόγον ὥστε ποιῆσαι τὸν

ἀποκρινόμενον τὰ ἀδοξότατα λέγειν τῶν διὰ τὴν θέσιν ἀναγκαίων, τοῦ δ' ἀποκρινομένου τὸ μὴ δι' αὐτὸν φαίνεσθαι συμβαίνειν τὸ ἀδύνατον ἢ τὸ παράδοξον, ἀλλὰ διὰ τὴν θέσιν· ἑτέρα γὰρ ἴσως ἀμαρτία τὸ θέσθαι πρῶτον ὃ μὴ δεῖ καὶ τὸ θέμενον μὴ φυλάττειν κατὰ τρόπον.

Ἐπεὶ δ' ἔστιν ἀδιόριστα τοῖς γυμνασίας καὶ πείρας ἔνεκα τοὺς λόγους ποιούμενοις (οὐ γὰρ οἱ αὐτοὶ σκοποὶ τοῖς διδάσκουσιν ἢ μανθάνουσι καὶ τοῖς ἀγωνιζομένοις, οὐδὲ τούτοις τε καὶ τοῖς διατρίβουσι μετ' ἀλλήλων σκέψεως χάριν· τῷ μὲν γὰρ μανθάνοντι θετέον ἀεὶ τὰ δοκοῦντα· καὶ γὰρ οὐδ' ἐπιχειρεῖ ψεῦδος οὐδεὶς διδάσκειν· τῶν δ' ἀγωνιζομένων τὸν μὲν ἐρωτῶντα φαίνεσθαι τι δεῖ ποιεῖν πάντως, τὸν δ' ἀποκρινόμενον μηδὲν φαίνεσθαι πάσχειν· ἐν δὲ ταῖς διαλεκτικαῖς συνόδοις τοῖς μὴ ἀγῶνος χάριν ἀλλὰ πείρας καὶ σκέψεως τοὺς λόγους ποιούμενοις οὐ διήρθρωταί πω τίνας δεῖ στοχάζεσθαι τὸν ἀποκρινόμενον καὶ ποῖα διδόναι καὶ ποῖα μὴ, πρὸς τὸ καλῶς ἢ μὴ καλῶς φυλάττειν τὴν θέσιν)· ἐπεὶ οὖν οὐδὲν ἔχομεν παραδεδομένον ὑπ' ἄλλων, αὐτοὶ τι πειραθῶμεν εἰπεῖν.

Ἀνάγκη δὴ τὸν ἀποκρινόμενον ὑπέχειν λόγον θέμενον ἥτοι ἔνδοξον ἢ ἄδοξον θέσιν ἢ μηδέτερον, καὶ ἥτοι ἀπλῶς [159b] ἔνδοξον ἢ ἄδοξον ἢ ὠρισμένως, οἷον τῷδι τινι, ἢ αὐτῷ ἢ ἄλλῳ. διαφέρει δ' οὐδὲν ὅπως οὖν ἐνδόξου ἢ ἀδόξου οὕσης· ὁ γὰρ αὐτὸς τρόπος ἔσται τοῦ καλῶς ἀποκρίνασθαι καὶ δοῦναι ἢ μὴ δοῦναι τὸ ἐρωτηθέν. ἀδόξου μὲν οὖν οὕσης τῆς θέσεως ἔνδοξον ἀνάγκη τὸ συμπέρασμα γίνεσθαι, ἐνδόξου δ' ἄδοξον· τὸ γὰρ ἀντικείμενον ἀεὶ τῇ θέσει ὁ ἐρωτῶν συμπεραίνεται. εἰ δὲ μήτ' ἄδοξον μήτ' ἔνδοξον τὸ κείμενον, καὶ τὸ συμπέρασμα ἔσται τοιοῦτον. ἐπεὶ δ' ὁ καλῶς συλλογιζόμενος ἐξ ἐνδοξοτέρων καὶ γνωριμωτέρων τὸ προβληθὲν ἀποδείκνυσιν, φανερόν ὡς ἀδόξου μὲν ὄντος ἀπλῶς τοῦ κειμένου οὐ δοτέον τῷ ἀποκρινομένῳ οὐθ' ὃ μὴ δοκεῖ ἀπλῶς, οὐθ' ὃ δοκεῖ μὲν ἦττον δὲ τοῦ συμπεράσματος δοκεῖ. ἀδόξου γὰρ οὕσης τῆς θέσεως ἔνδοξον τὸ συμπέρασμα, ὥστε δεῖ τὰ λαμβανόμενα ἔνδοξα πάντ' εἶναι καὶ μᾶλλον ἔνδοξα τοῦ προκειμένου, εἰ μέλλει διὰ τῶν γνωριμωτέρων τὸ ἦττον γνώριμον περαίνεσθαι. ὥστ' εἴ τι μὴ τοιοῦτόν ἐστι τῶν ἐρωτωμένων, οὐ θετέον τῷ ἀποκρινομένῳ. εἰ δ' ἔνδοξος ἀπλῶς ἡ θέσις, δῆλον ὅτι τὸ συμπέρασμα ἀπλῶς ἄδοξον. θετέον οὖν τὰ τε δοκοῦντα πάντα καὶ τῶν μὴ δοκούντων ὅσα ἦττόν ἐστιν ἄδοξα τοῦ συμπεράσματος· ἱκανῶς γὰρ ἂν δόξειε διειλέχθαι. ὁμοίως δέ, εἰ μήτ'

ἄδοξος μήτ' ἔνδοξός ἐστιν ἢ θέσις· καὶ γὰρ οὕτως τὰ τε φαινόμενα πάντα δοτέον καὶ τῶν μὴ δοκούντων ὅσα μᾶλλον ἔνδοξα τοῦ συμπεράσματος· οὕτω γὰρ ἐνδοξοτέρους συμβήσεται τοὺς λόγους γίνεσθαι. εἰ μὲν οὖν ἀπλῶς ἔνδοξον ἢ ἄδοξον τὸ κείμενον, πρὸς τὰ δοκούντα ἀπλῶς τὴν σύγκρισιν ποιητέον. εἰ δὲ μὴ ἀπλῶς ἔνδοξον ἢ ἄδοξον τὸ κείμενον ἀλλὰ τῷ ἀποκρινομένῳ, πρὸς αὐτὸν τὸ δοκοῦν καὶ τὸ μὴ δοκοῦν κρίνοντα θετέον ἢ οὐ θετέον. ἂν δ' ἐτέρου δόξαν διαφυλάττη ὁ ἀποκρινόμενος, δῆλον ὅτι πρὸς τὴν ἐκείνου διάνοιαν ἀποβλέποντα θετέον ἕκαστα καὶ ἀρνητέον. διὸ καὶ οἱ κομίζοντες ἀλλοτρίας δόξας, οἷον ἀγαθὸν καὶ κακὸν εἶναι ταυτόν, καθάπερ Ἡράκλειτός φησιν, οὐ διδόασι μὴ παρῆναι ἅμα τῷ αὐτῷ τάναντία, οὐχ ὥς οὐ δοκοῦν αὐτοῖς τοῦτο, ἀλλ' ὅτι καθ' Ἡράκλειτον οὕτω λεκτέον. ποιοῦσι δὲ τοῦτο καὶ οἱ παρ' ἀλλήλων δεχόμενοι τὰς θέσεις· στοχάζονται γὰρ ὥς ἂν εἴπειεν ὁ θέμενος.

Φανερόν οὖν τίνων στοχαστέον τῷ ἀποκρινομένῳ, εἴτε ἀπλῶς ἔνδοξον εἴτε τινὶ τὸ κείμενόν ἐστιν. ἐπεὶ δ' ἀνάγκη πᾶν τὸ ἐρωτώμενον ἢ ἔνδοξον εἶναι ἢ ἄδοξον ἢ μηδέτερον, καὶ ἢ πρὸς τὸν λόγον ἢ μὴ πρὸς τὸν λόγον εἶναι τὸ ἐρωτώμενον, [160a] ἐὰν μὲν ἢ δοκοῦν καὶ μὴ πρὸς τὸν λόγον, δοτέον φήσαντα δοκεῖν, ἐὰν δὲ μὴ δοκοῦν καὶ μὴ πρὸς τὸν λόγον, δοτέον μὲν, ἐπισημαντέον δὲ τὸ μὴ δοκεῖν, πρὸς εὐλάβειαν εὐηθείας. ὄντος δὲ πρὸς τὸν λόγον καὶ δοκούντος λεκτέον ὅτι δοκεῖ μὲν, ἀλλὰ λίαν σύνεγγυς τοῦ ἐν ἀρχῇ ἐστι καὶ ἀναιρεῖται τούτου τεθέντος τὸ κείμενον. εἰ δὲ πρὸς τὸν λόγον, λίαν δ' ἄδοξον τὸ ἀξίωμα, συμβαίνει μὲν φατέον τούτου τεθέντος, ἀλλὰ λίαν εὐηθες εἶναι τὸ προτεινόμενον. εἰ δὲ μήτ' ἄδοξον μήτ' ἔνδοξον, εἰ μὲν μηδὲν πρὸς τὸν λόγον, δοτέον μηδὲν διορίσαντι, εἰ δὲ πρὸς τὸν λόγον, ἐπισημαντέον ὅτι ἀναιρεῖται τεθέντος τὸ ἐν ἀρχῇ. οὕτω γὰρ ὁ τ' ἀποκρινόμενος οὐδὲν δόξει δι' αὐτὸν πάσχειν, ἐὰν προορῶν ἕκαστα τιθῇ, ὁ τ' ἐρωτῶν τεύξεται συλλογισμοῦ τιθεμένων αὐτῷ πάντων τῶν ἐνδοξοτέρων τοῦ συμπεράσματος. ὅσοι δ' ἐξ ἀδοξοτέρων τοῦ συμπεράσματος ἐπιχειροῦσι συλλογίζεσθαι, δῆλον ὥς οὐ καλῶς συλλογίζονται· διὸ τοῖς ἐρωτῶσιν οὐ θετέον.

Ὅμοίως δὲ καὶ ἐπὶ τῶν ἀσαφῶς καὶ πλεοναχῶς λεγομένων ἀπαντητέον. ἐπεὶ γὰρ δέδοται τῷ ἀποκρινομένῳ μὴ μανθάνοντι εἰπεῖν ὅτι “οὐ μανθάνω”, καὶ πλεοναχῶς λεγομένου μὴ ἐξ ἀνάγκης ὁμολογῆσαι ἢ ἀρνήσασθαι, δῆλον ὥς πρῶτον μὲν, ἂν μὴ σαφές ἢ τὸ

ρήθέν, οὐκ ἀποκνητέον τὸ φάναι μὴ συνιέναι· πολλάκις γὰρ ἐκ τοῦ μὴ σαφῶς ἐρωτηθέντας διδόναι ἀπαντᾷ τι δυσχερές. ἂν δὲ γνώριμον μὲν ἢ πλεοναχῶς δὲ λεγόμενον, ἐὰν μὲν ἐπὶ πάντων ἀληθές ἢ ψεῦδος ἢ τὸ λεγόμενον, δοτέον ἀπλῶς ἢ ἀρνητέον, ἐὰν δ' ἐπὶ τὶ μὲν ψεῦδος ἢ ἐπὶ τὶ δ' ἀληθές, ἐπισημαντέον ὅτι πλεοναχῶς λέγεται καὶ ὅτι τὸ μὲν ψεῦδος τὸ δ' ἀληθές· ὕστερον γὰρ διαιρουμένου ἁδῆλον εἰ καὶ ἐν ἀρχῇ συνεώρα τὸ ἀμφίβολον. ἐὰν δὲ μὴ προίδῃ τὸ ἀμφίβολον ἀλλ' εἰς θάτερον βλέψας θῇ, ρητέον πρὸς τὸν ἐπὶ θάτερον ἄγοντα ὅτι “οὐκ εἰς τοῦτο βλέπων ἔδωκα ἀλλ' εἰς θάτερον αὐτῶν”· πλειόνων γὰρ ὄντων τῶν ὑπὸ ταῦτόν ὄνομα ἢ λόγον ῥαδία ἢ ἀμφισβήτησις. ἐὰν δὲ καὶ σαφές ἢ καὶ ἀπλοῦν τὸ ἐρωτώμενον, ἢ “ναί” ἢ “οὐ” ἀποκριτέον.

Ἐπεὶ δὲ πᾶσα πρότασις συλλογιστικὴ ἢ τούτων τίς ἐστὶν ἐξ ὧν ὁ συλλογισμὸς ἢ τινος τούτων ἕνεκα (δῆλον δ' ὅταν ἐτέρου χάριν λαμβάνηται τῷ πλείω τὰ ὅμοια ἐρωτᾷ· ἢ γὰρ δι' ἐπαγωγῆς ἢ δι' ὁμοιότητος ὡς ἐπὶ τὸ πολὺ τὸ καθόλου λαμβάνουσιν), τὰ μὲν οὖν καθ' ἕκαστα πάντα θετέον, ἂν [160b] ἢ ἀληθῆ καὶ ἐνδοξα, πρὸς δὲ τὸ καθόλου πειρατέον ἔνστασιν φέρειν· τὸ γὰρ ἄνευ ἐνστάσεως ἢ οὔσης ἢ δοκούσης κωλύειν τὸν λόγον δυσκολαίνειν ἐστίν. εἰ οὖν ἐπὶ πολλῶν φαινομένου μὴ δίδωσι τὸ καθόλου, μὴ ἔχων ἔνστασιν, φανερόν ὅτι δυσκολαίνει. ἔτι εἰ μὴδ' ἀντεπιχειρεῖν ἔχει ὅτι οὐκ ἀληθές, πολλῷ μᾶλλον ἂν δόξειε δυσκολαίνειν. (καίτοι οὐδὲ τοῦθ' ἱκανόν· πολλοὺς γὰρ λόγους ἔχομεν ἐναντίους ταῖς δόξαις, οὓς χαλεπὸν λύειν, καθάπερ τὸν Ζήνωνος ὅτι οὐκ ἐνδέχεται κινεῖσθαι οὐδὲ τὸ στάδιον διελθεῖν, ἀλλ' οὐ διὰ τοῦτο τάντικείμενα τούτοις οὐ θετέον.) εἰ οὖν μήτ' ἀντεπιχειρεῖν ἔχων μήτ' ἐνίστασθαι μὴ τίθησι, δῆλον ὅτι δυσκολαίνει· ἔστι γὰρ ἢ ἐν λόγοις δυσκολία ἀπόκρισις παρὰ τοὺς εἰρημένους τρόπους, συλλογισμοῦ φθαρτικῇ.

Ὑπέχειν δὲ καὶ θέσιν καὶ ὀρισμὸν αὐτὸν αὐτῷ δεῖ προεπιχειρήσαντα· ἐξ ὧν γὰρ ἀναιροῦσιν οἱ πυνθανόμενοι τὸ κείμενον, δῆλον ὅτι τούτοις ἐναντιωτέον.

Ἄδοξον δ' ὑπόθεσιν εὐλαβητέον ὑπέχειν. εἴη δ' ἂν ἄδοξος διχῶς· καὶ γὰρ ἐξ ἧς ἄτοπα συμβαίνει λέγειν, οἷον εἰ πάντα φαίη τις κινεῖσθαι ἢ μὴδέν, καὶ ὅσα χείρονος ἦθους ἐλέσθαι καὶ ὑπεναντία ταῖς βουλήσεσιν, οἷον ὅτι ἡδονὴ τάγαθόν, καὶ τὸ ἀδικεῖν βέλτιον τοῦ ἀδικεῖσθαι· οὐ γὰρ ὡς λόγου χάριν ὑπέχοντα ἀλλ' ὡς τὰ δοκοῦντα λέγοντα μισοῦσιν.

Ὅσοι δὲ τῶν λόγων ψεῦδος συλλογίζονται, λυτέον ἀναιροῦντα παρ' ὃ γίνεται τὸ ψεῦδος· οὐ γὰρ ὁ ὅτιοῦν ἀνελὼν λέλυκεν, οὐδ' εἰ ψεῦδός ἐστι τὸ ἀναιρούμενον. ἔχοι γὰρ ἂν πλείω ψεύδη ὁ λόγος, οἷον ἐάν τις λάβῃ τὸν καθήμενον γράφειν, Σωκράτη δὲ καθῆσθαι· συμβαίνει γὰρ ἐκ τούτων Σωκράτη γράφειν. ἀναιρεθέντος οὖν τοῦ Σωκράτη καθῆσθαι οὐδὲν μᾶλλον λέλυται ὁ λόγος· καίτοι ψεῦδος τὸ ἀξίωμα. ἀλλ' οὐ παρὰ τοῦτο ὁ λόγος ψευδής· ἂν γάρ τις τύχη καθήμενος μὲν μὴ γράφων δέ, οὐκέτι ἐπὶ τοῦ τοιούτου ἢ αὐτὴ λύσις ἀρμόσει. ὥστε οὐ τοῦτο ἀναιρετέον, ἀλλὰ τὸ τὸν καθήμενον γράφειν· οὐ γὰρ πᾶς ὁ καθήμενος γράφει. λέλυκε μὲν οὖν πάντως ὁ ἀνελὼν παρ' ὃ γίνεται τὸ ψεῦδος, οἶδε δὲ τὴν λύσιν ὁ εἰδὼς ὅτι παρὰ τοῦτο ὁ λόγος, καθάπερ ἐπὶ τῶν ψευδογραφουμένων. οὐ γὰρ ἀπόχρη τὸ ἐνστῆναι, οὐδ' ἂν ψεῦδος ᾗ τὸ ἀναιρούμενον, ἀλλὰ καὶ διότι ψεῦδος ἀποδεικτέον· οὕτω γὰρ ἂν εἴη φανερόν πότερον προορῶν τι ἢ οὐ ποιεῖται τὴν ἐνστασιν.

[161a] Ἔστι δὲ λόγον κωλύσαι συμπεράνασθαι τετραχῶς. ἢ γὰρ ἀνελόντα παρ' ὃ γίνεται τὸ ψεῦδος, ἢ πρὸς τὸν ἐρωτῶντα ἐνστασιν εἰπόντα· πολλάκις γὰρ οὐ λέλυκε μὲν, ὁ μέντοι πυνθανόμενος οὐ δύναται πορρωτέρω προαγαγεῖν. τρίτον δὲ πρὸς τὰ ἠρωτημένα· συμβαίη γὰρ ἂν ἐκ μὲν τῶν ἠρωτημένων μὴ γίνεσθαι ὃ βούλεται διὰ τὸ κακῶς ἠρωτησθαι, προστεθέντος δὲ τινος γίνεσθαι τὸ συμπέρασμα. εἰ μὲν οὖν μηκέτι δύναται προάγειν ὁ ἐρωτῶν, πρὸς τὸν ἐρωτῶντα εἴη ἂν ἡ ἐνστασις, εἰ δὲ δύναται, πρὸς τὰ ἠρωτημένα. τετάρτη δὲ καὶ χειρίστη τῶν ἐνστάσεων ἢ πρὸς τὸν χρόνον· ἔνιοι γὰρ τοιαῦτα ἐνίστανται πρὸς ἃ διαλεχθῆναι πλείονός ἐστι χρόνου [ἢ] τῆς παρούσης διατριβῆς.

Αἱ μὲν οὖν ἐνστάσεις, καθάπερ εἵπαμεν, τετραχῶς γίνονται· λύσις δ' ἐστὶ τῶν εἰρημένων ἢ πρώτη μόνον, αἱ δὲ λοιπαὶ κωλύσεις τινὲς καὶ ἐμποδισμοὶ τῶν συμπερασμάτων.

Ἐπιτίμησις δὲ λόγου κατ' αὐτόν τε τὸν λόγον καὶ ὅταν ἐρωτᾶται οὐχ ἡ αὐτή. πολλάκις γὰρ τοῦ μὴ καλῶς διειλέχθαι τὸν λόγον ὁ ἐρωτώμενος αἴτιος διὰ τὸ μὴ συγχωρεῖν ἐξ ὧν ἦν διαλεχθῆναι καλῶς πρὸς τὴν θέσιν· οὐ γὰρ ἔστιν ἐπὶ θατέρῳ μόνον τὸ καλῶς ἐπιτελεσθῆναι τὸ κοινὸν ἔργον. ἀναγκαῖον οὖν ἐνίοτε πρὸς τὸν λέγοντα καὶ μὴ πρὸς τὴν θέσιν ἐπιχειρεῖν, ὅταν ὁ ἀποκρινόμενος τάναντία τῷ ἐρωτῶντι παρατηρῇ προσεπηρεάζων. δυσκολαίνοντες οὖν ἀγωνιστικὰς καὶ οὐ διαλεκτικὰς ποιοῦνται τὰς διατριβάς. ἔτι δ'

ἐπεὶ γυμνασίας καὶ πείρας χάριν ἄλλ' οὐ διδασκαλίας οἱ τοιοῦτοι τῶν λόγων, δῆλον ὡς οὐ μόνον τάληθῇ συλλογιστέον ἀλλὰ καὶ ψεῦδος, οὐδὲ δι' ἀληθῶν ἀεὶ ἀλλ' ἐνίοτε καὶ ψευδῶν· πολλάκις γὰρ ἀληθοὺς τεθέντος ἀναιρεῖν ἀνάγκη τὸν διαλεγόμενον, ὥστε προτατέον τὰ ψευδῆ. ἐνίοτε δὲ καὶ ψεύδους τεθέντος ἀναιρετέον διὰ ψευδῶν· οὐδὲν γὰρ κωλύει τινὶ δοκεῖν τὰ μὴ ὄντα μᾶλλον τῶν ἀληθῶν, ὥστ' ἐκ τῶν ἐκείνῳ δοκούντων τοῦ λόγου γινομένου μᾶλλον ἔσται πεπεισμένος ἢ ὠφελιμένος. δεῖ δὲ τὸν καλῶς μεταβιβάζοντα διαλεκτικῶς καὶ μὴ ἐριστικῶς μεταβιβάζειν, καθάπερ τὸν γεωμέτρην γεωμετρικῶς, ἅν τε ψεῦδος ἅν τ' ἀληθὲς ἢ τὸ συμπεραινόμενον· ποῖοι δὲ διαλεκτικοὶ συλλογισμοί, πρότερον εἰρηται. ἐπεὶ δὲ φαῦλος κοινωνὸς ὁ ἐμποδίζων τὸ κοινὸν ἔργον, δῆλον ὅτι καὶ ἐν λόγῳ. κοινὸν γάρ τι καὶ ἐν τούτοις προκείμενόν ἐστι, πλὴν τῶν ἀγωνιζομένων. τούτοις δ' οὐκ ἔστιν ἀμφοτέροις τυχεῖν τοῦ αὐτοῦ τέλους· πλείους γὰρ ἐνὸς ἀδύνατον [161b] νικᾶν. διαφέρει δ' οὐδέν, ἅν τε διὰ τοῦ ἀποκρίνεσθαι ἅν τε διὰ τοῦ ἐρωτᾶν ποιῇ τοῦτο· ὃ τε γὰρ ἐριστικῶς ἐρωτῶν φαύλως διαλέγεται, ὃ τ' ἐν τῷ ἀποκρίνεσθαι μὴ διδοὺς τὸ φαινόμενον μηδ' ἐκδεχόμενος ὃ τί ποτε βούλεται ὁ ἐρωτῶν πυθέσθαι. δῆλον οὖν ἐκ τῶν εἰρημένων ὅτι οὐχ ὁμοίως ἐπιτιμητέον καθ' αὐτόν τε τῷ λόγῳ καὶ τῷ ἐρωτῶντι· οὐδὲν γὰρ κωλύει τὸν μὲν λόγον φαῦλον εἶναι, τὸν δ' ἐρωτῶντα ὡς ἐνδέχεται βέλτιστα πρὸς τὸν ἀποκρινόμενον διειλέχθαι. πρὸς γὰρ τοὺς δυσκολαίνοντας οὐ δυνατὸν ἴσως εὐθὺς οἷους τις βούλεται ἀλλ' οἷους ἐνδέχεται ποιεῖσθαι τοὺς συλλογισμούς.

Ἐπεὶ δ' ἐστὶν ἀδιόριστον πότε τὰναντία καὶ πότε τὰ ἐν ἀρχῇ λαμβάνουσιν οἱ ἄνθρωποι (πολλάκις γὰρ καθ' αὐτοὺς λέγοντες τὰ ἐναντία λέγουσι, καὶ ἀνανεύσαντες πρότερον διδόασιν ὕστερον· διόπερ ἐρωτώμενοι τὰναντία καὶ τὸ ἐν ἀρχῇ πολλάκις ὑπακούουσιν), ἀνάγκη φαύλους γίνεσθαι τοὺς λόγους. αἴτιος δ' ὁ ἀποκρινόμενος, τὰ μὲν οὐ διδοὺς, τὰ δὲ τοιαῦτα διδοὺς. φανερόν οὖν ὡς οὐχ ὁμοίως ἐπιτιμητέον τοῖς ἐρωτῶσι καὶ τοῖς λόγοις.

Καθ' αὐτόν δὲ τῷ λόγῳ πέντ' εἰσὶν ἐπιτιμήσεις· πρώτη μὲν ὅταν ἐκ τῶν ἐρωτωμένων μὴ συμπεραίνεται μήτε τὸ προτεθὲν μήτε ὅλως μηδέν, ὄντων ψευδῶν ἢ ἀδόξων, ἢ ἀπάντων ἢ τῶν πλείστων, ἐν οἷς τὸ συμπέρασμα, καὶ μήτ' ἀφαιρεθέντων τινῶν μήτε προστεθέντων μήτε τῶν μὲν ἀφαιρεθέντων τῶν δὲ προστεθέντων γίνηται τὸ συμπέρασμα. δευτέρα δὲ εἰ πρὸς τὴν θέσιν μὴ γίνοιτο ὁ

συλλογισμὸς ἐκ τοιούτων τε καὶ οὕτως ὥς εἴρηται πρότερον. τρίτη δ' εἰ προστεθέντων τινῶν γίνοιτο συλλογισμὸς, ταῦτα δ' εἴη χεῖρω τῶν ἐρωτηθέντων καὶ ἥττον ἔνδοξα τοῦ συμπεράσματος. πάλιν εἰ ἀφαιρεθέντων τινῶν· ἐνίοτε γὰρ πλείω λαμβάνουσι τῶν ἀναγκαίων, ὥστε οὐ τῷ ταῦτ' εἶναι γίνεται ὁ συλλογισμὸς. ἔτι εἰ ἐξ ἀδοξοτέρων καὶ ἥττον πιστῶν τοῦ συμπεράσματος, ἢ εἰ ἐξ ἀληθῶν ἀλλὰ πλείονος ἔργου δεομένων ἀποδείξαι τοῦ προβλήματος.

Οὐ δεῖ δὲ πάντων τῶν προβλημάτων ὁμοίως ἀξιοῦν τοὺς συλλογισμοὺς ἐνδόξους εἶναι καὶ πιθανοὺς· φύσει γὰρ εὐθὺς ὑπάρχει τὰ μὲν ῥάω τὰ δὲ χαλεπώτερα τῶν ζητούμενων, ὥστ' ἐὰν ἐξ ὧν ἐνδέχεται μάλιστα ἐνδόξων συμβιβάσῃ, διείλεκται καλῶς. φανερόν οὖν ὅτι οὐδὲ λόγῳ ἢ αὐτῇ ἐπιτίμησις πρὸς τε τὸ προβληθὲν καὶ καθ' αὐτόν· οὐδὲν γὰρ κωλύει καθ' αὐτὸν μὲν εἶναι τὸν λόγον ψεκτόν, πρὸς δὲ τὸ [162a] πρόβλημα ἐπαινετόν, καὶ πάλιν ἀντεστραμμένως καθ' αὐτὸν μὲν ἐπαινετόν, πρὸς δὲ τὸ πρόβλημα ψεκτόν, ὅταν ἐκ πολλῶν ἢ ῥάδιον ἐνδόξων συμπεράνασθαι καὶ ἀληθῶν. εἴη δ' ἂν ποτε λόγος καὶ συμπεπερασμένος μὴ συμπεπερασμένου χείρων, ὅταν ὁ μὲν ἐξ εὐθήθων συμπεραίνεται μὴ τοιούτου τοῦ προβλήματος ὄντος, ὁ δὲ προσδέχεται τοιούτων ἃ ἐστὶν ἔνδοξα καὶ ἀληθῆ, καὶ μὴ ἐν τοῖς προσλαμβανομένοις ἢ ὁ λόγος. τοῖς δὲ διὰ ψευδῶν ἀληθὲς συμπεραينوμένοις οὐ δίκαιον ἐπιτιμᾶν· ψεῦδος μὲν γὰρ αἰεὶ ἀνάγκη διὰ ψευδῶν συλλογίζεσθαι, τὸ δ' ἀληθὲς ἔστι καὶ διὰ ψευδῶν ποτε συλλογίζεσθαι. φανερόν δ' ἐκ τῶν Ἀναλυτικῶν.

Ὅταν δ' ἀπόδειξις ἢ τινος ὁ εἰρημένος λόγος, εἴ τί ἐστιν ἄλλο πρὸς τὸ συμπέρασμα μηδαμῶς ἔχον, οὐκ ἔσται περὶ ἐκείνου συλλογισμὸς· ἂν δὲ φαίνηται, σόφισμα ἔσται, οὐκ ἀπόδειξις. ἔστι δὲ φιλοσόφημα μὲν συλλογισμὸς ἀποδεικτικός, ἐπιχείρημα δὲ συλλογισμὸς διαλεκτικός, σόφισμα δὲ συλλογισμὸς ἐριστικός, ἀπόρημα δὲ συλλογισμὸς διαλεκτικὸς ἀντιφάσεως.

Εἰ δ' ἐξ ἀμφοτέρων τι δοκούντων δειχθεῖν, μὴ ὁμοίως δὲ δοκούντων, οὐδὲν κωλύει τὸ δειχθὲν μᾶλλον ἐκατέρου δοκεῖν. ἀλλ' εἰ τὸ μὲν δοκοίη τὸ δὲ μηδετέρως, ἢ εἰ τὸ μὲν δοκοίη τὸ δὲ μὴ δοκοίη, εἰ μὲν ὁμοίως, ὁμοίως ἂν εἴη καὶ <δοκοῦν καὶ> μή, εἰ δὲ μᾶλλον θάτερον, ἀκολουθήσει τῷ μᾶλλον.

Ἔστι δὲ τις ἀμαρτία καὶ αὕτη περὶ τοὺς συλλογισμοὺς, ὅταν δείξῃ διὰ μακροτέρων, ἐνὸν δι' ἐλαττόνων καὶ ἐν τῷ λόγῳ ὑπαρχόντων, οἷον ὅτι ἔστι δόξα μᾶλλον ἐτέρα ἐτέρας, εἴ τις

αἰτήσαιτο αὐτοέκαστον μάλιστ' εἶναι, εἶναι δὲ δοξαστὸν ἀληθῶς αὐτό, ὥστε τῶν τινῶν μᾶλλον εἶναι αὐτό· πρὸς δὲ τὸ μᾶλλον μᾶλλον τὸ λεγόμενον εἶναι· εἶναι δὲ καὶ αὐτοδόξαν ἀληθῆ, ἢ ἔσται μᾶλλον ἀκριβῆς τῶν τινῶν· ἥττηται δὲ καὶ αὐτοδόξαν ἀληθῆ εἶναι καὶ αὐτοέκαστον μάλιστ' εἶναι· ὥστε αὕτη δόξα ἀκριβεστέρα ἐστίν. τίς δὲ ἡ μοχθηρία; ἢ ὅτι ποιεῖ, παρ' ὃ ὁ λόγος, λανθάνειν τὸ αἴτιον;

Λόγος δ' ἐστὶ δῆλος ἓνα μὲν τρόπον καὶ δημοσιώτατον, ἐὰν ἢ συμπεπερασμένος οὕτως ὥστε μηδὲν δεῖν ἐπερωτῆσαι· ἓνα δὲ καὶ ὃς μάλιστα λέγεται, ὅταν εἰλημμένα [162b] μὲν ἢ ἐξ ὧν ἀναγκαῖον εἶναι, ἢ δὲ διὰ συμπερασμάτων συμπεραινόμενος· ἔτι εἰ ἐλλείπει τι σφόδρα ἔνδοξον.

Ψευδὴς δὲ λόγος καλεῖται τετραχῶς· ἓνα μὲν τρόπον ὅταν φαίνεται συμπεραίνεσθαι μὴ συμπεραινόμενος, ὃ καλεῖται ἐριστικός συλλογισμός. ἄλλον δὲ ὅταν συμπεραίνηται μὲν, μὴ μέντοι πρὸς τὸ προκείμενον (ὅπερ συμβαίνει μάλιστα τοῖς εἰς ἀδύνατον ἄγουσιν), ἢ πρὸς τὸ προκείμενον μὲν συμπεραίνεται, μὴ μέντοι κατὰ τὴν οἰκείαν μέθοδον. τοῦτο δ' ἐστίν, ὅταν μὴ ὦν ἱατρικὸς δοκῇ ἱατρικὸς εἶναι, ἢ γεωμετρικὸς μὴ ὦν γεωμετρικός, ἢ διαλεκτικὸς μὴ ὦν διαλεκτικός, ἂν τε ψεῦδος ἂν τ' ἀληθὲς ἢ τὸ συμβαῖνον. ἄλλον δὲ τρόπον ἐὰν διὰ ψευδῶν συμπεραίνηται. τούτου δ' ἔσται ποτὲ μὲν τὸ συμπέρασμα ψεῦδος, ποτὲ δ' ἀληθές· τὸ μὲν γὰρ ψεῦδος αἰεὶ διὰ ψευδῶν περαίνεται, τὸ δ' ἀληθὲς ἐγχωρεῖ καὶ μὴ ἐξ ἀληθῶν, ὥσπερ εἴρηται καὶ πρότερον.

Τὸ μὲν οὖν ψευδῆ τὸν λόγον εἶναι τοῦ λέγοντος ἀμάρτημα μᾶλλον ἢ τοῦ λόγου, καὶ οὐδὲ τοῦ λέγοντος αἰεὶ, ἀλλ' ὅταν λανθάνῃ αὐτόν· ἐπεὶ καθ' αὐτόν γε πολλῶν ἀληθῶν ἀποδεχόμεθα μᾶλλον, ἂν ἐξ ὅτι μάλιστα δοκούντων ἀναιρῇ τι τῶν ἀληθῶν. τοιοῦτος γὰρ ὦν ἐτέρων ἀληθῶν ἀπόδειξις ἐστίν· δεῖ γὰρ τῶν κειμένων τι μὴ εἶναι παντελῶς, ὥστ' ἔσται τούτου ἀπόδειξις. εἰ δ' ἀληθὲς συμπεραίνοιτο διὰ ψευδῶν καὶ λίαν εὐήθων, πολλῶν ἂν εἴη χείρων ψεῦδος συλλογιζομένων· εἴη δ' ἂν τοιοῦτος καὶ ψεῦδος συμπεραινόμενος· ὥστε δῆλον ὅτι πρώτη μὲν ἐπίσκεψις λόγου καθ' αὐτόν εἰ συμπεραίνεται, δευτέρα δὲ πότερον ἀληθὲς ἢ ψεῦδος, τρίτη δ' ἐκ ποίων τινῶν. εἰ μὲν γὰρ ἐκ ψευδῶν ἐνδόξων δέ, λογικός· εἰ δ' ἐξ ὄντων μὲν ἀδόξων δέ, φαῦλος· εἰ δὲ καὶ ψευδῆ καὶ λίαν ἄδοξα, δῆλον ὅτι φαῦλος ἢ ἀπλῶς ἢ τοῦ πράγματος.

Τὸ δὲ ἐν ἀρχῇ καὶ τὰ ἐναντία πῶς αἰτεῖται ὁ ἐρωτῶν, κατ'

ἀλήθειαν μὲν ἐν τοῖς Ἀναλυτικοῖς εἴρηται, κατὰ δόξαν δὲ νῦν λεκτέον.

Αἰτεῖσθαι δὲ φαίνονται τὸ ἐν ἀρχῇ πενταχῶς. φανερώτατα μὲν καὶ πρῶτον, εἴ τις αὐτὸ τὸ δείκνυσθαι δέον αἰτήσειεν. τοῦτο δ' ἐπ' αὐτοῦ μὲν οὐ ῥάδιον λανθάνειν, ἐν δὲ τοῖς συνωνύμοις καὶ ἐν ὅσοις τὸ ὄνομα καὶ ὁ λόγος τὸ αὐτὸ [163a] σημαίνει, μᾶλλον. δεύτερον δέ, ὅταν κατὰ μέρος δέον ἀποδείξαι καθόλου τις αἰτήσῃ, οἷον <εἰ>, ἐπιχειρῶν ὅτι τῶν ἐναντίων μία ἐπιστήμη, ὅλως τῶν ἀντικειμένων ἀξιώσῃε μίαν εἶναι· δοκεῖ γὰρ ὁ ἔδει καθ' αὐτὸ δεῖξαι μετ' ἄλλων αἰτεῖσθαι πλειόνων. τρίτον εἴ τις καθόλου δεῖξαι προκειμένου κατὰ μέρος αἰτήσειεν, οἷον εἰ πάντων τῶν ἐναντίων προκειμένου τῶνδὲ τινων ἀξιώσῃε· δοκεῖ γὰρ καὶ οὗτος, ὁ μετὰ πλειόνων ἔδει δεῖξαι, καθ' αὐτὸ χωρὶς αἰτεῖσθαι. πάλιν εἴ τις διελὼν αἰτεῖται τὸ πρόβλημα, οἷον εἰ, δέον δεῖξαι τὴν ἱατρικὴν ὑγιεινοῦ καὶ νοσώδους, χωρὶς ἐκάτερον ἀξιώσῃεν, ἢ εἴ τις τῶν ἐπομένων ἀλλήλοις ἐξ ἀνάγκης θάτερον αἰτήσειεν, οἷον τὴν πλευρὰν ἀσύμμετρον εἶναι τῇ διαμέτρῳ, δέον ἀποδείξαι ὅτι ἡ διάμετρος τῇ πλευρᾷ.

Ἰσαχῶς δὲ καὶ τάναντία αἰτοῦνται τῷ ἐξ ἀρχῆς. πρῶτον μὲν γὰρ εἴ τις τὰ ἀντικείμενα αἰτήσαιτο, φάσιν καὶ ἀπόφασιν, δεύτερον δὲ τάναντία κατὰ τὴν ἀντίθεσιν, οἷον ἀγαθὸν καὶ κακὸν ταυτόν. τρίτον εἴ τις τὸ καθόλου ἀξιώσας ἐπὶ μέρους αἰτοῖτο τὴν ἀντίφασιν, οἷον εἰ, λαβὼν τῶν ἐναντίων μίαν ἐπιστήμην, ὑγιεινοῦ καὶ νοσώδους ἑτέραν ἀξιώσῃεν, ἢ, τοῦτο αἰτησάμενος, ἐπὶ τοῦ καθόλου τὴν ἀντίφασιν πειρᾷτο λαμβάνειν. πάλιν ἂν τις αἰτήσῃ τὸ ἐναντίον τῷ ἐξ ἀνάγκης συμβαίνοντι διὰ τῶν κειμένων, κἂν εἴ τις αὐτὰ μὲν μὴ λάβοι τὰ ἀντικείμενα, τοιαῦτα δ' αἰτήσαιτο δύο ἐξ ὧν ἔσται ἡ ἀντικειμένη ἀντίφασις. διαφέρει δὲ τὸ τάναντία λαμβάνειν τοῦ <τὸ> ἐν ἀρχῇ, ὅτι τοῦ μὲν ἐστὶν ἡ ἁμαρτία πρὸς τὸ συμπέρασμα (πρὸς γὰρ ἐκεῖνο βλέποντες τὸ ἐν ἀρχῇ λέγομεν αἰτεῖσθαι), τὰ δ' ἐναντία ἐστὶν ἐν ταῖς προτάσεσι τῷ ἔχειν πως ταύτας πρὸς ἀλλήλας.

Πρὸς δὲ γυμνασίαν καὶ μελέτην τῶν τοιούτων λόγων πρῶτον μὲν ἀντιστρέφειν ἐθίζεσθαι χρὴ τοὺς λόγους· οὕτως γὰρ πρὸς τε τὸ λεγόμενον εὐπορώτερον ἔξομεν καὶ ἐν ὀλίγοις πολλοὺς ἐξεπιστησόμεθα λόγους. τὸ γὰρ ἀντιστρέφειν ἐστὶ τὸ μεταλαμβάνοντα τὸ συμπέρασμα μετὰ τῶν λοιπῶν ἐρωτημάτων ἀνελεῖν ἐν τῶν δοθέντων· ἀνάγκη γάρ, εἰ τὸ συμπέρασμα μὴ ἔστι, μίαν τινὰ ἀναιρεῖσθαι τῶν προτάσεων, εἴπερ πασῶν τεθεισῶν ἀνάγκη ἦν τὸ

συμπέρασμα εἶναι. πρὸς ἅπασάν τε θέσιν, καὶ ὅτι οὕτως καὶ ὅτι οὐχ οὕτως, τὸ ἐπιχείρημα [163b] σκεπτέον, καὶ εὐρόντα τὴν λύσιν εὐθὺς ζητητέον· οὕτω γὰρ ἅμα συμβήσεται πρὸς τε τὸ ἐρωτᾶν καὶ πρὸς τὸ ἀποκρίνεσθαι γεγυμνάσθαι, κἂν πρὸς μηδένα ἄλλον ἔχωμεν, πρὸς αὐτούς. παράλληλά τε παραβάλλειν ἐκλέγοντα πρὸς τὴν αὐτὴν θέσιν ἐπιχειρήματα· τοῦτο γὰρ πρὸς τε τὸ βιάζεσθαι πολλὴν εὐπορίαν ποιεῖ καὶ πρὸς τὸ ἐλέγχειν μεγάλην ἔχει βοήθειαν, ὅταν εὐπορῇ τις καὶ ὅτι οὕτως καὶ ὅτι οὐχ οὕτως (πρὸς τὰ ἐναντία γὰρ συμβαίνει ποιεῖσθαι τὴν φυλακὴν)· πρὸς τε γνῶσιν καὶ τὴν κατὰ φιλοσοφίαν φρόνησιν τὸ δύνασθαι συννοᾶν καὶ συνεωρακέναι τὰ ἀφ' ἑκατέρας συμβαίνοντα τῆς ὑποθέσεως οὐ μικρὸν ὄργανον· λοιπὸν γὰρ τούτων ὀρθῶς ἐλέσθαι θάτερον. δεῖ δὲ πρὸς τὸ τοιοῦτον ὑπάρχειν εὐφυῶ, καὶ τοῦτ' ἔστιν ἢ κατ' ἀλήθειαν εὐφυΐα, τὸ δύνασθαι καλῶς ἐλέσθαι τάληθές καὶ φυγεῖν τὸ ψεῦδος· ὅπερ οἱ πεφυκότες εὖ δύνανται ποιεῖν· εὖ γὰρ φιλοῦντες καὶ μισοῦντες τὸ προσφερόμενον εὖ κρίνουνσι τὸ βέλτιστον.

Πρὸς τε τὰ πλειστάκις ἐμπίπτοντα τῶν προβλημάτων ἐξεπίστασθαι δεῖ λόγους, καὶ μάλιστα περὶ τῶν πρώτων θέσεων· ἐν τούτοις γὰρ ἀποδυσπετοῦσιν οἱ ἀποκρινόμενοι πολλάκις. ἔτι τε ὅρων εὐπορεῖν δεῖ καὶ τῶν ἐνδόξων τε καὶ τῶν πρώτων ἔχειν προχείρους· διὰ γὰρ τούτων οἱ συλλογισμοὶ γίνονται. πειρατέον δὲ καὶ εἰς ἃ πλειστάκις ἐμπίπτουσιν οἱ λόγοι κατέχειν. ὥσπερ γὰρ ἐν γεωμετρίᾳ πρὸ ἔργου τὸ περὶ τὰ στοιχεῖα γεγυμνάσθαι, καὶ ἐν ἀριθμοῖς τὸ περὶ τοὺς κεφαλισμοὺς προχείρως ἔχειν μέγα διαφέρει πρὸς τὸ καὶ τὸν ἄλλον ἀριθμὸν γινώσκειν πολλαπλασιούμενον, ὁμοίως καὶ ἐν τοῖς λόγοις τὸ πρόχειρον εἶναι περὶ τὰς ἀρχάς, καὶ τὰς προτάσεις ἀπὸ στόματος ἐξεπίστασθαι. καθάπερ γὰρ ἐν τῷ μνημονικῷ μόνον οἱ τόποι τεθέντες εὐθὺς ποιοῦσιν αὐτὰ μνημονεύειν, καὶ ταῦτα ποιήσει συλλογιστικώτερον διὰ τὸ πρὸς ὠρισμένας αὐτὰς βλέπειν κατ' ἀριθμόν. πρότασιν τε κοινὴν μᾶλλον ἢ λόγον εἰς μνήμην θετέον· ἀρχῆς γὰρ καὶ ὑποθέσεως εὐπορῆσαι μετρίως χαλεπόν.

Ἐτι τὸν ἓνα λόγον πολλοὺς ποιεῖν ἐθιστέον, ὥς ἀδηλότατα κρύπτοντας. εἴη δ' ἂν τὸ τοιοῦτον εἴ τις ὅτι πλεῖστον ἀφισταίη τῆς συγγενείας περὶ ὧν ὁ λόγος. ἔσονται δὲ δυνατοὶ τῶν λόγων οἱ μάλιστα καθόλου τοῦτο πάσχειν, οἷον ὅτι [164a] οὐκ ἔστι μία πλειόνων ἐπιστήμη· οὕτω γὰρ καὶ ἐπὶ τῶν πρὸς τι καὶ ἐπὶ τῶν ἐναντίων καὶ συστοίχων ἐστίν.

Δεῖ δὲ καὶ τὰς ἀπομνημονεύσεις καθόλου ποιεῖσθαι τῶν λόγων, κἂν ἢ διειλεγμένος ἐπὶ μέρους· οὕτω γὰρ καὶ πολλοὺς ἐξέσται τὸν ἓνα ποιεῖν. ὁμοίως δὲ καὶ ἐν ῥητορικοῖς ἐπὶ τῶν ἐνθυμημάτων. αὐτὸν δ' ὅτι μάλιστα φεύγειν ἐπὶ τὸ καθόλου φέρειν τοὺς συλλογισμούς. αἰεὶ τε δεῖ σκοπεῖν τοὺς λόγους, εἰ ἐπὶ κοινῶν διαλέγονται· πάντες γὰρ οἱ ἐν μέρει καὶ καθόλου διειλεγμένοι εἰσὶ, καὶ ἔνεστιν ἐν τῇ κατὰ μέρος ἢ τοῦ καθόλου ἀπόδειξις διὰ τὸ μὴ εἶναι συλλογίσασθαι μηδὲν ἄνευ τῶν καθόλου.

Τὴν δὲ γυμνασίαν ἀποδοτέον τῶν μὲν ἐπακτικῶν πρὸς νέον, τῶν δὲ συλλογιστικῶν πρὸς ἔμπειρον. πειρατέον δὲ λαμβάνειν παρὰ μὲν τῶν συλλογιστικῶν τὰς προτάσεις, παρὰ δὲ τῶν ἐπακτικῶν τὰς παραβολάς· ἐν τούτῳ γὰρ ἐκάτεροι γεγυμνασμένοι εἰσὶν. ὅλως δ' ἐκ τοῦ γυμνάζεσθαι διαλεγόμενον πειρατέον ἀποφέρεσθαι ἢ συλλογισμὸν περὶ τινος ἢ λύσιν ἢ πρότασιν ἢ ἔνστασιν, ἢ εἰ ὀρθῶς τις ἤρετο ἢ εἰ μὴ ὀρθῶς, ἢ αὐτὸς ἢ ἕτερος, καὶ παρὰ τί ἐκάτερον.

[164b] ἐκ τούτων γὰρ ἡ δύναμις, τὸ δὲ γυμνάζεσθαι δυνάμεως χάριν, καὶ μάλιστα περὶ τὰς προτάσεις καὶ ἐνστάσεις· ἔστι γὰρ ὡς ἀπλῶς εἰπεῖν διαλεκτικὸς ὁ προτατικὸς καὶ ἐνστατικός. ἔστι δὲ τὸ μὲν προτείνεισθαι ἐν ποιεῖν τὰ πλείω (δεῖ γὰρ ἐν ὅλως ληφθῆναι πρὸς ὃ ὁ λόγος), τὸ δ' ἐνίστασθαι τὸ ἐν πολλὰ· ἢ γὰρ διαιρεῖ ἢ ἀναιρεῖ, τὸ μὲν διδοῦς τὸ δ' οὐ τῶν προτεινομένων.

Οὐχ ἅπαντι δὲ διαλεκτέον, οὐδὲ πρὸς τὸν τυχόντα γυμναστέον. ἀνάγκη γὰρ πρὸς ἐνίους φαύλους γίνεσθαι τοὺς λόγους· πρὸς γὰρ τὸν πάντως πειρώμενον φαίνεσθαι διαφεύγειν δίκαιον μὲν πάντως πειρᾶσθαι συλλογίσασθαι, οὐκ εὐσχημον δέ. διόπερ οὐ δεῖ συνεστάναι εὐχερῶς πρὸς τοὺς τυχόντας· ἀνάγκη γὰρ πονηρολογίαν συμβαίνειν· καὶ γὰρ οἱ γυμναζόμενοι ἀδυνατοῦσιν ἀπέχεσθαι τοῦ διαλέγεσθαι ἀγωνιστικῶς.

Δεῖ δὲ καὶ πεποιημένους ἔχειν λόγους πρὸς τὰ τοιαῦτα τῶν προβλημάτων ἐν οἷς ἐλαχίστων εὐπορήσαντες πρὸς πλεῖστα χρησίμους ἔξομεν· οὗτοι δ' εἰσὶν οἱ καθόλου καὶ οὐς προσπορίζεσθαι χαλεπώτερον ἐκ τῶν παρὰ πόδας.

Περί των Σοφιστικῶν Ἑλεγχῶν (164a) Sophistical Refutations

Περὶ δὲ τῶν σοφιστικῶν ἐλέγχων καὶ τῶν φαινομένων μὲν ἐλέγχων, ὄντων δὲ παραλογισμῶν ἄλλ' οὐκ ἐλέγχων, λέγωμεν ἀρξάμενοι κατὰ φύσιν ἀπὸ τῶν πρώτων.

Ὅτι μὲν οὖν οἱ μὲν εἰσὶ συλλογισμοί, οἱ δ' οὐκ ὄντες δοκοῦσι, φανερόν. ὥσπερ γὰρ καὶ ἐπὶ τῶν ἄλλων τοῦτο γίνεται διὰ τινος ὁμοιότητος, καὶ ἐπὶ τῶν λόγων ὡσαύτως ἔχει. καὶ γὰρ τὴν ἕξιν οἱ μὲν ἔχουσιν εὖ, οἱ δὲ φαίνονται, φυλετικῶς φουσησάντες καὶ ἐπισκευάσαντες αὐτούς, καὶ καλοὶ οἱ μὲν διὰ κάλλος, οἱ δὲ φαίνονται, κομμώσαντες αὐτούς. ἐπὶ τε τῶν ἀψύχων ὡσαύτως· καὶ γὰρ τούτων τὰ μὲν ἄργυρος τὰ δὲ χρυσός ἐστιν ἀληθῶς, τὰ δ' ἔστι μὲν οὐ, φαίνεται δὲ κατὰ τὴν αἴσθησιν, οἷον τὰ μὲν λιθαργύρινα καὶ τὰ καττιτέρινα ἄργυρᾶ, τὰ δὲ χολοβάφινα χρυσᾶ. τὸν αὐτὸν δὲ τρόπον καὶ συλλογισμὸς καὶ ἔλεγχος ὁ μὲν ἔστιν, ὁ δ' οὐκ ἔστι μὲν, φαίνεται δὲ διὰ τὴν ἀπειρίαν· οἱ γὰρ ἄπειροι ὥσπερ ἂν ἀπέχοντες πόρρωθεν θεωροῦσιν. ὁ μὲν γὰρ συλλογισμὸς ἐκ τινῶν ἐστι τεθέντων ὥστε λέγειν ἕτερον ἐξ ἀνάγκης τι τῶν κειμένων διὰ τῶν κειμένων, ἔλεγχος δὲ συλλογισμὸς μετ' ἀντιφάσεως τοῦ συμπεράσματος. οἱ δὲ τοῦτο ποιοῦσι μὲν οὐ, δοκοῦσι δὲ διὰ πολλὰς αἰτίας· ὧν εἷς τόπος εὐφυέστατός ἐστι καὶ δημοσιώτατος, ὁ διὰ τῶν ὀνομάτων. ἐπεὶ γὰρ οὐκ ἔστιν αὐτὰ τὰ πράγματα διαλέγεσθαι φέροντας, ἀλλὰ τοῖς ὀνόμασιν ἀντὶ τῶν πραγμάτων χρώμεθα ὡς συμβόλοις, τὸ συμβαῖνον ἐπὶ τῶν ὀνομάτων καὶ ἐπὶ τῶν πραγμάτων ἡγούμεθα συμβαίνειν, καθάπερ ἐπὶ τῶν ψήφων τοῖς λογιζομένοις. τὸ δ' οὐκ ἔστιν ὅμοιον· τὰ μὲν γὰρ ὀνόματα πεπέρανται καὶ τὸ τῶν λόγων πλῆθος, τὰ δὲ πράγματα τὸν ἀριθμὸν ἄπειρά ἐστιν. ἀναγκαῖον οὖν πλείω τὸν αὐτὸν λόγον καὶ τοῦνομα τὸ ἐν σημαίνειν. ὥσπερ οὖν κάκεϊ οἱ μὴ δεινοὶ τὰς ψήφους φέρειν ὑπὸ τῶν ἐπιστημόνων παρακρούονται, τὸν αὐτὸν τρόπον καὶ ἐπὶ τῶν λόγων οἱ τῶν ὀνομάτων τῆς δυνάμεως ἄπειροι παραλογίζονται καὶ αὐτοὶ

διαλεγόμενοι καὶ ἄλλων ἀκούοντες. διὰ μὲν οὖν ταύτην τὴν αἰτίαν καὶ τὰς λεχθησομένας ἔστι καὶ συλλογισμὸς καὶ ἔλεγχος φαινόμενος οὐκ ὢν δέ. ἐπεὶ δ' ἐστὶ τισι μᾶλλον πρὸ ἔργου τὸ δοκεῖν εἶναι σοφοῖς ἢ τὸ εἶναι καὶ μὴ δοκεῖν (ἔστι γὰρ ἡ σοφιστικὴ φαινομένη σοφία οὕσα δ' οὐ, καὶ ὁ σοφιστὴς χρηματιστὴς ἀπὸ φαινομένης σοφίας ἀλλ' οὐκ οὐσης), δηλὸν ὅτι ἀναγκαῖον τοῦτοις καὶ τοῦ σοφοῦ ἔργον δοκεῖν ποιεῖν, μᾶλλον ἢ ποιεῖν καὶ μὴ δοκεῖν. ἔστι δ' ὡς ἐν πρὸς ἐν εἰπεῖν ἔργον περὶ ἕκαστον τοῦ εἰδότος ἀψευδεῖν μὲν αὐτὸν περὶ ὧν οἶδε, τὸν δὲ ψευδόμενον ἐμφανίζειν δύνασθαι. ταῦτα δ' ἐστὶ τὸ μὲν ἐν τῷ δύνασθαι δοῦναι λόγον, τὸ δ' ἐν τῷ λαβεῖν. ἀνάγκη οὖν τοὺς βουλομένους σοφιστεῦειν τὸ τῶν εἰρημένων λόγων γένος ζητεῖν· πρὸ ἔργου γὰρ ἐστίν· ἡ γὰρ τοιαύτη δύναμις ποιήσει φαίνεσθαι σοφόν, οὗ τυγχάνουσι τὴν προαίρεσιν ἔχοντες.

Ὅτι μὲν οὖν ἔστι τι τοιοῦτον λόγων γένος, καὶ ὅτι τοιαύτης ἐφίενται δυνάμεως οὐς καλοῦμεν σοφιστάς, δηλὸν. πόσα δ' ἔστιν εἶδη τῶν λόγων τῶν σοφιστικῶν, καὶ ἐκ πόσων τὸν ἀριθμὸν ἡ δύναμις αὕτη συνέστηκε, καὶ πόσα μέρη τυγχάνει τῆς πραγματείας ὄντα, καὶ περὶ τῶν ἄλλων τῶν συντελούντων εἰς τὴν τέχνην ταύτην ἤδη λέγωμεν.

Ἔστι δὴ τῶν ἐν τῷ διαλέγεσθαι λόγων τέτταρα γένη, διδασκαλικοὶ καὶ διαλεκτικοὶ καὶ πειραστικοὶ καὶ ἐριστικοί· διδασκαλικοὶ μὲν οἱ ἐκ τῶν οἰκείων ἀρχῶν ἐκάστου μαθήματος καὶ οὐκ ἐκ τῶν τοῦ ἀποκρινομένου δοξῶν συλλογιζόμενοι (δεῖ γὰρ πιστεύειν τὸν μανθάνοντα), διαλεκτικοὶ δ' οἱ ἐκ τῶν ἐνδόξων συλλογιστικοὶ ἀντιφάσεως, πειραστικοὶ δ' οἱ ἐκ τῶν δοκούντων τῷ ἀποκρινομένῳ καὶ ἀναγκαῖων εἰδέναι τῷ προσποιουμένῳ ἔχειν τὴν ἐπιστήμην (ὃν τρόπον δέ, διώριται ἐν ἑτέροις), ἐριστικοὶ δ' οἱ ἐκ τῶν φαινομένων ἐνδόξων, μὴ ὄντων δέ, συλλογιστικοὶ ἢ φαινόμενοι συλλογιστικοί. περὶ μὲν οὖν τῶν ἀποδεικτικῶν ἐν τοῖς Ἀναλυτικοῖς εἴρηται, περὶ δὲ τῶν διαλεκτικῶν καὶ πειραστικῶν ἐν ἄλλοις· περὶ δὲ τῶν ἀγωνιστικῶν καὶ ἐριστικῶν νῦν λέγωμεν.

Πρῶτον δὴ ληπτέον πόσων στοχάζονται οἱ ἐν τοῖς λόγοις ἀγωνιζόμενοι καὶ διαφιλονεικοῦντες. ἔστι δὲ πέντε ταῦτα τὸν ἀριθμὸν, ἔλεγχος καὶ ψεῦδος καὶ παράδοξον καὶ σολοικισμὸς καὶ πέμπτον τὸ ποιῆσαι ἀδολεσχήσαι τὸν προσδιαλεγόμενον (τοῦτο δ' ἐστὶ τὸ πολλάκις ἀναγκάζεσθαι ταῦτ' ἀλεγεινῶς), ἢ τὸ μὴ ὂν ἀλλὰ [τὸ] φαινόμενον ἕκαστον εἶναι τούτων. μάλιστα μὲν γὰρ προαιροῦνται

φαίνεσθαι ἐλέγχοντες, δεύτερον δὲ ψευδόμενόν τι δεικνύναι, τρίτον εἰς παράδοξον ἄγειν, τέταρτον δὲ σολοικίζειν ποιεῖν (τοῦτο δ' ἐστὶ τὸ ποιῆσαι τῇ λέξει βαρβαρίζειν ἐκ τοῦ λόγου τὸν ἀποκρινόμενον)· τελευταῖον δὲ τὸ πλεονάκις ταὐτὸ λέγειν.

Τρόποι δ' εἰσὶ τοῦ μὲν ἐλέγχειν δύο· οἱ μὲν γὰρ εἰσι παρὰ τὴν λέξιν, οἱ δ' ἔξω τῆς λέξεως. ἔστι δὲ τὰ μὲν παρὰ τὴν λέξιν ἐμποιοῦντα τὴν φαντασίαν ἔξ τὸν ἀριθμόν· ταῦτα δ' ἐστὶν ὁμωνυμία, ἀμφιβολία, σύνθεσις, διαίρεσις, προσφδία, σχῆμα λέξεως. τούτου δὲ πίστις ἢ τε διὰ τῆς ἐπαγωγῆς καὶ συλλογισμός, ἂν τε ληφθῇ τις ἄλλος καὶ ὅτι τοσαυταχῶς ἂν τοῖς αὐτοῖς ὀνόμασι καὶ λόγοις μὴ ταὐτὸ δηλώσαιμεν. εἰσὶ δὲ παρὰ μὲν τὴν ὁμωνυμίαν οἱ τοιοῖδε τῶν λόγων, οἷον ὅτι μανθάνουσιν οἱ ἐπιστάμενοι, τὰ γὰρ ἀποστοματιζόμενα μανθάνουσιν οἱ γραμματικοί· τὸ γὰρ μανθάνειν ὁμώνυμον, τό τε ξυνιέναι χρώμενον τῇ ἐπιστήμῃ καὶ τὸ λαμβάνειν ἐπιστήμην. καὶ πάλιν ὅτι τὰ κακὰ ἀγαθὰ· τὰ γὰρ δέοντα ἀγαθὰ, τὰ δὲ κακὰ δέοντα· διττὸν γὰρ τὸ δέον, τό τ' ἀναγκαῖον, ὃ συμβαίνει πολλάκις καὶ ἐπὶ τῶν κακῶν (ἔστι γὰρ κακόν τι ἀναγκαῖον) - καὶ τὰγαθὰ δὲ δέοντά φαμεν εἶναι. ἔτι <τὸ> τὸν αὐτὸν καθῆσθαι καὶ ἐστάναι, καὶ κάμνειν καὶ ὑγιαίνειν. ὅπερ γὰρ ἀνίστατο, ἔστηκεν, καὶ ὅπερ ὑγιάζετο, ὑγιαίνει· ἀνίστατο δ' ὁ καθήμενος καὶ ὑγιάζετο ὁ κάμνων. τὸ γὰρ τὸν κάμνοντα ὅτιοῦν ποιεῖν ἢ πάσχειν οὐχ ἔν σημαίνει, ἀλλ' ὅτε μὲν ὅτι ὁ νῦν κάμνων [ἢ καθήμενος], ὅτε δ' ὅς ἔκαμνε πρότερον. πλὴν ὑγιάζετο μὲν καὶ κάμνων καὶ ὁ κάμνων· ὑγιαίνει δ' οὐ κάμνων ἀλλ' ὁ κάμνων, οὐ νῦν, ἀλλ' ὁ πρότερον. παρὰ δὲ τὴν ἀμφιβολίαν οἱ τοιοῖδε· τὸ βούλεσθαι λαβεῖν με τοὺς πολεμίους. καὶ “ἄρ' ὃ τις γινώσκει, τοῦτο γινώσκει;” καὶ γὰρ τὸν γινώσκοντα καὶ τὸ γινωσκόμενον ἐνδέχεται ὡς γινώσκοντα σημῆναι τούτῳ τῷ λόγῳ. καὶ “ἄρα ὃ ὁρᾷ τις, τοῦτο ὁρᾷ; ὁρᾷ δὲ τὸν κίονα, ὥστε ὁρᾷ ὁ κίων”. καὶ “ἄρα ὃ σὺ φῆς εἶναι, τοῦτο σὺ φῆς εἶναι; φῆς δὲ λίθον εἶναι· σὺ ἄρα φῆς λίθος εἶναι”. καὶ “ἄρ' ἔστι σιγῶντα λέγειν;” διττὸν γὰρ καὶ τὸ σιγῶντα λέγειν, τό τε τὸν λέγοντα σιγᾶν καὶ τὸ τὰ λεγόμενα. εἰσὶ δὲ τρεῖς τρόποι τῶν παρὰ τὴν ὁμωνυμίαν καὶ τὴν ἀμφιβολίαν· εἷς μὲν ὅταν ἢ ὁ λόγος ἢ τοῦνομα κυρίως σημαινῇ πλείω, οἷον ἀετὸς καὶ κύων· εἷς δὲ ὅταν εἰωθότες ὦμεν οὕτω λέγειν· τρίτος δὲ ὅταν τὸ συντεθὲν πλείω σημαινῇ, κεχωρισμένον δὲ ἀπλῶς. οἷον τὸ “ἐπίσταται γράμματα”· ἐκάτερον μὲν γάρ, εἰ ἔτυχεν, ἔν τι σημαινῇ, τὸ “ἐπίσταται” καὶ τὸ “γράμματα”· ἄμφω δὲ πλείω, ἢ τὸ τὰ

γράμματα αὐτὰ ἐπιστήμην ἔχειν ἢ τῶν γραμμάτων ἄλλον.

Ἡ μὲν οὖν ἀμφιβολία καὶ ὁμωνυμία παρὰ τούτους τοὺς τρόπους ἐστίν. παρὰ δὲ τὴν σύνθεσιν τὰ τοιάδε, οἷον τὸ δύνασθαι καθήμενον βαδίζειν καὶ μὴ γράφοντα γράφειν (οὐ γὰρ ταὐτὸ σημαίνει ἂν διελών τις εἶπη καὶ συνθεῖς ὡς δυνατόν τὸ “καθήμενον βαδίζειν” [καὶ “μὴ γράφοντα γράφειν”]· καὶ τοῦθ’ ὡσαύτως, ἂν τις συνθῇ τὸ “μὴ γράφοντα γράφειν”· σημαίνει γὰρ ὡς ἔχει δύναμιν τοῦ μὴ γράφον γράφειν· ἐὰν δὲ μὴ συνθῇ, ὅτι ἔχει δύναμιν, ὅτε οὐ γράφει, τοῦ γράφειν), καὶ “μανθάνει νῦν γράμματα, εἴπερ μανθάνει ἃ ἐπίσταται”. ἔτι τὸ ἐν μόνον δυνάμενον φέρειν πολλὰ δύνασθαι φέρειν.

Παρὰ δὲ τὴν διαίρεσιν ὅτι τὰ πέντ’ ἐστὶ δύο καὶ τρία, καὶ περιττὰ καὶ ἄρτια, καὶ τὸ μεῖζον ἴσον· τοσοῦτον γὰρ καὶ ἔτι πρὸς. ὁ γὰρ αὐτὸς λόγος διηρημένος καὶ συγκεείμενος οὐκ ἀεὶ ταὐτὸ σημαίνειν ἂν δόξειεν, οἷον “ἐγὼ σ’ ἔθηκα δοῦλον ὄντ’ ἐλεύθερον” καὶ τὸ “πεντήκοντ’ ἀνδρῶν ἑκατὸν λίπε διὸς Ἀχιλλεύς”.

Παρὰ δὲ τὴν προσωδίαν ἐν μὲν τοῖς ἄνευ γραφῆς διαλεκτικοῖς οὐ ῥάδιον ποιῆσαι λόγον, ἐν δὲ τοῖς γεγραμμένοις καὶ ποιήμασι μᾶλλον. οἷον καὶ τὸν Ὅμηρον ἔνιοι διορθοῦνται πρὸς τοὺς ἐλέγχοντας ὡς ἄτοπον εἰρηκότα “τὸ μὲν οὐ καταπύθεται ὄμβρῳ”· λύουσι γὰρ αὐτὸ τῇ προσωδίᾳ, λέγοντες τὸ “οὐ” ὀξύτερον. καὶ τὸ περὶ τὸ ἐνύπνιον τοῦ Ἀγαμέμνονος, ὅτι οὐκ αὐτὸς ὁ Ζεὺς εἶπεν “δίδομεν δέ οἱ εὖχος ἀρέσθαι”, ἀλλὰ τῷ ἐνυπνίῳ ἐνετέλλετο διδόναι. τὰ μὲν οὖν τοιαῦτα παρὰ τὴν προσωδίαν ἐστίν.

Οἱ δὲ παρὰ τὸ σχῆμα τῆς λέξεως συμβαίνουσιν ὅταν τὸ μὴ ταὐτὸ ὡσαύτως ἐρμηνεύηται, οἷον τὸ ἄρρεν θῆλυ ἢ τὸ θῆλυ ἄρρεν ἢ τὸ μεταξὺ θάτερον τούτων, ἢ πάλιν τὸ ποιὸν ποσὸν ἢ τὸ ποσὸν ποιόν, ἢ τὸ ποιοῦν πάσχον ἢ τὸ διακείμενον ποιοῦν, καὶ τᾶλλα δ’ ὡς διήρηται πρότερον· ἔστι γὰρ τὸ μὴ τῶν ποιεῖν ὄν ὡς τῶν ποιεῖν τι τῇ λέξει σημαίνειν. οἷον τὸ ὑγιαίνειν ὁμοίως τῷ σχήματι τῆς λέξεως λέγεται τῷ τέμνειν ἢ οἰκοδομεῖν· καίτοι τὸ μὲν ποιόν τι καὶ διακείμενόν πως δηλοῖ, τὸ δὲ ποιεῖν τι. τὸν αὐτὸν δὲ τρόπον καὶ ἐπὶ τῶν ἄλλων.

Οἱ μὲν οὖν παρὰ τὴν λέξιν ἔλεγκοι ἐκ τούτων τῶν τόπων εἰσίν. τῶν δ’ ἔξω τῆς λέξεως παραλογισμῶν εἶδη ἔστιν ἐπτὰ, ἐν μὲν παρὰ τὸ συμβεβηκός, δεύτερον δὲ τὸ ἀπλῶς ἢ μὴ ἀπλῶς ἀλλὰ πῇ ἢ ποῦ ἢ ποτὲ ἢ πρὸς τι λέγεσθαι, τρίτον δὲ τὸ παρὰ τὴν τοῦ ἐλέγχου ἄγνοιαν,

τέταρτον δὲ τὸ παρὰ τὸ ἐπόμενον, πέμπτον δὲ τὸ παρὰ τὸ <τὸ> ἐν ἀρχῇ λαμβάνειν, ἕκτον δὲ τὸ <τὸ> μὴ αἴτιον ὡς αἴτιον τιθέναι, ἑβδομον δὲ τὸ τὰ πλείω ἐρωτήματα ἐν ποιεῖν.

Οἱ μὲν οὖν παρὰ τὸ συμβεβηκὸς παραλογισμοί εἰσιν ὅταν ὁμοίως ὁτιοῦν ἀξιωθῇ τῷ πράγματι καὶ τῷ συμβεβηκότη ὑπάρχειν. ἐπεὶ γὰρ τῷ αὐτῷ πολλὰ συμβέβηκεν, οὐκ ἀνάγκη πᾶσι τοῖς κατηγορουμένοις καὶ καθ' οὗ κατηγορεῖται ταῦτά πάντα ὑπάρχειν. οἷον “εἰ ὁ Κορίσκος ἕτερον ἀνθρώπου, αὐτὸς αὐτοῦ ἕτερος· ἔστι γὰρ ἄνθρωπος”. ἢ εἰ Σωκράτους ἕτερος, ὁ δὲ Σωκράτης ἄνθρωπος, ἕτερον ἀνθρώπου φασὶν ὡμολογηκέναι διὰ τὸ συμβεβηκέναι οὗ ἔφησεν ἕτερον εἶναι, τοῦτον εἶναι ἄνθρωπον.

Οἱ δὲ παρὰ τὸ ἀπλῶς τόδε ἢ πῇ λέγεσθαι καὶ μὴ κυρίως, ὅταν τὸ ἐν μέρει λεγόμενον ὡς ἀπλῶς εἰρημένον ληφθῇ, οἷον, εἰ τὸ μὴ ὄν ἐστὶ δοξαστόν, ὅτι τὸ μὴ ὄν ἔστιν· οὐ γὰρ ταῦτὸ τὸ εἶναι τέ τι καὶ εἶναι ἀπλῶς. ἢ πάλιν ὅτι τὸ ὄν οὐκ ἔστιν ὄν, εἰ τῶν ὄντων τι μὴ ἔστιν, οἷον εἰ μὴ ἄνθρωπος· οὐ γὰρ ταῦτὸ τὸ μὴ εἶναι τι καὶ ἀπλῶς μὴ εἶναι. φαίνεται δὲ διὰ τὸ πάρεγγυς τῆς λέξεως καὶ μικρὸν διαφέρειν τὸ εἶναι τι τοῦ εἶναι, καὶ τὸ μὴ εἶναι τι τοῦ μὴ εἶναι. ὁμοίως δὲ καὶ τὸ παρὰ τὸ πῇ καὶ τὸ ἀπλῶς· οἷον ὁ Ἰνδός, ὅλος μέλας ὢν, λευκός ἐστὶ τοὺς ὀδόντας· λευκός ἄρα καὶ οὐ λευκός ἐστίν. ἢ εἰ ἄμφω πῇ, ὅτι ἅμα τὰ ἐναντία ὑπάρχει. τὸ δὲ τοιοῦτον ἐπ' ἐνίων μὲν παντὶ θεωρῆσαι ῥάδιον, οἷον εἰ, λαβὼν τὸν Αἰθίοπα εἶναι μέλανα, τοὺς ὀδόντας ἔροιτ' εἰ λευκός· εἰ οὖν ταύτῃ λευκός, ὅτι μέλας καὶ οὐ μέλας οἷοιτ' <ἂν> διειλέχθαι, συλλογιστικῶς τελειώσας τὴν ἐρώτησιν. ἐπ' ἐνίων δὲ λανθάνει πολλάκις, ἐφ' ὅσων, ὅταν πῇ λέγεται, κἂν τὸ ἀπλῶς δόξειεν ἀκολουθεῖν, καὶ ἐν ὅσοις μὴ ῥάδιον θεωρῆσαι πότερον αὐτῶν κυρίως ἀποδοτέον. γίνεται δὲ τὸ τοιοῦτον ἐν οἷς ὁμοίως ὑπάρχει τὰ ἀντικείμενα· δοκεῖ γὰρ ἢ ἄμφω ἢ μηδέτερον δοτέον ἀπλῶς εἶναι [κατηγορεῖν]· οἷον, εἰ τὸ μὲν ἡμισυ λευκὸν τὸ δ' ἡμισυ μέλαν, πότερον λευκὸν ἢ μέλαν;

Οἱ δὲ παρὰ τὸ μὴ διωρίσθαι τί ἐστὶ συλλογισμὸς ἢ τί ἔλεγχος ἄλλως παρὰ τὴν ἔλλειψιν γίνονται τοῦ λόγου· ἔλεγχος μὲν γὰρ ἐστὶν ἀντίφασις τοῦ αὐτοῦ καὶ ἐνός, μὴ ὀνόματος ἀλλὰ πράγματος, καὶ ὀνόματος μὴ συνωνύμου ἀλλὰ τοῦ αὐτοῦ, ἐκ τῶν δοθέντων ἐξ ἀνάγκης (μὴ συναριθμουμένου τοῦ ἐν ἀρχῇ), κατὰ ταῦτὸ καὶ πρὸς ταῦτὸ καὶ ὡσαύτως καὶ ἐν τῷ αὐτῷ χρόνῳ. τὸν αὐτὸν δὲ τρόπον καὶ τὸ ψεύσασθαι περὶ τινος. ἐνιοὶ δὲ ἀπολιπόντες τι τῶν λεχθέντων

φαίνονται ἐλέγχειν, οἷον ὅτι ταὐτὸ διπλάσιον καὶ οὐ διπλάσιον· τὰ γὰρ δύο τοῦ μὲν ἐνὸς διπλάσια, τῶν δὲ τριῶν οὐ διπλάσια. ἢ εἰ τὸ αὐτὸ τοῦ αὐτοῦ διπλάσιον καὶ οὐ διπλάσιον, ἀλλ’ οὐ κατὰ ταυτό· κατὰ μὲν γὰρ τὸ μῆκος διπλάσιον, κατὰ δὲ τὸ πλάτος οὐ διπλάσιον. ἢ εἰ τοῦ αὐτοῦ καὶ κατὰ ταὐτὸ καὶ ὡσαύτως, ἀλλ’ οὐχ ἅμα· διόπερ ἐστὶ φαινόμενος ἔλεγχος. ἔλκοι δ’ ἂν τις τοῦτον καὶ εἰς τοὺς παρὰ τὴν λέξιν.

Οἱ δὲ παρὰ τὸ τὸ ἐν ἀρχῇ λαμβάνειν γίνονται μὲν οὕτως καὶ τοσαυταῶς ὡσαυῶς ἐνδέχεται τὸ ἐξ ἀρχῆς αἰτεῖσθαι, φαίνονται δ’ ἐλέγχειν διὰ τὸ μὴ δύνασθαι συννοῶν τὸ ταὐτὸν καὶ τὸ ἕτερον.

Ὁ δὲ παρὰ τὸ ἐπόμενον ἔλεγχος διὰ τὸ οἶεσθαι ἀντιστρέφειν τὴν ἀκολουθήσιν· ὅταν γὰρ τοῦδε ὄντος ἐξ ἀνάγκης τόδε ἦ, καὶ τοῦδε ὄντος οἶονται καὶ θάτερον εἶναι ἐξ ἀνάγκης. ὅθεν καὶ αἱ περὶ τὴν δόξαν ἐκ τῆς αἰσθήσεως ἀπάται γίνονται· πολλάκις γὰρ τὴν χολὴν μέλι ὑπέλαβον διὰ τὸ ἔπεσθαι τὸ ξανθὸν χρῶμα τῷ μέλιτι· καὶ ἐπεὶ συμβαίνει τὴν γῆν ὕσαντος γίνεσθαι διάβροχον, κἂν ἦ διάβροχος, ὑπολαμβάνομεν ὕσαι. τὸ δ’ οὐκ ἀναγκαῖον. ἔν τε τοῖς ῥητορικοῖς αἱ κατὰ τὸ σημεῖον ἀποδείξεις ἐκ τῶν ἐπομένων εἰσίν· βουλόμενοι γὰρ δεῖξαι ὅτι μοιχός, τὸ ἐπόμενον ἔλαβον, ὅτι καλῶπιστής ἢ ὅτι νύκτωρ ὁρᾶται πλανώμενος. πολλοῖς δὲ ταῦτα μὲν ὑπάρχει, τὸ δὲ κατηγορούμενον οὐχ ὑπάρχει. ὁμοίως δὲ καὶ ἐν τοῖς συλλογιστικοῖς, οἷον ὁ Μελίσσου λόγος ὅτι ἅπειρον τὸ ἅπαν, λαβὼν τὸ μὲν ἅπαν ἀγένητον (ἐκ γὰρ μὴ ὄντος οὐδὲν ἂν γενέσθαι), τὸ δὲ γενόμενον ἐξ ἀρχῆς γενέσθαι· εἰ μὴ οὖν γέγονεν, ἀρχὴν οὐκ ἔχειν τὸ πᾶν, ὥστ’ ἅπειρον. οὐκ ἀνάγκη δὲ τοῦτο συμβαίνειν· οὐ γὰρ εἰ τὸ γενόμενον ἅπαν ἀρχὴν ἔχει, καὶ εἴ τι ἀρχὴν ἔχει, γέγονεν, ὥσπερ οὐδ’ εἰ ὁ πυρέττων θερμός, καὶ τὸν θερμὸν ἀνάγκη πυρέττειν.

Ὁ δὲ παρὰ τὸ <τὸ> μὴ αἴτιον ὡς αἴτιον, ὅταν προσληφθῇ τὸ ἀναίτιον ὡς παρ’ ἐκεῖνο γινομένου τοῦ ἐλέγχου. συμβαίνει δὲ τὸ τοιοῦτον ἐν τοῖς εἰς τὸ ἀδύνατον συλλογισμοῖς· ἐν τούτοις γὰρ ἀναγκαῖον ἀναιρεῖν τι τῶν κειμένων. ἐὰν οὖν ἐγκαταριθμηθῇ <τι> ἐν τοῖς ἀναγκαίοις ἐρωτήμασι πρὸς τὸ συμβαῖνον ἀδύνατον, δόξει παρὰ τοῦτο γίνεσθαι πολλάκις ὁ ἔλεγχος, οἷον ὅτι οὐκ ἔστι ψυχὴ καὶ ζωὴ ταυτόν. εἰ γὰρ φθορᾷ γένεσις ἐναντίον, καὶ τῇ τινὶ φθορᾷ ἔσται τις γένεσις· ὁ δὲ θάνατος φθορὰ τις καὶ ἐναντίον ζωῇ, ὥστε γένεσις ἢ ζωὴ καὶ τὸ ζῆν γίνεσθαι· τοῦτο δ’ ἀδύνατον· οὐκ ἄρα ταὐτὸν ἢ ψυχὴ καὶ ἡ ζωὴ. οὐ δὴ συλλελογίσται· συμβαίνει γὰρ, κἂν μὴ τις ταὐτὸ φῇ

τὴν ζωὴν τῇ ψυχῇ, τὸ ἀδύνατον, ἀλλὰ μόνον ἐναντίον ζωὴν μὲν θανάτῳ, ὄντι φθορᾷ, φθορᾷ δὲ γένεσιν. ἀσυλλόγιστοι μὲν οὖν ἀπλῶς οὐκ εἰσὶν οἱ τοιοῦτοι λόγοι, πρὸς δὲ τὸ προκείμενον ἀσυλλόγιστοι. καὶ λανθάνει πολλάκις οὐχ ἥττον αὐτοὺς τοὺς ἐρωτῶντας τὸ τοιοῦτον.

Οἱ μὲν οὖν παρὰ τὸ ἐπόμενον καὶ παρὰ τὸ μὴ αἴτιον λόγοι τοιοῦτοί εἰσιν· οἱ δὲ παρὰ τὰ δύο ἐρωτήματα ἐν ποιεῖν, ὅταν λανθάνῃ πλείω ὄντα καὶ ὡς ἐνὸς ὄντος ἀποδοθῇ ἀπόκρισις μία. ἐπ' ἐνίων μὲν οὖν ῥᾷδιον ἰδεῖν ὅτι πλείω καὶ ὅτι οὐ δοτέον μίαν ἀπόκρισιν, οἷον “πότερον ἢ γῆ θάλαττά ἐστιν ἢ ὁ οὐρανός;” ἐπ' ἐνίων δ' ἥττον, καὶ ὡς ἐνὸς ὄντος ἢ ὁμολογοῦσι τῷ μὴ ἀποκρίνεσθαι τὸ ἐρωτώμενον ἢ ἐλέγχεσθαι φαίνονται. οἷον ἄρ' οὗτος καὶ οὗτός ἐστιν ἄνθρωπος; ὥστ' ἂν τις τύπτῃ τοῦτον καὶ τοῦτον, ἄνθρωπον ἄλλ' οὐκ ἀνθρώπους τυπτήσῃ. ἢ πάλιν, ὧν τὰ μὲν ἐστιν ἀγαθὰ τὰ δ' οὐκ ἀγαθὰ, πάντα ἀγαθὰ ἢ οὐκ ἀγαθὰ; ὁπότερον γὰρ ἂν φῇ, ἔστι μὲν ὡς ἔλεγχον ἢ ψεῦδος φαινόμενον δόξειεν ἂν ποιεῖν· τὸ γὰρ φάναι τῶν μὴ ἀγαθῶν τι εἶναι ἀγαθὸν ἢ τῶν ἀγαθῶν μὴ ἀγαθὸν ψεῦδος. ὅτε δὲ προσληφθέντων τινῶν κἂν ἔλεγχος γίνοιτο ἀληθινός, οἷον εἴ τις δοίῃ ὁμοίως ἐν καὶ πολλὰ λέγεσθαι λευκὰ καὶ γυμνὰ καὶ τυφλά. εἰ γὰρ τυφλὸν τὸ μὴ ἔχον ὄψιν πεφυκὸς δ' ἔχειν, καὶ τυφλὰ ἔσται τὰ μὴ ἔχοντα ὄψιν πεφυκότα δ' ἔχειν. ὅταν οὖν τὸ μὲν ἔχῃ τὸ δὲ μὴ ἔχῃ, τὰ ἄμφω ἔσται ἢ ὀρῶντα ἢ τυφλά· ὅπερ ἀδύνατον.

Ἡ δὲ οὕτως διαιρετέον τοὺς φαινομένους συλλογισμοὺς καὶ ἐλέγχους, ἢ πάντας ἀνακτέον εἰς τὴν τοῦ ἐλέγχου ἄγνοιαν, ἀρχὴν ταύτην ποιησαμένους· ἔστι γὰρ ἅπαντας ἀναλῦσαι τοὺς λεχθέντας τρόπους εἰς τὸν τοῦ ἐλέγχου διορισμόν. πρῶτον μὲν εἰ ἀσυλλόγιστοι· δεῖ γὰρ ἐκ τῶν κειμένων συμβαίνειν τὸ συμπέρασμα ὥστε λέγειν ἐξ ἀνάγκης ἀλλὰ μὴ φαίνεσθαι. ἔπειτα καὶ κατὰ τὰ μέρη τοῦ διορισμοῦ. τῶν μὲν γὰρ ἐν τῇ λέξει οἱ μὲν εἰσι παρὰ τὸ διττόν, οἷον ἢ τε ὁμωνυμία καὶ ὁ λόγος καὶ ἡ ὁμοιοσημοσύνη (σύνηθες γὰρ τὸ πάντα ὡς τότε τι σημαίνειν), ἢ δὲ σύνθεσις καὶ διαίρεσις καὶ προσωδία τῷ μὴ τὸν αὐτὸν εἶναι τὸν λόγον ἢ τὸ ὄνομα τὸ διαφέρον. ἔδει δὲ καὶ τοῦτο, καθάπερ καὶ τὸ πρᾶγμα ταυτόν, εἰ μέλλει ἔλεγχος ἢ συλλογισμὸς ἔσεσθαι, οἷον εἰ λώπιον, μὴ ἰμάτιον συλλογίσασθαι ἀλλὰ λώπιον. ἀληθὲς μὲν γὰρ κἀκεῖνο, ἀλλ' οὐ συλλελογίσται, ἀλλ' ἔτι ἐρωτήματος δεῖ εἰ ταυτόν σημαίνει, πρὸς τὸν ζητοῦντα τὸ διὰ τί.

Οἱ δὲ παρὰ τὸ συμβεβηκὸς ὀρισθέντος τοῦ συλλογισμοῦ

φανεροὶ γίνονται. τὸν αὐτὸν γὰρ ὁρισμὸν δεῖ καὶ τοῦ ἐλέγχου γίνεσθαι, πλὴν προσκεῖσθαι τὴν ἀντίφασιν· ὁ γὰρ ἔλεγχος συλλογισμὸς ἀντιφάσεως. εἰ οὖν μὴ ἔστι συλλογισμὸς τοῦ συμβεβηκότος, οὐ γίνεται ἔλεγχος. οὐ γὰρ εἰ τούτων ὄντων ἀνάγκη τόδ' εἶναι (τοῦτο δ' ἔστι λευκόν), ἀνάγκη λευκὸν εἶναι διὰ τὸν συλλογισμόν. οὐδ' εἰ τὸ τρίγωνον δυοῖν ὀρθαῖν ἴσας ἔχει, συμβέβηκε δ' αὐτῷ σχήματι εἶναι ἢ πρώτῳ ἢ ἀρχῇ, ὅτι σχῆμα ἢ ἀρχὴ ἢ πρῶτον τοῦτο ἔστιν· οὐ γὰρ ἢ σχῆμα οὐδ' ἢ πρῶτον ἀλλ' ἢ τρίγωνον ἢ ἀποδείξεις. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων. ὥστ' εἰ ὁ ἔλεγχος συλλογισμὸς τις, οὐκ ἂν εἴη ὁ κατὰ συμβεβηκὸς ἔλεγχος. ἀλλὰ παρὰ τοῦτο καὶ οἱ τεχνῖται καὶ ὅλως οἱ ἐπιστήμονες ὑπὸ τῶν ἀνεπιστημόνων ἐλέγχονται· κατὰ συμβεβηκὸς γὰρ ποιοῦνται τοὺς συλλογισμοὺς πρὸς τοὺς εἰδότας· οἱ δ' οὐ δυνάμενοι διαιρεῖν ἢ ἐρωτώμενοι διδόασιν ἢ οὐ δόντες οἶονται δεδωκέναι.

Οἱ δὲ παρὰ τὸ πῃ καὶ ἀπλῶς, ὅτι οὐ τοῦ αὐτοῦ ἢ κατάφασις καὶ ἢ ἀπόφασις. τοῦ γὰρ πῃ λευκοῦ τὸ πῃ οὐ λευκόν, τοῦ δ' ἀπλῶς λευκοῦ τὸ ἀπλῶς οὐ λευκὸν ἀπόφασις· εἰ οὖν δόντος πῃ εἶναι λευκὸν ὥς ἀπλῶς εἰρημένου λαμβάνει, οὐ ποιεῖ ἔλεγχον, φαίνεται δὲ διὰ τὴν ἄγνοιαν τοῦ τί ἔστιν ἔλεγχος.

Φανερώτατοι δὲ πάντων οἱ πρότερον λεχθέντες παρὰ τὸν τοῦ ἐλέγχου διορισμόν· διὸ καὶ προσηγορεύθησαν οὕτως· παρὰ γὰρ τοῦ λόγου τὴν ἔλλειψιν ἢ φαντασία γίνεται, καὶ διαιρουμένοις οὕτως κοινὸν ἐπὶ πᾶσι τούτοις θετέον τὴν τοῦ λόγου ἔλλειψιν.

Οἱ δὲ παρὰ τὸ λαμβάνειν τὸ ἐν ἀρχῇ καὶ τὸ ἀναίτιον ὥς αἴτιον τιθεῖναι δηλοῖ διὰ τοῦ ὁρισμοῦ. δεῖ γὰρ τὸ συμπέρασμα “τῷ ταῦτ' εἶναι” συμβαίνειν, ὅπερ οὐκ ἦν ἐν τοῖς ἀναιτίοις· καὶ πάλιν “μὴ ἐναριθμουμένου τοῦ ἐξ ἀρχῆς”, ὅπερ οὐκ ἔχουσιν οἱ παρὰ τὴν αἴτησιν τοῦ ἐν ἀρχῇ.

Οἱ δὲ παρὰ τὸ ἐπόμενον μέρος εἰσὶ τοῦ συμβεβηκότος· τὸ γὰρ ἐπόμενον συμβέβηκε. διαφέρει δὲ τοῦ συμβεβηκότος, ὅτι τὸ μὲν συμβεβηκὸς ἔστιν ἐφ' ἐνὸς μόνου λαβεῖν, οἷον ταῦτ' εἶναι τὸ ξανθὸν καὶ μέλι, καὶ τὸ λευκὸν καὶ κύκνον, τὸ δὲ παρὰ τὸ ἐπόμενον αἰεὶ ἐν πλείοσιν· τὰ γὰρ ἐνὶ καὶ ταῦτ' αὐτὰ καὶ ἀλλήλοις ἀξιοῦμεν εἶναι ταῦτά· διὸ γίνεται παρὰ τὸ ἐπόμενον ἔλεγχος. ἔστι δ' οὐ πάντως ἀληθές, οἷον ἂν ἢ κατὰ συμβεβηκός· καὶ γὰρ ἡ χιὼν καὶ ὁ κύκνος τῷ λευκῷ ταυτόν. ἢ πάλιν, ὥς ἐν τῷ Μελίσσου λόγῳ, τὸ αὐτὸ εἶναι λαμβάνει τὸ γεγονέναι καὶ ἀρχὴν ἔχειν, ἢ τὸ ἴσοις γίνεσθαι καὶ ταῦτ'

μέγεθος λαμβάνειν. ὅτι γὰρ τὸ γεγονὸς ἔχει ἀρχήν, καὶ τὸ ἔχον ἀρχήν γεγονέναι ἀξιοῖ, ὡς ἄμφω ταῦτ' ὄντα τῷ ἀρχὴν ἔχειν, τό τε γεγονὸς καὶ τὸ πεπερασμένον. ὁμοίως δὲ καὶ ἐπὶ τῶν ἴσων γινομένων, εἰ τὰ τὸ αὐτὸ μέγεθος καὶ ἐν λαμβάνοντα ἴσα γίνεται, καὶ τὰ ἴσα γινόμενα ἐν μέγεθος λαμβάνειν. ὥστε τὸ ἐπόμενον λαμβάνει. ἐπεὶ οὖν ὁ παρὰ τὸ συμβεβηκὸς ἔλεγχος ἐν τῇ ἀγνοίᾳ τοῦ ἐλέγχου, φανερόν ὅτι καὶ ὁ παρὰ τὸ ἐπόμενον. ἐπισκεπτέον δὲ τοῦτο καὶ ἄλλως.

Οἱ δὲ παρὰ τὸ τὰ πλείω ἐρωτήματα ἐν ποιεῖν ἐν τῷ μὴ διαρθροῦν ἡμᾶς τὸν τῆς προτάσεως λόγον. ἡ γὰρ πρότασις ἐστὶν ἐν καθ' ἑνός· ὁ γὰρ αὐτὸς ὅρος ἐνὸς μόνου καὶ ἀπλῶς τοῦ πράγματος, οἷον ἀνθρώπου καὶ ἐνὸς μόνου ἀνθρώπου· ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων. εἰ οὖν μία πρότασις ἢ ἐν καθ' ἑνός ἀξιοῦσα, καὶ ἀπλῶς ἔσται πρότασις ἢ τοιαύτη ἐρώτησις. ἐπεὶ δ' ὁ συλλογισμὸς ἐκ προτάσεων, ὁ δ' ἔλεγχος συλλογισμὸς, καὶ ὁ ἔλεγχος ἔσται ἐκ προτάσεων. εἰ οὖν ἢ πρότασις ἐν καθ' ἑνός, φανερόν ὅτι καὶ οὗτος ἐν τῇ τοῦ ἐλέγχου ἀγνοίᾳ· φαίνεται γὰρ εἶναι πρότασις ἢ οὐκ οὔσα πρότασις. εἰ μὲν οὖν δέδωκεν ἀπόκρισιν ὡς πρὸς μίαν ἐρώτησιν, ἔσται ἔλεγχος· εἰ δὲ μὴ δέδωκεν ἀλλὰ φαίνεται, φαινόμενος ἔλεγχος. ὥστε πάντες οἱ τόποι πίπτουσιν εἰς τὴν τοῦ ἐλέγχου ἀγνοίαν, οἱ μὲν οὖν παρὰ τὴν λέξιν, ὅτι φαινομένη *ἡ* ἀντίφασις, ὅπερ ἦν ἴδιον τοῦ ἐλέγχου, οἱ δ' ἄλλοι παρὰ τὸν τοῦ συλλογισμοῦ ὅρον.

Ἡ δ' ἀπάτη γίνεται τῶν μὲν παρὰ τὴν ὁμωνυμίαν καὶ τὸν λόγον τῷ μὴ δύνασθαι διαιρεῖν τὸ πολλαχῶς λεγόμενον (ἐνία γὰρ οὐκ εὔπορον διελεῖν, οἷον τὸ ἐν καὶ τὸ ὄν καὶ τὸ ταυτόν), τῶν δὲ παρὰ σύνθεσιν καὶ διαίρεσιν τῷ μηδὲν οἶεσθαι διαφέρειν συντιθέμενον ἢ διαιρούμενον τὸν λόγον, καθάπερ ἐπὶ τῶν πλείστων. ὁμοίως δὲ καὶ τῶν παρὰ τὴν προσωδίαν· οὐ γὰρ ἄλλο δοκεῖ σημαίνειν ἀνιέμενος καὶ ἐπιτεινόμενος ὁ λόγος, ἐπ' οὐδενὸς ἢ οὐκ ἐπὶ πολλῶν. τῶν δὲ παρὰ τὸ σχῆμα διὰ τὴν ὁμοιότητα τῆς λέξεως. χαλεπὸν γὰρ διελεῖν ποῖα ὡσαύτως καὶ ποῖα ὡς ἐτέρως λέγεται (σχεδὸν γὰρ ὁ τοῦτο δυνάμενος ποιεῖν ἐγγύς ἐστι τοῦ θεωρεῖν τάληθές, μάλιστα δ' ἐπίσταται συνεπινεύειν), ὅτι πᾶν τὸ κατηγορούμενόν τινος ὑπολαμβάνομεν τόδε τι, καὶ ὡς ἐν ὑπακούομεν· τῷ γὰρ ἐνὶ καὶ τῇ οὐσίᾳ μάλιστα δοκεῖ παρέπεσθαι τὸ τόδε τι καὶ τὸ ὄν. διὸ καὶ τῶν παρὰ τὴν λέξιν οὗτος ὁ τρόπος θετέος, πρῶτον μὲν ὅτι μᾶλλον ἢ ἀπάτη γίνεται μετ' ἄλλων σκοπούμενοις ἢ καθ' αὐτούς (ἡ μὲν γὰρ μετ' ἄλλου σκέψις διὰ λόγων, ἡ δὲ καθ'

αὐτὸν οὐχ ἦττον δι' αὐτοῦ τοῦ πράγματος)· εἶτα καὶ καθ' αὐτὸν ἀπατᾶσθαι συμβαίνει, ὅταν ἐπὶ τοῦ λόγου ποιῇται τὴν σκέψιν· ἔτι ἢ μὲν ἀπάτη ἐκ τῆς ὁμοιότητος, ἢ δ' ὁμοιότης ἐκ τῆς λέξεως. τῶν δὲ παρὰ τὸ συμβεβηκὸς διὰ τὸ μὴ δύνασθαι διακρίνειν τὸ ταῦτὸν καὶ τὸ ἕτερον, καὶ ἐν καὶ πολλά, μηδὲ τοῖς ποίοις τῶν κατηγορημάτων πάντα ταῦτά καὶ τῷ πράγματι συμβέβηκεν. ὁμοίως δὲ καὶ τῶν παρὰ τὸ ἐπόμενον· μέρος γάρ τι τοῦ συμβεβηκότος τὸ ἐπόμενον. ἔτι καὶ ἐπὶ πολλῶν φαίνεται καὶ ἀξιοῦται οὕτως, εἰ τόδε ἀπὸ τοῦδε μὴ χωρίζεται, μηδ' ἀπὸ θατέρου χωρίζεσθαι θάτερον. τῶν δὲ παρὰ τὴν ἔλλειψιν τοῦ λόγου καὶ τῶν παρὰ τὸ πῃ καὶ ἀπλῶς ἐν τῷ παρὰ μικρὸν ἢ ἀπάτη· ὥς γὰρ οὐδὲν προσσημαῖνον τὸ τί ἢ πῇ ἢ τὸ πὼς ἢ τὸ νῦν καθόλου συγχωροῦμεν. ὁμοίως δὲ καὶ ἐπὶ τῶν τὸ ἐν ἀρχῇ λαμβανόντων καὶ τῶν ἀναιτίων καὶ ὅσοι τὰ πλείω ἐρωτήματα ὥς ἐν ποιοῦσιν· ἐν ᾗ πασι γὰρ ἢ ἀπάτη διὰ τὸ παρὰ μικρὸν· οὐ γὰρ διακριβοῦμεν οὔτε τῆς προτάσεως οὔτε τοῦ συλλογισμοῦ τὸν ὅρον διὰ τὴν εἰρημένην αἰτίαν.

Ἐπεὶ δ' ἔχομεν παρ' ὅποσα γίνονται οἱ φαινόμενοι συλλογισμοί, ἔχομεν καὶ παρ' ὅποσα οἱ σοφιστικοὶ γένοιντ' ἂν συλλογισμοὶ καὶ ἔλεγχοι. λέγω δὲ σοφιστικὸν ἔλεγχον καὶ συλλογισμόν οὐ μόνον τὸν φαινόμενον συλλογισμόν ἢ ἔλεγχον μὴ ὄντα δέ, ἀλλὰ καὶ τὸν ὄντα μὲν φαινόμενον δὲ οἰκεῖον τοῦ πράγματος. εἰσὶ δ' οὗτοι οἱ μὴ κατὰ τὸ πρᾶγμα ἐλέγχοντες καὶ δεικνύντες ἀγνοοῦντας, ὅπερ ἦν τῆς πειραστικῆς. ἔστι δ' ἢ πειραστικὴ μέρος τῆς διαλεκτικῆς· αὕτη δὲ δύναται συλλογίζεσθαι ψεῦδος δι' ἀγνοίαν τοῦ διδόντος τὸν λόγον. οἱ δὲ σοφιστικοὶ ἔλεγχοι, ἂν καὶ συλλογίζωνται τὴν ἀντίφασιν, οὐ ποιοῦσι δῆλον εἰ ἀγνοεῖ· καὶ γὰρ τὸν εἰδότα ἐμποδίζουσι τούτοις τοῖς λόγοις.

Ὅτι δ' ἔχομεν αὐτοὺς τῇ αὐτῇ μεθόδῳ, δῆλον· παρ' ὅσα γὰρ φαίνεται τοῖς ἀκούουσιν ὥς ἠρωτημένα συλλελογίσθαι, παρὰ τοσαῦτα κἂν τῷ ἀποκρινομένῳ δόξειεν, ὥστ' ἔσονται συλλογισμοὶ ψευδεῖς διὰ τούτων ἢ πάντων ἢ ἐνίων· ὁ γὰρ μὴ ἐρωτηθεὶς οἶεται δεδωκέναι, κἂν ἐρωτηθεὶς θεῖη. πλὴν ἐπὶ γέ τινων ἅμα συμβαίνει προσερωτᾶν τὸ ἐνδεὲς καὶ τὸ ψεῦδος ἐμφανίζειν, οἷον ἐν τοῖς παρὰ τὴν λέξιν καὶ τὸν σολοικισμόν. εἰ οὖν οἱ παραλογισμοὶ τῆς ἀντιφάσεως παρὰ τὸν φαινόμενον ἔλεγχόν εἰσι, δῆλον ὅτι παρὰ τοσαῦτα ἂν καὶ τῶν ψευδῶν εἴησαν συλλογισμοὶ παρ' ὅσα καὶ ὁ φαινόμενος ἔλεγχος. ὁ δὲ φαινόμενος παρὰ τὰ μόρια τοῦ ἀληθινοῦ·

ἐκάστου γὰρ ἐκλείποντος φανείη ἂν ἔλεγχος, οἷον ὁ παρὰ τὸ μὴ συμβαῖνον διὰ τὸν λόγον (ὁ εἰς τὸ ἀδύνατον), καὶ ὁ τὰς δύο ἐρωτήσεις μίαν ποιῶν παρὰ τὴν πρότασιν, καὶ ἀντὶ τοῦ καθ' αὐτὸ ὁ παρὰ τὸ συμβεβηκός, καὶ τὸ τούτου μόριον, ὁ παρὰ τὸ ἐπόμενον· ἔτι τὸ μὴ ἐπὶ τοῦ πράγματος ἀλλ' ἐπὶ τοῦ λόγου συμβαίνειν· εἴτ', ἀντὶ τοῦ καθόλου τὴν ἀντίφασιν καὶ κατὰ ταῦτ' οὕτως καὶ πρὸς ταῦτ' οὕτως, παρὰ τὸ ἐπὶ τι, ἢ παρ' ἑκάστων τούτων· ἔτι παρὰ τὸ “μὴ ἐναριθμουμένου τοῦ ἐν ἀρχῇ” <τὸ> τὸ ἐν ἀρχῇ λαμβάνειν. ὥστ' ἔχομεν ἂν παρ' ὅσα γίνονται οἱ παραλογισμοί· παρὰ πλείω μὲν γὰρ οὐκ ἂν εἶεν, παρὰ δὲ τὰ εἰρημένα ἔσονται πάντες.

Ἔστι δ' ὁ σοφιστικὸς ἔλεγχος οὐχ ἁπλῶς ἔλεγχος ἀλλὰ πρὸς τινα· καὶ ὁ συλλογισμὸς ὡσαύτως. ἂν μὲν γὰρ μὴ λάβῃ ὁ τε παρὰ τὸ ὁμώνυμον ἐν σημαίνειν καὶ ὁ παρὰ τὴν ὁμοιοσημοσύνην τὸ μόνον τότε, καὶ οἱ ἄλλοι ὡσαύτως, οὐτ' ἔλεγχον οὔτε συλλογισμοὶ ἔσονται, οὔθ' ἁπλῶς οὔτε πρὸς τὸν ἐρωτώμενον. ἐὰν δὲ λάβωσι, πρὸς μὲν τὸν ἐρωτώμενον ἔσονται, ἁπλῶς δ' οὐκ ἔσονται· οὐ γὰρ ἐν σημαῖνον εἰλήφασιν ἀλλὰ φαινόμενον, καὶ παρὰ τοῦδε.

Παρὰ πόσα δ' ἐλέγχονται οἱ ἐλεγχόμενοι, οὐ δεῖ πειρᾶσθαι λαμβάνειν ἄνευ τῆς τῶν ὄντων ἐπιστήμης ἀπάντων. τοῦτο δ' οὐ μίᾳς ἔστι τέχνης· ἅπειροι γὰρ ἴσως αἱ ἐπιστήμαι, ὥστε δηλὸν ὅτι καὶ αἱ ἀποδείξεις. ἔλεγχον δ' εἰσὶ καὶ ἀληθεῖς· ὅσα γὰρ ἔστιν ἀποδείξαι, ἔστι καὶ ἐλέγχειν τὸν θέμενον τὴν ἀντίφασιν τοῦ ἀληθοῦς· οἷον εἰ σύμμετρον τὴν διάμετρον ἔθηκεν, ἐλέγξειεν ἂν τις τῇ ἀποδείξει ὅτι ἀσύμμετρος. ὥστε πάντων δεήσει ἐπιστήμονας εἶναι· οἱ μὲν γὰρ ἔσονται παρὰ τὰς ἐν γεωμετρίας ἀρχὰς καὶ τὰ τούτων συμπεράσματα, οἱ δὲ παρὰ τὰς ἐν ἱατρικῇ, οἱ δὲ παρὰ τὰς τῶν ἄλλων ἐπιστημῶν. ἀλλὰ μὴν καὶ οἱ ψευδεῖς ἔλεγχον ὁμοίως ἂν εἶεν ἐν ἀπείροις· καθ' ἐκάστην γὰρ τέχνην ἔστι ψευδὴς συλλογισμὸς, οἷον κατὰ γεωμετρίαν ὁ γεωμετρικὸς καὶ κατὰ ἱατρικὴν ὁ ἱατρικὸς· λέγω δὲ τὸ κατὰ τὴν τέχνην τὸ κατὰ τὰς ἐκείνης ἀρχάς. δηλὸν οὖν ὅτι οὐ πάντων τῶν ἐλέγχων ἀλλὰ τῶν παρὰ τὴν διαλεκτικὴν ληπτέον τοὺς τόπους· οὗτοι γὰρ κοινοὶ πρὸς ἅπασαν τέχνην καὶ δύναμιν. καὶ τὸν μὲν καθ' ἐκάστην ἐπιστήμην ἔλεγχον τοῦ ἐπιστήμονος ἔστι θεωρεῖν, εἴ τε μὴ ὧν φαίνεται, εἴ τ' ἔστι, διὰ τί ἔστι· τὸν δ' ἐκ τῶν κοινῶν καὶ ὑπὸ μηδεμίαν τέχνην τῶν διαλεκτικῶν. εἰ γὰρ ἔχομεν ἐξ ὧν οἱ ἐνδοξοὶ συλλογισμοὶ περὶ ὅτιον, ἔχομεν ἐξ ὧν οἱ ἔλεγχον· ὁ γὰρ ἔλεγχός ἐστιν ἀντιφάσεως συλλογισμὸς, ὥστ' ἢ εἰς ἢ δύο συλλογισμοὶ

ἀντιφάσεως ἔλεγχός ἐστιν. ἔχομεν ἄρα παρ' ὅποσα πάντες εἰσὶν οἱ τοιοῦτοι. εἰ δὲ τοῦτ' ἔχομεν, καὶ τὰς λύσεις ἔχομεν· αἱ γὰρ τούτων ἐνστάσεις λύσεις εἰσὶν. ἔχομεν δέ, παρ' ὅποσα γίνονται, καὶ τοὺς φαινομένους, φαινομένους δὲ οὐχ ὅτι οὐκ ἀλλὰ τοῖς τοιοῖσδε· ἀόριστα γὰρ ἐστὶν ἐάν τις σκοπῇ παρ' ὅποσα φαίνονται τοῖς τυχοῦσιν. ὥστε φανερόν ὅτι τοῦ διαλεκτικοῦ ἐστὶ τὸ δύνασθαι λαβεῖν παρ' ὅσα γίνεται διὰ τῶν κοινῶν ἢ ὧν ἔλεγχος ἢ φαινόμενος ἔλεγχος, καὶ ἢ διαλεκτικὸς ἢ φαινόμενος διαλεκτικὸς ἢ πειραστικός.

Οὐκ ἔστι δὲ διαφορὰ τῶν λόγων ἣν λέγουσιν οἱ τινες, τὸ εἶναι τοὺς μὲν πρὸς τοῦνομα λόγους, ἑτέρους δὲ πρὸς τὴν διάνοιαν· ἄτοπον γὰρ τὸ ὑπολαμβάνειν ἄλλους μὲν εἶναι πρὸς τοῦνομα λόγους, ἑτέρους δὲ πρὸς τὴν διάνοιαν, ἀλλ' οὐ τοὺς αὐτοὺς. τί γὰρ ἐστὶ τὸ μὴ πρὸς τὴν διάνοιαν ἀλλ' ἢ ὅταν μὴ χρῆται τῷ ὀνόματι ἐφ' ᾧ οἰόμενος ἐρωτᾶσθαι ὁ ἐρωτώμενος ἔδωκεν; τὸ δ' αὐτὸ τοῦτό ἐστὶ καὶ πρὸς τοῦνομα· τὸ δὲ πρὸς τὴν διάνοιαν, ὅταν ἐφ' ᾧ ἔδωκεν διανοηθεῖς. εἰ δὴ τινες πλείω σημαίνοντος τοῦ ὀνόματος οἰοῖντο ἐν σημαίνειν - καὶ ὁ ἐρωτῶν καὶ ὁ ἐρωτώμενος (οἷον ἴσως τὸ ὄν ἢ τὸ ἐν πολλὰ σημαίνει, ἀλλὰ καὶ ὁ ἀποκρινόμενος καὶ ὁ ἐρωτῶν [Ζήνων] ἐν οἰόμενοι εἶναι εἰρήκασιν, καὶ ἔστιν ὁ λόγος ὅτι ἐν πάντα), <ἄρ'> οὗτος πρὸς τοῦνομα ἔσται ἢ πρὸς τὴν διάνοιαν τοῦ ἐρωτωμένου διειλεγμένος; εἰ δέ γέ τις πολλὰ οἶται σημαίνειν, δηλὸν ὅτι οὐ πρὸς τὴν διάνοιαν. πρῶτον μὲν γὰρ περὶ τοὺς τοιοῦτους ἐστὶ λόγους τὸ πρὸς τοῦνομα καὶ πρὸς τὴν διάνοιαν ὅσοι πλείω σημαίνουσιν, εἴτα περὶ ὄντινόν ἐστιν· οὐ γὰρ ἐν τῷ λόγῳ ἐστὶ τὸ πρὸς τὴν διάνοιαν εἶναι, ἀλλ' ἐν τῷ τὸν ἀποκρινόμενον ἔχειν πῶς πρὸς τὰ δεδομένα. εἴτα πρὸς τοῦνομα πάντα ἐνδέχεται αὐτοὺς εἶναι· τὸ γὰρ πρὸς τοῦνομα τὸ μὴ πρὸς τὴν διάνοιαν εἶναι ἐστὶν ἐνταῦθα. εἰ γὰρ μὴ πάντες, ἔσονται οἱ τινες ἕτεροι οὔτε πρὸς τοῦνομα οὔτε πρὸς τὴν διάνοιαν· οἱ δὲ φασὶ πάντα, καὶ διαιροῦνται ἢ πρὸς τοῦνομα ἢ πρὸς τὴν διάνοιαν εἶναι πάντα, ἄλλους δ' οὐ. ἀλλὰ μὴν ὅσοι συλλογισμοὶ εἰσὶ παρὰ τὸ πλεοναχῶς, τούτων εἰσὶ τινες οἱ παρὰ τοῦνομα. ἀτόπως μὲν γὰρ καὶ εἴρηται τὸ παρὰ τοῦνομα φάναι πάντα τοὺς παρὰ τὴν λέξιν· ἀλλ' οὖν εἰσὶ τινες παραλογισμοὶ οὐ τῷ τὸν ἀποκρινόμενον πρὸς τούτους ἔχειν πῶς, ἀλλὰ τῷ τοιονδὶ ἐρώτημα τὸν λόγον αὐτὸν ἔχειν ὃ πλείω σημαίνει.

Ὅλος τε ἄτοπον τὸ περὶ ἐλέγχου διαλέγεσθαι ἀλλὰ μὴ πρότερον περὶ συλλογισμοῦ· ὁ γὰρ ἔλεγχος συλλογισμὸς ἐστὶν, ὥστε

χρή καὶ περὶ συλλογισμοῦ πρότερον ἢ περὶ ψευδοῦς ἐλέγχου· ἔστι γὰρ ὁ τοιοῦτος ἔλεγχος φαινόμενος συλλογισμὸς ἀντιφάσεως. διὸ ἢ ἐν τῷ συλλογισμῷ ἔσται τὸ αἴτιον ἢ ἐν τῇ ἀντιφάσει (προσκειῖσθαι γὰρ δεῖ τὴν ἀντίφασιν), ὅτε δ' ἐν ἀμφοῖν, ἂν ἢ φαινόμενος ἔλεγχος. ἔστι δὲ ὁ μὲν τοῦ “σιγῶντα λέγειν” ἐν τῇ ἀντιφάσει, οὐκ ἐν τῷ συλλογισμῷ, ὁ δὲ “ἂ μὴ ἔχει τις, δοίη ἅν” ἐν ἀμφοῖν, ὁ δὲ ὅτι ἡ Ὀμήρου ποιήσις σχῆμα διὰ τοῦ “κύκλος” ἐν τῷ συλλογισμῷ. ὁ δ' ἐν μηδετέρῳ ἀληθὴς συλλογισμός.

Ἀλλὰ δὴ, ὅθεν ὁ λόγος ἤλθε, πότερον οἱ ἐν τοῖς μαθήμασι λόγοι πρὸς τὴν διάνοιάν εἰσιν ἢ οὐ; καὶ εἴ τινα δοκεῖ πολλὰ σημαίνειν τὸ τρίγωνον, καὶ ἔδωκε μὴ ὡς τοῦτο τὸ σχῆμα ἐφ' οὗ συνεπεράνατο ὅτι δύο ὀρθαί, πότερον πρὸς τὴν διάνοιαν οὗτος διείλεκται τὴν ἐκείνου ἢ οὐ;

Ἔτι εἰ πολλὰ μὲν σημαίνει τοῦνομα, ὁ δὲ μὴ νοεῖ μηδ' οἶεται, πῶς οὗτος οὐ πρὸς τὴν διάνοιαν διείλεκται; ἢ πῶς δεῖ ἐρωτᾶν πλὴν διδόντα διαίρεσιν, εἴ τ' ἐρωτήσῃ τις εἰ ἔστι σιγῶντα λέγειν ἢ οὐ, ἢ ἔστι μὲν ὡς οὐ, ἔστι δ' ὡς ναί, εἰ δὴ τις δοίη μηδαμῶς, ὁ δὲ διαλεχθεῖν, ἅρ' οὐ πρὸς τὴν διάνοιαν διείλεκται; καίτοι ὁ λόγος δοκεῖ τῶν παρὰ τὸ ὄνομα εἶναι. οὐκ ἄρα ἐστὶ γένος τι λόγων τὸ πρὸς τὴν διάνοιαν. ἀλλ' οἱ μὲν πρὸς τοῦνομά εἰσι· καίτοι οὗτοι οὐ πάντες, οὐχ ὅτι οἱ ἔλεγχοι ἀλλ' οὐδ' οἱ φαινόμενοι ἔλεγχοι. εἰσὶ γὰρ καὶ μὴ παρὰ τὴν λέξιν φαινόμενοι ἔλεγχοι, οἷον οἱ παρὰ τὸ συμβεβηκὸς καὶ ἕτεροι.

Εἰ δέ τις ἀξιοῖ διαιρεῖν, ὅτι “λέγω δὲ σιγῶντα λέγειν τὰ μὲν ὥδι τὰ δ' ὥδι”, ἀλλὰ τοῦτό γ' ἐστὶ πρῶτον μὲν ἄτοπον, τὸ ἀξιοῦν· ἐνίστε γὰρ οὐ δοκεῖ τὸ ἐρωτώμενον πολλαχῶς ἔχειν, ἀδύνατον δὲ διαιρεῖν ὃ μὴ οἶεται. ἔπειτα τὸ διδάσκειν τί ἄλλο ἔσται; φανερόν γὰρ ποιήσει ὡς ἔχει τῷ μῆτ' ἐσκεμμένῳ μῆτ' εἰδότι μῆθ' ὑπολαμβάνοντι ὅτι ἄλλως λέγεται· ἐπεὶ καὶ ἐν τοῖς διπλοῖς τί κωλύει τοῦτο παθεῖν; “ἄρα ἴσαι αἱ μονάδες ταῖς δυάσιν ἐν τοῖς τέτταρσιν; εἰσὶ δὲ [δυάδες] αἱ μὲν ὥδι ἐνοῦσαι αἱ δὲ ὥδι.” καὶ “ἄρα τῶν ἐναντίων μία ἐπιστήμη ἢ οὐ; ἔστι δ' ἐναντία τὰ μὲν γνωστὰ τὰ δ' ἄγνωστα”. ὥστ' ἔοικεν ἀγνοεῖν ὁ τοῦτο ἀξιῶν ὅτι ἕτερον τὸ διδάσκειν τοῦ διαλέγεσθαι, καὶ ὅτι δεῖ τὸν μὲν διδάσκοντα μὴ ἐρωτᾶν ἀλλ' αὐτὸν δηλα ποιεῖν, τὸν δ' ἐρωτᾶν.

Ἔτι τὸ φάναι ἢ ἀποφάναι ἀξιοῦν οὐ δεικνύντος ἐστὶν ἀλλὰ πεῖραν λαμβάνοντος· ἢ γὰρ πειραστική ἐστὶ διαλεκτική τις καὶ θεωρεῖ οὐ τὸν εἰδότα ἀλλὰ τὸν ἀγνοοῦντα καὶ προσποιούμενον. ὁ

μὲν οὖν κατὰ τὸ πρᾶγμα θεωρῶν τὰ κοινὰ διαλεκτικός, ὁ δὲ τοῦτο φαινομένως ποιῶν σοφιστικός, καὶ συλλογισμὸς ἐριστικός καὶ σοφιστικός ἐστὶν εἷς μὲν ὁ φαινόμενος συλλογιστικὸς περὶ ὧν ἡ διαλεκτικὴ πειραστικὴ ἐστὶ, κἂν ἀληθὲς τὸ συμπέρασμα ᾗ (τοῦ γὰρ διὰ τί ἀπατητικός ἐστι), καὶ ὅσοι μὴ ὄντες κατὰ τὴν ἐκάστου μέθοδον παραλογισμοὶ δοκοῦσιν εἶναι κατὰ τὴν τέχνην. τὰ γὰρ ψευδογραφήματα οὐκ ἐριστικά (κατὰ γὰρ τὰ ὑπὸ τὴν τέχνην οἱ παραλογισμοί), οὐδέ γ' εἴ τί ἐστι ψευδογράφημα περὶ ἀληθές, οἷον τὸ Ἰπποκράτους ἢ ὁ τετραγωνισμὸς ὁ διὰ τῶν μηνίσκων. ἀλλ' ὥς Βρύσων ἐτετραγώνιζε τὸν κύκλον, εἰ καὶ τετραγωνίζεται ὁ κύκλος, ἀλλ' ὅτι οὐ κατὰ τὸ πρᾶγμα, διὰ τοῦτο σοφιστικός. ὥστε ὁ τε περὶ τῶνδε φαινόμενος συλλογισμὸς ἐριστικός λόγος, καὶ ὁ κατὰ τὸ πρᾶγμα φαινόμενος συλλογισμὸς, κἂν ἢ συλλογισμὸς, ἐριστικός λόγος· φαινόμενος γὰρ ἐστὶ κατὰ τὸ πρᾶγμα, ὥστ' ἀπατητικός καὶ ἄδικος. ὥσπερ γὰρ ἡ ἐν ἀγῶνι ἀδικία εἰδὸς τι ἔχει καὶ ἔστιν ἀδικομαχία τις, οὕτως ἐν ἀντιλογίᾳ ἀδικομαχία ἢ ἐριστικὴ ἐστὶν· ἐκεῖ τε γὰρ οἱ πάντως νικᾶν προαιρούμενοι πάντων ἄπτονται, καὶ ἐνταῦθα οἱ ἐριστικοί. οἱ μὲν οὖν τῆς νίκης αὐτῆς χάριν τοιοῦτοι ἐριστικοὶ ἄνθρωποι καὶ φιλέριδες δοκοῦσιν εἶναι, οἱ δὲ δόξης χάριν τῆς εἰς χρηματισμὸν σοφιστικοί· ἡ γὰρ σοφιστικὴ ἐστὶν, ὥσπερ εἵπομεν, χρηματιστικὴ τις ἀπὸ σοφίας φαινομένης· διὸ φαινομένης ἀποδείξεως ἐφίενται, καὶ τῶν λόγων τῶν αὐτῶν μὲν [εἴσιν] οἱ φιλέριδες καὶ οἱ σοφισταί, ἀλλ' οὐ τῶν αὐτῶν ἕνεκεν, καὶ λόγος ὁ αὐτὸς μὲν ἔσται σοφιστικός καὶ ἐριστικός, ἀλλ' οὐ κατὰ ταῦτόν, ἀλλ' ἢ μὲν νίκης φαινομένης «ἕνεκα», ἐριστικός, ἢ δὲ σοφίας, σοφιστικός· καὶ γὰρ ἡ σοφιστικὴ ἐστὶ φαινομένη σοφία τις ἀλλ' οὐκ οὕσα. ὁ δ' ἐριστικός ἐστὶ πως οὕτως ἔχων πρὸς τὸν διαλεκτικὸν ὥς ὁ ψευδογράφος πρὸς τὸν γεωμετρικόν· ἐκ γὰρ τῶν αὐτῶν τῷ διαλεκτικῷ παραλογίζεται, καὶ ὁ ψευδογράφος τῷ γεωμέτρῳ. ἀλλ' ὁ μὲν οὐκ ἐριστικός, ὅτι ἐκ τῶν ἀρχῶν καὶ συμπερασμάτων τῶν ὑπὸ τὴν τέχνην ψευδογραφεῖ· ὁ δ' ὑπὸ τὴν διαλεκτικὴν περὶ τᾶλλα ὅτι ἐριστικός ἔσται δῆλον. οἷον ὁ τετραγωνισμὸς ὁ μὲν διὰ τῶν μηνίσκων οὐκ ἐριστικός, ὁ δὲ Βρύσωνος ἐριστικός· καὶ τὸν μὲν οὐκ ἔστι μετενεγκεῖν ἀλλ' ἢ πρὸς γεωμετρίαν μόνον, διὰ τὸ ἐκ τῶν ιδίων εἶναι ἀρχῶν, τὸν δὲ πρὸς πολλούς, ὅσοι μὴ ἴσασι τὸ δυνατόν ἐν ἐκάστῳ καὶ τὸ ἀδύνατον· ἀρμόσει γάρ. ἢ ὥς Ἀντιφῶν ἐτετραγώνιζεν. ἢ εἴ τις μὴ φαίη βέλτιον εἶναι ἀπὸ δείπνου περιπατεῖν διὰ τὸν

Ζήνωνος λόγον, οὐκ ἰατρικός· κοινὸς γάρ. εἰ μὲν οὖν πάντῃ ὁμοίως εἶχεν ὁ ἐριστικός πρὸς τὸν διαλεκτικὸν τῷ ψευδογράφῳ πρὸς τὸν γεωμέτρην, οὐκ ἂν ἦν περὶ ἐκείνων ἐριστικός· νῦν δ' οὐκ ἔστιν ὁ διαλεκτικός περὶ γένος τι ὠρισμένον, οὐδὲ δεικτικός οὐδενός, οὐδὲ τοιοῦτος οἷος ὁ καθόλου. οὔτε γάρ ἐστιν ἅπαντα ἐν ἐνί τινι γένει, οὔτε, εἰ εἶη, οἷόν τε ὑπὸ τὰς αὐτὰς ἀρχὰς εἶναι τὰ ὄντα. ὥστ' οὐδεμία τέχνη τῶν δεικνουσῶν τινα φύσιν ἐρωτητική ἐστιν· οὐ γὰρ ἔξεστιν ὁποτερονοῦν τῶν μορίων δοῦναι· συλλογισμὸς γὰρ οὐ γίνεται ἐξ ἀμφοῖν. ἡ δὲ διαλεκτικὴ ἐρωτητικὴ ἐστιν, εἰ δ' ἐδείκνυνεν, εἰ καὶ μὴ πάντα, ἀλλὰ τὰ γε πρῶτα καὶ τὰς οἰκείας ἀρχὰς οὐκ ἂν ἠρώτα· μὴ διδόντος γὰρ οὐκ ἂν ἔτι εἶχεν ἐξ ὧν ἔτι διαλέξεται πρὸς τὴν ἔνστασιν. ἡ δ' αὐτὴ καὶ πειραστικὴ· οὐδὲ γὰρ ἡ πειραστικὴ τοιαύτη ἐστὶν οἷα ἡ γεωμετρία, ἀλλ' ἦν ἂν ἔχοι καὶ μὴ εἰδώς τις. ἔξεστι γὰρ πεῖραν λαβεῖν καὶ τὸν μὴ εἰδότα τὸ πρᾶγμα τοῦ μὴ εἰδότος, εἴπερ καὶ δίδωσιν, οὐκ ἐξ ὧν οἶδεν οὐδ' ἐκ τῶν ἰδίων ἀλλ' ἐκ τῶν ἐπομένων, ὅσα τοιαῦτά ἐστιν ἃ εἰδότα μὲν οὐδὲν κωλύει μὴ εἰδέναι τὴν τέχνην, μὴ εἰδότα δ' ἀνάγκη ἀγνοεῖν. (ὥστε φανερόν ὅτι οὐδενὸς ὠρισμένου ἡ πειραστικὴ ἐπιστήμη ἐστίν. διὸ καὶ περὶ πάντων ἐστί· πᾶσαι γὰρ αἱ τέχναι χρῶνται καὶ κοινοῖς τισιν. διὸ πάντες καὶ οἱ ἰδιῶται τρόπον τινὰ χρῶνται τῇ διαλεκτικῇ καὶ πειραστικῇ· πάντες γὰρ μέχρι τινὸς ἐπιχειροῦσιν ἀνακρίνειν τοὺς ἐπαγγελλομένους.) ταῦτα δ' ἐστὶ τὰ κοινά· ταῦτα γὰρ οὐδὲν ἦττον ἴσασιν αὐτοί, κἂν δοκῶσι λίαν ἔξω λέγειν. ἐλέγχουσιν οὖν ἅπαντες· ἀτέχνως γὰρ μετέχουσι τούτου οὗ ἐντέχνως ἡ διαλεκτικὴ ἐστί, καὶ ὁ τέχνη συλλογιστικὴ πειραστικός διαλεκτικός. ἐπεὶ δ' ἐστὶ πολλὰ μὲν ταῦτα κατὰ πάντων, οὐ τοιαῦτα δ' ὥστε φύσιν τινὰ εἶναι καὶ γένος ἀλλ' οἷα αἱ ἀποφάσεις, τὰ δ' οὐ τοιαῦτα ἀλλὰ ἴδια, ἔστιν ἐκ τούτων περὶ ἀπάντων πεῖραν λαμβάνειν καὶ εἶναι τέχνην τινά, καὶ μὴ τοιαύτην εἶναι οἷαι αἱ δεικνύουσαι. διόπερ ὁ ἐριστικός οὐκ ἔστιν οὕτως ἔχων πάντῃ ὡς ὁ ψευδογράφος· οὐ γὰρ ἔσται παραλογιστικός ἐξ ὠρισμένου τινὸς γένους ἀρχῶν, ἀλλὰ περὶ πᾶν γένος ἔσται ὁ ἐριστικός.

Τρόποι μὲν οὖν εἰσιν οὗτοι τῶν σοφιστικῶν ἐλέγχων. ὅτι δ' ἐστὶ τοῦ διαλεκτικοῦ τὸ θεωρῆσαι περὶ τούτων καὶ δύνασθαι ταῦτα ποιεῖν, οὐ χαλεπὸν ἰδεῖν· ἡ γὰρ περὶ τὰς προτάσεις μέθοδος ἅπασαν ἔχει ταύτην τὴν θεωρίαν.

Καὶ περὶ μὲν τῶν ἐλέγχων εἴρηται τῶν φαινομένων. περὶ δὲ τοῦ ψευδόμενον τι δεῖξαι καὶ τὸν λόγον εἰς ἄδοξόν τι ἀγαγεῖν (τοῦτο γὰρ

ἦν δεύτερον τῆς σοφιστικῆς προαιρέσεως) - πρῶτον μὲν οὖν ἐκ τοῦ πυνθάνεσθαι πως καὶ διὰ τῆς ἐρωτήσεως συμβαίνει μάλιστα. τὸ γὰρ [πρὸς] μηδὲν ὀρίσαντα κείμενον ἐρωτᾶν θηρευτικόν ἐστι τούτων· εἰκῇ γὰρ λέγοντες ἀμαρτάνουσι μᾶλλον· εἰκῇ δὲ λέγουσιν ὅταν μηδὲν ἔχωσι προκείμενον. τὸ τε ἐρωτᾶν πολλά, κἂν ὠρισμένον ἢ πρὸς ὃ διαλέγεται, καὶ τὸ τὰ δοκοῦντα λέγειν ἀξιῶν, ποιεῖ τιν' εὐπορίαν τοῦ εἰς ἄδοξον ἀγαγεῖν ἢ ψεῦδος, ἐάν τε ἐρωτώμενος φῇ ἢ ἀποφῇ τούτων τι, ἄγει πρὸς ἃ ἐπιχειρήματος εὐπορεῖ. δύνανται δὲ νῦν ἥττον κακουργεῖν διὰ τούτων ἢ πρότερον· ἀπαιτοῦνται γὰρ τί τοῦτο πρὸς τὸ ἐν ἀρχῇ. στοιχεῖον δὲ τοῦ τυχεῖν ἢ ψεύδους τινὸς ἢ ἀδόξου τὸ μηδεμίαν εὐθὺς ἐρωτᾶν θέσιν, ἀλλὰ φάσκειν ἐρωτᾶν μαθεῖν βουλόμενον· χώραν γὰρ ἐπιχειρήματος ἢ σκῆψις ποιεῖ.

Πρὸς δὲ τὸ ψευδόμενον δεῖξαι ἴδιος τόπος ὁ σοφιστικός, τὸ ἄγειν πρὸς τοιαῦτα πρὸς ἃ εὐπορεῖ λόγων. ἔστι δὲ καὶ καλῶς καὶ μὴ καλῶς τοῦτο ποιεῖν, καθάπερ ἐλέχθη πρότερον.

Πάλιν πρὸς τὸ παράδοξα λέγειν σκοπεῖν ἐκ τίνος γένους ὁ διαλεγόμενος, εἴτ' ἐπερωτᾶν ὃ τοῖς πολλοῖς οὗτοι λέγουσι παράδοξον· ἔστι γὰρ ἐκάστοις τι τοιοῦτον. στοιχεῖον δὲ τούτων τὸ τὰς ἐκάστων εἰληφέναι θέσεις ἐν ταῖς προτάσεσιν. λύσις δὲ καὶ τούτων ἢ προσήκουσα φέρεται τῷ ἐμφανίζειν ὅτι οὐ διὰ τὸν λόγον συμβαίνει τὸ ἄδοξον· αἰεὶ δὲ τοῦτο καὶ βούλεται ὁ ἀγωνιζόμενος.

Ἔτι δ' ἐκ τῶν βουλήσεων καὶ τῶν φανερῶν δοξῶν. οὐ γὰρ ταῦτα βούλονται τε καὶ φασίν, ἀλλὰ λέγουσι μὲν τοὺς εὐσχημονεστάτους τῶν λόγων, βούλονται δὲ τὰ φαινόμενα λυσιτελεῖν· οἷον τεθνάναι καλῶς μᾶλλον ἢ ζῆν ἢδέως φασὶ δεῖν, καὶ πένεσθαι δικαίως μᾶλλον ἢ πλουτεῖν αἰσchrῶς, βούλονται δὲ τάναντία. τὸν μὲν οὖν λέγοντα κατὰ τὰς βουλῆσεις εἰς τὰς φανεράς δόξας ἀκτέον, τὸν δὲ κατὰ ταύτας εἰς τὰς ἀποκεκρυμμένας· ἀμφοτέρως γὰρ ἀναγκαῖον παράδοξα λέγειν· ἢ γὰρ πρὸς τὰς φανεράς ἢ πρὸς τὰς ἀφανεῖς δόξας ἐροῦσιν ἐναντία.

Πλείστος δὲ τόπος ἐστὶ τοῦ ποιεῖν παράδοξα λέγειν, ὥσπερ καὶ ὁ Καλλικλῆς ἐν τῷ Γοργίᾳ γέγραπται λέγων, καὶ οἱ ἀρχαῖοι δὲ πάντες ᾤοντο συμβαίνειν, παρὰ τὸ κατὰ φύσιν καὶ κατὰ τὸν νόμον· ἐναντία γὰρ εἶναι φύσιν καὶ νόμον, καὶ τὴν δικαιοσύνην κατὰ νόμον μὲν εἶναι καλόν, κατὰ φύσιν δ' οὐ καλόν. δεῖ οὖν πρὸς μὲν τὸν εἰπόντα κατὰ φύσιν κατὰ νόμον ἀπαντᾶν, πρὸς δὲ τὸν κατὰ νόμον ἐπὶ τὴν φύσιν ἄγειν· ἀμφοτέρως γὰρ συμβαίνει λέγειν παράδοξα. ἦν δὲ τὸ μὲν κατὰ

φύσιν αὐτοῖς τὸ ἀληθές, τὸ δὲ κατὰ νόμον τὸ τοῖς πολλοῖς δοκοῦν. ὥστε δῆλον ὅτι κάκεῖνοι, καθάπερ καὶ οἱ νῦν, ἢ ἐλέγξαι ἢ παράδοξα λέγειν τὸν ἀποκρινόμενον ἐπεχείρουν ποιεῖν.

Ἔνια δὲ τῶν ἐρωτημάτων ἔχει τὸ ἀμφοτέρως ἄδοξον εἶναι τὴν ἀπόκρισιν, οἷον πότερον τοῖς σοφοῖς ἢ τῷ πατρὶ δεῖ πειθεσθαι, καὶ τὰ συμφέροντα πράττειν ἢ τὰ δίκαια, καὶ ἀδικεῖσθαι αἰρετώτερον ἢ βλάπτειν. δεῖ δ' ἄγειν εἰς τὰ τοῖς πολλοῖς καὶ <τὰ> τοῖς σοφοῖς ἐναντία - ἐὰν μὲν λέγῃ τις ὥς οἱ περὶ τοὺς λόγους, εἰς τὰ τοῖς πολλοῖς, ἐὰν δ' ὥς οἱ πολλοί, ἐπὶ τὰ τοῖς σοφοῖς. φασὶ γὰρ οἱ μὲν ἐξ ἀνάγκης τὸν εὐδαίμονα δίκαιον εἶναι· τοῖς δὲ πολλοῖς ἄδοξον τὸ βασιλέα μὴ εὐδαιμονεῖν. ἔστι δὲ τὸ εἰς τὰ οὕτως ἄδοξα ἄγειν τὸ αὐτὸ τῷ εἰς τὴν κατὰ φύσιν καὶ κατὰ νόμον ὑπεναντίωσιν ἄγειν· ὁ μὲν γὰρ νόμος δόξα τῶν πολλῶν, οἱ δὲ σοφοὶ κατὰ φύσιν καὶ κατ' ἀλήθειαν λέγουσιν.

Καὶ τὰ μὲν παράδοξα ἐκ τούτων δεῖ ζητεῖν τῶν τόπων· περὶ δὲ τοῦ ποιῆσαι ἀδολεσχεῖν, ὃ μὲν λέγομεν τὸ ἀδολεσχεῖν εἰρήκαμεν ἤδη· πάντες δὲ οἱ τοιοῖδε λόγοι τοῦτο βούλονται ποιεῖν· εἰ μὴδὲν διαφέρει τὸ ὄνομα ἢ τὸν λόγον εἰπεῖν, διπλάσιον δὴ καὶ διπλάσιον ἡμίσεος ταυτό· εἰ ἄρα ἐστὶ διπλάσιον ἡμίσεος διπλάσιον, ἔσται ἡμίσεος ἡμίσεος διπλάσιον. καὶ πάλιν ἂν ἀντὶ τοῦ “διπλάσιον” “διπλάσιον ἡμίσεος” τεθῇ, τρεῖς ἔσται εἰρημένον, ἡμίσεος ἡμίσεος ἡμίσεος διπλάσιον. καὶ ἄρα ἐστὶν ἡ ἐπιθυμία ἡδέος· τοῦτο δ' ἐστὶν ὄρεξις ἡδέος· ἔστιν ἄρα ἡ ἐπιθυμία ὄρεξις ἡδέος ἡδέος.

Εἰσὶ δὲ πάντες οἱ τοιοῦτοι τῶν λόγων ἔν τε τοῖς πρὸς τι, ὅσα μὴ μόνον τὰ γένη ἀλλὰ καὶ αὐτὰ πρὸς τι λέγεται καὶ πρὸς τὸ αὐτὸ καὶ ἔν ἀποδίδεται (οἷον ἢ τε ὄρεξις τινὸς ὄρεξις καὶ ἡ ἐπιθυμία τινὸς ἐπιθυμία, καὶ τὸ διπλάσιον τινὸς διπλάσιον, καὶ διπλάσιον ἡμίσεος), καὶ ὅσων ἡ οὐσία, οὐκ ὄντων πρὸς τι ὅλως ὧν εἰσιν ἕξεις ἢ πάθη ἢ τι τοιοῦτον ἐν τῷ λόγῳ αὐτῶν προσδηλοῦται, κατηγορουμένων ἐπὶ τούτοις. οἷον τὸ περιττὸν ἀριθμὸς μέσον ἔχων· ἔστι δ' ἀριθμὸς περιττός· ἔστιν ἄρα ἀριθμὸς ἀριθμὸς μέσον ἔχων. καὶ εἰ τὸ σιμὸν κοιλότης ῥινός ἐστιν, ἔστι δὲ ῥις σιμή, ἔστιν ἄρα ῥις ῥις κοίλη.

Φαίνονται δὲ ποιεῖν οὐ ποιοῦντες ἐνίοτε διὰ τὸ μὴ προσπυνθάνεσθαι εἰ σημαίνει τι καθ' αὐτὸ λεχθέν τὸ διπλάσιον ἢ οὐδέν, καὶ εἴ τι σημαίνει, πότερον τὸ αὐτὸ ἢ ἕτερον, ἀλλὰ τὸ συμπέρασμα λέγειν εὐθύς. ἀλλὰ φαίνεται, διὰ τὸ τὸ ὄνομα ταῦτο εἶναι, ταῦτο καὶ σημαίνειν.

Σολοικισμὸς δ' οἷον μὲν ἔστιν εἴρηται πρότερον· ἔστι δὲ τοῦτο καὶ ποιεῖν καὶ μὴ ποιοῦντα φαίνεσθαι καὶ ποιοῦντα μὴ δοκεῖν, καθάπερ, ὁ Πρωταγόρας ἔλεγεν, εἰ “ὁ μῆνις” καὶ “ὁ πῆληξ” ἄρρενά ἐστιν· ὁ μὲν γὰρ λέγων “οὐλομένην” σολοικίζει μὲν κατ' ἐκείνον, οὐ φαίνεται δὲ τοῖς ἄλλοις, ὁ δὲ “οὐλόμενον” φαίνεται μὲν, ἀλλ' οὐ σολοικίζει. δῆλον οὖν ὅτι καὶ τέχνη τις τοῦτο δύναται ποιεῖν· διὸ πολλοὶ τῶν λόγων οὐ συλλογιζόμενοι σολοικισμὸν φαίνονται συλλογίζεσθαι, καθάπερ ἐν τοῖς ἐλέγχois.

Εἰσὶ δὲ πάντες σχεδὸν οἱ φαινόμενοι σολοικισμοὶ παρὰ τόδε, [καὶ] ὅταν ἡ πτώσις μήτε ἄρρεν μήτε θῆλυ δηλοῖ ἀλλὰ τὸ μεταξὺ. τὸ μὲν γὰρ “οὔτος” ἄρρεν σημαίνει, τὸ δ' “αὕτη” θῆλυ· τὸ δὲ “τοῦτο” θέλει μὲν τὸ μεταξὺ σημαίνειν, πολλάκις δὲ σημαίνει κάκεινων ἑκάτερον, οἷον “τί τοῦτο;” “Καλλιόπη, ξύλον, Κορίσκος”. τοῦ μὲν οὖν ἄρρενος καὶ τοῦ θήλεος διαφέρουσιν αἱ πτώσεις ἅπασαι, τοῦ δὲ μεταξὺ αἱ μὲν αἱ δ' οὔ. δοθέντος δὴ πολλάκις “τοῦτο”, συλλογίζονται ὡς εἰρημένου “τοῦτον”· ὁμοίως δὲ καὶ ἄλλην πτώσιν ἀντ' ἄλλης. ὁ δὲ παραλογισμὸς γίνεται διὰ τὸ κοινὸν εἶναι τὸ “τοῦτο” πλειόνων πτώσεων· τὸ γὰρ “τοῦτο” σημαίνει ὅτε μὲν “οὔτος” ὅτε δὲ “τοῦτον”. δεῖ δ' ἐναλλάξ σημαίνειν μετὰ μὲν τοῦ “ἔστι” τὸ “οὔτος”, μετὰ δὲ τοῦ “εἶναι” τὸ “τοῦτον”, οἷον “ἔστι Κορίσκος”, “εἶναι Κορίσκον”. καὶ ἐπὶ τῶν θήλεων ὀνομάτων ὡσαύτως, καὶ ἐπὶ τῶν λεγομένων μὲν σκευῶν, ἐχόντων δὲ θηλείας ἢ ἄρρενος κλήσιν. ὅσα γὰρ εἰς τὸ ο καὶ τὸ ν τελευτᾷ, ταῦτα μόνον σκεύους ἔχει κλήσιν, οἷον ξύλον, σχοινίον· τὰ δὲ μὴ οὔτως ἄρρενος ἢ θήλεος, ὧν ἓνα φέρομεν ἐπὶ τὰ σκεύη, οἷον ἄσκος μὲν ἄρρεν τοῦνομα, κλίνη δὲ θῆλυ. διόπερ καὶ ἐπὶ τῶν τοιούτων ὡσαύτως τὸ “ἔστι” καὶ τὸ “εἶναι” διοίσει. καὶ τρόπον τινὰ ὁμοίος ἔστιν ὁ σολοικισμὸς τοῖς “παρὰ τὸ τὰ μὴ ὅμοια ὁμοίως” λεγομένοις ἐλέγχois. ὥσπερ γὰρ ἐκείνοις ἐπὶ τῶν πραγμάτων, τούτοις ἐπὶ τῶν ὀνομάτων συμπίπτει σολοικίζειν· ἄνθρωπος γὰρ καὶ λευκὸν καὶ πρᾶγμα καὶ ὄνομα ἔστιν.

Φανερόν οὖν ὅτι τὸν σολοικισμὸν πειρατέον ἐκ τῶν εἰρημένων πτώσεων συλλογίζεσθαι.

Εἶδη μὲν οὖν ταῦτα τῶν ἀγωνιστικῶν λόγων καὶ μέρη τῶν εἰδῶν καὶ τρόποι οἱ εἰρημένοι· διαφέρει δ' οὐ μικρὸν ἐὰν ταχθῇ πως τὰ περὶ τὴν ἐρώτησιν πρὸς τὸ λανθάνειν, ὥσπερ ἐν τοῖς διαλεκτικοῖς. ἐφεξῆς οὖν τοῖς εἰρημένοις ταῦτα πρῶτον λεκτέον.

Ἔστι δὴ πρὸς τὸ ἐλέγχειν ἐν μὲν μῆκος· χαλεπὸν γὰρ ἅμα

πολλά συνορᾶν· εἰς δὲ τὸ μῆκος τοῖς προειρημένοις στοιχείοις χρηστέον. Ἐν δὲ τάχος· ὑστερίζοντες γὰρ ἤττον προορῶσιν. ἔτι δ' ὀργή καὶ φιλονεικία· ταραπτόμενοι γὰρ ἤττον δύνανται φυλάττεσθαι πάντες· στοιχεῖα δὲ τῆς ὀργῆς τό τε φανερόν ἐαυτὸν ποιεῖν βουλόμενον ἀδικεῖν καὶ τὸ παράπαν ἀναισχυντεῖν. ἔτι τὸ ἐναλλάξ τὰ ἐρωτήματα τιθέναι, ἐάν τε πρὸς ταῦτ' οὐ πλείους τις ἔχη λόγους, ἐάν τε καὶ ὅτι οὕτως καὶ ὅτι οὐχ οὕτως· ἅμα γὰρ συμβαίνει ἢ πρὸς πλείω ἢ πρὸς τὰ ἐναντία ποιεῖσθαι τὴν φυλακὴν. ὅλως δὲ πάντα τὰ πρὸς τὴν κρύψιν λεχθέντα πρότερον χρήσιμα καὶ πρὸς τοὺς ἀγωνιστικούς λόγους· ἢ γὰρ κρύψις ἐστὶ τοῦ λαθεῖν χάριν, τὸ δὲ λαθεῖν τῆς ἀπάτης.

Πρὸς δὲ τοὺς ἀνανεύοντας ἅττ' ἂν οἰηθῶσιν εἶναι πρὸς τὸν λόγον, ἐξ ἀποφάσεως ἐρωτητέον ὥς τοῦναντίον βουλόμενον, ἢ καὶ ἐξ ἴσου ποιοῦντα τὴν ἐρώτησιν· ἀδήλου γὰρ ὄντος τοῦ τί βούλεται λαβεῖν ἤττον δυσκολαινοῦσιν. ὅταν τ' ἐπὶ τῶν μερῶν διδῶ τις τὸ καθ' ἕκαστον, ἐπάγοντα τὸ καθόλου πολλάκις οὐκ ἐρωτητέον ἄλλ' ὥς δεδομένῳ χρηστέον· ἐνίστε γὰρ καὶ αὐτοὶ οἴονται δεδοκέναι καὶ τοῖς ἀκούουσι φαίνονται διὰ τὴν τῆς ἐπαγωγῆς μνησίαν, ὥς οὐκ ἂν ἠρωτημένα μάτην. ἐν οἷς τε μὴ ὀνόματι σημαίνεται τὸ καθόλου ἀλλὰ τῇ ὁμοιότητι, χρηστέον πρὸς τὸ συμφέρον· λανθάνει γὰρ ἡ ὁμοιότης πολλάκις, πρὸς τε τὸ λαβεῖν τὴν πρότασιν τοῦναντίον παραβάλλοντα χρὴ πυνθάνεσθαι· οἶον, εἰ δεοὶ λαβεῖν ὅτι δεῖ πάντα τῷ πατρὶ πείθεσθαι, “πότερον ἅπαντα δεῖ πείθεσθαι τοῖς γονεῦσιν ἢ πάντ' ἀπειθεῖν;” καὶ “τὸ πολλάκις πολλά, πότερον πολλὰ συγχωρητέον ἢ ὀλίγα;” μᾶλλον γάρ, εἴπερ ἀνάγκη, δόξειεν ἂν εἶναι πολλά· παρατιθεμένων γὰρ ἐγγὺς τῶν ἐναντίων καὶ μείω καὶ μείζω φαίνεται καὶ χεῖρω καὶ βελτίω τοῖς ἀνθρώποις.

Σφόδρα δὲ καὶ πολλάκις ποιεῖ δοκεῖν ἐληλέγχθαι τὸ μάλιστα σοφιστικὸν συκοφάντημα τῶν ἐρωτώντων, τὸ μηδὲν συλλογισαμένους μὴ ἐρώτημα ποιεῖν τὸ τελευταῖον ἀλλὰ συμπεραντικῶς εἰπεῖν, ὥς συλλελογισμένους, “οὐκ ἄρα τὸ καὶ τό”.

Σοφιστικὸν δὲ καὶ τὸ κειμένου παραδόξου τὸ φαινόμενον ἀξιοῦν ἀποκρίνεσθαι, προκειμένου τοῦ δοκοῦντος ἐξ ἀρχῆς, καὶ τὴν ἐρώτησιν τῶν τοιούτων οὕτω ποιεῖσθαι, “πότερόν σοι δοκεῖ;” ἀνάγκη γάρ, ἂν ἦ τὸ ἐρώτημα ἐξ ὧν ὁ συλλογισμός, ἢ ἔλεγχον ἢ παράδοξον γίνεσθαι, δόντος μὲν ἔλεγχον, μὴ δόντος δὲ μηδὲ δοκεῖν φάσκοντος ἄδοξον, μὴ δόντος δέ, δοκεῖν δ' ὁμολογοῦντος,

ἐλεγχοειδές.

Ἔτι καθάπερ καὶ ἐν τοῖς ῥητορικοῖς, καὶ ἐν τοῖς ἐλεγκτικοῖς ὁμοίως τὰ ἐναντιώματα θεωρητέον ἢ πρὸς τὰ ὑφ' ἑαυτοῦ λεγόμενα ἢ πρὸς οὓς ὁμολογεῖ καλῶς λέγειν ἢ πράττειν, ἔτι πρὸς τοὺς δοκοῦντας τοιοῦτους ἢ πρὸς τοὺς ὁμοίους, ἢ πρὸς τοὺς πλείστους ἢ πρὸς πάντας. ὥσπερ τε καὶ ἀποκρινόμενοι πολλάκις, ὅταν ἐλέγχωνται, ποιοῦσι διττόν, ἂν μέλλῃ συμβαίνειν ἐλεγχθήσεσθαι, καὶ ἐρωτῶντας χρηστέον ποτὲ τούτῳ πρὸς τοὺς ἐνισταμένους - ἂν ὥδι μὲν συμβαίη ὥδι δὲ μή, ὅτι οὕτως εἴληφεν, οἷον ὁ Κλεοφῶν ποιεῖ ἐν τῷ Μανδροβούλῳ. δεῖ δὲ καὶ ἀφισταμένους τοῦ λόγου τὰ λοιπὰ τῶν ἐπιχειρημάτων ἐπιτέμνειν, καὶ ἀποκρινόμενον, ἂν προαισθάνηται, προενίστασθαι καὶ προαγορεύειν. ἐπιχειρητέον δ' ἐνίστε καὶ πρὸς ἄλλα τοῦ εἰρημένου, ἐκεῖνο ἐκλαβόντας, ἐὰν μὴ πρὸς τὸ κείμενον ἔχῃ τις ἐπιχειρεῖν· ὅπερ ὁ Λυκόφρων ἐποίησε προβληθέντος λύραν ἐγκωμιάζειν. πρὸς δὲ τοὺς ἀπαιτοῦντας πρὸς τί ἐπιχειρεῖ, ἐπειδὴ δοκεῖ δεῖν ἀποδιδόναι τὴν αἰτίαν, λεχθέντων δ' ἐνίων εὐφυλακτότερον (τὸ καθόλου συμβαῖνον ἐν τοῖς ἐλέγχουσιν), λέγειν τὴν ἀντίφασιν, ὅτι ὁ ἔφησεν ἀπόφῃσι, ἢ ὁ ἀπέφησε φησί, ἀλλὰ μὴ ὅτι τῶν ἐναντίων ἢ αὐτὴ ἐπιστήμη ἢ οὐχ ἢ αὐτή. οὐ δεῖ δὲ τὸ συμπέρασμα προτατικῶς ἐρωτᾶν. ἔνια δ' οὐδ' ἐρωτητέον ἀλλ' ὥς ὁμολογουμένοις χρηστέον.

Ἐξ ὧν μὲν οὖν αἱ ἐρωτήσεις καὶ πῶς ἐρωτητέον ἐν ταῖς ἀγωνιστικαῖς διατριβαῖς, εἴρηται. περὶ δὲ ἀποκρίσεως καὶ πῶς χρὴ λύειν καὶ τί, καὶ πρὸς τίνα χρῆσιν οἱ τοιοῦτοι τῶν λόγων ὠφέλιμοι, μετὰ ταῦτα λεκτέον.

Χρήσιμοι μὲν οὖν εἰσι πρὸς μὲν φιλοσοφίαν διὰ δύο. πρῶτον μὲν γὰρ ὥς ἐπὶ τὸ πολὺ γινόμενοι παρὰ τὴν λέξιν ἄμεινον ἔχειν ποιοῦσι πρὸς τὸ ποσαχῶς ἕκαστον λέγεται καὶ ποῖα ὁμοίως καὶ ποῖα ἐτέρως ἐπὶ τε τῶν πραγμάτων συμβαίνει καὶ ἐπὶ τῶν ὀνομάτων. δεύτερον δὲ πρὸς τὰς καθ' αὐτὸν ζητήσεις· ὁ γὰρ ὑφ' ἐτέρου ῥαδίως παραλογιζόμενος καὶ τοῦτο μὴ διαισθανόμενος κἂν αὐτὸς ὑφ' αὐτοῦ τοῦτο πάθοι πολλάκις. τρίτον δὲ καὶ τὸ λοιπὸν ἔτι πρὸς δόξαν, τὸ περὶ πάντα γεγυμνάσθαι δοκεῖν καὶ μηδενὸς ἀπείρωσ ἔχειν· τὸ γὰρ κοινωνοῦντα λόγων ψέγειν λόγους, μηδὲν ἔχοντα διορίζειν περὶ τῆς φαιλότητος αὐτῶν, ὑποψίαν δίδωσι τοῦ δοκεῖν δυσχεραίνειν οὐ διὰ τάληθές ἀλλὰ δι' ἀπειρίαν.

Ἀποκρινόμενοις δὲ πῶς ἀπαντητέον πρὸς τοὺς τοιοῦτους

λόγους, φανερόν, εἴπερ ὀρθῶς εἰρήκαμεν πρότερον ἐξ ὧν εἰσιν οἱ παραλογισμοί, καὶ τὰς ἐν τῷ πυνθάνεσθαι πλεονεξίας ἱκανῶς διείλομεν. οὐ ταὐτὸ δ' ἐστὶ λαβόντα τε τὸν λόγον ἰδεῖν καὶ λῦσαι τὴν μοχθηρίαν, καὶ ἐρωτώμενον ἀπαντᾶν δύνασθαι ταχέως· ὁ γὰρ ἴσμεν, πολλάκις μετατιθέμενον ἀγνοοῦμεν. ἔτι δ', ὥσπερ ἐν τοῖς ἄλλοις τὸ θᾶπτον καὶ τὸ βραδύτερον ἐκ τοῦ γεγυμνάσθαι γίνεται μᾶλλον, οὕτω καὶ ἐπὶ τῶν λόγων ἔχει, ὥστε, ἂν δῆλον μὲν ἡμῖν ἦ, ἀμελέτητοι δ' ὦμεν, ὑστεροῦμεν τῶν καιρῶν πολλάκις, συμβαίνει δέ ποτε καθάπερ ἐν τοῖς διαγράμμασιν· καὶ γὰρ ἐκεῖ ἀναλύσαντες ἐνίοτε συνθεῖναι πάλιν ἀδυνατοῦμεν· οὕτω καὶ ἐν τοῖς ἐλέγχοις, εἰδότες παρ' ὃ ὁ λόγος συμβαίνει συνεῖραι, διαλῦσαι τὸν λόγον ἀποροῦμεν.

Πρῶτον μὲν οὖν, ὥσπερ συλλογίζεσθαι φαμεν ἐνδόξως ποτὲ μᾶλλον ἢ ἀληθῶς προαιρεῖσθαι δεῖν, οὕτω καὶ λυτέον ποτὲ μᾶλλον ἐνδόξως ἢ κατὰ τἀληθές. ὅλως γὰρ πρὸς τοὺς ἐριστικούς μαχετέον οὐχ ὡς ἐλέγχοντας ἀλλ' ὡς φαινομένους· οὐ γὰρ φαμεν συλλογίζεσθαι γε αὐτούς, ὥστε πρὸς τὸ μὴ δοκεῖν διορθωτέον. εἰ γάρ ἐστιν ὁ ἔλεγχος ἀντίφασις μὴ ὁμώνυμος ἔκ τινων, οὐδὲν ἂν δέοι διαιρεῖσθαι πρὸς ἀμφίβολα καὶ τὴν ὁμωνυμίαν (οὐ γὰρ ποιεῖ συλλογισμόν), ἀλλ' οὐδενὸς ἄλλου χάριν προσδιαιρετέον ἀλλ' ἢ ὅτι τὸ συμπέρασμα φαίνεται ἐλεγχοειδές. οὐκ οὖν τὸ ἐλεγχθῆναι ἀλλὰ τὸ δοκεῖν εὐλαβητέον, ἐπεὶ τό γ' ἐρωτᾶν ἀμφίβολα καὶ τὰ παρὰ τὴν ὁμωνυμίαν ὅσαι τ' ἄλλαι τοιαῦται παρακρούσεις καὶ τὸν ἀληθινὸν ἔλεγχον ἀφανίζει καὶ τὸν ἐλεγχόμενον καὶ μὴ ἐλεγχόμενον ἄδηλον ποιεῖ. ἐπεὶ γὰρ ἔξεστιν ἐπὶ τέλει συμπεραναμένου μὴ ὅπερ ἔφησεν ἀποφῆσαι λέγειν, ἀλλ' «ἦ» ὁμώνυμως, εἰ καὶ ὅτι μάλιστ' ἔτυχεν ἐπὶ ταὐτὸ φέρων, ἄδηλον εἰ ἐλήλεγκται· ἄδηλον γὰρ εἰ ἀληθῆ λέγει νῦν. εἰ δὲ διελὼν ἤρετο τὸ ὁμώνυμον ἢ τὸ ἀμφίβολον, οὐκ ἂν ἄδηλος ἦν ὁ ἔλεγχος, ὃ τ' ἐπιζητοῦσι νῦν μὲν ἦττον πρότερον δὲ μᾶλλον οἱ ἐριστικοί, τὸ ἢ “ναί” ἢ “οὐ” ἀποκρίνεσθαι τὸν ἐρωτώμενον, ἐγίνετ' ἂν. νῦν δὲ διὰ τὸ μὴ καλῶς ἐρωτᾶν τοὺς πυνθανομένους ἀνάγκη προσαποκρίνεσθαι τι τὸν ἐρωτώμενον, διορθοῦντα τὴν μοχθηρίαν τῆς προτάσεως· ἐπεὶ διελομένου γε ἱκανῶς ἢ “ναί” ἢ “οὐ” ἀνάγκη λέγειν τὸν ἀποκρινόμενον.

Εἰ δὲ τις ὑπολήψεται τὸν κατὰ ὁμωνυμίαν ἔλεγχον «ἐλεγχον» εἶναι, τρόπον τινὰ οὐκ ἔσται διαφυγεῖν τὸ ἐλέγχεσθαι τὸν ἀποκρινόμενον· ἐπὶ γὰρ τῶν ὁρατῶν ἀναγκαῖον ὃ ἔφησεν ἀποφῆσαι ὄνομα καὶ ὃ ἀπέφησε φῆσαι. ὥς γὰρ διορθοῦνταί τινες, οὐδὲν

ὄφελος. οὐ γὰρ Κορίσκον φασὶν εἶναι μουσικὸν καὶ ἄμουσον, ἀλλὰ τοῦτον τὸν Κορίσκον μουσικὸν καὶ τοῦτον τὸν Κορίσκον ἄμουσον. ὁ γὰρ αὐτὸς ἔσται λόγος τὸ τοῦτον τὸν Κορίσκον τῷ τοῦτον τὸν Κορίσκον ἄμουσον εἶναι (ἢ μουσικόν), ὅπερ ἅμα φησί τε καὶ ἀπόφησιν. ἀλλ' ἴσως οὐ ταῦτὸ σημαίνει (οὐδὲ γὰρ ἐκεῖ τοῦνομα), ὥστε τί διαφέρει; εἰ δὲ τῷ μὲν τὸ ἀπλῶς λέγειν Κορίσκον ἀποδώσει, τῷ δὲ προσθήσει τὸ τινὰ ἢ τόνδε, ἄτοπον· οὐδὲν γὰρ μᾶλλον θατέρω· ὁποτέρω γὰρ ἂν οὐδὲν διαφέρει.

Οὐ μὴν ἀλλ' ἐπειδὴ ἄδηλος μὲν ἐστὶν ὁ μὴ διορισάμενος τὴν ἀμφιβολίαν πότερον ἐλήλεγκται ἢ οὐκ ἐλήλεγκται, δέδοται δ' ἐν τοῖς λόγοις τὸ διελεῖν, φανερόν ὅτι τὸ μὴ διορίσαντα δοῦναι τὴν ἐρώτησιν, ἀλλ' ἀπλῶς, ἀμάρτημά ἐστιν, ὥστε κἂν εἰ μὴ αὐτός, ἀλλ' ὁ γε λόγος ἐληλεγμένω ὅμοιός ἐστιν. συμβαίνει μέντοι πολλάκις ὁρῶντας τὴν ἀμφιβολίαν ὀκνεῖν διαιρεῖσθαι διὰ τὴν πυκνότητα τῶν τὰ τοιαῦτα προτεινόντων, ὅπως μὴ πρὸς ἅπαν δοκῶσι δυσκολαίνειν· εἴτ' οὐκ ἂν οἰηθέντων παρὰ τοῦτο γενέσθαι τὸν λόγον, πολλάκις ἀπήντησε παράδοξον. ὥστ' ἐπειδὴ δέδοται διαιρεῖν, οὐκ ὀκνητέον, καθάπερ ἐλέχθη πρότερον.

Εἰ δὲ τὰ δύο ἐρωτήματα μὴ ἐν ἐποίει τις ἐρώτημα, οὐδ' ἂν ὁ παρὰ τὴν ὁμωνυμίαν καὶ τὴν ἀμφιβολίαν ἐγίνετο παραλογισμός, ἀλλ' ἢ ἔλεγχος ἢ οὐ. τί γὰρ διαφέρει ἐρωτῆσαι εἰ Καλλίας καὶ Θεμιστοκλῆς μουσικοὶ εἰσιν ἢ εἰ ἀμφοτέροις ἐν ὄνομα ἦν ἐτέροις οὓσιν; εἰ γὰρ πλείω δηλοῖ ἐνός, πλείω ἡρώτησεν. εἰ οὖν μὴ ὀρθὸν πρὸς δύο ἐρωτήσεις μίαν ἀπόκρισιν ἀξιοῦν λαμβάνειν ἀπλῶς, φανερόν ὅτι οὐδενὶ προσήκει τῶν ὁμωνύμων ἀποκρίνεσθαι ἀπλῶς, οὐδ' εἰ κατὰ πάντων ἀληθές, ὥσπερ ἀξιούσιν τινες. οὐδὲν γὰρ τοῦτο διαφέρει ἢ εἰ ἦρετο, Κορίσκος καὶ Καλλίας πότερον οἴκοι εἰσιν ἢ οὐκ οἴκοι, εἴτε παρόντων ἀμφοῖν εἴτε μὴ παρόντων· ἀμφοτέρως γὰρ πλείους αἱ προτάσεις· οὐ γὰρ εἰ ἀληθές εἰπεῖν, διὰ τοῦτο μία ἢ ἐρώτησις. ἐγχωρεῖ γὰρ καὶ μυρία ἕτερα ἐρωτηθέντα ἐρωτήματα ἀπλῶς ἢ “ναί” ἢ “οὐ” ἀληθές εἶναι λέγειν· ἀλλ' ὅμως οὐκ ἀποκριτέον μιᾷ ἀποκρίσει· ἀναιρεῖται γὰρ τὸ διαλέγεσθαι. τοῦτο δ' ὅμοιον ὡς εἰ καὶ τὸ αὐτὸ ὄνομα τεθείη τοῖς ἐτέροις. εἰ οὖν μὴ δεῖ πρὸς δύο ἐρωτήσεις μίαν ἀπόκρισιν διδόναι, φανερόν ὅτι οὐδ' ἐπὶ τῶν ὁμωνύμων τὸ “ναί” ἢ “οὐ” λεκτέον· οὐδὲ γὰρ ὁ εἰπὼν ἀποκέκριται, ἀλλ' εἴρηκεν. ἀλλ' ἀξιούται πως ἐν τοῖς διαλεγόμενοις διὰ τὸ λανθάνειν τὸ συμβαῖνον.

Ὡςπερ οὖν εἶπομεν, ἐπειδήπερ οὐδ' ἔλεγκοί τινες ὄντες δοκοῦσιν εἶναι, κατὰ τὸν αὐτὸν τρόπον καὶ λύσεις δόξουσιν εἶναι τινες οὐκ οὔσαι λύσεις· ἃς δὴ φαμεν ἐνίοτε μᾶλλον δεῖν φέρειν ἢ τὰς ἀληθεῖς ἐν τοῖς ἀγωνιστικοῖς λόγοις καὶ τῇ πρὸς τὸ διττὸν ἀπαντήσῃ. ἀποκριτέον δ' ἐπὶ μὲν τῶν δοκούντων τὸ “ἔστω” λέγοντα· καὶ γὰρ οὕτως ἤκιστα γίνουιτ' ἂν παρεξέλεγχος. ἂν δέ τι παράδοξον ἀναγκάζεται λέγειν, ἐνταῦθα μάλιστα προσθετέον τὸ δοκεῖν· οὕτω γὰρ ἂν οὗτ' ἔλεγχος οὔτε παράδοξον γίνεσθαι δόξειεν. ἐπεὶ δὲ πῶς αἰτεῖται τὸ ἐν ἀρχῇ δῆλον, οἶονται δὲ πάντως ἂν ἢ σύνεγγυς ἀναιρετέον, καὶ μὴ συγχωρητέον εἶναι ἓνια, ὡς τὸ ἐν ἀρχῇ αἰτοῦντος, ὅταν τι τοιοῦτον ἀξιῷ τις ὃ ἀναγκαῖον μὲν συμβαίνειν ἐκ τῆς θέσεως, ἢ δὲ ψεῦδος ἢ ἄδοξον, ταὐτὸ λεκτέον· τὰ γὰρ ἐξ ἀνάγκης συμβαίνοντα τῆς αὐτῆς εἶναι δοκεῖ θέσεως. ἔτι ὅταν τὸ καθόλου μὴ ὀνόματι ληφθῇ ἀλλὰ παραβολῇ, λεκτέον ὅτι οὐχ ὡς ἐδόθη οὐδ' ὡς προὔτεινε λαμβάνει· καὶ γὰρ παρὰ τοῦτο γίνεται πολλάκις ἔλεγχος.

Ἐξαιρούμενον δὲ τούτων ἐπὶ τὸ μὴ καλῶς δεδειχθαι πορευτέον, ἀπαντῶντα κατὰ τὸν εἰρημένον διορισμόν.

Ἐν μὲν οὖν τοῖς κυρίως λεγομένοις ὀνόμασιν ἀνάγκη ἀποκρίνεσθαι ἢ ἀπλῶς ἢ διαιρούμενον. ἃ δὲ συνυπονοοῦντες τίθεμεν, οἷον ὅσα μὴ σαφῶς ἀλλὰ κολοβῶς ἐρωτᾶται, παρὰ τοῦτο συμβαίνει ὁ ἔλεγχος. οἷον “ἄρ' ὃ ἂν ἢ Ἀθηναίων κτῆμά ἐστιν Ἀθηναίων;” “ναί.” “ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων· ἀλλὰ μὴν ὁ ἄνθρωπος ἐστὶ τῶν ζώων;” “ναί.” “κτῆμα ἄρα ὁ ἄνθρωπος τῶν ζώων.” τὸν γὰρ ἄνθρωπον τῶν ζώων λέγομεν ὅτι ζῶόν ἐστι, καὶ Λύσανδρον τῶν Λακώνων ὅτι Λάκων. δῆλον οὖν ὡς ἐν οἷς ἀσαφές τὸ προτεινόμενον οὐ συγχωρητέον ἀπλῶς.

Ὅταν δὲ δυοῖν ὄντοι θατέρου μὲν ὄντος ἐξ ἀνάγκης θάτερον εἶναι δοκῇ, θατέρου δὲ τοῦτο μὴ ἐξ ἀνάγκης, ἐρωτώμενον πότερον, δεῖ τὸ ἕλαττον διδόναι (χαλεπώτερον γὰρ συλλογίσασθαι ἐκ πλειόνων)· ἐὰν δ' ἐπιχειρῇ ὅτι τῷ μὲν ἔστιν ἐναντίον τῷ δ' οὐκ ἔστιν, ἂν ὁ λόγος ἀληθὴς ἢ, ἐναντίον «εἶναι» φάναι, ὄνομα δὲ μὴ κεῖσθαι τοῦ ἐτέρου.

Ἐπεὶ δ' ἓνια μὲν ὧν λέγουσιν οἱ πολλοὶ τὸν μὴ συγχωροῦντα ψεύδεσθαι ἂν φαῖεν ἓνια δ' οὐ, οἷον ὅσα ἀμφιδοξοῦσιν (πότερον γὰρ φθαρτὴ ἢ ἀθάνατος ἢ ψυχὴ τῶν ζώων, οὐ διώριστα τοῖς πολλοῖς) - ἐν οἷς οὖν ἄδηλον ποτέρως εἶωθε λέγεσθαι τὸ προτεινόμενον, πότερον ὡς αἰ γινῶμαι (καλοῦσι γὰρ γνώμας καὶ τὰς ἀληθεῖς δόξας

καὶ τὰς ὅλας ἀποφάνσεις) ἢ ὡς “ἡ διάμετρος ἀσύμμετρός ἐστι”, οὐ τὸ ἀληθὲς ἀμφιδοξεῖται, μάλιστα μεταφέρων ἂν τις λανθάνοι τὰ ὀνόματα περὶ τούτων. διὰ μὲν γὰρ τὸ ἄδηλον εἶναι ποτέρως ἔχει τάληθές, οὐ δόξει σοφίζεσθαι, διὰ δὲ τὸ ἀμφιδοξεῖν οὐ δόξει ψευδεσθαι· ἡ γὰρ μεταφορὰ ποιήσει τὸν λόγον ἀνεξέλεγκτον.

Ἔτι ὅσα ἂν τις προαισθάνηται τῶν ἐρωτημάτων, προενστατέον καὶ προαγορευτέον· οὕτω γὰρ ἂν μάλιστα τὸν πυνθανόμενον κωλύσειεν.

Ἐπεὶ δ’ ἐστὶν ἡ μὲν ὀρθὴ λύσις ἐμφάνισις ψευδοῦς συλλογισμοῦ, παρ’ ὁποῖαν ἐρώτησιν συμβαίνει τὸ ψεῦδος, ὁ δὲ ψευδὴς συλλογισμὸς λέγεται διχῶς (ἡ γὰρ εἰ συλλελόγισται ψεῦδος, ἡ εἰ μὴ ὢν συλλογισμὸς δοκεῖ εἶναι συλλογισμὸς), εἴη ἂν ἡ τε εἰρημένη νῦν λύσις καὶ ἡ τοῦ φαινομένου συλλογισμοῦ παρ’ ὃ τι φαίνεται τῶν ἐρωτημάτων διόρθωσις, ὥστε συμβαίνει τῶν λόγων τοὺς μὲν συλλελογισμένους ἀνελόντα, τοὺς δὲ φαινομένους διελόντα λύειν. πάλιν δ’ ἐπεὶ τῶν συλλελογισμένων λόγων οἱ μὲν ἀληθὲς οἱ δὲ ψεῦδος ἔχουσι τὸ συμπέρασμα, τοὺς μὲν κατὰ τὸ συμπέρασμα ψευδεῖς διχῶς ἐνδέχεται λύειν· καὶ γὰρ τῷ ἀνελεῖν τι τῶν ἡρωτημένων καὶ τῷ δεῖξαι τὸ συμπέρασμα ἔχον οὐχ οὕτως· τοὺς δὲ κατὰ τὰς προτάσεις τῷ ἀνελεῖν τι μόνον· τὸ γὰρ συμπέρασμα ἀληθές. ὥστε τοῖς βουλομένοις λύειν λόγον πρῶτον μὲν σκεπτέον εἰ συλλελόγισται ἢ ἀσυλλόγιστος, εἴτα πότερον ἀληθὲς τὸ συμπέρασμα ἢ ψεῦδος, ὅπως ἢ διαιροῦντες ἢ ἀναιροῦντες λύωμεν, καὶ ἀναιροῦντες ἢ ὧδε ἢ ὧδε, καθάπερ ἐλέχθη πρότερον. διαφέρει δὲ πλεῖστον ἐρωτώμενόν τε καὶ μὴ λύειν λόγον· τὸ μὲν γὰρ προῖδεῖν χαλεπόν, τὸ δὲ κατὰ σχολὴν ἰδεῖν ῥᾶον.

Τῶν μὲν οὖν παρὰ τὴν ὁμωνυμίαν καὶ τὴν ἀμφιβολίαν ἐλέγχων οἱ μὲν ἔχουσι τῶν ἐρωτημάτων τι πλείω σημαῖνον, οἱ δὲ τὸ συμπέρασμα πολλαχῶς λεγόμενον· οἷον ἐν μὲν τῷ “σιγῶντα λέγειν” τὸ συμπέρασμα διττόν, ἐν δὲ τῷ “μὴ συνεπίστασθαι τὸν ἐπιστάμενον” ἐν τῶν ἐρωτημάτων ἀμφίβολον. καὶ τὸ διττὸν ὅτε μὲν ἔστιν ὅτε δ’ οὐκ ἔστιν, ἀλλὰ σημαίνει τὸ διττὸν τὸ μὲν ὄν τὸ δ’ οὐκ ὄν.

Ὅσοις μὲν οὖν ἐν τῷ τέλει τὸ πολλαχῶς, ἂν μὴ προσλάβῃ τὴν ἀντίφασιν οὐ γίνεται ἔλεγχος, οἷον ἐν τῷ τὸν τυφλὸν ὁρᾶν· ἄνευ γὰρ ἀντιφάσεως οὐκ ἦν ἔλεγχος. ὅσοις δ’ ἐν τοῖς ἐρωτήμασιν, οὐκ ἀνάγκη προαποφῆσαι τὸ διττόν· οὐ γὰρ πρὸς τοῦτο ἀλλὰ διὰ τοῦτο ὁ

λόγος. ἐν ἀρχῇ μὲν οὖν πρὸς τὸ διπλοῦν καὶ ὄνομα καὶ λόγον οὕτως ἀποκριτέον, ὅτι ἔστιν ὥς, ἔστι δ' ὥς οὐ, ὥσπερ τῷ “σιγῶντα λέγειν” ὅτι ἔστιν ὥς, ἔστι δ' ὥς οὐ, καὶ τὰ δέοντα πρακτέον ἔστιν ἃ, ἔστι δ' ἃ οὐ· τὰ γὰρ δέοντα λέγεται πολλαχῶς· ἐὰν δὲ λάθῃ, ἐπὶ τέλει προστιθέντα τῇ ἐρωτῇ διορθωτέον· “ἄρ' ἔστι σιγῶντα λέγειν;”, “οὐ, ἀλλὰ τόνδε σιγῶντα”. καὶ ἐν τοῖς ἔχουσι δὲ τὸ πλεοναχῶς ἐν ταῖς προτάσεσιν ὁμοίως· “οὐκ ἄρα συνεπίστανται ὅ τι ἐπίστανται;”, “ναί, ἀλλ' οὐχ οἱ οὕτως ἐπιστάμενοι”. οὐ γὰρ ταῦτόν ἐστιν ὅτι οὐκ ἔστι συνεπίστασθαι καὶ ὅτι τοὺς ὧδὶ ἐπισταμένους οὐκ ἔστιν. ὅλως τε μαχετέον, ἂν καὶ ἀπλῶς συλλογίζεται, ὅτι οὐχ ὁ ἔφησεν ἀπέφησε πρᾶγμα ἀλλ' ὄνομα, ὥστ' οὐκ ἔλεγχος.

Φανερόν δὲ καὶ τοὺς παρὰ τὴν διαίρεσιν καὶ σύνθεσιν πῶς λυτέον· ἂν γὰρ διαιρούμενος καὶ συντιθέμενος ὁ λόγος ἕτερον σημαίνει, συμπεραινομένου τούναντίον λεκτέον. εἰσὶ δὲ πάντες οἱ τοιοῦτοι λόγοι παρὰ τὴν σύνθεσιν ἢ διαίρεσιν· “ἄρ' ὃ εἶδες σὺ τοῦτον τυπτόμενον, τούτῳ ἐτύπετο οὗτος; καὶ ὃ ἐτύπετο, τούτῳ σὺ εἶδες;”. ἔχει μὲν οὖν τι καὶ τῶν ἀμφιβόλων ἐρωτημάτων, ἀλλ' ἔστι παρὰ σύνθεσιν. οὐ γὰρ ἐστι διττὸν τὸ παρὰ τὴν διαίρεσιν· οὐ γὰρ ὁ αὐτὸς λόγος γίνεται, διαιρούμενος, εἴπερ μὴ <ὥς> καὶ τὸ “ὅρος”, [καὶ] “ὅρος” τῇ προσωδία λεχθέν, σημαίνει ἕτερον. ἀλλ' ἐν μὲν τοῖς γεγραμμένοις τὸ αὐτὸ <τὸ> ὄνομα, ὅταν ἐκ τῶν αὐτῶν στοιχείων γεγραμμένον ἦ καὶ ὡσαύτως (κάκεϊ δ' ἤδη παράσημα ποιοῦνται), τὰ δὲ φθεγγόμενα οὐ ταῦτά. ὥστ' οὐ διττὸν τὸ παρὰ διαίρεσιν. φανερόν δὲ καὶ ὅτι οὐ πάντες οἱ ἔλεγκοι παρὰ τὸ διττόν, καθάπερ τινὲς φασιν.

Διαιρετέον οὖν τῷ ἀποκρινομένῳ· οὐ γὰρ ταῦτ' οὐκ ἰδεῖν “τοῖς ὀφθαλμοῖς τυπτόμενον” καὶ τὸ φάναι “ἰδεῖν τοῖς ὀφθαλμοῖς” τυπτόμενον. καὶ ὁ Εὐθυδήμου δὲ λόγος “ἄρ' οἶδας σὺ νῦν οὐσας ἐν Πειραιεὶ τριήρεις ἐν Σικελίᾳ ὦν;” καὶ πάλιν “ἄρ' ἔστιν ἀγαθὸν ὄντα σκυτέα μοχθηρὸν εἶναι; εἴη δ' ἂν τις ἀγαθὸς ὦν σκυτεὺς μοχθηρὸς· ὥστ' ἔσται ἀγαθὸς σκυτεὺς μοχθηρὸς”. “ἄρ' ὦν αἱ ἐπιστήμαι σπουδαῖαι, σπουδαῖα τὰ μαθήματα; τοῦ δὲ κακοῦ σπουδαία ἢ ἐπιστήμη· σπουδαῖον ἄρα μάθημα τὸ κακόν. ἀλλὰ μὴν καὶ κακὸν καὶ μάθημα τὸ κακόν, ὥστε κακὸν μάθημα τὸ κακόν. ἀλλ' ἔστι κακῶν σπουδαία ἢ ἐπιστήμη.” “ἄρ' ἀληθὲς εἰπεῖν νῦν ὅτι σὺ γέγονας; γέγονας ἄρα νῦν.” ἢ ἄλλο σημαίνει διαιρεθέν; ἀληθὲς γὰρ εἰπεῖν νῦν ὅτι σὺ γέγονας, ἀλλ' οὐ “νῦν γέγονας”. “ἄρ' ὥς δύνασαι καὶ ἃ δύνασαι, οὕτως καὶ ταῦτα ποιήσῃς ἄν; οὐ κιθαρίζων δ' ἔχεις

δύναμιν τοῦ καθαρίζειν· καθαρίσαις ἂν ἄρα οὐ καθαρίζων.” ἢ οὐ τούτου ἔχει τὴν δύναμιν, τοῦ οὐ καθαρίζων καθαρίζειν, ἀλλ’, ὅτε οὐ ποιεῖ, τοῦ ποιεῖν.

Λύουσι δέ τινες τοῦτον καὶ ἄλλως. εἰ γὰρ ἔδωκεν ὥς δύναται ποιεῖν, οὐ φασὶ συμβαίνειν μὴ καθαρίζοντα καθαρίζειν· οὐ γὰρ πάντως ὥς δύναται ποιεῖν δεδόσθαι ποιήσειν· οὐ ταῦτο δ’ εἶναι ὥς δύναται καὶ πάντως ὥς δύναται ποιεῖν. ἀλλὰ φανερόν ὅτι οὐ καλῶς λύουσιν· τῶν γὰρ παρὰ ταῦτόν λόγων ἡ αὐτὴ λύσις, αὕτη δ’ οὐχ ἀρμόσει ἐπὶ πάντα οὐδὲ πάντως ἐρωτώμενοις, ἀλλ’ ἔστι πρὸς τὸν ἐρωτῶντα, οὐ πρὸς τὸν λόγον. Παρὰ δὲ τὴν προσωδίαν λόγοι μὲν οὐκ εἰσὶν, οὔτε τῶν γεγραμμένων οὔτε τῶν λεγομένων, πλὴν εἴ τινες ὀλίγοι γένοιντ’ ἂν, οἷον οὗτος ὁ λόγος· “ἄρά γ’ ἐστὶ τὸ οὐ καταλύεις οἰκία;” “ναί.” “οὐκοῦν τὸ ‘οὐ καταλύεις’ τοῦ ‘καταλύεις’ ἀπόφασις;” “ναί.” “ἔφησας δ’ εἶναι τὸ οὐ καταλύεις οἰκίαν· ἡ οἰκία ἄρα ἀπόφασις.” ὥς δὴ λυτέον, δῆλον· οὐ γὰρ τὸ αὐτὸ σημαίνει ὀξύτερον τὸ δὲ βαρύτερον ῥηθέν.

Δῆλον δὲ καὶ τοῖς παρὰ τὸ ὡσαύτως λέγεσθαι τὰ μὴ ταῦτα πῶς ἀπαντητέον, ἐπεὶ περ ἔχομεν τὰ γένη τῶν κατηγοριῶν. ὁ μὲν γὰρ ἔδωκεν ἐρωτηθεὶς μὴ ὑπάρχειν τι τούτων ὅσα τί ἐστι σημαίνει· ὁ δ’ ἔδειξεν ὑπάρχον τι τῶν πρὸς τι ἢ ποσῶν, δοκούντων δὲ τί ἐστι σημαίνειν διὰ τὴν λέξιν· οἷον ἐν τῷδε τῷ λόγῳ· “ἄρ’ ἐνδέχεται τὸ αὐτὸ ἅμα ποιεῖν τε καὶ πεποιηκέναι;” “οὐ.” “ἀλλὰ μὴν ὁρᾶν γέ τι ἅμα καὶ ἑωρακέναι τὸ αὐτὸ καὶ κατὰ ταῦτο ἐνδέχεται.” “ἄρ’ ἔστι τι τῶν πάσχειν ποιεῖν τι;” “οὐ.” “οὐκοῦν τὸ τέμνεται καίεται αἰσθάνεται ὁμοίως λέγεται καὶ πάντα πάσχειν τι σημαίνει; πάλιν δὲ τὸ λέγειν τρέχειν ὁρᾶν ὁμοίως ἀλλήλοις λέγεται· ἀλλὰ μὴν τό γ’ ὁρᾶν αἰσθάνεσθαι τί ἐστιν, ὥστε καὶ πάσχειν τι ἅμα καὶ ποιεῖν.” εἰ δὴ τις ἐκεῖ, δοὺς μὴ ἐνδέχεσθαι ἅμα ταῦτο ποιεῖν καὶ πεποιηκέναι, τὸ ὁρᾶν καὶ ἑωρακέναι φαίη ἐγχωρεῖν, οὐπω ἐλήλεγκται, εἰ μὴ λέγοι τὸ ὁρᾶν ποιεῖν τι ἀλλὰ πάσχειν· προσδεῖται γὰρ τούτου τοῦ ἐρωτήματος. ἀλλ’ ὑπὸ τοῦ ἀκούοντος ὑπολαμβάνεται δεδωκέναι, ὅτε τὸ τέμνειν ποιεῖν τι καὶ τὸ τετμηκέναι πεποιηκέναι ἔδωκε καὶ ὅσα ἄλλα ὁμοίως λέγεται· τὸ γὰρ λοιπὸν αὐτὸς προστίθῃσιν ὁ ἀκούων ὥς ὁμοίως λεγόμενον. τὸ δὲ λέγεται μὲν οὐχ ὁμοίως, φαίνεται δὲ διὰ τὴν λέξιν. τὸ αὐτὸ δὲ συμβαίνει ὅπερ ἐν ταῖς ὁμωνυμίαις· οἶεται γὰρ ἐν τοῖς ὁμωνύμοις ὁ ἀγνῶς τῶν λόγων ὁ ἔφησεν ἀποφῆσαι πρᾶγμα, οὐκ ὄνομα. τῷ δὲ ἔτι προσδεῖ ἐρωτήματος εἰ ἐφ’ ἐν βλέπων λέγει τὸ

ὁμώνυμον· οὕτως γὰρ δόντος ἔσται ἔλεγχος.

Ὅμοιοι δὲ καὶ οἶδε οἱ λόγοι τούτοις, “εἰ ὁ τις ἔχων ὕστερον μὴ ἔχει, ἀπέβαλεν· ὁ γὰρ ἓνα μόνον ἀποβαλὼν ἀστράγαλον οὐχ ἔξει δέκα ἀστράγαλους”. ἢ ὁ μὲν μὴ ἔχει πρότερον ἔχων, ἀποβέβληκεν, ὅσα δὲ μὴ ἔχει ἢ ὅσα, οὐκ ἀνάγκη τοσαῦτα ἀποβαλεῖν; ἐρωτήσας οὖν ὁ ἔχει, συνάγει ἐπὶ τοῦ ὅσα· τὰ γὰρ δέκα ποσά. εἰ οὖν ἤρετο ἐξ ἀρχῆς, [εἰ] “ὅσα τις μὴ ἔχει πρότερον ἔχων, ἄρα γε ἀποβέβληκε τοσαῦτα;”, οὐδεὶς ἂν ἔδωκεν, ἀλλ’ ἢ τοσαῦτα ἢ τούτων τι. καὶ ὅτι δοίη ἂν τις ὁ μὴ ἔχει· οὐ γὰρ ἔχει ἓνα μόνον ἀστράγαλον. ἢ οὐ δέδωκεν ὁ οὐκ εἶχεν, ἀλλ’ ὥς οὐκ εἶχε, τὸν ἓνα· τὸ γὰρ μόνον οὐ τότε σημαίνει οὐδὲ τοιόνδε οὐδὲ τοσόνδε, ἀλλ’ ὥς ἔχει πρὸς τι, οἷον ὅτι οὐ μετ’ ἄλλου, ὥσπερ ἂν εἰ ἤρετο “ἄρ’ ὁ μὴ τις ἔχει δοίη ἂν;”, μὴ φάντος δὲ ἔροιτο εἰ δοίη ἂν τίς τι ταχέως μὴ ἔχων ταχέως, φήσαντος δὲ συλλογίζοιτο ὅτι δοίη ἂν τις ὁ μὴ ἔχει. καὶ φανερόν ὅτι οὐ συλλελόγισται· τὸ γὰρ ταχέως οὐ τότε διδόναι ἀλλ’ ὥδε διδόναι ἐστίν· ὥς δὲ μὴ ἔχει τις, δοίη ἂν, οἷον ἡδέως ἔχων δοίη ἂν λυπηρῶς.

Ὅμοιοι δὲ καὶ οἱ τοιοῖδε πάντες· “ἄρ’ ἢ μὴ ἔχει χειρὶ τύπτει ἂν”, ἢ “ᾧ μὴ ἔχει ὀφθαλμῷ ἴδοι ἂν;” οὐ γὰρ ἔχει ἓνα μόνον. λύουσι μὲν οὖν τινες λέγοντες ὥς καὶ ἔχει ἓνα μόνον καὶ ὀφθαλμὸν καὶ ἄλλ’ ὅτιοι οὐκ ὁ πλείω ἔχων· οἱ δὲ ὥς καὶ ὁ ἔχει ἔλαβεν· ἐδίδου γὰρ μίαν μόνον οὗτος ψῆφον· “καὶ οὗτός γ’ ἔχει”, φασί, “μίαν μόνον παρὰ τούτου ψῆφον”. οἱ δέ, εὐθύς τὴν ἐρώτησιν ἀναιροῦντες, ὅτι ἐνδέχεται ὁ μὴ ἔλαβεν ἔχειν, οἷον οἶνον λαβόντα ἡδύν, διαφθαρέντος ἐν τῇ λήψει ἔχειν ὀξύ. ἀλλ’ ὅπερ ἐλέχθη καὶ πρότερον, οὗτοι πάντες οὐ πρὸς τὸν λόγον ἀλλὰ πρὸς τὸν ἄνθρωπον λύουσιν. εἰ γὰρ ἦν αὕτη λύσις, δόντα τὸ ἀντικείμενον οὐχ οἷόν τε λύειν, καθάπερ ἐπὶ τῶν ἄλλων. οἷον εἰ “ἔστι μὲν ὅ, ἔστι δ’ ὁ οὐ” ἢ λύσις, ἂν ἀπλῶς δῶ λέγεσθαι, συμπεραίνεται· ἐὰν δὲ μὴ συμπεραίνεται, οὐκ ἂν εἴη <ἡ> λύσις. ἐν δὲ τοῖς προειρημένοις οὐδὲ πάντων διδομένων φαμὲν γίνεσθαι συλλογισμόν.

Ἔτι δὲ καὶ οἶδ’ εἰσὶ τούτων τῶν λόγων· “ἄρ’ ὁ γέγραπται, γέγραφέ τις; γέγραπται δὲ νῦν ὅτι σὺ κάθησαι, ψευδὴς λόγος· ἦν δ’ ἀληθής, ὅτ’ ἐγράφετο· ἅμα ἄρα ἐγράφετο ψευδὴς καὶ ἀληθής.” τὸ γὰρ ψευδῆ ἢ ἀληθῆ λόγον ἢ δόξαν εἶναι οὐ τότε ἀλλὰ τοιόνδε σημαίνει· ὁ γὰρ αὐτὸς λόγος καὶ ἐπὶ τῆς δόξης. καὶ “ἄρ’ ὁ μανθάνει ὁ μανθάνων, τοῦτ’ ἔστιν ὁ μανθάνει; μανθάνει δέ τις τὸ βραδύ ταχύ.” οὐ τοίνυν ὁ μανθάνει ἀλλ’ ὥς μανθάνει εἴρηκεν. καὶ “ἄρ’ ὁ βαδίζει

τις πατεῖ; βαδίζει δὲ τὴν ἡμέραν ὅλην.” ἢ οὐχ ὁ βαδίζει ἀλλ’ ὅτε βαδίζει εἴρηκεν, οὐδὲ τὸ τὴν κύλικα πίνειν ὁ πίνει ἀλλ’ ἐξ οὗ. καὶ “ἄρ’ ὁ τις οἶδεν, ἢ μαθὼν ἢ εὐρὼν οἶδεν; ὦν δὲ τὸ μὲν εὔρε τὸ δ’ ἔμαθε, τὰ ἄμφω οὐδέτερον.” ἢ ὁ μὲν ἅπαν, ἃ δ’ οὐχ ἅπαντα; καὶ ὅτι ἔστι τις τρίτος ἄνθρωπος παρ’ αὐτὸν καὶ τοὺς καθ’ ἕκαστον· τὸ γὰρ ἄνθρωπος καὶ ἅπαν τὸ κοινὸν οὐ τότε τι ἀλλὰ τοιόνδε τι ἢ ποσὸν ἢ πρὸς τι ἢ τῶν τοιούτων τι σημαίνει. ὁμοίως δὲ καὶ ἐπὶ τοῦ Κορίσκος καὶ Κορίσκος μουσικός, πότερον ταυτὸν ἢ ἕτερον; τὸ μὲν γὰρ τότε τι, τὸ δὲ τοιόνδε σημαίνει, ὥστ’ οὐκ ἔστιν αὐτὸ ἐκθέσθαι. οὐ τὸ ἐκτίθεσθαι δὲ ποιεῖ τὸν τρίτον ἄνθρωπον, ἀλλὰ τὸ ὅπερ τότε τι εἶναι συγχωρεῖν· οὐ γὰρ ἔστι τότε τι εἶναι, ὥσπερ Καλλίας, καὶ ὅπερ ἀνθρωπὸς ἐστιν. οὐδ’ εἴ τις τὸ ἐκτιθέμενον μὴ ὅπερ τότε τι εἶναι λέγοι ἀλλ’ ὅπερ ποιόν, οὐδὲν διοίσει· ἔσται γὰρ τὸ παρὰ τοὺς πολλοὺς ἔν τι, οἷον τὸ ἄνθρωπος. φανερόν οὖν ὅτι οὐ δοτέον τότε τι εἶναι τὸ κοινῇ κατηγορούμενον ἐπὶ πᾶσιν, ἀλλ’ ἥτοι ποιὸν ἢ πρὸς τι ἢ ποσὸν ἢ τῶν τοιούτων τι σημαίνειν.

Ὅλως δ’ ἐν τοῖς παρὰ τὴν λέξιν λόγοις αἰετὰ κατὰ τὸ ἀντικείμενον ἔσται ἡ λύσις ἢ παρ’ ὃ ἐστιν ὁ λόγος, οἷον εἰ παρὰ σύνθεσιν ὁ λόγος, ἢ λύσις διελόντι, εἰ δὲ παρὰ διαίρεσιν, συνθέντι. πάλιν εἰ παρὰ προσωδίαν ὀξεῖαν, ἢ βαρεῖα προσωδία λύσις, εἰ δὲ παρὰ βαρεῖαν, ἢ ὀξεῖα. εἰ δὲ παρ’ ὁμωνυμίαν, ἔστι τὸ ἀντικείμενον ὄνομα εἰπόντα λύειν· οἷον, εἰ ἄψυχον συμβαίνει λέγειν, ἀποφήσαντα μὴ εἶναι δηλοῦν ὥς ἔστιν ἔμψυχον· εἰ δ’ ἄψυχον ἔφησεν, ὁ δ’ ἔμψυχον συνελογίσατο, [λέγειν] ὥς ἔστιν ἄψυχον. ὁμοίως δὲ καὶ ἐπὶ τῆς ἀμφιβολίας. εἰ δὲ παρ’ ὁμοιότητα λέξεως, τὸ ἀντικείμενον ἔσται λύσις. “ἄρ’ ὁ μὴ ἔχει, δοίῃ ἂν τις;” ἢ οὐχ ὁ μὴ ἔχει, ἀλλ’ ὥς οὐκ ἔχει, οἷον ἕνα μόνον ἀστράγαλον. “ἄρ’ ὁ ἐπίσταται, μαθὼν ἢ εὐρὼν ἐπίσταται;” ἀλλ’ οὐχ ἃ ἐπίσταται. καὶ εἰ ὁ βαδίζει πατεῖ, ἀλλ’ οὐχ ὅτε. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων.

Πρὸς δὲ τοὺς παρὰ τὸ συμβεβηκὸς μία μὲν ἡ αὐτὴ λύσις πρὸς ἅπαντας. ἐπεὶ γὰρ ἀδιόριστόν ἐστι τὸ πότε λεκτέον ἐπὶ τοῦ πράγματος ὅταν ἐπὶ τοῦ συμβεβηκότητος ὑπάρχη, καὶ ἐπ’ ἐνίων μὲν δοκεῖ καὶ φασίν, ἐπ’ ἐνίων δ’ οὐ φασιν ἀναγκαῖον εἶναι, ῥητέον οὖν συμβιβασθέντος ὁμοίως πρὸς ἅπαντας ὅτι οὐκ ἀναγκαῖον, ἔχειν δὲ δεῖ προφέρειν τὸ “οἷον”. εἰσὶ δὲ πάντες οἱ τοιοῦδε τῶν λόγων παρὰ τὸ συμβεβηκὸς· “ἄρ’ οἶδας ὁ μέλλω σε ἐρωτᾶν;” “ἄρ’ οἶδας τὸν προσιόντα, ἢ τὸν ἐγκεκαλυμμένον;” “ἄρ’ ὁ ἀνδριάς σὸν ἐστιν ἔργον,

ἢ σὸς ὁ κύων πατήρ;” “ἄρα τὰ ὀλιγάκις ὀλίγα ὀλίγα;” φανερόν γάρ ἐν ἅπασι τούτοις ὅτι οὐκ ἀνάγκη τὸ κατὰ τοῦ συμβεβηκότος καὶ κατὰ τοῦ πράγματος ἀληθεύεσθαι· μόνοις γὰρ τοῖς κατὰ τὴν οὐσίαν ἀδιαφόροις καὶ ἐν οὖσιν ἅπαντα δοκεῖ ταυτὰ ὑπάρχειν. τῷ δ’ ἀγαθῷ οὐ ταυτόν ἐστιν ἀγαθῷ τ’ εἶναι καὶ μέλλοντι ἐρωτᾶσθαι, οὐδὲ τῷ προσιόντι ἢ ἐγκεκαλυμμένῳ προσιόντι τε εἶναι καὶ Κορίσκῳ· ὥστ’ οὐκ εἰ οἶδα τὸν Κορίσκον, ἀγνοῶ δὲ τὸν προσιόντα, τὸν αὐτὸν οἶδα καὶ ἀγνοῶ· οὐδ’ εἰ τοῦτ’ ἔστιν ἐμόν, ἔστι δ’ ἔργον, ἐμόν ἐστιν ἔργον, ἀλλ’ ἢ κτῆμα ἢ πρᾶγμα ἢ ἄλλο τι. τὸν αὐτὸν δὲ τρόπον καὶ ἐπὶ τῶν ἄλλων.

Λύουσι δέ τινες διαιροῦντες τὴν ἐρώτησιν. φασὶ γὰρ ἐνδέχεσθαι ταυτό πρᾶγμα εἰδέναι καὶ ἀγνοεῖν, ἀλλὰ μὴ κατὰ ταυτό· τὸν οὖν προσιόντα οὐκ εἰδότες, τὸν δὲ Κορίσκον εἰδότες, ταυτό μὲν εἰδέναι καὶ ἀγνοεῖν φασιν, ἀλλ’ οὐ κατὰ ταυτό. καίτοι πρῶτον μὲν, καθάπερ ἤδη εἵπομεν, δεῖ τῶν παρὰ ταυτό λόγων τὴν αὐτὴν εἶναι διόρθωσιν. αὕτη δ’ οὐκ ἔσται, ἂν τις μὴ ἐπὶ τοῦ εἰδέναι ἀλλ’ ἐπὶ τοῦ εἶναι ἢ πως ἔχειν τὸ αὐτὸ ἀξίωμα λαμβάνη, οἷον “εἰ ὅδε ἐστὶ πατήρ, ἔστι δὲ σός”· εἰ γὰρ ἐπ’ ἐνίων τοῦτ’ ἔστιν ἀληθές καὶ ἐνδέχεται τὸ αὐτὸ εἰδέναι καὶ ἀγνοεῖν, ἀλλ’ ἐνταῦθα οὐδὲν κοινωνεῖ τὸ λεχθέν. οὐδὲν δὲ κωλύει τὸν αὐτὸν λόγον πλείους μοχθηρίας ἔχειν, ἀλλ’ οὐχ ἢ πάσης μοχθηρίας ἐμφάνισις λύσις ἐστίν· ἐγχωρεῖ γὰρ ὅτι μὲν ψεῦδος συλλελογίσται δεῖξαι τινα, παρ’ ὃ δὲ μὴ δεῖξαι, οἷον τὸν Ζήνωνος λόγον, ὅτι οὐκ ἔστι κινηθῆναι. ὥστε καὶ εἴ τις ἐπιχειρεῖ συνάγειν ὥς δυνατόν, ἀμαρτάνει, κἂν [εἰ] μυριάκις ἢ συλλελογισμένος· οὐ γάρ ἐστιν αὕτη λύσις· ἦν γὰρ ἡ λύσις ἐμφάνισις ψευδοῦς συλλογισμοῦ παρ’ ὃ ψευδής. εἰ οὖν μὴ συλλελογίσται, εἰ καὶ ἀληθές ἢ ψεῦδος†ἐπιχειρεῖ συνάγειν, ἡ ἐκείνου δήλωσις λύσις ἐστίν. ἴσως δὲ καὶ τοῦτ’ ἐπ’ ἐνίων οὐδὲν κωλύει συμβαίνειν· πλήν ἐπὶ γε τούτων οὐδὲ τοῦτο δόξειεν ἂν· καὶ γὰρ τὸν Κορίσκον ὅτι Κορίσκος οἶδε καὶ τὸ προσιόν ὅτι προσιόν. ἐνδέχεσθαι δὲ δοκεῖ τὸ αὐτὸ εἰδέναι καὶ μὴ, οἷον ὅτι μὲν λευκὸν εἰδέναι, ὅτι δὲ μουσικὸν μὴ γνωρίζειν· οὕτω γὰρ τὸ αὐτὸ οἶδε καὶ οὐκ οἶδεν, ἀλλ’ οὐ κατὰ ταυτόν. τὸ δὲ προσιόν καὶ Κορίσκον <ὄν>, καὶ ὅτι προσιόν καὶ ὅτι Κορίσκος, οἶδεν.

Ὅμοίως δ’ ἀμαρτάνουσι καὶ οἱ λύοντες ὅτι ἅπας ἀριθμὸς ὀλίγος, ὥσπερ οὖς εἵπομεν· εἰ γάρ, μὴ συμπερινομένου, τοῦτο παραλιπόντες ἀληθές συμπεπεράνθαι φασὶ (πάντα γὰρ εἶναι καὶ

πολὺν καὶ ὀλίγον), ἀμαρτάνουσιν.

Ἐνιοὶ δὲ καὶ τῷ διττῷ λύουσι τοὺς συλλογισμούς, οἷον ὅτι σός ἐστι πατὴρ ἢ υἱὸς ἢ δοῦλος. καίτοι φανερόν ὥς εἰ παρὰ τὸ πολλαχῶς λέγεσθαι φαίνεται ὁ ἔλεγχος, δεῖ τοῦνομα ἢ τὸν λόγον κυρίως εἶναι πλειόνων. τὸ δὲ τόνδ' εἶναι τοῦδε τέκνον οὐδεὶς λέγει κυρίως, εἰ δεσπότης ἐστὶ τέκνον, ἀλλὰ παρὰ τὸ συμβεβηκὸς ἢ σύνθεσις ἐστίν· “ἄρ' ἐστὶ τοῦτο σόν;” “ναί.” “ἔστι δὲ τοῦτο τέκνον· σὸν ἄρα τοῦτο τέκνον.” ἀλλ' οὐ σὸν τέκνον ὅτι συμβέβηκεν εἶναι καὶ σὸν καὶ τέκνον.

Καὶ τὸ εἶναι τῶν κακῶν τι ἀγαθόν· “ἡ γὰρ φρόνησις ἐστὶν ἐπιστήμη τῶν κακῶν”. τὸ δὲ τοῦτο τούτων εἶναι οὐ λέγεται πολλαχῶς, ἀλλὰ κτῆμα. εἰ δ' ἄρα πολλαχῶς (καὶ γὰρ τὸν ἄνθρωπον τῶν ζώων φαμὲν εἶναι, ἀλλ' οὐ τι κτῆμα· καὶ ἐάν τι πρὸς τὰ κακὰ λέγεται ὥς τινός, διὰ τοῦτο τῶν κακῶν ἐστίν, ἀλλ' οὐ τοῦτο τῶν κακῶν), παρὰ τὸ πῇ οὖν καὶ ἀπλῶς φαίνεται. καίτοι ἐνδέχεται ἴσως ἀγαθὸν εἶναί τι τῶν κακῶν διττῶς, ἀλλ' οὐκ ἐπὶ τοῦ λόγου τούτου, ἀλλ' εἰ τι δοῦλον εἶη ἀγαθὸν μοχθηροῦ, μᾶλλον. ἴσως δ' οὐδ' οὕτως· οὐ γὰρ εἰ ἀγαθὸν καὶ τούτου, ἀγαθὸν τούτου ἅμα. οὐδὲ τὸ τὸν ἄνθρωπον φάναι τῶν ζώων εἶναι [οὐ] λέγεται πολλαχῶς· οὐ γὰρ εἴ ποτέ τι σημαίνομεν ἀφελόντες, τοῦτο λέγεται πολλαχῶς· καὶ γὰρ τὸ ἡμῖς εἰπόντες τοῦ ἔπους “δός μοι Ἰλιάδα” σημαίνομεν, οἷον τὸ “μῆνιν ἄειδε, θεά”.

Τοὺς δὲ παρὰ τὸ κυρίως τότε ἢ πῇ ἢ πού ἢ πῶς ἢ πρὸς τι λέγεσθαι, καὶ μὴ ἀπλῶς, λυτέον σκοποῦντι τὸ συμπέρασμα πρὸς τὴν ἀντίφασιν, εἰ ἐνδέχεται τούτων τι πεπονθέναι. τὰ γὰρ ἐναντία καὶ τὰ ἀντικείμενα καὶ φάσιν καὶ ἀπόφασιν ἀπλῶς μὲν ἀδύνατον ὑπάρχειν τῷ αὐτῷ, πῇ μέντοι ἐκάτερον ἢ πρὸς τι ἢ πῶς, ἢ τὸ μὲν πῇ τὸ δ' ἀπλῶς, οὐδὲν κωλύει. ὥστ' εἰ τότε μὲν ἀπλῶς τότε δὲ πῇ, οὕπω ἔλεγχος, τοῦτο δ' ἐν τῷ συμπεράσματι θεωρητέον πρὸς τὴν ἀντίφασιν.

Εἰσὶ δὲ πάντες οἱ τοιοῦτοι λόγοι τοῦτ' ἔχοντες· “ἄρ' ἐνδέχεται τὸ μὴ ὄν εἶναι; ἀλλὰ μὴν ἔστι γέ τι μὴ ὄν.” ὁμοίως δὲ καὶ τὸ ὄν οὐκ ἔσται· οὐ γὰρ ἔσται τι τῶν ὄντων. “ἄρ' ἐνδέχεται τὸν αὐτὸν ἅμα εὐορκεῖν καὶ ἐπιορκεῖν;” “ἄρ' ἐγχωρεῖ τὸν αὐτὸν ἅμα τῷ αὐτῷ πείθεσθαι καὶ ἀπειθεῖν;” ἢ οὔτε τὸ εἶναί τι καὶ εἶναι ταυτόν (τὸ γὰρ μὴ ὄν οὐκ εἰ ἔστι τι, καὶ ἔστιν ἀπλῶς), οὔτ' εἰ εὐορκεῖ τότε ἢ τῇδε, ἀνάγκη καὶ εὐορκεῖν (ὁ γὰρ ὁμόσας ἐπιορκήσιν εὐορκεῖ ἐπιορκῶν

τοῦτο μόνον, εὐορκεῖ δὲ οὐ). οὐδ' ὁ ἀπειθὼν πείθεται, ἀλλὰ τι πείθεται. ὅμοιος δ' ὁ λόγος καὶ περὶ τοῦ ψεύδεσθαι τὸν αὐτὸν ἅμα καὶ ἀληθεύειν, ἀλλὰ διὰ τὸ μὴ εἶναι εὐθεώρητον πότερον ἂν τις ἀποδοίῃ, τὸ ἀπλῶς ἀληθεύειν ἢ ψεύδεσθαι, δύσκολον φαίνεται. κωλύει δ' αὐτὸν οὐδὲν ἀπλῶς μὲν εἶναι ψευδῆ πῇ δ' ἀληθῇ ἢ τινος, καὶ εἶναι ἀληθῇ τινά, ἀληθῇ δὲ αὐτὸν μὴ. ὁμοίως δὲ καὶ ἐπὶ τῶν πρὸς τι καὶ πού καὶ ποτέ· πάντες γὰρ οἱ τοιοῦτοι λόγοι παρὰ τοῦτο συμβαίνουσιν. “ἄρ' ἡ υἷγια ἢ ὁ πλοῦτος ἀγαθόν; ἀλλὰ τῷ ἄφρονι καὶ μὴ ὀρθῶς χρωμένῳ οὐκ ἀγαθόν· ἀγαθὸν ἄρα καὶ οὐκ ἀγαθόν.” “ἄρα τὸ υἱαίνειν ἢ δύνασθαι ἐν πόλει βέλτιον; ἀλλ' ἔστιν ὅτε οὐ βέλτιον· ταῦτόν ἄρα τῷ αὐτῷ ἀγαθὸν καὶ οὐκ ἀγαθόν.” ἢ οὐδὲν κωλύει ἀπλῶς ὄν ἀγαθὸν τῷδε μὴ εἶναι ἀγαθόν, ἢ τῷδε μὲν ἀγαθόν, ἀλλ' οὐ νῦν ἢ οὐκ ἐνταῦθ' ἀγαθόν; “ἄρ' ὁ μὴ βούλοιτ' ἂν ὁ φρόνιμος, κακόν; ἀποβαλεῖν δ' οὐ βούλεται τὰγαθόν· κακὸν ἄρα τὰγαθόν.” οὐ γὰρ ταῦτόν εἶπεῖν τὰγαθὸν εἶναι κακόν καὶ τὸ ἀποβαλεῖν τὰγαθόν. ὁμοίως δὲ καὶ ὁ τοῦ κλέπτου λόγος· οὐ γάρ, εἰ κακὸν ἐστὶν ὁ κλέπτῃς, καὶ τὸ λαβεῖν ἐστὶ κακόν. οὐκ οὖν τὸ κακὸν βούλεται, ἀλλὰ τὰγαθόν· τὸ γὰρ λαβεῖν ἀγαθόν. καὶ ἡ νόσος κακὸν ἐστὶν, ἀλλ' οὐ τὸ ἀποβαλεῖν νόσον. “ἄρα τὸ δίκαιον τοῦ ἀδίκου καὶ τὸ δικαίως τοῦ ἀδίκως αἰρετώτερον; ἀλλ' ἀποθανεῖν ἀδίκως αἰρετώτερον.” “ἄρα δίκαιόν ἐστι τὰ αὐτοῦ ἔχειν ἕκαστον; ἢ δ' ἂν τις κρίνῃ κατὰ δόξαν τὴν αὐτοῦ, κἂν ἢ ψευδῆς, κύριά ἐστιν ἐκ τοῦ νόμου· τὸ αὐτὸ ἄρα δίκαιον καὶ οὐ δίκαιον”· καὶ “πότερον δεῖ κρίνειν, τὸν τὰ δίκαια λέγοντα ἢ τὸν τὰ ἄδिका; ἀλλὰ μὴν καὶ τὸν ἀδικούμενον δίκαιόν ἐστιν ἱκανῶς λέγειν ἢ ἔπαθεν· ταῦτα δ' ἦν ἄδिका.” οὐ γάρ, εἰ παθεῖν τι ἀδίκως αἰρετόν, τὸ ἀδίκως αἰρετώτερον τοῦ δικαίως, ἀλλ' ἀπλῶς μὲν τὸ δικαίως, τοδὶ μέντοι οὐδὲν κωλύει ἀδίκως ἢ δικαίως. καὶ τὸ ἔχειν τὰ αὐτοῦ δίκαιον, τὸ δὲ τὰλλότρια οὐ δίκαιον· κρίσιν μέντοι ταύτην δικαίαν εἶναι οὐδὲν κωλύει, οἷον ἂν ἢ κατὰ δόξαν τοῦ κρίναντος· οὐ γάρ, εἰ δίκαιον τῷδε ἢ ᾧδε, καὶ ἀπλῶς δίκαιον. ὁμοίως δὲ καὶ ἄδिका ὄντα οὐδὲν κωλύει λέγειν γε αὐτὰ δίκαιον εἶναι· οὐ γάρ, εἰ λέγειν δίκαιον, ἀνάγκη δίκαια εἶναι, ὥσπερ οὐδ' εἰ ὠφέλιμον λέγειν, ὠφέλιμα. ὁμοίως δὲ καὶ ἐπὶ τῶν δικαίων. ὥστ' οὐκ εἰ τὰ λεγόμενα ἄδिका, ὁ λέγων ἄδिका νικάται· λέγει γὰρ ἢ λέγειν ἐστὶ δίκαια, ἀπλῶς δὲ καὶ παθεῖν ἄδिका.

Τοῖς δὲ παρὰ τὸν ὀρισμὸν γινομένοις τοῦ ἐλέγχου, καθάπερ ὑπεγράφη πρότερον, ἀπαντητέον σκοποῦσι τὸ συμπέρασμα πρὸς τὴν

ἀντίφασιν, ὅπως ἔσται τὸ αὐτὸ καὶ κατὰ τὸ αὐτὸ καὶ πρὸς τὸ αὐτὸ καὶ ὡσαύτως καὶ ἐν τῷ αὐτῷ χρόνῳ. ἐὰν δ' ἐν ἀρχῇ προσέρηται, οὐχ ὁμολογητέον ὡς ἀδύνατον τὸ αὐτὸ εἶναι διπλάσιον καὶ μὴ διπλάσιον, ἀλλὰ φατέον, μὴ μέντοι ὥδι ὥς ποτ' ἦν τὸ ἐλέγχεσθαι διωμολογημένον. εἰσὶ δὲ πάντες οἳδ' οἱ λόγοι παρὰ τὸ τοιοῦτο. “ἄρ' ὁ εἰδὼς ἕκαστον ὅτι ἕκαστον οἶδε τὸ πρᾶγμα; καὶ ὁ ἀγνοῶν ὡσαύτως; εἰδὼς δέ τις τὸν Κορίσκον ὅτι Κορίσκος ἀγνοοίῃ ἂν ὅτι μουσικός, ὥστε ταὐτὸ ἐπίσταται καὶ ἀγνοεῖ.” “ἄρα τὸ τετράπηχυ τοῦ τριπλήχεος μείζον; γένοιτο δ' ἂν ἐκ τριπλήχεος τετράπηχυ κατὰ τὸ μῆκος· τὸ δὲ μείζον ἐλάττονος μείζον· αὐτὸ ἄρα αὐτοῦ κατὰ ταὐτὸ μείζον καὶ ἔλαττον.”

Τοὺς δὲ παρὰ τὸ αἰτεῖσθαι καὶ λαμβάνειν τὸ ἐν ἀρχῇ πυνθανομένῳ, ἂν ἦ δηλον, οὐ δοτέον, οὐδ' ἂν ἐνδοξον ἢ λέγοντι τάληθές. ἂν δὲ λάθῃ, τὴν ἀγνοίαν διὰ τὴν μοχθηρίαν τῶν τοιούτων λόγων εἰς τὸν ἐρωτῶντα μεταστρεπτέον ὡς οὐ διελεγμένον· ὁ γὰρ ἔλεγχος ἄνευ τοῦ ἐξ ἀρχῆς. εἴθ' ὅτι ἐδόθη οὐχ ὡς τούτῳ χρησομένου, ἀλλ' ὡς πρὸς τοῦτο συλλογιούμενου, τοῦναντίον ἢ ἐπὶ τῶν παρεξελέγχων.

Καὶ τοὺς διὰ τοῦ παρεπομένου συμβιβάζοντας ἐπ' αὐτοῦ τοῦ λόγου δεικτέον. ἔστι δὲ διττὴ ἡ τῶν ἐπομένων ἀκολούθησις· ἡ γὰρ ὡς τῷ ἐν μέρει τὸ καθόλου, οἷον ἀνθρώπῳ ζῶν (ἀξιοῦται γάρ, εἰ τότε μετὰ τοῦδε, καὶ τόδ' εἶναι μετὰ τοῦδε), ἢ κατὰ τὰς ἀντιθέσεις (εἰ γὰρ τότε τῷδε ἀκολουθεῖ, τῷ ἀντικειμένῳ τὸ ἀντικείμενον)· παρ' ὃ καὶ ὁ τοῦ Μελίσσου λόγος· εἰ γὰρ τὸ γεγονός ἔχει ἀρχήν, τὸ ἀγέννητον ἀξιοῖ μὴ ἔχειν, ὥστ' εἰ ἀγέννητος ὁ οὐρανός, καὶ ἄπειρος, τὸ δ' οὐκ ἔστιν· ἀνάπαλιν γὰρ ἡ ἀκολούθησις.

Ὅσοι τε παρὰ τὸ προστιθέναι τι συλλογίζονται, σκοπεῖν εἰ ἀφαιρουμένου συμβαίνει μηδὲν ἦττον τὸ ἀδύνατον. κἄπειτα τοῦτο ἐμφανιστέον, καὶ λεκτέον ὡς ἔδωκεν οὐχ ὡς δοκοῦν ἀλλ' ὡς πρὸς τὸν λόγον, ὁ δὲ κέχρηται οὐδὲν πρὸς τὸν λόγον.

Πρὸς δὲ τοὺς τὰ πλείω ἐρωτήματα ἐν ποιοῦντας εὐθὺς ἐν ἀρχῇ διοριστέον· ἐρώτησις γὰρ μία πρὸς ἡν μία ἀπόκρισις ἔστιν, ὥστ' οὔτε πλείω καθ' ἑνὸς οὔτε ἐν κατὰ πολλῶν, ἀλλ' ἐν καθ' ἑνὸς φατέον ἢ ἀποφατέον. ὥσπερ δὲ ἐπὶ τῶν ὁμωνύμων ὅτε μὲν ἀμφοῖν ὅτε δ' οὐδετέρῳ ὑπάρχει, ὥστε μὴ ἀπλοῦ ὄντος τοῦ ἐρωτήματος ἀπλῶς ἀποκρινόμενοις οὐδὲν συμβαίνει πάσχειν, ὁμοίως καὶ ἐπὶ τούτων. ὅταν μὲν οὖν τὰ πλείω τῷ ἐνὶ ἡ τὸ ἐν τοῖς πολλοῖς ὑπάρχη,

τῷ ἀπλῶς δόντι καὶ ἁμαρτύνει ταύτην τὴν ἁμαρτίαν οὐδὲν ὑπεναντίωμα συμβαίνει, ὅταν δὲ τῷ μὲν τῷ δὲ μή, ἢ πλείω κατὰ πλείονων. καὶ ἔστιν ὡς ὑπάρχει ἀμφοτέρω ἀμφοτέροις, ἔστι δ' ὡς οὐχ ὑπάρχει πάλιν, ὥστε τοῦτ' εὐλαβητέον· οἷον ἐν τοῖσδε τοῖς λόγοις· “εἰ τὸ μὲν ἐστὶν ἀγαθὸν τὸ δὲ κακόν, ὅτι ταῦτα ἀληθὲς εἰπεῖν ἀγαθὸν καὶ κακόν, καὶ πάλιν μήτ' ἀγαθὸν μήτε κακόν (οὐκ ἔστι γὰρ ἐκάτερον ἐκάτερον), ὥστε ταὐτὸ ἀγαθὸν καὶ κακὸν καὶ οὐτ' ἀγαθὸν οὔτε κακόν”, καὶ “εἰ ἕκαστον αὐτὸ αὐτῷ ταὐτὸ καὶ ἄλλου ἕτερον, ἐπειδὴ οὐκ ἄλλοις ταῦτ' ἄλλ' αὐτοῖς καὶ ἕτερα αὐτῶν, τὰ αὐτὰ ἑαυτοῖς ἕτερα καὶ τὰ αὐτὰ”. ἔτι “εἰ τὸ μὲν ἀγαθὸν κακὸν γίνεται, τὸ δὲ κακὸν ἀγαθόν, δύο γένοιντ' ἂν· δυοῖν δὲ καὶ ἀνίσων ἐκάτερον αὐτὸ αὐτῷ ἴσον· ὥστε ἴσα καὶ ἄνισα αὐτὰ αὐτοῖς”.

Ἐμπίπτουσι μὲν οὖν οὗτοι καὶ εἰς ἄλλας λύσεις· καὶ γὰρ τὸ ἄμφω καὶ τὸ ἅπαντα πλείω σημαίνει· οὐκ οὐν ταυτόν, πλὴν ὄνομα, συμβαίνει φῆσαι καὶ ἀποφῆσαι. τοῦτο δ' οὐκ ἦν ἔλεγχος, ἀλλὰ φανερόν ὅτι μὴ μιᾶς ἐρωτήσεως τῶν πλείονων γινομένης, ἀλλ' ἐν καθ' ἐνὸς φάντος ἢ ἀποφάντος, οὐκ ἔσται τὸ ἀδύνατον.

Περὶ δὲ τῶν ἀπαγόντων εἰς <τὸ> τὸ αὐτὸ πολλάκις εἰπεῖν φανερόν ὡς οὐ δοτέον τῶν πρὸς τι λεγομένων σημαίνει τι χωριζομένης καθ' αὐτὰς τὰς κατηγορίας, οἷον “διπλάσιον” ἀντὶ τοῦ “διπλάσιον ἡμίσεος”, ὅτι ἐμφαίνεται. καὶ γὰρ τὸ δέκα ἐν τοῖς ἐνὸς δέουσιν δέκα καὶ τὸ ποιῆσαι ἐν τῷ μὴ ποιῆσαι καὶ ὅλως ἐν τῇ ἀποφάσει ἢ φάσει· ἀλλ' ὅμως οὐκ εἴ τις λέγει τοδί μὴ εἶναι λευκόν, λέγει αὐτὸ λευκὸν εἶναι. τὸ δὲ “διπλάσιον” οὐδὲ σημαίνει οὐδὲν ἴσως, ὥσπερ οὐδὲ τὸ “ἡμισυ”· εἰ δ' ἄρα καὶ σημαίνει, ἀλλ' οὐ ταὐτὸ καὶ συνηρημένον. οὐδ' ἡ ἐπιστήμη ἐν τῷ εἶδει (οἷον εἰ ἔστιν ἡ ἱατρικὴ ἐπιστήμη), ὅπερ τὸ κοινόν· ἐκεῖνο δ' ἦν ἐπιστήμη ἐπιστητοῦ. ἐν δὲ τοῖς <τούτων> δι' ὧν δηλοῦται κατηγορουμένοις τοῦτο λεκτέον, ὡς οὐ τὸ αὐτὸ χωρὶς καὶ ἐν τῷ λόγῳ τὸ δηλούμενον. τὸ γὰρ κοῖλον κοινῇ μὲν τὸ αὐτὸ δηλοῖ ἐπὶ τοῦ σιμοῦ καὶ τοῦ ροικοῦ, προστιθέμενον δὲ οὐδὲν κωλύει ἄλλα, τὸ μὲν τῇ ῥίνι τὸ δὲ τῷ σκέλει, σημαίνει· ἔνθα μὲν γὰρ τὸ σιμόν, ἔνθα δὲ τὸ ροικόν σημαίνει, καὶ οὐδὲν διαφέρει εἰπεῖν ῥίς σιμὴ ἢ ῥίς κοίλη. ἔτι οὐ δοτέον τὴν λέξιν κατ' εὐθύ· ψεῦδος γὰρ ἐστίν. οὐ γάρ ἐστι τὸ σιμόν ῥίς κοίλη ἀλλὰ ῥίνος τοδί, οἷον πάθος, ὥστ' οὐδὲν ἄτοπον εἰ ἡ ῥίς ἢ σιμὴ ῥίς ἐστὶν ἔχουσα κοιλότητα ῥίνος.

Περὶ δὲ τῶν σολοικισμῶν, παρ' ὅ τι μὲν φαίνονται συμβαίνειν

εἵπομεν πρότερον. ὥς δὲ λυτέον, ἐπ' αὐτῶν τῶν λόγων ἔσται φανερόν· ἅπαντες γὰρ οἱ τοιοῖδε τοῦτο βούλονται κατασκευάζειν. “ἄρ' ὁ λέγεις ἀληθῶς, καὶ ἔστι τοῦτο ἀληθῶς; φῆς δ' εἶναί τι λίθον· ἔστιν ἄρα τι λίθον.” ἢ τὸ λέγειν λίθον οὐκ ἔστι λέγειν ὁ ἀλλ' ὄν, οὐδὲ τοῦτο ἀλλὰ τοῦτον. εἰ οὖν ἔροιτό τις, “ἄρ' ὄν ἀληθῶς λέγεις, ἔστι τοῦτον;”, οὐκ ἂν δοκοίη ἐλληνίζειν, ὥσπερ οὐδ' εἰ ἔροιτο, “ἄρ' ἦν λέγεις εἶναι, ἔστιν οὗτος;”. ξύλον δ' εἰπεῖν οὗτος, ἢ ὅσα μήτε θῆλυ μήτ' ἄρρεν σημαίνει, οὐδὲν διαφέρει· διὸ καὶ οὐ γίνεται σολοικισμός· “εἰ ὁ λέγεις εἶναι, ἔστι τοῦτο, ξύλον δὲ λέγεις εἶναι, ἔστιν ἄρα ξύλον”. τὸ δὲ “λίθος” καὶ τὸ “οὗτος” ἄρρενος ἔχει κλίσιν. εἰ δὴ τις ἔροιτο “ἄρ' οὗτός ἐστιν αὕτη;”, εἶτα πάλιν “τί δ'; οὐχ οὗτός ἐστι Κορίσκος;”, εἴτ' εἶπειεν “ἔστιν ἄρα οὗτος αὕτη”, οὐ συλλελόγισται τὸν σολοικισμόν, οὐδ' εἰ τὸ “Κορίσκος” σημαίνει ὅπερ αὕτη, μὴ δίδωσι δὲ ὁ ἀποκρινόμενος, ἀλλὰ δεῖ τοῦτο προσερωτηθῆναι. εἰ δὲ μήτ' ἔστιν μήτε δίδωσιν, οὐ συλλελόγισται οὔτε τῷ ὄντι οὔτε πρὸς τὸν ἠρωτημένον. ὁμοίως οὖν δεῖ κακεῖ τὸν λίθον σημαίνειν “οὗτος”. εἰ δὲ μήτε ἔστι μήτε δέδοται, οὐ λεκτέον τὸ συμπέρασμα· φαίνεται δὲ παρὰ τὸ τὴν ἀνόμοιον πῶσιν τοῦ ὀνόματος ὁμοίαν φαίνεσθαι. “ἄρ' ἀληθές ἐστιν εἰπεῖν ὅτι ἔστιν αὕτη ὅπερ εἶναι φῆς αὐτήν; εἶναι δὲ φῆς ἀσπίδα· ἔστιν ἄρα αὕτη ἀσπίδα.” ἢ οὐκ ἀνάγκη, εἰ μὴ τὸ “αὕτη” ἀσπίδα σημαίνει ἀλλ' ἀσπίς, τὸ δὲ “ταύτην” ἀσπίδα. οὐδ' εἰ ὁ φῆς εἶναι τοῦτον, ἔστιν οὗτος, φῆς δ' εἶναι Κλέωνα, ἔστιν ἄρα οὗτος Κλέωνα· οὐ γὰρ ἔστιν οὗτος Κλέωνα· εἴρηται γὰρ ὅτι ὁ φημι εἶναι τοῦτον, ἔστιν οὗτος, οὐ τοῦτον· οὐδὲ γὰρ ἂν ἐλληνίζοι οὕτως τὸ ἐρώτημα λεχθέν, “ἄρ' ἐπίστασαι τοῦτο; τοῦτο δ' ἐστὶ λίθος· ἐπίστασαι ἄρα λίθος”. ἢ οὐ ταῦτὸ σημαίνει τὸ “τοῦτο” ἐν τῷ “ἄρ' ἐπίστασαι τοῦτο;” καὶ ἐν τῷ “τοῦτο δὲ λίθος”, ἀλλ' ἐν μὲν τῷ πρώτῳ τοῦτον, ἐν δὲ τῷ ὑστέρῳ οὗτος. “ἄρ' οὗ ἐπιστήμην ἔχεις, ἐπίστασαι τοῦτο; ἐπιστήμην δ' ἔχεις λίθου· ἐπίστασαι ἄρα λίθου.” ἢ τὸ μὲν “οὗ” λίθου λέγει, τὸ δὲ “τοῦτο” λίθον· ἐδόθη δ', οὗ ἐπιστήμην ἔχεις, ἐπίστασθαι οὐ τούτου ἀλλὰ τοῦτο, ὥστ' οὐ τοῦ λίθου ἀλλὰ τὸν λίθον.

Ὅτι μὲν οὖν οἱ τοιοῦτοι τῶν λόγων οὐ συλλογίζονται σολοικισμόν ἀλλὰ φαίνονται, καὶ διὰ τί τε φαίνονται καὶ πῶς ἀπαντητέον πρὸς αὐτούς, φανερόν ἐκ τῶν εἰρημένων.

Δεῖ δὲ καὶ κατανοεῖν ὅτι πάντων τῶν λόγων οἱ μὲν εἰσι ῥάους κατιδεῖν, οἱ δὲ χαλεπώτεροι, παρὰ τί καὶ ἐν τίνι παραλογίζονται τὸν

ἀκούοντα, πολλάκις οἱ αὐτοὶ ἐκείνοις ὄντες· τὸν αὐτὸν γὰρ λόγον δεῖ καλεῖν τὸν παρὰ ταὐτὸ γινόμενον. ὁ αὐτὸς δὲ λόγος τοῖς μὲν παρὰ τὴν λέξιν τοῖς δὲ παρὰ τὸ συμβεβηκὸς τοῖς δὲ παρ’ ἑτερον δόξειεν ἂν εἶναι διὰ τὸ μεταφερόμενον ἕκαστον μὴ ὁμοίως εἶναι δῆλον. ὥσπερ οὖν ἐν τοῖς παρὰ τὴν ὁμωνυμίαν, ὅσπερ δοκεῖ τρόπος εὐθιέστατος εἶναι τῶν παραλογισμῶν, τὰ μὲν καὶ τοῖς τυχοῦσιν ἐστὶ δῆλα (καὶ γὰρ οἱ λόγοι σχεδὸν οἱ γελοῖοι πάντες εἰσὶ παρὰ τὴν λέξιν, οἷον “ἀνὴρ ἐφέρετο κατὰ κλίμακος δίφρον”, καὶ “ποῖ στέλλεσθε;” “πρὸς τὴν κεραίαν”, καὶ “ποτέρα τῶν βοῶν ἔμπροσθεν τέξεται;” “οὐδετέρα, ἀλλ’ ὀπισθεν ἄμφω”, καὶ “καθαρὸς ὁ βορέας;” “οὐ δῆτα· ἀπεκτόνηκε γὰρ τὸν πτωχὸν κατῳαζόμενον”. “ἄρ’ Εὐαρχος;” “οὐ δῆτα, ἀλλ’ Ἀπολλωνίδης”. τὸν αὐτὸν δὲ τρόπον καὶ τῶν ἄλλων σχεδὸν οἱ πλεῖστοι). τὰ δὲ καὶ τοὺς ἐμπειροτάτους φαίνεται λανθάνειν (σημεῖον δὲ τούτου ὅτι μάχονται πολλάκις περὶ τῶν ὀνομάτων, οἷον πότερον ταὐτὸ σημαίνει κατὰ πάντων τὸ ὄν καὶ τὸ ἔν, ἢ ἑτερον· τοῖς μὲν γὰρ δοκεῖ ταὐτὸ σημαίνειν τὸ ὄν καὶ τὸ ἔν, οἱ δὲ τὸν Ζήνωνος λόγον καὶ Παρμενίδου λύουσι διὰ τὸ πολλαχῶς φάναι τὸ ἔν λέγεσθαι καὶ τὸ ὄν). ὁμοίως δὲ καὶ <τῶν> παρὰ τὸ συμβεβηκὸς καὶ παρὰ τῶν ἄλλων ἕκαστον οἱ μὲν ἔσονται ῥάους ἰδεῖν οἱ δὲ χαλεπώτεροι τῶν λόγων, καὶ λαβεῖν ἐν τίνι γένει, καὶ πότερον ἔλεγχος ἢ οὐκ ἔλεγχος, οὐ ῥάδιον ὁμοίως περὶ πάντων.

Ἔστι δὲ δριμύς λόγος ὅστις ἀπορεῖν ποιεῖ μάλιστα· δάκνει γὰρ οὗτος μάλιστα. ἀπορία δ’ ἐστὶ διττή, ἢ μὲν ἐν τοῖς συλλελογισμένοις, ὅ τι ἀνέλη τις τῶν ἐρωτημάτων, ἢ δ’ ἐν τοῖς ἐριστικοῖς, πῶς εἴπη τις τὸ προταθέν. διόπερ ἐν τοῖς συλλογιστικοῖς οἱ δριμύτεροι λόγοι ζητεῖν μᾶλλον ποιοῦσιν. ἔστι δὲ συλλογιστικὸς μὲν λόγος δριμύτατος ἂν ἐξ ὅτι μάλιστα δοκούντων ὅτι μάλιστα ἐνδοξον ἀναιρῇ. εἷς γὰρ ὢν ὁ λόγος μετατιθεμένης τῆς ἀντιφάσεως ἅπαντας ὁμοίους ἔξει τοὺς συλλογισμούς· ἀεὶ γὰρ ἐξ ἐνδόξων ὁμοίως ἐνδοξον ἀναιρήσει [ἢ κατασκευάσει], διόπερ ἀπορεῖν ἀναγκαῖον. μάλιστα μὲν οὖν ὁ τοιοῦτος δριμύς, ὁ ἐξ ἴσου τὸ συμπέρασμα ποιῶν τοῖς ἐρωτήμασι, δεύτερος δ’ ὁ ἐξ ἀπάντων ὁμοίων· οὗτος γὰρ ὁμοίως ποιήσει ἀπορεῖν ὁποῖον τῶν ἐρωτημάτων ἀναιρετέον. τοῦτο δὲ χαλεπὸν· ἀναιρετέον μὲν γάρ, ὅ τι δ’ ἀναιρετέον ἄδηλον. τῶν δ’ ἐριστικῶν δριμύτατος μὲν ὁ πρῶτον εὐθὺς ἄδηλος πότερον συλλελόγισται ἢ οὐ, καὶ πότερον παρὰ ψεῦδος ἢ διαίρεσιν ἐστὶν ἡ λύσις· δεύτερος δὲ τῶν ἄλλων ὁ δῆλος μὲν ὅτι παρὰ διαίρεσιν ἢ ἀναίρεσιν ἐστὶ, μὴ φανερός δ’ ὢν διὰ

τίνος τῶν ἠρωτημένων ἀναίρεσιν ἢ διαίρεσιν λυτέος ἐστίν, ἢ πότερον αὕτη παρὰ τὸ συμπέρασμα ἢ παρὰ τι τῶν ἐρωτημάτων ἐστίν.

Ἐνίοτε μὲν οὖν ὁ μὴ συλλογισθεὶς λόγος εὐήθης ἐστίν, ἐὰν ἡ λῖαν ἄδοξα ἢ ψευδὴ τὰ λήμματα· ἐνίοτε δ' οὐκ ἄξιος καταφρονεῖσθαι. ὅταν μὲν γὰρ ἐλλείπη τι τῶν τοιούτων ἐρωτημάτων περὶ ᾧ ὁ λόγος καὶ δι' αἷ, [καὶ] μὴ προσλαβὼν τοῦτο καὶ μὴ συλλογισάμενος εὐήθης ὁ συλλογισμός· ὅταν δὲ τῶν ἔξωθεν, οὐκ εὐκαταφρόνητος οὐδαμῶς, ἀλλ' ὁ μὲν λόγος ἐπιεικής, ὁ δ' ἐρωτῶν ἠρώτηκεν οὐ καλῶς.

Ἔστι δέ, ὥσπερ λύειν ὅτε μὲν πρὸς τὸν λόγον ὅτε δὲ πρὸς τὸν ἐρωτῶντα καὶ τὴν ἐρώτησιν ὅτε δὲ πρὸς οὐδέτερον τούτων - ὁμοίως καὶ ἐρωτᾶν ἔστι καὶ συλλογίζεσθαι καὶ πρὸς τὴν θέσιν καὶ πρὸς τὸν ἀποκρινόμενον καὶ πρὸς τὸν χρόνον, ὅταν ἡ πλείονος χρόνου δεομένη ἢ λύσις [ἢ] τοῦ παρόντος καιροῦ τοῦ διαλεχθῆναι πρὸς τὴν λύσιν.

Ἐκ πόσων μὲν οὖν καὶ ποίων γίνονται τοῖς διαλεγομένοις οἱ παραλογισμοί, καὶ πῶς δεῖξομέν τε ψευδόμενον καὶ παράδοξα λέγειν ποιήσομεν, ἔτι δ' ἐκ τίνων συμβαίνει ὁ συλλογισμός, καὶ πῶς ἐρωτητέον καὶ τίς ἢ τάξις τῶν ἐρωτημάτων, ἔτι δὲ πρὸς τί χρήσιμοι πάντες εἰσὶν οἱ τοιοῦτοι λόγοι, καὶ περὶ ἀποκρίσεως ἀπλῶς τε πάσης καὶ πῶς λυτέον τοὺς λόγους καὶ τοὺς συλλογισμούς, εἰρήσθω περὶ ἀπάντων ἡμῖν ταῦτα. λοιπὸν δὲ περὶ τῆς ἐξ ἀρχῆς προθέσεως ἀναμνήσασιν εἰπεῖν τι βραχὺ περὶ αὐτῆς καὶ τέλος ἐπιθεῖναι τοῖς εἰρημένοις.

Προειλόμεθα μὲν οὖν εὐρεῖν δύναμιν τινα συλλογιστικὴν περὶ τοῦ προβληθέντος ἐκ τῶν ὑπαρχόντων ὡς ἐνδοξοτάτων· τοῦτο γὰρ ἔργον ἐστὶ τῆς διαλεκτικῆς καθ' αὐτὴν καὶ τῆς πειραστικῆς. ἐπεὶ δὲ προκατασκευαστέον πρὸς αὐτὴν διὰ τὴν τῆς σοφιστικῆς γειννίασιν, ὥστ' οὐ μόνον πείραν δύνασθαι λαβεῖν διαλεκτικῶς ἀλλὰ καὶ ὡς εἰδῶς, διὰ τοῦτο οὐ μόνον τὸ λεχθὲν ἔργον ὑπεθέμεθα τῆς πραγματείας, τὸ λόγον δύνασθαι λαβεῖν, ἀλλὰ καὶ ὅπως λόγον ὑπέχοντες φυλάξομεν τὴν θέσιν ὡς δι' ἐνδοξοτάτων ὁμοτρόπως. τὴν δ' αἰτίαν εἰρήκαμεν τούτου, ἐπεὶ καὶ διὰ τοῦτο Σωκράτης ἠρώτα ἀλλ' οὐκ ἀπεκρίνετο· ὠμολόγει γὰρ οὐκ εἰδέναι. δεδήλωται δ' ἐν τοῖς πρότερον καὶ πρὸς πόσα καὶ ἐκ πόσων τοῦτο ἔσται, καὶ πόθεν εὐπορήσομεν τούτων, ἔτι δὲ πῶς ἐρωτητέον καὶ τακτέον τὴν

ἐρώτησιν πᾶσαν, καὶ περὶ τε ἀποκρίσεων καὶ λύσεων τῶν πρὸς τοὺς συλλογισμούς. δεδήλωται δὲ καὶ περὶ τῶν ἄλλων ὅσα τῆς αὐτῆς μεθόδου τῶν λόγων ἐστίν. πρὸς δὲ τούτοις περὶ τῶν παραλογισμῶν διεληλύθαμεν, ὥσπερ εἰρήκαμεν ἤδη πρότερον. ὅτι μὲν οὖν ἔχει τέλος ἱκανῶς ἃ προειλόμεθα, φανερόν· δεῖ δ' ἡμᾶς μὴ λεληθέναι τὸ συμβεβηκὸς περὶ ταύτην τὴν πραγματείαν. τῶν γὰρ εὕρισκομένων ἀπάντων τὰ μὲν παρ' ἐτέρων ληθέντα πρότερον πεπονημένα κατὰ μέρος ἐπιδέδωκεν ὑπὸ τῶν παραλαβόντων ὕστερον, τὰ δ' ἐξ ὑπαρχῆς εὕρισκόμενα μικρὰν τὸ πρῶτον ἐπίδοσιν λαμβάνειν εἴωθε, χρησιμωτέραν μέντοι πολλῷ τῆς ὕστερον ἐκ τούτων αὐξήσεως· μέγιστον γὰρ ἴσως ἀρχὴ παντός, ὥσπερ λέγεται. διὸ καὶ χαλεπώτατον· ὅσφ γὰρ κράτιστον τῇ δυνάμει, τοσοῦτον μικρότατον ὄν τῷ μεγέθει χαλεπώτατόν ἐστιν ὀφθῆναι. ταύτης δ' εὕρημένης ῥᾶον τὸ προστιθέναι καὶ συναύξειν τὸ λοιπόν ἐστιν· ὅπερ καὶ περὶ τοὺς ῥητορικοὺς λόγους συμβέβηκε, σχεδὸν δὲ καὶ περὶ τὰς ἄλλας ἀπάσας τέχνας. οἱ μὲν γὰρ τὰς ἀρχὰς εὐρόντες παντελῶς ἐπὶ μικρόν τι προήγαγον· οἱ δὲ νῦν εὐδοκιμοῦντες, παραλαβόντες παρὰ πολλῶν οἶον ἐκ διαδοχῆς κατὰ μέρος προαγαγόντων, οὕτως ἠνξήκασι, Τεισίας μὲν μετὰ τοὺς πρώτους, Θρασύμαχος δὲ μετὰ Τεισίαν, Θεόδωρος δὲ μετὰ τοῦτον, καὶ πολλοὶ πολλὰ συνενηνόχασι μέρη· διόπερ οὐδὲν θαυμαστὸν ἔχειν τι πλῆθος τὴν τέχνην. ταύτης δὲ τῆς πραγματείας οὐ τὸ μὲν ἦν τὸ δ' οὐκ ἦν προεξεργασμένον, ἀλλ' οὐδὲν παντελῶς ὑπῆρχεν. καὶ γὰρ τῶν περὶ τοὺς ἐριστικούς λόγους μισθαρνούντων ὁμοία τις ἦν ἡ παιδείσις τῇ Γοργίου πραγματείᾳ· λόγους γὰρ οἱ μὲν ῥητορικοὺς οἱ δὲ ἐρωτητικούς ἐδίδοσαν ἐκμανθάνειν, εἰς οὓς πλειστάκις ἐμπίπτειν ᾤθησαν ἑκάτεροι τοὺς ἀλλήλων λόγους. διόπερ ταχεῖα μὲν ἄτεχνος δ' ἦν ἡ διδασκαλία τοῖς μανθάνουσι παρ' αὐτῶν· οὐ γὰρ τέχνην ἀλλὰ τὰ ἀπὸ τῆς τέχνης διδόντες παιδεύειν ὑπελάμβανον, ὥσπερ ἂν εἴ τις, ἐπιστήμην φάσκων παραδώσειν ἐπὶ τὸ μηδὲν πονεῖν τοὺς πόδας, εἴτα σκυτοτομικὴν μὲν μὴ διδάσκει μηδ' ὅθεν δυνήσεται πορίζεσθαι τὰ τοιαῦτα, δοίη δὲ πολλὰ γένη παντοδαπῶν ὑποδημάτων· οὗτος γὰρ βεβοήθηκε μὲν πρὸς τὴν χρεῖαν, τέχνην δ' οὐ παρέδωκεν. καὶ περὶ μὲν τῶν ῥητορικῶν ὑπῆρχε πολλὰ καὶ παλαιὰ τὰ λεγόμενα, περὶ δὲ τοῦ συλλογίζεσθαι παντελῶς οὐδὲν εἵχομεν πρότερον λέγειν ἢ τριβῇ ζητοῦντες πολὺν χρόνον ἐπονοῦμεν. εἰ δὲ φαίνεται θεασαμένοις ὑμῖν, ὥς ἐκ τοιούτων ἐξ ἀρχῆς ὑπαρχόντων, ἔχειν ἡ μέθοδος ἱκανῶς

παρὰ τὰς ἄλλας πραγματείας τὰς ἐκ παραδόσεως ηὐξημένας, λοιπὸν ἂν εἴη πάντων ὑμῶν [ἤ] τῶν ἠκροαμένων ἔργον τοῖς μὲν παραλελειμμένοις τῆς μεθόδου συγγνώμην τοῖς δ' εὐρημένοις πολλὴν ἔχειν χάριν.

Κεφάλαιο 1

[184a] Ἐπειδὴ τὸ εἰδέναι καὶ τὸ ἐπίστασθαι συμβαίνει περὶ πάσας τὰς μεθόδους, ὧν εἰσὶν ἀρχαὶ ἢ αἰτία ἢ στοιχεῖα, ἐκ τοῦ ταῦτα γνωρίζειν (τότε γὰρ οἰόμεθα γινώσκειν ἕκαστον, ὅταν τὰ αἰτία γνωρίσωμεν τὰ πρῶτα καὶ τὰς ἀρχὰς τὰς πρώτας καὶ μέχρι τῶν στοιχείων), δῆλον ὅτι καὶ τῆς περὶ φύσεως ἐπιστήμης πειρατέον διορίσασθαι πρῶτον τὰ περὶ τὰς ἀρχάς.

πέφυκε δὲ ἐκ τῶν γνωριμωτέρων ἡμῖν ἡ ὁδὸς καὶ σαφεστέρων ἐπὶ τὰ σαφέστερα τῇ φύσει καὶ γνωριμώτερα· οὐ γὰρ ταῦτα ἡμῖν τε γνῶριμα καὶ ἀπλῶς. διόπερ ἀνάγκη τὸν τρόπον τοῦτον προάγειν ἐκ τῶν ἀσαφεστέρων μὲν τῇ φύσει ἡμῖν δὲ σαφεστέρων ἐπὶ τὰ σαφέστερα τῇ φύσει καὶ γνωριμώτερα.

ἔστι δ' ἡμῖν τὸ πρῶτον δῆλα καὶ σαφὴ τὰ συγκεχυμένα μᾶλλον· ὕστερον δ' ἐκ τούτων γίγνεται γνῶριμα τὰ στοιχεῖα καὶ αἱ ἀρχαὶ διαιροῦσι ταῦτα. διὸ ἐκ τῶν καθόλου ἐπὶ τὰ καθ' ἕκαστα δεῖ προῖεναι· τὸ γὰρ ὅλον κατὰ τὴν αἴσθησιν γνωριμώτερον, τὸ δὲ καθόλου ὅλον τί ἐστι· πολλὰ γὰρ περιλαμβάνει ὡς μέρη τὸ καθόλου. πέπονθε δὲ [184b] ταῦτὸ τοῦτο τρόπον τινὰ καὶ τὰ ὀνόματα πρὸς τὸν λόγον· ὅλον γάρ τι καὶ ἀδιορίστως σημαίνει, οἷον ὁ κύκλος, ὁ δὲ ὀρισμὸς αὐτοῦ διαιρεῖ εἰς τὰ καθ' ἕκαστα. καὶ τὰ παιδία τὸ μὲν πρῶτον προσαγορεύει πάντας τοὺς ἄνδρας πατέρας καὶ μητέρας τὰς γυναῖκας, ὕστερον δὲ διορίζει τούτων ἐκάτερον.

Κεφάλαιο 2

Ανάγκη δ' ἥτοι μίαν εἶναι τὴν ἀρχὴν ἢ πλείους, καὶ εἰ μίαν, ἥτοι ἀκίνητον, ὥς φησι Παρμενίδης καὶ Μελίσσος, ἢ κινουμένην, ὥσπερ οἱ φυσικοί, οἱ μὲν ἀέρα φάσκοντες εἶναι οἱ δ' ὕδωρ τὴν πρώτην ἀρχὴν· εἰ δὲ πλείους, ἢ πεπερασμένας ἢ ἀπείρους, καὶ εἰ πεπερασμένας πλείους δὲ μιᾶς, ἢ δύο ἢ τρεῖς ἢ τέτταρας ἢ ἄλλον τινὰ ἀριθμόν, καὶ εἰ ἀπείρους, ἢ οὕτως ὥσπερ Δημόκριτος, τὸ γένος ἓν, σχήματι δὲ <διαφερούσας>, ἢ εἶδει διαφερούσας ἢ καὶ ἐναντίας.

ὁμοίως δὲ ζητοῦσι καὶ οἱ τὰ ὄντα ζητοῦντες πόσα· ἐξ ὧν γὰρ τὰ ὄντα ἐστὶ πρώτων, ζητοῦσι ταῦτα πότερον ἓν ἢ πολλά, καὶ εἰ πολλά, πεπερασμένα ἢ ἄπειρα, ὥστε τὴν ἀρχὴν καὶ τὸ στοιχεῖον ζητοῦσι πότερον ἓν ἢ πολλά. τὸ μὲν οὖν εἰ ἓν καὶ ἀκίνητον τὸ ὄν σκοπεῖν οὐ περὶ φύσεως ἐστὶ σκο[185a] πεῖν· ὥσπερ γὰρ καὶ τῷ γεωμέτρῳ οὐκέτι λόγος ἐστὶ πρὸς τὸν ἀνελόντα τὰς ἀρχάς, ἀλλ' ἥτοι ἐτέρας ἐπιστήμης ἢ πασῶν κοινῆς, οὕτως οὐδὲ τῷ περὶ ἀρχῶν· οὐ γὰρ ἔτι ἀρχὴ ἐστίν, εἰ ἓν μόνον καὶ οὕτως ἓν ἐστίν. ἡ γὰρ ἀρχὴ τινὸς ἢ τινῶν.

ὅμοιον δὴ τὸ σκοπεῖν εἰ οὕτως ἓν καὶ πρὸς ἄλλην θέσιν ὅποιαν οὖν διαλέγεσθαι τῶν λόγου ἔνεκα λεγομένων (οἷον τὴν Ἡρακλείτειον, ἢ εἴ τις φαίη ἄνθρωπον ἓνα τὸ ὄν εἶναι), ἢ λύειν λόγον ἐριστικόν, ὅπερ ἀμφοτέροι μὲν ἔχουσιν οἱ λόγοι, καὶ ὁ Μελίσσου καὶ ὁ Παρμενίδου· καὶ γὰρ ψευδῇ λαμβάνουσι καὶ ἀσυλλόγιστοί εἰσιν· μᾶλλον δ' ὁ Μελίσσου φορτικὸς καὶ οὐκ ἔχων ἀπορίαν, ἀλλ' ἐνὸς ἀτόπου δοθέντος τὰ ἄλλα συμβαίνει· τοῦτο δὲ οὐδὲν χαλεπόν.

ἡμῖν δ' ὑποκείσθω τὰ φύσει ἢ πάντα ἢ ἓνια κινούμενα εἶναι· δηλὸν δ' ἐκ τῆς ἐπαγωγῆς. ἅμα δ' οὐδὲ λύειν ἅπαντα προσήκει, ἀλλ' ἢ ὅσα ἐκ τῶν ἀρχῶν τις ἐπιδεικνὺς ψεύδεται, ὅσα δὲ μή, οὐ, οἷον τὸν τετραγωνισμόν τὸν μὲν διὰ τῶν τμημάτων γεωμετρικοῦ διαλῦσαι, τὸν δὲ Ἀντιφῶντος οὐ γεωμετρικοῦ· οὐ μὴν ἀλλ' ἐπειδὴ περὶ φύσεως μὲν οὐ, φυσικὰς δὲ ἀπορίας συμβαίνει λέγειν αὐτοῖς, ἴσως ἔχει καλῶς ἐπὶ μικρὸν διαλεχθῆναι περὶ αὐτῶν· ἔχει γὰρ φιλοσοφίαν ἢ σκέψις.

ἀρχὴ δὲ οἰκειοτάτη πασῶν, ἐπειδὴ πολλαχῶς λέγεται τὸ ὄν, πῶς λέγουσιν οἱ λέγοντες εἶναι ἓν τὰ πάντα, πότερον οὐσίαν τὰ πάντα ἢ ποσὰ ἢ ποιά, καὶ πάλιν πότερον οὐσίαν μίαν τὰ πάντα, οἷον ἄνθρωπον ἓνα ἢ ἵππον ἓνα ἢ ψυχὴν μίαν, ἢ ποιὸν ἓν δὲ τοῦτο, οἷον

λευκὸν ἢ θερμὸν ἢ τῶν ἄλλων τι τῶν τοιούτων. ταῦτα γὰρ πάντα διαφέρει τε πολὺ καὶ ἀδύνατα λέγειν.

εἰ μὲν γὰρ ἔσται καὶ οὐσία καὶ ποιὸν καὶ ποσόν, καὶ ταῦτα εἴτ' ἀπολελυμένα ἀπ' ἀλλήλων εἴτε μὴ, πολλὰ τὰ ὄντα·

εἰ δὲ πάντα ποιὸν ἢ ποσόν, εἴτ' οὔσης οὐσίας εἴτε μὴ οὔσης, ἄτοπον, εἰ δεῖ ἄτοπον λέγειν τὸ ἀδύνατον. οὐθὲν γὰρ τῶν ἄλλων χωριστόν ἐστι παρὰ τὴν οὐσίαν· πάντα γὰρ καθ' ὑποκειμένου λέγεται τῆς οὐσίας.

Μέλισσος δὲ τὸ ὄν ἄπειρον εἶναι φησιν. ποσὸν ἄρα τι τὸ ὄν· τὸ γὰρ ἄπειρον ἐν τῷ ποσῷ, οὐσίαν δὲ ἄπειρον εἶναι ἢ ποιότητα ἢ [185b] πάθος οὐκ ἐνδέχεται εἰ μὴ κατὰ συμβεβηκός, εἰ ἅμα καὶ ποσὰ ἅττα εἶεν· ὁ γὰρ τοῦ ἀπείρου λόγος τῷ ποσῷ προσχρῆται, ἀλλ' οὐκ οὐσία οὐδὲ τῷ ποιῷ. εἰ μὲν τοίνυν καὶ οὐσία ἔστι καὶ ποσόν, δύο καὶ οὐχ ἓν τὸ ὄν· εἰ δ' οὐσία μόνον, οὐκ ἄπειρον, οὐδὲ μέγεθος ἔξει οὐδέν· ποσὸν γάρ τι ἔσται.

ἔτι ἐπεὶ καὶ αὐτὸ τὸ ἐν πολλαχῶς λέγεται ὥσπερ καὶ τὸ ὄν, σκεπτόεν τίνα τρόπον λέγουσιν εἶναι ἐν τὸ πᾶν. λέγεται δ' ἐν ἢ τὸ συνεχές ἢ τὸ ἀδιαίρετον ἢ ὧν ὁ λόγος ὁ αὐτὸς καὶ εἷς ὁ τοῦ τί ἦν εἶναι, ὥσπερ μέθυ καὶ οἶνος.

εἰ μὲν τοίνυν συνεχές, πολλὰ τὸ ἐν· εἰς ἄπειρον γὰρ διαιρετὸν τὸ συνεχές.

(ἔχει δ' ἀπορίαν περὶ τοῦ μέρους καὶ τοῦ ὅλου, ἴσως δὲ οὐ πρὸς τὸν λόγον ἀλλ' αὐτὴν καθ' αὐτήν, πότερον ἐν ἢ πλείω τὸ μέρος καὶ τὸ ὅλον, καὶ πῶς ἐν ἢ πλείω, καὶ εἰ πλείω, πῶς πλείω, καὶ περὶ τῶν μερῶν τῶν μὴ συνεχῶν· καὶ εἰ τῷ ὅλῳ ἐν ἐκάτερον ὡς ἀδιαίρετον, ὅτι καὶ αὐτὰ αὐτοῖς.)

ἀλλὰ μὴν εἰ ὡς ἀδιαίρετον, οὐθὲν ἔσται ποσὸν οὐδὲ ποιόν, οὐδὲ δὴ ἄπειρον τὸ ὄν, ὥσπερ Μέλισσός φησιν, οὐδὲ πεπερασμένον, ὥσπερ Παρμενίδης· τὸ γὰρ πέρας ἀδιαίρετον, οὐ τὸ πεπερασμένον.

ἀλλὰ μὴν εἰ τῷ λόγῳ ἐν τὰ ὄντα πάντα ὡς λῶπιον καὶ ἱμάτιον, τὸν Ἡρακλείτου λόγον συμβαίνει λέγειν αὐτοῖς· ταυτὸν γὰρ ἔσται ἀγαθῷ καὶ κακῷ εἶναι, καὶ ἀγαθῷ καὶ μὴ ἀγαθῷ εἶναι-ὥστε ταυτὸν ἔσται ἀγαθὸν καὶ οὐκ ἀγαθόν, καὶ ἄνθρωπος καὶ ἵππος, καὶ οὐ περὶ τοῦ ἐν εἶναι τὰ ὄντα ὁ λόγος ἔσται ἀλλὰ περὶ τοῦ μηδέν-καὶ τὸ τοιῷδι εἶναι καὶ τοσῷδι ταυτὸν.

ἐθορυβοῦντο δὲ καὶ οἱ ὕστεροι τῶν ἀρχαίων ὅπως μὴ ἅμα γένηται αὐτοῖς τὸ αὐτὸ ἐν καὶ πολλὰ. διὸ οἱ μὲν τὸ ἐστὶν ἀφείλον, ὥσπερ

Λυκόφρων, οἱ δὲ τὴν λέξιν μετερρῦθμιζον, ὅτι ὁ ἄνθρωπος οὐ λευκός ἐστιν ἀλλὰ λελεύκωται, οὐδὲ βαδίζων ἐστὶν ἀλλὰ βαδίζει, ἵνα μή ποτε τὸ ἐστὶ προσάπτοντες πολλὰ εἶναι ποιῶσι τὸ ἓν, ὡς μοναχῶς λεγομένου τοῦ ἐνὸς ἢ τοῦ ὄντος. πολλὰ δὲ τὰ ὄντα ἢ λόγῳ (οἷον ἄλλο τὸ λευκῶ εἶναι καὶ μουσικῶ, τὸ δ' αὐτὸ ἄμφω· πολλὰ ἄρα τὸ ἓν) ἢ διαιρέσει, ὥσπερ τὸ ὅλον καὶ τὰ μέρη. ἐνταῦθα [186a] δὲ ἤδη ἠπóρουν, καὶ ὠμολόγουν τὸ ἓν πολλὰ εἶναι-ὥσπερ οὐκ ἐνδεχόμενον ταῦτόν ἐν τε καὶ πολλὰ εἶναι, μὴ τάντικείμενα δέ· ἔστι γὰρ τὸ ἓν καὶ δυνάμει καὶ ἐντελεχείᾳ.

Κεφάλαιο 3

Τόν τε δὴ τρόπον τοῦτον ἐπιούσιν ἀδύνατον φαίνεται τὰ ὄντα ἐν εἶναι, καὶ ἐξ ὧν ἐπιδεικνύουσι, λύειν οὐ χαλεπόν. ἀμφότεροι γὰρ ἐριστικῶς συλλογίζονται, καὶ Μελίσσος καὶ Παρμενίδης [καὶ γὰρ ψευδῇ λαμβάνουσι καὶ ἀσυλλόγιστοί εἰσιν αὐτῶν οἱ λόγοι· μᾶλλον δ' ὁ Μελίσσου φορτικὸς καὶ οὐκ ἔχων ἀπορίαν, ἀλλ' ἐνὸς ἀτόπου δοθέντος τᾶλλα συμβαίνει· τοῦτο δ' οὐθὲν χαλεπόν]. ὅτι μὲν οὖν παρὰ λογίζεται Μελίσσος, δῆλον· οἶται γὰρ εἰληφέναι, εἰ τὸ γενόμενον ἔχει ἀρχὴν ἅπαν, ὅτι καὶ τὸ μὴ γενόμενον οὐκ ἔχει. εἴτα καὶ τοῦτο ἀτοπον, τὸ παντὸς εἶναι ἀρχήν τοῦ πράγματος καὶ μὴ τοῦ χρόνου, καὶ γενέσεως μὴ τῆς ἀπλῆς ἀλλὰ καὶ ἀλλοιώσεως, ὥσπερ οὐκ ἀθρόας γιγνομένης μεταβολῆς. ἔπειτα διὰ τί ἀκίνητον, εἰ ἔν; ὥσπερ γὰρ καὶ τὸ μέρος ἐν ὄν, τοδὶ τὸ ὕδωρ, κινεῖται ἐν ἑαυτῷ, διὰ τί οὐ καὶ τὸ πᾶν; ἔπειτα ἀλλοιώσις διὰ τί οὐκ ἂν εἴη; ἀλλὰ μὴν οὐδὲ τῷ εἶδει οἷόν τε ἐν εἶναι, πλὴν τῷ ἐξ οὗ (οὕτως δὲ ἐν καὶ τῶν φυσικῶν τινες λέγουσιν, ἐκείνως δ' οὐ)· ἄνθρωπος γὰρ ἵππου ἕτερον τῷ εἶδει καὶ τάναντία ἀλλήλων.

καὶ πρὸς Παρμενίδην δὲ ὁ αὐτὸς τρόπος τῶν λόγων, καὶ εἰ τινες ἄλλοι εἰσὶν ἴδιοι· καὶ ἡ λύσις τῇ μὲν ὅτι ψευδῆς τῇ δὲ ὅτι οὐ συμπεραίνεται, ψευδῆς μὲν ἢ ἀπλῶς λαμβάνει τὸ ὄν λέγεσθαι, λεγομένου πολλαχῶς, ἀσυμπεράντος δὲ ὅτι, εἰ μόνον τὰ λευκὰ ληφθεῖν, σημαίνοντος ἐν τοῦ λευκοῦ, οὐθὲν ἦττον πολλὰ τὰ λευκὰ καὶ οὐχ ἔν· οὔτε γὰρ τῇ συνεχείᾳ ἐν ἔσται τὸ λευκὸν οὔτε τῷ λόγῳ. ἄλλο γὰρ ἔσται τὸ εἶναι λευκῷ καὶ τῷ δεδεγμένῳ. καὶ οὐκ ἔσται παρὰ τὸ λευκὸν οὐθὲν χωριστόν· οὐ γὰρ ἢ χωριστὸν ἀλλὰ τῷ εἶναι ἕτερον τὸ λευκὸν καὶ ᾧ ὑπάρχει. ἀλλὰ τοῦτο Παρμενίδης οὕτω συνέωρα.

ἀνάγκη δὴ λαβεῖν μὴ μόνον ἐν σημαίνειν τὸ ὄν, καθ' οὗ ἂν κατηγορηθῇ, ἀλλὰ καὶ ὅπερ ὄν καὶ ὅπερ ἔν. τὸ γὰρ συμβεβηκὸς καθ' ὑποκειμένου τινὸς λέγεται, ὥστε ᾧ συμβέβηκε τὸ ὄν, οὐκ ἔσται (ἕτερον γὰρ [186b] τοῦ ὄντος)· ἔσται τι ἄρα οὐκ ὄν. οὐ δὲ ἔσται ἄλλω ὑπάρχον τὸ ὅπερ ὄν. οὐ γὰρ ἔσται ὄν τι αὐτὸ εἶναι, εἰ μὴ πολλὰ τὸ ὄν σημαίνει οὕτως ὥστε εἶναι τι ἕκαστον. ἀλλ' ὑπόκειται τὸ ὄν σημαίνειν ἔν.

εἰ οὖν τὸ ὅπερ ὄν μηδενὶ συμ βέβηκεν ἀλλὰ <τὰ ἄλλα> ἐκείνῳ, τί

μᾶλλον τὸ ὅπερ ὄν σημαίνει τὸ ὄν ἢ μὴ ὄν; εἰ γὰρ ἔσται τὸ ὅπερ ὄν [ταὐτὸ] καὶ λευκόν, τὸ λευκῷ δ' εἶναι μὴ ἔστιν ὅπερ ὄν (οὐδὲ γὰρ συμβεβηκέναι αὐτῷ οἷόν τε τὸ ὄν· οὐδὲν γὰρ ὄν ὃ οὐχ ὅπερ ὄν), οὐκ ἄρα ὄν τὸ λευκόν· οὐχ οὕτω δὲ ὥσπερ τι μὴ ὄν, ἀλλ' ὅλως μὴ ὄν. τὸ ἄρα ὅπερ ὄν οὐκ ὄν· ἀληθὲς γὰρ εἰπεῖν ὅτι λευκόν, τοῦτο δὲ οὐκ ὄν ἐσήμαινεν. ὥστε καὶ τὸ λευκόν σημαίνει ὅπερ ὄν· πλείω ἄρα σημαίνει τὸ ὄν.

οὐ τοίνυν οὐδὲ μέγεθος ἔξει τὸ ὄν, εἴπερ ὅπερ ὄν τὸ ὄν· ἐκατέρω γὰρ ἕτερον τὸ εἶναι τῶν μορίων.

ὅτι δὲ διαιρεῖται τὸ ὅπερ ὄν εἰς ὅπερ ὄν τι ἄλλο, καὶ τῷ λόγῳ φανερόν, οἷον ὁ ἄνθρωπος εἰ ἔστιν ὅπερ ὄν τι, ἀνάγκη καὶ τὸ ζῶον ὅπερ ὄν τι εἶναι καὶ τὸ δίπουν. εἰ γὰρ μὴ ὅπερ ὄν τι, συμβεβηκότα ἔσται. ἢ οὖν τῷ ἀνθρώπῳ ἢ ἄλλῳ τινὶ ὑποκειμένῳ. ἀλλ' ἀδύνατον·

συμβεβηκός τε γὰρ λέγεται τοῦτο, ἢ ὃ ἐνδέχεται ὑπάρχειν καὶ μὴ ὑπάρχειν, ἢ οὗ ἐν τῷ λόγῳ ὑπάρχει τὸ ᾧ συμβέβηκεν [ἢ ἐν ᾧ ὁ λόγος ὑπάρχει ᾧ συμβέβηκεν] (οἷον τὸ μὲν καθῆσθαι ὡς χωριζόμενον, ἐν δὲ τῷ σιμῷ ὑπάρχει ὁ λόγος ὁ τῆς ρίνος ἢ φαμέν συμβεβηκέναι τὸ σιμόν)· ἔτι ὅσα ἐν τῷ ὀριστικῷ λόγῳ ἔνεστιν ἢ ἐξ ὧν ἔστιν, ἐν τῷ λόγῳ τῷ τούτων οὐκ ἐνυπάρχει ὁ λόγος ὁ τοῦ ὅλου, οἷον ἐν τῷ δίποδι ὁ τοῦ ἀνθρώπου ἢ ἐν τῷ λευκῷ ὁ τοῦ λευκοῦ ἀνθρώπου. εἰ τοίνυν ταῦτα τοῦτον ἔχει τὸν τρόπον καὶ τῷ ἀνθρώπῳ συμβέβηκε τὸ δίπουν, ἀνάγκη χωριστὸν εἶναι αὐτό, ὥστε ἐνδέχοιτο ἂν μὴ δίπουν εἶναι τὸν ἄνθρωπον, ἢ ἐν τῷ λόγῳ τῷ τοῦ δίποδος ἐνέσται ὁ τοῦ ἀνθρώπου λόγος. ἀλλ' ἀδύνατον· ἐκεῖνο γὰρ ἐν τῷ ἐκείνου λόγῳ ἔνεστιν.

εἰ δ' ἄλλῳ συμβέβηκε τὸ δίπουν καὶ τὸ ζῶον, καὶ μὴ ἔστιν ἐκάτερον ὅπερ ὄν τι, καὶ ὁ ἄνθρωπος ἂν εἴη τῶν συμβεβηκότων ἑτέρῳ. ἀλλὰ τὸ ὅπερ ὄν ἔστω μηδενὶ συμβεβηκός, καὶ καθ' οὗ ἅμφοι [καὶ ἐκατέρον], καὶ τὸ ἐκ τούτων λεγέσθω·

ἐξ ἀδιαιρέτων ἄρα τὸ πᾶν; [187a] ἐνιοὶ δ' ἐνέδοσαν τοῖς λόγοις ἀμφοτέροις, τῷ μὲν ὅτι πάντα ἔν, εἰ τὸ ὄν ἐν σημαίνει, ὅτι ἔστι τὸ μὴ ὄν, τῷ δὲ ἐκ τῆς διχοτομίας, ἄτομα ποιήσαντες μεγέθη. φανερόν δὲ καὶ ὅτι οὐκ ἀληθὲς ὥς, εἰ ἐν σημαίνει τὸ ὄν καὶ μὴ οἷόν τε ἅμα τὴν ἀντίφασιν, οὐκ ἔσται οὐθὲν μὴ ὄν· οὐθὲν γὰρ κωλύει, μὴ ἀπλῶς εἶναι, ἀλλὰ μὴ ὄν τι εἶναι τὸ μὴ ὄν. τὸ δὲ δὴ φάναι, παρ' αὐτὸ τὸ ὄν εἰ μὴ τι ἔσται ἄλλο, ἐν πάντα ἔσεσθαι, ἄτοπον. τίς γὰρ μανθάνει αὐτὸ τὸ ὄν εἰ μὴ τὸ ὅπερ ὄν τι εἶναι; εἰ δὲ τοῦτο, οὐδὲν ὅμως κωλύει

πολλά εἶναι τὰ ὄντα, ὥσπερ εἴρηται.

ὅτι μὲν οὖν οὕτως ἔν εἶναι τὸ ὄν ἀδύνα τον, δῆλον.

Κεφάλαιο 4

Ὡς δ' οἱ φυσικοὶ λέγουσι, δύο τρόποι εἰσίν.

οἱ μὲν γὰρ ἐν ποιήσαντες τὸ [ὄν] σῶμα τὸ ὑποκείμενον, ἢ τῶν τριῶν τι ἢ ἄλλο ὃ ἐστι πυρὸς μὲν πυκνότερον ἀέρος δὲ λεπτότερον, τᾶλλα γεννῶσι πυκνότητι καὶ μανότητι πολλὰ ποιοῦντες (ταῦτα δ' ἐστὶν ἐναντία, καθόλου δ' ὑπεροχὴ καὶ ἔλλειψις, ὥσπερ τὸ μέγα φησὶ Πλάτων καὶ τὸ μικρόν, πλὴν ὅτι ὁ μὲν ταῦτα ποιεῖ ὕλην τὸ δὲ ἐν τῷ εἶδος, οἱ δὲ τὸ μὲν ἐν τῷ ὑποκείμενον ὕλην, τὰ δ' ἐναντία διαφορὰς καὶ εἶδη).

οἱ δ' ἐκ τοῦ ἐνὸς ἐνούσας τὰς ἐναντιότητας ἐκ κρίνεσθαι, ὥσπερ Ἀναξίμανδρος φησι, καὶ ὅσοι δ' ἐν καὶ πολλὰ φασιν εἶναι, ὥσπερ Ἐμπεδοκλῆς καὶ Ἀναξαγόρας· ἐκ τοῦ μίγματος γὰρ καὶ οὗτοι ἐκκρίνουσι τᾶλλα. διαφέρουσι δὲ ἀλλήλων τῷ τὸν μὲν περίοδον ποιεῖν τούτων, τὸν δ' ἅπαξ, καὶ τὸν μὲν ἄπειρα, τὰ τε ὁμοιομερῆ καὶ τάναντία, τὸν δὲ τὰ καλούμενα στοιχεῖα μόνον.

ἔοικε δὲ Ἀναξαγόρας ἄπειρα οὕτως οἰηθῆναι διὰ τὸ ὑπολαμβάνειν τὴν κοινὴν δόξαν τῶν φυσικῶν εἶναι ἀληθεῖ, ὥς οὐ γιγνομένου οὐδὲ νὸς ἐκ τοῦ μὴ ὄντος (διὰ τοῦτο γὰρ οὕτω λέγουσιν, ἦν ὁμοῦ πάντα, καὶ τὸ γίγνεσθαι τοιόνδε καθέστηκεν ἀλλοιοῦσθαι, οἱ δὲ σύγκρισιν καὶ διάκρισιν). ἔτι δ' ἐκ τοῦ γίγνεσθαι ἐξ ἀλλήλων τάναντία· ἐνυπῆρχεν ἄρα· εἰ γὰρ πᾶν μὲν τὸ γιγνόμενον ἀνάγκη γίγνεσθαι ἢ ἐξ ὄντων ἢ ἐκ μὴ ὄντων, τούτων δὲ τὸ μὲν ἐκ μὴ ὄντων γίγνεσθαι ἀδύνατον (περὶ γὰρ ταύτης ὁμογνωμονοῦσι τῆς δόξης ἅπαντες οἱ περὶ φύσεως), τὸ λοιπὸν ἤδη συμβαίνειν ἐξ ἀνάγκης ἐνόμισαν, ἐξ ὄντων μὲν καὶ ἐνυπαρχόντων γίγνεσθαι, διὰ μικρότητα δὲ τῶν ὄγκων ἐξ [187b] ἀναισθήτων ἡμῖν. διό φασι πᾶν ἐν παντὶ μεμῖχθαι, διότι πᾶν ἐκ παντὸς ἐώρων γιγνόμενον· φαίνεσθαι δὲ διαφέροντα καὶ προσαγορεύεσθαι ἕτερα ἀλλήλων ἐκ τοῦ μάλιστα ὑπερέχοντος διὰ πλῆθος ἐν τῇ μίξει τῶν ἀπειρῶν· εἰλικρινῶς μὲν γὰρ ὅλον λευκὸν ἢ μέλαν ἢ γλυκὺ ἢ σάρκα ἢ ὅστον οὐκ εἶναι, ὅτου δὲ πλεῖστον ἕκαστον ἔχει, τοῦτο δοκεῖν εἶναι τὴν φύσιν τοῦ πράγματος.

εἰ δὴ τὸ μὲν ἄπειρον ἢ ἄπειρον ἄγνωστον, τὸ μὲν κατὰ πλῆθος ἢ κατὰ μέγεθος ἄπειρον ἄγνωστον πόσον τι, τὸ δὲ κατ' εἶδος ἄπειρον ἄγνωστον ποῖόν τι. τῶν δ' ἀρχῶν ἀπειρῶν οὐσῶν καὶ κατὰ πλῆθος καὶ κατ' εἶδος, ἀδύνατον εἰδέναι τὰ ἐκ τούτων. οὕτω γὰρ εἰδέναι τὸ

σύνθετον ὑπολαμβάνομεν, ὅταν εἰδῶμεν ἐκ τίνων καὶ πόσων ἐστίν. ἔτι δ' εἰ ἀνάγκη, οὗ τὸ μόνιον ἐνδέχεται ὀπηλικοῦν εἶναι κατὰ μέγεθος καὶ μικρότητα, καὶ αὐτὸ ἐνδέχεσθαι (λέγω δὲ τῶν τοιούτων τι μορίων, εἰς ὃ ἐνυπάρχον διαιρεῖται τὸ ὅλον), εἰ δὴ ἀδύνατον ζῶον ἢ φυτὸν ὀπηλικοῦν εἶναι κατὰ μέγεθος καὶ μικρότητα, φανερόν ὅτι οὐδὲ τῶν μορίων ὅτιοῦν· ἔσται γὰρ καὶ τὸ ὅλον ὁμοίως. σὰρξ δὲ καὶ ὀστοῦν καὶ τὰ τοιαῦτα μόρια ζώου, καὶ οἱ καρποὶ τῶν φυτῶν. δηλον τοίνυν ὅτι ἀδύνατον σάρκα ἢ ὀστοῦν ἢ ἄλλο τι ὀπηλι κονοῦν εἶναι τὸ μέγεθος ἢ ἐπὶ τὸ μείζον ἢ ἐπὶ τὸ ἔλαττον.

ἔτι εἰ πάντα μὲν ἐνυπάρχει τὰ τοιαῦτα ἐν ἀλλήλοις, καὶ μὴ γίγνεται ἀλλ' ἐκκρίνεται ἐνόντα, λέγεται δὲ ἀπὸ τοῦ πλείονος, γίγνεται δὲ ἐξ ὅτουοῦν ὅτιοῦν (οἶον ἐκ σαρκὸς ὕδωρ ἐκκρινόμενον καὶ σὰρξ ἐξ ὕδατος), ἅπαν δὲ σῶμα πεπερασμένον ἀναιρεῖται ὑπὸ σώματος πεπερασμένου, φανερόν ὅτι οὐκ ἐνδέχεται ἐν ἐκάστω ἕκαστον ὑπάρχειν. ἀφαιρεθείσης γὰρ ἐκ τοῦ ὕδατος σαρκὸς, καὶ πάλιν ἄλλης γενομένης ἐκ τοῦ λοιποῦ ἀποκρίσει, εἰ καὶ αἰεὶ ἐλάττων ἔσται ἢ ἐκκρινόμενη, ἀλλ' ὅμως οὐχ ὑπερβαλεῖ μέγεθός τι τῇ μικρότητι. ὥστ' εἰ μὲν στήσεται ἢ ἐκκρισις, οὐχ ἅπαν ἐν παντὶ ἐνέσται (ἐν γὰρ τῷ λοιπῷ ὕδατι οὐκ ἐνυπάρξει σὰρξ), εἰ δὲ μὴ στήσεται ἀλλ' αἰεὶ ἔξει ἀφαίρεσιν, ἐν πεπερασμένῳ μεγέθει ἴσα πεπερασμένα ἐνέσται ἅπειρα τὸ πλῆθος· τοῦτο δ' ἀδύνατον. πρὸς δὲ τούτοις, εἰ ἅπαν μὲν σῶμα ἀφαιρεθέντος τινὸς ἔλαττον ἀνάγκη γίνεσθαι, τῆς δὲ σαρκὸς ὥριστα τὸ ποσὸν καὶ μεγέθει καὶ μικρότητι, φανερόν ὅτι ἐκ τῆς ἐλαχίστης [188a] σαρκὸς οὐθὲν ἐκκριθήσεται σῶμα· ἔσται γὰρ ἐλάττων τῆς ἐλαχίστης.

ἔτι δ' ἐν τοῖς ἀπείροις σώμασιν ἐνυπάρχοι ἂν ἤδη σὰρξ ἅπειρος καὶ αἷμα καὶ ἐγκέφαλος, κεχωρισμένα μέντοι ἀπ' ἀλλήλων <οὐ>, οὐθὲν δ' ἦττον ὄντα, καὶ ἅπειρον ἕκαστον· τοῦτο δ' ἄλογον.

τὸ δὲ μηδέποτε διακριθῆσεσθαι οὐκ εἰδότως μὲν λέγεται, ὀρθῶς δὲ λέγεται· τὰ γὰρ πάθη ἀχώριστα· εἰ οὖν μέμικται τὰ χρώματα καὶ αἱ ἔξεις, ἐὰν διακριθῶσιν, ἔσται τι λευκὸν καὶ ὑγιεινὸν οὐχ ἕτερόν τι ὄν οὐδὲ καθ' ὑποκειμένου. ὥστε ἄτοπος τὰ ἀδύνατα ζητῶν ὁ νοῦς, εἵπερ βούλεται μὲν διακρίναι, τοῦτο δὲ ποιῆσαι ἀδύνατον καὶ κατὰ τὸ ποσὸν καὶ κατὰ τὸ ποιόν, κατὰ μὲν τὸ ποσὸν ὅτι οὐκ ἔστιν ἐλάχιστον μέγεθος, κατὰ δὲ τὸ ποιόν ὅτι ἀχώριστα τὰ πάθη.

οὐκ ὀρθῶς δὲ οὐδὲ τὴν γένεσιν λαμβάνει τῶν ὁμοειδῶν. ἔστι μὲν γὰρ ὡς ὁ πηλὸς εἰς πηλοὺς διαιρεῖται, ἔστι δ' ὡς οὐ. καὶ οὐχ ὁ αὐτὸς

τρόπος, ὥς πλίνθοι ἐξ οἰκίας καὶ οἰκία ἐκ πλίνθων, οὕτω [δὲ] καὶ ὕδωρ καὶ ἀήρ ἐξ ἀλλήλων καὶ εἰσὶ καὶ γίνονται. βέλτιόν τε ἐλάττω καὶ πεπερασμένα λαβεῖν, ὅπερ ποιεῖ Ἐμπεδοκλῆς.

Κεφάλαιο 5

Πάντες δὴ τάναντία ἀρχὰς ποιοῦσιν οἱ τε λέγοντες ὅτι ἐν τῷ πᾶν καὶ μὴ κινούμενον (καὶ γὰρ Παρμενίδης θερμὸν καὶ ψυχρὸν ἀρχὰς ποιεῖ, ταῦτα δὲ προσαγορεύει πῦρ καὶ γῆν) καὶ οἱ μανὸν καὶ πυκνόν, καὶ Δημόκριτος τὸ πλήρες καὶ κενόν, ὧν τὸ μὲν ὡς ὄν τὸ δὲ ὡς οὐκ ὄν εἶναι φησιν· ἔτι θέσει, σχήματι, τάξει. ταῦτα δὲ γένη ἐναντίων· θέσεως ἄνω κάτω, πρόσθεν ὀπίσθεν, σχήματος γεγωνιωμένον ἀγώνιον, εὐθὺ περιφερές.

ὅτι μὲν οὖν τάναντία πῶς πάντες ποιοῦσι τὰς ἀρχάς, δῆλον. καὶ τοῦτο εὐλόγως· δεῖ γὰρ τὰς ἀρχὰς μήτε ἐξ ἀλλήλων εἶναι μήτε ἐξ ἄλλων, καὶ ἐκ τούτων πάντα· τοῖς δὲ ἐναντίοις τοῖς πρώτοις ὑπάρχει ταῦτα, διὰ μὲν τὸ πρῶτα εἶναι μὴ ἐξ ἄλλων, διὰ δὲ τὸ ἐναντία μὴ ἐξ ἀλλήλων.

ἀλλὰ δεῖ τοῦτο καὶ ἐπὶ τοῦ λόγου σκέψασθαι πῶς συμβαίνει.

ληπτέον δὴ πρῶτον ὅτι πάντων τῶν ὄντων οὐθὲν οὔτε ποιεῖν πέφυκεν οὔτε πάσχειν τὸ τυχὸν ὑπὸ τοῦ τυχόντος, οὐδὲ γίγνεται ὅτιοῦν ἐξ ὅτουοῦν, ἂν μὴ τις λαμβάνῃ κατὰ συμβεβηκός· πῶς γὰρ ἂν γένοιτο λευκὸν ἐκ μουσικοῦ, πλὴν εἰ μὴ συμβεβηκός εἴη τῷ μὴ λευκῷ ἢ τῷ μέλανι τὸ μουσικόν; ἀλλὰ λευκὸν μὲν γίγνεται ἐξ οὐ λευκοῦ, καὶ τούτου οὐκ ἐκ παντὸς [188b] ἀλλ' ἐκ μέλανος ἢ τῶν μεταξύ, καὶ μουσικὸν οὐκ ἐκ μουσικοῦ, πλὴν οὐκ ἐκ παντὸς ἀλλ' ἐξ ἀμούσου ἢ εἴ τι αὐτῶν ἐστι μεταξύ.

οὐδὲ δὴ φθείρεται εἰς τὸ τυχὸν πρῶτον, οἷον τὸ λευκὸν οὐκ εἰς τὸ μουσικόν, πλὴν εἰ μὴ ποτε κατὰ συμβεβηκός, ἀλλ' εἰς τὸ μὴ λευκόν, καὶ οὐκ εἰς τὸ τυχὸν ἀλλ' εἰς τὸ μέλαν ἢ τὸ μεταξύ· ὥς δ' αὐτως καὶ τὸ μουσικὸν εἰς τὸ μὴ μουσικόν, καὶ τοῦτο οὐκ εἰς τὸ τυχὸν ἀλλ' εἰς τὸ ἄμουσον ἢ εἴ τι αὐτῶν ἐστι μεταξύ.

ὁμοίως δὲ τοῦτο καὶ ἐπὶ τῶν ἄλλων, ἐπεὶ καὶ τὰ μὴ ἀπλᾶ τῶν ὄντων ἀλλὰ σύνθετα κατὰ τὸν αὐτὸν ἔχει λόγον· ἀλλὰ διὰ τὸ μὴ τὰς ἀντικειμένας διαθέσεις ὠνομάσθαι λανθάνει τοῦτο συμβαῖνον. ἀνάγκη γὰρ πᾶν τὸ ἡρμοσμένον ἐξ ἀναρμόστου γίγνεσθαι καὶ τὸ ἀναρμόστον ἐξ ἡρμοσμένου, καὶ φθείρεσθαι τὸ ἡρμοσμένον εἰς ἀναρμοστίαν, καὶ ταύτην οὐ τὴν τυχούσαν ἀλλὰ τὴν ἀντικειμένην. διαφέρει δ' οὐθὲν ἐπὶ ἀρμονίας εἰπεῖν ἢ τάξεως ἢ συνθέσεως· φανερόν γὰρ ὅτι ὁ αὐτὸς λόγος. ἀλλὰ μὴν καὶ οἰκία καὶ ἀνδριάς καὶ

ὅτιοῦν ἄλλο γίγνεται ὁμοίως· ἢ τε γὰρ οἰκία γίγνεται ἐκ τοῦ μὴ συγκεῖσθαι ἀλλὰ διηρηῆσθαι ταδὶ ὠδί, καὶ ὁ ἀνδριάς καὶ τῶν ἐσχηματισμένων τι ἐξ ἀσχημοσύνης· καὶ ἕκαστον τούτων τὰ μὲν τάξις, τὰ δὲ σύνθεσις τίς ἐστίν.

εἰ τοίνυν τοῦτ' ἔστιν ἀληθές, ἅπαν ἂν γίγνοιτο τὸ γιγνόμενον καὶ φθείροιτο τὸ φθειρόμενον ἢ ἐξ ἐναντίων ἢ εἰς ἐναντία καὶ τὰ τούτων μεταξύ. τὰ δὲ μεταξύ ἐκ τῶν ἐναντίων ἐστίν, οἷον χρώματα ἐκ λευκοῦ καὶ μέλανος· ὥστε πάντ' ἂν εἴη τὰ φύσει γιγνόμενα ἢ ἐναντία ἢ ἐξ ἐναντίων.

μέχρι μὲν οὖν ἐπὶ τοσοῦτον σχεδὸν συνηκολουθήκασι καὶ τῶν ἄλλων οἱ πλείστοι, καθάπερ εἶπομεν πρότερον· πάντες γὰρ τὰ στοιχεῖα καὶ τὰς ὑπ' αὐτῶν καλουμένας ἀρχάς, καίπερ ἄνευ λόγου τιθέντες, ὅμως τὰναντία λέγουσιν, ὥσπερ ὑπ' αὐτῆς τῆς ἀληθείας ἀναγκασθέντες. διαφέρουσι δ' ἀλλήλων τῷ τοῦς μὲν πρότερα τοῦς δ' ὕστερα λαμβάνειν, καὶ τοῦς μὲν γνωριμώτερα κατὰ τὸν λόγον τοῦς δὲ κατὰ τὴν αἴσθησιν (οἱ μὲν γὰρ θερμὸν καὶ ψυχρόν, οἱ δ' ὑγρὸν καὶ ξηρόν, ἕτεροι δὲ περιττὸν καὶ ἄρτιον ἢ νεῖκος καὶ φιλίαν αἱ τίας τίθενται τῆς γενέσεως· ταῦτα δ' ἀλλήλων διαφέρει κατὰ τὸν εἰρημένον τρόπον),

ὥστε ταῦτα λέγειν πως καὶ ἕτερα ἀλλήλων, ἕτερα μὲν ὥσπερ καὶ δοκεῖ τοῖς πλείστοις, ταῦτα [189a] δὲ ἢ ἀνάλογον· λαμβάνουσι γὰρ ἐκ τῆς αὐτῆς συστοιχίας· τὰ μὲν γὰρ περιέχει, τὰ δὲ περιέχεται τῶν ἐναντίων. ταύτη τε δὴ ὡσαύτως λέγουσι καὶ ἑτέρως, καὶ χειρόν καὶ βέλτιον, καὶ οἱ μὲν γνωριμώτερα κατὰ τὸν λόγον, ὥσπερ εἴρηται πρότερον, οἱ δὲ κατὰ τὴν αἴσθησιν (τὸ μὲν γὰρ καθόλου κατὰ τὸν λόγον γνώριμον, τὸ δὲ καθ' ἕκαστον κατὰ τὴν αἴσθησιν· ὁ μὲν γὰρ λόγος τοῦ καθόλου, ἡ δ' αἴσθησις τοῦ κατὰ μέρος), οἷον τὸ μὲν μέγα καὶ τὸ μικρὸν κατὰ τὸν λόγον, τὸ δὲ μανὸν καὶ τὸ πυκνὸν κατὰ τὴν αἴσθησιν.

ὅτι μὲν οὖν ἐναντίας δεῖ τὰς ἀρχὰς εἶναι, φανερόν.

Κεφάλαιο 6

Ἐχόμενον δ' ἂν εἴη λέγειν πότερον δύο ἢ τρεῖς ἢ πλείους εἰσίν.

μίαν μὲν γὰρ οὐχ οἶόν τε, ὅτι οὐχ ἓν τὰ ἐναντία, ἀπείρους δ', ὅτι οὐκ ἐπιστητὸν τὸ ὄν ἔσται, μία τε ἐναντίωσις ἐν παντὶ γένει ἐνί, ἢ δ' οὐσία ἓν τι γένος, καὶ ὅτι ἐνδέχεται ἐκ πεπερασμένων, βέλτιον δ' ἐκ πεπερασμένων, ὥσπερ Ἐμπεδοκλῆς, ἢ ἐξ ἀπείρων· πάντα γὰρ ἀποδιδόναι οἶεται ὅσαπερ Ἀναξαγόρας ἐκ τῶν ἀπείρων. ἔτι δὲ ἔστιν ἄλλα ἄλλων πρότερα ἐναντία, καὶ γίνεταί ἕτερα ἐξ ἀλλήλων, οἶον γλυκὺ καὶ πικρὸν καὶ λευκὸν καὶ μέλαν, τὰς δὲ ἀρχὰς αἰεὶ δεῖ μένειν.

ὅτι μὲν οὖν οὔτε μία οὔτε ἄπειροι, δηλὸν ἐκ τούτων·

ἐπεὶ δὲ πεπερασμένοι, τὸ μὴ ποιεῖν δύο μόνον ἔχει τινὰ λόγον· ἀπορήσειε γὰρ ἂν τις πῶς ἢ ἡ πυκνότης τὴν μανότητα ποιεῖν τι πέφυκεν ἢ αὕτη τὴν πυκνότητα. ὁμοίως δὲ καὶ ἄλλη ὅποια οὖν ἐναντιότης· οὐ γὰρ ἡ φιλία τὸ νεῖκος συνάγει καὶ ποιεῖ τι ἐξ αὐτοῦ, οὐδὲ τὸ νεῖκος ἐξ ἐκείνης, ἀλλ' ἄμφω ἕτερόν τι τρίτον. ἔνιοι δὲ καὶ πλείω λαμβάνουσιν ἐξ ὧν κατασκευάζουσι τὴν τῶν ὄντων φύσιν.

πρὸς δὲ τούτοις ἔτι κἂν τόδε τις ἀπορήσειεν, εἰ μὴ τις ἑτέραν ὑποθήσει τοῖς ἐναντίοις φύσιν· οὐθενὸς γὰρ ὁρῶμεν τῶν ὄντων οὐσίαν τὰναντία, τὴν δ' ἀρχὴν οὐ καθ' ὑποκειμένου δεῖ λέγεσθαί τινος. ἔσται γὰρ ἀρχὴ τῆς ἀρχῆς· τὸ γὰρ ὑποκείμενον ἀρχή, καὶ πρότερον δοκεῖ τοῦ κατηγορουμένου εἶναι. ἔτι οὐκ εἶναι φαμεν οὐσίαν ἐναντίαν οὐσίᾳ· πῶς οὖν ἐκ μὴ οὐσιῶν οὐσία ἂν εἴη; ἢ πῶς ἂν πρότερον μὴ οὐσία οὐσίας εἴη;

διόπερ εἰ τις τὸν τε πρότερον ἀληθῆ νομίσειεν εἶναι λόγον καὶ τοῦτον, ἀναγκαῖον, [189b] εἰ μέλλει διασώσειν ἀμφοτέρους αὐτούς, ὑποτιθεῖναι τι τρίτον, ὥσπερ φασὶν οἱ μίαν τινὰ φύσιν εἶναι λέγοντες τὸ πᾶν, οἶον ὕδωρ ἢ πῦρ ἢ τὸ μεταξὺ τούτων. δοκεῖ δὲ τὸ μεταξὺ μᾶλλον· πῦρ γὰρ ἤδη καὶ γῆ καὶ ἀῆρ καὶ ὕδωρ μετ' ἐναντιοτήτων συμπεπλεγμένα ἐστίν. διὸ καὶ οὐκ ἀλόγως ποιοῦσιν οἱ τὸ ὑποκείμενον ἕτερον τούτων ποιοῦντες, τῶν δ' ἄλλων οἱ ἀέρα· καὶ γὰρ ὁ ἀῆρ ἥκιστα ἔχει τῶν ἄλλων διαφορὰς αἰσθητάς· ἐχόμενον δὲ τὸ ὕδωρ. ἀλλὰ πάντες γε τὸ ἐν τοῦτο τοῖς ἐναντίοις σχηματίζουσιν, πυκνότητι καὶ μανότητι καὶ τῷ μᾶλλον καὶ ἥττον. ταῦτα δ' ἐστὶν ὅλως ὑπεροχὴ δηλονότι καὶ ἔλλειψις, ὥσπερ εἴρηται πρότερον. καὶ ἔοικε παλαιὰ εἶναι καὶ αὕτη ἡ δόξα, ὅτι τὸ ἐν καὶ ὑπεροχὴ καὶ

ἔλλειψις ἀρχαὶ τῶν ὄντων εἰσὶ, πλὴν οὐ τὸν αὐτὸν τρόπον, ἀλλ' οἱ μὲν ἀρχαῖοι τὰ δύο μὲν ποιεῖν τὸ δὲ ἓν πάσχειν, τῶν δ' ὑστέρων τινὲς τοῦναντίον τὸ μὲν ἓν ποιεῖν τὰ δὲ δύο πάσχειν φασι μᾶλλον.

τὸ μὲν οὖν τρία φάσκειν τὰ στοιχεῖα εἶναι ἐκ τε τούτων καὶ ἐκ τοιούτων ἄλλων ἐπισκοποῦσι δόξειεν ἂν ἔχειν τινὰ λόγον, ὥσπερ εἵπομεν, τὸ δὲ πλείω τριῶν οὐκέτι·

πρὸς μὲν γὰρ τὸ πάσχειν ἱκανὸν τὸ ἓν, εἰ δὲ τεττάρων ὄντων δύο ἔσονται ἐναντιώσεις, δεήσει χωρὶς ἑκάτερα ὑπάρχειν ἑτέραν τινὰ μεταξὺ φύσιν· εἰ δ' ἐξ ἀλλήλων δύνανται γεννᾶν δύο οὐσαι, περίεργος ἂν ἡ ἑτέρα τῶν ἐναντιώσεων εἴη. ἅμα δὲ καὶ ἀδύνατον πλείους εἶναι ἐναντιώσεις τὰς πρώτας. ἡ γὰρ οὐσία ἓν τι γένος ἐστὶ τοῦ ὄντος, ὥστε τῷ πρότερον καὶ ὕστερον διοίσουσιν ἀλλήλων αἱ ἀρχαὶ μόνον, ἀλλ' οὐ τῷ γένει· αἰὶ γὰρ ἐν ἐνὶ γένει μία ἐναντιώσις ἔστιν, πᾶσαι τε αἱ ἐναντιώσεις ἀνάγεσθαι δοκοῦσιν εἰς μίαν.

ὅτι μὲν οὖν οὔτε ἓν τὸ στοιχεῖον οὔτε πλείω δυοῖν ἢ τριῶν, φανερόν· τούτων δὲ πότερον, καθάπερ εἵπομεν, ἀπορίαν ἔχει πολλήν.

Κεφάλαιο 7

Ἦδ' οὖν ἡμεῖς λέγωμεν πρῶτον περὶ πάσης γενέσεως ἐπελθόντες· ἔστι γὰρ κατὰ φύσιν τὰ κοινὰ πρῶτον εἰπόντας οὕτω τὰ περὶ ἕκαστον ἴδια θεωρεῖν.

φαμὲν γὰρ γίνεσθαι ἐξ ἄλλου ἄλλο καὶ ἐξ ἐτέρου ἕτερον ἢ τὰ ἀπλᾶ λέγοντες ἢ τὰ συγκείμενα. λέγω δὲ τοῦτο ὡδί. ἔστι γὰρ γίνεσθαι ἄνθρωπον μουσικόν, ἔστι δὲ τὸ μὴ μουσικὸν γίνεσθαι μουσικόν ἢ τὸν [190a] μὴ μουσικὸν ἄνθρωπον ἄνθρωπον μουσικόν. ἀπλοῦν μὲν οὖν λέγω τὸ γιγνόμενον τὸν ἄνθρωπον καὶ τὸ μὴ μουσικόν, καὶ ὃ γίγνεται ἀπλοῦν, τὸ μουσικόν· συγκείμενον δὲ καὶ ὃ γίγνεται καὶ τὸ γιγνόμενον, ὅταν τὸν μὴ μουσικὸν ἄνθρωπον φῶμεν γίνεσθαι μουσικὸν ἄνθρωπον.

τούτων δὲ τὸ μὲν οὐ μόνον λέγεται τόδε γίνεσθαι ἀλλὰ καὶ ἐκ τοῦδε, οἷον ἐκ μὴ μουσικοῦ μουσικός, τὸ δ' οὐ λέγεται ἐπὶ πάντων· οὐ γὰρ ἐξ ἀνθρώπου ἐγένετο μουσικός, ἀλλ' ἄνθρωπος ἐγένετο μουσικός.

τῶν δὲ γιγνομένων ὡς τὰ ἀπλᾶ λέγομεν γίνεσθαι, τὸ μὲν ὑπομένον γίγνεται τὸ δ' οὐχ ὑπομένον· ὁ μὲν γὰρ ἄνθρωπος ὑπομένει μουσικὸς γιγνόμενος ἄνθρωπος καὶ ἔστι, τὸ δὲ μὴ μουσικὸν καὶ τὸ ἄμουσον οὔτε ἀπλῶς οὔτε συντεθειμένον ὑπομένει.

διωρισμένων δὲ τούτων, ἐξ ἀπάντων τῶν γιγνομένων τοῦτο ἔστι λαβεῖν, ἐάν τις ἐπιβλέψῃ ὥσπερ λέγομεν, ὅτι δεῖ τι ἀεὶ ὑποκεῖσθαι τὸ γιγνόμενον, καὶ τοῦτο εἰ καὶ ἀριθμῷ ἐστὶν ἓν, ἀλλ' εἶδει γε οὐχ ἓν· τὸ γὰρ εἶδει λέγω καὶ λόγῳ ταυτόν· οὐ γὰρ ταυτόν τὸ ἀνθρώπῳ καὶ τὸ ἀμούσῳ εἶναι. καὶ τὸ μὲν ὑπομένει, τὸ δ' οὐχ ὑπομένει· τὸ μὲν μὴ ἀντικείμενον ὑπομένει (ὁ γὰρ ἄνθρωπος ὑπομένει), τὸ μὴ μουσικὸν δὲ καὶ τὸ ἄμουσον οὐχ ὑπομένει, οὐδὲ τὸ ἐξ ἀμφοῖν συγκείμενον, οἷον ὁ ἄμουσος ἄνθρωπος.

τὸ δ' ἐκ τίνος γίνεσθαι τι, καὶ μὴ τόδε γίνεσθαι τι, μᾶλλον μὲν λέγεται ἐπὶ τῶν μὴ ὑπομενόντων, οἷον ἐξ ἀμούσου μουσικὸν γίνεσθαι, ἐξ ἀνθρώπου δὲ οὐ· οὐ μὴν ἀλλὰ καὶ ἐπὶ τῶν ὑπομενόντων ἐνίοτε λέγεται ὡσαύτως· ἐκ γὰρ χαλκοῦ ἀνδριάντα γίνεσθαι φαμεν, οὐ τὸν χαλκὸν ἀνδριάντα. τὸ μέντοι ἐκ τοῦ ἀντικειμένου καὶ μὴ ὑπομένοντος ἀμφοτέρως λέγεται, καὶ ἐκ τοῦδε τόδε καὶ τόδε τόδε· καὶ γὰρ ἐξ ἀμούσου καὶ ὁ ἄμουσος γίγνεται

μουσικός. διὸ καὶ ἐπὶ τοῦ συγκειμένου ὡσαύτως· καὶ γὰρ ἐξ ἁμούσου ἀνθρώπου καὶ ὁ ἄμουσος ἄνθρωπος γίνεσθαι λέγεται μουσικός.

πολλαχῶς δὲ λεγομένου τοῦ γίνεσθαι, καὶ τῶν μὲν οὐ γίνεσθαι ἀλλὰ τόδε τι γίνεσθαι, ἀπλῶς δὲ γίνεσθαι τῶν οὐσιῶν μόνον,

κατὰ μὲν τᾶλλα φανερόν ὅτι ἀνάγκη ὑποκεῖσθαι τι τὸ γιγνόμενον (καὶ γὰρ ποσὸν καὶ ποιὸν καὶ πρὸς ἕτερον [καὶ ποτὲ] καὶ ποὺ γίνεται ὑποκειμένου τινὸς διὰ τὸ μόνην τὴν οὐσίαν μηθενὸς κατ' ἄλλου λέγεσθαι ὑποκειμένου, [190b] τὰ δ' ἄλλα πάντα κατὰ τῆς οὐσίας).

ὅτι δὲ καὶ αἱ οὐσίαι καὶ ὅσα [ἄλλα] ἀπλῶς ὄντα ἐξ ὑποκειμένου τινὸς γίνεται, ἐπισκοποῦντι γένοιτο ἂν φανερόν. αἰεὶ γὰρ ἔστι ὁ ὑπόκειται, ἐξ οὗ τὸ γιγνόμενον, οἶον τὰ φυτὰ καὶ τὰ ζῶα ἐκ σπέρματος.

γίνεται δὲ τὰ γιγνόμενα ἀπλῶς τὰ μὲν μετασχηματίζει, οἶον ἀνδριάς, τὰ δὲ προσθέσει, οἶον τὰ αὐξανόμενα, τὰ δ' ἀφαιρέσει, οἶον ἐκ τοῦ λίθου ὁ Ἑρμῆς, τὰ δὲ συνθέσει, οἶον οἰκία, τὰ δ' ἀλλοιώσει, οἶον τὰ τρεπόμενα κατὰ τὴν ὕλην.

πάντα δὲ τὰ οὕτω γιγνόμενα φανερόν ὅτι ἐξ ὑποκειμένων γίνεται.

ὥστε δῆλον ἐκ τῶν εἰρημένων ὅτι τὸ γιγνόμενον ἅπαν αἰεὶ συνθετόν ἐστι, καὶ ἔστι μὲν τι γιγνόμενον, ἔστι δὲ τι ὁ τοῦτο γίνεται, καὶ τοῦτο διττόν· ἢ γὰρ τὸ ὑποκείμενον ἢ τὸ ἀντικείμενον. λέγω δὲ ἀντικεῖσθαι μὲν τὸ ἄμουσον, ὑποκεῖσθαι δὲ τὸν ἄνθρωπον, καὶ τὴν μὲν ἀσχημοσύνην καὶ τὴν ἀμορφίαν καὶ τὴν ἀταξίαν τὸ ἀντικείμενον, τὸν δὲ χαλκὸν ἢ τὸν λίθον ἢ τὸν χρυσὸν τὸ ὑποκείμενον.

φανερόν οὖν ὥς, εἴπερ εἰσὶν αἰτίαι καὶ ἀρχαὶ τῶν φύσει ὄντων, ἐξ ὧν πρώτων εἰσὶ καὶ γεγόνاسι μὴ κατὰ συμβεβηκὸς ἀλλ' ἕκαστον ὁ λέγεται κατὰ τὴν οὐσίαν, ὅτι γίνεται πᾶν ἕκ τε τοῦ ὑποκειμένου καὶ τῆς μορφῆς· σύγ κείται γὰρ ὁ μουσικὸς ἄνθρωπος ἐξ ἀνθρώπου καὶ μουσικοῦ τρόπον τινά· διαλύσεις γὰρ [τοὺς λόγους] εἰς τοὺς λόγους τοὺς ἐκείνων. δῆλον οὖν ὥς γίγνεται ἂν τὰ γιγνόμενα ἐκ τούτων.

ἔστι δὲ τὸ μὲν ὑποκείμενον ἀριθμῷ μὲν ἓν, εἶδει δὲ δύο (ὁ μὲν γὰρ ἄνθρωπος καὶ ὁ χρυσὸς καὶ ὅλως ἡ ὕλη ἀριθμητή· τόδε γὰρ τι μᾶλλον, καὶ οὐ κατὰ συμβεβηκὸς ἐξ αὐτοῦ γίνεται τὸ γιγνόμενον· ἢ δὲ στέρησις καὶ ἡ ἐναντίωσις συμβεβηκός). ἓν δὲ τὸ εἶδος, οἶον ἡ τάξις ἢ ἡ μουσικὴ ἢ τῶν ἄλλων τι τῶν οὕτω κατηγορουμένων. διὸ

ἔστι μὲν ὥς δύο λεκτέον εἶναι τὰς ἀρχάς, ἔστι δ' ὥς τρεῖς· καὶ ἔστι μὲν ὥς τάναντία, οἷον εἴ τις λέγοι τὸ μουσικὸν καὶ τὸ ἄμουσον ἢ τὸ θερμὸν καὶ τὸ ψυχρὸν ἢ τὸ ἡρμοσμένον καὶ τὸ ἀνάρμοστον, ἔστι δ' ὥς οὐ· ὑπ' ἀλλήλων γὰρ πάσχειν τάναντία ἀδύνατον. λύεται δὲ καὶ τοῦτο διὰ τὸ ἄλλο εἶναι τὸ ὑποκείμενον· τοῦτο γὰρ οὐκ ἐναντίον. ὥστε οὔτε πλείους τῶν ἐναντίων αἱ ἀρχαὶ τρόπον τινά, ἀλλὰ δύο ὥς εἰπεῖν τῷ ἀριθμῷ, οὐτ' αὖ παντελῶς δύο διὰ [191a] τὸ ἕτερον ὑπάρχειν τὸ εἶναι αὐτοῖς, ἀλλὰ τρεῖς· ἕτερον γὰρ τὸ ἀνθρώπῳ καὶ τὸ ἄμουςῳ εἶναι, καὶ τὸ ἀσχηματίστῳ καὶ χαλκῷ.

πόσαι μὲν οὖν αἱ ἀρχαὶ τῶν περὶ γενέσεσιν φυσικῶν, καὶ πῶς ποσαί, εἴρηται· καὶ δηλόν ἐστιν ὅτι δεῖ ὑποκεῖσθαι τι τοῖς ἐναντίοις καὶ τάναντία δύο εἶναι. τρόπον δέ τινα ἄλλον οὐκ ἀναγκαῖον· ἰκανὸν γὰρ ἔσται τὸ ἕτερον τῶν ἐναντίων ποιεῖν τῇ ἀπουσίᾳ καὶ παρουσίᾳ τὴν μεταβολήν.

ἡ δὲ ὑποκειμένη φύσις ἐπιστητὴ κατ' ἀναλογίαν. ὥς γὰρ πρὸς ἀνδριάντα χαλκὸς ἢ πρὸς κλίνην ξύλον ἢ πρὸς τῶν ἄλλων τι τῶν ἐχόντων μορφήν [ἢ ὕλη καὶ] τὸ ἄμορφον ἔχει πρὶν λαβεῖν τὴν μορφήν, οὕτως αὕτη πρὸς οὐσίαν ἔχει καὶ τὸ τόδε τι καὶ τὸ ὄν.

μία μὲν οὖν ἀρχὴ αὕτη, οὐχ οὕτω μία οὕσα οὐδὲ οὕτως ὄν ὥς τὸ τόδε τι, μία δὲ ἥς ὁ λόγος, ἔτι δὲ τὸ ἐναντίον τούτῳ, ἢ στέρησις. ταῦτα δὲ πῶς δύο καὶ πῶς πλείω, εἴρηται ἐν τοῖς ἄνω. πρῶτον μὲν οὖν ἐλέχθη ὅτι ἀρχαὶ τάναντία μόνον, ὕστερον δ' ὅτι ἀνάγκη καὶ ἄλλο τι ὑποκεῖσθαι καὶ εἶναι τρία· ἐκ δὲ τῶν νῦν φανερόν τίς ἡ διαφορὰ τῶν ἐναντίων, καὶ πῶς ἔχουσιν αἱ ἀρχαὶ πρὸς ἀλλήλας, καὶ τί τὸ ὑποκείμενον. πότερον δὲ οὐσία τὸ εἶδος ἢ τὸ ὑποκείμενον, οὕτω δηλον. ἀλλ' ὅτι αἱ ἀρχαὶ τρεῖς καὶ πῶς τρεῖς, καὶ τίς ὁ τρόπος αὐτῶν, δηλον. πόσαι μὲν οὖν καὶ τίνες εἰσὶν αἱ ἀρχαί, ἐκ τούτων θεωρεῖσθωσαν.

Κεφάλαιο 8

Ὅτι δὲ μοναχῶς οὕτω λύεται καὶ ἡ τῶν ἀρχαίων ἀπορία, λέγωμεν μετὰ ταῦτα.

ζητοῦντες γὰρ οἱ κατὰ φιλοσοφίαν πρῶτοι τὴν ἀλήθειαν καὶ τὴν φύσιν τῶν ὄντων ἐξετράπησαν οἷον ὁδόν τινα ἄλλην ἀπωσθέντες ὑπὸ ἀπειρίας, καὶ φασιν οὔτε γίγνεσθαι τῶν ὄντων οὐδὲν οὔτε φθείρεσθαι διὰ τὸ ἀναγκαῖον μὲν εἶναι γίγνεσθαι τὸ γιγνόμενον ἢ ἐξ ὄντος ἢ ἐκ μὴ ὄντος, ἐκ δὲ τούτων ἀμφοτέρων ἀδύνατον εἶναι· οὔτε γὰρ τὸ ὄν γίγνεσθαι (εἶναι γὰρ ἤδη) ἐκ τε μὴ ὄντος οὐδὲν ἂν γενέσθαι· ὑποκεῖσθαι γάρ τι δεῖν. καὶ οὕτω δὴ τὸ ἐφεξῆς συμβαῖνον αὔξοντες οὐδ' εἶναι πολλά φασιν ἀλλὰ μόνον αὐτὸ τὸ ὄν. ἐκεῖνοι μὲν οὖν ταύτην ἔλαβον τὴν δόξαν διὰ τὰ εἰρημένα·

ἡμεῖς δὲ λέγομεν ὅτι τὸ ἐξ ὄντος ἢ μὴ ὄντος γίγνεσθαι, ἢ τὸ μὴ ὄν ἢ τὸ ὄν ποιεῖν τι ἢ πάσχειν ἢ ὅτιοῦν τόδε γίγνεσθαι, ἓνα μὲν τρόπον οὐθὲν [191b] διαφέρει ἢ τὸ τὸν ἱατρὸν ποιεῖν τι ἢ πάσχειν ἢ ἐξ ἱατροῦ εἶναι τι ἢ γίγνεσθαι, ὥστ' ἐπειδὴ τοῦτο διχῶς λέγεται, δηλὸν ὅτι καὶ τὸ ἐξ ὄντος καὶ τὸ ὄν ἢ ποιεῖν ἢ πάσχειν. οἰκοδομεῖ μὲν οὖν ὁ ἱατρὸς οὐχ ἢ ἱατρὸς ἀλλ' ἢ οἰκοδόμος, καὶ λευκὸς γίγνεται οὐχ ἢ ἱατρὸς ἀλλ' ἢ μέλας· ἱατρεύει δὲ καὶ ἀνίατρος γίγνεται ἢ ἱατρός. ἐπεὶ δὲ μάλιστα λέγομεν κυρίως τὸν ἱατρὸν ποιεῖν τι ἢ πάσχειν ἢ γίγνεσθαι ἐξ ἱατροῦ, ἐὰν ἢ ἱατρὸς ταῦτα πάσχη ἢ ποιῇ ἢ γίγηται, δηλὸν ὅτι καὶ τὸ ἐκ μὴ ὄντος γίγνεσθαι τοῦτο σημαίνει, τὸ ἢ μὴ ὄν.

ὅπερ ἐκεῖνοι μὲν οὐ διελόντες ἀπέστησαν, καὶ διὰ ταύτην τὴν ἄγνοίαν τοσοῦτον προσηγγόνησαν, ὥστε μὴθὲν οἶεσθαι γίγνεσθαι μὴδ' εἶναι τῶν ἄλλων, ἀλλ' ἀνελεῖν πᾶσαν τὴν γένεσιν·

ἡμεῖς δὲ καὶ αὐτοὶ φαμεν γίγνεσθαι μὲν μὴθὲν ἀπλῶς ἐκ μὴ ὄντος, πῶς μέντοι γίγνεσθαι ἐκ μὴ ὄντος, οἷον κατὰ συμβεβηκός (ἐκ γὰρ τῆς στερήσεως, ὃ ἐστὶ καθ' αὐτὸ μὴ ὄν, οὐκ ἐνυπάρχοντος γίγνεται τι· θαυμάζεται δὲ τοῦτο καὶ ἀδύνατον οὕτω δοκεῖ γίγνεσθαι τι, ἐκ μὴ ὄντος)·

ὡσαύτως δὲ οὐδ' ἐξ ὄντος οὐδὲ τὸ ὄν γίγνεσθαι, πλὴν κατὰ συμβεβηκός· οὕτω δὲ καὶ τοῦτο γίγνεσθαι, τὸν αὐτὸν τρόπον οἷον εἰ ἐκ ζῶου ζῶον γίγνοιτο καὶ ἐκ τινὸς ζῶου τι ζῶον· οἷον εἰ κύων <ἐκ κυνὸς ἢ ἵππος> ἐξ ἵππου γίγνοιτο. γίγνοιτο μὲν γὰρ ἂν οὐ μόνον ἐκ τινὸς ζῶου ὁ κύων, ἀλλὰ καὶ ἐκ ζῶου, ἀλλ' οὐχ ἢ ζῶον· ὑπάρχει γὰρ

ἤδη τοῦτο· εἰ δέ τι μέλλει γίνεσθαι ζῶον μὴ κατὰ συμβεβηκός, οὐκ ἐκ ζώου ἔσται, καὶ εἴ τι ὄν, οὐκ ἐξ ὄντος· οὐδ' ἐκ μὴ ὄντος· τὸ γὰρ ἐκ μὴ ὄντος εἴρηται ἡμῖν τί σημαίνει, ὅτι ἢ μὴ ὄν.

ἔτι δὲ καὶ τὸ εἶναι ἅπαν ἢ μὴ εἶναι οὐκ ἀναιροῦμεν.

εἷς μὲν δὴ τρόπος οὗτος, ἄλλος δ' ὅτι ἐνδέχεται ταῦτα λέγειν κατὰ τὴν δύναμιν καὶ τὴν ἐνέργειαν· τοῦτο δ' ἐν ἄλλοις διώρισται δι' ἀκριβείας μᾶλλον. ὥσθ' (ὅπερ ἐλέγομεν) αἱ ἀπορίαι λύονται δι' ὅς ἀναγκαζόμενοι ἀναιροῦσι τῶν εἰρημένων ἓνα· διὰ γὰρ τοῦτο τοσοῦτον καὶ οἱ πρότερον ἐξετράπησαν τῆς ὁδοῦ τῆς ἐπὶ τὴν γένεσιν καὶ φθορὰν καὶ ὅλως μεταβολήν· αὕτη γὰρ ἂν ὀφθεῖσα ἢ φύσις ἅπασαν ἔλυσεν αὐτῶν τὴν ἄγνοιαν.

Κεφάλαιο 9

Ἡμμένοι μὲν οὖν καὶ ἕτεροὶ τινές εἰσιν αὐτῆς, ἀλλ' οὐχ ἱκανῶς.

πρῶτον μὲν γὰρ ὁμολογοῦσιν ἀπλῶς γίνεσθαι τι ἐκ μὴ [192a] ὄντος, ἥ Παρμενίδην ὀρθῶς λέγειν· εἴτα φαίνεται αὐτοῖς, εἴπερ ἔστιν ἀριθμῷ μία, καὶ δυνάμει μία μόνον εἶναι. τοῦτο δὲ διαφέρει πλεῖστον.

ἡμεῖς μὲν γὰρ ὕλην καὶ στέρησιν ἕτερόν φαμεν εἶναι, καὶ τούτων τὸ μὲν οὐκ ὄν εἶναι κατὰ συμβεβηκός, τὴν ὕλην, τὴν δὲ στέρησιν καθ' αὐτήν, καὶ τὴν μὲν ἐγγὺς καὶ οὐσίαν πως, τὴν ὕλην, τὴν δὲ οὐδαμῶς· οἱ δὲ τὸ μὴ ὄν τὸ μέγα καὶ τὸ μικρὸν ὁμοίως, ἥ τὸ συναμφοτέρον ἢ τὸ χωρὶς ἐκάτερον. ὥστε παντελῶς ἕτερος ὁ τρόπος οὗτος τῆς τριάδος κάκεινος. μέχρι μὲν γὰρ δεῦρο προῆλθον, ὅτι δεῖ τινὰ ὑποκεῖσθαι φύσιν, ταύτην μέντοι μίαν ποιοῦσιν· καὶ γὰρ εἴ τις δυάδα ποιεῖ, λέγων μέγα καὶ μικρὸν αὐτήν, οὐθὲν ἥττον ταὐτὸ ποιεῖ· τὴν γὰρ ἑτέραν παρῆδεν. ἡ μὲν γὰρ ὑπομένουσα συναιτία τῇ μορφῇ τῶν γιγνομένων ἐστίν, ὥσπερ μήτηρ· ἡ δ' ἑτέρα μοῖρα τῆς ἐναντιώσεως πολλάκις ἂν φαντασθεῖη τῷ πρὸς τὸ κακοποιὸν αὐτῆς ἀτενίζοντι τὴν διάνοιαν οὐδ' εἶναι τὸ παράπαν. ὄντος γάρ τινος θείου καὶ ἀγαθοῦ καὶ ἐφετοῦ, τὸ μὲν ἐναντίον αὐτῷ φαμεν εἶναι, τὸ δὲ ὁ πέφυκεν ἐφίεσθαι καὶ ὀρέγεσθαι αὐτοῦ κατὰ τὴν αὐτοῦ φύσιν. τοῖς δὲ συμβαίνει τὸ ἐναντίον ὀρέγεσθαι τῆς αὐτοῦ φθορᾶς. καίτοι οὔτε αὐτὸ αὐτοῦ οἶόν τε ἐφίεσθαι τὸ εἶδος διὰ τὸ μὴ εἶναι ἐνδεές, οὔτε τὸ ἐναντίον (φθαρτικὰ γὰρ ἀλλήλων τὰ ἐναντία), ἀλλὰ τοῦτ' ἔστιν ἡ ὕλη, ὥσπερ ἂν εἰ θῆλυ ἄρρενος καὶ αἰσχροὺ καλοῦ· πλὴν οὐ καθ' αὐτὸ αἰσχρόν, ἀλλὰ κατὰ συμβεβηκός, οὐδὲ θῆλυ, ἀλλὰ κατὰ συμβεβηκός.

φθείρεται δὲ καὶ γίγνεται ἔστι μὲν ὥς, ἔστι δ' ὡς οὐ. ὡς μὲν γὰρ τὸ ἐν ᾧ, καθ' αὐτὸ φθείρεται (τὸ γὰρ φθειρόμενον ἐν τούτῳ ἐστίν, ἡ στέρησις)· ὡς δὲ κατὰ δύναμιν, οὐ καθ' αὐτό, ἀλλ' ἄφθαρτον καὶ ἀγέννητον ἀνάγκη αὐτὴν εἶναι. εἴτε γὰρ ἐγγίγντο, ὑποκεῖσθαι τι δεῖ πρῶτον ἐξ οὗ ἐνυπάρχοντος· τοῦτο δ' ἐστὶν αὐτὴ ἡ φύσις, ὥστ' ἔσται πρὶν γενέσθαι (λέγω γὰρ ὕλην τὸ πρῶτον ὑποκείμενον ἐκάστω, ἐξ οὗ γίγνεται τι ἐνυπάρχοντος μὴ κατὰ συμβεβηκός)· εἴτε φθείρεται, εἰς τοῦτο ἀφίζεται ἔσχατον, ὥστε ἐφθαρμένη ἔσται πρὶν φθαρθῆναι.

περὶ δὲ τῆς κατὰ τὸ εἶδος ἀρχῆς, πότερον μία ἢ πολλαὶ καὶ τίς ἡ

τίνες εἰσίν, δι' ἀκριβείας τῆς πρώτης φιλοσοφίας ἔργον ἐστὶν διορίσαι, ὥστ' εἰς ἐκεῖνον τὸν και[192b] ρὸν ἀποκείσθω. περὶ δὲ τῶν φυσικῶν καὶ φθαρτῶν εἰδῶν ἐν τοῖς ὕστερον δεικνυμένοις ἐροῦμεν.

ὅτι μὲν οὖν εἰσὶν ἀρχαί, καὶ τίνες, καὶ πόσαι τὸν ἀριθμόν, διορίσθω ἡμῖν οὕτως· πάλιν δ' ἄλλην ἀρχὴν ἀρξάμενοι λέγωμεν.

Βιβλίο 2

Κεφάλαιο 1

Τῶν ὄντων τὰ μὲν ἐστὶ φύσει, τὰ δὲ δι' ἄλλας αἰτίας,

φύσει μὲν τὰ τε ζῶα καὶ τὰ μέρη αὐτῶν καὶ τὰ φυτὰ καὶ τὰ ἀπλᾶ τῶν σωμάτων, οἷον γῆ καὶ πῦρ καὶ ἀήρ καὶ ὕδωρ (ταῦτα γὰρ εἶναι καὶ τὰ τοιαῦτα φύσει φαμέν), πάντα δὲ ταῦτα φαίνεται διαφέροντα πρὸς τὰ μὴ φύσει συνεστῶτα. τούτων μὲν γὰρ ἕκαστον ἐν ἑαυτῷ ἀρχὴν ἔχει κινήσεως καὶ στάσεως, τὰ μὲν κατὰ τόπον, τὰ δὲ κατ' αὐξήσιν καὶ φθίσιν, τὰ δὲ κατ' ἀλλοίωσιν· κλίνη δὲ καὶ ἱμάτιον, καὶ εἴ τι τοιοῦτον ἄλλο γένος ἐστίν, ἥ μὲν τετύχηκε τῆς κατηγορίας ἐκάστης καὶ καθ' ὅσον ἐστὶν ἀπὸ τέχνης, οὐδεμίαν ὁρμὴν ἔχει μεταβολῆς ἔμφυτον, ἥ δὲ συμβέβηκεν αὐτοῖς εἶναι λιθίνους ἢ γηϊνούς ἢ μικτοὺς ἐκ τούτων, ἔχει, καὶ κατὰ τοσοῦτον, ὥς οὕσης τῆς φύσεως ἀρχῆς τινὸς καὶ αἰτίας τοῦ κινεῖσθαι καὶ ἡρεμεῖν ἐν ᾧ ὑπάρχει πρῶτως καθ' αὐτὸ καὶ μὴ κατὰ συμβεβηκός

(λέγω δὲ τὸ μὴ κατὰ συμβεβηκός, ὅτι γένοιτ' ἂν αὐτὸς αὐτῷ τις αἴτιος ὑγιείας ὣν ἱατρός· ἀλλ' ὅμως οὐ καθὸ ὑγιαίνεται τὴν ἱατρικὴν ἔχει, ἀλλὰ συμβέβηκεν τὸν αὐτὸν ἱατρὸν εἶναι καὶ ὑγιαζόμενον· διὸ καὶ χωρίζεται ποτ' ἀπ' ἀλλήλων). ὁμοίως δὲ καὶ τῶν ἄλλων ἕκαστον τῶν ποιουμένων· οὐδὲν γὰρ αὐτῶν ἔχει τὴν ἀρχὴν ἐν ἑαυτῷ τῆς ποιήσεως, ἀλλὰ τὰ μὲν ἐν ἄλλοις καὶ ἔξωθεν, οἷον οἰκία καὶ τῶν ἄλλων τῶν χειροκμήτων ἕκαστον, τὰ δ' ἐν αὐτοῖς μὲν ἀλλ' οὐ καθ' αὐτά, ὅσα κατὰ συμβεβηκός αἴτια γένοιτ' ἂν αὐτοῖς.

φύσις μὲν οὖν ἐστὶ τὸ ῥηθέν· φύσιν δὲ ἔχει ὅσα τοιαύτην ἔχει ἀρχήν. καὶ ἔστιν πάντα ταῦτα οὐσία· ὑποκειμένον γάρ τι, καὶ ἐν ὑποκειμένῳ ἐστὶν ἡ φύσις αἰεί.

κατὰ φύσιν δὲ ταῦτα τε καὶ ὅσα τούτοις ὑπάρχει καθ' αὐτά, οἷον τῷ πυρὶ φέρεσθαι ἄνω· τοῦτο γὰρ φύσις μὲν οὐκ [193a] ἔστιν οὐδ' ἔχει φύσιν, φύσει δὲ καὶ κατὰ φύσιν ἐστίν.

τί μὲν οὖν ἐστὶν ἡ φύσις, εἴρηται, καὶ τί τὸ φύσει καὶ κατὰ φύσιν. ὥς δ' ἔστιν ἡ φύσις, πειρᾶσθαι δεικνύναι γελοῖον· φανερόν γάρ ὅτι τοιαῦτα τῶν ὄντων ἐστὶν πολλὰ. τὸ δὲ δεικνύναι τὰ φανερά διὰ τῶν ἀφανῶν οὐ δυναμένου κρίνειν ἐστὶ τὸ δι' αὐτὸ καὶ μὴ δι' αὐτὸ γνώριμον (ὅτι δ' ἐνδέχεται τοῦτο πάσχειν, οὐκ ἄδηλον· συλλογίσαιτο γὰρ ἂν τις ἐκ γενετῆς ὣν τυφλὸς περὶ χρωμάτων), ὥστε ἀνάγκη τοῖς τοιούτοις περὶ τῶν ὀνομάτων εἶναι τὸν λόγον, νοεῖν δὲ

μηδέν.

δοκεῖ δ' ἡ φύσις καὶ ἡ οὐσία τῶν φύσει ὄντων ἐνίοις εἶναι τὸ πρῶτον ἐνυπάρχον ἐκάστω, ἀρρύθμιστον <ὄν>καθ' ἑαυτό, οἷον κλίνης φύσις τὸ ξύλον, ἀνδριάντος δ' ὁ χαλκός.

σημεῖον δέ φησιν Ἀντιφῶν ὅτι, εἴ τις κατορύξειε κλίνην καὶ λάβοι δύναμιν ἢ σηπεδὼν ὥστε ἀνεῖναι βλαστόν, οὐκ ἂν γενέσθαι κλίνην ἀλλὰ ξύλον, ὥς τὸ μὲν κατὰ συμβεβηκὸς ὑπάρχον, τὴν κατὰ νόμον διάθεσιν καὶ τὴν τέχνην, τὴν δ' οὐσίαν οὕσαν ἐκείνην ἢ καὶ διαμένει ταῦτα πάσχουσα συνεχῶς.

εἰ δὲ καὶ τούτων ἕκαστον πρὸς ἕτερόν τι ταὐτὸ τοῦτο πέπονθεν (οἷον ὁ μὲν χαλκὸς καὶ ὁ χρυσὸς πρὸς ὕδωρ, τὰ δ' ὅσα καὶ ξύλα πρὸς γῆν, ὁμοίως δὲ καὶ τῶν ἄλλων ὁτιοῦν), ἐκεῖνο τὴν φύσιν εἶναι καὶ τὴν οὐσίαν αὐτῶν. διόπερ οἱ μὲν πῦρ, οἱ δὲ γῆν, οἱ δ' ἀέρα φασίν, οἱ δὲ ὕδωρ, οἱ δ' ἔνια τούτων, οἱ δὲ πάντα ταῦτα τὴν φύσιν εἶναι τὴν τῶν ὄντων. ὁ γάρ τις αὐτῶν ὑπέλαβε τοιοῦτον, εἴτε ἐν εἴτε πλείω, τοῦτο καὶ τοσαυτά φησιν εἶναι τὴν ἅπασαν οὐσίαν, τὰ δὲ ἄλλα πάντα πάθη τούτων καὶ ἔξεις καὶ διαθέσεις, καὶ τούτων μὲν ὁτιοῦν αἰδῖον (οὐ γὰρ εἶναι μεταβολὴν αὐτοῖς ἐξ αὐτῶν), τὰ δ' ἄλλα γίνεσθαι καὶ φθείρεσθαι ἀπειράκις.

ἕνα μὲν οὖν τρόπον οὕτως ἡ φύσις λέγεται, ἢ πρώτη ἐκάστω ὑποκειμένη ὕλη τῶν ἐχόντων ἐν αὐτοῖς ἀρχὴν κινήσεως καὶ μεταβολῆς,

ἄλλον δὲ τρόπον ἢ μορφή καὶ τὸ εἶδος τὸ κατὰ τὸν λόγον.

ὥσπερ γὰρ τέχνη λέγεται τὸ κατὰ τέχνην καὶ τὸ τεχνικόν, οὕτω καὶ φύσις τὸ κατὰ φύσιν [λέγεται] καὶ τὸ φυσικόν, οὔτε δὲ ἐκεῖ πω φαῖμεν ἂν ἔχειν κατὰ τὴν τέχνην οὐδέν, εἰ δυνάμει μόνον ἐστὶ κλίνη, μὴ πω δ' ἔχει τὸ εἶδος τῆς κλίνης, οὐδ' εἶναι τέχνην, οὔτ' ἐν τοῖς φύσει συνισταμένοις· τὸ γὰρ δυνάμει σὰρξ ἢ ὅστουν οὔτ' [193b] ἔχει πω τὴν ἑαυτοῦ φύσιν, πρὶν ἂν λάβῃ τὸ εἶδος τὸ κατὰ τὸν λόγον, ᾧ ὀριζόμενοι λέγομεν τί ἐστὶ σὰρξ ἢ ὅστουν, οὔτε φύσει ἐστίν. ὥστε ἄλλον τρόπον ἢ φύσις ἂν εἴη τῶν ἐχόντων ἐν αὐτοῖς κινήσεως ἀρχὴν ἢ μορφή καὶ τὸ εἶδος, οὐ χωριστὸν ὄν ἀλλ' ἢ κατὰ τὸν λόγον. (τὸ δ' ἐκ τούτων φύσις μὲν οὐκ ἔστιν, φύσει δέ, οἷον ἄνθρωπος.)

καὶ μᾶλλον αὕτη φύσις τῆς ὕλης· ἕκαστον γὰρ τότε λέγεται ὅταν ἐντελεχεία ᾗ, μᾶλλον ἢ ὅταν δυνάμει. ἔτι γίνεταί ἄνθρωπος ἐξ ἀνθρώπου, ἀλλ' οὐ κλίνη ἐκ κλίνης· διὸ καὶ φασιν οὐ τὸ σχῆμα εἶναι τὴν φύσιν ἀλλὰ τὸ ξύλον, ὅτι γένοιτ' ἂν, εἰ βλαστάνοι, οὐ κλίνη

ἀλλὰ ξύλον. εἰ δ' ἄρα τοῦτο φύσις, καὶ ἡ μορφή φύσις· γίνεται γὰρ ἐξ ἀνθρώπου ἄνθρωπος.

ἔτι δ' ἡ φύσις ἢ λεγομένη ὡς γένεσις ὁδὸς ἐστὶν εἰς φύσιν. οὐ γὰρ ὥσπερ ἡ ἰάτρευσις λέγεται οὐκ εἰς ἰατρικὴν ὁδὸν ἀλλ' εἰς ὑγίειαν· ἀνάγκη μὲν γὰρ ἀπὸ ἰατρικῆς οὐκ εἰς ἰατρικὴν εἶναι τὴν ἰάτρευσιν, οὐχ οὕτω δ' ἡ φύσις ἔχει πρὸς τὴν φύσιν, ἀλλὰ τὸ φυόμενον ἐκ τινὸς εἰς τὶ ἔρχεται ἢ φύεται. τί οὖν φύεται; οὐχὶ ἐξ οὗ, ἀλλ' εἰς ὅ. ἡ ἄρα μορφή φύσις.

ἡ δὲ μορφή καὶ ἡ φύσις διχῶς λέγεται· καὶ γὰρ ἡ στέρησις εἰδὸς πῶς ἐστίν. εἰ δ' ἔστιν στέρησις καὶ ἐναντίον τι περὶ τὴν ἀπλὴν γένεσιν ἢ μὴ ἔστιν, ὥστερον ἐπισκεπτέον.

Κεφάλαιο 2

Ἐπεὶ δὲ διώριται ποσαχῶς ἡ φύσις, μετὰ τοῦτο θεωρητέον τίνι διαφέρει ὁ μαθηματικὸς τοῦ φυσικοῦ (καὶ γὰρ ἐπίπεδα καὶ στερεὰ ἔχει τὰ φυσικὰ σώματα καὶ μήκη καὶ στιγμάς, περὶ ὧν σκοπεῖ ὁ μαθηματικὸς).

ἔτι εἰ ἡ ἀστρολογία ἐτέρα ἢ μέρος τῆς φυσικῆς· εἰ γὰρ τοῦ φυσικοῦ τὸ τί ἐστὶν ἥλιος ἢ σελήνη εἰδέναι, τῶν δὲ συμβεβηκότων καθ' αὐτὰ μηδέν, ἄτοπον, ἄλλως τε καὶ ὅτι φαίνονται λέγοντες οἱ περὶ φύσεως καὶ περὶ σχήματος σελήνης καὶ ἡλίου, καὶ δὴ καὶ πότερον σφαιροειδῆς ἢ γῆ καὶ ὁ κόσμος ἢ οὐ.

περὶ τούτων μὲν οὖν πραγματεύεται καὶ ὁ μαθηματικὸς, ἀλλ' οὐχ ἡ φυσικοῦ σώματος πέρας ἕκαστον· οὐδὲ τὰ συμβεβηκότα θεωρεῖ ἢ τοιούτοις οὔσι συμβέβηκεν· διὸ καὶ χωρίζει· χωριστὰ γὰρ τῇ νοήσει κινήσεώς ἐστι, καὶ οὐδὲν διαφέρει, οὐδὲ γίγνεται ψεῦδος χωρίζοντων. λανθάνουσι δὲ τοῦτο ποιοῦντες καὶ οἱ τὰς ιδέας λέγοντες· τὰ γὰρ φυσικὰ [194a] χωρίζουσιν ἥττον ὄντα χωριστὰ τῶν μαθηματικῶν. γίγνοιτο δ' ἂν τοῦτο δηλόν, εἰ τις ἐκατέρων πειρῶτο λέγειν τοὺς ὅρους, καὶ αὐτῶν καὶ τῶν συμβεβηκότων. τὸ μὲν γὰρ περιττὸν ἔσται καὶ τὸ ἄρτιον καὶ τὸ εὐθὺ καὶ τὸ καμπύλον, ἔτι δὲ ἀριθμὸς καὶ γραμμὴ καὶ σχῆμα, ἄνευ κινήσεως, σὰρξ δὲ καὶ ὀστοῦν καὶ ἄνθρωπος οὐκέτι, ἀλλὰ ταῦτα ὥσπερ ρίς σιμὴ ἀλλ' οὐχ ὥς τὸ καμπύλον λέγεται.

δηλοῖ δὲ καὶ τὰ φυσικώτερα τῶν μαθημάτων, οἷον ὀπτική καὶ ἀρμονική καὶ ἀστρολογία· ἀνάπαλιν γὰρ τρόπον τιν' ἔχουσιν τῇ γεωμετρίᾳ. ἡ μὲν γὰρ γεωμετρία περὶ γραμμῆς φυσικῆς σκοπεῖ, ἀλλ' οὐχ ἡ φυσική, ἡ δ' ὀπτική μαθηματικὴν μὲν γραμμὴν, ἀλλ' οὐχ ἡ μαθηματικὴ ἀλλ' ἡ φυσική.

ἐπεὶ δ' ἡ φύσις διχῶς, τό τε εἶδος καὶ ἡ ὕλη, ὥς ἂν εἰ περὶ σιμότητος σκοποῖμεν τί ἐστὶν, οὕτω θεωρητέον· ὥστ' οὐτ' ἄνευ ὕλης τὰ τοιαῦτα οὔτε κατὰ τὴν ὕλην. καὶ γὰρ δὴ καὶ περὶ τούτου ἀπορήσειεν ἂν τις, ἐπεὶ δύο αἱ φύσεις, περὶ ποτέρας τοῦ φυσικοῦ. ἡ περὶ τοῦ ἐξ ἀμφοῖν; ἀλλ' εἰ περὶ τοῦ ἐξ ἀμφοῖν, καὶ περὶ ἐκατέρας. πότερον οὖν τῆς αὐτῆς ἢ ἄλλης ἐκατέραν γνωρίζειν;

εἰς μὲν γὰρ τοὺς ἀρχαίους ἀποβλέψαντι δόξειεν ἂν εἶναι τῆς ὕλης (ἐπὶ μικρὸν γὰρ τι μέρος Ἐμπεδοκλῆς καὶ Δημόκριτος τοῦ εἶδους καὶ

τοῦ τί ἦν εἶναι ἤψαντο)·

εἰ δὲ ἡ τέχνη μιμεῖται τὴν φύσιν, τῆς δὲ αὐτῆς ἐπιστήμης εἰδέναι τὸ εἶδος καὶ τὴν ὕλην μέχρι τοῦ (οἶον ἱατροῦ ὑγίειαν καὶ χολὴν καὶ φλέγμα, ἐν οἷς ἡ ὑγίεια, ὁμοίως δὲ καὶ οἰκοδόμου τό τε εἶδος τῆς οἰκίας καὶ τὴν ὕλην, ὅτι πλίνθοι καὶ ξύλα· ὡσαύτως δὲ καὶ ἐπὶ τῶν ἄλλων), καὶ τῆς φυσικῆς ἂν εἴη τὸ γνωρίζειν ἀμφοτέρας τὰς φύσεις.

ἔτι τὸ οὐ ἔνεκα καὶ τὸ τέλος τῆς αὐτῆς, καὶ ὅσα τούτων ἔνεκα. ἡ δὲ φύσις τέλος καὶ οὐ ἔνεκα (ὧν γὰρ συνεχοῦς τῆς κινήσεως οὕσης ἔστι τι τέλος, τοῦτο <τὸ> ἔσχατον καὶ τὸ οὐ ἔνεκα· διὸ καὶ ὁ ποιητὴς γελοίως προήχθη εἰπεῖν “ἔχει τελευτήν, ἥπερ οὐνεκ’ ἐγένετο”· βούλεται γὰρ οὐ πᾶν εἶναι τὸ ἔσχατον τέλος, ἀλλὰ τὸ βέλτιστον)· ἐπεὶ καὶ ποιοῦσιν αἱ τέχναι τὴν ὕλην αἱ μὲν ἀπλῶς αἱ δὲ εὐεργόν, καὶ χρώμεθα ὡς ἡμῶν ἔνεκα πάντων ὑπαρχόντων (ἐσμὲν γάρ πως καὶ ἡμεῖς τέλος· διχῶς γὰρ τὸ οὐ ἔνεκα· εἴρηται δ’ ἐν τοῖς περὶ φιλοσοφίας). δύο [194b] δὲ αἱ ἄρχουσαι τῆς ὕλης καὶ γνωρίζουσαι τέχναι, ἡ τε χρωμένη καὶ τῆς ποιητικῆς ἡ ἀρχιτεκτονικῆς. διὸ καὶ ἡ χρωμένη ἀρχιτεκτονικὴ πως, διαφέρει δὲ ἥ ἡ μὲν τοῦ εἶδους γνωριστική, ἡ ἀρχιτεκτονικὴ, ἡ δὲ ὡς ποιητικὴ, τῆς ὕλης· ὁ μὲν γὰρ κυβερνήτης ποῖόν τι τὸ εἶδος τοῦ πηδαλίου γνωρίζει καὶ ἐπιτάττει, ὁ δ’ ἐκ ποίου ξύλου καὶ ποίων κινήσεων ἔσται. ἐν μὲν οὖν τοῖς κατὰ τέχνην ἡμεῖς ποιοῦμεν τὴν ὕλην τοῦ ἔργου ἔνεκα, ἐν δὲ τοῖς φυσικοῖς ὑπάρχει οὕσα.

ἔτι τῶν πρὸς τι ἡ ὕλη· ἄλλω γὰρ εἶδει ἄλλη ὕλη. μέχρι δὲ πόσου τὸν φυσικὸν δεῖ εἰδέναι τὸ εἶδος καὶ τὸ τί ἐστίν; ἢ ὥσπερ ἱατρὸν νεῦρον ἢ χαλκέα χαλκόν, μέχρι τοῦ τίνος [γὰρ] ἔνεκα ἕκαστον, καὶ περὶ ταῦτα ἃ ἐστὶ χωριστὰ μὲν εἶδει, ἐν ὕλῃ δέ; ἄνθρωπος γὰρ ἄνθρωπον γεννᾷ καὶ ἥλιος. πῶς δ’ ἔχει τὸ χωριστὸν καὶ τί ἐστὶ, φιλοσοφίας ἔργον διορίσαι τῆς πρώτης.

Κεφάλαιο 3

Διωρισμένων δὲ τούτων ἐπισκεπτέον περὶ τῶν αἰτίων, ποῖά τε καὶ πόσα τὸν ἀριθμὸν ἐστίν. ἐπεὶ γὰρ τοῦ εἰδέναι χάριν ἢ πραγματεία, εἰδέναι δὲ οὐ πρότερον οἰόμεθα ἕκαστον πρὶν ἂν λάβωμεν τὸ διὰ τί περὶ ἕκαστον (τοῦτο δ' ἐστὶ τὸ λαβεῖν τὴν πρώτην αἰτίαν), δηλὸν ὅτι καὶ ἡμῖν τοῦτο ποιητέον καὶ περὶ γενέσεως καὶ φθορᾶς καὶ πάσης τῆς φυσικῆς μεταβολῆς, ὅπως εἰδότες αὐτῶν τὰς ἀρχὰς ἀνάγειν εἰς αὐτὰς πειρώμεθα τῶν ζητουμένων ἕκαστον. ἓνα μὲν οὖν τρόπον αἴτιον λέγεται τὸ ἐξ οὗ γίνεταί τι ἐνυπάρχοντος, οἷον ὁ χαλκὸς τοῦ ἀνδριάντος καὶ ὁ ἄργυρος τῆς φιάλης καὶ τὰ τούτων γένη·

ἄλλον δὲ τὸ εἶδος καὶ τὸ παράδειγμα, τοῦτο δ' ἐστὶν ὁ λόγος ὁ τοῦ τί ἦν εἶναι καὶ τὰ τούτου γένη (οἷον τοῦ διὰ πασῶν τὰ δύο πρὸς ἓν, καὶ ὅλως ὁ ἀριθμὸς) καὶ τὰ μέρη τὰ ἐν τῷ λόγῳ.

ἔτι ὅθεν ἡ ἀρχὴ τῆς μεταβολῆς ἢ πρώτη ἢ τῆς ἡρεμίσσεως, οἷον ὁ βουλευσας αἴτιος, καὶ ὁ πατὴρ τοῦ τέκνου, καὶ ὅλως τὸ ποιοῦν τοῦ ποιουμένου καὶ τὸ μεταβάλλον τοῦ μεταβαλλομένου.

ἔτι ὡς τὸ τέλος· τοῦτο δ' ἐστὶν τὸ οὗ ἕνεκα, οἷον τοῦ περιπατεῖν ἢ ὑγίεια· διὰ τί γὰρ περιπατεῖ; φαμέν “ἵνα ὑγιαίνει”, καὶ εἰπόντες οὕτως οἰόμεθα ἀποδεδωκέναι τὸ αἴτιον. καὶ ὅσα δὴ κινήσαντος ἄλλου μεταξὺ γίνεταί τοῦ τέλους, οἷον τῆς ὑγείας ἢ ἰσχυασία ἢ ἡ [195a] κάθαρσις ἢ τὰ φάρμακα ἢ τὰ ὄργανα· πάντα γὰρ ταῦτα τοῦ τέλους ἕνεκά ἐστιν, διαφέρει δὲ ἀλλήλων ὡς ὄντα τὰ μὲν ἔργα τὰ δ' ὄργανα.

τὰ μὲν οὖν αἴτια σχεδὸν τοσαυταχῶς λέγεται,

συμβαίνει δὲ πολλαχῶς λεγομένων τῶν αἰτίων καὶ πολλὰ τοῦ αὐτοῦ αἴτια εἶναι, οὐ κατὰ συμβεβηκός, οἷον τοῦ ἀνδριάντος καὶ ἡ ἀνδριαντοποιικὴ καὶ ὁ χαλκός, οὐ καθ' ἑτερόν τι ἀλλ' ἢ ἀνδριάς, ἀλλ' οὐ τὸν αὐτὸν τρόπον, ἀλλὰ τὸ μὲν ὡς ὕλη τὸ δ' ὡς ὅθεν ἢ κίνησις. ἔστιν δέ τινα καὶ ἀλλήλων αἴτια, οἷον τὸ πονεῖν τῆς εὐεξίας καὶ αὕτη τοῦ πονεῖν· ἀλλ' οὐ τὸν αὐτὸν τρόπον, ἀλλὰ τὸ μὲν ὡς τέλος τὸ δ' ὡς ἀρχὴ κινήσεως. ἔτι δὲ τὸ αὐτὸ τῶν ἐναντίων ἐστίν· ὁ γὰρ παρὸν αἴτιον τοῦδε, τοῦτο καὶ ἀπὸν αἰτιώμεθα ἐνίστε τοῦ ἐναντίου, οἷον τὴν ἀπουσίαν τοῦ κυβερνήτου τῆς τοῦ πλοίου ἀνατροπῆς, οὗ ἦν ἡ παρουσία αἰτία τῆς σωτηρίας.

ἅπαντα δὲ τὰ νῦν εἰρημένα αἴτια εἰς τέτταρας πίπτει τρόπους τοὺς φανερωτάτους. τὰ μὲν γὰρ στοιχεῖα τῶν συλλαβῶν καὶ ἡ ὕλη τῶν

σκευαστῶν καὶ τὸ πῦρ καὶ τὰ τοιαῦτα τῶν σωμάτων καὶ τὰ μέρη τοῦ ὅλου καὶ αἱ ὑποθέσεις τοῦ συμπεράσματος ὥς τὸ ἐξ οὗ αἰτία ἐστίν, τούτων δὲ τὰ μὲν ὥς τὸ ὑποκείμενον, οἷον τὰ μέρη, τὰ δὲ ὥς τὸ τί ἦν εἶναι, τό τε ὅλον καὶ ἡ σύνθεσις καὶ τὸ εἶδος· τὸ δὲ σπέρμα καὶ ὁ ἰατρὸς καὶ ὁ βουλευσας καὶ ὅλως τὸ ποιοῦν, πάντα ὅθεν ἡ ἀρχὴ τῆς μεταβολῆς ἢ στάσεως [ἢ κινήσεως]· τὰ δ' ὥς τὸ τέλος καὶ τάγαθόν τῶν ἄλλων· τὸ γὰρ οὗ ἕνεκα βέλτιστον καὶ τέλος τῶν ἄλλων ἐθέλει εἶναι· διαφορετὸ δὲ μηδὲν εἰπεῖν αὐτὸ ἀγαθὸν ἢ φαινόμενον ἀγαθόν.

τὰ μὲν οὖν αἰτία ταῦτα καὶ τοσαῦτά ἐστι τῷ εἶδει·

τρόποι δὲ τῶν αἰτίων ἀριθμῷ μὲν εἰσὶ πολλοί, κεφαλαιούμενοι δὲ καὶ οὗτοι ἐλάττους. λέγεται γὰρ αἰτία πολλαχῶς, καὶ αὐτῶν τῶν ὁμοειδῶν προτέρως καὶ ὑστέρως ἄλλο ἄλλου, οἷον ὑγείας ἰατρὸς καὶ τεχνίτης, καὶ τοῦ διὰ πασῶν τὸ διπλάσιον καὶ ἀριθμός, καὶ ἀεὶ τὰ περιέχοντα πρὸς τὰ καθ' ἕκαστον. ἔτι δ' ὥς τὸ συμβεβηκὸς καὶ τὰ τούτων γένη, οἷον ἀνδριάντος ἄλλως Πολύκλειτος καὶ ἄλλως ἀνδριαντοποιός, ὅτι συμβέβηκε τῷ ἀνδριαντοποιῷ τὸ Πολυκλείτῳ εἶναι. καὶ τὰ περιέχοντα δὲ τὸ συμβεβηκός, οἷον εἰ ὁ ἄνθρωπος αἰτίος εἴη ἀνδριάντος ἢ [195b] ὅλως ζῶον. ἔστι δὲ καὶ τῶν συμβεβηκόντων ἄλλα ἄλλων πορρώτερον καὶ ἐγγύτερον, οἷον εἰ ὁ λευκὸς καὶ ὁ μουσικὸς αἰτίος λέγοιτο τοῦ ἀνδριάντος.

πάντα δὲ καὶ τὰ οἰκείως λεγόμενα καὶ τὰ κατὰ συμβεβηκὸς τὰ μὲν ὥς δυνάμενα λέγεται τὰ δ' ὥς ἐνεργοῦντα, οἷον τοῦ οἰκοδομεῖσθαι οἰκίαν οἰκοδόμος ἢ οἰκοδομῶν οἰκοδόμος.

ὁμοίως δὲ λεχθήσεται καὶ ἐφ' ὧν αἰτία τὰ αἰτία τοῖς εἰρημένοις, οἷον τουδὶ τοῦ ἀνδριάντος ἢ ἀνδριάντος ἢ ὅλως εἰκόνας, καὶ χαλκοῦ τουδε ἢ χαλκοῦ ἢ ὅλως ὕλης· καὶ ἐπὶ τῶν συμβεβηκόντων ὡσαύτως. ἔτι δὲ συμπλεκόμενα καὶ ταῦτα κάκεῖνα λεχθήσεται, οἷον οὐ Πολύκλειτος οὐδὲ ἀνδριαντοποιός, ἀλλὰ Πολύκλειτος ἀνδριαντοποιός. ἀλλ' ὅμως ἅπαντα ταῦτά ἐστι τὸ μὲν πληθὸς ἕξ, λεγόμενα δὲ διχῶς· ἢ γὰρ ὥς τὸ καθ' ἕκαστον, ἢ ὥς τὸ γένος, ἢ ὥς τὸ συμβεβηκός, ἢ ὥς τὸ γένος τοῦ συμβεβηκόντος, ἢ ὥς συμπλεκόμενα ταῦτα ἢ ὥς ἀπλῶς λεγόμενα· πάντα δὲ ἢ ἐνεργοῦντα ἢ κατὰ δύναμιν. διαφέρει δὲ τοσοῦτον, ὅτι τὰ μὲν ἐνεργοῦντα καὶ τὰ καθ' ἕκαστον ἅμα ἔστι καὶ οὐκ ἔστι καὶ ὧν αἰτία, οἷον ὅδ' ὁ ἰατρεύων τῷδε τῷ ὑγιαζομένῳ καὶ ὅδε ὁ οἰκοδομῶν τῷδε τῷ οἰκοδομουμένῳ, τὰ δὲ κατὰ δύναμιν οὐκ ἀεί. φθείρεται γὰρ οὐχ ἅμα ἢ οἰκία καὶ ὁ οἰκοδόμος.

δεῖ δ' αἰεὶ τὸ αἴτιον ἐκάστου τὸ ἀκρότατον ζητεῖν, ὥσπερ καὶ ἐπὶ τῶν ἄλλων (οἷον ἄνθρωπος οἰκοδομεῖ ὅτι οἰκοδόμος, ὁ δ' οἰκοδόμος κατὰ τὴν οἰκοδομικὴν· τοῦτο τοίνυν πρότερον τὸ αἴτιον, καὶ οὕτως ἐπὶ πάντων)· ἔτι τὰ μὲν γένη τῶν γενῶν, τὰ δὲ καθ' ἕκαστον τῶν καθ' ἕκαστον (οἷον ἀνδριαντοποιὸς μὲν ἀνδριάντος, ὁδὶ δὲ τουδί)· καὶ τὰς μὲν δυνάμεις τῶν δυνατῶν, τὰ δ' ἐνεργοῦντα πρὸς τὰ ἐνεργούμενα.

ὅσα μὲν οὖν τὰ αἴτια καὶ ὃν τρόπον αἴτια, ἔστω ἡμῖν διωρισμένα ἱκανῶς.

Κεφάλαιο 4

Λέγεται δὲ καὶ ἡ τύχη καὶ τὸ αὐτόματον τῶν αἰτίων, καὶ πολλὰ καὶ εἶναι καὶ γίνεσθαι διὰ τύχην καὶ διὰ τὸ αὐτόματον· τίνα οὖν τρόπον ἐν τούτοις ἐστὶ τοῖς αἰτίοις ἡ τύχη καὶ τὸ αὐτόματον, καὶ πότερον τὸ αὐτὸ ἡ τύχη καὶ τὸ αὐτόματον ἢ ἕτερον, καὶ ὅλως τί ἐστὶν ἡ τύχη καὶ τὸ αὐτόματον, ἐπισκεπτέον.

ἔνιοι γὰρ καὶ εἰ ἔστιν ἡ μὴ ἀποροῦσιν· [196a] οὐδὲν γὰρ δὴ γίνεσθαι ἀπὸ τύχης φασίν, ἀλλὰ πάντων εἶναι τι αἴτιον ὠρισμένον ὅσα λέγομεν ἀπὸ ταῦτομάτου γίνεσθαι ἡ τύχης, οἷον τοῦ ἐλθεῖν ἀπὸ τύχης εἰς τὴν ἀγοράν, καὶ καταλαβεῖν ὃν ἐβούλετο μὲν οὐκ ᾤετο δέ, αἴτιον τὸ βούλεσθαι ἀγοράσαι ἐλθόντα· ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων τῶν ἀπὸ τύχης λεγομένων ἀεὶ τι εἶναι λαβεῖν τὸ αἴτιον, ἀλλ’ οὐ τύχην, ἐπεὶ εἴ γέ τι ἦν ἡ τύχη, ἄτοπον ἂν φανείη ὥς ἀληθῶς, καὶ ἀπορήσειεν ἂν τις διὰ τί ποτ’ οὐδεὶς τῶν ἀρχαίων σοφῶν τὰ αἴτια περὶ γενέσεως καὶ φθορᾶς λέγων περὶ τύχης οὐδὲν διώρισεν, ἀλλ’ ὥς ἔοικεν, οὐδὲν ᾔοντο οὐδ’ ἐκεῖνοι εἶναι ἀπὸ τύχης. ἀλλὰ καὶ τοῦτο θαυμαστόν· πολλὰ γὰρ καὶ γίνεταί καὶ ἔστιν ἀπὸ τύχης καὶ ἀπὸ ταῦτομάτου, ἃ οὐκ ἀγνοοῦντες ὅτι ἔστιν ἐπανενεγκεῖν ἕκαστον ἐπὶ τι αἴτιον τῶν γιγνομένων, καθάπερ ὁ παλαιὸς λόγος εἶπεν ὁ ἀναιρῶν τὴν τύχην, ὅμως τούτων τὰ μὲν εἶναι φασὶ πάντες ἀπὸ τύχης τὰ δ’ οὐκ ἀπὸ τύχης· διὸ καὶ ἀμῶς γέ πως ἦν ποιητέον αὐτοῖς μνεῖαν. ἀλλὰ μὴν οὐδ’ ἐκείνων γέ τι ᾔοντο εἶναι τὴν τύχην, οἷον φιλίαν ἢ νεῖκος ἢ νοῦν ἢ πῦρ ἢ ἄλλο γέ τι τῶν τοιοῦτων. ἄτοπον οὖν εἴτε μὴ ὑπελάμβανον εἶναι εἴτε οἰόμενοι παρέλειπον, καὶ ταῦτ’ ἐνίστε χρώμενοι, ὥσπερ Ἐμπεδοκλῆς οὐκ ἀεὶ τὸν ἀέρα ἀνωτάτω ἀποκρίνεσθαι φησιν, ἀλλ’ ὅπως ἂν τύχη. λέγει γοῦν ἐν τῇ κοσμοποιίᾳ ὥς “οὕτω συνέκυρσε θεῶν τοτέ, πολλάκι δ’ ἄλλως”· καὶ τὰ μόρια τῶν ζώων ἀπὸ τύχης γενέσθαι τὰ πλεῖστά φησιν. εἰσὶ δὲ τινες οἱ καὶ τοῦρανοῦ τοῦδε καὶ τῶν κόσμων πάντων αἰτιῶνται τὸ αὐτόματον· ἀπὸ ταῦτομάτου γὰρ γενέσθαι τὴν δίνην καὶ τὴν κίνησιν τὴν διακρίνασαν καὶ καταστήσασαν εἰς ταύτην τὴν τάξιν τὸ πᾶν. καὶ μάλα τοῦτό γε αὐτὸ θαυμάσαι ἄξιον· λέγοντες γὰρ τὰ μὲν ζῶα καὶ τὰ φυτὰ ἀπὸ τύχης μήτε εἶναι μήτε γίνεσθαι, ἀλλ’ ἥτοι φύσιν ἢ νοῦν ἢ τι τοιοῦτον ἕτερον εἶναι τὸ αἴτιον (οὐ γὰρ ὅ τι ἔτυχεν ἐκ τοῦ σπέρματος ἐκάστου γίνεταί, ἀλλ’ ἐκ μὲν τοῦ τοιουδὶ ἐλαΐα ἐκ δὲ τοῦ

τοιουδι ἄνθρωπος), τὸν δ' οὐρανὸν καὶ τὰ θειότατα τῶν φανερῶν ἀπὸ τοῦ αὐτομάτου γενέσθαι, τοιαύτην δ' αἰτίαν μηδεμίαν εἶναι οἷαν τῶν ζώων καὶ τῶν φυτῶν. καίτοι εἰ οὕτως ἔχει, τοῦτ' αὐτὸ ἄξιον ἐπιστάσεως, καὶ καλῶς ἔχει λεχ[196b] θῆναί τι περὶ αὐτοῦ. πρὸς γὰρ τῷ καὶ ἄλλως ἄτοπον εἶναι τὸ λεγόμενον, ἔτι ἀτοπώτερον τὸ λέγειν ταῦτα ὀρῶντας ἐν μὲν τῷ οὐρανῷ οὐδὲν ἀπὸ ταυτομάτου γιγνόμενον, ἐν δὲ τοῖς οὐκ ἀπὸ τύχης πολλὰ συμβαίνοντα ἀπὸ τύχης· καίτοι εἰκὸς γε ἦν τοῦναντίον γίγνεσθαι.

εἰσὶ δὲ τινες οἷς δοκεῖ εἶναι μὲν αἰτία ἡ τύχη, ἄδηλος δὲ ἀνθρωπίνη διανοία ὥς θεῖόν τι οὔσα καὶ δαιμονιώτερον.

ὥστε σκεπτέον καὶ τί ἐκάτερον, καὶ εἰ ταῦτὸν ἢ ἕτερον τό τε αὐτόματον καὶ ἡ τύχη, καὶ πῶς εἰς τὰ διωρισμένα αἴτια ἐμπίπτουσιν.

Κεφάλαιο 5

Πρῶτον μὲν οὖν, ἐπειδὴ ὁρῶμεν τὰ μὲν ἀεὶ ὡσαύτως γιγνόμενα τὰ δὲ ὡς ἐπὶ τὸ πολὺ, φανερόν ὅτι οὐδετέρου τούτων αἰτία ἡ τύχη λέγεται οὐδὲ τὸ ἀπὸ τύχης, οὔτε τοῦ ἐξ ἀνάγκης καὶ αἰεὶ οὔτε τοῦ ὡς ἐπὶ τὸ πολὺ. ἀλλ' ἐπειδὴ ἔστιν ἃ γίγνεται καὶ παρὰ ταῦτα, καὶ ταῦτα πάντες φασὶν εἶναι ἀπὸ τύχης, φανερόν ὅτι ἔστι τι ἡ τύχη καὶ τὸ αὐτόματον· τὰ τε γὰρ τοιαῦτα ἀπὸ τύχης καὶ τὰ ἀπὸ τύχης τοιαῦτα ὄντα ἴσμεν.

τῶν δὲ γιγνομένων τὰ μὲν ἕνεκά του γίγνεται τὰ δ' οὐ (τούτων δὲ τὰ μὲν κατὰ προαίρεσιν, τὰ δ' οὐ κατὰ προαίρεσιν, ἄμφω δ' ἐν τοῖς ἕνεκά του), ὥστε δηλὸν ὅτι καὶ ἐν τοῖς παρὰ τὸ ἀναγκαῖον καὶ τὸ ὡς ἐπὶ τὸ πολὺ ἔστιν ἓνια περὶ ἃ ἐνδέχεται ὑπάρχειν τὸ ἕνεκά του. ἔστι δ' ἕνεκά του ὅσα τε ἀπὸ διανοίας ἂνπραχθεῖη καὶ ὅσα ἀπὸ φύσεως. τὰ δὴ τοιαῦτα ὅταν κατὰ συμβεβηκὸς γένηται, ἀπὸ τύχης φασὶν εἶναι (ὥσπερ γὰρ καὶ ὃν ἔστι τὸ μὲν καθ' αὐτὸ τὸ δὲ κατὰ συμβεβηκός, οὕτω καὶ αἴτιον ἐνδέχεται εἶναι, οἷον οἰκίας καθ' αὐτὸ μὲν αἴτιον τὸ οἰκοδομικόν, κατὰ συμβεβηκὸς δὲ τὸ λευκὸν ἢ τὸ μουσικόν· τὸ μὲν οὖν καθ' αὐτὸ αἴτιον ὠρισμένον, τὸ δὲ κατὰ συμβεβηκὸς ἀόριστον· ἄπειρα γὰρ ἂν τῷ ἐνὶ συμβαίῃ). καθάπερ οὖν ἐλέχθη, ὅταν ἐν τοῖς ἕνεκά του γιγνομένοις τοῦτο γένηται, τότε λέγεται ἀπὸ ταῦτοματου καὶ ἀπὸ τύχης (αὐτῶν δὲ πρὸς ἄλληλα τὴν διαφορὰν τούτων ὕστερον διοριστέον· νῦν δὲ τοῦτο ἔστω φανερόν, ὅτι ἄμφω ἐν τοῖς ἕνεκά του ἔστιν).

οἷον ἕνεκα τοῦ ἀπολαβεῖν τὸ ἀργύριον ἦλθεν ἂν κομιζομένου τὸν ἔρανον, εἰ ἦδει· ἦλθε δ' οὐ τούτου ἕνεκα, ἀλλὰ συνέβη αὐτῷ ἐλθεῖν, καὶ ποιῆσαι τοῦτο τοῦ κομίσασθαι ἕνεκα· τοῦτο δὲ οὐθ' ὡς ἐπὶ τὸ πολὺ φοιτῶν εἰς τὸ [197a] χωρίον οὐτ' ἐξ ἀνάγκης· ἔστι δὲ τὸ τέλος, ἢ κομιδὴ, οὐ τῶν ἐν αὐτῷ αἰτίων, ἀλλὰ τῶν προαιρετῶν καὶ ἀπὸ διανοίας· καὶ λέγεται γε τότε ἀπὸ τύχης ἐλθεῖν, εἰ δὲ προελόμενος καὶ τούτου ἕνεκα ἢ ἀεὶ φοιτῶν ἢ ὡς ἐπὶ τὸ πολὺ [κομιζόμενος], οὐκ ἀπὸ τύχης.

δηλὸν ἄρα ὅτι ἡ τύχη αἰτία κατὰ συμβεβηκὸς ἐν τοῖς κατὰ προαίρεσιν τῶν ἕνεκά του. διὸ περὶ τὸ αὐτὸ διάνοια καὶ τύχη· ἡ γὰρ προαίρεσις οὐκ ἄνευ διανοίας.

ἀόριστα μὲν οὖν τὰ αἴτια ἀνάγκη εἶναι ἀφ' ὧν ἂν γένοιτο τὸ ἀπὸ

τύχης. ὅθεν καὶ ἡ τύχη τοῦ ἀορίστου εἶναι δοκεῖ καὶ ἄδηλος ἀνθρώπῳ, καὶ ἔστιν ὥς οὐδὲν ἀπὸ τύχης δόξειεν ἂν γίνεσθαι. πάντα γὰρ ταῦτα ὀρθῶς λέγεται, εὐλόγως. ἔστιν μὲν γὰρ ὥς γίγνεται ἀπὸ τύχης· κατὰ συμβεβηκὸς γὰρ γίγνεται, καὶ ἔστιν αἴτιον ὥς συμβεβηκὸς ἡ τύχη· ὥς δ' ἀπλῶς οὐδενός· οἷον οἰκίας οἰκοδόμος μὲν αἴτιος, κατὰ συμβεβηκὸς δὲ ἀύλητης,

καὶ τοῦ ἐλθόντα κομίσασθαι τὸ ἀργύριον, μὴ τούτου ἔνεκα ἐλθόντα, ἄπειρα τὸ πλῆθος· καὶ γὰρ ἰδεῖν τινὰ βουλόμενος καὶ διώκων καὶ φεύγων καὶ θεασόμενος. καὶ τὸ φάναι εἶναί τι παράλογον τὴν τύχην ὀρθῶς· ὁ γὰρ λόγος ἢ τῶν ἀεὶ ὄντων ἢ τῶν ὥς ἐπὶ τὸ πολὺ, ἢ δὲ τύχη ἐν τοῖς γιγνομένοις παρὰ ταῦτα. ὥστ' ἐπεὶ ἀόριστα τὰ οὕτως αἴτια, καὶ ἡ τύχη ἀόριστον. ὅμως δ' ἐπ' ἐνίων ἀπορήσειεν ἂν τις, ἄρ' οὖν τὰ τυχόντα αἴτι' ἂν γένοιτο τῆς τύχης· οἷον ὑγιείας ἢ πνεῦμα ἢ εἴλησις, ἀλλ' οὐ τὸ ἀποκεκάρθαι· ἔστιν γὰρ ἄλλα ἄλλων ἐγγύτερα τῶν κατὰ συμβεβηκὸς αἰτίων.

τύχη δὲ ἀγαθὴ μὲν λέγεται ὅταν ἀγαθὸν τι ἀποβῇ, φαύλη δὲ ὅταν φαῦλόν τι, εὐτυχία δὲ καὶ δυστυχία ὅταν μέγεθος ἔχοντα ταῦτα· διὸ καὶ τὸ παρὰ μικρὸν κακὸν ἢ ἀγαθὸν λαβεῖν μέγα ἢ εὐτυχεῖν ἢ ἀτυχεῖν ἐστίν, ὅτι ὥς ὑπάρχον λέγει ἡ διάνοια· τὸ γὰρ παρὰ μικρὸν ὥσπερ οὐδὲν ἀπέχειν δοκεῖ. ἔτι ἀβέβαιον ἢ εὐτυχία εὐλόγως· ἡ γὰρ τύχη ἀβέβαιος· οὔτε γὰρ ἀεὶ οὕθ' ὥς ἐπὶ τὸ πολὺ οἷόν τ' εἶναι τῶν ἀπὸ τύχης οὐθέν.

ἔστι μὲν οὖν ἄμφω αἴτια, καθάπερ εἴρηται, κατὰ συμβεβηκός-καὶ ἡ τύχη καὶ τὸ αὐτόματον-ἐν τοῖς ἐνδεχομένοις γίνεσθαι μὴ ἀπλῶς μηδ' ὥς ἐπὶ τὸ πολὺ, καὶ τούτων ὅς' ἂν γένοιτο ἔνεκά του.

Κεφάλαιο 6

Διαφέρει δ' ὅτι τὸ αὐτόματον ἐπὶ πλεῖον ἐστὶ· τὸ μὲν γὰρ ἀπὸ τύχης πᾶν ἀπὸ ταυτομάτου, τοῦτο δ' οὐ πᾶν [197b] ἀπὸ τύχης.

ἡ μὲν γὰρ τύχη καὶ τὸ ἀπὸ τύχης ἐστὶν ὅσοις καὶ τὸ εὐτυχῆσαι ἂν ὑπάρξειεν καὶ ὅλως πρᾶξις. διὸ καὶ ἀνάγκη περὶ τὰ πρακτὰ εἶναι τὴν τύχην (σημεῖον δ' ὅτι δοκεῖ ἥτοι ταῦτόν εἶναι τῇ εὐδαιμονίᾳ ἢ εὐτυχίᾳ ἢ ἐγγύς, ἢ δ' εὐδαιμονία πρᾶξις τις· εὐπραξία γάρ), ὥσθ' ὁπόσοις μὴ ἐνδέχεται πρᾶξαι, οὐδὲ τὸ ἀπὸ τύχης τι ποιῆσαι. καὶ διὰ τοῦτο οὔτε ἄνυχον οὐδὲν οὔτε θηρίον οὔτε παιδίον οὐδὲν ποιεῖ ἀπὸ τύχης, ὅτι οὐκ ἔχει προαίρεσιν· οὐδ' εὐτυχία οὐδ' ἀτυχία ὑπάρχει τούτοις, εἰ μὴ καθ' ὁμοιότητα, ὥσπερ ἔφη Πρώταρχος εὐτυχεῖς εἶναι τοὺς λίθους ἐξ ὧν οἱ βωμοί, ὅτι τιμῶνται, οἱ δὲ ὁμόζυγες αὐτῶν καταπατοῦνται. τὸ δὲ ἀσχεῖν ἀπὸ τύχης ὑπάρξει πως καὶ τούτοις, ὅταν ὁ πράττων τι περὶ αὐτὰ πράξῃ ἀπὸ τύχης, ἄλλως δὲ οὐκ ἔστιν·

τὸ δ' αὐτόματον καὶ τοῖς ἄλλοις ζώοις καὶ πολλοῖς τῶν ἀνύχων, οἷον ὁ ἵππος αὐτόματος, φαμέν, ἦλθεν, ὅτι ἐσώθη μὲν ἐλθὼν, οὐ τοῦ σωθῆναι δὲ ἔνεκα ἦλθε· καὶ ὁ τρίπους αὐτόματος κατέπεσεν· ἔστι μὲν γὰρ τοῦ καθῆσθαι ἔνεκα, ἀλλ' οὐ τοῦ καθῆσθαι ἔνεκα κατέπεσεν.

ὥστε φανερόν ὅτι ἐν τοῖς ἀπλῶς ἔνεκά του γιγνομένοις, ὅταν μὴ τοῦ συμβάντος ἔνεκα γένηται ὧν ἔξω τὸ αἴτιον, τότε ἀπὸ τοῦ αὐτομάτου λέγομεν· ἀπὸ τύχης δέ, τούτων ὅσα ἀπὸ τοῦ αὐτομάτου γίγνεται τῶν προαιρετῶν τοῖς ἔχουσι προαίρεσιν. σημεῖον δὲ τὸ μάτην, ὅτι λέγεται ὅταν μὴ γένηται τὸ ἔνεκα ἄλλου ἐκείνου ἔνεκα, οἷον εἰ τὸ βαδίσαι λαπάξεως ἔνεκά ἐστιν, εἰ δὲ μὴ ἐγένετο βαδίσαντι, μάτην φαμέν βαδίσαι καὶ ἡ βάδις ματαία, ὡς τοῦτο ὂν τὸ μάτην, τὸ πεφυκὸς ἄλλου ἔνεκα, ὅταν μὴ περαίνει ἐκεῖνο οὗ ἔνεκα ἦν καὶ ἐπεφύκει, ἐπεὶ εἴ τις λούσασθαι φαίη μάτην ὅτι οὐκ ἐξέλειπεν ὁ ἥλιος, γελοῖος ἂν εἴη· οὐ γὰρ ἦν τοῦτο ἐκείνου ἔνεκα. οὕτω δὴ τὸ αὐτόματον καὶ κατὰ τὸ ὄνομα ὅταν αὐτὸ μάτην γένηται· κατέπεσεν γὰρ οὐ τοῦ πατάξαι ἔνεκεν ὁ λίθος· ἀπὸ τοῦ αὐτομάτου ἄρα κατέπεσεν ὁ λίθος, ὅτι πέσοι ἂν ὑπὸ τινὸς καὶ τοῦ πατάξαι ἔνεκα. μάλιστα δ' ἐστὶ χωριζόμενον τοῦ ἀπὸ τύχης ἐν τοῖς φύσει γιγνομένοις· ὅταν γὰρ γένηται τι παρὰ φύσιν, τότε οὐκ ἀπὸ τύχης ἀλλὰ μᾶλλον ἀπὸ ταυτομάτου γεγονέναι φαμέν. ἔστι δὲ καὶ τοῦτο

ἕτερον· τοῦ μὲν γὰρ ἔξω τὸ αἷτιον, τοῦ δ' ἐντός. [198a]

τί μὲν οὖν ἐστὶν τὸ αὐτόματον καὶ τί ἡ τύχη, εἴρηται, καὶ τί διαφέρουσιν ἀλλήλων. τῶν δὲ τρόπων τῆς αἰτίας ἐν τοῖς ὅθεν ἡ ἀρχὴ τῆς κινήσεως ἐκάτερον αὐτῶν· ἢ γὰρ τῶν φύσει τι ἢ τῶν ἀπὸ διανοίας αἰτίων ἀεὶ ἐστὶν· ἀλλὰ τούτων τὸ πληθὸς ἀόριστον.

ἐπεὶ δ' ἐστὶ τὸ αὐτόματον καὶ ἡ τύχη αἷτια ὧν ἂν ἡ νοῦς γένοιτο αἷτιος ἢ φύσις, ὅταν κατὰ συμβεβηκὸς αἷτιόν τι γένηται τούτων αὐτῶν, οὐδὲν δὲ κατὰ συμβεβηκὸς ἐστὶ πρότερον τῶν καθ' αὐτό, δῆλον ὅτι οὐδὲ τὸ κατὰ συμβεβηκὸς αἷτιον πρότερον τοῦ καθ' αὐτό. ὕστερον ἄρα τὸ αὐτόματον καὶ ἡ τύχη καὶ νοῦ καὶ φύσεως· ὥστ' εἰ ὅτι μάλιστα τοῦ οὐρανοῦ αἷτιον τὸ αὐτόματον, ἀνάγκη πρότερον νοῦν αἷτιον καὶ φύσιν εἶναι καὶ ἄλλων πολλῶν καὶ τοῦδε τοῦ παντός.

Κεφάλαιο 7

Ὅτι δὲ ἔστιν αἷτια, καὶ ὅτι τοσαῦτα τὸν ἀριθμὸν ὅσα φαμέν, δῆλον· τοσαῦτα γὰρ τὸν ἀριθμὸν τὸ διὰ τί περιεῖληφεν· ἡ γὰρ εἰς τὸ τί ἐστὶν ἀνάγεται τὸ διὰ τί ἔσχατον, ἐν τοῖς ἀκινήτοις (οἷον ἐν τοῖς μαθήμασιν· εἰς ὀρισμὸν γὰρ τοῦ εὐθέος ἢ συμμέτρου ἢ ἄλλου τινὸς ἀνάγεται ἔσχατον), ἡ εἰς τὸ κινήσαν πρῶτον (οἷον διὰ τί ἐπολέμησαν; ὅτι ἐσύλησαν), ἡ τίνος ἔνεκα (ἵνα ἄρξωσιν), ἡ ἐν τοῖς γιγνομένοις ἢ ὕλῃ. ὅτι μὲν οὖν τὰ αἷτια ταῦτα καὶ τοσαῦτα, φανερόν·

ἐπεὶ δ' αἱ αἷτιαί τέτταρες, περὶ πασῶν τοῦ φυσικοῦ εἰδέναι, καὶ εἰς πάσας ἀνάγων τὸ διὰ τί ἀποδώσει φυσικῶς, τὴν ὕλην, τὸ εἶδος, τὸ κινήσαν, τὸ οὐ ἔνεκα. ἔρχεται δὲ τὰ τρία εἰς [τὸ] ἐν πολλάκις· τὸ μὲν γὰρ τί ἐστὶ καὶ τὸ οὐ ἔνεκα ἓν ἐστὶ, τὸ δ' ὅθεν ἢ κίνησις πρῶτον τῷ εἶδει ταὐτὸ τούτοις· ἄνθρωπος γὰρ ἄνθρωπον γεννᾷ-καὶ ὅλως ὅσα κινούμενα κινεῖ (ὅσα δὲ μὴ, οὐκέτι φυσικῆς· οὐ γὰρ ἐν αὐτοῖς ἔχοντα κίνησιν οὐδ' ἀρχὴν κινήσεως κινεῖ, ἀλλ' ἀκίνητα ὄντα· διὸ τρεῖς αἱ πραγματεῖαι, ἡ μὲν περὶ ἀκινήτων, ἡ δὲ περὶ κινουμένων μὲν ἀφθάρτων δέ, ἡ δὲ περὶ τὰ φθαρτά).

ὥστε τὸ διὰ τί καὶ εἰς τὴν ὕλην ἀνάγοντι ἀποδίδονται, καὶ εἰς τὸ τί ἐστὶν, καὶ εἰς τὸ πρῶτον κινήσαν. περὶ γενέσεως γὰρ μάλιστα τοῦτον τὸν τρόπον τὰς αἰτίας σκοποῦσι, τί μετὰ τί γίνεταί, καὶ τί πρῶτον ἐποίησεν ἢ τί ἔπαθεν, καὶ οὕτως αἰεὶ τὸ ἐφεξῆς.

διτταὶ δὲ αἱ ἀρχαὶ αἱ κινούσαι φυσικῶς, ὧν ἡ ἑτέρα οὐ φυσική· οὐ [198b] γὰρ ἔχει κινήσεως ἀρχὴν ἐν αὐτῇ. τοιοῦτον δ' ἐστὶν εἴ τι κινεῖ μὴ κινούμενον, ὥσπερ τό τε παντελῶς ἀκίνητον καὶ [τὸ] πάντων πρῶτον καὶ τὸ τί ἐστὶν καὶ ἡ μορφή· τέλος γὰρ καὶ οὐ ἔνεκα· ὥστε ἐπεὶ ἡ φύσις ἔνεκά του, καὶ ταύτην εἰδέναι δεῖ, καὶ πάντως ἀποδοτέον τὸ διὰ τί, οἷον ὅτι ἐκ τοῦδε ἀνάγκη τόδε (τὸ δὲ ἐκ τοῦδε ἢ ἀπλῶς ἢ ὥς ἐπὶ τὸ πολὺ), καὶ εἰ μέλλει τοδὶ ἔσεσθαι (ὥσπερ ἐκ τῶν προτάσεων τὸ συμπέρασμα), καὶ ὅτι τοῦτ' ἦν τὸ τί ἦν εἶναι, καὶ διότι βέλτιον οὕτως, οὐχ ἀπλῶς, ἀλλὰ τὸ πρὸς τὴν ἐκάστου οὐσίαν.

Κεφάλαιο 8

Λεκτέον δὴ πρῶτον μὲν διότι ἡ φύσις τῶν ἔνεκά του αἰτίων, ἔπειτα περὶ τοῦ ἀναγκαίου, πῶς ἔχει ἐν τοῖς φυσικοῖς· εἰς γὰρ ταύτην τὴν αἰτίαν ἀνάγουσι πάντες, ὅτι ἐπειδὴ τὸ θερμὸν τοιονδὶ πέφυκεν καὶ τὸ ψυχρὸν καὶ ἕκαστον δὴ τῶν τοιούτων, ταδὶ ἐξ ἀνάγκης ἐστὶ καὶ γίνεται· καὶ γὰρ ἐὰν ἄλλην αἰτίαν εἴπωσιν, ὅσον ἀψάμενοι χαίρειν ἐῷσιν, ὁ μὲν τὴν φιλίαν καὶ τὸ νεῖκος, ὁ δὲ τὸν νοῦν·

ἔχει δ' ἀπορίαν τί κωλύει τὴν φύσιν μὴ ἔνεκά του ποιεῖν μὴδ' ὅτι βέλτιον, ἀλλ' ὥσπερ ὕει ὁ Ζεὺς οὐχ ὅπως τὸν σῖτον αὐξήσῃ, ἀλλ' ἐξ ἀνάγκης (τὸ γὰρ ἀναχθὲν ψυχθῆναι δεῖ, καὶ τὸ ψυχθὲν ὕδωρ γενόμενον κατελθεῖν· τὸ δ' αὐξάνεσθαι τούτου γενομένου τὸν σῖτον συμβαίνει), ὁμοίως δὲ καὶ εἴ τῳ ἀπόλλυται ὁ σῖτος ἐν τῇ ἄλῳ, οὐ τούτου ἔνεκα ὕει ὅπως ἀπόληται, ἀλλὰ τοῦτο συμβέβηκεν· ὥστε τί κωλύει οὕτω καὶ τὰ μέρη ἔχειν ἐν τῇ φύσει, οἷον τοὺς ὀδόντας ἐξ ἀνάγκης ἀνατεῖλαι τοὺς μὲν ἐμπροσθίους ὀξεῖς, ἐπιτηδεῖους πρὸς τὸ διαιρεῖν, τοὺς δὲ γομφίους πλατεῖς καὶ χρησίμους πρὸς τὸ λεαίνειν τὴν τροφήν, ἐπεὶ οὐ τούτου ἔνεκα γενέσθαι, ἀλλὰ συμπεσεῖν· ὁμοίως δὲ καὶ περὶ τῶν ἄλλων μερῶν, ἐν ὅσοις δοκεῖ ὑπάρχειν τὸ ἔνεκά του. ὅπου μὲν οὖν ἅπαντα συνέβη ὥσπερ κἂν εἰ ἔνεκά του ἐγίγνετο, ταῦτα μὲν ἐσώθη ἀπὸ τοῦ αὐτομάτου συστάντα ἐπιτηδεῖως· ὅσα δὲ μὴ οὕτως, ἀπώλετο καὶ ἀπόλλυται, καθάπερ Ἐμπεδοκλῆς λέγει τὰ βουγενῇ ἀνδρόπρωρα.

ὁ μὲν οὖν λόγος, ὃ ἂν τις ἀπορήσειεν, οὗτος, καὶ εἴ τις ἄλλος τοιοῦτός ἐστιν· ἀδύνατον δὲ τοῦτον ἔχειν τὸν τρόπον. ταῦτα μὲν γὰρ καὶ πάντα τὰ φύσει ἢ αἰεὶ οὕτω γίνεται ἢ ὥς ἐπὶ τὸ πολὺ, τῶν δ' ἀπὸ τύχης καὶ τοῦ αὐτομάτου οὐδέν. οὐ [199a] γὰρ ἀπὸ τύχης οὐδ' ἀπὸ συμπτώματος δοκεῖ ὕειν πολλάκις τοῦ χειμῶνος, ἀλλ' ἐὰν ὑπὸ κύνα· οὐδὲ καύματα ὑπὸ κύνα, ἀλλ' ἂν χειμῶνος. εἰ οὖν ἢ ἀπὸ συμπτώματος δοκεῖ ἢ ἔνεκά του εἶναι, εἰ μὴ οἷόν τε ταῦτ' εἶναι μήτε ἀπὸ συμπτώματος μήτ' ἀπὸ ταυτομάτου, ἔνεκά του ἂν εἴη. ἀλλὰ μὴν φύσει γ' ἐστὶ τὰ τοιαῦτα πάντα, ὥς κἂν αὐτοὶ φαῖεν οἱ ταῦτα λέγοντες. ἔστιν ἄρα τὸ ἔνεκά του ἐν τοῖς φύσει γιγνομένοις καὶ οὖσιν.

ἔτι ἐν ὅσοις τέλος ἔστι τι, τούτου ἔνεκα πράττεται τὸ πρότερον καὶ τὸ ἐφεξῆς. οὐκοῦν ὥς πράττεται, οὕτω πέφυκε, καὶ ὥς πέφυκεν,

οὕτω πράττεται ἕκαστον, ἂν μή τι ἐμποδίζῃ. πράττεται δ' ἕνεκά του· καὶ πέφυκεν ἄρα ἕνεκά του. οἷον εἰ οἰκία τῶν φύσει γιγνομένων ἦν, οὕτως ἂν ἐγίγνετο ὡς νῦν ὑπὸ τῆς τέχνης· εἰ δὲ τὰ φύσει μὴ μόνον φύσει ἀλλὰ καὶ τέχνῃ γίγνοιτο, ὡσαύτως ἂν γίγνοιτο ἢ πέφυκεν. ἕνεκα ἄρα θατέρου θάτερον. ὅλως δὲ ἡ τέχνη τὰ μὲν ἐπιτελεῖ ἃ ἡ φύσις ἀδυνατεῖ ἀπεργάσασθαι, τὰ δὲ μιμεῖται. εἰ οὖν τὰ κατὰ τέχνην ἕνεκά του, δῆλον ὅτι καὶ τὰ κατὰ φύσιν· ὁμοίως γὰρ ἔχει πρὸς ἄλληλα ἐν τοῖς κατὰ τέχνην καὶ ἐν τοῖς κατὰ φύσιν τὰ ὕστερα πρὸς τὰ πρότερα. μάλιστα δὲ φανερόν ἐπὶ τῶν ζώων τῶν ἄλλων, ἃ οὔτε τέχνῃ οὔτε ζητήσαντα οὔτε βουλευσάμενα ποιεῖ· ὅθεν διαποροῦσί τινες πότερον νῶ ἢ τινι ἄλλῳ ἐργάζονται οἳ τ' ἀράχνη καὶ οἱ μύρμηκες καὶ τὰ τοιαῦτα. κατὰ μικρόν δ' οὕτω προϊόντι καὶ ἐν τοῖς φυτοῖς φαίνεται τὰ συμφέροντα γιγνόμενα πρὸς τὸ τέλος, οἷον τὰ φύλλα τῆς τοῦ καρποῦ ἕνεκα σκέπης. ὥστ' εἰ φύσει τε ποιεῖ καὶ ἕνεκά του ἡ χελιδὼν τὴν νεοττιὰν καὶ ὁ ἀράχνης τὸ ἀράχνιον, καὶ τὰ φυτὰ τὰ φύλλα ἕνεκα τῶν καρπῶν καὶ τὰς ρίζας οὐκ ἄνω ἀλλὰ κάτω τῆς τροφῆς, φανερόν ὅτι ἔστιν ἡ αἰτία ἡ τοιαύτη ἐν τοῖς φύσει γιγνομένοις καὶ οὖσιν. καὶ ἐπεὶ ἡ φύσις διττή, ἡ μὲν ὡς ὕλη ἡ δ' ὡς μορφή, τέλος δ' αὕτη, τοῦ τέλους δὲ ἕνεκα τᾶλλα, αὕτη ἂν εἴη ἡ αἰτία, ἡ οὗ ἕνεκα. ἀμαρτία δὲ γίγνεται καὶ ἐν τοῖς κατὰ τέχνην (ἔγραψε γὰρ οὐκ ὀρθῶς ὁ γραμματικός, καὶ ἐπότισεν [οὐκ ὀρθῶς] ὁ ἱατρὸς τὸ φάρμακον), ὥστε δῆλον ὅτι ἐνδέχεται καὶ ἐν τοῖς κατὰ [199b] φύσιν. εἰ δὴ ἔστιν ἓνα κατὰ τέχνην ἐν οἷς τὸ ὀρθῶς ἕνεκά του, ἐν δὲ τοῖς ἀμαρτανομένοις ἕνεκα μὲν τινος ἐπιχειρεῖται ἀλλ' ἀποτυγχάνεται, ὁμοίως ἂν ἔχοι καὶ ἐν τοῖς φυσικοῖς, καὶ τὰ τέρατα ἀμαρτήματα ἐκείνου τοῦ ἕνεκά του. καὶ ἐν ταῖς ἐξ ἀρχῆς ἄρα συστάσεσι τὰ βουγενῆ, εἰ μὴ πρὸς τινὰ ὅρον καὶ τέλος δυνατὰ ἦν ἐλθεῖν, διαφθειρομένης ἂν ἀρχῆς τινὸς ἐγίγνετο, ὥσπερ νῦν τοῦ σπέρματος.

ἔτι ἀνάγκη σπέρμα γενέσθαι πρῶτον, ἀλλὰ μὴ εὐθὺς τὰ ζῶα· καὶ τὸ “οὐλοφυνὲς μὲν πρῶτα” σπέρμα ἦν.

ἔτι καὶ ἐν τοῖς φυτοῖς ἔνεστι τὸ ἕνεκά του, ἥττον δὲ διήρθρωται· πότερον οὖν καὶ ἐν τοῖς φυτοῖς ἐγίγνετο, ὥσπερ τὰ βουγενῆ ἀνδρόπρωρα, οὕτω καὶ ἀμπελογενῆ ἐλαιόπρωρα, ἢ οὐ; ἀτοπον γάρ· ἀλλὰ μὴν ἔδει γε, εἴπερ καὶ ἐν τοῖς ζώοις.

ἔτι ἔδει καὶ ἐν τοῖς σπέρμασι γίγνεσθαι ὅπως ἔτυχεν· ὅλως δ' ἀναιρεῖ ὁ οὕτως λέγων τὰ φύσει τε καὶ φύσιν· φύσει γάρ, ὅσα ἀπό

τινος ἐν αὐτοῖς ἀρχῇς συνεχῶς κινούμενα ἀφικνεῖται εἰς τι τέλος· ἀφ' ἐκάστης δὲ οὐ τὸ αὐτὸ ἐκάστοις οὐδὲ τὸ τυχόν, ἀεὶ μέντοι ἐπὶ τὸ αὐτό, ἂν μὴ τι ἐμποδίσῃ.

τὸ δὲ οὗ ἔνεκα, καὶ ὃ τούτου ἔνεκα, γένοιτο ἂν καὶ ἀπὸ τύχης, οἷον λέγομεν ὅτι ἀπὸ τύχης ἦλθεν ὁ ξένος καὶ λυ σάμενος ἀπῆλθεν, ὅταν ὥσπερ ἔνεκα τούτου ἐλθὼν πράξῃ, μὴ ἔνεκα δὲ τούτου ἔλθῃ. καὶ τοῦτο κατὰ συμβεβηκός (ἢ γὰρ τύχη τῶν κατὰ συμβεβηκός αἰτίων, καθάπερ καὶ πρότερον εἵπομεν), ἀλλ' ὅταν τοῦτο αἰεὶ ἢ ὡς ἐπὶ τὸ πολὺ γένηται, οὐ συμβεβηκός οὐδ' ἀπὸ τύχης· ἐν δὲ τοῖς φυσι κοῖς ἀεὶ οὕτως, ἂν μὴ τι ἐμποδίσῃ.

ἄτοπον δὲ τὸ μὴ οἶεσθαι ἔνεκά του γίγνεσθαι, ἐὰν μὴ ἴδωσι τὸ κινεῖν βουλευσάμενον. καίτοι καὶ ἡ τέχνη οὐ βουλεύεται· καὶ εἰ ἐνῆν ἐν τῷ ξύλῳ ἡ ναυπηγική, ὁμοίως ἂν τῇ φύσει ἐποίει· ὥστ' εἰ ἐν τῇ τέχνῃ ἔνεστι τὸ ἔνεκά του, καὶ ἐν τῇ φύσει. μάλιστα δὲ δῆλον, ὅταν τις ἱατρεύῃ αὐτὸς ἑαυτόν· τούτῳ γὰρ ἔοικεν ἡ φύσις. ὅτι μὲν οὖν αἰτία ἡ φύσις, καὶ οὕτως ὡς ἔνεκά του, φανερόν.

Κεφάλαιο 9

Τὸ δ' ἐξ ἀνάγκης πότερον ἐξ ὑποθέσεως ὑπάρχει ἢ καὶ ἀπλῶς; νῦν μὲν γὰρ οἴονται τὸ ἐξ ἀνάγκης εἶναι [200a] ἐν τῇ γενέσει ὥσπερ ἂν εἴ τις τὸν τοῖχον ἐξ ἀνάγκης γεγενῆσθαι νομίζοι, ὅτι τὰ μὲν βαρέα κάτω πέφυκε φέρεσθαι τὰ δὲ κοῦφα ἐπιπολῆς, διὸ οἱ λίθοι μὲν κάτω καὶ τὰ θεμέλια, ἡ δὲ γῆ ἄνω διὰ κουφότητα, ἐπιπολῆς δὲ μάλιστα τὰ ξύλα· κουφότατα γάρ. ἀλλ' ὅμως οὐκ ἄνευ μὲν τούτων γέγονεν, οὐ μέντοι διὰ ταῦτα πλὴν ὥς δι' ὕλην, ἀλλ' ἔνεκα τοῦ κρύπτειν ἅττα καὶ σώζειν. ὁμοίως δὲ καὶ ἐν τοῖς ἄλλοις πᾶσιν, ἐν ὅσοις τὸ ἔνεκά του ἔστιν, οὐκ ἄνευ μὲν τῶν ἀναγκαῖαν ἐχόντων τὴν φύσιν, οὐ μέντοι γε διὰ ταῦτα ἀλλ' ἢ ὥς ὕλην, ἀλλ' ἔνεκά του, οἷον διὰ τί ὁ πρίων τοιοσδί; ὅπως τοδί καὶ ἔνεκα τουδί. τοῦτο μέντοι τὸ οὗ ἔνεκα ἀδύνατον γενέσθαι, ἂν μὴ σιδηροῦς ἦ· ἀνάγκη ἄρα σιδηροῦν εἶναι, εἰ πρίων ἔσται καὶ τὸ ἔργον αὐτοῦ. ἐξ ὑποθέσεως δὴ τὸ ἀναγκαῖον, ἀλλ' οὐχ ὥς τέλος· ἐν γὰρ τῇ ὕλῃ τὸ ἀναγκαῖον, τὸ δ' οὗ ἔνεκα ἐν τῷ λόγῳ.

ἔστι δὲ τὸ ἀναγκαῖον ἐν τε τοῖς μαθήμασι καὶ ἐν τοῖς κατὰ φύσιν γιγνομένοις τρόπον τινὰ παραπλησίως· ἐπεὶ γὰρ τὸ εὐθὺ τοδί ἐστιν, ἀνάγκη τὸ τρίγωνον δύο ὀρθαῖς ἴσας ἔχειν· ἀλλ' οὐκ ἐπεὶ τοῦτο, ἐκεῖνο· ἀλλ' εἴ γε τοῦτο μὴ ἔστιν, οὐδὲ τὸ εὐθὺ ἔστιν. ἐν δὲ τοῖς γιγνομένοις ἔνεκά του ἀνάπαλιν, εἰ τὸ τέλος ἔσται ἢ ἔστι, καὶ τὸ ἔμπροσθεν ἔσται ἢ ἔστιν· εἰ δὲ μή, ὥσπερ ἐκεῖ μὴ ὄντος τοῦ συμπεράσματος ἡ ἀρχὴ οὐκ ἔσται, καὶ ἐνταῦθα τὸ τέλος καὶ τὸ οὗ ἔνεκα. ἀρχὴ γὰρ καὶ αὕτη, οὐ τῆς πράξεως ἀλλὰ τοῦ λογισμοῦ (ἐκεῖ δὲ τοῦ λογισμοῦ· πράξεις γὰρ οὐκ εἰσίν). ὥστ' εἰ ἔσται οἰκία, ἀνάγκη ταῦτα γενέσθαι ἢ ὑπάρχειν, ἢ εἶναι [ἦ] ὅλως τὴν ὕλην τὴν ἔνεκά του, οἷον πλίνθους καὶ λίθους, εἰ οἰκία· οὐ μέντοι διὰ ταῦτά ἐστι τὸ τέλος ἀλλ' ἢ ὥς ὕλην, οὐδ' ἔσται διὰ ταῦτα. ὅλως μέντοι μὴ ὄντων οὐκ ἔσται οὐθ' ἡ οἰκία οὐθ' ὁ πρίων, ἡ μὲν εἰ μὴ οἱ λίθοι, ὁ δ' εἰ μὴ ὁ σίδηρος· οὐδὲ γὰρ ἐκεῖ αἱ ἀρχαί, εἰ μὴ τὸ τρίγωνον δύο ὀρθαί.

φανερὸν δὴ ὅτι τὸ ἀναγκαῖον ἐν τοῖς φυσικοῖς τὸ ὥς ὕλη λεγόμενον καὶ αἱ κινήσεις αἱ ταύτης. καὶ ἄμφω μὲν τῷ φυσικῷ λεκτέαι αἱ αἰτίαι, μᾶλλον δὲ ἡ τίνος ἔνεκα· αἴτιον γὰρ τοῦτο τῆς ὕλης, ἀλλ' οὐχ αὕτη τοῦ τέλους· καὶ τὸ τέλος τὸ οὗ ἔνεκα, καὶ ἡ ἀρχὴ ἀπὸ τοῦ ὀρισμοῦ καὶ τοῦ λόγου, ὥσπερ ἐν τοῖς κατὰ [200b]

τέχνην, ἐπεὶ ἡ οἰκία τοιόνδε, τάδε δεῖ γενέσθαι καὶ ὑπάρχειν ἐξ ἀνάγκης, καὶ ἐπεὶ ἡ ὑγίεια τοδί, τάδε δεῖ γενέσθαι ἐξ ἀνάγκης καὶ ὑπάρχειν-οὕτως καὶ εἰ ἄνθρωπος τοδί, ταδί· εἰ δὲ ταδί, ταδί. ἴσως δὲ καὶ ἐν τῷ λόγῳ ἔστιν τὸ ἀναγκαῖον. ὀρισαμένῳ γὰρ τὸ ἔργον τοῦ πρίειν ὅτι διαίρεσις τοιαδί, αὕτη γ' οὐκ ἔσται, εἰ μὴ ἔξει ὀδόντας τοιουσδί· οὗτοι δ' οὐ, εἰ μὴ σιδηροῦς. ἔστι γὰρ καὶ ἐν τῷ λόγῳ ἕνια μόρια ὡς ὕλη τοῦ λόγου.

Βιβλίο 3

Κεφάλαιο 1

Ἐπεὶ δ' ἡ φύσις μὲν ἐστὶν ἀρχὴ κινήσεως καὶ μεταβολῆς, ἡ δὲ μέθοδος ἡμῖν περὶ φύσεως ἐστὶ, δεῖ μὴ λανθάνειν τί ἐστὶ κίνησις· ἀναγκαῖον γὰρ ἀγνοουμένης αὐτῆς ἀγνοεῖσθαι καὶ τὴν φύσιν.

διορισμένοις δὲ περὶ κινήσεως πειρατέον τὸν αὐτὸν ἐπελθεῖν τρόπον περὶ τῶν ἐφεξῆς. δοκεῖ δ' ἡ κίνησις εἶναι τῶν συνεχῶν, τὸ δ' ἄπειρον ἐμφαίνεται πρῶτον ἐν τῷ συνεχεῖ· διὸ καὶ τοῖς ὀριζομένοις τὸ συνεχές συμβαίνει προσχρήσασθαι πολλάκις τῷ λόγῳ τῷ τοῦ ἀπείρου, ὥς τὸ εἰς ἄπειρον διαιρετὸν συνεχές ὄν. πρὸς δὲ τούτοις ἄνευ τόπου καὶ κενοῦ καὶ χρόνου κίνησιν ἀδύνατον εἶναι.

δηλον οὖν ὥς διὰ τε ταῦτα, καὶ διὰ τὸ πάντων εἶναι κοινὰ καὶ καθόλου ταῦτα, σκεπτέον προχειρισάμενοις περὶ ἐκάστου τούτων (ύστερα γὰρ ἡ περὶ τῶν ιδίων θεωρία τῆς περὶ τῶν κοινῶν ἐστίν)·

καὶ πρῶτον, καθάπερ εἵπαμεν, περὶ κινήσεως. ἔστι δὴ [τι] τὸ μὲν ἐντελεχεία μόνον, τὸ δὲ δυνάμει καὶ ἐντελεχεία, τὸ μὲν τότε τι, τὸ δὲ τοσόνδε, τὸ δὲ τοιόνδε, καὶ τῶν ἄλλων τῶν τοῦ ὄντος κατηγοριῶν ὁμοίως. τοῦ δὲ πρὸς τι τὸ μὲν καθ' ὑπεροχὴν λέγεται καὶ κατ' ἔλλειψιν, τὸ δὲ κατὰ τὸ ποιητικὸν καὶ παθητικόν, καὶ ὅλως κινητικόν τε καὶ κινητόν· τὸ γὰρ κινητικὸν κινητικὸν τοῦ κινητοῦ καὶ τὸ κινητόν κινητόν ὑπὸ τοῦ κινητικοῦ.

οὐκ ἔστι δὲ κίνησις παρὰ τὰ πράγματα· μεταβάλλει γὰρ αἰεὶ τὸ μεταβάλλον ἢ κατ' οὐσίαν ἢ κατὰ ποσὸν ἢ κατὰ ποιὸν ἢ κατὰ τόπον, κοινὸν δ' ἐπὶ τούτων οὐδὲν ἔστι λαβεῖν, ὥς φαμέν, ὃ οὔτε τότε οὔτε πο [201a] σὸν οὔτε ποιὸν οὔτε τῶν ἄλλων κατηγορημάτων οὐθέν· ὥστ' οὐδὲ κίνησις οὐδὲ μεταβολὴ οὐθενὸς ἔσται παρὰ τὰ εἰρημένα, μηθενός γε ὄντος παρὰ τὰ εἰρημένα.

ἕκαστον δὲ διχῶς ὑπάρχει πᾶσιν, οἷον τὸ τότε (τὸ μὲν γὰρ μορφὴ αὐτοῦ, τὸ δὲ στέρησις), καὶ κατὰ τὸ ποιόν (τὸ μὲν γὰρ λευκὸν τὸ δὲ μέλαν), καὶ κατὰ τὸ ποσὸν τὸ μὲν τέλειον τὸ δ' ἀτελές. ὁμοίως δὲ καὶ κατὰ τὴν φορὰν τὸ μὲν ἄνω τὸ δὲ κάτω, ἢ τὸ μὲν κοῦφον τὸ δὲ βαρὺ.

ὥστε κινήσεως καὶ μεταβολῆς ἔστιν εἶδη τοσαῦτα ὅσα τοῦ ὄντος.

διηρημένου δὲ καθ' ἕκαστον γένος τοῦ μὲν ἐντελεχεία τοῦ δὲ δυνάμει, ἢ τοῦ δυνάμει ὄντος ἐντελέχεια, ἢ τοιοῦτον, κινήσις ἐστίν, οἷον τοῦ μὲν ἀλλοιωτοῦ, ἢ ἀλλοιωτόν, ἀλλοιώσις, τοῦ δὲ αὐξητοῦ καὶ τοῦ ἀντικειμένου φθιτοῦ (οὐδὲν γὰρ ὄνομα κοινὸν ἐπ' ἀμφοῖν)

αὔξεις καὶ φθίσεις, τοῦ δὲ γενητοῦ καὶ φθαρτοῦ γένεσις καὶ φθορά, τοῦ δὲ φορητοῦ φορά.

ὅτι δὲ τοῦτο ἔστιν ἡ κίνησις, ἐντεῦθεν δηλον. ὅταν γὰρ τὸ οἰκοδομητόν, ἢ τοιοῦτον αὐτὸ λέγομεν εἶναι, ἐντελεχεία ἢ, οἰκοδομεῖται, καὶ ἔστιν τοῦτο οἰκοδόμησις· ὁμοίως δὲ καὶ μάθησις καὶ ἰατρευσις καὶ κύλισις καὶ ἄλσις καὶ ἄδρυνσις καὶ γήρανσις.

ἐπεὶ δ' ἓνια ταῦτά καὶ δυνάμει καὶ ἐντελεχεία ἐστίν, οὐχ ἅμα δὲ ἢ οὐ κατὰ τὸ αὐτό, ἀλλ' οἷον θερμὸν μὲν ἐντελεχεία ψυχρὸν δὲ δυνάμει, πολλὰ ἤδη ποιήσει καὶ πείσεται ὑπ' ἀλλήλων· ἅπαν γὰρ ἔσται ἅμα ποιητικὸν καὶ παθητικόν. ὥστε καὶ τὸ κινεῖν φυσικῶς κινήτον· πᾶν γὰρ τὸ τοιοῦτον κινεῖ κινούμενον καὶ αὐτό. δοκεῖ μὲν οὖν τισιν ἅπαν κινεῖσθαι τὸ κινεῖν, οὐ μὴν ἀλλὰ περὶ τούτου μὲν ἐξ ἄλλων ἔσται δηλον ὅπως ἔχει (ἔστι γάρ τι κινεῖν καὶ ἀκίνητον),

ἡ δὲ τοῦ δυνάμει ὄντος <ἐντελέχεια>, ὅταν ἐντελεχεία ὦν ἐνεργῇ οὐχ ἢ αὐτὸ ἀλλ' ἢ κινήτον, κίνησις ἐστίν. λέγω δὲ τὸ ἢ ὡδί. ἔστι γὰρ ὁ χαλκὸς δυνάμει ἀνδριάς, ἀλλ' ὅμως οὐχ ἡ τοῦ χαλκοῦ ἐντελέχεια, ἢ χαλκός, κίνησις ἐστίν·

οὐ γὰρ τὸ αὐτὸ τὸ χαλκῷ εἶναι καὶ δυνάμει τινὶ [κινήτῳ], ἐπεὶ εἰ ταῦτόν ἦν ἀπλῶς καὶ κατὰ τὸν λόγον, ἦν ἂν ἡ τοῦ χαλκοῦ, ἢ χαλκός, ἐντελέχεια κίνησις· οὐκ ἔστιν δὲ ταῦτόν, ὡς εἴρηται (δηλον δ' ἐπὶ τῶν ἐναντίων· τὸ μὲν γὰρ δύνασθαι ὑγιαίνειν [201b] καὶ δύνασθαι κάμνειν ἕτερον-καὶ γὰρ ἂν τὸ κάμνειν καὶ τὸ ὑγιαίνειν ταῦτόν ἦν-τὸ δὲ ὑποκείμενον καὶ τὸ ὑγιαῖνον καὶ τὸ νοσοῦν, εἴθ' ὑγρότης εἴθ' αἷμα, ταῦτόν καὶ ἓν).

ἐπεὶ δ' οὐ ταῦτόν, ὥσπερ οὐδὲ χρῶμα ταῦτόν καὶ ὁρατόν, ἡ τοῦ δυνατοῦ, ἢ δυνατόν, ἐντελέχεια φανερόν ὅτι κίνησις ἐστίν.

ὅτι μὲν οὖν ἐστίν αὕτη, καὶ ὅτι συμβαίνει τότε κινεῖσθαι ὅταν ἡ ἐντελέχεια ἢ αὕτη, καὶ οὔτε πρότερον οὔτε ὕστερον, δηλον· ἐνδέχεται γὰρ ἕκαστον ὅτε μὲν ἐνεργεῖν ὅτε δὲ μή, οἷον τὸ οἰκοδομητόν, καὶ ἡ τοῦ οἰκοδομητοῦ ἐνέργεια, ἢ οἰκοδομητόν, οἰκοδόμησις ἐστίν (ἢ γὰρ οἰκοδόμησις ἡ ἐνέργεια [τοῦ οἰκοδομητοῦ] ἢ ἡ οἰκία· ἀλλ' ὅταν οἰκία ἢ, οὐκέτ' οἰκοδομητόν ἔστιν· οἰκοδομεῖται δὲ τὸ οἰκοδομητόν· ἀνάγκη οὖν οἰκοδόμησιν τὴν ἐνέργειαν εἶναι)· ἡ δ' οἰκοδόμησις κίνησις τις. ἀλλὰ μὴν ὁ αὐτὸς ἐφαρμόσει λόγος καὶ ἐπὶ τῶν ἄλλων κινήσεων.

Κεφάλαιο 2

Ὅτι δὲ καλῶς εἴρηται, δῆλον καὶ ἐξ ὧν οἱ ἄλλοι περὶ αὐτῆς λέγουσιν, καὶ ἐκ τοῦ μὴ ῥάδιον εἶναι διορίσαι ἄλλως αὐτήν.

οὔτε γὰρ τὴν κίνησιν καὶ τὴν μεταβολὴν ἐν ἄλλῳ γένει θεῖναι δύναται ἂν τις, δῆλόν τε σκοποῦσιν ὥς τιθέασιν αὐτήν ἔνιοι, ἑτερότητα καὶ ἀνισότητα καὶ τὸ μὴ ὄν φάσκοντες εἶναι τὴν κίνησιν· ὧν οὐδὲν ἀναγκαῖον κινεῖσθαι, οὔτ' ἂν ἕτερα ἢ οὔτ' ἂν ἄνισα οὔτ' ἂν οὐκ ὄντα· ἀλλ' οὐδ' ἡ μεταβολὴ οὔτ' εἰς ταῦτα οὔτ' ἐκ τούτων μᾶλλον ἐστὶν ἢ ἐκ τῶν ἀντικειμένων.

αἴτιον δὲ τοῦ εἰς ταῦτα τιθῆναι ὅτι ἀόριστόν τι δοκεῖ εἶναι ἡ κίνησις, τῆς δὲ ἐτέρας συστοιχίας αἱ ἀρχαὶ διὰ τὸ στερητικαὶ εἶναι ἀόριστοι· οὔτε γὰρ τόδε οὔτε τοιόνδε οὐδεμία αὐτῶν ἐστὶν, [ὅτι] οὐδὲ τῶν ἄλλων κατηγοριῶν. τοῦ δὲ δοκεῖν ἀόριστον εἶναι τὴν κίνησιν αἴτιον ὅτι οὔτε εἰς δύναμιν τῶν ὄντων οὔτε εἰς ἐνέργειαν ἐστὶν θεῖναι αὐτήν· οὔτε γὰρ τὸ δυνατόν ποσὸν εἶναι κινεῖται ἐξ ἀνάγκης οὔτε τὸ ἐνεργεῖα ποσόν, ἢ τε κίνησις ἐνέργεια μὲν εἶναι τις δοκεῖ, ἀτελὴς δέ· αἴτιον δ' ὅτι ἀτελὲς τὸ δυνατόν, οὗ ἐστὶν ἐνέργεια. καὶ διὰ τοῦτο δὴ χαλεπὸν αὐτὴν λαβεῖν τί ἐστὶν· ἢ γὰρ εἰς στέρησιν ἀναγκαῖον θεῖναι ἢ εἰς δύναμιν ἢ εἰς ἐνέργειαν ἀπλῆν, τούτων δ' οὐδὲν φαίνεται ἐνδεχόμενον. λείπεται [202a] τοίνυν ὁ εἰρημένος τρόπος, ἐνέργειαν μὲν τίνα εἶναι, τοιαύτην δ' ἐνέργειαν οἷαν εἵπαμεν, χαλεπὴν μὲν ἰδεῖν, ἐνδεχομένην δ' εἶναι.

κινεῖται δὲ καὶ τὸ κινεῖν ὥσπερ εἴρηται πᾶν, τὸ δυνάμει ὄν κινήτόν, καὶ οὗ ἡ ἀκίνησία ἡρεμία ἐστίν (ᾧ γὰρ ἡ κίνησις ὑπάρχει, τούτου ἡ ἀκίνησία ἡρεμία). τὸ γὰρ πρὸς τοῦτο ἐνεργεῖν, ἢ τοιοῦτον, αὐτὸ τὸ κινεῖν ἐστὶ· τοῦτο δὲ ποιεῖ θίξει, ὥστε ἅμα καὶ πάσχει· διὸ ἡ κίνησις ἐντελέχεια τοῦ κινήτου, ἢ κινήτόν, συμβαίνει δὲ τοῦτο θίξει τοῦ κινήτου, ὥσθ' ἅμα καὶ πάσχει. εἶδος δὲ ἀεὶ οἴσεται τι τὸ κινεῖν, ἥτοι τόδε ἢ τοιόνδε ἢ τοσόνδε, ὃ ἔσται ἀρχὴ καὶ αἴτιον τῆς κινήσεως, ὅταν κινή, οἷον ὁ ἐντελεχεῖα ἄνθρωπος ποιεῖ ἐκ τοῦ δυνάμει ὄντος ἀνθρώπου ἄνθρωπον.

Κεφάλαιο 3

Καὶ τὸ ἀπορούμενον δὲ φανερόν, ὅτι ἐστὶν ἡ κίνησις ἐν τῷ κινητῷ· ἐντελέχεια γὰρ ἐστὶ τούτου [καὶ] ὑπὸ τοῦ κινητικοῦ. καὶ ἡ τοῦ κινητικοῦ δὲ ἐνέργεια οὐκ ἄλλη ἐστίν· δεῖ μὲν γὰρ εἶναι ἐντελέχειαν ἀμφοῖν· κινητικὸν μὲν γὰρ ἐστὶν τῷ δύνασθαι, κινεῖν δὲ τῷ ἐνεργεῖν, ἀλλ' ἐστὶν ἐνεργητικὸν τοῦ κινητοῦ, ὥστε ὁμοίως μία ἡ ἀμφοῖν ἐνέργεια ὥσπερ τὸ αὐτὸ διάστημα ἐν πρὸς δύο καὶ δύο πρὸς ἓν, καὶ τὸ ἄναντες καὶ τὸ κάταντες· ταῦτα γὰρ ἐν μὲν ἐστὶν, ὁ μέντοι λόγος οὐχ εἷς· ὁμοίως δὲ καὶ ἐπὶ τοῦ κινουντος καὶ κινουμένου.

ἔχει δ' ἀπορίαν λογικὴν· ἀναγκαῖον γὰρ ἴσως εἶναι τινα ἐνέργειαν τοῦ ποιητικοῦ καὶ τοῦ παθητικοῦ· τὸ μὲν δὴ ποίησις, τὸ δὲ πάθησις, ἔργον δὲ καὶ τέλος τοῦ μὲν ποίημα, τοῦ δὲ πάθος. ἐπεὶ οὖν ἄμφω κινήσεις, εἰ μὲν ἕτεραι, ἐν τίνι; ἢ γὰρ ἄμφω ἐν τῷ πάσχοντι καὶ κινουμένῳ, ἢ ἡ μὲν ποίησις ἐν τῷ ποιοῦντι, ἢ δὲ πάθησις ἐν τῷ πάσχοντι (εἰ δὲ δεῖ καὶ ταύτην ποίησιν καλεῖν, ὁμώνυμος ἂν εἴη).

ἀλλὰ μὴν εἰ τοῦτο, ἡ κίνησις ἐν τῷ κινεῖντι ἔσται (ὁ γὰρ αὐτὸς λόγος ἐπὶ κινουντος καὶ κινουμένου), ὥστ' ἢ πᾶν τὸ κινεῖν κινήσεται, ἢ ἔχον κίνησιν οὐ κινήσεται.

εἰ δ' ἄμφω ἐν τῷ κινουμένῳ καὶ πάσχοντι, καὶ ἡ ποίησις καὶ ἡ πάθησις, καὶ ἡ δίδαξις καὶ ἡ μάθησις δύο οὔσαι ἐν τῷ μανθάνοντι, πρῶτον μὲν ἡ ἐνέργεια ἡ ἐκάστου οὐκ ἐν ἐκάστῳ ὑπάρξει, εἴτα ἄτοπον δύο κινήσεις ἅμα κινεῖσθαι· τίνες γὰρ ἔσσονται ἀλλοιώσεις δύο τοῦ ἐνὸς καὶ εἰς ἓν εἶδος; ἀλλ' ἀδύνατον. ἀλλὰ μία ἔσται ἡ ἐνέργεια.

ἀλλ' [202b] ἄλογον δύο ἐτέρων τῷ εἶδει τὴν αὐτὴν καὶ μίαν εἶναι ἐνέργειαν· καὶ ἔσται, εἴπερ ἡ δίδαξις καὶ ἡ μάθησις τὸ αὐτὸ καὶ ἡ ποίησις καὶ ἡ πάθησις, καὶ τὸ διδάσκειν τῷ μανθάνειν τὸ αὐτὸ καὶ τὸ ποιεῖν τῷ πάσχειν, ὥστε τὸν διδάσκοντα ἀνάγκη ἔσται πάντα μανθάνειν καὶ τὸν ποιοῦντα πάσχειν.

ἢ οὔτε τὸ τὴν ἄλλου ἐνέργειαν ἐν ἐτέρῳ εἶναι ἄτοπον (ἔστι γὰρ ἡ δίδαξις ἐνέργεια τοῦ διδασκαλικοῦ, ἐν τινι μέντοι, καὶ οὐκ ἀποτετμημένη, ἀλλὰ τοῦδε ἐν τῷδε),

οὔτε μίαν δυοῖν κωλύει οὐθὲν τὴν αὐτὴν εἶναι (μὴ ὥς τῷ εἶναι τὸ αὐτό, ἀλλ' ὥς ὑπάρχει τὸ δυνάμει ὄν πρὸς τὸ ἐνεργοῦν),

οὔτ' ἀνάγκη τὸν διδάσκοντα μανθάνειν, οὔδ' εἰ τὸ ποιεῖν καὶ

πάσχειν τὸ αὐτὸ ἐστίν, μὴ μέντοι ὥστε τὸν λόγον εἶναι ἓνα τὸν <τὸ> τί ἦν εἶναι λέγοντα, οἷον ὡς λώπιον καὶ ἱμάτιον, ἀλλ' ὡς ἡ ὁδὸς ἢ Θήβηθεν Ἀθήναζε καὶ ἡ Ἀθήνηθεν εἰς Θήβας, ὥσπερ εἴρηται καὶ πρότερον; οὐ γὰρ ταῦτά πάντα ὑπάρχει τοῖς ὁπωσοῦν τοῖς αὐτοῖς, ἀλλὰ μόνον οἷς τὸ εἶναι τὸ αὐτό. οὐ μὴν ἀλλ' οὐδ' εἰ ἡ δίδαξις τῇ μαθήσει τὸ αὐτό, καὶ τὸ μανθάνειν τῷ διδάσκειν, ὥσπερ οὐδ' εἰ ἡ διάστασις μία τῶν διεστηκότων, καὶ τὸ διίστασθαι ἐνθένθε ἐκεῖσε κάκειθεν δεῦρο ἐν καὶ τὸ αὐτό. ὅλως δ' εἰπεῖν οὐδ' ἡ δίδαξις τῇ μαθήσει οὐδ' ἡ ποίησις τῇ παθήσει τὸ αὐτὸ κυρίως, ἀλλ' ὅ ὑπάρχει ταῦτα, ἢ κίνησις· τὸ γὰρ τοῦδε ἐν τῷδε καὶ τὸ τοῦδε ὑπὸ τοῦδε ἐνέργειαν εἶναι ἕτερον τῷ λόγῳ.

τί μὲν οὖν ἐστὶν κίνησις εἴρηται καὶ καθόλου καὶ κατὰ μέρος· οὐ γὰρ ἄδηλον πῶς ὁρισθήσεται τῶν εἰδῶν ἕκαστον αὐτῆς· ἀλλοιώσις μὲν γὰρ ἢ τοῦ ἀλλοιωτοῦ, ἢ ἀλλοιωτόν, ἐντελέχεια. ἔτι δὲ γνωριμώτερον, ἢ τοῦ δυνάμει ποιητικοῦ καὶ παθητικοῦ, ἢ τοιοῦτον, ἀπλῶς τε καὶ πάλιν καθ' ἕκαστον, ἢ οἰκοδόμησις ἢ ἰάτρευσις. τὸν αὐτὸν δὲ λεχθήσεται τρόπον καὶ περὶ τῶν ἄλλων κινήσεων ἐκάστης.

Κεφάλαιο 4

Ἐπεὶ δ' ἐστὶν ἡ περὶ φύσεως ἐπιστήμη περὶ μεγέθη καὶ κίνησιν καὶ χρόνον, ὧν ἕκαστον ἀναγκαῖον ἢ ἄπειρον ἢ πεπερασμένον εἶναι, εἰ καὶ μὴ πᾶν ἐστὶν ἄπειρον ἢ πεπερασμένον, οἷον πάθος ἢ στιγμή (τῶν γὰρ τοιούτων ἴσως οὐδὲν ἀναγκαῖον ἐν θατέρῳ τούτων εἶναι), προσῆκον ἂν εἴη τὸν περὶ φύσεως πραγματευόμενον θεωρῆσαι περὶ ἀπείρου, εἰ ἔστιν ἢ μή, καὶ εἰ ἔστιν, τί ἐστίν.

σημεῖον δ' ὅτι ταύτης τῆς [203a] ἐπιστήμης οἰκεία ἡ θεωρία ἡ περὶ αὐτοῦ· πάντες γὰρ οἱ δοκοῦντες ἀξιολόγως ἦφθαι τῆς τοιαύτης φιλοσοφίας πεποίηται λόγον περὶ τοῦ ἀπείρου, καὶ πάντες ὡς ἀρχὴν τινα τιθέασιν τῶν ὄντων, οἱ μὲν, ὥσπερ οἱ Πυθαγόρειοι καὶ Πλάτων, καθ' αὐτό, οὐχ ὡς συμβεβηκός τινι ἐτέρῳ ἀλλ' οὐσίαν αὐτὸ ὄν τὸ ἄπειρον. πλὴν οἱ μὲν Πυθαγόρειοι ἐν τοῖς αἰσθητοῖς (οὐ γὰρ χωριστὸν ποιοῦσιν τὸν ἀριθμόν), καὶ εἶναι τὸ ἔξω τοῦ οὐρανοῦ ἄπειρον, Πλάτων δὲ ἔξω μὲν οὐδὲν εἶναι σῶμα, οὐδὲ τὰς ιδέας, διὰ τὸ μηδὲ ποῦ εἶναι αὐτάς, τὸ μέντοι ἄπειρον καὶ ἐν τοῖς αἰσθητοῖς καὶ ἐν ἐκείναις εἶναι·

καὶ οἱ μὲν τὸ ἄπειρον εἶναι τὸ ἄρτιον (τοῦτο γὰρ ἐναπολαμβανόμενον καὶ ὑπὸ τοῦ περιττοῦ περαινόμενον παρέχειν τοῖς οὖσι τὴν ἀπειρίαν· σημεῖον δ' εἶναι τούτου τὸ συμβαῖνον ἐπὶ τῶν ἀριθμῶν· περιτιθεμένων γὰρ τῶν γνωμόνων περὶ τὸ ἐν καὶ χωρὶς ὅτε μὲν ἄλλο ἀεὶ γίνεσθαι τὸ εἶδος, ὅτε δὲ ἓν), Πλάτων δὲ δύο τὰ ἄπειρα, τὸ μέγα καὶ τὸ μικρόν.

οἱ δὲ περὶ φύσεως πάντες [ἀεὶ] ὑποτιθέασιν ἑτέραν τινὰ φύσιν τῷ ἀπείρῳ τῶν λεγομένων στοιχείων, οἷον ὕδωρ ἢ ἀέρα ἢ τὸ μεταξὺ τούτων. τῶν δὲ πεπερασμένα ποιούντων στοιχεῖα οὐθεὶς ἄπειρα ποιεῖ· ὅσοι δ' ἄπειρα ποιοῦσι τὰ στοιχεῖα, καθάπερ Ἀναξαγόρας καὶ Δημόκριτος, ὁ μὲν ἐκ τῶν ὁμοιομερῶν, ὁ δ' ἐκ τῆς πανσπερμίας τῶν σχημάτων, τῇ ἀφ᾽ ἧς συνεχὲς τὸ ἄπειρον εἶναι φασίν·

καὶ ὁ μὲν ὅτι οὖν τῶν μορίων εἶναι μίγμα ὁμοίως τῷ παντὶ διὰ τὸ ὁρᾶν ὅτι οὖν ἐξ ὅτου οὖν γινόμενον· ἐντεῦθεν γὰρ ἔοικε καὶ ὁμοῦ ποτὲ πάντα χρήματα φάναι εἶναι, οἷον ἥδε ἢ σὰρξ καὶ τόδε τὸ ὅστο οὖν, καὶ οὕτως ὅτι οὖν· καὶ πάντα ἄρα· καὶ ἅμα τοίνυν· ἀρχὴ γὰρ οὐ μόνον ἐν ἐκάστῳ ἔστι τῆς διακρίσεως, ἀλλὰ καὶ πάντων. ἐπεὶ γὰρ τὸ γινόμενον ἐκ τοῦ τοιούτου γίγνεται σώματος, πάντων δ' ἔστι

γένεσις πλὴν οὐχ ἅμα, καὶ τίνα ἀρχὴν δεῖ εἶναι τῆς γενέσεως, αὕτη δ' ἐστὶν μία, οἷον ἐκεῖνος καλεῖ νοῦν, ὁ δὲ νοῦς ἀπ' ἀρχῆς τινος ἐργάζεται νοήσας· ὥστε ἀνάγκη ὁμοῦ ποτε πάντα εἶναι καὶ ἄρξασθαι ποτε κινούμενα.

Δημόκριτος δ' οὐδὲν ἕτερον ἐξ ἑτέρου γίνεσθαι τῶν πρώτων φησὶν· ἀλλ' ὅμως γε αὐτῷ τὸ κοινὸν [203b] σῶμα πάντων ἐστὶν ἀρχή· μεγέθει κατὰ μόρια καὶ σχήματι διαφέρον.

ὅτι μὲν οὖν προσήκουσα τοῖς φυσικοῖς ἡ θεωρία, δηλὸν ἐκ τούτων. εὐλόγως δὲ καὶ ἀρχὴν αὐτὸ τιθέασι πάντες· οὔτε γὰρ μάτην οἶόν τε αὐτὸ εἶναι, οὔτε ἄλλην ὑπάρχειν αὐτῷ δύναμιν πλὴν ὡς ἀρχήν· ἅπαντα γὰρ ἢ ἀρχὴ ἢ ἐξ ἀρχῆς, τοῦ δὲ ἀπείρου οὐκ ἔστιν ἀρχή· εἴη γὰρ ἂν αὐτοῦ πέρας. ἔτι δὲ καὶ ἀγένητον καὶ ἄφθαρτον ὡς ἀρχή τις οὔσα· τό τε γὰρ γενόμενον ἀνάγκη τέλος λαβεῖν, καὶ τελευτὴ πάσης ἔστιν φθορᾶς. διό, καθάπερ λέγομεν, οὐ ταύτης ἀρχή, ἀλλ' αὕτη τῶν ἄλλων εἶναι δοκεῖ καὶ περιέχειν ἅπαντα καὶ πάντα κυβερνᾶν, ὥς φασιν ὅσοι μὴ ποιοῦσι παρὰ τὸ ἄπειρον ἄλλας αἰτίας, οἷον νοῦν ἢ φιλίαν· καὶ τοῦτ' εἶναι τὸ θεῖον· ἀθάνατον γὰρ καὶ ἀνώλεθρον, ὥσπερ φησὶν Ἀναξίμανδρος καὶ οἱ πλεῖστοι τῶν φυσιολόγων.

τοῦ δ' εἶναι τι ἄπειρον ἢ πίστις ἐκ πέντε μάλιστ' ἂν συμβαίνοι σκοποῦσιν,

1. ἐκ τε τοῦ χρόνου (οὗτος γὰρ ἄπειρος)

2. καὶ ἐκ τῆς ἐν τοῖς μεγέθεσι διαιρέσεως (χρῶνται γὰρ καὶ οἱ μαθηματικοὶ τῷ ἀπείρῳ)·

3. ἔτι τῷ οὕτως ἂν μόνως μὴ ὑπολείπειν γένεσιν καὶ φθοράν, εἰ ἄπειρον εἴη ὅθεν ἀφαιρεῖται τὸ γινόμενον·

4. ἔτι τῷ τὸ πεπερασμένον ἀεὶ πρὸς τι περαίνειν, ὥστε ἀνάγκη μὴδὲν εἶναι πέρας, εἰ ἀεὶ περαίνειν ἀνάγκη ἕτερον πρὸς ἕτερον.

5. μάλιστα δὲ καὶ κυριώτατον, ὃ τὴν κοινὴν ποιεῖ ἀπορίαν πᾶσι· διὰ γὰρ τὸ ἐν τῇ νοήσει μὴ ὑπολείπειν καὶ ὁ ἀριθμὸς δοκεῖ ἄπειρος εἶναι καὶ τὰ μαθηματικὰ μεγέθη καὶ τὸ ἔξω τοῦ οὐρανοῦ.

ἀπείρου δ' ὄντος τοῦ ἔξω, καὶ σῶμα ἄπειρον εἶναι δοκεῖ καὶ κόσμοι· τί γὰρ μᾶλλον τοῦ κενοῦ ἐνταῦθα ἢ ἐνταῦθα; ὥστ' εἴπερ μοναχοῦ, καὶ πανταχοῦ εἶναι τὸν ὄγκον. ἅμα δ' εἰ καὶ ἔστι κενὸν καὶ τόπος

ἄπειρος, καὶ σῶμα εἶναι ἀναγκαῖον· ἐνδέχεσθαι γὰρ ἢ εἶναι οὐδὲν διαφέρει ἐν τοῖς αἰδίοις. ἔχει δ' ἀπορίαν ἢ περὶ τοῦ ἀπείρου θεωρία· καὶ γὰρ μὴ εἶναι τιθεμένοις πόλλ' ἀδύνατα συμβαίνει καὶ εἶναι. ἔτι δὲ ποτέρως ἔστιν, πότερον ὡς οὐσία ἢ ὡς συμβεβηκὸς καθ' αὐτὸ φύσει τινί; ἢ οὐδετέρως, ἀλλ' οὐδὲν ἦττον ἔστιν ἄπειρον ἢ ἄπειρα [204a] τῷ πλήθει;

μάλιστα δὲ φυσικοῦ ἔστιν σκέψασθαι εἰ ἔστι μέγεθος αἰσθητὸν ἄπειρον.

πρῶτον οὖν διοριστέον ποσαχῶς λέγεται τὸ ἄπειρον.

1. ἓνα μὲν δὴ τρόπον τὸ ἀδύνατον διελθεῖν τῷ μὴ πεφυκέναι διέναι, ὥσπερ ἡ φωνὴ ἀόρατος·

2. ἄλλως δὲ τὸ διέξοδον ἔχον ἀτελεύτητον, ἢ ὁ μόγις,

3. ἢ ὁ πεφυκὸς ἔχειν μὴ ἔχει διέξοδον ἢ πέρας.

ἔτι ἄπειρον ἅπαν ἢ κατὰ πρόσθεσιν ἢ κατὰ διαίρεσιν ἢ ἀμφοτέρως.

Κεφάλαιο 5

Χωριστὸν μὲν οὖν εἶναι τὸ ἄπειρον τῶν αἰσθητῶν, αὐτό τι ὄν ἄπειρον, οὐχ οἷόν τε. εἰ γὰρ μήτε μέγεθός ἐστιν μήτε πλῆθος, ἀλλ' οὐσία αὐτὸ ἐστὶ τὸ ἄπειρον καὶ μὴ συμβεβηκός, ἀδιαίρετον ἔσται (τὸ γὰρ διαιρετὸν ἢ μέγεθος ἔσται ἢ πλῆθος)· εἰ δὲ τοιοῦτον, οὐκ ἄπειρον, εἰ μὴ ὥς ἡ φωνὴ ἀόρατος. ἀλλ' οὐχ οὕτως οὔτε φασὶν εἶναι οἱ φάσκοντες εἶναι τὸ ἄπειρον οὔτε ἡμεῖς ζητοῦμεν, ἀλλ' ὥς ἀδιεξίτητον. εἰ δὲ κατὰ συμβεβηκός ἐστιν τὸ ἄπειρον, οὐκ ἂν εἴη στοιχεῖον τῶν ὄντων, ἢ ἄπειρον, ὥσπερ οὐδὲ τὸ ἀόρατον τῆς διαλέκτου, καίτοι ἡ φωνὴ ἐστὶν ἀόρατος.

ἔτι πῶς ἐνδέχεται εἶναι τι αὐτὸ ἄπειρον, εἴπερ μὴ καὶ ἀριθμὸν καὶ μέγεθος, ὧν ἐστὶ καθ' αὐτὸ πάθος τι τὸ ἄπειρον; ἔτι γὰρ ἦττον ἀνάγκη ἢ τὸν ἀριθμὸν ἢ τὸ μέγεθος.

φανερὸν δὲ καὶ ὅτι οὐκ ἐνδέχεται εἶναι τὸ ἄπειρον ὥς ἐνεργεῖα ὄν καὶ ὥς οὐσίαν καὶ ἀρχήν· ἔσται γὰρ ὅτιοῦν αὐτοῦ ἄπειρον τὸ λαμβανόμενον, εἰ μεριστόν (τὸ γὰρ ἀπείρῳ εἶναι καὶ ἄπειρον τὸ αὐτό, εἴπερ οὐσία τὸ ἄπειρον καὶ μὴ καθ' ὑποκειμένου), ὥστ' ἢ ἀδιαίρετον ἢ εἰς ἄπειρα διαιρετόν· πολλὰ δ' ἄπειρα εἶναι τὸ αὐτὸ ἀδύνατον (ἀλλὰ μὴν ὥσπερ ἀέρος ἀἷρ μέρος, οὕτω καὶ ἄπειρον ἀπείρου, εἴ γε οὐσία ἐστὶ καὶ ἀρχή)· ἀμεριστόν ἄρα καὶ ἀδιαίρετον. ἀλλ' ἀδύνατον τὸ ἐντελεχεῖα ὄν ἄπειρον· ποσὸν γὰρ τι εἶναι ἀναγκαῖον.

κατὰ συμβεβηκός ἄρα ὑπάρχει τὸ ἄπειρον. ἀλλ' εἰ οὕτως, εἴρηται ὅτι οὐκ ἐνδέχεται αὐτὸ λέγειν ἀρχήν, ἀλλ' ὃ συμβέβηκε, τὸν ἀέρα ἢ τὸ ἄρτιον.

ὥστε ἀτόπως ἂν ἀποφαίνοντο οἱ λέγοντες οὕτως ὥσπερ οἱ Πυθαγόρειοί φασιν· ἅμα γὰρ οὐσίαν ποιοῦσι τὸ ἄπειρον καὶ μερίζουσιν.

ἀλλ' ἴσως αὕτη μὲν [ἐστὶ] καθόλου ἢ ζήτησις, εἰ ἐνδέχεται ἄπειρον καὶ ἐν τοῖς μαθηματικοῖς [204b] εἶναι καὶ ἐν τοῖς νοητοῖς καὶ μηδὲν ἔχουσι μέγεθος· ἡμεῖς δ' ἐπισκοποῦμεν περὶ τῶν αἰσθητῶν καὶ περὶ ὧν ποιούμεθα τὴν μέθοδον, ἅρ' ἐστὶν ἐν αὐτοῖς ἢ οὐκ ἔστι σῶμα ἄπειρον ἐπὶ τὴν αὔξησιν.

λογικῶς μὲν οὖν σκοποῦμενοις ἐκ τῶν τοιῶνδε δόξειεν ἂν οὐκ εἶναι· εἰ γὰρ ἐστὶ σώματος λόγος τὸ ἐπιπέδῳ ὠρισμένον, οὐκ ἂν εἴη

σῶμα ἄπειρον, οὔτε νοητὸν οὔτε αἰσθητὸν (ἀλλὰ μὴν οὐδ' ἀριθμὸς οὕτως ὡς κεχωρισμένος καὶ ἄπειρος· ἀριθμητὸν γὰρ ἀριθμὸς ἢ τὸ ἔχον ἀριθμόν· εἰ οὖν τὸ ἀριθμητὸν ἐνδέχεται ἀριθμῆσαι, καὶ διεξελθεῖν ἂν εἴη δυνατόν τὸ ἄπειρον)·

φυσικῶς δὲ μᾶλλον θεωροῦσιν ἐκ τῶνδε.

οὔτε γὰρ σύνθετον οἷόν τε εἶναι οὔτε ἀπλοῦν.

σύνθετον μὲν οὖν οὐκ ἔσται τὸ ἄπειρον σῶμα, εἰ πεπερασμένα τῷ πλήθει τὰ στοιχεῖα. ἀνάγκη γὰρ πλείω εἶναι, καὶ ἰσάζειν αἰετὰν ἀντία, καὶ μὴ εἶναι ἐν αὐτῶν ἄπειρον (εἰ γὰρ ὅποσφ οὖν λείπεται ἢ ἐν ἐνὶ σώματι δύναμις θατέρου, οἷον εἰ τὸ πῦρ πεπεράνται, ὁ δ' ἀὴρ ἄπειρος, ἔστιν δὲ τὸ ἴσον πῦρ τοῦ ἴσου ἀέρος τῇ δυνάμει ὅποσαπλασιονοῦν, μόνον δὲ ἀριθμόν τινα ἔχον, ὅμως φανερόν ὅτι τὸ ἄπειρον ὑπερβαλεῖ καὶ φθερεῖ τὸ πεπερασμένον)· ἕκαστον δ' ἄπειρον εἶναι ἀδύνατον· σῶμα μὲν γὰρ ἔστιν τὸ πάντῃ ἔχον διάστασιν, ἄπειρον δὲ τὸ ἀπεράντως διεστηκός, ὥστε τὸ ἄπειρον σῶμα πανταχῇ ἔσται διεστηκός εἰς ἄπειρον.

ἀλλὰ μὴν οὐδὲ ἐν καὶ ἀπλοῦν εἶναι σῶμα ἄπειρον ἐνδέχεται, οὔτε ὡς λέγουσί τινες τὸ παρὰ τὰ στοιχεῖα, ἐξ οὗ ταῦτα γεννῶσιν, οὔθ' ἀπλῶς.

εἰσὶν γὰρ τινες οἱ τοῦτο ποιοῦσι τὸ ἄπειρον, ἀλλ' οὐκ ἀέρα ἢ ὕδωρ, ὅπως μὴ τᾶλλα φθείρηται ὑπὸ τοῦ ἀπείρου αὐτῶν· ἔχουσι γὰρ πρὸς ἄλληλα ἐναντίωσιν, οἷον ὁ μὲν ἀὴρ ψυχρός, τὸ δ' ὕδωρ ὑγρόν, τὸ δὲ πῦρ θερμόν· ὧν εἰ ἦν ἐν ἄπειρον, ἔφθαρτο ἂν ἤδη τᾶλλα· νῦν δ' ἕτερον εἶναί φασιν ἐξ οὗ ταῦτα.

ἀδύνατον δ' εἶναι τοιοῦτον, οὐχ ὅτι ἄπειρον (περὶ τούτου μὲν γὰρ κοινόν τι λεκτέον ἐπὶ παντὸς ὁμοίως, καὶ ἀέρος καὶ ὕδατος καὶ ὁτουοῦν), ἀλλ' ὅτι οὐκ ἔστιν τοιοῦτον σῶμα αἰσθητὸν παρὰ τὰ καλούμενα στοιχεῖα· ἅπαντα γὰρ ἐξ οὗ ἐστί, καὶ διαλύεται εἰς τοῦτο, ὥστε ἦν ἂν ἐνταῦθα παρὰ ἀέρα καὶ πῦρ καὶ γῆν καὶ ὕδωρ· φαίνεται δ' οὐδέν.

οὐδὲ δὴ πῦρ οὐδ' ἄλλο τι [205a] τῶν στοιχείων οὐδὲν ἄπειρον ἐνδέχεται εἶναι. ὅλως γὰρ καὶ χωρὶς τοῦ ἄπειρον εἶναί τι αὐτῶν, ἀδύνατον τὸ πᾶν, κἂν ἢ πεπερασμένον, ἢ εἶναι ἢ γίγνεσθαι ἐν τι αὐτῶν, ὥσπερ Ἡράκλειτός φησιν ἅπαντα γίγνεσθαι ποτε πῦρ (ὁ δ' αὐτὸς λόγος καὶ ἐπὶ τοῦ ενός, οἷον ποιοῦσι παρὰ τὰ στοιχεῖα οἱ φυσικοί)· πάντα γὰρ μεταβάλλει ἐξ ἐναντίου εἰς ἐναντίον, οἷον ἐκ θερμοῦ εἰς ψυχρόν.

δεῖ δὲ κατὰ παντὸς ἐκ τῶνδε σκοπεῖν, εἰ ἐνδέχεται ἢ οὐκ ἐνδέχεται εἶναι [σῶμα ἄπειρον αἰσθητόν]. ὅτι δὲ ὅλως ἀδύνατον εἶναι σῶμα ἄπειρον αἰσθητόν, ἐκ τῶνδε δῆλον.

πέφυκε γὰρ πᾶν τὸ αἰσθητόν που εἶναι, καὶ ἔστιν τόπος τις ἐκάστου, καὶ ὁ αὐτὸς τοῦ μορίου καὶ παντός, οἷον ὅλης τε τῆς γῆς καὶ βώλου μιᾶς, καὶ πυρὸς καὶ σπινθήρος.

ὥστε εἰ μὲν ὁμοειδές, ἀκίνητον ἔσται ἢ ἀεὶ οἰσθήσεται· καίτοι ἀδύνατον (τί γὰρ μᾶλλον κάτω ἢ ἄνω ἢ ὀπουοῦν; λέγω δὲ οἷον, εἰ βῶλος εἴη, ποῦ αὕτη κινηθήσεται ἢ ποῦ μενεῖ; ὁ γὰρ τόπος ἄπειρος τοῦ συγγενοῦς αὐτῇ σώματος. πότερον οὖν καθέξει τὸν ὅλον τόπον; καὶ πῶς; τίς οὖν ἢ ποῦ ἢ μονὴ καὶ ἡ κίνησις αὐτῆς; ἢ πανταχοῦ μενεῖ; οὐ κινηθήσεται ἄρα. ἢ πανταχοῦ κινηθήσεται; οὐκ ἄρα στήσεται).

εἰ δ' ἀνόμοιον τὸ πᾶν, ἀνόμοιοι καὶ οἱ τόποι· καὶ πρῶτον μὲν οὐχ ἐν τὸ σῶμα τοῦ παντός ἄλλ' ἢ τῷ ἅπτεσθαι· ἔπειτα ἥτοι πεπερασμένα ταῦτ' ἔσται ἢ ἄπειρα τῷ εἶδει. πεπερασμένα μὲν οὖν οὐχ οἷόν τε (ἔσται γὰρ τὰ μὲν ἄπειρα τὰ δ' οὐ, εἰ τὸ πᾶν ἄπειρον, οἷον τὸ πῦρ ἢ τὸ ὕδωρ· φθορὰ δὲ τὸ τοιοῦτον τοῖς ἐναντίοις [καθάπερ εἴρηται πρότερον· (καὶ διὰ τοῦτ' οὐθεὶς τὸ ἐν καὶ ἄπειρον πῦρ ἐποίησεν οὐδὲ γῆν τῶν φυσιολόγων, ἄλλ' ἢ ὕδωρ ἢ ἀέρα ἢ τὸ μέσον αὐτῶν, ὅτι τόπος ἐκατέρου δῆλος ἦν διωρισμένος, ταῦτα δ' ἐπαμφοτερίζει τῷ ἄνω καὶ κάτω.) εἰ δ' ἄπειρα καὶ ἀπλᾶ, καὶ οἱ τόποι ἄπειροι, καὶ ἔσται ἄπειρα τὰ στοιχεῖα· εἰ δὲ τοῦτ' ἀδύνατον καὶ πεπερασμένοι οἱ τόποι, καὶ τὸ ὅλον [πεπεράνθαι ἀναγκαῖον]· ἀδύνατον γὰρ μὴ ἀπαρτίζειν τὸν τόπον καὶ τὸ σῶμα· οὔτε γὰρ ὁ τόπος ὁ πᾶς μείζων ἢ ὅσον ἐνδέχεται τὸ σῶμα εἶναι (ἅμα δ' οὐδ' ἄπειρον ἔσται τὸ σῶμα ἔτι), οὔτε τὸ σῶμα μείζον ἢ ὁ τόπος· ἢ γὰρ κενὸν [205b] ἔσται τι ἢ σῶμα οὐδαμοῦ πεφυκὸς εἶναι.

Ἀναξαγόρας δ' ἀτόπως λέγει περὶ τῆς τοῦ ἀπείρου μονῆς· στηρίζειν γὰρ αὐτὸ αὐτό φησιν τὸ ἄπειρον· τοῦτο δέ, ὅτι ἐν αὐτῷ (ἄλλο γὰρ οὐδὲν περιέχειν), ὡς ὅπου ἂν τι ᾖ, πεφυκὸς ἐνταῦθα εἶναι. τοῦτο δ' οὐκ ἀληθές· εἴη γὰρ ἂν τί που βῆ καὶ οὐχ οὗ πέφυκεν.

εἰ οὖν ὅτι μάλιστα μὴ κινεῖται τὸ ὅλον (τὸ γὰρ αὐτῷ στηριζόμενον καὶ ἐν αὐτῷ ὄν ἀκίνητον εἶναι ἀνάγκη), ἀλλὰ διὰ τί οὐ πέφυκε κινεῖσθαι, λεκτέον. οὐ γὰρ ἱκανὸν τὸ οὕτως εἰπόντα ἀπηλλάχθαι· εἴη γὰρ ἂν καὶ ὅτι οὐκ ἔχει ἀλλαγῇ κινεῖσθαι οὐ κινούμενον, ἀλλὰ πεφυκέναι οὐδὲν κωλύει· ἐπεὶ καὶ ἡ γῆ οὐ φέρεται, οὐδ' εἰ ἄπειρος ἦν, εἰργμένη μέντοι ὑπὸ τοῦ μέσου· ἄλλ' οὐχ ὅτι οὐκ ἔστιν ἄλλο οὗ

ἐνεχθήσεται, μείνειεν ἂν [ἐπὶ τοῦ μέσου], ἀλλ' ὅτι πέφυκεν οὕτω. καίτοι ἐξεῖη ἂν λέγειν ὅτι στηρίζει αὐτήν. εἰ οὖν μηδ' ἐπὶ τῆς γῆς τοῦτο αἷτιον ἀπείρου οὔσης, ἀλλ' ὅτι βάρος ἔχει, τὸ δὲ βαρὺ μένει ἐπὶ τοῦ μέσου, ἢ δὲ γῆ ἐπὶ τοῦ μέσου, ὁμοίως ἂν καὶ τὸ ἄπειρον μένοι ἐν αὐτῷ διὰ τιν' ἄλλην αἰτίαν, καὶ οὐχ ὅτι ἄπειρον καὶ στηρίζει αὐτὸ ἑαυτό.

ἅμα δὲ δηλὸν ὅτι κἂν ὅτιοῦν μέρος δέοι μένειν· ὥς γὰρ τὸ ἄπειρον ἐν ἑαυτῷ μένει στηρίζον, οὕτως κἂν ὅτιοῦν ληφθῇ μέρος ἐν ἑαυτῷ μενεῖ· τοῦ γὰρ ὅλου καὶ τοῦ μέρους ὁμοειδεῖς οἱ τόποι, οἷον ὅλης γῆς καὶ βώλου κάτω καὶ παντὸς πυρὸς καὶ σπινθῆρος ἄνω. ὥστε εἰ τοῦ ἀπείρου τόπος τὸ ἐν αὐτῷ, καὶ τοῦ μέρους ὁ αὐτός. μενεῖ ἄρα ἐν ἑαυτῷ.

ὅλως δὲ φανερόν ὅτι ἀδύνατον ἄπειρον ἅμα λέγειν σῶμα καὶ τόπον τινὰ εἶναι τοῖς σώμασιν, εἰ πᾶν σῶμα αἰσθητὸν ἢ βάρος ἔχει ἢ κουφότητα, καὶ εἰ μὲν βαρὺ, ἐπὶ τὸ μέσον ἔχει τὴν φορὰν φύσει, εἰ δὲ κοῦφον, ἄνω· ἀνάγκη γὰρ καὶ τὸ ἄπειρον, ἀδύνατον δὲ ἢ ἅπαν ὀποτερονοῦν ἢ τὸ ἥμισυ ἐκάτερον πεπονθέναι· πῶς γὰρ διελεῖς; ἢ πῶς τοῦ ἀπείρου ἔσται τὸ μὲν ἄνω τὸ δὲ κάτω, ἢ ἔσχατον καὶ μέσον;

ἔτι πᾶν σῶμα αἰσθητὸν ἐν τόπῳ, τόπου δὲ εἶδη καὶ διαφοραὶ τᾶνω καὶ κάτω καὶ ἔμπροσθεν καὶ ὀπίσθεν καὶ δεξιὸν καὶ ἀριστερόν· καὶ ταῦτα οὐ μόνον πρὸς ἡμᾶς καὶ θέσει, ἀλλὰ καὶ ἐν αὐτῷ τῷ ὅλῳ διώρισται. ἀδύνατον δ' ἐν τῷ ἀπείρῳ εἶναι ταῦτα. ἀπλῶς δ' εἰ ἀδύνατον [206a] τόπον ἄπειρον εἶναι, ἐν τόπῳ δὲ πᾶν σῶμα, ἀδύνατον ἄπειρον [τι] εἶναι σῶμα.

ἀλλὰ μὴν τό γε πού ἐν τόπῳ, καὶ τὸ ἐν τόπῳ πού. εἰ οὖν μηδὲ ποσὸν οἷόν τ' εἶναι τὸ ἄπειρον-ποσὸν γὰρ τί ἔσται, οἷον δίπηχυ ἢ τρίπηχυ· ταῦτα γὰρ σημαίνει τὸ ποσόν-οὕτω καὶ τὸ ἐν τόπῳ ὅτι πού, τοῦτο δὲ ἢ ἄνω ἢ κάτω ἢ ἐν ἄλλῃ τινὶ διαστάσει τῶν ἑξ, τούτων δ' ἕκαστον πέρας τί ἐστίν.

ὅτι μὲν οὖν ἐνεργεῖα οὐκ ἔστι σῶμα ἄπειρον, φανερόν ἐκ τούτων.

Κεφάλαιο 6

Ὅτι δ' εἰ μὴ ἔστιν ἄπειρον ἀπλῶς, πολλὰ ἀδύνατα συμβαίνει, δῆλον. τοῦ τε γὰρ χρόνου ἔσται τις ἀρχὴ καὶ τελευτὴ, καὶ τὰ μεγέθη οὐ διαιρετὰ εἰς μεγέθη, καὶ ἀριθμὸς οὐκ ἔσται ἄπειρος. ὅταν δὲ διωρισμένων οὕτως μηδετέρως φαίνεται ἐνδέχεσθαι, διαιτητοῦ δεῖ, καὶ δῆλον ὅτι πῶς μὲν ἔστιν πῶς δ' οὐ.

λέγεται δὴ τὸ εἶναι τὸ μὲν δυνάμει τὸ δὲ ἐντελεχείᾳ, καὶ τὸ ἄπειρον ἔστι μὲν προσθέσει ἔστι δὲ καὶ διαιρέσει.

τὸ δὲ μέγεθος ὅτι μὲν κατ' ἐνέργειαν οὐκ ἔστιν ἄπειρον, εἴρηται, διαιρέσει δ' ἐστίν· οὐ γὰρ χαλεπὸν ἀνελεῖν τὰς ἀτόμους γραμμάς· λείπεται οὖν δυνάμει εἶναι τὸ ἄπειρον.

οὐ δεῖ δὲ τὸ δυνάμει ὄν λαμβάνειν, ὥσπερ εἰ δυνατόν τοῦτ' ἀνδριάντα εἶναι, ὥς καὶ ἔσται τοῦτ' ἀνδριάς, οὕτω καὶ ἄπειρον ὃ ἔσται ἐνεργείᾳ· ἀλλ' ἐπεὶ πολλαχῶς τὸ εἶναι, ὥσπερ ἡ ἡμέρα ἔστι καὶ ὁ ἀγὼν τῷ ἀεὶ ἄλλο καὶ ἄλλο γίνεσθαι, οὕτω καὶ τὸ ἄπειρον (καὶ γὰρ ἐπὶ τούτων ἔστι καὶ δυνάμει καὶ ἐνεργείᾳ· Ὀλύμπια γὰρ ἔστι καὶ τῷ δύνασθαι τὸν ἀγῶνα γίνεσθαι καὶ τῷ γίνεσθαι).

ἄλλως δ' ἐν τε τῷ χρόνῳ δῆλον [τὸ ἄπειρον] καὶ ἐπὶ τῶν ἀνθρώπων, καὶ ἐπὶ τῆς διαιρέσεως τῶν μεγεθῶν. ὅλως μὲν γὰρ οὕτως ἔστιν τὸ ἄπειρον, τῷ ἀεὶ ἄλλο καὶ ἄλλο λαμβάνεσθαι, καὶ τὸ λαμβανόμενον μὲν ἀεὶ εἶναι πεπερασμένον, ἀλλ' ἀεὶ γε ἕτερον καὶ ἕτερον· [ἔτι τὸ εἶναι πλεοναχῶς λέγεται, ὥστε τὸ ἄπειρον οὐ δεῖ λαμβάνειν ὥς τόδε τι, οἷον ἄνθρωπον ἢ οἰκίαν, ἀλλ' ὥς ἡ ἡμέρα λέγεται καὶ ὁ ἀγὼν, οἷς τὸ εἶναι οὐχ ὥς οὐσία τις γέγονεν, ἀλλ' ἀεὶ ἐν γενέσει ἢ φθορᾷ, πεπερασμένον, ἀλλ' ἀεὶ γε ἕτερον καὶ ἕτερον.]

ἀλλ' ἐν [206b] τοῖς μεγέθεσιν ὑπομένοντος τοῦ ληφθέντος [τοῦτο συμβαίνει], ἐπὶ δὲ τοῦ χρόνου καὶ τῶν ἀνθρώπων φθειρομένων οὕτως ὥστε μὴ ἐπιλείπειν.

τὸ δὲ κατὰ πρόσθεσιν τὸ αὐτὸ ἐστὶ πῶς καὶ τὸ κατὰ διαίρεσιν· ἐν γὰρ τῷ πεπερασμένῳ κατὰ πρόσθεσιν γίνεται ἀντεστραμμένως· ἢ γὰρ διαιρούμενον ὁράται εἰς ἄπειρον, ταύτῃ προστιθέμενον φανέται πρὸς τὸ ὀρισμένον. ἐν γὰρ τῷ πεπερασμένῳ μεγέθει ἂν λαβὼν τις ὀρισμένον προσλαμβάνῃ τῷ αὐτῷ λόγῳ, μὴ τὸ αὐτό τι τοῦ ὅλου μέγεθος περιλαμβάνων, οὐ διέξεισι τὸ πεπερασμένον· ἐὰν δ' οὕτως αὕξη τὸν λόγον ὥστε ἀεὶ τι τὸ αὐτὸ περιλαμβάνειν μέγεθος, διέξεισι,

διὰ τὸ πᾶν πεπερασμένον ἀναρῆσθαι ὁτῶ οὖν ὀρισμένῳ.

ἄλλως μὲν οὖν οὐκ ἔστιν, οὕτως δ' ἔστι τὸ ἄπειρον, δυνάμει τε καὶ ἐπὶ καθαιρέσει (καὶ ἐντελεχεία δὲ ἔστιν, ὥς τὴν ἡμέραν εἶναι λέγομεν καὶ τὸν ἀγῶνα)· καὶ δυνάμει οὕτως ὥς ἡ ὕλη, καὶ οὐ καθ' αὐτό, ὥς τὸ πεπερασμένον. καὶ κατὰ πρόσθεσιν δὴ οὕτως ἄπειρον δυνάμει ἔστιν, ὃ ταῦτὸ λέγομεν τρόπον τινὰ εἶναι τῷ κατὰ διαίρεσιν· ἀεὶ μὲν γὰρ τι ἔξω ἔσται λαμβάνειν, οὐ μέντοι ὑπερβαλεῖ παντὸς μεγέθους, ὥσπερ ἐπὶ τὴν διαίρεσιν ὑπερβάλλει παντὸς ὀρισμένου καὶ ἀεὶ ἔσται ἔλαττον.

ὥστε δὲ παντὸς ὑπερβάλλειν κατὰ τὴν πρόσθεσιν, οὐδὲ δυνάμει οἶόν τε εἶναι, εἴπερ μὴ ἔστι κατὰ συμβεβηκὸς ἐντελεχεία ἄπειρον, ὥσπερ φασὶν οἱ φυσιολόγοι τὸ ἔξω σῶμα τοῦ κόσμου, οὗ ἡ οὐσία ἢ ἀήρ ἢ ἄλλο τι τοιοῦτον, ἄπειρον εἶναι. ἀλλ' εἰ μὴ οἶόν τε εἶναι ἄπειρον ἐντελεχεία σῶμα αἰσθητὸν οὕτω, φανερόν ὅτι οὐδὲ δυνάμει ἂν εἴη κατὰ πρόσθεσιν, ἀλλ' ἢ ὥσπερ εἴρηται ἀντεστραμμένως τῇ διαιρέσει, ἐπεὶ καὶ Πλάτων διὰ τοῦτο δύο τὰ ἄπειρα ἐποίησεν, ὅτι καὶ ἐπὶ τὴν αὐξὴν δοκεῖ ὑπερβάλλειν καὶ εἰς ἄπειρον ἰέναι καὶ ἐπὶ τὴν καθαίρεσιν. ποιήσας μέντοι δύο οὐ χρήται· οὔτε γὰρ ἐν τοῖς ἀριθμοῖς τὸ ἐπὶ τὴν καθαίρεσιν ἄπειρον ὑπάρχει (ἢ γὰρ μονὰς ἐλάχιστον), οὔτε <τὸ> ἐπὶ τὴν αὐξήν (μέχρι γὰρ δεκάδος ποιεῖ τὸν ἀριθμόν).

συμβαίνει δὲ τοῦναντίον εἶναι ἄπειρον ἢ ὥς λέγουσιν. [207a] οὐ γὰρ οὗ μηδὲν ἔξω, ἀλλ' οὗ ἀεὶ τι ἔξω ἐστί, τοῦτο ἄπειρόν ἐστιν. σημεῖον δέ· καὶ γὰρ τοὺς δακτυλίους ἀπείρους λέγουσι τοὺς μὴ ἔχοντας σφενδόνην, ὅτι αἰεὶ τι ἔξω ἔστι λαμβάνειν, καθ' ὁμοιότητα μὲν τινα λέγοντες, οὐ μέντοι κυρίως· δεῖ γὰρ τοῦτό τε ὑπάρχειν καὶ μηδέποτε τὸ αὐτὸ λαμβά νεσθαι· ἐν δὲ τῷ κύκλῳ οὐ γίνεταί οὕτως, ἀλλ' αἰεὶ τὸ ἐφεξῆς μόνον ἕτερον. ἄπειρον μὲν οὖν ἐστιν οὗ κατὰ τὸ ποσὸν λαμβάνουσιν αἰεὶ τι λαμβάνειν ἔστιν ἔξω. οὗ δὲ μηδὲν ἔξω, τοῦτ' ἔστι τέλειον καὶ ὅλον· οὕτω γὰρ ὀρίζομεθα τὸ ὅλον, οὗ μηδὲν ἄπεστιν, οἷον ἄνθρωπον ὅλον ἢ κιβώτιον. ὥσπερ δὲ τὸ καθ' ἕκαστον, οὕτω καὶ τὸ κυρίως, οἷον τὸ ὅλον οὗ μηδὲν ἐστιν ἔξω· οὗ δ' ἔστιν ἀπουσία ἔξω, οὐ πᾶν, ὃ τι ἂν ἀπῇ. ὅλον δὲ καὶ τέλειον ἢ τὸ αὐτὸ πᾶμπαν ἢ σύνεγγυς τὴν φύσιν. τέλειον δ' οὐδὲν μὴ ἔχον τέλος· τὸ δὲ τέλος πέρας.

διὸ βέλτιον οἰητέον Παρμενίδην Μελίσσου εἰρηκέναι· ὁ μὲν γὰρ τὸ ἄπειρον ὅλον φησὶν, ὁ δὲ τὸ ὅλον πεπεράνθαι, “μεσσόθεν

ἰσοπαλές”. οὐ γὰρ λίνον λίνῳ συνάπτειν ἐστὶν τῷ ἅπαντι καὶ ὅλῳ τὸ ἄπειρον, ἐπεὶ ἐντεῦθεν γε λαμβάνουσι τὴν σεμνότητα κατὰ τοῦ ἀπείρου, τὸ πάντα περιέχειν καὶ τὸ πᾶν ἐν ἑαυτῷ ἔχειν, διὰ τὸ ἔχειν τινὰ ὁμοιότητα τῷ ὅλῳ. ἔστι γὰρ τὸ ἄπειρον τῆς τοῦ μεγέθους τελειότητος ὕλη καὶ τὸ δυνάμει ὅλον, ἐντελεχεία δ’ οὐ, διαιρετὸν δ’ ἐπὶ τε τὴν καθαίρεσιν καὶ τὴν ἀντεστραμμένην πρόσθεσιν, ὅλον δὲ καὶ πεπερασμένον οὐ καθ’ αὐτὸ ἀλλὰ κατ’ ἄλλο· καὶ οὐ περιέχει ἀλλὰ περιέχεται, ἢ ἄπειρον. διὸ καὶ ἄγνωστον ἢ ἄπειρον· εἶδος γὰρ οὐκ ἔχει ἢ ὕλη. ὥστε φανερὸν ὅτι μᾶλλον ἐν μορίου λόγῳ τὸ ἄπειρον ἢ ἐν ὅλου· μόριον γὰρ ἢ ὕλη τοῦ ὅλου ὥσπερ ὁ χαλκὸς τοῦ χαλκοῦ ἀνδριάντος, ἐπεὶ εἴ γε περιέχει ἐν τοῖς αἰσθητοῖς, καὶ ἐν τοῖς νοητοῖς τὸ μέγα καὶ τὸ μικρὸν ἔδει περιέχειν τὰ νοητά. ἄτοπον δὲ καὶ ἀδύνατον τὸ ἄγνωστον καὶ ἀόριστον περιέχειν καὶ ὀρίζειν.

Κεφάλαιο 7

Κατὰ λόγον δὲ συμβαίνει καὶ τὸ κατὰ πρόσθεσιν μὲν μὴ εἶναι δοκεῖν ἄπειρον οὕτως ὥστε παντὸς ὑπερβάλλειν μεγέθους, ἐπὶ τὴν διαίρεσιν δὲ εἶναι (περιέχεται γὰρ ἡ ὕλη [207b] ἐντὸς καὶ τὸ ἄπειρον, περιέχει δὲ τὸ εἶδος)· εὐλόγως δὲ καὶ τὸ ἐν μὲν τῷ ἀριθμῷ εἶναι ἐπὶ μὲν τὸ ἐλάχιστον πέρας ἐπὶ δὲ τὸ πλεῖον ἀεὶ παντὸς ὑπερβάλλειν πλήθους, ἐπὶ δὲ τῶν μεγεθῶν τοῦναντίον ἐπὶ μὲν τὸ ἔλαττον παντὸς ὑπερβάλλειν μεγέθους ἐπὶ δὲ τὸ μεῖζον μὴ εἶναι μέγεθος ἄπειρον. αἴτιον δ' ὅτι τὸ ἐν ἐστὶν ἀδιαίρετον, ὃ τι περ ἂν ἐν ἧ (οἷον ἄνθρωπος εἷς ἄνθρωπος καὶ οὐ πολλοί), ὁ δ' ἀριθμὸς ἐστὶν ἓνα πλείω καὶ πόσ' ἄττα, ὥστ' ἀνάγκη στῆναι ἐπὶ τὸ ἀδιαίρετον (τὸ γὰρ τρία καὶ δύο παρώνυμα ὀνόματά ἐστιν, ὁμοίως δὲ καὶ τῶν ἄλλων ἀριθμῶν ἕκαστος), ἐπὶ δὲ τὸ πλεῖον ἀεὶ ἔστι νοῆσαι· ἄπειροι γὰρ αἱ διχοτομίαι τοῦ μεγέθους. ὥστε δυνάμει μὲν ἐστὶν, ἐνεργεία δ' οὐ· ἀλλ' ἀεὶ ὑπερβάλλει τὸ λαμβανόμενον παντὸς ὀρισμένου πλήθους. ἀλλ' οὐ χωριστὸς ὁ ἀριθμὸς οὗτος [τῆς διχοτομίας], οὐδὲ μένει ἡ ἀπειρία ἀλλὰ γίγνεται, ὥσπερ καὶ ὁ χρόνος καὶ ὁ ἀριθμὸς τοῦ χρόνου.

ἐπὶ δὲ τῶν μεγεθῶν τοῦναντίον ἐστὶ· διαιρεῖται μὲν γὰρ εἰς ἄπειρα τὸ συνεχές, ἐπὶ δὲ τὸ μεῖζον οὐκ ἔστιν ἄπειρον. ὅσον γὰρ ἐνδέχεται δυνάμει εἶναι, καὶ ἐνεργεία ἐνδέχεται τοσοῦτον εἶναι. ὥστε ἐπεὶ ἄπειρον οὐδὲν ἐστὶ μέγεθος αἰσθητόν, οὐκ ἐνδέχεται παντὸς ὑπερβολὴν εἶναι ὀρισμένου μεγέθους· εἴη γὰρ ἂν τι τοῦ οὐρανοῦ μεῖζον.

τὸ δ' ἄπειρον οὐ ταὐτὸν ἐν μεγέθει καὶ κινήσει καὶ χρόνῳ, ὥς μία τις φύσις, ἀλλὰ τὸ ὕστερον λέγεται κατὰ τὸ πρότερον, οἷον κίνησις μὲν ὅτι τὸ μέγεθος ἐφ' οὗ κινεῖται ἢ ἀλλοιοῦται ἢ αὐξάνεται, ὁ χρόνος δὲ διὰ τὴν κίνησιν. νῦν μὲν οὖν χρόμεθα τούτοις, ὕστερον δὲ ἐροῦμεν καὶ τί ἐστὶν ἕκαστον, καὶ διότι πᾶν μέγεθος εἰς μεγέθη διαιρετόν.

οὐκ ἀφαιρεῖται δ' ὁ λόγος οὐδὲ τοὺς μαθηματικοὺς τὴν θεωρίαν, ἀναιρῶν οὕτως εἶναι ἄπειρον ὥστε ἐνεργεία εἶναι ἐπὶ τὴν αὐξησιν ἀδιεξίτητον· οὐδὲ γὰρ νῦν δέονται τοῦ ἀπείρου (οὐ γὰρ χρῶνται), ἀλλὰ μόνον εἶναι ὅσῃν ἂν βούλωνται πεπερασμένην· τῷ δὲ μεγίστῳ μεγέθει τὸν αὐτὸν ἔστι τετμηθῆαι λόγον ὀπηλικονοῦν μέγεθος ἕτερον. ὥστε πρὸς μὲν τὸ δεῖξαι ἐκείνοις οὐδὲν διοίσει τὸ [δ'] εἶναι

ἐν τοῖς οὗσιν μεγέθεσιν.

ἐπεὶ δὲ τὰ αἷτια διήρηται τετραχῶς, φανερόν ὅτι ὡς ὕλη τὸ ἄπειρον αἷτιόν ἐστι, καὶ ὅτι [208a] τὸ μὲν εἶναι αὐτῷ στέρησις, τὸ δὲ καθ' αὐτὸ ὑποκείμενον τὸ συνεχὲς καὶ αἰσθητόν. φαίνονται δὲ πάντες καὶ οἱ ἄλλοι ὡς ὕλη χρώμενοι τῷ ἀπείρῳ· διὸ καὶ ἄτοπον τὸ περιέχον ποιεῖν αὐτὸ ἀλλὰ μὴ περιεχόμενον.

Κεφάλαιο 8

Λοιπὸν δ' ἐπελθεῖν καθ' οὓς λόγους τὸ ἄπειρον εἶναι δοκεῖ οὐ μόνον δυνάμει ἀλλ' ὥς ἀφωρισμένον· τὰ μὲν γὰρ ἐστὶν αὐτῶν οὐκ ἀναγκαῖα, τὰ δ' ἔχει τινὰς ἐτέρας ἀληθεῖς ἀπαντήσεις.

οὔτε γὰρ ἵνα ἡ γένεσις μὴ ἐπιλείπη, ἀναγκαῖον ἐνεργεῖα ἄπειρον εἶναι σῶμα αἰσθητόν· ἐνδέχεται γὰρ τὴν θατέρου φθορὰν θατέρου εἶναι γένεσιν, πεπερασμένου ὄντος τοῦ παντός.

ἔτι τὸ ἅπτεσθαι καὶ τὸ πεπεράνθαι ἕτερον. τὸ μὲν γὰρ πρὸς τι καὶ τινός (ἅπτεται γὰρ πᾶν τινός), καὶ τῶν πεπερασμένων τινὶ συμβέβηκεν, τὸ δὲ πεπερασμένον οὐ πρὸς τι· οὐδ' ἄψασθαι τῷ τυχόντι τοῦ τυχόντος ἔστιν. τὸ δὲ τῇ νοήσει πιστεύειν ἄτοπον· οὐ γὰρ ἐπὶ τοῦ πράγματος ἡ ὑπεροχὴ καὶ ἡ ἔλλειψις, ἀλλ' ἐπὶ τῆς νοήσεως. ἕκαστον γὰρ ἡμῶν νοήσκειν ἂν τις πολλαπλάσιον ἑαυτοῦ αὔξων εἰς ἄπειρον· ἀλλ' οὐ διὰ τοῦτο ἔξω [τοῦ ἄστεός] τίς ἐστὶν [ἡ] τοῦ τηλικούτου μεγέθους ὃ ἔχομεν, ὅτι νοεῖ τις, ἀλλ' ὅτι ἔστι· τοῦτο δὲ συμβέβηκεν. ὁ δὲ χρόνος καὶ ἡ κίνησις ἄπειρά ἐστι καὶ ἡ νόησις οὐχ ὑπομένοντος τοῦ λαμβανομένου.

μέγεθος δὲ οὔτε τῇ καθαιρέσει οὔτε τῇ νοητικῇ αὐξήσει ἔστιν ἄπειρον.

ἀλλὰ περὶ μὲν τοῦ ἀπείρου, πῶς ἔστι καὶ πῶς οὐκ ἔστι καὶ τί ἐστὶν, εἴρηται.

Βιβλίο 4

Κεφάλαιο 1

Ὅμοίως δ' ἀνάγκη καὶ περὶ τόπου τὸν φυσικὸν ὥσπερ καὶ περὶ ἀπείρου γνωρίζειν, εἰ ἔστιν ἢ μή, καὶ πῶς ἔστι, καὶ τί ἔστιν. τὰ τε γὰρ ὄντα πάντες ὑπολαμβάνουσιν εἶναι που (τὸ γὰρ μὴ ὄν οὐδαμοῦ εἶναι· ποῦ γὰρ ἔστι τραγέλαφος ἢ σφίγξ;) καὶ τῆς κινήσεως ἢ κοινῇ μάλιστα καὶ κυριωτάτῃ κατὰ τόπον ἔστιν, ἣν καλοῦμεν φοράν. ἔχει δὲ πολλὰς ἀπορίας τί ποτ' ἔστιν ὁ τόπος· οὐ γὰρ ταῦτόν φαίνεται θεωροῦσιν ἐξ ἀπάντων τῶν ὑπαρχόντων. ἔτι δ' οὐδ' ἔχομεν οὐδὲν παρὰ τῶν ἄλλων οὔτε προηπορημένον οὔτε προηυπορημένον περὶ [208b] αὐτοῦ. ὅτι μὲν οὖν ἔστιν ὁ τόπος, δοκεῖ δήλον εἶναι ἐκ τῆς ἀντιμεταστάσεως· ὅπου γὰρ ἔστι νῦν ὕδωρ, ἐνταῦθα ἐξελθόντος ὥσπερ ἐξ ἀγγείου πάλιν ἀῆρ ἔνεστιν, ὅτε δὲ τὸν αὐτὸν τόπον τοῦτον ἄλλο τι τῶν σωμάτων κατέχει· τοῦτο δὴ τῶν ἐγγιγνομένων καὶ μεταβαλλόντων ἕτερον πάντων εἶναι δοκεῖ· ἐν ᾧ γὰρ ἀῆρ ἔστι νῦν, ὕδωρ ἐν τούτῳ πρότερον ἦν, ὥστε δήλον ὡς ἦν ὁ τόπος τι καὶ ἡ χώρα ἕτερον ἀμφοῖν, εἰς ἣν καὶ ἐξ ἧς μετέβαλον.

ἔτι δὲ αἱ φοραὶ τῶν φυσικῶν σωμάτων καὶ ἀπλῶν, οἷον πυρὸς καὶ γῆς καὶ τῶν τοιούτων, οὐ μόνον δηλοῦσιν ὅτι ἐστὶ τι ὁ τόπος, ἀλλ' ὅτι καὶ ἔχει τινὰ δύναμιν. φέρεται γὰρ ἕκαστον εἰς τὸν αὐτοῦ τόπον μὴ κωλυόμενον, τὸ μὲν ἄνω τὸ δὲ κάτω· ταῦτα δ' ἐστὶ τόπου μέρη καὶ εἶδη, τό τε ἄνω καὶ τὸ κάτω καὶ αἱ λοιπαὶ τῶν ἐξ διαστάσεων. ἔστι δὲ τὰ τοιαῦτα οὐ μόνον πρὸς ἡμᾶς, τὸ ἄνω καὶ κάτω καὶ δεξιὸν καὶ ἀριστερόν· ἡμῖν μὲν γὰρ οὐκ αἰεὶ τὸ αὐτό, ἀλλὰ κατὰ τὴν θέσιν, ὅπως ἂν στραφῶμεν, γίγνεται (διὸ καὶ ταῦτο πολλάκις δεξιὸν καὶ ἀριστερόν καὶ ἄνω καὶ κάτω καὶ πρόσθεν καὶ ὀπίσθεν), ἐν δὲ τῇ φύσει διώριστα χωρὶς ἕκαστον. οὐ γὰρ ὅ τι ἔτυχεν ἔστι τὸ ἄνω, ἀλλ' ὅπου φέρεται τὸ πῦρ καὶ τὸ κοῦφον· ὁμοίως δὲ καὶ τὸ κάτω οὐχ ὅ τι ἔτυχεν, ἀλλ' ὅπου τὰ ἔχοντα βάρος καὶ τὰ γεηρά, ὡς οὐ τῇ θέσει διαφέροντα μόνον ἀλλὰ καὶ τῇ δυνάμει. δηλοῖ δὲ καὶ τὰ μαθηματικά· οὐκ ὄντα γὰρ ἐν τόπῳ ὅμως κατὰ τὴν θέσιν τὴν πρὸς ἡμᾶς ἔχει δεξιὰ καὶ ἀριστερὰ ὡς τὰ μόνον λεγόμενα διὰ θέσιν, οὐκ ἔχοντα φύσει τούτων ἕκαστον. ἔτι οἱ τὸ κενὸν φάσκοντες εἶναι τόπον λέγουσιν· τὸ γὰρ κενὸν τόπος ἂν εἴη ἐστερημένος σώματος.

ὅτι μὲν οὖν ἐστὶ τι ὁ τόπος παρὰ τὰ σώματα, καὶ πᾶν σῶμα αἰσθητὸν ἐν τόπῳ, διὰ τούτων ἂν τις ὑπολάβοι· δόξειε δ' ἂν καὶ

Ἡσίοδος ὀρθῶς λέγειν ποιήσας πρῶτον τὸ χάος. λέγει γοῦν

“πάντων μὲν πρώτιστα χάος γένητ’· αὐτὰρ ἔπειτα γαῖ’
εὐρύστερνος,” ὡς δέον πρῶτον ὑπάρξαι χώραν τοῖς οὕσι, διὰ τὸ
νομίζειν, ὥσπερ οἱ πολλοί, πάντα εἶναι· που καὶ ἐν τόπῳ. εἰ δ’ ἐστὶ
τοιοῦτο, θαυμαστή τις ἂν εἴη ἡ τοῦ τόπου δύναμις καὶ προτέρα
πάντων· οὐ γὰρ ἄνευ τῶν ἄλλων οὐδὲν ἔστιν, ἐκεῖνο δ’ [209a] ἄνευ
τῶν ἄλλων, ἀνάγκη πρῶτον εἶναι· οὐ γὰρ ἀπόλλυται ὁ τόπος τῶν ἐν
αὐτῷ φθειρομένων.

οὐ μὴν ἀλλ’ ἔχει γε ἀπορίαν, εἰ ἔστι, τί ἐστι, πότερον ὄγκος τις
σώματος ἢ τις ἑτέρα φύσις· ζητητέον γὰρ τὸ γένος αὐτοῦ πρῶτον.

διαστήματα μὲν οὖν ἔχει τρία, μῆκος καὶ πλάτος καὶ βάθος, οἷς
ὀρίζεται σῶμα πᾶν. ἀδύνατον δὲ σῶμα εἶναι τὸν τόπον· ἐν ταύτῳ γὰρ
ἂν εἴη δύο σώματα.

ἔτι εἵπερ ἔστι σῶματος τόπος καὶ χώρα, δῆλον ὅτι καὶ ἐπιφανείας
καὶ τῶν λοιπῶν περάτων· ὁ γὰρ αὐτὸς ἀρμόσει λόγος· ὅπου γὰρ ἦν
πρότερον τὰ τοῦ ὕδατος ἐπίπεδα, ἔσται πάλιν τὰ τοῦ ἀέρος. ἀλλὰ μὴν
οὐδεμίαν διαφορὰν ἔχομεν στιγμῆς καὶ τόπου στιγμῆς, ὥστ’ εἰ μηδὲ
ταύτης ἕτερόν ἐστιν ὁ τόπος, οὐδὲ τῶν ἄλλων οὐδενός, οὐδ’ ἐστὶ τι
παρ’ ἑκαστον τούτων ὁ τόπος.

τί γὰρ ἂν ποτε καὶ θείημεν εἶναι τὸν τόπον; οὔτε γὰρ στοιχεῖον
οὔτ’ ἐκ στοιχείων οἷόν τε εἶναι τοιαύτην ἔχοντα φύσιν, οὔτε τῶν σω
ματικῶν οὔτε τῶν ἀσωμάτων· μέγεθος μὲν γὰρ ἔχει, σῶμα δ’ οὐδέν·
ἔστι δὲ τὰ μὲν τῶν αἰσθητῶν στοιχεῖα σώματα, ἐκ δὲ τῶν νοητῶν
οὐδὲν γίγνεται μέγεθος.

ἔτι δὲ καὶ τίνος ἂν τις θείη τοῖς οὕσι αἴτιον εἶναι τὸν τόπον;
οὐδεμία γὰρ αὐτῷ ὑπάρχει αἰτία τῶν τεττάρων· οὔτε γὰρ ὡς ὕλη τῶν
ὄντων (οὐδὲν γὰρ ἐξ αὐτοῦ συνέστηκεν) οὔτε ὡς εἶδος καὶ λόγος τῶν
πραγμάτων οὔθ’ ὡς τέλος, οὔτε κινεῖ τὰ ὄντα.

ἔτι δὲ καὶ αὐτὸς εἰ ἔστι τι τῶν ὄντων, πού ἔσται. ἡ γὰρ Ζήνωνος
ἀπορία ζητεῖ τινὰ λόγον· εἰ γὰρ πᾶν τὸ ὄν ἐν τόπῳ, δῆλον ὅτι καὶ τοῦ
τόπου τόπος ἔσται, καὶ τοῦτο εἰς ἄπειρον.

ἔτι ὥσπερ ἅπαν σῶμα ἐν τόπῳ, οὕτω καὶ ἐν τόπῳ ἅπαντι σῶμα·
πῶς οὖν ἐροῦμεν περὶ τῶν αὐξανομένων; ἀνάγκη γὰρ ἐκ τούτων
συναύξεσθαι αὐτοῖς τὸν τόπον, εἰ μήτ’ ἐλάττων μήτε μείζων ὁ τόπος
ἐκάστου.

διὰ μὲν οὖν τούτων οὐ μόνον τί ἐστίν, ἀλλὰ καὶ εἰ ἔστιν, ἀπορεῖν
ἀναγκαῖον.

Κεφάλαιο 2

Ἐπεὶ δὲ τὸ μὲν καθ' αὐτὸ τὸ δὲ κατ' ἄλλο λέγεται, καὶ τόπος ὁ μὲν κοινός, ἐν ᾧ ἅπαντα τὰ σώματά ἐστιν, ὁ δ' ἴδιος, ἐν ᾧ πρῶτω (λέγω δὲ οἶον σὺ νῦν ἐν τῷ οὐρανῷ ὅτι ἐν τῷ ἀέρι οὗτος δ' ἐν τῷ οὐρανῷ, καὶ ἐν τῷ ἀέρι δὲ ὅτι ἐν τῇ γῇ, ὁμοίως δὲ καὶ ἐν ταύτῃ ὅτι ἐν τῷδε τῷ τόπῳ, [209b] ὃς περιέχει οὐδὲν πλέον ἢ σέ), εἰ δὴ ἐστὶν ὁ τόπος τὸ πρῶτον περιέχον ἕκαστον τῶν σωμάτων, πέρας τι ἂν εἴη, ὥστε δόξειεν ἂν τὸ εἶδος καὶ ἡ μορφή ἐκάστου ὁ τόπος εἶναι, ᾧ ὀρίζεται τὸ μέγεθος καὶ ἡ ὕλη ἡ τοῦ μεγέθους· τοῦτο γὰρ ἐκάστου πέρας. οὕτω μὲν οὖν σκοποῦσιν ὁ τόπος τὸ ἐκάστου εἶδος ἐστὶν· ἥ δὲ δοκεῖ ὁ τόπος εἶναι τὸ διάστημα τοῦ μεγέθους, ἡ ὕλη· τοῦτο γὰρ ἕτερον τοῦ μεγέθους, τοῦτο δ' ἐστὶ τὸ περιεχόμενον ὑπὸ τοῦ εἶδους καὶ ὀρισμένον, οἶον ὑπὸ ἐπιπέδου καὶ πέρατος, ἔστι δὲ τοιοῦτον ἡ ὕλη καὶ τὸ ἀόριστον· ὅταν γὰρ ἀφαιρεθῇ τὸ πέρας καὶ τὰ πάθη τῆς σφαίρας, λείπεται οὐδὲν παρὰ τὴν ὕλην.

διὸ καὶ Πλάτων τὴν ὕλην καὶ τὴν χώραν ταυτό φησιν εἶναι ἐν τῷ Τιμαίῳ· τὸ γὰρ μεταληπτικὸν καὶ τὴν χώραν ἐν καὶ ταυτόν. ἄλλον δὲ τρόπον ἐκεῖ τε λέγων τὸ μεταληπτικὸν καὶ ἐν τοῖς λεγομένοις ἀγράφοις δόγμασιν, ὅμως τὸν τόπον καὶ τὴν χώραν τὸ αὐτὸ ἀπεφήνατο. λέγουσι μὲν γὰρ πάντες εἶναί τι τὸν τόπον, τί δ' ἐστίν, οὗτος μόνος ἐπεχείρησεν εἰπεῖν.

εἰκότως δ' ἐκ τούτων σκοπουμένοις δόξειεν ἂν εἶναι χαλεπὸν γνωρίσαι τί ἐστὶν ὁ τόπος, εἴπερ τούτων ὁποτερονοῦν ἐστίν, εἴτε ἡ ὕλη εἴτε τὸ εἶδος· ἄλλως τε γὰρ τὴν ἀκροτάτην ἔχει θέαν, καὶ χωρὶς ἀλλήλων οὐ ῥᾶδιον γνωρίζειν.

ἀλλὰ μὴν ὅτι γε ἀδύνα τον ὁποτερονοῦν τούτων εἶναι τὸν τόπον, οὐ χαλεπὸν ἰδεῖν. τὸ μὲν γὰρ εἶδος καὶ ἡ ὕλη οὐ χωρίζεται τοῦ πράγματος, τὸν δὲ τόπον ἐνδέχεται· ἐν ᾧ γὰρ ἂν ἦν, ἐν τούτῳ πάλιν ὕδωρ, ὥσπερ ἔφαμεν, γίνεταί, ἀντιμεθισταμένων ἀλλήλοις τοῦ τε ὕδατος καὶ τοῦ ἀέρος, καὶ τῶν ἄλλων σωμάτων ὁμοίως, ὥστε οὔτε μόνιον οὐθ' ἕξις ἀλλὰ χωριστὸς ὁ τόπος ἐκάστου ἐστί. καὶ γὰρ δοκεῖ τοιοῦτό τι εἶναι ὁ τόπος οἶον τὸ ἀγγεῖον (ἔστι γὰρ τὸ ἀγγεῖον τόπος μεταφορητός)· τὸ δ' ἀγγεῖον οὐδὲν τοῦ πράγματός ἐστιν.

ἥ μὲν οὖν χωριστὸς [ἐστί] τοῦ πράγματος, ταύτῃ μὲν οὐκ ἐστὶ τὸ εἶδος· ἥ δὲ περιέχει, ταύτῃ δ' ἕτερος τῆς ὕλης.

δοκεῖ δὲ αἰεὶ τὸ ὄν που αὐτό τε εἶναί τι καὶ ἕτερόν τι ἐκτὸς αὐτοῦ. (Πλάτωνι μέντοι λεκτέον, εἰ δεῖ παρεκβάντας εἰπεῖν, διὰ τί οὐκ ἐν τόπῳ τὰ εἶδη καὶ οἱ ἀριθμοί, εἴπερ τὸ μεθεκτικὸν ὁ τόπος, εἴτε τοῦ μεγάλου [210a] καὶ τοῦ μικροῦ ὄντος τοῦ μεθεκτικοῦ εἴτε τῆς ὕλης, ὥσπερ ἐν τῷ Τιμαίῳ γέγραφεν.)

ἔτι πῶς ἂν φέροιτο εἰς τὸν αὐτοῦ τόπον, εἰ ὁ τόπος ἢ ὕλη ἢ τὸ εἶδος; ἀδύνατον γὰρ οὐ μὴ κίνησις μηδὲ τὸ ἄνω ἢ κάτω ἐστί, τόπον εἶναι. ὥστε ζητητέος ἐν τοῖς τοιούτοις ὁ τόπος.

εἰ δ' ἐν αὐτῷ ὁ τόπος (δεῖ γάρ, εἴπερ ἢ μορφή ἢ ὕλη), ἔσται ὁ τόπος ἐν τόπῳ· μεταβάλλει γὰρ ἅμα τῷ πράγματι καὶ κινεῖται καὶ τὸ εἶδος καὶ τὸ ἀόριστον, οὐκ αἰεὶ ἐν τῷ αὐτῷ ἀλλ' οὔτε καὶ τὸ πρᾶγμα· ὥστε τοῦ τόπου ἔσται τόπος.

ἔτι ὅταν ἐξ ἀέρος ὕδωρ γένηται, ἀπόλωλεν ὁ τόπος· οὐ γὰρ ἐν τῷ αὐτῷ τόπῳ τὸ γενόμενον σῶμα· τίς οὖν ἢ φθορά; ἐξ ὧν μὲν τοίνυν ἀναγκαῖον εἶναί τι τὸν τόπον, καὶ πάλιν ἐξ ὧν ἀπορήσειεν ἂν τις αὐτοῦ περὶ τῆς οὐσίας, εἴρηται.

Κεφάλαιο 3

Μετὰ δὲ ταῦτα ληπτέον ποσαχῶς ἄλλο ἐν ἄλλῳ λέγεται.

ἓνα μὲν δὴ τρόπον ὥς ὁ δάκτυλος ἐν τῇ χειρὶ καὶ ὅλως τὸ μέρος ἐν τῷ ὅλῳ.

ἄλλον δὲ ὥς τὸ ὅλον ἐν τοῖς μέρεσιν· οὐ γάρ ἐστι παρὰ τὰ μέρη τὸ ὅλον.

ἄλλον δὲ τρόπον ὥς ὁ ἄνθρωπος ἐν ζῳῳ καὶ ὅλως εἶδος ἐν γένει.

ἄλλον δὲ ὥς τὸ γένος ἐν τῷ εἶδει καὶ ὅλως τὸ μέρος τοῦ εἶδους ἐν τῷ λόγῳ.

ἔτι ὥς ἡ ὑγίεια ἐν θερμοῖς καὶ ψυχροῖς καὶ ὅλως τὸ εἶδος ἐν τῇ ὕλῃ.

ἔτι ὥς ἐν βασιλεῖ τὰ τῶν Ἑλλήνων καὶ ὅλως ἐν τῷ πρώτῳ κινήτικῳ.

ἔτι ὥς ἐν τῷ ἀγαθῷ καὶ ὅλως ἐν τῷ τέλει· τοῦτο δ' ἐστὶ τὸ οὐ ἕνεκα.

πάντων δὲ κυριώτατον τὸ ὥς ἐν ἀγγείῳ καὶ ὅλως ἐν τόπῳ.

ἀπορήσκει δ' ἂν τις, ἄρα καὶ αὐτό τι ἐν ἑαυτῷ ἐνδέχεται εἶναι, ἢ οὐδέν, ἀλλὰ πᾶν ἢ οὐδαμοῦ ἢ ἐν ἄλλῳ. διχῶς δὲ τοῦτ' ἔστιν, ἥτοι καθ' αὐτὸ ἢ καθ' ἕτερον.

ὅταν μὲν γὰρ ἦ μόρια τοῦ ὅλου τὸ ἐν ᾧ καὶ τὸ ἐν τούτῳ, λεχθήσεται τὸ ὅλον ἐν αὐτῷ· λέγεται γὰρ καὶ κατὰ τὰ μέρη, οἷον λευκὸς ὅτι ἡ ἐπιφάνεια λευκή, καὶ ἐπιστήμων ὅτι τὸ λογιστικόν. ὁ μὲν οὖν ἀμφορεὺς οὐκ ἔσται ἐν αὐτῷ, οὐδ' ὁ οἶνος· ὁ δὲ τοῦ οἴνου ἀμφορεὺς ἔσται· ὃ τε γὰρ καὶ ἐν ᾧ, ἀμφοτέρα τοῦ αὐτοῦ μόρια.

οὕτω μὲν οὖν ἐνδέχεται αὐτό τι ἐν αὐτῷ εἶναι, πρώτως δ' οὐκ ἐνδέχεται.

οἷον τὸ λευκὸν ἐν σώματι (ἢ [210b] ἐπιφάνεια γὰρ ἐν σώματι), ἢ δ' ἐπιστήμη ἐν ψυχῇ· κατὰ ταῦτα δὲ αἱ προσηγορίαι μέρη ὄντα, ὥς γε ἐν ἀνθρώπῳ (ὁ δὲ ἀμφορεὺς καὶ ὁ οἶνος χωρὶς μὲν ὄντα οὐ μέρη, ἅμα δέ· διὸ ὅταν ἦ μέρη, ἔσται αὐτὸ ἐν αὐτῷ)· οἷον τὸ λευκὸν ἐν ἀνθρώπῳ ὅτι ἐν σώματι, καὶ ἐν τούτῳ ὅτι ἐν ἐπιφανείᾳ· ἐν δὲ ταύτῃ οὐκέτι κατ' ἄλλο. καὶ ἕτερά γε τῷ εἶδει ταῦτα, καὶ ἄλλην φύσιν ἔχει ἐκάτερον καὶ δύναμιν, ἢ τ' ἐπιφάνεια καὶ τὸ λευκόν.

οὕτε δὴ ἐπακτικῶς σκοποῦσιν οὐδὲν ὁρῶμεν ἐν ἑαυτῷ κατ' οὐδένα τῶν διορισμῶν, τῷ τε λόγῳ δηλον ὅτι ἀδύνατον· δεήσει γὰρ

ἀμφοτέρα ἐκάτερον ὑπάρχειν, οἷον τὸν ἀμφορέα ἀγγεῖον τε καὶ οἶνον εἶναι καὶ τὸν οἶνον οἶνόν τε καὶ ἀμφορέα, εἴπερ ἐνδέχεται αὐτό τι ἐν αὐτῷ εἶναι. ὥστ' εἰ ὅτι μάλιστα ἐν ἀλλήλοις εἶεν, ὁ μὲν ἀμφορεὺς δέξεται τὸν οἶνον οὐχ ἢ αὐτὸς οἶνος ἀλλ' ἢ ἐκεῖνος, ὁ δ' οἶνος ἐνέσται ἐν τῷ ἀμφορεῖ οὐχ ἢ αὐτὸς ἀμφορεὺς ἀλλ' ἢ ἐκεῖνος. κατὰ μὲν οὖν τὸ εἶναι ὅτι ἕτερον, δηλον· ἄλλος γὰρ ὁ λόγος τοῦ ἐν ᾧ καὶ τοῦ ἐν τούτῳ. ἀλλὰ μὴν οὐδὲ κατὰ συμβεβηκὸς ἐνδέχεται· ἅμα γὰρ δύο ἐν ταύτῳ ἔσται· αὐτός τε γὰρ ἐν αὐτῷ ὁ ἀμφορεὺς ἔσται, εἰ οὐ ἢ φύσις δεκτική, τοῦτ' ἐνδέχεται ἐν αὐτῷ εἶναι, καὶ ἔτι ἐκεῖνο οὐ δεκτικόν, οἷον, εἰ οἶνου, ὁ οἶνος. ὅτι μὲν οὖν ἀδύνατον ἐν αὐτῷ τι εἶναι πρῶτως, δηλον· ὁ δὲ Ζήνων ἠπόρει, ὅτι εἰ ὁ τόπος ἐστὶ τι, ἐν τινι ἔσται, λύειν οὐ χαλεπὸν· οὐδὲ γὰρ κωλύει ἐν ἄλλῳ εἶναι τὸν πρῶτον τόπον, μὴ μέντοι ὥς ἐν τόπῳ ἐκείνῳ, ἀλλ' ὥσπερ ἢ μὲν ὑγίεια ἐν τοῖς θερμοῖς ὥς ἕξις, τὸ δὲ θερμὸν ἐν σώματι ὥς πάθος. ὥστε οὐκ ἀνάγκη εἰς ἄπειρον ἰέναι.

ἐκεῖνο δὲ φανερόν, ὅτι ἐπεὶ οὐδὲν τὸ ἀγγεῖον τοῦ ἐν αὐτῷ (ἕτερον γὰρ τὸ πρῶτως ὃ τε καὶ ἐν ᾧ), οὐκ ἂν εἴη οὔτε ἡ ὕλη οὔτε τὸ εἶδος ὁ τόπος, ἀλλ' ἕτερον. ἐκείνου γάρ τι ταῦτα τοῦ ἐνόντος, καὶ ἡ ὕλη καὶ ἡ μορφή. ταῦτα μὲν οὖν ἔστω διηπορημένα.

Κεφάλαιο 4

Τί δέ ποτ' ἐστὶν ὁ τόπος, ὃδ' ἂν γένοιτο φανερόν.

λάβωμεν δὲ περὶ αὐτοῦ ὅσα δοκεῖ ἀληθῶς καθ' αὐτὸ ὑπάρχειν αὐτῷ.

ἄξιον μὲν δὴ τὸν τόπον εἶναι

1. πρῶτον μὲν [211a] περιέχον ἐκεῖνο οὗ τόπος ἐστί,

2. καὶ μηδὲν τοῦ πράγματος, ἔτι τὸν πρῶτον μήτ' ἐλάττω μήτε μείζω,

3. ἔτι ἀπολείπεσθαι ἐκάστου καὶ χωριστὸν εἶναι,

4. πρὸς δὲ τούτοις πάντα τόπον ἔχειν τὸ ἄνω καὶ κάτω, καὶ φέρεσθαι φύσει καὶ μένειν ἐν τοῖς οἰκείοις τόποις ἕκαστον τῶν σωμάτων, τοῦτο δὲ ποιεῖν ἢ ἄνω ἢ κάτω.

ὑποκειμένων δὲ τούτων τὰ λοιπὰ θεωρητέον. δεῖ δὲ πειρᾶσθαι τὴν σκέψιν οὕτω ποιεῖσθαι ὅπως τὸ τί ἐστὶν ἀποδοθήσεται, ὥστε τὰ τε ἀπορούμενα λύεσθαι, καὶ τὰ δοκοῦντα ὑπάρχειν τῷ τόπῳ ὑπάρχοντα ἔσται, καὶ ἔτι τὸ τῆς δυσκολίας αἴτιον καὶ τῶν περὶ αὐτὸν ἀπορημάτων ἔσται φανερόν· οὕτω γὰρ ἂν κάλλιστα δεικνύοιτο ἕκαστον. πρῶτον μὲν οὖν δεῖ κατανοῆσαι ὅτι οὐκ ἂν ἐζητεῖτο ὁ τόπος, εἰ μὴ κίνησις ἦν ἢ κατὰ τόπον· διὰ γὰρ τοῦτο καὶ τὸν οὐρανὸν μάλιστ' οἴομεθα ἐν τόπῳ, ὅτι ἀεὶ ἐν κινήσει. ταύτης δὲ τὸ μὲν φορὰ, τὸ δὲ αὐξήσις καὶ φθίσις· καὶ γὰρ ἐν τῇ αὐξήσει καὶ φθίσει μεταβάλλει, καὶ ὁ πρότερον ἦν ἐνταῦθα, πάλιν μεθέστηκεν εἰς ἕλαττον ἢ μείζον.

ἔστι δὲ κινούμενον τὸ μὲν καθ' αὐτὸ ἐνεργείᾳ, τὸ δὲ κατὰ συμβεβηκός· κατὰ συμβεβηκός δὲ τὸ μὲν ἐνδεχόμενον κινεῖσθαι καθ' αὐτό, οἷον τὰ μόρια τοῦ σώματος καὶ ὁ ἐν τῷ πλοίῳ ἦλος, τὰ δ' οὐκ ἐνδεχόμενα ἄλλ' αἰεὶ κατὰ συμβεβηκός, οἷον ἡ λευκότης καὶ ἡ ἐπιστήμη· ταῦτα γὰρ οὕτω μεταβέβληκε τὸν τόπον, ὅτι ἐν ᾧ ὑπάρχουσι μεταβάλλει.

ἐπεὶ δὲ λέγομεν εἶναι ὡς ἐν τόπῳ ἐν τῷ οὐρανῷ, διότι ἐν τῷ ἀέρι οὗτος δὲ ἐν τῷ οὐρανῷ· καὶ ἐν τῷ ἀέρι δὲ οὐκ ἐν παντί, ἀλλὰ διὰ τὸ ἔσχατον αὐτοῦ καὶ περιέχον ἐν τῷ ἀέρι φανέν εἶναι (εἰ γὰρ πᾶς ὁ ἀήρ

τόπος, οὐκ ἂν ἴσος εἴη ἐκάστου ὁ τόπος καὶ ἕκαστον, δοκεῖ δέ γε ἴσος εἶναι, τοιοῦτος δ' ὁ πρῶτος ἐν ᾧ ἐστίν)·

ὅταν μὲν οὖν μὴ διηρημένον ἦ τὸ περιέχον ἀλλὰ συνεχές, οὐχ ὡς ἐν τόπῳ λέγεται εἶναι ἐν ἐκείνῳ, ἀλλ' ὡς μέρος ἐν ὅλῳ· ὅταν δὲ διηρημένον ἦ καὶ ἀπτόμενον, ἐν πρώτῳ ἐστὶ τῷ ἐσχάτῳ τοῦ περιέχοντος, ὃ οὔτε ἐστὶ μέρος τοῦ ἐν αὐτῷ οὔτε μεῖζον τοῦ διαστήματος ἀλλ' ἴσον· ἐν γὰρ τῷ αὐτῷ τὰ ἐσχατα τῶν ἀπτομένων.

καὶ συνεχές μὲν ὃν οὐκ ἐν ἐκείνῳ κινεῖται ἀλλὰ μετ' ἐκείνου, διηρημένον δὲ ἐν ἐκείνῳ· καὶ ἕαν τε κινῆται τὸ περιέχον ἕαν τε μὴ, [211b] οὐδὲν ἦττον.

[ἔτι ὅταν μὴ διηρημένον ἦ, ὡς μέρος ἐν ὅλῳ λέγεται, οἷον ἐν τῷ ὀφθαλμῷ ἢ ὄψις ἢ ἐν τῷ σώματι ἢ χεῖρ, ὅταν δὲ διηρημένον, οἷον ἐν τῷ κάδῳ τὸ ὕδωρ ἢ ἐν τῷ κεραμίῳ ὁ οἶνος· ἢ μὲν γὰρ χεῖρ μετὰ τοῦ σώματος κινεῖται, τὸ δὲ ὕδωρ ἐν τῷ κάδῳ.]

ἤδη τοίνυν φανερόν ἐκ τούτων τί ἐστίν ὁ τόπος. σχεδὸν γὰρ τέτταρά ἐστιν ὧν ἀνάγκη τὸν τόπον ἔν τι εἶναι· ἢ γὰρ μορφῇ ἢ ὕλῃ ἢ διάστημά τι τὸ μεταξὺ τῶν ἐσχάτων, ἢ τὰ ἐσχατα εἰ μὴ ἔστι μηδὲν διάστημα παρὰ τὸ τοῦ ἐγγιγνομένου σώματος μέγεθος.

τούτων δ' ὅτι οὐκ ἐνδέχεται τὰ τρία εἶναι, φανερόν· ἀλλὰ διὰ μὲν τὸ περιέχειν δοκεῖ ἢ μορφῇ εἶναι· ἐν ταυτῷ γὰρ τὰ ἐσχατα τοῦ περιέχοντος καὶ τοῦ περιεχομένου. ἔστι μὲν οὖν ἅμφω πέρατα, ἀλλ' οὐ τοῦ αὐτοῦ, ἀλλὰ τὸ μὲν εἶδος τοῦ πράγματος, ὁ δὲ τόπος τοῦ περιέχοντος σώματος.

διὰ δὲ τὸ μεταβάλλειν πολλάκις μένοντος τοῦ περιέχοντος τὸ περιεχόμενον καὶ διηρημένον, οἷον ἐξ ἀγγείου ὕδωρ, τὸ μεταξὺ εἶναι τι δοκεῖ διάστημα, ὡς ὃν τι παρὰ τὸ σῶμα τὸ μεθιστάμενον. τὸ δ' οὐκ ἔστιν, ἀλλὰ τὸ τυχὸν ἐμπίπτει σῶμα τῶν μεθισταμένων καὶ ἅπτεσθαι πεφυκότων.

εἰ δ' ἦν τι [τὸ] διάστημα <καθ' αὐ>τὸ πεφυκὸς <εἶναι> καὶ μένον, ἐν τῷ αὐτῷ ἅπειροι ἂν ἦσαν τόποι (μεθισταμένου γὰρ τοῦ ὕδατος καὶ τοῦ ἀέρος ταὐτὸ ποιήσει τὰ μόρια πάντα ἐν τῷ ὅλῳ ὅπερ ἅπαν τὸ ὕδωρ ἐν τῷ ἀγγεῖῳ)· ἅμα δὲ καὶ ὁ τόπος ἔσται μεταβάλλων· ὥστ' ἔσται τοῦ τόπου τ' ἄλλος τόπος, καὶ πολλοὶ τόποι ἅμα ἔσονται. οὐκ ἔστι δὲ ἄλλος ὁ τόπος τοῦ μορίου, ἐν ᾧ κινεῖται, ὅταν ὅλον τὸ ἀγγεῖον μεθίστηται, ἀλλ' ὁ αὐτός· ἐν ᾧ γὰρ ἔστιν, ἀντιμεθίσταται ὁ ἀῆρ καὶ τὸ ὕδωρ ἢ τὰ μόρια τοῦ ὕδατος, ἀλλ' οὐκ ἐν ᾧ γίνονται τόπῳ, ὅς μέρος ἐστὶ τοῦ τόπου ὅς ἐστι τόπος ὅλου τοῦ οὐρανοῦ.

καὶ ἡ ὕλη δὲ δόξειεν ἂν εἶναι τόπος, εἴ γε ἐν ἡρεμοῦντί τις σκοποῖ καὶ μὴ κεχωρισμένῳ ἀλλὰ συνεχεῖ. ὥσπερ γὰρ εἰ ἀλλοιοῦται, ἔστι τι ὃ νῦν μὲν λευκὸν πάλαι δὲ μέλαν, καὶ νῦν μὲν σκληρὸν πάλαι δὲ μαλακόν (διό φαμεν εἶναι τι τὴν ὕλην), οὕτω καὶ ὁ τόπος διὰ τοιαύτης τινὸς εἶναι δοκεῖ φαντασίας, πλὴν ἐκεῖνο μὲν διότι ὃ ἦν ἀήρ, τοῦτο νῦν ὕδωρ, ὁ δὲ τόπος ὅτι οὗ ἦν ἀήρ, ἐνταῦθ' ἔστι νῦν ὕδωρ. ἀλλ' ἡ μὲν ὕλη, [212a] ὥσπερ ἐλέγχθη ἐν τοῖς πρότερον, οὔτε χωριστὴ τοῦ πράγματος οὔτε περιέχει, ὁ δὲ τόπος ἄμφω.

εἰ τοίνυν μηδὲν τῶν τριῶν ὁ τόπος ἐστίν, μήτε τὸ εἶδος μήτε ἡ ὕλη μήτε διάστημά τι ἀεὶ ὑπάρχον ἕτερον παρὰ τὸ τοῦ πράγματος τοῦ μεθισταμένου, ἀνάγκη τὸν τόπον εἶναι τὸ λοιπὸν τῶν τεττάρων, τὸ πέρας τοῦ περιέχοντος σώματος <καθ' ὃ συνάπτει τῷ περιεχομένῳ>. λέγω δὲ τὸ περιεχόμενον σῶμα τὸ κινητὸν κατὰ φοράν.

δοκεῖ δὲ μέγα τι εἶναι καὶ χαλεπὸν ληφθῆναι ὁ τόπος διὰ τε τὸ παρεμφαίνεσθαι τὴν ὕλην καὶ τὴν μορφήν, καὶ διὰ τὸ ἐν ἡρεμοῦντι τῷ περιέχοντι γίνεσθαι τὴν μετάστασιν τοῦ φερομένου· ἐνδέχεσθαι γὰρ φαίνεται εἶναι διάστημα μεταξὺ ἄλλο τι τῶν κινουμένων μεγεθῶν. συμβάλλεται δέ τι καὶ ὁ ἀήρ δοκῶν ἀσώματος εἶναι· φαίνεται γὰρ οὐ μόνον τὰ πέρατα τοῦ ἀγγείου εἶναι ὁ τόπος, ἀλλὰ καὶ τὸ μεταξὺ ὡς κενὸν <ὄν>. ἔστι δ' ὥσπερ τὸ ἀγγεῖον τόπος μεταφορητός, οὕτως καὶ ὁ τόπος ἀγγεῖον ἀμετακίνητον. διὸ ὅταν μὲν ἐν κινουμένῳ κινῆται καὶ μεταβάλλῃ τὸ ἐντός, οἷον ἐν ποταμῷ πλοῖον, ὡς ἀγγεῖον χρῆται μᾶλλον ἢ τόπῳ τῷ περιέχοντι. βούλεται δ' ἀκίνητος εἶναι ὁ τόπος· διὸ ὁ πᾶς μᾶλλον ποταμὸς τόπος, ὅτι ἀκίνητος ὁ πᾶς.

ὥστε τὸ τοῦ περιέχοντος πέρας ἀκίνητον πρῶτον, τοῦτ' ἐστίν ὁ τόπος.

καὶ διὰ τοῦτο τὸ μέσον τοῦ οὐρανοῦ καὶ τὸ ἔσχατον τὸ πρὸς ἡμᾶς τῆς κύκλῳ φορᾶς δοκεῖ εἶναι τὸ μὲν ἄνω τὸ δὲ κάτω μάλιστα πᾶσι κυρίως, ὅτι τὸ μὲν αἰεὶ μένει, τοῦ δὲ κύκλῳ τὸ ἔσχατον ὡσαύτως ἔχον μένει. ὥστ' ἐπεὶ τὸ μὲν κοῦφον τὸ ἄνω φερόμενόν ἐστι φύσει, τὸ δὲ βαρὺ τὸ κάτω, τὸ μὲν πρὸς τὸ μέσον περιέχον πέρας κάτω ἐστίν, καὶ αὐτὸ τὸ μέσον, τὸ δὲ πρὸς τὸ ἔσχατον ἄνω, καὶ αὐτὸ τὸ ἔσχατον·

καὶ διὰ τοῦτο δοκεῖ ἐπίπεδόν τι εἶναι καὶ οἷον ἀγγεῖον ὁ τόπος καὶ περιέχον.

ἔτι ἅμα τῷ πράγματι ὁ τόπος· ἅμα γὰρ τῷ πεπερασμένῳ τὰ
πέρατα.

Κεφάλαιο 5

Ἵδι μὲν οὖν σώματι ἔστι τι ἐκτὸς σῶμα περιέχον αὐτό, τοῦτο ἔστιν ἐν τόπῳ, ᾧ δὲ μή, οὐ. διὸ κὰν ὕδωρ γένηται τοιοῦτο, τὰ μὲν μόρια κινήσεται αὐτοῦ (περιέχεται γὰρ ὑπ' ἀλλήλων), τὸ δὲ πᾶν ἔστι μὲν ὡς κινήσεται ἔστι δ' ὡς οὐ. ὡς μὲν γὰρ ὅλον, ἅμα τὸν τόπον οὐ μεταβάλλει, κύκλῳ [212b] δὲ κινεῖται-τῶν μορίων γὰρ οὗτος ὁ τόπος-καὶ ἄνω μὲν καὶ κάτω οὐ, κύκλῳ δ' ἔνια· τὰ δὲ καὶ ἄνω καὶ κάτω, ὅσα ἔχει πύκνωσιν καὶ μάνωσιν.

ὥσπερ δ' ἐλέγχθη, τὰ μὲν ἔστιν ἐν τόπῳ κατὰ δύναμιν, τὰ δὲ κατ' ἐνέργειαν. διὸ ὅταν μὲν συνεχὲς ᾗ τὸ ὁμοιομερές, κατὰ δύναμιν ἐν τόπῳ τὰ μέρη, ὅταν δὲ χωρισθῇ μὲν ἅπτηται δ' ὥσπερ σωρός, κατ' ἐνέργειαν. καὶ τὰ μὲν καθ' αὐτά (οἷον πᾶν σῶμα ἢ κατὰ φορὰν ἢ κατ' αὔξησιν κινήτῳ καθ' αὐτό που, ὁ δ' οὐρανός, ὥσπερ εἴρηται, οὐ που ὅλος οὐδ' ἐν τινι τόπῳ ἐστίν, εἴ γε μηδὲν αὐτὸν περιέχει σῶμα· ἐφ' ᾧ δὲ κινεῖται, ταύτῃ καὶ τόπος ἔστι τοῖς μορίοις· ἕτερον γὰρ ἑτέρου ἐχόμενον τῶν μορίων ἐστίν)·

τὰ δὲ κατὰ συμβεβηκός, οἷον ἡ ψυχὴ καὶ ὁ οὐρανός· τὰ γὰρ μόρια ἐν τόπῳ πως πάντα· ἐπὶ τῷ κύκλῳ γὰρ περιέχει ἄλλο ἄλλο. διὸ κινεῖται μὲν κύκλῳ τὸ ἄνω, τὸ δὲ πᾶν οὐ που. τὸ γὰρ που αὐτό τέ ἐστὶ τι, καὶ ἔτι ἄλλο τι δεῖ εἶναι παρὰ τοῦτο ἐν ᾧ, ὃ περιέχει· παρὰ δὲ τὸ πᾶν καὶ ὅλον οὐδὲν ἔστιν ἔξω τοῦ παντός, καὶ διὰ τοῦτο ἐν τῷ οὐρανῷ πάντα· ὁ γὰρ οὐρανός τὸ πᾶν ἴσως. ἔστι δ' ὁ τόπος οὐχ ὁ οὐρανός, ἀλλὰ τοῦ οὐρανοῦ τι τὸ ἔσχατον καὶ ἀπτόμενον τοῦ κινήτου σώματος [πέρας ἡρεμοῦν]. καὶ διὰ τοῦτο ἡ μὲν γῆ ἐν τῷ ὕδατι, τοῦτο δ' ἐν τῷ ἁέρι, οὗτος δ' ἐν τῷ αἰθέρι, ὁ δ' αἰθήρ ἐν τῷ οὐρανῷ, ὁ δ' οὐρανός οὐκέτι ἐν ἄλλῳ.

φανερὸν δ' ἐκ τούτων ὅτι καὶ αἱ ἀπορίαι πᾶσαι λύονται· ἂν οὕτω λεγομένου τοῦ τόπου.

1. οὔτε γὰρ συναύξεσθαι ἀνάγκη τὸν τόπον,
2. οὔτε στιγμῆς εἶναι τόπον, οὔτε δύο σώματα ἐν τῷ αὐτῷ τόπῳ,
3. οὔτε διάστημά τι εἶναι σωματικόν (σῶμα γὰρ τὸ μεταξὺ τοῦ τόπου τὸ τυχόν, ἀλλ' οὐ διάστημα σώματος).
4. καὶ ἔστιν ὁ τόπος καὶ πού, οὐχ ὡς ἐν τόπῳ δέ, ἀλλ' ὡς τὸ πέρασ

ἐν τῷ πεπερασμένῳ. οὐ γὰρ πᾶν τὸ ὄν ἐν τόπῳ, ἀλλὰ τὸ κινητὸν σῶμα.

5. καὶ φέρεται δὴ εἰς τὸν αὐτοῦ τόπον ἕκαστον εὐλόγως (ὃ γὰρ ἐφεξῆς καὶ ἀπτόμενον μὴ βία, συγγενές· καὶ συμπεφυκότα μὲν ἀπαθῆ, ἀπτόμενα δὲ παθητικὰ καὶ ποιητικὰ ἀλλήλων)· καὶ μένει δὴ φύσει πᾶν ἐν τῷ οἰκείῳ τόπῳ οὐκ ἀλόγως· καὶ γὰρ τὸ μέρος, τὸ δὲ ἐν [τῷ] τόπῳ ὡς διαιρετὸν μέρος πρὸς ὅλον ἐστίν, οἷον ὅταν ὕδατος κινήσῃ τις [213a] μόριον ἢ ἀέρος. οὕτω δὲ καὶ ἀήρ ἔχει πρὸς ὕδωρ· οἷον ὕλη γάρ, τὸ δὲ εἶδος, τὸ μὲν ὕδωρ ὕλη ἀέρος, ὃ δ' ἀήρ οἷον ἐνεργεία τις ἐκείνου· τὸ γὰρ ὕδωρ δυνάμει ἀήρ ἐστίν, ὃ δ' ἀήρ δυνάμει ὕδωρ ἄλλον τρόπον.

διοριστέον δὲ περὶ τούτων ὕστερον· ἀλλὰ διὰ τὸν καιρὸν ἀνάγκη μὲν εἰπεῖν, ἀσαφῶς δὲ νῦν ῥηθὲν τότε ἔσται σαφέστερον. εἰ οὖν τὸ αὐτὸ [ἡ] ὕλη καὶ ἐντελέχεια (ὕδωρ γὰρ ἅμφω, ἀλλὰ τὸ μὲν δυνάμει τὸ δ' ἐντελεχεία), ἔχοι ἂν ὡς μόριόν πως πρὸς ὅλον. διὸ καὶ τούτοις ἀφή ἔστιν· σύμφυσις δέ, ὅταν ἅμφω ἐνεργεῖα ἐν γένωνται. καὶ περὶ μὲν τόπου, καὶ ὅτι ἔστι καὶ τί ἐστίν, εἴρηται.

Κεφάλαιο 6

Τὸν αὐτὸν δὲ τρόπον ὑποληπτέον εἶναι τοῦ φυσικοῦ θεωρῆσαι καὶ περὶ κενοῦ, εἰ ἔστιν ἢ μὴ, καὶ πῶς ἔστι, καὶ τί ἔστιν, ὥσπερ καὶ περὶ τόπου· καὶ γὰρ παραπλησίαν ἔχει τὴν τε ἀπιστίαν καὶ τὴν πίστιν διὰ τῶν ὑπολαμβανομένων· οἷον γὰρ τόπον τινὰ καὶ ἀγγεῖον τὸ κενὸν τιθέασιν οἱ λέγοντες, δοκεῖ δὲ πλήρες μὲν εἶναι, ὅταν ἔχη τὸν ὄγκον οὗ δεκτικόν ἔστιν, ὅταν δὲ στερηθῇ, κενόν, ὡς τὸ αὐτὸ μὲν ὄν κενὸν καὶ πλήρες καὶ τόπον, τὸ δ' εἶναι αὐτοῖς οὐ ταῦτ' ὄν.

ἄρξασθαι δὲ δεῖ τῆς σκέψεως λαβοῦσιν ἃ τε λέγουσιν οἱ φάσκοντες εἶναι καὶ πάλιν ἃ λέγουσιν οἱ μὴ φάσκοντες, καὶ τρίτον τὰς κοινὰς περὶ αὐτῶν δόξας.

οἱ μὲν οὖν δεικνύναι πειρώμενοι ὅτι οὐκ ἔστιν, οὐχ ὃ βούλονται λέγειν οἱ ἄνθρωποι κενόν, τοῦτ' ἐξελέγχουσιν, ἀλλ' <ὃ> ἁμαρτάνοντες λέγουσιν. ὥσπερ Ἀναξαγόρας καὶ οἱ τοῦτον τὸν τρόπον ἐλέγχοντες. ἐπιδεικνύουσι γὰρ ὅτι ἔστιν τι ὃ ἀήρ, στρεβλοῦντες τοὺς ἀσκούς καὶ δεικνύντες ὡς ἰσχυρὸς ὁ ἀήρ, καὶ ἐναπολαμβάνοντες ἐν ταῖς κλεψύδραις. οἱ δὲ ἄνθρωποι βούλονται κενὸν εἶναι διάστημα ἐν ᾧ μηδὲν ἔστι σῶμα αἰσθητόν· οἰόμενοι δὲ τὸ ὄν ἅπαν εἶναι σῶμα φασίν, ἐν ᾧ ὅλως μηδὲν ἔστι, τοῦτ' εἶναι κενόν, διὸ τὸ πλήρες ἀέρος κενὸν εἶναι. οὐκ οὖν τοῦτο δεῖ δεικνύναι, ὅτι ἔστι τι ὃ ἀήρ, ἀλλ' ὅτι οὐκ ἔστι διάστημα ἕτερον τῶν σωμάτων, οὔτε χωριστὸν οὔτε ἐνεργεῖα ὄν, ὃ διαλαμβάνει τὸ πᾶν σῶμα ὥστε εἶναι μὴ συνεχές, καθάπερ λέγουσιν Δημόκριτος καὶ Λεύκιππος καὶ [213b] ἕτεροι πολλοὶ τῶν φυσιολόγων, ἢ καὶ εἰ τι ἔξω τοῦ παντὸς σώματός ἔστιν ὄντος συνεχοῦς.

οὗτοι μὲν οὖν οὐ κατὰ θύρας πρὸς τὸ πρόβλημα ἀπαντῶσιν, ἀλλ' οἱ φάσκοντες εἶναι μᾶλλον.

λέγουσιν δ' ἐν μὲν ὅτι κίνησις ἢ κατὰ τόπον οὐκ ἂν εἴη (αὕτη δ' ἔστι φορὰ καὶ αὐξησις)· οὐ γὰρ ἂν δοκεῖν εἶναι κίνησιν, εἰ μὴ εἴη κενόν· τὸ γὰρ πλήρες ἀδύνατον εἶναι δέξασθαι τι. εἰ δὲ δέξεται καὶ ἔσται δύο ἐν ταύτῳ, ἐνδέχοιτ' ἂν καὶ ὅποσαοῦν εἶναι ἅμα σώματα· τὴν γὰρ διαφοράν, δι' ἣν οὐκ ἂν εἴη τὸ λεχθέν, οὐκ ἔστιν εἰπεῖν. εἰ δὲ τοῦτο ἐνδέχεται, καὶ τὸ μικρότατον δέξεται τὸ μέγιστον· πολλὰ γὰρ μικρὰ τὸ μέγα ἐστίν· ὥστε εἰ πολλὰ ἴσα ἐνδέχεται ἐν ταύτῳ εἶναι, καὶ πολλὰ ἄνισα.

Μέλισσος μὲν οὖν καὶ δείκνυσιν ὅτι τὸ πᾶν ἀκίνητον ἐκ τούτων· εἰ γὰρ κινήσεται, ἀνάγκη εἶναι (φησί) κενόν, τὸ δὲ κενὸν οὐ τῶν ὄντων.

ἓνα μὲν οὖν τρόπον ἐκ τούτων δεικνύουσιν ὅτι ἔστιν τι κενόν, ἄλλον δ' ὅτι φαίνεται ἓνα συνιόντα καὶ πιλούμενα, οἶον καὶ τὸν οἶνον φασὶ δέχεσθαι μετὰ τῶν ἀσκῶν τοὺς πίθους, ὥς εἰς τὰ ἐνόντα κενὰ συνιόντος τοῦ πυκνουμένου σώματος.

ἔτι δὲ καὶ ἡ αὐξησις δοκεῖ πᾶσι γίγνεσθαι διὰ κενοῦ· τὴν μὲν γὰρ τροφήν σῶμα εἶναι, δύο δὲ σώματα ἀδύνατον ἅμα εἶναι. μαρτύριον δὲ καὶ τὸ περὶ τῆς τέφρας ποιοῦνται, ἡ δέχεται ἴσον ὕδωρ ὅσον τὸ ἀγγεῖον τὸ κενόν. εἶναι δ' ἔφασαν καὶ οἱ Πυθαγόρειοι κενόν, καὶ ἐπεισιέναι αὐτὸ τῷ οὐρανῷ ἐκ τοῦ ἀπείρου πνεύματος ὥς ἀναπνέοντι καὶ τὸ κενόν, ὃ διορίζει τὰς φύσεις, ὥς ὄντος τοῦ κενοῦ χωρισμοῦ τινὸς τῶν ἐφεξῆς καὶ [τῆς] διορίσεως· καὶ τοῦτ' εἶναι πρῶτον ἐν τοῖς ἀριθμοῖς· τὸ γὰρ κενὸν διορίζει τὴν φύσιν αὐτῶν.

ἐξ ὧν μὲν οὖν οἱ μὲν φασιν εἶναι οἱ δ' οὐ φασι, σχεδὸν τοιαῦτα καὶ τοσαῦτά ἐστιν.

Κεφάλαιο 7

Πρὸς δὲ τὸ ποτέρως ἔχει δεῖ λαβεῖν τί σημαίνει τοῦνομα.

δοκεῖ δὴ τὸ κενὸν τόπος εἶναι ἐν ᾧ μηδέν ἐστι. τούτου δ' αἴτιον ὅτι τὸ ὄν σῶμα οἶονται εἶναι, πᾶν δὲ σῶμα ἐν τόπῳ, κενὸν δὲ ἐν ᾧ τόπῳ μηδέν ἐστι σῶμα, ὥστ' εἴ που μὴ ἔστι σῶμα, οὐδὲν εἶναι ἐνταῦθα.

σῶμα δὲ πάλιν ἅπαν [214a] οἶονται εἶναι ἀπτόν· τοιοῦτο δὲ ὃ ἂν ἔχη βάρος ἢ κουφότητα.

συμβαίνει οὖν ἐκ συλλογισμοῦ τοῦτο εἶναι κενόν, ἐν ᾧ μηδέν ἐστι βαρὺ ἢ κοῦφον.

ταῦτα μὲν οὖν, ὥσπερ εἵπομεν καὶ πρότερον, ἐκ συλλογισμοῦ συμβαίνει. ἄτοπον δὲ εἰ ἡ στιγμή κενόν· δεῖ γὰρ τόπον εἶναι ἐν ᾧ σώματος ἔστι διὰ στήμα ἀπτοῦ.

ἀλλ' οὖν φαίνεται λέγεσθαι τὸ κενὸν ἓνα μὲν τρόπον τὸ μὴ πλήρες αἰσθητοῦ σώματος κατὰ τὴν ἀφήν· αἰσθητὸν δ' ἐστὶ κατὰ τὴν ἀφήν τὸ βάρος ἔχον ἢ κουφότητα (διὸ κἂν ἀπορήσειέ τις, τί ἂν φαῖεν, εἰ ἔχοι τὸ διάστημα χρῶμα ἢ ψόφον, πότερον κενόν ἢ οὐ; ἢ δῆλον ὅτι εἰ μὲν δέχοιτο σῶμα ἀπτόν, κενόν, εἰ δὲ μή, οὐ).

ἄλλον δὲ τρόπον, ἐν ᾧ μὴ τόδε τι μηδ' οὐσία τις σωματική. διό φασίν τινες εἶναι τὸ κενὸν τὴν τοῦ σώματος ὕλην (οἷπερ καὶ τὸν τόπον τὸ αὐτὸ τοῦτο), λέγοντες οὐ καλῶς· ἡ μὲν γὰρ ὕλη οὐ χωριστὴ τῶν πραγμάτων, τὸ δὲ κενὸν ζητοῦσιν ὡς χωριστόν.

ἐπεὶ δὲ περὶ τόπου διώρισται, καὶ τὸ κενὸν ἀνάγκη τόπον εἶναι, εἰ ἔστιν, ἐστερημένον σώματος, τόπος δὲ καὶ πῶς ἔστι καὶ πῶς οὐκ ἔστιν εἴρηται, φανερόν ὅτι οὕτω μὲν κενὸν οὐκ ἔστιν, οὔτε κεχωρισμένον οὔτε ἀχώριστον. τὸ γὰρ κενὸν οὐ σῶμα ἀλλὰ σώματος διάστημα βούλεται εἶναι· διὸ καὶ τὸ κενὸν δοκεῖ τι εἶναι, ὅτι καὶ ὁ τόπος, καὶ διὰ ταῦτά. ἥκει γὰρ δὴ ἡ κίνησις ἢ κατὰ τόπον καὶ τοῖς τὸν τόπον φάσκουσιν εἶναι τι παρὰ τὰ σώματα τὰ ἐμπίπτοντα καὶ τοῖς τὸ κενόν. αἴτιον δὲ κινήσεως οἶονται εἶναι τὸ κενὸν οὕτως ὡς ἐν ᾧ κινεῖται· τοῦτο δ' ἂν εἴη οἷον τὸν τόπον φασί τινες εἶναι.

οὐδεμία δ' ἀνάγκη, εἰ κίνησις ἔστιν, εἶναι κενόν. ὅλως μὲν οὖν πάσης κινήσεως οὐδαμῶς, δι' ὃ καὶ Μέλισσον ἔλαθεν· ἀλλοιοῦσθαι γὰρ τὸ πλήρες ἐνδέχεται.

ἀλλὰ δὴ οὐδὲ τὴν κατὰ τόπον κίνησιν· ἅμα γὰρ ἐνδέχεται

ὑπεξίεναι ἀλλήλοις, οὐδενὸς ὄντος διαστήματος χωριστοῦ παρὰ τὰ σώματα τὰ κινούμενα. καὶ τοῦτο δῆλον καὶ ἐν ταῖς τῶν συνεχῶν δίναις, ὥσπερ καὶ ἐν ταῖς τῶν ὑγρῶν.

ἐνδέχεται δὲ καὶ πυκνοῦσθαι μὴ εἰς τὸ κενὸν ἀλλὰ διὰ τὸ τὰ ἐνόντα [214b] ἐκπυρηνίζειν (οἷον ὕδατος συνθλιβομένου τὸν ἐνόντα ἀέρα), καὶ αὐξάνεσθαι οὐ μόνον εἰσιόντος τινὸς ἀλλὰ καὶ ἀλλοιώσει, οἷον εἰ ἐξ ὕδατος γίγνοιτο ἀήρ.

ὅλως δὲ ὃ τε περὶ τῆς αὐξήσεως λόγος καὶ τοῦ εἰς τὴν τέφραν ἐγγεομένου ὕδατος αὐτὸς αὐτὸν ἐμποδίζει. ἢ γὰρ οὐκ αὐξάνεται ὅτι οὐν, ἢ οὐ σώματι, ἢ ἐνδέχεται δύο σώματα ἐν ταὐτῳ εἶναι (ἀπορίαν οὖν κοινήν ἀξιοῦσι λύειν, ἀλλ' οὐ κενὸν δεικνύουσιν ὥς ἔστιν), ἢ πᾶν εἶναι ἀναγκαῖον τὸ σῶμα κενόν, εἰ πάντῃ αὐξάνεται καὶ αὐξάνεται διὰ κενοῦ. ὁ δ' αὐτὸς λόγος καὶ ἐπὶ τῆς τέφρας.

ὅτι μὲν οὖν ἐξ ὧν δεικνύουσιν εἶναι τὸ κενὸν λύειν ῥάδιον, φανερόν.

Κεφάλαιο 8

Ὅτι δ' οὐκ ἔστιν κενὸν οὕτω κεχωρισμένον, ὥς ἔνιοί φασι, λέγωμεν πάλιν. εἰ γὰρ ἔστιν ἐκάστου φορὰ τις τῶν ἀπλῶν σωμάτων φύσει, οἷον τῷ πυρὶ μὲν ἄνω τῇ δὲ γῇ κάτω καὶ πρὸς τὸ μέσον, δηλὸν ὅτι οὐκ ἂν τὸ κενὸν αἴτιον εἴη τῆς φορᾶς. τίνος οὖν αἴτιον ἔσται τὸ κενόν; δοκεῖ γὰρ αἴτιον εἶναι κινήσεως τῆς κατὰ τόπον, ταύτης δ' οὐκ ἔστιν.

ἔτι εἰ ἔστιν τι οἷον τόπος ἐστερημένος σώματος, ὅταν ἡ κενόν, ποῦ οἰσθήσεται τὸ εἰσθεθὲν εἰς αὐτὸ σῶμα; οὐ γὰρ δὴ εἰς ἅπαν. ὁ δ' αὐτὸς λόγος καὶ πρὸς τοὺς τὸν τόπον οἰομένους εἶναι τι κεχωρισμένον, εἰς ὃν φέρεται· πῶς γὰρ οἰσθήσεται τὸ ἐντεθὲν ἡ μενεῖ; καὶ περὶ τοῦ ἄνω καὶ κάτω καὶ περὶ τοῦ κενοῦ ὁ αὐτὸς ἀρμόσει λόγος εἰκότως· τὸ γὰρ κενὸν τόπον ποιοῦσιν οἱ εἶναι φάσκοντες·

καὶ πῶς δὴ ἐνέσται ἡ ἐν [τῷ] τόπῳ ἡ ἐν τῷ κενῷ; οὐ γὰρ συμβαίνει, ὅταν ὅλον τεθῇ ὥς ἐν κεχωρισμένῳ τόπῳ καὶ ὑπομένοντι σῶμά τι· τὸ γὰρ μέρος, ἂν μὴ χωρὶς τιθῇται, οὐκ ἔσται ἐν τόπῳ ἄλλ' ἐν τῷ ὅλῳ. ἔτι εἰ μὴ τόπος, οὐδὲ κενὸν ἔσται.

συμβαίνει δὲ τοῖς λέγουσιν εἶναι κενὸν ὥς ἀναγκαῖον, εἴπερ ἔσται κίνησις, τούναντίον μᾶλλον, ἂν τις ἐπισκοπῇ, μὴ ἐνδέχεσθαι μηδὲ ἐν κινεῖσθαι, ἐὰν ἡ κενόν· ὥσπερ γὰρ οἱ διὰ τὸ ὅμοιον φάμενοι τὴν γῆν ἡρεμεῖν, οὕτω καὶ ἐν τῷ κενῷ ἀνάγκη ἡρεμεῖν· οὐ γὰρ ἔστιν οὗ μᾶλλον ἢ ἥττον κινήθησεται· ἡ γὰρ κενόν, οὐκ [215a] ἔχει διαφοράν.

ἔπειθ' ὅτι πᾶσα κίνησις ἡ βία ἡ κατὰ φύσιν. ἀνάγκη δὲ ἂν περ ἡ <ἡ> βίαιος, εἶναι καὶ τὴν κατὰ φύσιν (ἡ μὲν γὰρ βίαιος παρὰ φύσιν, ἡ δὲ παρὰ φύσιν ὑστέρα τῆς κατὰ φύσιν)· ὥστ' εἰ μὴ κατὰ φύσιν ἔστιν ἐκάστῳ τῶν φυσικῶν σωμάτων κίνησις, οὐδὲ τῶν ἄλλων ἔσται κινήσεων οὐδεμία. ἀλλὰ μὴν φύσει γε πῶς ἔσται μηδεμιᾶς οὔσης διαφορᾶς κατὰ τὸ κενὸν καὶ τὸ ἄπειρον; ἡ μὲν γὰρ ἄπειρον, οὐδὲν ἔσται ἄνω οὐδὲ κάτω οὐδὲ μέσον, ἡ δὲ κενόν, οὐδὲν διάφορον τὸ ἄνω τοῦ κάτω (ὥσπερ γὰρ τοῦ μηδενὸς οὐδεμία ἔστι διαφορά, οὕτω καὶ τοῦ κενοῦ· τὸ γὰρ κενὸν μὴ ὄν τι καὶ στέρησις δοκεῖ εἶναι). ἡ δὲ φύσει φορὰ διάφορος, ὥστε ἔσται φύσει διάφορα. ἡ οὖν οὐκ ἔστι φύσει οὐδαμοῦ οὐδενὶ φορὰ, ἡ εἰ τοῦτ' ἔστιν, οὐκ ἔστι κενόν.

ἔτι νῦν μὲν κινεῖται τὰ ῥιπτούμενα τοῦ ὄσαντος οὐχ ἀπομένου, ἡ

δι' ἀντιπερίστασιν, ὥσπερ ἔνιοί φασιν, ἢ διὰ τὸ ὠθεῖν τὸν ὠσθέντα ἀέρα θάπτω κίνησιν τῆς τοῦ ὠσθέντος φορᾶς ἢν φέρεται εἰς τὸν οἰκεῖον τόπον· ἐν δὲ τῷ κενῷ οὐδὲν τούτων ὑπάρχει, οὐδ' ἔσται φέρεσθαι ἀλλ' ἢ ὡς τὸ ὀχοῦμενον.

ἔτι οὐδεὶς ἂν ἔχοι εἰπεῖν διὰ τί κινήθην στήσεταιί που· τί γὰρ μᾶλλον ἐνταῦθα ἢ ἐνταῦθα; ὥστε ἢ ἡρεμήσει ἢ εἰς ἄπειρον ἀνάγκη φέρεσθαι, ἐὰν μὴ τι ἐμποδίσῃ κρεῖττον.

ἔτι νῦν μὲν εἰς τὸ κενὸν διὰ τὸ ὑπείκειν φέρεσθαι δοκεῖ· ἐν δὲ τῷ κενῷ πάντῃ ὁμοίως τὸ τοιοῦτον, ὥστε πάντῃ οἰσθήσεται. ἔτι δὲ καὶ ἐκ τῶνδε φανερόν τὸ λεγόμενον. ὀρῶμεν γὰρ τὸ αὐτὸ βάρος καὶ σῶμα θάπττον φερόμενον διὰ δύο αἰτίας, ἢ τῷ διαφέρειν τὸ δι' οὗ, οἷον δι' ὕδατος ἢ γῆς ἢ δι' ὕδατος ἢ ἀέρος, ἢ τῷ διαφέρειν τὸ φερόμενον, ἐὰν τᾶλλα ταῦτα ὑπάρχῃ, διὰ τὴν ὑπεροχὴν τοῦ βάρους ἢ τῆς κουφότητος.

τὸ μὲν οὖν δι' οὗ φέρεται αἴτιον, ὅτι ἐμποδίζει μάλιστα μὲν ἀντιφερόμενον, ἔπειτα καὶ μένον· μᾶλλον δὲ τὸ μὴ εὐδιαίρετον· τοιοῦτο δὲ τὸ παχύτερον. τὸ δὴ ἐφ' οὗ [215b] A οἰσθήσεται διὰ τοῦ B τὸν ἐφ' ᾧ Γ χρόνον, διὰ δὲ τοῦ Δ λεπτοτέρου ὄντος τὸν ἐφ' ᾧ E, εἰ ἴσον τὸ μῆκος τὸ τοῦ B τῷ Δ, κατὰ τὴν ἀναλογίαν τοῦ ἐμποδιζόντος σώματος. ἔστω γὰρ τὸ μὲν B ὕδωρ, τὸ δὲ Δ ἀήρ· ὅσῳ δὴ λεπτότερον ἀήρ ὕδατος καὶ ἀσωματώτερον, τοσοῦτῳ θάπττον τὸ A διὰ τοῦ Δ οἰσθήσεται ἢ διὰ τοῦ B. ἐχέτω δὴ τὸν αὐτὸν λόγον ὄνπερ διέστηκεν ἀήρ πρὸς ὕδωρ, τὸ τάχος πρὸς τὸ τάχος. ὥστε εἰ διπλασίως λεπτόν, ἐν διπλασίῳ χρόνῳ τὴν τὸ B δίδεισιν ἢ τὴν τὸ Δ, καὶ ἔσται ὁ ἐφ' ᾧ Γ χρόνος διπλασίος τοῦ ἐφ' ᾧ E. καὶ αἰεὶ δὴ ὅσῳ ἂν ἢ ἀσωματώτερον καὶ ἥττον ἐμποδιστικὸν καὶ εὐδιαιρετώτερον δι' οὗ φέρεται, θάπττον οἰσθήσεται.

τὸ δὲ κενὸν οὐδένα ἔχει λόγον ᾧ ὑπερέχεται ὑπὸ τοῦ σώματος, ὥσπερ οὐδὲ τὸ μηδὲν πρὸς ἀριθμόν. εἰ γὰρ τὰ τέτταρα τῶν τριῶν ὑπερέχει ἐνί, πλείονι δὲ τοῖν δυοῖν, καὶ ἔτι πλείονι τοῦ ἐνὸς ἢ τοῖν δυοῖν, τοῦ δὲ μηδενὸς οὐκέτι ἔχει λόγον ᾧ ὑπερέχει· ἀνάγκη γὰρ τὸ ὑπερέχον διαιρεῖσθαι εἰς τε τὴν ὑπεροχὴν καὶ τὸ ὑπερεχόμενον, ὥστε ἔσται τὰ τέτταρα ὅσῳ τε ὑπερέχει καὶ οὐδέν. διὸ οὐδὲ γραμμὴ στιγμῆς ὑπερέχει, εἰ μὴ σύγκειται ἐκ στιγμῶν. ὁμοίως δὲ καὶ τὸ κενὸν πρὸς τὸ πλῆρες οὐδένα οἷον τε ἔχειν λόγον, ὥστε οὐδὲ τὴν κίνησιν, ἀλλ' εἰ διὰ τοῦ λεπτοτάτου ἐν τοσφδὶ τὴν τοσήνδε φέρεται, διὰ τοῦ κενοῦ παντὸς ὑπερβάλλει λόγου. ἔστω γὰρ τὸ Z κενόν, ἴσον

δὲ [τῷ μεγέθει] τοῖς Β καὶ Δ. τὸ δὲ Α εἰ δίδεισι καὶ κινήθησεται ἐν τινὶ μὲν χρόνῳ, τῷ ἐφ' οὗ Η, ἐν ἐλάττωι δὲ τοῦ ἐφ' οὗ Ε, τοῦτον ἔξει τὸν λόγον τὸ κενὸν πρὸς τὸ πληρὲς. ἀλλ' ἐν τοσοῦτῳ χρόνῳ ὅσος ἐφ' οὗ τὸ Η, τοῦ Δ τὸ Α δίδεισι τὴν τὸ Θ. δίδεισι δὲ γε κἂν ἢ τι λεπτότητι διαφέρον τοῦ ἀέρος ἐφ' ᾧ τὸ Ζ ταύτην τὴν ἀναλογίαν ἣν ἔχει ὁ χρόνος ἐφ' ᾧ Ε πρὸς τὸν ἐφ' ᾧ Η. ἂν γὰρ ἢ τοσοῦτῳ λεπτότερον τὸ ἐφ' ᾧ Ζ σῶμα τοῦ Δ, ὅσῳ ὑπερέχει τὸ Ε τοῦ Η, ἀντεστραμμένως δίδεισι τῷ [216a] τάχει ἐν τῷ τοσοῦτῳ ὅσον τὸ Η, τὴν τὸ Ζ τὸ ἐφ' οὗ Α, ἐὰν φέρηται. ἐὰν τοίνυν μηδὲν ἢ σῶμα ἐν τῷ Ζ, ἔτι θᾶπτον. ἀλλ' ἦν ἐν τῷ Η. ὥστ' ἐν ἴσῳ χρόνῳ δίδεισι πληρὲς τε ὄν καὶ κενόν. ἀλλ' ἀδύνατον. φανερόν τοίνυν ὅτι, εἰ ἔστι χρόνος ἐν ᾧ τοῦ κενοῦ ὅτιοῦν οἰσθήσεται, συμβήσεται τοῦτο τὸ ἀδύνατον· ἐν ἴσῳ γὰρ ληφθήσεται πληρὲς τε ὄν διεξιέναι τι καὶ κενόν· ἔσται γὰρ τι ἀνάλογον σῶμα ἕτερον πρὸς ἕτερον ὡς χρόνος πρὸς χρόνον.

ὥς δ' ἐν κεφαλαίῳ εἰπεῖν, δῆλον τὸ τοῦ συμβαίνοντος αἴτιον, ὅτι κινήσεως μὲν πρὸς κίνησιν πάσης ἔστι λόγος (ἐν χρόνῳ γὰρ ἔστι, χρόνου δὲ παντὸς ἔστι πρὸς χρόνον, πεπερασμένων ἀμφοῖν), κενοῦ δὲ πρὸς πληρὲς οὐκ ἔστιν. ἢ μὲν οὖν διαφέρουσι δι' ὧν φέρονται, ταῦτα συμβαίνει, κατὰ δὲ τὴν τῶν φερομένων ὑπεροχὴν τάδε· ὁρῶμεν γὰρ τὰ μείζω ῥοπήν ἔχοντα ἢ βάρους ἢ κουφότητος, ἐὰν τᾶλλα ὁμοίως ἔχη [τοῖς σχήμασι], θᾶπτον φερόμενα τὸ ἴσον χωρίον, καὶ κατὰ λόγον ὄν ἔχουσι τὰ μεγέθη πρὸς ἄλληλα. ὥστε καὶ διὰ τοῦ κενοῦ. ἀλλ' ἀδύνατον· διὰ τίνα γὰρ αἰτίαν οἰσθήσεται θᾶπτον; ἐν μὲν γὰρ τοῖς πλήρεσιν ἐξ ἀνάγκης· θᾶπτον γὰρ διαίρει τῇ ἰσχυρί τὸ μείζον· ἢ γὰρ σχήματι διαίρει, ἢ ῥοπῇ ἣν ἔχει τὸ φερόμενον ἢ τὸ ἀφεθέν. ἰσοταχῇ ἄρα πάντ' ἔσται. ἀλλ' ἀδύνατον. ὅτι μὲν οὖν εἰ ἔστι κενόν, συμβαίνει τὸναντίον ἢ δι' ὃ κατασκευάζουσιν οἱ φάσκοντες εἶναι κενόν, φανερόν ἐκ τῶν εἰρημένων. οἱ μὲν οὖν οἴονται τὸ κενὸν εἶναι, εἴπερ ἔσται ἢ κατὰ τόπον κίνησις, ἀποκεκριμένον καθ' αὐτό· τοῦτο δὲ ταῦτόν ἐστι τῷ τὸν τόπον φάναι εἶναι τι κεχωρισμένον· τοῦτο δ' ὅτι ἀδύνατον, εἴρηται πρότερον. καὶ καθ' αὐτὸ δὲ σκοποῦσιν φανείη ἂν τὸ λεγόμενον κενὸν ὡς ἀληθῶς κενόν. ὥσπερ γὰρ ἐὰν ἐν ὕδατι τιθῇ τις κύβον, ἐκστήσεται τοσοῦτον ὕδωρ ὅσος ὁ κύβος, οὕτω καὶ ἐν ἀέρι· ἀλλὰ τῇ αἰσθήσει ἄδηλον. καὶ αἰεὶ δὴ ἐν παντὶ σώματι ἔχοντι μετὰστασιν, ἐφ' ὃ πέφυκε μεθίστασθαι, ἀνάγκη, ἂν μὴ συμπιληται, μεθίστασθαι ἢ κάτω αἰεὶ, εἰ κάτω ἢ φορὰ ὥσπερ γῆς, ἢ ἄνω, εἰ πῦρ, ἢ ἐπ' ἄμφω, [ἢ] ὅποιον ἂν τι ἢ τὸ ἐντιθέμενον· ἐν δὲ δὴ τῷ κενῷ τοῦτο

μὲν ἀδύνατον (οὐδὲν γὰρ σῶμα), διὰ δὲ τοῦ κύβου τὸ ἴσον διάστημα διεληλυθέναι, ὅπερ ἦν καὶ πρότερον [216b] ἐν τῷ κενῷ, ὥσπερ ἂν εἰ τὸ ὕδωρ μὴ μεθίστατο τῷ ξυλίνῳ κύβῳ μὴδ' ὁ ἀήρ, ἀλλὰ πάντῃ διήεσαν δι' αὐτοῦ. ἀλλὰ μὴν καὶ ὁ κύβος γε ἔχει τοσοῦτον μέγεθος, ὅσον κατέχει κενόν· ὃ εἰ καὶ θερμόν ἢ ψυχρόν ἐστὶν ἢ βαρὺ ἢ κοῦφον, οὐδὲν ἦττον ἕτερον τῷ εἶναι πάντων τῶν παθημάτων ἐστὶ, καὶ εἰ μὴ χωριστόν· λέγω δὲ τὸν ὄγκον τοῦ ξυλίνου κύβου. ὥστ' εἰ καὶ χωρισθεῖη τῶν ἄλλων πάντων καὶ μήτε βαρὺ μήτε κοῦφον εἴη, καθέξει τὸ ἴσον κενὸν καὶ ἐν τῷ αὐτῷ ἔσται τῷ τοῦ τόπου καὶ τῷ τοῦ κενοῦ μέρει ἴσῳ ἑαυτῷ. τί οὖν διοίσει τὸ τοῦ κύβου σῶμα τοῦ ἴσου κενοῦ καὶ τόπου; καὶ εἰ δύο τοιαῦτα, διὰ τί οὐ καὶ ὀποσαοῦν ἐν τῷ αὐτῷ ἔσται;

ἐν μὲν δὴ τοῦτο ἄτοπον καὶ ἀδύνατον. ἔτι δὲ φανερόν ὅτι τοῦτο ὁ κύβος ἔξει καὶ μεθιστάμενος, ὃ καὶ τὰ ἄλλα σώματα πάντ' ἔχει. ὥστ' εἰ τοῦ τόπου μὴδὲν διαφέρει, τί δεῖ ποιεῖν τόπον τοῖς σώμασιν παρὰ τὸν ἐκάστου ὄγκον, εἰ ἀπαθὲς ὁ ὄγκος; οὐδὲν γὰρ συμβάλλεται, εἰ ἕτερον περὶ αὐτὸν ἴσον διάστημα τοιοῦτον εἴη. [ἔτι δεῖ δῆλον εἶναι οἷον κενὸν ἐν τοῖς κινουμένοις. νῦν δ' οὐδαμοῦ ἐντὸς τοῦ κόσμου· ὁ γὰρ ἀήρ ἐστὶν τι, οὐ δοκεῖ δὲ γε-οὐδὲ τὸ ὕδωρ, εἰ ἦσαν οἱ ἰχθύες σιδηροῖ· τῇ ἀφῇ γὰρ ἡ κρίσις τοῦ ἀπτοῦ.]

ὅτι μὲν τοίνυν οὐκ ἔστι κεχωρισμένον κενόν, ἐκ τούτων ἐστὶ δῆλον.

Κεφάλαιο 9

Εἰσὶν δέ τινες οἱ διὰ τοῦ μανοῦ καὶ πυκνοῦ οἶονται φανερόν εἶναι ὅτι ἔστι κενόν. εἰ μὲν γὰρ μὴ ἔστι μανὸν καὶ πυκνόν, οὐδὲ συνιέναι καὶ πιλεῖσθαι οἶόν τε· εἰ δὲ τοῦτο μὴ εἴη, ἢ ὅλως κίνησις οὐκ ἔσται, ἢ κυμανεῖ τὸ ὅλον, ὥσπερ ἔφη Ξοῦθος, ἢ εἰς ἴσον ἀεὶ <δεῖ> μεταβάλλειν ἀέρα καὶ ὕδωρ (λέγω δὲ οἶον εἰ ἐξ ὕδατος κυάθου γέγονεν ἀήρ, ἅμα ἐξ ἴσου ἀέρος ὕδωρ τοσοῦτον γεγενῆσθαι), ἢ κενὸν εἶναι ἐξ ἀνάγκης· συμπιλεῖσθαι γὰρ καὶ ἐπεκτείνεσθαι οὐκ ἐνδέχεται ἄλλως.

εἰ μὲν οὖν τὸ μανὸν λέγουσι τὸ πολλὰ κενὰ κεχωρισμένα ἔχον, φανερόν ὡς εἰ μηδὲ κενὸν ἐνδέχεται εἶναι χωριστὸν ὥσπερ μηδὲ τόπον ἔχοντα διάστημα αὐτοῦ, οὐδὲ μανὸν οὕτως· εἰ δὲ μὴ χωριστόν, ἀλλ' ὅμως ἐνεῖναί τι κενόν, ἥττον μὲν ἀδύνατον, συμβαίνει δὲ πρῶτον μὲν οὐ πάσης κινήσεως αἴτιον τὸ κενόν, ἀλλὰ τῆς ἄνω (τὸ γὰρ μανὸν κοῦφον, διὸ [217a] καὶ τὸ πῦρ μανὸν εἶναι φασιν), ἔπειτα κινήσεως αἴτιον οὐχ οὕτω τὸ κενὸν ὡς ἐν ᾧ, ἀλλ' ὥσπερ οἱ ἄσκοι τῷ φέρεσθαι αὐτοὶ ἄνω φέρουσι τὸ συνεχές, οὕτω τὸ κενὸν ἄνω φέρει. καίτοι πῶς οἶόν τε φορὰν εἶναι κενοῦ ἢ τόπον κενοῦ; κενοῦ γὰρ γίνεταί κενόν, εἰς ὃ φέρεται.

ἔτι δὲ πῶς ἐπὶ τοῦ βαρέος ἀποδώσουσιν τὸ φέρεσθαι κάτω; καὶ δηλὸν ὅτι εἰ ὅσῳ ἂν μανότερον καὶ κενώτερον ἢ ἄνω οἰσθήσεται, εἰ ὅλως εἴη κενόν, τάχιστ' ἂν φέροιτο. ἴσως δὲ καὶ τοῦτ' ἀδύνατον κινήθηναί· λόγος δ' ὁ αὐτός, ὥσπερ ὅτι ἐν τῷ κενῷ ἀκίνητα πάντα, οὕτω καὶ τὸ κενὸν ὅτι ἀκίνητον· ἀσύμβλητα γὰρ τὰ τάχη. ἐπεὶ δὲ κενὸν μὲν οὐ φαμεν εἶναι, τὰ ἄλλα δ' ἠπόρηται ἀληθῶς, ὅτι ἢ κίνησις οὐκ ἔσται, εἰ μὴ ἔσται πύκνωσις καὶ μάνωσις, ἢ κυμανεῖ ὁ οὐρανός, ἢ αἰεὶ ἴσον ὕδωρ ἐξ ἀέρος ἔσται καὶ ἀήρ ἐξ ὕδατος (δηλὸν γὰρ ὅτι πλείων ἀήρ ἐξ ὕδατος γίνεταί· ἀνάγκη τοίνυν, εἰ μὴ ἔστι πίλησις, ἢ ἐξωθούμενον τὸ ἐχόμενον τὸ ἔσχατον κυμαίνειν ποιεῖν, ἢ ἄλλοθί που ἴσον μεταβάλλειν ἐξ ἀέρος ὕδωρ, ἵνα ὁ πᾶς ὄγκος τοῦ ὅλου ἴσος ἦ, ἢ μηδὲν κινεῖσθαι· ἀεὶ γὰρ μεθισταμένου τοῦτο συμβήσεται, ἂν μὴ κύκλῳ περιίστηται· οὐκ ἀεὶ δ' εἰς τὸ κύκλῳ ἢ φορά, ἀλλὰ καὶ εἰς εὐθύ).

οἱ μὲν δὴ διὰ ταῦτα κενόν τι φαῖεν ἂν εἶναι, ἡμεῖς δὲ λέγομεν ἐκ τῶν ὑποκειμένων ὅτι ἔστιν ὕλη μία τῶν ἐναντίων, θερμοῦ καὶ

ψυχροῦ καὶ τῶν ἄλλων τῶν φυσικῶν ἐναντιώσεων, καὶ ἐκ δυνάμει ὄντος ἐνεργείᾳ ὃν γίνεταί, καὶ οὐ χωριστὴ μὲν ἡ ὕλη, τὸ δ' εἶναι ἕτερον, καὶ μία τῷ ἀριθμῷ, εἰ ἔτυχε, χροιαῖς καὶ θερμοῦ καὶ ψυχροῦ.

ἔστι δὲ καὶ σῶματος ὕλη καὶ μεγάλου καὶ μικροῦ ἢ αὐτῇ. δηλὸν δέ· ὅταν γὰρ ἐξ ὕδατος ἀήρ γένηται, ἡ αὐτὴ ὕλη οὐ προσλαβοῦσά τι ἄλλο ἐγένετο, ἀλλ' ὃ ἦν δυνάμει, ἐνεργείᾳ ἐγένετο, καὶ πάλιν ὕδωρ ἐξ ἀέρος ὡσαύτως, ὅτε μὲν εἰς μέγεθος ἐκ μικρότητος, ὅτε δ' εἰς μικρὸν ἐκ μεγέθους. ὁμοίως τοῖνυν καὶ ὁ ἀήρ πολὺς ὢν ἐν ἐλάττονι γίγνηται ὄγκῳ καὶ ἐξ ἐλάττονος μείζων, ἡ δυνάμει οὕσα ὕλη γίνεταί ἁμφο.

ὥσπερ γὰρ καὶ ἐκ ψυχροῦ θερμὸν καὶ ἐκ θερμοῦ ψυχρὸν ἢ αὐτῇ, ὅτι ἦν δυνάμει, οὕτω καὶ ἐκ θερμοῦ [217b] μᾶλλον θερμὸν, οὐδενὸς γενομένου ἐν τῇ ὕλῃ θερμοῦ ὃ οὐκ ἦν θερμὸν ὅτε ἦττον ἦν θερμὸν, ὥσπερ γε οὐδ' ἡ τοῦ μείζονος κύκλου περιφέρεια καὶ κυρτότης ἐὰν γίγνηται ἐλάττονος κύκλου, <ἢ> ἡ αὐτὴ οὕσα ἢ ἄλλῃ, ἐν οὐθενὶ ἐγγέγονε τὸ κυρτὸν ὃ ἦν οὐ κυρτὸν ἀλλ' εὐθύ (οὐ γὰρ τῷ διαλείπειν τὸ ἦττον ἢ τὸ μᾶλλον ἔστιν)· οὐδ' ἔστι τῆς φλογὸς λαβεῖν τι μέγεθος ἐν ᾧ οὐ καὶ θερμότης καὶ λευκότης ἔνεστιν. οὕτω τοῖνυν καὶ ἡ πρότερον θερμότης <πρὸς> τὴν ὕστερον. ὥστε καὶ τὸ μέγεθος καὶ ἡ μικρότης τοῦ αἰσθητοῦ ὄγκου οὐ προσλαβούσης τι τῆς ὕλης ἐπεκτείνεται, ἀλλ' ὅτι δυνάμει ἐστὶν ὕλη ἁμφοῖν· ὥστ' ἐστὶ τὸ αὐτὸ πυκνὸν καὶ μανόν, καὶ μία ὕλη αὐτῶν. ἔστι δὲ τὸ μὲν πυκνὸν βαρὺ, τὸ δὲ μανὸν κοῦφον. [ἔτι ὥσπερ ἡ τοῦ κύκλου περιφέρεια συναγομένη εἰς ἐλάττον οὐκ ἄλλο τι λαμβάνει τὸ κοῖλον, ἀλλ' ὃ ἦν συνήχθη, καὶ τοῦ πυρὸς ὃ τι ἂν τις λάβῃ πᾶν ἔσται θερμὸν, οὕτω καὶ τὸ πᾶν συναγωγή καὶ διαστολὴ τῆς αὐτῆς ὕλης.] δύο γὰρ ἔστιν ἐφ' ἑκατέρου, τοῦ τε πυκνοῦ καὶ τοῦ μανοῦ· τό τε γὰρ βαρὺ καὶ τὸ σκληρὸν πυκνὰ δοκεῖ εἶναι, καὶ τὰναντία μανὰ τό τε κοῦφον καὶ τὸ μαλακόν· διαφωνεῖ δὲ τὸ βαρὺ καὶ τὸ σκληρὸν ἐπὶ μολίβδου καὶ σιδήρου.

ἐκ δὲ τῶν εἰρημένων φανερόν ὥς οὗτ' ἀποκεκριμένον κενὸν ἔστιν, οὐθ' ἀπλῶς οὗτ' ἐν τῷ μανῷ, οὔτε δυνάμει, εἰ μὴ τις βούλεται πάντως καλεῖν κενὸν τὸ αἴτιον τοῦ φέρεσθαι. οὕτω δ' ἡ τοῦ βαρέος καὶ κούφου ὕλη, ἥ τοιαύτη, εἴη ἂν τὸ κενόν· τὸ γὰρ πυκνὸν καὶ τὸ μανὸν κατὰ ταύτην τὴν ἐναντίωσιν φορᾶς ποιητικά, κατὰ δὲ τὸ σκληρὸν καὶ μαλακὸν πάθους καὶ ἀπαθείας, καὶ οὐ φορᾶς ἀλλ' ἑτεροιώσεως μᾶλλον.

καὶ περὶ μὲν κενοῦ, πῶς ἔστι καὶ πῶς οὐκ ἔστι, διωρίσθω τὸν
τρόπον τοῦτον.

Κεφάλαιο 10

Ἐχόμενον δὲ τῶν εἰρημένων ἐστὶν ἐπελθεῖν περὶ χρόνου· πρῶτον δὲ καλῶς ἔχει διαπορῆσαι περὶ αὐτοῦ καὶ διὰ τῶν ἐξωτερικῶν λόγων, πότερον τῶν ὄντων ἐστὶν ἢ τῶν μὴ ὄντων, εἴτα τίς ἢ φύσις αὐτοῦ. ὅτι μὲν οὖν ἢ ὅλως οὐκ ἔστιν ἢ μόλις καὶ ἀμυδρῶς, ἐκ τῶνδὲ τις ἂν ὑποπτεύσειεν. τὸ μὲν γὰρ αὐτοῦ γέγονε καὶ οὐκ ἔστιν, τὸ δὲ μέλλει καὶ οὐπω ἔστιν. [218a] ἐκ δὲ τούτων καὶ ὁ ἄπειρος καὶ ὁ αἰεὶ λαμβανόμενος χρόνος σύγκειται. τὸ δ' ἐκ μὴ ὄντων συγκείμενον ἀδύνατον ἂν εἶναι δόξειε μετέχειν οὐσίας.

πρὸς δὲ τούτοις παντὸς μεριστοῦ, ἅνπερ ἢ, ἀνάγκη, ὅτε ἔστιν, ἥτοι πάντα τὰ μέρη εἶναι ἢ ἓν· τοῦ δὲ χρόνου τὰ μὲν γέγονε τὰ δὲ μέλλει, ἔστι δ' οὐδέν, ὄντος μεριστοῦ. τὸ δὲ νῦν οὐ μέρος· μετρεῖ τε γὰρ τὸ μέρος, καὶ συγκεῖσθαι δεῖ τὸ ὅλον ἐκ τῶν μερῶν· ὁ δὲ χρόνος οὐ δοκεῖ συγκεῖσθαι ἐκ τῶν νῦν.

ἔτι δὲ τὸ νῦν, ὃ φαίνεται διορίζειν τὸ παρελθὸν καὶ τὸ μέλλον, πότερον ἓν καὶ ταυτόν αἰεὶ διαμένει ἢ ἄλλο καὶ ἄλλο, οὐ ῥάδιον ἰδεῖν.

εἰ μὲν γὰρ αἰεὶ ἕτερον καὶ ἕτερον, μηδὲν δ' ἐστὶ τῶν ἐν τῷ χρόνῳ ἄλλο καὶ ἄλλο μέρος ἅμα (ὃ μὴ περιέχει, τὸ δὲ περιέχεται, ὥσπερ ὁ ἐλάττων χρόνος ὑπὸ τοῦ πλείονος), τὸ δὲ νῦν μὴ ὄν πρότερον δὲ ὄν ἀνάγκη ἐφθάρθαι ποτέ, καὶ τὰ νῦν ἅμα μὲν ἀλλήλοις οὐκ ἔσται, ἐφθάρθαι δὲ ἀνάγκη αἰεὶ τὸ πρότερον. ἐν αὐτῷ μὲν οὖν ἐφθάρθαι οὐχ οἷόν τε διὰ τὸ εἶναι τότε, ἐν ἄλλῳ δὲ νῦν ἐφθάρθαι τὸ πρότερον νῦν οὐκ ἐνδέχεται. ἔστω γὰρ ἀδύνατον ἐχόμενα εἶναι ἀλλήλων τὰ νῦν, ὥσπερ στιγμὴν στιγμῆς. εἴπερ οὖν ἐν τῷ ἐφεξῆς οὐκ ἐφθαρταὶ ἀλλ' ἐν ἄλλῳ, ἐν τοῖς μεταξὺ [τοις] νῦν ἀπείροις οὖσιν ἅμα ἂν εἴη· τοῦτο δὲ ἀδύνατον.

ἀλλὰ μὴν οὐδ' αἰεὶ τὸ αὐτὸ διαμένειν δυνατόν· οὐδενὸς γὰρ διαιρετοῦ πεπερασμένου ἐν πέρας ἔστιν, οὔτε ἂν ἐφ' ἐν ἢ συνεχὲς οὔτε ἂν ἐπὶ πλείῳ· τὸ δὲ νῦν πέρας ἐστίν, καὶ χρόνον ἔστι λαβεῖν πεπερασμένον. ἔτι εἰ τὸ ἅμα εἶναι κατὰ χρόνον καὶ μήτε πρότερον μήτε ὕστερον τὸ ἐν τῷ αὐτῷ εἶναι καὶ ἐνὶ [τῷ] νῦν ἐστίν, εἰ τὰ τε πρότερον καὶ τὰ ὕστερον ἐν τῷ νῦν τῷδὲ ἐστίν, ἅμα ἂν εἴη τὰ ἔτος γενόμενα μυριοστὸν τοῖς γε νομένοις τήμερον, καὶ οὔτε πρότερον οὔτε ὕστερον οὐδὲν ἄλλο ἄλλου.

περὶ μὲν οὖν τῶν ὑπαρχόντων αὐτῷ τοσαῦτ' ἔστω διη πορημένα·

τί δ' ἐστὶν ὁ χρόνος καὶ τίς αὐτοῦ ἡ φύσις, ὁμοίως ἔκ τε τῶν παραδεδομένων ἁδηλόν ἐστιν, καὶ περὶ ὧν τυγχάνομεν διεληλυθότες πρότερον.

οἱ μὲν γὰρ τὴν τοῦ ὅλου [218b] κίνησιν εἶναί φασιν, οἱ δὲ τὴν σφαῖραν αὐτήν.

καίτοι τῆς περιφορᾶς καὶ τὸ μέρος χρόνος τίς ἐστι, περιφορὰ δέ γε οὐ· μέρος γὰρ περιφορᾶς τὸ ληφθέν, ἀλλ' οὐ περιφορά. ἔτι δ' εἰ πλείους ἦσαν οἱ οὐρανοί, ὁμοίως ἂν ἦν ὁ χρόνος ἢ ὅτουοῦν αὐτῶν κίνησις, ὥστε πολλοὶ χρόνοι ἅμα.

ἡ δὲ τοῦ ὅλου σφαῖρα ἔδοξε μὲν τοῖς εἰποῦσιν εἶναι ὁ χρόνος, ὅτι ἔν τε τῷ χρόνῳ πάντα ἐστὶν καὶ ἐν τῇ τοῦ ὅλου σφαίρᾳ· ἔστιν δ' εὐηθικώτερον τὸ εἰρημένον ἢ ὥστε περὶ αὐτοῦ τὰ ἀδύνατα ἐπισκοπεῖν.

ἐπεὶ δὲ δοκεῖ μάλιστα κίνησις εἶναι καὶ μεταβολή τις ὁ χρόνος, τοῦτ' ἂν εἶη σκεπτέον.

ἡ μὲν οὖν ἐκάστου μεταβολή καὶ κίνησις ἐν αὐτῷ τῷ μεταβάλλοντι μόνον ἐστίν, ἢ οὐκ ἂν τύχη ὃν αὐτὸ τὸ κινούμενον καὶ μεταβάλλον· ὁ δὲ χρόνος ὁμοίως καὶ πανταχοῦ καὶ παρὰ πᾶσιν.

ἔτι δὲ μεταβολή μὲν ἐστὶ θάπτων καὶ βραδυτέρα, χρόνος δ' οὐκ ἔστιν· τὸ γὰρ βραδὺ καὶ ταχὺ χρόνῳ ὥρισται, ταχὺ μὲν τὸ ἐν ὀλίγῳ πολὺ κινούμενον, βραδὺ δὲ τὸ ἐν πολλῷ ὀλίγον· ὁ δὲ χρόνος οὐχ ὥρισται χρόνῳ, οὔτε τῷ ποσός τις εἶναι οὔτε τῷ ποιός.

ὅτι μὲν τοίνυν οὐκ ἔστιν κίνησις, φανερόν· μηδὲν δὲ διαφερέτω λέγειν ἡμῖν ἐν τῷ παρόντι κίνησιν ἢ μεταβολήν.

Κεφάλαιο 11

Ἀλλὰ μὴν οὐδ' ἄνευ γε μεταβολῆς· ὅταν γὰρ μηδὲν αὐτοὶ μεταβάλλωμεν τὴν διάνοιαν ἢ λάθωμεν μεταβάλλοντες, οὐ δοκεῖ ἡμῖν γεγονέναι χρόνος, καθάπερ οὐδὲ τοῖς ἐν Σαρδοὶ μυθολογουμένοις καθευδεῖν παρὰ τοῖς ἥρωσιν, ὅταν ἐγερθῶσι· συνάπτουσι γὰρ τῷ πρότερον νῦν τὸ ὕστερον νῦν καὶ ἐν ποιοῦσιν, ἐξαιροῦντες διὰ τὴν ἀναισθησίαν τὸ μεταξύ. ὥσπερ οὖν εἰ μὴ ἦν ἕτερον τὸ νῦν ἀλλὰ ταὐτὸ καὶ ἓν, οὐκ ἂν ἦν χρόνος, οὕτως καὶ ἐπεὶ λανθάνει ἕτερον ὄν, οὐ δοκεῖ εἶναι τὸ μεταξύ χρόνος. εἰ δὴ τὸ μὴ οἶσθαι εἶναι χρόνον τότε συμβαίνει ἡμῖν, ὅταν μὴ ὀρίσωμεν μηδεμίαν μεταβολήν, ἀλλ' ἐν ἐνὶ καὶ ἀδιαιρέτῳ φαίνεται ἡ ψυχὴ μένειν, ὅταν δ' αἰσθώμεθα καὶ ὀρίσωμεν, τότε φαμέν γεγονέναι χρόνον, φανερόν ὅτι οὐκ ἔστιν ἄνευ κινήσεως καὶ μεταβολῆς [219a] χρόνος. ὅτι μὲν οὖν οὔτε κίνησις οὔτ' ἄνευ κινήσεως ὁ χρόνος ἐστί, φανερόν·

ληπτέον δέ, ἐπεὶ ζητοῦμεν τί ἐστὶν ὁ χρόνος, ἐντεῦθεν ἀρχομένοις, τί τῆς κινήσεως ἐστὶν.

ἅμα γὰρ κινήσεως αἰσθανόμεθα καὶ χρόνου· καὶ γὰρ ἐὰν ἡ σκότος καὶ μηδὲν διὰ τοῦ σώματος πάσχωμεν, κίνησις δέ τις ἐν τῇ ψυχῇ ἐνῇ, εὐθύς ἅμα δοκεῖ τις γεγονέναι καὶ χρόνος. ἀλλὰ μὴν καὶ ὅταν γε χρόνος δοκῇ γεγονέναι τις, ἅμα καὶ κίνησίς τις δοκεῖ γεγονέναι. ὥστε ἦτοι κίνησις ἢ τῆς κινήσεως τί ἐστὶν ὁ χρόνος. ἐπεὶ οὖν οὐ κίνησις, ἀνάγκη τῆς κινήσεως τι εἶναι αὐτόν.

ἐπεὶ δὲ τὸ κινούμενον κινεῖται ἕκ τινος εἰς τι καὶ πᾶν μέγεθος συνεχές, ἀκολουθεῖ τῷ μεγέθει ἡ κίνησις· διὰ γὰρ τὸ τὸ μέγεθος εἶναι συνεχές καὶ ἡ κίνησίς ἐστιν συνεχής, διὰ δὲ τὴν κίνησιν ὁ χρόνος· ὅση γὰρ ἡ κίνησις, τοσοῦτος καὶ ὁ χρόνος αἰεὶ δοκεῖ γεγονέναι.

τὸ δὴ πρότερον καὶ ὕστερον ἐν τόπῳ πρῶτόν ἐστιν. ἐνταῦθα μὲν δὴ τῇ θέσει· ἐπεὶ δ' ἐν τῷ μεγέθει ἔστι τὸ πρότερον καὶ ὕστερον, ἀνάγκη καὶ ἐν κινήσει εἶναι τὸ πρότερον καὶ ὕστερον, ἀνάλογον τοῖς ἐκεῖ. ἀλλὰ μὴν καὶ ἐν χρόνῳ ἔστιν τὸ πρότερον καὶ ὕστερον διὰ τὸ ἀκολουθεῖν ἀεὶ θατέρῳ θάτερον αὐτῶν. ἔστι δὲ τὸ πρότερον καὶ ὕστερον ἐν τῇ κινήσει ὃ μὲν ποτε ὄν κίνησις [ἐστὶν]· τὸ μέντοι εἶναι αὐτῷ ἕτερον καὶ οὐ κίνησις. ἀλλὰ μὴν καὶ τὸν χρόνον γε γνωρίζομεν ὅταν ὀρίσωμεν τὴν κίνησιν, τῷ πρότερον καὶ ὕστερον ὀρίζοντες· καὶ

τότε φαμέν γεγονέναι χρόνον, ὅταν τοῦ προτέρου καὶ ὑστέρου ἐν τῇ κινήσει αἰσθησιν λάβωμεν. ὀρίζομεν δὲ τῷ ἄλλο καὶ ἄλλο ὑπολαβεῖν αὐτά, καὶ μεταξύ τι αὐτῶν ἕτερον· ὅταν γὰρ ἕτερα τὰ ἄκρα τοῦ μέσου νοήσωμεν, καὶ δύο εἴπη ἡ ψυχὴ τὰ νῦν, τὸ μὲν πρότερον τὸ δ' ὕστερον, τότε καὶ τοῦτό φαμεν εἶναι χρόνον· τὸ γὰρ ὀριζόμενον τῷ νῦν χρόνος εἶναι δοκεῖ· καὶ ὑποκείσθω.

ὅταν μὲν οὖν ὡς ἐν τὸ νῦν αἰσθανώμεθα, καὶ μὴ ἦτοι ὡς πρότερον καὶ ὕστερον ἐν τῇ κινήσει ἢ ὡς τὸ αὐτὸ μὲν προτέρου δὲ καὶ ὑστέρου τινός, οὐ δοκεῖ χρόνος γεγονέναι οὐδεὶς, ὅτι οὐδὲ κινήσις. ὅταν δὲ τὸ πρότερον [219b] καὶ ὕστερον, τότε λέγομεν χρόνον· τοῦτο γὰρ ἐστὶν ὁ χρόνος, ἀριθμὸς κινήσεως κατὰ τὸ πρότερον καὶ ὕστερον.

οὐκ ἄρα κί νησις ὁ χρόνος ἀλλ' ἢ ἀριθμὸν ἔχει ἡ κίνησις. σημεῖον δέ· τὸ μὲν γὰρ πλεῖον καὶ ἔλαττον κρίνομεν ἀριθμῷ, κίνησιν δὲ πλείω καὶ ἐλάττω χρόνῳ· ἀριθμὸς ἄρα τις ὁ χρόνος. ἐπεὶ δ' ἀριθμὸς ἐστὶ διχῶς (καὶ γὰρ τὸ ἀριθμούμενον καὶ τὸ ἀριθμητὸν ἀριθμὸν λέγομεν, καὶ ᾧ ἀριθμοῦμεν), ὁ δὴ χρόνος ἐστὶν τὸ ἀριθμούμενον καὶ οὐχ ᾧ ἀριθμοῦμεν. ἐστὶ δ' ἕτερον ᾧ ἀριθμοῦμεν καὶ τὸ ἀριθμούμενον. καὶ ὥσπερ ἡ κίνησις αἰεὶ ἄλλη καὶ ἄλλη, καὶ ὁ χρόνος (ὁ δ' ἅμα πᾶς χρόνος ὁ αὐτός· τὸ γὰρ νῦν τὸ αὐτὸ ὃ ποτ' ἦν-τὸ δ' εἶναι αὐτῷ ἕτερον-τὸ δὲ νῦν τὸν χρόνον ὀρίζει, ἢ πρότερον καὶ ὕστερον).

τὸ δὲ νῦν ἐστὶ μὲν ὡς τὸ αὐτό, ἐστὶ δ' ὡς οὐ τὸ αὐτό· ἢ μὲν γὰρ ἐν ἄλλῳ καὶ ἄλλῳ, ἕτερον (τοῦτο δ' ἦν αὐτῷ τὸ νῦν <εἶναι>, ὃ δὲ ποτε ὄν ἐστι τὸ νῦν, τὸ αὐτό. ἀκολουθεῖ γάρ, ὡς ἐλέχθη, τῷ μὲν μεγέθει ἡ κίνησις, ταύτῃ δ' ὁ χρόνος, ὡς φαμεν· καὶ ὁμοίως δὴ τῇ στιγμῇ τὸ φερόμενον, ᾧ τὴν κίνησιν γνωρίζομεν καὶ τὸ πρότερον ἐν αὐτῇ καὶ τὸ ὕστερον. τοῦτο δὲ ὃ μὲν ποτε ὄν τὸ αὐτό (ἢ στιγμή γὰρ ἢ λίθος ἢ τι ἄλλο τοιοῦτόν ἐστι), τῷ λόγῳ δὲ ἄλλο, ὥσπερ οἱ σοφισταὶ λαμβάνουσιν ἕτερον τὸ Κορίσκον ἐν Λυκείῳ εἶναι καὶ τὸ Κορίσκον ἐν ἀγορᾷ. καὶ τοῦτο δὴ τῷ ἄλλοθι καὶ ἄλλοθι εἶναι ἕτερον· τῷ δὲ φερομένῳ ἀκολουθεῖ τὸ νῦν, ὥσπερ ὁ χρόνος τῇ κινήσει (τῷ γὰρ φερομένῳ γνωρίζομεν τὸ πρότερον καὶ ὕστερον ἐν κινήσει, ἢ δ' ἀριθμητὸν τὸ πρότερον καὶ ὕστερον, τὸ νῦν ἐστὶν)· ὥστε καὶ ἐν τούτοις ὃ μὲν ποτε ὄν νῦν ἐστὶ, τὸ αὐτό (τὸ πρότερον γὰρ καὶ ὕστερόν ἐστι τὸ ἐν κινήσει), τὸ δ' εἶναι ἕτερον (ἢ ἀριθμητὸν γὰρ τὸ πρότερον καὶ ὕστερον, τὸ νῦν ἐστὶν). καὶ γνώριμον δὲ μάλιστα τοῦτ' ἐστὶν· καὶ γὰρ ἡ κίνησις διὰ τὸ κινούμενον καὶ ἡ φορὰ διὰ τὸ

φερόμενον· τόδε γάρ τι τὸ φερόμενον, ἡ δὲ κίνησις οὐ. ἔστι μὲν οὖν ὡς τὸ αὐτὸ τὸ νῦν αἰεὶ, ἔστι δ' ὡς οὐ τὸ αὐτό· καὶ γὰρ τὸ φερόμενον. φανερόν δὲ καὶ ὅτι εἴτε χρόνος μὴ εἴη, τὸ νῦν οὐκ ἂν [220a] εἴη, εἴτε τὸ νῦν μὴ εἴη, χρόνος οὐκ ἂν εἴη· ἅμα γὰρ ὥσπερ τὸ φερόμενον καὶ ἡ φορά, οὕτως καὶ ὁ ἀριθμὸς ὁ τοῦ φερομένου καὶ ὁ τῆς φορᾶς.

χρόνος μὲν γὰρ ὁ τῆς φορᾶς ἀριθμὸς, τὸ νῦν δὲ ὡς τὸ φερόμενον, οἷον μονὰς ἀριθμοῦ. καὶ συνεχῆς τε δὴ ὁ χρόνος τῷ νῦν, καὶ διήρηται κατὰ τὸ νῦν· ἀκολουθεῖ γὰρ καὶ τοῦτο τῇ φορᾷ καὶ τῷ φερομένῳ. καὶ γὰρ ἡ κίνησις καὶ ἡ φορὰ μία τῷ φερομένῳ, ὅτι ἓν (καὶ οὐχ ὃ ποτε ὄν-καὶ γὰρ ἂν διαλίποι-ἀλλὰ τῷ λόγῳ)· καὶ ὀρίζει δὲ τὴν πρότερον καὶ ὕστερον κίνησιν τοῦτο. ἀκολουθεῖ δὲ καὶ τοῦτό πως τῇ στιγμῇ· καὶ γὰρ ἡ στιγμή καὶ συνέχει τὸ μῆκος καὶ ὀρίζει· ἔστι γὰρ τοῦ μὲν ἀρχὴ τοῦ δὲ τελευτῆ. ἀλλ' ὅταν μὲν οὕτω λαμβάνῃ τις ὡς δυσι χρώμενος τῇ μιᾷ, ἀνάγκη ἴστασθαι, εἰ ἔσται ἀρχὴ καὶ τελευτῆ ἡ αὐτὴ στιγμή· τὸ δὲ νῦν διὰ τὸ κινεῖσθαι τὸ φερόμενον αἰεὶ ἕτερον.

ὥσθ' ὁ χρόνος ἀριθμὸς οὐχ ὡς τῆς αὐτῆς στιγμῆς, ὅτι ἀρχὴ καὶ τελευτῆ, ἀλλ' ὡς τὰ ἔσχατα τῆς γραμμῆς μᾶλλον-καὶ οὐχ ὡς τὰ μέρη, διὰ τε τὸ εἰρημένον (τῇ γὰρ μέσῃ στιγμῇ ὡς δυσι χρήσεται, ὥστε ἡρεμεῖν συμβήσεται), καὶ ἔτι φανερόν ὅτι οὐδὲν μόριον τὸ νῦν τοῦ χρόνου, οὐδ' ἡ διαίρεσις τῆς κινήσεως, ὥσπερ οὐδ' ἡ στιγμή τῆς γραμμῆς· αἱ δὲ γραμμαὶ αἱ δύο τῆς μιᾶς μόρια.

ἡ μὲν οὖν πέρας τὸ νῦν, οὐ χρόνος, ἀλλὰ συμβέβηκεν· ἡ δ' ἀριθμεῖ, ἀριθμὸς· τὰ μὲν γὰρ πέρατα ἐκείνου μόνον ἐστὶν οὗ ἐστὶν πέρατα, ὁ δ' ἀριθμὸς ὁ τῶνδε τῶν ἵππων, ἡ δεκάς, καὶ ἄλλοθι.

ὅτι μὲν τοίνυν ὁ χρόνος ἀριθμὸς ἐστὶν κινήσεως κατὰ τὸ πρότερον καὶ ὕστερον, καὶ συνεχῆς (συνεχοῦς γάρ), φανερόν.

Κεφάλαιο 12

Ἐλάχιστος δὲ ἀριθμὸς ὁ μὲν ἀπλῶς ἐστὶν ἢ δυάς· τίς δὲ ἀριθμὸς ἔστι μὲν ὥς ἔστιν, ἔστι δ' ὥς οὐκ ἔστιν, οἷον γραμμῆς ἐλάχιστος πλήθει μὲν ἐστὶν αἱ δύο ἢ ἡ μία, μεγέθει δ' οὐκ ἔστιν ἐλάχιστος· αἰ γὰρ διαιρεῖται πᾶσα γραμμή. ὥστε ὁμοίως καὶ χρόνος· ἐλάχιστος γὰρ κατὰ μὲν ἀριθμὸν ἐστὶν ὁ εἷς ἢ οἱ δύο, κατὰ μέγεθος δ' οὐκ ἔστιν.

φανερὸν [220b] δὲ καὶ ὅτι ταχὺς μὲν καὶ βραδὺς οὐ λέγεται, πολὺς δὲ καὶ ὀλίγος καὶ μακρὸς καὶ βραχύς. ἢ μὲν γὰρ συνεχῆς, μακρὸς καὶ βραχύς, ἢ δὲ ἀριθμὸς, πολὺς καὶ ὀλίγος.

ταχὺς δὲ καὶ βραδὺς οὐκ ἔστιν· οὐδὲ γὰρ ἀριθμὸς ἢ ἀριθμοῦμεν ταχὺς καὶ βραδὺς οὐδεὶς. καὶ ὁ αὐτὸς δὲ πανταχοῦ ἅμα· πρότερον δὲ καὶ ὕστερον οὐχ ὁ αὐτός, ὅτι καὶ ἡ μεταβολὴ ἢ μὲν παροῦσα μία, ἢ δὲ γεγεννημένη καὶ ἡ μέλλουσα ἑτέρα, ὁ δὲ χρόνος ἀριθμὸς ἐστὶν οὐχ ὅς ἀριθμοῦμεν ἀλλ' ὁ ἀριθμούμενος, οὗτος δὲ συμβαίνει πρότερον καὶ ὕστερον αἰεὶ ἕτερος· τὰ γὰρ νῦν ἕτερα. ἔστι δὲ ὁ ἀριθμὸς εἷς μὲν καὶ ὁ αὐτὸς ὁ τῶν ἑκατὸν ἵππων καὶ ὁ τῶν ἑκατὸν ἀνθρώπων, ὧν δ' ἀριθμὸς, ἕτερα, οἱ ἵπποι τῶν ἀνθρώπων. ἔτι ὥς ἐνδέχεται κίνησιν εἶναι τὴν αὐτὴν καὶ μίαν πάλιν καὶ πάλιν, οὕτω καὶ χρόνον, οἷον ἐνιαυτὸν ἢ ἔαρ ἢ μετόπωρον.

οὐ μόνον δὲ τὴν κίνησιν τῷ χρόνῳ μετροῦμεν, ἀλλὰ καὶ τῇ κινήσει τὸν χρόνον διὰ τὸ ὀρίζεσθαι ὑπ' ἀλλήλων· ὁ μὲν γὰρ χρόνος ὀρίζει τὴν κίνησιν ἀριθμὸς ὧν αὐτῆς, ἢ δὲ κίνησις τὸν χρόνον. καὶ λέγομεν πολὺν καὶ ὀλίγον χρόνον τῇ κινήσει μετροῦντες, καθάπερ καὶ τῷ ἀριθμητῷ τὸν ἀριθμὸν, οἷον τῷ ἐνὶ ἵπῳ τὸν τῶν ἵππων ἀριθμὸν. τῷ μὲν γὰρ ἀριθμῷ τὸ τῶν ἵππων πλῆθος γνωρίζομεν, πάλιν δὲ τῷ ἐνὶ ἵπῳ τὸν τῶν ἵππων ἀριθμὸν αὐτόν. ὁμοίως δὲ καὶ ἐπὶ τοῦ χρόνου καὶ τῆς κινήσεως· τῷ μὲν γὰρ χρόνῳ τὴν κίνησιν, τῇ δὲ κινήσει τὸν χρόνον μετροῦμεν. καὶ τοῦτ' εὐλόγως συμβέβηκεν· ἀκολουθεῖ γὰρ τῷ μὲν μεγέθει ἢ κινήσις, τῇ δὲ κινήσει ὁ χρόνος, τῷ καὶ ποσὰ καὶ συνεχῇ καὶ διαιρετὰ εἶναι· διὰ μὲν γὰρ τὸ τὸ μέγεθος εἶναι τοιοῦτον ἢ κίνησις ταῦτα πέπονθεν, διὰ δὲ τὴν κίνησιν ὁ χρόνος. καὶ μετροῦμεν καὶ τὸ μέγεθος τῇ. κινήσει καὶ τὴν κίνησιν τῷ μεγέθει· πολλὴν γὰρ εἶναί φαμεν τὴν ὁδόν, ἂν ἢ πορεία πολλή, καὶ ταύτην πολλήν, ἂν ἢ ὁδὸς [ἢ] πολλή· καὶ τὸν χρόνον, ἂν ἢ κίνησις, καὶ τὴν κίνησιν, ἂν ὁ χρόνος.

ἐπεὶ δ' ἐστὶν ὁ χρόνος μέτρον [221a] κινήσεως καὶ τοῦ κινεῖσθαι, μετρεῖ δ' οὗτος τὴν κίνησιν τῷ ὀρίσαι τινὰ κίνησιν ἢ καταμετρήσει τὴν ὅλην (ὥσπερ καὶ τὸ μῆκος ὁ πῆχυς τῷ ὀρίσαι τι μέγεθος ὁ ἀναμετρήσει τὸ ὅλον), καὶ ἔστιν τῇ κινήσει τὸ ἐν χρόνῳ εἶναι τὸ μετρεῖσθαι τῷ χρόνῳ καὶ αὐτὴν καὶ τὸ εἶναι αὐτῆς (ἅμα γὰρ τὴν κίνησιν καὶ τὸ εἶναι τῆς κινήσεως μετρεῖ, καὶ τοῦτ' ἔστιν αὐτῇ τὸ ἐν χρόνῳ εἶναι, τὸ μετρεῖσθαι αὐτῆς τὸ εἶναι), δηλὸν ὅτι καὶ τοῖς ἄλλοις τοῦτ' ἔστι τὸ ἐν χρόνῳ εἶναι, τὸ μετρεῖσθαι αὐτῶν τὸ εἶναι ὑπὸ τοῦ χρόνου. τὸ γὰρ ἐν χρόνῳ εἶναι δυοῖν ἐστὶν θάτερον, ἐν μὲν τὸ εἶναι τότε ὅτε ὁ χρόνος ἔστιν, ἐν δὲ ὥσπερ ἕνια λέγομεν ὅτι ἐν ἀριθμῷ ἐστὶν. τοῦτο δὲ σημαίνει ἥτοι ὡς μέρος ἀριθμοῦ καὶ πάθος, καὶ ὅλως ὅτι τοῦ ἀριθμοῦ τι, ἢ ὅτι ἔστιν αὐτοῦ ἀριθμός.

ἐπεὶ δ' ἀριθμὸς ὁ χρόνος, τὸ μὲν νῦν καὶ τὸ πρότερον καὶ ὅσα τοιαῦτα οὕτως ἐν χρόνῳ ὡς ἐν ἀριθμῷ μονὰς καὶ τὸ περιττὸν καὶ ἄρτιον (τὰ μὲν γὰρ τοῦ ἀριθμοῦ τι, τὰ δὲ τοῦ χρόνου τί ἐστὶν)· τὰ δὲ πράγματα ὡς ἐν ἀριθμῷ τῷ χρόνῳ ἐστίν. εἰ δὲ τοῦτο, περιέχεται ὑπὸ χρόνου ὥσπερ <καὶ τὰ ἐν ἀριθμῷ ὑπ' ἀριθμοῦ> καὶ τὰ ἐν τόπῳ ὑπὸ τόπου.

φανερὸν δὲ καὶ ὅτι οὐκ ἔστιν τὸ ἐν χρόνῳ εἶναι τὸ εἶναι ὅτε ὁ χρόνος ἔστιν, ὥσπερ οὐδὲ τὸ ἐν κινήσει εἶναι οὐδὲ τὸ ἐν τόπῳ ὅτε ἡ κίνησις καὶ ὁ τόπος ἔστιν. εἰ γὰρ ἔσται τὸ ἐν τινὶ οὕτῳ, πάντα τὰ πράγματα ἐν ὅτῳ οὖν ἔσται, καὶ ὁ οὐρανὸς ἐν τῇ κέγχρῳ· ὅτε γὰρ ἡ κέγχρος ἔστιν, ἔστι καὶ ὁ οὐρανός. ἀλλὰ τοῦτο μὲν συμβέβηκεν, ἐκεῖνο δ' ἀνάγκη παρακολουθεῖν, καὶ τῷ ὄντι ἐν χρόνῳ εἶναι τινα χρόνον ὅτε καὶ ἐκεῖνο ἔστιν, καὶ τῷ ἐν κινήσει ὄντι εἶναι τότε κίνησιν.

ἐπεὶ δὲ ἐστὶν ὡς ἐν ἀριθμῷ τὸ ἐν χρόνῳ, ληφθήσεται τις πλείων χρόνος παντὸς τοῦ ἐν χρόνῳ ὄντος· διὸ ἀνάγκη πάντα τὰ ἐν χρόνῳ ὄντα περιέχεσθαι ὑπὸ χρόνου, ὥσπερ καὶ τᾶλλα ὅσα ἐν τινὶ ἐστὶν, οἷον τὰ ἐν τόπῳ ὑπὸ τοῦ τόπου.

καὶ πάσχει δὴ τι ὑπὸ τοῦ χρόνου, καθάπερ καὶ λέγειν εἰώθαμεν ὅτι κατατῆκε ὁ χρόνος, καὶ γηράσκει πάνθ' ὑπὸ τοῦ χρόνου, καὶ ἐπιλανθάνεται διὰ τὸν χρόνον, ἀλλ' [221b] οὐ μεμάθηκεν, οὐδὲ νέον γέγονεν οὐδὲ καλόν· φθορᾶς γὰρ αἴτιος καθ' ἑαυτὸν μᾶλλον ὁ χρόνος· ἀριθμὸς γὰρ κινήσεως, ἡ δὲ κίνησις ἐξίστησιν τὸ ὑπάρχον· ὥστε φανερὸν ὅτι τὰ αἰεὶ ὄντα, ἢ αἰεὶ ὄντα, οὐκ ἔστιν ἐν χρόνῳ· οὐ γὰρ περιέχεται ὑπὸ χρόνου, οὐδὲ μετρεῖται τὸ εἶναι αὐτῶν ὑπὸ τοῦ χρόνου· σημεῖον δὲ τούτου ὅτι οὐδὲ πάσχει οὐδὲν ὑπὸ τοῦ χρόνου ὡς

οὐκ ὄντα ἐν χρόνῳ. ἐπεὶ δ' ἐστὶν ὁ χρόνος μέτρον κινήσεως, ἔσται καὶ ἡρεμίας μέτρον [κατὰ συμβεβηκός]· πᾶσα γὰρ ἡρεμία ἐν χρόνῳ. οὐ γὰρ ὥσπερ τὸ ἐν κινήσει ὄν ἀνάγκη κινεῖσθαι, οὕτω καὶ τὸ ἐν χρόνῳ· οὐ γὰρ κίνησις ὁ χρόνος, ἀλλ' ἀριθμὸς κινήσεως, ἐν ἀριθμῷ δὲ κινήσεως ἐνδέχεται εἶναι καὶ τὸ ἡρεμοῦν. οὐ γὰρ πᾶν τὸ ἀκίνητον ἡρεμεῖ, ἀλλὰ τὸ ἐστερημένον κινήσεως πεφυκὸς δὲ κινεῖσθαι, καθάπερ εἴρηται ἐν τοῖς πρότερον.

τὸ δ' εἶναι ἐν ἀριθμῷ ἐστὶν τὸ εἶναί τινα ἀριθμὸν τοῦ πράγματος, καὶ μετρεῖσθαι τὸ εἶναι αὐτοῦ τῷ ἀριθμῷ ἐν ᾧ ἐστὶν, ὥστ' εἰ ἐν χρόνῳ, ὑπὸ χρόνου. μετρήσει δ' ὁ χρόνος τὸ κινούμενον καὶ τὸ ἡρεμοῦν, ἥ τὸ μὲν κινούμενον τὸ δὲ ἡρεμοῦν· τὴν γὰρ κίνησιν αὐτῶν μετρήσει καὶ τὴν ἡρεμίαν, πόση τις.

ὥστε τὸ κινούμενον οὐχ ἀπλῶς ἔσται μετρητὸν ὑπὸ χρόνου, ἢ ποσόν τί ἐστὶν, ἀλλ' ἢ ἡ κίνησις αὐτοῦ ποσὴ. ὥστε ὅσα μήτε κινεῖται μήτ' ἡρεμεῖ, οὐκ ἔστιν ἐν χρόνῳ· τὸ μὲν γὰρ ἐν χρόνῳ εἶναι τὸ μετρεῖσθαι ἐστὶ χρόνῳ, ὁ δὲ χρόνος κινήσεως καὶ ἡρεμίας μέτρον.

φανερὸν οὖν ὅτι οὐδὲ τὸ μὴ ὄν ἔσται πᾶν ἐν χρόνῳ, οἷον ὅσα μὴ ἐνδέχεται ἄλλως, ὥσπερ τὸ τὴν διάμετρον εἶναι τῇ πλευρᾷ σύμμετρον.

ὅλως γάρ, εἰ μέτρον μὲν ἐστὶ κινήσεως ὁ χρόνος καθ' αὐτό, τῶν δ' ἄλλων κατὰ συμβεβηκός, δηλὸν ὅτι ὦν τὸ εἶναι μετρεῖ, τούτοις ἅπασιν ἔσται τὸ εἶναι ἐν τῷ ἡρεμεῖν ἢ κινεῖσθαι. ὅσα μὲν οὖν φθαρτὰ καὶ γενητὰ καὶ ὅλως ὅτε μὲν ὄντα ὅτε δὲ μὴ, ἀνάγκη ἐν χρόνῳ εἶναι (ἔστιν γὰρ χρόνος τις πλείων, ὃς ὑπερέξει τοῦ τε εἶναι αὐτῶν καὶ τοῦ μετροῦντος τὴν οὐσίαν αὐτῶν)· τῶν δὲ μὴ ὄντων ὅσα μὲν περιέχει ὁ χρόνος, τὰ μὲν ἦν, οἷον Ὅμηρός ποτε [222a] ἦν, τὰ δὲ ἔσται, οἷον τῶν μελλόντων τι, ἐφ' ὁπότερα περιέχει· καὶ εἰ ἐπ' ἄμφω, ἀμφοτέρω [καὶ ἦν καὶ ἔσται]· ὅσα δὲ μὴ περιέχει μηδαμῇ, οὔτε ἦν οὔτε ἔστιν οὔτε ἔσται. ἔστι δὲ τὰ τοιαῦτα τῶν μὴ ὄντων, ὥσων τάντικείμενα αἰεὶ ἔστιν, οἷον τὸ ἀσύμμετρον εἶναι τὴν διάμετρον αἰεὶ ἔστι, καὶ οὐκ ἔσται τοῦτ' ἐν χρόνῳ. οὐ τοίνυν οὐδὲ τὸ σύμμετρον· διὸ αἰεὶ οὐκ ἔστιν, ὅτι ἐναντίον τῷ αἰεὶ ὄντι. ὥσων δὲ τὸ ἐναντίον μὴ αἰεὶ, ταῦτα δὲ δύναται καὶ εἶναι καὶ μὴ, καὶ ἔστιν γένεσις καὶ φθορὰ αὐτῶν.

Κεφάλαιο 13

Τὸ δὲ νῦν ἐστὶν συνέχεια χρόνου, ὥσπερ ἐλέχθη· συνέχει γὰρ τὸν χρόνον τὸν παρεληλυθότα καὶ ἐσόμενον, καὶ πέρας χρόνου ἐστίν· ἔστι γὰρ τοῦ μὲν ἀρχῇ, τοῦ δὲ τελευτῇ. ἀλλὰ τοῦτ' οὐχ ὥσπερ ἐπὶ τῆς στιγμῆς μενούσης φανερόν. διαιρεῖ δὲ δυνάμει. καὶ ἡ μὲν τοιοῦτο, αἰεὶ ἕτερον τὸ νῦν, ἡ δὲ συνδεῖ, αἰεὶ τὸ αὐτό, ὥσπερ ἐπὶ τῶν μαθηματικῶν γραμμῶν (οὐ γὰρ ἡ αὐτὴ αἰεὶ στιγμή τῇ νοήσει· διαιρούντων γὰρ ἄλλη καὶ ἄλλη· ἡ δὲ μία, ἡ αὐτὴ πάντη)

-οὕτω καὶ τὸ νῦν τὸ μὲν τοῦ χρόνου διαίρεσις κατὰ δύναμιν, τὸ δὲ πέρας ἀμφοῖν καὶ ἐνότης· ἔστι δὲ ταῦτό καὶ κατὰ ταῦτό ἡ διαίρεσις καὶ ἡ ἔνωσις, τὸ δ' εἶναι οὐ ταῦτό.

τὸ μὲν οὖν οὕτω λέγεται τῶν νῦν, ἄλλο δ' ὅταν ὁ χρόνος ὁ τούτου ἐγγὺς ᾖ. ἥξει νῦν, ὅτι τήμερον ἥξει· ἡκεῖ νῦν, ὅτι ἦλθε τήμερον. τὰ δ' ἐν Ἰλίῳ γέγονεν οὐ νῦν, οὐδ' ὁ κατακλυσμὸς [γέγονε] νῦν· καίτοι συνεχῆς ὁ χρόνος εἰς αὐτά, ἀλλ' ὅτι οὐκ ἐγγύς.

τὸ δὲ ποτὲ χρόνος ὠρισμένος πρὸς τὸ πρότερον νῦν, οἷον ποτὲ ἐλήφθη Τροία, καὶ ποτὲ ἔσται κατακλυσμός· δεῖ γὰρ πεπεράνθαι πρὸς τὸ νῦν. ἔσται ἄρα ποσὸς τις ἀπὸ τοῦδε χρόνος εἰς ἐκεῖνο, καὶ ἦν εἰς τὸ παρελθόν. εἰ δὲ μηδεὶς χρόνος ὅς οὐ ποτε, πᾶς ἂν εἴη χρόνος πεπερασμένος.

ἄρ' οὖν ὑπολείψει; ἢ οὐ, εἴπερ αἰεὶ ἔστι κίνησις; ἄλλος οὖν ἢ ὁ αὐτὸς πολλάκις; δηλὸν ὅτι ὥς ἂν ἡ κίνησις, οὕτω καὶ ὁ χρόνος· εἰ μὲν γὰρ ἡ αὐτὴ καὶ μία γίνεταί ποτε, ἔσται καὶ χρόνος εἷς καὶ ὁ αὐτός, εἰ δὲ μή, οὐκ ἔσται.

ἐπεὶ δὲ τὸ νῦν τελευτῇ [222b] καὶ ἀρχῇ χρόνου, ἀλλ' οὐ τοῦ αὐτοῦ, ἀλλὰ τοῦ μὲν παρήκοντος τελευτῇ, ἀρχῇ δὲ τοῦ μέλλοντος, ἔχοι ἂν ὥσπερ ὁ κύκλος ἐν τῷ αὐτῷ πῶς τὸ κυρτὸν καὶ τὸ κοῖλον, οὕτως καὶ ὁ χρόνος ἀεὶ ἐν ἀρχῇ καὶ τελευτῇ. καὶ διὰ τοῦτο δοκεῖ ἀεὶ ἕτερος· οὐ γὰρ τοῦ αὐτοῦ ἀρχῇ καὶ τελευτῇ τὸ νῦν· ἅμα γὰρ ἂν καὶ κατὰ τὸ αὐτὸ τάναντία ἂν εἴη. καὶ οὐχ ὑπολείψει δὴ· αἰεὶ γὰρ ἐν ἀρχῇ.

τὸ δ' ἤδη τὸ ἐγγύς ἐστὶ τοῦ παρόντος νῦν ἀτόμου μέρος τοῦ μέλλοντος χρόνου (πότε βαδίζεις; ἤδη, ὅτι ἐγγύς ὁ χρόνος ἐν ᾧ μέλλει), καὶ τοῦ παρεληλυθότος χρόνου τὸ μὴ πόρρω τοῦ νῦν (πότε βαδίζεις; ἤδη βεβάδικα). τὸ δὲ Ἴλιον φάναι ἤδη ἐαλωκέναι οὐ

λέγομεν, ὅτι λίαν πόρρω τοῦ νῦν. καὶ τὸ ἄρτι τὸ ἐγγὺς τοῦ παρόντος νῦν [τὸ] μόνιον τοῦ παρελθόντος. πότε ἦλθες; ἄρτι, ἐὰν ἢ ὁ χρόνος ἐγγὺς τοῦ ἐνεστώτος νῦν. πάλαι δὲ τὸ πόρρω. τὸ δ' ἐξαίφνης τὸ ἐν ἀναισθήτῳ χρόνῳ διὰ μικρότητα ἐκστάν· μεταβολὴ δὲ πᾶσα φύσει ἐκστατικόν. ἐν δὲ τῷ χρόνῳ πάντα γίγνεται καὶ φθείρεται· διὸ καὶ οἱ μὲν σοφώτατον ἔλεγον, ὁ δὲ Πυθαγόρειος Πάρων ἀμαθέστατον, ὅτι καὶ ἐπιλανθάνονται ἐν τούτῳ, λέγων ὀρθότερον. δῆλον οὖν ὅτι φθορᾶς μᾶλλον ἔσται καθ' αὐτὸν αἴτιος ἢ γενέσεως, καθάπερ ἐλέχθη καὶ πρότερον (ἐκστατικὸν γὰρ ἢ μεταβολὴ καθ' αὐτήν), γενέσεως δὲ καὶ τοῦ εἶναι κατὰ συμβεβηκός. σημεῖον δὲ ἱκανὸν ὅτι γίγνεται μὲν οὐδὲν ἄνευ τοῦ κινεῖσθαι πῶς αὐτὸ καὶ πράττειν, φθείρεται δὲ καὶ μηδὲν κινούμενον. καὶ ταύτην μάλιστα λέγειν εἰώθαμεν ὑπὸ τοῦ χρόνου φθοράν. οὐ μὲν ἄλλ' οὐδὲ ταύτην ὁ χρόνος ποιεῖ, ἀλλὰ συμβαίνει ἐν χρόνῳ γίνεσθαι καὶ ταύτην τὴν μεταβολήν.

ὅτι μὲν οὖν ἔστιν ὁ χρόνος καὶ τί, καὶ ποσαχῶς λέγεται τὸ νῦν, καὶ τί τὸ ποτε καὶ τὸ ἄρτι καὶ τὸ ἤδη καὶ τὸ πάλαι καὶ τὸ ἐξαίφνης, εἴρηται.

Κεφάλαιο 14

Τούτων δ' ἡμῖν οὕτω διωρισμένων φανερόν ὅτι πᾶσα μεταβολὴ καὶ ἅπαν τὸ κινούμενον ἐν χρόνῳ. τὸ γὰρ θᾶπτον καὶ βραδύτερον κατὰ πᾶσάν ἐστιν μεταβολήν (ἐν πᾶσι γὰρ οὕτω φαίνεται). λέγω δὲ θᾶπτον κινεῖσθαι τὸ πρότερον [223a] μεταβάλλον εἰς τὸ ὑποκείμενον κατὰ τὸ αὐτὸ διάστημα καὶ ὁμαλὴν κίνησιν κινούμενον (οἷον ἐπὶ τῆς φορᾶς, εἰ ἄμφω κατὰ τὴν περιφερῆ κινεῖται ἢ ἄμφω κατὰ τὴν εὐθεΐαν· ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων). ἀλλὰ μὴν τό γε πρότερον ἐν χρόνῳ ἐστὶ· πρότερον γὰρ καὶ ὕστερον λέγομεν κατὰ τὴν πρὸς τὸ νῦν ἀπόστασιν, τὸ δὲ νῦν ὅρος τοῦ παρήκοντος καὶ τοῦ μέλλοντος· ὥστ' ἐπεὶ τὰ νῦν ἐν χρόνῳ, καὶ τὸ πρότερον καὶ ὕστερον ἐν χρόνῳ ἔσται· ἐν ᾧ γὰρ τὸ νῦν, καὶ ἡ τοῦ νῦν ἀπόστασις. (ἐναντίως δὲ λέγεται τὸ πρότερον κατὰ τε τὸν παρεληλυθότα χρόνον καὶ τὸν μέλλοντα· ἐν μὲν γὰρ τῷ παρεληλυθότι πρότερον λέγομεν τὸ πορρώτερον τοῦ νῦν, ὕστερον δὲ τὸ ἐγγύτερον, ἐν δὲ τῷ μέλλοντι πρότερον μὲν τὸ ἐγγύτερον, ὕστερον δὲ τὸ πορρώτερον.) ὥστε ἐπεὶ τὸ μὲν πρότερον ἐν χρόνῳ, πάσῃ δ' ἀκολουθεῖ κινήσει τὸ πρότερον, φανερόν ὅτι πᾶσα μεταβολὴ καὶ πᾶσα κίνησις ἐν χρόνῳ ἐστίν. ἄξιον δ' ἐπισκέψεως καὶ πῶς ποτε ἔχει ὁ χρόνος πρὸς τὴν ψυχὴν, καὶ διὰ τί ἐν παντὶ δοκεῖ εἶναι ὁ χρόνος, καὶ ἐν γῇ καὶ ἐν θαλάττῃ καὶ ἐν οὐρανῷ. ἢ ὅτι κινήσεώς τι πάθος ἢ ἕξις, ἀριθμὸς γε ὢν, ταῦτα δὲ κινήτὰ πάντα (ἐν τόπῳ γὰρ πάντα), ὁ δὲ χρόνος καὶ ἡ κίνησις ἅμα κατὰ τε δύναμιν καὶ κατ' ἐνέργειαν;

πότερον δὲ μὴ οὔσης ψυχῆς εἴη ἂν ὁ χρόνος ἢ οὐ, ἀπορήσειεν ἂν τις. ἀδυνάτου γὰρ ὄντος εἶναι τοῦ ἀριθμήσοντος ἀδύνατον καὶ ἀριθμητόν τι εἶναι, ὥστε δῆλον ὅτι οὐδ' ἀριθμός. ἀριθμὸς γὰρ ἢ τὸ ἡριθμημένον ἢ τὸ ἀριθμητόν. εἰ δὲ μηδὲν ἄλλο πέφυκεν ἀριθμεῖν ἢ ψυχὴ καὶ ψυχῆς νοῦς, ἀδύνατον εἶναι χρόνον ψυχῆς μὴ οὔσης, ἀλλ' ἢ τοῦτο ὃ ποτε ὂν ἔστιν ὁ χρόνος, οἷον εἰ ἐνδέχεται κίνησιν εἶναι ἄνευ ψυχῆς. τὸ δὲ πρότερον καὶ ὕστερον ἐν κινήσει ἐστίν· χρόνος δὲ ταῦτ' ἐστὶν ἢ ἀριθμητὰ ἐστίν.

ἀπορήσειε δ' ἂν τις καὶ ποίας κινήσεως ὁ χρόνος ἀριθμός. ἢ ὅποιου; καὶ γὰρ γίνεταί ἐν χρόνῳ καὶ φθείρεται καὶ αὐξάνεται καὶ ἀλλοιοῦται καὶ φέρεται· ἢ οὖν κινήσις ἐστὶ, ταύτῃ ἐστὶν ἐκάστης κινήσεως ἀριθμός. διὸ κινήσεως ἐστὶν ἀπλῶς ἀριθμός [223b]

συνεχοῦς, ἀλλ' οὐ τινός.

ἀλλ' ἔστι νῦν κεκινήσθαι καὶ ἄλλο· ὧν ἑκατέρας τῆς κινήσεως εἴη ἂν ἀριθμός. ἕτερος οὖν χρόνος ἔστιν, καὶ ἅμα δύο ἴσοι χρόνοι ἂν εἶεν· ἢ οὐ; ὁ αὐτὸς γὰρ χρόνος καὶ εἷς ὁ ἴσος καὶ ἅμα· εἶδει δὲ καὶ οἱ μὴ ἅμα· εἰ γὰρ εἶεν κύνες, οἱ δ' ἵπποι, ἑκάτεροι δ' ἐπτά, ὁ αὐτὸς ἀριθμός. οὕτω δὲ καὶ τῶν κινήσεων τῶν ἅμα περαινομένων ὁ αὐτὸς χρόνος, ἀλλ' ἢ μὲν ταχεῖα ἴσως ἢ δ' οὐ, καὶ ἢ μὲν φορὰ ἢ δ' ἀλλοίωσις· ὁ μέντοι χρόνος ὁ αὐτός, εἴπερ καὶ [ὁ ἀριθμός] ἴσος καὶ ἅμα, τῆς τε ἀλλοιώσεως καὶ τῆς φορᾶς. καὶ διὰ τοῦτο αἱ μὲν κινήσεις ἕτεραι καὶ χωρίς, ὁ δὲ χρόνος πανταχοῦ ὁ αὐτός, ὅτι καὶ ὁ ἀριθμός εἷς καὶ ὁ αὐτὸς πανταχοῦ ὁ τῶν ἴσων καὶ ἅμα. ἐπεὶ δ' ἔστι φορὰ καὶ ταύτης ἢ κύκλω, ἀριθμεῖται δ' ἕκαστον ἐνὶ τινι συγγενεῖ, μονάδες μονάδι, ἵπποι δ' ἵππῳ, οὕτω <δὲ> καὶ ὁ χρόνος χρόνῳ τινὶ ὠρισμένῳ, μετρεῖται δ', ὥσπερ εἶπομεν, ὃ τε χρόνος κινήσει καὶ ἡ κίνησις χρόνῳ (τοῦτο δ' ἐστίν, ὅτι ὑπὸ τῆς ὠρισμένης κινήσεως χρόνῳ μετρεῖται τῆς τε κινήσεως τὸ ποσὸν καὶ τοῦ χρόνου)-εἰ οὖν τὸ πρῶτον μέτρον πάντων τῶν συγγενῶν, ἡ κυκλοφορία ἢ ὁμαλῆς μέτρον μάλιστα, ὅτι ὁ ἀριθμός ὁ ταύτης γνωριμώτατος. ἀλλοίωσις μὲν οὖν οὐδὲ αὐξήσις οὐδὲ γένεσις οὐκ εἰσὶν ὁμαλεῖς, φορὰ δ' ἔστιν. διὸ καὶ δοκεῖ ὁ χρόνος εἶναι ἢ τῆς σφαίρας κίνησις, ὅτι ταύτη μετροῦνται αἱ ἄλλαι κινήσεις καὶ ὁ χρόνος ταύτῃ τῇ κινήσει.

διὰ δὲ τοῦτο καὶ τὸ εἰωθὸς λέγεσθαι συμβαίνει· φασὶν γὰρ κύκλον εἶναι τὰ ἀνθρώπινα πράγματα, καὶ τῶν ἄλλων τῶν κίνησιν ἐχόντων φυσικὴν καὶ γένεσιν καὶ φθοράν. τοῦτο δέ, ὅτι ταῦτα πάντα τῷ χρόνῳ κρίνεται, καὶ λαμβάνει τελευτὴν καὶ ἀρχὴν ὥσπερ ἂν εἰ κατὰ τινα περίοδον. καὶ γὰρ ὁ χρόνος αὐτὸς εἶναι δοκεῖ κύκλος τις· τοῦτο δὲ πάλιν δοκεῖ, διότι τοιαύτης ἐστὶ φορᾶς μέτρον καὶ μετρεῖται αὐτὸς ὑπὸ τοιαύτης. ὥστε τὸ λέγειν εἶναι τὰ γιγνόμενα τῶν πραγμάτων κύκλον τὸ λέγειν ἐστὶν τοῦ χρόνου εἶναι τινα κύκλον· τοῦτο δέ, ὅτι μετρεῖται τῇ κυκλοφορίᾳ· παρὰ γὰρ τὸ μέτρον οὐδὲν [224a] ἄλλο παρεμφαίνεται τῷ μετρομένῳ, ἀλλ' ἢ πλείω μέτρα τὸ ὅλον.

λέγεται δὲ ὀρθῶς καὶ ὅτι ἀριθμός μὲν ὁ αὐτός ὁ τῶν προβάτων καὶ τῶν κυνῶν, εἰ ἴσος ἑκάτερος, δεκάς δὲ οὐχ ἢ αὐτὴ οὐδὲ δέκα τὰ αὐτά, ὥσπερ οὐδὲ τρίγωνα τὰ αὐτά τὸ ἰσόπλευρον καὶ τὸ σκαληνές, καίτοι σχῆμά γε ταυτό, ὅτι τρίγωνα ἅμφω· ταὐτὸ γὰρ λέγεται οὐ μὴ διαφέρει διαφορᾷ, ἀλλ' οὐχὶ οὐ διαφέρει, οἷον τρίγωνον τριγώνου <τριγώνου> διαφορᾷ διαφέρει· τοιγαροῦν ἕτερα τρίγωνα· σχήματος

δὲ οὐ, ἀλλ' ἐν τῇ αὐτῇ διαιρέσει καὶ μιᾷ. σχῆμα γὰρ τὸ μὲν τοιόνδε κύκλος, τὸ δὲ τοιόνδε τρίγωνον, τούτου δὲ τὸ μὲν τοιόνδε ἰσόπλευρον, τὸ δὲ τοιόνδε σκαληνές. σχῆμα μὲν οὖν τὸ αὐτό, καὶ τοῦτο τρίγωνον, τρίγωνον δ' οὐ τὸ αὐτό. καὶ ἀριθμὸς δὴ ὁ αὐτός (οὐ γὰρ διαφέρει ἀριθμοῦ διαφορᾷ ὁ ἀριθμὸς αὐτῶν), δεκάς δ' οὐχ ἡ αὐτή· ἐφ' ὧν γὰρ λέγεται, διαφέρει· τὰ μὲν γὰρ κύνες, τὰ δ' ἵπποι.

καὶ περὶ μὲν χρόνου καὶ αὐτοῦ καὶ τῶν περὶ αὐτὸν οἰκείων τῇ σκέψει εἴρηται.

Κεφάλαιο 1

Μεταβάλλει δὲ τὸ μεταβάλλον πᾶν τὸ μὲν κατὰ συμβεβηκός, οἷον ὅταν λέγωμεν τὸ μουσικὸν βαδίζειν, ὅτι ᾧ συμβέβηκεν μουσικῶ εἶναι, τοῦτο βαδίζει· τὸ δὲ τῷ τούτου τι μεταβάλλειν ἀπλῶς λέγεται μεταβάλλειν, οἷον ὅσα λέγεται κατὰ μέρη (ὕγιαζεται γὰρ τὸ σῶμα, ὅτι ὁ ὀφθαλμὸς ἢ ὁ θώραξ, ταῦτα δὲ μέρη τοῦ ὅλου σώματος)· ἔστι δέ τι ὃ οὔτε κατὰ συμβεβηκός κινεῖται οὔτε τῷ ἄλλο τι τῶν αὐτοῦ, ἀλλὰ τῷ αὐτὸ κινεῖσθαι πρῶτον. καὶ τοῦτ' ἔστι τὸ καθ' αὐτὸ κινητόν, κατ' ἄλλην δὲ κίνησιν ἕτερον, οἷον ἀλλοιωτόν, καὶ ἀλλοιώσεως ὑγιαντόν ἢ θερμαντόν ἕτερον. ἔστι δὲ καὶ ἐπὶ τοῦ κινουντος ὡσαύτως· τὸ μὲν γὰρ κατὰ συμβεβηκός κινεῖ, τὸ δὲ κατὰ μέρος τῷ τῶν τούτου τι, τὸ δὲ καθ' αὐτὸ πρῶτον, οἷον ὁ μὲν ἰατρὸς ἰᾶται, ἡ δὲ χεὶρ πλήττει. ἐπεὶ δ' ἔστι μὲν τι τὸ κινεῖν πρῶτον, ἔστι δέ τι τὸ κινούμενον, ἔτι ἐν ᾧ, ὁ χρόνος, καὶ παρὰ ταῦτα ἐξ οὗ καὶ εἰς (224b.) ὃ — πᾶσα γὰρ κίνησις ἐκ τινος καὶ εἰς τι· ἕτερον γὰρ τὸ πρῶτον κινούμενον καὶ εἰς ὃ κινεῖται καὶ ἐξ οὗ, οἷον τὸ ξύλον καὶ τὸ θερμὸν καὶ τὸ ψυχρόν· τούτων δὲ τὸ μὲν ὅ, τὸ δ' εἰς ὃ, τὸ δ' ἐξ οὗ — ἡ δὴ κίνησις δῆλον ὅτι ἐν τῷ ξύλῳ, οὐκ ἐν τῷ εἶδει· οὔτε γὰρ κινεῖ οὔτε κινεῖται τὸ εἶδος ἢ ὁ τόπος ἢ τὸ τοσόνδε, ἀλλ' ἔστι κινεῖν καὶ κινούμενον καὶ εἰς ὃ κινεῖται. μᾶλλον γὰρ εἰς ὃ ἢ ἐξ οὗ κινεῖται ὀνομάζεται ἡ μεταβολή. διὸ καὶ ἡ φθορὰ εἰς τὸ μὴ ὄν μεταβολή ἐστιν· καίτοι καὶ ἐξ ὄντος μεταβάλλει τὸ φθειρόμενον· καὶ ἡ γένεσις εἰς ὄν, καίτοι καὶ ἐκ μὴ ὄντος. τί μὲν οὖν ἐστὶν ἡ κίνησις, εἴρηται πρότερον· τὰ δὲ εἶδη καὶ τὰ πάθη καὶ ὁ τόπος, εἰς ᾧ κινεῖν τὰ κινούμενα, ἀκίνητά ἐστιν, οἷον ἡ ἐπιστήμη καὶ ἡ θερμότης. καίτοι ἀπορήσειεν ἂν τις, εἰ τὰ πάθη κινήσεις, ἡ δὲ λευκότης πάθος· ἔσται γὰρ εἰς κίνησιν μεταβολή. ἀλλ' ἴσως οὐχ ἡ λευκότης κίνησις, ἀλλ' ἡ λεύκαν σις. ἔστιν δὲ καὶ ἐν ἐκείνοις καὶ τὸ κατὰ συμβεβηκός καὶ τὸ κατὰ μέρος καὶ [τὸ] κατ' ἄλλο καὶ τὸ πρῶτως καὶ μὴ κατ' ἄλλο, οἷον τὸ λευκαινόμενον εἰς μὲν τὸ νοούμενον μεταβάλλει κατὰ συμβεβηκός (τῷ γὰρ χρώματι συμβέβηκε νοεῖσθαι), εἰς δὲ χρῶμα ὅτι μέρος τὸ λευκὸν τοῦ χρώματος (καὶ εἰς τὴν Εὐρώπην ὅτι μέρος αἱ Ἀθηναίαι τῆς Εὐρώπης), εἰς δὲ τὸ λευκὸν χρῶμα καθ' αὐτό. πῶς μὲν οὖν καθ' αὐτὸ κινεῖται καὶ πῶς κατὰ συμβεβηκός, καὶ πῶς κατ' ἄλλο τι καὶ πῶς τῷ αὐτὸ πρῶτον, καὶ ἐπὶ κινουντος καὶ ἐπὶ κινουμένου,

δῆλον, καὶ ὅτι ἡ κίνησις οὐκ ἐν τῷ εἶδει ἀλλ' ἐν τῷ κινουμένῳ καὶ κινήτῳ κατ' ἐνέργειαν. ἡ μὲν οὖν κατὰ συμβεβηκὸς μεταβολὴ ἀφείσθω· ἐν ἅπασί τε γάρ ἐστι καὶ αἰεὶ καὶ πάντων· ἡ δὲ μὴ κατὰ συμβεβηκὸς οὐκ ἐν ἅπασιν, ἀλλ' ἐν τοῖς ἐναντίοις καὶ τοῖς μεταξὺ καὶ ἐν ἀντιφάσει· τούτου δὲ πίστις ἐκ τῆς ἐπαγωγῆς. ἐκ δὲ τοῦ μεταξὺ μεταβάλλει· χρῆται γὰρ αὐτῷ ὡς ἐναντίῳ ὄντι πρὸς ἐκάτερον· ἔστι γὰρ πῶς τὸ μεταξὺ τὰ ἄκρα. διὸ καὶ τοῦτο πρὸς ἐκεῖνα κακεῖνα πρὸς τοῦτο λέγεται πῶς ἐναντία, οἷον ἡ μέση ὀξεῖα πρὸς τὴν ὑπάτην καὶ βαρεῖα πρὸς τὴν νητὴν, καὶ τὸ φαιὸν λευκὸν πρὸς τὸ μέλαν καὶ μέλαν πρὸς τὸ λευκόν.

ἐπεὶ δὲ (225a.) πᾶσα μεταβολὴ ἐστὶν ἐκ τινος εἰς τι (δηλοῖ δὲ καὶ τοῦνομα· μετ' ἄλλο γάρ τι καὶ τὸ μὲν πρότερον δηλοῖ, τὸ δ' ὕστερον), μεταβάλλοι ἂν τὸ μεταβάλλον τετραχῶς· ἡ γὰρ ἐξ ὑποκειμένου εἰς ὑποκείμενον, ἡ ἐξ ὑποκειμένου εἰς μὴ ὑποκείμενον, ἡ οὐκ ἐξ ὑποκειμένου εἰς ὑποκείμενον, ἡ οὐκ ἐξ ὑποκειμένου εἰς μὴ ὑποκείμενον· λέγω δὲ ὑποκείμενον τὸ καταφάσει δηλούμενον. ὅστε ἀνάγκη ἐκ τῶν εἰρημένων τρεῖς εἶναι μεταβολάς, τὴν τε ἐξ ὑποκειμένου εἰς ὑποκείμενον, καὶ τὴν ἐξ ὑποκειμένου εἰς μὴ ὑποκείμενον, καὶ τὴν ἐκ μὴ ὑποκειμένου εἰς ὑποκείμενον. ἡ γὰρ οὐκ ἐξ ὑποκειμένου εἰς μὴ ὑποκείμενον οὐκ ἔστιν μεταβολὴ διὰ τὸ μὴ εἶναι κατ' ἀντίθεσιν· οὔτε γὰρ ἐναντία οὔτε ἀντίφασίς ἐστιν.

ἡ μὲν οὖν οὐκ ἐξ ὑποκειμένου εἰς ὑποκείμενον μεταβολὴ κατ' ἀντίφασιν γένεσις ἐστὶν, ἡ μὲν ἀπλῶς ἀπλῇ, ἡ δὲ τις τινός (οἷον ἡ μὲν ἐκ μὴ λευκοῦ εἰς λευκὸν γένεσις τούτου, ἡ δ' ἐκ τοῦ μὴ ὄντος ἀπλῶς εἰς οὐσίαν γένεσις ἀπλῶς, καθ' ἣν ἀπλῶς γίνεσθαι καὶ οὐ τι γίνεσθαι λέγομεν)· ἡ δ' ἐξ ὑποκειμένου εἰς οὐκ ὑποκείμενον φθορά, ἀπλῶς μὲν ἡ ἐκ τῆς οὐσίας εἰς τὸ μὴ εἶναι, τις δὲ ἡ εἰς τὴν ἀντικειμένην ἀπόφασιν, καθάπερ ἐλέχθη καὶ ἐπὶ τῆς γενέσεως.

εἰ δὲ τὸ μὴ ὄν λέγεται πλεοναχῶς, καὶ μήτε τὸ κατὰ σύνθεσιν ἢ διαίρεσιν ἐνδέχεται κινεῖσθαι μήτε τὸ κατὰ δύναμιν, τὸ τῷ ἀπλῶς κατ' ἐνέργειαν ὄντι ἀντικείμενον (τὸ μὲν γὰρ μὴ λευκὸν ἢ μὴ ἀγαθὸν ὅμως ἐνδέχεται κινεῖσθαι κατὰ συμβεβηκός, εἴη γὰρ <ἂν> ἄνθρωπος τὸ μὴ λευκόν· τὸ δ' ἀπλῶς μὴ τότε οὐδαμῶς), ἀδύνατον [γὰρ] τὸ μὴ ὄν κινεῖσθαι (εἰ δὲ τοῦτο, καὶ τὴν γένεσιν κίνησιν εἶναι· γίγνεται γὰρ τὸ μὴ ὄν· εἰ γὰρ καὶ ὅτι μάλιστα κατὰ συμβεβηκός γίγνεται, ἀλλ' ὅμως ἀληθὲς εἰπεῖν ὅτι ὑπάρχει τὸ μὴ ὄν κατὰ τοῦ γιγνομένου ἀπλῶς)-ὁμοίως δὲ καὶ τὸ ἡρεμεῖν.

ταῦτά τε δὴ συμβαίνει δυσχερῇ [τῷ κινεῖσθαι τὸ μὴ ὄν] καὶ εἰ πᾶν τὸ κινούμενον ἐν τόπῳ, τὸ δὲ μὴ ὄν οὐκ ἔστιν ἐν τόπῳ· εἴη γὰρ ἄν που.

οὐδὲ δὴ ἡ φθορὰ κίνησις· ἐναντίον μὲν γὰρ κινήσει ἢ κίνησις ἢ ἡρεμία, ἡ δὲ φθορὰ γενέσει ἐναντίον. ἐπεὶ δὲ πᾶσα κίνησις μεταβολή τις, μεταβολαὶ δὲ τρεῖς αἱ εἰρημέναι, τούτων δὲ αἱ κατὰ γένεσιν καὶ φθορὰν (225b.) οὐ κινήσεις, αὗται δ' εἰσὶν αἱ κατ' ἀντίφασιν, ἀνάγκη τὴν ἐξ ὑποκειμένου εἰς ὑποκείμενον μεταβολὴν κίνησιν εἶναι μόνην. τὰ δ' ὑποκείμενα ἢ ἐναντία ἢ μεταξύ (καὶ γὰρ ἡ στέρησις κείσθω ἐναντίον), καὶ δηλοῦται καταφάσει, τὸ γυμνὸν καὶ νωδὸν καὶ μέλαν. εἰ οὖν αἱ κατηγορίαι διήρηνται οὐσία καὶ ποιότητι καὶ τῷ πού [καὶ τῷ ποτέ] καὶ τῷ πρὸς τι καὶ τῷ ποσῷ καὶ τῷ ποιεῖν ἢ πάσχειν, ἀνάγκη τρεῖς εἶναι κινήσεις, τὴν τε τοῦ ποιοῦ καὶ τὴν τοῦ ποσοῦ καὶ τὴν κατὰ τόπον.

Κεφάλαιο 2

Κατ' οὐσίαν δ' οὐκ ἔστιν κίνησις διὰ τὸ μηδὲν εἶναι οὐσία τῶν ὄντων ἐναντίον. οὐδὲ δὴ τοῦ πρὸς τι· ἐνδέχεται γὰρ θατέρου μεταβάλλοντος <ἀληθεύεσθαι καὶ μὴ> ἀληθεύεσθαι θάτερον μηδὲν μεταβάλλον, ὥστε κατὰ συμβεβηκὸς ἡ κίνησις αὐτῶν. οὐδὲ δὴ ποιούντος καὶ πάσχοντος, ἢ κινουμένου καὶ κινούντος, ὅτι οὐκ ἔστι κινήσεως κίνησις οὐδὲ γενέσεως γένεσις, οὐδ' ὅλως μεταβολῆς μεταβολή.

πρῶτον μὲν γὰρ διχῶς ἐνδέχεται κινήσεως εἶναι κίνησιν, ἢ ὡς ὑποκειμένου (οἶον ἄνθρωπος κινεῖται ὅτι ἐκ λευκοῦ εἰς μέλαν μεταβάλλει· ἄρα γε οὕτω καὶ ἡ κίνησις ἢ θερμαίνεται ἢ ψύχεται ἢ τόπον ἀλλάττει ἢ αὐξάνεται ἢ φθίνει; τοῦτο δὲ ἀδύνατον· οὐ γὰρ τῶν ὑποκειμένων τι ἢ μεταβολή), ἢ τῷ ἑτερόν τι ὑποκείμενον ἐκ μεταβολῆς μεταβάλλειν εἰς ἕτερον εἶδος [οἶον ἄνθρωπος ἐκ νόσου εἰς ὑγίειαν]. ἀλλ' οὐδὲ τοῦτο δυνατόν πλην κατὰ συμβεβηκὸς· αὐτὴ γὰρ ἡ κίνησις ἐξ ἄλλου εἶδους εἰς ἄλλο ἐστὶ μεταβολή <οἶον ἀνθρώπου ἐκ νόσου εἰς ὑγίειαν>· καὶ ἡ γένεσις δὲ καὶ ἡ φθορὰ ὡσαύτως, πλην αἱ μὲν εἰς ἀντικείμενα ὡδί, ἡ δὲ ὡδί, ἡ κίνησις. ἅμα οὖν μεταβάλλει ἐξ ὑγείας εἰς νόσον καὶ ἐξ αὐτῆς ταύτης τῆς μεταβολῆς εἰς ἄλλην. δηλὸν δὴ ὅτι ὅταν νοσήσῃ, μεταβεβληκὸς ἔσται εἰς ὅποιανοῦν (ἐνδέχεται γὰρ ἡρεμεῖν), καὶ ἔτι εἰς μὴ τὴν τυχοῦσαν αἰεὶ, κἀκεῖνη ἐκ τινος εἰς τι ἕτερον ἔσται, ὥστε καὶ ἡ ἀντικείμενη ἔσται ὑγίανσις· ἀλλὰ τῷ συμβεβηκέναι, οἶον ἐξ ἀναμνήσεως εἰς λήθην μεταβάλλει, ὅτι ᾧ ὑπάρχει, ἐκεῖνο μεταβάλλει ὅτε μὲν εἰς ἐπιστήμην ὅτε δ' εἰς ἄγνοιαν.

ἔτι εἰς ἄπειρον βαδιεῖται, εἰ ἔσται μεταβολῆς μεταβολὴ καὶ γενέσεως γένεσις. ἀνάγκη δὴ καὶ τὴν προτέραν, εἰ ἡ ὑστέρα (226a.) ἔσται, οἶον εἰ ἡ ἀπλὴ γένεσις ἐγένετό ποτε, καὶ τὸ γιγνόμενον ἐγένετο, ὥστε οὐπω ἦν τὸ γιγνόμενον ἀπλῶς, ἀλλὰ τι γιγνόμενον γιγνόμενον ἤδη, καὶ πάλιν τοῦτ' ἐγένετό ποτε, ὥστ' οὐκ ἦν πω τότε γιγνόμενον γιγνόμενον. ἐπεὶ δὲ τῶν ἀπείρων οὐκ ἔστιν τι πρῶτον, οὐκ ἔσται τὸ πρῶτον, ὥστ' οὐδὲ τὸ ἐχόμενον· οὔτε γίγνεσθαι οὖν οὔτε κινεῖσθαι οἶον τε οὔτε μεταβάλλειν οὐδέν.

ἔτι τοῦ αὐτοῦ κίνησις ἢ ἐναντία (καὶ ἔτι ἡρέμησις), καὶ γένεσις καὶ φθορά, ὥστε τὸ γιγνόμενον γιγνόμενον ὅταν γένηται γιγνόμενον,

τότε φθείρεται· οὔτε γὰρ εὐθὺς γιγνόμενον οὐθ' ὕστερον· εἶναι γὰρ δεῖ τὸ φθειρόμενον.

ἔτι ὕλην δεῖ ὑπεῖναι καὶ τῷ γιγνομένῳ καὶ τῷ μεταβάλλοντι. τίς οὖν ἔσται — ὥσπερ τὸ ἀλλοιωτὸν σῶμα ἢ ψυχὴ, οὕτω τί τὸ γιγνόμενον κίνησις ἢ γένεσις; καὶ πάλιν τί εἰς ὃ κινοῦνται; δεῖ γὰρ εἶναι [τι] τὴν τοῦδε ἐκ τοῦδε εἰς τόδε κίνησιν [καὶ μὴ κίνησιν] ἢ γένεσιν. ἅμα δὲ πῶς καὶ ἔσται; οὐ γὰρ ἔσται μάθησις ἢ τῆς μαθήσεως γένεσις, ὥστ' οὐδὲ γενέσεως γένεσις, οὐδέ τις τινός.

ἔτι εἰ τρία εἶδη κινήσεώς ἐστιν, τούτων τινὰ ἀνάγκη εἶναι καὶ τὴν ὑποκειμένην φύσιν καὶ εἰς ἃ κινοῦνται, οἷον τὴν φορὰν ἀλλοιοῦσθαι ἢ φέρεσθαι.

ὅλως δὲ ἐπεὶ κινεῖται [τὸ κινούμενον] πᾶν τριχῶς, ἢ κατὰ συμβεβηκὸς ἢ τῷ μέρος τι ἢ [τῷ] καθ' αὐτό, κατὰ συμβεβηκὸς μόνον ἂν ἐνδέχοιτο μεταβάλλειν τὴν μεταβολήν, οἷον εἰ ὁ ὑγιαζόμενος τρέχει ἢ μανθάνει· τὴν δὲ κατὰ συμβεβηκὸς ἀφεῖμεν πάλαι.

ἐπεὶ δὲ οὔτε οὐσίας οὔτε τοῦ πρὸς τι οὔτε τοῦ ποιεῖν καὶ πάσχειν, λείπεται κατὰ τὸ ποιὸν καὶ τὸ ποσὸν καὶ τὸ ποὺ κίνησιν εἶναι μόνον· ἐν ἐκάστῳ γὰρ ἔστι τούτων ἐναντίωσις. ἡ μὲν οὖν κατὰ τὸ ποιὸν κίνησις ἀλλοίωσις ἔστω· τοῦτο γὰρ ἐπέξευκται κοινὸν ὄνομα. λέγω δὲ τὸ ποιὸν οὐ τὸ ἐν τῇ οὐσίᾳ (καὶ γὰρ ἡ διαφορὰ ποιότης) ἀλλὰ τὸ παθητικόν, καθ' ὃ λέγεται πάσχειν ἢ ἀπαθεῖς εἶναι. ἡ δὲ κατὰ τὸ ποσὸν τὸ μὲν κοινὸν ἀνώνυμος, καθ' ἐκάτερον δ' αὖξησις καὶ φθίσις, ἡ μὲν εἰς τὸ τέλειον μέγεθος αὖξησις, ἡ δ' ἐκ τούτου φθίσις. ἡ δὲ κατὰ τόπον καὶ τὸ κοινόν καὶ τὸ ἴδιον ἀνώνυμος, ἔστω δὲ φορὰ καλουμένη τὸ κοινόν· καίτοι λέγεται γε ταῦτα φέρεσθαι μόνον κυρίως, ὅταν μὴ ἐφ' αὐτοῖς ἢ τὸ στήναι τοῖς μεταβάλλουσι τὸν τόπον, καὶ ὅσα (226b.) μὴ αὐτὰ ἑαυτὰ κινεῖ κατὰ τόπον.

ἡ δ' ἐν τῷ αὐτῷ εἶδει μεταβολὴ ἐπὶ τὸ μᾶλλον καὶ ἥττον ἀλλοίωσις ἐστιν· ἡ γὰρ ἐξ ἐναντίου ἢ εἰς ἐναντίον κίνησις ἐστιν, ἡ ἀπλῶς ἢ πῆ· ἐπὶ μὲν γὰρ τὸ ἥττον ἰοῦσα εἰς τοῦναντίον λεχθήσεται μεταβάλλειν, ἐπὶ δὲ τὸ μᾶλλον ὥς ἐκ τοῦναντίου εἰς αὐτό. διαφέρει γὰρ οὐδὲν πῆ μεταβάλλειν ἢ ἀπλῶς, πλὴν πῆ δεήσει τάναντία ὑπάρχειν· τὸ δὲ μᾶλλον καὶ ἥττον ἐστὶ τὸ πλέον ἢ ἔλαττον ἐνυπάρχειν τοῦ ἐναντίου καὶ μή. ὅτι μὲν οὖν αὗται τρεῖς μόναι κινήσεις εἰσίν, ἐκ τούτων δῆλον·

ἀκίνητον δ' ἐστὶ τό τε ὅλως ἀδύνατον κινήσθαι, ὥσπερ ὁ ψόφος ἀόρατος, καὶ τὸ ἐν πολλῷ χρόνῳ μόλις κινούμενον ἢ τὸ βραδέως

ἀρχόμενον, ὃ λέγεται δυσκίνητον, καὶ τὸ πεφυκὸς μὲν κινεῖσθαι καὶ δυνάμενον, μὴ κινούμενον δὲ τότε ὅτε πέφυκε καὶ οὐ καὶ ὥς, ὅπερ ἡρεμεῖν καλῶ τῶν ἀκινήτων μόνον· ἐναντίον γὰρ ἡρεμία κινήσει, ὥστε στέρησις ἂν εἴη τοῦ δεκτικοῦ.

τί μὲν οὖν ἐστὶ κίνησις καὶ τί ἡρεμία, καὶ πόσαι μεταβολαὶ καὶ ποῖαι κινήσεις, φανερὸν ἐκ τῶν εἰρημένων.

Κεφάλαιο 3

Μετὰ δὲ ταῦτα λέγωμεν τί ἐστὶν τὸ ἅμα καὶ χωρὶς, καὶ τί τὸ ἄπτεσθαι, καὶ τί τὸ μεταξὺ καὶ τί τὸ ἐφεξῆς καὶ τί τὸ ἐχόμενον καὶ συνεχές, καὶ τοῖς ποίοις ἕκαστον τούτων ὑπάρχειν πέφυκεν.

ἅμα μὲν οὖν λέγω ταῦτ' εἶναι κατὰ τόπον, ὅσα ἐν ἐνὶ τόπῳ ἐστὶ πρῶτῳ, χωρὶς δὲ ὅσα ἐν ἐτέρῳ,

ἄπτεσθαι δὲ ὧν τὰ ἄκρα ἅμα.

μεταξὺ δὲ εἰς ὃ πέφυκε πρότερον ἀφικνεῖσθαι τὸ μεταβάλλον ἢ εἰς ὃ ἔσχατον μεταβάλλει κατὰ φύσιν συνεχῶς μεταβάλλον. [ἐν ἐλαχίστοις δ' ἐστὶ τὸ μεταξὺ τρισίν· ἔσχατον μὲν γάρ ἐστι τῆς μεταβολῆς τὸ ἐναντιον.] συνεχῶς δὲ κινεῖται τὸ μηθὲν ἢ ὅτι ὀλίγιστον διαλείπον τοῦ πράγματος — μὴ τοῦ χρόνου (οὐδὲν γὰρ κωλύει διαλείποντα, καὶ εὐθὺς δὲ μετὰ τὴν ὑπάτην φθέγξασθαι τὴν νεάτην) ἀλλὰ τοῦ πράγματος ἐν ᾧ κινεῖται. [<ἐπεὶ δὲ πᾶσα μεταβολὴ ἐν τοῖς ἀντικειμένοις, τὰ δ' ἀντικείμενα τὰ τε ἐναντία καὶ τὰ κατὰ ἀντίφασιν, ἀντιφάσεως δ' οὐδὲν ἀνὰ μέσον, φανερόν ὅτι ἐν τοῖς ἐναντίοις ἔσται τὸ μεταξύ. (226b.) ἐν ἐλαχίστοις δ' ἐστὶ τὸ μεταξὺ τρισίν· ἔσχατον μὲν γάρ ἐστι τῆς μεταβολῆς τὸ ἐναντίον,>] τοῦτο δὲ ἐν τε ταῖς κατὰ τόπον καὶ ἐν ταῖς ἄλλαις μεταβολαῖς φανερόν. ἐναντίον δὲ κατὰ τόπον τὸ κατ' εὐθεῖαν ἀπέχον πλεῖστον· ἢ γὰρ ἐλαχίστη πεπέρανται, μέτρον δὲ τὸ πεπερασμένον.

ἐφεξῆς δὲ οὗ μετὰ τὴν ἀρχὴν ὄντος ἢ θέσει ἢ εἴδει ἢ ἄλλῳ τινὶ οὕτως ἀφορισθέντος (227a.) μηδὲν μεταξύ ἐστὶ τῶν ἐν ταῦτῳ γένει καὶ οὗ ἐφεξῆς ἐστὶν (λέγω δ' οἷον γραμμὴ γραμμῆς ἢ γραμμαί, ἢ μονάδος μονὰς ἢ μονάδες, ἢ οἰκίας οἰκία· ἄλλο δ' οὐδὲν κωλύει μεταξύ εἶναι). τὸ γὰρ ἐφεξῆς τινὶ ἐφεξῆς καὶ ὕστερόν τι· οὐ γὰρ τὸ ἐν ἐφεξῆς τοῖν δυοῖν, οὐδ' ἡ νομηνία τῇ δευτέρᾳ ἐφεξῆς, ἀλλὰ ταῦτ' ἐκείνοις.

ἐχόμενον δὲ ὃ ἂν ἐφεξῆς ὦν ἄπτηται. τὸ δὲ συνεχές ἐστὶ μὲν ὅπερ ἐχόμενόν τι, λέγω δ' εἶναι συνεχές ὅταν ταῦτὸ γένηται καὶ ἐν τὸ ἑκατέρου πέρας οἷς ἄπτονται, καὶ ὥσπερ σημαίνει τοῦνομα, συνέχεται. τοῦτο δ' οὐχ οἷόν τε δυοῖν ὄντοι εἶναι τοῖν ἐσχάτοι. τούτου δὲ διωρισμένου φανερόν ὅτι ἐν τούτοις ἐστὶ τὸ συνεχές, ἐξ ὧν ἐν τι πέφυκε γίγνεσθαι κατὰ τὴν σύναψιν. καὶ ὥς ποτε γίγνεται τὸ συνέχον ἐν, οὕτω καὶ τὸ ὅλον ἔσται ἐν, οἷον ἢ γόμφῳ ἢ κόλλῃ ἢ ἀφῇ

ἢ προσφύσει.

φανερὸν δὲ καὶ ὅτι πρῶτον τὸ ἐφεξῆς ἐστὶ· τὸ μὲν γὰρ ἀπτόμενον ἐφεξῆς ἀνάγκη εἶναι, τὸ δ' ἐφεξῆς οὐ πᾶν ἄπτεσθαι (διὸ καὶ ἐν προτέροις τῷ λόγῳ τὸ ἐφεξῆς ἔστιν, οἷον ἐν ἀριθμοῖς, ἀφ' ἧς δ' οὐκ ἔστιν), καὶ εἰ μὲν συνεχές, ἀνάγκη ἄπτεσθαι, εἰ δ' ἄπτεται, οὐπω συνεχές· οὐ γὰρ ἀνάγκη ἐν εἶναι αὐτῶν τὰ ἅκρα, εἰ ἅμα εἶεν· ἀλλ' εἰ ἐν, ἀνάγκη καὶ ἅμα. ὥστε ἡ σύμφυσις ὑστάτη κατὰ τὴν γένεσιν· ἀνάγκη γὰρ ἄψασθαι εἰ συμφύσεται τὰ ἅκρα, τὰ δὲ ἀπτόμενα οὐ πάντα συμπέφυκεν· ἐν οἷς δὲ μὴ ἔστιν ἀφή, δῆλον ὅτι οὐκ ἔστιν οὐδὲ σύμφυσις ἐν τούτοις. ὥστ' εἰ ἔστι στιγμή καὶ μονὰς οἷας λέγουσι κεχωρισμένας, οὐχ οἷόν τε εἶναι μονάδα καὶ στιγμήν τὸ αὐτό· ταῖς μὲν γὰρ ὑπάρχει τὸ ἄπτεσθαι, ταῖς δὲ μονάσιν τὸ ἐφεξῆς, καὶ τῶν μὲν ἐνδέχεται εἶναι τι μεταξύ (πᾶσα γὰρ γραμμὴ μεταξύ στιγμῶν), τῶν δ' οὐκ ἀνάγκη· οὐδὲ γὰρ μεταξύ δυνάδος καὶ μονάδος.

τί μὲν οὖν ἐστὶ τὸ ἅμα καὶ χωρίς, καὶ τί τὸ ἄπτεσθαι, καὶ τί τὸ μεταξύ (227b.) καὶ τὸ ἐφεξῆς, καὶ τί τὸ ἐχόμενον καὶ τὸ συνεχές, καὶ τοῖς ποίοις ἕκαστον τούτων ὑπάρχει, εἴρηται. Μία δὲ κίνησις λέγεται πολλαχῶς· τὸ γὰρ ἐν πολλαχῶς λέγομεν.

Ἔτι δὲ διοριστέον ποία κινήσεις ἐναντία κινήσει, καὶ περὶ μονῆς δὲ τὸν αὐτὸν τρόπον. διαιρετέον δὲ πρῶτον πότερον ἐναντία κινήσεις ἢ ἐκ τοῦ αὐτοῦ τῇ εἰς τὸ αὐτό (οἷον ἢ ἐξ ὑγιείας τῇ εἰς ὑγίειαν), οἷον καὶ γένεσις καὶ φθορὰ δοκεῖ, ἢ ἢ ἐξ ἐναντίων (οἷον ἢ ἐξ ὑγιείας τῇ ἐκ νόσου), ἢ ἢ εἰς ἐναντία (οἷον ἢ εἰς ὑγίειαν τῇ εἰς νόσον), ἢ ἢ ἐξ ἐναντίου τῇ εἰς ἐναντίον (οἷον ἢ ἐξ ὑγιείας τῇ εἰς νόσον), ἢ ἢ ἐξ ἐναντίου εἰς ἐναντίον τῇ ἐξ ἐναντίου εἰς ἐναντίον (οἷον ἢ ἐξ ὑγιείας εἰς νόσον τῇ ἐκ νόσου εἰς ὑγίειαν). ἀνάγκη γὰρ ἢ ἓνα τινὰ τούτων εἶναι τῶν τρόπων ἢ πλείους· οὐ γὰρ ἔστιν ἄλλως ἀντιτιθέναι.

Ἐπεὶ δὲ κινήσει οὐ μόνον δοκεῖ κίνησις εἶναι ἐναντία ἀλλὰ καὶ ἡρεμία, τοῦτο διοριστέον. ἀπλῶς μὲν γὰρ ἐναντίον κίνησις κινήσει, ἀντίκειται δὲ καὶ ἡρεμία (στέρησις γάρ, ἔστι δ' ὡς καὶ ἡ στέρησις ἐναντία λέγεται), ποιᾷ δὲ ποιᾷ, οἷον τῇ κατὰ τόπον ἢ κατὰ τόπον. ἀλλὰ τοῦτο νῦν λέγεται ἀπλῶς· πότερον γὰρ τῇ ἐνταῦθα μονῇ ἢ ἐκ τούτου ἢ ἡ εἰς τοῦτο κίνησις ἀντίκειται; δῆλον δὲ ὅτι, ἐπεὶ ἐν δυσὶν ἡ κίνησις ὑποκειμένοις, τῇ μὲν ἐκ τούτου εἰς τὸ ἐναντίον ἢ ἐν τούτῳ μονῇ, τῇ δ' ἐκ τοῦ ἐναντίου εἰς τοῦτο ἢ ἐν τῷ ἐναντίῳ. ἅμα δὲ καὶ ἀλλήλαις ἐναντίαι αὗται· καὶ γὰρ ἄτοπον, εἰ κινήσεις (230a.) μὲν ἐναντίαι εἰσὶν, ἡρεμίαι δ' ἀντικείμεναι οὐκ εἰσὶν. εἰσὶν δὲ αἱ ἐν τοῖς ἐναντίοις, οἷον ἡ ἐν ὑγιείᾳ τῇ ἐν νόσῳ ἡρεμία (κινήσει δὲ τῇ ἐξ ὑγιείας εἰς νόσον· τῇ γὰρ ἐκ νόσου εἰς ὑγίαν ἄλογον — ἡ γὰρ εἰς αὐτὸ κίνησις ἐν ᾧ ἔστηκεν, ἡρέμησις μᾶλλον ἐστίν, ἢ συμβαίνει γε ἅμα γίνεσθαι τῇ κινήσει ἀνάγκη δὲ ἢ ταύτην ἢ ἐκείνην εἶναι)· οὐ γὰρ ἢ γ' ἐν λευκότητι ἡρεμία ἐναντία τῇ ἐν ὑγιείᾳ.

ὅσοις δὲ μὴ ἔστιν ἐναντία, τούτων μεταβολὴ μὲν ἐστίν ἀντικείμενῃ ἢ ἐξ αὐτοῦ τῇ εἰς αὐτό, κίνησις δ' οὐκ ἔστιν, οἷον ἡ ἐξ ὄντος τῇ εἰς ὄν, καὶ μονὴ μὲν τούτων οὐκ ἔστιν, ἀμεταβλησιὰ δέ. καὶ εἰ μὲν τι εἴη ὑποκείμενον, ἢ ἐν τῷ ὄντι ἀμεταβλησιὰ τῇ ἐν τῷ μὴ ὄντι ἐναντία. εἰ δὲ μὴ ἔστι τι τὸ μὴ ὄν, ἀπορήσειεν ἂν τις τίτιν ἐναντία ἢ ἐν τῷ ὄντι ἀμεταβλησιὰ, καὶ εἰ ἡρεμία ἐστίν. εἰ δὲ τοῦτο, ἢ οὐ πᾶσα ἡρεμία κινήσει ἐναντία, ἢ ἡ γένεσις καὶ φθορὰ κίνησις. δῆλον τοίνυν ὅτι ἡρεμία μὲν οὐ λεκτέα, εἰ μὴ καὶ αὗται κινήσεις, ὅμοιον δέ τι καὶ ἀμεταβλησιὰ· ἐναντία δὲ ἢ οὐδενὶ ἢ τῇ ἐν τῷ μὴ ὄντι ἢ τῇ φθορᾷ· αὕτη γὰρ ἐξ αὐτῆς, ἢ δὲ γένεσις εἰς ἐκείνην.

ἀπορήσειε δ' ἂν τις διὰ τί ἐν μὲν τῇ κατὰ τόπον μεταβολῇ εἰσὶ καὶ κατὰ φύσιν καὶ παρὰ φύσιν καὶ μοναὶ καὶ κινήσεις, ἐν δὲ ταῖς ἄλλαις οὐ, οἷον ἀλλοιώσεις ἢ μὲν κατὰ φύσιν ἢ δὲ παρὰ φύσιν (οὐδὲν γὰρ μᾶλλον ἢ ὑγίανσις ἢ ἡ νόσανσις κατὰ φύσιν ἢ παρὰ φύσιν, οὐδὲ λεύκανσις ἢ μέλανσις)· ὁμοίως δὲ καὶ ἐπ' αὐξήσεως καὶ φθίσεως (οὔτε γὰρ αὗται ἀλλήλαις ἐναντίαι ὡς φύσει ἢ δὲ παρὰ φύσιν, οὔτ' αὐξήσις αὐξή σεις)· καὶ ἐπὶ γενέσεως δὲ καὶ φθορᾷ ὁ αὐτὸς λόγος· οὔτε γὰρ ἢ μὲν γένεσις κατὰ φύσιν ἢ δὲ φθορὰ παρὰ φύσιν (τὸ γὰρ γηρᾶν κατὰ φύσιν), οὔτε γένεσιν ὁρῶμεν τὴν μὲν κατὰ φύσιν τὴν δὲ

παρὰ φύσιν. ἢ εἰ ἔστιν τὸ βία παρὰ φύσιν, καὶ φθορὰ ἂν εἴη φθορᾶ ἐναντία ἢ βίαιος ὥς παρὰ φύσιν οὕσα τῇ κατὰ φύσιν; ἄρ' οὖν καὶ γενέσεις εἰσὶν ἔναι βίαιοι καὶ οὐχ εἰμαρμέναι, αἷς ἐναντίαι αἱ κατὰ φύσιν, (230b.) καὶ αὐξήσεις βίαιοι καὶ φθίσεις, οἷον αὐξήσεις αἱ τῶν ταχὺ διὰ τρυφὴν ἡβώντων, καὶ οἱ σῖτοι οἱ ταχὺ ἀδρυνόμενοι καὶ μὴ πιληθέντες; ἐπὶ δ' ἀλλοιώσεως πῶς; ἢ ὡσαύτως; εἶεν γὰρ ἂν τινες βίαιοι, αἱ δὲ φυσικαί, οἷον οἱ ἀφιέμενοι μὴ ἐν κρισίμοις ἡμέραις, οἱ δ' ἐν κρισίμοις· οἱ μὲν οὖν παρὰ φύσιν ἡλλοιώνται, οἱ δὲ κατὰ φύσιν. ἔσονται δὴ καὶ φθοραὶ ἐναντίαι ἀλλήλαις, οὐ γενέσεσι. καὶ τί γε κωλύει ἔστιν ὥς; καὶ γὰρ εἰ ἡ μὲν ἡδεῖα ἡ δὲ λυπηρὰ εἴη· ὥστε οὐχ ἀπλῶς φθορὰ φθορᾶ ἐναντία, ἀλλ' ἢ ἡ μὲν τοιαδὶ ἡ δὲ τοιαδὶ αὐτῶν ἔστιν.

ὅλως μὲν οὖν ἐναντίαι κινήσεις καὶ ἡρεμίας τὸν εἰρημένον τρόπον εἰσὶν, οἷον ἡ ἄνω τῇ κάτω· τόπου γὰρ ἐναντιώσεις αὗται. φέρεται δὲ τὴν μὲν ἄνω φορὰν φύσει τὸ πῦρ, τὴν δὲ κάτω ἡ γῆ· καὶ ἐναντίαι γ' αὐτῶν αἱ φοραί. τὸ δὲ πῦρ ἄνω μὲν φύσει, κάτω δὲ παρὰ φύσιν· καὶ ἐναντία γε ἡ κατὰ φύσιν αὐτοῦ τῇ παρὰ φύσιν. καὶ μοναὶ δ' ὡσαύτως· ἡ γὰρ ἄνω μονὴ τῇ ἄνωθεν κάτω κινήσει ἐναντία. γίγνεται δὲ τῇ γῇ ἡ μὲν μονὴ ἐκείνη παρὰ φύσιν, ἡ δὲ κίνησις αὕτη κατὰ φύσιν. ὥστε κινήσει μονὴ ἐναντία ἢ παρὰ φύσιν τῇ κατὰ φύσιν τοῦ αὐτοῦ· καὶ γὰρ ἡ κίνησις ἢ τοῦ αὐτοῦ ἐναντία οὕτως· ἡ μὲν γὰρ κατὰ φύσιν [ἔσται] αὐτῶν, ἡ ἄνω ἢ ἡ κάτω, ἡ δὲ παρὰ φύσιν. ἔχει δ' ἀπορίαν εἰ ἔστιν πάσης ἡρεμίας τῆς μὴ αἰεὶ γένεσις, καὶ αὕτη τὸ ἴστασθαι. τοῦ δὴ παρὰ φύσιν μένοντος, οἷον τῆς γῆς ἄνω, εἴη ἂν γένεσις. ὅτε ἄρα ἐφέρετο ἄνω βία, ἴστατο. ἀλλὰ τὸ ἰστάμενον ἀεὶ δοκεῖ φέρεσθαι θᾶπτον, τὸ δὲ βία τούναντίον. οὐ γενόμενον ἄρα ἡρεμοῦν ἔσται ἡρεμοῦν. ἔτι δοκεῖ τὸ ἴστασθαι ἢ ὅλως εἶναι τὸ εἰς τὸν αὐτοῦ τρόπον φέρεσθαι ἢ συμβαίνειν ἅμα.

ἔχει δ' ἀπορίαν εἰ ἐναντία ἢ μονὴ ἢ ἐνταῦθα τῇ ἐντεῦθεν κινήσει· ὅταν γὰρ κινῆται ἐκ τουδὶ καὶ ἀποβάλλῃ, ἔτι δοκεῖ ἔχειν τὸ ἀποβαλλόμενον, ὥστ' εἰ αὕτη ἡ ἡρεμία ἐναντία τῇ ἐντεῦθεν εἰς τούναντίον κινήσει, ἅμα ὑπάρξει τάναντία. ἢ πῇ ἡρεμεῖ, εἰ ἔτι μένει, ὅλως δὲ τοῦ κινουμένου τὸ μὲν (231a.) ἐκεῖ, τὸ δ' εἰς ὃ μεταβάλλει; διὸ καὶ μᾶλλον κίνησις κινήσει ἐναντίον ἢ ἡρέμησις.

καὶ περὶ μὲν κινήσεως καὶ ἡρεμίας, πῶς ἑκατέρα μία, καὶ τίνες ἐναντίαι τίσιν, εἴρηται.

Εἰ δ' ἐστὶ συνεχές καὶ ἀπτόμενον καὶ ἐφεξῆς, ὡς διώριται πρότερον, συνεχῇ μὲν ὧν τὰ ἔσχατα ἓν, ἀπτόμενα δ' ὧν ἅμα, ἐφεξῆς δ' ὧν μηδὲν μεταξύ συγγενές, ἀδύνατον ἐξ ἀδιαιρέτων εἶναι τι συνεχές, οἷον γραμμὴν ἐκ στιγμῶν, εἴπερ ἡ γραμμὴ μὲν συνεχές, ἡ στιγμή δὲ ἀδιαιρέτον. οὔτε γὰρ ἓν τὰ ἔσχατα τῶν στιγμῶν (οὐ γάρ ἐστι τὸ μὲν ἔσχατον τὸ δ' ἄλλο τι μόριον τοῦ ἀδιαιρέτου), οὔθ' ἅμα τὰ ἔσχατα (οὐ γάρ ἐστιν ἔσχατον τοῦ ἀμεροῦς οὐδέν· ἕτερον γὰρ τὸ ἔσχατον καὶ οὐ ἔσχατον).

ἔτι δ' ἀνάγκη ἦτοι συνεχεῖς εἶναι τὰς στιγμὰς ἢ ἀπτομένας ἀλλήλων, ἐξ ὧν ἐστι τὸ συνεχές· ὁ δ' αὐτὸς λόγος καὶ ἐπὶ πάντων τῶν (231b.) ἀδιαιρέτων. συνεχεῖς μὲν δὴ οὐκ ἂν εἶεν διὰ τὸν εἰρημένον λόγον· ἅπτεται δ' ἅπαν ἢ ὅλον ὅλου ἢ μέρος μέρος ἢ ὅλου μέρος. ἐπεὶ δ' ἀμερές τὸ ἀδιαιρέτον, ἀνάγκη ὅλον ὅλου ἅπτεσθαι. ὅλον δ' ὅλου ἀπτόμενον οὐκ ἔσται συνεχές. τὸ γὰρ συνεχές ἔχει τὸ μὲν ἄλλο τὸ δ' ἄλλο μέρος, καὶ διαιρεῖται εἰς οὕτως ἕτερα καὶ τόφω κεχωρισμένα.

ἀλλὰ μὴν οὐδὲ ἐφεξῆς ἔσται στιγμή στιγμή ἢ τὸ νῦν τῷ νῦν, ὥστ' ἐκ τούτων εἶναι τὸ μῆκος ἢ τὸν χρόνον· ἐφεξῆς μὲν γὰρ ἐστὶν ὧν μηθέν ἐστι μεταξύ συγγενές, στιγμῶν δ' αἰεὶ [τὸ] μεταξύ γραμμὴ καὶ τῶν νῦν χρόνος. ἔτι διαιροῖτ' ἂν εἰς ἀδιαιρέτα, εἴπερ ἐξ ὧν ἐστὶν ἐκάτερον, εἰς ταῦτα διαιρεῖται· ἀλλ' οὐθέν ἦν τῶν συνεχῶν εἰς ἀμερῇ διαιρετόν. ἄλλο δὲ γένος οὐχ οἷόν τ' εἶναι μεταξύ [τῶν στιγμῶν καὶ τῶν νῦν οὐθέν]. ἡ γὰρ [ἔσται, δηλον ὡς ἦτοι] ἀδιαιρέτον ἔσται ἢ διαιρετόν, καὶ εἰ διαιρετόν, ἢ εἰς ἀδιαιρέτα ἢ εἰς αἰεὶ διαιρετά· τοῦτο δὲ συνεχές.

φανερὸν δὲ καὶ ὅτι πᾶν συνεχές διαιρετὸν εἰς αἰεὶ διαιρετά· εἰ γὰρ εἰς ἀδιαιρέτα, ἔσται ἀδιαιρέτον ἀδιαιρέτου ἀπτόμενον· ἓν γὰρ τὸ ἔσχατον καὶ ἅπτεται τῶν συνεχῶν.

τοῦ δ' αὐτοῦ λόγου μέγεθος καὶ χρόνον καὶ κίνησιν ἐξ ἀδιαιρέτων συγκεῖσθαι, καὶ διαιρεῖσθαι εἰς ἀδιαιρέτα, ἢ μηθέν. δηλον δ' ἐκ τῶνδε. εἰ γὰρ τὸ μέγεθος ἐξ ἀδιαιρέτων σύγκειται, καὶ ἡ κίνησις ἢ τούτου ἐξ ἴσων κινήσεων ἔσται ἀδιαιρέτων, οἷον εἰ τὸ ΑΒΓ ἐκ τῶν Α Β Γ ἐστὶν ἀδιαιρέτων, ἢ κίνησις ἐφ' ἧς ΔΕΖ, ἣν ἐκινήθη τὸ Ω ἐπὶ τῆς ΑΒΓ, ἕκαστον τὸ μέρος ἔχει ἀδιαιρέτον. εἰ δὴ παρούσης κινήσεως

ἀνάγκη κινεῖσθαι τι, καὶ εἰ κινεῖται τι, παρεῖναι κίνησιν, καὶ τὸ κινεῖσθαι ἔσται ἐξ ἀδιαιρέτων. τὸ μὲν δὴ Α ἐκινήθη τὸ Ω τὴν τὸ Δ κινούμενον κίνησιν, τὸ δὲ Β τὴν τὸ Ε, καὶ τὸ Γ ὡσαύτως τὴν τὸ Ζ. εἰ δὴ ἀνάγκη τὸ κινούμενον ποθὲν ποι μὴ ἅμα κινεῖσθαι καὶ κεκινήσθαι οὐ κινεῖτο ὅτε ἐκινεῖτο (οἷον εἰ Θήβαζε τι βαδίζει, ἀδύνατον ἅμα βαδίζειν Θήβαζε καὶ βεβαδικέναι (232a.) Θήβαζε), τὴν δὲ τὸ Α τὴν ἀμερῇ ἐκινεῖτο τὸ Ω, ἢ ἢ τὸ Δ κίνησις παρῇ· ὥστ' εἰ μὲν ὕστερον διεληλύθει ἢ διήει, διαιρετὴ ἂν εἴη (ὅτε γὰρ διήει, οὔτε ἡρέμει οὔτε διεληλύθει, ἀλλὰ μεταξὺ ἦν), εἰ δ' ἅμα διέρχεται καὶ διελήλυθε, τὸ βαδίζον, ὅτε βαδίζει, βεβαδικὸς ἐκεῖ ἔσται καὶ κεκινήμενον οὐ κινεῖται. εἰ δὲ τὴν μὲν ὅλην τὴν ΑΒΓ κινεῖται τι, καὶ ἡ κίνησις ἦν κινεῖται τὰ Δ Ε Ζ ἔστι, τὴν δ' ἀμερῇ τὴν Α οὐθὲν κινεῖται ἀλλὰ κεκίνηται, εἴη ἂν ἡ κίνησις οὐκ ἐκ κινήσεων ἀλλ' ἐκ κινημάτων καὶ τῷ κεκινήσθαι τι μὴ κινούμενον· τὴν γὰρ Α διελήλυθεν οὐ διεξιόν. ὥστε ἔσται τι βεβαδικέναι μὴδέποτε βαδίζον· ταύτην γὰρ βεβάδικεν οὐ βαδίζον ταύτην. εἰ οὖν ἀνάγκη ἢ ἡρεμεῖν ἢ κινεῖσθαι πᾶν, ἡρεμεῖ καθ' ἕκαστον τῶν Α Β Γ, ὥστ' ἔσται τι συνεχῶς ἡρεμοῦν ἅμα καὶ κινούμενον. τὴν γὰρ ΑΒΓ ὅλην ἐκινεῖτο καὶ ἡρέμει ὅτιοῦν μέρος, ὥστε καὶ πᾶσαν. καὶ εἰ μὲν τὰ ἀδιαίρετα τῆς ΔΕΖ κινήσεις, κινήσεως παρούσης ἐνδέχοιτ' ἂν μὴ κινεῖσθαι ἀλλ' ἡρεμεῖν· εἰ δὲ μὴ κινήσεις, τὴν κίνησιν μὴ ἐκ κινήσεων εἶναι. ὁμοίως δ' ἀνάγκη τῷ μήκει καὶ τῇ κινήσει ἀδιαίρετον εἶναι τὸν χρόνον, καὶ συγκεῖσθαι ἐκ τῶν νῦν ὄντων ἀδιαιρέτων· εἰ γὰρ πᾶσα διαιρετός, ἐν τῷ ἐλάττονι δὲ τὸ ἰσοταχὲς δίοισιν ἔλαττον, διαιρετός ἔσται καὶ ὁ χρόνος. εἰ δ' ὁ χρόνος διαιρετός ἐν ᾧ φέρεται τι τὴν Α, καὶ ἢ τὸ Α ἔσται διαιρετὴ.

Κεφάλαιο 2

Ἐπεὶ δὲ πᾶν μέγεθος εἰς μεγέθη διαιρετόν (δέδεικται γὰρ ὅτι ἀδύνατον ἐξ ἀτόμων εἶναι τι συνεχές, μέγεθος δ' ἐστὶν ἅπαν συνεχές), ἀνάγκη τὸ θᾶπτον ἐν τῷ ἴσῳ χρόνῳ μείζον καὶ ἐν τῷ ἐλάττονι ἴσον καὶ ἐν τῷ ἐλάττονι πλείον κινεῖσθαι, καθάπερ ὀρίζονται τινες τὸ θᾶπτον. ἔστω γὰρ τὸ ἐφ' ᾧ Α τοῦ ἐφ' ᾧ Β θᾶπτον. ἐπεὶ τοίνυν θᾶπτόν ἐστιν τὸ πρότερον μεταβάλλον, ἐν ᾧ χρόνῳ τὸ Α μεταβέβληκεν ἀπὸ τοῦ Γ εἰς τὸ Δ, οἷον τῷ ΖΗ, ἐν τούτῳ τὸ Β οὐπω ἔσται πρὸς τῷ Δ, ἀλλ' ἀπολείψει, ὥστε ἐν τῷ ἴσῳ χρόνῳ πλείον διείσιν τὸ θᾶπτον. ἀλλὰ μὴν καὶ ἐν τῷ ἐλάττονι πλείον· ἐν ᾧ γὰρ τὸ Α γεγένηται πρὸς τῷ Δ, τὸ Β ἔστω πρὸς τῷ Ε τὸ βραδύτερον ὄν. οὐκοῦν ἐπεὶ (232b.) τὸ Α πρὸς τῷ Δ γεγένηται ἐν ἅπαντι τῷ ΖΗ χρόνῳ, πρὸς τῷ Θ ἔσται ἐν ἐλάττονι τούτου· καὶ ἔστω ἐν τῷ ΖΚ. τὸ μὲν οὖν ΓΘ, ὃ διελήλυθε τὸ Α, μείζον ἐστὶ τοῦ ΓΕ, ὁ δὲ χρόνος ὁ ΖΚ ἐλάττων τοῦ παντός τοῦ ΖΗ, ὥστε ἐν ἐλάττονι μείζον διείσιν. φανερόν δὲ ἐκ τούτων καὶ ὅτι τὸ θᾶπτον ἐν ἐλάττονι χρόνῳ διείσιν τὸ ἴσον. ἐπεὶ γὰρ τὴν μείζον ἐν ἐλάττονι διέρχεται τοῦ βραδυτέρου, αὐτὸ δὲ καθ' αὐτὸ λαμβανόμενον ἐν πλείονι χρόνῳ τὴν μείζον τῆς ἐλάττονος, οἷον τὴν ΑΜ τῆς ΑΞ, πλείων ἂν εἴη ὁ χρόνος ὁ ΠΡ, ἐν ᾧ τὴν ΑΜ διέρχεται, ἢ ὁ ΠΣ, ἐν ᾧ τὴν ΑΞ. ὥστε εἰ ὁ ΠΡ χρόνος ἐλάττων ἐστὶν τοῦ Χ, ἐν ᾧ τὸ βραδύτερον διέρχεται τὴν ΑΞ, καὶ ὁ ΠΣ ἐλάττων ἔσται τοῦ ἐφ' ᾧ Χ· τοῦ γὰρ ΠΡ ἐλάττων, τὸ δὲ τοῦ ἐλάττονος ἔλαττον καὶ αὐτὸ ἔλαττον. ὥστε ἐν ἐλάττονι κινήσεται τὸ ἴσον. ἔτι δ' εἰ πᾶν ἀνάγκη ἢ ἐν ἴσῳ ἢ ἐν ἐλάττονι ἢ ἐν πλείονι κινεῖσθαι, καὶ τὸ μὲν ἐν πλείονι βραδύτερον, τὸ δ' ἐν ἴσῳ ἰσοταχές, τὸ δὲ θᾶπτον οὔτε ἰσοταχές οὔτε βραδύτερον, οὐτ' ἂν ἐν ἴσῳ οὐτ' ἐν πλείονι κινεῖτο τὸ θᾶπτον. λείπεται οὖν ἐν ἐλάττονι, ὥστ' ἀνάγκη καὶ τὸ ἴσον μέγεθος ἐν ἐλάττονι χρόνῳ διέναι τὸ θᾶπτον. ἐπεὶ δὲ πᾶσα μὲν κίνησις ἐν χρόνῳ καὶ ἐν ἅπαντι χρόνῳ δυνατόν κινήθῃναι, πᾶν δὲ τὸ κινούμενον ἐνδέχεται καὶ θᾶπτον κινεῖσθαι καὶ βραδύτερον, ἐν ἅπαντι χρόνῳ ἔσται τὸ θᾶπτον κινεῖσθαι καὶ βραδύτερον. τούτων δ' ὄντων ἀνάγκη καὶ τὸν χρόνον συνεχῇ εἶναι. λέγω δὲ συνεχές τὸ διαιρετόν εἰς αἰεὶ διαιρετά· τούτου γὰρ ὑποκειμένου τοῦ συνεχοῦς, ἀνάγκη συνεχῇ εἶναι τὸν χρόνον. ἐπεὶ γὰρ δέδεικται ὅτι τὸ θᾶπτον ἐν ἐλάττονι χρόνῳ διείσιν τὸ ἴσον, ἔστω τὸ μὲν ἐφ' ᾧ Α θᾶπτον, τὸ δ'

ἐφ' ᾧ Β βραδύτερον, καὶ κεκινήσθω τὸ βραδύτερον τὸ ἐφ' ᾧ ΓΔ μέγεθος ἐν τῷ ΖΗ χρόνῳ. δηλον τοίνυν ὅτι τὸ θάττον ἐν ἐλάττονι τούτου κινήσεται τὸ αὐτὸ μέγεθος· καὶ κεκινήσθω ἐν τῷ ΖΘ. πάλιν δ' ἐπεὶ τὸ θάττον ἐν τῷ ΖΘ διελήλυθεν τὴν ὅλην τὴν ΓΔ, τὸ βραδύτερον ἐν τῷ αὐτῷ χρόνῳ τὴν ἐλάττω δίδεισιν· ἔστω οὖν ἐφ' (233a.) ἧς ΓΚ. ἐπεὶ δὲ τὸ βραδύτερον τὸ Β ἐν τῷ ΖΘ χρόνῳ τὴν ΓΚ διελήλυθεν, τὸ θάττον ἐν ἐλάττονι δίδεισιν, ὥστε πάλιν διαιρεθήσεται ὁ ΖΘ χρόνος. τούτου δὲ διαιρουμένου καὶ τὸ ΓΚ μέγεθος διαιρεθήσεται κατὰ τὸν αὐτὸν λόγον. εἰ δὲ τὸ μέγεθος, καὶ ὁ χρόνος. καὶ αἰ τοῦτ' ἔσται μεταλαμβάνουσιν ἀπὸ τοῦ θάττονος τὸ βραδύτερον καὶ ἀπὸ τοῦ βραδυτέρου τὸ θάττον, καὶ τῷ ἀποδεδειγμένῳ χρωμένοις· διαιρήσει γὰρ τὸ μὲν θάττον τὸν χρόνον, τὸ δὲ βραδύτερον τὸ μῆκος. εἰ οὖν αἰεὶ μὲν ἀντιστρέφειν ἀληθές, ἀντιστρεφομένου δὲ αἰεὶ γίνεταί διαίρεσις, φανερόν ὅτι πᾶς χρόνος ἔσται συνεχής.

ἅμα δὲ δηλον καὶ ὅτι μέγεθος ἅπαν ἐστὶ συνεχές· τὰς αὐτὰς γὰρ καὶ τὰς ἴσας διαιρέσεις ὁ χρόνος διαιρεῖται καὶ τὸ μέγεθος. ἔτι δὲ καὶ ἐκ τῶν εἰωθότων λόγων λέγεσθαι φανερόν ὡς εἶπερ ὁ χρόνος ἐστὶ συνεχής, ὅτι καὶ τὸ μέγεθος, εἶπερ ἐν τῷ ἡμίσει χρόνῳ ἥμισυ διέρχεται καὶ ἀπλῶς ἐν τῷ ἐλάττονι ἔλαττον· αἱ γὰρ αὐταὶ διαιρέσεις ἔσονται τοῦ χρόνου καὶ τοῦ μεγέθους. καὶ εἰ ὅποτερονοῦν ἄπειρον, καὶ θάτερον, καὶ ὡς θάτερον, καὶ θάτερον, οἷον εἰ μὲν τοῖς ἐσχάτοις ἄπειρος ὁ χρόνος, καὶ τὸ μῆκος τοῖς ἐσχάτοις, εἰ δὲ τῇ διαιρέσει, τῇ διαιρέσει καὶ τὸ μῆκος, εἰ δὲ ἀμφοῖν, ἀμφοῖν καὶ τὸ μέγεθος.

διὸ καὶ ὁ Ζήνωνος λόγος ψευδὸς λαμβάνει τὸ μὴ ἐνδέχεσθαι τὰ ἄπειρα διελθεῖν ἢ ἄψασθαι τῶν ἀπείρων καθ' ἕκαστον ἐν πεπερασμένῳ χρόνῳ. διχῶς γὰρ λέγεται καὶ τὸ μῆκος καὶ ὁ χρόνος ἄπειρον, καὶ ὅλως πᾶν τὸ συνεχές, ἥτοι κατὰ διαίρεσιν ἢ τοῖς ἐσχάτοις. τῶν μὲν οὖν κατὰ τὸ ποσὸν ἀπείρων οὐκ ἐνδέχεται ἄψασθαι ἐν πεπερασμένῳ χρόνῳ, τῶν δὲ κατὰ διαίρεσιν ἐνδέχεται· καὶ γὰρ αὐτὸς ὁ χρόνος οὕτως ἄπειρος. ὥστε ἐν τῷ ἀπείρῳ καὶ οὐκ ἐν τῷ πεπερασμένῳ συμβαίνει διέναι τὸ ἄπειρον, καὶ ἅπτεσθαι τῶν ἀπείρων τοῖς ἀπείροις, οὐ τοῖς πεπερασμένοις. οὔτε δὴ τὸ ἄπειρον οἷόν τε ἐν πεπερασμένῳ χρόνῳ διελθεῖν, οὔτ' ἐν ἀπείρῳ τὸ πεπερασμένον· ἀλλ' ἐάν τε ὁ χρόνος ἄπειρος ᾗ, καὶ τὸ μέγεθος ἔσται ἄπειρον, ἐάν τε τὸ μέγεθος, καὶ ὁ χρόνος. ἔστω γὰρ πεπερασμένον μέγεθος ἐφ' οὗ ΑΒ, χρόνος δὲ ἄπειρος ἐφ' ᾧ Γ· εἰλήφθω δέ τι τοῦ

(233b.) χρόνου πεπερασμένον, ἐφ' ᾧ ΓΔ. ἐν τούτῳ οὖν δίδεισι τι τοῦ μεγέθους, καὶ ἔστω διεληλυθὸς ἐφ' ᾧ ΒΕ. τοῦτο δὲ ἢ καταμετρήσει τὸ ἐφ' ᾧ ΑΒ, ἢ ἐλλείψει, ἢ ὑπερβαλεῖ· διαφέρει γὰρ οὐθέν· εἰ γὰρ αἰεὶ τὸ ἴσον τῷ ΒΕ μέγεθος ἐν ἴσῳ χρόνῳ δίδεισιν, τοῦτο δὲ καταμετρεῖ τὸ ὅλον, πεπερασμένος ἔσται ὁ πᾶς χρόνος ἐν ᾧ διήλθεν· εἰς ἴσα γὰρ διαιρεθήσεται καὶ τὸ μέγεθος. ἔτι δ' εἰ μὴ πᾶν μέγεθος ἐν ἀπείρῳ χρόνῳ δίδεισιν, ἀλλ' ἐνδέχεται τι καὶ ἐν πεπερασμένῳ διελθεῖν, οἷον τὸ ΒΕ, τοῦτο δὲ καταμετρήσει τὸ πᾶν, καὶ τὸ ἴσον ἐν ἴσῳ δίδεισιν, ὥστε πεπερασμένος ἔσται καὶ ὁ χρόνος. ὅτι δ' οὐκ ἐν ἀπείρῳ δίδεισιν τὸ ΒΕ, φανερόν, εἰ ληφθεῖ ἐπὶ θάτερα πεπερασμένος ὁ χρόνος· εἰ γὰρ ἐν ἐλάττονι τὸ μέρος δίδεισιν, τοῦτο ἀνάγκη πεπεράνθαι, θατέρου γε πέρατος ὑπάρχοντος. ἡ αὐτὴ δὲ ἀπόδειξις καὶ εἰ τὸ μὲν μῆκος ἄπειρον ὁ δὲ χρόνος πεπερασμένος. φανερόν οὖν ἐκ τῶν εἰρημένων ὡς οὔτε γραμμὴ οὔτε ἐπίπεδον οὔτε ὅλως τῶν συνεχῶν οὐθέν ἔσται ἄτομον,

οὐ μόνον διὰ τὸ νῦν λεχθέν, ἀλλὰ καὶ ὅτι συμβήσεται διαιρεῖσθαι τὸ ἄτομον. ἐπεὶ γὰρ ἐν ἅπαντι χρόνῳ τὸ θᾶπτον καὶ βραδύτερον ἔστι, τὸ δὲ θᾶπτον πλεῖον διέρχεται ἐν τῷ ἴσῳ χρόνῳ, ἐνδέχεται δὲ καὶ διπλάσιον καὶ ἡμιόλιον διέναι μῆκος (εἴη γὰρ ἂν οὗτος ὁ λόγος τοῦ τάχους), ἐννέχθω οὖν τὸ θᾶπτον ἡμιόλιον ἐν τῷ αὐτῷ χρόνῳ, καὶ διηρήσθω τὰ μεγέθη τὸ μὲν τοῦ θᾶπτοντος εἰς τρία ἄτομα, ἐφ' ὧν ΑΒ ΒΓ ΓΔ, τὸ δὲ τοῦ βραδυτέρου εἰς δύο, ἐφ' ὧν ΕΖ ΖΗ. οὐκοῦν καὶ ὁ χρόνος διαιρεθήσεται εἰς τρία ἄτομα· τὸ γὰρ ἴσον ἐν τῷ ἴσῳ χρόνῳ δίδεισιν. διηρήσθω οὖν ὁ χρόνος εἰς τὰ ΚΛ ΛΜ ΜΝ. πάλιν δ' ἐπεὶ τὸ βραδύτερον ἐνήνεκται τὴν ΕΖΗ, καὶ ὁ χρόνος τμηθήσεται δίχα. διαιρεθήσεται ἄρα τὸ ἄτομον, καὶ τὸ ἀμερὲς οὐκ ἐν ἀτόμῳ δίδεισιν ἀλλ' ἐν πλείονι. φανερόν οὖν ὅτι οὐδέν ἐστι τῶν συνεχῶν ἀμερὲς.

Κεφάλαιο 3

Ανάγκη δὲ καὶ τὸ νῦν τὸ μὴ καθ' ἕτερον ἀλλὰ καθ' αὐτὸ καὶ πρῶτον λεγόμενον ἀδιαίρετον εἶναι, καὶ ἐν ᾧ παντὶ τὸ τοιοῦτο χρόνῳ ἐνυπάρχειν. ἔστιν γὰρ ἔσχατον τι τοῦ (234a.) γεγονότος, οὗ ἐπὶ τὰδε οὐθέν ἐστι τοῦ μέλλοντος, καὶ πάλιν τοῦ μέλλοντος, οὗ ἐπὶ τὰδε οὐθέν ἐστι τοῦ γεγονότος· ὃ δὴ φαμεν ἀμφοῖν εἶναι πέρας. τοῦτο δὲ ἐὰν δειχθῇ ὅτι τοιοῦτόν ἐστιν [καθ' αὐτό] καὶ ταυτόν, ἅμα φανερόν ἐσται καὶ ὅτι ἀδιαίρετον. ἀνάγκη δὴ τὸ αὐτὸ εἶναι τὸ νῦν τὸ ἔσχατον ἀμφοτέρων τῶν χρόνων· εἰ γὰρ ἕτερον, ἐφεξῆς μὲν οὐκ ἂν εἴη θάτερον θατέρῳ διὰ τὸ μὴ εἶναι συνεχές ἐξ ἡμερῶν, εἰ δὲ χωρὶς ἐκάτερον, μεταξὺ ἔσται χρόνος· πᾶν γὰρ τὸ συνεχές τοιοῦτον ὥστ' εἶναι τι συνώνυμον μεταξὺ τῶν περάτων. ἀλλὰ μὴν εἰ χρόνος τὸ μεταξύ, διαιρετόν ἐσται· πᾶς γὰρ χρόνος δέδεικται ὅτι διαιρετός. ὥστε διαιρετόν τὸ νῦν. εἰ δὲ διαιρετόν τὸ νῦν, ἔσται τι τοῦ γεγονότος ἐν τῷ μέλλοντι καὶ τοῦ μέλλοντος ἐν τῷ γεγονότι· καθ' ὃ γὰρ ἂν διαιρεθῇ, τοῦτο διοριεῖ τὸν παρήκοντα καὶ τὸν μέλλοντα χρόνον. ἅμα δὲ καὶ οὐκ ἂν καθ' αὐτὸ εἴη τὸ νῦν, ἀλλὰ καθ' ἕτερον· ἢ γὰρ διαίρεσις οὐ καθ' αὐτό. πρὸς δὲ τούτοις τοῦ νῦν τὸ μὲν τι γεγονὸς ἔσται τὸ δὲ μέλλον, καὶ οὐκ αἰεὶ τὸ αὐτὸ γεγονὸς ἢ μέλλον. οὐδὲ δὴ τὸ νῦν τὸ αὐτό· πολλαχῇ γὰρ διαιρετός ὁ χρόνος. ὥστ' εἰ ταῦτα ἀδύνατον ὑπάρχειν, ἀνάγκη τὸ αὐτὸ εἶναι τὸ ἐν ἐκατέρῳ νῦν. ἀλλὰ μὴν εἰ ταυτό, φανερόν ὅτι καὶ ἀδιαίρετον· εἰ γὰρ διαιρετόν, πάλιν ταῦτά συμβήσεται ἅ καὶ ἐν τῷ πρότερον. ὅτι μὲν τοίνυν ἔστιν τι ἐν τῷ χρόνῳ ἀδιαίρετον, ὃ φαμεν εἶναι τὸ νῦν, δηλόν ἐστιν ἐκ τῶν εἰρημένων·

ὅτι δ' οὐθέν ἐν τῷ νῦν κινεῖται, ἐκ τῶνδε φανερόν ἐστιν. εἰ γὰρ, ἐνδέχεται καὶ θάπτον κινεῖσθαι καὶ βραδύτερον. ἔστω δὴ τὸ νῦν ἐφ' ᾧ N, κεκινήσθω δ' ἐν αὐτῷ τὸ θάπτον τὴν AB. οὐκοῦν τὸ βραδύτερον ἐν τῷ αὐτῷ ἐλάττω τῆς AB κινήσεται, οἷον τὴν AG. ἐπεὶ δὲ τὸ βραδύτερον ἐν ὅλῳ τῷ νῦν κινεῖται τὴν AG, τὸ θάπτον ἐν ἐλάττονι τούτου κινήσεται, ὥστε διαιρεθήσεται τὸ νῦν. ἀλλ' ἢν ἀδιαίρετον. οὐκ ἄρα ἔστιν κινεῖσθαι ἐν τῷ νῦν.

ἀλλὰ μὴν οὐδ' ἡρεμεῖν· ἡρεμεῖν γὰρ λέγομεν τὸ πεφυκὸς κινεῖσθαι μὴ κινούμενον ὅτε πέφυκεν καὶ οὗ καὶ ὥς, ὥστ' ἐπεὶ ἐν τῷ νῦν οὐθέν πέφυκε κινεῖσθαι, δηλὸν ὥς οὐδ' ἡρεμεῖν.

ἔτι δ' εἰ τὸ αὐτὸ μὲν ἐστὶ τὸ νῦν ἐν ἀμφοῖν τοῖν χρόνοις, (234b.) ἐνδέχεται δὲ τὸν μὲν κινεῖσθαι τὸν δ' ἡρεμεῖν ὅλον, τὸ δ' ὅλον κινούμενον τὸν χρόνον ἐν ὁτφοῦν κινήσεται τῶν τούτου καθ' ὃ πέφυκε κινεῖσθαι, καὶ τὸ ἡρεμοῦν ὡσαύτως ἡρεμήσει, συμβήσεται τὸ αὐτὸ ἅμα ἡρεμεῖν καὶ κινεῖσθαι· τὸ γὰρ αὐτὸ ἔσχατον τῶν χρόνων ἀμφοτέρων, τὸ νῦν.

ἔτι δ' ἡρεμεῖν μὲν λέγομεν τὸ ὁμοίως ἔχον καὶ αὐτὸ καὶ τὰ μέρη νῦν καὶ πρότερον· ἐν δὲ τῷ νῦν οὐκ ἔστι τὸ πρότερον, ὥστ' οὐδ' ἡρεμεῖν.

ἀνάγκη ἄρα καὶ κινεῖσθαι τὸ κινούμενον ἐν χρόνῳ καὶ ἡρεμεῖν τὸ ἡρεμοῦν.

Κεφάλαιο 4

Τὸ δὲ μεταβάλλον ἅπαν ἀνάγκη διαιρετὸν εἶναι. ἐπεὶ γὰρ ἕκ τινος εἷς τι πᾶσα μεταβολή, καὶ ὅταν μὲν ἦ ἐν τούτῳ εἰς ὃ μετέβαλλεν, οὐκέτι μεταβάλλει, ὅταν δὲ ἐξ οὗ μετέβαλλεν, καὶ αὐτὸ καὶ τὰ μέρη πάντα, οὕτω μεταβάλλει (τὸ γὰρ ὡσαύτως ἔχον καὶ αὐτὸ καὶ τὰ μέρη οὐ μεταβάλλει), ἀνάγκη οὖν τὸ μὲν τι ἐν τούτῳ εἶναι, τὸ δ' ἐν θατέρῳ τοῦ μεταβάλλοντος· οὔτε γὰρ ἐν ἀμφοτέροις οὔτ' ἐν μηδετέρῳ δυνατόν. λέγω δ' εἰς ὃ μεταβάλλει τὸ πρῶτον κατὰ τὴν μεταβολήν, οἷον ἐκ τοῦ λευκοῦ τὸ φαιόν, οὐ τὸ μέλαν· οὐ γὰρ ἀνάγκη τὸ μεταβάλλον ἐν ὅποτερωσὺν εἶναι τῶν ἄκρων. φανερόν οὖν ὅτι πᾶν τὸ μεταβάλλον ἔσται διαιρετόν.

κίνησις δ' ἐστὶν διαιρετὴ διχῶς, ἓνα μὲν τρόπον τῷ χρόνῳ, ἄλλον δὲ κατὰ τὰς τῶν μερῶν τοῦ κινουμένου κινήσεις, οἷον εἰ τὸ ΑΓ κινεῖται ὅλον, καὶ τὸ ΑΒ κινήσεται καὶ τὸ ΒΓ. ἔστω δὴ τοῦ μὲν ΑΒ ἡ ΔΕ, τοῦ δὲ ΒΓ ἡ ΕΖ κίνησις τῶν μερῶν. ἀνάγκη δὴ τὴν ὅλην, ἐφ' ἧς ΔΖ, τοῦ ΑΓ εἶναι κίνησιν. κινήσεται γὰρ κατὰ ταύτην, ἐπείπερ ἑκάτερον τῶν μερῶν κινεῖται καθ' ἑκατέραν· οὐθὲν δὲ κινεῖται κατὰ τὴν ἄλλου κίνησιν· ὥστε ἡ ὅλη κίνησις τοῦ ὅλου ἐστὶν μεγέθους κίνησις.

ἔτι δ' εἰ πᾶσα μὲν κίνησις τινός, ἡ δ' ὅλη κίνησις ἡ ἐφ' ἧς ΔΖ μήτε τῶν μερῶν ἐστὶν μηδετέρου (μέρους γὰρ ἑκατέρα) μήτ' ἄλλου μηδενός (οὗ γὰρ ὅλη ὅλου, καὶ τὰ μέρη τῶν μερῶν· τὰ δὲ μέρη τῶν ΑΒ ΒΓ καὶ οὐδένων ἄλλων· πλειόνων γὰρ οὐκ ἦν μία κίνησις), κἂν ἡ ὅλη κίνησις εἴη τοῦ ΑΒΓ μεγέθους.

ἔτι δ' εἰ ἔστιν ἄλλη τοῦ ὅλου κίνησις, οἷον ἐφ' ἧς ΘΙ, ἀφαιρεθήσεται ἀπ' αὐτῆς (235a.) ἡ ἑκατέρων τῶν μερῶν κίνησις· αὗται δ' ἴσαι ἔσονται ταῖς ΔΕ ΕΖ· μία γὰρ ἐνὸς κίνησις. ὥστ' εἰ μὲν ὅλη διαιρεθήσεται ἡ ΘΙ εἰς τὰς τῶν μερῶν κινήσεις, ἴση ἔσται ἡ ΘΙ τῇ ΔΖ· εἰ δ' ἀπολείπει τι, οἷον τὸ ΚΙ, αὕτη οὐδενὸς ἔσται κίνησις (οὔτε γὰρ τοῦ ὅλου οὔτε τῶν μερῶν διὰ τὸ μίαν εἶναι ἐνός, οὔτε ἄλλου οὐθενός· ἡ γὰρ συνεχῆς κίνησίς ἐστι συνεχῶν τινῶν), ὡσαύτως δὲ καὶ εἰ ὑπερβάλλει κατὰ τὴν διαίρεσιν· ὥστ' εἰ τοῦτο ἀδύνατον, ἀνάγκη τὴν αὐτὴν εἶναι καὶ ἴσην.

αὕτη μὲν οὖν ἡ διαίρεσις κατὰ τὰς τῶν μερῶν κινήσεις ἐστίν, καὶ ἀνάγκη παντὸς εἶναι τοῦ μεριστοῦ αὐτήν· ἄλλη δὲ κατὰ τὸν χρόνον·

ἐπεὶ γὰρ ἅπασα κίνησις ἐν χρόνῳ, χρόνος δὲ πᾶς διαιρετός, ἐν δὲ τῷ ἐλάττονι ἐλάττων ἢ κίνησις, ἀνάγκη πᾶσαν κίνησιν διαιρεῖσθαι κατὰ τὸν χρόνον. ἐπεὶ δὲ πᾶν τὸ (13) κινούμενον ἐν τινι κινεῖται καὶ χρόνον τινά, καὶ παντὸς ἔστι κίνησις, ἀνάγκη τὰς αὐτὰς εἶναι διαιρέσεις τοῦ τε χρόνου καὶ τῆς κινήσεως καὶ τοῦ κινεῖσθαι καὶ τοῦ κινουμένου καὶ ἐν ᾧ ἡ κίνησις (πλὴν οὐ πάντων ὁμοίως ἐν οἷς ἡ κίνησις, ἀλλὰ τοῦ μὲν τόπου καθ' αὐτό, τοῦ δὲ ποιοῦ κατὰ συμβεβηκός). εἰλήφθω γὰρ ὁ χρόνος ἐν ᾧ κινεῖται ἐφ' ᾧ A, καὶ ἡ κίνησις ἐφ' ᾧ B. εἰ οὖν τὴν ὅλην ἐν τῷ παντὶ χρόνῳ κεκίνηται, ἐν τῷ ἡμίσει ἐλάττω, καὶ πάλιν τούτου διαιρεθέντος ἐλάττω ταύτης, καὶ αἰεὶ οὕτως.

ὁμοίως δὲ καί, εἰ ἡ κίνησις διαιρετὴ, καὶ ὁ χρόνος διαιρετός· εἰ γὰρ τὴν ὅλην ἐν τῷ παντί, τὴν ἡμίσειαν ἐν τῷ ἡμίσει, καὶ πάλιν τὴν ἐλάττω ἐν τῷ ἐλάττονι. τὸν αὐτὸν δὲ τρόπον καὶ τὸ κινεῖσθαι διαιρεθήσεται. ἔστω γὰρ ἐφ' ᾧ Γ τὸ κινεῖσθαι. κατὰ δὴ τὴν ἡμίσειαν κίνησιν ἐλάττον ἔσται τοῦ ὅλου, καὶ πάλιν κατὰ τὴν τῆς ἡμισείας ἡμίσειαν, καὶ αἰεὶ οὕτως. ἔστι δὲ καὶ ἐκθέμενον τὸ καθ' ἑκατέραν τῶν κινήσεων κινεῖσθαι, οἷον κατὰ τε τὴν ΔΓ καὶ τὴν ΓΕ, λέγειν ὅτι τὸ ὅλον ἔσται κατὰ τὴν ὅλην (εἰ γὰρ ἄλλο, πλείω ἔσται κινεῖσθαι κατὰ τὴν αὐτὴν κίνησιν), ὥσπερ ἐδείξαμεν καὶ τὴν κίνησιν διαιρετὴν εἰς τὰς τῶν μερῶν κινήσεις οὕσαν· ληφθέντος γὰρ τοῦ κινεῖσθαι καθ' ἑκατέραν συνεχῆς ἔσται τὸ ὅλον.

ὥσαύτως δὲ δειχθήσεται καὶ τὸ μῆκος διαιρετόν, καὶ ὅλως πᾶν ἐν ᾧ ἔστιν ἡ μεταβολή (πλὴν ἓνια κατὰ συμβεβηκός, ὅτι τὸ μεταβάλλον ἔστιν διαιρετόν)· ἐνὸς γὰρ διαιρουμένου πάντα διαιρεθήσεται. καὶ ἐπὶ τοῦ (235b.) πεπερασμένα εἶναι ἢ ἄπειρα ὁμοίως ἔξει κατὰ πάντων. ἡκολούθηκεν δὲ μάλιστα τὸ διαιρεῖσθαι πάντα καὶ ἄπειρα εἶναι ἀπὸ τοῦ μεταβάλλοντος· εὐθύς γὰρ ἐνυπάρχει τῷ μεταβάλλοντι τὸ διαιρετόν καὶ τὸ ἄπειρον. τὸ μὲν οὖν διαιρετόν δέδεικται πρότερον, τὸ δ' ἄπειρον ἐν τοῖς ἐπομένοις ἔσται δῆλον.

Κεφάλαιο 5

Ἐπεὶ δὲ πᾶν τὸ μεταβάλλον ἔκ τινος εἷς τι μεταβάλλει, ἀνάγκη τὸ μεταβεβληκός, ὅτε πρῶτον μεταβέβληκεν, εἶναι ἐν ᾧ μεταβέβληκεν. τὸ γὰρ μεταβάλλον, ἐξ οὗ μεταβάλλει, ἐξίσταται ἢ ἀπολείπει αὐτό, καὶ ἦτοι ταυτόν ἐστι τὸ μεταβάλλειν καὶ τὸ ἀπολείπειν, ἢ ἀκολουθεῖ τῷ μεταβάλλειν τὸ ἀπολείπειν. εἰ δὲ τῷ μεταβάλλειν τὸ ἀπολείπειν, τῷ μεταβεβληκέναι τὸ ἀπολελοιπέναι· ὁμοίως γὰρ ἐκάτερον ἔχει πρὸς ἐκάτερον.

ἐπεὶ οὖν μία τῶν μεταβολῶν ἢ κατ' ἀντίφασιν, ὅτε μεταβέβληκεν ἐκ τοῦ μὴ ὄντος εἰς τὸ ὄν, ἀπολέλοιπεν τὸ μὴ ὄν. ἔσται ἄρα ἐν τῷ ὄντι· πᾶν γὰρ ἀνάγκη ἢ εἶναι ἢ μὴ εἶναι. φανερόν οὖν ὅτι ἐν τῇ κατ' ἀντίφασιν μεταβολῇ τὸ μεταβεβληκός ἔσται ἐν ᾧ μεταβέβληκεν. εἰ δ' ἐν ταύτῃ, καὶ ἐν ταῖς ἄλλαις· ὁμοίως γὰρ ἐπὶ μιᾷ καὶ τῶν ἄλλων.

ἔτι δὲ καὶ καθ' ἐκάστην λαμβάνουσι φανερόν, εἴπερ ἀνάγκη τὸ μεταβεβληκός εἶναι που ἢ ἐν τινι. ἐπεὶ γὰρ ἐξ οὗ μεταβέβληκεν ἀπολέλοιπεν, ἀνάγκη δ' εἶναι που, ἢ ἐν τούτῳ ἢ ἐν ἄλλῳ ἔσται. εἰ μὲν οὖν ἐν ἄλλῳ, οἷον ἐν τῷ Γ, τὸ εἰς τὸ Β μεταβεβληκός, πάλιν ἐκ τοῦ Γ μεταβάλλει εἰς τὸ Β· οὐ γὰρ ἦν ἐχόμενον τὸ Β, ἢ δὲ μεταβολὴ συνεχῆς. ὥστε τὸ μεταβεβληκός, ὅτε μεταβέβληκεν, μεταβάλλει εἰς ὃ μεταβέβληκεν. τοῦτο δ' ἀδύνατον· ἀνάγκη ἄρα τὸ μεταβεβληκός εἶναι ἐν τούτῳ εἰς ὃ μεταβέβληκεν. φανερόν οὖν ὅτι καὶ τὸ γεγονός, ὅτε γέγονεν, ἔσται, καὶ τὸ ἐφθαρμένον οὐκ ἔσται· καθόλου τε γὰρ εἴρηται περὶ πάσης μεταβολῆς, καὶ μάλιστα δῆλον ἐν τῇ κατ' ἀντίφασιν. ὅτι μὲν τοίνυν τὸ μεταβεβληκός, ὅτε μεταβέβληκε πρῶτον, ἐν ἐκείνῳ ἐστίν, δῆλον·

ἐν ᾧ δὲ πρῶτῳ μεταβέβληκεν τὸ μεταβεβληκός, ἀνάγκη ἄτομον εἶναι. λέγω δὲ πρῶτον ὃ μὴ τῷ ἑτερόν τι αὐτοῦ εἶναι τοιοῦτόν ἐστιν. ἔστω γὰρ διαιρετὸν τὸ ΑΓ, καὶ διηρήσθω κατὰ τὸ Β. εἰ μὲν οὖν ἐν τῷ ΑΒ μεταβέβληκεν ἢ πάλιν ἐν τῷ ΒΓ, οὐκ ἂν ἐν πρῶτῳ τῷ ΑΓ μεταβεβληκός εἴη. εἰ δ' ἐν ἐκατέρῳ μετέβαλλεν (ἀνάγκη γὰρ (236a.) ἢ μεταβεβληκέναι ἢ μεταβάλλειν ἐν ἐκατέρῳ), κἂν ἐν τῷ ὅλῳ μεταβάλλοι· ἀλλ' ἦν μεταβεβληκός. ὁ αὐτὸς δὲ λόγος καὶ εἰ ἐν τῷ μὲν μεταβάλλει, ἐν δὲ τῷ μεταβέβληκεν· ἔσται γὰρ τι τοῦ πρώτου πρότερον· ὥστ' οὐκ ἂν εἴη διαιρετὸν ἐν ᾧ μεταβέβληκεν. φανερόν οὖν ὅτι καὶ τὸ ἐφθαρμένον καὶ τὸ γεγονός ἐν ἀτόμῳ τὸ μὲν ἐφθαρται

τὸ δὲ γέγονεν.

λέγεται δὲ τὸ ἐν $\tilde{\omega}$ πρώτῳ μεταβέβληκε διχῶς, τὸ μὲν ἐν $\tilde{\omega}$ πρώτῳ ἐπετελέσθη ἢ μεταβολή (τότε γὰρ ἀληθὲς εἰπεῖν ὅτι μεταβέβληκεν), τὸ δ' ἐν $\tilde{\omega}$ πρώτῳ ἤρξατο μεταβάλλειν. τὸ μὲν οὖν κατὰ τὸ τέλος τῆς μεταβολῆς πρῶτον λεγόμενον ὑπάρχει τε καὶ ἔστιν (ἐνδέχεται γὰρ ἐπιτελεσθῆναι μεταβολὴν καὶ ἔστι μεταβολῆς τέλος, ὃ δὴ καὶ δέδεικται ἀδιαίρετον ὄν διὰ τὸ πέρας εἶναι). τὸ δὲ κατὰ τὴν ἀρχὴν ὅλως οὐκ ἔστιν· οὐ γὰρ ἔστιν ἀρχὴ μεταβολῆς, οὐδ' ἐν $\tilde{\omega}$ πρώτῳ τοῦ χρόνου μετέβαλλεν. ἔστω γὰρ πρῶτον ἐφ' $\tilde{\omega}$ τὸ ΑΔ. τοῦτο δὴ ἀδιαίρετον μὲν οὐκ ἔστιν· συμβήσεται γὰρ ἐχόμενα εἶναι τὰ νῦν. ἔτι δ' εἰ ἐν τῷ ΓΑ χρόνῳ παντὶ ἡρεμεῖ (κεῖσθω γὰρ ἡρεμοῦν), καὶ ἐν τῷ Α ἡρεμεῖ, ὥστ' εἰ ἀμέρες ἐστὶ τὸ ΑΔ, ἅμα ἡρεμήσει καὶ μεταβεβληκὸς ἔσται· ἐν μὲν γὰρ τῷ Α ἡρεμεῖ, ἐν δὲ τῷ Δ μεταβέβληκεν. ἐπεὶ δ' οὐκ ἔστιν ἀμέρες, ἀνάγκη διαιρετὸν εἶναι καὶ ἐν ὁπωσὺν τῶν τούτου μεταβεβληκέναι· διαιρεθέντος γὰρ τοῦ ΑΔ, εἰ μὲν ἐν μηδετέρῳ μεταβέβληκεν, οὐδ' ἐν τῷ ὅλῳ· εἰ δ' ἐν ἀμφοῖν μεταβάλλει καὶ ἐν τῷ παντί, εἴτ' ἐν θατέρῳ μεταβέβληκεν, οὐκ ἐν τῷ ὅλῳ πρώτῳ. ὥστε ἀνάγκη ἐν ὁπωσὺν μεταβεβλη κέναι. φανερόν τοίνυν ὅτι οὐκ ἔστιν ἐν $\tilde{\omega}$ πρώτῳ μεταβέβληκεν· ἅπειροι γὰρ αἱ διαιρέσεις. οὐδὲ δὴ τοῦ μεταβεβληκότος ἔστιν τι πρῶτον ὃ μεταβέβληκεν. ἔστω γὰρ τὸ ΔΖ πρῶτον μεταβεβληκὸς τοῦ ΔΕ· πᾶν γὰρ δέδεικται διαιρετὸν τὸ μεταβάλλον. ὁ δὲ χρόνος ἐν $\tilde{\omega}$ τὸ ΔΖ μεταβέβληκεν ἔστω ἐφ' $\tilde{\omega}$ ΘΙ. εἰ οὖν ἐν τῷ παντί τὸ ΔΖ μεταβέβληκεν, ἐν τῷ ἡμίσει ἔλαττον ἔσται τι μεταβεβληκὸς καὶ πρότερον τοῦ ΔΖ, καὶ πάλιν τούτου ἄλλο, κἀκεῖνου ἕτερον, καὶ αἰεὶ οὕτως. ὥστ' οὐθὲν ἔσται πρῶτον τοῦ μεταβάλλοντος ὃ μεταβέβληκεν. ὅτι μὲν οὖν οὔτε τοῦ μεταβάλλοντος οὔτ' ἐν $\tilde{\omega}$ μεταβάλλει χρόνῳ πρῶτον οὐθὲν ἐστίν, φανερόν ἐκ τῶν εἰρημένων.

(236b.) αὐτὸ δὲ ὃ μεταβάλλει ἢ καθ' ὃ μεταβάλλει, οὐκέθ' ὁμοίως ἔξει. τρία γὰρ ἐστὶν ἃ λέγεται κατὰ τὴν μεταβολήν, τό τε μεταβάλλον καὶ ἐν $\tilde{\omega}$ καὶ εἰς ὃ μεταβάλλει, οἷον ὁ ἄνθρωπος καὶ ὁ χρόνος καὶ τὸ λευκόν. ὁ μὲν οὖν ἄνθρωπος καὶ ὁ χρόνος διαιρετοί, περὶ δὲ τοῦ λευκοῦ ἄλλος λόγος. πλὴν κατὰ συμβεβηκὸς γε πάντα διαιρετά· $\tilde{\omega}$ γὰρ συμβέβηκεν τὸ λευκὸν ἢ τὸ ποιόν, ἐκεῖνο διαιρετὸν ἐστίν· ἐπεὶ ὅσα γε καθ' αὐτὰ λέγεται διαιρετά καὶ μὴ κατὰ συμβεβηκός, οὐδ' ἐν τούτοις ἔσται τὸ πρῶτον, οἷον ἐν τοῖς μεγέθεσιν. ἔστω γὰρ τὸ ἐφ' $\tilde{\omega}$ ΑΒ μέγεθος, κεκινήσθω δ' ἐκ τοῦ Β εἰς τὸ Γ πρῶτον. οὐκοῦν εἰ μὲν

ἀδιαίρετον ἔσται τὸ ΒΓ, ἀμερὲς ἀμεροῦς ἔσται ἐχόμενον· εἰ δὲ διαιρετόν, ἔσται τι τοῦ Γ πρότερον, εἰς ὃ μεταβέβληκεν, κακείνου πάλιν ἄλλο, καὶ αἰ οὕτως διὰ τὸ μηδέποτε ὑπολείπειν τὴν διαίρεσιν. ὥστ' οὐκ ἔσται πρῶτον εἰς ὃ μεταβέβληκεν. ὁμοίως δὲ καὶ ἐπὶ τῆς τοῦ ποσοῦ μεταβολῆς· καὶ γὰρ αὕτη ἐν συνεχεῖ ἔστιν. φανερόν οὖν ὅτι ἐν μόνῃ τῶν κινήσεων τῇ κατὰ τὸ ποιὸν ἐνδέχεται ἀδιαίρετον καθ' αὐτὸ εἶναι.

Κεφάλαιο 6

Ἐπεὶ δὲ τὸ μεταβάλλον ἅπαν ἐν χρόνῳ μεταβάλλει, λέγεται δ' ἐν χρόνῳ μεταβάλλειν καὶ ὡς ἐν πρώτῳ καὶ ὡς καθ' ἕτερον, οἷον ἐν τῷ ἐνιαυτῷ ὅτι ἐν τῇ ἡμέρᾳ μεταβάλλει, ἐν ᾧ πρώτῳ χρόνῳ μεταβάλλει τὸ μεταβάλλον, ἐν ὁποῦν ἀνάγκη τούτου μεταβάλλειν. δῆλον μὲν οὖν καὶ ἐκ τοῦ ὀρισμοῦ (τὸ γὰρ πρῶτον οὕτως ἐλέγομεν), οὐ μὴν ἀλλὰ καὶ ἐκ τῶνδε φανερόν. ἔστω γὰρ ἐν ᾧ πρώτῳ κινεῖται τὸ κινούμενον ἐφ' ᾧ ΧΡ, καὶ διηρήσθω κατὰ τὸ Κ· πᾶς γὰρ χρόνος διαιρετός. ἐν δὲ τῷ ΧΚ χρόνῳ ἤτοι κινεῖται ἢ οὐ κινεῖται, καὶ πάλιν ἐν τῷ ΚΡ ὡσαύτως. εἰ μὲν οὖν ἐν μηδετέρῳ κινεῖται, ἡρεμοίῃ ἂν ἐν τῷ παντί (κινεῖσθαι γὰρ ἐν μηθενὶ τῶν τούτου κινούμενον ἀδύνατον)· εἰ δ' ἐν θατέρῳ μόνῳ κινεῖται, οὐκ ἂν ἐν πρώτῳ κινεῖτο τῷ ΧΡ· καθ' ἕτερον γὰρ ἢ κίνησις. ἀνάγκη ἄρα ἐν ὁποῦν τοῦ ΧΡ κινεῖσθαι.

δεδειγμένου δὲ τούτου φανερόν ὅτι πᾶν τὸ κινούμενον ἀνάγκη κεκινήσθαι πρότερον. εἰ γὰρ ἐν τῷ ΧΡ πρώτῳ χρόνῳ τὸ ΚΛ κεκίνηται μέγεθος, ἐν τῷ ἡμίσει τὸ ὁμοταχῶς κινούμενον καὶ ἅμα ἀρξάμενον τὸ ἥμισυ ἔσται κεκινημένον. εἰ δὲ τὸ (237a.) ὁμοταχὲς ἐν τῷ αὐτῷ χρόνῳ κεκίνηται τι, καὶ θάτερον ἀνάγκη ταὐτὸ κεκινήσθαι μέγεθος, ὥστε κεκινημένον ἔσται τὸ κινούμενον.

ἔτι δὲ εἰ ἐν τῷ παντί χρόνῳ τῷ ΧΡ κεκινήσθαι λέγομεν, ἢ ὅλως ἐν ὁποῦν χρόνῳ, τῷ λαβεῖν τὸ ἔσχατον αὐτοῦ νῦν (τοῦτο γὰρ ἐστὶ τὸ ὀρίζον, καὶ τὸ μεταξὺ τῶν νῦν χρόνος), καὶ ἐν τοῖς ἄλλοις ὁμοίως λέγοιτο κεκινήσθαι. τοῦ δ' ἡμίσεος ἔσχατον ἢ διαίρεσις. ὥστε καὶ ἐν τῷ ἡμίσει κεκινημένον ἔσται καὶ ὅλως ἐν ὁποῦν τῶν μερῶν· αἰεὶ γὰρ ἅμα τῇ τομῇ χρόνος ἐστὶν ὠρισμένος ὑπὸ τῶν νῦν. εἰ οὖν ἅπας μὲν χρόνος διαιρετός, τὸ δὲ μεταξὺ τῶν νῦν χρόνος, ἅπαν τὸ μεταβάλλον ἄπειρα ἔσται μεταβεβληκός.

ἔτι δ' εἰ τὸ συνεχῶς μεταβάλλον καὶ μὴ φθαρὲν μηδὲ πεπαισμένον τῆς μεταβολῆς ἢ μεταβάλλειν ἢ μεταβεβληκέναι ἀναγκαῖον ἐν ὁποῦν, ἐν δὲ τῷ νῦν οὐκ ἐστὶν μεταβάλλειν, ἀνάγκη μεταβεβληκέναι καθ' ἕκαστον τῶν νῦν· ὥστ' εἰ τὰ νῦν ἄπειρα, πᾶν τὸ μεταβάλλον ἄπειρα ἔσται μεταβεβληκός.

οὐ μόνον δὲ τὸ μεταβάλλον ἀνάγκη μεταβεβληκέναι, ἀλλὰ καὶ τὸ μεταβεβληκὸς ἀνάγκη μεταβάλλειν πρότερον· ἅπαν γὰρ τὸ ἐκ τινος

εἷς τι μεταβεβληκὸς ἐν χρόνῳ μεταβέβληκεν. ἔστω γὰρ ἐν τῷ νῦν ἐκ τοῦ Α εἰς τὸ Β μεταβεβληκός. οὐκοῦν ἐν μὲν τῷ αὐτῷ νῦν ἐν ᾧ ἐστὶν ἐν τῷ Α, οὐ μεταβέβληκεν (ἅμα γὰρ ἂν εἴη ἐν τῷ Α καὶ ἐν τῷ Β)· τὸ γὰρ μεταβεβληκός, ὅτε μεταβέβληκεν, ὅτι οὐκ ἔστιν ἐν τούτῳ, δέδεικται πρότερον· εἰ δ' ἐν ἄλλῳ, μεταξὺ ἔσται χρόνος· οὐ γὰρ ἦν ἐχόμενα τὰ νῦν. ἐπεὶ οὖν ἐν χρόνῳ μεταβέβληκεν, χρόνος δ' ἅπας διαιρετός, ἐν τῷ ἡμίσει ἄλλο ἔσται μεταβεβληκός, καὶ πάλιν ἐν τῷ ἐκείνου ἡμίσει ἄλλο, καὶ αἰεὶ οὕτως· ὥστε μεταβάλλοι ἂν πρότερον.

ἔτι δ' ἐπὶ τοῦ μεγέθους φανερώτερον τὸ λεχθὲν διὰ τὸ συνεχές εἶναι τὸ μέγεθος ἐν ᾧ μεταβάλλει τὸ μεταβάλλον. ἔστω γὰρ τι μεταβεβληκὸς ἐκ τοῦ Γ εἰς τὸ Δ. οὐκοῦν εἰ μὲν ἀδιαίρετόν ἐστι τὸ ΓΔ, ἀμερὲς ἀμεροῦς ἔσται ἐχόμενον· ἐπεὶ δὲ τοῦτο ἀδύνατον, ἀνάγκη μέγεθος εἶναι τὸ μεταξὺ καὶ εἰς ἅπειρα διαιρετόν· ὥστ' εἰς ἐκεῖνα μεταβάλλει πρότερον. ἀνάγκη ἄρα πᾶν τὸ μεταβεβληκὸς μεταβάλλειν πρότερον. ἡ γὰρ αὐτὴ ἀπόδειξις (237b.) καὶ ἐν τοῖς μὴ συνεχέσιν, οἷον ἐν τε τοῖς ἐναντίοις καὶ ἐν ἀντιφάσει· ληψόμεθα γὰρ τὸν χρόνον ἐν ᾧ μεταβέβληκεν, καὶ πάλιν ταῦτα ἐροῦμεν. ὥστε ἀνάγκη τὸ μεταβεβληκὸς μεταβάλλειν καὶ τὸ μεταβάλλον μεταβεβληκέναι, καὶ ἔσται τοῦ μὲν μεταβάλλειν τὸ μεταβεβληκέναι πρότερον, τοῦ δὲ μεταβεβληκέναι τὸ μεταβάλλειν, καὶ οὐδέποτε ληφθήσεται τὸ πρῶτον. αἴτιον δὲ τούτου τὸ μὴ εἶναι ἀμερὲς ἀμεροῦς ἐχόμενον· ἅπειρος γὰρ ἡ διαίρεσις, καθάπερ ἐπὶ τῶν αὐξανομένων καὶ καθαιρουμένων γραμμῶν.

φανερὸν οὖν ὅτι καὶ τὸ γεγονὸς ἀνάγκη γίνεσθαι πρότερον καὶ τὸ γιγνόμενον γεγονέναι, ὅσα διαιρετὰ καὶ συνεχῇ, οὐ μέντοι αἰεὶ ὁ γίγνεται, ἀλλ' ἄλλο ἐνίστε, οἷον τῶν ἐκείνου τι, ὥσπερ τῆς οἰκίας τὸν θεμέλιον. ὁμοίως δὲ καὶ ἐπὶ τοῦ φθειρομένου καὶ ἐφθαρμένου· εὐθὺς γὰρ ἐνυπάρχει τῷ γιγνομένῳ καὶ τῷ φθειρομένῳ ἅπειρόν τι συνεχεῖ γε ὄντι, καὶ οὐκ ἔστιν οὔτε γίγνεσθαι μὴ γεγονός τι οὔτε γεγονέναι μὴ γιγνόμενόν τι, ὁμοίως δὲ καὶ ἐπὶ τοῦ φθείρεσθαι καὶ ἐπὶ τοῦ ἐφθάρθαι· αἰεὶ γὰρ ἔσται τοῦ μὲν φθείρεσθαι τὸ ἐφθάρθαι πρότερον, τοῦ δ' ἐφθάρθαι τὸ φθείρεσθαι. φανερὸν οὖν ὅτι καὶ τὸ γεγονὸς ἀνάγκη γίνεσθαι πρότερον καὶ τὸ γιγνόμενον γεγονέναι· πᾶν γὰρ μέγεθος καὶ πᾶς χρόνος ἀεὶ διαιρετός.

ὥστ' ἐν ᾧ ἂν ἦ, οὐκ ἂν εἴη ὡς πρῶτῳ.

Κεφάλαιο 7

Ἐπεὶ δὲ πᾶν τὸ κινούμενον ἐν χρόνῳ κινεῖται, καὶ ἐν τῷ πλείονι μείζον μέγεθος, ἐν τῷ ἀπείρῳ χρόνῳ ἀδύνατόν ἐστιν πεπερασμένην κινεῖσθαι, μὴ τὴν αὐτὴν αἰεὶ καὶ τῶν ἐκείνης τι κινούμενον, ἀλλ' ἐν ᾧπαντι ἅπασαν. ὅτι μὲν οὖν εἴ τι ἰσοταχῶς κινοῖτο, ἀνάγκη τὸ πεπερασμένον ἐν πεπερασμένῳ κινεῖσθαι, δῆλον (ληφθέντος γὰρ μορίου ὃ καταμετρήσει τὴν ὅλην, ἐν ἴσοις χρόνοις τοσούτοις ὅσα τὰ μόρια ἐστίν, τὴν ὅλην κεκίνηται, ὥστ' ἐπεὶ ταῦτα πεπέρανται καὶ τῷ πόσον ἕκαστον καὶ τῷ ποσάκις ἅπαντα, καὶ ὁ χρόνος ἂν εἴη πεπερασμένος· τοσαυτάκις γὰρ ἔσται τοσοῦτος, ὅσος ὁ τοῦ μορίου χρόνος πολλαπλασιασθεὶς τῷ πλήθει τῶν μορίων).

ἀλλὰ δὴ καὶ μὴ ἰσοταχῶς, διαφέρει οὐθέν. ἔστω γὰρ ἐφ' ἧς τὸ AB διάστημα πεπερασμένον, ὃ κεκίνηται (238a.) ἐν τῷ ἀπείρῳ, καὶ ὁ χρόνος ἄπειρος ἐφ' οὗ τὸ ΓΔ. εἰ δὴ ἀνάγκη πρότερον ἕτερον ἐτέρου κεκινήσθαι (τοῦτο δὲ δῆλον, ὅτι τοῦ χρόνου ἐν τῷ προτέρῳ καὶ ὑστέρῳ ἕτερον κεκίνηται· αἰεὶ γὰρ ἐν τῷ πλείονι ἕτερον ἔσται κεκινημένον, ἐάν τε ἰσοταχῶς ἐάν τε μὴ ἰσοταχῶς μεταβάλλῃ, καὶ ἐάν τε ἐπιτείνῃ ἢ κίνησις ἐάν τε ἀνιῇ ἐάν τε μένῃ, οὐθέν ἦττον), εἰλήφθω δὴ τι τοῦ AB διαστήματος, τὸ AE, ὃ καταμετρήσει τὴν AB. τοῦτο δὴ τοῦ ἀπείρου ἐν τινι ἐγένετο χρόνῳ· ἐν ἀπείρῳ γὰρ οὐχ οἶόν τε· τὸ γὰρ ἅπαν ἐν ἀπείρῳ. καὶ πάλιν ἕτερον δὴ ἐὰν λάβω ὅσον τὸ AE, ἀνάγκη ἐν πεπερασμένῳ χρόνῳ· τὸ γὰρ ἅπαν ἐν ἀπείρῳ. καὶ οὕτω δὴ λαμβάνων, ἐπειδὴ τοῦ μὲν ἀπείρου οὐθέν ἔστι μόνιον ὃ καταμετρήσει (ἀδύνατον γὰρ τὸ ἄπειρον εἶναι ἐκ πεπερασμένων καὶ ἴσων καὶ ἀνίσων, διὰ τὸ καταμετρηθῆσεσθαι τὰ πεπερασμένα πλήθει καὶ μεγέθει ὑπὸ τινος ἐνός, ἐάν τε ἴσα ἢ ἐάν τε ἄνισα, ὠρισμένα δὲ τῷ μεγέθει, οὐθέν ἦττον), τὸ δὲ διάστημα τὸ πεπερασμένον ποσοῖς τοῖς AE μετρεῖται, ἐν πεπερασμένῳ ἂν χρόνῳ τὸ AB κινοῖτο (ὥσαύτως δὲ καὶ ἐπὶ ἡρεμῆσεως)· ὥστε οὔτε γίνεσθαι οὔτε φθίρεσθαι οἶόν τε αἰεὶ τι τὸ αὐτὸ καὶ ἔν. ὁ αὐτὸς δὲ λόγος καὶ ὅτι οὐδ' ἐν πεπερασμένῳ χρόνῳ ἄπειρον οἶόν τε κινεῖσθαι οὐδ' ἡρεμίζεσθαι, οὐθ' ὁμαλῶς κινούμενον οὔτ' ἀνωμάλως. ληφθέντος γὰρ τινος μέρους ὃ ἀναμετρήσει τὸν ὅλον χρόνον, ἐν τούτῳ πόσον τι διέξεισιν τοῦ μεγέθους καὶ οὐχ ὅλον (ἐν γὰρ τῷ παντὶ τὸ ὅλον), καὶ πάλιν ἐν τῷ ἴσῳ ἄλλο, καὶ ἐν ἐκάστῳ ὁμοίως, εἴτε ἴσον εἴτε ἄνισον

τῷ ἐξ ἀρχῆς· διαφέρει γὰρ οὐδέν, εἰ μόνον πεπερασμένον ἕκαστον·
δῆλον γὰρ ὡς ἀναιρουμένου τοῦ χρόνου τὸ ἄπειρον οὐκ
ἀναιρεθήσεται, πεπερασμένης τῆς ἀφαιρέσεως γιγνομένης καὶ τῷ
ποσῷ καὶ τῷ ποσάκις· ὥστ' οὐ δίεισιν ἐν πεπερασμένῳ χρόνῳ τὸ
ἄπειρον. οὐδὲν τε διαφέρει τὸ μέγεθος ἐπὶ θάτερα ἢ ἐπ' ἀμφοτέρα
εἶναι ἄπειρον· ὁ γὰρ αὐτὸς ἔσται λόγος.

ἀποδεδειγμένων δὲ τούτων φανερόν ὅτι οὐδὲ τὸ πεπερασμένον
μέγεθος τὸ ἄπειρον ἐνδέχεται διελθεῖν ἐν πεπερασμένῳ διὰ τὴν
αὐτὴν αἰτίαν· ἐν γὰρ τῷ μορίῳ τοῦ χρόνου πεπερασμένον δίεισι, καὶ
ἐν ἑκάστῳ ὡσαύτως, ὥστ' ἐν τῷ παντὶ πεπερασμένον.

ἐπεὶ δὲ τὸ πεπερασμένον οὐ δίεισι τὸ ἄπειρον (238b.) ἐν
πεπερασμένῳ χρόνῳ, δῆλον ὡς οὐδὲ τὸ ἄπειρον τὸ πεπερασμένον· εἰ
γὰρ τὸ ἄπειρον τὸ πεπερασμένον, ἀνάγκη καὶ τὸ πεπερασμένον
διέναι τὸ ἄπειρον. οὐδὲν γὰρ διαφέρει ὅποτερονοῦν εἶναι τὸ
κινούμενον· ἀμφοτέρως γὰρ τὸ πεπερασμένον δίεισι τὸ ἄπειρον.
ὅταν γὰρ κινῆται τὸ ἄπειρον ἐφ' ᾧ τὸ Α, ἔσται τι αὐτοῦ κατὰ τὸ Β τὸ
πεπερασμένον, οἷον τὸ ΓΔ, καὶ πάλιν ἄλλο καὶ ἄλλο, καὶ αἰεὶ οὕτως.
ὥσθ' ἅμα συμβήσεται τὸ ἄπειρον κεκινήσθαι τὸ πεπερασμένον καὶ
τὸ πεπερασμένον διεληλυθέναι τὸ ἄπειρον· οὐδὲ γὰρ ἴσως δυνατόν
ἄλλως τὸ ἄπειρον κινήθηναι τὸ πεπερασμένον ἢ τῷ τὸ πεπερασμένον
διέναι τὸ ἄπειρον, ἢ φερόμενον ἢ ἀναμετροῦν. ὥστ' ἐπεὶ τοῦτ'
ἀδύνατον, οὐκ ἂν δίοι τὸ ἄπειρον τὸ πεπερασμένον. ἀλλὰ μὴν οὐδὲ
τὸ ἄπειρον ἐν πεπερασμένῳ χρόνῳ τὸ ἄπειρον· δίεισιν· εἰ γὰρ τὸ
ἄπειρον, καὶ τὸ πεπερασμένον· ἐνυπάρχει γὰρ τῷ ἀείρῳ τὸ
πεπερασμένον. ἔτι δὲ καὶ τοῦ χρόνου ληφθέντος ἢ αὐτὴ ἔσται
ἀπόδειξις. ἐπεὶ δ' οὔτε τὸ πεπερασμένον τὸ ἄπειρον οὔτε τὸ ἄπειρον
τὸ πεπερασμένον οὔτε τὸ ἄπειρον τὸ ἄπειρον ἐν πεπερασμένῳ χρόνῳ
κινεῖται, φανερόν ὅτι οὐδὲ κίνησις ἔσται ἄπειρος ἐν πεπερασμένῳ
χρόνῳ· τί γὰρ διαφέρει τὴν κίνησιν ἢ τὸ μέγεθος ποιεῖν ἄπειρον;
ἀνάγκη γάρ, εἰ ὅποτερονοῦν, καὶ θάτερον εἶναι ἄπειρον· πᾶσα γὰρ
φορὰ ἐν τόπῳ.

Κεφάλαιο 8

Ἐπεὶ δὲ πᾶν ἢ κινεῖται ἢ ἡρεμεῖ τὸ πεφυκὸς ὅτε πέφυκε καὶ οὐ καὶ ὥς, ἀνάγκη τὸ ἰστάμενον ὅτε ἴσταται κινεῖσθαι· εἰ γὰρ μὴ κινεῖται, ἡρεμήσει, ἀλλ' οὐκ ἐνδέχεται ἡρεμίζεσθαι τὸ ἡρεμοῦν. τούτου δ' ἀποδεδειγμένου φανερόν ὅτι καὶ ἐν χρόνῳ ἴστασθαι ἀνάγκη (τὸ γὰρ κινούμενον ἐν χρόνῳ κινεῖται, τὸ δ' ἰστάμενον δέδεικται κινούμενον, ὥστε ἀνάγκη ἐν χρόνῳ ἴστασθαι).

ἔτι δ' εἰ τὸ μὲν θάπτον καὶ βραδύτερον ἐν χρόνῳ λέγομεν, ἴστασθαι δ' ἔστιν θάπτον καὶ βραδύτερον. ἐν ᾧ δὲ χρόνῳ πρώτῳ τὸ ἰστάμενον ἴσταται, ἐν ὅτῳ οὖν ἀνάγκη τούτου ἴστασθαι. διαιρεθέντος γὰρ τοῦ χρόνου εἰ μὲν ἐν μηδετέρῳ τῶν μερῶν ἴσταται, οὐδ' ἐν τῷ ὅλῳ, ὥστ' οὐκ ἂν ἴσταιτο τὸ ἰστάμενον· εἰ δ' ἐν θατέρῳ, οὐκ ἂν ἐν πρώτῳ τῷ ὅλῳ ἴσταιτο· καθ' ἕτερον γὰρ ἐν τούτῳ ἴσταται, καθάπερ ἐλέχθη καὶ ἐπὶ τοῦ κινουμένου πρότερον. ὥσπερ δὲ τὸ κινούμενον οὐκ ἔστιν (239a.) ἐν ᾧ πρώτῳ κινεῖται, οὕτως οὐδ' ἐν ᾧ ἴσταται τὸ ἰστάμενον· οὔτε γὰρ τοῦ κινεῖσθαι οὔτε τοῦ ἴστασθαί ἐστιν τι πρῶτον. ἔστω γὰρ ἐν ᾧ πρώτῳ ἴσταται ἐφ' ᾧ τὸ AB. τοῦτο δὴ ἀμερὲς μὲν οὐκ ἐνδέχεται εἶναι (κίνησις γὰρ οὐκ ἔστιν ἐν τῷ ἀμερεῖ διὰ τὸ κεκινήσθαι τι ἂν αὐτοῦ, τὸ δ' ἰστάμενον δέδεικται κινούμενον)· ἀλλὰ μὴν εἰ διαιρετόν ἐστιν, ἐν ὅτῳ οὖν αὐτοῦ τῶν μερῶν ἴσταται· τοῦτο γὰρ δέδεικται πρότερον, ὅτι ἐν ᾧ πρώτῳ ἴσταται, ἐν ὅτῳ οὖν τῶν ἐκείνου ἴσταται. ἐπεὶ οὖν χρόνος ἐστὶν ἐν ᾧ πρώτῳ ἴσταται, καὶ οὐκ ἄτομον, ἅπας δὲ χρόνος εἰς ἅπειρα μεριστός, οὐκ ἔσται ἐν ᾧ πρώτῳ ἴσταται.

οὐδὲ δὴ τὸ ἡρεμοῦν ὅτε πρῶτον ἡρέμησεν ἔστιν. ἐν ἀμερεῖ μὲν γὰρ οὐκ ἡρέμησεν διὰ τὸ μὴ εἶναι κίνησιν ἐν ἀτόμῳ, ἐν ᾧ δὲ τὸ ἡρεμεῖν, καὶ τὸ κινεῖσθαι (τότε γὰρ ἔφαμεν ἡρεμεῖν, ὅτε καὶ ἐν ᾧ πεφυκὸς κινεῖσθαι μὴ κινεῖται τὸ πεφυκός)· ἔτι δὲ καὶ τότε λέγομεν ἡρεμεῖν, ὅταν ὁμοίως ἔχη νῦν καὶ πρότερον, ὡς οὐχ ἐνί τινι κρίνοντες ἀλλὰ δυοῖν τοῖν ἐλαχίστοιν· ὥστ' οὐκ ἔσται ἐν ᾧ ἡρεμεῖ ἀμερὲς. εἰ δὲ μεριστόν, χρόνος ἂν εἴη, καὶ ἐν ὅτῳ οὖν αὐτοῦ τῶν μερῶν ἡρεμήσει. τὸν αὐτὸν γὰρ τρόπον δειχθήσεται ὃν καὶ ἐπὶ τῶν πρότερον.

ὥστ' οὐθὲν ἔσται πρῶτον. τούτου δ' αἴτιον ὅτι ἡρεμεῖ μὲν καὶ κινεῖται πᾶν ἐν χρόνῳ, χρόνος δ' οὐκ ἔστι πρῶτος οὐδὲ μέγεθος οὐδ'

ὅλως συνεχὲς οὐδέν· ἅπαν γὰρ εἰς ἄπειρα μεριστόν.

ἐπεὶ δὲ πᾶν τὸ κινούμενον ἐν χρόνῳ κινεῖται καὶ ἔκ τινος εἰς τι μεταβάλλει, ἐν ᾧ χρόνῳ κινεῖται καθ' αὐτὸν καὶ μὴ τῷ ἐν ἐκείνου τινί, ἀδύνατον τότε κατὰ τι εἶναι πρῶτον τὸ κινούμενον. τὸ γὰρ ἡρεμεῖν ἐστὶν τὸ ἐν τῷ αὐτῷ εἶναι χρόνον τινὰ καὶ αὐτὸ καὶ τῶν μερῶν ἕκαστον. οὕτως γὰρ λέγομεν ἡρεμεῖν, ὅταν ἐν ἄλλῳ καὶ ἄλλῳ τῶν νῦν ἀληθὲς ἢ εἰπεῖν ὅτι ἐν τῷ αὐτῷ καὶ αὐτὸ καὶ τὰ μέρη. εἰ δὲ τοῦτ' ἔστι τὸ ἡρεμεῖν, οὐκ ἐνδέχεται τὸ μεταβάλλον κατὰ τι εἶναι ὅλον κατὰ τὸν πρῶτον χρόνον· ὁ γὰρ χρόνος διαιρετὸς ἅπας, ὥστε ἐν ἄλλῳ καὶ ἄλλῳ αὐτοῦ μέρει ἀληθὲς ἔσται εἰπεῖν ὅτι ἐν ταῦτῳ ἐστὶν καὶ αὐτὸ καὶ τὰ μέρη. εἰ γὰρ μὴ οὕτως ἀλλ' ἐν ἐνὶ μόνῳ τῶν νῦν, οὐκ ἔσται χρόνον οὐδένα κατὰ τι, ἀλλὰ κατὰ τὸ πέρας τοῦ χρόνου. ἐν δὲ τῷ νῦν ἔστιν μὲν ἀεὶ κατὰ τι μὲν (239b.) ὄν, οὐ μέντοι ἡρεμεῖ· οὔτε γὰρ κινεῖσθαι οὔτ' ἡρεμεῖν ἔστιν ἐν τῷ νῦν, ἀλλὰ μὴ κινεῖσθαι μὲν ἀληθὲς ἐν τῷ νῦν καὶ εἶναι κατὰ τι, ἐν χρόνῳ δ' οὐκ ἐνδέχεται εἶναι κατὰ τι ἡρεμοῦν· συμβαίνει γὰρ τὸ φερόμενον ἡρεμεῖν.

Κεφάλαιο 9

Ζήνων δὲ παραλογίζεται· εἰ γὰρ αἰεὶ, φησὶν, ἡρεμεῖ πᾶν [ἢ κινεῖται] ὅταν ἢ κατὰ τὸ ἴσον, ἔστιν δ' αἰεὶ τὸ φερόμενον ἐν τῷ νῦν, ἀκίνητον τὴν φερομένην εἶναι οἷστον. τοῦτο δ' ἐστὶ ψεῦδος· οὐ γὰρ σύγκειται ὁ χρόνος ἐκ τῶν νῦν τῶν ἀδιαιρέτων, ὥσπερ οὐδ' ἄλλο μέγεθος οὐδέν.

τέτταρες δ' εἰσὶν οἱ λόγοι περὶ κινήσεως Ζήνωνος οἱ παρέχοντες τὰς δυσκολίας τοῖς λύουσιν, πρῶτος μὲν ὁ περὶ τοῦ μὴ κινεῖσθαι διὰ τὸ πρότερον εἰς τὸ ἥμισυ δεῖν ἀφικέσθαι τὸ φερόμενον ἢ πρὸς τὸ τέλος, περὶ οὗ διείλομεν ἐν τοῖς πρότερον λόγοις.

δεύτερος δ' ὁ καλούμενος Ἀχιλλεύς· ἔστι δ' οὗτος, ὅτι τὸ βραδύτατον οὐδέποτε καταληφθήσεται θεόν ὑπὸ τοῦ ταχίστου· ἔμπροσθεν γὰρ ἀναγκαῖον ἐλθεῖν τὸ διῶκον ὅθεν ὥρμησεν τὸ φεῦγον, ὥστε αἰεὶ τι προέχειν ἀναγκαῖον τὸ βραδύτερον. ἔστιν δὲ καὶ οὗτος ὁ αὐτὸς λόγος τῷ διχοτομεῖν, διαφέρει δ' ἐν τῷ διαιρεῖν μὴ δίχα τὸ προσλαμβανόμενον μέγεθος. τὸ μὲν οὖν μὴ καταλαμβάνεσθαι τὸ βραδύτερον συμβέβηκεν ἐκ τοῦ λόγου, γίνγεται δὲ παρὰ ταῦτο τῇ διχοτομίᾳ (ἐν ἀμφοτέροις γὰρ συμβαίνει μὴ ἀφικνεῖσθαι πρὸς τὸ πέρας διαιρουμένου πως τοῦ μεγέθους· ἀλλὰ πρόσκειται ἐν τούτῳ ὅτι οὐδὲ τὸ τάχιστον τετραγωδημένον ἐν τῷ διώκειν τὸ βραδύτατον), ὥστ' ἀνάγκη καὶ τὴν λύσιν εἶναι τὴν αὐτήν. τὸ δ' ἀξιοῦν ὅτι τὸ προέχον οὐ καταλαμβάνεται, ψεῦδος· ὅτε γὰρ προέχει, οὐ καταλαμβάνεται· ἀλλ' ὅμως καταλαμβάνεται, εἴπερ δώσει διεξίναί τὴν πεπερασμένην. οὗτοι μὲν οὖν οἱ δύο λόγοι,

τρίτος δ' ὁ νῦν ῥηθείς, ὅτι ἡ οἷστὸς φερομένη ἔστηκεν. συμβαίνει δὲ παρὰ τὸ λαμβάνειν τὸν χρόνον συγκεῖσθαι ἐκ τῶν νῦν· μὴ διδομένου γὰρ τούτου οὐκ ἔσται ὁ συλλογισμός.

τέταρτος δ' ὁ περὶ τῶν ἐν τῷ σταδίῳ κινουμένων ἐξ ἐναντίας ἴσων ὄγκων παρ' ἴσους, τῶν μὲν ἀπὸ τέλους τοῦ σταδίου τῶν δ' ἀπὸ μέσου, ἴσῳ τάχει, ἐν ᾧ συμβαίνειν (240a.) οἶεται ἴσον εἶναι χρόνον τῷ διπλασίῳ τὸν ἥμισυν. ἔστι δ' ὁ παραλογισμὸς ἐν τῷ τὸ μὲν παρὰ κινούμενον τὸ δὲ παρ' ἡρεμοῦν τὸ ἴσον μέγεθος ἀξιοῦν τῷ ἴσῳ τάχει τὸν ἴσον φέρεσθαι χρόνον· τοῦτο δ' ἐστὶ ψεῦδος. οἷον ἔστωσαν οἱ ἐστῶτες ἴσοι ὄγκοι ἐφ' ὧν τὰ ΑΑ, οἱ δ' ἐφ' ὧν τὰ ΒΒ ἀρχόμενοι ἀπὸ τοῦ μέσου, ἴσοι τὸν ἀριθμὸν τούτοις ὄντες καὶ τὸ μέγεθος, οἱ δ' ἐφ'

ὧν τὰ ΓΓ ἀπὸ τοῦ ἐσχάτου, ἴσοι τὸν ἀριθμὸν ὄντες τούτοις καὶ τὸ μέγεθος, καὶ ἰσοταχεῖς τοῖς Β. συμβαίνει δὴ τὸ πρῶτον Β ἅμα ἐπὶ τῷ ἐσχάτῳ εἶναι καὶ τὸ πρῶτον Γ, παρ' ἄλληλα κινουμένων.

συμβαίνει δὲ τὸ Γ παρὰ πάντα [τὰ Β] διεξεληλυθέναι, τὸ δὲ Β παρὰ τὰ ἡμίση· ὥστε ἡμισυν εἶναι τὸν χρόνον· ἴσον γὰρ ἐκάτερόν ἐστιν παρ' ἑκαστον. ἅμα δὲ συμβαίνει τὸ πρῶτον Β παρὰ πάντα τὰ Γ παρεληλυθέναι· ἅμα γὰρ ἔσται τὸ πρῶτον Γ καὶ τὸ πρῶτον Β ἐπὶ τοῖς ἐναντίοις ἐσχάτοις, [ἴσον χρόνον παρ' ἑκαστον γιγνόμενον τῶν Β ὅσον περ τῶν Α, ὡς φησιν,] διὰ τὸ ἀμφοτέρω ἴσον χρόνον παρὰ τὰ Α γίνεσθαι. ὁ μὲν οὖν λόγος οὗτός ἐστιν, συμβαίνει δὲ παρὰ τὸ εἰρημένον ψευδός.

οὐδὲ δὴ κατὰ τὴν ἐν τῇ ἀντιφάσει μεταβολὴν οὐθὲν ἡμῖν ἔσται ἀδύνατον, οἷον εἰ ἐκ τοῦ μὴ λευκοῦ εἰς τὸ λευκὸν μεταβάλλει καὶ ἐν μηδετέρῳ ἐστίν, ὡς ἄρα οὔτε λευκὸν ἔσται οὔτε οὐ λευκόν· οὐ γὰρ εἰ μὴ ὅλον ἐν ὁποτέρῳ ἐστίν, οὐ λεχθήσεται λευκὸν ἢ οὐ λευκόν· λευκὸν γὰρ λέγομεν ἢ οὐ λευκὸν οὐ τῷ ὅλον εἶναι τοιοῦτον, ἀλλὰ τῷ τὰ πλεῖστα ἢ τὰ κυριώτατα μέρη· οὐ ταὐτὸ δ' ἐστίν μὴ εἶναι τε ἐν τούτῳ καὶ μὴ εἶναι ἐν τούτῳ ὅλον. ὁμοίως δὲ καὶ ἐπὶ τοῦ ὄντος καὶ ἐπὶ τοῦ μὴ ὄντος καὶ τῶν ἄλλων τῶν κατ' ἀντίφασιν· ἔσται μὲν γὰρ ἐξ ἀνάγκης ἐν θατέρῳ τῶν ἀντικειμένων, ἐν οὐδετέρῳ δ' ὅλον αἰεὶ.

πάλιν δ' ἐπὶ τοῦ κύκλου καὶ ἐπὶ τῆς σφαίρας καὶ ὅλως τῶν ἐν αὐτοῖς κινουμένων, ὅτι συμβήσεται αὐτὰ ἡρεμεῖν· ἐν γὰρ τῷ αὐτῷ τόπῳ χρόνον τινὰ ἔσται καὶ αὐτὰ καὶ τὰ μέρη, ὥστε ἡρεμήσει ἅμα καὶ κινήσεται. πρῶτον μὲν γὰρ τὰ μέρη οὐκ ἔστιν ἐν τῷ αὐτῷ οὐθένᾳ χρόνῳ (240b.) νον, εἴτα καὶ τὸ ὅλον μεταβάλλει αἰεὶ εἰς ἕτερον· οὐ γὰρ ἢ αὕτη ἐστίν ἢ ἀπὸ τοῦ Α λαμβανομένη περιφέρεια καὶ ἢ ἀπὸ τοῦ Β καὶ τοῦ Γ καὶ τῶν ἄλλων ἐκάστου σημείων, πλην ὡς ὁ μουσικὸς ἄνθρωπος καὶ ἄνθρωπος, ὅτι συμβέβηκεν. ὥστε μεταβάλλει αἰεὶ ἢ ἑτέρα εἰς τὴν ἑτέραν, καὶ οὐδέποτε ἡρεμήσει. τὸν αὐτὸν δὲ τρόπον καὶ ἐπὶ τῆς σφαίρας καὶ ἐπὶ τῶν ἄλλων τῶν ἐν αὐτοῖς κινουμένων.

Κεφάλαιο 10

Αποδεδειγμένων δὲ τούτων λέγομεν ὅτι τὸ ἀμερὲς οὐκ ἐνδέχεται κινεῖσθαι πλὴν κατὰ συμβεβηκός, οἷον κινουμένου τοῦ σώματος ἢ τοῦ μεγέθους τῷ ἐνυπάρχειν, καθάπερ ἂν εἰ τὸ ἐν τῷ πλοίῳ κινοῖτο ὑπὸ τῆς τοῦ πλοίου φορᾶς ἢ τὸ μέρος τῆ τοῦ ὅλου κινήσει. (ἀμερὲς δὲ λέγω τὸ κατὰ ποσὸν ἀδιαίρετον.) καὶ γὰρ αἱ τῶν μερῶν κινήσεις ἕτεραί εἰσι κατ' αὐτά τε τὰ μέρη καὶ κατὰ τὴν τοῦ ὅλου κίνησιν. ἴδιοι δ' ἂν τις ἐπὶ τῆς σφαίρας μάλιστα τὴν διαφοράν· οὐ γὰρ ταῦτὸν τάχος ἐστὶ τῶν τε πρὸς τῷ κέντρῳ καὶ τῶν ἐκτὸς καὶ τῆς ὅλης, ὥς οὐ μιᾶς οὔσης κινήσεως. καθάπερ οὖν εἵπομεν, οὕτω μὲν ἐνδέχεται κινεῖσθαι τὸ ἀμερὲς ὥς ὁ ἐν τῷ πλοίῳ καθήμενος τοῦ πλοίου θεόντος, καθ' αὐτὸ δ' οὐκ ἐνδέχεται. μεταβαλλέτω γὰρ ἐκ τοῦ AB εἰς τὸ BG, εἴτ' ἐκ μεγέθους εἰς μέγεθος εἴτ' ἐξ εἰδους εἰς εἶδος εἴτε κατ' ἀντίφασιν· ὁ δὲ χρόνος ἔστω ἐν ᾧ πρώτῳ μεταβάλλει ἐφ' οὗ Δ. οὐκοῦν ἀνάγκη αὐτὸ καθ' ὃν μεταβάλλει χρόνον ἢ ἐν τῷ AB εἶναι ἢ ἐν τῷ BG, ἢ τὸ μὲν τι αὐτοῦ ἐν τούτῳ τὸ δ' ἐν θατέρῳ· πᾶν γὰρ τὸ μεταβάλλον οὕτως εἶχεν. ἐν ἑκατέρῳ μὲν οὖν οὐκ ἔσται τι αὐτοῦ· μεριστὸν γὰρ ἂν εἴη. ἀλλὰ μὴν οὐδ' ἐν τῷ BG· μεταβεβληκός γὰρ ἔσται, ὑπόκειται δὲ μεταβάλλειν. λείπεται δὴ αὐτὸ ἐν τῷ AB εἶναι, καθ' ὃν μεταβάλλει χρόνον. ἡρεμήσει ἄρα· τὸ γὰρ ἐν τῷ αὐτῷ εἶναι χρόνον τινὰ ἡρεμεῖν ἦν. ὥστ' οὐκ ἐνδέχεται τὸ ἀμερὲς κινεῖσθαι οὐδ' ὅλως μεταβάλλειν· μοναχῶς γὰρ ἂν οὕτως ἦν αὐτοῦ κινήσεις, εἰ ὁ χρόνος ἦν ἐκ τῶν νῦν· αἰεὶ γὰρ ἐν τῷ νῦν κεκινημένον ἂν ἦν καὶ μετα(241a.) βεβληκός, ὥστε κινεῖσθαι μὲν μηδέποτε, κεκινήσθαι δ' αἰεὶ. τοῦτο δ' ὅτι ἀδύνατον, δέδεικται καὶ πρότερον· οὔτε γὰρ ὁ χρόνος ἐκ τῶν νῦν οὐθ' ἡ γραμμὴ ἐκ στιγμῶν οὐθ' ἡ κινήσεις ἐκ κινήματων· οὐθὲν γὰρ ἄλλο ποιεῖ ὁ τοῦτο λέγων ἢ τὴν κίνησιν ἐξ ἀμερῶν, καθάπερ ἂν εἰ τὸν χρόνον ἐκ τῶν νῦν ἢ τὸ μῆκος ἐκ στιγμῶν.

ἔτι δὲ καὶ ἐκ τῶνδε φανερόν ὅτι οὔτε στιγμὴν οὐτ' ἄλλο ἀδιαίρετον οὐθὲν ἐνδέχεται κινεῖσθαι. ἅπαν γὰρ τὸ κινούμενον ἀδύνατον πρότερον μεῖζον κινήσθαι αὐτοῦ, πρὶν ἢ ἴσον ἢ ἔλαττον. εἰ δὴ τοῦτο, φανερόν ὅτι καὶ ἡ στιγμὴ ἔλαττον ἢ ἴσον κινήσεται πρῶτον. ἐπεὶ δὲ ἀδιαίρετος, ἀδύνατον ἔλαττον κινήσθαι πρότερον· ἴσην ἄρα αὐτῇ. ὥστε ἔσται ἡ γραμμὴ ἐκ στιγμῶν· αἰεὶ γὰρ ἴσην

κινουμένη την πᾶσαν γραμμὴν στιγμή καταμετρήσει. εἰ δὲ τοῦτο ἀδύνατον, καὶ τὸ κινεῖσθαι τὸ ἀδιαίρετον ἀδύνατον.

ἔτι δ' εἰ ἅπαν ἐν χρόνῳ κινεῖται, ἐν δὲ τῷ νῦν μηθέν, ἅπας δὲ χρόνος διαιρετός, εἴη ἂν τις χρόνος ἐλάττων ὁτιοῦν τῶν κινουμένων ἢ ἐν ᾧ κινεῖται ὅσον αὐτό. οὗτος μὲν γὰρ ἔσται χρόνος ἐν ᾧ κινεῖται διὰ τὸ πᾶν ἐν χρόνῳ κινεῖσθαι, χρόνος δὲ πᾶς διαιρετός δέδεικται πρότερον. εἰ δ' ἄρα στιγμή κινεῖται, ἔσται τις χρόνος ἐλάττων ἢ ἐν ᾧ αὐτὴν ἐκινήθη. ἀλλὰ ἀδύνατον· ἐν γὰρ τῷ ἐλάττονι ἔλαττον ἀνάγκη κινεῖσθαι. ὥστε ἔσται διαιρετὸν τὸ ἀδιαίρετον εἰς τὸ ἔλαττον, ὥσπερ καὶ ὁ χρόνος εἰς τὸν χρόνον. μοναχῶς γὰρ ἂν κινοῖτο τὸ ἀμερὲς καὶ ἀδιαίρετον, εἰ ἦν ἐν τῷ νῦν κινεῖσθαι δυνατόν τῷ ἀτόμῳ· τοῦ γὰρ αὐτοῦ λόγου ἐν τῷ νῦν κινεῖσθαι καὶ ἀδιαίρετόν τι κινεῖσθαι.

μεταβολὴ δ' οὐκ ἔστιν οὐδεμία ἄπειρος· ἅπαντα γὰρ ἦν ἕκ τινος εἷς τι, καὶ ἡ ἐν ἀντιφάσει καὶ ἡ ἐν ἐναντίοις. ὥστε τῶν μὲν κατ' ἀντίφασιν ἢ φάσις καὶ ἡ ἀπόφασις πέρας (οἷον γενέσεως μὲν τὸ ὄν, φθορᾶς δὲ τὸ μὴ ὄν), τῶν δ' ἐν τοῖς ἐναντίοις τὰ ἐναντία· ταῦτα γὰρ ἄκρα τῆς μεταβολῆς, ὥστε καὶ ἀλλοιώσεως πάσης (ἐξ ἐναντίων γὰρ τινῶν ἢ ἀλλοιώσεως), ὁμοίως δὲ καὶ αὐξήσεως καὶ φθίσεως· αὐξήσεως μὲν γὰρ τὸ πέρας τοῦ (241b.) κατὰ τὴν οἰκείαν φύσιν τελείου μεγέθους, φθίσεως δὲ ἡ τούτου ἕκστασις. ἡ δὲ φορὰ οὕτω μὲν οὐκ ἔσται πεπερασμένη· οὐ γὰρ πᾶσα ἐν ἐναντίοις· ἀλλ' ἐπειδὴ τὸ ἀδύνατον τμηθῆναι οὕτω, τῷ μὴ ἐνδέχεσθαι τμηθῆναι (πλεοναχῶς γὰρ λέγεται τὸ ἀδύνατον), οὐκ ἐνδέχεται τὸ οὕτως ἀδύνατον τέμνεσθαι, οὐδὲ ὅλως τὸ ἀδύνατον γενέσθαι γίγνεσθαι, οὐδὲ τὸ μεταβαλεῖν ἀδύνατον ἐνδέχεται· ἂν μεταβάλλειν εἰς ὃ ἀδύνατον μεταβαλεῖν. εἰ οὖν τὸ φερόμενον μεταβάλλοι εἷς τι, καὶ δυνατόν ἔσται μεταβαλεῖν.

ὥστ' οὐκ ἄπειρος ἡ κίνησις, οὐδ' οἰσθήσεται τὴν ἄπειρον· ἀδύνατον γὰρ διελθεῖν αὐτήν. ὅτι μὲν οὖν οὕτως οὐκ ἔστιν ἄπειρος μεταβολὴ ὥστε μὴ ὀρίσθαι πέραςι, φανερόν. ἀλλ' εἰ οὕτως ἐνδέχεται ὥστε τῷ χρόνῳ εἶναι ἄπειρον τὴν αὐτὴν οὕσαν καὶ μίαν, σκεπτέον. μὴ μιᾶς μὲν γὰρ γιγνομένης οὐθὲν ἴσως κωλύει, οἷον εἰ μετὰ τὴν φορὰν ἀλλοίωσις εἴη καὶ μετὰ τὴν ἀλλοίωσιν αὐξήσις καὶ πάλιν γένεσις· οὕτω γὰρ αἰεὶ μὲν ἔσται τῷ χρόνῳ κίνησις, ἀλλ' οὐ μία διὰ τὸ μὴ εἶναι μίαν ἐξ ἀπασῶν. ὥστε δὲ γίγνεσθαι μίαν, οὐκ ἐνδέχεται ἄπειρον εἶναι τῷ χρόνῳ πλὴν μιᾶς· αὕτη δ' ἐστὶν ἡ κύκλω φορὰ.

Κεφάλαιο 1

Ἄπαν τὸ κινούμενον ὑπὸ τινος ἀνάγκη κινεῖσθαι· εἰ μὲν γὰρ ἐν ἑαυτῷ μὴ ἔχει τὴν ἀρχὴν τῆς κινήσεως, φανερόν ὅτι ὑφ' ἑτέρου κινεῖται (ἄλλο γὰρ ἔσται τὸ κινοῦν)· εἰ δ' ἐν αὐτῷ, ἔστω [τὸ] εἰλημμένον ἐφ' οὗ τὸ AB ὃ κινεῖται καθ' αὐτό, ἀλλὰ μὴ <τῷ τῶν> τούτου τι κινεῖσθαι. πρῶτον μὲν οὖν τὸ ὑπολαμβάνειν τὸ AB ὑφ' ἑαυτοῦ κινεῖσθαι διὰ τὸ ὅλον τε κινεῖσθαι καὶ ὑπ' οὐδενὸς τῶν ἕξωθεν ὁμοίον ἐστίν ὥσπερ εἰ τοῦ ΚΛ κινοῦντος τὸ ΛΜ καὶ αὐτοῦ κινουμένου εἰ μὴ φάσκοι τις τὸ ΚΜ κινεῖσθαι ὑπὸ τινος, διὰ τὸ μὴ φανερόν εἶναι πότερον τὸ κινοῦν καὶ πότερον τὸ κινούμενον· εἴτα τὸ μὴ ὑπὸ τινος κινούμενον (242a.) οὐκ ἀνάγκη παύσασθαι κινούμενον τῷ ἄλλο ἡρεμεῖν, ἀλλ' εἴ τι ἡρεμεῖ τῷ ἄλλο πεπαῦσθαι κινούμενον, ἀνάγκη ὑπὸ τινος αὐτὸ κινεῖσθαι. τούτου δ' εἰλημμένου πᾶν τὸ κινούμενον κινήσεται ὑπὸ τινος. ἐπεὶ γὰρ εἰληπται [τὸ] κινούμενον ἐφ' ᾧ τὸ AB, ἀνάγκη διαιρετὸν αὐτὸ εἶναι· πᾶν γὰρ τὸ κινούμενον διαιρετόν. διηρήσθω δὴ κατὰ τὸ Γ. τοῦ δὴ ΓΒ μὴ κινουμένου οὐ κινήθησεται τὸ AB. εἰ γὰρ κινήσεται, δηλὸν ὅτι τὸ ΑΓ κινεῖται ἂν τοῦ ΓΒ ἡρεμοῦντος, ὥστε οὐ καθ' αὐτὸ κινήθησεται καὶ πρῶτον. ἀλλ' ὑπέκειτο καθ' αὐτὸ κινεῖσθαι καὶ πρῶτον. ἀνάγκη ἄρα τοῦ ΓΒ μὴ κινουμένου ἡρεμεῖν τὸ AB. ὃ δὲ ἡρεμεῖ (45) μὴ κινουμένου τινός, ὁμολόγηται ὑπὸ τινος κινεῖσθαι, ὥστε πᾶν ἀνάγκη τὸ κινούμενον ὑπὸ τινος κινεῖσθαι· ἀεὶ γὰρ ἔσται τὸ κινούμενον διαιρετόν, τοῦ δὲ μέρους μὴ κινουμένου ἀνάγκη καὶ τὸ ὅλον ἡρεμεῖν.

ἐπεὶ δὲ πᾶν τὸ κινούμενον ἀνάγκη κινεῖσθαι ὑπὸ τινος, ἐάν γέ τι κινήται τὴν ἐν τόπῳ κίνησιν ὑπ' ἄλλου κινουμένου, καὶ πάλιν τὸ κινοῦν ὑπ' ἄλλου κινουμένου κινήται κάκεῖνο ὑφ' ἑτέρου καὶ ἀεὶ οὕτως, ἀνάγκη εἶναί τι τὸ πρῶτον κινοῦν, καὶ μὴ βαδίζειν εἰς ἄπειρον· μὴ γὰρ ἔστω, ἀλλὰ γενέσθω ἄπειρον. κινεῖσθω δὴ τὸ μὲν Α ὑπὸ τοῦ Β, τὸ δὲ Β ὑπὸ τοῦ Γ, τὸ δὲ Γ ὑπὸ τοῦ Δ, καὶ ἀεὶ τὸ ἐχόμενον ὑπὸ τοῦ ἐχομένου. ἐπεὶ οὖν ὑπόκειται τὸ κινοῦν κινούμενον κινεῖν, ἀνάγκη ἅμα γίνεσθαι τὴν τοῦ κινουμένου καὶ τὴν τοῦ κινοῦντος κίνησιν (ἅμα γὰρ κινεῖ τὸ κινοῦν καὶ κινεῖται τὸ κινούμενον)· φανερόν <οὖν> ὅτι ἅμα ἔσται τοῦ Α καὶ τοῦ Β καὶ τοῦ Γ καὶ ἐκάστου τῶν κινούντων καὶ κινουμένων ἡ κίνησις. εἰλήφθω οὖν ἡ ἐκάστου κίνησις, καὶ ἔστω τοῦ μὲν Α ἐφ' ἧς Ε, τοῦ δὲ Β ἐφ' ἧς Ζ, τῶν <δὲ> Γ

Δ ἐφ' ὧν Η Θ. εἰ γὰρ ἀεὶ κινεῖται ἕκαστον ὑφ' ἐκάστου, ὅμως ἔσται λαβεῖν μίαν ἐκάστου κίνησιν τῷ ἀριθμῷ· πᾶσα γὰρ κίνησις ἔκ τινος εἷς τι, καὶ οὐκ ἄπειρος τοῖς ἐσχάτοις· λέγω δὴ ἀριθμῷ μίαν κίνησιν τὴν ἐκ τοῦ αὐτοῦ εἰς τὸ αὐτὸ τῷ ἀριθμῷ ἐν τῷ αὐτῷ χρόνῳ τῷ ἀριθμῷ γιγνομένην. ἔστι γὰρ κίνησις καὶ γένει καὶ εἶδει καὶ ἀριθμῷ ἢ αὐτῇ, (242b.) γένει μὲν ἢ τῆς αὐτῆς κατηγορίας, οἷον οὐσίας ἢ ποιότητος, εἶδει δὲ <ἡ> ἐκ τοῦ αὐτοῦ τῷ εἶδει εἰς τὸ αὐτὸ τῷ εἶδει, οἷον ἐκ λευκοῦ εἰς μέλαν ἢ ἐξ ἀγαθοῦ εἰς κακὸν ἀδιάφορον τῷ εἶδει· ἀριθμῷ δὲ ἢ ἐξ ἐνὸς τῷ ἀριθμῷ <εἰς ἐν τῷ ἀριθμῷ> ἐν τῷ αὐτῷ χρόνῳ, οἷον ἐκ τοῦδε τοῦ λευκοῦ εἰς τόδε τὸ μέλαν, ἢ ἐκ τοῦδε τοῦ τόπου εἰς τόνδε, ἐν τῷδε τῷ χρόνῳ· εἰ γὰρ ἐν ἄλλῳ, οὐκέτι ἔσται ἀριθμῷ μία κίνησις, ἀλλ' εἶδει.

εἴρηται δὲ περὶ τούτων ἐν τοῖς πρότερον. εἰλήφθω δὲ καὶ ὁ χρόνος ἐν ᾧ κεκίνηται τὴν αὐτοῦ κίνησιν τὸ Α, καὶ ἔστω ἐφ' ᾧ Κ. πεπερασμένης δ' οὔσης τῆς τοῦ Α κινήσεως καὶ ὁ χρόνος ἔσται πεπερασμένος. ἐπεὶ δὴ ἄπειρα τὰ κινούμενα καὶ τὰ κινούμενα, καὶ ἡ κίνησις ἢ ΕΖΗΘ ἢ ἐξ ἀπασῶν ἄπειρος ἔσται· ἐνδέχεται μὲν γὰρ ἴσην εἶναι τὴν τοῦ Α καὶ τοῦ Β καὶ τὴν τῶν ἄλλων, ἐνδέχεται δὲ μείζους τὰς τῶν ἄλλων, ὥστε εἴ τε ἴσαι εἴ τε μείζους, ἀμφοτέρως ἄπειρος ἢ ὅλη· λαμβάνομεν γὰρ τὸ ἐνδεχόμενον. ἐπεὶ δ' ἅμα κινεῖται καὶ τὸ Α καὶ τῶν ἄλλων ἕκαστον, ἢ ὅλη κίνησις ἐν τῷ αὐτῷ χρόνῳ ἔσται καὶ ἡ τοῦ Α· ἢ δὲ τοῦ Α ἐν πεπερασμένῳ· ὥστε εἴη ἂν ἄπειρος ἐν πεπερασμένῳ, τοῦτο δ' ἀδύνατον.

οὕτω μὲν οὖν δόξειεν ἂν δεδειχθαι τὸ ἐξ ἀρχῆς, οὐ μὴν ἀποδείκνυται διὰ τὸ μηδὲν δεικνυσθαι ἀδύνατον· ἐνδέχεται γὰρ ἐν πεπερασμένῳ χρόνῳ ἄπειρον εἶναι κίνησιν, μὴ ἐνὸς ἀλλὰ πολλῶν. ὅπερ συμβαίνει καὶ ἐπὶ τούτων· ἕκαστον γὰρ κινεῖται τὴν ἑαυτοῦ κίνησιν, ἅμα δὲ πολλὰ κινεῖσθαι οὐκ ἀδύνατον. ἀλλ' εἰ τὸ κινεῖν πρῶτως κατὰ τόπον καὶ σωματικὴν κίνησιν ἀνάγκη ἢ ἅπτεσθαι ἢ συνεχῆς εἶναι τῷ κινουμένῳ, καθάπερ ὁρῶμεν ἐπὶ πάντων, ἀνάγκη τὰ κινούμενα καὶ τὰ κινούμενα συνεχῆ εἶναι ἢ ἅπτεσθαι ἀλλήλων, ὥστ' εἶναι τι ἐξ ἀπάντων ἔν. τοῦτο δὲ εἴτε πεπερασμένον εἴτε ἄπειρον, οὐδὲν διαφέρει πρὸς τὰ νῦν· πάντως γὰρ ἡ κίνησις ἔσται ἄπειρος ἀπείρων ὄντων, εἴπερ ἐνδέχεται καὶ ἴσας εἶναι καὶ μείζους ἀλλήλων· ὁ γὰρ ἐνδέχεται, ληψόμεθα ὡς ὑπάρχον. εἰ οὖν τὸ μὲν ἐκ τῶν Α Β Γ Δ <ἢ πεπερασμένον ἢ> ἄπειρόν τί ἐστίν, κινεῖται δὲ τὴν ΕΖΗΘ κίνησιν ἐν τῷ χρόνῳ τῷ Κ, οὗτος δὲ πεπέρανται, συμβαίνει ἐν

πεπερασμένῳ χρόνῳ ἄπειρον διέναι ἢ τὸ πεπερασμένον ἢ τὸ ἄπειρον. ἀμφοτέρως δὲ ἀδύνατον· ὥστε ἀνάγκη ἴστασθαι καὶ εἶναι τι πρῶτον κινεῖν καὶ κινούμενον. οὐδὲν γὰρ διαφέρει τὸ συμβαίνειν ἐξ ὑποθέσεως τὸ ἀδύνατον· (243a.) ἢ γὰρ ὑπόθεσις εἴληπται ἐνδεχομένη, τοῦ δ' ἐνδεχομένου τεθέντος οὐδὲν προσήκει γίγνεσθαι διὰ τοῦτο ἀδύνατον.

Κεφάλαιο 2

Τὸ δὲ πρῶτον κινεῖν, μὴ ὡς τὸ οὗ ἕνεκεν, ἀλλ' ὅθεν ἡ ἀρχὴ τῆς κινήσεως, ἅμα τῷ κινουμένῳ ἐστί (λέγω δὲ τὸ ἅμα, ὅτι οὐδέν ἐστιν αὐτῶν μεταξύ). τοῦτο γὰρ κοινὸν ἐπὶ παντὸς κινουμένου καὶ κινουντός ἐστιν. ἐπεὶ δὲ τρεῖς αἱ κινήσεις, ἥ τε κατὰ τόπον καὶ ἡ κατὰ τὸ ποιὸν καὶ ἡ κατὰ τὸ ποσόν, ἀνάγκη καὶ τὰ κινούμενα τρία εἶναι, τό τε φέρον καὶ τὸ ἀλλοιοῦν καὶ τὸ αὖξον ἢ φθίνον.

πρῶτον οὖν εἴπωμεν περὶ τῆς φορᾶς· πρώτη γὰρ αὕτη τῶν κινήσεων. ἅπαν δὴ τὸ φερόμενον ἢ ὑφ' ἐαυτοῦ κινεῖται ἢ ὑπ' ἄλλου. ὅσα μὲν οὖν αὐτὰ ὑφ' αὐτῶν κινεῖται, φανερόν ἐν τούτοις ὅτι ἅμα τὸ κινούμενον καὶ τὸ κινεῖν ἐστίν· ἐνυπάρχει γὰρ αὐτοῖς τὸ πρῶτον κινεῖν, ὥστ' οὐδέν ἐστιν ἀναμεταξύ· ὅσα δ' ὑπ' ἄλλου κινεῖται, τετραχῶς ἀνάγκη γίνεσθαι· τέτταρα γὰρ εἶδη τῆς ὑπ' ἄλλου φορᾶς, ἔλξις, ὥσις, ὄχησις, δίνησις. ἅπασαι γὰρ αἱ κατὰ τόπον κινήσεις ἀνάγονται εἰς ταύτας· ἡ μὲν γὰρ ἔπωσις ὥσις τίς ἐστιν, ὅταν τὸ ἀφ' αὐτοῦ κινεῖν ἐπακολουθοῦν ὠθῇ, ἡ δ' ἄπωσις, ὅταν μὴ ἐπακολουθῇ κινήσαν, ἡ δὲ ῥίψις, ὅταν σφο (243b.) δροτέραν ποιήσῃ τὴν ἀφ' αὐτοῦ κίνησιν τῆς κατὰ φύσιν φορᾶς, καὶ μέχρι τοσούτου φέρεται ἕως ἂν κρατῇ ἡ κίνησις. πάλιν ἡ δίωσις καὶ σύνωσις ἄπωσις καὶ ἔλξις εἰσίν· ἡ μὲν γὰρ δίωσις ἄπωσις (ἡ γὰρ ἀφ' αὐτοῦ ἢ ἀπ' ἄλλου ἐστὶν ἡ ἄπωσις), ἡ δὲ σύνωσις ἔλξις (καὶ γὰρ πρὸς αὐτὸ καὶ πρὸς ἄλλο ἡ ἔλξις). ὥστε καὶ ὅσα τούτων εἶδη, οἷον σπάθησις καὶ κέρκισις· ἡ μὲν γὰρ σύνωσις, ἡ δὲ δίωσις. ὁμοίως δὲ καὶ αἱ ἄλλαι συγκρίσεις καὶ διακρίσεις — ἅπασαι γὰρ ἔσσονται διώσεις ἢ συνώσεις — πλὴν ὅσαι ἐν γενέσει καὶ φθορᾷ εἰσιν. ἅμα δὲ φανερόν ὅτι οὐδ' ἐστὶν ἄλλο τι γένος κινήσεως ἢ σύγκρισις καὶ διάκρισις· ἅπασαι γὰρ διανέμονται εἰς τινὰς τῶν εἰρημένων. ἔτι δ' ἡ μὲν εἰσπονὴ ἔλξις, ἡ δ' ἐκπονὴ ὥσις. ὁμοίως δὲ καὶ ἡ πτύσις, καὶ ὅσαι ἄλλαι διὰ τοῦ σώματος ἢ ἐκκριτικαὶ ἢ ληπτικαὶ κινήσεις· αἱ μὲν γὰρ ἔλξεις εἰσίν, αἱ δ' ἀπώσεις. δεῖ δὲ καὶ τὰς ἄλλας τὰς κατὰ τόπον ἀνάγειν· ἅπασαι γὰρ πίπτουσιν εἰς τέσσαρας ταύτας. τούτων δὲ πάλιν ἡ ὄχησις καὶ ἡ δίνησις εἰς ἔλξιν καὶ ὥσιν. ἡ μὲν γὰρ ὄχησις κατὰ τούτων τινὰ τῶν τριῶν τρόπων ἐστίν (τὸ μὲν γὰρ ὀχούμενον κινεῖται κατὰ συμβεβηκός, ὅτι ἐν κινουμένῳ ἐστὶν ἢ ἐπὶ κινουμένου τινός, τὸ δ' ὀχοῦν ὀχεῖ ἢ ἐλκόμενον ἢ (244a.) ὠθούμενον ἢ δινούμενον, ὥστε

κοινή ἐστὶν ἀπασῶν τῶν τριῶν ἢ ὄχησις)· ἡ δὲ δίνησις σύγκειται ἐξ ἑλξέως τε καὶ ὤσεως· ἀνάγκη γὰρ τὸ δινοῦν τὸ μὲν ἔλκειν τὸ δ' ὠθεῖν· τὸ μὲν γὰρ ἀφ' αὐτοῦ τὸ δὲ πρὸς αὐτὸ ἄγει. ὥστ' εἰ τὸ ὠθοῦν καὶ τὸ ἔλκον ἅμα τῷ ὠθουμένῳ καὶ τῷ ἐλκομένῳ, φανερόν ὅτι τοῦ κατὰ τόπον κινουμένου καὶ κινουντος οὐδέν ἐστι μεταξύ. ἀλλὰ μὴν τοῦτο δῆλον καὶ ἐκ τῶν ὀρισμῶν· ὧσις μὲν γὰρ ἐστὶν ἡ ἀφ' αὐτοῦ ἢ ἀπ' ἄλλου πρὸς ἄλλο κίνησις, ἑλξις δὲ ἡ ἀπ' ἄλλου πρὸς αὐτὸ ἢ πρὸς ἄλλο, ὅταν θάπτων ἡ κίνησις ἢ [τοῦ ἔλκοντος] τῆς χωριζούσης ἀπ' ἀλλήλων τὰ συνεχῇ· οὕτω γὰρ συνεφέλκεται θάτερον. (τάχα δὲ δόξειεν ἂν εἶναι τις ἑλξις καὶ ἄλλως· τὸ γὰρ ξύλον ἔλκει τὸ πῦρ οὐχ οὕτως. τὸ δ' οὐθέν διαφέρει κινουμένου τοῦ ἔλκοντος ἢ μένοντος ἔλκειν· ὅτε μὲν γὰρ ἔλκει οὗ ἔστιν, ὅτε δὲ οὗ ἦν.) ἀδύνατον δὲ ἡ ἀφ' αὐτοῦ πρὸς ἄλλο ἢ ἀπ' ἄλλου πρὸς αὐτὸ κινεῖν (244b.) μὴ ἀπτόμενον, ὥστε φανερόν ὅτι τοῦ κατὰ τόπον κινουμένου καὶ κινουντος οὐδέν ἐστι μεταξύ.

ἀλλὰ μὴν οὐδὲ τοῦ ἀλλοιουμένου καὶ τοῦ ἀλλοιούντος. τοῦτο δὲ δῆλον ἐξ ἐπαγωγῆς· ἐν ἅπασι γὰρ συμβαίνει ἅμα εἶναι τὸ ἔσχατον ἀλλοιοῦν καὶ τὸ πρῶτον ἀλλοιούμενον· <ὑπόκειται γὰρ ἡμῖν τὸ τὰ ἀλλοιούμενα κατὰ τὰς παθητικὰς καλουμένας ποιότητας πάσχοντα ἀλλοιοῦσθαι>. ἅπαν γὰρ σῶμα σώματος διαφέρει τοῖς αἰσθητοῖς ἢ πλείοσιν ἢ ἐλάττωσιν ἢ τῷ μᾶλλον καὶ ἥττον τοῖς αὐτοῖς· ἀλλὰ μὴν καὶ ἀλλοιοῦται τὸ ἀλλοιούμενον ὑπὸ τῶν εἰρημένων. ταῦτα γὰρ ἐστὶ πάθη τῆς ὑποκειμένης ποιότητος· ἡ γὰρ θερμαινόμενον ἢ γλυκαινόμενον ἢ πυκνούμενον ἢ ξηραίνόμενον ἢ λευκαινόμενον ἀλλοιοῦσθαι φαμεν, ὁμοίως τό τε ἄψυχον καὶ τὸ ἐμψυχον λέγοντες, καὶ πάλιν τῶν ἐμψύχων τά τε μὴ αἰσθητικὰ τῶν μερῶν καὶ αὐτὰς τὰς αἰσθήσεις. ἀλλοιοῦνται γὰρ πῶς καὶ αἱ αἰσθήσεις· ἡ γὰρ αἴσθησις ἡ κατ' ἐνέργειαν κίνησίς ἐστι διὰ τοῦ σώματος, πασχούσης τι τῆς αἰσθήσεως. καθ' ὅσα μὲν οὖν τὸ ἄψυχον ἀλλοιοῦται, καὶ τὸ ἐμψυχον, καθ' ὅσα δὲ τὸ ἐμψυχον, οὐ κατὰ ταῦτα πάντα τὸ ἄψυχον (οὐ γὰρ ἀλλοιοῦται κατὰ τὰς αἰσθήσεις)· καὶ τὸ μὲν λανθάνει, τὸ δ' οὐ (245a.) λανθάνει πάσχον. οὐδὲν δὲ κωλύει καὶ τὸ ἐμψυχον λανθάνειν, ὅταν μὴ κατὰ τὰς αἰσθήσεις γίγνηται ἡ ἀλλοίωσις. εἴπερ οὖν ἀλλοιοῦται τὸ ἀλλοιούμενον ὑπὸ τῶν αἰσθητῶν, ἐν ἅσιν γε τούτοις φανερόν ὅτι ἅμα ἐστὶ τὸ ἔσχατον ἀλλοιοῦν καὶ τὸ πρῶτον ἀλλοιούμενον· τῷ μὲν γὰρ συνεχῆς ὁ ἀήρ, τῷ δ' ἀέρι τὸ σῶμα. πάλιν δὲ τὸ μὲν χρῶμα τῷ φωτί, τὸ δὲ φῶς τῇ ὄψει. τὸν αὐτὸν δὲ τρόπον

καὶ ἡ ἀκοή καὶ ἡ ὁσφρησις· πρῶτον γὰρ κινεῖν πρὸς τὸ κινούμενον ὁ ἀήρ. καὶ ἐπὶ τῆς γεύσεως ὁμοίως· ἅμα γὰρ τῇ γεύσει ὁ χυμός. ὡσαύτως δὲ καὶ ἐπὶ τῶν ἀψύχων καὶ ἀναισθήτων. ὥστ' οὐδὲν ἔσται μεταξὺ τοῦ ἀλλοιουμένου καὶ τοῦ ἀλλοιοῦντος.

οὐδὲ μὴν τοῦ αὐξανομένου τε καὶ αὔζοντος· αὐξάνει γὰρ τὸ πρῶτον αὔξον προσγιγνόμενον, ὥστε ἐν γίγνεσθαι τὸ ὅλον. καὶ πάλιν φθίνει τὸ φθίνον ἀπογιγνόμενον τινὸς τῶν τοῦ φθίνοντος. ἀνάγκη οὖν συνεχὲς εἶναι καὶ τὸ αὔξον καὶ τὸ φθίνον, τῶν δὲ συνεχῶν οὐδὲν μεταξύ.

φανερὸν οὖν ὅτι τοῦ κινουμένου καὶ (245b.) τοῦ κινεῖντος πρῶτου καὶ ἐσχάτου πρὸς τὸ κινούμενον οὐδὲν ἔστιν ἀνὰ μέσον.

Κεφάλαιο 3

Ὅτι δὲ τὸ ἀλλοιούμενον ἅπαν ἀλλοιοῦται ὑπὸ τῶν αἰσθητῶν, καὶ ἐν μόνοις ὑπάρχει τούτοις ἀλλοίωσις ὅσα καθ' αὐτὰ λέγεται πάσχειν ὑπὸ τῶν αἰσθητῶν, ἐκ τῶνδε θεωρητέον. τῶν γὰρ ἄλλων μάλιστ' ἂν τις ὑπολάβοι ἐν τε τοῖς σχήμασι καὶ ταῖς μορφαῖς καὶ ἐν ταῖς ἕξεσι καὶ ταῖς τούτων λήψεσι καὶ ἀποβολαῖς ἀλλοίωσιν ὑπάρχειν· ἐν οὐδετέροις δ' ἔστιν.

τὸ μὲν γὰρ σχηματιζόμενον καὶ ῥυθμιζόμενον ὅταν ἐπιτελεσθῇ, οὐ λέγομεν ἐκεῖνο ἐξ οὗ ἔστιν, οἷον τὸν ἀνδριάντα χαλκὸν ἢ τὴν πυραμίδα κηρὸν ἢ τὴν κλίνην ξύλον, ἀλλὰ παρωνυμιάζοντες τὸ μὲν χαλκοῦν, τὸ δὲ κήρινον, τὸ δὲ ξύλινον. τὸ δὲ πεπονθὸς καὶ ἡλλοιωμένον προσαγορεύομεν· ὑγρὸν γὰρ καὶ θερμὸν καὶ σκληρὸν τὸν χαλκὸν λέγομεν καὶ τὸν κηρόν

(καὶ οὐ μόνον οὕτως, ἀλλὰ καὶ τὸ ὑγρὸν καὶ τὸ θερμὸν χαλκὸν λέγομεν), ὁμωνύμως τῷ πάθει προσαγορεύοντες τὴν (246a.) ὕλην.

ὥστ' εἰ κατὰ μὲν τὸ σχῆμα καὶ τὴν μορφήν οὐ λέγεται τὸ γεγονὸς ἐν ᾧ ἔστι τὸ σχῆμα, κατὰ δὲ τὰ πάθη καὶ τὰς ἀλλοιώσεις λέγεται, φανερόν ὅτι οὐκ ἂν εἶεν αἱ γενέσεις ἀλλοιώσεις.

ἔτι δὲ καὶ εἰπεῖν οὕτως ἄτοπον ἂν δόξειεν, ἡλλοιωῖσθαι τὸν ἄνθρωπον ἢ τὴν οἰκίαν ἢ ἄλλο ὅτιοι τῶν γεγενημένων· ἀλλὰ γίνεσθαι μὲν ἴσως ἕκαστον ἀναγκαῖον ἀλλοιουμένου τινός, οἷον τῆς ὕλης πυκνουμένης ἢ μανουμένης ἢ θερμαινομένης ἢ ψυχομένης, οὐ μέντοι τὰ γιγνόμενά γε ἀλλοιοῦται, οὐδ' ἡ γενέσεις αὐτῶν ἀλλοιώσεις ἔστιν.

ἀλλὰ μὴν οὐδ' αἱ ἕξεις οὐθ' αἱ τοῦ σώματος οὐθ' αἱ τῆς ψυχῆς ἀλλοιώσεις. αἱ μὲν γὰρ ἀρεταὶ αἱ δὲ κακίαι τῶν ἕξεων· οὐκ ἔστι δὲ οὔτε ἡ ἀρετὴ οὔτε ἡ κακία ἀλλοίωσις, ἀλλ' ἡ μὲν ἀρετὴ τελειώσις τις (ὅταν γὰρ λάβῃ τὴν αὐτοῦ ἀρετὴν, τότε λέγεται τέλειον ἕκαστον — τότε γὰρ ἔστι μάλιστα [τὸ] κατὰ φύσιν — ὥσπερ κύκλος τέλειος, ὅταν μάλιστα γένηται κύκλος καὶ ὅταν βέλτιστος), ἡ δὲ κακία φθορὰ τούτου καὶ ἕκστασις· ὥσπερ οὖν οὐδὲ τὸ τῆς οἰκίας τελείωμα λέγομεν ἀλλοίωσιν (ἄτοπον γὰρ εἰ ὁ θριγκὸς καὶ ὁ κέραμος ἀλλοίωσις, ἢ εἰ θριγκουμένη καὶ κεραμουμένη ἀλλοιοῦται ἀλλὰ μὴ τελειοῦται ἢ οἰκία), τὸν αὐτὸν τρόπον καὶ ἐπὶ τῶν ἀρε(246b.) τῶν καὶ τῶν κακιῶν καὶ τῶν ἐχόντων ἢ λαμβανόντων· αἱ μὲν γὰρ τελειώσεις

αἱ δὲ ἐκστάσεις εἰσὶν, ὥστ' οὐκ ἀλλοιώσεις. ἔτι δὲ καὶ φαμεν ἀπάσας εἶναι τὰς ἀρετὰς ἐν τῷ πρὸς τι πῶς ἔχειν. τὰς μὲν γὰρ τοῦ σώματος, οἷον ὑγίειαν καὶ εὐεξίαν, ἐν κράσει καὶ συμμετρίᾳ θερμῶν καὶ ψυχρῶν τίθεμεν, ἢ αὐτῶν πρὸς αὐτὰ τῶν ἐντὸς ἢ πρὸς τὸ περιέχον· ὁμοίως δὲ καὶ τὸ κάλλος καὶ τὴν ἰσχὺν καὶ τὰς ἄλλας ἀρετὰς καὶ κακίας. ἐκάστη γὰρ ἐστὶ τῷ πρὸς τι πῶς ἔχειν, καὶ περὶ τὰ οἰκεῖα πάθη εὖ ἢ κακῶς διατίθῃσι τὸ ἔχον· οἰκεῖα δ' ὑφ' ὧν γίνεσθαι καὶ φθείρεσθαι πέφυκεν. ἐπεὶ οὖν τὰ πρὸς τι οὔτε αὐτὰ ἐστὶν ἀλλοιώσεις, οὔτε ἔστιν αὐτῶν ἀλλοιώσεις οὐδὲ γένεσις οὐδ' ὅλως μεταβολὴ οὐδεμία, φανερόν ὅτι οὐθ' αἱ ἕξεις οὐθ' αἱ τῶν ἕξεων ἀποβολαὶ καὶ λήψεις ἀλλοιώσεις εἰσὶν, ἀλλὰ γίνεσθαι μὲν ἴσως αὐτὰς καὶ φθείρεσθαι ἀλλοιουμένων τινῶν ἀνάγκη, καθάπερ καὶ τὸ εἶδος καὶ τὴν μορφήν, οἷον θερμῶν καὶ ψυχρῶν ἢ ξηρῶν καὶ ὑγρῶν, ἢ ἐν οἷς τυγχάνουσιν οὔσαι πρῶτοις. περὶ ταῦτα γὰρ ἐκάστη λέγεται κακία καὶ ἀρετὴ, ὑφ' ὧν ἀλλοιοῦσθαι πέφυκε τὸ ἔχον· ἡ μὲν γὰρ ἀρετὴ ποιεῖ ἢ ἀπαθὲς ἢ ὠδὶ παθητικόν, ἡ δὲ κακία παθητικὸν ἢ ἐναντίως ἀπαθές.

ὁμοίως (247a.) δὲ καὶ ἐπὶ τῶν τῆς ψυχῆς ἕξεων· ἅπασαι γὰρ καὶ αὐταὶ τῷ πρὸς τι πῶς ἔχειν, καὶ αἱ μὲν ἀρεταὶ τελειώσεις, αἱ δὲ κακίαι ἐκστάσεις. ἔτι δὲ ἡ μὲν ἀρετὴ εὖ διατίθῃσι πρὸς τὰ οἰκεῖα πάθη, ἡ δὲ κακία κακῶς. ὥστ' οὐδ' αὐταὶ ἔσονται ἀλλοιώσεις· οὐδὲ δὴ αἱ ἀποβολαὶ καὶ αἱ λήψεις αὐτῶν. γίνεσθαι δ' αὐτὰς ἀναγκαῖον ἀλλοιουμένου τοῦ αἰσθητικοῦ μέρους. ἀλλοιωθήσεται δ' ὑπὸ τῶν αἰσθητῶν· ἅπασα γὰρ ἡ ἠθικὴ ἀρετὴ περὶ ἡδονὰς καὶ λύπας τὰς σωματικὰς, αὐταὶ δὲ ἢ ἐν τῷ πράττειν ἢ ἐν τῷ μεμνησθαι ἢ ἐν τῷ ἐλπίζειν. αἱ μὲν οὖν ἐν τῇ πράξει κατὰ τὴν αἴσθησίν εἰσιν, ὥσθ' ὑπ' αἰσθητοῦ τινὸς κινεῖσθαι, αἱ δ' ἐν τῇ μνήμῃ καὶ ἐν τῇ ἐλπίδι ἀπὸ ταύτης εἰσὶν· ἢ γὰρ οἷα ἔπαθον μεμνημένοι ἡδονταὶ, ἢ ἐλπίζοντες οἷα μέλλουσιν. ὥστ' ἀνάγκη πᾶσαν τὴν τοιαύτην ἡδονὴν ὑπὸ τῶν αἰσθητῶν γίνεσθαι. ἐπεὶ δ' ἡδονῆς καὶ λύπης ἐγγιγνομένης καὶ ἡ κακία καὶ ἡ ἀρετὴ ἐγγίγνεται (περὶ ταύτας γὰρ εἰσιν), αἱ δ' ἡδοναὶ καὶ αἱ λύπαι ἀλλοιώσεις τοῦ αἰσθητικοῦ, φανερόν ὅτι ἀλλοιουμένου τινὸς ἀνάγκη καὶ ταύτας ἀποβάλλειν καὶ λαμβάνειν. ὥσθ' ἡ μὲν γένεσις αὐτῶν μετ' ἀλλοιώσεως, αὐταὶ δ' οὐκ εἰσὶν ἀλλοιώσεις.

(247b.) ἀλλὰ μὴν οὐδ' αἱ τοῦ νοητικοῦ μέρους ἕξεις ἀλλοιώσεις, οὐδ' ἔστιν αὐτῶν γένεσις. πολὺ γὰρ μάλιστα τὸ ἐπιστῆμον ἐν τῷ πρὸς τι πῶς ἔχειν λέγομεν. ἔτι δὲ καὶ φανερόν ὅτι οὐκ ἔστιν αὐτῶν

γένεσις· τὸ γὰρ κατὰ δύναμιν ἐπιστήμον οὐδὲν αὐτὸ κινηθὲν ἀλλὰ τῷ ἄλλο ὑπάρξαι γίγνεται ἐπιστήμον. ὅταν γὰρ γένηται τὸ κατὰ μέρος, ἐπίσταται πῶς τὰ καθόλου τῷ ἐν μέρει. πάλιν δὲ τῆς χρήσεως καὶ τῆς ἐνεργείας οὐκ ἔστι γένεσις, εἰ μὴ τις καὶ τῆς ἀναβλέψεως καὶ τῆς ἀφῆς οἶεται γένεσιν εἶναι· τὸ γὰρ χρῆσθαι καὶ τὸ ἐνεργεῖν ὁμοιον τούτοις. ἡ δ' ἐξ ἀρχῆς λήψις τῆς ἐπιστήμης γένεσις οὐκ ἔστιν οὐδ' ἀλλοίωσις· τῷ γὰρ ἡρεμῆσαι καὶ στῆναι τὴν διάνοιαν ἐπίστασθαι καὶ φρονεῖν λεγόμεθα, εἰς δὲ τὸ ἡρεμεῖν οὐκ ἔστι γένεσις· ὅλως γὰρ οὐδεμιᾶς μεταβολῆς, καθάπερ εἴρηται πρότερον. ἔτι δ' ὥσπερ ὅταν ἐκ τοῦ μεθύειν ἢ καθεύδειν ἢ νοσεῖν εἰς τάναντία μεταστῇ τις, οὐ φαινομεν ἐπιστήμονα γεγονέναι πάλιν (καίτοι ἀδύνατος ἦν τῇ ἐπιστήμῃ χρῆσθαι πρότερον), οὕτως οὐδ' ὅταν ἐξ ἀρχῆς λαμβάνῃ τὴν ἕξιν· τῷ γὰρ καθίστασθαι τὴν ψυχὴν ἐκ τῆς φυσικῆς ταραχῆς φρόνιμόν τι γίγνεται καὶ ἐπιστήμον. διὸ καὶ τὰ παῖδιά οὔτε μαθάνειν δύνανται οὔτε κατὰ τὰς αἰσθήσεις (248a.) ὁμοίως κρίνειν τοῖς πρεσβυτέροις· πολλὴ γὰρ ἡ ταραχὴ καὶ ἡ κίνησις. καθίσταται δὲ καὶ ἡρεμίζεται πρὸς ἓνα μὲν ὑπὸ τῆς φύσεως αὐτῆς, πρὸς ἓνα δ' ὑπ' ἄλλων, ἐν ἀμφοτέροις δὲ ἀλλοιουμένων τινῶν τῶν ἐν τῷ σώματι, καθάπερ ἐπὶ τῆς χρήσεως καὶ τῆς ἐνεργείας, ὅταν νήφων γένηται καὶ ἐγερθῇ. φανερόν οὖν ἐκ τῶν εἰρημένων ὅτι τὸ ἀλλοιοῦσθαι καὶ ἡ ἀλλοίωσις ἐν τε τοῖς αἰσθητοῖς γίγνεται καὶ ἐν τῷ αἰσθητικῷ μορίῳ τῆς ψυχῆς, ἐν ἄλλῳ δ' οὐδενὶ πλὴν κατὰ συμβεβηκός.

Κεφάλαιο 4

Απορήσειε δ' ἂν τις πότερόν ἐστι κίνησις πᾶσα πάσῃ συμβλητῇ ἢ οὐ. εἰ δὴ ἐστὶν πᾶσα συμβλητῇ, καὶ ὁμοταχὲς τὸ ἐν ἴσῳ χρόνῳ ἴσον κινούμενον, ἔσται περιφερὴς τις ἴση εὐθείᾳ, καὶ μείζων δὴ καὶ ἐλάττων. ἔτι ἀλλοιώσις καὶ φορὰ τις ἴση, ὅταν ἐν ἴσῳ χρόνῳ τὸ μὲν ἀλλοιωθῇ τὸ δ' ἐνεχθῇ. ἔσται ἄρα ἴσον πάθος μήκει. ἀλλ' ἀδύνατον. ἀλλ' ἄρα ὅταν ἐν ἴσῳ ἴσον κινήθῃ, τότε ἰσοταχὲς, ἴσον δ' οὐκ ἔστιν πάθος μήκει, ὥστε οὐκ ἔστιν ἀλλοιώσις φορᾷ ἴση οὐδ' ἐλάττων, ὥστ' οὐ πᾶσα συμβλητῇ;

ἐπὶ δὲ τοῦ κύκλου καὶ τῆς εὐθείας πῶς συμβήσεται; ἄτοπόν τε γὰρ εἰ μὴ ἔστιν κύκλῳ ὁμοίως τουτὶ κινεῖσθαι καὶ τουτὶ ἐπὶ τῆς εὐθείας, ἀλλ' εὐθὺς ἀνάγκη ἢ θᾶττον ἢ βραδύτερον, ὥσπερ ἂν εἰ κάταντες, τὸ δ' ἄναντες· οὐδὲ διαφέρει οὐδὲν τῷ λόγῳ, εἴ τίς φησιν ἀνάγκην εἶναι θᾶττον εὐθὺς ἢ βραδύτερον κινεῖσθαι· ἔσται γὰρ μείζων καὶ ἐλάττων ἢ περιφερὴς τῆς εὐθείας, ὥστε καὶ ἴση. εἰ γὰρ ἐν τῷ Α χρόνῳ (248b.) τὴν Β διελήλυθε τὸ δὲ τὴν Γ, μείζων ἂν εἴη ἢ Β τῆς Γ· οὕτω γὰρ τὸ θᾶττον ἐλέγετο. οὐκοῦν καὶ εἰ ἐν ἐλάττονι ἴσον, θᾶττον· ὥστ' ἔσται τι μέρος τοῦ Α ἐν ᾧ τὸ Β τοῦ κύκλου τὸ ἴσον δεισι καὶ τὸ Γ ἐν ὅλῳ τῷ Α [τὴν Γ]. ἀλλὰ μὴν εἰ ἔστιν συμβλητά, συμβαίνει τὸ ἄρτι ῥηθέν, ἴσην εὐθεῖαν εἶναι κύκλῳ. ἀλλ' οὐ συμβλητά· οὐδ' ἄρα αἱ κινήσεις, ἀλλ' ὅσα μὴ συνώνυμα, πάντ' ἀσύμβλητα.

οἷον διὰ τί οὐ συμβλητὸν πότερον ὀξύτερον τὸ γραφεῖον ἢ ὁ οἶνος ἢ ἡ νῆτη; ὅτι ὁμώνυμα, οὐ συμβλητά· ἀλλ' ἡ νῆτη τῇ παρανήτῃ συμβλητῇ, ὅτι τὸ αὐτὸ σημαίνει τὸ ὀξὺ ἐπ' ἀμφοῖν. ἄρ' οὖν οὐ ταυτὸν τὸ ταχὺ ἐνταῦθα ἀκαεῖ, πολὺ δ' ἔτι ἥττον ἐν ἀλλοιώσει καὶ φορᾷ;

ἢ πρῶτον μὲν τοῦτο οὐκ ἀληθές, ὥς εἰ μὴ ὁμώνυμα συμβλητά; τὸ γὰρ πολὺ τὸ αὐτὸ σημαίνει ἐν ὕδατι καὶ ἀέρι, καὶ οὐ συμβλητά. εἰ δὲ μή, τό γε διπλάσιον ταυτό (δύο γὰρ πρὸς ἓν), καὶ οὐ συμβλητά. ἢ καὶ ἐπὶ τούτων ὁ αὐτὸς λόγος; καὶ γὰρ τὸ πολὺ ὁμώνυμον. ἀλλ' ἐνίων καὶ οἱ λόγοι ὁμώνυμοι, οἷον εἰ λέγοι τις ὅτι τὸ πολὺ τὸ τοσοῦτον καὶ ἔτι, ἄλλο τὸ τοσοῦτον· καὶ τὸ ἴσον ὁμώνυμον, καὶ τὸ ἐν δέ, εἰ ἔτυχεν, εὐθὺς ὁμώνυμον. εἰ δὲ τοῦτο, καὶ τὰ δύο, ἐπεὶ διὰ τί τὰ μὲν συμβλητὰ τὰ δ' οὐ, εἴπερ ἦν μία φύσις; ἢ ὅτι ἐν ἄλλῳ πρώτῳ δεκτικῷ; ὁ μὲν οὖν ἵππος καὶ ὁ κύων συμβλητά, πότερον λευκότερον

(ἐν ᾧ γὰρ πρώτῳ, τὸ αὐτό, ἡ ἐπιφάνεια), καὶ κατὰ μέγεθος ὡσαύτως· ὕδωρ δὲ καὶ φωνὴ οὐ· ἐν ἄλλῳ γάρ. ἡ δὴλον ὅτι ἔσται οὕτω γε πάντα ἐν ποιεῖν, ἐν ἄλλῳ (249a.) δὲ ἕκαστον φάσκειν εἶναι, καὶ ἔσται ταὐτὸ <τὸ> ἴσον καὶ γλυκὺ καὶ λευκόν, ἀλλ' ἄλλο ἐν ἄλλῳ; ἔτι δεκτικὸν οὐ τὸ τυχόν <τοῦ τυχόντος> ἐστίν, ἀλλ' ἐν ἐνὸς τὸ πρώτων.

ἀλλ' ἄρα οὐ μόνον δεῖ τὰ συμβλητὰ μὴ ὁμώνυμα εἶναι ἀλλὰ καὶ μὴ ἔχειν διαφοράν, μήτε ὁ μήτε ἐν ᾧ; λέγω δὲ οἷον χρῶμα ἔχει διαίρεσιν· τοιγαροῦν οὐ συμβλητὸν κατὰ τοῦτο (οἷον πότερον κεχρωμάτισται μᾶλλον, μὴ κατὰ τὶ χρῶμα, ἀλλ' ἢ χρῶμα), ἀλλὰ κατὰ τὸ λευκόν.

οὕτω καὶ περὶ κίνησιν ὁμοταχὲς τῷ ἐν ἴσῳ χρόνῳ κινεῖσθαι ἴσον τοσονδί· εἰ δὴ τοῦ μήκους ἐν τῷδὶ τὸ μὲν ἡλλοιώθη τὸ δ' ἠνέχθη, ἴση ἄρα αὕτη ἡ ἀλλοίωσις καὶ ὁμοταχὴς τῇ φορᾷ; ἀλλ' ἄτοπον. αἴτιον δ' ὅτι ἡ κίνησις ἔχει εἶδη, ὥστ' εἰ τὰ ἐν ἴσῳ χρόνῳ ἐνεχθέντα ἴσον μῆκος ἰσοταχῇ ἔσται, ἴση ἡ εὐθεῖα καὶ ἡ περιφερής. πότερον οὖν αἴτιον, ὅτι ἡ φορὰ γένος ἢ ὅτι ἡ γραμμὴ γένος; ὁ μὲν γὰρ χρόνος ὁ αὐτός, ἂν δὲ τῷ εἶδει ἢ ἄλλα, καὶ ἐκεῖνα εἶδει διαφέρει. καὶ γὰρ ἡ φορὰ εἶδη ἔχει, ἂν ἐκεῖνο ἔχη εἶδη ἐφ' οὗ κινεῖται (ὅτε δὲ ἐὰν ᾧ, οἷον εἰ πόδες, βᾶδισις, εἰ δὲ πτέρυγες, πτῆσις. ἢ οὐ, ἀλλὰ τοῖς σχήμασιν ἢ φορὰ ἄλλῃ;). ὥστε τὰ ἐν ἴσῳ ταὐτὸ μέγεθος κινούμενα ἰσοταχῇ, τὸ αὐτὸ δὲ καὶ ἀδιάφορον εἶδει καὶ κινήσει ἀδιάφορον· ὥστε τοῦτο σκεπτέον, τίς διαφορὰ κινήσεως. καὶ σημαίνει ὁ λόγος οὗτος ὅτι τὸ γένος οὐχ ἓν τι, ἀλλὰ παρὰ τοῦτο λανθάνει πολλά, εἰσὶν τε τῶν ὁμωνυμιῶν αἱ μὲν πολὺ ἀπέχουσαι, αἱ δὲ ἔχουσαι τινα ὁμοιότητα, αἱ δ' ἐγγὺς ἡ γένει ἢ ἀναλογίᾳ, διὸ οὐ δοκοῦσιν ὁμωνυμία εἶναι οὐσαι.

πότε οὖν ἕτερον τὸ εἶδος, ἐὰν ταὐτὸ ἐν ἄλλῳ, ἢ ἂν ἄλλο ἐν ἄλλῳ; καὶ τίς ὁρος; ἢ τῷ κρινοῦμεν ὅτι ταὐτὸν τὸ λευκὸν καὶ τὸ γλυκὺ ἢ ἄλλο — ὅτι ἐν ἄλλῳ φαίνεται ἕτερον, ἢ ὅτι ὅλως οὐ ταὐτό; περὶ δὲ δὴ ἡλλοιώσεως, πῶς ἔσται ἰσοταχὴς ἐτέρα ἐτέρα; εἰ δὴ ἔστι τὸ ὑγιαζεσθαι ἡλλοιοῦσθαι, ἔστι τὸν μὲν ταχὺ τὸν δὲ βραδέως ἰαθῆναι, καὶ ἅμα τινάς, ὥστ' (249b.) ἔσται ἡλλοίωσις ἰσοταχὴς· ἐν ἴσῳ γὰρ χρόνῳ ἡλλοιώθη. ἀλλὰ τί ἡλλοιώθη; τὸ γὰρ ἴσον οὐκ ἔστιν ἐνταῦθα λεγόμενον, ἀλλ' ὥς ἐν τῷ ποσῷ ἰσότης, ἐνταῦθα ὁμοιότης. ἀλλ' ἔστω ἰσοταχὲς τὸ ἐν ἴσῳ χρόνῳ τὸ αὐτὸ μεταβάλλον. πότερον οὖν ἐν ᾧ τὸ πάθος ἢ τὸ πάθος δεῖ συμβάλλειν; ἐνταῦθα μὲν δὴ ὅτι ὑγεία ἢ αὐτῇ, ἔστιν λαβεῖν ὅτι οὕτε μᾶλλον οὕτε ἥττον ἀλλ' ὁμοίως ὑπάρχει. ἐὰν δὲ τὸ πάθος ἄλλο ἢ, οἷον ἡλλοιοῦται τὸ λευκαινόμενον καὶ τὸ

ὕγιαζόμενον, τούτοις οὐδὲν τὸ αὐτὸ οὐδ' ἴσον οὐδ' ὅμοιον, ἢ ἤδη ταῦτα εἶδη ποιεῖ ἀλλοιώσεως, καὶ οὐκ ἔστι μία ὥσπερ οὐδ' αἱ φοραί. ὥστε ληπτέον πόσα εἶδη ἀλλοιώσεως καὶ πόσα φορᾶς. εἰ μὲν οὖν τὰ κινούμενα εἶδει διαφέρει, ὧν εἰσὶν αἱ κινήσεις καθ' αὐτὰ καὶ μὴ κατὰ συμβεβηκός, καὶ αἱ κινήσεις εἶδει διοίσουσιν· εἰ δὲ γένει, γένει, εἰ δ' ἀριθμῷ, ἀριθμῷ. ἀλλὰ δὴ πότερον εἰς τὸ πάθος δεῖ βλέψαι, ἐὰν ἢ τὸ αὐτὸ ἢ ὅμοιον, εἰ ἰσοταχεῖς αἱ ἀλλοιώσεις, ἢ εἰς τὸ ἀλλοιούμενον, οἷον εἰ τοῦ μὲν τοσονδὶ λελεύκονται τοῦ δὲ τοσονδί; ἢ εἰς ἄμφω, καὶ ἢ αὐτὴ μὲν ἢ ἄλλη τῷ πάθει, εἰ τὸ αὐτὸ <ἢ μὴ τὸ> αὐτό, ἴση δ' ἢ ἄνισος, εἰ ἐκεῖνο <ἴσον ἢ> ἄνισον;

καὶ ἐπὶ γενέσεως δὲ καὶ φθορᾶς τὸ αὐτὸ σκεπτέον. πῶς ἰσοταχὴς ἡ γένεσις; εἰ ἐν ἴσῳ χρόνῳ τὸ αὐτὸ καὶ ἄτομον, οἷον ἄνθρωπος ἀλλὰ μὴ ζῶον· θάπτων δ', εἰ ἐν ἴσῳ ἕτερον (οὐ γὰρ ἔχονεν τινα δύο ἐν οἷς ἡ ἐτερότης ὡς ἡ ἀνομοιότης), ἢ, εἰ ἔστιν ἀριθμὸς ἡ οὐσία, πλείων καὶ ἐλάττων ἀριθμὸς ὁμοειδής· ἀλλ' ἀνώνυμον τὸ κοινόν, καὶ τὸ ἐκάτερον [ποιόν· τὸ μὲν ποιόν,] ὥσπερ τὸ πλεῖον πάθος ἢ τὸ ὑπερέχον μᾶλλον, τὸ δὲ ποσὸν μεῖζον.

Κεφάλαιο 5

Ἐπεὶ δὲ τὸ κινεῖν κινεῖ τι αἰεὶ καὶ ἔν τινι καὶ μέχρι τοῦ (λέγω δὲ τὸ μὲν ἔν τινι, ὅτι ἐν χρόνῳ, τὸ δὲ μέχρι τοῦ, ὅτι ποσὸν τι μήκος· αἰεὶ γὰρ ἅμα κινεῖ καὶ κεκίνηκεν, ὥστε ποσὸν τι ἔσται ὃ ἐκινήθη, καὶ ἐν ποσῷ), εἰ δὴ τὸ μὲν Α τὸ κινεῖν, τὸ δὲ Β τὸ κινούμενον, ὅσον δὲ κεκίνηται μη(250a.) κος τὸ Γ, ἐν ὅσῳ δέ, ὁ χρόνος, ἐφ' οὗ τὸ Δ, ἐν δὴ τῷ ἴσῳ χρόνῳ ἢ ἴση δύναμις ἢ ἐφ' οὗ τὸ Α τὸ ἥμισυ τοῦ Β διπλασίαν τῆς Γ κινήσει, τὴν δὲ τὸ Γ ἐν τῷ ἡμίσει τοῦ Δ· οὕτω γὰρ ἀνάλογον ἔσται. καὶ εἰ ἡ αὐτὴ δύναμις τὸ αὐτὸ ἐν τῷδὶ τῷ χρόνῳ τοσήνδε κινεῖ καὶ τὴν ἡμίσειαν ἐν τῷ ἡμίσει, καὶ ἡ ἡμίσεια ἰσχύς τὸ ἥμισυ κινήσει ἐν τῷ ἴσῳ χρόνῳ τὸ ἴσον. οἷον τῆς Α δυνάμεως ἔστω ἡμίσεια ἢ τὸ Ε καὶ τοῦ Β τὸ Ζ ἥμισυ· ὁμοίως δὴ ἔχουσι καὶ ἀνάλογον ἢ ἰσχύς πρὸς τὸ βάρος, ὥστε ἴσον ἐν ἴσῳ χρόνῳ κινήσουσιν. καὶ εἰ τὸ Ε τὸ Ζ κινεῖ ἐν τῷ Δ τὴν Γ, οὐκ ἀνάγκη ἐν τῷ ἴσῳ χρόνῳ τὸ ἐφ' οὗ Ε τὸ διπλάσιον τοῦ Ζ κινεῖν τὴν ἡμίσειαν τῆς Γ· εἰ δὴ τὸ Α τὴν τὸ Β κινεῖ ἐν τῷ Δ ὅσην ἢ τὸ Γ, τὸ ἥμισυ τοῦ Α τὸ ἐφ' ὃ Ε τὴν τὸ Β οὐ κινήσει ἐν τῷ χρόνῳ ἐφ' ὃ τὸ Δ οὐδ' ἔν τινι τοῦ Δ τι τῆς Γ ἀνάλογον πρὸς τὴν ὅλην τὴν Γ ὡς τὸ Α πρὸς τὸ Ε· ὅλως γὰρ εἰ ἔτυχεν οὐ κινήσει οὐδέν· οὐ γὰρ εἰ ἡ ὅλη ἰσχύς τοσήνδε ἐκίνησεν, ἢ ἡμίσεια οὐ κινήσει οὔτε ποσὴν οὔτ' ἐν ὀποσσοῦν· εἷς γὰρ ἂν κινοίη τὸ πλοῖον, εἴπερ ἢ τε τῶν νεωλκῶν τέμνεται ἰσχύς εἰς τὸν ἀριθμὸν καὶ τὸ μήκος ὃ πάντες ἐκίνησαν. διὰ τοῦτο ὁ Ζήνωνος λόγος οὐκ ἀληθής, ὡς ψοφεῖ τῆς κέγχρου ὅτιοῦν μέρος· οὐδὲν γὰρ κωλύει μὴ κινεῖν τὸν ἀέρα ἐν μηδενὶ χρόνῳ τοῦτον ὃν ἐκίνησεν πεσὼν ὁ ὅλος μέδιμνος. οὐδὲ δὴ τοσοῦτον μόριον, ὅσον ἂν κινήσειεν τοῦ ὅλου εἰ εἴη καθ' αὐτὸ τοῦτο, οὐ κινεῖ. οὐδὲ γὰρ οὐδὲν ἔστιν ἀλλ' ἢ δυνάμει ἐν τῷ ὅλῳ.

εἰ δὲ τὰ <κινεῖν> δύο, καὶ ἐκάτερον τῶνδε ἐκάτερον κινεῖ τὸ τοσόνδε ἐν τοσῷδε, καὶ συντιθέμεναι αἱ δυνάμεις τὸ σύνθετον ἐκ τῶν βαρῶν τὸ ἴσον κινήσουσιν μήκος καὶ ἐν ἴσῳ χρόνῳ· ἀνάλογον γάρ.

ἄρ' οὖν οὕτω καὶ ἐπ' ἀλλοιώσεως καὶ ἐπ' αὐξήσεως; τί μὲν γὰρ τὸ αὐξόν, τί δὲ τὸ αὐξανόμενον, ἐν ποσῷ δὲ χρόνῳ καὶ ποσὸν τὸ μὲν αὐξει τὸ δὲ αὐξάνεται. καὶ τὸ ἀλλοιοῦν καὶ τὸ ἀλλοιούμενον ὡσαύτως — τί καὶ ποσὸν (250b.) κατὰ τὸ μᾶλλον καὶ ἥττον ἡλλοίωται, καὶ ἐν ποσῷ χρόνῳ, ἐν διπλασίῳ διπλάσιον, καὶ τὸ

διπλάσιον ἐν διπλασίῳ· τὸ δ' ἥμισυ ἐν ἡμίσει χρόνῳ (ἢ ἐν ἡμίσει ἡμισυ), ἢ ἐν ἴσῳ διπλάσιον.

εἰ δὲ τὸ ἀλλοιοῦν ἢ αὖξον τὸ τοσόνδε ἐν τῷ τοσῷδε αὖξει ἢ ἀλλοιοῖ, οὐκ ἀνάγκη καὶ τὸ ἥμισυ ἐν ἡμίσει καὶ ἐν ἡμίσει ἥμισυ, ἀλλ' οὐδέν, εἰ ἔτυχεν, ἀλλοιώσει ἢ αὖξήσει, ὥσπερ καὶ ἐπὶ τοῦ βάρους.

Κεφάλαιο 1

Πότερον γέγονέ ποτε κίνησις οὐκ οὔσα πρότερον, καὶ φθείρεται πάλιν οὕτως ὥστε κινεῖσθαι μηδέν, ἢ οὔτ' ἐγένετο οὔτε φθείρεται, ἀλλ' αἰεὶ ἦν καὶ αἰεὶ ἔσται, καὶ τοῦτ' ἀθάνατον καὶ ἄπαυστον ὑπάρχει τοῖς οὔσιν, οἷον ζωὴ τις οὔσα τοῖς φύσει συνεστῶσι πᾶσιν;

εἶναι μὲν οὖν κίνησιν πάντες φασὶν οἱ περὶ φύσεώς τι λέγοντες διὰ τὸ κοσμοποιεῖν καὶ περὶ γενέσεως καὶ φθορᾶς εἶναι τὴν θεωρίαν πᾶσαν αὐτοῖς, ἣν ἀδύνατον ὑπάρχειν μὴ κινήσεως οὔσης· ἀλλ' ὅσοι μὲν ἀπείρους τε κόσμους εἶναι φασιν, καὶ τοὺς μὲν γίγνεσθαι τοὺς δὲ φθεῖρεσθαι τῶν κόσμων, αἰεὶ φασιν εἶναι κίνησιν (ἀναγκαῖον γὰρ τὰς γενέσεις καὶ τὰς φθορὰς εἶναι μετὰ κινήσεως αὐτῶν)· ὅσοι δ' ἓνα <ἢ αἰεὶ> ἢ μὴ αἰεὶ, καὶ περὶ τῆς κινήσεως ὑποτίθενται κατὰ λόγον. εἰ δὴ ἐνδέχεται ποτε μηδέν κινεῖσθαι, διχῶς ἀνάγκη τοῦτο συμβαίνειν· ἢ γὰρ ὡς Ἀναξαγόρας λέγει (φησὶν γὰρ ἐκεῖνος, ὁμοῦ πάντων ὄντων καὶ ἡρεμούντων τὸν ἄπειρον χρόνον, κίνησιν ἐμποιεῖσαι τὸν νοῦν καὶ διακρίναι), ἢ ὡς Ἐμπεδοκλῆς ἐν μέρει κινεῖσθαι καὶ πάλιν ἡρεμεῖν, κινεῖσθαι μὲν ὅταν ἡ φιλία ἐκ πολλῶν ποιῇ τὸ ἐν ἢ τὸ νεῖκος πολλὰ ἐξ ἑνός, ἡρεμεῖν δ' ἐν τοῖς μεταξὺ χρόνοις, λέγων οὕτως ἢ μὲν ἐν ἐκ πλεόνων μεμάθηκε φύεσθαι, ἢ δὲ πάλιν διαφύντος ἑνός πλεόν' ἐκτελέθουσιν, (251a.) τῇ μὲν γίνονται τε καὶ οὐ σφισιν ἔμπεδος αἰών· ἢ δὲ τάδ' ἀλλάσσοντα διαμπερὲς οὐδαμὰ λήγει, ταύτη δ' αἰὲν ἔασιν ἀκίνητοι κατὰ κύκλον. τὸ γὰρ “ἢ δὲ τάδ' ἀλλάσσοντα” ἐνθένδε ἐκεῖσε λέγειν αὐτὸν ὑποληπτέον. σκεπτέον δὲ περὶ τούτων πῶς ἔχει·

πρὸ ἔργου γὰρ οὐ μόνον πρὸς τὴν περὶ φύσεως θεωρίαν ἰδεῖν τὴν ἀλήθειαν, ἀλλὰ καὶ πρὸς τὴν μέθοδον τὴν περὶ τῆς ἀρχῆς τῆς πρώτης. ἀρξώμεθα δὲ πρῶτον ἐκ τῶν διωρισμένων ἡμῖν ἐν τοῖς φυσικοῖς πρότερον. φαμὲν δὴ τὴν κίνησιν εἶναι ἐνέργειαν τοῦ κινητοῦ ἢ κινητόν. ἀναγκαῖον ἄρα ὑπάρχειν τὰ πράγματα τὰ δυνάμενα κινεῖσθαι καθ' ἐκάστην κίνησιν. καὶ χωρὶς δὲ τοῦ τῆς κινήσεως ὀρισμοῦ, πᾶς ἂν ὁμολογήσειεν ἀναγκαῖον εἶναι κινεῖσθαι τὸ δυνατόν κινεῖσθαι καθ' ἐκάστην κίνησιν, οἷον ἀλλοιοῦσθαι μὲν τὸ ἀλλοιωτόν, φέρεσθαι δὲ τὸ κατὰ τόπον μεταβλητόν, ὥστε δεῖ πρότερον καυστὸν εἶναι πρὶν κάεσθαι καὶ καυστικὸν πρὶν κάειν. οὐκοῦν καὶ ταῦτα ἀναγκαῖον ἢ γενέσθαι ποτὲ οὐκ ὄντα ἢ αἰδία εἶναι. εἰ μὲν τοίνυν ἐγένετο τῶν κινητῶν ἕκαστον, ἀναγκαῖον πρότερον τῆς

ληφθείσης ἄλλην γενέσθαι μεταβολὴν καὶ κίνησιν, καθ' ἣν ἐγένετο τὸ δυνατὸν κινηθῆναι ἢ κινηθῆναι· εἰ δ' ὄντα προϋπῆρχεν αἰετὶ κινήσεως μὴ οὐσίας, ἄλογον μὲν φαίνεται καὶ αὐτόθεν ἐπιστήσασιν, οὐ μὴν ἀλλὰ μᾶλλον ἐτι προάγουσι τοῦτο συμβαίνειν ἀναγκαῖον. εἰ γὰρ τῶν μὲν κινητῶν ὄντων τῶν δὲ κινητικῶν ὅτε μὲν ἔσται τι πρῶτον κινουῦν, τὸ δὲ κινούμενον, ὅτε δ' οὐθέν, ἀλλ' ἡρεμεῖ, ἀναγκαῖον τοῦτο μεταβάλῃ λειν πρότερον· ἦν γὰρ τι αἴτιον τῆς ἡρεμίας· ἡ γὰρ ἡρέμησις στέρησις κινήσεως. ὥστε πρὸ τῆς πρώτης μεταβολῆς ἔσται μεταβολὴ προτέρα. τὰ μὲν γὰρ κινεῖ μοναχῶς, τὰ δὲ καὶ τὰς ἐναντίας κινήσεις, οἷον τὸ μὲν πῦρ θερμαίνει, ψύχει δ' οὐ, ἡ δ' ἐπιστήμη δοκεῖ τῶν ἐναντίων εἶναι μία. φαίνεται μὲν οὖν κακεῖ τι εἶναι ὁμοιότροπον· τὸ γὰρ ψυχρὸν θερμαίνει στραφέν πως καὶ ἀπελθόν, ὥσπερ καὶ ἁμαρτάνει ἐκὼν ὁ ἐπιστήμων, ὅταν ἀνάπαλιν χρήσεται τῇ ἐπι(251b.) στήμῃ. ἀλλ' οὖν ὅσα γε δυνατὰ ποιεῖν καὶ πάσχειν ἢ κινεῖν, τὰ δὲ κινεῖσθαι, οὐ πάντως δυνατὰ ἐστίν, ἀλλ' ὡδὶ ἔχοντα καὶ πλησιάζοντα ἀλλήλοις. ὥσθ' ὅταν πλησιάσῃ, κινεῖ, τὸ δὲ κινεῖται, καὶ ὅταν ὑπάρξῃ ὡς ἦν τὸ μὲν κινητικὸν τὸ δὲ κινητόν. εἰ τοίνυν μὴ αἰετὶ ἐκινεῖτο, δηλὸν ὡς οὐχ οὕτως εἶχον ὡς ἦν δυνάμενα τὸ μὲν κινεῖσθαι τὸ δὲ κινεῖν, ἀλλ' ἔδει μεταβάλλειν θάτερον αὐτῶν· ἀνάγκη γὰρ ἐν τοῖς πρὸς τι τοῦτο συμβαίνειν, οἷον εἰ μὴ ὄν διπλάσιον νῦν διπλάσιον, μεταβάλλειν, εἰ μὴ ἀμφοτέρα, θάτερον. ἔσται ἄρα τις προτέρα μεταβολὴ τῆς πρώτης. πρὸς δὲ τούτοις τὸ πρότερον καὶ ὕστερον πῶς ἔσται χρόνου μὴ ὄντος; ἢ χρόνος μὴ οὐσίας κινήσεως; εἰ δὴ ἐστίν ὁ χρόνος κινήσεως ἀριθμὸς ἢ κινήσις τις, εἴπερ αἰετὶ χρόνος ἔστιν, ἀνάγκη καὶ κίνησιν αἰετὶ εἶναι. ἀλλὰ μὴν περὶ γε χρόνου ἔξω ἐνὸς ὁμοιοητικῶς ἔχοντες φαίνονται πάντες· ἀγέννητον γὰρ εἶναι λέγουσιν. καὶ διὰ τούτου Δημόκριτός γε δείκνυσιν ὡς ἀδύνατον ἅπαντα γεγονέναι· τὸν γὰρ χρόνον ἀγέννητον εἶναι. Πλάτων δὲ γεννᾷ μόνος· ἅμα μὲν γὰρ αὐτὸν τῷ οὐρανῷ [γεγονέναι], τὸν δ' οὐρανὸν γεγονέναι φησίν. εἰ οὖν ἀδύνατόν ἐστιν καὶ εἶναι καὶ νοῆσαι χρόνον ἄνευ τοῦ νῦν, τὸ δὲ νῦν ἐστὶ μεσότης τις, καὶ ἀρχὴν καὶ τελευτὴν ἔχον ἅμα, ἀρχὴν μὲν τοῦ ἐσομένου χρόνου, τελευτὴν δὲ τοῦ παρελθόντος, ἀνάγκη αἰετὶ εἶναι χρόνον. τὸ γὰρ ἔσχατον τοῦ τελευταίου ληφθέντος χρόνου ἐν τινι τῶν νῦν ἔσται (οὐδὲν γὰρ ἔστι λαβεῖν ἐν τῷ χρόνῳ παρὰ τὸ νῦν), ὥστ' ἐπεὶ ἐστὶν ἀρχὴ τε καὶ τελευτὴ τὸ νῦν, ἀνάγκη αὐτοῦ ἐπ' ἀμφοτέρα εἶναι αἰετὶ χρόνον. ἀλλὰ μὴν εἰ γε χρόνον, φανερόν ὅτι ἀνάγκη εἶναι καὶ κίνησιν, εἴπερ ὁ

χρόνος πάθος τι κινήσεως.

ὁ δ' αὐτὸς λόγος καὶ περὶ τοῦ ἄφθαρτον εἶναι τὴν κίνησιν· καθάπερ γὰρ ἐπὶ τοῦ γενέσθαι κίνησιν συνέβαινεν προτέραν εἶναι τινα μεταβολὴν τῆς πρώτης, οὕτως ἐνταῦθα ὑστέρα τῆς τελευταίας· οὐ γὰρ ἅμα παύεται κινούμενον καὶ κινητὸν ὄν, οἷον καιόμενον καὶ καυστὸν ὄν (ἐνδέχεται γὰρ καυστὸν εἶναι μὴ καιόμενον), οὐδὲ (252a.) κινητικὸν καὶ κινοῦν. καὶ τὸ φθαρτικὸν δὴ δεήσει φθαρῆναι ὅταν φθείρη· καὶ τὸ τούτου φθαρτικὸν πάλιν ὕστερον· καὶ γὰρ ἡ φθορὰ μεταβολὴ τίς ἐστιν. εἰ δὴ ταῦτ' ἀδύνατα, δῆλον ὡς ἔστιν ἄδιος κίνησις, ἀλλ' οὐχ ὅτε μὲν ἦν ὅτε δ' οὐ· καὶ γὰρ ἔοικε τὸ οὕτω λέγειν πλάσματι μᾶλλον.

ὁμοίως δὲ καὶ τὸ λέγειν ὅτι πέφυκεν οὕτως καὶ ταύτην δεῖ νομίζειν εἶναι ἀρχὴν, ὅπερ ἔοικεν Ἐμπεδοκλῆς ἂν εἰπεῖν, ὡς τὸ κρατεῖν καὶ κινεῖν ἐν μέρει τὴν φιλίαν καὶ τὸ νεῖκος ὑπάρχει τοῖς πράγμασιν ἐξ ἀνάγκης, ἡρεμεῖν δὲ τὸν μεταξὺ χρόνον. τάχα δὲ καὶ οἱ μίαν ἀρχὴν ποιοῦντες, ὥπερ Ἀναξαγόρας, οὕτως ἂν εἴποιεν. ἀλλὰ μὴν οὐδέν γε ἄτακτον τῶν φύσει καὶ κατὰ φύσιν· ἡ γὰρ φύσις αἰτία πᾶσιν τάξεως. τὸ δ' ἄπειρον πρὸς τὸ ἄπειρον οὐδένα λόγον ἔχει· τάξις δὲ πᾶσα λόγος. τὸ δ' ἄπειρον χρόνον ἡρεμεῖν, εἴτα κινηθῆναι ποτε, τούτου δὲ μηδεμίαν εἶναι διαφοράν, ὅτι νῦν μᾶλλον ἢ πρότερον, μηδ' αὖ τινὰ τάξιν ἔχειν, οὐκέτι φύσεως ἔργον. ἡ γὰρ ἀπλῶς ἔχει τὸ φύσει, καὶ οὐχ ὅτε μὲν οὕτως ὅτε δ' ἄλλως, οἷον τὸ πῦρ ἄνω φύσει φέρεται καὶ οὐχ ὅτε μὲν ὅτε δ' οὐ· ἡ λόγον ἔχει τὸ μὴ ἀπλοῦν. διόπερ βέλτιον ὡς Ἐμπεδοκλῆς, κἂν εἴ τις ἕτερος εἴρηκεν οὕτως ἔχειν, ἐν μέρει τὸ πᾶν ἡρεμεῖν καὶ κινεῖσθαι πάλιν· τάξιν γὰρ ἤδη τιν' ἔχει τὸ τοιοῦτον. ἀλλὰ καὶ τοῦτο δεῖ τὸν λέγοντα μὴ φάναι μόνον, ἀλλὰ καὶ τὴν αἰτίαν αὐτοῦ λέγειν, καὶ μὴ τίθεσθαι μηδὲν μηδ' ἀξιοῦν ἀξίωμ' ἄλογον, ἀλλ' ἡ ἐπαγωγὴν ἢ ἀποδείξιν φέρειν· αὐτὰ μὲν γὰρ οὐκ αἰτία τὰ ὑποτεθέντα, οὐδὲ τοῦτ' ἦν τὸ φιλότητι ἢ νεῖκει εἶναι, ἀλλὰ τῆς μὲν τὸ συνάγειν, τοῦ δὲ τὸ διακρίνειν. εἰ δὲ προσοριεῖται τὸ ἐν μέρει, λεκτέον ἐφ' ὧν οὕτως, ὥπερ ὅτι ἔστιν τι ὃ συνάγει τοὺς ἀνθρώπους, ἡ φιλία, καὶ φεύγουσιν οἱ ἐχθροὶ ἀλλήλους· τοῦτο γὰρ ὑποτίθεται καὶ ἐν τῷ ὄλῳ εἶναι· φαίνεται γὰρ ἐπὶ τινων οὕτως. τὸ δὲ καὶ δι' ἴσων χρόνων δεῖται λόγου τινός. ὅλως δὲ τὸ νομίζειν ἀρχὴν εἶναι ταύτην ἱκανήν, εἴ τι αἰεὶ ἢ ἔστιν οὕτως ἢ γίγνεται, οὐκ ὀρθῶς ἔχει ὑπολαβεῖν, ἐφ' ὃ Δημόκριτος ἀνάγει τὰς περὶ φύσεως αἰτίας, ὡς οὕτω καὶ τὸ πρότερον ἐγίγνετο· τοῦ δὲ αἰε

οὐκ (252b.) ἀξιοῖ ἀρχὴν ζητεῖν, λέγων ἐπὶ τινων ὀρθῶς, ὅτι δ' ἐπὶ πάντων, οὐκ ὀρθῶς. καὶ γὰρ τὸ τρίγωνον ἔχει δυσὶν ὀρθαῖς ἀεὶ τὰς γωνίας ἴσας, ἀλλ' ὅμως ἐστὶν τι τῆς ἀϊδιότητος ταύτης ἕτερον αἴτιον· τῶν μέντοι ἀρχῶν οὐκ ἔστιν ἕτερον αἴτιον ἀϊδίων οὐσῶν. ὅτι μὲν οὖν οὐδεὶς ἦν χρόνος οὐδ' ἔσται ὅτε κίνη σις οὐκ ἦν ἢ οὐκ ἔσται, εἰρήσθω τοσαῦτα.

Κεφάλαιο 2

Τὰ δὲ ἐναντία τούτοις οὐ χαλεπὸν λύειν. δόξειε δ' ἂν ἐκ τῶν τοιῶνδε σκοποῦσιν ἐνδέχεσθαι μάλιστα κίνησιν εἶναι ποτε μὴ οὔσαν ὅλως,

πρῶτον μὲν ὅτι οὐδεμία αἰδῖος μεταβολή· μεταβολή γὰρ ἅπασα πέφυκεν ἐκ τινος εἰς τι, ὥστε ἀνάγκη πάσης μεταβολῆς εἶναι πέρας τὰ ἐναντία ἐν οἷς γίνεταί, εἰς ἄπειρον δὲ κινεῖσθαι μηδέν.

ἔτι ὁρῶμεν ὅτι δυνατόν κινήσῃν μήτε κινούμενον μήτ' ἔχον ἐν ἑαυτῷ μηδεμίαν κίνησιν, οἷον ἐπὶ τῶν ἀνύχων, ὧν οὔτε μέρος οὐδὲν οὔτε τὸ ὅλον κινούμενον ἀλλ' ἡρεμοῦν κινεῖται ποτε· προσῆκεν δὲ ἢ αἰεὶ κινεῖσθαι ἢ μηδέποτε, εἴπερ μὴ γίνεταί οὐκ οὔσα.

πολὺ δὲ μάλιστα τὸ τοιοῦτον ἐπὶ τῶν ἐμψύχων εἶναι φανερόν· οὐδεμιᾶς γὰρ ἐν ἡμῖν ἐνούσης κινήσεως ἐνίστε, ἀλλ' ἡσυχάζοντες ὅμως κινούμεθα ποτε, καὶ ἐγγίγνεται ἐν ἡμῖν ἐξ ἡμῶν αὐτῶν ἀρχὴ κινήσεως, καὶ μὴθὲν ἐξωθεν κίνησις. τοῦτο γὰρ ἐπὶ τῶν ἀνύχων οὐχ ὁρῶμεν ὁμοίως, ἀλλ' αἰεὶ κινεῖ τι αὐτὰ τῶν ἐξωθεν ἕτερον· τὸ δὲ ζῶον αὐτὸ φαμεν ἑαυτὸ κινεῖν. ὥστ' εἴπερ ἡρεμεῖ ποτὲ πάμπαν, ἐν ἀκινήτῳ κίνησις ἂν γίγνοιτο ἐξ αὐτοῦ καὶ οὐκ ἐξωθεν. εἰ δ' ἐν ζῳῳ τοῦτο δυνατόν γενέσθαι, τί κωλύει τὸ αὐτὸ συμβῆναι καὶ κατὰ τὸ πᾶν; εἰ γὰρ ἐν μικρῷ κόσμῳ γίνεταί, καὶ ἐν μεγάλῳ· καὶ εἰ ἐν τῷ κόσμῳ, καὶ ἐν τῷ ἀπείρῳ, εἴπερ ἐνδέχεται κινεῖσθαι τὸ ἄπειρον καὶ ἡρεμεῖν ὅλον.

τούτων δὴ τὸ μὲν πρῶτον λεχθέν, τὸ μὴ τὴν αὐτὴν αἰεὶ καὶ μίαν τῷ ἀριθμῷ εἶναι τὴν κίνησιν τὴν εἰς τὰ ἀντικείμενα, ὁρθῶς λέγεται. τοῦτο μὲν γὰρ ἴσως ἀναγκαῖον, εἴπερ μὴ αἰεὶ μίαν καὶ τὴν αὐτὴν εἶναι δυνατόν τὴν τοῦ αὐτοῦ καὶ ἐνὸς κίνησιν· λέγω δ' οἷον πότερον τῆς μιᾶς χορδῆς εἰς καὶ ὁ αὐτὸς φθόγγος, ἢ αἰεὶ ἕτερος, ὁμοίως ἐχούσης καὶ κινουμένης. ἀλλ' ὅμως ὁποτέρως ποτ' ἔχει, οὐδὲν κωλύει τὴν αὐτὴν (253a.) τὴν εἶναι τινὰ τῷ συνεχῇ εἶναι καὶ αἰδῖον· δηλὸν δ' ἔσται μᾶλλον ἐκ τῶν ὕστερον.

τὸ δὲ κινεῖσθαι μὴ κινούμενον οὐδὲν ἄτοπον, ἂν ὅτε μὲν ἢ τὸ κινήσον ἐξωθεν, ὅτε δὲ μή. τοῦτο μέντοι πῶς ἂν εἴη, ζητητέον, λέγω δὲ ὥστε τὸ αὐτὸ ὑπὸ τοῦ αὐτοῦ κινητικοῦ ὄντος ὅτε μὲν κινεῖσθαι ὅτε δὲ μή· οὐδὲν γὰρ ἄλλ' ἀπορεῖ ὁ τοῦτο λέγων ἢ διὰ τί οὐκ αἰεὶ τὰ μὲν ἡρεμεῖ τῶν ὄντων τὰ δὲ κινεῖται.

μάλιστα δ' ἂν δόξειεν τὸ τρίτον ἔχειν ἀπορίαν, ὥς ἐγγιγνομένης οὐκ ἐνούσης πρότερον κινήσεως, τὸ συμβαῖνον ἐπὶ τῶν ἐμψύχων· ἡρεμοῦν γὰρ πρότερον μετὰ ταῦτα βαδίζει, κινήσαντος τῶν ἔξωθεν οὐδενός, ὥς δοκεῖ. τοῦτο δ' ἐστὶ ψεῦδος. ὁρῶμεν γὰρ ἀεὶ τι κινούμενον ἐν τῷ ζῳῷ τῶν συμφύτων· τούτου δὲ τῆς κινήσεως οὐκ αὐτὸ τὸ ζῷον αἴτιον, ἀλλὰ τὸ περιέχον ἴσως. αὐτὸ δὲ φαμεν αὐτὸ κινεῖν οὐ πᾶσαν κίνησιν, ἀλλὰ τὴν κατὰ τόπον. οὐδὲν οὖν κωλύει, μᾶλλον δ' ἴσως ἀναγκαῖον, ἐν μὲν τῷ σώματι πολλὰς ἐγγίγνεσθαι κινήσεις ὑπὸ τοῦ περιέχοντος, τούτων δ' ἐνίας τὴν διάνοιαν ἢ τὴν ὀρεξιν κινεῖν, ἐκείνην δὲ τὸ ὅλον ἤδη ζῷον κινεῖν, οἷον συμβαίνει περὶ τοὺς ὕπνους· αἰσθητικῆς μὲν γὰρ οὐδεμιᾶς ἐνούσης κινήσεως, ἐνούσης μέντοι τινός, ἐγείρεται τὰ ζῷα πάλιν. ἀλλὰ γὰρ φανερόν ἐσται καὶ περὶ τούτων ἐκ τῶν ἐπομένων.

Κεφάλαιο 3

Αρχὴ δὲ τῆς σκέψεως ἥπερ καὶ περὶ τῆς λεχθείσης ἀπορίας, διὰ τί ποτε ἔνια τῶν ὄντων ὅτε μὲν κινεῖται ὅτε δὲ ἡρεμεῖ πάλιν. ἀνάγκη δὴ ἥτοι πάντα ἡρεμεῖν ἀεὶ, ἢ πάντα ἀεὶ κινεῖσθαι, ἢ τὰ μὲν κινεῖσθαι τὰ δ' ἡρεμεῖν, καὶ πάλιν τούτων ἥτοι τὰ μὲν κινούμενα κινεῖσθαι ἀεὶ τὰ δ' ἡρεμοῦντα ἡρεμεῖν, ἢ πάντα πεφυκέναι ὁμοίως κινεῖσθαι καὶ ἡρεμεῖν, ἢ τὸ λοιπὸν ἔτι καὶ τρίτον. ἐνδέχεται γὰρ τὰ μὲν ἀεὶ τῶν ὄντων ἀκίνητα εἶναι, τὰ δ' ἀεὶ κινούμενα, τὰ δ' ἀμφοτέρων μεταλαμβάνειν· ὅπερ ἡμῖν λεκτέον ἐστίν· τοῦτο γὰρ ἔχει λύσιν τε πάντων τῶν ἀπορουμένων, καὶ τέλος ἡμῖν ταύτης τῆς πραγματείας ἐστίν.

τὸ μὲν οὖν πάντ' ἡρεμεῖν, καὶ τούτου ζητεῖν λόγον ἀφέντας τὴν αἴσθησιν, ἀρρωστία τίς ἐστὶν διανοίας, καὶ περὶ ὅλου τινὸς ἄλλ' οὐ περὶ μέρους ἀμφισβήτησις· οὐδὲ μόνον πρὸς τὸν φυσικόν, ἀλλὰ πρὸς πάσας τὰς (253b.) ἐπιστήμας ὡς εἰπεῖν καὶ πάσας τὰς δόξας διὰ τὸ κινήσει χρῆσθαι πάσας. ἔτι δ' αἱ περὶ τῶν ἀρχῶν ἐνστάσεις, ὥσπερ ἐν τοῖς περὶ τὰ μαθήματα λόγοις οὐδέν εἰσιν πρὸς τὸν μαθηματικόν, ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων, οὕτως οὐδὲ περὶ τοῦ νῦν ῥηθέντος πρὸς τὸν φυσικόν· ὑπόθεσις γὰρ ὅτι ἡ φύσις ἀρχὴ τῆς κινήσεως.

σχεδὸν δὲ καὶ τὸ φάναι κινεῖσθαι πάντα ψεῦδος μὲν, ἥττον δὲ τούτου παρὰ τὴν μέθοδον· ἐτέθη μὲν γὰρ ἡ φύσις ἐν τοῖς φυσικοῖς ἀρχή, καθάπερ κινήσεως, καὶ ἡρεμίας, ὅμως δὲ φυσικὸν ἡ κίνησις· καὶ φασὶ τινες κινεῖσθαι τῶν ὄντων οὐ τὰ μὲν τὰ δ' οὐ, ἀλλὰ πάντα καὶ ἀεὶ, ἀλλὰ λανθάνειν τοῦτο τὴν ἡμετέραν αἴσθησιν· πρὸς οὓς καίπερ οὐ διορίζοντας ποῖαν κίνησιν λέγουσιν, ἢ πάσας, οὐ χαλεπὸν ἀπαντῆσαι. οὔτε γὰρ αὐξάνεσθαι οὔτε φθίνειν οἷόν τε συνεχῶς, ἀλλ' ἔστι καὶ τὸ μέσον. ἔστι δ' ὁμοιος ὁ λόγος τῷ περὶ τοῦ τὸν σταλαγμὸν κατατρίβειν καὶ τὰ ἐκφυόμενα τοὺς λίθους διαιρεῖν· οὐ γὰρ εἰ τοσόνδε ἐξέωσεν ἢ ἀφεῖλεν ὁ σταλαγμός, καὶ τὸ ἡμισυ ἐν ἡμίσει χρόνῳ πρότερον· ἀλλ' ὥσπερ ἡ νεωλκία, καὶ οἱ σταλαγμοὶ οἱ τοσοῖδι τοσονδὶ κινουῖσιν, τὸ δὲ μέρος αὐτῶν ἐν οὐδενὶ χρόνῳ τοσοῦτον. διαιρεῖται μὲν οὖν τὸ ἀφαιρεθὲν εἰς πλείω, ἀλλ' οὐδὲν αὐτῶν ἐκινήθη χωρίς, ἀλλ' ἅμα. φανερόν οὖν ὡς οὐκ ἀναγκαῖον ἀεὶ τι ἀπιέναι, ὅτι διαιρεῖται ἢ φθίσις εἰς ἄπειρα, ἀλλ' ὅλον ποτὲ ἀπιέναι. ὁμοίως δὲ καὶ ἐπ' ἀλλοιωσεως ὅποιασούν· οὐ γὰρ εἰ μεριστὸν εἰς

ἄπειρα τὸ ἀλλοιούμενον, διὰ τοῦτο καὶ ἡ ἀλλοίωσις, ἀλλ' ἀθρόα γίνεται πολλάκις, ὥσπερ ἡ πῆξις. ἔτι ὅταν τι νοσήσῃ, ἀνάγκη χρόνον γενέσθαι ἐν ᾧ ὑγιασθήσεται, καὶ μὴ ἐν πέρατι χρόνου μεταβάλλειν· ἀνάγκη δὲ εἰς ὑγίειαν μεταβάλλειν καὶ μὴ εἰς ἄλλο μηθέν. ὥστε τὸ φάναι συνεχῶς ἀλλοιοῦσθαι λίαν ἐστὶ τοῖς φανεροῖς ἀμφισβητεῖν. εἰς τοῦναντίον γὰρ ἡ ἀλλοίωσις· ὁ δὲ λίθος οὔτε σκληρότερος γίνεται οὔτε μαλακώτερος. κατὰ τε τὸ φέρεσθαι θαυμαστὸν εἰ λέληθεν ὁ λίθος κάτω φερόμενος ἢ μένων ἐπὶ τῆς γῆς. ἔτι δ' ἡ γῆ καὶ τῶν ἄλλων ἕκαστον ἐξ ἀνάγκης μένουσι μὲν ἐν τοῖς οἰκείοις τόποις, κινεῦνται δὲ βιαίως ἐκ τούτων· εἴπερ οὖν ἐνὶ αὐτῶν ἐστὶν ἐν τοῖς οἰκείοις τόποις, (254a.) ἀνάγκη μηδὲ κατὰ τόπον πάντα κινεῖσθαι. ὅτι μὲν οὖν ἀδύνατον ἢ ἀεὶ πάντα κινεῖσθαι ἢ ἀεὶ πάντα ἡρεμεῖν, ἐκ τούτων καὶ ἄλλων τοιούτων πιστεύσειεν ἂν τις.

ἀλλὰ μὴν οὐδὲ τὰ μὲν ἀεὶ ἐνδέχεται ἡρεμεῖν, τὰ δ' ἀεὶ κινεῖσθαι, ποτὲ δ' ἡρεμεῖν καὶ ποτὲ κινεῖσθαι μηδέν. λεκτέον δ' ὅτι ἀδύνατον, ὥσπερ ἐπὶ τῶν εἰρημένων πρότερον, καὶ ἐπὶ τούτων (ὀρῶμεν γὰρ ἐπὶ τῶν αὐτῶν γιγνομένας τὰς εἰρημένας μεταβολάς), καὶ πρὸς τούτοις ὅτι μάχεται τοῖς φανεροῖς ὁ ἀμφισβητῶν· οὔτε γὰρ αὐξήσις οὔθ' ἡ βίαιος ἔσται κίνησις, εἰ μὴ κινήσεται παρὰ φύσιν ἡρεμοῦν πρότερον. γένεσιν οὖν ἀναιρεῖ καὶ φθορὰν οὗτος ὁ λόγος. σχεδὸν δὲ καὶ τὸ κινεῖσθαι γίγνεσθαι τι καὶ φθείρεσθαι δοκεῖ πᾶσιν· εἰς ὃ μὲν γὰρ μεταβάλλει, γίγνεται τοῦτο ἢ ἐν τούτῳ, ἐξ οὗ δὲ μεταβάλλει, φθείρεται τοῦτο ἢ ἐντεῦθεν. ὥστε δῆλον ὅτι τὰ μὲν κινεῖται, τὰ δ' ἡρεμεῖ ἐνίοτε.

τὸ δὲ πάντα ἀξιοῦν ὅτε μὲν ἡρεμεῖν ὅτε δὲ κινεῖσθαι, τοῦτ' ἤδη συναπτεῖν πρὸς τοὺς πάλαι λόγους. ἀρχὴν δὲ πάλιν ποιητέον ἀπὸ τῶν νῦν διορισθέντων, τὴν αὐτὴν ἤνπερ ἡρξάμεθα πρότερον. ἢ γάρ τοι πάντα ἡρεμεῖ, ἢ πάντα κινεῖται, ἢ τὰ μὲν ἡρεμεῖ τὰ δὲ κινεῖται τῶν ὄντων. καὶ εἰ τὰ μὲν ἡρεμεῖ τὰ δὲ κινεῖται, ἀνάγκη ἦτοι πάντα ὅτε μὲν ἡρεμεῖν ὅτε δὲ κινεῖσθαι, <ἢ τὰ μὲν ἀεὶ ἡρεμεῖν τὰ δὲ ἀεὶ κινεῖσθαι>, ἢ τὰ μὲν ἀεὶ ἡρεμεῖν τὰ δὲ ἀεὶ κινεῖσθαι αὐτῶν, τὰ δ' ὅτε μὲν ἡρεμεῖν ὅτε δὲ κινεῖσθαι. ὅτι μὲν τοίνυν οὐχ οἷόν τε πάντ' ἡρεμεῖν, εἴρηται μὲν καὶ πρότερον, εἰπώμεν δὲ καὶ νῦν. εἰ γὰρ καὶ κατ' ἀλήθειαν οὕτως ἔχει καθάπερ φασὶ τινες, εἶναι τὸ ὄν ἄπειρον καὶ ἀκίνητον, ἀλλ' οὔτι φαίνεται γε κατὰ τὴν αἴσθησιν, ἀλλὰ κινεῖσθαι πολλὰ τῶν ὄντων. εἴπερ οὖν ἔστιν δόξα ψευδὴς ἢ ὅλως δόξα, καὶ κίνησις ἔστιν, κἂν εἰ φαντασία, κἂν εἰ ὅτε μὲν οὕτως δοκεῖ

ὅτε δ' ἐτέρως· ἢ γὰρ φαντασία καὶ ἡ δόξα κινήσεις τινὲς εἶναι δοκοῦσιν. ἀλλὰ τὸ μὲν περὶ τούτου σκοπεῖν, καὶ ζητεῖν λόγον ὧν βέλτιον ἔχομεν ἢ λόγου δεῖσθαι, κακῶς κρίνειν ἐστὶν τὸ βέλτιον καὶ τὸ χεῖρον, καὶ τὸ πιστὸν καὶ τὸ μὴ πιστόν, καὶ ἀρχὴν καὶ μὴ ἀρχήν. ὁμοίως δὲ ἀδύνατον καὶ τὸ πάντα κινεῖσθαι, ἢ τὰ μὲν ἀεὶ κινεῖσθαι τὰ δ' ἀεὶ ἡρεμεῖν. πρὸς ἅπαντα γὰρ ταῦτα ἰκανὴ μία πίστις· (254b.) ὁρῶμεν γὰρ ἓνια ὅτε μὲν κινούμενα ὅτε δ' ἡρεμοῦντα. ὥστε φανερόν ὅτι ἀδύνατον ὁμοίως τὸ πάντα ἡρεμεῖν καὶ τὸ πάντα κινεῖσθαι συνεχῶς τῷ τὰ μὲν ἀεὶ κινεῖσθαι τὰ δ' ἡρεμεῖν ἀεὶ. λοιπὸν οὖν θεωρῆσαι πότερον πάντα τοιαῦτα οἶα κινεῖσθαι καὶ ἡρεμεῖν, ἢ ἓνια μὲν οὕτως, ἓνια δ' ἀεὶ ἡρεμεῖ, ἓνια δ' ἀεὶ κινεῖται· τοῦτο γὰρ δεικτέον ἡμῖν.

Κεφάλαιο 4

Τῶν δὴ κινούντων καὶ κινουμένων τὰ μὲν κατὰ συμβεβηκὸς κινεῖ καὶ κινεῖται, τὰ δὲ καθ' αὐτά, κατὰ συμβεβηκὸς μὲν οἷον ὅσα τε τῷ ὑπάρχειν τοῖς κινουῖσιν ἢ κινουμένοις καὶ τὰ κατὰ μόριον, τὰ δὲ καθ' αὐτά, ὅσα μὴ τῷ ὑπάρχειν τῷ κινουῖντι ἢ τῷ κινουμένῳ, μηδὲ τῷ μόριόν τι αὐτῶν κινεῖν ἢ κινεῖσθαι.

τῶν δὲ καθ' αὐτά τὰ μὲν ὑφ' ἑαυτοῦ τὰ δ' ὑπ' ἄλλου, καὶ τὰ μὲν φύσει τὰ δὲ βία καὶ παρὰ φύσιν. τό τε γὰρ αὐτὸ ὑφ' αὐτοῦ κινούμενον φύσει κινεῖται, οἷον ἕκαστον τῶν ζώων (κινεῖται γὰρ τὸ ζῶον αὐτὸ ὑφ' αὐτοῦ, ὅσων δ' ἡ ἀρχὴ ἐν αὐτοῖς τῆς κινήσεως, ταῦτα φύσει φαμέν κινεῖσθαι· διὸ τὸ μὲν ζῶον ὅλον φύσει αὐτὸ ἑαυτὸ κινεῖ, τὸ μέντοι σῶμα ἐνδέχεται καὶ φύσει καὶ παρὰ φύσιν κινεῖσθαι· διαφέρει γὰρ ὁποῖαν τε ἂν κίνησιν κινούμενον τύχη καὶ ἐκ ποίου στοιχείου συνεστηκός), καὶ τῶν ὑπ' ἄλλου κινουμένων τὰ μὲν φύσει κινεῖται τὰ δὲ παρὰ φύσιν, παρὰ φύσιν μὲν οἷον τὰ γεηρὰ ἄνω καὶ τὸ πῦρ κάτω, ἔτι δὲ τὰ μόρια τῶν ζώων πολλάκις κινεῖται παρὰ φύσιν, παρὰ τὰς θέσεις καὶ τοὺς τρόπους τῆς κινήσεως. καὶ μάλιστα τὸ ὑπότινος κινεῖσθαι τὸ κινούμενον ἐν τοῖς παρὰ φύσιν κινουμένοις ἐστὶ φανερόν διὰ τὸ δηλὸν εἶναι ὑπ' ἄλλου κινούμενον. μετὰ δὲ τὰ παρὰ φύσιν τῶν κατὰ φύσιν τὰ αὐτὰ ὑφ' αὐτῶν, οἷον τὰ ζῶα· οὐ γὰρ τοῦτ' ἄδηλον, εἰ ὑπότινος κινεῖται, ἀλλὰ πῶς δεῖ διαλαβεῖν αὐτοῦ τὸ κινεῖν καὶ τὸ κινούμενον· ἔοικεν γὰρ ὥσπερ ἐν τοῖς πλοίοις καὶ τοῖς μὴ φύσει συνισταμένοις, οὕτω καὶ ἐν τοῖς ζώοις εἶναι διηρημένον τὸ κινεῖν καὶ τὸ κινούμενον, καὶ οὕτω τὸ ἅπαν αὐτὸ αὐτὸ κινεῖν.

μάλιστα δ' ἀπορεῖται τὸ λοιπὸν τῆς εἰρημένης τελευταίας διαιρέσεως· τῶν γὰρ ὑπ' ἄλλου κινουμένων τὰ μὲν παρὰ φύσιν ἐθήκαμεν κινεῖσθαι, τὰ δὲ λείπεται ἀντιθεῖναι (255a.) ὅτι φύσει. ταῦτα δ' ἐστὶν ἢ τὴν ἀπορίαν παράσχοι ἂν ὑπὸ τίνας κινεῖται, οἷον τὰ κοῦφα καὶ τὰ βαρέα. ταῦτα γὰρ εἰς μὲν τοὺς ἀντικειμένους τόπους βία κινεῖται, εἰς δὲ τοὺς οἰκείους, τὸ μὲν κοῦφον ἄνω τὸ δὲ βαρὺ κάτω, φύσει· τὸ δ' ὑπὸ τίνας οὐκέτι φανερόν, ὥσπερ ὅταν κινῶνται παρὰ φύσιν. τό τε γὰρ αὐτὰ ὑφ' αὐτῶν φάναι ἀδύνατον· ζωτικόν τε γὰρ τοῦτο καὶ τῶν ἐμψύχων ἴδιον, καὶ ιστάναι ἂν ἐδύνατο αὐτὰ αὐτά (λέγω δ' οἷον, εἰ τοῦ βαδίζειν αἴτιον αὐτῷ, καὶ τοῦ μὴ βαδίζειν), ὥστ' εἰ ἐπ' αὐτῷ τὸ ἄνω φέρεσθαι τῷ πυρί, δηλὸν ὅτι ἐπ' αὐτῷ καὶ

τὸ κάτω. ἄλογον δὲ καὶ τὸ μίαν κίνησιν κινεῖσθαι μόνην ὑφ' αὐτῶν, εἶγε αὐτὰ ἑαυτὰ κινουῦσιν. ἔτι πῶς ἐνδέχεται συνεχές τι καὶ συμφυές αὐτὸ ἑαυτὸ κινεῖν; ἥ γὰρ ἐν καὶ συνεχές μὴ ἀφῆ, ταύτη ἀπαθές· ἀλλ' ἥ κεχώριται, ταύτη τὸ μὲν πέφυκε ποιεῖν τὸ δὲ πάσχειν. οὐτ' ἄρα τούτων οὐθέν αὐτὸ ἑαυτὸ κινεῖ (συμφυῆ γάρ), οὐτ' ἄλλο συνεχές οὐδέν, ἀλλ' ἀνάγκη διηρηθῆναι τὸ κινεῖν ἐν ἐκάστω πρὸς τὸ κινούμενον, οἷον ἐπὶ τῶν ἀψύχων ὀρῶμεν, ὅταν κινῇ τι τῶν ἐμψύχων. ἀλλὰ συμβαίνει καὶ ταῦτα ὑπὸ τινος ἀεὶ κινεῖσθαι· γένοιτο δ' ἂν φανερόν διαιρουῖσι τὰς αἰτίας.

ἔστιν δὲ καὶ ἐπὶ τῶν κινούντων λαβεῖν τὰ εἰρημένα· τὰ μὲν γὰρ παρὰ φύσιν αὐτῶν κινητικά ἐστιν, οἷον ὁ μοχλὸς οὐ φύσει τοῦ βάρους κινητικός, τὰ δὲ φύσει, οἷον τὸ ἐνεργεῖα θερμὸν κινητικὸν τοῦ δυνάμει θερμοῦ. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων τῶν τοιούτων.

καὶ κινητὸν δ' ὥσαύτως φύσει τὸ δυνάμει ποιὸν ἢ ποσὸν ἢ πού, ὅταν ἔχη τὴν ἀρχὴν τὴν τοιαύτην ἐν αὐτῷ καὶ μὴ κατὰ συμβεβηκός (εἴη γὰρ ἂν τὸ αὐτὸ καὶ ποιὸν καὶ ποσόν, ἀλλὰ θατέρῳ θάτερον συμβέβηκεν καὶ οὐ καθ' αὐτὸ ὑπάρχει). τὸ δὲ πῦρ καὶ ἡ γῆ κινεῦνται ὑπὸ τινος βία μὲν ὅταν παρὰ φύσιν, φύσει δ' ὅταν εἰς τὰς αὐτῶν ἐνεργείας δυνάμει ὄντα. ἐπεὶ δὲ τὸ δυνάμει πλεοναχῶς λέγεται, τοῦτ' αἴτιον τοῦ μὴ φανερόν εἶναι ὑπὸ τίνος τὰ τοιαῦτα κινεῖται, οἷον τὸ πῦρ ἄνω καὶ ἡ γῆ κάτω. ἔστι δὲ δυνάμει ἄλλως ὁ μανθάνων ἐπιστήμων καὶ ὁ ἔχων ἤδη καὶ μὴ ἐνεργῶν. ἀεὶ δ', ὅταν ἅμα τὸ ποιητικὸν καὶ τὸ παθητικὸν ὦσιν, γίγνεται ἐνεργεῖα τὸ δυ(255b.) νατόν, οἷον τὸ μανθάνον ἐκ δυνάμει ὄντος ἕτερον γίγνεται δυνάμει (ὁ γὰρ ἔχων ἐπιστήμην μὴ θεωρῶν δὲ δυνάμει ἐστὶν ἐπιστήμων πῶς, ἀλλ' οὐχ ὥς καὶ πρὶν μαθεῖν), ὅταν δ' οὕτως ἔχη, ἐάν τι μὴ κωλύη, ἐνεργεῖ καὶ θεωρεῖ, ἢ ἔσται ἐν τῇ ἀντιφάσει καὶ ἐν ἀγνοίᾳ. ὁμοίως δὲ ταῦτ' ἔχει καὶ ἐπὶ τῶν φυσικῶν· τὸ γὰρ ψυχρὸν δυνάμει θερμόν, ὅταν δὲ μεταβάλλῃ, ἤδη πῦρ, καίει δέ, ἂν μὴ τι κωλύη καὶ ἐμποδίξῃ. ὁμοίως δ' ἔχει καὶ περὶ τὸ βαρὺ καὶ κοῦφον· τὸ γὰρ κοῦφον γίγνεται ἐκ βαρέος, οἷον ἐξ ὕδατος ἀήρ (τοῦτο γὰρ δυνάμει πρῶτον), καὶ ἤδη κοῦφον, καὶ ἐνεργήσῃ γ' εὐθύς, ἂν μὴ τι κωλύη. ἐνέργεια δὲ τοῦ κούφου τὸ ποῦ εἶναι καὶ ἄνω, κωλύεται δ', ὅταν ἐν τῷ ἐναντίῳ τόπῳ ἦ. καὶ τοῦθ' ὁμοίως ἔχει καὶ ἐπὶ τοῦ ποσοῦ καὶ ἐπὶ τοῦ ποιοῦ. καίτοι τοῦτο ζητεῖται, διὰ τί ποτε κινεῖται εἰς τὸν αὐτῶν τόπον τὰ κοῦφα καὶ τὰ βαρέα. αἴτιον δ' ὅτι πέφυκέν ποι, καὶ τοῦτ' ἔστιν τὸ κούφῳ καὶ βαρεῖ εἶναι, τὸ μὲν τῷ ἄνω τὸ δὲ τῷ κάτω διωρισμένον. δυνάμει δ'

ἐστὶν κοῦφον καὶ βαρὺ πολλαχῶς, ὥσπερ εἴρηται· ὅταν τε γὰρ ἦ ὕδωρ, δυνάμει γέ πῶς ἐστὶ κοῦφον, καὶ ὅταν ἀήρ, ἔστιν ὡς ἔτι δυνάμει (ἐνδέχεται γὰρ ἐμποδιζόμενον μὴ ἄνω εἶναι)· ἀλλ' ἐὰν ἀφαιρεθῇ τὸ ἐμποδίζον, ἐνεργεῖ καὶ ἀεὶ ἀνωτέρω γίγνεται. ὁμοίως δὲ καὶ τὸ ποιὸν εἰς τὸ ἐνεργεῖα εἶναι μεταβάλλει· εὐθὺς γὰρ θεωρεῖ τὸ ἐπιστήμον, ἐὰν μὴ τι κωλύῃ· καὶ τὸ ποσὸν ἐκτείνεται, ἐὰν μὴ τι κωλύῃ. ὁ δὲ τὸ ὑφιστάμενον καὶ κωλῦον κινήσας ἔστιν ὡς κινεῖ ἔστι δ' ὡς οὗ, οἷον ὁ τὸν κίονα ὑποσπάσας ἢ ὁ τὸν λίθον ἀφελὼν ἀπὸ τοῦ ἀσκοῦ ἐν τῷ ὕδατι· κατὰ συμβεβηκὸς γὰρ κινεῖ, ὥσπερ καὶ ἡ ἀνακλασθεῖσα σφαῖρα οὐχ ὑπὸ τοῦ τοίχου ἐκινήθη ἀλλ' ὑπὸ τοῦ βάλλοντος. ὅτι μὲν τοίνυν οὐδὲν τούτων αὐτὸ κινεῖ ἑαυτό, δηλόν· ἀλλὰ κινήσεως ἀρχὴν ἔχει, οὐ τοῦ κινεῖν οὐδὲ τοῦ ποιεῖν, ἀλλὰ τοῦ πάσχειν.

εἰ δὴ πάντα τὰ κινούμενα ἢ φύσει κινεῖται ἢ παρὰ φύσιν καὶ βία, καὶ τὰ τε βία καὶ παρὰ φύσιν πάντα ὑπὸ τινος καὶ ὑπ' ἄλλου, τῶν δὲ φύσει πάλιν τὰ θ' ὑφ' αὐτῶν κινούμενα ὑπὸ τινος κινεῖται καὶ τὰ μὴ ὑφ' αὐτῶν, οἷον τὰ κοῦφα καὶ τὰ βαρέα (256a.) (ἢ γὰρ ὑπὸ τοῦ γεννήσαντος καὶ ποιήσαντος κοῦφον ἢ βαρὺ, ἢ ὑπὸ τοῦ τὰ ἐμποδίζοντα καὶ κωλύοντα λύσαντος), ἅπαντα ἂν τὰ κινούμενα ὑπὸ τινος κινῶιτο.

Κεφάλαιο 5

Τοῦτο δὲ διχῶς· ἢ γὰρ οὐ δι' αὐτὸ τὸ κινεῖν, ἀλλὰ δι' ἕτερον ὃ κινεῖ τὸ κινεῖν, ἢ δι' αὐτό, καὶ τοῦτο ἢ πρῶτον μετὰ τὸ ἔσχατον ἢ διὰ πλειόνων, οἷον ἢ βακτηρία κινεῖ τὸν λίθον καὶ κινεῖται ὑπὸ τῆς χειρὸς κινουμένης ὑπὸ τοῦ ἀνθρώπου, οὗτος δ' οὐκέτι τῷ ὑπ' ἄλλου κινεῖσθαι. ἄμφω δὲ κινεῖν φαμέν, καὶ τὸ τελευταῖον καὶ τὸ πρῶτον τῶν κινούντων, ἀλλὰ μᾶλλον τὸ πρῶτον· ἐκεῖνο γὰρ κινεῖ τὸ τελευταῖον, ἀλλ' οὐ τοῦτο τὸ πρῶτον, καὶ ἄνευ μὲν τοῦ πρώτου τὸ τελευταῖον οὐ κινήσει, ἐκεῖνο δ' ἄνευ τούτου, οἷον ἢ βακτηρία οὐ κινήσει μὴ κινούντος τοῦ ἀνθρώπου. εἰ δὲ ἀνάγκη πᾶν τὸ κινούμενον ὑπὸ τινός τε κινεῖσθαι, καὶ ἢ ὑπὸ κινουμένου ὑπ' ἄλλου ἢ μή, καὶ εἰ μὲν ὑπ' ἄλλου [κινουμένου], ἀνάγκη τι εἶναι κινεῖν ὃ οὐχ ὑπ' ἄλλου πρῶτον, εἰ δὲ τοιοῦτο τὸ πρῶτον, οὐκ ἀνάγκη θάτερον (ἀδύνατον γὰρ εἰς ἄπειρον ἰέναι τὸ κινεῖν καὶ κινούμενον ὑπ' ἄλλου αὐτό· τῶν γὰρ ἀπείρων οὐκ ἔστιν οὐδὲν πρῶτον) — εἰ οὖν ἅπαν μὲν τὸ κινούμενον ὑπὸ τινος κινεῖται, τὸ δὲ πρῶτον κινεῖται μὲν, οὐχ ὑπ' ἄλλου δέ, ἀνάγκη αὐτὸ ὑφ' αὐτοῦ κινεῖσθαι.

ἔτι δὲ καὶ ὧδε τὸν αὐτὸν τοῦτον λόγον ἔστιν ἐπελθεῖν. πᾶν γὰρ τὸ κινεῖν τί τε κινεῖ καὶ τινί. ἢ γὰρ αὐτῷ κινεῖ τὸ κινεῖν ἢ ἄλλῳ, οἷον ἄνθρωπος ἢ αὐτὸς ἢ τῇ βακτηρίᾳ, καὶ ὁ ἄνεμος κατέβαλεν ἢ αὐτὸς ἢ ὁ λίθος ὃν ἔωσεν. ἀδύνατον δὲ κινεῖν ἄνευ τοῦ αὐτὸ αὐτῷ κινούντος τὸ ᾧ κινεῖ· ἀλλ' εἰ μὲν αὐτὸ αὐτῷ κινεῖ, οὐκ ἀνάγκη ἄλλο εἶναι ᾧ κινεῖ, ἂν δὲ ἢ ἕτερον τὸ ᾧ κινεῖ, ἔστιν τι ὃ κινήσει οὐ τινὶ ἄλλ' αὐτῷ, ἢ εἰς ἄπειρον εἴσιν. εἰ οὖν κινούμενόν τι κινεῖ, ἀνάγκη στήναι καὶ μὴ εἰς ἄπειρον ἰέναι· εἰ γὰρ ἢ βακτηρία κινεῖ τῷ κινεῖσθαι ὑπὸ τῆς χειρὸς, ἢ χεὶρ κινεῖ τὴν βακτηρίαν· εἰ δὲ καὶ ταύτῃ ἄλλο κινεῖ, καὶ ταύτῃ ἕτερόν τι τὸ κινεῖν. ὅταν δὲ τινι κινήῃ αἰετὸν ἕτερον, ἀνάγκη εἶναι πρότερον τὸ αὐτὸ αὐτῷ κινεῖν. εἰ οὖν κινεῖται μὲν τοῦτο, μὴ ἄλλο δὲ τὸ κινεῖν αὐτό, ἀνάγκη αὐτὸ αὐτό (256b.) κινεῖν· ὥστε καὶ κατὰ τοῦτον τὸν λόγον ἦτοι εὐθὺς τὸ κινούμενον ὑπὸ τοῦ αὐτοῦ κινούντος κινεῖται, ἢ ἔρχεται ποτε εἰς τὸ τοιοῦτον.

πρὸς δὲ τοῖς εἰρημένοις καὶ ὧδε σκοποῦσι ταῦτα συμβήσεται ταῦτα. εἰ γὰρ ὑπὸ κινουμένου κινεῖται τὸ κινούμενον πᾶν, ἦτοι τοῦτο ὑπάρχει τοῖς πράγμασιν κατὰ συμ βεβηκός, ὥστε κινεῖν μὲν κινούμενον, οὐ μέντοι διὰ τὸ κινεῖσθαι αὐτό, ἢ οὐ, ἀλλὰ καθ' αὐτό.

πρῶτον μὲν οὖν εἰ κατὰ συμβεβηκός, οὐκ ἀνάγκη κινεῖσθαι τὸ κινουόν. εἰ δὲ τοῦτο, δηλὸν ὡς ἐνδέχεται ποτε μηδὲν κινεῖσθαι τῶν ὄντων· οὐ γὰρ ἀναγκαῖον τὸ συμβεβηκός, ἀλλ' ἐνδεχόμενον μὴ εἶναι. ἐὰν οὖν θῶμεν τὸ δυνατόν εἶναι, οὐδὲν ἀδύνατον συμβήσεται, ψεῦδος δ' ἴσως. ἀλλὰ τὸ κίνησιν μὴ εἶναι ἀδύνατον· δέδεικται γὰρ πρότερον ὅτι ἀνάγκη κίνησιν αἰεὶ εἶναι.

καὶ εὐλόγως δὲ τοῦτο συμβέβηκεν. τρία γὰρ ἀνάγκη εἶναι, τό τε κινούμενον καὶ τὸ κινουόν καὶ τὸ ᾧ κινεῖ. τὸ μὲν οὖν κινούμενον ἀνάγκη κινεῖσθαι, κινεῖν δ' οὐκ ἀνάγκη· τὸ δ' ᾧ κινεῖ, καὶ κινεῖν καὶ κινεῖσθαι (συμμεταβάλλει γὰρ τοῦτο ἅμα καὶ κατὰ τὸ αὐτὸ τῷ κινουμένῳ ὄν· δηλὸν δ' ἐπὶ τῶν κατὰ τόπον κινούντων· ἅπτεσθαι γὰρ ἀλλήλων ἀνάγκη μέχρι τινός)· τὸ δὲ κινουόν οὕτως ὥστ' εἶναι μὴ ᾧ κινεῖ, ἀκίνητον. ἐπεὶ δ' ὁρῶμεν τὸ ἔσχατον, ὃ κινεῖσθαι μὲν δύναται, κινήσεως δ' ἀρχὴν οὐκ ἔχει, καὶ ὃ κινεῖται μὲν, οὐχ ὑπ' ἄλλου δὲ ἀλλ' ὑπ' αὐτοῦ, εὐλογον, ἵνα μὴ ἀναγκαῖον εἴπωμεν, καὶ τὸ τρίτον εἶναι ὃ κινεῖ ἀκίνητον ὄν. διὸ καὶ Ἀναξαγόρας ὀρθῶς λέγει, τὸν νοῦν ἀπαθῆ φάσκων καὶ ἀμιγῆ εἶναι, ἐπειδὴ γε κινήσεως ἀρχὴν αὐτὸν εἶναι ποιεῖ· οὕτω γὰρ μόνως ἂν κινοίη ἀκίνητος ὢν καὶ κρατοίη ἀμιγῆς ὢν.

ἀλλὰ μὴν εἰ μὴ κατὰ συμβεβηκός ἀλλ' ἐξ ἀνάγκης κινεῖται τὸ κινουόν, εἰ δὲ μὴ κινοίτο, οὐκ ἂν κινοίη, ἀνάγκη τὸ κινουόν, ἢ κινεῖται, ἥτοι οὕτω κινεῖσθαι ὥς γε κατὰ τὸ αὐτὸ εἶδος τῆς κινήσεως, ἢ καθ' ἕτερον. λέγω δ' ἥτοι τὸ θερμαῖνον καὶ αὐτὸ θερμαίνεσθαι καὶ τὸ ὑγιάζον ὑγιάζεσθαι καὶ τὸ φέρον φέρεσθαι, ἢ τὸ ὑγιάζον φέρεσθαι, τὸ δὲ φέρον αὐξάνεσθαι. ἀλλὰ φανερόν ὅτι ἀδύνατον· δεῖ γὰρ μέχρι (257a.) τῶν ἀτόμων διαιροῦντα λέγειν, οἷον εἴ τι διδάσκει γεωμετρεῖν, τοῦτο διδάσκεσθαι γεωμετρεῖν τὸ αὐτό, ἢ εἰ ρίπτει, ρίπτεσθαι τὸν αὐτὸν τρόπον τῆς ρίψεως· ἢ οὕτως μὲν μή, ἄλλο δ' ἐξ ἄλλου γένους, οἷον τὸ φέρον μὲν αὐξάνεσθαι, τὸ δὲ τοῦτο αὖξον ἀλλοιοῦσθαι ὑπ' ἄλλου, τὸ δὲ τοῦτο ἀλλοιοῦν ἑτέραν τινὰ κινεῖσθαι κίνησιν. ἀλλ' ἀνάγκη στήναι· πεπερασμένοι γὰρ αἱ κινήσεις. τὸ δὲ πάλιν ἀνακάμπτειν καὶ τὸ ἀλλοιοῦν φάναι φέρεσθαι τὸ αὐτὸ ποιεῖν ἐστὶ κἂν εἰ εὐθὺς ἔφη τὸ φέρον φέρεσθαι καὶ διδάσκεσθαι τὸ διδάσκον (δηλὸν γὰρ ὅτι κινεῖται καὶ ὑπὸ τοῦ ἀνωτέρω κινούντος τὸ κινούμενον πᾶν, καὶ μᾶλλον ὑπὸ τοῦ προτέρου τῶν κινούντων). ἀλλὰ μὴν τοῦτό γε ἀδύνατον· τὸ διδάσκον γὰρ συμβαίνει μανθάνειν, ὣν τὸ μὲν μὴ ἔχειν τὸ δὲ ἔχειν ἐπιστήμην ἀναγκαῖον. ἔτι δὲ μᾶλλον τούτων

ἄλογον, ὅτι συμβαίνει πᾶν τὸ κινητικὸν κινητόν, εἴπερ ἅπαν ὑπὸ κινουμένου κινεῖται τὸ κινούμενον· ἔσται γὰρ κινητόν, ὥσπερ εἰ τις λέγοι πᾶν τὸ ὑγιαστικὸν [καὶ ὑγιάζον] ὑγιαστὸν εἶναι, καὶ τὸ οἰκοδομητικὸν οἰκοδομητόν, ἢ εὐθύς ἢ διὰ πλειόνων· λέγω δ' οἷον εἰ κινητὸν μὲν ὑπ' ἄλλου πᾶν τὸ κινητικόν, ἀλλ' οὐ ταύτην τὴν κίνησιν κινητὸν ἦν κινεῖ τὸ πλησίον, ἀλλ' ἑτέραν, οἷον τὸ ὑγιαστικὸν μαθητικόν, ἀλλὰ τοῦτο ἐπαναβαῖνον ἥξει ποτὲ εἰς τὸ αὐτὸ εἶδος, ὥσπερ εἵπομεν πρότερον. τὸ μὲν οὖν τούτων ἀδύνατον, τὸ δὲ πλασματῶδες· ἄτοπον γὰρ τὸ ἐξ ἀνάγκης τὸ ἀλλοιωτικὸν αὐξητὸν εἶναι. οὐκ ἄρα ἀνάγκη ἀεὶ κινεῖσθαι τὸ κινούμενον ὑπ' ἄλλου, καὶ τούτου κινουμένου· στήσεται ἄρα. ὥστε ἦτοι ὑπὸ ἡρεμοῦντος κινήσεται τὸ κινούμενον πρῶτον, ἢ αὐτὸ ἑαυτὸ κινήσει. ἀλλὰ μὴν καὶ εἰ γε δέοι σκοπεῖν πότερον αἴτιον κινήσεως καὶ ἀρχὴ τὸ αὐτὸ αὐτὸ κινοῦν ἢ τὸ ὑπ' ἄλλου κινούμενον, ἐκεῖνο πᾶς ἂν θεῖη· τὸ γὰρ αὐτὸ καθ' αὐτὸ ὃν ἀεὶ πρότερον αἴτιον τοῦ καθ' ἕτερον καὶ αὐτοῦ ὄντος. ὥστε τοῦτο σκεπτέον λαβοῦσιν ἄλλην ἀρχήν, εἰ τι κινεῖ αὐτὸ αὐτό, πῶς κινεῖ καὶ τίνα τρόπον. ἀναγκαῖον δὴ τὸ κινούμενον ἅπαν εἶναι διαιρετὸν εἰς ἀεὶ διαιρετά· τοῦτο γὰρ δέδεικται πρότερον ἐν τοῖς (257b.) καθόλου τοῖς περὶ φύσεως, ὅτι πᾶν τὸ καθ' αὐτὸ κινούμενον συνεχές. ἀδύνατον δὴ τὸ αὐτὸ αὐτὸ κινοῦν πάντῃ κινεῖν αὐτὸ αὐτό· φέροιτο γὰρ ἂν ὅλον καὶ φέροι τὴν αὐτὴν φορὰν, ἐν ὃν καὶ ἄτομον τῷ εἶδει, καὶ ἀλλοιοῖτο καὶ ἀλλοιοῖ, ὥστε διδάσκει ἂν καὶ μανθάνοι ἅμα, καὶ ὑγιάζει καὶ ὑγιάζοιτο τὴν αὐτὴν ὑγίειαν. ἔτι διώριστα ὅτι κινεῖται τὸ κινητόν· τοῦτο δ' ἐστὶν δυνάμει κινούμενον, οὐκ ἐντελεχεία, τὸ δὲ δυνάμει εἰς ἐντελέχειαν βαδίζει, ἔστιν δ' ἡ κίνησις ἐντελέχεια κινητοῦ ἀτελής. τὸ δὲ κινοῦν ἤδη ἐνεργεία ἔστιν, οἷον θερμαίνει τὸ θερμὸν καὶ ὅλως γεννᾷ τὸ ἔχον τὸ εἶδος, ὥσθ' ἅμα τὸ αὐτὸ κατὰ τὸ αὐτὸ θερμὸν ἔσται καὶ οὐ θερμόν. ὁμοίως δὲ καὶ τῶν ἄλλων ἕκαστον, ὅσων τὸ κινοῦν ἀνάγκη ἔχειν τὸ συνώνυμον. τὸ μὲν ἄρα κινεῖ τὸ δὲ κινεῖται τοῦ αὐτοῦ αὐτὸ κινούντος. ὅτι δ' οὐκ ἔστιν αὐτὸ αὐτὸ κινοῦν οὕτως ὥσθ' ἑκάτερον ὑφ' ἑκατέρου κινεῖσθαι, ἐκ τῶνδε φανερόν. οὔτε γὰρ ἔσται πρῶτον κινοῦν οὐδέν, εἰ γε αὐτὸ ἑαυτὸ κινήσει ἑκάτερον (τὸ γὰρ πρότερον αἰτιώτερον τοῦ κινεῖσθαι τοῦ ἐχομένου καὶ κινήσει μᾶλλον· διχῶς γὰρ κινεῖν ἦν, τὸ μὲν τὸ ὑπ' ἄλλου κινούμενον αὐτό, τὸ δ' αὐτῷ· ἐγγύτερον δὲ τὸ πορρώτερον τοῦ κινουμένου τῆς ἀρχῆς ἢ τὸ μεταξύ)· ἔτι οὐκ ἀνάγκη τὸ κινοῦν κινεῖσθαι εἰ μὴ ὑφ' αὐτοῦ· κατὰ

συμβεβηκὸς ἄρα ἀντικινεῖ θάτερον. ἔλαβον τοίνυν ἐνδέχεσθαι μὴ

 ἀνάγκη τὸ κινεῖν ἀντικινεῖσθαι, ἀλλ' ἢ ἀκίνητόν γέ τι κινεῖν ἀνάγκη
 ἢ αὐτὸ ὑφ' αὐτοῦ κινούμενον, εἴπερ ἀνάγκη ἀεὶ κίνησιν εἶναι. ἔτι ἦν
 κινεῖ κίνησιν, κινεῖτ' ἂν, ὥστε τὸ θερμαῖνον θερμαίνεται. ἀλλὰ μὴν
 οὐδὲ τοῦ πρῶτως αὐτὸ αὐτὸ κινεῖντος οὔτε ἐν μόριον οὔτε πλείω

 οὐκ ἐτί)· εἰ δὲ ὅλον ὑφ' ὅλου κινεῖται, κατὰ συμβεβηκὸς ἂν ταῦτα
 κινεῖ αὐτὰ ἑαυτά. ὥστε εἰ μὴ ἀναγκαῖον, εἰλήφθω μὴ κινούμενα
 (258a.) ὑφ' αὐτῶν. τῆς ὅλης ἄρα τὸ μὲν κινήσει ἀκίνητον ὃν τὸ δὲ
 κινήσεται· μόνως γὰρ οὕτως οἷόν τέ τι αὐτοκίνητον εἶναι. ἔτι εἴπερ
 ἢ ὅλη αὐτὴ αὐτὴν κινεῖ, τὸ μὲν κινήσει αὐτῆς, τὸ δὲ κινήσεται. ἢ ἄρα
 AB ὑφ' αὐτῆς τε κινήσεται καὶ ὑπὸ τῆς A. ἐπεὶ δὲ κινεῖ τὸ μὲν
 κινούμενον ὑπ' ἄλλου τὸ δ' ἀκίνητον ὃν, καὶ κινεῖται τὸ μὲν κινεῖν
 τὸ δὲ οὐδὲν κινεῖν, τὸ αὐτὸ αὐτὸ κινεῖν ἀνάγκη ἐξ ἀκινήτου εἶναι
 κινεῖντος δέ, καὶ ἔτι ἐκ κινουμένου μὴ κινεῖντος δ' ἐξ ἀνάγκης,
 ἀλλ' ὅποτερ' ἔτυχεν. ἔστω γὰρ τὸ A κινεῖν μὲν ἀκίνητον δέ, τὸ δὲ B
 κινούμενόν τε ὑπὸ τοῦ A καὶ κινεῖν τὸ ἐφ' ᾧ Γ, τοῦτο δὲ κινούμενον
 μὲν ὑπὸ τοῦ B, μὴ κινεῖν δὲ μηδέν· εἴπερ γὰρ καὶ διὰ πλειόνων ἤξει
 ποτὲ εἰς τὸ Γ, ἔστω δι' ἐνὸς μόνου. τὸ δὲ ἅπαν ABΓ αὐτὸ ἑαυτὸ
 κινεῖ. ἀλλ' ἐὰν ἀφέλῃ τὸ Γ, τὸ μὲν AB κινήσει αὐτὸ ἑαυτό, τὸ μὲν A
 κινεῖν τὸ δὲ B κινούμενον, τὸ δὲ Γ οὐ κινήσει αὐτὸ ἑαυτό, οὐδ'
 ὅλως κινήσεται. ἀλλὰ μὴν οὐδ' ἢ BΓ κινήσει αὐτὴ ἑαυτὴν ἄνευ τοῦ
 A· τὸ γὰρ B κινεῖ τῷ κινεῖσθαι ὑπ' ἄλλου, οὐ τῷ ὑφ' αὐτοῦ τινὸς
 μέρους. τὸ ἄρα AB μόνον αὐτὸ ἑαυτὸ κινεῖ. ἀνάγκη ἄρα τὸ αὐτὸ
 ἑαυτὸ κινεῖν ἔχειν τὸ κινεῖν ἀκίνητον δέ, καὶ τὸ κινούμενον μηδέν
 δὲ κινεῖν ἐξ ἀνάγκης, ἀπτόμενα ἦτοι ἄμφω ἀλλήλων ἢ θατέρου
 θάτερον. εἰ μὲν οὖν συνεχές ἐστι τὸ κινεῖν (τὸ μὲν γὰρ κινούμενον
 ἀναγκαῖον εἶναι συνεχές), ἄψεται ἐκάτερον ἐκατέρου. δῆλον δὲ ὅτι
 τὸ πᾶν αὐτὸ ἑαυτὸ κινεῖ οὐ τῷ αὐτοῦ τι εἶναι τοιοῦτον οἷον αὐτὸ
 αὐτὸ κινεῖν, ἀλλ' ὅλον κινεῖ αὐτὸ ἑαυτό, κινούμενόν τε καὶ κινεῖν
 τῷ αὐτοῦ τι εἶναι τὸ κινεῖν καὶ τὸ κινούμενον. οὐ γὰρ ὅλον κινεῖ
 οὐδ' ὅλον κινεῖται, ἀλλὰ κινεῖ μὲν ἢ τὸ A, κινεῖται δὲ ἢ τὸ B μόνον
 [τὸ δὲ Γ ὑπὸ τοῦ A οὐκ ἐτί· ἀδύνατον γάρ].

ἀπορίαν δ' ἔχει, ἐὰν ἀφέλῃ τις ἢ τῆς A, εἰ συνεχὲς τὸ κινουὺν μὲν ἀκίνητον δέ, ἢ τῆς B τῆς κινουμένης· ἢ λοιπὴ ἄρα κινήσει τῆς A ἢ τῆς B κινηθήσεται; εἰ γὰρ τοῦτο, οὐκ ἂν εἴη πρῶ τως κινουμένη ὑφ' αὐτῆς ἢ τὸ AB· ἀφαιρεθείσης γὰρ ἀπὸ τῆς AB, ἔτι κινήσει αὐτὴν ἢ λοιπὴ AB. ἢ δυνάμει μὲν (258b.) ἐκάτερον οὐδὲν κωλύει ἢ θάτερον, τὸ κινούμενον, διαιρετὸν εἶναι, ἐντελεχείᾳ δ' ἀδιαίρετον· ἐὰν δὲ διαιρεθῇ, μηκέτι εἶναι ἔχον τὴν αὐτὴν φύσιν· ὥστ' οὐδὲν κωλύει ἐν διαιρετοῖς δυνάμει πρῶτως ἐνεῖναι.

φανερὸν τοίνυν ἐκ τούτων ὅτι ἔστιν τὸ πρῶτως κινουὺν ἀκίνητον· εἴτε γὰρ εὐθὺς ἴσταται τὸ κινούμενον, ὑπὸ τι νος δὲ κινούμενον, εἰς ἀκίνητον τὸ πρῶτον, εἴτε εἰς κινούμενον μὲν, αὐτὸ δ' αὐτὸ κινουὺν καὶ ἰστάν, ἀμφοτέρως συμβαίνει τὸ πρῶτως κινουὺν ἅπασιν εἶναι τοῖς κινουμένοις ἀκίνητον.

Κεφάλαιο 6

Ἐπεὶ δὲ δεῖ κίνησιν ἀεὶ εἶναι καὶ μὴ διαλείπειν, ἀνάγκη εἶναι τι αἰδῖον ὃ πρῶτον κινεῖ, εἴτε ἔν εἴτε πλείω· καὶ τὸ πρῶτον κινεῖν ἀκίνητον. ἕκαστον μὲν οὖν αἰδῖον εἶναι τῶν ἀκινήτων μὲν κινούντων δὲ οὐδὲν πρὸς τὸν νῦν λόγον· ὅτι δ' ἀναγκαῖον εἶναι τι τὸ ἀκίνητον μὲν αὐτὸ πάσης ἐκτὸς μεταβολῆς, καὶ ἀπλῶς καὶ κατὰ συμβεβηκός, κινήτικὸν δ' ἐτέρου, δῆλον ὧδε σκοποῦσιν. ἔστω δὴ, εἴ τις βούλεται, ἐπὶ τινῶν ἐνδεχόμενον ὥστε εἶναι ποτε καὶ μὴ εἶναι ἄνευ γενέσεως καὶ φθορᾶς (τάχα γὰρ ἀναγκαῖον, εἴ τι ἀμερές ὅτε μὲν ἔστιν ὅτε δὲ μὴ ἔστιν, ἄνευ τοῦ μεταβάλλειν ὅτε μὲν εἶναι ὅτε δὲ μὴ εἶναι πᾶν τὸ τοιοῦτον). καὶ τῶν ἀρχῶν τῶν ἀκινήτων μὲν κινήτικῶν δ' ἐνίας ὅτε μὲν εἶναι ὅτε δὲ μὴ εἶναι, ἐνδεχέσθω καὶ τοῦτο. ἀλλ' οὐ τί γε πάσας δυνατόν· δῆλον γὰρ ὡς αἴτιον τοῖς αὐτὰ ἑαυτὰ κινουσίην ἐστὶ τι τοῦ ὅτε μὲν εἶναι ὅτε δὲ μὴ. τὸ μὲν γὰρ αὐτὸ ἑαυτὸ κινεῖν ἅπαν ἔχειν ἀνάγκη μέγεθος, εἰ μηδὲν κινεῖται ἀμερές, τὸ δὲ κινεῖν οὐδεμία ἀνάγκη ἐκ τῶν εἰρημένων. τοῦ δὴ τὰ μὲν γίνεσθαι τὰ δὲ φθεῖρεσθαι, καὶ τοῦτ' εἶναι συνεχῶς, οὐδὲν αἴτιον τῶν ἀκινήτων μὲν μὴ ἀεὶ δ' ὄντων, οὐδ' αὖ τῶνδὶ μὲν ταδί [κινούντων], τούτων δ' ἕτερα. τοῦ γὰρ ἀεὶ καὶ συνεχοῦς οὔτε ἕκαστον αὐτῶν οὔτε πάντα αἴτια· τὸ μὲν γὰρ οὕτως ἔχειν αἰδῖον καὶ ἐξ ἀνάγκης, τὰ δὲ πάντα ἄπειρα, καὶ οὐχ ἅμα πάντα ὄντα. δῆλον τοίνυν ὅτι, εἰ καὶ μυριάκις ἔνια [ἀρχαί] (259a.) τῶν ἀκινήτων μὲν κινούντων δέ, καὶ πολλὰ τῶν αὐτὰ ἑαυτὰ κινούντων, φθείρεται, τὰ δ' ἐπιγίνεται, καὶ τότε μὲν ἀκίνητον ὄν τότε κινεῖ, ἕτερον δὲ τοδί, ἀλλ' οὐδὲν ἧττον ἔστιν τι ὃ περιέχει, καὶ τοῦτο παρ' ἕκαστον, ὃ ἔστιν αἴτιον τοῦ τὰ μὲν εἶναι τὰ δὲ μὴ καὶ τῆς συνεχοῦς μεταβολῆς· καὶ τοῦτο μὲν τούτοις, ταῦτα δὲ τοῖς ἄλλοις αἴτια κινήσεως. εἴπερ οὖν αἰδῖος ἡ κίνησις, αἰδῖον καὶ τὸ κινεῖν ἔσται πρῶτον, εἰ ἔν· εἰ δὲ πλείω, πλείω τὰ αἰδῖα. ἐν δὲ μᾶλλον ἢ πολλά, καὶ πεπερασμένα ἢ ἄπειρα, δεῖ νομίζειν. τῶν αὐτῶν γὰρ συμβαινόντων αἰεὶ τὰ πεπερασμένα μᾶλλον ληπτέον· ἐν γὰρ τοῖς φύσει δεῖ τὸ πεπερασμένον καὶ τὸ βέλτιον, ἂν ἐνδέχεται, ὑπάρχειν μᾶλλον. ἱκανὸν δὲ καὶ ἔν, ὃ πρῶτον τῶν ἀκινήτων αἰδῖον ὄν ἔσται ἀρχὴ τοῖς ἄλλοις κινήσεως.

φανερὸν δὲ καὶ ἐκ τοῦδε ὅτι ἀνάγκη εἶναι τι ἔν καὶ αἰδῖον τὸ πρῶτον κινεῖν. δέδεικται γὰρ ὅτι ἀνάγκη ἀεὶ κίνησιν εἶναι. εἰ δὲ ἀεὶ,

ανάγκη συνεχῇ εἶναι· καὶ γὰρ τὸ ἀεὶ συνεχές, τὸ δ' ἐφεξῆς οὐ συνεχές. ἀλλὰ μὴν εἴ γε συνεχῆς, μία. μία δ' ἢ ὑφ' ἐνός τε τοῦ κινουῦντος καὶ ἐνός τοῦ κινουμένου· εἰ γὰρ ἄλλο καὶ ἄλλο κινήσει, οὐ συνεχῆς ἢ ὅλη κίνησις, ἀλλ' ἐφεξῆς.

ἐκ τε δὴ τούτων πιστεύσειεν ἂν τις εἶναι τι πρῶτον ἀκίνητον, καὶ πάλιν ἐπιβλέψας ἐπὶ τὰς ἀρχάς [τῶν κινούντων]. τὸ μὲν δὴ εἶναι ἅττα τῶν ὄντων ἃ ὅτε μὲν κινεῖται ὅτε δὲ ἡρεμεῖ φανερόν. καὶ διὰ τούτου γέγονε δηλὸν ὅτι οὔτε πάντα κινεῖται οὔτε πάντα ἡρεμεῖ οὔτε τὰ μὲν ἀεὶ ἡρεμεῖ τὰ δὲ ἀεὶ κινεῖται· τὰ γὰρ ἐπαμφοτερί ζοντα καὶ δύναμιν ἔχοντα τοῦ κινεῖσθαι καὶ ἡρεμεῖν δείκνυσιν περὶ αὐτῶν. ἐπεὶ δὲ τὰ μὲν τοιαῦτα δηλὰ πᾶσι, βουλόμεθα δὲ δεῖξαι καὶ τοῖν δυοῖν ἐκατέρου τὴν φύσιν, ὅτι ἔστιν τὰ μὲν ἀεὶ ἀκίνητα τὰ δὲ ἀεὶ κινούμενα, προϊόντες δ' ἐπὶ τοῦτο καὶ θέντες ἅπαν τὸ κινούμενον ὑπὸ τινος κινεῖσθαι, καὶ τοῦτ' εἶναι ἢ ἀκίνητον ἢ κινούμενον, καὶ κινούμενον ἢ ὑφ' αὐτοῦ ἢ ὑπ' ἄλλου ἀεὶ, προήλθομεν ἐπὶ τὸ λαβεῖν ὅτι τῶν κινουμένων ἐστὶν ἀρχὴ κινουμένων μὲν ὃ αὐτὸ ἑαυτὸ (259b.) κινεῖ, πάντων δὲ τὸ ἀκίνητον, ὁρῶμεν δὲ καὶ φανερῶς ὄντα τοιαῦτα ἃ κινεῖ αὐτὰ ἑαυτά, οἷον τὸ τῶν ἐμψύχων καὶ τὸ τῶν ζώων γένος, ταῦτα δὲ καὶ δόξαν παρείχε μή ποτε ἐνδέχεται κίνησιν ἐγγίγνεσθαι μὴ οὔσαν ὁλως, διὰ τὸ ἐν τούτοις ὁρᾶν ἡμᾶς τοῦτο συμβαῖνον (ἀκίνητα γὰρ ποτε ὄντα κινεῖται πάλιν, ὥς δοκεῖ), τοῦτο δὴ δεῖ λαβεῖν, ὅτι μίαν κίνησιν αὐτὰ κινεῖ, καὶ ὅτι ταύτην οὐ κυρίως· οὐ γὰρ ἐξ αὐτοῦ τὸ αἴτιον, ἀλλ' ἔνεισιν ἄλλαι κινήσεις φυσικαὶ τοῖς ζώοις, ἃς οὐ κινοῦνται δι' αὐτῶν, οἷον αὔξησις φθίσις ἀναπνοή, ἃς κινεῖται τῶν ζώων ἕκαστον ἡρεμοῦν καὶ οὐ κινούμενον τὴν ὑφ' αὐτοῦ κίνησιν. τούτου δ' αἴτιον τὸ περιέχον καὶ πολλὰ τῶν εἰσιόντων, οἷον ἐνίων ἢ τροφή· πεττομένης μὲν γὰρ καθεύδουσιν, διακρινομένης δ' ἐγείρονται καὶ κινοῦσιν ἑαυτούς, τῆς πρώτης ἀρχῆς ἔξωθεν οὔσης, διὸ οὐκ ἀεὶ κινοῦνται συνεχῶς ὑφ' αὐτῶν· ἄλλο γὰρ τὸ κινοῦν, αὐτὸ κινούμενον καὶ μεταβάλλον πρὸς ἕκαστον τῶν κινούντων ἑαυτά. ἐν πᾶσι δὲ τούτοις κινεῖται τὸ κινοῦν πρῶτον καὶ τὸ αἴτιον τοῦ αὐτὸ ἑαυτὸ κινεῖν ὑφ' αὐτοῦ, κατὰ συμβεβηκὸς μέντοι· μεταβάλλει γὰρ τὸν τόπον τὸ σῶμα, ὥστε καὶ τὸ ἐν τῷ σώματι ὄν καὶ τῇ μοχλείᾳ κινοῦν ἑαυτό. ἐξ ὧν ἔστιν πιστεῦσαι ὅτι εἴ τί ἐστι τῶν ἀκινήτων μὲν κινούντων δὲ καὶ αὐτὰ κατὰ συμβεβηκός, ἀδύνατον συνεχῇ κίνησιν κινεῖν. ὥστ' εἴπερ ἀνάγκη συνεχῶς εἶναι κίνησιν, εἶναι τι δεῖ τὸ πρῶτον κινοῦν ἀκίνητον καὶ κατὰ συμβεβηκός, εἰ μέλλει, καθάπερ

εἵπομεν, ἔσεσθαι ἐν τοῖς οὖσιν ἄπαυστός τις καὶ ἀθάνατος κίνησις, καὶ μενεῖν τὸ ὄν αὐτὸ ἐν αὐτῷ καὶ ἐν τῷ αὐτῷ· τῆς γὰρ ἀρχῆς μενούσης ἀνάγκη καὶ τὸ πᾶν μένειν συνεχὲς ὄν πρὸς τὴν ἀρχήν. οὐκ ἔστιν δὲ τὸ αὐτὸ τὸ κινεῖσθαι κατὰ συμβεβηκὸς ὑφ' αὐτοῦ καὶ ὑφ' ἑτέρου· τὸ μὲν γὰρ ὑφ' ἑτέρου ὑπάρχει καὶ τῶν ἐν τῷ οὐρανῷ ἐνίαις ἀρχαῖς, ὅσα πλείους φέρεται φοράς, θάτερον δὲ τοῖς φθαρτοῖς μόνον. ἀλλὰ μὴν εἴ γε ἔστιν τι ἀεὶ τοιοῦτον, κινεῖν μὲν τι ἀκίνητον δὲ αὐτὸ καὶ ἀίδιον, ἀνάγκη καὶ τὸ πρῶτον ὑπὸ τούτου (260a.) κινούμενον αἶδιον εἶναι. ἔστιν δὲ τοῦτο δῆλον μὲν καὶ ἐκ τοῦ μὴ ἂν ἄλλως εἶναι γένεσιν καὶ φθορὰν καὶ μεταβολὴν τοῖς ἄλλοις, εἰ μὴ τι κινήσει κινούμενον· τὸ μὲν γὰρ ἀκίνητον [τὴν αὐτὴν] ἀεὶ τὸν αὐτὸν κινήσει τρόπον καὶ μίαν κίνησιν, ἅτε οὐδὲν αὐτὸ μεταβάλλον πρὸς τὸ κινούμενον. τὸ δὲ κινούμενον ὑπὸ τοῦ κινουμένου μὲν, ὑπὸ τοῦ ἀκινήτου δὲ κινουμένου ἤδη, διὰ τὸ ἄλλως καὶ ἄλλως ἔχειν πρὸς τὰ πράγματα, οὐ τῆς αὐτῆς ἔσται κινήσεως αἴτιον, ἀλλὰ διὰ τὸ ἐναντίοις εἶναι τόποις ἢ εἶδεσιν ἐναντίως παρέξεται κινούμενον ἕκαστον τῶν ἄλλων, καὶ ὅτε μὲν ἡρεμοῦν ὅτε δὲ κινούμενον.

φανερὸν δὴ γέγονεν ἐκ τῶν εἰρημένων καὶ ὁ κατ' ἀρχὰς ἠποροῦμεν, τί δὴ ποτε οὐ πάντα ἢ κινεῖται ἢ ἡρεμεῖ, ἢ τὰ μὲν κινεῖται ἀεὶ τὰ δ' ἀεὶ ἡρεμεῖ, ἀλλ' ἓν ὅτε μὲν ὅτε δ' οὐ. τούτου γὰρ τὸ αἴτιον δῆλόν ἐστι νῦν, ὅτι τὰ μὲν ὑπὸ ἀκινήτου κινεῖται αἰδίου, διὸ ἀεὶ κινεῖται, τὰ δ' ὑπὸ κινουμένου καὶ μεταβάλλοντος, ὥστε καὶ αὐτὰ ἀναγκαῖον μεταβάλλειν. τὸ δ' ἀκίνητον, ὥσπερ εἴρηται, ἅτε ἀπλῶς καὶ ὡσαύτως καὶ ἐν τῷ αὐτῷ διαμένον, μίαν καὶ ἀπλὴν κινήσει κίνησιν.

Κεφάλαιο 7

Οὐ μὴν ἀλλὰ καὶ ἄλλην ποιησαμένοις ἀρχὴν μᾶλλον ἔσται περὶ τούτων φανερόν. σκεπτέον γὰρ πότερον ἐνδέχεται τινα κίνησιν εἶναι συνεχῇ ἢ οὐ, καὶ εἰ ἐνδέχεται, τίς αὕτη, καὶ τίς πρώτη τῶν κινήσεων· δηλὸν γὰρ ὡς εἴπερ ἀναγκαῖον μὲν αἰεὶ κίνησιν εἶναι, πρώτη δὲ ἦδε καὶ συνεχῆς, ὅτι τὸ πρῶτον κινοῦν κινεῖ ταύτην τὴν κίνησιν, ἣν ἀναγκαῖον μίαν καὶ τὴν αὐτὴν εἶναι καὶ συνεχῇ καὶ πρώτῃν.

τριῶν δ' οὐσῶν κινήσεων, τῆς τε κατὰ μέγεθος καὶ τῆς κατὰ πάθος καὶ τῆς κατὰ τόπον, ἣν καλοῦμεν φορὰν, ταύτην ἀναγκαῖον εἶναι πρώτῃν. ἀδύνατον γὰρ αὐξήσιν εἶναι ἀλλοιώσεως μὴ προϋπαρχούσης· τὸ γὰρ αὐξανόμενον ἔστιν μὲν ὡς ὁμοίῳ αὐξάνεται, ἔστιν δ' ὡς ἀνομοίῳ· τροφή γὰρ λέγεται τῷ ἐναντίῳ τὸ ἐναντίον. προσγίγνεται δὲ πᾶν γιγνόμενον ὅμοιον ὁμοίῳ. ἀνάγκη οὖν ἀλλοίωσιν εἶναι τὴν εἰς τὰναντία μεταβολήν. (260b.) ἀλλὰ μὴν εἴ γε ἀλλοιοῦται, δεῖ τι εἶναι τὸ ἀλλοιοῦν καὶ ποιοῦν ἐκ τοῦ δυνάμει θερμοῦ ἐνεργείᾳ θερμόν. δηλὸν οὖν ὅτι τὸ κινοῦν οὐχ ὁμοίως ἔχει, ἀλλ' ὅτε μὲν ἐγγύτερον ὅτε δὲ πορρώτερον τοῦ ἀλλοιουμένου ἐστίν. ταῦτα δ' ἄνευ φορᾶς οὐκ ἐνδέχεται ὑπάρχειν. εἰ ἄρα ἀνάγκη αἰεὶ κίνησιν εἶναι, ἀνάγκη καὶ φορὰν αἰεὶ εἶναι πρώτην τῶν κινήσεων, καὶ φορᾶς, εἰ ἔστιν ἢ μὲν πρώτη ἢ δ' ὑστέρα, τὴν πρώτην. ἔτι δὲ πάντων τῶν παθημάτων ἀρχὴ πύκνωσις καὶ μάνωσις· καὶ γὰρ βαρὺ καὶ κοῦφον καὶ μαλακὸν καὶ σκληρὸν καὶ θερμὸν καὶ ψυχρὸν πυκνότητες δοκοῦσιν καὶ ἀραιότητες εἶναί τινες. πύκνωσις δὲ καὶ μάνωσις σύγκρισις καὶ διάκρισις, καθ' ἧς γένεσις καὶ φθορὰ λέγεται τῶν οὐσιῶν. συγκρινόμενα δὲ καὶ διακρινόμενα ἀνάγκη κατὰ τόπον μεταβάλλειν. ἀλλὰ μὴν καὶ τοῦ αὐξανομένου καὶ φθίνοντος μεταβάλλει κατὰ τόπον τὸ μέγεθος.

ἔτι καὶ ἐντεῦθεν ἐπισκοποῦσιν ἔσται φανερόν ὅτι ἡ φορὰ πρώτη. τὸ γὰρ πρῶτον, ὥσπερ ἐφ' ἐτέρων, οὕτω καὶ ἐπὶ κινήσεως ἂν λέγοιτο πλεοναχῶς. λέγεται δὲ πρότερον οὗ τε μὴ ὄντος οὐκ ἔσται τᾶλλα, ἐκεῖνο δὲ ἄνευ τῶν ἄλλων, καὶ τὸ τῷ χρόνῳ, καὶ τὸ κατ' οὐσίαν. ὥστ' ἐπεὶ κίνησιν μὲν ἀναγκαῖον εἶναι συνεχῶς, εἴη δ' ἂν συνεχῶς ἢ συνεχῆς οὕσα ἢ ἐφεξῆς, μᾶλλον δ' ἢ συνεχῆς, καὶ βέλτιον συνεχῇ ἢ ἐφεξῆς εἶναι, τὸ δὲ βέλτιον αἰεὶ ὑπολαμβάνομεν ἐν τῇ φύσει ὑπάρχειν, ἂν ἢ δυνατόν, δυνατόν δὲ συνεχῇ εἶναι (δειχθήσεται δ'

ὑστερον· νῦν δὲ τοῦτο ὑποκείσθω), καὶ ταύτην οὐδεμίαν ἄλλην οἶόν τε εἶναι ἀλλ’ ἢ φορὰν, ἀνάγκη τὴν φορὰν εἶναι πρώτην. οὐδεμία γὰρ ἀνάγκη οὔτε αὖξεσθαι οὔτε ἀλλοιοῦσθαι τὸ φερόμενον, οὐδὲ δὴ γίνεσθαι ἢ φθείρεσθαι· τούτων δὲ οὐδεμίαν ἐνδέχεται τῆς συνεχοῦς μὴ οὔσης, ἣν κινεῖ τὸ πρῶτον κινοῦν.

ἔτι χρόνῳ πρώτην· τοῖς γὰρ αἰδίοις μόνον ἐνδέχεται κινεῖσθαι ταύτην. ἀλλ’ ἐφ’ ἐνὸς μὲν ὅτουοῦν τῶν ἐχόντων γένεσιν τὴν φορὰν ἀναγκαῖον ὑστάτην εἶναι τῶν κινήσεων· μετὰ γὰρ τὸ γενέσθαι πρῶτον ἀλλοιώσεις καὶ αὖξεις, φορὰ δ’ ἤδη τετελειωμένων κινήσις ἐστίν. (261a.) ἀλλ’ ἕτερον ἀνάγκη κινούμενον εἶναι κατὰ φορὰν πρότερον, ὃ καὶ τῆς γενέσεως αἴτιον ἔσται τοῖς γιγνομένοις, οὐ γιγνόμενον, οἶον τὸ γεννησαν τοῦ γεννηθέντος, ἐπεὶ δόξειέ γ’ ἂν ἡ γένεσις εἶναι πρώτη τῶν κινήσεων διὰ τοῦτο, ὅτι γενέσθαι δεῖ τὸ πρᾶγμα πρῶτον. τὸ δ’ ἐφ’ ἐνὸς μὲν ὅτουοῦν τῶν γιγνομένων οὕτως ἔχει, ἀλλ’ ἕτερον ἀναγκαῖον πρότερόν τι κινεῖσθαι τῶν γιγνομένων ὃν αὐτὸ καὶ μὴ γιγνόμενον, καὶ τούτου ἕτερον πρότερον. ἐπεὶ δὲ γένεσιν ἀδύνατον εἶναι πρώτην (πάντα γὰρ ἂν εἴη τὰ κινούμενα φθαρτά), δῆλον ὡς οὐδὲ τῶν ἐφεξῆς κινήσεων οὐδεμία προτέρα· λέγω δ’ ἐφεξῆς αὖξεις, εἴτ’ ἀλλοιώσιν καὶ φθί σιν καὶ φθοράν· πᾶσαι γὰρ ὑστεραι γενέσεως, ὥστ’ εἰ μὴδὲ γένεσις προτέρα φορᾶς, οὐδὲ τῶν ἄλλων οὐδεμία μεταβολῶν.

ὅλως τε φαίνεται τὸ γιγνόμενον ἀτελὲς καὶ ἐπ’ ἀρχὴν ἰόν, ὥστε τὸ τῇ γενέσει ὑστερον τῇ φύσει πρότερον εἶναι. τελευταῖον δὲ φορὰ πᾶσιν ὑπάρχει τοῖς ἐν γενέσει. διὸ τὰ μὲν ὅλως ἀκίνητα τῶν ζώντων δι’ ἔνδειαν [τοῦ ὀργάνου], οἶον τὰ φυτὰ καὶ πολλὰ γένη τῶν ζώων, τοῖς δὲ τελειομένοις ὑπάρχει. ὥστ’ εἰ μᾶλλον ὑπάρχει φορὰ τοῖς μᾶλλον ἀπειληφόσιν τὴν φύσιν, καὶ ἡ κίνησις αὕτη πρώτη τῶν ἄλλων ἂν εἴη κατ’ οὐσίαν, διὰ τε ταῦτα καὶ διότι ἥκιστα τῆς οὐσίας ἐξίσταται τὸ κινούμενον τῶν κινήσεων ἐν τῷ φέρεσθαι· κατὰ μόνην γὰρ οὐδὲν μεταβάλλει τοῦ εἶναι, ὥσπερ ἀλλοιουμένου μὲν τὸ ποιόν, αὖξανομένου δὲ καὶ φθίνοντος τὸ ποσόν. μάλιστα δὲ δῆλον ὅτι τὸ κινοῦν αὐτὸ αὐτὸ μάλιστα ταύτην κινεῖ κυρίως, τὴν κατὰ τόπον· καίτοι φαμέν τοῦτο εἶναι τῶν κινουμένων καὶ κινούντων ἀρχὴν καὶ πρῶτον τοῖς κινουμένοις, τὸ αὐτὸ αὐτὸ κινοῦν.

ὅτι μὲν τοίνυν τῶν κινήσεων ἡ φορὰ πρώτη, φανερόν ἐκ τούτων· τίς δὲ φορὰ πρώτη, νῦν δεικτέον. ἅμα δὲ καὶ τὸ νῦν καὶ πρότερον ὑποτεθέν, ὅτι ἐνδέχεται τινα κίνησιν εἶναι συνεχῇ καὶ αἰδίον,

φανερὸν ἔσται τῇ αὐτῇ μεθόδῳ. ὅτι μὲν οὖν τῶν ἄλλων κινήσεων οὐδεμίαν ἐνδέχεται συνεχῇ εἶναι, ἐκ τῶνδε φανερόν. ἅπασαι γὰρ ἐξ ἀντικειμένων εἰς ἀντικείμενά εἰσιν αἱ κινήσεις καὶ μεταβολαί, οἷον γενέσει μὲν καὶ φθορᾷ τὸ ὄν καὶ τὸ μὴ ὄν ὅροι, ἀλλοιώσει δὲ τὰ ἐναντία πάθῃ, αὐξήσει δὲ καὶ φθίσει ἢ μέγεθος καὶ μικρότης ἢ τελειότης μεγέθους καὶ ἀτέλεια· ἐναντία δ' αἱ (261b.) εἰς τὰ ἐναντία. τὸ δὲ μὴ αἰεὶ κινούμενον τήνδε τὴν κίνησιν, ὄν δὲ πρότερον, ἀνάγκη πρότερον ἡρεμεῖν. φανερόν οὖν ὅτι ἡρεμήσει ἐν τῷ ἐναντίῳ τὸ μεταβάλλον. ὁμοίως δὲ καὶ ἐπὶ τῶν μεταβολῶν· ἀντίκειται γὰρ φθορὰ καὶ γενέσεις ἀπλῶς καὶ ἡ καθ' ἕκαστον τῇ καθ' ἕκαστον. ὥστ' εἰ ἀδύνατον ἅμα μεταβάλλειν τὰς ἀντικειμένας, οὐκ ἔσται συνεχῆς ἡ μεταβολή, ἀλλὰ μεταξὺ ἔσται αὐτῶν χρόνος. οὐδὲν γὰρ διαφέρει ἐναντίας ἢ μὴ ἐναντίας εἶναι τὰς κατ' ἀντίφασιν μεταβολάς, εἰ μόνον ἀδύνατον ἅμα τῷ αὐτῷ παρεῖναι (τοῦτο γὰρ τῷ λόγῳ οὐδὲν χρήσιμον), οὐδ' εἰ μὴ ἀνάγκη ἡρεμῆσαι ἐν τῇ ἀντιφάσει, μηδ' ἐστὶν μεταβολὴ ἡρεμίας ἐναντίον (οὐ γὰρ ἴσως ἡρεμεῖ τὸ μὴ ὄν, ἡ δὲ φθορὰ εἰς τὸ μὴ ὄν), ἀλλ' εἰ μόνον μεταξὺ γίνεταί χρόνος· οὕτω γὰρ οὐκ ἔστιν ἡ μεταβολὴ συνεχῆς· οὐδὲ γὰρ ἐν τοῖς πρότερον ἢ ἐναντίωσις χρήσιμον, ἀλλὰ τὸ μὴ ἐνδέχεσθαι ἅμα ὑπάρχειν. οὐ δεῖ δὲ ταράττεσθαι ὅτι τὸ αὐτὸ πλείοσιν ἔσται ἐναντίον, οἷον ἡ κίνησις καὶ στάσει καὶ κινήσει τῇ εἰς τοῦναντίον, ἀλλὰ μόνον τοῦτο λαμβάνειν, ὅτι ἀντίκειται πῶς καὶ τῇ κινήσει καὶ τῇ ἡρεμίας ἢ κίνησις ἢ ἐναντία, καθάπερ τὸ ἴσον καὶ τὸ μέτριον τῷ ὑπερέχοντι καὶ τῷ ὑπερεχομένῳ, καὶ ὅτι οὐκ ἐνδέχεται ἅμα τὰς ἀντικειμένας οὔτε κινήσεις οὔτε μεταβολάς ὑπάρχειν. ἔτι δ' ἐπὶ τε τῆς γενέσεως καὶ τῆς φθορᾶς καὶ παντελῶς ἄτοπον ἂν εἶναι δόξειεν, εἰ γενόμενον εὐθὺς ἀνάγκη φθαρῆναι καὶ μηδένα χρόνον διαμεῖναι. ὥστε ἐκ τούτων ἂν ἡ πίστις γένοιτο ταῖς ἄλλαις· φυσικὸν γὰρ τὸ ὁμοίως ἔχειν ἐν ἀπάσαις.

Ὅτι δ' ἐνδέχεται εἶναί τινα ἄπειρον, μίαν οὖσαν καὶ συνεχῇ, καὶ αὕτη ἐστὶν ἡ κύκλω, λέγωμεν νῦν. πᾶν μὲν γὰρ κινεῖται τὸ φερόμενον ἢ κύκλω ἢ εὐθεῖαν ἢ μικτήν, ὥστ' εἰ μὴδ' ἐκείνων ἢ ἑτέρα συνεχῆς, οὐδὲ τὴν ἐξ ἀμφοῖν οἷόν τ' εἶναι συγκειμένην· ὅτι δὲ τὸ φερόμενον τὴν εὐθεῖαν καὶ πεπερασμένην οὐ φέρεται συνεχῶς, δῆλον· ἀνακάμπει γάρ, τὸ δ' ἀνακάμπτον τὴν εὐθεῖαν τὰς ἐναντίας κινεῖται κινήσεις· ἐναντία γὰρ κατὰ τόπον ἢ ἄνω τῇ κάτω καὶ ἢ εἰς τὸ πρόσθεν τῇ εἰς τοῦπισθεν καὶ ἢ εἰς ἀριστερὰ τῇ εἰς δεξιὰ· τόπου γὰρ ἐναντιώσεις αὗται. τίς δ' ἐστὶν ἡ μία καὶ (262a.) συνεχῆς κινήσις, διώρισται πρότερον, ὅτι ἡ τοῦ ἐνὸς καὶ ἐν ἐνὶ χρόνῳ καὶ ἐν ἀδιαφόρῳ κατ' εἶδος (τρία γὰρ ἦν, τὸ τε κινούμενον, οἷον ἄνθρωπος ἢ θεός, καὶ ὅτε, οἷον χρόνος, καὶ τρίτον τὸ ἐν ᾧ· τοῦτο δ' ἐστὶν τόπος ἢ πάθος ἢ εἶδος ἢ μέγεθος). τὰ δ' ἐναντία διαφέρει τῷ εἶδει, καὶ οὐχ ἓν· τόπου δ' αἱ εἰρημέναι διαφοραί. σημεῖον δ' ὅτι ἐναντία ἡ κινήσις ἢ ἀπὸ τοῦ Α πρὸς τὸ Β τῇ ἀπὸ τοῦ Β πρὸς τὸ Α, ὅτι ἰσθᾶσιν καὶ παύουσιν ἀλλήλας, ἐὰν ἅμα γίνωνται. καὶ ἐπὶ κύκλου ὡσαύτως, οἷον ἢ ἀπὸ τοῦ Α ἐπὶ τὸ Β τῇ ἀπὸ τοῦ Α ἐπὶ τὸ Γ (ισθᾶσι γάρ, κἂν συνεχεῖς ᾧσιν καὶ μὴ γίγνηται ἀνάκαμψις, διὰ τὸ τὰναντία φθεῖρειν καὶ κωλύειν ἄλληλα)· ἀλλ' οὐχ ἢ εἰς τὸ πλάγιον τῇ ἄνω. μάλιστα δὲ φανερόν ὅτι ἀδύνατον εἶναι συνεχῇ τὴν ἐπὶ τῆς εὐθείας κίνησιν, ὅτι ἀνακάμπτον ἀναγκαῖον στῆναι, οὐ μόνον ἐπ' εὐθείας, ἀλλὰ κἂν κύκλον φέρηται. οὐ γὰρ ταῦτόν κύκλω φέρεσθαι καὶ κύκλον· ἔστιν γὰρ ὅτε μὲν συνεῖρειν κινούμενον, ὅτε δ' ἐπὶ τὸ αὐτὸ ἐλθὼν ὅθεν ὠρμήθη ἀνακάμψαι πάλιν. ὅτι δ' ἀνάγκη ἴστασθαι, ἢ πίστις οὐ μόνον ἐπὶ τῆς αἰσθήσεως ἀλλὰ καὶ ἐπὶ τοῦ λόγου. ἀρχὴ δὲ ἦδε. τριῶν γὰρ ὄντων, ἀρχῆς μέσου τελευτῆς, τὸ μέσον πρὸς ἐκάτερον ἄμφω ἐστίν, καὶ τῷ μὲν ἀριθμῷ ἓν, τῷ λόγῳ δὲ δύο. ἔτι δὲ ἄλλο ἐστὶν τὸ δυνάμει καὶ τὸ ἐνεργείᾳ, ὥστε τῆς εὐθείας τῶν ἐντὸς τῶν ἄκρων ὁτιοῦν σημεῖον δυνάμει μὲν ἐστὶ μέσον, ἐνεργείᾳ δ' οὐκ ἔστιν, ἐὰν μὴ διέλη ταύτη καὶ ἐπιστὰν πάλιν ἄρξῃται κινεῖσθαι· οὕτω δὲ τὸ μέσον ἀρχὴ γίγνεται καὶ τελευτῇ, ἀρχὴ μὲν τῆς ὕστερον, τελευτῇ δὲ τῆς πρώτης (λέγω δ' οἷον ἐὰν φερόμενον τὸ Α στῇ ἐπὶ τοῦ Β καὶ πάλιν φέρηται ἐπὶ τὸ Γ). ὅταν δὲ συνεχῶς φέρηται, οὔτε γεγονέναι οὔτε ἀπογεγονέναι οἷόν τε τὸ Α κατὰ τὸ Β σημεῖον, ἀλλὰ μόνον εἶναι ἐν

τὸν αὐτὸν δὲ τρόπον ἀπαντητέον καὶ πρὸς τοὺς ἐρωτῶντας τὸν Ζήνωνος λόγον, [καὶ ἀξιούντας,] εἰ αἰετὸ ἡμῖς διέναι δεῖ, ταῦτα δ' ἄπειρα, τὰ δ' ἄπειρα ἀδύνατον διεξελεῖν, ἢ ὡς τὸν αὐτὸν τοῦτον λόγον τινὲς ἄλλως ἐρωτῶσιν, ἀξιούντες ἅμα τῷ κινεῖσθαι τὴν

ἡμίσειαν πρότερον ἀριθμεῖν καθ' ἕκαστον γιγνόμενον τὸ ἥμισυ, ὥστε διελθόντος τὴν ὅλην ἄπειρον συμβαίνει ἡριθμηκέναι ἀριθμόν· τοῦτο δ' ὁμολογουμένως ἐστὶν ἀδύνατον. ἐν μὲν οὖν τοῖς πρώτοις λόγοις τοῖς περὶ κινήσεως ἐλύομεν διὰ τοῦ τὸν χρόνον ἄπειρα ἔχειν ἐν αὐτῷ· οὐδὲν γὰρ ἄτοπον εἰ ἐν ἀπείρῳ χρόνῳ ἄπειρα διέρχεται τις· ὁμοίως δὲ τὸ ἄπειρον ἐν τε τῷ μήκει ὑπάρχει καὶ ἐν τῷ χρόνῳ. ἀλλ' αὕτη ἡ λύσις πρὸς μὲν τὸν ἐρωτῶντα ἱκανῶς ἔχει (ἡρωτᾷτο γὰρ εἰ ἐν πεπερασμένῳ ἄπειρα ἐνδέχεται διεξελθεῖν ἢ ἀριθμῆσαι), πρὸς δὲ τὸ πρᾶγμα καὶ τὴν ἀλήθειαν οὐχ ἱκανῶς· ἂν γάρ τις ἀφόμενος τοῦ μήκους καὶ τοῦ ἐρωτᾶν εἰ ἐν πεπερασμένῳ χρόνῳ ἐνδέχεται ἄπειρα διεξελθεῖν, πυνθάνηται ἐπ' αὐτοῦ τοῦ χρόνου ταῦτα (ἔχει γὰρ ὁ χρόνος ἀπείρους διαιρέσεις), οὐκέτι ἱκανὴ ἔσται αὕτη ἡ λύσις, ἀλλὰ τὸ ἀληθὲς λεκτέον, ὅπερ εἵπομεν ἐν τοῖς ἄρτι λόγοις. ἐὰν γάρ τις τὴν συνεχῇ διαιρῇ εἰς δύο ἡμίση, οὗτος τῷ ἐνὶ σημείῳ ὥς δυσὶ χρήται· ποιεῖ γὰρ αὐτὸ ἀρχὴν καὶ τελευτήν. οὕτω δὲ ποιεῖ ὁ τε ἀριθμῶν καὶ ὁ εἰς τὰ ἡμίση διαιρῶν. οὕτω δὲ διαιροῦντος οὐκ ἔσται συνεχὴς οὐθ' ἡ γραμμὴ οὐθ' ἡ κίνησις· ἡ γὰρ συνεχὴς κίνησις συνεχοῦς ἐστίν, ἐν δὲ τῷ συνεχεῖ ἔνεστι μὲν ἄπειρα ἡμίση, ἀλλ' οὐκ ἐντελεχεία ἀλλὰ δυνάμει. ἂν δὲ ποιῇ ἐντελεχεία, οὐ ποιήσει συνεχῇ, ἀλλὰ στήσει, ὅπερ ἐπὶ τοῦ ἀριθμοῦντος τὰ ἡμίσεια φανερόν ἐστιν ὅτι συμβαίνει· τὸ γὰρ ἐν σημείῳ ἀνάγκη (263b.) αὐτῷ ἀριθμεῖν δύο· τοῦ μὲν γὰρ ἐτέρου τελευτὴ ἡμίσεος τοῦ δ' ἐτέρου ἀρχὴ ἔσται, ἂν μὴ μίαν ἀριθμῇ τὴν συνεχῇ, ἀλλὰ δύο ἡμισείας. ὥστε λεκτέον πρὸς τὸν ἐρωτῶντα εἰ ἐνδέχεται ἄπειρα διεξελθεῖν ἢ ἐν χρόνῳ ἢ ἐν μήκει, ὅτι ἔστιν ὥς, ἔστιν δ' ὥς οὐ. ἐντελεχεία μὲν γὰρ ὄντα οὐκ ἐνδέχεται, δυνάμει δὲ ἐνδέχεται· ὁ γὰρ συνεχῶς κινούμενος κατὰ συμβεβηκὸς ἄπειρα διελήλυθεν, ἀπλῶς δ' οὐ· συμβέβηκε γὰρ τῇ γραμμῇ ἄπειρα ἡμίσεια εἶναι, ἢ δ' οὐσία ἐστὶν ἑτέρα καὶ τὸ εἶναι. δηλὸν δὲ καὶ ὅτι ἐὰν μὴ τις ποιῇ τοῦ χρόνου τὸ διαιροῦν σημεῖον τὸ πρότερον καὶ ὕστερον ἀεὶ τοῦ ὑστέρου τῷ πράγματι, ἔσται ἅμα τὸ αὐτὸ ὄν καὶ οὐκ ὄν, καὶ ὅτε γέγονεν οὐκ ὄν. τὸ σημεῖον μὲν οὖν ἀμφοῖν κοινόν, καὶ τοῦ προτέρου καὶ τοῦ ὑστέρου, καὶ ταυτὸν καὶ ἐν ἀριθμῷ, λόγῳ δ' οὐ ταυτόν (τοῦ μὲν γὰρ τελευτῇ, τοῦ δ' ἀρχῇ)· τῷ δὲ πράγματι ἀεὶ τοῦ ὑστέρου πάθους ἐστίν. χρόνος ἐφ' ᾧ ΑΓΒ, πρᾶγμα ἐφ' ᾧ Δ. τοῦτο ἐν μὲν τῷ Α χρόνῳ λευκόν, ἐν δὲ τῷ Β οὐ λευκόν· ἐν τῷ ἅρα Γ λευκόν καὶ οὐ λευκόν. ἐν ὁπωῦν γὰρ τοῦ Α λευκόν ἀληθὲς εἰπεῖν, εἰ πάντα τὸν χρόνον τοῦτον ἦν λευκόν, καὶ ἐν τῷ Β οὐ λευκόν· τὸ δὲ Γ ἐν ἀμφοῖν.

οὐκ ἄρα δοτέον ἐν παντί, ἀλλὰ πλὴν τοῦ τελευταίου νῦν ἐφ' οὗ τὸ Γ· τοῦτο δ' ἤδη τοῦ ὑστερου. καὶ εἰ ἐγίνετο οὐ λευκὸν καὶ ἐφθείρετο <τὸ> λευκὸν ἐν τῷ Α παντί, γέγονεν ἢ ἐφθαρται ἐν τῷ Γ. ὥστε λευκὸν ἢ μὴ λευκὸν ἐν ἐκείνῳ πρῶτον ἀληθὲς εἰπεῖν, ἢ ὅτε γέγονεν οὐκ ἔσται, καὶ ὅτε ἐφθαρται ἔσται, ἢ ἅμα λευκὸν καὶ οὐ λευκὸν καὶ ὅλως ὄν καὶ μὴ ὄν ἀνάγκη εἶναι. εἰ δ' ὁ ἂν ἦ πρότερον μὴ ὄν, ἀνάγκη γίνεσθαι ὄν, καὶ ὅτε γίνεταί μὴ ἔστιν, οὐχ οἷόν τε εἰς ἀτόμους χρόνους διαιρεῖσθαι τὸν χρόνον. εἰ γὰρ ἐν τῷ Α τὸ Δ ἐγίνετο λευκόν, γέγονε δ' ἅμα καὶ ἔστιν ἐν ἐτέρῳ ἀτόμῳ χρόνῳ ἐχομένῳ δ', ἐν τῷ Β-εἰ ἐν τῷ Α ἐγίνετο, οὐκ ἦν, ἐν δὲ τῷ Β ἐστί-, γένεσιν δεῖ τινὰ εἶναι μεταξύ, ὥστε καὶ (264a.) χρόνον ἐν ᾧ ἐγίνετο. οὐ γὰρ ὁ αὐτὸς ἔσται λόγος καὶ τοῖς μὴ ἄτομα λέγουσιν, ἀλλ' αὐτοῦ τοῦ χρόνου, ἐν ᾧ ἐγίνετο, γέγονε καὶ ἔστιν ἐν τῷ ἐσχάτῳ σημείῳ, οὐ οὐδὲν ἐχόμενόν ἐστιν οὐδ' ἐφεξῆς· οἱ δὲ ἄτομοι χρόνοι ἐφεξῆς. φανερόν δ' ὅτι εἰ ἐν τῷ Α ὅλῳ χρόνῳ ἐγίνετο, οὐκ ἔστιν πλείων χρόνος ἐν ᾧ γέγονεν καὶ ἐγίνετο ἢ ἐν ᾧ ἐγίνετο μόνον παντί.

οἷς μὲν οὖν ἂν τις ὡς οἰκείῳ πιστεύσειε λόγοις, οὗτοι καὶ τοιοῦτοί τινες εἰσιν· λογικῶς δ' ἐπισκοποῦσι καὶ ἐκ τῶνδε δόξειέ τῳ ταῦτο τοῦτο συμβαίνειν. ἅπαν γὰρ τὸ κινούμενον συνεχῶς, ἂν ὑπὸ μηδενὸς ἐκκρούηται, εἰς ὅπερ ἦλθεν κατὰ τὴν φορὰν, εἰς τοῦτο καὶ ἐφέρετο πρότερον, οἷον εἰ ἐπὶ τὸ Β ἦλθε, καὶ ἐφέρετο ἐπὶ τὸ Β, καὶ οὐχ ὅτε πλησίον ἦν, ἀλλ' εὐθὺς ὡς ἤρξατο κινεῖσθαι· τί γὰρ μᾶλλον νῦν ἢ πρότερον; ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων. τὸ δὴ ἀπὸ τοῦ Α [ἐπὶ τὸ Γ] φερόμενον, ὅταν ἐπὶ τὸ Γ ἔλθῃ, πάλιν ἥξει ἐπὶ τὸ Α συν εἰς κινούμενον. ὅτε ἄρα ἀπὸ τοῦ Α φέρεται πρὸς τὸ Γ, τότε καὶ εἰς τὸ Α φέρεται τὴν ἀπὸ τοῦ Γ κίνησιν, ὥσθ' ἅμα τὰς ἐναντίας· ἐναντία γὰρ αἱ κατ' εὐθεΐαν. ἅμα δὲ καὶ ἐκ τούτου μεταβάλλει ἐν ᾧ οὐκ ἔστιν. εἰ οὖν τοῦτ' ἀδύνατον, ἀνάγκη ἵστασθαι ἐπὶ τοῦ Γ. οὐκ ἄρα μία ἡ κίνησις· ἢ γὰρ διαλαμ βανομένη στάσει οὐ μία.

ἔτι καὶ ἐκ τῶνδε φανερόν καθόλου μᾶλλον περὶ πάσης κινήσεως. εἰ γὰρ ἅπαν τὸ κινούμενον τῶν εἰρημένων τινὰ κινεῖται κινήσεων καὶ ἡρεμεῖ τῶν ἀντικειμένων ἡρεμιῶν (οὐ γὰρ ἦν ἄλλη παρὰ ταύτας), τὸ δὲ μὴ αἰεὶ κινούμενον τήνδε τὴν κίνησιν (λέγω δ' ὅσαι ἕτεραι τῷ εἶδει, καὶ μὴ εἴ τι μῦριόν ἐστιν τῆς ὅλης) ἀνάγκη πρότερον ἡρεμεῖν τὴν ἀντικειμένην ἡρεμίαν (ἢ γὰρ ἡρεμία στέρησις κινήσεως)· εἰ οὖν ἐναντία μὲν κινήσεις αἱ κατ' εὐθεΐαν, ἅμα δὲ μὴ ἐνδέχεται κινεῖσθαι τὰς ἐναντίας, τὸ ἀπὸ τοῦ Α πρὸς τὸ Γ φερόμενον οὐκ ἂν φέροιτο ἅμα

καὶ ἀπὸ τοῦ Γ πρὸς τὸ Α· ἐπεὶ δ' οὐχ ἅμα φέρεται, κινήσεται δὲ ταύτην τὴν κίνησιν, ἀνάγκη πρότερον ἡρεμῆσαι πρὸς τῷ Γ· αὕτη γὰρ ἦν ἡ ἀντικειμένη ἡρεμία τῇ ἀπὸ τοῦ Γ κινήσει. δηλὸν τοίνυν (264b.) ἐκ τῶν εἰρημένων ὅτι οὐκ ἔσται συνεχῆς ἡ κίνησις.

ἔτι δὲ καὶ ὁδε ὁ λόγος μᾶλλον οἰκεῖος τῶν εἰρημένων. ἅμα γὰρ ἔφθαρται τὸ οὐ λευκὸν καὶ γέγονε λευκόν. εἰ οὖν συνεχῆς ἡ ἀλλοιώσις εἰς λευκὸν καὶ ἐκ λευκοῦ καὶ μὴ μένει τινὰ χρόνον, ἅμα ἔφθαρται τὸ οὐ λευκὸν καὶ γέγονε λευκὸν καὶ γέγονεν οὐ λευκόν· τριῶν γὰρ ἔσται ὁ αὐτὸς χρόνος.

ἔτι οὐκ εἰ συνεχῆς ὁ χρόνος, καὶ ἡ κίνησις, ἀλλ' ἐφεξῆς. πῶς δ' ἂν εἴη τὸ ἔσχατον τὸ αὐτὸ τῶν ἐναντίων, οἷον λευκότητος καὶ μελανίας;

ἡ δ' ἐπὶ τῆς περιφεροῦς ἔσται μία καὶ συνεχῆς· οὐθὲν γὰρ ἀδύνατον συμβαίνει· τὸ γὰρ ἐκ τοῦ Α κινούμενον ἅμα κινήσεται εἰς τὸ Α κατὰ τὴν αὐτὴν πρόθεσιν (εἰς ὃ γὰρ ἤξει, καὶ κινεῖται εἰς τοῦτο), ἀλλ' οὐχ ἅμα κινήσεται τὰς ἐναντίας οὐδὲ τὰς ἀντικειμένας· οὐ γὰρ ἅπασα ἡ εἰς τοῦτο τῇ ἐκ τούτου ἐναντία οὐδ' ἀντικειμένη, ἀλλ' ἐναντία μὲν ἡ κατ' εὐθεῖαν (ταύτη γὰρ ἔστιν ἐναντία κατὰ τόπον, οἷον τὰ κατὰ διάμετρον· ἀπέχει γὰρ πλεῖστον), ἀντικειμένη δὲ ἡ κατὰ τὸ αὐτὸ μῆκος. ὥστ' οὐδὲν κωλύει συνεχῶς κινεῖσθαι καὶ μηδένα χρόνον διαλείπειν· ἡ μὲν γὰρ κύκλω κινήσις ἐστὶν ἀφ' αὐτοῦ εἰς αὐτό, ἡ δὲ κατ' εὐθεῖαν ἀφ' αὐτοῦ εἰς ἄλλο· καὶ ἡ μὲν ἐν τῷ κύκλω οὐδέποτε ἐν τοῖς αὐτοῖς, ἡ δὲ κατ' εὐθεῖαν πολλάκις ἐν τοῖς αὐτοῖς. τὴν μὲν οὖν ἀεὶ ἐν ἄλλῳ καὶ ἄλλῳ γιγνομένην ἐνδέχεται κινεῖσθαι συνεχῶς, τὴν δ' ἐν τοῖς αὐτοῖς πολλάκις οὐκ ἐνδέχεται· ἀνάγκη γὰρ ἅμα κινεῖσθαι τὰς ἀντικειμένας. ὥστ' οὐδ' ἐν τῷ ἡμικυκλίῳ οὐδ' ἐν ἄλλῃ περιφερείᾳ οὐδεμιᾷ ἐνδέχεται συνεχῶς κινεῖσθαι· πολλάκις γὰρ ἀνάγκη ταυτὰ κινεῖσθαι καὶ τὰς ἐναντίας μεταβάλλειν μεταβολάς· οὐ γὰρ συνάπτει τῇ ἀρχῇ τὸ πέρας. ἡ δὲ τοῦ κύκλου συνάπτει, καὶ ἔστι μόνῃ τέλειος.

φανερὸν δὲ ἐκ ταύτης τῆς διαιρέσεως ὅτι οὐδὲ τὰς ἄλλας ἐνδέχεται κινήσεις εἶναι συνεχεῖς· ἐν ἀπάσαις γὰρ ταυτὰ συμβαίνει κινεῖσθαι πολλάκις, οἷον ἐν ἀλλοιώσει τὰ μεταξύ, καὶ ἐν τῇ τοῦ ποσοῦ τὰ ἀνὰ μέσον μεγέθη, καὶ ἐν γενέσει καὶ φθορᾷ ὡσαύτως· οὐδὲν γὰρ διαφέρει ὀλίγα ἢ πολλὰ ποιῆσαι, ἐν (265a.) οἷς ἐστὶν ἡ μεταβολή, οὐδὲ μεταξὺ θεῖναι τι ἢ ἀφελεῖν· ἀμφοτέρως γὰρ συμβαίνει ταυτὰ κινεῖσθαι πολλάκις. δηλὸν οὖν ἐκ τούτων ὅτι οὐδ' οἱ φυσιολόγοι καλῶς λέγουσιν οἱ πάντα τὰ αἰσθητὰ κινεῖσθαι

φάσκοντες αεί· κινεῖσθαι γὰρ ἀνάγκη τούτων τινὰ τῶν κινήσεων, καὶ μάλιστα κατ' ἐκείνους [ἐστὶν] ἀλλοιοῦσθαι· ῥεῖν γάρ φασιν αἰεὶ καὶ φθίνειν, ἔτι δὲ καὶ τὴν γένεσιν καὶ τὴν φθορὰν ἀλλοίωσιν λέγουσιν. ὁ δὲ λόγος νῦν εἶρηκε καθόλου περὶ πάσης κινήσεως ὅτι κατ' οὐδεμίαν κίνησιν ἐνδέχεται κινεῖσθαι συνεχῶς ἔξω τῆς κύκλω, ὥστε οὔτε κατ' ἀλλοίωσιν οὔτε κατ' αὔξησιν. ὅτι μὲν οὖν οὗτ' ἀπειρός ἐστι μεταβολὴ οὐδεμία οὔτε συνεχῆς ἔξω τῆς κύκλω φορᾶς ἔστω τοσαῦθ' ἡμῖν εἰρημένα.

Κεφάλαιο 9

Ὅτι δὲ τῶν φορῶν ἡ κυκλοφορία πρώτη, δηλον. πᾶσα γὰρ φορά, ὥσπερ καὶ πρότερον εἵπομεν, ἢ κύκλῳ ἢ ἐπ' εὐθείας ἢ μικτή. ταύτης δὲ ἀνάγκη προτέρας εἶναι ἐκείνας· ἐξ ἐκείνων γὰρ συνέστηκεν. τῆς δ' εὐθείας ἢ κύκλῳ· ἀπλῇ γὰρ καὶ τέλειος μᾶλλον. ἄπειρον μὲν γὰρ οὐκ ἔστιν εὐθεῖαν φέρεσθαι (τὸ γὰρ οὕτως ἄπειρον οὐκ ἔστιν· ἅμα δ' οὐδ' εἰ ἦν, ἐκινεῖτ' ἂν οὐδέν· οὐ γὰρ γίνεταί τὸ ἀδύνατον, διελθεῖν δὲ τὴν ἄπειρον ἀδύνατον)· ἡ δ' ἐπὶ τῆς πεπερασμένης ἀνακάμπτουσα μὲν συνθετὴ καὶ δύο κινήσεις, μὴ ἀνακάμπτουσα δὲ ἀτελὴς καὶ φθαρτή. πρότερον δὲ καὶ φύσει καὶ λόγῳ καὶ χρόνῳ τὸ τέλειον μὲν τοῦ ἀτελοῦς, τοῦ φθαρτοῦ δὲ τὸ ἄφθαρτον. ἔτι προτέρα ἦν ἐνδέχεται αἰδῖον εἶναι τῆς μὴ ἐνδεχομένης· τὴν μὲν οὖν κύκλῳ ἐνδέχεται αἰδῖον εἶναι, τῶν δὲ ἄλλων οὔτε φορὰν οὔτε ἄλλην οὐδεμίαν· στάσιν γὰρ δεῖ γενέσθαι, εἰ δὲ στάσις, ἔφθαρται ἢ κίνησις. εὐλόγως δὲ συμβέβηκε τὸ τὴν κύκλῳ μίαν εἶναι καὶ συνεχῆ, καὶ μὴ τὴν ἐπ' εὐθείας· τῆς μὲν γὰρ ἐπ' εὐθείας ὥριστα καὶ ἀρχὴ καὶ τέλος καὶ μέσον, καὶ πάντ' ἔχει ἐν αὐτῇ, ὥστ' ἔστιν ὅθεν ἄρξεται τὸ κινούμενον καὶ οὗ τελευτήσει (πρὸς γὰρ τοῖς πέρασιν ἡρεμεῖ πᾶν, ἢ ὅθεν ἢ οὐ), τῆς δὲ περιφεροῦς ἀόριστα· τί γὰρ μᾶλλον ὁποιοιοῦν πέρας τῶν ἐπὶ τῆς γραμμῆς; ὁμοίως γὰρ ἕκαστον καὶ ἀρχὴ καὶ μέσον καὶ τέλος, ὥστ' αἰετὸς (265b.) εἶναι ἐν ἀρχῇ καὶ ἐν τέλει καὶ μηδέποτε. διὸ κινεῖται τε καὶ ἡρεμεῖ πῶς ἢ σφαῖρα· τὸν αὐτὸν γὰρ κατέχει τόπον. αἴτιον δ' ὅτι πάντα συμβέβηκε ταῦτα τῷ κέντρῳ· καὶ γὰρ ἀρχὴ καὶ μέσον τοῦ μεγέθους καὶ τέλος ἐστίν, ὥστε διὰ τὸ ἔξω εἶναι τοῦτο τῆς περιφερείας οὐκ ἔστιν ὅπου τὸ φερόμενον ἡρεμήσει ὡς διεληλυθός (αἰετὸς γὰρ φέρεται περὶ τὸ μέσον, ἀλλ' οὐ πρὸς τὸ ἔσχατον), διὰ δὲ τὸ τοῦτο μένειν αἰετὸς ἡρεμεῖ πῶς τὸ ὅλον καὶ κινεῖται συνεχῶς. συμβαίνει δ' ἀντιστρόφως· καὶ γὰρ ὅτι μέτρον τῶν κινήσεων ἡ περιφορά, πρώτην ἀναγκαῖον αὐτὴν εἶναι (ἅπαντα γὰρ μετρεῖται τῷ πρώτῳ), καὶ διότι πρώτη, μέτρον ἐστὶν τῶν ἄλλων. ἔτι δὲ καὶ ὁμαλῇ ἐνδέχεται εἶναι τὴν κύκλῳ μόνην· τὰ γὰρ ἐπ' εὐθείας ἀνωμαλῶς ἀπὸ τῆς ἀρχῆς φέρεται καὶ πρὸς τὸ τέλος· πάντα γὰρ ὅσῳ περ ἂν ἀφίστηται [πλεῖον] τοῦ ἡρεμοῦντος, φέρεται θάττον· τῆς δὲ κύκλῳ μόνης οὕτ' ἀρχὴ οὔτε τέλος ἐν αὐτῇ πέφυκεν, ἀλλ' ἐκτός. ὅτι δ' ἡ κατὰ τόπον φορὰ πρώτη τῶν κινήσεων, μαρτυροῦσι πάντες

ὅσοι περὶ κινήσεως πεποιήνται μνείαν· τὰς γὰρ ἀρχὰς αὐτῆς ἀποδιδόασιν τοῖς κινουῖσι τοιαύτην κίνησιν. διάκρισις γὰρ καὶ σύγκρισις κινήσεις κατὰ τόπον εἰσίν, οὕτω δὲ κινουῖσιν ἢ φιλία καὶ τὸ νεῖκος· τὸ μὲν γὰρ διακρίνει, τὸ δὲ συγκρίνει αὐτῶν. καὶ τὸν νοῦν δέ φησιν Ἀναξαγόρας διακρίνειν τὸν κινήσαντα πρῶτον. ὁμοίως δὲ καὶ ὅσοι τοιαύτην μὲν οὐδεμίαν αἰτίαν λέγουσιν, διὰ δὲ τὸ κενὸν κινεῖσθαι φασιν· καὶ γὰρ οὗτοι τὴν κατὰ τόπον κίνησιν κινεῖσθαι τὴν φύσιν λέγουσιν (ἡ γὰρ διὰ τὸ κενὸν κινήσις φορὰ ἐστίν καὶ ὡς ἐν τόπῳ), τῶν δ' ἄλλων οὐδεμίαν ὑπάρχειν τοῖς πρώτοις ἀλλὰ τοῖς ἐκ τούτων οἶονται· αὐξάνεσθαι γὰρ καὶ φθίνειν καὶ ἀλλοιοῦσθαι συγκρινομένων καὶ διακρινομένων τῶν ἀτόμων σωμάτων φασίν. τὸν αὐτὸν δὲ τρόπον καὶ ὅσοι διὰ πυκνότητα ἢ μανότητα κατασκευάζουσι γένεσιν καὶ φθοράν· συγκρίσει γὰρ καὶ διακρίσει ταῦτα διακοσμοῦσιν. ἔτι δὲ παρὰ τούτους οἱ τὴν ψυχὴν αἰτίαν ποιοῦντες κινήσεως· τὸ γὰρ αὐτὸ αὐτὸ κινοῦν ἀρχὴν εἶναί φασιν τῶν κινουμένων, κινεῖ δὲ τὸ ζῶον καὶ πᾶν τὸ ἔμ(266a.) ψυχον τὴν κατὰ τόπον αὐτὸ κίνησιν. καὶ κυρίως δὲ κινεῖσθαι φαμεν μόνον τὸ κινούμενον [τὴν] κατὰ τόπον [κίνησιν]· ἂν δ' ἡρεμῇ μὲν ἐν τῷ αὐτῷ, αὐξάνηται δ' ἢ φθίνη ἢ ἀλλοιούμενον τυγχάνη, πῇ κινεῖσθαι, ἀπλῶς δὲ κινεῖσθαι οὐ φαμεν. ὅτι μὲν οὖν αἰεὶ τε κινήσις ἦν καὶ ἔσται τὸν ἅπαντα χρόνον, καὶ τίς ἀρχὴ τῆς αἰδίου κινήσεως, ἔτι δὲ τίς πρώτη κινήσις, καὶ τίνα κίνησιν αἰδίου ἐνδέχεται μόνην εἶναι, καὶ τὸ κινοῦν πρῶτον ὅτι ἀκίνητον, εἴρηται.

Κεφάλαιο 10

“Οτι δὲ τοῦτ’ ἀμερὲς ἀναγκαῖον εἶναι καὶ μηδὲν ἔχειν μέγεθος, νῦν λέγωμεν, πρῶτον περὶ τῶν προτέρων αὐτοῦ διορίσαντες.

τούτων δ’ ἐν μὲν ἐστὶν ὅτι οὐχ οἷόν τε οὐδὲν πεπερασμένον κινεῖν ἄπειρον χρόνον. τρία γὰρ ἔστιν, τὸ κινεῖν, τὸ κινούμενον, τὸ ἐν ᾧ τρίτον, ὁ χρόνος. ταῦτα δὲ ἢ πάντα ἄπειρα ἢ πάντα πεπερασμένα ἢ ἓν, οἷον τὰ δύο ἢ τὸ ἓν. ἔστω δὴ τὸ Α τὸ κινεῖν, τὸ δὲ κινούμενον Β, χρόνος ἄπειρος ἐφ’ οὗ Γ. τὸ δὴ Δ τῆς Β κινεῖται τι μέρος, τὸ ἐφ’ οὗ Ε. οὐ δὴ ἐν ἴσῳ τῷ Γ· ἐν πλείονι γὰρ τὸ μείζον. ὥστ’ οὐκ ἄπειρος ὁ χρόνος ὁ τὸ Ζ. οὕτω δὴ τῇ Δ προστιθείς καταναλώσω τὸ Α καὶ τῇ Ε τὸ Β· τὸν δὲ χρόνον οὐ καταναλώσω ἀεὶ ἀφαιρῶν ἴσον· ἄπειρος γάρ· ὥστε ἡ πᾶσα Α τὴν ὅλην Β κινήσει ἐν πεπερασμένῳ χρόνῳ τοῦ Γ. οὐκ ἄρα οἷόν τε ὑπὸ πεπερασμένου κινεῖσθαι οὐδὲν ἄπειρον κίνησιν.

ὅτι μὲν οὖν οὐκ ἐνδέχεται τὸ πεπερασμένον ἄπειρον κινεῖν χρόνον, φανερόν· ὅτι δ’ ὅλως οὐκ ἐνδέχεται ἐν πεπερασμένῳ μεγέθει ἄπειρον εἶναι δύναμιν, ἐκ τῶνδε δῆλον. ἔστω γὰρ ἡ πλείων δύναμις ἀεὶ ἢ τὸ ἴσον ἐν ἐλάττονι χρόνῳ ποιοῦσα, οἷον θερμαίνουσα ἢ γλυκαίνουσα ἢ ῥιπτοῦσα καὶ ὅλως κινοῦσα. ἀνάγκη ἄρα καὶ ὑπὸ τοῦ πεπερασμένου μὲν ἄπειρον δ’ ἔχοντος δύναμιν πάσχειν τι τὸ πάσχον, καὶ πλείον ἢ ὑπ’ ἄλλου· πλείων γὰρ ἢ ἄπειρος. ἀλλὰ μὴν χρόνον γε οὐκ ἐνδέχεται εἶναι οὐδένα. εἰ γὰρ ἐστὶν ὁ ἐφ’ οὗ Α χρόνος ἐν ᾧ ἢ ἄπειρος ἰσχύς ἐθέρμανεν ἢ ἔωσεν, ἐν τῷ δὲ ΑΒ πεπερασμένη τις, πρὸς ταύτην (266b.) μείζω λαμβάνων ἀεὶ πεπερασμένην ἤξω ποτὲ εἰς τὸ ἐν τῷ Α χρόνῳ κεκινήκεναι· πρὸς πεπερασμένον γὰρ ἀεὶ προστιθείς ὑπερβαλῶ παντὸς ὀρισμένου, καὶ ἀφαιρῶν ἐλλείψω ὡσαύτως. ἐν ἴσῳ ἄρα χρόνῳ κινήσει τῇ ἀπείρῳ ἢ πεπερασμένη. τοῦτο δὲ ἀδύνατον· οὐδὲν ἄρα πεπερασμένον ἐνδέχεται ἄπειρον δύναμιν ἔχειν. οὐ τοίνυν οὐδ’ ἐν ἀπείρῳ πεπε(6)ρασμένην· καίτοι ἐνδέχεται ἐν ἐλάττονι μεγέθει πλείω δύναμιν εἶναι· ἀλλ’ ἔτι μᾶλλον ἐν μείζονι πλείω. ἔστω δὴ τὸ ἐφ’ οὗ ΑΒ ἄπειρον. τὸ δὴ ΒΓ ἔχει δύναμιν τινα, ἢ ἐν τινι χρόνῳ ἐκίνησεν τὴν Δ, ἐν τῷ χρόνῳ ἐφ’ οὗ ΕΖ. ἂν δὴ τῆς ΒΓ διπλασίαν λαμβάνω, ἐν ἡμίσει χρόνῳ τοῦ ΕΖ (ἔστω γὰρ αὕτη ἡ ἀναλογία), ὥστε ἐν τῷ ΖΘ κινήσει. οὐκοῦν οὕτω λαμβάνων ἀεὶ τὴν μὲν ΑΒ οὐδέποτε διέξειμι, τοῦ χρόνου δὲ τοῦ δοθέντος αἰεὶ ἐλάττω λήψομαι. ἄπειρος ἄρα ἢ δύναμις ἔσται· πάσης

γὰρ πεπερασμένης ὑπερβάλλει δυνάμεως, εἴ γε πάσης πεπερασμένης δυνάμεως ἀνάγκη πεπερασμένον εἶναι καὶ τὸν χρόνον (εἰ γὰρ ἓν τινὶ ἢ τοσηδί, ἢ μείζων ἐν ἐλάττονι μὲν ὠρισμένῳ δὲ χρόνῳ κινήσει, κατὰ τὴν ἀντιστροφὴν τῆς ἀναλογίας)· ἄπειρος δὲ πᾶσα δύναμις, ὥσπερ καὶ πλῆθος καὶ μέγεθος τὸ ὑπερβάλλον παντὸς ὠρισμένου. ἔστιν δὲ καὶ ὧδε δεῖξαι τοῦτο· ληψόμεθα γάρ τινα δύναμιν τὴν αὐτὴν τῷ γένει τῇ ἐν τῷ ἀπείρῳ μεγέθει, ἐν πεπερασμένῳ μεγέθει οὖσαν, ἣ καταμετρήσει τὴν ἐν τῷ ἀπείρῳ πεπερασμένην δύναμιν.

ὅτι μὲν οὖν οὐκ ἐνδέχεται ἄπειρον εἶναι δύναμιν ἐν πεπερασμένῳ μεγέθει, οὐδ' ἐν ἀπείρῳ πεπερασμένην, ἐκ τούτων δῆλον. περὶ δὲ τῶν φερομένων ἔχει καλῶς διαπορῆσαί τινα ἀπορίαν πρῶτον. εἰ γὰρ πᾶν τὸ κινούμενον κινεῖται ὑπὸ τινός, ὅσα μὴ αὐτὰ ἑαυτὰ κινεῖ, πῶς κινεῖται ἓνα συνεχῶς μὴ ἀπτομένου τοῦ κινήσαντος, οἷον τὰ ῥιπτούμενα; εἰ δ' ἅμα κινεῖ καὶ ἄλλο τι ὁ κινήσας, οἷον τὸν ἀέρα, ὃς κινούμενος κινεῖ, ὁμοίως ἀδύνατον τοῦ πρώτου μὴ ἀπτομένου μηδὲ κινουντος κινεῖσθαι, ἀλλ' ἅμα πάντα <καὶ> κινεῖσθαι καὶ (267a.) πεπαῦσθαι ὅταν τὸ πρῶτον κινεῖται παύσῃται, καὶ εἰ ποιεῖ, ὥσπερ ἡ λίθος, οἷόν τε κινεῖν ὁ ἐκίνησεν. ἀνάγκη δὲ τοῦτο μὲν λέγειν, ὅτι τὸ πρῶτον κινήσαν ποιεῖ οἷόν τε κινεῖν ἢ τὸν ἀέρα [τοιουτον] ἢ τὸ ὕδωρ ἢ τι ἄλλο τοιουτον ὁ πέφυκε κινεῖν καὶ κινεῖσθαι· ἀλλ' οὐχ ἅμα παύεται κινεῖν καὶ κινούμενον, ἀλλὰ κινούμενον μὲν ἅμα ὅταν ὁ κινῶν παύσῃται κινῶν, κινεῖν δὲ ἔτι ἐστίν. διὸ καὶ κινεῖ τι ἄλλο ἐχόμενον· καὶ ἐπὶ τούτου ὁ αὐτὸς λόγος. παύεται δέ, ὅταν αἰεὶ ἐλάττων ἢ δύναμις τοῦ κινεῖν ἐγγίγνηται τῷ ἐχομένῳ. τέλος δὲ παύεται, ὅταν μηκέτι ποιῇ τὸ πρότερον κινεῖν, ἀλλὰ κινούμενον μόνον. ταῦτα δ' ἀνάγκη ἅμα παύεσθαι, τὸ μὲν κινεῖν τὸ δὲ κινούμενον, καὶ τὴν ὅλην κίνησιν. αὕτη μὲν οὖν ἐν τοῖς ἐνδεχομένοις ὅτε μὲν κινεῖσθαι ὅτε δ' ἡρεμεῖν ἐγγίγνεται ἢ κίνησις, καὶ οὐ συνεχής, ἀλλὰ φαίνεται· ἢ γὰρ ἐφεξῆς ὄντων ἢ ἀπτομένων ἐστίν· οὐ γὰρ ἓν τὸ κινεῖν, ἀλλ' ἐχόμενα ἀλλήλων. διὸ ἐν ἀέρι καὶ ὕδατι γίγνεται ἢ τοιαύτη κίνησις, ἣν λέγουσιν τινες ἀντιπερίστασιν εἶναι. ἀδύνατον δὲ ἄλλως τὰ ἀπορηθέντα λύειν, εἰ μὴ τὸν εἰρημένον τρόπον. ἢ δ' ἀντιπερίστασις ἅμα πάντα κινεῖσθαι ποιεῖ καὶ κινεῖν, ὥστε καὶ παύεσθαι· νῦν δὲ φαίνεται τι ἐν κινούμενον συνεχῶς· ὑπὸ τίνος οὖν; οὐ γὰρ ὑπὸ τοῦ αὐτοῦ. ἐπεὶ δ' ἐν τοῖς οὖσιν ἀνάγκη κίνησιν εἶναι συνεχῆ, αὕτη δὲ μία ἐστίν, ἀνάγκη δὲ τὴν μίαν μεγέθους τέ τινος εἶναι (οὐ γὰρ κινεῖται τὸ ἀμέγεθες) καὶ ἐνός καὶ

ὕφ' ενός (οὐ γὰρ ἔσται συνεχῆς, ἀλλ' ἐχομένη ἑτέρα ἐτέρας καὶ διηρημένη), τὸ δὴ κινεῖν εἰ ἓν, ἢ κινούμενον κινεῖ ἢ ἀκίνητον ὄν. εἰ μὲν δὴ κινού μενον, συνακολουθεῖν δεήσει καὶ μεταβάλλειν αὐτό, ἅμα δὲ (267b.) κινεῖσθαι ὑπὸ τινος, ὥστε στήσεται καὶ ἥξει εἰς τὸ κινεῖσθαι ὑπὸ ἀκινήτου. τοῦτο γὰρ οὐκ ἀνάγκη συμμεταβάλλειν, ἀλλ' αἰετὸς δυνήσεται κινεῖν (ἄπονον γὰρ τὸ οὕτω κινεῖν) καὶ ὁμαλῆς αὕτη ἢ κίνησις ἢ μόνη ἢ μάλιστα· οὐ γὰρ ἔχει μεταβολὴν τὸ κινεῖν οὐδεμίαν. δεῖ δὲ οὐδὲ τὸ κινούμενον πρὸς ἐκεῖνο ἔχειν μεταβολήν, ἵνα ὁμοία ἦ ἢ κίνησις. ἀνάγκη δὴ ἢ ἐν μέσῳ ἢ ἐν κύκλῳ εἶναι· αὗται γὰρ αἱ ἀρχαί. ἀλλὰ τάχιστα κινεῖται τὰ ἐγγύτατα τοῦ κινουμένου. τοιαύτη δ' ἢ τοῦ κύκλου κίνησις· ἐκεῖ ἄρα τὸ κινεῖν. ἔχει δ' ἀπορίαν εἰ ἐνδέχεται τι κινούμενον κινεῖν συνεχῶς, ἀλλὰ μὴ ὥσπερ τὸ ὠθεῖν πάλιν καὶ πάλιν, τῷ ἐφεξῆς εἶναι συνεχῶς· ἢ γὰρ αὐτὸ δεῖ αἰετὸς ὠθεῖν ἢ ἔλκειν ἢ ἄμφω, ἢ ἕτερόν τι ἐκδεχόμενον ἄλλο παρ' ἄλλου, ὥσπερ πάλαι ἐλέχθη ἐπὶ τῶν ῥιπτουμένων, εἰ διαιρετὸς ὢν ὁ ἀήρ [ἢ τὸ ὕδωρ] κινεῖ ἄλλος αἰετὸς κινούμενος. ἀμφοτέρως δ' οὐχ οἷόν τε μίαν εἶναι, ἀλλ' ἐχομένην. μόνη ἄρα συνεχῆς ἦν κινεῖ τὸ ἀκίνητον· αἰετὸς γὰρ ὁμοίως ἔχον καὶ πρὸς τὸ κινούμενον ὁμοίως ἔξει καὶ συνεχῶς.

διωρισμένων δὲ τούτων φανερόν ὅτι ἀδύνατον τὸ πρῶτον κινεῖν καὶ ἀκίνητον ἔχειν τι μέγεθος. εἰ γὰρ μέγεθος ἔχει, ἀνάγκη ἥτοι πεπερασμένον αὐτὸ εἶναι ἢ ἄπειρον. ἄπειρον μὲν οὖν ὅτι οὐκ ἐνδέχεται μέγεθος εἶναι, δέδεικται πρότερον ἐν τοῖς φυσικοῖς· ὅτι δὲ τὸ πεπερασμένον ἀδύνατον ἔχειν δύναμιν ἄπειρον, καὶ ὅτι ἀδύνατον ὑπὸ πεπερασμένου κινεῖσθαι τι ἄπειρον χρόνον, δέδεικται νῦν. τὸ δὲ γε πρῶτον κινεῖν αἰετὸς κινεῖ κίνησιν καὶ ἄπειρον χρόνον. φανερόν τοίνυν ὅτι ἀδιαίρετόν ἐστι καὶ ἀμερὲς καὶ οὐδὲν ἔχον μέγεθος.

(268a.) Ἡ περὶ φύσεως ἐπιστήμη σχεδὸν ἢ πλείστη φαίνεται περὶ τε σώματα καὶ μεγέθη καὶ τὰ τούτων οὐσα πάθη καὶ τὰς κινήσεις, ἔτι δὲ περὶ τὰς ἀρχάς, ὅσαι τῆς τοιαύτης οὐσίας εἰσὶν· τῶν γὰρ φύσει συνεστώτων τὰ μὲν ἐστὶ σώματα καὶ μεγέθη, τὰ δ' ἔχει σῶμα καὶ μέγεθος, τὰ δ' ἀρχαὶ τῶν ἐχόντων εἰσὶν.

Συνεχὲς μὲν οὖν ἐστὶ τὸ διαιρετὸν εἰς ἀεὶ διαιρετά, σῶμα δὲ τὸ πάντῃ διαιρετόν. Μεγέθους δὲ τὸ μὲν ἐφ' ἓν γραμμὴ, τὸ δ' ἐπὶ δύο ἐπίπεδον, τὸ δ' ἐπὶ τρία σῶμα· καὶ παρὰ ταῦτα οὐκ ἔστιν ἄλλο μέγεθος διὰ τὸ τὰ τρία πάντα εἶναι καὶ τὸ τρις πάντῃ. Καθάπερ γάρ φασι καὶ οἱ Πυθαγόρειοι, τὸ πᾶν καὶ τὰ πάντα τοῖς τρισὶν ὥριστα· τελευτὴ γὰρ καὶ μέσον καὶ ἀρχὴ τὸν ἀριθμὸν ἔχει τὸν τοῦ παντός, ταῦτα δὲ τὸν τῆς τριάδος. Διὸ παρὰ τῆς φύσεως εὐληφότες ὥσπερ νόμους ἐκείνης, καὶ πρὸς τὰς ἀγιστείας χρώμεθα τῶν θεῶν τῷ ἀριθμῷ τούτῳ. Ἀποδίδομεν δὲ καὶ τὰς προσηγορίας τὸν τρόπον τοῦτον· τὰ γὰρ δύο ἄμφω μὲν λέγομεν καὶ τοὺς δύο ἀμφοτέρους, πάντας δ' οὐ λέγομεν, ἀλλὰ κατὰ τῶν τριῶν ταύτην τὴν κατηγορίαν κατάφαμεν πρῶτον. Ταῦτα δ', ὥσπερ εἴρηται, διὰ τὸ τὴν φύσιν αὐτὴν οὕτως ἐπάγειν ἀκολουθοῦμεν.

᾽Ωστ' ἐπεὶ τὰ πάντα καὶ τὸ πᾶν καὶ τὸ τέλειον οὐ κατὰ τὴν ἰδέαν διαφέρουσιν ἀλλήλων, ἀλλ' εἶπερ, ἐν τῇ ὕλῃ καὶ ἐφ' ᾧ λέγονται, τὸ σῶμα μόνον ἂν εἴη τῶν μεγεθῶν τέλειον· μόνον γὰρ ὥριστα τοῖς τρισὶν, τοῦτο δ' ἐστὶ πᾶν. Τριχῇ δὲ ὄν διαιρετὸν πάντῃ διαιρετόν ἐστιν· τῶν δ' ἄλλων τὸ μὲν ἐφ' ἓν τὸ δ' ἐπὶ δύο· ὥς γὰρ τοῦ ἀριθμοῦ τετυχήκασιν, οὕτω καὶ τῆς διαιρέσεως καὶ τοῦ συνεχοῦς· τὸ μὲν γὰρ ἐφ' ἓν συνεχές, τὸ δ' ἐπὶ δύο, τὸ δὲ πάντῃ τοιοῦτον. Ὅσα μὲν οὖν διαιρετὰ τῶν μεγεθῶν, καὶ συνεχῇ ταῦτα· εἰ δὲ καὶ τὰ συνεχῇ πάντα διαιρετά, οὕπω δήλον ἐκ τῶν νῦν.

Ἀλλ' ἐκεῖνο μὲν δηλον, ὥς οὐκ (268b.) ἔστιν εἰς ἄλλο γένος μετὰβασις, ὥσπερ ἐκ μήκους εἰς ἐπιφάνειαν, εἰς δὲ σῶμα ἐξ ἐπιφανείας· οὐ γὰρ ἂν ἔτι τὸ τοιοῦτον τέλειον εἴη μέγεθος· ἀνάγκη γὰρ γίνεσθαι τὴν ἔκβασιν κατὰ τὴν ἔλλειψιν, οὐχ οἷόν τε δὲ τὸ τέλειον ἐλλείπειν· πάντῃ γάρ ἐστιν.

Τῶν μὲν οὖν ἐν μορίου εἶδει σωμάτων κατὰ τὸν λόγον ἕκαστον τοιοῦτόν ἐστιν· πάσας γὰρ ἔχει τὰς διαστάσεις· ἀλλ' ὥριστα πρὸς τὸ

πλησίον ἀφ᾽· διὸ τρόπον τινὰ πολλὰ τῶν σωμάτων ἕκαστόν ἐστιν.
Τὸ δὲ πᾶν οὗ ταῦτα μέρη, τέλειον ἀναγκαῖον εἶναι καὶ καθάπερ
τοῦνομα ημαίνει πάντῃ, καὶ μὴ τῇ μὲν τῇ δὲ μή.

Κεφάλαιο 2

Περὶ μὲν οὖν τῆς τοῦ παντὸς φύσεως, εἴτ' ἄπειρός ἐστι κατὰ τὸ μέγεθος εἴτε πεπέρανται τὸν σύνολον ὄγκον, ὕστερον ἐπισκεπτέον· περὶ δὲ τῶν κατ' εἶδος αὐτοῦ μορίων νῦν λέγωμεν ἀρχὴν ποιησάμενοι τήνδε.

Πάντα γὰρ τὰ φυσικὰ σώματα καὶ μεγέθη καθ' αὐτὰ κινητὰ λέγομεν εἶναι κατὰ τόπον· τὴν γὰρ φύσιν κινήσεως ἀρχὴν εἶναι φαμεν αὐτοῖς.

Πᾶσα δὲ κίνησις ὅση κατὰ τόπον, ἣν καλοῦμεν φορὰν, ἢ εὐθεῖα ἢ κύκλῳ ἢ ἐκ τούτων μικτή· ἀπλαῖ γὰρ αὗται δύο μόναι. Αἴτιον δ' ὅτι καὶ τὰ μεγέθη ταῦτα ἀπλᾶ μόνον, ἢ τ' εὐθεῖα καὶ ἡ περιφερῆς. Κύκλῳ μὲν οὖν ἐστὶν ἡ περὶ τὸ μέσον, εὐθεῖα δ' ἡ ἄνω καὶ κάτω. Λέγω δ' ἄνω μὲν τὴν ἀπὸ τοῦ μέσου, κάτω δὲ τὴν ἐπὶ τὸ μέσον. Ὡστ' ἀνάγκη πᾶσαν εἶναι τὴν ἀπλῆν φορὰν τὴν μὲν ἀπὸ τοῦ μέσου, τὴν δ' ἐπὶ τὸ μέσον, τὴν δὲ περὶ τὸ μέσον. Καὶ ὅμοιον ἡκολουθηκέναι κατὰ λόγον τοῦτο τοῖς ἐξ ἀρχῆς· τό τε γὰρ σῶμα ἀπετελέσθη ἐν τρισὶ καὶ ἡ κίνησις αὐτοῦ. Ἐπεὶ δὲ τῶν σωμάτων τὰ μὲν ἐστὶν ἀπλᾶ τὰ δὲ σύνθετα ἐκ τούτων (λέγω δ' ἀπλᾶ μὲν ὅσα κινήσεως ἀρχὴν ἔχει κατὰ φύσιν, οἷον πῦρ καὶ γῆν καὶ τὰ τούτων εἶδη καὶ τὰ συγγενῆ τούτοις), ἀνάγκη καὶ τὰς κινήσεις εἶναι τὰς μὲν ἀπλᾶς τὰς δὲ μικτάς πως, (269a.) καὶ τῶν μὲν ἀπλῶν ἀπλᾶς, μικτάς δὲ τῶν συνθέτων, κινεῖσθαι δὲ κατὰ τὸ ἐπικρατοῦν.

Εἴπερ οὖν ἐστὶν ἀπλῆ κίνησις, ἀπλῆ δ' ἡ κύκλῳ κίνησις, καὶ τοῦ τε ἀπλοῦ σώματος ἀπλῆ ἡ κίνησις καὶ ἡ ἀπλῆ κίνησις ἀπλοῦ σώματος (καὶ γὰρ ἂν συνθέτου ἦ, κατὰ τὸ ἐπικρατοῦν ἔσται), ἀναγκαῖον εἶναι τι σῶμα ἀπλοῦν ὃ πέφυκε φέρεσθαι τὴν κύκλῳ κίνησιν κατὰ τὴν ἑαυτοῦ φύσιν· βία γὰρ ἐνδέχεται τὴν ἄλλου καὶ ἐτέρου, κατὰ φύσιν δὲ ἀδύνατον, εἴπερ μία ἐκάστου κίνησις ἢ κατὰ φύσιν τῶν ἀπλῶν.

Ἔτι εἰ ἡ παρὰ φύσιν ἐναντία τῇ κατὰ φύσιν καὶ ἐν ἐνὶ ἐναντίον, ἀνάγκη, ἐπεὶ ἀπλῆ ἡ κύκλῳ, εἰ μὴ ἔσται κατὰ φύσιν τοῦ φερομένου σώματος, παρὰ φύσιν αὐτοῦ εἶναι. Εἰ οὖν πῦρ ἢ ἄλλο τι τῶν τοιούτων ἐστὶ τὸ κύκλῳ φερόμενον, ἐναντία ἢ κατὰ φύσιν αὐτοῦ φορὰ ἔσται τῇ κύκλῳ. Ἀλλ' ἐν ἐνὶ ἐναντίον· ἢ δ' ἄνω καὶ κάτω ἀλλήλαις ἐναντίαι. Εἰ δ' ἕτερόν τί ἐστι σῶμα τὸ φερόμενον κύκλῳ

παρὰ φύσιν, ἔσται τις αὐτοῦ ἄλλη κίνησις κατὰ φύσιν. Ἀλλὰ τοῦτ' ἀδύνατον· εἰ μὲν γὰρ ἡ ἄνω, πῦρ ἔσται ἢ ἀήρ, εἰ δ' ἡ κάτω, ὕδωρ ἢ γῆ.

Ἀλλὰ μὴν καὶ πρώτην γε ἀναγκαῖον εἶναι τὴν τοιαύτην φοράν. Τὸ γὰρ τέλειον πρότερον τῇ φύσει τοῦ ἀτελοῦς, ὁ δὲ κύκλος τῶν τελείων, εὐθεῖα δὲ γραμμὴ οὐδεμία· οὔτε γὰρ ἡ ἄπειρος (ἔχει γὰρ ἄν πέρας καὶ τέλος) οὔτε τῶν πεπερασμένων οὐδεμία (πασῶν γάρ ἐστί τι ἐκτός· αὐξῆσαι γὰρ ἐνδέχεται ὅποιανοῦν). Ὡστ' εἴπερ ἡ μὲν προτέρα κίνησις προτέρου τῇ φύσει σώματος, ἡ δὲ κύκλῳ προτέρα τῆς εὐθείας, ἡ δ' ἐπ' εὐθείας τῶν ἀπλῶν σωμάτων ἐστί (τό τε γὰρ πῦρ ἐπ' εὐθείας ἄνω φέρεται καὶ τὰ γεηρὰ κάτω πρὸς τὸ μέσον), ἀνάγκη καὶ τὴν κύκλῳ κίνησιν τῶν ἀπλῶν τινος εἶναι σωμάτων· τῶν γὰρ μικτῶν τὴν φοράν ἔφαμεν εἶναι κατὰ τὸ ἐπικρατοῦν ἐν τῇ μίξει τῶν ἀπλῶν. Ἐκ τε δὴ τούτων φανερόν ὅτι πέφυκε τις οὐσία σώματος ἄλλη παρὰ τὰς ἐνταῦθα συστάσεις, θειότερα καὶ προτέρα τούτων ἀπάντων, καὶν εἰ τις ἔτι λάβοι πᾶσαν εἶναι κίνησιν ἢ κατὰ φύσιν ἢ παρὰ φύσιν, καὶ τὴν ἄλλω παρὰ φύσιν ἐτέρῳ κατὰ φύσιν, οἷον ἡ ἄνω καὶ ἡ κάτω πέπονθεν· ἡ μὲν γὰρ τῷ πυρί, ἡ δὲ τῇ γῇ παρὰ φύσιν καὶ κατὰ φύσιν· (269b.) ὥστ' ἀναγκαῖον καὶ τὴν κύκλῳ κίνησιν, ἐπειδὴ τούτοις παρὰ φύσιν, ἐτέρου τινὸς εἶναι κατὰ φύσιν. Πρὸς δὲ τούτοις εἰ μὲν ἐστὶν ἡ κύκλῳ τινὶ φορά κατὰ φύσιν, δηλὸν ὡς εἴη ἄν τι σῶμα τῶν ἀπλῶν καὶ πρώτων, ὃ πέφυκεν, ὥσπερ τὸ πῦρ ἄνω καὶ ἡ γῆ κάτω, ἐκεῖνο κύκλῳ φέρεσθαι κατὰ φύσιν. Εἰ δὲ παρὰ φύσιν φέρεται τὰ φερόμενα κύκλῳ τὴν περίξ φοράν, θαυμαστὸν καὶ παντελῶς ἄλογον τὸ μόνην εἶναι συνεχῇ ταύτην τὴν κίνησιν καὶ αἰδῖον, οὐσαν παρὰ φύσιν· φαίνεται γὰρ ἐν γε τοῖς ἄλλοις τάχιστα φθειρόμενα τὰ παρὰ φύσιν.

Ὡστ' εἴπερ ἐστὶ πῦρ τὸ φερόμενον, καθάπερ φασί τινες, οὐδὲν ἧττον αὐτῷ παρὰ φύσιν ἢ κινήσις ἐστὶν αὕτη ἢ ἡ κάτω· πυρὸς γὰρ κίνησιν ὀρῶμεν τὴν ἀπὸ τοῦ μέσου κατ' εὐθεῖαν.

Διόπερ ἐξ ἀπάντων ἄν τις τούτων συλλογιζόμενος πιστεύσειεν ὡς ἐστί τι παρὰ τὰ σώματα τὰ δεῦρο καὶ περὶ ἡμᾶς ἕτερον κεχωρισμένον, τοσοῦτω τιμιωτέραν ἔχον τὴν φύσιν ὅσῳ περ ἀφέστηκε τῶν ἐνταῦθα πλείον.

Κεφάλαιο 3

Ἐπεὶ δὲ τὰ μὲν ὑπόκειται τὰ δ' ἀποδέδεικται τῶν εἰρημένων, φανερόν ὅτι οὔτε κουφότητα οὔτε βάρος ἔχει σῶμα ἅπαν, δεῖ δὲ ὑποθέσθαι τί λέγομεν τὸ βαρὺ καὶ τὸ κοῦφον, νῦν μὲν ἱκανῶς ὡς πρὸς τὴν παρούσαν χρεῖαν, ἀκριβέστερον δὲ πάλιν, ὅταν ἐπισκοπῶμεν περὶ τῆς οὐσίας αὐτῶν. Βαρὺ μὲν οὖν ἔστω τὸ φέρεσθαι πεφυκὸς ἐπὶ τὸ μέσον, κοῦφον δὲ τὸ ἀπὸ τοῦ μέσου, βαρύτατον δὲ τὸ πᾶσιν ὑφιστάμενον τοῖς κάτω φερομένοις, κουφότατον δὲ τὸ πᾶσιν ἐπιτολάζον τοῖς ἄνω φερομένοις.

Ἀνάγκη δὴ πᾶν τὸ φερόμενον ἢ κάτω ἢ ἄνω ἢ κουφότητ' ἔχειν ἢ βάρος ἢ ἄμφω, μὴ πρὸς τὸ αὐτὸ δέ· πρὸς ἄλληλα γὰρ ἐστὶ βαρέα καὶ κοῦφα, οἷον ἀήρ πρὸς ὕδωρ, καὶ πρὸς γῆν ὕδωρ. Τὸ δὲ κύκλω σῶμα φερόμενον ἀδύνατον ἔχειν βάρος ἢ κουφότητα· οὔτε γὰρ κατὰ φύσιν οὔτε παρὰ φύσιν ἐνδέχεται αὐτῷ κινηθῆναι ἐπὶ τὸ μέσον ἢ ἀπὸ τοῦ μέσου. Κατὰ φύσιν μὲν γὰρ οὐκ ἔστιν αὐτῷ ἢ ἐπ' εὐθείας φορᾶ· μία γὰρ ἦν ἐκάστου τῶν ἀπλῶν, ὥστ' ἔσται τὸ αὐτὸ τῶν οὕτω τινὶ φερομένων. Παρὰ φύσιν δ' ἐνεχθέντος, εἰ μὲν ἢ κάτω (270a.) παρὰ φύσιν, ἢ ἄνω ἔσται κατὰ φύσιν, εἰ δ' ἢ ἄνω παρὰ φύσιν, ἢ κάτω κατὰ φύσιν· ἔθεμεν γὰρ τῶν ἐναντίων ᾧ ἢ ἑτέρα παρὰ φύσιν, τὴν ἑτέραν εἶναι κατὰ φύσιν.

Ἐπεὶ δ' εἰς τὸ αὐτὸ φέρεται τὸ ὅλον καὶ τὸ μόριον κατὰ φύσιν, οἷον πᾶσα γῆ καὶ μικρὰ βῶλος, συμβαίνει πρῶτον μὲν μήτε κουφότητ' ἔχειν αὐτὸ μηδεμίαν μήτε βάρος (ἢ γὰρ ἂν πρὸς τὸ μέσον ἢ ἀπὸ τοῦ μέσου ἡδύνατο φέρεσθαι κατὰ τὴν ἑαυτοῦ φύσιν), ἔπειθ' ὅτι ἀδύνατον κινηθῆναι τὴν κατὰ τόπον κίνησιν ἢ ἄνω ἢ κάτω κατασπώμενον· οὔτε γὰρ κατὰ φύσιν ἐνδέχεται κινηθῆναι κίνησιν αὐτῷ ἄλλην οὔτε παρὰ φύσιν, οὔτ' αὐτῷ οὔτε τῶν μορίων οὐδενί· ὁ γὰρ αὐτὸς λόγος περὶ ὅλου καὶ μέρους.

Ὁμοίως δ' εὐλόγον ὑπολαβεῖν περὶ αὐτοῦ καὶ ὅτι ἀγένητον καὶ ἄφθαρτον καὶ ἀναυξὲς καὶ ἀναλλοίωτον, διὰ τὸ γίγνεσθαι μὲν ἅπαν τὸ γινόμενον ἐξ ἐναντίου τε καὶ ὑποκειμένου τινός, καὶ φθείρεσθαι ὡσαύτως ὑποκειμένου τέ τινος καὶ ὑπ' ἐναντίου καὶ εἰς ἐναντίον, καθάπερ ἐν τοῖς πρώτοις εἴρηται λόγοις· τῶν δ' ἐναντίων καὶ αἱ φοραὶ ἐναντία. Εἰ δὴ τούτῳ μηδὲν ἐναντίον ἐνδέχεται εἶναι διὰ τὸ καὶ τῇ φορᾷ τῇ κύκλω μὴ εἶναι ἂν τιν' ἐναντίαν κίνησιν, ὁρθῶς

ἔοικεν ἡ φύσις τὸ μέλλον ἔσσεσθαι ἀγέννητον καὶ ἄφθαρτον ἐξελέσθαι ἐκ τῶν ἐναντίων· ἐν τοῖς ἐναντίοις γὰρ ἡ γένεσις καὶ ἡ φθορά.

Ἀλλὰ μὴν καὶ τὸ αὐξανόμενον ἅπαν αὐξάνεται [καὶ τὸ φθίνον φθίνει] ὑπὸ συγγενοῦς προσιόντος καὶ ἀναλυομένου εἰς τὴν ὕλην· τούτῳ δ' οὐκ ἔστιν ἐξ οὗ γέγονεν.

Εἰ δ' ἐστὶ καὶ ἀναύξητον καὶ ἄφθαρτον, τῆς αὐτῆς διανοίας ἐστὶν ὑπολαβεῖν καὶ ἀναλλοίωτον εἶναι. Ἔστι μὲν γὰρ ἡ ἀλλοιώσις κίνησις κατὰ τὸ ποιόν, τοῦ δὲ ποιοῦ αἱ μὲν ἔξεις καὶ διαθέσεις οὐκ ἄνευ τῶν κατὰ τὰ πάθη γίνονται μεταβολῶν, οἷον ὑγίεια καὶ νόσος. Κατὰ δὲ πάθος ὅσα μεταβάλλει τῶν φυσικῶν σωμάτων, ἔχονθ' ὁρῶμεν πάντα καὶ αὕξησιν καὶ φθίσιν, οἷον τὰ τε τῶν ζώων σώματα καὶ τὰ μόρια αὐτῶν καὶ τὰ τῶν φυτῶν, ὁμοίως δὲ καὶ τὰ τῶν στοιχείων· ὥστ' εἴπερ τὸ κύκλῳ σῶμα μήτ' αὕξησιν ἔχειν ἐνδέχεται μήτε φθίσιν, εὐλογον καὶ ἀναλλοίωτον εἶναι.

(270b.) Διότι μὲν οὖν αἰδίδιον καὶ οὗτ' αὕξησιν ἔχον οὔτε φθίσιν, ἀλλ' ἀγήρατον καὶ ἀναλλοίωτον καὶ ἀπαθές ἐστὶ τὸ πρῶτον τῶν σωμάτων, εἴ τις τοῖς ὑποκειμένοις πιστεύει, φανερόν ἐκ τῶν εἰρημένων ἐστίν.

Ἔοικε δ' ὁ τε λόγος τοῖς φαινομένοις μαρτυρεῖν καὶ τὰ φαινόμενα τῷ λόγῳ· πάντες γὰρ ἄνθρωποι περὶ θεῶν ἔχουσιν ὑπόληψιν, καὶ πάντες τὸν ἀνωτάτῳ τῷ θεῷ τόπον ἀποδιδόασιν, καὶ βάρβαροι καὶ Ἕλληνες, ὅσοι περ εἶναι νομίζουσι θεούς, δηλον ὅτι ὡς τῷ ἀθανάτῳ τὸ ἀθάνατον συνηρημένον· ἀδύνατον γὰρ ἄλλως.

Εἴπερ οὖν ἔστι τι θεῖον, ὥσπερ ἔστι, καὶ τὰ νῦν εἰρημένα περὶ τῆς πρώτης οὐσίας τῶν σωμάτων εἴρηται καλῶς. Συμβαίνει δὲ τοῦτο καὶ διὰ τῆς αἰσθήσεως ἱκανῶς, ὥς γε πρὸς ἀνθρωπίνην εἰπεῖν πίστιν· ἐν ἅπαντι γὰρ τῷ παρεληλυθότι χρόνῳ κατὰ τὴν παραδεδομένην ἀλλήλοισι μνήμην οὐθὲν φαίνεται μεταβεβληκὸς οὔτε καθ' ὅλον τὸν ἔσχατον οὐρανὸν οὔτε κατὰ μόριον αὐτοῦ τῶν οἰκείων οὐθέν.

Ἔοικε δὲ καὶ τοῦνομα παρὰ τῶν ἀρχαίων παραδεδόσθαι μέχρι καὶ τοῦ νῦν χρόνου, τοῦτον τὸν τρόπον ὑπολαμβανόντων ὄνπερ καὶ ἡμεῖς λέγομεν· οὐ γὰρ ἅπαξ οὐδὲ δις ἀλλ' ἀπειράκις δεῖ νομίζειν τὰς αὐτὰς ἀφικνεῖσθαι δόξας εἰς ἡμᾶς. Διόπερ ὡς ἑτέρου τινὸς ὄντος τοῦ πρώτου σώματος παρὰ γῆν καὶ πῦρ καὶ ἀέρα καὶ ὕδωρ, αἰθέρα προσωνόμασαν τὸν ἀνωτάτῳ τόπον, ἀπὸ τοῦ θεῖν ἀεὶ τὸν αἰδίδιον χρόνον θέμενοι τὴν ἐπωνυμίαν αὐτῷ. Ἀναξαγόρας δὲ καταχρῆται τῷ ὀνόματι τούτῳ οὐ καλῶς· ὀνομάζει γὰρ αἰθέρα ἀντὶ πυρός.

Φανερόν δ' ἐκ τῶν εἰρημένων καὶ διότι τὸν ἀριθμὸν ἀδύνατον εἶναι πλείω τὸν τῶν λεγομένων σωμάτων ἀπλῶν· τοῦ μὲν γὰρ ἀπλοῦ σώματος ἀνάγκη τὴν κίνησιν ἀπλῆν εἶναι, μόνας δὲ ταύτας εἶναί φαμεν ἀπλᾶς, τὴν τε κύκλῳ καὶ τὴν ἐπ' εὐθείας, καὶ ταύτης τὰ δύο μέρη, τὴν μὲν ἀπὸ τοῦ μέσου, τὴν δ' ἐπὶ τὸ μέσον.

Κεφάλαιο 4

Ὅτι δ' οὐκ ἔστι τῇ κύκλῳ φορᾷ ἐναντία ἄλλῃ φορᾷ, πλεοναχόθεν ἂν τις λάβοι τὴν πίστιν· πρῶτον μὲν ὅτι τῇ περιφερεῖ τὴν εὐθείαν ἀντικεῖσθαι μάλιστα τίθεμεν· τὸ γὰρ κοῦλον καὶ τὸ κυρτὸν οὐ μόνον ἀλλήλοις ἀντικεῖσθαι δοκεῖ (271a.) ἀλλὰ καὶ τῷ εὐθεῖ, συνδυαζόμενα καὶ λαβόντα σύνθεσιν· ὥστ' εἶπερ ἐναντία τίς ἐστι, τὴν ἐπὶ τῆς εὐθείας μάλιστα ἀναγκαῖον ἐναντίαν εἶναι πρὸς τὴν κύκλῳ κίνησιν. Αἱ δ' ἐπὶ τῆς εὐθείας ἀλλήλαις ἀντίκεινται διὰ τοὺς τόπους· τὸ γὰρ ἄνω κάτω τόπου τέ ἐστι διαφορὰ καὶ ἐναντίωσις.

Ἐπειτ' εἰ τις ὑπολαμβάνει τὸν αὐτὸν εἶναι λόγον ὄνπερ ἐπὶ τῆς εὐθείας καὶ ἐπὶ τῆς περιφεροῦς (τὴν γὰρ ἀπὸ τοῦ Α πρὸς τὸ Β φορὰν ἐναντίαν εἶναι τῇ ἀπὸ τοῦ Β πρὸς τὸ Α), τὴν ἐπὶ τῆς εὐθείας λέγει· αὕτη γὰρ πεπέρανται, περιφερεῖς δ' ἄπειροι ἂν εἶεν περὶ τὰ αὐτὰ σημεῖα.

Ὅμοίως δὲ καὶ ἐπὶ τοῦ ἡμικυκλίου τοῦ ἐνός, οἷον ἀπὸ τοῦ Γ ἐπὶ τὸ Δ καὶ ἀπὸ τοῦ Δ ἐπὶ τὸ Γ· ἡ γὰρ αὕτη τῇ ἐπὶ τῆς διαμέτρου ἐστίν· αἱ γὰρ ἕκαστον ἀπέχειν τὴν εὐθεῖαν τίθεμεν.

Ὅμοίως δὲ καὶ εἰ τις κύκλον ποιήσας τὴν ἐπὶ θατέρου ἡμικυκλίου φορὰν ἐναντίαν θεῖη τῇ ἐπὶ θατέρου, οἷον ἐν τῷ ὅλῳ κύκλῳ τὴν ἀπὸ τοῦ Ε πρὸς τὸ Ζ τοῦ Η ἡμικυκλίου τῇ ἀπὸ τοῦ Ζ πρὸς τὸ Ε ἐν τῷ Θ ἡμικυκλίῳ.

Εἰ δὲ καὶ αὗται ἐναντίαι, ἀλλ' οὔτι γε αἱ ἐπὶ τοῦ ὅλου κύκλου φοραὶ ἀλλήλαις διὰ τοῦτο ἐναντίαι. *-* Ἀλλὰ μὴν οὐδ' ἡ ἀπὸ τοῦ Α ἐπὶ τὸ Β κύκλῳ φορὰ ἐναντία τῇ ἀπὸ τοῦ Α ἐπὶ τὸ Γ· ἐκ ταυτοῦ γὰρ εἰς ταὐτὸ ἡ κίνησις, ἡ δ' ἐναντία διωρίσθη φορὰ ἐκ τοῦ ἐναντίου εἰς τὸ ἐναντίον.

Εἰ δὲ καὶ ἦν ἡ κύκλῳ τῇ κύκλῳ ἐναντία, μάτην ἂν ἦν ἡ ἐτέρα· *ἐπὶ τὸ αὐτὸ γάρ, ὅτι ἀνάγκη τὸ κύκλῳ φερόμενον ὁποθεοῦν ἀρξάμενον εἰς πάντας ὁμοίως ἀφικνεῖσθαι τοὺς ἐναντίους τόπους (εἰσὶ δὲ τόπου ἐναντιότητες τὸ ἄνω καὶ κάτω καὶ τὸ πρόσθιον καὶ ὀπίσθιον καὶ τὸ δεξιὸν καὶ ἀριστερόν), αἱ δὲ τῆς φορᾶς ἐναντιώσεις κατὰ τὰς τῶν τόπων εἰσὶν ἐναντιώσεις· * εἰ μὲν γὰρ ἴσαι ἦσαν, οὐκ ἂν ἦν κίνησις αὐτῶν, εἰ δ' ἡ ἐτέρα κίνησις ἐκράτει, ἡ ἐτέρα οὐκ ἂν ἦν. Ὡστ' εἰ ἀμφοτέρω ἦν, μάτην ἂν θάτερον ἦν σῶμα μὴ κινούμενον τὴν αὐτοῦ κίνησιν· μάτην γὰρ ὑπόδημα τοῦτο λέγομεν, οὗ μὴ ἐστίν

ὑπόδεσις. Ὁ δὲ θεὸς καὶ ἡ φύσις οὐδὲν μάτην ποιοῦσιν.

Κεφάλαιο 5

(271b.) Ἄλλ' ἐπεὶ δῆλον περὶ τούτων, περὶ τῶν λοιπῶν σκεπτέον, καὶ πρῶτον πότερον ἔστι τι σῶμα ἄπειρον, ὥσπερ οἱ πλείστοι τῶν ἀρχαίων φιλοσόφων ᾠθήθησαν, ἢ τοῦτ' ἔστιν ἓν τι τῶν ἀδυνάτων· τὸ γὰρ οὕτως ἢ ἐκείνως ἔχειν οὐ τι μικρὸν ἀλλ' ὅλον διαφέρει καὶ πᾶν πρὸς τὴν περὶ τῆς ἀληθείας θεωρίαν· σχεδὸν γὰρ αὕτη πασῶν ἀρχῇ τῶν ἐναντιώσεων τοῖς ἀποφνηαμένοις τι περὶ τῆς ὅλης φύσεως καὶ γέγονε καὶ γένοιτ' ἂν, εἴπερ καὶ τὸ μικρὸν παραβῆναι τῆς ἀληθείας ἀφισταμένοις γίνεται πόρρω μυριοπλάσιον. Οἷον εἴ τις ἐλάχιστον εἶναι τι φαίη μέγεθος· οὗτος γὰρ τοῦλάχιστον εἰσαγαγὼν τὰ μέγιστ' ἂν κινήσειε τῶν μαθηματικῶν. Τούτου δ' αἴτιον ὅτι ἡ ἀρχὴ δυνάμει μείζων ἢ μεγέθει, διόπερ τὸ ἐν ἀρχῇ μικρὸν ἐν τῇ τελευτῇ γίνεται παμμέγεθες. Τὸ δ' ἄπειρον καὶ ἀρχῆς ἔχει δύναμιν καὶ τοῦ ποσοῦ τὴν μεγίστην, ὥστ' οὐδὲν ἄτοπον οὐδ' ἄλογον τὸ θαυμαστὴν εἶναι τὴν διαφορὰν ἐκ τοῦ λαβεῖν ὡς ἔστι τι σῶμα ἄπειρον. Διὸ περὶ αὐτοῦ λεκτέον ἐξ ἀρχῆς ἀναλαβοῦσιν.

Ἀνάγκη δὴ πᾶν σῶμα ἥτοι τῶν ἀπλῶν εἶναι ἢ τῶν συνθέτων, ὥστε καὶ τὸ ἄπειρον ἢ ἀπλοῦν ἔσται ἢ σύνθετον. Ἀλλὰ μὴν καὶ ὅτι γε πεπερασμένων τῶν ἀπλῶν ἀνάγκη πεπερασμένον εἶναι τὸ σύνθετον, δῆλον· τὸ γὰρ ἐκ πεπερασμένων καὶ πλήθει καὶ μεγέθει συγκείμενον πεπέρανται καὶ πλήθει καὶ μεγέθει· τοσοῦτον γὰρ ἔστιν ἐξ ὧν ἔστι συγκείμενον.

Λοιπὸν τοίνυν ἰδεῖν πότερον ἐνδέχεται τι τῶν ἀπλῶν ἄπειρον εἶναι τὸ μέγεθος, ἢ τοῦτ' ἀδύνατον. Προχειρισάμενοι δὴ περὶ τοῦ πρώτου τῶν σωμάτων, οὕτω σκοπῶμεν καὶ περὶ τῶν λοιπῶν.

Ὅτι μὲν τοίνυν ἀνάγκη τὸ σῶμα τὸ κύκλω φερόμενον πεπεράνθαι πᾶν, ἐκ τῶνδε δῆλον.

Εἰ γὰρ ἄπειρον τὸ κύκλω φερόμενον σῶμα, ἄπειροι ἔσονται αἱ ἀπὸ τοῦ μέσου ἐκβαλλόμεναι. Τῶν δ' ἀπείρων τὸ διάστημα ἄπειρον· διάστημα δὲ λέγω τῶν γραμμῶν, οἷον μηδὲν ἔστιν ἔξω λαβεῖν μέγεθος ἀπτόμενον τῶν γραμμῶν. Τοῦτ' οὖν ἀνάγκη ἄπειρον εἶναι· τῶν γὰρ πεπερασμένων ἀεὶ ἔσται πεπερασμένον. Ἔτι δ' ἀεὶ ἔστι τοῦ (272a.) δοθέντος μείζον λαβεῖν, ὥστε καθάπερ ἀριθμὸν λέγομεν ἄπειρον, ὅτι μέγιστος οὐκ ἔστιν, ὁ αὐτὸς λόγος καὶ περὶ τοῦ διαστήματος· εἰ οὖν τὸ μὲν ἄπειρον μὴ ἔστι διελθεῖν, ἀπείρου δ' ὄντος ἀνάγκη τὸ

διάστημα ἄπειρον εἶναι, οὐκ ἂν ἐνδέχοιτο κινηθῆναι κύκλῳ· τὸν δ' οὐρανὸν ὀρῶμεν κύκλῳ στρεφόμενον, καὶ τῷ λόγῳ δὲ διωρίσαμεν ὅτι ἐστὶ τινος ἡ κύκλῳ κίνησις.

Ἔτι ἀπὸ πεπερασμένου χρόνου ἐὰν ἀφέλῃς πεπερασμένον, ἀνάγκη καὶ τὸν λοιπὸν εἶναι πεπερασμένον καὶ ἔχειν ἀρχήν. Εἰ δ' ὁ χρόνος ὁ τῆς βαδίσεως ἔχει ἀρχήν, ἔστιν ἀρχὴ καὶ τῆς κινήσεως, ὥστε καὶ τοῦ μεγέθους ὁ βεβάδικεν. Ὅμοίως δὲ τοῦτο καὶ ἐπὶ τῶν ἄλλων.

Ἔστω δὴ γραμμὴ ἄπειρος, ἐφ' ἣ ΑΓΕ, ἐπὶ θάτερα, ἢ τὸ Ε· ἡ δ' ἐφ' ἣ τὰ ΒΒ, ἐπ' ἀμφοτέρα ἄπειρος. Εἰ δὴ γράψει κύκλον ἡ τὸ ΑΓΕ ἀπὸ τοῦ Γ κέντρου, τέμνουσά ποτε οἰσθήσεται κύκλῳ τὴν τὰ ΒΒ ἢ τὸ ΑΓΕ πεπερασμένον χρόνον· ὁ γὰρ πᾶς χρόνος, ἐν ᾧ κύκλῳ ἠνέχθη ὁ οὐρανός, πεπερασμένος. Καὶ ὁ ἀφηρημένος ἄρα, ὃν ἡ τέμνουσα ἐφέρετο. Ἔσται ἄρα τις ἀρχὴ ἢ πρῶτον ἢ τὸ ΑΓΕ τὴν τὰ ΒΒ ἔτεμεν. Ἄλλ' ἀδύνατον. Οὐκ ἄρα ἔστι κύκλῳ στραφῆναι τὸ ἄπειρον. Ὡστ' οὐδὲ τὸν κόσμον, εἰ ἦν ἄπειρος.

Ἔτι δὲ καὶ ἐκ τῶνδε φανερόν, ὅτι τὸ ἄπειρον ἀδύνατον κινηθῆναι. Ἔστω γὰρ ἡ τὸ Α φερομένη παρὰ τὴν Β, πεπερασμένη παρὰ πεπερασμένην. Ἀνάγκη δὴ ἅμα τὴν τε Α τῆς Β ἀπολεῦσθαι καὶ τὴν Β τῆς Α· ὅσον γὰρ ἡ ἑτέρα ἐπιβάλλει τῆς ἑτέρας, καὶ ἡ ἑτέρα ἐκείνης τοσοῦτον. Εἰ μὲν οὖν ἄμφω κινοῖντο εἰς τοῦναντίον, θάττον ἂν ἀπολύοιντο, εἰ δὲ παρὰ μένουσαν φέροιτο, βραδύτερον, τῷ αὐτῷ τάχει κινουμένου τοῦ παραφερομένου. Ἄλλ' ἐκεῖνό γε φανερόν, ὅτι ἀδύνατον τὴν ἄπειρον διελθεῖν ἐν πεπερασμένῳ χρόνῳ. Ἐν ἀείρῳ ἄρα· δέδεικται γὰρ τοῦτο πρότερον ἐν τοῖς περὶ κινήσεως. Διαφέρει δέ γε οὐθὲν ἢ τὴν πεπερασμένην φέρεσθαι παρὰ τὴν ἄπειρον ἢ τὴν ἄπειρον παρ' ἐκείνην· ὅταν γὰρ (272b.) ἐκείνη παρ' ἐκείνην, κάκεινή παραλλάττει ἐκείνην, ὁμοίως κινουμένη καὶ ἀκίνητος· πλὴν θάττον, ἐὰν κινῶνται ἀμφοτέραι, ἀπολυθήσονται. Καίτοι γ' ἐνίот' οὐθὲν κωλύει τὴν κινουμένην παρ' ἡρεμοῦσαν θάττον παρελθεῖν ἢ τὴν ἀντικινουμένην, ἐὰν τις ποιήσῃ τὰς μὲν ἀντικινουμένας ἀμφοτέρας φερομένας βραδέως, τὴν δὲ παρὰ τὴν ἡρεμοῦσαν πολλῷ ἐκείνων θάττον φερομένην.

Οὐδὲν οὖν πρὸς τὸν λόγον ἐμπόδιον ὅτι παρ' ἡρεμοῦσαν, ἐπείπερ κινουμένην ἐνδέχεται τὴν Α παρὰ κινουμένην τὴν Β βραδύτερον παρελθεῖν. Εἰ οὖν ἄπειρος ὁ χρόνος ὃν ἡ πεπερασμένη ἀπολύεται κινουμένη, καὶ ἐν ᾧ ἡ ἄπειρος τὴν πεπερασμένην ἐκινήθη ἀνάγκη

ἄπειρον εἶναι.

Ἀδύνατον ἄρα τὸ ἄπειρον κινεῖσθαι ὅλον· ἐὰν γὰρ καὶ τοῦλάχιστον κινήθῃ, ἀνάγκη ἄπειρον γίγνεσθαι χρόνον. Ἀλλὰ μὴν ὃ γ' οὐρανὸς περιέρχεται καὶ στρέφεται ὅλος κύκλῳ ἐν πεπερασμένῳ χρόνῳ, ὥστε περίεισιν ἅπασαν τὴν ἐντός, οἷον τὴν ΑΒ πεπερασμένην. Ἀδύνατον ἄρα ἄπειρον εἶναι τὸ κύκλῳ.

Ἔτι ὥσπερ γραμμὴν ἢ πέρασ ἐστὶν ἀδύνατον εἶναι ἄπειρον, ἀλλ' εἴπερ, ἐπὶ μῆκος, καὶ ἐπίπεδον ὡσαύτως ἢ πέρασ οὐκ ἐνδέχεται· ὅταν δ' ὀρίσθῃ, οὐθαμῇ, οἷον τετράγωνον ἄπειρον ἢ κύκλον ἢ σφαῖραν, ὥσπερ οὐδὲ ποδιαίαν ἄπειρον. Εἰ οὖν μήτε σφαῖρα [μήτε τετράγωνον] μήτε κύκλος ἐστὶν ἄπειρος, μὴ ὄντος δὲ κύκλου οὐδ' ἂν ἡ κύκλῳ εἴη φορά, ὁμοίως δὲ μὴδ' ἀπείρου ὄντος οὐκ ἂν εἴη ἄπειρος, εἰ μὴδ' ὁ κύκλος ἄπειρός ἐστιν, οὐκ ἂν κινοῖτο κυκλικῶς ἄπειρον σῶμα.

Ἔτι εἰ τὸ Γ κέντρον, ἡ δὲ τὸ ΑΒ ἄπειρος καὶ ἡ τὸ Ε πρὸς ὀρθὴν ἄπειρος καὶ ἡ τὸ ΓΔ κινουμένη, οὐδέποτε' ἀπολυθήσεται τῆς Ε, ἀλλ' αἰεὶ ἔξει ὥσπερ ἡ ΓΕ· τέμνει γὰρ ἡ τὸ Ζ. Οὐκ ἄρα περίεισι κύκλῳ ἡ ἄπειρος. Ἔτι εἴπερ ἄπειρος ὁ οὐρανός, κινεῖται δὲ κύκλῳ, ἐν πεπερασμένῳ χρόνῳ ἄπειρον ἔσται διεληλυθώς. Ἔστω γὰρ ὁ μὲν μένων οὐρανὸς ἄπειρος, ὁ δ' ἐν τούτῳ κινούμενος ἴσος. Ὡστ' εἴπερ περιελήλυθε κύκλῳ ἄπειρος ὢν, ἄπειρον τὸν ἴσον αὐτῷ διελήλυθεν ἐν πεπερασμένῳ χρόνῳ. Ἀλλὰ τοῦτ' ἦν ἀδύνατον.

Ἔστι δὲ καὶ ἀντεστραμμένως εἰπεῖν, ὅτι εἰ πεπερασμένος ὁ χρόνος ἐν ᾧ περιστρέφη, καὶ τὸ μέγεθος ὃ διελήλυθεν ἀναγκαῖον εἶναι πεπερασμένον· ἴσον δ' αὐτῷ διελήλυθεν· πεπέρανται ἄρα καὶ αὐτός.

Ὅτι μὲν οὖν τὸ κύκλῳ κινούμενον οὐκ ἔστιν ἀτελεύτητον οὐδ' ἄπειρον, ἀλλ' ἔχει τέλος, φανερόν.

Κεφάλαιο 6

Ἀλλὰ μὴν οὐδὲ τὸ ἐπὶ τὸ μέσον οὐδὲ τὸ ἀπὸ τοῦ μέσου φερόμενον ἄπειρον ἔσται· ἐναντίαι γὰρ αἱ φοραὶ ἢ ἄνω καὶ ἢ κάτω, αἱ δ' ἐναντίαι εἰς ἐναντίους τόπους. Τῶν δ' ἐναντίων εἰ θάτερον ὄρισται, καὶ θάτερον ὀρισμένον ἔσται. Τὸ δὲ μέσον ὄρισται· εἰ γὰρ ὀποθενοῦν φέροιτο κάτω τὸ ὑφιστάμενον, οὐκ ἐνδέχεται πορρωτέρω διελθεῖν τοῦ μέσου. Ὀρισμένου οὖν τοῦ μέσου, καὶ τὸν ἄνω τόπον ἀνάγκη ὀρίσθαι. Εἰ δ' οἱ τόποι ὀρισμένοι καὶ πεπερασμένοι, καὶ τὰ σώματα ἔσται πεπερασμένα. Ἔτι εἰ τὸ ἄνω καὶ τὸ κάτω ὄρισται, καὶ τὸ μεταξὺ ἀνάγκη ὀρίσθαι. Εἰ γὰρ μὴ ὄρισται, ἄπειρος ἂν εἴη ἢ κίνησις· τοῦτο δ' ὅτι ἀδύνατον, δέδεικται πρότερον. Ὀρισται ἄρα τὸ μέσον, ὥστε καὶ τὸ ἐν τούτῳ σῶμα ἢ ὄν ἢ γενέσθαι δυνατόν. Ἀλλὰ μὴν τὸ ἄνω καὶ κάτω φερόμενον σῶμα δύναται ἐν τούτῳ γενέσθαι· πέφυκε γὰρ τὸ μὲν ἀπὸ τοῦ μέσου κινεῖσθαι, τὸ δ' ἐπὶ τὸ μέσον.

Ἐκ τε δὴ τούτων φανερόν ὅτι οὐκ ἐνδέχεται σῶμα εἶναι ἄπειρον, καὶ πρὸς τούτοις εἰ βάρος μὴ ἐστὶν ἄπειρον, οὐδ' ἂν τούτων τῶν σωμάτων οὐθὲν εἴη ἄπειρον· ἀνάγκη γὰρ τοῦ ἀπείρου σώματος ἄπειρον εἶναι καὶ τὸ βάρος. (Ὁ δ' αὐτὸς λόγος ἔσται καὶ ἐπὶ τοῦ κούφου· εἰ γὰρ ἐστὶν ἄπειρος βαρύτης, ἔστι καὶ κουφότης, ἐὰν ἄπειρον ᾖ τὸ ἐπιπολάζον). Δῆλον δ' ἐκ τῶνδε.

Ἔστω γὰρ πεπερασμένον, καὶ εἰλήφθω τὸ μὲν ἄπειρον σῶμα ἐφ' ᾧ τὸ AB, τὸ δὲ βάρος αὐτοῦ ἐφ' ᾧ τὸ Γ. Ἀφηρήσθω οὖν ἀπὸ τοῦ ἀπείρου πεπερασμένον μέγεθος ἐφ' ᾧ τὸ ΒΔ· καὶ τὸ βάρος αὐτοῦ ἔστω ἐφ' ᾧ τὸ Ε. Τὸ δὴ Ε τοῦ Γ ἔλαττον ἔσται· τὸ γὰρ τοῦ ἐλάττονος βάρος ἔλαττον. Καταμετρεῖται δὴ τὸ ἔλαττον ὀποσακισοῦν, (273b.) καὶ ὥς τὸ βάρος τοῦ ἐλάττον πρὸς τὸ μείζον, τὸ ΒΔ πρὸς τὸ ΒΖ γεγενῆσθω· ἐνδέχεται γὰρ ἀφελεῖν τοῦ ἀπείρου ὀποσονοῦν. Εἰ τοίνυν ἀνάλογον τὰ μεγέθη τοῖς βάρεσι, τὸ δ' ἔλαττον βάρος τοῦ ἐλάττονός ἐστι μεγέθους, καὶ τὸ μείζον ἂν εἴη τοῦ μείζονος. Ἰσον ἄρα ἔσται τὸ τοῦ πεπερασμένου καὶ τὸ τοῦ ἀπείρου βάρος.

Ἔτι δ' εἰ τοῦ μείζονος σώματος μείζον τὸ βάρος, τὸ τοῦ ΗΒ μείζον ἔσται βάρος ἢ τὸ τοῦ ΖΒ, ὥστε τὸ τοῦ πεπερασμένου ἢ τὸ τοῦ ἀπείρου [μείζον ἔσται βάρος]. Καὶ τὸ τῶν ἀνίσων δὲ μεγεθῶν ταυτὸν ἔσται βάρος· ἄνισον γὰρ τῷ πεπερασμένῳ τὸ ἄπειρον.

Οὐθὲν δὲ διαφέρει τὰ βάρη σύμμετρα εἶναι ἢ ἀσύμμετρα· καὶ γὰρ

ἀσυμμέτρων ὄντων ὁ αὐτὸς ἔσται λόγος· οἷον εἰ [τὸ Ε] τρίτον ὑπερβάλλει μετροῦν τὸ βάρος· τῶν γὰρ ΒΔ μεγεθῶν τριῶν ὅλων ληφθέντων μείζον ἔσται τὸ βάρος ἢ τὸ ἐφ' ᾧ τὸ Γ. Ὡστε τὸ αὐτὸ ἔσται ἀδύνατον. Ἐτι δὲ καὶ ἐγγωρεῖ σύμμετρα λαβεῖν· οὐδὲν γὰρ διαφέρει ἄρχεσθαι ἀπὸ τοῦ βάρους ἢ ἀπὸ τοῦ μεγέθους· οἷον ἐὰν ληφθῇ σύμμετρον βάρος τῷ Γ τὸ ἐφ' ᾧ τὸ Ε, καὶ ἀπὸ τοῦ ἀπείρου ἀφαιρεθῇ τὸ ἔχον τὸ ἐφ' ᾧ Ε βάρος, οἷον τὸ ΒΔ, εἴτα ὡς τὸ βάρος πρὸς τὸ βάρος, τὸ ΒΔ πρὸς ἄλλο γένηται μέγεθος, οἷον πρὸς τὸ ΒΖ· ἐνδέχεται γὰρ ἀπείρου ὄντος τοῦ μεγέθους ὅποσονοῦν ἀφαιρεθῆναι· τούτων γὰρ ληφθέντων σύμμετρα ἔσται καὶ τὰ μεγέθη καὶ τὰ βάρη ἀλλήλοις.

Οὐδὲ δὴ τὸ μέγεθος ὁμοιοβαρὲς εἶναι ἢ ἀνομοιοβαρὲς οὐδὲν διοίσει πρὸς τὴν ἀπόδειξιν· αἰεὶ γὰρ ἔσται λαβεῖν ἰσοβαρῇ σώματα τῷ ΒΔ, ἀπὸ τοῦ ἀπείρου ὅποσαοῦν ἢ ἀφαιροῦντας ἢ προστιθέντας.

Ὡστε δῆλον ἐκ τῶν εἰρημένων ὅτι οὐκ ἔσται τοῦ ἀπείρου σώματος πεπερασμένον τὸ βάρος. Ἀπειρον ἄρα. Εἰ τοίνυν τοῦτ' ἀδύνατον, καὶ τὸ ἄπειρόν τι εἶναι σῶμα ἀδύνατον.

Ἀλλὰ μὴν ὅτι ἄπειρόν τι εἶναι βάρος ἀδύνατον, ἐκ τῶνδε φανερόν. Εἰ γὰρ τοσόνδε βάρος τὴν τοσήνδε ἐν τῷδε τῷ χρόνῳ κινεῖται, τὸ τοσοῦτον καὶ ἔτι ἐν ἐλάττονι, καὶ τὴν ἀναλογίαν ἦν τὰ βάρη ἔχει, οἱ χρόνοι ἀνάπαλιν ἔξου(274a.) σιν, οἷον εἰ τὸ ἡμισυ βάρος ἐν τῷδε, τὸ διπλάσιον ἐν ἡμίσει τούτου. Ἐτι τὸ πεπερασμένον βάρος ἅπασαν πεπερασμένην δίεισιν ἐν τινι χρόνῳ πεπερασμένῳ. Ἀνάγκη ἄρα ἐκ τούτων, εἴ τι ἔστιν ἄπειρον βάρος, κινεῖσθαι μὲν ἢ τοσόνδε ὅσον τὸ πεπερασμένον καὶ ἔτι, μὴ κινεῖσθαι δέ, ἢ ἀνάλογον μὲν δεῖ κατὰ τὰς ὑπεροχὰς κινεῖσθαι, ἐναντίως δὲ τὸ μείζον ἐν τῷ ἐλάττονι. Λόγος δ' οὐθείς ἐστι τοῦ ἀπείρου πρὸς τὸ πεπερασμένον, τοῦ δ' ἐλάττονος χρόνου πρὸς τὸν μείζω πεπερασμένον· ἀλλ' αἰεὶ ἐν ἐλάττονι. Ἐλάχιστος δ' οὐκ ἔστιν.

Οὐδ' εἰ ἦν, ὄφελός τι ἂν ἦν· ἄλλο γὰρ ἂν τι πεπερασμένον ἐλήφθη ἐν τῷ αὐτῷ λόγῳ, ἐν ᾧ τὸ ἄπειρον πρὸς ἕτερον, μείζον, ὥστ' ἐν ἴσῳ χρόνῳ τὴν ἴσην ἂν ἐκινεῖτο τὸ ἄπειρον τῷ πεπερασμένῳ. Ἀλλ' ἀδύνατον. Ἀλλὰ μὴν ἀνάγκη γε, εἴπερ ἐν ὀηλικωοῦν χρόνῳ πεπερασμένῳ δὲ κινεῖται τὸ ἄπειρον, καὶ ἄλλο ἐν τῷ αὐτῷ τούτῳ πεπερασμένον βάρος κινεῖσθαι τινα πεπερασμένην.

Ἀδύνατον ἄρα ἄπειρον εἶναι βάρος, ὁμοίως δὲ καὶ κουφότητα. Καὶ σώματα ἅρ' ἄπειρον βάρος ἔχοντα καὶ κουφότητα ἀδύνατον.

Ὅτι μὲν οὖν οὐκ ἔστιν ἄπειρον σῶμα, δῆλον διὰ τε τῶν κατὰ μέρος θεωροῦσι τοῦτον τὸν τρόπον, καὶ καθόλου σκοπομένοις μὴ μόνον κατὰ τοὺς λόγους τοὺς ἐν τοῖς περὶ τὰς ἀρχὰς εἰρημένους ἡμῖν (διωρίσθη γὰρ ἀκεῖ καθόλου πρότερον περὶ ἀπείρου πῶς ἔστι καὶ πῶς οὐκ ἔστιν) ἀλλὰ καὶ νῦν ἄλλον τρόπον.

Μετὰ δὲ ταῦτ' ἐπισκεπτέον κἂν εἰ μὴ ἄπειρον μὲν τὸ σῶμα τὸ πᾶν, οὐ μὴν ἀλλὰ τοσοῦτόν γε ὥστ' εἶναι πλείους οὐρανοῦς· τάχα γὰρ ἂν τις τοῦτ' ἀπορήσειεν, ὅτι καθάπερ ὁ περὶ ἡμᾶς κόσμος συνέστηκεν, οὐδὲν κωλύει καὶ ἑτέρους εἶναι πλείους μὲν ἑνός, μὴ μέντοι γε ἀπείρους. Πρῶτον δ' εἰπόμεν καθόλου περὶ τοῦ ἀπείρου.

Κεφάλαιο 7

Ανάγκη δὴ σῶμα πᾶν ἥτοι ἄπειρον εἶναι ἢ πεπερασμένον, καὶ εἰ ἄπειρον, ἥτοι ἀνομοιομερὲς ἅπαν ἢ ὁμοιομερὲς, κᾶν εἰ ἀνομοιομερὲς, ἥτοι ἐκ πεπερασμένων εἰδῶν ἢ ἐξ ἀπειρῶν. Ὅτι μὲν τοῖνυν οὐχ οἷόν τε ἐξ ἀπειρῶν, φανερόν, εἴ τις ἡμῖν ἐάσει μένειν τὰς πρώτας ὑποθέσεις· πεπερασ(274b.) μένων γὰρ τῶν πρώτων κινήσεων οὐσῶν, ἀνάγκη καὶ τὰς ιδέας τῶν ἀπλῶν σωμάτων εἶναι πεπερασμένας. Ἀπλῇ μὲν γὰρ ἡ τοῦ ἀπλοῦ σώματος κίνησις, αἱ δ' ἀπλαῖ πεπερασμέναι κινήσεις εἰσὶν· ἀνάγκη δὲ κίνησιν ἔχειν σῶμα πᾶν φυσικόν.

Ἀλλὰ μὴν εἴ γε ἐκ πεπερασμένων ἔσται τὸ ἄπειρον, ἀνάγκη καὶ τῶν μορίων ἕκαστον εἶναι ἄπειρον, λέγω δ' οἷον τὸ ὕδωρ ἢ τὸ πῦρ. Ἀλλ' ἀδύνατον· δέδεικται γὰρ ὅτι οὔτε βάρος οὔτε κουφότης ἐστὶν ἄπειρος.

Ἔτι ἀναγκαῖον ἀπείρους τῷ μεγέθει εἶναι καὶ τοὺς τόπους αὐτῶν, ὥστε καὶ τὰς κινήσεις ἀπείρους εἶναι πάντων. Τοῦτο δ' ἀδύνατον, εἰ θήσομεν ἀληθεῖς εἶναι τὰς πρώτας ὑποθέσεις, καὶ μήτε τὸ κάτω φερόμενον εἰς ἄπειρον ἐνδέχεσθαι φέρεσθαι μήτε τὸ ἄνω κατὰ τὸν αὐτὸν λόγον. Ἀδύνατον γὰρ γίνεσθαι ὃ μὴ ἐνδέχεται γενέσθαι, ὁμοίως ἐπὶ τοῦ τοιόνδε καὶ τοσόνδε καὶ τοῦ ποῦ. Λέγω δ', εἰ ἀδύνατον γενέσθαι λευκὸν ἢ πηχυαῖον ἢ ἐν Αἰγύπτῳ, καὶ γίνεσθαι τι τούτων ἀδύνατον. Ἀδύνατον ἄρα καὶ φέρεσθαι ἐκεῖ οὗ μὴθὲν δυνατὸν ἀφικέσθαι φερόμενον. Ἔτι εἰ καὶ διεσπασμένα ἐστίν, οὐδὲν ἧττον ἐνδέχεται ἂν τὸ ἐξ ἀπάντων [πῦρ] ἄπειρον εἶναι. Ἀλλὰ σῶμα ἦν τὸ πάντῃ διάστασιν ἔχον· ὥστε πῶς οἷόν τε πλείω μὲν ἀνόμοια, ἕκαστον δ' αὐτῶν ἄπειρον εἶναι; πάντῃ γὰρ ἕκαστον δεῖ ἄπειρον εἶναι.

Ἀλλὰ μὴν οὐδὲ πᾶν ὁμοιομερὲς ἐνδέχεται τὸ ἄπειρον εἶναι. Πρῶτον μὲν γὰρ οὐκ ἔστιν ἄλλη παρὰ ταύτας κινήσεις. Ἐξεῖ οὖν μίαν τούτων. Εἰ δὲ τοῦτο, συμβήσεται ἢ βάρος ἄπειρον ἢ κουφότητα εἶναι ἄπειρον.

Ἀλλὰ μὴν οὐδ' οἷόν τε τὸ κύκλῳ σῶμα φερόμενον [εἶναι ἄπειρον]. Ἀδύνατον γὰρ τὸ ἄπειρον φέρεσθαι κύκλῳ· οὐθὲν γὰρ διαφέρει τοῦτο λέγειν ἢ τὸ τὸν οὐρανὸν φάναι ἄπειρον εἶναι, τοῦτο δὲ δέδεικται ὅτι ἀδύνατον. Ἀλλὰ μὴν οὐδ' ὅλως γε τὸ ἄπειρον

ἐνδέχεται κινεῖσθαι. Ἡ γὰρ κατὰ φύσιν κινηθήσεται ἢ βία· καὶ εἰ βία, ἔστιν αὐτῷ καὶ ἡ κατὰ φύσιν, ὥστε καὶ τόπος ἄλλος ἴσος εἰς ὃν οἰσθήσεται. Τοῦτο δ' ἀδύνατον.

Ὅτι δ' ὅλως ἀδύνατον ἄπειρον ὑπὸ πεπερασμένου παθεῖν τι ἢ ποιῆσαι τὸ πεπερασμένον, ἐκ τῶνδε φανερόν. Ἐστω (275a.) γὰρ ἄπειρον ἐφ' οὗ Α, πεπερασμένον ἐφ' οὗ Β, χρόνος ἐν ᾧ ἐκίνησέ τι ἢ ἐκινήθη Γ. Εἰ δὴ ὑπὸ τοῦ Β τὸ Α ἐθερμάνθη ἢ ὥσθη ἢ ἄλλο τι ἔπαθεν ἢ καὶ ὅτιοῦν ἐκινήθη ἐν τῷ χρόνῳ ἐφ' οὗ Γ, ἔστω τὸ Δ τοῦ Β ἔλαττον, καὶ τὸ ἔλαττον ἐν τῷ ἴσῳ χρόνῳ ἔλαττον κινεῖται· ἔστω δὲ τὸ ἐφ' ᾧ Ε ὑπὸ τοῦ Δ ἡλλοιωμένον. Ὁ δὴ ἐστὶ τὸ Δ πρὸς τὸ Β, τὸ Ε ἔσται πρὸς πεπερασμένον τι. Ἐστω δὴ τὸ μὲν ἴσον ἐν ἴσῳ χρόνῳ ἴσον ἡλλοιοῦν, τὸ δ' ἔλαττον ἐν τῷ ἴσῳ ἔλαττον, τὸ δὲ μείζον μείζον, τοσοῦτον δὲ ὅσον ἀνάλογον ἔσται ὅπερ τὸ μείζον πρὸς τὸ ἔλαττον. Οὐκ ἄρα τὸ ἄπειρον ὑπ' οὐδενὸς πεπερασμένου κινηθήσεται ἐν οὐθενὶ χρόνῳ· ἔλαττον γὰρ ἄλλο ἐν τῷ ἴσῳ χρόνῳ ὑπὸ ἐλάττονος κινηθήσεται, πρὸς ὃ τὸ ἀνάλογον πεπερασμένον ἔσται· τὸ γὰρ ἄπειρον πρὸς τὸ πεπερασμένον ἐν οὐθενὶ λόγῳ ἐστίν. Ἀλλὰ μὴν οὐδὲ τὸ ἄπειρον ἐν οὐθενὶ χρόνῳ κινήσει τὸ πεπερασμένον. Ἐστω γὰρ ἐφ' ᾧ τὸ Α ἄπειρον, τὸ δὲ Β πεπερασμένον, χρόνος ἐν ᾧ τὸ Γ. Οὐκοῦν τὸ Δ ἐν τῷ Γ ἔλαττον τοῦ Β κινήσει· ἔστω τὸ Ζ. Ὁ δὴ ἐστὶ τὸ ΒΖ ὅλον πρὸς τὸ Ζ, τὸ Ε ἔχον τὸν λόγον τοῦτον ἔστω πρὸς τὸ Δ. Κινήσει ἄρα τὸ Ε τὸ ΒΖ ἐν τῷ Γ. Τὸ πεπερασμένον τοίνυν καὶ τὸ ἄπειρον ἐν τῷ ἴσῳ χρόνῳ ἡλλοιώσει. Ἀλλ' ἀδύνατον· ἐν ἐλάττονι γὰρ τὸ μείζον ὑπέκειτο. Ἀλλ' αἰὶ ὁ ληφθεὶς χρόνος ταῦτό ποιήσει, ὥστ' οὐκ ἔσται χρόνος οὐθεὶς ἐν ᾧ κινήσει. Ἀλλὰ μὴν ἐν ἀπείρῳ γε οὐκ ἔστι κινῆσαι οὐδὲ κινήσθαι· πέρας γὰρ οὐκ ἔχει, ἡ δὲ ποίησις καὶ τὸ πάθος ἔχει.

Οὐδ' ἄπειρον δὴ ὑπ' ἀπείρου ἐνδέχεται οὐθὲν παθεῖν. Ἐστω γὰρ τὸ Α ἄπειρον καὶ τὸ Β, χρόνος δ' ἐν ᾧ ἔπαθε τὸ Β ὑπὸ τοῦ Α, ἐφ' ᾧ ΓΔ. Τὸ δὴ ἐφ' ᾧ τὸ Ε τοῦ ἀπείρου μέρος, ἐπεὶ ὅλον πέπονθε τὸ Β, οὐκ ἐν ἴσῳ χρόνῳ τὸ αὐτό· ὑποκείσθω γὰρ ἐν ἐλάττονι κινεῖσθαι τὸ ἔλαττον χρόνῳ. Ἐστω τὸ Ε κεινημένον ὑπὸ τοῦ Α ἐν τῷ Δ.

Ὁ δὴ τὸ Δ πρὸς τὸ ΓΔ, τὸ Ε ἐστὶ πρὸς τι τοῦ Β πεπερασμένον. Τοῦτο τοίνυν ἀνάγκη ὑπὸ τοῦ Α κινήσθαι ἐν τῷ ΓΔ χρόνῳ· ὑπὸ γὰρ τοῦ αὐτοῦ ὑποκείσθω ἐν τῷ πλείονι καὶ ἐλάττονι (275b.) χρόνῳ τὸ μείζον καὶ τὸ ἔλαττον πάσχειν, ὅσα ἀνάλογον τῷ χρόνῳ διήρηται. Ἐν οὐδενὶ ἄρα χρόνῳ δυνατόν πεπερασμένῳ ἄπειρον ὑπ' ἀπείρου κινήσθαι· ἐν ἀπείρῳ ἄρα. Ἀλλ' ὁ μὲν ἄπειρος χρόνος οὐκ ἔχει

τέλος, τὸ δὲ κεκινημένον ἔχει.

Εἰ τοίνυν πᾶν σῶμα αἰσθητὸν ἔχει δύναμιν ποιητικὴν ἢ παθητικὴν ἢ ἄμφω, ἀδύνατον σῶμα ἄπειρον αἰσθητὸν εἶναι. Ἀλλὰ μὴν καὶ ὅσα γε σώματα ἐν τόπῳ, πάντα αἰσθητά. Οὐκ ἔστιν ἄρα σῶμα ἄπειρον ἔξω τοῦ οὐρανοῦ οὐθέν. Ἀλλὰ μὴν οὐδὲ μέχρι τινός. Οὐθέν ἄρα ὅλως σῶμα ἔξω τοῦ οὐρανοῦ. Εἰ μὲν γὰρ νοητόν, ἔσται ἐν τόπῳ· τὸ γὰρ ἔξω καὶ ἔσω τόπον σημαίνει. Ὡστ' ἔσται αἰσθητόν. Αἰσθητὸν δ' οὐθέν μὴ ἐν τόπῳ.

Λογικώτερον δ' ἔστιν ἐπιχειρεῖν καὶ ὧδε. Οὔτε γὰρ κύκλῳ οἶόν τε κινεῖσθαι τὸ ἄπειρον ὁμοιομερές ὄν· μέσον μὲν γὰρ τοῦ ἀπείρου οὐκ ἔστι, τὸ δὲ κύκλῳ περὶ τὸ μέσον κινεῖται. Ἀλλὰ μὴν οὐδ' ἐπ' εὐθείας οἶόν τε φέρεσθαι τὸ ἄπειρον· δεήσει γὰρ ἕτερον εἶναι τοσοῦτον τόπον ἄπειρον εἰς ὃν οἰσθήσεται κατὰ φύσιν, καὶ ἄλλον τοσοῦτον εἰς ὃν παρὰ φύσιν.

Ἔτι εἴτε φύσει ἔχει κίνησιν τοῦ εἰς εὐθὺ εἴτε βίᾳ κινεῖται, ἀμφοτέρως δεήσει ἄπειρον εἶναι τὴν κινουσαν ἰσχύν· ἢ τε γὰρ ἄπειρος ἀπείρου καὶ τοῦ ἀπείρου ἄπειρος ἢ ἰσχύς· ὥστ' ἔσται καὶ τὸ κινεῖν ἄπειρον (λόγος δ' ἐν τοῖς περὶ κινήσεως ὅτι οὐθέν ἔχει ἄπειρον δύναμιν τῶν πεπερασμένων, οὐδὲ τῶν ἀπείρων πεπερασμένην). Εἰ οὖν τὸ κατὰ φύσιν καὶ παρὰ φύσιν ἐνδέχεται κινήσθαι, ἔσται δύο ἄπειρα, τό τε κινεῖν οὕτω καὶ τὸ κινούμενον. Ἔτι τὸ κινεῖν τὸ ἄπειρον τί ἐστιν; εἰ μὲν γὰρ αὐτὸ ἑαυτό, ἐμψυχον ἔσται. Τοῦτο δὲ πῶς δυνατόν, ἄπειρον εἶναι ζῶον; εἰ δ' ἄλλο [τι] τὸ κινεῖν, δύο ἔσται ἄπειρα, τό τε κινεῖν καὶ τὸ κινούμενον, διαφέροντα τὴν μορφήν καὶ τὴν δύναμιν.

Εἰ δὲ μὴ συνεχές τὸ πᾶν, ἀλλ' ὥσπερ λέγει Δημόκριτος καὶ Λεῦκιππος, διωρισμένα τῷ κενῷ, μίαν ἀναγκαῖον εἶναι πάντων τὴν κίνησιν. Διώρισται μὲν γὰρ τοῖς σχήμασιν· τὴν δὲ φύσιν φασὶν αὐτῶν εἶναι μίαν, ὥσ(276a.) περ ἂν εἰ χρυσὸς ἕκαστον εἴη κεχωρισμένος. Τούτων δέ, καθάπερ λέγομεν, ἀναγκαῖον εἶναι τὴν αὐτὴν κίνησιν· ὅπου γὰρ μία βῶλος, καὶ ἡ σύμπασα γῆ φέρεται, καὶ τό τε πᾶν πῦρ καὶ σπινθήρ εἰς τὸν αὐτὸν τόπον. Ὡστ' οὔτε κοῦφον ἀπλῶς οὐθέν ἔσται τῶν σωμάτων, εἰ πάντ' ἔχει βάρος· εἰ δὲ κουφότητα, βαρὺ οὐδέν.

Ἔτι εἰ βάρος ἔχει ἢ κουφότητα, ἔσται ἢ ἔσχατόν τι τοῦ παντός ἢ μέσον. Τοῦτο δ' ἀδύνατον ἀπείρου γ' ὄντος. Ὅλως δ', οὐ μὴ ἐστὶ μέσον μηδ' ἔσχατον, μηδὲ τὸ μὲν ἄνω τὸ δὲ κάτω, τόπος οὐθεὶς ἔσται

τοῖς σώμασι τῆς φορᾶς. Τούτου δὲ μὴ ὄντος κίνησις οὐκ ἔσται· ἀνάγκη γὰρ κινεῖσθαι ἥτοι κατὰ φύσιν ἢ παρὰ φύσιν, ταῦτα δ' ὥρισται τοῖς τόποις τοῖς τ' οἰκείοις καὶ τοῖς ἀλλοτρίοις.

Ἔτι εἰ οὐ παρὰ φύσιν τι μένει ἢ φέρεται, ἀνάγκη ἄλλου τινὸς εἶναι τοῦτον τὸν τόπον κατὰ φύσιν (τοῦτο δὲ πιστὸν ἐκ τῆς ἐπαγωγῆς), ἀνάγκη δὴ μὴ πάντα ἢ βάρος ἔχειν ἢ κουφότητα, ἀλλὰ τὰ μὲν τὰ δὲ μή. Ὅτι μὲν τοίνυν οὐκ ἔστι τὸ σῶμα τοῦ παντὸς ἄπειρον, ἐκ τούτων φανερόν.

Κεφάλαιο 8

Διότι δ' οὐδὲ πλείους οἶόν τ' οὐρανοὺς εἶναι, λέγωμεν· τοῦτο γὰρ ἔφαμεν ἐπισκεπτέον, εἴ τις μὴ νομίζει καθόλου δεδεῖχθαι περὶ τῶν σωμάτων ὅτι ἀδύνατον ἐκτὸς εἶναι τοῦ κόσμου τοῦδε ὅτιοῦν αὐτῶν, ἀλλὰ μόνον ἐπὶ τῶν ἀορίστως κειμένων εἰρῆσθαι τὸν λόγον.

Ἄπαντα γὰρ καὶ μένει καὶ κινεῖται καὶ κατὰ φύσιν καὶ βία, καὶ κατὰ φύσιν μὲν, ἐν ᾧ μένει μὴ βία, καὶ φέρεται, καὶ εἰς ὃν φέρεται, καὶ μένει· ἐν ᾧ δὲ βία, καὶ φέρεται βία, καὶ εἰς ὃν βία φέρεται, βία καὶ μένει. Ἐτι εἰ βία ἦδε ἡ φορά, ἡ ἐναντία κατὰ φύσιν. Ἐπὶ δὴ τὸ μέσον τὸ ἐνταῦθα εἰ βία οἰσθήσεται ἡ γῆ ἐκεῖθεν, ἐντεῦθεν οἰσθήσεται ἐκεῖ κατὰ φύσιν· καὶ εἰ μένει ἐνταῦθα ἡ ἐκεῖθεν μὴ βία, καὶ οἰσθήσεται δεῦρο κατὰ φύσιν. Μία γὰρ ἡ κατὰ φύσιν.

Ἐτι ἀνάγκη πάντας τοὺς κόσμους ἐκ τῶν αὐτῶν εἶναι σωμάτων, ὁμοίους γ' ὄντας τὴν φύσιν.

Ἀλλὰ μὴν καὶ τῶν σωμάτων ἕκαστον ἀναγκαῖον τὴν αὐτὴν (276b.) ἔχειν δύναμιν, οἶον λέγω πῦρ καὶ γῆν καὶ τὰ μεταξὺ τούτων· εἰ γὰρ ὁμώνυμα ταῦτα καὶ μὴ κατὰ τὴν αὐτὴν ιδέαν λέγονται τάκει τοῖς παρ' ἡμῖν, καὶ τὸ πᾶν ὁμωνύμως ἂν λέγοιτο κόσμος. Δῆλον τοίνυν ὅτι τὸ μὲν ἀπὸ τοῦ μέσου φέρεσθαι πέφυκε, τὸ δ' ἐπὶ τὸ μέσον αὐτῶν, εἴπερ πᾶν ὁμοειδὲς τὸ πῦρ τῷ πυρὶ καὶ τῶν ἄλλων ἕκαστον, ὥσπερ καὶ τὰ ἐν τούτῳ μόρια τοῦ πυρός.

Ὅτι δ' ἀναγκαῖον οὕτως ἔχειν, ἐκ τῶν περὶ τὰς κινήσεις ὑποθέσεων φανερόν· αἱ τε γὰρ κινήσεις πεπερασμέναι, ἕκαστόν τε τῶν στοιχείων λέγεται καθ' ἐκάστην τῶν κινήσεων. Ὡστ' εἴπερ καὶ αἱ κινήσεις αἱ αὐταί, καὶ τὰ στοιχεῖα ἀναγκαῖον εἶναι πανταχοῦ ταυτά.

Πέφυκεν ἄρα φέρεσθαι καὶ ἐπὶ τόδε τὸ μέσον τὰ ἐν ἄλλῳ κόσμῳ τῆς γῆς μόρια, καὶ πρὸς τόδε τὸ ἔσχατον τὸ ἐκεῖ πῦρ. Ἀλλ' ἀδύνατον· τούτου γὰρ συμβαίνοντος ἀνάγκη φέρεσθαι ἄνω μὲν τὴν γῆν ἐν τῷ οἰκείῳ κόσμῳ, τὸ δὲ πῦρ ἐπὶ τὸ μέσον, ὁμοίως δὲ καὶ τὴν ἐντεῦθεν γῆν ἀπὸ τοῦ μέσου φέρεσθαι κατὰ φύσιν πρὸς τὸ ἐκεῖ φερομένην μέσον, διὰ τὸ τοὺς κόσμους οὕτω κεῖσθαι πρὸς ἀλλήλους. Ἡ γὰρ οὐ θετέον τὴν αὐτὴν εἶναι φύσιν τῶν ἀπλῶν σωμάτων ἐν τοῖς πλείοσιν οὐρανοῖς, ἢ λέγοντας οὕτως τὸ μέσον ἐν ποιεῖν ἀνάγκη καὶ τὸ ἔσχατον· τούτου δ' ὄντος ἀδύνατον εἶναι κόσμους πλείους ἑνός.

Τὸ δ' ἀξιοῦν ἄλλην εἶναι φύσιν τῶν ἀπλῶν σωμάτων, ἂν ἀποσχῶσιν ἔλαττον ἢ πλεῖον τῶν οἰκείων τόπων, ἄλογον· τί γὰρ διαφέρει τὸ τοσονδὶ φάναι μῆκος ἀπέχειν ἢ τοσονδί; Διοίσει γὰρ κατὰ λόγον, ὅσῳ πλεῖον μᾶλλον, τὸ δ' εἶδος τὸ αὐτό.

Ἀλλὰ μὴν ἀνάγκη γ' εἶναι τινα κίνησιν αὐτῶν· ὅτι μὲν γὰρ κινουῦνται, φανερόν. Πότερον οὖν βία πάσας ἐροῦμεν κινεῖσθαι καὶ τὰς ἐναντίας; ἀλλ' ὃ μὴ πέφυκεν ὅλως κινεῖσθαι, ἀδύνατον τοῦτο κινεῖσθαι βία. Εἰ τοίνυν ἐστὶ τις κίνησις αὐτῶν κατὰ φύσιν, ἀνάγκη τῶν ὁμοειδῶν καὶ τῶν καθ' ἕκαστον πρὸς ἓνα ἀριθμῷ τόπον ὑπάρχειν τὴν κίνησιν, οἷον πρὸς τόδε τι μέσον καὶ πρὸς τόδε τι ἔσχατον. Εἰ δὲ πρὸς εἶδει ταῦτά, (277a.) πλείω δέ, διότι καὶ τὰ καθ' ἕκαστα πλείω μὲν, εἶδει δ' ἕκαστον ἀδιάφορον, οὐ τῷ μὲν τῷ δ' οὐ τοιοῦτον ἔσται τῶν μορίων, ἀλλ' ὁμοίως πᾶσιν· ὁμοίως γὰρ ἅπαντα κατ' εἶδος ἀδιάφορα ἀλλήλων, ἀριθμῷ δ' ἕτερον ὅτιοῦν ὅτουοῦν. Λέγω δὲ τοῦτο, ὅτι εἰ τὰ ἐνταῦθα μόρια πρὸς ἀλλήλα καὶ τὰ ἐν ἐτέρῳ κόσμῳ ὁμοίως ἔχει, καὶ τὸ ληφθὲν ἐντεῦθεν οὐδὲν διαφερόντως πρὸς τῶν ἐν ἄλλῳ τινὶ κόσμῳ μορίων καὶ πρὸς τῶν ἐν τῷ αὐτῷ, ἀλλ' ὡσαύτως· διαφέρουσι γὰρ οὐθὲν εἶδει ἀλλήλων. Ὡστ' ἀναγκαῖον ἢ κινεῖν ταύτας τὰς ὑποθέσεις, ἢ τὸ μέσον ἐν εἶναι καὶ τὸ ἔσχατον. Τούτου δ' ὄντος ἀνάγκη καὶ τὸν οὐρανὸν ἓνα μόνον εἶναι καὶ μὴ πλείους, τοῖς αὐτοῖς τεκμηρίοις τούτοις καὶ ταῖς αὐταῖς ἀνάγκαις.

Ὅτι δ' ἐστὶ τι οὐ πέφυκεν ἢ γῇ φέρεσθαι καὶ τὸ πῦρ, δῆλον καὶ ἐκ τῶν ἄλλων. Ὅλως γὰρ τὸ κινούμενον ἐκ τινος εἰς τι μεταβάλλει, καὶ ταῦτα ἐξ οὗ καὶ εἰς ὃ εἶδει διαφέρει· πᾶσα δὲ πεπερασμένη μεταβολή· οἷον τὸ ὑγιαζόμενον ἐκ νόσου εἰς ὑγίειαν καὶ τὸ αὐξανόμενον ἐκ μικρότητος εἰς μέγεθος. Καὶ τὸ φερόμενον ἄρα· καὶ γὰρ τοῦτο γίνεται ποθέν ποι. Δεῖ ἄρα εἶδει διαφέρειν ἐξ οὗ καὶ εἰς ὃ πέφυκε φέρεσθαι, ὥσπερ τὸ ὑγιαζόμενον οὐχ οὗ ἔτυχεν, οὐδ' οὗ βούλεται ὁ κινῶν.

Καὶ τὸ πῦρ ἄρα καὶ ἡ γῇ οὐκ εἰς ἄπειρον φέρονται, ἀλλ' εἰς ἀντικείμενα· ἀντίκειται δὲ κατὰ τόπον τὸ ἄνω τῷ κάτω, ὥστε ταῦτα ἔσται πέρατα τῆς φορᾶς. Ἐπεὶ καὶ ἡ κύκλῳ ἔχει πως ἀντικείμενα τὰ κατὰ διάμετρον, τῇ δ' ὅλη οὐκ ἔστιν ἐναντίον οὐδέν, ὥστε καὶ τούτοις τρόπον τινὰ ἡ κίνησις εἰς ἀντικείμενα καὶ πεπερασμένα. Ἀνάγκη ἄρα εἶναι τι τέλος καὶ μὴ εἰς ἄπειρον φέρεσθαι.

Τεκμήριον δὲ τοῦ μὴ εἰς ἄπειρον φέρεσθαι καὶ τὸ τὴν γῆν μὲν, ὅσῳ ἂν ἐγγυτέρῳ ἢ τοῦ μέσου, θᾶπτον φέρεσθαι, τὸ δὲ πῦρ, ὅσῳ ἂν

τοῦ ἄνω. Εἰ δ' ἄπειρον ἦν, ἄπειρος ἂν ἦν καὶ ἡ ταχυτής, εἰ δ' ἡ ταχυτής, καὶ τὸ βάρος καὶ ἡ κουφότης· ὥς γὰρ <εἰ> τῷ κατωτέρῳ ταχὺ ἦν τι, ἕτερον τῷ βάρει ἂν ἦν ταχύ, οὕτως εἰ ἄπειρος ἦν ἡ τούτου ἐπίδοσις, καὶ ἡ τῆς ταχυτήτος ἐπίδοσις ἄπειρος ἂν ἦν.

Ἀλλὰ (277b.) μὴν οὐδ' ὑπ' ἄλλου φέρεται αὐτῶν τὸ μὲν ἄνω τὸ δὲ κάτω· οὐδὲ βία, ὥσπερ τινὲς φασὶ τῇ ἐκθλίψει. Βραδύτερον γὰρ ἂν ἐκινεῖτο τὸ πλεῖον πῦρ ἄνω καὶ ἡ πλείων γῆ κάτω· νῦν δὲ τοῦναντίον ἀεὶ τὸ πλεῖον πῦρ θάττον φέρεται καὶ ἡ πλείων γῆ εἰς τὸν αὐτῶν τόπον. Οὐδὲ θάττον ἂν πρὸς τῷ τέλει ἐφέρετο, εἰ βία καὶ ἐκθλίψει· πάντα γὰρ τοῦ βιασαμένου πορρωτέρῳ γιγνόμενα βραδύτερον φέρεται, καὶ ὅθεν βία, ἐκεῖ φέρεται οὐ βία. Ὡστ' ἐκ τούτων θεωροῦσιν ἔστι λαβεῖν τὴν πίστιν περὶ τῶν λεγομένων ἱκανῶς.

Ἔτι δὲ καὶ διὰ τῶν ἐκ τῆς πρώτης φιλοσοφίας λόγων δειχθεῖν ἂν, καὶ ἐκ τῆς κύκλῳ κινήσεως, ἣν ἀναγκαῖον αἴδιον ὁμοίως ἐνταυθὰ τ' εἶναι καὶ ἐν τοῖς ἄλλοις κόσμοις.

Δῆλον δὲ κἂν ὧδε γένοιτο σκοπούμενοις ὅτι ἀνάγκη εἶναι τὸν οὐρανόν. Τριῶν γὰρ ὄντων τῶν σωματικῶν στοιχείων, τρεῖς ἔσονται καὶ οἱ τόποι τῶν στοιχείων, εἷς μὲν ὁ τοῦ ὑφισταμένου σώματος ὁ περὶ τὸ μέσον, ἄλλος δὲ ὁ τοῦ κύκλῳ φερομένου, ὅσπερ ἐστὶν ἔσχατος, τρίτος δ' ὁ μεταξὺ τούτων ὁ τοῦ μέσου σώματος. Ἀνάγκη γὰρ ἐν τούτῳ εἶναι τὸ ἐπιπολάζον. Εἰ γὰρ μὴ ἐν τούτῳ, ἔξω ἔσται· ἀλλ' ἀδύνατον ἔξω. Τὸ μὲν γὰρ ἀβαρὲς τὸ δ' ἔχον βάρος, κατωτέρῳ δὲ ὁ τοῦ βάρους ἔχοντος σώματος τόπος, εἶπερ ὁ πρὸς τῷ μέσῳ τοῦ βαρέος. Ἀλλὰ μὴν οὐδὲ παρὰ φύσιν· ἄλλῳ γὰρ ἔσται κατὰ φύσιν, ἄλλο δ' οὐκ ἦν. Ἀνάγκη ἄρα ἐν τῷ μεταξὺ εἶναι. Τούτου δ' αὐτοῦ τίνες εἰσὶ διαφοραί, ὥστερον ἐροῦμεν.

Περὶ μὲν οὖν τῶν σωματικῶν στοιχείων, ποῖα τ' ἐστὶ καὶ πόσα, καὶ τίς ἐκάστου τόπος, ἔτι δ' ὅλως πόσοι τὸ πλῆθος οἱ τόποι, δῆλον ἡμῖν ἐκ τῶν εἰρημένων.

Κεφάλαιο 9

Ὅτι δ' οὐ μόνον εἷς ἐστίν, ἀλλὰ καὶ ἀδύνατον γενέσθαι πλείους, ἔτι δ' ὥς αἰδῖος ἄφθαρτος ὢν καὶ ἀγέννητος, λέγωμεν, πρῶτον διαπορήσαντες περὶ αὐτοῦ.

Δόξειε γὰρ ἂν ὡδὶ σκοπούμενοις ἀδύνατον ἓνα καὶ μόνον εἶναι αὐτόν· ἐν ἅπασι γὰρ καὶ τοῖς φύσει καὶ τοῖς ἀπὸ τέχνης συνεστῶσι καὶ γεγεννημένοις ἕτερόν ἐστιν αὐτὴ τε καθ' αὐτὴν ἡ μορφή καὶ μεμιγμένη μετὰ τῆς ὕλης· οἷον τῆς σφαίρας ἕτερον τὸ εἶδος (278a.) καὶ ἡ χρυσοῦ καὶ ἡ χαλκῆ σφαῖρα, καὶ πάλιν τοῦ κύκλου ἑτέρα ἡ μορφή καὶ ὁ χαλκοῦς καὶ ὁ ξύλινος κύκλος· τὸ γὰρ τί ἦν εἶναι λέγοντες σφαῖρα ἢ κύκλω οὐκ ἐροῦμεν ἐν τῷ λόγῳ χρυσὸν ἢ χαλκόν, ὥς οὐκ ὄντα ταῦτα τῆς οὐσίας· ἂν δὲ τὴν χαλκὴν ἢ χρυσοῦν, ἐροῦμεν, καὶ ἐὰν μὴ δυνώμεθα νοῆσαι μηδὲ λαβεῖν ἄλλο τι παρὰ τὸ καθ' ἕκαστον. Ἐνίστε γὰρ οὐθὲν κωλύει τοῦτο συμβαίνειν, οἷον εἰ μόνος εἷς ληφθεὶς κύκλος· οὐθὲν γὰρ ἦττον ἄλλο ἔσται τὸ κύκλω εἶναι καὶ τῷδε τῷ κύκλω, καὶ τὸ μὲν εἶδος, τὸ δ' εἶδος ἐν τῇ ὕλῃ καὶ τῶν καθ' ἕκαστον.

Ἐπεὶ οὖν ἐστὶν ὁ οὐρανὸς αἰσθητός, τῶν καθ' ἕκαστον ἂν εἴη· τὸ γὰρ αἰσθητὸν ἅπαν ἐν τῇ ὕλῃ ὑπῆρχεν. Εἰ δὲ τῶν καθ' ἕκαστον, ἕτερον ἂν εἴη τῷδε τῷ οὐρανῷ εἶναι καὶ οὐρανῷ ἀπλῶς. Ἐτερον ἄρα ὅδε ὁ οὐρανὸς καὶ οὐρανὸς ἀπλῶς, καὶ τὸ μὲν ὥς εἶδος καὶ μορφή, τὸ δ' ὥς τῇ ὕλῃ μεμιγμένον. Ὡν δ' ἐστὶ μορφή τις καὶ εἶδος, ἥτοι ἔστιν ἢ ἐνδέχεται πλείω γενέσθαι τὰ καθ' ἕκαστα. Εἴτε γὰρ ἔστιν εἶδη, καθάπερ φασὶ τινες, ἀνάγκη τοῦτο συμβαίνειν, εἴτε καὶ χωριστὸν μηθὲν τῶν τοιούτων, οὐθὲν ἦττον· ἐπὶ πάντων γὰρ οὕτως ὁρῶμεν, ὅσων ἡ οὐσία ἐν ὕλῃ ἐστίν, πλείω καὶ ἄπειρα ὄντα τὰ ὁμοειδῆ. Ὡστε ἥτοι εἰσὶ πλείους οὐρανοὶ ἢ ἐνδέχεται πλείους εἶναι. Ἐκ μὲν δὴ τούτων ὑπολάβοι τις ἂν καὶ εἶναι καὶ ἐνδέχεσθαι πλείους εἶναι οὐρανούς· σκεπτέον δὲ πάλιν τί τούτων λέγεται καλῶς καὶ τί οὐ καλῶς.

Τὸ μὲν οὖν ἕτερον εἶναι τὸν λόγον τὸν ἄνευ τῆς ὕλης καὶ τὸν ἐν τῇ ὕλῃ τῆς μορφῆς καλῶς τε λέγεται, καὶ ἔστω τοῦτ' ἀληθές. Ἀλλ' οὐδὲν ἦττον οὐδεμία ἀνάγκη διὰ τοῦτο πλείους εἶναι κόσμους, οὐδ' ἐνδέχεται γενέσθαι πλείους, εἴπερ οὗτος ἐξ ἀπάσης ἐστὶ τῆς ὕλης, ὥσπερ ἔστιν.

Ὡδὶ δὲ μᾶλλον ἴσως τὸ λεγόμενον ἔσται δῆλον. Εἰ γάρ ἐστιν ἡ γρυπότης καμπυλότης ἐν ῥίνι ἢ σαρκί, καὶ ἔστιν ὕλη τῇ γρυπότητι ἡ σάρξ, εἰ ἐξ ἀπασῶν τῶν σαρκῶν μία γένοιτο σὰρξ καὶ ὑπάρξειεν ταύτῃ τὸ γρυπόν, οὐθὲν ἂν ἄλλ' οὕτ' εἴη γρυπὸν οὕτ' ἐνδέχοιτο γενέσθαι. Ὁμοίως δὲ καὶ εἰ τῷ ἀνθρώπῳ ἐστὶν ὕλη σάρκες καὶ ὅστᾳ, εἰ ἐκ πάσης τῆς σαρκὸς καὶ πάντων τῶν ὁστώων ἀνθρωπος γένοιτο ἀδυνάτων ὄντων διαλυθῆναι, οὐκ ἂν ἐνδέχοιτο εἶναι ἄλλον ἀνθρωπον. Ὡσαύ(278b.) τως δὲ καὶ ἐπὶ τῶν ἄλλων· ὅλως γὰρ ὅσων ἐστὶν ἡ οὐσία ἐν ὑποκειμένῃ τινὶ ὕλῃ, τούτων οὐδὲν ἐνδέχεται γίγνεσθαι μὴ ὑπαρχούσης τινὸς ὕλης.

Ὁ δ' οὐρανὸς ἔστι μὲν τῶν καθ' ἕκαστα καὶ τῶν ἐκ τῆς ὕλης· ἀλλ' εἰ μὴ ἐκ μορίου αὐτῆς συνέστηκεν ἀλλ' ἐξ ἀπάσης, τὸ μὲν εἶναι αὐτῷ οὐρανῷ καὶ τῷδε τῷ οὐρανῷ ἕτερόν ἐστιν, οὐ μέντοι οὕτ' ἂν εἴη ἄλλος οὕτ' ἂν ἐνδέχοιτο γενέσθαι πλείους, διὰ τὸ πᾶσαν τὴν ὕλην περιειληφέναι τοῦτον. Λείπεται ἄρα αὐτὸ τοῦτο δεῖξαι, ὅτι ἐξ ἅπαντος τοῦ φυσικοῦ καὶ τοῦ αἰσθητοῦ συνέστηκε σῶματος.

Εἵπωμεν δὲ πρῶτον τί λέγομεν εἶναι τὸν οὐρανὸν καὶ ποσαχῶς, ἵνα μᾶλλον ἡμῖν δῆλον γένηται τὸ ζητούμενον. Ἐνα μὲν οὖν τρόπον οὐρανὸν λέγομεν τὴν οὐσίαν τὴν τῆς ἐσχάτης τοῦ παντός περιφορᾶς, ἢ σῶμα φυσικὸν τὸ ἐν τῇ ἐσχάτῃ περιφορᾷ τοῦ παντός· εἰώθαμεν γὰρ τὸ ἔσχατον καὶ τὸ ἄνω μάλιστα καλεῖν οὐρανόν, ἐν ᾧ καὶ τὸ θεῖον πᾶν ἰδρῦσθαι φαμεν.

Ἄλλον δ' αὖ τρόπον τὸ συνεχὲς σῶμα τῇ ἐσχάτῃ περιφορᾷ τοῦ παντός, ἐν ᾧ σελήνη καὶ ἥλιος καὶ ἔνια τῶν ἀστρῶν· καὶ γὰρ ταῦτα ἐν τῷ οὐρανῷ εἶναι φαμεν.

Ἔτι δ' ἄλλως λέγομεν οὐρανὸν τὸ περιεχόμενον σῶμα ὑπὸ τῆς ἐσχάτης περιφορᾶς· τὸ γὰρ ὅλον καὶ τὸ πᾶν εἰώθαμεν λέγειν οὐρανόν.

Τριχῶς δὲ λεγομένου τοῦ οὐρανοῦ, τὸ ὅλον τὸ ὑπὸ τῆς ἐσχάτης περιεχόμενον περιφορᾶς ἐξ ἅπαντος ἀνάγκη συνεστάναι τοῦ φυσικοῦ καὶ τοῦ αἰσθητοῦ σῶματος διὰ τὸ μήτ' εἶναι μηδὲν ἔξω σῶμα τοῦ οὐρανοῦ μήτ' ἐνδέχεσθαι γενέσθαι.

Εἰ γὰρ ἔστιν ἔξω τῆς ἐσχάτης περιφορᾶς σῶμα φυσικόν, ἀνάγκη αὐτὸ ἦτοι τῶν ἀπλῶν εἶναι σωμάτων ἢ τῶν συνθέτων, καὶ ἢ κατὰ φύσιν ἢ παρὰ φύσιν ἔχειν. Τῶν μὲν οὖν ἀπλῶν οὐθὲν ἂν εἴη. Τὸ μὲν γὰρ κύκλῳ φερόμενον δέδεικται ὅτι οὐκ ἐνδέχεται μεταλλάξαι τὸν αὐτοῦ τόπον. Ἀλλὰ μὴν οὐδὲ τὸ ἀπὸ τοῦ μέσου δυνατόν, οὐδὲ τὸ

ύφιστάμενον. Κατὰ φύσιν μὲν γὰρ οὐκ ἂν εἶησαν (ἄλλοι γὰρ αὐτῶν οἰκεῖοι τόποι), παρὰ φύσιν δ' εἵπερ εἰσίν, ἄλλω τινὶ ἔσται κατὰ φύσιν ὁ ἔξω τόπος· τὸν γὰρ τούτῳ παρὰ φύσιν ἀναγκαῖον ἄλλω εἶναι κατὰ φύσιν. Ἀλλ' οὐκ ἦν ἄλλο σῶμα παρὰ ταῦτα. Οὐκ ἄρ' ἐστὶ δυνατόν οὐθὲν τῶν ἀπλῶν ἔξω εἶναι τοῦ (279a.) οὐρανοῦ σῶμα. Εἰ δὲ μὴ τῶν ἀπλῶν, οὐδὲ τῶν μικτῶν· ἀνάγκη γὰρ εἶναι καὶ τὰ ἀπλᾶ τοῦ μικτοῦ ὄντος.

Ἀλλὰ μὴν οὐδὲ γενέσθαι δυνατόν· ἦτοι γὰρ κατὰ φύσιν ἔσται ἢ παρὰ φύσιν, καὶ ἢ ἀπλοῦν ἢ μικτόν. Ὡστε ἅλιν ὁ αὐτὸς ἥξει λόγος· οὐδὲν γὰρ διαφέρει σκοπεῖν εἰ ἔστιν ἢ εἰ γενέσθαι δυνατόν.

Φανερόν τοίνυν ἐκ τῶν εἰρημένων ὅτι οὐτ' ἔστιν ἔξω οὐτ' ἐγγωρεῖ γενέσθαι σώματος ὄγκον οὐθενός· ἐξ ἀπάσης ἄρ' ἐστὶ τῆς οἰκείας ὕλης ὁ πᾶς κόσμος· ὕλη γὰρ ἦν αὐτῷ τὸ φυσικὸν σῶμα καὶ αἰσθητόν. Ὡστ' οὐτε νῦν εἰσὶ πλείους οὐρανοὶ οὐτ' ἐγένοντο, οὐτ' ἐνδέχεται γενέσθαι πλείους· ἀλλ' εἷς καὶ μόνος καὶ τέλειος οὗτος οὐρανός ἐστιν.

Ἄμα δὲ δῆλον ὅτι οὐδὲ τόπος οὐδὲ κενὸν οὐδὲ χρόνος ἐστὶν ἔξω τοῦ οὐρανοῦ. Ἐν ἅπαντι γὰρ τόπῳ δυνατόν ὑπάρχει σῶμα· κενὸν δ' εἶναί φασι ἐν ᾧ μὴ ἐνυπάρχει σῶμα, δυνατόν δ' ἐστὶ γενέσθαι· χρόνος δὲ ἀριθμὸς κινήσεως· κίνησις δ' ἄνευ φυσικοῦ σώματος οὐκ ἔστιν. Ἐξω δὲ τοῦ οὐρανοῦ δέδεικται ὅτι οὐτ' ἔστιν οὐτ' ἐνδέχεται γενέσθαι σῶμα. Φανερόν ἄρα ὅτι οὐτε τόπος οὐτε κενὸν οὐτε χρόνος ἐστὶν ἔξω.

Διόπερ οὐτ' ἐν τόπῳ τὰκεῖ πέφυκεν, οὐτε χρόνος αὐτὰ ποιεῖ γηράσκειν, οὐδ' ἐστὶν οὐδενὸς οὐδεμίας μεταβολῆ τῶν ὑπὲρ τὴν ἔξωτάτῳ τεταγμένων φορὰν, ἀλλ' ἀναλλοίωτα καὶ ἀπαθῆ τὴν ἀρίστην ἔχοντα ζωὴν καὶ τὴν αὐταρκεστάτην διατελεῖ τὸν ἅπαντα αἰῶνα. (Καὶ γὰρ τοῦτο τοῦνομα θεῖως ἔφθεγκται παρὰ τῶν ἀρχαίων. Τὸ γὰρ τέλος τὸ περιέχον τὸν τῆς ἐκάστου ζωῆς χρόνον, οὐ μὴθὲν ἔξω κατὰ φύσιν, αἰὼν ἐκάστου κέκληται. Κατὰ τὸν αὐτὸν δὲ λόγον καὶ τὸ τοῦ παντὸς οὐρανοῦ τέλος καὶ τὸν πάντα χρόνον καὶ τὴν ἀπειρίαν περιέχον τέλος αἰῶν ἐστίν, ἀπὸ τοῦ αἰεὶ εἶναι τὴν ἐπωνυμίαν εἰληφώς, ἀθάνατος καὶ θεῖος). Ὅθεν καὶ τοῖς ἄλλοις ἐξήρηται, τοῖς μὲν ἀκριβέστερον τοῖς δ' ἀμαυρῶς, τὸ εἶναί τε καὶ ζῆν.

Καὶ γάρ, καθάπερ ἐν τοῖς ἐγκυκλίσις φιλοσοφήμασι περὶ τὰ θεῖα, πολλάκις προφαίνεται τοῖς λόγοις ὅτι τὸ θεῖον ἀμετάβλητον

ἀναγκαῖον εἶναι πᾶν τὸ πρῶτον καὶ ἀκρότατον· ὃ οὕτως ἔχον μαρτυρεῖ τοῖς εἰρημένοις. Οὔτε γὰρ ἄλλο κρεῖττον ἐστὶν ὃ τι κινήσει (ἐκεῖνο γὰρ ἂν εἴη θειότερον) οὔτ' ἔχει φαῦλον οὐδέν, οὔτ' ἐνδεές τῶν αὐτοῦ καλῶν οὐδενός ἐστιν.

(279b.) Καὶ ἄπαυστον δὴ κίνησιν κινεῖται εὐλόγως· πάντα γὰρ παύεται κινούμενα ὅταν ἔλθῃ εἰς τὸν οἰκεῖον τόπον, τοῦ δὲ κύκλου σώματος ὁ αὐτὸς τόπος ὅθεν ἤρξατο καὶ εἰς ὃν τελευτᾷ.

Κεφάλαιο 10

Τούτων δὲ διωρισμένων λέγωμεν μετὰ ταῦτα πότερον ἀγέννητος ἢ γενητὸς καὶ ἄφθαρτος ἢ φθαρτός, διεξελθόντες πρότερον τὰς τῶν ἄλλων ὑπολήψεις· αἱ γὰρ τῶν ἐναντίων ἀποδείξεις ἀπορίαι περὶ τῶν ἐναντίων εἰσίν. Ἄμα δὲ καὶ μᾶλλον ἂν εἴη πιστὰ τὰ μέλλοντα λεχθήσεσθαι προακηκοόσι τὰ τῶν ἀμφισβητούντων λόγων δικαιώματα. Τὸ γὰρ ἐρήμην καταδικάζεσθαι δοκεῖν ἦττον ἂν ἡμῖν ὑπάρχοι· καὶ γὰρ δεῖ διαιτητὰς ἄλλ’ οὐκ ἀντιδίκους εἶναι τοὺς μέλλοντας τάληθές κρίνειν ἱκανῶς.

Γενόμενον μὲν οὖν ἅπαντες εἶναί φασιν, ἀλλὰ γενόμενον οἱ μὲν αἰδίδιον, οἱ δὲ φθαρτὸν ὥσπερ ὅτιοῦν ἄλλο τῶν συνισταμένων, οἱ δ’ ἐναλλάξ ὅτε μὲν οὕτως ὅτε δὲ ἄλλως ἔχειν [φθειρόμενον], καὶ τοῦτο αἰεὶ διατελεῖν οὕτως, ὥσπερ Ἑμπεδοκλῆς ὁ Ἀκραγαντῖνος καὶ Ἡράκλειτος ὁ Ἐφέσιος.

Τὸ μὲν οὖν γενέσθαι μὲν αἰδίδιον δ’ ὁμῶς εἶναι φάναι τῶν ἀδυνάτων. Μόνα γὰρ ταῦτα θετέον ὑλόγως ὅσα ἐπὶ πολλῶν ἢ πάντων ὀρῶμεν ὑπάρχοντα, περὶ δὲ τούτου συμβαίνει τοῦναντίον· ἅπαντα γὰρ τὰ γινόμενα καὶ φθειρόμενα φαίνεται.

Ἔτι δὲ τὸ μὴ ἔχον ἀρχὴν τοῦ ὧδὶ ἔχειν, ἀλλ’ ἀδύνατον ἄλλως ἔχειν πρότερον τὸν ἅπαντα αἰῶνα, ἀδύνατον καὶ μεταβάλλειν· ἔσται γάρ τι αἴτιον, ὃ εἰ ὑπῆρχε πρότερον, δυνατόν ἂν ἦν ἄλλως ἔχειν τὸ ἀδύνατον ἄλλως ἔχειν. Εἰ δὲ πρότερον ἐξ ἄλλως ἐχόντων συνέστη ὁ κόσμος, εἰ μὲν αἰεὶ οὕτως ἐχόντων καὶ ἀδυνάτων ἄλλως ἔχειν, οὐκ ἂν ἐγένετο· εἰ δὲ γέγονεν, ἀνάγκη δηλονότι κάκεῖνα δυνατὰ εἶναι ἄλλως ἔχειν καὶ μὴ αἰεὶ οὕτως ἔχειν, ὥστε καὶ συνεστῶτα διαλυθήσεται καὶ διαλελυμένα συνέστη ἔμπροσθεν, καὶ τοῦτ’ ἀπειράκις ἢ οὕτως εἶχεν ἢ δυνατόν ἦν. Εἰ δὲ τοῦτ’, οὐκ ἂν εἴη ἄφθαρτος, οὐτ’ εἰ ἄλλως εἶχε ποτε οὐτ’ εἰ δυνατόν ἄλλως ἔχειν.

Ἦν δέ τινες βοήθειαν ἐπιχειροῦσι φέρειν ἑαυτοῖς τῶν λεγόντων ἄφθαρτον μὲν εἶναι γενόμενον δέ, οὐκ ἔστιν ἀληθές· ὁμοίως γάρ φασι τοῖς τὰ διαγράμματα γράφουσι καὶ σφᾶς εἰρηκέναι περὶ τῆς γενέσεως, οὐχ ὥς γενομένου ποτέ, ἀλλὰ (280a.) διδασκαλίας χάριν ὥς μᾶλλον γνωριζόντων, ὥσπερ τὸ διάγραμμα γιγνόμενον θεασαμένους. Τοῦτο δ’ ἐστίν, ὥσπερ λέγομεν, οὐ τὸ αὐτό· ἐν μὲν γὰρ τῇ ποιήσει τῶν διαγραμμάτων πάντων τεθέντων εἶναι ἅμα τὸ

αὐτὸ συμβαίνει, ἐν δὲ ταῖς τούτων ἀποδείξεσιν οὐ ταυτόν, ἀλλ' ἀδύνατον· τὰ γὰρ λαμβανόμενα πρότερον καὶ ὕστερον ὑπεναντία ἐστίν· ἐξ ἀτάκτων γὰρ τεταγμένα γενέσθαι φασίν, ἅμα δὲ ἄτακτον εἶναι καὶ τεταγμένον ἀδύνατον, ἀλλ' ἀνάγκη γένεσιν εἶναι τὴν χωρίζουσαν καὶ χρόνον· ἐν δὲ τοῖς διαγράμμασιν οὐδὲν τῷ χρόνῳ κεχώριται. Ὅτι μὲν οὖν ἀδύνατον ἅμ' αἰῶδιον αὐτὸν εἶναι καὶ γενέσθαι, φανερόν.

Τὸ δ' ἐναλλάξ συνιστάναι καὶ διαλύειν οὐδὲν ἄλλοιότερον ποιεῖν ἐστίν ἢ τὸ κατασκευάζειν αὐτὸν αἰῶδιον μὲν, ἀλλὰ μεταβάλλοντα τὴν μορφήν, ὥσπερ εἴ τις ἐκ παιδὸς ἄνδρα γινόμενον καὶ ἐξ ἀνδρὸς παῖδα ὅτε μὲν φθείρεσθαι ὅτε δ' εἶναι οἶοιτο· δηλὸν γὰρ ὅτι καὶ εἰς ἄλληλα τῶν στοιχείων συνιόντων οὐχ ἡ τυχοῦσα τάξις γίγνεται καὶ σύστασις, ἀλλ' ἡ αὐτή, ἄλλως τε καὶ κατὰ τοὺς τοῦτον τὸν λόγον εἰρηκότας, οἱ τῆς διαθέσεως ἐκατέρας αἰτιῶνται τὸ ἐναντίον. Ὡστ' εἰ τὸ ὅλον σῶμα συνεχὲς ὃν ὅτε μὲν οὕτως ὅτε δ' ἐκείνως διατίθεται καὶ διακεκόσμηται, ἡ δὲ τοῦ ὅλου σύστασις ἐστὶ κόσμος καὶ οὐρανός, οὐκ ἂν ὁ κόσμος γίγνοιτο καὶ φθείροιτο, ἀλλ' αἱ διαθέσεις αὐτοῦ.

Τὸ δ' ὅλως γενόμενον φθαρῆναι καὶ μὴ ἀνακάμπτειν ὄντος μὲν ἐνὸς ἀδύνατόν ἐστιν· πρὶν γὰρ γενέσθαι αἰεὶ ὑπῆρχεν ἢ πρὸ αὐτοῦ σύστασις, ἣν μὴ γενομένην οὐχ οἷόν τ' εἶναί φαμεν μεταβάλλειν· ἀπείρων δ' ὄντων ἐνδέχεται μᾶλλον.

Οὐ μὴν ἀλλὰ καὶ τοῦτο πότερον ἀδύνατον ἢ δυνατόν, ἔσται δηλὸν ἐκ τῶν ὕστερον· εἰσὶ γὰρ τινες οἷς ἐνδέχεσθαι δοκεῖ καὶ ἀγέννητόν τι ὃν φθαρῆναι καὶ γινόμενον ἄφθαρτον διατελεῖν, ὥσπερ ἐν τῷ Τιμαίῳ· ἐκεῖ γὰρ φησι τὸν οὐρανὸν γενέσθαι μὲν, οὐ μὴν ἀλλ' ἔσεσθαι γε τὸν λοιπὸν αἰεὶ χρόνον. Πρὸς οὓς φυσικῶς μὲν περὶ οὐρανοῦ μόνον εἴρηται, καθόλου δὲ περὶ ἅπαντος σκεψαμένοις ἔσται καὶ περὶ τούτου δηλόν.

Κεφάλαιο 11

(280b.) Πρῶτον δὲ διαιρετέον πῶς ἀγένητα καὶ γενητά φαμεν καὶ φθαρτὰ καὶ ἄφθαρτα· πολλαχῶς γὰρ λεγομένων, κἂν μηδὲν διαφέρει πρὸς τὸν λόγον, ἀνάγκη τὴν διάνοιαν ἀορίστως ἔχειν, ἂν τις τῷ διαιρουμένῳ πολλαχῶς ὡς ἀδιαίρετῳ χρῆται· ἄδηλον γὰρ κατὰ ποίαν φύσιν αὐτῶν συμβαίνει τὸ λεχθέν.

Λέγεται δ' ἀγένητον ἓνα μὲν τρόπον ἐὰν ἧ τι νῦν πρότερον μὴ ὄν ἄνευ γενέσεως καὶ μεταβολῆς, καθάπερ ἔνιοι τὸ ἅπτεσθαι καὶ τὸ κινεῖσθαι λέγουσιν· οὐ γὰρ εἶναι γενέσθαι φασὶν ἀπτόμενον, οὐδὲ κινούμενον. "Ἐνα δ' εἴ τι ἐνδεχόμενον γίνεσθαι ἢ γενέσθαι μὴ ἔστιν· ὁμοίως γὰρ καὶ τοῦτο ἀγένητον, ὅτι ἐνδέχεται γενέσθαι. "Ἐνα δ' εἴ τι ὅλως ἀδύνατον γενέσθαι, ὥσθ' ὅτε μὲν εἶναι ὅτε δὲ μὴ. (Τὸ δ' ἀδύνατον λέγεται διχῶς. "Ἡ γὰρ τῷ μὴ ἀληθὲς εἶναι εἰπεῖν ὅτι γένοιτ' ἂν, ἢ τῷ μὴ ῥαδίως μὴδὲ ταχὺ ἢ καλῶς.)

Τὸν αὐτὸν δὲ τρόπον καὶ τὸ γενητὸν ἓνα μὲν εἰ μὴ ὄν πρότερον ὕστερον ἔστιν, εἴτε γινόμενον εἴτ' ἄνευ τοῦ γίνεσθαι, ὅτε μὲν μὴ ὄν, πάλιν δ' ὄν. "Ἐνα δ' εἰ δυνατόν, εἴτε τῷ ἀληθεῖ διορισθέντος τοῦ δυνατοῦ εἴτε τῷ ῥαδίως. "Ἐνα δ' ἐὰν ἡ γένεσις αὐτοῦ ἐκ τοῦ μὴ ὄντος εἰς τὸ ὄν, εἴτ' ἤδη ὄντος, διὰ τοῦ γίνεσθαι δ' ὄντος, εἴτε καὶ μήπω ὄντος, ἀλλ' ἐνδεχομένου.

Καὶ φθαρτὸν δὲ καὶ ἄφθαρτον ὡσαύτως· εἴτε γὰρ πρότερόν τι ὄν ὕστερον ἢ μὴ ἔστιν ἢ ἐνδέχεται μὴ εἶναι, φθαρτὸν εἶναί φαμεν, εἴτε φθειρόμενόν ποτε καὶ μεταβάλλον, εἴτε μὴ. "Ἔστι δ' ὅτε καὶ τὸ διὰ τοῦ φθειρεσθαι ἐνδεχόμενον μὴ εἶναι φθαρτὸν εἶναί φαμεν, καὶ ἔτι ἄλλως τὸ ῥαδίως φθειρόμενον, ὃ εἶποι ἂν τις εὐφθαρτον. Καὶ περὶ τοῦ ἀφθάρτου ὁ αὐτὸς λόγος· "Ἡ γὰρ τὸ ἄνευ φθορᾶς ὅτε μὲν ὄν ὅτε δὲ μὴ ὄν, οἷον τὰς ἀφάς, ὅτι ἄνευ τοῦ φθεῖρεσθαι πρότερον οὔσαι ὕστερον οὐκ εἰσίν. "Ἡ τὸ ὄν μὲν, δυνατόν δὲ μὴ εἶναι, ἢ καὶ οὐκ ἐσόμενόν ποτε, νῦν δ' ὄν· σὺ γὰρ εἴ, καὶ ἡ ἀφή νῦν· ἀλλ' ὅμως φθαρτόν, ὅτι ἔσται ποτὲ ὅτε οὐκ ἀληθὲς εἰπεῖν ὅτι εἴ, οὐδὲ ταῦτα ἅπτεσθαι. Τὸ δὲ μάλιστα κυρίως, τὸ ὄν μὲν, ἀδύνατον δὲ φθαρῆναι οὕτως ὥστε νῦν ὄν ὕστερον μὴ εἶναι ἢ ἐνδέχεσθαι μὴ εἶναι. "Ἡ καὶ τὸ μήπω ἐφθαρμένον, ἐνδεχόμενον δ' ὕστερον μὴ εἶναι. Λέγεται δ' (281a.) ἄφθαρτον καὶ τὸ μὴ ῥαδίως φθειρόμενον.

Εἰ δὴ ταῦθ' οὕτως ἔχει, σκεπτέον πῶς λέγομεν τὸ δυνατόν καὶ

ἀδύνατον· τό τε γὰρ κυριώτατα λεγόμενον ἄφθαρτον τῷ μὴ δύνασθαι ἂν φθαρῆναι, μηδ' ὅτε μὲν εἶναι ὅτε δὲ μὴ· λέγεται δὲ καὶ τὸ ἀγένητον τὸ ἀδύνατον καὶ μὴ δυνάμενον γενέσθαι οὕτως ὥστε πρότερον μὲν μὴ εἶναι ὕστερον δὲ εἶναι, οἷον τὴν διάμετρον σύμμετρον. Εἰ δὴ τι δύναται κινηθῆναι [στάδια ἑκατὸν] ἢ ἄραι βάρος, αἰεὶ πρὸς τὸ πλεῖστον λέγομεν, οἷον τάλαντα ἄραι ἑκατὸν ἢ στάδια βαδίσαι ἑκατὸν (καίτοι καὶ τὰ μόρια δύναται τὰ ἐντός, εἴπερ καὶ τὴν ὑπεροχὴν), ὥς δεόν ὀρίζεσθαι πρὸς τὸ τέλος καὶ τὴν ὑπεροχὴν τὴν δύναμιν. Ἀνάγκη μὲν οὖν τὸ δυνατόν καθ' ὑπεροχὴν τοσαυτὴ καὶ τὰ ἐντός δύνασθαι, οἷον εἰ τάλαντα ἑκατὸν ἄραι, καὶ δύο, κἂν εἰ στάδια ἑκατὸν, καὶ δύο δύνασθαι βαδίσαι. Ἡ δὲ δύναμις τῆς ὑπεροχῆς ἐστίν· κἂν εἴ τι ἀδύνατον τοσονδὶ καθ' ὑπερβολὴν εἰπόντων, καὶ τὰ πλείω ἀδύνατον, οἷον ὁ χίλια βαδίσαι στάδια μὴ δυνάμενος δῆλον ὅτι καὶ χίλια καὶ ἕν.

Μηδὲν δ' ἡμᾶς παρενοχλεῖτω· διωρίσθω γὰρ κατὰ τῆς ὑπεροχῆς τὸ τέλος λεγόμενον τὸ κυρίως δυνατόν. Τάχα γὰρ ἐνσταίῃ τις ἂν ὥς οὐκ ἀνάγκη τὸ λεχθέν· ὁ γὰρ ὁρῶν στάδιον οὐ καὶ τὰ ἐντός ὄψεται μεγέθη, ἀλλὰ τοῦναντίον μᾶλλον ὁ δυνάμενος ἰδεῖν στιγμὴν ἢ ἀκοῦσαι μικροῦ ψόφου καὶ τῶν μειζόνων ἔξει αἴσθησιν. Ἀλλ' οὐδὲν διαφέρει πρὸς τὸν λόγον· διωρίσθω γὰρ ἥτοι ἐπὶ τῆς δυνάμεως ἢ ἐπὶ τοῦ πράγματος ἢ ὑπερβολή. Τὸ γὰρ λεγόμενον δῆλον· ἢ μὲν γὰρ ὅπως ἢ τοῦ ἐλάττονος ὑπερέχει, ἢ δὲ ταχυτῆς ἢ τοῦ πλείονος.

Κεφάλαιο 12

Διωρισμένων δὲ τούτων λεκτέον τὸ ἐφεξῆς. Εἰ δὴ ἐστὶν ἓνια δυνατὰ καὶ εἶναι καὶ μὴ, ἀνάγκη χρόνον τινὰ ὠρίσθαι τὸν πλεῖστον καὶ τοῦ εἶναι καὶ τοῦ μὴ, λέγω δ' ὃν δυνατόν τὸ πρᾶγμα εἶναι καὶ ὃν δυνατόν μὴ εἶναι καθ' ὅποιαν οὖν κατηγορίαν, οἷον ἄνθρωπον ἢ λευκὸν ἢ τρίπηχυν ἢ ἄλλ' ὅτιοῦν τῶν τοιούτων. Εἰ γὰρ μὴ ἔσται ποσὸς τις, ἀλλ' αἰεὶ πλείων τοῦ προτεθέντος καὶ οὐκ ἔστιν οὗ ἐλάττων, ἅπειρον (281b.) ἔσται χρόνον δυνατόν εἶναι, καὶ μὴ εἶναι ἄλλον ἅπειρον· ἀλλὰ τοῦτ' ἀδύνατον.

Ἀρχὴ δ' ἔστω ἐντεῦθεν· τὸ γὰρ ἀδύνατον καὶ τὸ ψεῦδος οὐ ταὐτὸ σημαίνει. Ἔστι δὲ τὸ ἀδύνατον καὶ δυνατόν καὶ ψεῦδος καὶ ἀληθὲς τὸ μὲν ἐξ ὑποθέσεως (λέγω δ', οἷον τὸ τρίγωνον ἀδύνατον δύο ὀρθὰς ἔχειν, εἰ τάδε, καὶ ἡ διάμετρος σύμμετρος). Ἔστι δ' ἀπλῶς καὶ δυνατὰ καὶ ἀδύνατα καὶ ψευδῆ καὶ ἀληθῆ. Οὐ δὴ ταὐτὸ ἐστὶ ψευδὸς τέ τι εἶναι ἀπλῶς καὶ ἀδύνατον ἀπλῶς. Τὸ γὰρ σε μὴ ἐστῶτα φάναι ἐστάναι ψεῦδος μὲν, οὐκ ἀδύνατον δέ. Ὅμοίως δὲ τὸν κιθαρίζοντα, μὴ ἄδοντα δέ, ἄδειν φάναι ψεῦδος, ἀλλ' οὐκ ἀδύνατον. Τὸ δ' ἅμα ἐστάναι καὶ καθῆσθαι, καὶ τὴν διάμετρον σύμμετρον εἶναι, οὐ μόνον ψεῦδος, ἀλλὰ καὶ ἀδύνατον. Οὐ δὴ ταὐτόν ἐστιν ὑποθέσθαι ψεῦδος καὶ ἀδύνατον. Συμβαίνει δ' ἀδύνατον ἐξ ἀδυνάτου.

Τοῦ μὲν οὖν καθῆσθαι καὶ ἐστάναι ἅμα ἔχει τὴν δύναμιν, ὅτι ὅτε ἔχει ἐκείνην, καὶ τὴν ἐτέραν· ἀλλ' οὐχ ὥστε ἅμα καθῆσθαι καὶ ἐστάναι, ἀλλ' ἐν ἄλλῳ χρόνῳ. Εἰ δέ τι ἅπειρον χρόνον ἔχει πλειόνων δύναμιν, οὐκ ἔστιν ἐν ἄλλῳ χρόνῳ, ἀλλὰ τοῦθ' ἅμα.

Ὡστ' εἴ τι ἅπειρον χρόνον ὃν φθαρτόν ἐστι, δύναμιν ἔχει ἂν τοῦ μὴ εἶναι. Εἰ δὴ ἅπειρον χρόνον, ἔστω ὑπάρχον ὃ δύναται. Ἄμα ἄρ' ἔσται τε καὶ οὐκ ἔσται κατ' ἐνέργειαν. Πσεῦδος μὲν οὖν συμβαίνοι ἂν, ὅτι ψεῦδος ἐτέθη. Ἀλλ' εἰ μὴ ἀδύνατον ἦν, οὐκ ἂν καὶ ἀδύνατον ἦν τὸ συμβαίνειν. Ἄπαν ἄρα τὸ αἰεὶ ὃν ἀπλῶς ἀφθαρτον.

Ὅμοίως δὲ καὶ ἀγένητον· εἰ γὰρ γενητόν, ἔσται δυνατόν χρόνον τινὰ μὴ εἶναι-φθαρτόν μὲν γὰρ ἐστὶ τὸ πρότερον μὲν ὃν, νῦν δὲ μὴ ὃν ἢ ἐνδεχόμενόν ποτε ὕστερον μὴ εἶναι· γενητόν δὲ ὃ ἐνδέχεται πρότερον μὴ εἶναι-ἀλλ' οὐκ ἔστιν ἐν ᾧ χρόνῳ δυνατόν τὸ αἰεὶ ὃν ὥστε μὴ εἶναι, οὐτ' ἅπειρον οὔτε πεπερασμένον· καὶ γὰρ τὸν πεπερασμένον χρόνον δύναται εἶναι, εἴπερ καὶ τὸν ἅπειρον. Οὐκ ἄρα

ἐνδέχεται τὸ αὐτὸ καὶ ἐν αἰεὶ τε δύνασθαι εἶναι καὶ αἰεὶ μὴ εἶναι. Ἀλλὰ μὴν οὐδὲ τὴν ἀπόφασιν, οἷον λέγω μὴ αἰεὶ εἶναι. Ἀδύνατον ἄρα καὶ αἰεὶ μὲν τι εἶναι, φθαρτὸν (282a.) δ' εἶναι. Ὅμοίως δ' οὐδὲ γενητόν· δυοῖν γὰρ ὅροις εἰ ἀδύνατον τὸ ὕστερον ἄνευ τοῦ προτέρου ὑπάρχειν, ἐκεῖνο δ' ἀδύνατον ὑπάρχειν, καὶ τὸ ὕστερον. Ὡστ' εἰ τὸ αἰεὶ ὄν μὴ ἐνδέχεται ποτε μὴ εἶναι, ἀδύνατον καὶ γενητόν εἶναι.

Ἐπεὶ δ' ἀπόφασιν τοῦ μὲν αἰεὶ δυναμένου εἶναι τὸ μὴ αἰεὶ δυνάμενον εἶναι, τὸ δ' αἰεὶ δυνατόν μὴ εἶναι ἐναντίον, οὗ ἀπόφασιν τὸ μὴ αἰεὶ δυνάμενον μὴ εἶναι, ἀνάγκη τὰς ἀποφάσεις ἀμφοῖν τῷ αὐτῷ ὑπάρχειν, καὶ εἶναι μέσον τοῦ αἰεὶ ὄντος καὶ τοῦ αἰεὶ μὴ ὄντος τὸ δυνάμενον εἶναι καὶ μὴ εἶναι· ἢ γὰρ ἐκατέρου ἀποφάσις ποτε ὑπάρξει, εἰ μὴ αἰεὶ. Ὡστ' εἰ τὸ μὴ αἰεὶ μὴ ὄν ἔσται ποτε καὶ οὐκ ἔσται, καὶ τὸ μὴ αἰεὶ δυνάμενον εἶναι δηλονότι, ἀλλὰ ποτε ὄν, ὥστε καὶ μὴ εἶναι. Τὸ αὐτὸ ἄρ' ἔσται δυνατόν εἶναι καὶ μὴ, καὶ τοῦτ' ἔστιν ἀμφοῖν μέσον. Λόγος δὲ καθόλου ὅδε. Ἐστω γὰρ τὸ Α καὶ τὸ Β μηδενὶ τῷ αὐτῷ δυνάμενα ὑπάρχειν, ἅπαντι δὲ τὸ Α ἢ τὸ Γ καὶ τὸ Β ἢ τὸ Δ. Ἀνάγκη δὴ ᾧ μήτε τὸ Α ὑπάρχει μήτε τὸ Β, παντὶ ὑπάρχειν τὰ ΓΔ. Ἄρ' οὖν εἰ καὶ ἀγέννητον, ὃν δέ, τοῦτ' ἀνάγκη αἰδῖον εἶναι, ὁμοίως δὲ καὶ εἰ ἄφθαρτον, ὃν δέ; (Λέγω δὲ τὸ ἀγέννητον καὶ ἄφθαρτον τὰ κυρίως λεγόμενα, ἀγέννητον μὲν ὃ ἔστι νῦν, καὶ πρότερον οὐκ ἀληθὲς ἦν εἰπεῖν τὸ μὴ εἶναι, ἄφθαρτον δὲ ὃ νῦν ὃν ὕστερον μὴ ἀληθὲς ἔσται εἰπεῖν μὴ εἶναι). Ἡ εἰ μὲν ταῦτα ἀλλήλοις ἀκολουθεῖ καὶ τό τε ἀγέννητον ἄφθαρτον καὶ τὸ ἄφθαρτον ἀγέννητον, ἀνάγκη καὶ τὸ αἰδῖον ἐκατέρῳ ἀκολουθεῖν, καὶ εἴτε ἀγένη (282b.) τον, αἰδῖον, εἴτε ἄφθαρτον, αἰδῖον. Τὸ δὲ φάναι μηδὲν κωλύειν γινόμενόν τι ἄφθαρτον εἶναι καὶ ἀγέννητον ὃν φθαρήναι, ἅπαξ ὑπαρχούσης τῷ μὲν τῆς γενέσεως τῷ δὲ τῆς φθορᾶς, ἀναιρεῖν ἐστὶ τῶν δεδομένων τι. Ἡ γὰρ ἄπειρον ἢ ποσόν τινα ὥρισμένον χρόνον δύναται ἅπαντα ἢ ποιεῖν ἢ πάσχειν, ἢ εἶναι ἢ μὴ εἶναι * * καὶ τὸν ἄπειρον διὰ τοῦτο, ὅτι ὥρισταί πως ὁ ἄπειρος, οὗ οὐκ ἐστὶ πλείων. Τὸ δὴ πῇ ἄπειρον οὕτ' ἄπειρον οὕθ' ὥρισμένον.

Ἔτι τί μᾶλλον ἐπὶ τῷδε τῷ σημείῳ αἰεὶ ὃν πρότερον ἐφθάρη ἢ μὴ ὃν ἄπειρον ἐγένετο; εἰ γὰρ μηθὲν μᾶλλον, ἄπειρα δὲ τὰ σημεῖα, δῆλον ὅτι ἄπειρον χρόνον ἦν τι γεννητόν καὶ φθαρτόν. Δύναται ἄρα μὴ εἶναι ἄπειρον χρόνον· ἅμα γὰρ ἔξει δύναμιν τοῦ μὴ εἶναι καὶ εἶναι, τὸ μὲν πρότερον, εἰ φθαρτόν, τὸ δ' ὕστερον, εἰ γεννητόν. Ὡστ' ἐὰν ὑπάρχειν θῶμεν ἃ δύναται, τὰ ἀντικείμενα ἅμα ὑπάρξει.

Ἔτι δὲ καὶ τοῦθ' ὁμοίως ἐν ἅπαντι σημείῳ ὑπάρξει, ὥστ' ἄπειρον χρόνον τοῦ μὴ εἶναι καὶ τοῦ εἶναι ἔξει δύναμιν· ἀλλὰ δέδεικται ὅτι ἀδύνατον τοῦτο.

Ἔτι εἰ πρότερον ἢ δύναμις ὑπάρχει τῆς ἐνεργείας, ἅπανθ' ὑπάρξει τὸν χρόνον, καὶ ὃν ἀγέννητον ἦν καὶ μὴ ὃν [τὸν ἄπειρον χρόνον], γίνεσθαι δὲ δυνάμενον. Ἄμα δὴ οὐκ ἦν καὶ τοῦ εἶναι δύναμιν εἶχε,

καὶ τοῦ τότε εἶναι καὶ ὕστερον· ἄπειρον ἄρα χρόνον.

Φανερόν δὲ καὶ ἄλλως ὅτι ἀδύνατον φθαρτὸν ὄν μὴ φθαρῆναι ποτε. Αἰεὶ γὰρ ἔσται ἅμα καὶ φθαρτὸν καὶ ἀφθαρτον ἐντελεχεία, ὥστε ἅμα ἔσται δυνατόν αἰεὶ τε εἶναι καὶ μὴ αἰεὶ· φθείρεται ἄρα ποτὲ τὸ φθαρτόν. Καὶ εἰ γενητόν, γέγονεν· δυνατόν γὰρ γεγονέναι, καὶ μὴ αἰεὶ ἄρα εἶναι.

Ἔστι δὲ καὶ ὧδε θεωρῆσαι ὅτι ἀδύνατον ἢ γενόμενόν ποτε ἀφθαρτον διατελεῖν, ἢ ἀγένητον ὄν καὶ αἰεὶ πρότερον ὄν φθαρῆναι. Οὐδὲν γὰρ ἀπὸ τοῦ αὐτομάτου οὔτ' ἀφθαρτον οὔτ' ἀγένητον οἷόν τ' εἶναι. Τὸ μὲν γὰρ αὐτόματόν ἐστι καὶ τὸ ἀπὸ τύχης παρὰ τὸ αἰεὶ καὶ τὸ ὡς ἐπὶ (283b.) τὸ πολὺ ἢ ὄν ἢ γινόμενον· τὸ δ' ἄπειρον χρόνον ἢ ἀπλῶς ἢ ἀπὸ τινος, ἢ αἰεὶ ἢ ὡς ἐπὶ τὸ πολὺ ὑπάρχει ὄν. Ἀνάγκη τοίνυν φύσει τὰ τοιαῦτα ὅτε μὲν εἶναι ὅτε δὲ μὴ. Τῶν δὲ τοιούτων ἡ αὐτὴ δύναμις τῆς ἀντιφάσεως, καὶ ἡ ὕλη αἰτία τοῦ εἶναι καὶ μὴ. Ὡστ' ἀνάγκη ἅμα ὑπάρχειν ἐνεργείᾳ τὰ ἀντικείμενα. Ἀλλὰ μὴν οὐδὲν γ' ἀληθὲς εἰπεῖν νῦν ὅτι ἔστι πέρυσιν, οὐδὲ πέρυσιν ὅτι νῦν ἔστιν. Ἀδύνατον ἄρα μὴ ὄν ποτε ὕστερον αἰδίων εἶναι· ἔξει γὰρ ὕστερον καὶ τὴν τοῦ μὴ εἶναι δύναμιν, πλὴν οὐ τοῦ τότε μὴ εἶναι ὅτε ἔστιν (ὑπάρχει γὰρ ἐνεργείᾳ ὄν), ἀλλὰ τοῦ πέρυσιν καὶ ἐν τῷ παρελθόντι χρόνῳ. Ἔστω δὴ οὗ ἔχει τὴν δύναμιν ὑπάρχον ἐνεργείᾳ· ἔσται ἄρα ἀληθὲς εἰπεῖν νῦν ὅτι οὐκ ἔστι πέρυσιν. Ἀλλ' ἀδύνατον· οὐδεμία γὰρ δύναμις τοῦ γεγονέναι ἐστίν, ἀλλὰ τοῦ εἶναι ἢ ἔσεσθαι. Ὅμοίως δὲ καὶ εἰ πρότερον ὄν αἰδίων ὕστερον μὴ ἔσται· ἔξει γὰρ δύναμιν οὗ ἐνεργείᾳ οὐκ ἔστιν. Ὡστ' ἂν θῶμεν τὸ δυνατόν, ἀληθὲς ἔσται εἰπεῖν νῦν ὅτι τοῦτ' ἔστι πέρυσιν καὶ ὅλως ἐν τῷ παρελθόντι χρόνῳ.

Καὶ φυσικῶς δὲ καὶ μὴ καθόλου σκοποῦσιν ἀδύνατον ἢ αἰδίων ὄν πρότερον φθαρῆναι ὕστερον, ἢ πρότερον μὴ ὄν ὕστερον αἰδίων εἶναι. Τὰ γὰρ φθαρτὰ καὶ γενητὰ καὶ ἀλλοιωτὰ πάντα· ἀλλοιοῦνται δὲ τοῖς ἐναντίοις, καὶ ἐξ ὧν συνίσταται τὰ φύσει ὄντα, καὶ ὑπὸ τῶν αὐτῶν τούτων φθείρεται.

Κεφάλαιο 1

Ὅτι μὲν οὖν οὔτε γέγονεν ὁ πᾶς οὐρανὸς οὔτ' ἐνδέχεται φθαρῆναι, καθάπερ τινὲς φασιν αὐτόν, ἀλλ' ἔστιν εἷς καὶ αἰδῖος, ἀρχὴν μὲν καὶ τελευτὴν οὐκ ἔχων τοῦ παντός αἰῶνος, ἔχων δὲ καὶ περιέχων ἐν αὐτῷ τὸν ἄπειρον χρόνον, ἐκ τε τῶν εἰρημένων ἐξεστι λαμβάνειν τὴν πίστιν, καὶ διὰ τῆς δόξης τῆς παρὰ τῶν ἄλλως λεγόντων καὶ γεννώντων αὐτόν· εἰ γὰρ οὕτως μὲν ἔχειν ἐνδέχεται, καθ' ὃν δὲ τρόπον ἐκεῖνοι γενέσθαι λέγουσιν οὐκ ἐνδέχεται, μεγάλην ἂν ἔχοι καὶ τοῦτο (284a.) ῥοπήν εἰς πίστιν περὶ τῆς ἀθανασίας αὐτοῦ καὶ τῆς αἰδιότητος. Διόπερ καλῶς ἔχει συμπεῖθαι ἐαυτὸν τοὺς ἀρχαίους καὶ μάλιστα πατρίους ἡμῶν ἀληθεῖς εἶναι λόγους, ὥς ἔστιν ἀθάνατόν τι καὶ θεῖον τῶν ἐχόντων μὲν κίνησιν, ἐχόντων δὲ τοιαύτην ὥστε μηθὲν εἶναι πέρας αὐτῆς, ἀλλὰ μᾶλλον ταύτην τῶν ἄλλων πέρας· τό τε γὰρ πέρας τῶν περιεχόντων ἐστί, καὶ αὕτη τέλειος οὔσα περιέχει τὰς ἀτελεῖς καὶ τὰς ἐχούσας πέρας καὶ παῦλαν, αὕτη μὲν οὐδεμίαν οὔτ' ἀρχὴν ἔχουσα οὔτε τελευτὴν, ἀλλ' ἄπαυστος οὔσα τὸν ἄπειρον χρόνον, τῶν δ' ἄλλων τῶν μὲν αἰτία τῆς ἀρχῆς, τῶν δὲ δεχομένη τὴν παῦλαν.

Τὸν δ' οὐρανὸν καὶ τὸν ἄνω τόπον οἱ μὲν ἀρχαῖοι τοῖς θεοῖς ἀπένειμαν ὥς ὄντα μόνον ἀθάνατον· ὁ δὲ νῦν μαρτυρεῖ λόγος ὥς ἄφθαρτος καὶ ἀγέννητος, ἔτι δ' ἀπαθὴς πάσης θνητῆς δυσχερείας ἐστίν, πρὸς δὲ τοῦτοις ἄπονος διὰ τὸ μηδεμιᾶς προσδεῖσθαι βιαίας ἀνάγκης, ἣ κατέχει κωλύουσα φέρεσθαι πεφυκότα αὐτόν ἄλλως· πᾶν γὰρ τὸ τοιοῦτον ἐπίπονον, ὅσῳπερ ἂν αἰδιώτερον ᾖ, καὶ διαθέσεως τῆς ἀρίστης ἁμοιον.

Διόπερ οὔτε κατὰ τὸν τῶν παλαιῶν μῦθον ὑποληπτέον ἔχειν, οἷ φασιν Ἀτλαντός τινος αὐτῷ προσδεῖσθαι τὴν σωτηρίαν· εἰκόασι γὰρ καὶ τοῦτον οἱ συστήσαντες τὸν λόγον τὴν αὐτὴν ἔχειν ὑπόληψιν τοῖς ὕστερον· ὥς γὰρ περὶ βάρους ἐχόντων καὶ γενηρῶν ἀπάντων τῶν ἄνω σωμάτων ὑπέστησαν αὐτῷ μυθικῶς ἀνάγκην ἔμψυχον.

Οὔτε δὴ τοῦτον τὸν τρόπον ὑποληπτέον, οὔτε διὰ τὴν δίνησιν θάπτοντος τυγχάνοντα φορᾶς τῆς οἰκείας ῥοπῆς ἔτι σώζεσθαι τοσοῦτον χρόνον, καθάπερ Ἐμπεδοκλῆς φησιν.

Ἀλλὰ μὴν οὐδ' ὑπὸ ψυχῆς εὐλογον ἀναγκαζούσης μένειν αἰδῖον· οὐδὲ γὰρ τῆς ψυχῆς οἷόν τ' εἶναι τὴν τοιαύτην ζῶην ἄλυπον καὶ

μακαρίαν· ἀνάγκη γὰρ καὶ τὴν κίνησιν μετὰ βίας οὔσαν, εἴπερ κινεῖ φέρεσθαι πεφυκότος τοῦ πρώτου σώματος ἄλλως καὶ κινεῖ συνεχῶς, ἄσכולον εἶναι καὶ πάσης ἀπηλλαγμένην ῥαστώνης ἔμφορος, εἴ γε μὴδ' ὥσπερ τῇ ψυχῇ τῇ τῶν θνητῶν ζώων ἐστὶν ἀνάπαυσις ἢ περὶ τὸν ὕπνον γινομένη τοῦ σώματος ἄνεσις, ἀλλ' ἀναγκαῖον Ἰξίωνός τινος μοῖραν κατέχειν αὐτὴν αἰδῖον καὶ ἄτρυτον.

Εἰ δὴ, καθάπερ (284b.) εἵπομεν, ἐνδέχεται τὸν εἰρημένον ἔχειν τρόπον περὶ τῆς πρώτης φορᾶς, οὐ μόνον αὐτοῦ περὶ τῆς αἰδιότητος οὕτως ὑπολαβεῖν ἐμμελέστερον, ἀλλὰ καὶ τῇ μαντείᾳ τῇ περὶ τὸν θεὸν μόνως ἂν ἔχοιμεν οὕτως ὁμολογουμένως ἀποφαίνεσθαι συμφώνους λόγους. Ἀλλὰ τῶν μὲν τοιούτων λόγων ἅλις ἔστω τὸ νῦν.

Κεφάλαιο 2

Ἐπειδὴ δέ τινές εἰσιν οἱ φασιν εἶναι τι δεξιὸν καὶ ἀριστερὸν τοῦ οὐρανοῦ, καθάπερ οἱ καλούμενοι Πυθαγόρειοι (ἐκείνων γὰρ οὗτος ὁ λόγος ἐστίν), σκεπτέον πότερον τοῦτον ἔχει τὸν τρόπον ὡς ἐκείνοι λέγουσιν, ἢ μᾶλλον ἐτέρως, εἴπερ δεῖ προσάπτειν τῷ τοῦ παντὸς σώματι ταύτας τὰς ἀρχάς.

Εὐθὺς γὰρ πρῶτον, εἰ τὸ δεξιὸν ὑπάρχει καὶ τὸ ἀριστερόν, ἔτι πρότερον τὰς προτέρας ὑποληπτέον ὑπάρχειν ἀρχὰς ἐν αὐτῷ. Διώριστα μὲν οὖν περὶ τούτων ἐν τοῖς περὶ τὰς τῶν ζώων κινήσεις διὰ τὸ τῆς φύσεως οἰκεῖα τῆς ἐκείνων εἶναι· φανερώς γὰρ ἐν γε τοῖς ζώοις ὑπάρχοντα φαίνεται τοῖς μὲν πάντα τὰ τοιαῦτα μόρια, λέγω δ' οἶον τό τε δεξιὸν καὶ τὸ ἀριστερόν, τοῖς δ' ἔνια, τοῖς δὲ φυτοῖς τὸ ἄνω καὶ τὸ κάτω μόνον. Εἰ δὲ δεῖ καὶ τῷ οὐρανῷ προσάπτειν τι τῶν τοιούτων, καὶ τὸ πρῶτον, καθάπερ εἵπομεν, ἐν τοῖς ζώοις ὑπάρχον εὐλογον ὑπάρχειν ἐν αὐτῷ· τριῶν γὰρ ὄντων ἕκαστον οἶον ἀρχὴ τις ἐστίν. Λέγω δὲ τὰ τρία τὸ ἄνω καὶ τὸ κάτω, καὶ τὸ πρόσθιον καὶ τὸ ἀντικείμενον, καὶ τὸ δεξιὸν καὶ τὸ ἀριστερόν· ταύτας γὰρ τὰς διαστάσεις εὐλογον ὑπάρχειν τοῖς σώμασι τοῖς τελείοις πάσας. Ἔστι δὲ τὸ μὲν ἄνω τοῦ μήκους ἀρχή, τὸ δὲ δεξιὸν τοῦ πλάτους, τὸ δ' ἔμπροσθεν τοῦ βάθους. Ἔτι δ' ἄλλως κατὰ τὰς κινήσεις· ἀρχὰς γὰρ ταύτας λέγω ὅθεν ἄρχονται πρῶτον αἱ κινήσεις τοῖς ἔχουσιν. Ἔστι δὲ ἀπὸ μὲν τοῦ ἄνω ἡ αὖξησης, ἀπὸ δὲ τῶν δεξιῶν ἡ κατὰ τόπον, ἀπὸ δὲ τῶν ἔμπροσθεν ἡ κατὰ τὴν αἴσθησιν· ἔμπροσθεν γὰρ λέγω ἐφ' ὃ αἱ αἰσθήσεις.

Διὸ καὶ οὐκ ἐν ἅπαντι σώματι τὸ ἄνω καὶ κάτω καὶ τὸ δεξιὸν καὶ ἀριστερὸν καὶ τὸ ἔμπροσθεν καὶ ὀπίσθεν ζητητέον, ἀλλ' ὅσα ἔχει κινήσεως ἀρχὴν ἐν αὐτοῖς ἔμψυχα ὄντα· τῶν γὰρ ἀψύχων ἐν οὐθενὶ ὁρῶμεν ὅθεν ἡ ἀρχὴ τῆς κινήσεως. Τὰ μὲν γὰρ ὅλως οὐ κινεῖται, τὰ δὲ κινεῖται μὲν ἀλλ' οὐ πανταχόθεν ὁμοίως, οἶον τὸ πῦρ ἄνω μό(285a.) νον καὶ ἡ γῆ ἐπὶ τὸ μέσον. Ἀλλ' ἐν μὲν τούτοις λέγομεν τὸ ἄνω καὶ τὸ κάτω καὶ τὸ δεξιὸν καὶ τὸ ἀριστερὸν πρὸς ἡμᾶς ἐπαναφέροντες· ἢ γὰρ κατὰ τὰ ἡμέτερα δεξιὰ, ὥσπερ οἱ μάντις, ἢ καθ' ὁμοιότητα τοῖς ἡμετέροις, ὥσπερ τὰ τοῦ ἀνδριάντος, ἢ τὰ ἐναντίως ἔχοντα τῇ θέσει, δεξιὸν μὲν τὸ κατὰ τὸ ἡμέτερον ἀριστερόν, ἀριστερὸν δὲ τὸ κατὰ τὸ ἡμέτερον δεξιόν, [καὶ ὀπίσθεν τὸ

κατὰ τὸ ἡμέτερον ἔμπροσθεν]. Ἐν αὐτοῖς δὲ τούτοις οὐδεμίαν ὁρῶμεν διαφορὰν· ἐὰν γὰρ ἀνάπαλιν στραφῇ, τὰ ἐναντία ἐροῦμεν δεξιὰ καὶ ἀριστερὰ καὶ ἄνω καὶ κάτω καὶ ἔμπροσθεν καὶ ὀπισθεν.

Διὸ καὶ τῶν Πυθαγορείων ἂν τις θαυμάσειεν ὅτι δύο μόνας ταύτας ἀρχὰς ἔλεγον, τὸ δεξιὸν καὶ τὸ ἀριστερόν, τὰς δὲ τέτταρας παρέλιπον οὐθὲν ἦττον κυρίας οὔσας· οὐθὲν γὰρ ἐλάττω διαφορὰν ἔχει τὰ ἄνω πρὸς τὰ κάτω καὶ τὰ ἔμπροσθεν πρὸς τὰ ὀπισθεν ἢ τὰ δεξιὰ πρὸς τὰ ἀριστερὰ ἐν ἅπασιν τοῖς ζώοις. Τὰ μὲν γὰρ τῇ δυνάμει διαφέρει μόνον, τὰ δὲ καὶ τοῖς σχήμασι, καὶ τὸ μὲν ἄνω καὶ τὸ κάτω πᾶσι τοῖς ἐμψύχοις ἐστὶν ὁμοίως ζώοις καὶ φυτοῖς, τὸ δὲ δεξιὸν καὶ τὸ ἀριστερόν οὐκ ἐνυπάρχει τοῖς φυτοῖς.

Ἔτι δ' ὥς τὸ μῆκος τοῦ πλάτους πρότερον, εἰ τὸ μὲν ἄνω τοῦ μήκους ἀρχή, τὸ δὲ δεξιὸν τοῦ πλάτους, ἢ δὲ τοῦ προτέρου ἀρχὴ προτέρα, πρότερον ἂν εἴη τὸ ἄνω τοῦ δεξιοῦ κατὰ γένεσιν, ἐπειδὴ πολλαχῶς λέγεται τὸ πρότερον. Πρὸς δὲ τούτοις, εἰ τὸ μὲν ἄνω ἐστὶ τὸ ὅθεν ἡ κίνησις, τὸ δὲ δεξιὸν ἀφ' οὗ, τὸ δ' ἔμπροσθεν ἐφ' ὃ, κἂν οὕτως ἔχοι τινὰ δύνάμιν ἀρχῆς τὸ ἄνω πρὸς τὰς ἄλλας ιδέας.

Διὰ τε δὴ τὸ παραλείπειν τὰς κυριωτέρας ἀρχὰς δίκαιον αὐτοῖς ἐπιτιμᾶν, καὶ διότι ταύτας ἐν ἅπασιν ὁμοίως ἐνόμιζον ὑπάρχειν.

Ἡμῖν δ' ἐπεὶ διώρισται πρότερον ὅτι ἐν τοῖς ἔχουσιν ἀρχὴν κινήσεως αἱ τοιαῦται δυνάμεις ἐνυπάρχουσιν, ὃ δ' οὐρανὸς ἔμψυχος καὶ ἔχει κινήσεως ἀρχήν, δῆλον ὅτι ἔχει καὶ τὸ ἄνω καὶ τὸ κάτω καὶ τὸ δεξιὸν καὶ τὸ ἀριστερόν.

Οὐ δεῖ γὰρ ἀπορεῖν διὰ τὸ σφαιροειδὲς εἶναι τὸ σχῆμα τοῦ παντός, ὅπως ἔσται τούτου τὸ μὲν δεξιὸν τὸ δὲ ἀριστερόν ὁμοίων γ' ὄντων τῶν μο(285b.) ρίων ἀπάντων καὶ κινουμένων τὸν ἅπαντα χρόνον, ἀλλὰ νοεῖν ὥσπερ ἂν εἴ τις, ἐν οἷς ἔχει τὸ δεξιὸν πρὸς τὸ ἀριστερόν διαφορὰν καὶ τοῖς σχήμασιν, εἴτα περιθεῖη σφαῖραν· ἔξει μὲν γὰρ τὴν δύνάμιν διαφέρουσαν, δόξει δ' οὕτως, διὰ τὴν ὁμοιότητα τοῦ σχήματος. Τὸν αὐτὸν δὲ τρόπον καὶ περὶ τῆς ἀρχῆς τοῦ κινεῖσθαι· καὶ γὰρ εἰ μηδέποτε ἥρξατο, ὅμως ἔχειν ἀναγκαῖον ἀρχήν, ὅθεν ἂν ἥρξατο, εἰ ἥρχετο κινούμενον, κἂν εἰ σταίη, κινηθεῖη ἂν πάλιν.

Λέγω δὲ μῆκος μὲν αὐτοῦ τὸ κατὰ τοὺς πόλους διάστημα, καὶ τῶν πόλων τὸν μὲν ἄνω τὸν δὲ κάτω· διαφορὰν γὰρ ἐν τούτοις μόνοις ὁρῶμεν τῶν ἡμισφαιρίων, τῷ μὴ κινεῖσθαι τοὺς πόλους. Ἄμα δὲ καὶ εἰώθαμεν λέγειν τὰ πλάγια ἐν τῷ κόσμῳ οὐ τὸ ἄνω καὶ τὸ κάτω, ἀλλὰ τὸ παρὰ τοὺς πόλους, ὡς τούτου μήκους ὄντος· τὸ γὰρ εἰς τὸ

πλάγιόν ἐστι τὸ παρὰ τὸ ἄνω καὶ τὸ κάτω.

Τῶν δὲ πόλων ὁ μὲν ὑπὲρ ἡμᾶς φαινόμενος τὸ κάτω μέρος ἐστίν, ὁ δ' ἡμῖν ἄδηλος τὸ ἄνω. Δεξιὸν γὰρ ἐκάστου λέγομεν, ὅθεν ἡ ἀρχὴ τῆς κατὰ τόπον κινήσεως· τοῦ δ' οὐρανοῦ ἀρχὴ τῆς περιφορᾶς, ὅθεν αἱ ἀνατολαὶ τῶν ἄστρον, ὥστε τοῦτ' ἂν εἴη δεξιόν, οὗ δ' αἱ δύσεις, ἀριστερόν. Εἰ οὖν ἄρχεται ἀπὸ τῶν δεξιῶν καὶ ἐπὶ τὰ δεξιὰ περιφέρεται, ἀνάγκη τὸ ἄνω εἶναι τὸν ἀφανῆ πόλον· εἰ γὰρ ἔσται ὁ φανερός, ἐπ' ἀριστερὰ ἔσται ἡ κίνησις, ὅπερ οὐ φαμεν. Δῆλον τοίνυν ὅτι ὁ ἀφανὴς πόλος ἐστὶ τὸ ἄνω. Καὶ οἱ μὲν ἐκεῖ οἰκοῦντες ἐν τῷ ἄνω εἰσὶν ἡμισφαιρίῳ καὶ πρὸς τοῖς δεξιοῖς, ἡμεῖς δ' ἐν τῷ κάτω καὶ πρὸς τοῖς ἀριστεροῖς, ἐναντίως ἢ ὡς οἱ Πυθαγόρειοι λέγουσιν· ἐκεῖνοι γὰρ ἡμᾶς ἄνω ποιοῦσι καὶ ἐν τῷ δεξιῷ μέρει, τοὺς δ' ἐκεῖ κάτω καὶ ἐν τῷ ἀριστερῷ. Συμβαίνει δὲ τοῦναντίον.

Ἀλλὰ τῆς μὲν δευτέρας περιφορᾶς, οἷον τῆς τῶν πλανήτων, ἡμεῖς μὲν ἐν τοῖς ἄνω καὶ ἐν τοῖς δεξιοῖς ἐσμεν, ἐκεῖνοι δὲ ἐν τοῖς κάτω καὶ ἐν τοῖς ἀριστεροῖς· ἀνάπαλιν γὰρ τούτοις ἡ ἀρχὴ τῆς κινήσεως ἐστὶ διὰ τὸ ἐναντίας εἶναι τὰς φοράς, ὥστε συμβαίνειν ἡμᾶς μὲν εἶναι πρὸς τῇ ἀρχῇ, ἐκείνους δὲ πρὸς τῷ τέλει. Περὶ μὲν οὖν τῶν κατὰ τὰς δια(286a.) στάσεις τῶν μορίων καὶ τῶν κατὰ τόπον ὠρισμένων τοσαῦτα εἰρήσθω.

Κεφάλαιο 3

Ἐπεὶ δ' οὐκ ἔστιν ἐναντία κίνησις ἢ κύκλω τῇ κύκλω, σκεπτέον διὰ τί πλείους εἰσὶ φοραί, καίπερ πόρρωθεν πειρωμένοις ποιεῖσθαι τὴν ζήτησιν, πόρρω δ' οὐχ οὕτω τῷ τόπῳ, πολὺ δὲ μᾶλλον τῷ τῶν συμβεβηκότων αὐτοῖς περὶ πάντα ὀλίγων ἔχειν αἴσθησιν. Ὅμως δὲ λέγωμεν.

Ἡ δ' αἰτία περὶ αὐτῶν ἐνθὲνδε ληπτέα. Ἐκαστόν ἐστιν, ὃν ἐστιν ἔργον, ἔνεκα τοῦ ἔργου. Θεοῦ δ' ἐνέργεια ἀθανασία· τοῦτο δ' ἐστὶ ζωὴ αἰδίου. ὥστ' ἀνάγκη τῷ θεῷ κίνησιν αἰδίου ὑπάρχειν. Ἐπεὶ δ' ὁ οὐρανὸς τοιοῦτος (σῶμα γάρ τι θεῖον), διὰ τοῦτο ἔχει τὸ ἐγκύκλιον σῶμα, ὃ φύσει κινεῖται κύκλω αἰεῖ.

Διὰ τί οὖν οὐχ ὅλον τὸ σῶμα τοῦ οὐρανοῦ τοιοῦτον; ὅτι ἀνάγκη μένειν τι τοῦ σώματος τοῦ φερομένου κύκλω, τὸ ἐπὶ τοῦ μέσου, τούτου δ' οὐθὲν οἶόν τε μένειν μόνον, οὔθ' ὅλως οὔτ' ἐπὶ τοῦ μέσου. Καὶ γὰρ ἂν ἢ κατὰ φύσιν κίνησις ἦν αὐτοῦ ἐπὶ τὸ μέσον· φύσει δὲ κύκλω κινεῖται· οὐ γὰρ ἂν ἦν αἰδίου ἢ κίνησις· οὐθὲν γὰρ παρὰ φύσιν αἰδίου. Ὑστερον δὲ τὸ παρὰ φύσιν τοῦ κατὰ φύσιν, καὶ ἔκστασίς τις ἐστὶν ἐν τῇ γενέσει τὸ παρὰ φύσιν τοῦ κατὰ φύσιν. Ἀνάγκη τοίνυν γῆν εἶναι· τοῦτο γὰρ ἡρεμεῖ ἐπὶ τοῦ μέσου. Νῦν μὲν οὖν ὑποκείσθω τοῦτο, ὕστερον δὲ δειχθήσεται περὶ αὐτοῦ.

Ἀλλὰ μὴν εἰ γῆν, ἀνάγκη καὶ πῦρ εἶναι· τῶν γὰρ ἐναντίων εἰ θάτερον φύσει, ἀνάγκη καὶ θάτερον εἶναι φύσει, ἐάν περ ἢ ἐναντίον, καὶ εἶναι τινα αὐτοῦ φύσιν· ἢ γὰρ αὐτὴ ὕλη τῶν ἐναντίων, καὶ τῆς στερήσεως πρότερον ἢ κατάφασις (λέγω δ' οἶον τὸ θερμὸν τοῦ ψυχροῦ), ἢ δ' ἡρεμία καὶ τὸ βαρὺ λέγεται κατὰ στέρησιν κουφότητος καὶ κινήσεως. Ἀλλὰ μὴν εἴπερ ἔστι πῦρ καὶ γῆ, ἀνάγκη καὶ τὰ μεταξὺ αὐτῶν εἶναι σώματα· ἐναντίωσιν γὰρ ἔχει ἕκαστον τῶν στοιχείων πρὸς ἕκαστον. Ὑποκείσθω δὲ καὶ τοῦτο νῦν, ὕστερον δὲ πειρατέον δεῖξαι. Τούτων δ' ὑπαρχόντων φανερόν ὅτι ἀνάγκη γενέσιν εἶναι διὰ τὸ μηδὲν οἶόν τ' αὐτῶν εἶναι αἰδίου· πάσχει γὰρ καὶ ποιεῖ τὰναντία ὑπ' ἀλλήλων, καὶ φθαρτικὰ ἀλλήλων ἐστίν. Ἔτι δ' οὐκ εὐλογον εἶναι τι κινητὸν αἰδίου, οὗ μὴ ἐνδέχεται εἶναι κατὰ φύσιν τὴν κίνησιν αἰδίου· (286b.) τούτων δ' ἐστὶ κίνησις. Ὅτι μὲν τοίνυν ἀναγκαῖον εἶναι γενέσιν, ἐκ τούτων δῆλον.

Εἰ δὲ γενέσιν, ἀναγκαῖον καὶ ἄλλην εἶναι φορὰν, ἢ μίαν ἢ

πλείους· κατὰ γὰρ τὴν τοῦ ὅλου ὡσαύτως ἀναγκαῖον ἔχειν τὰ στοιχεῖα τῶν σωμάτων πρὸς ἄλληλα. Λεχθήσεται δὲ καὶ περὶ τούτου ἐν τοῖς ἐπομένοις σαφέστερον. Νῦν δὲ τοσοῦτόν ἐστι δῆλον, διὰ τίνα αἰτίαν πλείω τὰ ἐγκύκλια ἐστὶ σώματα, ὅτι ἀνάγκη γένεσιν εἶναι, γένεσιν δ', εἴπερ καὶ πῦρ, τοῦτο δὲ καὶ τᾶλλα, εἴπερ καὶ γῆν· ταύτην δ' ὅτι ἀνάγκη μένειν τι ἀεὶ, εἴπερ καὶ κινεῖσθαι τι ἀεὶ.

Κεφάλαιο 4

Σχῆμα δ' ἀνάγκη σφαιροειδὲς ἔχειν τὸν οὐρανόν· τοῦτο γὰρ οἰκειότατόν τε τῇ οὐσίᾳ καὶ τῇ φύσει πρῶτον. Εἵπωμεν δὲ καθόλου περὶ τῶν σχημάτων, τὸ ποῖόν ἐστι πρῶτον, καὶ ἐν ἐπιπέδοις καὶ ἐν στερεοῖς. Ἄπαν δὴ σχῆμα ἐπίπεδον ἢ εὐθύγραμμόν ἐστιν ἢ περιφερόγραμμον. Καὶ τὸ μὲν εὐθύγραμμον ὑπὸ πλειόνων περιέχεται γραμμῶν, τὸ δὲ περιφερόγραμμον ὑπὸ μιᾶς. Ἐπεὶ δὲ πρότερον [τῇ φύσει] ἐν ἐκάστω γένει τὸ ἐν τῶν πολλῶν καὶ τὸ ἀπλοῦν τῶν συνθέτων, πρῶτον ἂν εἴη τῶν ἐπιπέδων σχημάτων ὁ κύκλος.

Ἔτι δὲ εἴπερ τέλειόν ἐστιν οὗ μὴδὲν ἔξω τῶν αὐτοῦ λαβεῖν δυνατόν, ὥσπερ ὥρισται πρότερον, καὶ τῇ μὲν εὐθείᾳ πρόσθεσίς ἐστιν ἀεί, τῇ δὲ τοῦ κύκλου οὐδέποτε, φανερόν ὅτι τέλειος ἂν εἴη ἡ περιέχουσα τὸν κύκλον· ὥστ' εἰ τὸ τέλειον πρότερον τοῦ ἀτελοῦς, καὶ διὰ ταῦτα πρότερον ἂν εἴη τῶν σχημάτων ὁ κύκλος.

Ὡσαύτως δὲ καὶ ἡ σφαῖρα τῶν στερεῶν· μόνη γὰρ περιέχεται μιᾷ ἐπιφανείᾳ, τὰ δ' εὐθύγραμμα πλείοσιν· ὥς γὰρ ἔχει ὁ κύκλος ἐν τοῖς ἐπιπέδοις, οὕτως ἡ σφαῖρα ἐν τοῖς στερεοῖς.

Ἔτι δὲ καὶ οἱ διαιροῦντες εἰς ἐπίπεδα καὶ ἐξ ἐπιπέδων τὰ σώματα γεννῶντες μεμαρτυρηκέναι φαίνονται τούτοις· μόνην γὰρ τῶν στερεῶν οὐ διαιροῦσι τὴν σφαῖραν ὥς οὐκ ἔχουσαν πλείους ἐπιφανείας ἢ μίαν· ἡ γὰρ εἰς τὰ ἐπίπεδα διαίρεσις οὐχ ὥς ἂν τέμνων τις εἰς τὰ μέρη διέλοι τὸ ὅλον, τοῦτον διαιρεῖται τὸν τρόπον, ἀλλ' ὥς εἰς ἕτερα τῷ εἶδει.

Ὅτι μὲν οὖν πρῶτόν ἐστιν ἡ σφαῖρα τῶν στερεῶν σχημάτων, δηλόν. Ἔστι δὲ καὶ κατὰ τὸν ἀριθμὸν τὴν τάξιν ἀποδιδοῦσιν οὕτω τιθεμένοις εὐλογώτατον, τὸν μὲν κύκλον κατὰ τὸ ἐν, τὸ δὲ τρίγωνον (287a.) κατὰ τὴν δυάδα, ἐπειδὴ ὀρθαὶ δύο. Ἐὰν δὲ τὸ ἐν κατὰ τὸ τρίγωνον, ὁ κύκλος οὐκέτι ἔσται σχῆμα.

Ἐπεὶ δὲ τὸ μὲν πρῶτον σχῆμα τοῦ πρώτου σώματος, πρῶτον δὲ σῶμα τὸ ἐν τῇ ἐσχάτῃ περιφορᾷ, σφαιροειδὲς ἂν εἴη τὸ τὴν κύκλῳ περιφερόμενον φοράν. Καὶ τὸ συνεχὲς ἄρα ἐκείνῳ· τὸ γὰρ τῷ σφαιροειδεῖ συνεχὲς σφαιροειδές. Ὡσαύτως δὲ καὶ τὰ πρὸς τὸ μέσον τούτων· τὰ γὰρ ὑπὸ τοῦ σφαιροειδοῦς περιεχόμενα καὶ ἀπτόμενα ὅλα σφαιροειδῇ ἀνάγκῃ εἶναι· τὰ δὲ κάτω τῆς τῶν πλανήτων ἅπτεται τῆς ἐπάνω σφαίρας. Ὡστε σφαιροειδὴς ἂν εἴη πᾶσα· πάντα γὰρ

ἄπτεται καὶ συνεχῇ ἐστὶ ταῖς σφαίραις.

Ἔτι δὲ ἐπεὶ φαίνεται καὶ ὑπόκειται κύκλῳ περιφέρεισθαι τὸ πᾶν, δέδεικται δ' ὅτι τῆς ἐσχάτης περιφορᾶς οὔτε κενόν ἐστὶν ἔξωθεν οὔτε τόπος, ἀνάγκη καὶ διὰ ταῦτα σφαιροειδῇ εἶναι αὐτόν. Εἰ γὰρ ἔσται εὐθύγραμμος, συμβήσεται καὶ τόπον εἶναι ἔξω καὶ σῶμα καὶ κενόν. Κύκλῳ γὰρ στρεφόμενον τὸ εὐθέγραμμον οὐδέποτε τὴν αὐτὴν ἐφέξει χώραν, ἀλλ' ὅπου πρότερον ἦν σῶμα, νῦν οὐκ ἔσται, καὶ οὗ νῦν οὐκ ἔστι, πάλιν ἔσται, διὰ τὴν παράλλαξιν τῶν γωνιῶν.

Ὅμοίως δὲ κἂν εἴ τι ἄλλο σχῆμα γένοιτο μὴ ἴσας ἔχον τὰς ἐκ τοῦ μέσου γραμμᾶς, οἷον φακοειδὲς ἢ ῥοειδές· ἐν ἅπασιν γὰρ συμβήσεται καὶ τόπον ἔξω καὶ κενόν εἶναι τῆς φορᾶς, διὰ τὸ μὴ τὴν αὐτὴν χώραν κατέχειν τὸ ὅλον. Ἔτι δ' εἰ τῶν μὲν κινήσεων τὸ μέτρον ἢ τοῦ οὐρανοῦ φορὰ διὰ τὸ εἶναι μόνῃ συνεχῆς καὶ ὁμαλῆς καὶ ἀίδιος, ἐν ἐκάστῳ δὲ μέτρον τὸ ἐλάχιστον, ἐλαχίστη δὲ κίνησις ἢ ταχίστη, δῆλον ὅτι ταχίστη ἂν εἴη πασῶν τῶν κινήσεων ἢ τοῦ οὐρανοῦ κίνησις.

Ἀλλὰ μὴν τῶν ἀφ' αὐτοῦ ἐφ' αὐτὸ ἐλαχίστη ἐστὶν ἢ τοῦ κύκλου γραμμῇ· κατὰ δὲ τὴν ἐλαχίστην ταχίστη ἢ κίνησις· ὥστ' εἰ ὁ οὐρανὸς κύκλῳ τε φέρεται καὶ τάχιστα κινεῖται, σφαιροειδῇ αὐτὸν ἀνάγκη εἶναι.

Λάβοι δ' ἂν τις καὶ ἐκ τῶν περὶ τὸ μέσον ἰδρυμένων σωμάτων ταύτην τὴν πίστιν. Εἰ γὰρ τὸ μὲν ὕδωρ ἐστὶ περὶ τὴν γῆν, ὁ δ' αἷρ περὶ τὸ ὕδωρ, τὸ δὲ πῦρ περὶ τὸν ἀέρα, καὶ τὰ ἄνω σώματα κατὰ τὸν αὐτὸν λόγον (συνεχῇ μὲν γὰρ οὐκ ἔστιν, ἄπτεται δὲ (287b.) τούτων), ἢ δὲ τοῦ ὕδατος ἐπιφάνεια σφαιροειδὴς ἐστὶν, τὸ δὲ τῷ σφαιροειδεῖ συνεχὲς ἢ κείμενον περὶ τὸ σφαιροειδές καὶ αὐτὸ τοιοῦτον ἀναγκαῖον εἶναι· ὥστε κἂν διὰ τοῦτο φανερόν εἴη ὅτι σφαιροειδὴς ἐστὶν ὁ οὐρανός.

Ἀλλὰ μὴν ὅτι γε ἢ τοῦ ὕδατος ἐπιφάνεια τοιαύτη φανερόν, ὑπόθεσιν λαμβάνουσιν ὅτι πέφυκεν αἰεὶ συρρεῖν τὸ ὕδωρ εἰς τὸ κοιλότερον· κοιλότερον δὲ ἐστὶ τὸ τοῦ κέντρου ἐγγύτερον. Ἦχθωσαν οὖν ἐκ τοῦ κέντρου ἢ ΑΒ καὶ ἢ ΑΓ, καὶ ἐπεζεύχθω ἐφ' ἧς ΒΓ. Ἡ οὖν ἀχθεῖσα ἐπὶ τὴν βάσιν, ἐφ' ἧς ΑΔ, ἐλάττων ἐστὶ τῶν ἐκ τοῦ κέντρου· κοιλότερος ἄρα ὁ τόπος. Ὡστε περιρρεύσεται τὸ ὕδωρ, ἕως ἂν ἰσασθῇ. Ἰση δὲ ταῖς ἐκ τοῦ κέντρου ἢ ΑΕ. Ὡστ' ἀνάγκη πρὸς ταῖς ἐκ τοῦ κέντρου εἶναι τὸ ὕδωρ· τότε γὰρ ἡρεμήσει. Ἡ δὲ τῶν ἐκ τοῦ κέντρου ἀπτομένη περιφερὴς· σφαιροειδὴς ἄρα ἢ τοῦ ὕδατος

ἐπιφάνεια, ἐφ' ἧς ΒΕΓ.

Ὅτι μὲν οὖν σφαιροειδὴς ἐστὶν ὁ κόσμος, δῆλον ἐκ τούτων, καὶ ὅτι κατ' ἀκρίβειαν ἔντορνος οὕτως ὥστε μηθὲν μήτε χειρόκμητον ἔχειν παραπλησίως μήτ' ἄλλο μηθὲν τῶν ἡμῖν ἐν ὀφθαλμοῖς φαινομένων. Ἐξ ὧν γὰρ τὴν σύστασιν εἴληφεν, οὐδὲν οὕτω δυνατὸν ὁμαλότητα δέξασθαι καὶ ἀκρίβειαν ὥς ἡ τοῦ πέριξ σώματος φύσις· δῆλον γὰρ ὡς ἀνάλογον ἔχει, καθάπερ ὕδωρ πρὸς γῆν, καὶ τὰ πλεῖον ἀεὶ ἀπέχοντα τῶν συστοίχων.

Κεφάλαιο 5

Ἐπεὶ δ' ἔστι διχῶς ἐπὶ τοῦ κύκλου κινηθῆναι, οἷον ἀπὸ τοῦ Α τὴν μὲν ἐπὶ τὸ Β τὴν δ' ἐπὶ τὸ Γ, ὅτι μὲν οὖν οὐκ εἰσὶν ἐναντία αὗται, πρότερον εἴρηται. Ἄλλ' εἰ μηδὲν ὥς ἔτυχε μηδ' ἀπὸ ταυτομάτου ἐνδέχεται ἐν τοῖς αἰδίοις εἶναι, ὁ δ' οὐρανὸς αἰδῖος καὶ ἡ κύκλῳ φορὰ, διὰ τίνα ποτ' αἰτίαν ἐπὶ θάτερα φέρεται, ἀλλ' οὐκ ἐπὶ θάτερα; ἀνάγκη γὰρ καὶ τοῦτο ἢ ἀρχὴν εἶναι ἢ εἶναι αὐτοῦ ἀρχήν.

Ἰσως μὲν οὖν τὸ περὶ ἐνίων ἀποφαίνεσθαι τι πειρᾶσθαι καὶ τὸ περὶ πάντων καὶ τὸ παρίεναι μηθὲν τάχ' ἂν δόξειεν εἶναι σημεῖον ἢ πολλῆς εὐθειας ἢ πολλῆς προθυμίας. Οὐ μὴν δίκαιόν γε πᾶσιν ὁμοίως ἐπιτιμᾶν, ἀλλ' ὁρᾶν δεῖ τὴν αἰτίαν τοῦ λέγειν τίς ἐστίν, ἔτι δὲ πῶς ἔχων τῷ πιστεύειν, πότερον ἀνθρωπίνως ἢ καρτερώτερον. Τὰς μὲν οὖν ἀκριβεστέρας ἀνάγκας, ὅταν (288a.) τις ἐπιτύχῃ, τότε χάριν ἔχειν δεῖ τοῖς εὐρίσκουσι, νῦν δὲ τὸ φαινόμενον ρητέον.

Εἰ γὰρ ἡ φύσις ἀεὶ ποιεῖ τῶν ἐνδεχομένων τὸ βέλτιστον, ἔστι δὲ καθάπερ τῶν ἐπὶ τῆς εὐθειας φορῶν ἢ πρὸς τὸν ἄνω τόπον τιμιωτέρα (θειότερος γὰρ τόπος ὁ ἄνω τοῦ κάτω), τὸν αὐτὸν τρόπον καὶ ἡ εἰς τὸ πρόσθεν τῆς εἰς τοῦπισθεν, ἔχει, εἴπερ καὶ τὸ δεξιὸν καὶ τὸ ἀριστερόν, καθάπερ ἐλέχθη πρότερον, (καὶ μαρτυρεῖ δ' ἡ ῥηθεῖσα ἀπορία ὅτι ἔχει) τὸ πρότερον καὶ ὕστερον· αὕτη γὰρ ἡ αἰτία λύει τὴν ἀπορίαν. Εἰ γὰρ ἔχει ὥς ἐνδέχεται βέλτιστα, αὕτη ἂν εἴη αἰτία καὶ τοῦ εἰρημένου· βέλτιστον γὰρ κινεῖσθαι ἀπλὴν τε κίνησιν καὶ ἄπαιστον, καὶ ταύτην ἐπὶ τὸ τιμιώτερον.

Κεφάλαιο 6

Περὶ δὲ τῆς κινήσεως αὐτοῦ, ὅτι ὁμαλῆς ἐστὶ καὶ οὐκ ἀνώμαλος, ἐφεξῆς ἂν εἴη τῶν εἰρημένων διελθεῖν. Λέγω δὲ τοῦτο περὶ τοῦ πρώτου οὐρανοῦ καὶ περὶ τῆς πρώτης φορᾶς· ἐν γὰρ τοῖς ὑποκάτω πλείους ἤδη αἱ φοραὶ συνεληλύθασιν εἰς ἓν.

Εἰ γὰρ ἀνωμάλως κινήσεται, δῆλον ὅτι ἐπίτασις ἔσται καὶ ἀκμὴ καὶ ἄνεσις τῆς φορᾶς· ἅπαντα γὰρ ἢ ἀνώμαλος φορὰ καὶ ἄνεσιν ἔχει καὶ ἐπίτασιν καὶ ἀκμὴν. Ἀκμὴ δ' ἐστὶν ἢ ὅθεν φέρεται ἢ οἷ ἢ ἀνὰ μέσον, οἷον ἴσως τοῖς μὲν κατὰ φύσιν οἷ φέρονται, τοῖς δὲ παρὰ φύσιν ὅθεν, τοῖς δὲ ῥιπτουμένοις ἀνὰ μέσον. Τῆς δὲ κύκλῳ φορᾶς οὐκ ἔστιν οὔτε ὅθεν οὔτε οἷ οὔτε μέσον· οὔτε γὰρ ἀρχὴ οὔτε πέρας οὔτε μέσον ἐστὶν αὐτῆς ἀπλῶς· τῷ τε γὰρ χρόνῳ αἰδίδιος καὶ τῷ μήκει συνηγμένη καὶ ἄκλαστος· ὥστ' εἰ μὴ ἐστὶν ἀκμὴ αὐτοῦ τῆς φορᾶς, οὐδ' ἂν ἀνωμαλία εἴη· ἢ γὰρ ἀνωμαλία γίνεταί διὰ τὴν ἄνεσιν καὶ ἐπίτασιν.

Ἔτι δ' ἐπεὶ πᾶν τὸ κινούμενον ὑπὸ τινος κινεῖται, ἀνάγκη τὴν ἀνωμαλίαν γίνεσθαι τῆς κινήσεως ἢ διὰ τὸ κινεῖν ἢ διὰ τὸ κινούμενον ἢ δι' ἄμφω· εἴτε γὰρ τὸ κινεῖν μὴ τῇ αὐτῇ δυνάμει κινεῖ, εἴτε τὸ κινούμενον ἀλλοιοῖτο καὶ μὴ διαμένει τὸ αὐτό, εἴτε ἄμφω μεταβάλλοι, οὐθὲν κωλύει ἀνωμάλως κινεῖσθαι τὸ κινούμενον. Οὐθὲν δὲ τούτων δυνατὸν περὶ τὸν οὐρανὸν γενέσθαι· τὸ μὲν γὰρ κινούμενον δέδεικται ὅτι πρῶτον καὶ ἀπλοῦν καὶ (288b.) ἀγένητον καὶ ἄφθαρτον καὶ ὅλως ἀμετάβλητον, τὸ δὲ κινεῖν πολὺ μᾶλλον εὐλογον εἶναι τοιοῦτον· τὸ γὰρ πρῶτον τοῦ πρώτου καὶ τὸ ἀπλοῦν τοῦ ἀπλοῦ καὶ τὸ ἄφθαρτον καὶ ἀγένητον τοῦ ἀφθάρτου καὶ ἀγενήτου κινητικόν. Ἐπεὶ οὖν τὸ κινούμενον οὐ μεταβάλλει σῶμα ὄν, οὐδ' ἂν τὸ κινεῖν μεταβάλλοι ἀσώματον ὄν. Ὡστε καὶ τὴν φορὰν ἀδύνατον ἀνώμαλον εἶναι.

Καὶ γὰρ εἰ γίνεται ἀνώμαλος, ἥτοι ὅλη μεταβάλλει καὶ ὅτε μὲν γίνεται θάπτων ὅτε δὲ βραδυτέρα πάλιν, ἢ τὰ μέρη αὐτῆς. Τὰ μὲν οὖν μέρη ὅτι οὐκ ἔστιν ἀνώμαλα, φανερόν· ἤδη γὰρ ἂν ἐγεγόνει διάστασις τῶν ἄστρον ἐν τῷ ἀπείρῳ χρόνῳ, τοῦ μὲν θάπτων κινουμένου τοῦ δὲ βραδυτέρου. Οὐ φαίνεται δ' οὐθὲν ἄλλως ἔχον τοῖς διαστήμασιν. Ἀλλὰ μὴν οὐδὲ τὴν ὅλην ἐγχωρεῖ μεταβάλλειν· ἢ γὰρ ἄνεσις ἐκάστου γίνεται δι' ἀδυναμίαν, ἢ δ' ἀδυναμία παρὰ

φύσιν· καὶ γὰρ αἱ ἐν τοῖς ζώοις ἀδυναμίαι πᾶσαι παρὰ φύσιν εἰσίν, οἶον γῆρας καὶ φθίσις. Ὅλη γὰρ ἴσως ἡ σύστασις τῶν ζώων ἐκ τοιούτων συνέστηκεν ἃ διαφέρει τοῖς οἰκείοις τόποις· οὐθὲν γὰρ τῶν μερῶν ἔχει τὴν αὐτοῦ χώραν.

Εἰ οὖν ἐν τοῖς πρώτοις μὴ ἐστὶ τὸ παρὰ φύσιν (ἀπλᾶ γὰρ καὶ ἄμικτα καὶ ἐν τῇ οἰκείᾳ χώρᾳ, καὶ οὐθὲν αὐτοῖς ἐναντίον), οὐδ' ἂν ἀδυναμία εἴη, ὥστ' οὐδ' ἄνεσις οὐδ' ἐπίτασις· εἰ γὰρ ἐπίτασις, καὶ ἄνεσις.

Ἔτι δὲ καὶ ἄλογον ἄπειρον χρόνον ἀδύνατον εἶναι τὸ κινεῖν, καὶ πάλιν ἄλλον ἄπειρον δυνατόν· οὐθὲν γὰρ φαίνεται ὃν ἄπειρον χρόνον παρὰ φύσιν (ἢ δ' ἀδυναμία παρὰ φύσιν), οὐδὲ τὸν ἴσον χρόνον παρὰ φύσιν καὶ κατὰ φύσιν, οὐδ' ὅλως δυνατόν καὶ ἀδύνατον· ἀνάγκη δ', εἰ ἀνίησιν ἢ κίνησις, ἄπειρον ἀνιέναι χρόνον. Ἀλλὰ μὴν οὐδ' ἐπιτείνειν αἰεὶ ἢ πάλιν ἀνιέναι δυνατόν· ἄπειρος γὰρ ἂν εἴη καὶ ἀόριστος ἢ κίνησις, ἅπασαν δὲ φάμεν ἕκ τινος εἶς τι εἶναι καὶ ὠρισμένην.

Ἔτι δ' εἴ τις λάβοι εἶναι τινὰ χρόνον ἐλάχιστον, οὗ οὐκ ἐνδέχεται ἐν ἐλάττω κινηθῆναι τὸν οὐρανόν (ὥσπερ γὰρ οὐδὲ κιθαρίσαι οὐδὲ βαδίσαι ἐν ὀτῳῶν χρόνῳ δυνατόν, ἀλλ' ἔστιν ἐκάστης πράξεως ὠρισμένος ὁ ἐλάχιστος χρόνος κατὰ τὸ μὴ ὑπερβάλλειν, οὕτως οὐδὲ κινηθῆναι τὸν οὐρανὸν (289a.) ἐν ὀτῳῶν χρόνῳ δυνατόν)· εἰ οὖν τοῦτ' ἀληθές, οὐκ ἂν εἴη αἰεὶ ἐπίτασις τῆς φορᾶς (εἰ δὲ μὴ ἐπίτασις, οὐδ' ἄνεσις· ὁμοίως γὰρ ἄμφω καὶ θάτερον), εἴπερ τῷ αὐτῷ τε ἐπιτείνει τάχει ἢ μείζονι, καὶ ἄπειρον χρόνον.

Λείπεται δὴ λέγειν ἐναλλάξ εἶναι τῇ κινήσει τὸ θᾶπτον καὶ τὸ βραδύτερον· τοῦτο δὲ παντελῶς ἄλογον καὶ πλάσματι ὅμοιον. Ἔτι δὲ καὶ τὸ μὴ λανθάνειν ἐπὶ τούτων εὐλογώτερον· εὐαισθητότερα γὰρ τὰ παρ' ἀλλήλα τιθέμενα.

Ὅτι μὲν οὖν εἶς τε μόνος ἐστὶν ὁ οὐρανός, καὶ οὗτος ἀγέννητος καὶ αἰδίος, ἔτι δὲ κινούμενος ὁμαλῶς, ἐπὶ τοσοῦτον ἡμῖν εἰρήσθω.

Κεφάλαιο 7

Περὶ δὲ τῶν καλουμένων ἄστρον ἐπόμενον ἂν εἶη λέγειν, ἐκ τίνων τε συνεστᾶσι καὶ ἐν ποίοις σχήμασι καὶ τίνες αἱ κινήσεις αὐτῶν.

Εὐλογώτατον δὴ καὶ τοῖς εἰρημένοις ἐπόμενον ἡμῖν τὸ ἕκαστον τῶν ἄστρον ποιεῖν ἐκ τούτου τοῦ σώματος ἐν ᾧ τυγχάνει τὴν φορὰν ἔχον, ἐπειδὴ ἔφαμέν τι εἶναι ὁ κύκλῳ φέρεσθαι πέφυκεν· ὥσπερ γὰρ οἱ πύρινα φάσκοντες εἶναι διὰ τοῦτο λέγουσιν, ὅτι τὸ ἄνω σῶμα πῦρ εἶναι φασιν, ὡς εὐλογον ὄν ἕκαστον συνεστάναι ἐκ τούτων ἐν οἷς ἕκαστόν ἐστιν, ὁμοίως καὶ ἡμεῖς λέγομεν.

Ἡ δὲ θερμότης ἀπ' αὐτῶν καὶ τὸ φῶς γίνεται παρεκτριβομένου τοῦ ἀέρος ὑπὸ τῆς ἐκείνων φορᾶς. Πέφυκε γὰρ ἡ κίνησις ἐκπυροῦν καὶ ξύλα καὶ λίθους καὶ σίδηρον· εὐλογώτερον οὖν τὸ ἐγγύτερον τοῦ πυρός, ἐγγύτερον δὲ ὁ ἀήρ· οἷον καὶ ἐπὶ τῶν φερομένων βελῶν· ταῦτα γὰρ αὐτὰ ἐκπυροῦνται οὕτως ὥστε τήκεσθαι τὰς μολυβδίδας, καὶ ἐπείπερ αὐτὰ ἐκπυροῦνται, ἀνάγκη καὶ τὸν κύκλῳ αὐτῶν ἀέρα τὸ αὐτὸ τοῦτο πάσχειν. Ταῦτα μὲν οὖν αὐτὰ ἐκθερμαίνεται διὰ τὸ ἐν ἀέρι φέρεσθαι, ὅς διὰ τὴν πληγὴν τῇ κινήσει γίγνεται πῦρ.

Τῶν δὲ ἄνω ἕκαστον ἐν τῇ σφαίρᾳ φέρεται, ὥστ' αὐτὰ μὲν μὴ ἐκπυροῦσθαι, τοῦ δ' ἀέρος ὑπὸ τὴν τοῦ κυκλικοῦ σώματος σφαῖραν ὄντος ἀνάγκη φερομένης ἐκείνης ἐκθερμαίνεσθαι, καὶ ταύτῃ μάλιστα ἢ ὁ ἥλιος τετύχηκεν ἐνδεδεμένος· διὸ δὴ πλησιάζοντός τε αὐτοῦ καὶ ἀνίσχοντος καὶ ὑπὲρ ἡμῶν ὄντος γίγνεται ἡ θερμότης. Ὅτι μὲν οὖν οὔτε πύρινά ἐστιν οὔτ' ἐν πυρὶ φέρεται, ταῦθ' ἡμῖν εἰρήσθω περὶ αὐτῶν.

Κεφάλαιο 8

(289b.) Ἐπεὶ δὲ φαίνεται καὶ τὰ ἄστρα μεθιστάμενα καὶ ὅλος ὁ οὐρανός, ἀναγκαῖον ἦτοι ἡρεμούντων ἀμφοτέρων γίνεσθαι τὴν μεταβολήν, ἢ κινουμένων, ἢ τοῦ μὲν ἡρεμούντος τοῦ δὲ κινουμένου.

Ἀμφοτέρα μὲν τοίνυν ἡρεμεῖν ἀδύνατον ἡρεμούσης γε τῆς γῆς· οὐ γὰρ ἂν ἐγίγνετο τὰ φαινόμενα. Τὴν δὲ γῆν ὑποκείσθω ἡρεμεῖν. Λείπεται δὴ ἀμφοτέρα κινεῖσθαι, ἢ τὸ μὲν κινεῖσθαι τὸ δ' ἡρεμεῖν.

Εἰ μὲν οὖν ἀμφοτέρα κινήσεται, ἄλογον τὸ ταυτὰ τάχῃ τῶν ἄστρον εἶναι καὶ τῶν κύκλων· ἕκαστον γὰρ δὴ ὁμοταχὲς ἔσται τῷ κύκλῳ καθ' ὃν φέρεται. Φαίνεται γὰρ ἅμα τοῖς κύκλοις καθιστάμενα πάλιν εἰς τὸ αὐτό. Συμβαίνει οὖν ἅμα τό τε ἄστρον διεληλυθέναι τὸν κύκλον καὶ τὸν κύκλον ἐννεχῆθαι τὴν αὐτοῦ φοράν, διεληλυθότα τὴν περιφέρειαν. Οὐκ ἔστι δ' εὐλογον τὸ τὸν αὐτὸν λόγον ἔχειν τὰ τάχῃ τῶν ἄστρον καὶ τὰ μεγέθη τῶν κύκλων. Τοὺς μὲν γὰρ κύκλους οὐθὲν ἄτοπον ἀλλ' ἀναγκαῖον ἀνάλογον ἔχειν τὰ τάχῃ τοῖς μεγέθεσι, τῶν δ' ἄστρον ἕκαστον τῶν ἐν τούτοις οὐθαμῶς εὐλογον· εἴτε γὰρ ἐξ ἀνάγκης τὸ τὸν μείζω κύκλον φερόμενον θᾶττον ἔσται, δῆλον ὅτι καὶ μετατεθῇ τὰ ἄστρα εἰς τοὺς ἀλλήλων κύκλους, τὸ μὲν ἔσται θᾶττον τὸ δὲ βραδύτερον (οὕτω δ' οὐκ ἂν ἔχοιεν οἰκείαν κίνησιν, ἀλλὰ φέροντ' ἂν ὑπὸ τῶν κύκλων), εἴτε ἀπὸ ταυτομάτου συνέπεσεν, οὐδ' οὕτως εὐλογον ὥστ' ἐν ἅπασιν ἅμα τὸν τε κύκλον εἶναι μείζω καὶ τὴν φοράν θάττω τοῦ ἐν αὐτῷ ἄστρου· τὸ μὲν γὰρ ἐν ἡ δύο τοῦτον τὸν τρόπον ἔχειν οὐθὲν ἄτοπον, τὸ δὲ πάνθ' ὁμοίως πλάσματι ἔοικεν. Ἄμα δὲ καὶ οὐκ ἔστιν ἐν τοῖς φύσει τὸ ὥς ἔτυχεν, οὐδὲ τὸ πανταχοῦ καὶ πᾶσιν ὑπάρχον τὸ ἀπὸ τύχης.

Ἀλλὰ μὴν πάλιν εἰ οἱ μὲν κύκλοι μένουσιν, αὐτὰ δὲ τὰ ἄστρα κινεῖται, τὰ αὐτὰ καὶ ὁμοίως ἔσται ἄλογα· συμβήσεται γὰρ θᾶττον κινεῖσθαι τὰ ἔξω, καὶ τὰ τάχῃ εἶναι κατὰ τὰ μεγέθη τῶν κύκλων.

Ἐπεὶ τοίνυν οὕτ' ἀμφοτέρα κινεῖσθαι εὐλογον οὔτε τὸ ἕτερον μόνον, λείπεται τοὺς μὲν κύκλους κινεῖσθαι, τὰ δὲ ἄστρα ἡρεμεῖν καὶ ἐνδεδεμένα τοῖς κύκλοις φέρεσθαι· μόνως γὰρ οὕτως οὐθὲν ἄλογον συμβαίνει· τό τε γὰρ θᾶττον εἶναι τοῦ μείζονος κύκλου τὸ τάχος εὐλογον περὶ τὸ αὐτὸ κέντρον ἐνδεδεμένων (290a.) (ὥσπερ γὰρ ἐν τοῖς ἄλλοις τὸ μείζον σῶμα θᾶττον φέρεται τὴν οἰκείαν φοράν, οὕτως καὶ ἐν τοῖς ἐγκυκλίοις· μείζον γὰρ τῶν ἀφαιρουμένων ὑπὸ τῶν

ἐκ τοῦ κέντρου τὸ τοῦ μείζονος κύκλου τμήμα, ὥστ' εὐλόγως ἐν τῷ ἴσῳ χρόνῳ ὁ μείζων περιοισθήσεται κύκλος), τό τε μὴ διασπᾶσθαι τὸν οὐρανὸν διὰ τε τοῦτο συμβήσεται καὶ ὅτι δέδεικται συνεχῆς ὂν τὸ ὅλον.

Ἔτι δ' ἐπεὶ σφαιροειδῇ τὰ ἄστρα, καθάπερ οἱ τ' ἄλλοι φασὶ καὶ ἡμῖν ὁμολογούμενον εἰπεῖν, ἐξ ἐκείνου γε τοῦ σώματος γεννῶσιν, τοῦ δὲ σφαιροειδοῦς δύο κινήσεις εἰσὶ καθ' αὐτό, κύλισις καὶ δίνησις, εἴπερ οὖν κινεῖται τὰ ἄστρα δι' αὐτῶν, τὴν ἐτέραν ἂν κινοῖτο τούτων· ἀλλ' οὐδετέραν φαίνεται.

Δινούμενα μὲν γὰρ ἂν ἔμενεν ἐν ταύτῳ καὶ οὐ μετέβαλλε τὸν τόπον, ὅπερ φαίνεται τε καὶ πάντες φασίν. Ἔτι δὲ πάντα μὲν εὐλογον τὴν αὐτὴν κίνησιν κινεῖσθαι, μόνος δὲ δοκεῖ τῶν ἄστρον ὁ ἥλιος τοῦτο δρᾶν ἀνατέλλων καὶ δύνων, καὶ οὗτος οὐ δι' αὐτὸν ἀλλὰ διὰ τὴν ἀπόστασιν τῆς ἡμετέρας ὀψεως· ἡ γὰρ ὄψις ἀποτεينوμένη μακρὰν ἐλίσσεται διὰ τὴν ἀσθένειαν. Ὅπερ αἴτιον ἴσως καὶ τοῦ στίλβειν φαίνεσθαι τοὺς ἀστέρας τοὺς ἐνδεδεμένους, τοὺς δὲ πλάνητας μὴ στίλβειν· οἱ μὲν γὰρ πλάνητες ἐγγύς εἰσιν, ὥστ' ἐγκρατὴς οὔσα πρὸς αὐτοὺς ἀφικνεῖται ἡ ὄψις· πρὸς δὲ τοὺς μένοντας κραδαίνεται διὰ τὸ μῆκος, ἀποτεينوμένη πόρρω λίαν. Ὁ δὲ τρόμος αὐτῆς ποιεῖ τοῦ ἄστρου δοκεῖν εἶναι τὴν κίνησιν· οὐθὲν γὰρ διαφέρει κινεῖν τὴν ὄψιν ἢ τὸ ὀρώμενον.

Ἀλλὰ μὴν ὅτι οὐδὲ κυλίνεται τὰ ἄστρα, φανερόν· τὸ μὲν γὰρ κυλιόμενον στρέφεσθαι ἀνάγκη, τῆς δὲ σελήνης αἰεὶ δηλὸν ἐστὶ τὸ καλούμενον πρόσωπον. Ὡστ' ἐπεὶ κινούμενα μὲν δι' αὐτῶν τὰς οἰκείας κινεῖσθαι κινήσεις εὐλογον, ταύτας δ' οὐ φαίνεται κινούμενα, δηλὸν ὅτι οὐκ ἂν κινοῖτο δι' αὐτῶν.

Πρὸς δὲ τούτοις ἄλογον τὸ μὴθὲν ὄργανον αὐτοῖς ἀποδοῦναι τὴν φύσιν πρὸς τὴν κίνησιν (οὐθὲν γὰρ ὡς ἔτυχε ποιεῖ ἡ φύσις), οὐδὲ τῶν μὲν ζώων φροντίσαι, τῶν δ' οὕτω τιμίων ὑπεριδεῖν, ἀλλ' ἔοικεν ὥσπερ ἐπίτηδες ἀφελεῖν πάντα δι' ὧν ἐνεδέχετο προῖέναι καθ' αὐτά, καὶ ὅτι πλεῖστον ἀποστῆσαι τῶν ἐχόντων ὄργανα πρὸς κίνησιν.

Διὸ καὶ εὐλόγως ἂν δόξειεν ὁ τε (290b.) ὅλος οὐρανὸς σφαιροειδὴς εἶναι καὶ ἕκαστον τῶν ἄστρον. Πρὸς μὲν γὰρ τὴν ἐν ἑαυτῷ κίνησιν ἡ σφαῖρα τῶν σχημάτων χρησιμώτατον (οὕτω γὰρ ἂν καὶ τάχιστα κινοῖτο καὶ μάλιστα κατέχει τὸν αὐτὸν τόπον), πρὸς δὲ τὴν εἰς τὸ πρόσθεν ἀχρηστότατον· ἥκιστα γὰρ ὅμοιον τοῖς δι' αὐτῶν κινητικοῖς· οὐδὲν γὰρ ἀπηρτημένον ἔχει οὐδὲ προέχον, ὥσπερ τὸ

εὐθύγραμμον, ἀλλὰ πλεῖστον ἀφέστηκε τῷ σχήματι τῶν πορευτικῶν σωμάτων.

Ἐπεὶ οὖν δεῖ τὸν μὲν οὐρανὸν κινεῖσθαι τὴν ἐν ἑαυτῷ κίνησιν, τὰ δ' ἄλλα [ἄστρα] μὴ προϊέναι δι' αὐτῶν, εὐλόγως ἂν ἐκάτερον εἶη σφαιροειδές· οὕτω γὰρ μάλιστα τὸ μὲν κινήσεται τὸ δ' ἡρεμήσει.

Κεφάλαιο 9

Φανερόν δ' ἐκ τούτων ὅτι καὶ τὸ φάναι γίνεσθαι φερομένων ἁρμονίαν, ὡς συμφώνων γινομένων τῶν ψόφων, κομψῶς μὲν εἴρηται καὶ περιττῶς ὑπὸ τῶν εἰπόντων, οὐ μὴν οὕτως ἔχει τάληθές. Δοκεῖ γάρ τισιν ἀναγκαῖον εἶναι τηλικούτων φερομένων σωμάτων γίνεσθαι ψόφον, ἐπεὶ καὶ τῶν παρ' ἡμῖν οὔτε τοὺς ὄγκους ἐχόντων ἴσους οὔτε τοιοῦτω τάχει φερομένων· ἡλίου δὲ καὶ σελήνης, ἔτι τε τοσούτων τὸ πλῆθος ἄστρον καὶ τὸ μέγεθος φερομένων τῷ τάχει τοιαύτην φορὰν ἀδύνατον μὴ γίνεσθαι ψόφον ἀμήχανόν τινα τὸ μέγεθος. Ὑποθέμενοι δὲ ταῦτα καὶ τὰς ταχυτήτας ἐκ τῶν ἀποστάσεων ἔχειν τοὺς τῶν συμφωνιῶν λόγους, ἐναρμόνιον γίνεσθαί φασι τὴν φωνὴν φερομένων κύκλῳ τῶν ἄστρον.

Ἐπεὶ δ' ἄλογον δοκεῖ τὸ μὴ συνακούειν ἡμᾶς τῆς φωνῆς ταύτης, αἴτιον τούτου φασὶν εἶναι τὸ γιγνομένων εὐθὺς ὑπάρχειν τὸν ψόφον, ὥστε μὴ διάδηλον εἶναι πρὸς τὴν ἐναντίαν σιγὴν· πρὸς ἄλληλα γὰρ φωνῆς καὶ σιγῆς εἶναι τὴν διάγνωσιν· ὥστε καθάπερ τοῖς χαλκοτύποις διὰ συνήθειαν οὐθὲν δοκεῖ διαφέρειν, καὶ τοῖς ἀνθρώποις ταὐτὸ συμβαίνειν.

Ταῦτα δὴ, καθάπερ εἴρηται πρότερον, ἐμμελῶς μὲν λέγεται καὶ μουσικῶς, ἀδύνατον δὲ τοῦτον ἔχειν τὸν τρόπον. Οὐ γὰρ μόνον τὸ μηθὲν ἀκούειν ἄτοπον, περὶ οὗ λέγειν ἐγχειροῦσι τὴν αἰτίαν, ἀλλὰ καὶ τὸ μηδὲν πάσχειν χωρὶς αἰσθήσεως. Οἱ γὰρ ὑπερβάλλοντες ψόφοι διακναίουσι καὶ τῶν ἀψύχων σωμάτων τοὺς ὄγκους, οἷον ὁ τῆς βροντῆς διίστησι λίθους καὶ (291a.) τὰ καρτερώτατα τῶν σωμάτων. Τοσούτων δὲ φερομένων, καὶ τοῦ ψόφου διόντος πρὸς τὸ φερόμενον μέγεθος, πολλαπλάσιον μέγεθος ἀναγκαῖον ἀφικνεῖσθαι τε δεῦρο καὶ τὴν ἰσχὺν ἀμήχανον εἶναι τῆς βίας. Ἄλλ' εὐλόγως οὐτ' ἀκούομεν οὔτε ἀσχόντα φαίνεται τὰ σώματα βίαιον οὐδὲν πάθος, διὰ τὸ μὴ ψοφεῖν. Ἄμα δ' ἐστὶ τό τ' αἴτιον τούτων δῆλον, καὶ μαρτύριον τῶν εἰρημένων ἡμῖν λόγων, ὥς εἰσιν ἀληθεῖς· τὸ γὰρ ἀπορηθὲν καὶ ποιῆσαν τοὺς Πυθαγορείους φάναι γίνεσθαι συμφωνίαν τῶν φερομένων ἡμῖν ἐστι τεκμήριον. Ὅσα (9) μὲν γὰρ αὐτὰ φέρεται, ποιεῖ ψόφον καὶ πληγὴν· ὅσα δ' ἐν φερομένῳ ἐνδέδεται ἢ ἐνυπάρχει, καθάπερ ἐν τῷ πλοίῳ τὰ μόρια, οὐχ οἷόν τε ψοφεῖν, οὐδ' αὐτὸ τὸ πλοῖον, εἰ φέροιτο ἐν ποταμῷ. Καίτοι τοὺς αὐτοὺς λόγους ἂν ἐξείη

λέγειν, ὥς ἄτοπον εἰ μὴ φερόμενος ὁ ἰστός καὶ ἡ πρύμνα ποιεῖ ψόφον πολὺν τηλικαύτης νεώς, ἢ πάλιν αὐτὸ τὸ πλοῖον κινούμενον. Τὸ δ' ἐν μὴ φερομένῳ φερόμενον ποιεῖ ψόφον· ἐν φερομένῳ δὲ συνεχὲς καὶ μὴ ποιοῦν πληγὴν ἀδύνατον ψοφεῖν. Ὡστ' ἐνταῦθα λεκτέον ὥς εἴπερ ἐφέρετο τὰ σώματα τούτων εἴτ' ἐν ἀέρος πλήθει κεχυμένῳ κατὰ τὸ πᾶν εἴτε πυρός, ὥσπερ πάντες φασίν, ἀναγκαῖον ποιεῖν ὑπερφυᾶ τῷ μεγέθει τὸν ψόφον, τούτου δὲ γινομένου καὶ δεῦρ' ἀφικνεῖσθαι καὶ διακναίειν. Ὡστ' ἐπείπερ οὐ φαίνεται τοῦτο συμβαῖνον, οὔτ' ἂν ἔμψυχον οὔτε βίαιον φέροιτο φορὰν οὐθὲν αὐτῶν, ὥσπερ τὸ μέλλον ἔσεσθαι προνοούσης τῆς φύσεως, ὅτι μὴ τοῦτον τὸν τρόπον ἐχούσης τῆς κινήσεως οὐθὲν ἂν ἦν τῶν περὶ τὸν δεῦρο τόπον ὁμοίως ἔχον.

Ὅτι μὲν οὖν σφαιροειδῇ τὰ ἄστρα καὶ ὅτι οὐ κινεῖται δι' αὐτῶν, εἴρηται.

Κεφάλαιο 10

Περὶ δὲ τῆς τάξεως αὐτῶν, ὃν μὲν τρόπον ἕκαστα κινεῖται τῷ τὰ μὲν εἶναι πρότερα τὰ δ' ὕστερα, καὶ πῶς ἔχει πρὸς ἄλληλα τοῖς ἀποστήμασιν, ἐκ τῶν περὶ ἀστρολογίαν θεωρεῖσθω· λέγεται γὰρ ἱκανῶς. Συμβαίνει δὲ κατὰ λόγον γίνεσθαι τὰς ἐκάστου κινήσεις τοῖς ἀποστήμασι τῷ τὰς μὲν εἶναι θάττους τὰς δὲ βραδυτέρας· ἐπεὶ γὰρ ὑπόκειται τὴν μὲν ἐσχάτην τοῦ οὐρανοῦ περιφορὰν ἀπλῆν τ' εἶναι (291b.) καὶ ταχίστην, τὰς δὲ τῶν ἄλλων βραδυτέρας τε καὶ πλείους (ἕκαστον γὰρ ἀντιφέρεται τῷ οὐρανῷ κατὰ τὸν αὐτοῦ κύκλον), εὐλογον ἤδη τὸ μὲν ἐγγυτάτῳ τῆς ἀπλῆς καὶ πρώτης περιφορᾶς ἐν πλείστῳ χρόνῳ διέναι τὸν αὐτοῦ κύκλον, τὸ δὲ πορρωτάτῳ ἐν ἐλαχίστῳ, τῶν δ' ἄλλων τὸ ἐγγύτερον αἰεὶ ἐν πλείονι, τὸ δὲ πορρώτερον ἐν ἐλάττονι. Τὸ μὲν γὰρ ἐγγυτάτῳ μάλιστα κρατεῖται, τὸ δὲ πορρωτάτῳ πάντων ἥκιστα διὰ τὴν ἀπόστασιν· τὰ δὲ μεταξὺ κατὰ λόγον ἤδη τῆς ἀποστάσεως, ὥσπερ καὶ δεικνύουσιν οἱ μαθηματικοί.

Κεφάλαιο 11

Τὸ δὲ σχῆμα τῶν ἄστρον ἐκάστου σφαιροειδὲς μάλιστ' ἂν τις εὐλόγως ὑπολάβοι. Ἐπεὶ γὰρ δέδεικται ὅτι οὐ πεφύκασι κινεῖσθαι δι' αὐτῶν, ἡ δὲ φύσις οὐδὲν ἀλόγως οὐδὲ μάτην ποιεῖ, δῆλον ὅτι καὶ σχῆμα τοιοῦτον ἀπέδωκε τοῖς ἀκινήτοις ὃ ἥκιστα ἐστὶ κινητικόν. Ἦκιστα δὲ κινητικὸν ἡ σφαῖρα διὰ τὸ μηδὲν ἔχειν ὄργανον πρὸς τὴν κίνησιν. Ὡστε δῆλον ὅτι σφαιροειδῇ ἂν εἴη τὸν ὄγκον.

Ἔτι δ' ὁμοίως μὲν ἅπαντα καὶ ἔν, ἡ δὲ σελήνη δείκνυται διὰ τῶν περὶ τὴν ὄψιν ὅτι σφαιροειδῆς· οὐ γὰρ ἂν ἐγίνετο αὐξανομένη καὶ φθίνουσα τὰ μὲν πλεῖστα μηνοειδῆς ἢ ἀμφίκυρτος, ἅπαξ δὲ διχότομος. Καὶ πάλιν διὰ τῶν ἀστρολογικῶν, ὅτι οὐκ ἂν ἦσαν αἱ τοῦ ἡλίου ἐκλείψεις μηνοειδεῖς. Ὡστ' εἴπερ ἔν τοιοῦτον, δῆλον ὅτι καὶ τᾶλλα ἂν εἴη σφαιροειδῇ.

Κεφάλαιο 12

Δυοῖν δ' ἀπορίαιν οὔσαιν, περὶ ὧν εἰκότως ἂν ὅστισοῦν ἀπορήσειε, πειρατέον λέγειν τὸ φαινόμενον, αἰδοῦς ἀξίαν εἶναι νομίζοντας τὴν προθυμίαν μᾶλλον ἢ θράσους, εἴ τις διὰ τὸ φιλοσοφίας διψῇ καὶ μικρὰς εὐπορίας ἀγαπᾷ περὶ ὧν τὰς μεγίστας ἔχομεν ἀπορίας. Ἔστι δὲ πολλῶν ὄντων τοιούτων οὐχ ἥκιστα θαυμαστόν, διὰ τίνα ποτ' αἰτίαν οὐκ ἀεὶ τὰ πλεῖον ἀπέχοντα τῆς πρώτης φορᾶς κινεῖται πλείους κινήσεις, ἀλλὰ τὰ μεταξὺ πλείστας. Εὐλογον γὰρ ἂν δόξειεν εἶναι τοῦ πρώτου σώματος μίαν κινουμένου φορὰν τὸ πλησιαιτάτον ἐλαχίστας κινεῖσθαι κινήσεις, οἷον δύο, τὸ δ' ἐχόμενον τρεῖς ἢ τίνα ἄλλην τοιαύτην τάξιν. Νῦν δὲ συμβαίνει τούναντίον· ἐλάττους γὰρ ἥλιος καὶ σελήνη κινοῦνται (292a.) κινήσεις ἢ τῶν πλανωμένων ἄστρον ἓνα· καίτοι πορρώτερον τοῦ μέσου καὶ πλησιαιτέρον τοῦ πρώτου σώματός εἰσιν αὐτῶν. Δῆλον δὲ τοῦτο περὶ ἐνίων καὶ τῇ ὅψει γέγονεν· τὴν γὰρ σελήνην ἐωράκαμεν διχότομον μὲν οὔσαν, ὑπελθοῦσαν δὲ τῶν ἀστέρων τὸν τοῦ Ἄρεος, καὶ ἀποκρυφέντα μὲν κατὰ τὸ μέλαν αὐτῆς, ἐξελθόντα δὲ κατὰ τὸ φανὸν καὶ λαμπρόν.

Ὅμοίως δὲ καὶ περὶ τοὺς ἄλλους ἀστέρας λέγουσιν οἱ πάλοι τετηρηκότες ἐκ πλείστων ἐτῶν Αἰγύπτιοι καὶ Βαβυλώνιοι, παρ' ὧν πολλὰς πίστει ἔχομεν περὶ ἐκάστου τῶν ἄστρον.

Τοῦτο τε δὴ δικαίως ἀπορήσειεν ἂν τις, καὶ διὰ τίνα ποτ' αἰτίαν ἐν μὲν τῇ πρώτῃ φορᾷ τοσοῦτόν ἐστιν ἄστρον πλῆθος ὥστε τῶν ἀναριθμήτων εἶναι δοκεῖν τὴν πᾶσαν τάξιν, τῶν δ' ἄλλων ἐν χωρὶς ἕκαστον, δύο δ' ἢ πλείω οὐ φαίνεται ἐν τῇ αὐτῇ ἐνδεδεμένα φορᾷ.

Περὶ δὴ τούτων ζητεῖν μὲν καλῶς ἔχει καὶ τὴν ἐπὶ πλεῖον σύνεσιν, καίπερ μικρὰς ἔχοντας ἀφορμὰς καὶ τοσαύτην ἀπόστασιν ἀπέχοντας τῶν περὶ αὐτὰ συμβαινόντων· ὅμως δ' ἐκ τῶν τοιούτων θεωροῦσιν οὐδὲν ἄλογον ἂν δόξειεν εἶναι τὸ νῦν ἀπορούμενον. Ἀλλ' ἡμεῖς ὡς περὶ σωμάτων αὐτῶν μόνον, καὶ μονάδων τάξιν μὲν ἐχόντων, ἀψύχων δὲ πάμπαν, διανοούμεθα· δεῖ δ' ὡς μετεχόντων ὑπολαμβάνειν πράξεως καὶ ζωῆς· οὕτω γὰρ οὐθὲν δόξει παράλογον εἶναι τὸ συμβαῖνον. Ἔοικε γὰρ τῷ μὲν ἄριστα ἔχοντι ὑπάρχειν τὸ εὖ ἄνευ πράξεως, τῷ δ' ἐγγύτατα διὰ ὀλίγης καὶ μιᾶς, τοῖς δὲ πορρωτέρω διὰ πλειόνων, ὥσπερ ἐπὶ σώματος τὸ μὲν οὐδὲ

γυμναζόμενον εὖ ἔχει, τὸ δὲ μικρὰ περιπατήσαν, τῷ δὲ καὶ δρόμου δεῖ καὶ πάλης καὶ κονίσεως, πάλιν δ' ἐτέρῳ οὐδ' ὅποσαοῦν πονοῦντι τοῦτο γ' ἂν ἔτι ὑπάρξαι τάγαθόν, ἀλλ' ἕτερόν τι.

Ἔστι δὲ τὸ κατορθοῦν χαλεπὸν ἢ τὸ πολλὰ ἢ τὸ πολλάκις, οἷον μυρίους ἀστραγάλους Χίους βαλεῖν ἀμήχανον, ἀλλ' ἓνα ἢ δύο ῥᾶον. Καὶ πάλιν ὅταν τοδὶ μὲν δέῃ τοῦδ' ἔνεκα ποιῆσαι, τοῦτο δ' ἄλλου καὶ τοῦτο ἐτέρου, ἐν μὲν ἐνὶ ἢ δυσὶ ῥάδιον ἐπιτυχεῖν, ὅσῳ δ' ἂν διὰ πλειόνων, (292b.) χαλεπώτερον.

Διὸ δεῖ νομίζειν καὶ τὴν τῶν ἄστρον πρᾶξιν εἶναι τοιαύτην οἷα περ ἢ τῶν ζώων καὶ φυτῶν. Καὶ γὰρ ἐνταῦθα αἱ τοῦ ἀνθρώπου πλεῖσται πράξεις· πολλῶν γὰρ τῶν εὖ δύναται τυχεῖν, ὥστε πολλὰ πράττειν, καὶ ἄλλων ἔνεκα. (Τῷ δ' ὡς ἄριστα ἔχοντι οὐθέν δεῖ πράξεως· ἔστι γὰρ αὐτὸ τὸ οὗ ἔνεκα, ἢ δὲ πρᾶξις ἀεὶ ἐστὶν ἐν δυσὶν, ὅταν καὶ οὗ ἔνεκα ἢ καὶ τὸ τούτου ἔνεκα). Τῶν δ' ἄλλων ζώων ἐλάττους, τῶν δὲ φυτῶν μικρὰ τις καὶ μία ἴσως· ἢ γὰρ ἐν τί ἐστὶν οὗ τύχοι ἂν, ὥσπερ καὶ ἄνθρωπος, ἢ καὶ τὰ πολλὰ πάντα πρὸ ὁδοῦ ἐστὶ πρὸς τὸ ἄριστον. Τὸ μὲν οὖν ἔχει καὶ μετέχει τοῦ ἀρίστου, τὸ δ' ἀφικνεῖται [ἐγγὺς] δι' ὀλίγων, τὸ δὲ διὰ πολλῶν, τὸ δ' οὐδ' ἐγχειρεῖ, ἀλλ' ἱκανὸν εἰς τὸ ἐγγὺς τοῦ ἐσχάτου ἐλθεῖν· οἷον εἰ ὑγίεια τέλος, τὸ μὲν δὴ ἀεὶ ὑγιαίνει, τὸ δ' ἰσχνανθέν, τὸ δὲ δραμὸν καὶ ἰσχνανθέν, τὸ δὲ καὶ ἄλλο τι πρᾶξαν τοῦ δραμεῖν ἔνεκα, ὥστε πλείους αἱ κινήσεις· ἕτερον δ' ἀδυνατεῖ πρὸς τὸ ὑγιαίνει ἐλθεῖν, ἀλλὰ πρὸς τὸ δραμεῖν μόνον ἢ ἰσχνανθῆναι, καὶ τούτων θάτερον τέλος αὐτοῖς. Μάλιστα μὲν γὰρ ἐκείνου τυχεῖν ἄριστον πᾶσι τοῦ τέλους· εἰ δὲ μή, ἀεὶ ἄμεινόν ἐστὶν ὅσῳ ἂν ἐγγύτερον ἢ τοῦ ἀρίστου.

Καὶ διὰ τοῦτο ἢ μὲν γῇ ὅλως οὐ κινεῖται, τὰ δ' ἐγγὺς ὀλίγας (20) κινήσεις· οὐ γὰρ ἀφικνεῖται πρὸς τὸ ἔσχατον, ἀλλὰ μέχρι ὅτου δύναται τυχεῖν τῆς θειοτάτης ἀρχῆς. Ὁ δὲ πρῶτος οὐρανὸς εὐθὺς τυγχάνει διὰ μιᾶς κινήσεως. Τὰ δ' ἐν μέσῳ τοῦ πρώτου καὶ τῶν ἐσχάτων ἀφικνεῖται μὲν, διὰ πλειόνων δ' ἀφικνεῖται κινήσεων. Περὶ δὲ τῆς ἀπορίας ὅτι κατὰ μὲν τὴν πρώτην μίαν οὔσαν φορὰν πολὺ πλῆθος συνέστηκεν ἄστρον, τῶν δ' ἄλλων χωρὶς ἕκαστον εἴληφεν ἰδίας κινήσεις, δι' ἐν μὲν ἂν τις πρῶτον εὐλόγως οἰηθεῖη τοῦθ' ὑπάρχειν· νοῆσαι γὰρ δεῖ τῆς ζωῆς καὶ τῆς ἀρχῆς ἐκάστης πολλὴν ὑπεροχὴν εἶναι τῆς πρώτης πρὸς τὰς ἄλλας, εἴη δ' ἂν ἥδε συμβαίνουσα κατὰ λόγον· ἢ μὲν γὰρ πρώτη μία οὔσα πολλὰ κινεῖ τῶν σωμάτων τῶν θείων, αἱ δὲ πολλαὶ οὔσαι ἐν μόνον (293a.)

ἐκάστη· τῶν γὰρ πλανωμένων ἐν ὁτιοῦν πλείους φέρεται φοράς. Ταύτη τε οὖν ἀνισάζει ἢ φύσις καὶ ποιεῖ τινὰ τάξιν, τῇ μὲν μιᾷ φορᾷ πολλὰ ἀποδοῦσα σώματα, τῇ δ' ἐνὶ σώματι πολλὰς φοράς.

Καὶ ἔτι διὰ τόδε ἐν ἔχουσι σῶμα αἱ ἄλλαι φοραί, ὅτι πολλὰ σώματα κινοῦσιν αἱ πρὸ τῆς τελευταίας καὶ τῆς ἐν ἄστρον ἐχούσης· ἐν πολλαῖς γὰρ σφαίραις ἡ τελευταία σφαῖρα ἐνδεδεμένη φέρεται, ἐκάστη δὲ σφαῖρα σῶμά τι τυγχάνει ὄν. Ἐκείνης ἂν οὖν κοινὸν εἴη τὸ ἔργον· αὐτῇ μὲν γὰρ ἐκάστη ἢ ἴδιος φύσει φορά, αὕτη δὲ οἷον πρόσκειται, παντὸς δὲ πεπερασμένου σώματος πρὸς πεπερασμένον ἢ δύναμὶς ἐστίν.

Ἀλλὰ περὶ μὲν τῶν τὴν ἐγκύκλιον φερομένων κίνησιν ἄστρον εἴρηται ποῦ ἅττα κατὰ τε τὴν οὐσίαν ἐστὶ καὶ κατὰ τὸ σχῆμα, περὶ τε τῆς φορᾶς καὶ τῆς τάξεως αὐτῶν.

Κεφάλαιο 13

Λοιπὸν δὲ περὶ τῆς γῆς εἶπεῖν, οὗ τε τυγχάνει κειμένη, καὶ πότερον τῶν ἡρεμούντων ἐστὶν ἢ τῶν κινουμένων, καὶ περὶ τοῦ σχήματος αὐτῆς.

Περὶ μὲν οὖν τῆς θέσεως οὐ τὴν αὐτὴν ἅπαντες ἔχουσι δόξαν, ἀλλὰ τῶν πλείστων ἐπὶ τοῦ μέσου κεῖσθαι λεγόντων, ὅσοι τὸν ὅλον οὐρανὸν πεπερασμένον εἶναι φασιν, ἐναντίως οἱ περὶ τὴν Ἰταλίαν, καλούμενοι δὲ Πυθαγόρειοι λέγουσιν· ἐπὶ μὲν γὰρ τοῦ μέσου πῦρ εἶναι φασι, τὴν δὲ γῆν, ἐν τῶν ἄστρον οὔσαν, κύκλῳ φερομένην περὶ τὸ μέσον νύκτα τε καὶ ἡμέραν ποιεῖν. Ἔτι δ' ἐναντίαν ἄλλην ταύτη κατασκευάζουσι γῆν, ἣν ἀντίχθονα ὄνομα καλοῦσιν, οὐ πρὸς τὰ φαινόμενα τοὺς λόγους καὶ τὰς αἰτίας ζητοῦντες, ἀλλὰ πρὸς τινας λόγους καὶ δόξας αὐτῶν τὰ φαινόμενα προσέλκοντες καὶ πειρώμενοι συγκοσμεῖν.

Πολλοῖς δ' ἂν καὶ ἐτέροις συνδόξειε μὴ δεῖν τῇ γῇ τὴν τοῦ μέσου χώραν ἀποδιδόναι, τὸ πιστὸν οὐκ ἐκ τῶν φαινομένων ἀθροῦσιν ἀλλὰ μᾶλλον ἐκ τῶν λόγων. Τῷ γὰρ τιμιωτάτῳ οἶονται προσήκειν τὴν τιμιωτάτην ὑπάρχειν χώραν, εἶναι δὲ πῦρ μὲν γῆς τιμιώτερον, τὸ δὲ πέρας τοῦ μεταξύ, τὸ δ' ἔσχατον καὶ τὸ μέσον πέρας· ὥστ' ἐκ τούτων ἀναλογιζόμενοι οὐκ οἶονται ἐπὶ τοῦ μέσου τῆς σφαίρας κεῖσθαι αὐτὴν, ἀλλὰ μᾶλλον (293b.) τὸ πῦρ. Ἔτι δ' οἱ γε Πυθαγόρειοι καὶ διὰ τὸ μάλιστα προσήκειν φυλάττεσθαι τὸ κυριώτατον τοῦ παντός, τὸ δὲ μέσον εἶναι τοιοῦτον, [ὃ] Διὸς φυλακὴν ὀνομάζουσι τὸ ταύτην ἔχον τὴν χώραν πῦρ· ὥσπερ τὸ μέσον ἀπλῶς λεγόμενον, καὶ τὸ τοῦ μεγέθους μέσον καὶ τοῦ πράγματος ὃν μέσον καὶ τῆς φύσεως. Καίτοι καθάπερ ἐν τοῖς ζῴοις οὐ ταὐτὸν τοῦ ζώου καὶ τοῦ σώματος μέσον, οὕτως ὑποληπτέον μᾶλλον καὶ περὶ τὸν ὅλον οὐρανόν. Διὰ μὲν οὖν ταύτην τὴν αἰτίαν οὐθὲν αὐτοὺς δεῖ θορυβεῖσθαι περὶ τὸ πᾶν, οὐδ' εἰσάγειν φυλακὴν ἐπὶ τὸ κέντρον, ἀλλ' ἐκεῖνο ζητεῖν τὸ μέσον, ποῖόν τι καὶ ποῦ πέφυκεν. Ἐκεῖνο μὲν γὰρ ἀρχὴ τὸ μέσον καὶ τίμιον, τὸ δὲ τοῦ τόπου μέσον ἔοικε τελευτῇ μᾶλλον ἢ ἀρχῇ· τὸ μὲν γὰρ ὀριζόμενον τὸ μέσον, τὸ δ' ὀρίζον τὸ πέρας. Τιμιώτερον δὲ τὸ περιέχον καὶ τὸ πέρας ἢ τὸ περαινόμενον· τὸ μὲν γὰρ ὕλη, τὸ δ' οὐσία τῆς συστάσεώς ἐστιν.

Περὶ μὲν οὖν τοῦ τόπου τῆς γῆς ταύτην ἔχουσί τινες τὴν δόξαν, ὁμοίως δὲ καὶ περὶ μονῆς καὶ κινήσεως· οὐ γὰρ τὸν αὐτὸν τρόπον ἅπαντες ὑπολαμβάνουσιν, ἀλλ' ὅσοι μὲν μὴδ' ἐπὶ τοῦ μέσου κεῖσθαι φασιν αὐτὴν, κινεῖσθαι κύκλῳ περὶ τὸ μέσον, οὐ μόνον δὲ ταύτην, ἀλλὰ καὶ τὴν ἀντίχθονα, καθάπερ εἵπομεν πρότερον.

Ἐνίοις δὲ δοκεῖ καὶ πλείω σώματα τοιαῦτα ἐνδέχεσθαι φέρεσθαι περὶ τὸ μέσον, ἡμῖν ἄδηλα διὰ τὴν ἐπιπρόσθησιν τῆς γῆς. Διὸ καὶ τὰς τῆς σελήνης ἐκλείψεις πλείους ἢ τὰς τοῦ ἡλίου γίνεσθαι φασιν· τῶν γὰρ φερομένων ἕκαστον ἀντιφράττειν αὐτὴν, ἀλλ' οὐ μόνον τὴν γῆν. Ἐπεὶ γὰρ οὐκ ἔστιν ἡ γῆ κέντρον, ἀλλ' ἀπέχει τὸ ἡμισφαίριον αὐτῆς ὅλον, οὐθὲν κωλύειν οἶονται τὰ φαινόμενα συμβαίνειν ὁμοίως μὴ κατοικοῦσιν ἡμῖν ἐπὶ τοῦ κέντρου, ὥσπερ κἂν εἰ ἐπὶ τοῦ μέσου ἦν ἡ γῆ· οὐθὲν γὰρ οὐδὲ νῦν ποιεῖν ἐπίδηλον τὴν ἡμίσειαν ἀπεχόντων τῆς διαμέτρου.

Ἐνιοὶ δὲ καὶ κειμένην ἐπὶ τοῦ κέντρου φασὶν αὐτὴν ἴλλεσθαι καὶ κινεῖσθαι περὶ τὸν διὰ παντὸς τεταμένον πόλον, ὥσπερ ἐν τῷ Τιμαίῳ γέγραπται.

Παραπλησίως δὲ καὶ περὶ τοῦ σχήματος ἀμφισβητεῖται· τοῖς μὲν γὰρ δοκεῖ εἶναι σφαιροειδῆς, τοῖς δὲ πλατεῖα καὶ τὸ σχῆμα τυμπανο(294a.) εἰδῆς· ποιοῦνται δὲ τεκμήριον ὅτι δύνων καὶ ἀνατέλλων ὁ ἥλιος εὐθεῖαν ἀλλ' οὐ περιφερῆ τὴν ἀπόκρυσιν φαίνεται ποιούμενος ὑπὸ τῆς γῆς, ὥς δέον, εἴπερ ἦν σφαιροειδῆς, περιφερῆ γίνεσθαι τὴν ἀποτομήν, οὐ προσλογιζόμενοι τό τε ἀπόστημα τοῦ ἡλίου πρὸς τὴν γῆν καὶ τὸ τῆς περιφερείας μέγεθος, ὥς ἐν τοῖς φαινομένοις μικροῖς κύκλοις εὐθεῖα φαίνεται πόρρωθεν. Διὰ μὲν οὖν ταύτην τὴν φαντασίαν οὐδὲν αὐτοὺς ἀπιστεῖν δεῖ μὴ κυκλοτερῆ τὸν ὄγκον εἶναι τῆς γῆς· ἀλλ' ἔτι προστιθέασι, καὶ φασὶ διὰ τὴν ἡρεμίαν ἀναγκαῖον τὸ σχῆμα τοῦτ' ἔχειν αὐτὴν.

Καὶ γὰρ δὴ οἱ περὶ τῆς κινήσεως καὶ τῆς μονῆς εἰρημένοι τρόποι πολλοὶ τυγχάνουσιν. Τὸ μὲν οὖν ἀπορῆσαι πᾶσιν ἀναγκαῖον ἐπελθεῖν· τάχα γὰρ ἀλυποτέρας διανοίας τὸ μὴ θαυμάζειν πῶς ποτε μικρὸν μὲν μόριον τῆς γῆς, ἂν μετεωρισθὲν ἀφελῇ, φέρεται καὶ μένειν οὐκ ἐθέλει, καὶ τὸ πλεῖον ἀεὶ θάπτον, πᾶσαν δὲ τὴν γῆν εἴ τις ἀφείη μετεωρίσας, οὐκ ἂν φέροιτο. Νῦν δ' ἡρεμεῖ τοσοῦτον βάρος. Ἀλλὰ μὴν κἂν εἴ τις τῶν φερομένων μορίων αὐτῆς, πρὶν πεσεῖν, ὑφαιροίη τὴν γῆν, οἰσθήσεται κάτω μηθενὸς ἀντερείσαντος.

Ὡστε τὸ μὲν ἀπορεῖν εἰκότως ἐγένετο φιλοσόφημα πᾶσιν· τὸ δὲ

τάς περὶ τούτου λύσεις μὴ μᾶλλον ἀτόπους εἶναι δοκεῖν τῆς ἀπορίας, θαυμάσειεν ἂν τις. Οἱ μὲν γὰρ διὰ ταῦτα ἄπειρον τὸ κάτω τῆς γῆς εἶναι φασιν, ἐπ' ἄπειρον αὐτὴν ἐρριζῶσθαι λέγοντες, ὥσπερ Ξενοφάνης ὁ Κολοφώνιος, ἵνα μὴ πράγματ' ἔχωσι ζητοῦντες τὴν αἰτίαν· διὸ καὶ Ἐμπεδοκλῆς οὕτως ἐπέπληξεν, εἰπὼν ὡς εἴ περ ἀπείρονα γῆς τε βάθη καὶ δαψιλὸς αἰθήρ, ὡς διὰ πολλῶν δὴ γλώσσης ῥηθέντα ματαίως ἐκκέχυται στομάτων, ὀλίγον τοῦ παντὸς ἰδόντων.

Οἱ δ' ἐφ' ὕδατος κεῖσθαι. Τοῦτον γὰρ ἀρχαιότατον παρειλήφαμεν τὸν λόγον, ὃν φασιν εἰπεῖν Θαλῆν τὸν Μιλήσιον, ὡς διὰ τὸ πλωτὴν εἶναι μένουσαν ὥσπερ ξύλον ἢ τι τοιοῦτον ἕτερον (καὶ γὰρ τούτων ἐπ' ἀέρος μὲν οὐθὲν πέφυκε μένειν, ἀλλ' ἐφ' ὕδατος), ὥσπερ οὐ τὸν αὐτὸν λόγον ὄντα περὶ τῆς γῆς καὶ τοῦ ὕδατος τοῦ ὁχοῦντος τὴν γῆν· οὐδὲ γὰρ τὸ ὕδωρ πέφυκε μένειν μετέωρον, ἀλλ' ἐπὶ τινός (294b.) ἔστιν.

Ἔτι δ' ὥσπερ ἄηρ ὕδατος κουφότερον, καὶ γῆς ὕδωρ· ὥστε πῶς οἶόν τε τὸ κουφότερον κατωτέρω κεῖσθαι τοῦ βαρυτέρου τὴν φύσιν; Ἔτι δ' εἴπερ ὅλη πέφυκε μένειν ἐφ' ὕδατος, δηλὸν ὅτι καὶ τῶν μορίων ἕκαστον· νῦν δ' οὐ φαίνεται τοῦτο γιγνόμενον, ἀλλὰ τὸ τυχὸν μόριον φέρεται εἰς βυθόν, καὶ θάττον τὸ μεῖζον.

Ἀλλ' εὐοίκασι μέχρι τινὸς ζητεῖν, ἀλλ' οὐ μέχρι περ οὗ δυνατὸν τῆς ἀπορίας. Πᾶσι γὰρ ἡμῖν τοῦτο σύνηθες, μὴ πρὸς τὸ πρᾶγμα ποιεῖσθαι τὴν ζήτησιν ἀλλὰ πρὸς τὸν τάναντία λέγοντα· καὶ γὰρ αὐτὸς ἐν αὐτῷ ζητεῖ μέχρι περ ἂν οὗ μηκέτι ἔχη ἀντιλέγειν αὐτὸς αὐτῷ. Διὸ δεῖ τὸν μέλλοντα καλῶς ζητήσιν ἐνστατικὸν εἶναι διὰ τῶν οἰκείων ἐνστάσεων τῷ γένει, τοῦτο δ' ἔστιν ἐκ τοῦ πάσας θεωρηκέναι τὰς διαφοράς.

Ἀναξιμένης δὲ καὶ Ἀναξαγόρας καὶ Δημόκριτος τὸ πλάτος αἴτιον εἶναι φασὶ τοῦ μένειν αὐτὴν. Οὐ γὰρ τέμνεται ἀλλ' ἐπιπωμαίνει τὸν ἀέρα τὸν κάτωθεν, ὅπερ φαίνεται τὰ πλάτος ἔχοντα τῶν σωμάτων ποιεῖν· ταῦτα γὰρ καὶ πρὸς τοὺς ἀνέμους ἔχει δυσκινήτως διὰ τὴν ἀντέρεισιν. Ταῦτό δὲ τοῦτο ποιεῖν τῷ πλάτει φασὶ τὴν γῆν πρὸς τὸν ὑποκείμενον ἀέρα, (τὸν δ' οὐκ ἔχοντα μεταστῆναι τόπον ἱκανὸν ἀθρόως [τῷ] κάτωθεν ἡρεμεῖν,) ὥσπερ τὸ ἐν ταῖς κλεψύδραις ὕδωρ. Ὅτι δὲ δύναται πολὺ βάρος φέρειν ἀπολαμβανόμενος καὶ μένων ὁ ἀήρ, τεκμήρια πολλὰ λέγουσιν. Πρῶτον μὲν οὖν εἰ μὴ πλατὺ τὸ σχῆμα τῆς γῆς ἔστι, διὰ τοῦτο μὲν οὐκ ἂν ἡρεμοί. Καίτοι τῆς μονῆς οὐ τὸ πλάτος αἴτιον ἐξ ὧν λέγουσιν, ἀλλὰ τὸ μέγεθος μᾶλλον· διὰ

γὰρ τὴν στενοχωρίαν οὐκ ἔχων τὴν πάροδον ὁ ἀὴρ μένει διὰ τὸ πλῆθος· πολὺς δ' ἐστὶ διὰ τὸ ὑπὸ μεγέθους πολλοῦ ἐναπολαμβάνεσθαι τοῦ τῆς γῆς. Ὡστε τοῦτο μὲν ὑπάρξει, κἂν σφαιροειδὴς μὲν ᾖ, τηλικαύτη δὲ τὸ μέγεθος· μενεῖ γὰρ κατὰ τὸν ἐκείνων λόγον.

Ὅλως δὲ πρὸς τοὺς οὕτω λέγοντας περὶ τῆς κινήσεως οὐ περὶ μορίων ἐστὶν ἡ ἀμφισβήτησις, ἀλλὰ περὶ ὅλου τινὸς καὶ παντός. Ἐξ ἀρχῆς γὰρ διοριστέον πότερόν ἐστὶ τις τοῖς σώμασι φύσει κίνησις ἢ οὐδεμία, καὶ πότερον φύσει μὲν οὐκ ἔστι, βία δ' ἔστιν. Ἐπεὶ δὲ (295a.) περὶ τούτων διώρισται πρότερον ὅσα κατὰ τὴν παροῦσαν δύναμιν εἴχομεν, χρηστέον ὥς ὑπάρχουσιν.

Εἰ γὰρ μηδεμία φύσει κίνησις ἐστὶν αὐτῶν, οὐδὲ βίαιος ἔσται· εἰ δὲ μή ἐστὶ μήτε φύσει μήτε βία, ὅλως οὐδὲν κινηθήσεται· περὶ γὰρ τούτων ὅτι ἀναγκαῖον συμβαίνειν, διώρισται πρότερον, καὶ πρὸς τούτοις ὅτι οὐδ' ἡρεμεῖν ἐνδέχεται· ὥσπερ γὰρ κίνησις ὑπάρχει ἢ βία ἢ φύσει, οὕτω καὶ ἡρεμία.

Ἀλλὰ μὴν εἰ γέ ἐστι κίνησις τις κατὰ φύσιν, οὐκ ἂν ἡ βίαιος εἴη φορὰ μόνον οὐδ' ἡρέμησις· ὥστ' εἰ βία νῦν ἡ γῇ μένει, καὶ συνῆλθεν ἐπὶ τὸ μέσον φερομένη διὰ τὴν δίνησιν· ταύτην γὰρ τὴν αἰτίαν πάντες λέγουσιν ἐκ τῶν ἐν τοῖς ὑγροῖς καὶ περὶ τὸν ἀέρα συμβαινόντων· ἐν τούτοις γὰρ ἀεὶ φέρεται τὰ μείζω καὶ βαρύτερα πρὸς τὸ μέσον τῆς δίνης. Διὸ δὴ τὴν γῆν πάντες ὅσοι τὸν οὐρανὸν γεννῶσιν, ἐπὶ τὸ μέσον συνελθεῖν φασίν· ὅτι δὲ μένει, ζητοῦσι τὴν αἰτίαν, καὶ λέγουσιν οἱ μὲν τοῦτον τὸν τρόπον, ὅτι τὸ πλάτος καὶ τὸ μέγεθος αὐτῆς αἴτιον, οἱ δ' ὥσπερ Ἐμπεδοκλῆς, τὴν τοῦ οὐρανοῦ φορὰν κύκλῳ περιθέουσαν καὶ θάπτον φερομένην ἢ τὴν τῆς γῆς φορὰν κωλύειν, καθάπερ τὸ ἐν τοῖς κυάθοις ὕδωρ· καὶ γὰρ τοῦτο κύκλῳ τοῦ κυάθου φερομένου πολλάκις κάτω τοῦ χαλκοῦ γινόμενον ὁμῶς οὐ φέρεται κάτω, πεφυκὸς φέρεσθαι, διὰ τὴν αὐτὴν αἰτίαν. Καίτοι μήτε τῆς δίνης κωλυούσης μήτε τοῦ πλάτους, ἀλλ' ὑπείκοντος τοῦ ἀέρος, ποῖ ποτ' οἰσθήσεται; Πρὸς μὲν γὰρ τὸ μέσον βία, καὶ μένει βία· κατὰ φύσιν δέ γε ἀναγκαῖον εἶναι τινὰ αὐτῆς φορὰν. Αὕτη οὖν πότερον ἄνω ἢ κάτω, ἢ ποῦ ἐστίν; Εἶναι μὲν γὰρ τινὰ ἀναγκαῖον· εἰ δὲ μηδὲν μᾶλλον κάτω ἢ ἄνω, ὁ δ' ἄνω ἀὴρ μὴ κωλύει τὴν ἄνω φορὰν, οὐδ' ἂν ὁ ὑπὸ τῇ γῇ κωλύοι τὴν κάτω· τὰ γὰρ αὐτὰ τῶν αὐτῶν ἀναγκαῖον εἶναι αἰτία τοῖς αὐτοῖς.

Ἔτι δὲ πρὸς Ἐμπεδοκλέα κἂν ἐκεῖνό τις εἴπειεν. Ὅτε γὰρ τὰ

στοιχεῖα διεισθῆκει χωρὶς ὑπὸ τοῦ νείκους, τίς αἰτία τῇ γῇ τῆς μονῆς ἦν; Οὐ γὰρ δὴ καὶ τότε αἰτιάσεται τὴν δίνην. Ἄτοπον δὲ καὶ τὸ μὴ συννοεῖν ὅτι πρότερον μὲν διὰ τὴν δίνην ἐφέρετο τὰ μόρια τῆς γῆς πρὸς τὸ μέσον· νῦν δὲ διὰ τίν' αἰτίαν πάντα τὰ βάρους ἔχοντα φέρεται πρὸς αὐτήν; Οὐ γὰρ ἢ γε δίνη πλησιά(295b.) ζεῖ πρὸς ἡμᾶς. Ἔτι δὲ καὶ τὸ πῦρ ἄνω φέρεται διὰ τίν' αἰτίαν; Οὐ γὰρ διὰ γε τὴν δίνην. Εἰ δὲ τοῦτο φέρεσθαι που πέφυκεν, δῆλον ὅτι καὶ τὴν γῆν οἰητέον. Ἀλλὰ μὴν οὐδὲ τῇ δίνῃ γε τὸ βαρὺ καὶ κοῦφον ὥριστα, ἀλλὰ τῶν πρότερον ὑπαρχόντων βαρέων καὶ κούφων τὰ μὲν εἰς τὸ μέσον ἔρχεται, τὰ δ' ἐπιτολάζει διὰ τὴν κίνησιν. Ἦν ἄρα καὶ πρὶν γενέσθαι τὴν δίνην τὸ μὲν βαρὺ τὸ δὲ κοῦφον, ἃ τίνι διώριστο καὶ πῶς ἐπεφύκει φέρεσθαι ἢ ποῦ; ἀπείρου γὰρ ὄντος ἀδύνατον εἶναι ἄνω ἢ κάτω, διώριστα δὲ τούτοις τὸ βαρὺ καὶ κοῦφον.

Οἱ μὲν οὖν πλεῖστοι περὶ τὰς αἰτίας ταύτας διατρίβουσιν· εἰσὶ δὲ τινες οἱ διὰ τὴν ὁμοιότητά φασιν αὐτὴν μένειν, ὥσπερ τῶν ἀρχαίων Ἀναξίμανδρος· μᾶλλον μὲν γὰρ οὐθὲν ἄνω ἢ κάτω ἢ εἰς τὰ πλάγια φέρεσθαι προσήκει τὸ ἐπὶ τοῦ μέσου ἰδρυμένον καὶ ὁμοίως πρὸς τὰ ἔσχατα ἔχον· ἅμα δ' ἀδύνατον εἰς τὸ ἐναντίον ποιεῖσθαι τὴν κίνησιν· ὥστ' ἐξ ἀνάγκης μένειν.

Τοῦτο δὲ λέγεται κομψῶς μὲν, οὐκ ἀληθῶς δέ· κατὰ γὰρ τοῦτον τὸν λόγον ἀναγκαῖον ἅπαν ὃ τι ἂν τεθῇ ἐπὶ τοῦ μέσου, μένειν, ὥστε καὶ τὸ πῦρ ἡρεμήσει· τὸ γὰρ εἰρημένον οὐκ ἰδίον ἐστὶ τῆς γῆς. Ἀλλὰ μὴν οὐκ ἀναγκαῖον. Οὐ γὰρ μόνον φαίνεται μένουσα ἐπὶ τοῦ μέσου, ἀλλὰ καὶ φερομένη πρὸς τὸ μέσον. Ὅπου γὰρ ὅτιοῦν φέρεται μόνιον αὐτῆς, ἀναγκαῖον ἐνταῦθα φέρεσθαι καὶ τὴν ὅλην· οὗ δὲ φέρεται κατὰ φύσιν, καὶ μένει ἐνταυθοῖ κατὰ φύσιν. Οὐκ ἄρα διὰ τὸ ὁμοίως ἔχειν πρὸς τὰ ἔσχατα· τοῦτο μὲν γὰρ πᾶσι κοινόν, τὸ δὲ φέρεσθαι πρὸς τὸ μέσον ἰδίον τῆς γῆς.

Ἄτοπον δὲ καὶ τοῦτο μὲν ζητεῖν, διὰ τί ποτε μένει ἡ γῇ ἐπὶ τοῦ μέσου, τὸ δὲ πῦρ μὴ ζητεῖν διὰ τί ἐπὶ τοῦ ἐσχάτου. Εἰ μὲν γὰρ κάκεῖν φύσει τόπος ὁ ἔσχατος, δῆλον ὅτι ἀναγκαῖον εἶναι τινα καὶ τῇ γῇ φύσει τόπον· εἰ δὲ μὴ ταύτῃ οὗτος ὁ τόπος, ἀλλὰ διὰ τὴν ἀνάγκην μένει τὴν τῆς ὁμοιότητος (ὥσπερ ὁ περὶ τῆς τριχὸς λόγος τῆς ἰσχυρῶς μὲν ὁμοίως δὲ πάντῃ τεινομένης, ὅτι οὐ διαρραγῆσεται, καὶ τοῦ πεινῶντος καὶ διψῶντος σφόδρα μὲν, ὁμοίως δέ, καὶ τῶν ἐδωδίμων καὶ ποτῶν ἴσον ἀπέχοντος· καὶ γὰρ τοῦτον ἡρεμεῖν ἀναγκαῖον), ζητητέον αὐτοῖς περὶ τῆς τοῦ πυρὸς μονῆς ἐπὶ τῶν

ἐσχάτων.

(296a.) Θαυμαστὸν δὲ καὶ τὸ περὶ μὲν τῆς μονῆς ζητεῖν, περὶ δὲ τῆς φορᾶς αὐτῶν μὴ ζητεῖν, διὰ τίν' αἰτίαν τὸ μὲν ἄνω φέρεται, τὸ δ' ἐπὶ τὸ μέσον, μηδενὸς ἐμποδίζοντος.

Ἀλλὰ μὴν οὐδ' ἀληθές ἐστι τὸ λεγόμενον. Κατὰ συμβεβηκὸς μέντοι τοῦτό γ' ἀληθές, ὥς ἀναγκαῖον μένειν ἐπὶ τοῦ μέσου πᾶν ὃ μὴ ἐν μᾶλλον δεῦρο ἢ δεῦρο κινεῖσθαι προσήκει. Ἀλλὰ διὰ γε τοῦτον τὸν λόγον οὐ μενεῖ, ἀλλὰ κινήθησεται, οὐ μέντοι ὅλον, ἀλλὰ διεσπασμένον. Ὁ γὰρ αὐτὸς ἀρμόσει λόγος καὶ ἐπὶ τοῦ πυρός· ἀνάγκη γὰρ τεθὲν μένειν ὁμοίως ὥσπερ τὴν γῆν· ὁμοίως γὰρ ἔξει πρὸς τῶν σημείων τῶν ἐσχάτων ὅτιοῦν· ἀλλ' ὅμως οἰσθήσεται ἀπὸ τοῦ μέσου, ὥσπερ καὶ φαίνεται φερόμενον, ἂν μὴ τι κωλύῃ, πρὸς τὸ ἔσχατον· πλὴν οὐχ ὅλον πρὸς ἓν σημεῖον (τοῦτο γὰρ ἀναγκαῖον μόνον συμβαίνειν ἐκ τοῦ λόγου τοῦ περὶ τῆς ὁμοιότητος) ἀλλὰ τὸ ἀνάλογον μόνον πρὸς τὸ ἀνάλογον τοῦ ἐσχατοῦ, λέγω δ' οἶον τὸ τέταρτον μέρος πρὸς τὸ τέταρτον μέρος τοῦ περιέχοντος· οὐθὲν γὰρ στιγμή τῶν σωμάτων ἐστίν. Ὡσπερ δὲ κἂν ἐκ μεγάλου συνέλθοι πυκνούμενον εἰς ἐλάττω τόπον, οὕτω κἂν ἐξ ἐλάττονος εἰς μείζω μανότερον γιγνόμενον· ὥστε κἂν ἡ γῆ τοῦτον τὸν τρόπον ἐκινεῖτο ἀπὸ τοῦ μέσου διὰ γε τὸν τῆς ὁμοιότητος λόγον, εἰ μὴ φύσει τῆς γῆς οὗτος ὁ τόπος ἦν. Ὅσα μὲν οὖν τυγχάνει περὶ τε τοῦ σχήματος αὐτῆς ὑπολαμβάνόμενα καὶ περὶ τόπου καὶ μονῆς καὶ κινήσεως, σχεδὸν ταῦτ' ἐστίν.

Κεφάλαιο 14

Ἡμεῖς δὲ λέγωμεν πρῶτον πότερον ἔχει κίνησιν ἢ μένει· καθάπερ γὰρ εἶπομεν, οἱ μὲν αὐτὴν ἐν τῶν ἄστρον εἶναι ποιοῦσιν, οἱ δ' ἐπὶ τοῦ μέσου θέντες ἔλθουσιν καὶ κινεῖσθαι φασὶ περὶ τὸν πόλον μέσον. Ὅτι δ' ἐστὶν ἀδύνατον, δηλὸν λαβοῦσιν ἀρχὴν ὥς εἴπερ φέρεται εἶτ' ἐκτὸς οὖσα τοῦ μέσου εἶτ' ἐπὶ τοῦ μέσου, ἀναγκαῖον αὐτὴν βίᾳ κινεῖσθαι ταύτην τὴν κίνησιν· οὐ γὰρ αὐτῆς γε τῆς γῆς ἐστίν· καὶ γὰρ ἂν τῶν μορίων ἕκαστον ταύτην εἶχε τὴν φοράν· νῦν δ' ἐπ' εὐθείας πάντα φέρεται πρὸς τὸ μέσον. Διόπερ οὐχ οἶόν τ' αἰδιδίον εἶναι, βίαιόν γ' οὖσαν καὶ παρὰ φύσιν· ἢ δέ γε τοῦ κόσμου τάξις αἰδίδιος.

Ἔτι πάντα τὰ φερόμενα τὴν φοράν τὴν ἐγκύκλιον ὑπολειπόμενα φαίνεται καὶ κινούμενα πλείους (296b.) μιᾶς φοράς ἔξω τῆς πρώτης, ὥστε καὶ τὴν γῆν ἀναγκαῖον, εἴτε περὶ τὸ μέσον εἶτ' ἐπὶ τοῦ μέσου κειμένη φέρεται, δύο κινεῖσθαι φοράς. Τούτου δὲ συμβαίνοντος ἀναγκαῖον γίνεσθαι πάροδον καὶ τροπὰς τῶν ἐνδεδεμένων ἄστρον. Τοῦτο δ' οὐ φαίνεται γιγνόμενον, ἀλλ' αἰεὶ ταυτὰ κατὰ τοὺς αὐτοὺς ἀνατέλλει καὶ δύεται τόπους αὐτῆς. Ἔτι δ' ἡ φορά τῶν μορίων καὶ ὅλης αὐτῆς ἢ κατὰ φύσιν ἐπὶ τὸ μέσον τοῦ παντός ἐστίν· διὰ τοῦτο γὰρ καὶ τυγχάνει κειμένη νῦν ἐπὶ τοῦ κέντρου· διαφορήσειε δ' ἂν τις, ἐπεὶ ταυτὸν ἀμφοτέρων ἐστὶ τὸ μέσον, πρὸς πότερον φέρεται τὰ βάρος ἔχοντα καὶ τὰ μόρια τῆς γῆς κατὰ φύσιν· πότερον ὅτι τοῦ παντός ἐστὶ μέσον, ἢ διότι τῆς γῆς. Ἀνάγκη δὴ πρὸς τὸ τοῦ παντός· καὶ γὰρ τὰ κοῦφα καὶ τὸ πῦρ εἰς τοῦναντίον φερόμενα τοῖς βάρεσι πρὸς τὸ ἔσχατον φέρεται τοῦ περιέχοντος τόπου τὸ μέσον. Συμβέβηκε δὲ ταυτὸ μέσον εἶναι τῆς γῆς καὶ τοῦ παντός· φέρεται γὰρ καὶ ἐπὶ τὸ τῆς γῆς μέσον, ἀλλὰ κατὰ συμβεβηκός, ἢ τὸ μέσον ἔχει ἐν τῷ τοῦ παντός μέσῳ. Ὅτι δὲ φέρεται καὶ πρὸς τὸ τῆς γῆς μέσον, σημεῖον ὅτι τὰ φερόμενα βάρη ἐπὶ ταύτην οὐ παρ' ἄλληλα φέρεται ἀλλὰ πρὸς ὁμοίας γωνίας, ὥστε πρὸς ἐν τὸ μέσον φέρεται, καὶ τὸ τῆς γῆς.

Φανερόν τοίνυν ὅτι ἀνάγκη ἐπὶ τοῦ μέσου εἶναι τὴν γῆν καὶ ἀκίνητον, διὰ τε τὰς εἰρημένας αἰτίας, καὶ διότι τὰ βίᾳ ῥιπτούμενα ἄνω βάρη κατὰ στάθμην πάλιν φέρεται εἰς ταυτό, κἂν εἰς ἄπειρον ἢ δύναμις ἐκριπτῇ. Ὅτι μὲν οὖν οὔτε κινεῖται οὔτ' ἐκτὸς κεῖται τοῦ μέσου, φανερόν ἐκ τούτων· πρὸς δὲ τούτοις δηλὸν ἐκ τῶν εἰρημένων

τὸ αἷτιον τῆς μονῆς. Εἰ γὰρ φύσει πέφυκε φέρεσθαι πάντοθεν πρὸς τὸ μέσον, ὥσπερ φαίνεται, καὶ τὸ πῦρ ἀπὸ τοῦ μέσου πάλιν πρὸς τὸ ἔσχατον, ἀδύνατον ἐνεχθῆναι ὅτιοῦν μόνιον αὐτῆς ἀπὸ τοῦ μέσου μὴ βιασθέν· μία γὰρ φορὰ τοῦ ἐνὸς καὶ ἀπλῆ τοῦ ἀπλοῦ, ἀλλ' οὐχ αἰ ἐναντία· ἡ δ' ἀπὸ τοῦ μέσου τῇ ἐπὶ τὸ μέσον ἐναντία. Εἰ τοίνυν ὅτιοῦν μόνιον ἀδύνατον ἐνεχθῆναι ἀπὸ τοῦ μέσου, φανερόν ὅτι καὶ τὴν ὅλην ἔτι ἀδυνατώτερον· εἰς ὃ γὰρ τὸ μόνιον πέφυκε φέρεσθαι, καὶ τὸ ὅλον ἐνταῦθα πέφυκεν· ὥστ' (297a.) εἴπερ ἀδύνατον κινήσθαι μὴ ὑπὸ κρείττονος ἰσχύος, ἀναγκαῖον ἂν εἴη μένειν αὐτὴν ἐπὶ τοῦ μέσου.

Μαρτυρεῖ δὲ τούτοις καὶ τὰ παρὰ τῶν μαθηματικῶν λεγόμενα περὶ τὴν ἀστρολογίαν· τὰ γὰρ φαινόμενα συμβαίνει μεταβαλλόντων τῶν σχημάτων οἷς ὥριστα τῶν ἄστρον ἡ τάξις, ὥς ἐπὶ τοῦ μέσου κειμένης τῆς γῆς.

Περὶ μὲν οὖν τοῦ τόπου καὶ μονῆς καὶ κινήσεως, ὃν τρόπον ἔχει, τοσαῦτα εἰρήσθω περὶ αὐτῆς.

Σχῆμα δ' ἔχει σφαιροειδὲς ἀναγκαῖον αὐτήν· ἕκαστον γὰρ τῶν μορίων βάρος ἔχει μέχρι πρὸς τὸ μέσον, καὶ τὸ ἔλαττον ὑπὸ τοῦ μείζονος ὠθούμενον οὐχ οἷόν τε κυμαίνειν, ἀλλὰ συμπιέζεσθαι μᾶλλον καὶ συγχωρεῖν ἕτερον ἐτέρῳ, ἕως ἂν ἔλθῃ ἐπὶ τὸ μέσον. Δεῖ δὲ νοῆσαι τὸ λεγόμενον ὥσπερ ἂν εἰ γιγνομένης τὸν τρόπον ὃν καὶ τῶν φυσιολόγων λέγουσί τινες γενέσθαι. Πλὴν ἐκεῖνοι μὲν βίαν αἰτιῶνται τῆς κάτω φορᾶς· βέλτιον δὲ τιθέναι τάλιθές, καὶ φάναι τοῦτο συμβαίνειν διὰ τὸ φύσιν ἔχειν φέρεσθαι τὸ βάρος ἔχον πρὸς τὸ μέσον. Ἐν δυνάμει οὖν ὄντος τοῦ μίγματος τὰ διακρινόμενα ἐφέρετο ὁμοίως πάντοθεν πρὸς τὸ μέσον. Εἴτ' οὖν ὁμοίως ἀπὸ τῶν ἐσχάτων διηρημένα τὰ μόρια συνήχθη πρὸς τὸ μέσον, εἴτ' ἄλλως ἔχοντα, ποιήσει ταυτόν. Ὅτι μὲν οὖν ὁμοίως γε πανταχόθεν ἀπὸ τῶν ἐσχάτων φερομένων πρὸς ἓν μέσον ἀναγκαῖον ὅμοιον γίνεσθαι πάντῃ τὸν ὄγκον, φανερόν· ἴσου γὰρ πάντῃ προστιθεμένου ἴσον ἀνάγκη ἀπέχειν τοῦ μέσου τὸ ἔσχατον· τοῦτο δὲ τὸ σχῆμα σφαίρας ἐστίν. Οὐδὲν δὲ διοίσει πρὸς τὸν λόγον, οὐδ' εἰ μὴ πανταχόθεν ὁμοίως συνέθει πρὸς τὸ μέσον τὰ μόρια αὐτῆς. Τὸ γὰρ πλεῖον αἰετὶ τὸ πρὸ αὐτοῦ ἔλαττον προωθεῖν ἀναγκαῖον μέχρι τοῦ μέσου τὴν ῥοπὴν ἔχόντων ἀμφοῖν, καὶ τοῦ βαρυτέρου προωθοῦντος μέχρι τούτου τὸ ἔλαττον βάρος.

Ὁ γὰρ ἂν τις ἀπορήσειε, τὴν αὐτὴν ἔχει τούτοις λύσιν· εἰ γὰρ οὔσης ἐπὶ τοῦ μέσου καὶ σφαιροειδοῦς τῆς γῆς πολλαπλάσιον βάρος

ἐπιγένοιτο πρὸς θάτερον ἡμισφαίριον, οὐκ ἔσται τὸ αὐτὸ μέσον τοῦ ὅλου καὶ τὸ τῆς γῆς· ὥστε ἢ οὐ μενεῖ ἐπὶ τοῦ μέσου, ἢ εἴπερ, ἡρεμήσει γε καὶ (297b.) μὴ τὸ μέσον ἔχουσα, ἢ πέφυκε κινεῖσθαι καὶ νῦν.

Τὸ μὲν οὖν ἀπορούμενον τοῦτ' ἔστιν· ἰδεῖν δ' οὐ χαλεπὸν μικρὸν ἐπιτείναντας, καὶ διελόντας πῶς ἀξιούμεν ὅποσονοῦν μέγεθος φέρεσθαι πρὸς τὸ μέσον, βάρος ἔχον. Δῆλον γὰρ ὡς οὐχὶ μέχρι τοῦ ἄσπασθαι τοῦ κέντρου τὸ ἔσχατον, ἀλλὰ δεῖ κρατεῖν τὸ πλέον ἕως ἂν λάβῃ τῷ αὐτοῦ μέσῳ τὸ μέσον· μέχρι τούτου γὰρ ἔχει τὴν ῥοπήν. Οὐδὲν τοίνυν τοῦτο διαφέρει λέγειν ἐπὶ βώλου καὶ μορίου τοῦ τυχόντος ἢ ἐπὶ ὅλης τῆς γῆς· οὐ γὰρ διὰ μικρότητα ἢ μέγεθος εἴρηται τὸ συμβαῖνον, ἀλλὰ κατὰ παντὸς τοῦ ῥοπήν ἔχοντος ἐπὶ τὸ μέσον.

Ὡστε εἴτε ὅλη ποθὲν ἐφέρετο εἴτε κατὰ μέρος, ἀναγκαῖον μέχρι τούτου φέρεσθαι ἕως ἂν πανταχόθεν ὁμοίως λάβῃ τὸ μέσον, ἀνισαζομένων τῶν ἐλαττόνων ὑπὸ τῶν μειζόνων τῇ προώσει τῆς ῥοπῆς.

Εἴτ' οὖν ἐγένετο, τοῦτον ἀναγκαῖον γενέσθαι τὸν τρόπον, ὥστε φανερόν ὅτι σφαιροειδὴς ἡ γένεσις αὐτῆς, εἴτ' ἀγέννητος ἀεὶ διατελεῖ μένουσα, τὸν αὐτὸν τρόπον ἔχειν ὄνπερ κἂν εἰ γιγνομένη τὸ πρῶτον ἐγένετο.

Κατὰ τοῦτόν τε δὴ τὸν λόγον ἀναγκαῖον εἶναι τὸ σχῆμα σφαιροειδὲς αὐτῆς, καὶ ὅτι πάντα φέρεται τὰ βαρέα πρὸς ὁμοίας γωνίας, ἀλλ' οὐ παρ' ἄλληλα· τοῦτο δὲ πέφυκε πρὸς τὸ φύσει σφαιροειδές. Ἡ οὖν ἐστὶ σφαιροειδής, ἡ φύσει γε σφαιροειδής. Δεῖ δ' ἕκαστον λέγειν τοιοῦτον εἶναι ὃ φύσει βούλεται εἶναι καὶ ὑπάρχειν, ἀλλὰ μὴ ὃ βία καὶ παρὰ φύσιν.

Ἔτι δὲ καὶ διὰ τῶν φαινομένων κατὰ τὴν αἴσθησιν· οὔτε γὰρ ἂν αἱ τῆς σελήνης ἐκλείψεις τοιαύτας ἂν εἶχον τὰς ἀποτομάς· νῦν γὰρ ἐν μὲν τοῖς κατὰ μῆνα σχηματισμοῖς πάσας λαμβάνει τὰς διαιρέσεις (καὶ γὰρ εὐθεῖα γίνεται καὶ ἀμφίκυρτος καὶ κοίλη), περὶ δὲ τὰς ἐκλείψεις ἀεὶ κυρτὴν ἔχει τὴν ὀρίζουσαν γραμμὴν, ὥστ' ἐπεὶ περ ἐκλείπει διὰ τὴν τῆς γῆς ἐπιπρόσθησιν, ἡ τῆς γῆς ἂν εἴη περιφέρεια τοῦ σχήματος αἰτία σφαιροειδὴς οὕσα. Ἔτι δὲ διὰ τῆς τῶν ἄστρον φαντασίας οὐ μόνον φανερόν ὅτι περιφερής, ἀλλὰ καὶ τὸ μέγεθος οὐκ οὕσα μεγάλη· μικρᾶς γὰρ γιγνομένης μεταστάσεως ἡμῖν πρὸς μεσημβρίαν καὶ ἄρκτον ἐπιδόλως ἕτερος γίγνεται ὁ ὀρίζων κύκλος, ὥστε τὰ (298a.) ὑπὲρ κεφαλῆς ἄστρα μεγάλην ἔχειν τὴν μεταβολήν,

καὶ μὴ ταῦτὰ φαίνεσθαι πρὸς ἄρκτον τε καὶ μεσημβρίαν μεταβαίνουσιν· ἔνιοι γὰρ ἐν Αἰγύπτῳ μὲν ἀστέρες ὀρῶνται καὶ περὶ Κύπρον, ἐν τοῖς πρὸς ἄρκτον δὲ χωρίοις οὐχ ὀρῶνται, καὶ τὰ διὰ παντὸς ἐν τοῖς πρὸς ἄρκτον φαινόμενα τῶν ἄστρον ἐν ἐκείνοις τοῖς τόποις ποιεῖται δύσιν. Ὡστ' οὐ μόνον ἐκ τούτων δηλὸν περιφερὲς ὂν τὸ σχῆμα τῆς γῆς, ἀλλὰ καὶ σφαίρας οὐ μεγάλης· οὐ γὰρ ἂν οὕτω ταχὺ ἐπίδηλον ἐποίει μεθισταμένοις οὕτω βραχύ.

Διὸ τοὺς ὑπολαμβάνοντας συνάπτειν τὸν περὶ τὰς Ἡρακλείας στήλας τόπον τῷ περὶ τὴν Ἰνδικήν, καὶ τοῦτον τὸν τρόπον εἶναι τὴν θάλατταν μίαν, μὴ λίαν ὑπολαμβάνειν ἄπιστα δοκεῖν· λέγουσι δὲ τεκμαιρόμενοι καὶ τοῖς ἐλέφασιν, ὅτι περὶ ἀμφοτέρους τοὺς τόπους τοὺς ἐσχάτους ὄντας τὸ γένος αὐτῶν ἐστίν, ὡς τῶν ἐσχάτων διὰ τὸ συνάπτειν ἀλλήλοις τοῦτο πεπονθότων.

Καὶ τῶν μαθηματικῶν δὲ ὅσοι τὸ μέγεθος ἀναλογίζεσθαι πειρῶνται τῆς περιφερείας, εἰς τετταράκοντα λέγουσιν εἶναι μυριάδας.

Ἐξ ὧν τεκμαιρομένοις οὐ μόνον σφαιροειδῆ τὸν ὄγκον ἀναγκαῖον εἶναι τῆς γῆς, ἀλλὰ καὶ μὴ μέγαν πρὸς τὸ τῶν ἄλλων ἄστρον μέγεθος.

Βιβλίο 3

Κεφάλαιο 1

Περὶ μὲν οὖν τοῦ πρώτου οὐρανοῦ καὶ τῶν μερῶν, ἔτι δὲ περὶ τῶν ἐν αὐτῷ φερομένων ἄστρων, ἐκ τίνων τε συνεστᾶσι καὶ ποι' ἅττα τὴν φύσιν ἐστί, πρὸς δὲ τούτοις ὅτι ἀγέννητα καὶ ἄφθαρτα, διεληλύθαμεν πρότερον. Ἐπεὶ δὲ τῶν φύσει λεγομένων τὰ μὲν ἐστὶν οὐσίαι, τὰ δ' ἔργα καὶ πάθη τούτων (λέγω δ' οὐσίας μὲν τὰ τε ἀπλᾶ σώματα, οἷον πῦρ καὶ γῆν καὶ τὰ σύστοιχα τούτοις, καὶ ὅσα ἐκ τούτων, οἷον τόν τε σύνολον οὐρανὸν καὶ τὰ μόρια αὐτοῦ, καὶ πάλιν τὰ τε ζῶα καὶ τὰ φυτὰ καὶ τὰ μόρια τούτων, πάθη δὲ καὶ ἔργα τὰς τε κινήσεις τὰς τούτων ἐκάστου καὶ τῶν ἄλλων, ὅσων ἐστὶν αἷτια ταῦτα κατὰ τὴν δύναμιν τὴν ἑαυτῶν, ἔτι δὲ τὰς ἀλ(298b.) λιοώσεις καὶ τὰς εἰς ἄλληλα μεταβάσεις), φανερόν ὅτι τὴν πλείστην συμβαίνει τῆς περὶ φύσεως ἱστορίας περὶ σωμάτων εἶναι· πᾶσαι γὰρ αἱ φυσικαὶ οὐσίαι ἢ σώματα ἢ μετὰ σωμάτων γίνονται καὶ μεγεθῶν. Τοῦτο δὲ δῆλον ἔκ τε τοῦ διωρίσθαι τὰ ποῖά ἐστι φύσει, καὶ ἐκ τῆς καθ' ἕκαστα θεωρίας.

Περὶ μὲν οὖν τοῦ πρώτου τῶν στοιχείων εἴρηται, καὶ ποιόν τι τὴν φύσιν, καὶ ὅτι ἄφθαρτον καὶ ἀγέννητον· λοιπὸν δὲ περὶ τοῖν δυοῖν εἰπεῖν. Ἄμα δὲ συμβήσεται περὶ τούτων λέγουσι καὶ περὶ γενέσεως καὶ φθορᾶς διασκέψασθαι· γένεσις γὰρ ἤτοι τὸ παράπαν οὐκ ἔστιν, ἢ μόνον ἐν τούτοις τοῖς στοιχείοις καὶ τοῖς ἐκ τούτων ἐστίν. Αὐτὸ δὲ τοῦτο πρῶτον ἴσως θεωρητέον, πότερον ἔστιν ἢ οὐκ ἔστιν.

Οἱ μὲν οὖν πρότερον φιλοσοφήσαντες περὶ τῆς ἀληθείας καὶ πρὸς οὓς νῦν λέγομεν ἡμεῖς λόγους καὶ πρὸς ἀλλήλους διηνέχθησαν.

Οἱ μὲν γὰρ αὐτῶν ὅλως ἀνεῖλον γένεσιν καὶ φθοράν· οὐθὲν γὰρ οὔτε γίνεσθαι φασιν οὔτε φθεῖρεσθαι τῶν ὄντων, ἀλλὰ μόνον δοκεῖν ἡμῖν, οἷον οἱ περὶ Μέλισσόν τε καὶ Παρμενίδην, οὓς, εἰ καὶ τᾶλλα λέγουσι καλῶς, ἀλλ' οὐ φυσικῶς γε δεῖ νομίσαι λέγειν· τὸ γὰρ εἶναι ἅττα τῶν ὄντων ἀγέννητα καὶ ὅλως ἀκίνητα μᾶλλον ἐστὶν ἐτέρας καὶ προτέρας ἢ τῆς φυσικῆς σκέψεως.

Ἐκεῖνοι δὲ διὰ τὸ μηθὲν μὲν ἄλλο παρὰ τὴν τῶν αἰσθητῶν οὐσίαν ὑπολαμβάνειν εἶναι, τοιαύτας δὲ τινὰς νοῆσαι πρῶτοι φύσεις, εἶπερ ἔσται τις γνῶσις ἢ φρόνησις, οὕτω μετήνεγκαν ἐπὶ ταῦτα τοὺς ἐκεῖθεν λόγους. Ἔτεροι δὲ τινες ὥσπερ ἐπίτηδες τὴν ἐναντίαν τούτοις ἔσχον δόξαν. Εἰσὶ γὰρ τινες οἱ φασιν οὐθὲν ἀγέννητον εἶναι

τῶν πραγμάτων, ἀλλὰ πάντα γίνεσθαι, γενόμενα δὲ τὰ μὲν ἄφθαρτα διαμένειν, τὰ δὲ πάλιν φθείρεσθαι, μάλιστα μὲν οἱ περὶ Ἡσίοδον, εἴτα καὶ τῶν ἄλλων οἱ πρῶτοι φυσιολογήσαντες.

Οἱ δὲ τὰ μὲν ἄλλα πάντα γίνεσθαι φασὶ καὶ ρεῖν, εἶναι δὲ παγίως οὐθέν, ἐν δὲ τι μόνον ὑπομένειν, ἐξ οὗ ταῦτα πάντα μετασχηματίζεσθαι πέφυκεν· ὅπερ εὐόικασι βούλεσθαι λέγειν ἄλλοι τε πολλοὶ καὶ Ἡράκλειτος ὁ Ἐφέσιος. Εἰσὶ δὲ τινες καὶ οἱ πᾶν σῶμα γενητὸν ποιοῦσι, συντιθέντες καὶ διαλύοντες εἰς (299a.) ἐπίπεδα καὶ ἐξ ἐπιπέδων.

Περὶ μὲν οὖν τῶν ἄλλων ἕτερος ἔστω λόγος· τοῖς δὲ τοῦτον τὸν τρόπον λέγουσι καὶ πάντα τὰ σώματα συνιστᾶσιν ἐξ ἐπιπέδων ὅσα μὲν ἄλλα συμβαίνει λέγειν ὑπεναντία τοῖς μαθήμασιν, ἐπιπολῆς ἰδεῖν· καίτοι δίκαιον ἢ μὴ κινεῖν ἢ πιστοτέροις αὐτὰ λόγοις κινεῖν τῶν ὑποθέσεων. Ἐπεὶ δὴ δῆλον ὅτι τοῦ αὐτοῦ λόγου ἐστὶ στερεὰ μὲν ἐξ ἐπιπέδων συγκεῖσθαι, ἐπίπεδα δ' ἐκ γραμμῶν, ταύτας δ' ἐκ στιγμῶν· οὕτω δ' ἐχόντων οὐκ ἀνάγκη τὸ τῆς γραμμῆς μέρος γραμμὴν εἶναι· περὶ δὲ τούτων ἐπέσκεπται πρότερον ἐν τοῖς περὶ κινήσεως λόγοις, ὅτι οὐκ ἔστιν ἀδιαίρετα μήκη.

Ὅσα δὲ περὶ τῶν φυσικῶν σωμάτων ἀδύνατα συμβαίνει λέγειν τοῖς ποιοῦσι τὰς ἀτόμους γραμμάς, ἐπὶ μικρὸν θεωρήσωμεν καὶ νῦν· τὰ μὲν γὰρ ἐπ' ἐκείνων ἀδύνατα συμβαίνοντα καὶ τοῖς φυσικοῖς ἀκολουθήσει, τὰ δὲ τούτοις ἐπ' ἐκείνων οὐχ ἅπαντα διὰ τὸ τὰ μὲν ἐξ ἀφαιρέσεως λέγεσθαι, τὰ μαθηματικά, τὰ δὲ φυσικὰ ἐκ προσθέσεως. Πολλὰ δ' ἐστὶν ἃ τοῖς ἀδιαίρετοις οὐχ οἷόν τε ὑπάρχειν, τοῖς δὲ φυσικοῖς ἀναγκαῖον. [Οἷον εἴ τί ἐστιν ἀδιαίρετον·] ἐν ἀδιαίρετῳ γὰρ διαιρετὸν ἀδύνατον ὑπάρχειν, τὰ δὲ πάθη διαιρετὰ πάντα διχῶς· ἢ γὰρ κατ' εἶδος ἢ κατὰ συμβεβηκός, κατ' εἶδος μὲν οἷον χρώματος τὸ λευκὸν ἢ τὸ μέλαν, κατὰ συμβεβηκός δέ, ἂν ᾧ ὑπάρχει ἢ διαιρετόν, ὥστε ὅσα ἁπλᾶ τῶν παθημάτων, πάντ' ἐστὶ διαιρετὰ τοῦτον τὸν τρόπον. Διὸ τὸ ἀδύνατον ἐν τοῖς τοιούτοις ἐπισκεπτέον.

Εἰ δὴ τῶν ἀδυνάτων ἐστὶν ἑκατέρου μέρους μηδὲν ἔχοντος βάρος τὰ ἄμφω ἔχειν βάρος, τὰ δ' αἰσθητὰ σώματα ἢ πάντα ἢ ἓνια βάρος ἔχει, οἷον ἡ γῆ καὶ τὸ ὕδωρ, ὥς καὶ αὐτοὶ φαῖεν, εἰ ἡ στιγμή μηδὲν ἔχει βάρος, δῆλον ὅτι οὐδ' αἱ γραμμαί, εἰ δὲ μὴ αὗται, οὐδὲ τὰ ἐπίπεδα· ὥστ' οὐδὲ τῶν σωμάτων οὐθέν.

Ἀλλὰ μὴν ὅτι τὴν στιγμήν οὐχ οἷόν τε βάρος ἔχειν, φανερόν. Τὸ μὲν γὰρ βαρὺ ἅπαν καὶ βαρύτερον καὶ τὸ κοῦφον καὶ κουφότερον

ἐνδέχε(299b.) ταί τινος εἶναι. Τὸ δὲ βαρύτερον ἢ κουφότερον ἴσως οὐκ ἀνάγκη βαρὺ ἢ κοῦφον εἶναι, ὥσπερ καὶ τὸ μὲν μέγα μείζον, τὸ δὲ μείζον οὐ πᾶν μέγα· πολλὰ γὰρ ἐστὶν ἃ μικρὰ ὄντα ἀπλῶς ὅμως μείζω ἐτέρων ἐστίν. Εἰ δὴ ὁ ἂν βαρὺ ὢν βαρύτερον ἢ, ἀνάγκη βάρει μείζον εἶναι, τὸ βαρὺ ἅπαν διαιρετὸν ἂν εἴη. Ἡ δὲ στιγμή ἀδιαίρετον ὑπόκειται.

Ἔτι εἰ τὸ μὲν βαρὺ πυκνόν τι, τὸ δὲ κοῦφον μανόν, ἔστι δὲ πυκνὸν μανοῦ διαφέρον τῷ ἐν ἴσῳ ὄγκῳ πλεῖον ἐνυπάρχειν· εἰ οὖν ἐστὶ στιγμή βαρεῖα καὶ κούφη, ἔστι καὶ πυκνὴ καὶ μανή. Ἀλλὰ τὸ μὲν πυκνὸν διαιρετὸν, ἡ δὲ στιγμή ἀδιαίρετος.

Εἰ δὲ πᾶν τὸ βαρὺ ἢ μαλακὸν ἢ σκληρὸν ἀνάγκη εἶναι, ῥάδιον ἐκ τούτων ἀδύνατόν τι συναγαγεῖν. Μαλακὸν μὲν γὰρ τὸ εἰς ἑαυτὸ ὑπεῖκον, σκληρὸν δὲ τὸ μὴ ὑπεῖκον· τὸ δὲ ὑπεῖκον διαιρετόν.

Ἀλλὰ μὴν οὐδ' ἐκ μὴ ἐχόντων βάρος ἔσται βάρος. Καὶ γὰρ ἐπὶ πόσων συμβήσεται τοῦτο καὶ ἐπὶ ποίων; Ἡ πῶς διορισίῃ μὴ βουλόμενοι πλάττειν; καὶ εἰ πᾶν μείζον βάρος βάρους βάρει, συμβήσεται καὶ ἕκαστον τῶν ἀβαρῶν βάρος ἔχειν· εἰ γὰρ αἱ τέτταρες στιγμαὶ βάρος ἔχουσι, τὸ δ' ἐκ πλείονων ἢ τοδὶ βαρέος ὄντος βαρύτερον, τὸ δὲ βαρέος βαρύτερον ἀνάγκη βάρει εἶναι, ὥσπερ καὶ τὸ λευκοῦ λευκότερον λευκῷ, ἔσται τὸ μείζον μιᾷ στιγμή βαρύτερον, ὥστε, ἀφαιρεθέντος τοῦ ἴσου, [ὥστε] καὶ ἡ μία στιγμή βάρος ἔξει.

Ἔτι εἰ μὲν τὰ ἐπίπεδα μόνον κατὰ γραμμὴν ἐνδέχεται συντίθεσθαι, ἄτοπον· ὥσπερ γὰρ γραμμὴ πρὸς γραμμὴν ἀμφοτέρως συντίθεται, καὶ κατὰ μῆκος καὶ κατὰ πλάτος, δεῖ καὶ ἐπίπεδον ἐπιπέδῳ τὸν αὐτὸν τρόπον. Γραμμὴ δὲ δύναται γραμμῇ συντίθεσθαι κατὰ γραμμὴν ἐπιτιθεμένη ἄλλ' οὐ προστιθεμένη. Ἀλλὰ μὴν εἴ γε καὶ κατὰ πλάτος ἐνδέχεται συντίθεσθαι, ἔσται τι σῶμα ὃ οὔτε στοιχεῖον οὔτε ἐκ στοιχείων, συντιθέμενον ἐκ τῶν οὕτω συντιθεμένων ἐπιπέδων.

Ἔτι εἰ μὲν πλήθει βαρύτερα τὰ σώματα τῶν ἐπιπέδων, ὥσπερ ἐν τῷ (300a.) Τιμαίῳ διώριστα, δηλὸν ὡς ἔξει καὶ ἡ γραμμὴ καὶ ἡ στιγμή βάρος· ἀνάλογον γὰρ πρὸς ἄλληλα ἔχουσιν, ὥσπερ καὶ πρότερον εἰρήκαμεν. Εἰ δὲ μὴ τοῦτον διαφέρει τὸν τρόπον ἀλλὰ τῷ τὴν μὲν γῆν εἶναι βαρὺ τὸ δὲ πῦρ κοῦφον, ἔσται καὶ τῶν ἐπιπέδων τὸ μὲν κοῦφον τὸ δὲ βαρὺ. Καὶ τῶν γραμμῶν δὴ καὶ τῶν στιγμῶν ὡσαύτως· τὸ γὰρ τῆς γῆς ἐπίπεδον ἔσται βαρύτερον ἢ τὸ τοῦ πυρός. Ὅλως δὲ συμβαίνει ἢ μηδὲν ποτ' εἶναι μέγεθος, ἢ δύνασθαι γε

ἀναιρεθῆναι, εἴπερ ὁμοίως ἔχει στιγμή μὲν πρὸς γραμμὴν, γραμμὴ δὲ πρὸς ἐπίπεδον, τοῦτο δὲ πρὸς σῶμα· πάντα γὰρ εἰς ἄλληλα ἀναλυόμενα εἰς τὰ πρῶτα ἀναλυθήσεται· ὥστ' ἐνδέχουτ' ἂν στιγμὰς μόνον εἶναι, σῶμα δὲ μηθέν.

Πρὸς δὲ τούτοις καὶ εἰ ὁ χρόνος ὁμοίως ἔχει, ἀναιροῖτ' ἂν ποτε ἢ ἐνδέχουτ' ἂν ἀναιρεθῆναι· τὸ γὰρ νῦν τὸ ἄτομον οἶον στιγμή γραμμῆς ἐστίν.

Τὸ δ' αὐτὸ συμβαίνει καὶ τοῖς ἐξ ἀριθμῶν συντιθεῖσι τὸν οὐρανόν· ἔνιοι γὰρ τὴν φύσιν ἐξ ἀριθμῶν συνιστᾶσιν, ὥσπερ τῶν Πυθαγορείων τινές· τὰ μὲν γὰρ φυσικὰ σώματα φαίνεται βάρος ἔχοντα καὶ κουφότητα, τὰς δὲ μονάδας οὔτε σώματα ποιεῖν οἶόν τε συντιθεμένας οὔτε βάρος ἔχειν.

Κεφάλαιο 2

Ὅτι δ' ἀναγκαῖον ὑπάρχειν κίνησιν τοῖς ἀπλοῖς σώμασι φύσει τινὰ πᾶσιν, ἐκ τῶνδε δῆλον. Ἐπεὶ γὰρ κινούμενα φαίνεται, κινεῖσθαι γε ἀναγκαῖον βία, εἰ μὴ οἰκείαν ἔχει κίνησιν· τὸ δὲ βία καὶ παρὰ φύσιν ταυτόν. Ἀλλὰ μὴν εἰ παρὰ φύσιν ἐστὶ τις κίνησις, ἀνάγκη εἶναι καὶ κατὰ φύσιν, παρ' ἣν αὕτη· καὶ εἰ πολλαὶ αἱ παρὰ φύσιν, τὴν κατὰ φύσιν μίαν· κατὰ φύσιν μὲν γὰρ ἀπλῶς, παρὰ φύσιν δ' ἔχει πολλὰς ἕκαστον.

Ἔτι δὲ καὶ ἐκ τῆς ἡρεμίας δῆλον· καὶ γὰρ ἡρεμεῖν ἀναγκαῖον ἢ βία ἢ κατὰ φύσιν· βία δὲ μένει οὐ καὶ φέρεται βία, καὶ κατὰ φύσιν οὐ κατὰ φύσιν.

Ἐπεὶ οὖν φαίνεται τι μένον ἐπὶ τοῦ μέσου, εἰ μὲν κατὰ φύσιν, δῆλον ὅτι καὶ ἡ φορὰ ἢ ἐνταῦθα κατὰ φύσιν αὐτῷ· εἰ δὲ βία, τί τὸ φέρεσθαι κωλύον; Εἰ μὲν ἡρεμοῦν, τὸν αὐτὸν κυκλήσομεν λόγον· ἀνάγκη γὰρ ἢ κατὰ φύσιν εἶναι τὸ (300b.) πρῶτον ἡρεμοῦν ἢ εἰς ἄπειρον ἰέναι, ὅπερ ἀδύνατον· εἰ δὲ κινούμενον τὸ κωλῶν φέρεσθαι, καθάπερ φησὶν Ἑμπεδοκλῆς τὴν γῆν ὑπὸ τῆς δίνης ἡρεμεῖν, ποῦ ἂν ἐφέρετο, ἐπειδὴ εἰς ἄπειρον ἀδύνατον; Οὐθὲν γὰρ γίνεταί ἀδύνατον, τὸ δ' ἄπειρον διελθεῖν ἀδύνατον. Ὡστ' ἀνάγκη στήναί που τὸ φερόμενον, κακεῖ μὴ βία μένειν ἀλλὰ κατὰ φύσιν. Εἰ δ' ἐστὶν ἡρεμία κατὰ φύσιν, ἔστι καὶ κίνησις κατὰ φύσιν, ἢ εἰς τοῦτον τὸν τόπον φορὰ. Διὸ καὶ Λευκίππῳ καὶ Δημοκρίτῳ, τοῖς λέγουσιν ἀεὶ κινεῖσθαι τὰ πρῶτα σώματα ἐν τῷ κενῷ καὶ τῷ ἀπείρῳ, λεκτέον τίνα κίνησιν καὶ τίς ἢ κατὰ φύσιν αὐτῶν κίνησις. Εἰ γὰρ ἄλλο ὑπ' ἄλλου κινεῖται βία τῶν στοιχείων, ἀλλὰ καὶ κατὰ φύσιν ἀνάγκη τινὰ εἶναι κίνησιν ἐκάστου, παρ' ἣν ἡ βίαιός ἐστιν· καὶ δεῖ τὴν πρώτην κινουσαν μὴ βία κινεῖν, ἀλλὰ κατὰ φύσιν· εἰς ἄπειρον γὰρ εἴσιν, εἰ μὴ τι ἔσται κατὰ φύσιν κινουὶν πρῶτον, ἀλλ' ἀεὶ τὸ πρότερον βία κινούμενον κινήσει.

Τὸ αὐτὸ δὲ τοῦτο συμβαίνειν ἀναγκαῖον κἂν εἰ καθάπερ ἐν τῷ Τιμαίῳ γέγραπται, πρὶν γενέσθαι τὸν κόσμον ἐκινεῖτο τὰ στοιχεῖα ἀτάκτως. Ἀνάγκη γὰρ ἢ βίαιον εἶναι τὴν κίνησιν ἢ κατὰ φύσιν. Εἰ δὲ κατὰ φύσιν ἐκινεῖτο, ἀνάγκη κόσμον εἶναι, ἐὰν τις βούληται θεωρεῖν ἐπιστήσας· τό τε γὰρ πρῶτον κινουὶν ἀνάγκη κινεῖν ἑαυτὸ κινούμενον κατὰ φύσιν, καὶ τὰ κινούμενα μὴ βία, ἐν τοῖς οἰκείοις ἡρεμοῦντα τόποις, ποιεῖν ἥνπερ ἔχουσι νῦν τάξιν, τὰ μὲν βάρος ἔχοντα ἐπὶ τὸ

μέσον, τὰ δὲ κουφότητα ἔχοντα ἀπὸ τοῦ μέσου· ταύτην δ' ὁ κόσμος ἔχει τὴν διάταξιν.

Ἔτι δὲ τοσοῦτον ἐπανεύροιτ' ἂν τις, πότερον οὐχ οἷόν τ' ἦν κινούμενα ἀτάκτως καὶ μίγνυσθαι τοιαύτας μίξεις ἓνια, ἐξ ὧν συνίσταται τὰ κατὰ φύσιν συνιστάμενα σώματα, λέγω δ' οἷον ὅσα καὶ σάρκας, καθάπερ Ἐμπεδοκλῆς φησὶ γίνεσθαι ἐπὶ τῆς φιλότητος· λέγει γὰρ ὡς πολλὰ μὲν κόρσαι ἀναύχενες ἐβλάστησαν.

Τοῖς δ' ἄπειρα ἐν ἀπείρῳ τὰ κινούμενα ποιοῦσιν, εἰ μὲν ἐν τὸ κινοῦν, ἀνάγκη μίαν φέρεσθαι φοράν, ὥστ' οὐκ ἀτάκτως κινήθησεται, εἰ δ' ἄπειρα τὰ (301a.) κινοῦντα, καὶ τὰς φορὰς ἀναγκαῖον ἀπείρους εἶναι· εἰ γὰρ πεπερασμένοι, τάξεις τις ἔσται· οὐ γὰρ τῷ μὴ φέρεσθαι εἰς τὸ αὐτὸ ἢ ἀταξία συμβαίνει· οὐδὲ γὰρ νῦν εἰς τὸ αὐτὸ φέρεται πάντα, ἀλλὰ τὰ συγγενῇ μόνον.

Ἔτι τὸ ἀτάκτως οὐθέν ἐστιν ἕτερον ἢ τὸ παρὰ φύσιν· ἡ γὰρ τάξις ἢ οἰκεία τῶν αἰσθητῶν φύσις ἐστίν. Ἀλλὰ μὴν καὶ τοῦτο ἄτοπον καὶ ἀδύνατον, τὸ ἄπειρον ἄτακτον ἔχειν κίνησιν· ἔστι γὰρ φύσις ἐκείνη τῶν πραγμάτων οἷαν ἔχει τὰ πλείω καὶ τὸν πλείω χρόνον· συμβαίνει οὖν αὐτοῖς τούναντίον τὴν μὲν ἀταξίαν εἶναι κατὰ φύσιν, τὴν δὲ τάξιν καὶ τὸν κόσμον παρὰ φύσιν· καίτοι οὐδὲν ὡς ἔτυχε γίγνεται τῶν κατὰ φύσιν. Ἔοικε δὲ τοῦτό γε αὐτὸ καλῶς Ἀναξαγόρας λαβεῖν· ἐξ ἀκινήτων γὰρ ἄρχεται κοσμοποιεῖν. Πειρῶνται δὲ καὶ οἱ ἄλλοι συγκρίνοντές πως πάλιν κινεῖν καὶ διακρίνειν. Ἐκ διεστώτων δὲ καὶ κινουμένων οὐκ εὐλογον ποιεῖν τὴν γένεσιν. Διὸ καὶ Ἐμπεδοκλῆς παραλείπει τὴν ἐπὶ τῆς φιλότητος· οὐ γὰρ ἂν ἡδύνατο συστήσαι τὸν οὐρανὸν ἐκ κεχωρισμένων μὲν κατασκευάζων, σύγκρισιν δὲ ποιῶν διὰ τὴν φιλότητα· ἐκ διακεκριμένων γὰρ συνέστηκεν ὁ κόσμος τῶν στοιχείων· ὥστ' ἀναγκαῖον γίνεσθαι ἐξ ἐνὸς καὶ συγκεκριμένου.

Ὅτι μὲν οὖν ἐστὶ φυσικὴ τις κίνησις ἐκάστου τῶν σωμάτων, ἣν οὐ βία κινοῦνται οὐδὲ παρὰ φύσιν, φανερόν ἐκ τούτων.

Ὅτι δ' ἔχειν ἓνια ἀναγκαῖον ῥοπὴν βάρους καὶ κουφότητος, ἐκ τῶνδε δῆλον. Κινεῖσθαι μὲν γὰρ φαμεν ἀναγκαῖον εἶναι· εἰ δὲ μὴ ἔξει φύσει ῥοπὴν τὸ κινούμενον, ἀδύνατον κινεῖσθαι ἢ πρὸς τὸ μέσον ἢ ἀπὸ τοῦ μέσου. Ἔστω γὰρ τὸ μὲν ἐφ' οὗ Α ἀβαρές, τὸ δ' ἐφ' οὗ Β βάρος ἔχον, ἐννέχθω δὲ τὸ ἀβαρές τὴν ΓΔ, τὸ δὲ Β ἐν τῷ ἴσῳ χρόνῳ τὴν ΓΕ· μείζω γὰρ οἰσθήσεται τὸ βάρος ἔχον. Ἐὰν δὴ διαιρεθῇ τὸ σῶμα τὸ ἔχον βάρος ὡς ἡ ΓΕ πρὸς τὴν ΓΔ (δυνατὸν γὰρ οὕτως ἔχειν πρὸς τι τῶν ἐν αὐτῷ μορίων), εἰ τὸ ὅλον φέρεται τὴν ὅλην τὴν ΓΕ, τὸ

μόριον ἀνάγκη ἐν τῷ αὐτῷ χρόνῳ τὴν ΓΔ φέρεσθαι, ὥστε ἴσον οἰσθήσεται τὸ ἀβαρὲς καὶ τὸ βάρος ἔχον· ὅπερ ἀδύνα(301b.) τον. Ὁ δ' αὐτὸς λόγος καὶ ἐπὶ κουφότητος.

Ἔτι δ' εἰ ἔσται τι σῶμα κινούμενον μήτε κουφότητα μήτε βάρος ἔχον, ἀνάγκη τοῦτο βία κινεῖσθαι, βία δὲ κινούμενον ἄπειρον ποιεῖ τὴν κίνησιν. Ἐπεὶ γὰρ δύναμις τις ἢ κινουῖσα, τὸ δ' ἔλαττον καὶ τὸ κουφότερον ὑπὸ τῆς αὐτῆς δυνάμεως πλεῖον κινηθήσεται, κεκινήσθω τὸ μὲν ἐφ' ᾧ τὸ Α, τὸ ἀβαρὲς, τὴν ΓΕ, τὸ δ' ἐφ' ᾧ τὸ Β, τὸ βάρος ἔχον, ἐν τῷ ἴσῳ χρόνῳ τὴν ΓΔ.

Διαιρεθέντος δὴ τοῦ βάρους ἔχοντος σώματος ὡς ἡ ΓΕ πρὸς τὴν ΓΔ, συμβήσεται τὸ ἀφαιρούμενον ἀπὸ τοῦ βάρους ἔχοντος σώματος τὴν ΓΕ φέρεσθαι ἐν τῷ ἴσῳ χρόνῳ, ἐπεὶπερ τὸ ὅλον ἐφέρετο τὴν ΓΔ. Τὸ γὰρ τάχος ἔξει τὸ τοῦ ἐλάττονος πρὸς τὸ τοῦ μείζονος ὡς τὸ μείζον σῶμα πρὸς τὸ ἔλαττον. Ἴσον ἄρα τὸ ἀβαρὲς οἰσθήσεται σῶμα καὶ τὸ βάρος ἔχον ἐν τῷ αὐτῷ χρόνῳ. Τοῦτο δ' ἀδύνατον. Ὡστ' ἐπεὶ παντὸς τοῦ προτεθέντος μείζον κινηθήσεται διάστημα τὸ ἀβαρὲς, ἄπειρον ἂν φέροιτο. Φανερόν οὖν ὅτι ἀνάγκη σῶμα πᾶν βάρος ἔχειν ἢ κουφότητα διωρισμένον. Ἐπεὶ δὲ φύσις μὲν ἐστὶν ἡ ἐν αὐτῷ ὑπάρχουσα κινήσεως ἀρχή, δύναμις δ' ἡ ἐν ἄλλῳ ἢ ἡ ἄλλο, κίνησις δὲ ἡ μὲν κατὰ φύσιν ἢ δὲ βία πᾶσα, τὴν μὲν κατὰ φύσιν, οἷον τῷ λίθῳ τὴν κάτω, θάττω ποιήσει τὸ κατὰ δύναμιν, τὴν δὲ παρὰ φύσιν ὅλως αὐτή. Πρὸς ἀμφοτέρα δὲ ὥσπερ ὀργάνῳ χρῆται τῷ ἀέρι (πέφυκε γὰρ οὗτος καὶ κοῦφος εἶναι καὶ βαρὺς)· τὴν μὲν οὖν ἄνω ποιήσει φορὰν ἢ κοῦφος, ὅταν ὠσθῇ καὶ λάβῃ τὴν ἀρχὴν ἀπὸ τῆς δυνάμεως, τὴν δὲ κάτω πάλιν ἢ βαρὺς· ὥσπερ γὰρ ἐναφάψασα παραδίδωσιν ἐκατέρῳ. Διὸ καὶ οὐ παρακολουθοῦντος τοῦ κινήσαντος φέρεται τὸ βία κινηθέν. Εἰ γὰρ μὴ τοιοῦτόν τι σῶμα ὑπῆρχεν, οὐκ ἂν ἦν βία κίνησις. Καὶ τὴν κατὰ φύσιν δ' ἐκάστου κίνησιν συνεπουρίζει τὸν αὐτὸν τρόπον. Ὅτι μὲν οὖν ἅπαν ἢ κοῦφον ἢ βαρὺ, καὶ πῶς αἱ παρὰ φύσιν κινήσεις ἔχουσι ἐν τούτοις, φανερόν.

Ὅτι δ' οὔτε πάντων ἐστὶ γένεσις οὐθ' ἀπλῶς οὐθενός, δηλὸν ἐκ τῶν προειρημένων· ἀδύνατον γὰρ παντὸς σώματος εἶναι γένεσιν, (302a.) εἰ μὴ καὶ κενὸν εἶναί τι δυνατόν κεχωρισμένον· ἐν ᾧ γὰρ ἔσται τόπῳ τὸ νῦν γιγνόμενον εἰ ἐγίγνετο, ἐν τούτῳ πρότερον τὸ κενὸν ἀναγκαῖον εἶναι σώματος μηθενός ὄντος. Ἄλλο μὲν γὰρ ἐξ ἄλλου σῶμα γίγνεσθαι δυνατόν, οἷον ἐξ ἀέρος πῦρ, ὅλως δ' ἐκ μηθενός ἄλλου προϋπάρχοντος μεγέθους ἀδύνατον· μάλιστα γὰρ ἂν

ἐκ δυνάμει τινὸς ὄντος σώματος ἐνεργεία γένοιτ' ἂν σῶμα. Ἄλλ' εἰ
τὸ δυνάμει ὄν σῶμα μηθέν ἐστὶν ἄλλο σῶμα ἐνεργείᾳ πρότερον,
κενὸν ἔσται κεχωρισμένον.

Κεφάλαιο 3

Λοιπὸν δ' εἰπεῖν τίνων τέ ἐστὶ γένεσις [σωμάτων], καὶ διὰ τί ἐστίν. Ἐπεὶ οὖν ἐν ἅπασιν ἡ γινώσις διὰ τῶν πρώτων, πρῶτα δὲ τῶν ἐνυπαρχόντων τὰ στοιχεῖα, σκεπτέον ποῖα τῶν τοιούτων σωμάτων ἐστὶ στοιχεῖα, καὶ διὰ τί ἐστίν, ἔπειτα μετὰ ταῦτα πόσα καὶ ποῖ' ἄττα.

Τοῦτο δ' ἔσται φανερόν ὑποθεμένοις τίς ἐστίν ἡ τοῦ στοιχείου φύσις. Ἔστω δὴ στοιχεῖον τῶν σωμάτων, εἰς ὃ τᾶλλα σώματα διαιρεῖται, ἐνυπάρχον δυνάμει ἢ ἐνεργείᾳ (τοῦτο γὰρ ποτέρως, ἔτι ἀμφισβητήσιμον), αὐτὸ δ' ἐστίν ἀδιαίρετον εἰς ἕτερα τῷ εἶδει τοιοῦτον γὰρ τι τὸ στοιχεῖον ἅπαντες καὶ ἐν ἅπασιν βούλονται λέγειν. Εἰ δὴ τὸ εἰρημένον ἐστὶ στοιχεῖον, ἀνάγκη εἶναι ἅττα τοιαῦτα τῶν σωμάτων. Ἐν μὲν γὰρ σαρκὶ καὶ ξύλῳ καὶ ἐκάστῳ τῶν τοιούτων ἔνεστι δυνάμει πῦρ καὶ γῆ· φανερὰ γὰρ ταῦτα ἐξ ἐκείνων ἐκκρινόμενα. Ἐν δὲ πυρὶ σὰρξ ἢ ξύλον οὐκ ἐνυπάρχουσιν, οὔτε κατὰ δύναμιν οὔτε κατ' ἐνεργείαν· ἐξεκρίνετο γὰρ ἄν. Ὁμοίως δ' οὐδ' εἰ ἐν τι μόνον εἴη τοιοῦτον, οὐδ' ἐν ἐκείνῳ· οὐ γὰρ εἰ ἔσται σὰρξ ἢ ὀστοῦν ἢ τῶν ἄλλων ὅτιοῦν, οὐπω φατέον ἐνυπάρχειν δυνάμει, ἀλλὰ προσθεωρητέον τίς ὁ τρόπος τῆς γενέσεως.

Ἀναξαγόρας δ' ἐναντίως Ἐμπεδοκλεῖ λέγει περὶ τῶν στοιχείων. Ὁ μὲν γὰρ πῦρ καὶ γῆν καὶ τὰ σύστοιχα τούτοις στοιχεῖα φησιν εἶναι τῶν σωμάτων καὶ συγκεῖσθαι πάντ' ἐκ τούτων, Ἀναξαγόρας δὲ τοῦναντίον· τὰ γὰρ ὁμοιομερῆ στοιχεῖα (λέγω δ' οἷον σάρκα καὶ ὀστοῦν καὶ τῶν τοι(302b.) οὔτων ἕκαστον), ἀέρα δὲ καὶ πῦρ μίγματα τούτων καὶ τῶν ἄλλων σπερμάτων πάντων· εἶναι γὰρ ἐκάτερον αὐτῶν ἐξ ἀοράτων τῶν ὁμοιομερῶν πάντων ἡθροισμένον. Διὸ καὶ γίνεσθαι πάντ' ἐκ τούτων· τὸ γὰρ πῦρ καὶ τὸν αἰθέρα προσαγορεύει ταυτό.

Ἐπεὶ δ' ἐστὶ παντὸς φυσικοῦ σώματος κίνησις οἰκεία, τῶν δὲ κινήσεων αἱ μὲν ἀπλαῖ αἱ δὲ μικταί, καὶ αἱ μὲν μικταὶ τῶν μικτῶν, αἱ δὲ ἀπλαῖ τῶν ἀπλῶν εἰσι, φανερόν ὅτι ἔσται ἅττα σώματα ἀπλᾶ. Εἰσὶ γὰρ καὶ κινήσεις ἀπλαῖ. Ὡστε δῆλον καὶ ὅτι ἐστὶ στοιχεῖα καὶ διὰ τί ἐστίν.

Κεφάλαιο 4

Πότερον δὲ πεπερασμένα ἢ ἄπειρα, καὶ εἰ πεπερασμένα, πόσα τὸν ἀριθμόν, ἐπόμενον ἂν εἴη σκοπεῖν.

Πρῶτον μὲν οὖν ὅτι οὐκ ἔστιν ἄπειρα, καθάπερ οἶονταί τινες, θεωρητέον, καὶ πρῶτον τοὺς πάντα τὰ ὁμοιομερῇ στοιχεῖα ποιοῦντας, καθάπερ καὶ Ἀναξαγόρας. Οὐθεὶς γὰρ τῶν οὕτως ἀξιούντων ὀρθῶς λαμβάνει τὸ στοιχεῖον· ὀρῶμεν γὰρ πολλὰ καὶ τῶν μικτῶν σωμάτων εἰς ὁμοιομερῇ διαιρούμενα, λέγω δ' οἷον σάρκα καὶ ὀστοῦν καὶ ξύλον καὶ λίθον. Ὡστ' εἶπερ τὸ σύνθετον οὐκ ἔστι στοιχεῖον, οὐχ ἅπαν ἔσται τὸ ὁμοιομερὲς στοιχεῖον, ἀλλὰ τὸ ἀδιαίρετον εἰς ἕτερα τῷ εἶδει, καθάπερ εἴρηται πρότερον.

Ἔτι δ' οὐδ' οὕτως λαμβάνοντας τὸ στοιχεῖον ἀνάγκη ποιεῖν ἄπειρα· πάντα γὰρ ταῦτ' ἀποδοθήσεται καὶ πεπερασμένων ὄντων, ἐάν τις λάβῃ· τὸ αὐτὸ γὰρ ποιήσει, κἂν δύο ἢ τρία μόνον ἢ τοιαῦτα, καθάπερ ἐγχειρεῖ καὶ Ἐμπεδοκλῆς. Ἐπεὶ γὰρ καὶ ὥς αὐτοῖς συμβαίνει μὴ πάντα ποιεῖν ἐξ ὁμοιομερῶν (πρόσωπον γὰρ οὐκ ἐκ προσώπων ποιοῦσιν, οὐδ' ἄλλο τῶν κατὰ φύσιν ἐσχηματισμένων οὐθέν), φανερόν ὅτι πολλῷ βέλτιον πεπερασμένας ποιεῖν τὰς ἀρχάς, καὶ ταύτας ὡς ἐλαχίστας πάντων γε τῶν αὐτῶν μελλόντων δείκνυσθαι, καθάπερ ἀξιούσι καὶ οἱ ἐν τοῖς μαθήμασιν· αἰεὶ γὰρ πεπερασμένας λαμβάνουσιν ἀρχὰς ἢ τῷ εἶδει ἢ τῷ ποσῷ.

Ἔτι εἰ σῶμα σώματος ἕτερον λέγεται κατὰ τὰς οἰκείας διαφοράς, αἱ δὲ τῶν σωμάτων διαφοραὶ πεπερασμέναι (δια(303a.) φέρουσι γὰρ τοῖς αἰσθητοῖς, ταῦτα δὲ πεπέρανται· δεῖ δὲ τοῦτο δειχθῆναι), φανερόν ὅτι καὶ τὰ στοιχεῖα ἀνάγκη πεπερασμένα εἶναι.

Ἀλλὰ μὴν οὐδ' ὥς ἕτεροί τινες λέγουσιν, οἷον Λεύκιππος τε καὶ Δημόκριτος ὁ Ἀβδηρίτης, εὐλογα τὰ συμβαίνοντα· φασὶ γὰρ εἶναι τὰ πρῶτα μεγέθη πλήθει μὲν ἄπειρα, μεγέθει δὲ ἀδιαίρετα, καὶ οὗτ' ἐξ ἐνὸς πολλὰ γίγνεσθαι οὔτε ἐκ πολλῶν ἓν, ἀλλὰ τῇ τούτων συμπλοκῇ καὶ περιπαλάξει πάντα γεννᾶσθαι. Τρόπον γάρ τινα καὶ οὗτοι πάντα τὰ ὄντα ποιοῦσιν ἀριθμοὺς καὶ ἐξ ἀριθμῶν· καὶ γὰρ εἰ μὴ σαφῶς δηλοῦσιν, ὅμως τοῦτο βούλονται λέγειν. Καὶ πρὸς τούτοις, ἐπεὶ διαφέρει τὰ σώματα σχήμασιν, ἄπειρα δὲ τὰ σχήματα, ἄπειρα καὶ τὰ ἀπλᾶ σώματά φασιν εἶναι. Ποῖον δὲ καὶ τί ἐκάστου τὸ σχῆμα τῶν στοιχείων, οὐθέν ἐπιδιώρισαν, ἀλλὰ μόνον τῷ πυρὶ τὴν σφαῖραν

ἀπέδωκαν· ἀέρα δὲ καὶ ὕδωρ καὶ τᾶλλα μεγέθει καὶ μικρότητι διεῖλον, ὥς οὕσαν αὐτῶν τὴν φύσιν οἶον πανσπερμίαν πάντων τῶν στοιχείων.

Πρῶτον μὲν οὖν ταὐτὸν καὶ τούτοις ἀμάρτημα τὸ μὴ πεπερασμένης λαβεῖν τὰς ἀρχάς, ἐξὸν ἅπαντα ταῦτα λέγειν. Ἔτι δ' εἰ μὴ ἄπειροι τῶν σχημάτων αἱ διαφοραί, δῆλον ὅτι οὐκ ἔσται τὰ στοιχεῖα ἄπειρα.

Πρὸς δὲ τούτοις ἀνάγκη μάχεσθαι ταῖς μαθηματικαῖς ἐπιστήμαις ἄτομα σώματα λέγοντας, καὶ πολλὰ τῶν ἐνδόξων καὶ τῶν φαινομένων κατὰ τὴν αἴσθησιν ἀναιρεῖν, περὶ ὧν εἴρηται πρότερον ἐν τοῖς περὶ χρόνου καὶ κινήσεως. Ἄμα δὲ καὶ ἐναντία λέγειν αὐτοὺς αὐτοῖς ἀνάγκη· ἀδύνατον γὰρ ἀτόμων ὄντων τῶν στοιχείων μεγέθει καὶ μικρότητι διαφέρειν ἀέρα καὶ γῆν καὶ ὕδωρ· οὐ γὰρ οἶόν τ' ἐξ ἀλλήλων γίνεσθαι· ὑπολείπει γὰρ ἀεὶ τὰ μέγιστα σώματα ἐκκρινόμενα, φασὶ δ' οὕτω γίνεσθαι ὕδωρ καὶ ἀέρα καὶ γῆν ἐξ ἀλλήλων.

Ἔτι οὐδὲ κατὰ τὴν τούτων ὑπόληψιν δόξειεν ἂν ἄπειρα γίνεσθαι τὰ στοιχεῖα, εἴπερ τὰ μὲν σώματα διαφέρει σχήμασι, τὰ δὲ σχήματα πάντα σύγκειται ἐκ πυραμίδων, τὰ μὲν εὐθύγραμμα ἐξ εὐθυ(303b.) γράμμων, ἡ δὲ σφαῖρα ἐξ ὀκτὼ μορίων. Ἀνάγκη γὰρ εἶναι τινὰς ἀρχὰς τῶν σχημάτων. Ὡστε εἴτε μία εἴτε δύο εἴτε πλείους, καὶ τὰ ἀπλᾶ σώματα τοσαῦτα ἔσται τὸ πλῆθος.

Ἔτι δ' εἰ ἐκάστῳ μὲν τῶν στοιχείων ἐστί τις οἰκεία κίνησις, καὶ ἡ τοῦ ἀπλοῦ σώματος ἀπλῆ, μὴ εἰσι δ' αἱ ἀπλαῖ κινήσεις ἄπειροι διὰ τὸ μήτε τὰς ἀπλᾶς φορὰς πλείους εἶναι δυοῖν μήτε τοὺς τόπους ἀπείρους, οὐκ ἂν εἴη οὐδ' οὕτως ἄπειρα τὰ στοιχεῖα.

Κεφάλαιο 5

Ἐπεὶ δ' ἀνάγκη πεπεράνθαι τὰ στοιχεῖα, λοιπὸν σκέψασθαι πότερον πλείω ἔσται ἢ ἓν. Ἐνιοὶ γὰρ ἓν μόνον ὑποτίθενται, καὶ τοῦτο οἱ μὲν ὕδωρ, οἱ δ' ἀέρα, οἱ δὲ πῦρ, οἱ δ' ὕδατος μὲν λεπτότερον, ἀέρος δὲ πυκνότερον, ὃ περιέχειν φασὶ πάντα τοὺς οὐρανοὺς ἅπειρον ὄν.

Ὅσοι μὲν οὖν τὸ ἓν τοῦτο ποιοῦσιν ὕδωρ ἢ ἀέρα ἢ ὕδατος μὲν λεπτότερον, ἀέρος δὲ πυκνότερον, εἴτ' ἐκ τούτου μανότῃ καὶ πυκνότητι τᾶλλα γεννῶσιν, οὗτοι λανθάνουσιν αὐτοὶ αὐτοὺς ἄλλο τι πρότερον τοῦ στοιχείου ποιοῦντες· ἔστι γὰρ ἢ μὲν ἐκ τῶν στοιχείων γένεσις σύνθεσις, ὥς φασιν, ἢ δ' εἰς τὰ στοιχεῖα διάλυσις, ὥστ' ἀνάγκη πρότερον εἶναι τῇ φύσει τὸ λεπτομερέστερον. Ἐπεὶ οὖν φασὶ πάντων τῶν σωμάτων τὸ πῦρ λεπτότατον εἶναι, πρῶτον ἂν εἴῃ τῇ φύσει τὸ πῦρ· διαφέρει δ' οὐθέν, ἀνάγκη γὰρ ἓν τι τῶν ἄλλων εἶναι πρῶτον, καὶ μὴ τὸ μέσον. Ἔτι δὲ τὸ μὲν πυκνότητι καὶ μανότῃ τᾶλλα γεννᾷν οὐθέν διαφέρει ἢ λεπτότῃ καὶ παχύτῃ· τὸ μὲν γὰρ λεπτὸν μανόν, τὸ δὲ παχὺ βούλονται εἶναι πυκνόν. Πάλιν δὲ τὸ λεπτότῃ καὶ παχύτῃ ταῦτόν καὶ τὸ μεγέθει καὶ μικρότῃ· λεπτὸν μὲν γὰρ τὸ μικρομερές, παχὺ δὲ τὸ μεγαλομερές· τὸ γὰρ ἐπεκτείνόμενον ἐπὶ πολὺ λεπτόν, τοιοῦτον δὲ τὸ ἐκ μικρῶν μερῶν συνεστός, ὥστ' αὐτοῖς συμβαίνει μεγέθει καὶ μικρότῃ διαιρεῖν τὴν τῶν ἄλλων οὐσίαν. Οὕτω δὲ διοριζομένοις ἅπαντα συμβήσεται λέγειν πρὸς τι, καὶ οὐκ ἔσται ἀπλῶς τὸ μὲν πῦρ τὸ δ' ὕδωρ τὸ δ' ἀήρ, ἀλλὰ τὸ αὐτὸ πρὸς μὲν τόδε (304a.) πῦρ, πρὸς δὲ τι ἄλλο ἀήρ, ὅπερ συμβαίνει καὶ τοῖς πλείω μὲν τὰ στοιχεῖα λέγουσι, μεγέθει δὲ καὶ μικρότῃ διαφέρειν φάσκουσιν· ἐπεὶ γὰρ τῷ ποσῷ διώρισται ἕκαστον, ἔσται τις λόγος πρὸς ἄλληλα τῶν μεγεθῶν, ὥστε τὰ τοῦτον ἔχοντα τὸν λόγον πρὸς ἄλληλα ἀνάγκη τὸ μὲν ἀέρα εἶναι τὸ δὲ πῦρ τὸ δὲ γῆν τὸ δ' ὕδωρ, διὰ τὸ ἐνυπάρχειν ἐν τοῖς μείζοσι τοὺς τῶν ἐλαττόνων λόγους.

Ὅσοι δὲ πῦρ ὑποτίθενται τὸ στοιχεῖον, τοῦτο μὲν διαφεύγουσιν, ἄλλα δ' αὐτοῖς ἀναγκαῖον ἄλογα συμβαίνειν. Οἱ μὲν γὰρ αὐτῶν σχῆμα περιάπτουσι τῷ πυρί, καθάπερ οἱ τὴν πυραμίδα ποιοῦντες, καὶ τούτων οἱ μὲν ἀπλουστέως λέγοντες ὅτι τῶν μὲν σχημάτων τμητικώτατον ἢ πυραμῖς, τῶν δὲ σωμάτων τὸ πῦρ, οἱ δὲ κομψοτέως

τῷ λόγῳ προσάγοντες ὅτι τὰ μὲν σώματα πάντα σύγκειται ἐκ τοῦ λεπτομερεστάτου, τὰ δὲ σχήματα τὰ στερεὰ ἐκ πυραμίδων, ὥστ' ἐπεὶ τῶν μὲν σωμάτων τὸ πῦρ λεπτότατον, τῶν δὲ σχημάτων ἡ πυραμὶς μικρομερέστατον καὶ πρῶτον, τὸ δὲ πρῶτον σχῆμα τοῦ πρώτου σώματος, πυραμὶς ἂν εἴη τὸ πῦρ.

Οἱ δὲ περὶ μὲν σχήματος οὐδὲν ἀποφαίνονται, λεπτομερέστατον δὲ μόνον ποιοῦσιν, ἔπειτ' ἐκ τούτου συντιθεμένου φασὶ γίνεσθαι τὰλλα καθάπερ ἂν εἰ συμφυσσωμένου ψήγματος.

Ἀμφοτέροις δὲ ταῦτ' ἀ συμβαίνει δυσχερῆ· εἰ μὲν γὰρ ἄτομον τὸ πρῶτον σῶμα ποιοῦσι, πάλιν ἥξουσιν οἱ πρότερον εἰρημένοι λόγοι πρὸς ταύτην τὴν ὑπόθεσιν.

Ἔτι οὐκ ἐνδέχεται τοῦτο λέγειν φυσικῶς βουλομένοις θεωρεῖν. Εἰ γὰρ ἅπαν σῶμα σώματι συμβλητὸν κατὰ τὸ ποσόν, ἔχει δ' ἀνάλογον τὰ μεγέθη τὰ τε τῶν ὁμοιομερῶν πρὸς ἄλληλα καὶ τὰ τῶν στοιχείων (οἷον τὰ τοῦ παντὸς ὕδατος πρὸς τὸν ἅπαντα ἀέρα καὶ τοῦ στοιχείου πρὸς τὸ στοιχεῖον, ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων), ὁ δ' ἀὴρ πλείων τοῦ ὕδατος καὶ ὅλως τὸ λεπτομερέστερον τοῦ παχυμερεστέρου, φανερόν ὅτι καὶ τὸ στοιχεῖον ἔλαττον ἔσται τὸ τοῦ ὕδατος ἢ τὸ τοῦ ἀέρος. Εἰ οὖν τὸ ἔλαττον μέγεθος ἐνυπάρχει τῷ μείζονι, διαιρετὸν ἂν εἴη τὸ τοῦ ἀέρος (304b.) στοιχεῖον. Ὡσαύτως δὲ καὶ τὸ τοῦ πυρὸς καὶ ὅλως τῶν λεπτομερεστέρων.

Εἰ δὲ διαιρετόν, τοῖς μὲν σχηματίζουσι τὸ πῦρ συμβήσεται μὴ εἶναι τὸ τοῦ πυρὸς μέρος πῦρ διὰ τὸ μὴ συγκεῖσθαι τὴν πυραμίδα ἐκ πυραμίδων, ἔτι δὲ μὴ πᾶν σῶμα εἶναι ἢ στοιχεῖον ἢ ἐκ στοιχείων (τὸ γὰρ μέρος τοῦ πυρὸς οὔτε πῦρ οὔθ' ἕτερον στοιχεῖον οὐδέν)· τοῖς δὲ τῷ μεγέθει διορίζουσι πρότερόν τι τοῦ στοιχείου στοιχεῖον εἶναι, καὶ τοῦτ' εἰς ἅπειρον βαδίζειν, εἴπερ ἅπαν σῶμα διαιρετὸν καὶ τὸ μικρομερέστατον στοιχεῖον. Ἔτι δὲ καὶ τούτοις συμβαίνει λέγειν ὡς ταῦτ' ὅσον πρὸς μὲν τὸδε πῦρ ἔστι, πρὸς ἄλλο δ' ἀήρ, καὶ πάλιν ὕδωρ καὶ γῆ.

Κοινὸν δὲ πᾶσιν ἀμάρτημα τοῖς ἐν τὸ στοιχεῖον ὑποτιθεμένοις τὸ μίαν μόνην κίνησιν ποιεῖν φυσικὴν, καὶ πάντων τὴν αὐτήν. Ὅρῳμεν γὰρ πᾶν τὸ φυσικὸν σῶμα κινήσεως ἔχον ἀρχήν. Εἰ οὖν ἅπαντα τὰ σώματα ἐν τῇ ἐστὶ, πάντων ἂν εἴη μία κίνησις· καὶ ταύτην ἀναγκαῖον ὥσπερ ἂν πλείω γίγνηται, κινεῖσθαι μᾶλλον, ὥσπερ καὶ τὸ πῦρ ὅσῳ ἂν πλείον γίγνηται, φέρεται θάττον ἄνω τὴν αὐτοῦ φοράν. Συμβαίνει δὲ πολλὰ κάτω φέρεσθαι θάττον.

Ὡστε διά τε ταῦτα καὶ πρὸς τούτοις ἐπεὶ διώρισται πρότερον ὅτι πλείους αἱ φυσικαὶ κινήσεις, δῆλον ὅτι ἀδύνατον ἓν εἶναι τὸ στοιχεῖον. Ἐπειδὴ δὲ οὔτε ἄπειρα οὔτε ἓν, ἀνάγκη πλείω εἶναι καὶ πεπερασμένα.

Κεφάλαιο 6

Ἐπισκεπτέον δὲ πρῶτον πότερον αἰδία ἐστὶν ἢ γινόμενα φθείρεται· τούτου γὰρ δειχθέντος φανερόν ἐσται καὶ πόσ' ἅττα καὶ ποῖά ἐστιν. Αἰδία μὲν οὖν εἶναι ἀδύνατον· ὁρῶμεν γὰρ καὶ πῦρ καὶ ὕδωρ καὶ ἕκαστον τῶν ἀπλῶν σωμάτων διαλυόμενον. Ἀνάγκη δὲ ἢ ἄπειρον εἶναι ἢ ἴστασθαι τὴν διάλυσιν. Εἰ μὲν οὖν ἄπειρος, ἐσται καὶ ὁ χρόνος ὁ τῆς διαλύσεως ἄπειρος, καὶ πάλιν ὁ τῆς συνθέσεως· ἕκαστον γὰρ ἐν ἄλλῳ χρόνῳ διαλύεται καὶ συντίθεται τῶν μορίων. Ὡστε συμβήσεται ἕξω τοῦ ἀπείρου χρόνου ἄλλον εἶναι ἄπειρον, ὅταν ὁ τε τῆς συνθέσεως ἄπειρος ἢ καὶ ἔτι πρότερος τούτου ὁ τῆς διαλύσεως. Ὡστε τοῦ ἀπείρου ἕξω γίνεται ἄπειρον· (305a.) ὅπερ ἀδύνατον.

Εἰ δὲ στήσεται πού ἢ διάλυσιν, ἥτοι ἄτομον ἐσται τὸ σῶμα ἐν ᾧ ἴσταται, ἢ διαιρετὸν μὲν οὐ μέντοι διαιρεθησόμενον οὐδέποτε, καθάπερ ἔοικεν Ἐμπεδοκλῆς βούλεσθαι λέγειν.

Ἄτομον μὲν οὖν οὐκ ἐσται διὰ τοὺς πρότερον εἰρημένους λόγους· ἀλλὰ μὴν οὐδὲ διαιρετὸν μὲν οὐδέποτε δὲ διαλυθησόμενον. Τὸ γὰρ ἔλαττον σῶμα τοῦ μείζονος εὐφθαρτότερόν ἐστιν. Εἴπερ οὖν καὶ τὸ πολὺ φθείρεται κατὰ ταύτην τὴν φθοράν, ὥστε διαλύεσθαι εἰς ἐλάττω, ἔτι μᾶλλον τοῦτο πάσχειν εὐλογον τὸ ἔλαττον. Δύο δὲ τρόπους ὁρῶμεν φθειρόμενον τὸ πῦρ· ὑπὸ τε γὰρ τοῦ ἐναντίου φθείρεται σβεννύμενον, καὶ αὐτὸ ὑφ' αὐτοῦ μαραινόμενον. Τοῦτο δὲ πάσχει τὸ ἔλαττον ὑπὸ τοῦ πλείονος, καὶ θάπτον, ὅσῳ ἂν ἢ ἔλαττον. Ὡστ' ἀνάγκη φθαρτὰ καὶ γενητὰ εἶναι τὰ στοιχεῖα τῶν σωμάτων.

Ἐπεὶ δ' ἐστὶ γενητά, ἥτοι ἐξ ἀσωμάτου ἢ ἐκ σώματος ἐσται ἡ γένεσις, καὶ εἰ ἐκ σώματος, ἥτοι ἐξ ἄλλου ἢ ἐξ ἀλλήλων.

Ὁ μὲν οὖν ἐξ ἀσωμάτου γεννῶν λόγος ποιεῖ κεχωρισμένον κενόν. Πᾶν γὰρ τὸ γινόμενον <ἐν τινι γίγνεται καὶ> ἥτοι ἀσώματον ἐσται ἐν ᾧ ἡ γένεσις, ἢ ἔξει σῶμα· καὶ εἰ μὲν ἔξει σῶμα, δύο ἅμα ἐσται σώματα ἐν τῷ αὐτῷ, τό τε γιγνόμενον καὶ τὸ προϋπάρχον· εἰ δ' ἀσώματον, ἀνάγκη κενὸν εἶναι ἀφωρισμένον· τοῦτο δ' ὅτι ἀδύνατον, δέδεικται πρότερον.

Ἀλλὰ μὴν οὐδ' ἐκ σώματος τινος ἐγχωρεῖ γίνεσθαι τὰ στοιχεῖα· συμβήσεται γὰρ ἄλλο σῶμα πρότερον εἶναι τῶν στοιχείων. Τοῦτο δ' εἰ μὲν ἔξει βάρος ἢ κουφότητα, τῶν στοιχείων ἐσται τι, μηδεμίαν δ'

ἔχον ῥοπὴν ἀκίνητον ἔσται καὶ μαθηματικόν· τοιοῦτον δὲ ὄν οὐκ ἔσται ἐν τόπῳ. Ἐν ᾧ γὰρ ἡρεμεῖ, ἐν τούτῳ καὶ κινεῖσθαι δυνατόν. Καὶ εἰ μὲν βία, παρὰ φύσιν, εἰ δὲ μὴ βία, κατὰ φύσιν. Εἰ μὲν οὖν ἔσται ἐν τόπῳ καὶ πού, ἔσται τι τῶν στοιχείων· εἰ δὲ μὴ ἐν τόπῳ, οὐδὲν ἐξ αὐτοῦ ἔσται· τὸ γὰρ γινόμενον, καὶ ἐξ οὗ γίγνεται, ἀνάγκη ἅμα εἶναι. Ἐπεὶ δ' οὔτε ἐξ ἀσωμάτου γίνεσθαι δυνατόν οὔτ' ἐξ ἄλλου σώματος, λείπεται ἐξ ἀλλήλων γίνεσθαι.

Κεφάλαιο 7

Πάλιν οὖν ἐπισκεπτέον τίς ὁ τρόπος τῆς ἐξ ἀλλήλων γενέσεως, πότερον ὡς Ἐμπεδοκλῆς λέγει καὶ Δημόκριτος, ἢ ὡς οἱ εἰς τὰ ἐπίπεδα διαλύοντες, ἢ ἔστιν ἄλλος τις τρόπος (305b.) παρὰ τούτους.

Οἱ μὲν οὖν περὶ Ἐμπεδοκλέα καὶ Δημόκριτον λανθάνουσιν αὐτοὶ αὐτοὺς οὐ γένεσιν ἐξ ἀλλήλων ποιοῦντες, ἀλλὰ φαινομένην γένεσιν· ἐνυπάρχον γὰρ ἕκαστον ἐκκρίνεσθαι φασιν, ὥσπερ ἐξ ἀγγείου τῆς γενέσεως οὔσης, ἀλλ' οὐκ ἔκ τινος ὕλης, οὐδὲ γίγνεσθαι μεταβάλλοντος.

Ἐπειτα καὶ οὕτως οὐδὲν ἦττον ἄλογα τὰ συμβαίνοντα. Τὸ γὰρ αὐτὸ μέγεθος οὐ δοκεῖ συμπληθὲν γίνεσθαι βαρύτερον. Ἀνάγκη δὲ τοῦτο λέγειν τοῖς φάσκουσιν ἐκκρίνεσθαι τὸ ὕδωρ ἐκ τοῦ ἀέρος ἐνυπάρχον· ὅταν γὰρ ὕδωρ ἐξ ἀέρος γένηται, βαρύτερόν ἐστιν.

Ἐτι δὲ τῶν μεμιγμένων σωμάτων οὐκ ἀνάγκη χωρισθὲν θάτερον αἰεὶ πλείω τόπον ἐπέχειν· ὅταν δ' ἐξ ὕδατος ἀήρ γένηται, πλείω καταλαμβάνει τόπον· τὸ γὰρ λεπτομερέστερον ἐν πλείονι τόπῳ γίγνεται. Φανερόν δὲ τοῦτό γε καὶ ἐν τῇ μεταβάσει· διατμιζομένου γὰρ καὶ πνευματουμένου τοῦ ὕγρου ῥήγνυται τὰ περιέχοντα τοὺς ὄγκους ἀγγεῖα διὰ τὴν στενοχωρίαν. Ὡστ' εἰ μὲν ὅλως μὴ ἐστὶ κενὸν μηδ' ἐπεκτείνεται τὰ σώματα, καθάπερ φασὶν οἱ ταῦτα λέγοντες, φανερόν τὸ ἀδύνατον· εἰ δ' ἐστὶ κενὸν καὶ ἐπέκτασις, ἄλογον τὸ ἐξ ἀνάγκης αἰεὶ πλείω τόπον ἐπιλαμβάνειν τὸ χωριζόμενον.

Ἀνάγκη δὲ καὶ ὑπολείπειν τὴν ἐξ ἀλλήλων γένεσιν, εἴπερ ἐν τῷ πεπερασμένῳ μεγέθει μὴ ἐνυπάρχει ἅπειρα πεπερασμένα. Ὅταν γὰρ ἐκ γῆς ὕδωρ γένηται, ἀφήρηται τι τῆς γῆς, εἴπερ ἐκκρίσει ἢ γένεσις· καὶ πάλιν ὅταν ἐκ τῆς ὑπολειπομένης, ὡσαύτως. Εἰ μὲν οὖν αἰεὶ τοῦτ' ἔσται, συμβήσεται ἐν τῷ πεπερασμένῳ ἅπειρα ἐνυπάρχειν· ἐπεὶ δὲ τοῦτ' ἀδύνατον, οὐκ ἂν αἰεὶ γίγνοιτο ἐξ ἀλλήλων. Ὅτι μὲν οὖν οὐκ ἐστὶ τῇ ἐκκρίσει ἢ εἰς ἄλληλα μετάβασις, εἴρηται.

Λείπεται δ' εἰς ἄλληλα μεταβάλλοντα γίγνεσθαι. Τοῦτο δὲ διχῶς· ἢ γὰρ τῇ μετασχηματίζει, καθάπερ ἐκ τοῦ αὐτοῦ κηροῦ γίγνιτο' ἂν σφαῖρα καὶ κύβος, ἢ τῇ διαλύσει τῇ εἰς τὰ ἐπίπεδα, ὥσπερ ἔνιοι φασιν.

Εἰ μὲν οὖν τῇ μετασχηματίζει γίνεται, συμβαίνει ἐξ ἀνάγκης ἄτομα λέγειν τὰ σώματα· διαιρετῶν γὰρ ὄντων οὐκ ἔσται τὸ τοῦ

πυρὸς μέρος πῦρ, οὐδὲ τὸ τῆς γῆς γῆ, διὰ τὸ μὴ εἶναι μήτε τὸ τῆς πυραμίδος μέρος πάντως πυραμίδα μήτε τὸ τοῦ κύβου (306a.) κύβον.

Εἰ δὲ τῇ τῶν ἐπιπέδων διαλύσει, πρῶτον μὲν ἄτοπον τὸ μὴ πάντα γεννᾶν ἐξ ἀλλήλων, ὅπερ ἀνάγκη λέγειν αὐτοῖς, καὶ λέγουσιν. Οὔτε γὰρ εὐλογον ἐν μόνον ἅμοιρον γενέσθαι τῆς μεταβάσεως, οὔτε φαίνεται κατὰ τὴν αἴσθησιν, ἀλλ' ὁμοίως πάντα μεταβάλλειν εἰς ἄλληλα. Συμβαίνει δὲ περὶ τῶν φαινομένων λέγουσι μὴ ὁμολογούμενα λέγειν τοῖς φαινομένοις. Τούτου δ' αἴτιον τὸ μὴ καλῶς λαβεῖν τὰς πρώτας ἀρχάς, ἀλλὰ πάντα βούλεσθαι πρὸς τινὰς δόξας ὠρισμένας ἀνάγειν. Δεῖ γὰρ ἴσως τῶν μὲν αἰσθητῶν αἰσθητάς, τῶν δὲ αἰδίων αἰδιούς, τῶν δὲ φθαρτῶν φθαρτάς εἶναι τὰς ἀρχάς, ὅλως δ' ὁμογενεῖς τοῖς ὑποκειμένοις. Οἱ δὲ διὰ τὴν τούτων φιλίαν ταῦτ' οὖν ποιεῖν ἐοίκασι τοῖς τὰς θέσεις ἐν τοῖς λόγοις διαφυλάττουσιν· ἅπαν γὰρ ὑπομένουσι τὸ συμβαῖνον ὡς ἀληθεῖς ἔχοντες ἀρχάς, ὥσπερ οὐκ ἐνίας δέον κρίνειν ἐκ τῶν ἀποβαινόντων, καὶ μάλιστα ἐκ τοῦ τέλους.

Τέλος δὲ τῆς μὲν ποιητικῆς ἐπιστήμης τὸ ἔργον, τῆς δὲ φυσικῆς τὸ φαινόμενον αἰεὶ κυρίως κατὰ τὴν αἴσθησιν. Συμβαίνει δ' αὐτοῖς μάλιστα τὴν γῆν εἶναι στοιχεῖον, καὶ μόνην ἄφθαρτον, εἴπερ τὸ ἀδιάλυτον ἄφθαρτόν τ' ἐστὶ καὶ στοιχεῖον· ἡ γὰρ γῆ μόνη ἀδιάλυτος εἰς ἄλλο σῶμα.

Ἀλλὰ μὴν οὐδ' ἐν τοῖς διαλυομένοις ἢ τῶν τριγώνων παραιώρησις εὐλογος. Συμβαίνει δὲ καὶ τοῦτο ἐν τῇ εἰς ἄλληλα μεταβάσει διὰ τὸ ἐξ ἀνίσων τῷ πλήθει συνεστάναι τριγώνων.

Ἔτι δ' ἀνάγκη τοῖς ταῦτα λέγουσιν οὐκ ἐκ σώματος ποιεῖν γένεσιν· ὅταν γὰρ ἐξ ἐπιπέδων γένηται, οὐκ ἐκ σώματος ἔσται γεγονός.

Πρὸς δὲ τούτοις ἀνάγκη μὴ πᾶν σῶμα λέγειν διαιρετόν, ἀλλὰ μάχεσθαι ταῖς ἀκριβεστάταις ἐπιστήμαις· αἱ μὲν γὰρ καὶ τὸ νοητὸν λαμβάνουσι διαιρετόν, αἱ μαθηματικαί, οἱ δὲ οὐδὲ τὸ αἰσθητὸν ἅπαν συγχωροῦσι διὰ τὸ βούλεσθαι σῶζειν τὴν ὑπόθεσιν. Ἀνάγκη γὰρ ὅσοι σχῆμα ποιοῦσιν ἐκάστου τῶν στοιχείων καὶ τούτῳ διορίζουσι τὰς οὐσίας αὐτῶν, ἀδιαίρετα ποιεῖν αὐτά· τῆς γὰρ πυραμίδος ἢ τῆς σφαίρας διαιρεθείσης πως οὐκ ἔσται τὸ λειπόμενον σφαῖρα ἢ πυραμῖς.

Ὡστε ἢ τὸ τοῦ πυρὸς μέρος οὐ πῦρ, ἀλλ' ἔσται τι πρότερον τοῦ (306b.) στοιχείου, διὰ τὸ πᾶν εἶναι ἢ στοιχεῖον ἢ ἐκστοιχείων· ἢ οὐχ

ἅπαν σῶμα διαιρετόν.

Κεφάλαιο 8

Ὅλως δὲ τὸ πειρᾶσθαι τὰ ἀπλᾶ σώματα σχηματίζειν ἄλογόν ἐστι, πρῶτον μὲν ὅτι συμβήσεται μὴ ἀναπληροῦσθαι τὸ ὅλον· ἐν μὲν γὰρ τοῖς ἐπιπέδοις τρία σχήματα δοκεῖ συμπληροῦν τὸν τόπον, τρίγωνον καὶ τετράγωνον καὶ ἐξάγωνον, ἐν δὲ τοῖς στερεοῖς δύο μόνον, πυραμὶς καὶ κύβος· ἀνάγκη δὲ πλείω τούτων λαμβάνειν διὰ τὸ πλείω τὰ στοιχεῖα ποιεῖν.

Ἐπειτα φαίνεται πάντα μὲν τὰ ἀπλᾶ σώματα σχηματιζόμενα τῷ περιέχοντι τόπῳ, μάλιστα δὲ τὸ ὕδωρ καὶ ὁ ἀήρ. Διαμένειν μὲν οὖν τὸ τοῦ στοιχείου σχῆμα ἀδύνατον· οὐ γὰρ ἂν ἦπτετο πανταχῇ τοῦ περιέχοντος τὸ ὅλον. Ἀλλὰ μὴν εἰ μεταρρυθμισθήσεται, οὐκέτι ἔσται ὕδωρ, εἴπερ τῷ σχήματι διέφερεν. Ὡστε φανερόν ὅτι οὐκ ἔστιν ὠρισμένα τὰ σχήματα αὐτῶν.

Ἄλλ' ἔοικεν ἡ φύσις αὐτῇ τοῦτο σημαίνειν ἡμῖν, ὃ καὶ κατὰ λόγον ἐστίν· ὥσπερ γὰρ ἐν τοῖς ἄλλοις αἰδεῖς καὶ ἄμορφον δεῖ τὸ ὑποκείμενον εἶναι (μάλιστα γὰρ ἂν οὕτω δύναιτο ρυθμίζεσθαι, καθάπερ ἐν τῷ Τιμαίῳ γέγραπται, τὸ πανδεχές), οὕτω καὶ τὰ στοιχεῖα δεῖ νομίζειν ὥσπερ ὕλην εἶναι τοῖς συνθέτοις· διὸ καὶ δύναται μεταβάλλειν εἰς ἄλληλα χωριζομένων τῶν κατὰ τὰ πάθη διαφορῶν.

Πρὸς δὲ τούτοις πῶς ἐνδέχεται γίνεσθαι σάρκα καὶ ὀστοῦν ἢ ὀτιοῦν τῶν συνεχῶν σωμάτων; οὔτε γὰρ ἐξ αὐτῶν τῶν στοιχείων ἐγγωρεῖ διὰ τὸ μὴ γίνεσθαι συνεχὲς ἐκ τῆς συνθέσεως, οὔτ' ἐκ τῶν ἐπιπέδων συντιθεμένων· τὰ γὰρ στοιχεῖα γεννᾶται τῇ συνθέσει καὶ οὐ τὰ ἐκ τῶν στοιχείων. Ὡστ' ἐάν τις ἀκριβολογεῖσθαι βούληται καὶ μὴ ἐκ παρόδου τοὺς λόγους ἀποδέχεσθαι τοὺς τοιούτους, ἀναιροῦντας ὅσεται τὴν γένεσιν ἐκ τῶν ὄντων.

Ἀλλὰ μὴν καὶ πρὸς τὰ πάθη τε καὶ τὰς δυνάμεις καὶ τὰς κινήσεις ἀσύμφωνα τὰ σχήματα τοῖς σώμασιν, εἰς ἃ μάλιστα βλέψαντες οὕτω διένειμαν. Οἷον ἐπεὶ τὸ πῦρ εὐκίνητόν ἐστι καὶ θερμαντικόν καὶ καυστικόν, οἱ μὲν ἐποίησαν αὐτὸ σφαῖραν, οἱ δὲ πυραμίδα· ταῦτα γὰρ εὐκίνητότατα μὲν διὰ τὸ ἐλαχίστων ἅπτεσθαι καὶ ἥκι(307a.) στα βεβηκέναι, θερμαντικώτατα δὲ καὶ καυστικώτατα, διότι τὸ μὲν ὅλον ἐστὶ γωνία, τὸ δὲ ὀξυγωνιώτατον, καίει δὲ καὶ θερμαίνει ταῖς γωνίαις, ὥς φασιν.

Πρῶτον μὲν οὖν κατὰ τὴν κίνησιν ἀμφοτέροι διημαρτήκασιν· εἰ

γὰρ καὶ ἔστιν εὐκίνητότατα ταῦτα τῶν σχημάτων, ἀλλ' οὐ τὴν τοῦ πυρὸς κίνησιν εὐκίνητα· ἡ μὲν γὰρ τοῦ πυρὸς ἄνω καὶ κατ' εὐθεΐαν, ταῦτα δ' εὐκίνητα κύκλῳ, τὴν καλουμένην κύλισιν. Ἐπειτ' εἰ ἔστιν ἡ γῆ κύβος διὰ τὸ βεβηκέναι καὶ μένειν, μένει δ' οὐχ οὗ ἔτυχεν ἀλλ' ἐν τῷ αὐτῆς τόπῳ, ἐκ δὲ τοῦ ἀλλοτρίου φέρεται μὴ κωλυομένη, καὶ τὸ πῦρ δὲ καὶ τὰ ἄλλα ὡσαύτως, δηλὸν ὅτι καὶ τὸ πῦρ καὶ ἕκαστον τῶν στοιχείων ἐν μὲν τῷ ἀλλοτρίῳ τόπῳ σφαῖρα ἔσται ἢ πυραμῖς, ἐν δὲ τῷ οἰκείῳ κύβος. Ἐτι δ' εἰ θερμαίνει καὶ καίει τὸ πῦρ διὰ τὰς γωνίας, ἅπαντα ἔσται τὰ στοιχεῖα θερμαντικά, μᾶλλον δ' ἴσως ἕτερον ἑτέρου· πάντα γὰρ ἔχει γωνίας, οἷον τό τε ὀκτάεδρον καὶ τὸ δωδεκάεδρον. (Δημοκρίτῳ δὲ καὶ ἡ σφαῖρα, ὡς γωνία τις οὔσα, τέμνει ὡς εὐκίνητον).

Ὡστε διοίσει τῷ μᾶλλον καὶ ἥττον. Τοῦτο δ' ὅτι ψεῦδος, φανερόν. Ἄμα δὲ συμβῆσεται καὶ τὰ μαθηματικὰ σώματα καίειν καὶ θερμαίνειν· ἔχει γὰρ κἄκεῖνα γωνίας, καὶ ἐνείσιν ἐν αὐτοῖς ἄτομοι καὶ σφαῖραι καὶ πυραμίδες, ἄλλως τε καὶ εἰ ἔστιν ἄτομα μεγέθη, καθάπερ φασίν. Εἰ γὰρ τὰ μὲν τὰ δὲ μὴ, λεκτέον τὴν διαφοράν, ἀλλ' οὐχ ἀπλῶς οὕτω λεκτέον ὡς λέγουσιν.

Ἐτι εἰ τὸ καιόμενον πυροῦται, τὸ δὲ πῦρ ἐστὶ σφαῖρα ἢ πυραμῖς, ἀνάγκη τὸ καιόμενον γίνεσθαι σφαίρας ἢ πυραμίδας. Τὸ μὲν οὖν τέμνειν καὶ διαιρεῖν ἔστω κατὰ λόγον συμβαῖνον τῷ σχήματι· τὸ δ' ἐξ ἀνάγκης τὴν πυραμίδα ποιεῖν πυραμίδας ἢ τὴν σφαῖραν σφαίρας παντελῶς ἄλογον, καὶ ὅμοιον ὥσπερ εἴ τις ἀξιοίῃ τὴν μάχαιραν εἰς μαχαίρας διαιρεῖν ἢ τὸν πρίονα εἰς πρίονας.

Ἐτι δὲ γελοῖον πρὸς τὸ διαιρεῖν μόνον ἀποδοῦναι τὸ σχῆμα τῷ πυρί· δοκεῖ γὰρ μᾶλλον συγκρίνειν καὶ συνορίζειν ἢ διακρίνειν. Διακρίνει μὲν γὰρ τὰ μὴ (307b.) ὁμόφυλα, συγκρίνει δὲ τὰ ὁμόφυλα· καὶ ἡ μὲν σύγκρισις καθ' αὐτό ἐστι (τὸ γὰρ συνορίζειν καὶ ἐνοῦν τοῦ πυρός), ἡ δὲ διάκρισις κατὰ συμβεβηκός (συγκρίνον γὰρ τὸ ὁμόφυλον ἐξαίρει τὸ ἀλλότριον). Ὡστ' ἢ πρὸς ἄμφω ἐχρῆν ἀποδοῦναι ἢ μᾶλλον ἐπὶ τὸ συγκρίνειν.

Πρὸς δὲ τούτοις, ἐπεὶ τὸ θερμὸν καὶ τὸ ψυχρὸν ἐναντία τῇ δυνάμει, ἀδύνατον ἀποδοῦναι τῷ ψυχρῷ σχῆμά τι· δεῖ γὰρ ἐναντίον εἶναι τὸ ἀποδιδόμενον, οὐθὲν δ' ἐναντίον ἐστὶ σχῆμα σχήματι. Διὸ καὶ πάντες ἀπολελοίπασι τοῦτο· καίτοι προσῆκεν ἢ πάντα ἀφορίσαι σχήμασιν ἢ μηδέν. Ἐνιοὶ δὲ περὶ τῆς δυνάμεως αὐτοῦ πειραθέντες εἶπεῖν ἐναντία λέγουσιν αὐτοὶ αὐτοῖς.

Φασὶ γὰρ εἶναι ψυχρὸν τὸ μεγαλομερές διὰ τὸ συνθλίβειν καὶ μὴ διένειν διὰ τῶν πόρων. Δῆλον τοίνυν ὅτι καὶ τὸ θερμὸν ἂν εἴη τὸ διόν· τοιοῦτον δ' αἰετὶ τὸ λεπτομερές. Ὡστε συμβαίνει μικρότητι καὶ μεγέθει διαφέρειν τὸ θερμὸν καὶ τὸ ψυχρὸν, ἀλλ' οὐ τοῖς σχήμασιν. Ἐτι δ' εἰ ἄνισοι αἱ πυραμίδες, αἱ μεγάλαι ἂν εἶεν οὐ πῦρ οὐδ' αἴτιον τὸ σχῆμα τοῦ καίειν, ἀλλὰ τὸ ὑναντίον.

Ὅτι μὲν οὖν οὐ τοῖς σχήμασι διαφέρει τὰ στοιχεῖα, φανερὸν ἐκ τῶν εἰρημένων· ἐπεὶ δὲ κυριώταται διαφοραὶ τῶν σωμάτων αἷ τε κατὰ τὰ πάθη καὶ τὰ ἔργα καὶ τὰς δυνάμεις (ἐκάστου γὰρ εἶναί φαμεν τῶν φύσει καὶ ἔργα καὶ πάθη καὶ δυνάμεις), πρῶτον ἂν εἴη περὶ τούτων λεκτέον, ὅπως θεωρήσαντες ταῦτα λάβωμεν τὰς ἐκάστου πρὸς ἕκαστον διαφοράς.

Κεφάλαιο 1

Περὶ δὲ βαρέος καὶ κούφου, τί τ' ἐστὶν ἐκάτερον καὶ τίς ἡ φύσις αὐτῶν, σκεπτέον, καὶ διὰ τίν' αἰτίαν ἔχουσι τὰς δυνάμεις ταύτας. Ἔστι γὰρ ἡ περὶ αὐτῶν θεωρία τοῖς περὶ κινήσεως λόγοις οἰκεία· βαρὺ γὰρ καὶ κοῦφον τῷ δύνασθαι κινεῖσθαι φυσικῶς πως λέγομεν. (Ταῖς δὲ ἐνεργείαις ὀνόματ' αὐτῶν οὐ κεῖται, πλὴν εἴ τις οἶοιτο τὴν ῥοπὴν εἶναι τοιοῦτον.) (308a.) Διὰ δὲ τὸ τὴν φυσικὴν μὲν εἶναι πραγματείαν περὶ κίνησιν, ταῦτα δ' ἔχειν ἐν ἑαυτοῖς οἷον ζώπυρ' ἅττα κινήσεως, πάντες μὲν χρῶνται ταῖς δυνάμεσιν αὐτῶν, οὐ μὴν διωρίκασί γε, πλὴν ὀλίγων. Ἰδόντες οὖν πρῶτον τὰ παρὰ τῶν ἄλλων εἰρημένα, καὶ διαπορήσαντες ὅσα πρὸς τὴν σκέψιν ταύτην διελεῖν ἀναγκαῖον, οὕτω καὶ τὸ φαινόμενον ἡμῖν εἴπωμεν περὶ αὐτῶν.

Λέγεται δὴ τὸ μὲν ἀπλῶς βαρὺ καὶ κοῦφον, τὸ δὲ πρὸς ἕτερον· τῶν γὰρ ἐχόντων βάρος φαμέν τὸ μὲν εἶναι κουφότερον, τὸ δὲ βαρύτερον, οἷον ξύλου χαλκόν. Περὶ μὲν οὖν τῶν ἀπλῶς λεγομένων οὐδὲν εἴρηται παρὰ τῶν πρότερον, περὶ δὲ τῶν πρὸς ἕτερον· οὐ γὰρ λέγουσι τί ἐστὶ τὸ βαρὺ καὶ τί τὸ κοῦφον, ἀλλὰ τί τὸ βαρύτερον καὶ κουφότερον ἐν τοῖς ἔχουσι βάρος. Μᾶλλον δ' ἔσται δῆλον ὃ λέγομεν ὧδε. Τὰ μὲν γὰρ ἀεὶ πέφυκεν ἀπὸ τοῦ μέσου φέρεσθαι, τὰ δ' ἀεὶ πρὸς τὸ μέσον. Τούτων δὲ τὸ μὲν ἀπὸ τοῦ μέσου φερόμενον ἄνω λέγω φέρεσθαι, κάτω δὲ τὸ πρὸς τὸ μέσον.

Ἄτοπον γὰρ τὸ μὴ νομίζειν εἶναί τι ἐν τῷ οὐρανῷ τὸ μὲν ἄνω τὸ δὲ κάτω, καθάπερ τινὲς ἀξιουῖσιν· οὐ γὰρ εἶναι τὸ μὲν ἄνω τὸ δὲ κάτω φασίν, εἴπερ πάντῃ ὁμοίος ἐστὶ, καὶ πανταχόθεν ἀντίπους ἐστὶ πορευόμενος ἕκαστος αὐτὸς αὐτῷ. Ἡμεῖς δὲ τὸ τοῦ παντὸς ἔσχατον ἄνω λέγομεν, ὃ καὶ κατὰ τὴν θέσιν ἐστὶν ἄνω καὶ τῇ φύσει πρῶτον· ἐπεὶ δ' ἐστὶ τι τοῦ οὐρανοῦ ἔσχατον καὶ μέσον, δῆλον ὅτι ἐστὶ καὶ ἄνω καὶ κάτω, ὥσπερ καὶ οἱ πολλοὶ λέγουσι, πλὴν οὐχ ἱκανῶς.

Τούτου δ' αἴτιον ὅτι νομίζουσιν οὐχ ὅμοιον εἶναι πάντῃ τὸν οὐρανόν, ἀλλ' ἐν εἶναι μόνον τὸ ὑπὲρ ἡμᾶς ἡμισφαίριον, ἐπεὶ προσυπολαμβάνοντες καὶ κύκλῳ τοιοῦτον, καὶ τὸ μέσον ὁμοίως ἔχει πρὸς ἅπαν, τὸ μὲν ἄνω φήσουσιν εἶναι, τὸ δὲ μέσον κάτω.

Ἀπλῶς μὲν οὖν κοῦφον λέγομεν τὸ ἄνω φερόμενον καὶ πρὸς τὸ ἔσχατον, βαρὺ δὲ ἀπλῶς τὸ κάτω καὶ πρὸς τὸ μέσον· πρὸς ἄλλο δὲ κοῦφον καὶ κουφότερον, ὅτε, δυοῖν ἐχόντων βάρος καὶ τὸν ὄγκον

ἴσον, κάτω φέρεται θάτερον φύσει θᾶπτον.

Κεφάλαιο 2

Τῶν δὴ πρότερον ἐλθόντων ἐπὶ τὴν περὶ τούτων σκέψιν σχεδὸν οἱ πλεῖστοι περὶ τῶν οὕτω βαρέων καὶ κούφων εἰρήκασι μόνον, ὅσων ἀμφοτέρων ἐχόντων βάρος θάτερόν ἐστι (308b.) κουφότερον· οὕτω δὲ διελθόντες οἴονται διωρίσθαι καὶ περὶ τοῦ ἀπλῶς κούφου καὶ βαρέος· ὁ δὲ λόγος αὐτοῖς οὐκ ἐφαρμόττει. Δῆλον δ' ἔσται τοῦτο μᾶλλον προελθοῦσιν.

Λέγουσι γὰρ τὸ κουφότερον καὶ βαρύτερον οἱ μὲν ὥσπερ ἐν τῷ Τιμαίῳ τυγχάνει γεγραμμένον, βαρύτερον μὲν τὸ ἐκ πλειόνων τῶν αὐτῶν συνεστός, κουφότερον δὲ τὸ ἐξ ἐλαττόνων, ὥσπερ μόλιβδου μόλιβδος ὁ πλείων βαρύτερος καὶ χαλκοῦ χαλκός. Ὅμοίως δὲ καὶ τῶν ἄλλων τῶν ὁμοειδῶν ἕκαστον· ἐν ὑπεροχῇ γὰρ τῶν ἴσων μορίων βαρύτερον ἕκαστόν ἐστιν. Τὸν αὐτὸν δὲ τρόπον καὶ ξύλου μόλιβδόν φασιν· ἐκ τινων γὰρ τῶν αὐτῶν εἶναι πάντα τὰ σώματα καὶ μιᾶς ὕλης, ἀλλ' οὐ δοκεῖν.

Οὕτω δὴ διωρισμένων οὐκ εἴρηται περὶ τοῦ ἀπλῶς κούφου καὶ βαρέος· νῦν γὰρ τὸ μὲν πῦρ ἀεὶ κούφον καὶ ἄνω φέρεται, ἡ δὲ γῆ καὶ τὰ γεγραῖα πάντα κάτω καὶ πρὸς τὸ μέσον. Ὡστ' οὐ δι' ὀλιγότητα τῶν τριγώνων, ἐξ ὧν συνεστάναι φασὶν ἕκαστον αὐτῶν, τὸ πῦρ ἄνω φέρεσθαι πέφυκεν· τὸ τε γὰρ πλεῖον ἦττον ἂν ἐφέρετο καὶ βαρύτερον ἦν ἐκ πλειόνων ὃν τριγώνων. Νῦν δὲ φαίνεται τούναντίον· ὅσῳ γὰρ ἂν ἡ πλεῖον, κουφότερόν ἐστι καὶ ἄνω φέρεται θάπτον. Καὶ ἄνωθεν δὲ κάτω τὸ ὀλίγον οἰσθήσεται θάπτον πῦρ, τὸ δὲ πολὺ βραδύτερον.

Πρὸς δὲ τούτοις, ἐπεὶ τὸ μὲν ἐλάσσῳ ἔχον τὰ ὁμογενῆ κουφότερον εἶναί φασι, τὸ δὲ πλείῳ βαρύτερον, ἀέρα δὲ καὶ ὕδωρ καὶ πῦρ ἐκ τῶν αὐτῶν εἶναι τριγώνων, ἀλλὰ διαφέρειν ὀλιγότητι καὶ πλήθει, διὸ τὸ μὲν αὐτῶν εἶναι κουφότερον τὸ δὲ βαρύτερον, ἔσται τι πλῆθος ἀέρος ὃ βαρύτερον ὕδατος ἔσται. Συμβαίνει δὲ πᾶν τούναντίον· ἀεὶ τε γὰρ ὁ πλείων ἀήρ ἄνω φέρεται μᾶλλον, καὶ ὅλως ὅτιοῦν μέρος ἀέρος ἄνω φέρεται ἐκ τοῦ ὕδατος.

Οἱ μὲν οὖν τοῦτον τὸν τρόπον περὶ κούφου καὶ βαρέος διώρισαν· τοῖς δ' οὐχ ἱκανὸν ἔδοξεν οὕτω διελεῖν, ἀλλὰ καίπερ ὄντες ἀρχαιότεροι ταῖς ἡλικίαις καινότερως ἐνόησαν περὶ τῶν νῦν λεχθέντων. Φαίνεται γὰρ ἓναι τὸν ὄγκον μὲν ἐλάττω τῶν σωμάτων, ὄντα δὲ βαρύτερα. Δῆλον οὖν ὡς οὐχ ἱκανὸν τὸ φάσκειν ἐξ ἴσων

συγκεῖσθαι τῶν πρώτων τὰ ἰσοβαρῆ· ἴσα γὰρ ἂν ἦν τὸν ὄγκον. Τὰ δὲ πρῶτα καὶ ἄτομα τοῖς μὲν ἐπίπεδα λέγουσιν ἐξ ὧν συνέστηκε τὰ βάρος ἔχοντα (309a.) τῶν σωμάτων, ἄτοπον τὸ φάναι· τοῖς δὲ στερεὰ μᾶλλον ἐνδέχεται λέγειν τὸ μείζον εἶναι βαρύτερον αὐτῶν. Τῶν δὲ συνθέτων, ἐπειδήπερ οὐ φαίνεται τοῦτον ἕκαστον ἔχειν τὸν τρόπον, ἀλλὰ πολλὰ βαρύτερα ὀρῶμεν ἐλάττω τὸν ὄγκον ὄντα, καθάπερ ἐρίου χαλκόν, ἕτερον τὸ αἷτιον οἶονταί τε καὶ λέγουσιν ἔνιοι· τὸ γὰρ κενὸν ἐμπεριλαμβανόμενον κουφίζειν τὰ σώματά φασι καὶ ποιεῖν ἔστιν ὅτε τὰ μείζω κουφότερα· πλεῖον γὰρ ἔχειν κενόν. Διὰ τοῦτο γὰρ καὶ τὸν ὄγκον εἶναι μείζω συγκείμενα πολλάκις ἐξ ἴσων στερεῶν ἢ καὶ ἐλαττόνων. Ὅλως δὲ καὶ παντὸς αἷτιον εἶναι τοῦ κουφοτέρου τὸ πλεῖον ἐνυπάρχειν κενόν.

Λέγουσι μὲν οὖν τοῦτον τὸν τρόπον, ἀνάγκη δὲ προσθεῖναι τοῖς οὕτω διορίζουσι μὴ μόνον τὸ κενὸν ἔχειν πλεῖον, ἂν ἢ κουφότερον, ἀλλὰ καὶ τὸ στερεὸν ἐλαττον· εἰ γὰρ ὑπερέξει τῆς τοιαύτης ἀναλογίας, οὐκ ἔσται κουφότερον. Διὰ γὰρ τοῦτο καὶ τὸ πῦρ εἶναι φασι κουφότατον, ὅτι πλεῖστον ἔχει κενόν. Συμβήσεται οὖν μικροῦ πυρὸς πολλὸν χρυσὸν πλεῖον ἔχοντα τὸ κενὸν εἶναι κουφότερον, εἰ μὴ καὶ στερεὸν ἔξει πολλαπλάσιον· ὥστε τοῦτο λεκτέον. Ἐνιοι μὲν οὖν τῶν μὴ φασκόντων εἶναι κενὸν οὐδὲν διώρισαν περὶ κούφου καὶ βαρέος, οἷον Ἀναξαγόρας καὶ Ἐμπεδοκλῆς· οἱ δὲ διορίσαντες μὲν, οὐ φάσκοντες δὲ εἶναι κενόν, οὐδὲν εἶπον διὰ τί τὰ μὲν ἀπλῶς κοῦφα τὰ δὲ βαρέα τῶν σωμάτων, καὶ φέρεται τὰ μὲν ἀεὶ ἄνω τὰ δὲ κάτω, οὐδὲ περὶ τοῦ ἔνια μείζω τὸν ὄγκον ὄντα κουφότερα τῶν ἐλαττόνων εἶναι σωμάτων οὐδὲν ἐπεμνήσθησαν, οὐδὲ δῆλον πῶς ἐκ τῶν εἰρημένων ὁμολογούμενα τοῖς φαινομένοις συμβήσεται λέγειν αὐτοῖς.

Ἀναγκαῖον δὲ καὶ τοῖς περὶ τῆς τοῦ πυρὸς κουφότητος αἰτιωμένοις τὸ πολὺ κενὸν ἔχειν σχεδὸν ἐν ταῖς αὐταῖς ἐνέχεσθαι δυσχερεῖαις. Ἐλαττον μὲν γὰρ ἔξει στερεὸν τῶν ἄλλων σωμάτων, καὶ τὸ κενὸν πλεῖον· ἀλλ' ὅμως ἔσται τι πυρὸς πλῆθος ἐν ᾧ τὸ στερεὸν καὶ τὸ πλήρες ὑπερβάλλει τῶν περιεχομένων στερεῶν ἐν τινι μικρῷ πλήθει γῆς. Ἐὰν δὲ φῶσι καὶ τὸ κενόν, πῶς διοριούσι τὸ ἀπλῶς βαρὺ; Ἡ γὰρ τῷ πλεῖον στερεὸν ἔχειν ἢ τῷ ἐλαττον κενόν. Εἰ μὲν οὖν τοῦτο (309b.) φήσουσιν, ἔσται τι πλῆθος γῆς οὕτως ὀλίγον ἐν ᾧ στερεὸν ἔσται ἐλαττον ἢ ἐν πολλῷ πλήθει πυρός. Ὅμοιως δὲ καὶ τῷ κενῷ διορίσωσιν, ἔσται τι κουφότερον τοῦ ἀπλῶς κούφου καὶ φερομένου ἀεὶ ἄνω αὐτὸ φερόμενον ἀεὶ κάτω. Τοῦτο δὲ ἀδύνατον· τὸ γὰρ ἀπλῶς

κοῦφον ἀεὶ κουφότερον τῶν ἐχόντων βάρος καὶ κάτω φερομένων, τὸ δὲ κουφότερον οὐκ ἀεὶ κοῦφον διὰ τὸ λέγεσθαι καὶ ἐν τοῖς ἔχουσι βάρος ἕτερον ἐτέρου κουφότερον, οἷον γῆς ὕδωρ.

Ἀλλὰ μὴν οὐδὲ τῷ τὸ κενὸν ἀνάλογον ἔχειν πρὸς τὸ πλήρες ἱκανὸν λῦσαι τὴν λεγομένην νῦν ἀπορίαν. Συμβήσεται γὰρ καὶ τοῦτον τὸν τρόπον λέγουσιν ὡσαύτως τὸ ἀδύνατον. Ἐν γὰρ τῷ πλείονι πυρὶ καὶ ἐν τῷ ἐλάττονι τὸν αὐτὸν ἔξει λόγον τὸ στερεὸν πρὸς τὸ κενόν. Φέρεται δὲ γε θᾶπτον τὸ πλεῖον ἄνω πῦρ τοῦ ἐλάττονος, καὶ κάτω δὲ πάλιν ὡσαύτως ὁ πλείων χρυσὸς καὶ ὁ μόλιβδος· ὁμοίως δὲ καὶ τῶν ἄλλων ἕκαστον τῶν ἐχόντων βάρος. Οὐκ ἔδει δὲ τοῦτο συμβαίνειν, εἴπερ τούτῳ διώρισται τὸ βαρὺ καὶ κοῦφον.

Ἄτοπον δὲ καὶ εἰ διὰ τὸ κενὸν μὲν ἄνω φέρονται, τὸ δὲ κενὸν αὐτὸ μὴ. Ἀλλὰ μὴν εἴ γε τὸ μὲν κενὸν ἄνω πέφυκε φέρεσθαι, κάτω δὲ τὸ πλήρες, καὶ διὰ τοῦτο τοῖς ἄλλοις αἰτία τῆς φορᾶς ἑκατέρας, οὐθὲν περὶ τῶν συνθέτων ἔδει σκοπεῖν διὰ τί τὰ μὲν κοῦφα τὰ δὲ βαρέα τῶν σωμάτων, ἀλλὰ περὶ τούτων αὐτῶν εἰπεῖν διὰ τί τὸ μὲν κοῦφον, τὸ δ' ἔχει βάρος, ἔτι δὲ τί τὸ αἴτιον τοῦ μὴ διεστάναι τὸ πλήρες καὶ τὸ κενόν.

Ἄλογον δὲ καὶ τὸ χώραν τῷ κενῷ ποιεῖν, ὥσπερ οὐκ αὐτὸ χώραν τινὰ οὔσαν· ἀναγκαῖον δ', εἴπερ κινεῖται τὸ κενόν, εἶναι αὐτοῦ τινὰ τόπον, ἐξ οὗ μεταβάλλει καὶ εἰς ὄν.

Πρὸς δὲ τούτοις τί τῆς κινήσεως αἴτιον; Οὐ γὰρ δὴ τό γε κενόν· οὐ γὰρ αὐτὸ κινεῖται μόνον, ἀλλὰ καὶ τὸ στερεόν.

Ὡσαύτως δὲ συμβαίνει καὶ τις ἄλλως διορίζῃ, μεγέθει καὶ σμικρότητι ποιῶν βαρύτερα καὶ κουφότερα ῥων, καὶ ἄλλον ὄντινον τρόπον κατασκευάζων, μόνον δὲ τὴν αὐτὴν ὕλην ἅπασιν ἀποδιδούς, ἢ πλείους μὲν ὑπεναντίας δὲ μόνον.

Μιᾶς μὲν γὰρ οὔσης οὐκ ἔσται τὸ ἀπλῶς βαρὺ καὶ κοῦφον, ὥσπερ τοῖς ἐκ τῶν τριγώνων συνιστάσιν· ἐναντίας δέ, (310a.) καθάπερ οἱ τὸ κενὸν καὶ πλήρες, οὐκ ἔσται τὰ μεταξὺ τῶν ἀπλῶς βαρέων καὶ κούφων διὰ τίν' αἰτίαν βαρύτερα καὶ κουφότερα ἀλλήλων καὶ τῶν ἀπλῶν ἐστιν.

Τὸ δὲ μεγέθει καὶ μικρότητι διορίζειν πεπλασμένῳ μὲν ἔοικε μᾶλλον τῶν πρότερον, ὅτι δ' ἐνδέχεται καθ' ἕκαστον ποιεῖν διαφορὰς τῶν τεττάρων στοιχείων, ἀσφαλεστέως ἔχει πρὸς τὰς ἔμπροσθεν ἀπορίας.

Τῷ δὲ μίαν ποιεῖν φύσιν τῶν τῷ μεγέθει διαφερόντων ἀναγκαῖον ταὐτὸν συμβαίνειν τοῖς μίαν ποιοῦσιν ὕλην, καὶ μήθ' ἀπλῶς εἶναι μηθὲν κοῦφον μήτε φερόμενον ἄνω, ἀλλ' ἢ ὑστερίζον ἢ ἐκθλιβόμενον, καὶ πολλὰ μικρὰ ὀλίγων μεγάλων βαρύτερα εἶναι. Εἰ δὲ τοῦτο ἔσται, συμβήσεται πολὺν ἀέρα καὶ πολὺ πῦρ ὕδατος εἶναι βαρύτερα καὶ γῆς ὀλίγης. Τοῦτο δ' ἐστὶν ἀδύνατον.

Κεφάλαιο 3

Τὰ μὲν οὖν παρὰ τῶν ἄλλων εἰρημένα ταῦτα, καὶ τοῦτον λέγεται τὸν τρόπον.

Ἡμεῖς δὲ λέγωμεν πρῶτον διορίσαντες περὶ οὗ μάλιστα ἀποροῦσί τινες, διὰ τί τὰ μὲν ἄνω φέρεται τὰ δὲ κάτω τῶν σωμάτων ἀεὶ κατὰ φύσιν, τὰ δὲ καὶ ἄνω καὶ κάτω, μετὰ δὲ ταῦτα περὶ βαρέος καὶ κούφου καὶ τῶν συμβαινόντων περὶ αὐτὰ παθημάτων, διὰ τίν' αἰτίαν ἕκαστον γίνεται.

Περὶ μὲν οὖν τοῦ φέρεσθαι εἰς τὸν αὐτοῦ τρόπον ἕκαστον ὁμοίως ὑποτῶν ἐτέληπτόν ὥσπερ καὶ περὶ τὰς ἄλλας γενέσεις καὶ μεταβολάς. Ἐπεὶ γάρ εἰσι τρεῖς αἱ κινήσεις (ἡ μὲν κατὰ μέγεθος, ἡ δὲ κατ' εἶδος, ἡ δὲ κατὰ τόπον), ἐν ἐκάστη τούτων τὴν μεταβολὴν ὁρῶμεν γινομένην ἐκ τῶν ἐναντίων εἰς τὰ ἐναντία καὶ τὰ μετὰξὺ, καὶ οὐκ εἰς τὸ τυχὸν τῷ τυχόντι μεταβολὴν οὔσαν· ὁμοίως δὲ οὐδὲ κινητικὸν τὸ τυχὸν τοῦ τυχόντος· ἀλλ' ὥσπερ τὸ ἀλλοιωτὸν καὶ τὸ αὐξητὸν ἕτερον, οὕτω καὶ τὸ ἀλλοιωτικὸν καὶ τὸ αὐξητικόν. Τὸν αὐτὸν δὴ τρόπον ὑποληπτέον καὶ τὸ κατὰ τόπον κινητικὸν καὶ κινητὸν οὐ τὸ τυχὸν εἶναι τοῦ τυχόντος.

Εἰ οὖν εἰς τὸ ἄνω καὶ τὸ κάτω κινητικὸν μὲν τὸ βαρυντικὸν καὶ τὸ κουφιστικόν, κινητὸν δὲ τὸ δυνάμει βαρὺ καὶ κούφον, τὸ δ' εἰς τὸν αὐτοῦ τρόπον φέρεσθαι ἕκαστον τὸ εἰς τὸ αὐτοῦ εἶδος ἐστὶ φέρε(310b.) σθαι (καὶ ταύτῃ μᾶλλον ἢ τις ὑπολάβοι ὃ ἔλεγον οἱ ἀρχαῖοι, ὅτι τὸ ὅμοιον φέροισι πρὸς τὸ ὅμοιον. Τοῦτο γὰρ οὐ συμβαίνει πάντως· οὐ γὰρ ἐάν τις μεταθῇ τὴν γῆν οὗ νῦν ἢ σελήνην, οἰσθήσεται τῶν μορίων ἕκαστον πρὸς αὐτήν, ἀλλ' ὅπου περ καὶ νῦν. Ὅλως μὲν οὖν τοῖς ὁμοίοις καὶ ἀδιαφόροις ὑπὸ τῆς αὐτῆς κινήσεως ἀνάγκη τοῦτο συμβαίνειν, ὥσθ' ὅπου πέφυκεν ἓν τι φέρεσθαι μόριον, καὶ τὸ πᾶν. Ἐπεὶ δ' ὁ τόπος ἐστὶ τὸ τοῦ περιέχοντος πέρασ, περιέχει δὲ πάντα τὰ κινούμενα ἄνω καὶ κάτω τό τε ἔσχατον καὶ τὸ μέσον, τοῦτο δὲ τρόπον τινὰ γίγνεται τὸ εἶδος τοῦ περιεχομένου, τὸ εἰς τὸν αὐτοῦ τρόπον φέρεσθαι πρὸς τὸ ὁμοίον ἐστὶ φέρεσθαι· τὰ γὰρ ἐφεξῆς ὁμοιά ἐστιν ἀλλήλοις, οἷον ὕδωρ ἀέρι καὶ ἀήρ πυρί. Ἀνάπαλιν δὲ λέγειν τοῖς μέσοις ἐστὶ, τοῖς δ' ἄκροις οὐ, οἷον ἀέρα μὲν ὕδατι, ὕδωρ δὲ γῇ· ἀεὶ γὰρ τὸ ἀνώτερον πρὸς τὸ ὑφ' αὐτὸ, ὡς εἶδος πρὸς ὕλην, οὕτως ἔχει πρὸς ἄλληλα), τὸ δὲ ζητεῖν διὰ τί φέρεται τὸ

πῦρ ἄνω καὶ ἡ γῆ κάτω, τὸ αὐτὸ ἐστὶ καὶ διὰ τί τὸ ὑγιαστὸν ἂν κινῆται καὶ μεταβάλλῃ ἢ ὑγιαστὸν, εἰς ὑγίειαν ἔρχεται ἀλλ' οὐκ εἰς λευκότητα. Ὅμοίως δὲ καὶ τᾶλλα πάντα τὰ ἀλλοιωτά. Ἀλλὰ μὴν καὶ τὸ αὐξητὸν ὅταν μεταβάλλῃ ἢ αὐξητὸν, οὐκ εἰς ὑγίειαν ἔρχεται ἀλλ' εἰς μεγέθους ὑπεροχὴν. Ὅμοίως δὲ καὶ τούτων ἕκαστον τὸ μὲν ἐν τῷ ποιῶ, τὸ δ' ἐν τῷ ποσῶ μεταβάλλει, καὶ ἐν τόπῳ τὰ μὲν κοῦφα ἄνω, τὰ δὲ βαρέα κάτω.

Πλὴν ὅτι τὰ μὲν ἐν αὐτοῖς δοκεῖ ἔχειν ἀρχὴν τῆς μεταβολῆς (λέγω δὲ τὸ βαρὺ καὶ τὸ κοῦφον), τὰ δ' οὐ, ἀλλ' ἔξωθεν, οἷον τὸ ὑγιαστὸν καὶ τὸ αὐξητὸν. Καίτοι ἐνίοτε καὶ ταῦτα ἐξ αὐτῶν μεταβάλλει, καὶ μικρᾶς γενομένης ἐν τοῖς ἔξω κινήσεως τὸ μὲν εἰς ὑγίειαν ἔρχεται, τὸ δ' εἰς αὐξήν· καὶ ἐπεὶ ταῦτόν τὸ ὑγιαστὸν καὶ τὸ νόσου δεκτικόν, ἐὰν μὲν κινήθῃ ἢ ὑγιαστὸν, εἰς ὑγίειαν φέρεται, ἐὰν δ' ἢ νοσερόν, εἰς νόσον.

Μᾶλλον δὲ τὸ βαρὺ καὶ τὸ κοῦφον τούτων ἐν ἑαυτοῖς ἔχειν φαίνεται τὴν ἀρχὴν διὰ τὸ ἐγγύτατα τῆς οὐσίας εἶναι τὴν τούτων ὕλην· σημεῖον δ' ὅτι ἡ φορὰ ἀπολελυμένων ἐστὶ, καὶ γενέσει ὑστάτη τῶν κινήσεων, ὥστε πρώτη (311a.) ἂν εἴη κατὰ τὴν οὐσίαν αὕτη ἡ κίνησις. Ὅταν μὲν οὖν γίγνηται ἐξ ὕδατος ἀήρ καὶ ἐκ βαρέος κοῦφον, ἔρχεται εἰς τὸ ἄνω.

Ἄμα δ' ἐστὶ κοῦφον, καὶ οὐκέτι γίνεται, ἀλλ' ἐκεῖ ἐστίν. Φανερόν δὴ ὅτι δυνάμει ὄν, εἰς ἐντελέχειαν ἰὼν ἔρχεται ἐκεῖ καὶ εἰς τὸ τοσοῦτον καὶ τὸ τοιοῦτον, οὗ ἡ ἐντελέχεια καὶ ὅσου καὶ οἷου [καὶ ὅπου]. Τὸ δ' αὐτὸ αἷτιον καὶ τοῦ ἤδη ὑπάρχοντα καὶ ὄντα γῆν καὶ πῦρ κινεῖσθαι εἰς τοὺς αὐτῶν τόπους μηδενὸς ἐμποδίζοντος. Καὶ γὰρ ἡ τροφή, ὅταν τὸ κωλῦον, καὶ τὸ ὑγιαστὸν, ὅταν τὸ ἐπίσχον μὴ ἦ, φέρεται εὐθύς. Κινεῖ δὲ τό τε ἐξ ἀρχῆς ποιῆσαν καὶ τὸ ὑποσπᾶσαν ἢ ὅθεν ἀπεπῆδησεν, καθάπερ εἴρηται ἐν τοῖς πρώτοις λόγοις, ἐν οἷς διωρίζομεν ὅτι οὐθέν τούτων αὐτὸ ἑαυτὸ κινεῖ.

Διὰ τίνα μὲν οὖν αἰτίαν φέρεται τῶν φερομένων ἕκαστον, καὶ τὸ φέρεσθαι εἰς τὸν αὐτοῦ τόπον τί ἐστίν, εἴρηται.

Κεφάλαιο 4

Τὰς δὲ διαφορὰς καὶ τὰ συμβαίνοντα περὶ αὐτὰ νῦν λέγωμεν. Πρῶτον μὲν οὖν διωρίσθω, καθάπερ φαίνεται πᾶσι, βαρὺ μὲν ἀπλῶς τὸ πᾶσιν ὑφίστάμενον, κοῦφον δὲ τὸ πᾶσιν ἐπιπολάζον. Ἀπλῶς δὲ λέγω εἰς τε τὸ γένος βλέπων, καὶ ὅσοις μὴ ἀμφοτέρα ὑπάρχει· οἷον φαίνεται πυρὸς μὲν τὸ τυχὸν μέγεθος ἄνω φερόμενον, ἐὰν μὴ τι τύχη κωλῶν ἕτερον, γῆς δὲ κάτω· τὸν αὐτὸν δὲ τρόπον καὶ θάπτον τὸ πλεῖον.

Ἄλλως δὲ βαρὺ καὶ κοῦφον, οἷς ἀμφοτέρα ὑπάρχει· καὶ γὰρ ἐπιπολάζουσι τισι καὶ ὑφίστανται, καθάπερ ἀήρ καὶ ὕδωρ· ἀπλῶς μὲν γὰρ οὐδέτερον τούτων κοῦφον ἢ βαρὺ· γῆς μὲν γὰρ ἄμφω κουφότερα (ἐπιπολάζει γὰρ αὐτῇ τὸ τυχὸν αὐτῶν μόριον), πυρὸς δὲ βαρύτερα (ὑφίσταται γὰρ αὐτῶν ὅποσον ἂν ἦ μόριον), πρὸς ἑαυτὰ δὲ ἀπλῶς τὸ μὲν βαρὺ τὸ δὲ κοῦφον· ἀήρ μὲν γὰρ ὅποσος ἂν ἦ, ἐπιπολάζει ὕδατι, ὕδωρ δὲ ὅποσον ἂν ἦ, ἀέρι ὑφίσταται.

Ἐπεὶ δὲ καὶ τῶν ἄλλων τὰ μὲν ἔχει βάρος τὰ δὲ κουφότητα, δηλονότι τούτων μὲν αἰτία πάντων ἢ ἐν τοῖς ἀσυνθέτοις διαφορὰ· κατὰ γὰρ τὸ ἐκείνων τετυχηκέναι τοῦ μὲν πλεῖον τοῦ δ' ἔλαττον, ἔσται τὰ μὲν κοῦφα τὰ δὲ βαρέα τῶν σωμάτων. Ὡστε περὶ ἐκείνων λεκτέον· τᾶλλα γὰρ ἀκολουθεῖ τοῖς πρώτοις, ὅπερ ἔφαμεν χρῆναι ποιεῖν καὶ τοὺς διὰ τὸ πληρεῖς τὸ βαρὺ λέγοντας (311b.) καὶ διὰ τὸ κενὸν τὸ κοῦφον.

Συμβαίνει δὴ μὴ πανταχοῦ ταῦτα βαρέα δοκεῖν εἶναι καὶ κοῦφα διὰ τὴν τῶν πρώτων διαφοράν· λέγω δ' οἷον ἐν μὲν ἀέρι βαρύτερον ἔσται ταλαντιαῖον ξύλον μολὶβδου μναϊαίου, ἐν δὲ ὕδατι κουφότερον· αἴτιον δ' ὅτι πάντα βάρος ἔχει πλὴν πυρὸς καὶ κουφότητα πλὴν γῆς.

Γῆν μὲν οὖν καὶ ὅσα γῆς ἔχει πλεῖστον, πανταχοῦ βάρος ἔχειν ἀναγκαῖον, ὕδωρ δὲ πανταχοῦ πλὴν ἐν γῇ, ἀέρα δὲ πλὴν ἐν ὕδατι καὶ γῇ· ἐν τῇ αὐτοῦ γὰρ χώρα πάντα βάρος ἔχει πλὴν πυρός, καὶ ὁ ἀήρ. Σημεῖον δ' ὅτι ἔλκει πλεῖον ὁ πεφυσημένος ἀσκὸς τοῦ κενοῦ. Ὡστ' εἴ τι ἀέρος ἔχει πλεῖον ἢ γῆς καὶ ὕδατος, ἐν μὲν ὕδατι ἐνδέχεται κουφότερον εἶναί τινος, ἐν δὲ ἀέρι βαρύτερον· ἀέρι μὲν γὰρ οὐκ ἐπιπολάζει, τῷ δὲ ὕδατι ἐπιπολάζει. Ὅτι δ' ἐστὶ τι ἀπλῶς κοῦφον καὶ ἀπλῶς βαρὺ, ἐκ τῶνδ' ἐστὶ φανερόν. Λέγω δ' ἀπλῶς κοῦφον ὃ ἀέι

ἄνω καὶ βαρὺ ὃ ἀεὶ κάτω πέφυκε φέρεσθαι μὴ κωλυόμενον· τοιαῦτα γάρ ἐστὶ τινα, καὶ οὐχ ὥσπερ οἶονταί τινες πάντ' ἔχειν βάρος· βαρὺ μὲν γὰρ δοκεῖ τισιν εἶναι καὶ ἐτέροις, καὶ ἀεὶ φέρεσθαι πρὸς τὸ μέσον. Ἔστι δ' ὁμοίως καὶ τὸ κοῦφον. Ὁρῶμεν γάρ, καθάπερ εἴρηται πρότερον, ὅτι τὰ γεηρὰ πᾶσιν ὑφίσταται καὶ φέρεται πρὸς τὸ μέσον. Ἀλλὰ μὴν ὠρισταὶ τὸ μέσον. Εἰ τοίνυν ἐστὶ τι ὃ πᾶσιν ἐπιπολάζει, καθάπερ φαίνεται τὸ πῦρ καὶ ἐν αὐτῷ τῷ ἀέρι ἄνω φερόμενον, ὃ δ' ἀήρ ἡσυχάζων, δῆλον ὅτι τοῦτο φέρεται πρὸς τὸ ἔσχατον. Ὡστε βάρος οὐδὲν οἷόν τ' ἔχειν αὐτό· ὑφίστατο γὰρ ἂν ἄλλω· εἰ δὲ τοῦτο, εἴη ἂν τι ἄλλο, ὃ φέρεται ἐπὶ τὸ ἔσχατον, ὃ πᾶσι τοῖς φερομένοις ἐπιπολάζει. Νῦν δ' οὐδὲν φαίνεται. Τὸ ἄρα πῦρ οὐδὲν ἔχει βάρος, οὐδὲ ἡ γῆ κουφότητα οὐδεμίαν, εἴπερ ὑφίσταται πᾶσι καὶ τὸ ὑφιστάμενον φέρεται ἐπὶ τὸ μέσον.

Ἀλλὰ μὴν ὅτι γ' ἐστὶ μέσον πρὸς ὃ ἡ φορὰ τοῖς ἔχουσι βάρος καὶ ἀφ' οὗ τοῖς κούφοις, δῆλον πολλαχόθεν. Πρῶτον μὲν τῷ εἰς ἄπειρον μὴ ἐνδέχεσθαι φέρεσθαι μηθέν. Ὡσπερ γὰρ οὐκ ἔστιν οὐθὲν ἀδύνατον, οὕτως οὐδὲ γίγνεται· ἡ δὲ φορὰ γένεσις ποθὲν ποι.

Ἐπεὶτα πρὸς ὁμοίας φαίνεται γωνίας τὸ μὲν πῦρ ἄνω φερόμενον, ἡ δὲ γῆ κάτω καὶ πᾶν τὸ βάρος ἔχον. Ὡστ' ἀνάγκη φέρεσθαι (312a.) πρὸς τὸ μέσον. (Τοῦτο δὲ πότερον συμβαίνει πρὸς τὸ τῆς γῆς μέσον ἢ πρὸς τὸ τοῦ παντός, ἐπεὶ ταῦτὸν αὐτῶν ἐστίν, ἄλλος λόγος.) Ἐπεὶ δὲ τὸ πᾶσιν ὑφιστάμενον φέρεται πρὸς τὸ μέσον, ἀνάγκη τὸ πᾶσιν ἐπιπολάζον φέρεσθαι πρὸς τὸ ἔσχατον τῆς χώρας, ἐν ᾗ ποιοῦνται τὴν κίνησιν· ἐναντίον γὰρ τὸ μὲν μέσον τῷ ἐσχατῷ, τὸ δὲ ὑφιστάμενον ἀεὶ τῷ ἐπιπολάζοντι.

Διὸ καὶ εὐλόγως τὸ βαρὺ καὶ κοῦφον δύο ἐστίν· καὶ γὰρ οἱ τόποι δύο, τὸ μέσον καὶ τὸ ἔσχατον.

Ἔστι δὲ δῆ τι καὶ μεταξὺ τούτων, ὃ πρὸς ἐκάτερον αὐτῶν λέγεται θάτερον· ἔστι γὰρ ὡς ἔσχατον καὶ μέσον ἀμφοτέρων ἐστὶ τὸ μεταξύ· διὰ τοῦτο ἐστὶ τι καὶ ἄλλο βαρὺ καὶ κοῦφον, οἷον ὕδωρ καὶ ἀήρ.

Φαμὲν δὲ τὸ μὲν περιέχον τοῦ εἶδους εἶναι, τὸ δὲ περιεχόμενον τῆς ὕλης. Ἔστι δ' ἐν πᾶσι τοῖς γένεσιν αὕτη ἡ διάστασις· καὶ γὰρ ἐν τῷ ποιῷ καὶ ἐν τῷ ποσῷ ἐστὶ τὸ μὲν ὡς εἶδος μᾶλλον, τὸ δ' ὡς ὕλη. Καὶ ἐν τοῖς κατὰ τόπον ὡσαύτως τὸ μὲν ἄνω τοῦ ὠρισμένου, τὸ δὲ κάτω τῆς ὕλης.

Ὡστε καὶ ἐν αὐτῇ τῇ ὕλῃ τῇ τοῦ βαρέος καὶ κούφου, ἡ μὲν τοιοῦτον δυνάμει, βαρέος ὕλη, ἡ δὲ τοιοῦτον, κούφου· καὶ ἔστι μὲν ἡ

αὐτή, τὸ δ' εἶναι οὐ ταὐτόν, ὥσπερ καὶ τὸ νοσερὸν καὶ τὸ ὑγιαστόν.
Τὸ γὰρ εἶναι οὐ ταὐτόν· διόπερ οὐδὲ τὸ νοσῶδει εἶναι ἢ ὑγιεινῶ.

Κεφάλαιο 5

Τὸ μὲν οὖν ἔχον τοιαύτην ὕλην κοῦφον καὶ ἀεὶ ἄνω, τὸ δὲ τὴν ἐναντίαν βαρὺ καὶ ἀεὶ κάτω· τὸ δ' ἐτέρας μὲν τούτων, ἐχούσας δ' οὕτω πρὸς ἀλλήλας ὡς αὗται ἀπλῶς, καὶ ἄνω καὶ κάτω [φερομένας]· διὸ ἀήρ καὶ ὕδωρ ἔχουσι καὶ κουφότητα καὶ βάρος ἐκάτερον, καὶ ὕδωρ μὲν πλὴν γῆς πᾶσιν ὑφίσταται, ἀήρ δὲ πλὴν πυρὸς πᾶσιν ἐπιπολάζει. Ἐπεὶ δ' ἐστὶν ἓν μόνον ὃ πᾶσιν ἐπιπολάζει καὶ ἓν ὃ πᾶσιν ὑφίσταται, ἀνάγκη δύο ἄλλα εἶναι ἃ καὶ ὑφίσταταί τινι καὶ ἐπιπολάζει τινί.

Ὡστε ἀνάγκη καὶ τὰς ὕλας τοσαύτας εἶναι ὅσαπερ ταῦτα, τέτταρας, οὕτω δὲ τέτταρας ὡς μίαν μὲν ἀπάντων τὴν κοινήν, ἄλλως τε καὶ εἰ γίνονται ἐξ ἀλλήλων, ἀλλὰ τὸ εἶναι ἕτερον. Οὐδὲν γὰρ κωλύει τῶν (312b.) ἐναντίων εἶναι μετὰ καὶ ἓν καὶ πλείω, ὥσπερ ἐν χρώμασιν· πολλαχῶς γὰρ λέγεται τὸ μετὰ καὶ τὸ μέσον.

Ἐν μὲν οὖν τῇ αὐτοῦ χώρα τῶν ἐχόντων καὶ βάρος καὶ κουφότητα ἕκαστον ἔχει βάρος (ἢ δὲ γῆ ἐν ἅπασιν)· κουφότητα δ' οὐκ ἔχει, ἀλλ' ἢ ἐν οἷς ἐπιπολάζει.

Διὸ καὶ ὑποσπωμένων μὲν φέρεται εἰς τὰ ἐφεξῆς κάτω, ἀήρ μὲν εἰς τὴν τοῦ ὕδατος χώραν, ὕδωρ δὲ εἰς τὴν τῆς γῆς. Ἄνω δ' εἰς τὴν τοῦ πυρός, ἀναιρουμένου τοῦ πυρός, οὐκ οἰσθήσεται ὁ ἀήρ, εἰ μὴ βία, ὥσπερ καὶ τὸ ὕδωρ σπᾶται, ὅταν γένηται τὸ ἐπίπεδον ἐν καὶ θᾶπτον σπάσῃ τις ἄνω τῆς φορᾶς, ἣν φέρεται τὸ ὕδωρ κάτω. Οὐδὲ τὸ ὕδωρ εἰς τὴν τοῦ ἀέρος, ἀλλ' ἢ ὡς νῦν εἴρηται. Ἡ γῆ δὲ τοῦτο οὐ πάσχει, ὅτι οὐχ ἓν τὸ ἐπίπεδον. Διὸ τὸ μὲν ὕδωρ εἰς τὸ ἀγγεῖον πυρωθὲν σπᾶται, γῆ δ' οὐ. Ὡσπερ δὲ οὐδ' ἡ γῆ ἄνω, οὐδὲ τὸ πῦρ κάτω εἰσιν ὑφαιρουμένου τοῦ ἀέρος· οὐδὲν γὰρ ἔχει βάρος οὐδ' ἐν τῇ αὐτοῦ χώρα, ὥσπερ οὐδ' ἡ γῆ κουφότητα. Φέρεται δὲ κάτω τὰ δύο ὑποσπωμένων, ὅτι τὸ μὲν ἀπλῶς βαρὺ ἐστὶν ὃ πᾶσιν ὑφίσταται, τὸ δὲ πρὸς τι βαρὺ ὃν εἰς τὴν αὐτοῦ χώραν ἢ οἷς ἐπιπολάζει, δι' ὁμοιότητα τῆς ὕλης.

Ὅτι δ' ἀναγκαῖον ποιεῖν ἴσας τὰς διαφορὰς αὐτοῖς, δῆλον. Εἰ μὲν γὰρ μία ὕλη πάντων, οἷον ἢ τὸ κενὸν ἢ τὸ πληρὲς ἢ τὸ μέγεθος ἢ τὰ τρίγωνα, ἢ πάντα ἄνω ἢ πάντα κάτω οἰσθήσεται, ἢ δὲ ἐτέρα φορὰ οὐκέτι ἔσται· ὥστ' ἢ κοῦφον οὐδὲν ἔσται ἀπλῶς, εἰ πάντα ῥέπει μᾶλλον τῷ ἐκ μειζόνων εἶναι σωμάτων ἢ ἐκ πλειόνων ἢ ὅτι πλήρη

(τοῦτο δὲ ὁρῶμέν τε, καὶ δέδεικται ὅτι ὁμοίως κάτω τε αἰεὶ καὶ πανταχοῦ φέρεται καὶ ἄνω)· ἐὰν δὲ τὸ κενὸν ἢ τι τοιοῦτον ὁ αἰεὶ ἄνω, οὐκ ἔσται ὁ αἰεὶ κάτω. Καὶ τῶν μεταξὺ δὴ ἓνια ἔσται κάτω θᾶπτον γῆς· ἐν γὰρ τῷ πολλῷ ἀέρι τρίγωνα πλείω ἢ τὰ στερεὰ ἢ τὰ μικρὰ ἔσται. Οὐ φαίνεται δ' οὐδὲ ἐν μόριον ἀέρος κάτω φερόμενον. Ὅμοίως δὲ καὶ ἐπὶ τοῦ κούφου, ἐὰν ἐκεῖνο ποιῇ τις ὑπερέχειν τῇ ὕλῃ.

Ἐὰν δὲ δύο, τὰ μεταξὺ πῶς ἔσται ποιοῦντα ἃ ποιεῖ ἀήρ τε καὶ ὕδωρ; (Οἶον εἴ τις (313a.) φαίη εἶναι τὸ κενὸν καὶ πληρὲς· τὸ μὲν οὖν πῦρ κενόν, διὸ ἄνω, τὴν δὲ γῆν πληρὲς, διὸ κάτω· ἀέρα δὲ πλεῖον πυρὸς ἔχειν, ὕδωρ δὲ γῆς). Ἔσται γὰρ τι ὕδωρ ὃ πλεῖον ἔξει πῦρ ὀλίγου ἀέρος, καὶ ἀήρ πολὺς ὀλίγου ὕδατος γῆν πλείω, ὥστε δεήσει ἀέρος τι πλῆθος θᾶπτον φέρεσθαι κάτω ὕδατος ὀλίγου. Τοῦτο δ' οὐ φαίνεται οὐδαμοῦ οὐδέποτε.

Ἀνάγκη τοίνυν, ὥσπερ καὶ τὸ πῦρ ἄνω, ὅτι τοδὶ ἔχει, οἶον τὸ κενόν, τὰ δ' ἄλλα οὐ, καὶ τὴν γῆν κάτω, ὅτι τὸ πληρὲς ἔχει, καὶ τὸν ἀέρα εἰς τὴν αὐτοῦ καὶ ἀνώτερον τοῦ ὕδατος, ὅτι τοδὶ τι ἔχει, καὶ τὸ ὕδωρ κάτω, ὅτι τοιόνδε τι.

Εἰ δὲ ἦν ἐν τι ἄμφω ἢ δύο, ἄμφω δ' ὑπάρξει ταῦτα ἐκατέρω, ἔσται τι πλῆθος ἐκατέρου ὃ ὑπερέξει ὕδωρ τε ἀέρος ὀλίγου τῷ ἄνω καὶ ἀήρ ὕδατος τῷ κάτω, καθάπερ εἴρηται πολλάκις.

Κεφάλαιο 6

Τὰ δὲ σχήματα οὐκ αἷτια τοῦ φέρεσθαι ἀπλῶς ἢ κάτω ἢ ἄνω, ἀλλὰ τοῦ θᾶττον ἢ βραδύτερον. Δι' ὅς δ' αἰτίας, οὐ χαλεπὸν ἰδεῖν· ἀπορεῖται γὰρ νῦν διὰ τί τὰ πλατέα σιδήρια καὶ μόλιβδος ἐπιπλεῖ ἐπὶ τοῦ ὕδατος, ἄλλα δὲ ἐλάττω καὶ ἥττον βαρέα, ἂν ἢ στρογγύλα ἢ μακρά, οἷον βελόνη, κάτω φέρεται, καὶ ὅτι ἔνια διὰ μικρότητα ἐπιπλεῖ, οἷον τὸ ψῆγμα καὶ ἄλλα γεώδη καὶ κονιορτώδη ἐπὶ τοῦ ἀέρος.

Περὶ δὴ τούτων ἀπάντων τὸ μὲν νομίζειν αἷτιον εἶναι ὥσπερ Δημόκριτος οὐκ ὀρθῶς ἔχει. Ἐκεῖνος γὰρ φησι τὰ ἀναφερόμενα θερμὰ ἐκ τοῦ ὕδατος ἀνακωχεύειν (313b.) τὰ πλατέα τῶν ἐχόντων βάρος, τὰ δὲ στενὰ διαπίπτειν· ὀλίγα γὰρ εἶναι τὰ ἀντικρούοντα αὐτοῖς.

Ἔδει δ' ἐν τῷ ἀέρι ἔτι μᾶλλον τοῦτο ποιεῖν, ὥσπερ ἐνίσταται κάκεῖνος αὐτός.

Ἄλλ' ἐνστάς λύει μαλακῶς· φησὶ γὰρ οὐκ εἰς ἓν ὁρμᾶν τὸν σοῦν, λέγων τὸν σοῦν τὴν κίνησιν τῶν ἄνω φερομένων σωμάτων.

Ἐπεὶ δ' ἐστὶ τὰ μὲν εὐδιαίρετα τῶν συνεχῶν τὰ δ' ἥττον, καὶ διαιρετικά δὴ τὸν αὐτὸν τρόπον τὰ μὲν μᾶλλον τὰ δ' ἥττον, ταύτας εἶναι νομιστέον αἰτίας. Εὐδιαίρετον μὲν οὖν τὸ εὐόριστον, καὶ μᾶλλον τὸ μᾶλλον· ἀπὸ δὲ μᾶλλον ὕδατος τοιοῦτον, ὕδωρ δὲ γῆς. Καὶ τὸ ἔλαττον δὴ ἐν ἐκάστῳ γένει εὐδιαιρετώτερον καὶ διασπᾶται ῥᾶον. Τὰ μὲν οὖν ἔχοντα πλάτος διὰ τὸ πολὺ περιλαμβάνειν ἐπιμένει, διὰ τὸ μὴ διασπᾶσθαι τὸ πλεῖον ῥαδίως· τὰ δ' ἐναντίως ἔχοντα τοῖς σχήμασι διὰ τὸ ὀλίγον περιλαμβάνειν φέρεται κάτω, διὰ τὸ διαρεῖν ῥαδίως. Καὶ ἐν ἀέρι πολὺ μᾶλλον, ὅσῳ εὐδιαιρετώτερος ὕδατός ἐστιν.

Ἐπεὶ δὲ τό τε βάρος ἔχει τινὰ ἰσχὺν καθ' ἣν φέρεται κάτω, καὶ τὰ συνεχῇ πρὸς τὸ μὴ διασπᾶσθαι, ταῦτα δεῖ πρὸς ἄλληλα συμβάλλειν· ἐὰν γὰρ ὑπερβάλλῃ ἡ ἰσχὺς ἢ τοῦ βάρους τῆς ἐν τῷ συνεχεῖ πρὸς τὴν διάσπασιν καὶ διαίρεσιν, βιάσεται κάτω θᾶττον, ἐὰν δὲ ἀσθενεστέρα ἢ, ἐπιπολάσει.

Περὶ μὲν οὖν βαρέος καὶ κούφου καὶ τῶν περὶ αὐτὰ συμβεβηκότων διωρίσθω τοῦτον ἡμῖν τὸν τρόπον.

(314a.) Περί δὲ γενέσεως καὶ φθορᾶς τῶν φύσει γενομένων καὶ φθειρομένων, ὁμοίως κατὰ πάντων, τάς τε αἰτίας διαιρετέον καὶ τοὺς λόγους αὐτῶν, ἔτι δὲ περὶ αὐξήσεως καὶ ἀλλοιώσεως, τί ἐκάτερον, καὶ πότερον τὴν αὐτὴν ὑποληπτέον φύσιν εἶναι ἀλλοιώσεως καὶ γενέσεως, ἢ χωρὶς, ὥσπερ διώρισται καὶ τοῖς ὀνόμασιν. Τῶν μὲν οὖν ἀρχαίων οἱ μὲν τὴν καλουμένην ἀπλὴν γένεσιν ἀλλοίωσιν εἶναι φασιν, οἱ δ' ἕτεροι ἀλλοίωσιν καὶ γένεσιν. Ὅσοι μὲν γὰρ ἓν τι τὸ πᾶν λέγουσιν εἶναι καὶ πάντα ἐξ ἑνὸς γεννῶσι, τούτοις μὲν ἀνάγκη τὴν γένεσιν ἀλλοίωσιν φάναι καὶ τὸ κυρίως γινόμενον ἀλλοιοῦσθαι.

Ὅσοι δὲ πλείω τὴν ὕλην ἑνὸς τιθέασιν, οἷον Ἐμπεδοκλῆς καὶ Ἀναξαγόρας καὶ Λεύκιππος, τούτοις δὲ ἕτερον. Καίτοι Ἀναξαγόρας γε τὴν οἰκείαν φωνὴν ἠγγόησεν· λέγει γοῦν ὥς τὸ γίνεσθαι καὶ ἀπόλλυσθαι ταῦτόν καθέστηκεν τῷ ἀλλοιοῦσθαι, πολλὰ δὲ λέγει τὰ στοιχεῖα, καθάπερ καὶ ἕτεροι. Ἐμπεδοκλῆς μὲν γὰρ τὰ μὲν σωματικὰ τέτταρα, τὰ δὲ πάντα μετὰ τῶν κινούντων ἐξ τὸν ἀριθμόν, Ἀναξαγόρας δὲ ἅπειρα καὶ Λεύκιππος καὶ Δημόκριτος. Ὁ μὲν γὰρ τὰ ὁμοιομερῆ στοιχεῖα τίθησιν, οἷον ὄστον καὶ σάρκα καὶ μυελόν, καὶ τῶν ἄλλων ὧν ἐκάστῳ συνώνυμον τὸ μέρος ἐστίν.

Δημόκριτος δὲ καὶ Λεύκιππος ἐκ σωμάτων ἀδιαιρέτων τᾶλλα συγκεκρισθαι φασι, ταῦτα δ' ἅπειρα καὶ τὸ πλῆθος εἶναι καὶ τὰς μορφάς, αὐτὰ δὲ πρὸς αὐτὰ διαφέρειν τούτοις ἐξ ὧν εἰσὶ καὶ θέσει καὶ τάξει τούτων. Ἐναντίως δὲ φαίνονται λέγοντες οἱ περὶ Ἀναξαγόραν τοῖς περὶ Ἐμπεδοκλέα· ὁ μὲν γὰρ φησι πῦρ καὶ ὕδωρ καὶ ἀέρα καὶ γῆν στοιχεῖα τέσσαρα καὶ ἀπλᾶ εἶναι μᾶλλον ἢ σάρκα καὶ ὄστον καὶ τὰ τοιαῦτα τῶν ὁμοιομερῶν, οἱ δὲ ταῦτα μὲν ἀπλᾶ καὶ στοιχεῖα, γῆν δὲ καὶ πῦρ καὶ ὕδωρ καὶ ἀέρα σύνθετα· (314b.) πανσπερμίαν γὰρ εἶναι τούτων. Τοῖς μὲν οὖν ἐξ ἑνὸς πάντα κατασκευάζουσιν ἀναγκαῖον λέγειν τὴν γένεσιν καὶ τὴν φθορὰν ἀλλοίωσιν· αἰεὶ γὰρ μένειν τὸ ὑποκείμενον ταῦτό καὶ ἓν· τὸ δὲ τοιοῦτον ἀλλοιοῦσθαι φαμεν· τοῖς δὲ τὰ γένη πλείω ποιοῦσι διαφέρειν τὴν ἀλλοίωσιν τῆς γενέσεως· συνιόντων γὰρ καὶ διαλυομένων ἢ γένεσις συμβαίνει καὶ ἡ φθορά. Διὸ λέγει τοῦτον τὸν τρόπον καὶ Ἐμπεδοκλῆς, ὅτι “φύσις οὐδενός ἐστιν, ... ἀλλὰ μόνον μίξις τε διάλλαξις τε μιγέντων.” Ὅτι μὲν οὖν οἰκεῖος ὁ λόγος αὐτῶν

τῇ ὑποθέσει οὕτω φάναι, δῆλον, καὶ ὅτι λέγουσι τὸν τρόπον τοῦτον· ἀναγκαῖον δὲ καὶ τούτοις τὴν ἀλλοίωσιν εἶναι μὲν τι φάναι παρὰ τὴν γένεσιν, ἀδύνατον μέντοι κατὰ τὰ ὑπ' ἐκείνων λεγόμενα. Τοῦτο δ' ὅτι λέγομεν ὀρθῶς, ῥάδιον συνιδεῖν. Ὡςπερ γὰρ ὀρῶμεν ἡρεμούσης τῆς οὐσίας ἐν αὐτῇ μεταβολὴν κατὰ μέγεθος, τὴν καλουμένην αὐξήσιν καὶ φθίσιν, οὕτω καὶ ἀλλοίωσιν. Οὐ μὴν ἀλλ' ἐξ ὧν λέγουσιν οἱ πλείους ἀρχὰς ποιοῦντες μιᾷς ἀδύνατον ἀλλοιοῦσθαι. Τὰ γὰρ πάθη, καθ' ἃ φαμεν τοῦτο συμβαίνειν, διαφοραὶ τῶν στοιχείων εἰσίν, λέγω δ' οἷον θερμὸν ψυχρόν, λευκὸν μέλαν, ξηρὸν ὑγρόν, μαλακὸν σκληρόν καὶ τῶν ἄλλων ἕκαστον, ὥςπερ καὶ φησὶν Ἐμπεδοκλῆς “ἥελιον μὲν λευκὸν ὀρᾶν καὶ θερμὸν ἀπάντη, ὄμβρον δ' ἐν πᾶσιν δνοφόεντά τε ῥιγαλέον τε”. Ὁμοίως δὲ διορίζει καὶ ἐπὶ τῶν λοιπῶν. Ὡστ' εἰ μὴ δυνατόν ἐκ πυρὸς γενέσθαι ὕδωρ μηδ' ἐξ ὕδατος γῆν, οὐδ' ἐκ λευκοῦ μέλαν ἔσται οὐδὲν οὐδ' ἐκ μαλακοῦ σκληρόν· ὁ δ' αὐτὸς λόγος καὶ περὶ τῶν ἄλλων· τοῦτο δ' ἦν ἀλλοίωσις. Ἦι καὶ φανερόν ὅτι μίαν ἀεὶ τοῖς ἐναντίοις ὑποθετέον ὕλην, ἂν τε μεταβάλλῃ κατὰ τόπον, ἂν τε κατ' αὐξήσιν καὶ φθίσιν, ἂν τε κατ' ἀλλοίωσιν. Ἔτι δ' ὁμοίως ἀναγκαῖον εἶναι τοῦτο καὶ ἀλλοίωσιν· εἴτε γὰρ ἀλλοίωσις (315a.) ἐστὶ, καὶ τὸ ὑποκείμενον ἐν στοιχείῳ καὶ μία πάντων ὕλη τῶν ἐχόντων εἰς ἄλληλα μεταβολήν, κἂν εἰ τὸ ὑποκείμενον ἔν, ἔστιν ἀλλοίωσις.

Ἐμπεδοκλῆς μὲν οὖν ἔοικεν ἐναντία λέγειν καὶ πρὸς τὰ φαινόμενα καὶ πρὸς αὐτὸν αὐτός. Ἄμα μὲν γὰρ οὐ φησιν ἕτερον ἐξ ἐτέρου γίνεσθαι τῶν στοιχείων οὐδέν, ἀλλὰ τᾶλλα πάντα ἐκ τούτων, ἅμα δ' ὅταν εἰς ἓν συναγάγῃ τὴν ἅπασαν φύσιν πλὴν τοῦ νείκους, ἐκ τοῦ ἐνὸς γίνεσθαι πάλιν ἕκαστον. Ὡστ' ἐξ ἐνός τινος δῆλον ὅτι διαφοραῖς τισι χωριζομένων καὶ πάθεσιν ἐγένετο τὸ μὲν ὕδωρ τὸ δὲ πῦρ, καθάπερ λέγει τὸν μὲν ἥλιον λευκὸν καὶ θερμόν, τὴν δὲ γῆν βαρὺ καὶ σκληρόν· ἀφαιρουμένων οὖν τούτων τῶν διαφορῶν (εἰσὶ γὰρ ἀφαιρεταὶ γενόμεναί γε) δῆλον ὡς ἀνάγκη γίνεσθαι καὶ γῆν ἐξ ὕδατος καὶ ὕδωρ ἐκ γῆς, ὁμοίως δὲ καὶ τῶν ἄλλων ἕκαστον, οὐ τότε μόνον ἀλλὰ καὶ νῦν, μεταβάλλοντά γε τοῖς πάθεσιν. Ἔστι δ' ἐξ ὧν εἴρηκε δυνάμενα προσγίνεσθαι καὶ χωρίζεσθαι πάλιν, ἄλλως τε καὶ μαχομένων ἀλλήλοις ἔτι τοῦ νείκους καὶ τῆς φιλίας. Διόπερ καὶ τότε ἐξ ἐνός ἐγεννήθησαν· οὐ γὰρ δὴ πῦρ γε καὶ γῆ καὶ ὕδωρ ὄντα ἐν ἧν τὸ πᾶν. Ἀδελον δὲ καὶ πότερον ἀρχὴν αὐτῶν θετέον τὸ ἐν ἢ τὰ πολλά, λέγω δὲ πῦρ καὶ γῆν καὶ τὰ σύστοιχα τούτων. Ἦι μὲν γὰρ ὡς

ὕλη ὑπόκειται, ἐξ οὗ μεταβάλλοντα διὰ τὴν κίνησιν γίνονται γῆ καὶ πῦρ, τὸ ἐν στοιχεῖον· ἥ δὲ τοῦτο μὲν ἐκ συνθέσεως γίνεται συνιόντων ἐκείνων, ἐκεῖνα δ' ἐκ διαλύσεως, στοιχειωδέστερα ἐκεῖνα καὶ πρότερα τὴν φύσιν.

Κεφάλαιο 2

Ὅλως τε δὴ περὶ γενέσεως καὶ φθορᾶς τῆς ἀπλῆς λεκτέον, πότερον ἔστιν ἢ οὐκ ἔστι καὶ πῶς ἔστιν, καὶ περὶ τῶν ἄλλων ἀπλῶν κινήσεων, οἷον περὶ αὐξήσεως καὶ ἀλλοιώσεως.

Πλάτων μὲν οὖν μόνον περὶ γενέσεως ἐσκέπαστο καὶ φθορᾶς, ὅπως ὑπάρχει τοῖς πράγμασι, καὶ περὶ γενέσεως οὐ πάσης ἀλλὰ τῆς τῶν στοιχείων· πῶς δὲ σάρκες ἢ ὅστ᾽ ἢ τῶν ἄλλων τι τῶν τοιούτων, οὐδέν· ἔτι οὔτε περὶ ἀλλοιώσεως οὔτε περὶ αὐξήσεως, τίνα τρόπον ὑπάρχουσι τοῖς πράγμασιν. Ὅλως δὲ παρὰ τὰ ἐπιπολῆς περὶ οὐδενὸς οὐδεὶς ἐπέστησεν ἔξω Δημοκρίτου. Οὗτος δ' ἔοικε μὲν περὶ ἀπάντων φροντίσαι, ἤδη (315b.) δὲ ἐν τῷ πῶς διαφέρειν. Οὔτε γὰρ περὶ αὐξήσεως οὐδεὶς οὐδὲν διώρισεν, ὥσπερ λέγομεν, ὅ τι μὴ καὶ ὁ τυχὼν εἴπειεν, ὅτι προσιόντος αὐξάνονται τῷ ὁμοίῳ (πῶς δὲ τοῦτο, οὐκέτι), οὐδὲ περὶ μίξεως, οὔτε περὶ τῶν ἄλλων ὡς εἶπεῖν οὐδενός, οἷον τοῦ ποιεῖν καὶ τοῦ πάσχειν, τίνα τρόπον τὸ μὲν ποιεῖ τὸ δὲ πάσχει τὰς φυσικὰς ποιήσεις. Δημόκριτος δὲ καὶ Λεύκιππος ποιήσαντες τὰ σχήματα τὴν ἀλλοίωσιν καὶ τὴν γένεσιν ἐκ τούτων ποιοῦσι, διακρίσει μὲν καὶ συγκρίσει γένεσιν καὶ φθοράν, τάξει δὲ καὶ θέσει ἀλλοίωσιν. Ἐπεὶ δ' ὦντο τάληθές ἐν τῷ φαίνεσθαι, ἐναντία δὲ καὶ ἄπειρα τὰ φαινόμενα, τὰ σχήματα ἄπειρα ἐποίησαν, ὥστε ταῖς μεταβολαῖς τοῦ συγκειμένου τὸ αὐτὸ ἐναντίον δοκεῖν ἄλλω καὶ ἄλλω, καὶ μετακινεῖσθαι μικροῦ ἐμμιγνυμένου καὶ ὅλως ἕτερον φαίνεσθαι ἐνὸς μετακινήθέντος· ἐκ τῶν αὐτῶν γὰρ τραγωδία καὶ κωμωδία γίνεται γραμμάτων.

Ἐπεὶ δὲ δοκεῖ σχεδὸν πᾶσιν ἕτερον εἶναι γένεσις καὶ ἀλλοίωσις, καὶ γίνεσθαι μὲν καὶ φθεῖρεσθαι συγκρινόμενα καὶ διακρινόμενα, ἀλλοιοῦσθαι δὲ μεταβαλλόντων τῶν παθημάτων, περὶ τούτων ἐπιστήσασι θεωρητέον. Απορίας γὰρ ἔχει ταῦτα καὶ πολλὰς καὶ εὐλόγους. Εἰ μὲν γὰρ ἔστι σύγκρισις ἢ γένεσις, πολλὰ ἀδύνατα συμβαίνει· εἰσὶ δ' αὖ λόγοι ἕτεροι ἀναγκαστικοὶ καὶ οὐκ εὐποροὶ διαλύειν ὡς οὐκ ἐνδέχεται ἄλλως ἔχειν. Εἴτε μὴ ἔστι σύγκρισις ἢ γένεσις, ἢ ὅλως οὐκ ἔστι γένεσις ἢ ἀλλοίωσις, ἢ εἰ καὶ τοῦτο διαλῦσαι χαλεπὸν ὄν πειρατέον.

Ἀρχὴ δὲ τούτων πάντων, πότερον οὕτω γίνεται καὶ ἀλλοιοῦται καὶ αὐξάνεται τὰ ὄντα καὶ τάναντία τούτοις πάσχει, τῶν πρώτων

υπαρχόντων μεγεθῶν ἀδιαιρέτων, ἥ οὐθέν ἐστι μέγεθος ἀδιαίρετον· διαφέρει γὰρ τοῦτο πλεῖστον. Καὶ πάλιν εἰ μεγέθη, πότερον, ὥς Δημόκριτος καὶ Λεύκιππος, σώματα ταῦτ' ἐστίν, ἥ ὥσπερ ἐν τῷ Τιμαίῳ ἐπίπεδα. Τοῦτο μὲν οὖν αὐτό, καθάπερ καὶ ἐν ἄλλοις εἰρήκαμεν, ἄλογον μέχρι ἐπιπέδων διαλῦσαι. Διὸ μᾶλλον εὐλογον σώματα εἶναι ἀδιαίρετα.

Ἀλλὰ καὶ ταῦτα πολλὴν ἔχει ἀλογίαν. Ὅμως δὲ τούτοις ἀλλοιώσιν καὶ γένεσιν ἐνδέχεται ποιεῖν, καθάπερ εἴρηται, τροπῇ καὶ διαθιγῇ μετακινούντα τὸ αὐτὸ καὶ ταῖς τῶν σχημάτων (316a.) των διαφοραῖς, ὅπερ ποιεῖ Δημόκριτος. Διὸ καὶ χροιάν οὐ φησιν εἶναι· τροπῇ γὰρ χρωματίζεσθαι. Τοῖς δ' εἰς ἐπίπεδα διαιροῦσιν οὐκέτι· οὐδὲν γὰρ γίνεται πλὴν στερεὰ συντιθεμένων· πάθος γὰρ οὐδ' ἐγχειροῦσι γεννᾶν οὐδὲν ἐξ αὐτῶν.

Αἴτιον δὲ τοῦ ἐπ' ἔλαττον δύνασθαι τὰ ὁμολογούμενα συννοῶν ἢ ἀπειρία. Διὸ ὅσοι ἐνφκῆκασι μᾶλλον ἐν τοῖς φυσικοῖς μᾶλλον δύνανται ὑποτίθεσθαι τοιαύτας ἀρχὰς αἱ ἐπὶ πολὺ δύνανται συνείρειν· οἱ δ' ἐκ τῶν πολλῶν λόγων ἀθεώρητοι τῶν ὑπαρχόντων ὄντες, πρὸς ὀλίγα βλέψαντες, ἀποφαίνονται ῥᾶον. Ἴδοι δ' ἂν τις καὶ ἐκ τούτων ὅσον διαφέρουσιν οἱ φυσικῶς καὶ λογικῶς σκοποῦντες· περὶ γὰρ τοῦ ἄτομα εἶναι μεγέθη οἱ μὲν φασιν ὅτι τὸ αὐτοτρίγωνον πολλὰ ἔσται, Δημόκριτος δ' ἂν φανείη οἰκείοις καὶ φυσικοῖς λόγοις πεπεῖσθαι. Δῆλον δ' ἔσται ὃ λέγομεν προιοῦσιν.

Ἐχει γὰρ ἀπορίαν, εἴ τις θεῖη σῶμά τι εἶναι καὶ μέγεθος πάντη διαιρετόν, καὶ τοῦτο δυνατόν. Τί γὰρ ἔσται ὅπερ τὴν διαίρεσιν διαφεύγει; εἰ γὰρ πάντη διαιρετόν, καὶ τοῦτο δυνατόν, κἂν ἅμα εἴη τοῦτο πάντη διηρημένον, καὶ εἰ μὴ ἅμα διήρηται· κἂν εἰ τοῦτο γένοιτο, οὐδὲν ἂν εἴη ἀδύνατον. Οὐκοῦν καὶ κατὰ τὸ μέσον ὡσαύτως, καὶ ὅλως δέ, εἰ πάντη πέφυκε διαιρετόν, ἂν διαιρεθῇ, οὐδὲν ἔσται ἀδύνατον γεγονός, ἐπεὶ οὐδ' ἂν εἰς μυρία μυριάκις διηρημένα ἦ, οὐδὲν ἀδύνατον· καίτοι ἴσως οὐδεὶς ἂν διέλοι. Ἐπεὶ τοίνυν πάντη τοιοῦτόν ἐστι τὸ σῶμα, διηρήσθω. Τί οὖν ἔσται λοιπόν; μέγεθος; οὐ γὰρ οἶόν τε· ἔσται γάρ τι οὐ διηρημένον, ἣν δὲ πάντη διαιρετόν. Ἀλλὰ μὴν εἰ μηδὲν ἔσται σῶμα μηδὲ μέγεθος, διαίρεσις δ' ἔσται, ἥ ἐκ στιγμῶν ἔσται, καὶ ἀμεγέθη ἐξ ὧν σύγκειται, ἥ οὐδὲν παντάπασιν, ὥστε κἂν γίνοιτο ἐκ μηδενὸς κἂν εἴη συγκείμενον, καὶ τὸ πᾶν δὴ οὐδὲν ἄλλ' ἢ φαινόμενον. Ὅμοιως δὲ κἂν ἥ ἐκ στιγμῶν, οὐκ ἔσται ποσόν. Ὅποτε γὰρ ἤπτοντο καὶ ἐν ἣν μέγεθος καὶ ἅμα

ἦσαν, οὐδὲν ἐποίουν μείζον τὸ πᾶν. Διαιρεθέντος γὰρ εἰς δύο καὶ πλείω, οὐδὲν ἔλαττον οὐδὲ μείζον τὸ πᾶν τοῦ πρότερον, ὥστε κἂν πᾶσαι συντεθῶσιν, οὐδὲν ποιήσουσι μέγεθος. Ἀλλὰ μὴν καὶ εἴ τι διαιρουμένου οἷον ἔκπρισμα (316b.) γίνεται τοῦ σώματος, καὶ οὕτως ἐκ τοῦ μεγέθους σῶμα τι ἀπέρχεται, ὁ αὐτὸς λόγος, ἐκεῖνο πῶς διαιρετόν. Εἰ δὲ μὴ σῶμα ἀλλ' εἰδὸς τι χωριστὸν ἢ πάθος ὃ ἀπῆλθεν, καὶ ἔστι τὸ μέγεθος στιγμαὶ ἢ ἀφαι τοδὶ παθοῦσαι, ἄτοπον ἐκ μὴ μεγεθῶν μέγεθος εἶναι. Ἔτι δὲ ποῦ ἔσονται, καὶ ἀκίνητοι ἢ κινούμεναι αἱ στιγμαί; ἀφῇ τε ἀεὶ μία δυοῖν τινων, ὡς ὄντος τινὸς παρὰ τὴν ἀφὴν καὶ τὴν διαίρεσιν καὶ τὴν στιγμήν. Εἰ δὴ τις θήσεται ὅτιοῦν ἢ ὀπηλικονοῦν σῶμα εἶναι πάντῃ διαιρετόν, πάντα ταῦτα συμβαίνει. Ἔτι ἐὰν διελὼν συνθῶ τὸ ξύλον ἢ τι ἄλλο, πάλιν ἴσον τε καὶ ἓν. Οὐκοῦν οὕτως ἔχει δηλονότι κἂν τέμω τὸ ξύλον καθ' ὅτιοῦν σημεῖον. Πάντῃ ἄρα διήρηται δυνάμει. Τί οὖν ἔστι παρὰ τὴν διαίρεσιν; εἰ γὰρ καὶ ἔστι τι πάθος, ἀλλὰ πῶς εἰς ταῦτα διαλύεται καὶ γίνεται ἐκ τούτων; ἢ πῶς χωρίζεται ταῦτα; ὥστ' εἴπερ ἀδύνατον ἐξ ἀφῶν ἢ στιγμῶν εἶναι τὰ μεγέθη, ἀνάγκη εἶναι σώματα ἀδιαίρετα καὶ μεγέθη. Οὐ μὴν ἀλλὰ καὶ ταῦτα θεμένοις οὐχ ἦττον συμβαίνει ἀδύνατα. Ἔσκεπται δὲ περὶ αὐτῶν ἐν ἐτέροις. Ἀλλὰ ταῦτα πειρατέον λύειν· διὸ πάλιν ἐξ ἀρχῆς τὴν ἀπορίαν λεκτέον.

Τὸ μὲν οὖν ἅπαν σῶμα αἰσθητὸν εἶναι διαιρετὸν καθ' ὅτιοῦν σημεῖον καὶ ἀδιαίρετον οὐδὲν ἄτοπον· τὸ μὲν γὰρ δυνάμει διαιρετόν, τὸ δ' ἐντελεχεία ὑπάρξει. Τὸ δ' εἶναι ἅμα πάντῃ διαιρετὸν δυνάμει ἀδύνατον δόξειεν ἂν εἶναι. Εἰ γὰρ δυνατόν, κἂν γένοιτο, οὐχ ὥστε εἶναι ἅμα ἅμφω ἐντελεχεία ἀδιαίρετον καὶ διηρημένον, ἀλλὰ διηρημένον καθ' ὅτιοῦν σημεῖον. Οὐδὲν ἄρα ἔσται λοιπόν, καὶ ἀσώματον ἐφθαρμένον τὸ σῶμα, καὶ γίνοιτο δ' ἂν πάλιν ἦτοι ἐκ στιγμῶν ἢ ὅλως ἐξ οὐδενός. Καὶ τοῦτο πῶς δυνατόν; ἀλλὰ μὴν ὅτι γε διαιρεῖται εἰς χωριστὰ καὶ ἀεὶ εἰς ἐλάττω μεγέθη καὶ εἰς ἀπέχοντα καὶ κεχωρισμένα, φανερόν. Οὔτε δὴ κατὰ μέρος διαιροῦντι εἴη ἂν ἄπειρος ἢ θρύψις, οὔτε ἅμα οἷόν τε διαιρεθῆναι κατὰ πᾶν σημεῖον (οὐ γὰρ δυνατόν), ἀλλὰ μέχρι του. Ἀνάγκη ἄρα ἄτομα ἐνυπάρχειν μεγέθη ἀόρατα, ἄλλως τε καὶ εἴπερ ἔσται γένεσις καὶ φθορὰ ἢ μὲν διακρίσει ἢ δὲ συγκρίσει. Ὁ μὲν οὖν ἀναγκάζειν δοκῶν (317a.) λόγος εἶναι μεγέθη ἄτομα οὗτός ἐστιν· ὅτι δὲ λανθάνει παραλογιζόμενος, καὶ ἢ λανθάνει, λέγωμεν.

Ἐπεὶ γὰρ οὐκ ἔστι στιγμή στιγμής ἐχομένη, τὸ πάντῃ εἶναι

διαιρετόν ἔστι μὲν ὡς ὑπάρχει τοῖς μεγέθεσιν, ἔστι δ' ὡς οὐ. Δοκεῖ δ', ὅταν τοῦτο τεθῇ, καὶ ὀπιοῦν καὶ πάντα στιγμὴν εἶναι, ὥστ' ἀναγκαῖον εἶναι διαιρεθῆναι τὸ μέγεθος εἰς μηδέν· πάντα γὰρ εἶναι στιγμὴν, ὥστε ἢ ἐξ ἀφῶν ἢ ἐκ στιγμῶν εἶναι. Τὸ δ' ἐστὶν ὡς ὑπάρχει πάντῃ, ὅτι μία ὀπιοῦν ἐστι, καὶ πᾶσαι ὡς ἐκάστη· πλείους δὲ μιᾶς οὐκ εἰσὶν· ἐφεξῆς γὰρ οὐκ εἰσὶν, ὥστ' οὐ πάντα· εἰ γὰρ κατὰ μέσον διαιρετόν, καὶ κατ' ἐχομένην στιγμὴν ἔσται διαιρετόν· οὐ γὰρ ἐστὶν ἐχόμενον σημεῖον σημείου ἢ στιγμὴ στιγμῆς. Τοῦτο δ' ἐστὶ διαίρεσις ἢ σύνθεσις. Ὡστ' ἔστι καὶ διάκρισις καὶ σύγκρισις, ἀλλ' οὐτ' εἰς ἄτομα καὶ ἐξ ἀτόμων (πολλὰ γὰρ τὰ ἀδύνατα) οὔτε οὕτως ὥστε πάντα διαίρεσιν γενέσθαι (εἰ γὰρ ἦν ἐχομένη στιγμὴ στιγμῆς, τοῦτ' ἂν ἦν), ἀλλ' εἰς μικρὰ καὶ ἐλάττω ἐστί, καὶ σύγκρισις ἐξ ἐλαττόνων. Ἀλλ' οὐχ ἡ ἀπλῆ καὶ τελεία γένεσις συγκρίσει καὶ διακρίσει ὥρισται, ὥς τινὲς φασιν, τὴν δ' ἐν τῷ συνεχεῖ μεταβολὴν ἀλλοίωσιν. Ἀλλὰ τοῦτ' ἔστιν ἐν ᾧ σφάλλεται πάντα. Ἔστι γὰρ γένεσις ἀπλῆ καὶ φθορὰ οὐ συγκρίσει καὶ διακρίσει, ἀλλ' ὅταν μεταβάλλῃ ἐκ τοῦδε εἰς τόδε ὅλον. Οἱ δὲ οἶονται ἀλλοίωσιν πᾶσαν εἶναι τὴν τοιαύτην μεταβολήν· τὸ δὲ διαφέρει. Ἐν γὰρ τῷ ὑποκειμένῳ τὸ μὲν ἐστὶ κατὰ τὸν λόγον, τὸ δὲ κατὰ τὴν ὕλην.

Ὅταν μὲν οὖν ἐν τούτοις ἢ ἡ μεταβολή, γένεσις ἔσται ἢ φθορά, ὅταν δ' ἐν τοῖς πάθεσι καὶ κατὰ συμβεβηκός, ἀλλοίωσις. Διακρινόμενα δὲ καὶ συγκρινόμενα εὐφθάρτα γίνεται. Ἐὰν μὲν γὰρ εἰς ἐλάττω ὑδάτια διαιρεθῇ, θάπτον ἀήρ γίνεται, ἐὰν δὲ συγκριθῇ, βραδύτερον. Μᾶλλον δ' ἔσται δηλὸν ἐν τοῖς ὕστερον. Νῦν δὲ τοσοῦτον διωρίσθω, ὅτι ἀδύνατον εἶναι τὴν γένεσιν σύγκρισιν, οἷαν δὴ τινὲς φασιν.

Κεφάλαιο 3

Διωρισμένων δὲ τούτων, πρῶτον θεωρητέον πότερόν ἐστί τι γινόμενον ἀπλῶς καὶ φθειρόμενον, ἢ κυρίως μὲν οὐδέν, ἀεὶ δ' ἕκτινος καὶ τί, λέγω δ' οἶον ἐκ κάμνοντος ὑγιαῖνον καὶ κάμνον ἐξ ὑγιαίνοντος, ἢ μικρὸν ἐκ μεγάλου καὶ (317b.) μέγα ἐκ μικροῦ, καὶ τᾶλλα πάντα τοῦτον τὸν τρόπον. Εἰ γὰρ ἀπλῶς ἔσται γένεσις, ἀπλῶς ἂν τι γίνοιτο ἐκ μὴ ὄντος, ὥστ' ἀληθὲς ἂν εἴη λέγειν ὅτι ὑπάρχει τισὶ τὸ μὴ ὄν. Τίς μὲν γὰρ γένεσις ἐκ μὴ ὄντος τινός, οἶον ἐκ μὴ λευκοῦ ἢ μὴ καλοῦ, ἢ δὲ ἀπλῇ ἐξ ἀπλῶς μὴ ὄντος. Τὸ δ' ἀπλῶς ἦτοι τὸ πρῶτον σημαίνει καθ' ἐκάστην κατηγορίαν τοῦ ὄντος, ἢ τὸ καθόλου καὶ τὸ πάντα περιέχον. Εἰ μὲν οὖν τὸ πρῶτον, οὐσίας ἔσται γένεσις ἐκ μὴ οὐσίας. Ὡς δὲ μὴ ὑπάρχει οὐσία μηδὲ τὸ τόδε, δηλὸν ὡς οὐδὲ τῶν ἄλλων οὐδεμία κατηγοριῶν, οἶον οὔτε ποιὸν οὔτε ποσὸν οὔτε τὸ ποῦ· χωριστὰ γὰρ ἂν εἴη τὰ πάθη τῶν οὐσιῶν. Εἰ δὲ τὸ μὴ ὄν ὅλως, ἀπόφασις ἔσται καθόλου πάντων, ὥστε ἐκ μηδενὸς ἀνάγκη γίνεσθαι τὸ γινόμενον. Περὶ μὲν οὖν τούτων ἐν ἄλλοις τε διηπόρηται καὶ διώριστα τοῖς λόγοις ἐπὶ πλεῖον· συντόμως δὲ καὶ νῦν λεκτέον, ὅτι τρόπον μὲν τίνα ἐκ μὴ ὄντος ἀπλῶς γίνεται, τρόπον δὲ ἄλλον ἐξ ὄντος ἀεὶ· τὸ γὰρ δυνάμει ὄν ἐντελεχεία δὲ μὴ ὄν ἀνάγκη προυπάρχειν λεγόμενον ἀμφοτέρως. Ὁ δὲ καὶ τούτων διωρισμένων ἔχει θαυμαστὴν ἀπορίαν, πάλιν ἐπαναποδιστέον, πῶς ἔστιν ἀπλῇ γένεσις, εἴτ' ἐκ δυνάμει ὄντος οὔσα εἴτε καὶ πῶς ἄλλως. Ἀπορήσειε γὰρ ἂν τις ἄρ' ἔστιν οὐσίας γένεσις καὶ τοῦ τοῦδε, ἀλλὰ μὴ τοῦ τοιοῦδε καὶ τοσοῦδε καὶ ποῦ. Τὸν αὐτὸν δὲ τρόπον καὶ περὶ φθορᾶς. Εἰ γάρ τι γίνεται, δηλὸν ὡς ἔσται δυνάμει τις οὐσία, ἐντελεχεία δ' οὔ, ἐξ ἧς ἡ γένεσις ἔσται καὶ εἰς ἣν ἀνάγκη μεταβάλλειν τὸ φθειρόμενον. Πότερον οὖν ὑπάρξει τι τούτῳ τῶν ἄλλων ἐντελεχεία; λέγω δ' οἶον ἄρ' ἔσται ποσὸν ἢ ποιὸν ἢ ποῦ τὸ δυνάμει μόνον τόδε καὶ ὄν, ἀπλῶς δὲ μὴ τόδε μηδ' ὄν; εἰ γὰρ μηδὲν ἀλλὰ πάντα δυνάμει, χωριστόν τε συμβαίνει τὸ μὴ οὕτως ὄν, καὶ ἔτι, ὃ μάλιστα φοβούμενοι διετέλεσαν οἱ πρῶτοι φιλοσοφήσαντες, τὸ ἐκ μηδενὸς γίνεσθαι προυπάρχοντος· εἰ δὲ τὸ μὲν εἶναι τόδε τι ἢ οὐσίαν οὐχ ὑπάρξει, τῶν δ' ἄλλων τι τῶν εἰρημένων, ἔσται, καθάπερ εἵπομεν, χωριστὰ τὰ πάθη τῶν οὐσιῶν.

Περὶ τε τούτων οὖν ὅσον ἐνδέχεται πραγματευτέον, καὶ τίς αἰτία τοῦ γένεσιν ἀεὶ εἶναι, καὶ τὴν ἀπλῆν καὶ τὴν κατὰ μέρος. (318a.)

Οὐσης δ' αἰτίας μιᾶς μὲν ὅθεν τὴν ἀρχὴν εἶναι φαμεν τῆς κινήσεως, μιᾶς δὲ τῆς ὕλης, τὴν τοιαύτην αἰτίαν λεκτέον.

Περὶ μὲν γὰρ ἐκείνης εἴρηται πρότερον ἐν τοῖς περὶ κινήσεως λόγοις, ὅτι ἐστὶ τὸ μὲν ἀκίνητον τὸν ἅπαντα χρόνον, τὸ δὲ κινούμενον ἀεί. Τούτων δὲ περὶ μὲν τῆς ἀκινήτου ἀρχῆς τῆς ἐτέρας καὶ προτέρας διελεῖν ἐστὶ φιλοσοφίας ἔργον· περὶ δὲ τοῦ διὰ τὸ συνεχῶς κινεῖσθαι ἄλλα κινουντος ὕστερον ἀποδοτέον, τί τοιοῦτον τῶν καθ' ἕκαστα λεγομένων αἰτιόν ἐστιν, νῦν δὲ τὴν ὡς ἐν ὕλης εἶδει τιθεμένην αἰτίαν εἰπωμεν, δι' ἣν ἀεὶ φθορὰ καὶ γένεσις οὐχ ὑπολείπει τὴν φύσιν· ἅμα γὰρ ἂν ἴσως τοῦτο γένοιτο δῆλον, καὶ περὶ τοῦ νῦν ἀπορηθέντος, πῶς ποτὲ δεῖ λέγειν καὶ περὶ τῆς ἀπλῆς φθορᾶς καὶ γενέσεως. Ἐχει δ' ἀπορίαν ἱκανὴν καὶ τί τὸ αἴτιον τοῦ συνεῖρην τὴν γένεσιν, εἴπερ τὸ φθειρόμενον εἰς τὸ μὴ ὄν ἀπέρχεται, τὸ δὲ μὴ ὄν μηδὲν ἐστίν· οὔτε γὰρ τί οὔτε ποιὸν οὔτε ποσὸν οὔτε ποῦ τὸ μὴ ὄν. Εἴπερ οὖν ἀεὶ τι τῶν ὄντων ἀπέρχεται, διὰ τί ποτ' οὐκ ἀνήλωται πάλαι καὶ φροῦδον τὸ πᾶν, εἴ γε πεπερασμένον ἦν ἐξ οὗ γίνεται τῶν γινομένων ἕκαστον; οὐ γὰρ δὴ διὰ τὸ ἄπειρον εἶναι ἐξ οὗ γίνεται, οὐχ ὑπολείπει· τοῦτο γὰρ ἀδύνατον. Κατ' ἐνέργειαν μὲν γὰρ οὐδέν ἐστιν ἄπειρον, δυνάμει δ' ἐπὶ τὴν διαίρεσιν, ὥστ' ἔδει ταύτην εἶναι μόνην τὴν μὴ ὑπολείπουσαν τῷ γίνεσθαι τι ἀεὶ ἔλαττον· νῦν δὲ τοῦτο οὐχ ὁρῶμεν. Ἄρ' οὖν διὰ τὸ τὴν τοῦδε φθορὰν ἄλλου εἶναι γένεσιν καὶ τὴν τοῦδε γένεσιν ἄλλου εἶναι φθορὰν ἄπαυστον ἀναγκαῖον εἶναι τὴν μεταβολήν;

Περὶ μὲν οὖν τοῦ γένεσιν εἶναι καὶ φθορὰν ὁμοίως περὶ ἕκαστον τῶν ὄντων, ταύτην οἰητέον εἶναι πᾶσιν ἱκανὴν αἰτίαν. Διὰ τί δέ ποτε τὰ μὲν ἀπλῶς γίνεσθαι λέγεται καὶ φθεῖρεσθαι τὰ δ' οὐχ ἀπλῶς, πάλιν σκεπτέον, εἴπερ τὸ αὐτὸ ἐστὶ γένεσις μὲν τουδὶ φθορὰ δὲ τουδί, καὶ φθορὰ μὲν τουδί γένεσις δὲ τουδί· ζητεῖ γάρ τινα τοῦτο λόγον. Λέγομεν γὰρ ὅτι φθεῖρεται νῦν ἀπλῶς, καὶ οὐ μόνον τοδί· καὶ αὕτη μὲν γένεσις ἀπλῶς, αὕτη δὲ φθορὰ. Τοδί δὲ γίνεται μὲν τι, γίνεται δ' ἀπλῶς οὐ· φαμέν γὰρ τὸν μανθάνοντα γίνεσθαι μὲν ἐπιστήμονα, γίνεσθαι δ' ἀπλῶς οὐ. Καθάπερ οὖν πολλάκις (318b.) διορίζομεν λέγοντες ὅτι τὰ μὲν τότε τι σημαίνει τὰ δ' οὐ, διὰ τοῦτο συμβαίνει τὸ ζητούμενον.

Διαφέρει γὰρ εἰς ἃ μεταβάλλει τὸ μεταβάλλον, οἷον ἴσως ἢ μὲν εἰς πῦρ ὁδὸς γένεσις μὲν ἀπλῆ, φθορὰ δὲ <τίς> τινός ἐστιν, οἷον γῆς, ἢ δὲ γῆς γένεσις τίς γένεσις, γένεσις δ' οὐχ ἀπλῶς, φθορὰ δ' ἀπλῶς,

οἷον πυρός, ὥσπερ Παρμενίδης λέγει δύο, τὸ ὄν καὶ τὸ μὴ ὄν εἶναι φάσκων πῦρ καὶ γῆν. Τὸ δὴ ταῦτα ἢ τοιαῦθ' ἕτερα ὑποτίθεσθαι διαφέρει οὐδέν· τὸν γὰρ τρόπον ζητοῦμεν, ἀλλ' οὐ τὸ ὑποκείμενον.

Ἡ μὲν οὖν εἰς τὸ μὴ ὄν ἀπλῶς ὁδὸς φθορὰ ἀπλῆ, ἡ δ' εἰς τὸ ἀπλῶς ὄν γενέσις ἀπλῆ. Οἷς οὖν διώρισται εἴτε πυρὶ καὶ γῇ εἴτε ἄλλοις τισί, τούτων ἔσται τὸ μὲν ὄν τὸ δὲ μὴ ὄν. Ἐνα μὲν οὖν τρόπον τούτῳ διοίσει τὸ ἀπλῶς τι γίνεσθαι καὶ φθεῖρεσθαι τοῦ μὴ ἀπλῶς, ἄλλον δὲ τῇ ὕλῃ ὅποια τις ἂν ᾖ· ἥς μὲν γὰρ μᾶλλον αἱ διαφοραὶ τόδε τι σημαίνουσι, μᾶλλον οὐσία, ἥς δὲ στέρησιν, μὴ ὄν, οἷον τὸ μὲν θερμὸν κατηγορία τις καὶ εἶδος, ἡ δὲ ψυχρότης στέρησις, διαφέρουσι δὲ γῇ καὶ πῦρ καὶ ταύταις ταῖς διαφοραῖς. Δοκεῖ δὲ μᾶλλον τοῖς πολλοῖς τῷ αἰσθητῷ καὶ μὴ αἰσθητῷ διαφέρειν· ὅταν μὲν γὰρ εἰς αἰσθητὴν μεταβάλλῃ ὕλην, γίνεσθαι φασιν, ὅταν δ' εἰς ἀφανῆ, φθεῖρεσθαι· τὸ γὰρ ὄν καὶ τὸ μὴ ὄν τῷ αἰσθάνεσθαι καὶ τῷ μὴ αἰσθάνεσθαι διορίζουσιν, ὥσπερ τὸ μὲν ἐπιστητὸν ὄν, τὸ δ' ἄγνωστον μὴ ὄν· ἡ γὰρ αἴσθησις ἐπιστήμης ἔχει δύναμιν. Καθάπερ οὖν αὐτοὶ τῷ αἰσθάνεσθαι ἢ τῷ δύνασθαι καὶ ζῆν καὶ εἶναι νομίζουσιν, οὕτω καὶ τὰ πράγματα, τρόπον τινὰ διώκοντες τάληθές, αὐτὸ δὲ λέγοντες οὐκ ἀληθές. Συμβαίνει δὴ κατὰ δόξαν καὶ κατ' ἀλήθειαν ἄλλως τὸ γίνεσθαι τε ἀπλῶς καὶ τὸ φθεῖρεσθαι· πνεῦμα γὰρ καὶ ἀήρ κατὰ μὲν τὴν αἴσθησιν ἥττον ἐστίν (διὸ καὶ τὰ φθειρόμενα ἀπλῶς τῇ εἰς ταῦτα μεταβολῇ φθεῖρεσθαι λέγουσιν, γίνεσθαι δ' ὅταν εἰς ἀπτὸν καὶ εἰς γῆν μεταβάλλῃ), κατὰ δ' ἀλήθειαν μᾶλλον τόδε τι καὶ εἶδος ταῦτα τῆς γῆς.

Τοῦ μὲν οὖν εἶναι τὴν μὲν ἀπλῆν γενέσιν φθορὰν οὕσαν τινος, τὴν δὲ φθορὰν [τὴν] ἀπλῆν γενέσιν οὕσαν τινος, εἴρηται τὸ αἷτιον· διὰ γὰρ τὸ τὴν ὕλην διαφέρειν ἢ τῷ οὐσίαν (319a.) εἶναι ἢ τῷ μή, ἢ τῷ τὴν μὲν μᾶλλον τὴν δὲ μή, ἢ τῷ τὴν μὲν μᾶλλον αἰσθητὴν εἶναι τὴν ὕλην ἐξ ἧς καὶ εἰς ἣν, τὴν δὲ ἥττον εἶναι. Τοῦ δὲ τὰ μὲν ἀπλῶς γίνεσθαι λέγεσθαι, τὰ δὲ τι μόνον, μὴ τῇ ἐξ ἀλλήλων γενέσει καθ' ὃν εἵπομεν νῦν τρόπον· νῦν μὲν γὰρ τοσοῦτον διώρισται, τί δὴ ποτε πάσης γενέσεως οὔσης φθορᾶς ἄλλου, καὶ πάσης φθορᾶς οὔσης ἑτέρου τινὸς γενέσεως, οὐχ ὁμοίως ἀποδίδομεν τὸ γίνεσθαι καὶ τὸ φθεῖρεσθαι τοῖς εἰς ἄλληλα μεταβάλλουσιν· τὸ δ' ὕστερον εἰρημένον οὐ τοῦτο διαπορεῖ, ἀλλὰ τί ποτε τὸ μανθάνον μὲν οὐ λέγεται ἀπλῶς γίνεσθαι ἀλλὰ γίνεσθαι ἐπιστῆμον, τὸ δὲ φυόμενον γίνεσθαι. Ταῦτα δὲ διώρισται ταῖς κατηγορίαις· τὰ μὲν γὰρ τόδε τι σημαίνει, τὰ δὲ

τοιόνδε, τὰ δὲ ποσόν.

Ὅσα οὖν μὴ οὐσίαν σημαίνει, οὐ λέγεται ἀπλῶς, ἀλλὰ τι γίνεσθαι. Οὐ μὴν ἀλλ' ὁμοίως ἐν πᾶσι γένεσις μὲν κατὰ τὰ ἐν τῇ ἐτέρα συστοιχία λέγεται, οἷον ἐν μὲν οὐσία ἐὰν πῦρ ἀλλ' οὐκ ἐὰν γῆ, ἐν δὲ τῷ ποιῶ ἐὰν ἐπιστῆμον ἀλλ' οὐχ ὅταν ἀνεπιστῆμον.

Περὶ μὲν οὖν τοῦ τὰ μὲν ἀπλῶς γίνεσθαι τὰ δὲ μή, καὶ ὅλως καὶ ἐν ταῖς οὐσίαις αὐταῖς, εἴρηται, καὶ διότι τοῦ γένεσιν εἶναι συνεχῶς αἰτία ὡς ὕλη τὸ ὑποκείμενον, ὅτι μεταβλητικόν ἐστι εἰς τάναντία, καὶ ἔστιν ἢ θατέρου γένεσις ἀεὶ ἐπὶ τῶν οὐσιῶν ἄλλου φθορὰ καὶ ἢ ἄλλου φθορὰ ἄλλου γένεσις. Ἀλλὰ μὴν οὐδ' ἀπορήσαι δεῖ διὰ τί γίνεται ἀεὶ ἀπολλυμένων· ὥσπερ γὰρ καὶ τὸ φθείρεσθαι ἀπλῶς φασιν, ὅταν εἰς ἀναισθητον ἔλθῃ καὶ τὸ μὴ ὄν, ὁμοίως καὶ γίνεσθαι ἐκ μὴ ὄντος φασίν, ὅταν ἐξ ἀναισθήτου. Εἴτ' οὖν ὄντος τινὸς τοῦ ὑποκειμένου εἴτε μή, γίνεται ἐκ μὴ ὄντος. Ὡστε ὁμοίως καὶ γίνεται ἐκ μὴ ὄντος καὶ φθείρεται εἰς τὸ μὴ ὄν. Εἰκότως οὖν οὐχ ὑπολείπει· ἢ γὰρ γένεσις φθορὰ τοῦ μὴ ὄντος, ἢ δὲ φθορὰ γένεσις τοῦ μὴ ὄντος. Ἀλλὰ τοῦτο τὸ μὴ ὄν ἀπλῶς ἀπορήσειεν ἂν τις πότερον τὸ ἕτερον τῶν ἐναντίων ἐστίν, οἷον γῆ καὶ τὸ βαρὺ μὴ ὄν, πῦρ δὲ καὶ τὸ κοῦφον τὸ ὄν, ἢ οὐ, ἀλλ' ἐστὶ καὶ γῆ τὸ ὄν, τὸ δὲ μὴ ὄν ὕλη ἢ τῆς γῆς, καὶ πυρὸς ὡσαύτως. Καὶ ἄρά γε ἐτέρα ἐκατέρου ἢ ὕλη, ἢ οὐκ ἂν γί(319b.) νοιτο ἐξ ἀλλήλων οὐδ' ἐξ ἐναντίων; τούτοις γὰρ ὑπάρχει τάναντία, πυρί, γῆ, ὕδατι, ἀέρι. Ἡ ἔστι μὲν ὡς ἡ αὐτή, ἔστι δ' ὡς ἡ ἐτέρα· ὁ μὲν γάρ ποτε ὄν ὑπόκειται τὸ αὐτό, τὸ δ' εἶναι οὐ τὸ αὐτό. Περὶ μὲν οὖν τούτων ἐπὶ τοσοῦτον εἰρήσθω.

Κεφάλαιο 4

Περὶ δὲ γενέσεως καὶ ἀλλοιώσεως λέγωμεν τί διαφέρουσιν· φαιδὲν γὰρ ἐτέρας εἶναι ταύτας τὰς μεταβολὰς ἀλλήλων. Ἐπειδὴ οὖν ἐστὶ τι τὸ ὑποκείμενον καὶ ἕτερον τὸ πάθος ὃ κατὰ τοῦ ὑποκειμένου λέγεσθαι πέφυκεν, καὶ ἔστι μεταβολὴ ἐκατέρου τούτων, ἀλλοίωσις μὲν ἐστίν, ὅταν ὑπομένοντος τοῦ ὑποκειμένου, αἰσθητοῦ ὄντος, μεταβάλλῃ ἐν τοῖς αὐτοῦ πάθεσιν, ἢ ἐναντίοις οὓσιν ἢ μεταξύ, οἷον τὸ σῶμα ὑγιαίνει καὶ πάλιν κάμνει ὑπομένον γε ταυτό, καὶ ὁ χαλκὸς στρογγύλος, ὅτε δὲ γωνιοειδὴς ὁ αὐτός γε ὢν. Ὅταν δ' ὅλον μεταβάλλῃ μὴ ὑπομένοντος αἰσθητοῦ τινὸς ὡς ὑποκειμένου τοῦ αὐτοῦ, ἀλλ' οἷον ἐκ τῆς γονῆς αἷμα πάσης ἢ ἐξ ὕδατος ἀῆρ ἢ ἐξ ἀέρος παντὸς ὕδωρ, γενέσις ἤδη τὸ τοιοῦτον, τοῦ δὲ φθορά, μάλιστα δέ, ἂν ἡ μεταβολὴ γίνηται ἐξ ἀναισθήτου εἰς αἰσθητὸν ἢ ἀφῆ ἢ πάσαις ταῖς αἰσθήσεσιν, οἷον ὅταν ὕδωρ γένηται ἢ φθαρῇ εἰς ἀέρα· ὁ γὰρ ἀῆρ ἐπιεικῶς ἀναισθητός. Ἐν δὲ τούτοις ἂν τι ὑπομένη πάθος τὸ αὐτὸ ἐναντιώσεως ἐν τῷ γενομένῳ καὶ τῷ φθαρέντι, οἷον ὅταν ἐξ ἀέρος ὕδωρ, εἰ ἄμφω διαφανῇ ἢ ψυχρά, οὐ δεῖ τούτου θάτερον πάθος εἶναι εἰς ὃ μεταβάλλει. Εἰ δὲ μή, ἔσται ἀλλοίωσις, οἷον ὁ μουσικὸς ἄνθρωπος ἐφθάρη, ἄνθρωπος δ' ἄμουσος ἐγένετο, ὁ δ' ἄνθρωπος ὑπομένει τὸ αὐτό. Εἰ μὲν οὖν τούτου μὴ πάθος ἦν καθ' αὐτὸ ἢ μουσικὴ καὶ ἢ ἀμουσία, τοῦ μὲν γενέσις ἦν ἂν, τοῦ δὲ φθορά· διὸ ἀνθρώπου μὲν ταῦτα πάθη, ἀνθρώπου δὲ μουσικοῦ καὶ ἀνθρώπου ἀμούσου γενέσις καὶ φθορά· νῦν δὲ πάθος τοῦτο τοῦ ὑπομένοντος. Διὸ ἀλλοίωσις τὰ τοιαῦτα. Ὅταν μὲν οὖν κατὰ τὸ ποσὸν ἢ ἡ μεταβολὴ τῆς ἐναντιώσεως, αὗξη καὶ φθίσις, ὅταν δὲ κατὰ τόπον, φθορά, ὅταν δὲ κατὰ πάθος καὶ τὸ ποιόν, ἀλλοίωσις, ὅταν δὲ μηδὲν (320a.) ὑπομένη οὗ θάτερον πάθος ἢ συμβεβηκὸς ὅλως, γενέσις, τὸ δὲ φθορά. Ἐστὶ δὲ ὕλη μάλιστα μὲν καὶ κυρίως τὸ ὑποκείμενον γενέσεως καὶ φθορᾶς δεκτικόν, τρόπον δὲ τινα καὶ τὰ ταῖς ἄλλαις μεταβολαῖς, ὅτι πάντα δεκτικὰ τὰ ὑποκείμενα ἐναντιώσεων τινων. Περὶ μὲν οὖν γενέσεως, εἴτε ἔστιν εἴτε μή, καὶ πῶς ἔστι, καὶ περὶ ἀλλοιώσεως διωρίσθω τοῦτον τὸν τρόπον.

Κεφάλαιο 5

Περὶ δὲ αὐξήσεως λοιπὸν εἰπεῖν, τί τε διαφέρει γενέσεως καὶ ἀλλοιώσεως, καὶ πῶς αὐξάνεται τῶν αὐξανομένων ἕκαστον καὶ φθίνει ὅτιοι τῶν φθινόντων. Σκεπτέον δὴ πρῶτον πότερον μόνως ἐν τῷ περὶ ὃ ἐστὶν αὐτῶν ἢ πρὸς ἄλληλα διαφορά, οἷον ὅτι ἡ μὲν ἐκ τοῦδε εἰς τόδε μεταβολή, οἷον ἐκ δυνάμει οὐσίας εἰς ἐντελεχείαν οὐσίαν, γένεσις ἐστὶν, ἡ δὲ περὶ μέγεθος αὐξήσις, ἡ δὲ περὶ πάθος ἀλλοιώσις· ἀμφοτέρω δὲ ἐκ δυνάμει ὄντων εἰς ἐντελέχειαν μεταβολή τῶν εἰρημένων ἐστίν, ἢ καὶ ὁ τρόπος διαφέρει τῆς μεταβολῆς· φαίνεται γὰρ τὸ μὲν ἀλλοιούμενον οὐκ ἐξ ἀνάγκης μεταβάλλον κατὰ τόπον, οὐδὲ τὸ γινόμενον, τὸ δ' αὐξανόμενον καὶ τὸ φθίνον, ἄλλον δὲ τρόπον τοῦ φερομένου. Τὸ μὲν γὰρ φερόμενον ὅλον ἀλλάττει τόπον, τὸ δ' αὐξανόμενον ὥσπερ τὸ ἐλαυνόμενον· τούτου γὰρ μένοντος τὰ μόρια μεταβάλλει κατὰ τόπον, οὐχ ὥσπερ τὰ τῆς σφαίρας· τὰ μὲν γὰρ ἐν τῷ ἴσῳ τόπῳ μεταβάλλει τοῦ ὅλου μένοντος, τὰ δὲ τοῦ αὐξανομένου αἰεὶ ἐπὶ πλείῳ τόπον, ἐπ' ἐλάττω δὲ τὰ τοῦ φθινόντος. Ὅτι μὲν οὖν ἡ μεταβολή διαφέρει οὐ μόνον περὶ ὃ ἀλλὰ καὶ ὥς τοῦ τε γινομένου καὶ ἀλλοιουμένου καὶ αὐξανομένου, δηλόν. Περὶ δὲ ὃ ἐστὶν ἡ μεταβολή ἢ τῆς αὐξήσεως καὶ ἢ τῆς φθίσεως (περὶ μέγεθος δὲ δοκεῖ εἶναι τὸ αὐξάνεσθαι καὶ φθίνειν), ποτέρως ὑποληπτέον, πότερον ἐκ δυνάμει μὲν μεγέθους καὶ σώματος, ἐντελεχεία δ' ἀσωμάτου καὶ ἀμεγέθους γίνεσθαι σῶμα καὶ μέγεθος, καὶ τούτου διχῶς ἐνδεχομένου λέγειν, ποτέρως ἢ αὐξήσις γίνεται; πότερον ἐκ κεχωρισμένης αὐτῆς καθ' αὐτὴν τῆς ὕλης, ἢ ἐνυπαρχούσης ἐν ἄλλῳ σώματι; ἢ ἀδύνατον ἀμφοτέρως. Χω(320b.) ριστὴ μὲν γὰρ οὕσα ἢ οὐδένα καθέξει τόπον, [ἦ] οἷον στιγμή τις, ἢ κενὸν ἔσται καὶ σῶμα οὐκ αἰσθητόν. Τούτων δὲ τὸ μὲν οὐκ ἐνδέχεται, τὸ δὲ ἀναγκαῖον ἐν τινὶ εἶναι· αἰεὶ γάρ που ἔσται τὸ γινόμενον ἐξ αὐτοῦ, ὥστε κἀκεῖνο, ἢ καθ' αὐτὸ ἢ κατὰ συμβεβηκός. Ἀλλὰ μὴν εἰ γ' ἐν τινὶ ὑπάρξει, εἰ μὲν κεχωρισμένον οὕτως ὥστε μὴ ἐκείνου καθ' αὐτὸ ἢ κατὰ συμβεβηκός τι εἶναι, συμβήσεται πολλὰ καὶ ἀδύνατα. Λέγω δ' οἷον εἰ γίνεται ἀήρ ἐξ ὕδατος, οὐ τοῦ ὕδατος ἔσται μεταβάλλοντος, ἀλλὰ διὰ τὸ ὥσπερ ἐν ἀγγεῖῳ τῷ ὕδατι ἐνεῖναι τὴν ὕλην αὐτοῦ. Ἀπείρους γὰρ οὐδὲν κωλύει ὕλας εἶναι, ὥστε καὶ γίνεσθαι ἐντελεχεία. Ἐτι δ' οὐδ' οὕτω φαίνεται γινόμενος ἀήρ ἐξ

ὑδατος, οἷον ἐξιὼν ὑπομένοντος. Βέλτιον τοίνυν ποιεῖν πᾶσιν ἀχώριστον τὴν ὕλην ὥς οὖσαν τὴν αὐτὴν καὶ μίαν τῷ ἀριθμῷ, τῷ λόγῳ δὲ μὴ μίαν. Ἀλλὰ μὴν οὐδὲ στιγμᾶς θετέον οὐδὲ γραμμᾶς τὴν τοῦ σώματος ὕλην διὰ τὰς αὐτὰς αἰτίας. Ἐκεῖνο δὲ οὗ ταῦτα ἔσχατα ἢ ὕλη, ἣν οὐδέποτε ἄνευ πάθους οἷον τε εἶναι οὐδ' ἄνευ μορφῆς.

Γίνεται μὲν οὖν ἀπλῶς ἕτερον ἐξ ἐτέρου, ὥσπερ καὶ ἐν ἄλλοις διώριστα, καὶ ὑπὸ τινος δὲ ἐντελεχεία ὄντος, ἢ ὁμοιοειδοῦς ἢ ὁμογενοῦς, οἷον πῦρ ὑπὸ πυρὸς ἢ ἄνθρωπος ὑπ' ἀνθρώπου, ἢ ὑπ' ἐντελεχείας· σκληρὸν γὰρ οὐχ ὑπὸ σκληροῦ γίνεται.

Ἐπεὶ δ' ἐστὶ καὶ οὐσίας ὕλη σωματικῆς, σώματος δ' ἤδη τοιουδί (σῶμα γὰρ κοινὸν οὐδέν), ἡ αὐτὴ καὶ μεγέθους καὶ πάθους ἐστί, τῷ μὲν λόγῳ χωριστή, τόπῳ δ' οὐ χωριστή, εἰ μὴ καὶ τὰ πάθη χωριστά.

Φανερόν δὴ ἐκ τῶν διηπορημένων ὅτι οὐκ ἔστιν ἡ αὐξησις μεταβολὴ ἐκ δυνάμει μεγέθους, ἐντελεχεία δὲ μηδὲν ἔχοντος μέγεθος· χωριστὸν γὰρ ἂν εἴη τὸ κενόν, τοῦτο δ' ὅτι ἀδύνατον, εἴρηται ἐν ἐτέροις πρότερον. Ἔτι δ' ἢ γε τοιαύτη μεταβολὴ οὐκ αὐξήσεως ἴδιος ἀλλὰ γενέσεως ὄλως. Ἡ γὰρ αὐξησις ἐστὶ τοῦ ἐνυπάρχοντος μεγέθους ἐπίδοσις, ἢ δὲ φθίσις μείωσις. Διὸ δὴ ἔχειν τι δεῖ μέγεθος τὸ αὐξανόμενον, ὥστ' οὐκ ἐξ ἀμεγέθους ὕλης δεῖ εἶναι τὴν αὐξησιν εἰς ἐντελέχειαν μεγέθους· γένεσις γὰρ ἂν εἴη σώματος μᾶλλον, οὐκ αὐξησις.

Ληπτέον δὴ μᾶλλον οἷον ἀπτομένους (321a.) τῆς ζητήσεως ἐξ ἀρχῆς, ποίου τινὸς ὄντος τοῦ αὐξάνεσθαι ἢ τοῦ φθίνειν τὰ αἷτια ζητοῦμεν. Φαίνεται δὴ τοῦ αὐξανομένου ὅτιοῦν μέρος ἠϋξῆσθαι, ὁμοίως δὲ καὶ ἐν τῷ φθίνειν ἔλαττον γεγονέναι, ἔτι δὲ προσιόντος τινὸς αὐξάνεσθαι καὶ ἀπιόντος φθίνειν. Αναγκαῖον δὴ ἢ ἀσωμάτῳ αὐξάνεσθαι ἢ σώματι· εἰ μὲν οὖν ἀσωμάτῳ, ἔσται χωριστὸν τὸ κενόν· ἀδύνατον δὲ μεγέθους ὕλην εἶναι χωριστήν, ὥσπερ εἴρηται πρότερον. Εἰ δὲ σώματι, δύο ἐν τῷ αὐτῷ σώματα τόπῳ ἔσται, τό τε αὐξόμενον καὶ τὸ αὔξον· ἔστι δὲ καὶ τοῦτο ἀδύνατον. Ἀλλὰ μὴν οὐδ' οὕτως ἐνδέχεται λέγειν γίνεσθαι τὴν αὐξησιν ἢ τὴν φθίσιν, ὥσπερ ὅταν ἐξ ὑδατος ἀήρ· τότε γὰρ μείζων ὁ ὄγκος γέγονεν· οὐ γὰρ αὐξησις τοῦτο ἀλλὰ γένεσις μὲν τοῦ εἰς ὃ μεταβάλλει ἔσται, φθορὰ δὲ τοῦ ἐναντίου, αὐξησις δὲ οὐδετέρου, ἀλλ' ἢ οὐδενὸς ἢ εἰ τι κοινὸν ἀμφοῖν ὑπάρχει, τῷ γινομένῳ καὶ τῷ φθαρέντι, οἷον εἰ σῶμα. Τὸ δ' ὕδωρ οὐκ ἠϋξῆται οὐδ' ὁ ἀήρ, ἀλλὰ τὸ μὲν ἀπόλωλε τὸ δὲ γέγονεν· τὸ σῶμα δέ, εἴπερ, ἠϋξῆται. Ἀλλὰ καὶ τοῦτ' ἀδύνατον· δεῖ γὰρ

σώζειν τῷ λόγῳ τὰ ὑπάρχοντα τῷ αὐξανομένῳ καὶ φθίνοντι. Ταῦτα δὲ τρία ἐστίν, ὧν ἐν μὲν ἐστὶ τὸ ὅτιοῦν μέρος μείζον γίνεσθαι τοῦ αὐξανομένου μεγέθους, οἷον εἰ σὰρξ τῆς σαρκός, καὶ προσιόντος τινός, καὶ τρίτον σωζομένου τοῦ αὐξανομένου καὶ ὑπομένουτος· ἐν μὲν γὰρ τῷ γίνεσθαί τι ἀπλῶς ἢ φθείρεσθαι οὐχ ὑπομένει, ἐν δὲ τῷ ἀλλοιοῦσθαι ἢ αὐξάνεσθαι ἢ φθίνειν ὑπομένει τὸ αὐτὸ τὸ αὐξανόμενον καὶ ἀλλοιούμενον.

Ἄλλ’ ἔνθα μὲν τὸ πάθος ἔνθα δὲ τὸ μέγεθος τὸ αὐτὸ οὐ μένει. Εἰ δὴ ἔσται ἡ εἰρημένη αὔξησης, ἐνδέχοιτ’ ἂν μηδενός γε προσιόντος μηδὲ ὑπομένουτος αὐξάνεσθαι καὶ μηδενός ἀπιόντος φθίνειν καὶ μὴ ὑπομένειν τὸ αὐξανόμενον. Ἀλλὰ δεῖ τοῦτο σώζειν· ὑπόκειται γὰρ ἡ αὔξησης τοιοῦτον.

Ἀπορήσειε δ’ ἂν τις καὶ τί ἐστὶ τὸ αὐξανόμενον, πότερον ᾧ προστίθεται τι, οἷον εἰ τὴν κνήμην αὐξάνει, αὕτη μείζων, ᾧ δὲ αὐξάνει, ἡ τροφή, οὐ. Διὰ τί δὴ οὖν οὐκ ἄμφω ἠύξηται; μείζων γὰρ καὶ ὁ καὶ ᾧ, ὥσπερ ὅταν μίξης οἶνον ὕδατι· ὁμοίως γὰρ πλεῖον ἐκάτερον. Ἡ ὅτι τοῦ μὲν μένει ἡ οὐσία, τοῦ δ’ οὐ, οἷον τῆς τροφῆς, ἐπεὶ καὶ ἐνταῦθα τὸ ἐπικρατοῦν λέγεται ἐν (321b.) τῇ μίξει, οἷον ὅτι οἶνος· ποιεῖ γὰρ τὸ τοῦ οἴνου ἔργον ἀλλ’ οὐ τὸ τοῦ ὕδατος τὸ συνόλον μίγμα.

Ὅμοίως δὲ καὶ ἐπ’ ἀλλοιώσεως, εἰ μένει σὰρξ οὐσα καὶ τὸ τί ἐστὶ, πάθος δὲ τι ὑπάρχει τῶν καθ’ αὐτό, ὃ πρότερον οὐχ ὑπῆρχεν, ἡλλοίωται τοῦτο· ᾧ δ’ ἡλλοίωται, ὅτε μὲν οὐδὲν πέπονθεν, ὅτε δὲ κάκεῖνο. Ἀλλὰ τὸ ἀλλοιοῦν καὶ ἡ ἀρχὴ τῆς κινήσεως ἐν τῷ αὐξανομένῳ καὶ τῷ ἀλλοιουμένῳ· ἐν τούτοις γὰρ τὸ κινοῦν, ἐπεὶ καὶ τὸ εἰσελθὼν γένοιτ’ ἂν ποτε μείζων, καὶ τὸ ἀπολαῦσαν αὐτοῦ σῶμα, οἷον εἰ εἰσελθὼν γένοιτο πνεῦμα. Ἀλλ’ ἐφθαρταί γε τοῦτο παθόν, καὶ τὸ κινοῦν οὐκ ἐν τούτῳ.

Ἐπεὶ δὲ διηπόρηται περὶ αὐτῶν ἱκανῶς, δεῖ καὶ τῆς ἀπορίας πειρᾶσθαι λύσιν εὑρεῖν, σώζοντας τὸ ὑπομένουτός τε τοῦ αὐξανομένου καὶ προσιόντος τινὸς αὐξάνεσθαι, ἀπιόντος δὲ φθίνειν, ἔτι δὲ τὸ ὅτιοῦν σημεῖον αἰσθητὸν ἢ μείζων ἢ ἔλαττον γεγενῆναι, καὶ μήτε κενὸν εἶναι τὸ σῶμα μήτε δύο ἐν τῷ αὐτῷ τόπῳ μεγέθη μήτε ἁσωμάτῳ αὐξάνεσθαι. Ληπτέον δὲ τὸ αἴτιον διορισαμένοις πρῶτον ἐν μὲν ὅτι τὰ ἀνομοιομερῆ αὐξάνεται τῷ τὰ ὁμοιομερῆ αὐξάνεσθαι (σύγκειται γὰρ ἐκ τούτων ἕκαστον), ἔπειθ’ ὅτι σὰρξ καὶ ὅστουν καὶ ἕκαστον τῶν τοιούτων μορίων ἐστὶ διττόν, ὥσπερ καὶ τῶν ἄλλων τῶν

ἐν ὕλῃ εἶδος ἐχόντων· καὶ γὰρ ἡ ὕλη λέγεται καὶ τὸ εἶδος σὰρξ ἢ ὀστοῦν. Τὸ οὖν ὅτιοῦν μέρος αὐξάνεσθαι καὶ προσιόντος τινὸς κατὰ μὲν τὸ εἶδος ἐστὶν ἐνδεχόμενον, κατὰ δὲ τὴν ὕλην οὐκ ἔστιν· δεῖ γὰρ νοῆσαι ὥσπερ εἴ τις μετροίῃ τῷ αὐτῷ μέτρῳ ὕδωρ· αἰεὶ γὰρ ἄλλο καὶ ἄλλο τὸ γινόμενον. Οὕτω δ' αὐξάνεται ἡ ὕλη τῆς σαρκὸς, καὶ οὐχ ὁτφοῦν παντὶ προσγίνεται, ἀλλὰ τὸ μὲν ὑπεκρεῖ τὸ δὲ προσέρχεται, τοῦ δὲ σχήματος καὶ τοῦ εἶδους ὁτφοῦν μορίῳ. Ἐπὶ δὲ τῶν ἀνομοιομερῶν τοῦτο μᾶλλον δῆλον, οἷον χειρός, ὅτι ἀνάλογον ηὔξεται· ἡ γὰρ ὕλη ἐτέρα οὕσα δῆλη μᾶλλον τοῦ εἶδους ἐνταῦθα ἢ ἐπὶ σαρκὸς καὶ τῶν ὁμοιομερῶν· διὸ καὶ τεθνεώτος μᾶλλον ἂν δόξειεν εἶναι ἔτι σὰρξ καὶ ὀστοῦν ἢ χεὶρ καὶ βραχίον. Ὡστε ἔστι μὲν ὥς ὅτιοῦν τῆς σαρκὸς ηὔξεται, ἔστι δ' ὥς οὐ. Κατὰ μὲν γὰρ τὸ εἶδος ὁτφοῦν προσελήλυθεν, κατὰ δὲ τὴν ὕλην οὐ.

Μεῖζον μέντοι τὸ ὅλον γέγονε προσελθόντος μὲν τινος, ὃ κα(322a.) λείπεται τροφή καὶ ἐναντίον, μεταβάλλοντος δὲ εἰς τὸ αὐτὸ εἶδος, οἷον εἰ ξηρῷ προσίοι ὑγρόν, προσελθὼν δὲ μεταβάλαι καὶ γένοιτο ξηρόν· ἔστι μὲν γὰρ ὥς τὸ ὅμοιον ὁμοίῳ αὐξάνεται, ἔστι δ' ὥς ἀνομοίῳ.

Ἀπορήσειε δ' ἂν τις ποῖόν τι δεῖ εἶναι τὸ ὃ αὐξάνεται. Φανερόν δὴ ὅτι δυνάμει ἐκεῖνο, οἷον εἰ σὰρξ, δυνάμει σάρκα. Ἐντελεχεία ἄρα ἄλλο· φθαρὲν δὴ τοῦτο σὰρξ γέγονεν. Οὐκοῦν οὐ τοῦτο αὐτὸ καθ' αὐτό· γένεσις γὰρ ἂν ἦν, οὐκ αὔξησις· ἀλλὰ τὸ αὐξανόμενον τούτῳ. Τί οὖν παθὼν ὑπὸ τούτου [ἠὔξήθη]; ἢ μιχθέν, ὥσπερ οἶνω εἴ τις ἐπιχέοι ὕδωρ, ὃ δὲ δύναται οἶνον ποιεῖν τὸ μιχθέν; καὶ ὥσπερ τὸ πῦρ ἀνάμενον τοῦ καυστοῦ, οὕτως ἐν τῷ αὐξανομένῳ καὶ ὄντι ἐντελεχεία σαρκὶ τὸ ἐνὸν αὐξητικὸν προσελθόντος δυνάμει σαρκὸς ἐποίησεν ἐντελεχεία σάρκα. Οὐκοῦν ἅμα ὄντος· εἰ γὰρ χωρὶς, γένεσις. Ἔστι μὲν γὰρ οὕτω πῦρ ποιῆσαι ἐπὶ τὸ ὑπάρχον ἐπιθέντα ξύλα. Ἀλλ' οὕτω μὲν αὔξησις, ὅταν δὲ αὐτὰ τὰ ξύλα ἀφθῇ, γένεσις. Ποσὸν δὲ τὸ μὲν καθόλου οὐ γίνεται, ὥσπερ οὐδὲ ζῶον ὃ μήτ' ἄνθρωπος μήτε τῶν καθ' ἕκαστα· ἀλλ' ὥς ἐνταῦθα τὸ καθόλου, κάκει τὸ ποσόν.

Σὰρξ δὲ ἢ ὀστοῦν ἢ χεὶρ καὶ τούτων τὰ ὁμοιομερῆ. Προσελθόντος μὲν δὴ τινος ποσοῦ, ἀλλ' οὐ σαρκὸς ποσῆς. Ἦι μὲν οὖν δυνάμει τὸ συναμφοτέρον, οἷον ποσὴ σὰρξ, ταύτῃ μὲν αὔξει· καὶ γὰρ ποσὴν δεῖ γενέσθαι καὶ σάρκα· ἥ δὲ μόνον σὰρξ, τρέφει· ταύτῃ γὰρ διαφέρει τροφή καὶ αὔξησις τῷ λόγῳ. Διὸ τρέφεται μὲν ἕως ἂν σώζεται καὶ

φθίνον, αὐξάνεται δὲ οὐκ αἰεί, καὶ ἡ τροφή τῇ αὐξήσει τὸ αὐτὸ μέν, τὸ δ' εἶναι ἄλλο· ἥ μὲν γάρ ἐστι τὸ προσιὸν δυνάμει ποσὴ σὰρξ, ταύτῃ μὲν αὐξητικὸν σαρκός, ἥ δὲ μόνον δυνάμει σὰρξ, τροφή. Τοῦτο δὲ τὸ εἶδος ἄνευ ὕλης, οἷον αὐλός, δύνάμεις τις ἐν ὕλῃ ἐστίν. Ἐὰν δέ τις προσίῃ ὕλῃ, οὗσα δυνάμει αὐλός, ἔχουσα καὶ τὸ ποσὸν δυνάμει, οὗτοι ἔσονται μείζους αὐλοί. Ἐὰν δὲ μηκέτι ποιεῖν δύνηται, ἀλλ' οἷον ὕδωρ οἶνω αἰεὶ πλεῖον μιγνύμενον τέλος ὕδαρῃ ποιεῖ καὶ ὕδωρ, τότε φθίσιν ποιεῖται τοῦ ποσοῦ, τὸ δ' εἶδος μένει.

Κεφάλαιο 6

(322b.) Ἐπεὶ δὲ πρῶτον δεῖ περὶ τῆς ὕλης καὶ τῶν καλουμένων στοιχείων εἰπεῖν, εἴτ' ἔστιν εἴτε μὴ, καὶ πότερον αἰδίου ἕκαστον ἢ γίνεται πως, καὶ εἰ γίνεται, πότερον ἐξ ἀλλήλων γίνεται πάντα τὸν αὐτὸν τρόπον ἢ τι πρῶτον ἐν αὐτῶν ἐστίν, ἀνάγκη δὴ πρότερον εἰπεῖν περὶ ὧν ἀδιορίστως λέγεται νῦν.

Πάντες γὰρ οἱ τε τὰ στοιχεῖα γεννῶντες καὶ οἱ τὰ ἐκ τῶν στοιχείων διακρίσει χρῶνται καὶ συγκρίσει καὶ τῷ ποιεῖν καὶ πάσχειν. Ἔστι δ' ἡ σύγκρισις μίξις· πῶς δὲ μίγνυσθαι λέγομεν, οὐ διώριστα σαφῶς. Ἀλλὰ μὴν οὐδ' ἀλλοιοῦσθαι δυνατόν, οὐδὲ διακρίνεσθαι καὶ συγκρίνεσθαι, μηδενὸς ποιοῦντος μηδὲ πάσχοντος· καὶ γὰρ οἱ πλείω τὰ στοιχεῖα ποιοῦντες γεννῶσι τῷ ποιεῖν καὶ πάσχειν ὑπ' ἀλλήλων, καὶ τοῖς ἐξ ἐνὸς ἀνάγκη λέγειν τὴν ποίησιν, καὶ τοῦτ' ὀρθῶς λέγει Διογένης, ὅτι εἰ μὴ ἐξ ἐνὸς ἦν ἅπαντα, οὐκ ἂν ἦν τὸ ποιεῖν καὶ τὸ πάσχειν ὑπ' ἀλλήλων, οἷον τὸ θερμὸν ψύχεσθαι καὶ τοῦτο θερμαίνεσθαι πάλιν· οὐ γὰρ ἡ θερμότης μεταβάλλει καὶ ἡ ψυχρότης εἰς ἄλληλα, ἀλλὰ δηλὸν ὅτι τὸ ὑποκείμενον, ὥστε ἐν οἷς τὸ ποιεῖν ἐστὶ καὶ τὸ πάσχειν, ἀνάγκη τούτων μίαν εἶναι τὴν ὑποκειμένην φύσιν. Τὸ μὲν οὖν πάντα εἶναι τοιαῦτα φάσκειν οὐκ ἀληθές, ἀλλ' ἐν ὅσοις τὸ ὑπ' ἀλλήλων ἐστίν. Ἀλλὰ μὴν εἰ περὶ τοῦ ποιεῖν καὶ πάσχειν καὶ περὶ μίξεως θεωρητέον, ἀνάγκη καὶ περὶ ἀφῆς· οὔτε γὰρ ποιεῖν ταῦτα καὶ πάσχειν δύναται κυρίως ἢ μὴ οἷόν τε ἄψασθαι ἀλλήλων, οὔτε μὴ ἀψάμενά πως ἐνδέχεται μιχθῆναι πρῶτον. Ὡστε περὶ τριῶν τούτων διοριστέον, τί ἀφή καὶ τί μίξις καὶ τί ποίησις. Ἀρχὴν δὲ λάβωμεν τήνδε. Ἀνάγκη γὰρ τῶν ὄντων ὅσοις ἐστὶ μίξις, εἶναι ταῦτ' ἀλλήλων ἀπτικά· κἂν εἴ τι ποιεῖ, τὸ δὲ πάσχει κυρίως, καὶ τούτοις ὡσαύτως. Διὸ πρῶτον λεκτέον περὶ ἀφῆς.

Σχεδὸν μὲν οὖν, ὥσπερ καὶ τῶν ἄλλων ὀνομάτων ἕκαστον λέγεται πολλαχῶς, καὶ τὰ μὲν ὁμωνύμως τὰ δὲ θάτερα ἀπὸ τῶν ἐτέρων καὶ τῶν προτέρων, οὕτως ἔχει καὶ περὶ ἀφῆς. Ὅμως δὲ τὸ κυρίως λεγόμενον ὑπάρχει τοῖς ἔχουσι θέσιν, θέσις δ' οἷσπερ (323a.) καὶ τόπος· καὶ γὰρ τοῖς μαθηματικοῖς ὁμοίως ἀποδοτέον ἀφὴν καὶ τόπον, εἴτ' ἐστὶ κεχωρισμένον ἕκαστον αὐτῶν εἴτ' ἄλλον τρόπον. Εἰ οὖν ἐστίν, ὥσπερ διωρίσθη πρότερον, τὸ ἄπτεσθαι τὸ τὰ ἔσχατα ἔχειν ἅμα, ταῦτα ἂν ἄπτοιτο ἀλλήλων ὅσα διωρισμένα μεγέθη καὶ θέσιν

ἔχοντα ἅμα ἔχει τὰ ἔσχατα. Ἐπεὶ δὲ θέσις μὲν ὅσοις καὶ τόπος ὑπάρχει, τόπου δὲ διαφορὰ πρώτη τὸ ἄνω καὶ τὸ κάτω καὶ τὰ τοιαῦτα τῶν ἀντικειμένων, ἅπαντα τὰ ἀλλήλων ἀπτόμενα βάρος ἂν ἔχοι ἢ κουφότητα, ἢ ἄμφω ἢ θάτερον. Τὰ δὲ τοιαῦτα παθητικά καὶ ποιητικά· ὥστε φανερόν ὅτι ταῦτα ἄπτεσθαι πέφυκεν ἀλλήλων, ὧν διηρημένων μεγεθῶν ἅμα τὰ ἔσχατά ἐστιν, ὄντων κινητικῶν καὶ κινητῶν ὑπ' ἀλλήλων.

Ἐπεὶ δὲ τὸ κινεῖν οὐχ ὁμοίως κινεῖ τὸ κινούμενον, ἀλλὰ τὸ μὲν ἀνάγκη κινούμενον καὶ αὐτὸ κινεῖν, τὸ δ' ἀκίνητον ὄν, δηλὸν ὅτι καὶ ἐπὶ τοῦ ποιοῦντος ἐροῦμεν ὡσαύτως· καὶ γὰρ τὸ κινεῖν ποιεῖν τί φασι καὶ τὸ ποιοῦν κινεῖν. Οὐ μὴν ἀλλὰ διαφέρει γε καὶ δεῖ διορίζειν· οὐ γὰρ οἶόν τε πᾶν τὸ κινεῖν ποιεῖν, εἴπερ τὸ ποιοῦν ἀντιθήσομεν τῷ πάσχοντι, τοῦτο δ' οἷς ἢ κίνησις πάθος.

Πάθος δὲ καθ' ὅσον ἀλλοιοῦται μόνον, οἷον τὸ λευκὸν καὶ τὸ θερμόν· ἀλλὰ τὸ κινεῖν ἐπὶ πλεόν τοῦ ποιεῖν ἐστιν. Ἐκεῖνο δ' οὖν φανερόν, ὅτι ἔστι μὲν ὡς τὰ κινεῦντα τῶν κινητῶν ἅπτοιτ' ἂν, ἔστι δ' ὡς οὐ. Ἄλλ' ὁ διορισμὸς τοῦ ἄπτεσθαι καθόλου μὲν ὁ τῶν θέσιν ἐχόντων καὶ τοῦ μὲν κινητικοῦ τοῦ δὲ κινητοῦ, πρὸς ἀλλήλα δὲ κινητικοῦ καὶ κινητοῦ, ἐν οἷς ὑπάρχει τὸ ποιεῖν καὶ τὸ πάσχειν. Ἔστι μὲν οὖν ὡς ἐπὶ τὸ πολὺ τὸ ἀπτόμενον ἀπτομένου ἀπτόμενον· καὶ γὰρ κινεῖ κινούμενα πάντα σχεδὸν τὰ ἐμποδῶν, ὅσοις ἀνάγκη καὶ φαίνεται τὸ ἀπτόμενον ἄπτεσθαι ἀπτομένου· ἔστι δ' ὡς ἐνίότῃ φαμεν τὸ κινεῖν ἄπτεσθαι μόνου τοῦ κινουμένου, τὸ δ' ἀπτόμενον μὴ ἄπτεσθαι ἀπτομένου· ἀλλὰ διὰ τὸ κινεῖν κινούμενα τὰ ὁμογενῆ, ἀνάγκη δοκεῖ εἶναι ἀπτομένου ἄπτεσθαι. Ὡστε εἴ τι κινεῖ ἀκίνητον ὄν, ἐκεῖνο μὲν ἂν ἅπτοιτο τοῦ κινητοῦ, ἐκείνου δὲ οὐδέν· φαμὲν γὰρ ἐνίότῃ τὸν λυποῦντα ἄπτεσθαι ἡμῶν, ἀλλ' οὐκ αὐτοὶ ἐκείνου. Περὶ μὲν οὖν ἀφῆς τῆς ἐν τοῖς φυσικοῖς διωρίσθω τοῦτον τὸν τρόπον.

Κεφάλαιο 7

(323b.) Περί δὲ τοῦ ποιεῖν καὶ πάσχειν λεκτέον ἐφεξῆς· παρειλήφαμεν δὲ παρὰ τῶν πρότερον ὑπεναντίους ἀλλήλοις λόγους. Οἱ μὲν γὰρ πλεῖστοι τοῦτό γε ὁμοιοητικῶς λέγουσιν, ὥς τὸ μὲν ὅμοιον ὑπὸ τοῦ ὁμοίου πᾶν ἀπαθές ἐστι διὰ τὸ μηδὲν μᾶλλον ποιητικὸν ἢ παθητικὸν εἶναι θάτερον θατέρου (πάντα γὰρ ὁμοίως ὑπάρχειν ταῦτα τοῖς ὁμοίοις), τὰ δ' ἀνόμοια καὶ τὰ διάφορα ποιεῖν καὶ πάσχειν εἰς ἄλληλα πέφυκεν.

Καὶ γὰρ ὅταν τὸ ἔλαττον πῦρ ὑπὸ τοῦ πλείονος φθείρηται, διὰ τὴν ἐναντίωσιν τοῦτό φασι πάσχειν· ἐναντίον γὰρ εἶναι τὸ πολὺ τῷ ὀλίγῳ. Δημόκριτος δὲ παρὰ τοὺς ἄλλους ἰδίως ἔλεξε μόνος· φησὶ γὰρ τὸ αὐτὸ καὶ ὅμοιον εἶναι τό τε ποιοῦν καὶ τὸ πάσχον· οὐ γὰρ ἐγχωρεῖν τὰ ἕτερα καὶ ιαφέροντα πάσχειν ὑπ' ἀλλήλων, ἀλλὰ κἂν ἕτερα ὄντα ποιῇ τι εἰς ἄλληλα, οὐχ ἢ ἕτερα ἄλλ' ἢ ταυτὸν τι ὑπάρχει, ταύτη τοῦτο συμβαίνειν αὐτοῖς.

Τὰ μὲν οὖν λεγόμενα ταῦτ' ἐστίν, εὐόκασι δὲ οἱ τοῦτον τὸν τρόπον λέγοντες ὑπεναντία φαίνεσθαι λέγειν. Αἴτιον δὲ τῆς ἐναντιολογίας ὅτι δέον ὅλον τι θεωρῆσαι μέρος τι τυγχάνουσι λέγοντες ἐκάτεροι· τό τε γὰρ ὅμοιον καὶ τὸ πάντη πάντως ἀδιάφορον εὖλογον μὴ πάσχειν ὑπὸ τοῦ ὁμοίου μηθέν· τί γὰρ μᾶλλον θάτερον ἔσται ποιητικὸν ἢ θάτερον; εἴ τε ὑπὸ τοῦ ὁμοίου τι πάσχειν δυνατόν, καὶ αὐτὸ ὑφ' αὐτοῦ· καίτοι τούτων οὕτως ἐχόντων οὐδὲν ἂν εἴη οὔτε ἄφθαρτον οὔτε ἀκίνητον, εἴπερ τὸ ὅμοιον ἢ ὅμοιον ποιητικόν· αὐτὸ γὰρ αὐτὸ κινήσει πᾶν, τό τε παντελῶς ἕτερον καὶ τὸ μηθαμῇ ταυτὸν ὡσαύτως· οὐδὲν γὰρ ἂν πάθοι λευκότης ὑπὸ γραμμῆς ἢ γραμμὴ ὑπὸ λευκότητος, πλὴν εἰ μὴ που κατὰ συμβεβηκός, οἷον εἰ συμβέβηκε λευκὴν ἢ μέλαιναν εἶναι τὴν γραμμὴν· οὐκ ἐξίστησι γὰρ ἄλληλα τῆς φύσεως ὅσα μῆτ' ἐναντία μῆτ' ἐξ ἐναντίων ἐστίν.

Ἄλλ' ἐπεὶ οὐ τὸ τυχὸν πέφυκε πάσχειν καὶ ποιεῖν, ἀλλ' ὅσα ἢ ἐναντία ἐστίν ἢ ἐναντίωσιν ἔχει, ἀνάγκη καὶ τὸ ποιοῦν καὶ τὸ πάσχον τῷ γένει μὲν ὅμοιον εἶναι καὶ ταυτό, τῷ δ' εἶδει ἀνόμοιον καὶ ἐναντίον· πέφυκε γὰρ σῶμα μὲν ὑπὸ σώματος, χυμὸς δ' ὑπὸ χυμοῦ, χρῶμα δ' ὑπὸ χρώματος πάσχειν, (324a.) ὅλως δὲ τὸ ὁμογενὲς ὑπὸ τοῦ ὁμογενοῦς. Τούτου δ' αἴτιον ὅτι τὰναντία ἐν ταυτῷ γένει πάντα, ποιεῖ δὲ καὶ πάσχει τὰναντία ὑπ' ἀλλήλων. Ὡστ' ἀνάγκη πῶς μὲν

εἶναι ταῦτα τό τε ποιοῦν καὶ τὸ πάσχον, πῶς δ' ἕτερα καὶ ἀνόμοια ἀλλήλοις. Ἐπεὶ δὲ καὶ τὸ πάσχον καὶ τὸ ποιοῦν τῷ μὲν γένει ταῦτα καὶ ὅμοια τῷ δ' εἶδει ἀνόμοια, τοιαῦτα δὲ τὰναντία, φανερόν ὅτι παθητικὰ καὶ ποιητικὰ ἀλλήλων ἐστὶ τὰ τ' ἐναντία καὶ τὰ μεταξύ· καὶ γὰρ ὅλως φθορὰ καὶ γένεσις ἐν τούτοις. Διὸ καὶ εὐλογον ἤδη τό τε πῦρ θερμαίνειν καὶ τὸ ψυχρὸν ψύχειν, καὶ ὅλως τὸ ποιητικὸν ὁμοιοῦν ἑαυτῷ τὸ πάσχον· τό τε γὰρ ποιοῦν καὶ τὸ πάσχον ἐναντία ἐστί, καὶ ἡ γένεσις εἰς τοῦναντίον. Ὡστ' ἀνάγκη τὸ πάσχον εἰς τὸ ποιοῦν μεταβάλλειν· οὕτω γὰρ ἔσται εἰς τοῦναντίον ἡ γένεσις. Καὶ κατὰ λόγον δὴ τὸ μὴ ταῦτα λέγοντας ἀμφοτέρους ὁμῶς ἄπτεσθαι τῆς φύσεως. Λέγομεν γὰρ πάσχειν ὅτε μὲν τὸ ὑποκείμενον, οἷον ὑγιάζεσθαι τὸν ἄνθρωπον καὶ θερμαίνεσθαι καὶ ψύχεσθαι καὶ τᾶλλα τὸν αὐτὸν τρόπον, ὅτε δὲ θερμαίνεσθαι μὲν τὸ ψυχρὸν, ὑγιάζεσθαι δὲ τὸ κάμνον· ἀμφοτέρα δ' ἐστὶν ἀληθῆ.

Τὸν αὐτὸν δὲ τρόπον καὶ ἐπὶ τοῦ ποιοῦντος· ὅτε μὲν γὰρ τὸν ἄνθρωπον φαμεν θερμαίνειν, ὅτε δὲ τὸ θερμόν· ἔστι μὲν γὰρ ὡς ἡ ὕλη πάσχει, ἔστι δ' ὡς τοῦναντίον. Οἱ μὲν οὖν εἰς ἐκεῖνο βλέψαντες ταυτόν τι δεῖν ὥήθησαν τὸ ποιοῦν ἔχειν καὶ τὸ πάσχον, οἱ δ' εἰς θάτερα τοῦναντίον. Τὸν αὐτὸν δὲ λόγον ὑποληπτέον εἶναι περὶ τοῦ ποιεῖν καὶ πάσχειν ὥπερ καὶ περὶ τοῦ κινεῖν καὶ κινεῖσθαι· διχῶς γὰρ λέγεται καὶ τὸ κινεῖν· ἐν ᾧ τε γὰρ ἡ ἀρχὴ τῆς κινήσεως, δοκεῖ τοῦτο κινεῖν (ἡ γὰρ ἀρχὴ πρώτη τῶν αἰτίων), καὶ πάλιν τὸ ἔσχατον πρὸς τὸ κινούμενον καὶ τὴν γένεσιν. Ὁμοίως δὲ καὶ περὶ τοῦ ποιοῦντος· καὶ γὰρ τὸν ἱατρόν φαμεν ὑγιάζειν καὶ τὸν οἶνον. Τὸ μὲν οὖν πρῶτον κινεῖν οὐδὲν κωλύει ἐν μὲν κινήσει ἀκίνητον εἶναι· ἐπ' ἐνίων δὲ καὶ ἀναγκαῖον· τὸ δ' ἔσχατον ἀεὶ κινεῖν κινούμενον. Ἐπὶ δὲ ποιήσεως τὸ μὲν πρῶτον ἀπαθές, τὸ δ' ἔσχατον καὶ αὐτὸ πάσχον· ὅσα γὰρ μὴ ἔχει τὴν αὐτὴν ὕλην, ποιεῖ ἀπαθῆ ὄντα, οἷον ἡ ἱατρικὴ· αὐτὴ γὰρ ποιοῦσα ὑγίειαν οὐδὲν πάσχει (324b.) ὑπὸ τοῦ ὑγιαζομένου. Τὸ δὲ σιτίον ποιοῦν καὶ αὐτὸ πάσχει τι· ἡ γὰρ θερμαίνεται ἢ ψύχεται ἢ ἄλλο τι πάσχει ἅμα ποιοῦν. Ἔστι δὲ ἡ μὲν ἱατρικὴ ὡς ἀρχή, τὸ δὲ σιτίον τὸ ἔσχατον καὶ ἀπτόμενον. Ὅσα μὲν οὖν μὴ ἐν ὕλῃ ἔχει τὴν μορφήν, ταῦτα μὲν ἀπαθῆ τῶν ποιητικῶν, ὅσα δ' ἐν ὕλῃ, παθητικά. Τὴν μὲν γὰρ ὕλην λέγομεν ὁμοίως ὡς εἰπεῖν τὴν αὐτὴν εἶναι τῶν ἀντικειμένων ὁποτέρουοῦν, ὥσπερ γένος ὄν, τὸ δὲ δυνάμενον θερμόν εἶναι παρόντος τοῦ θερμαντικοῦ καὶ πλησιάζοντος ἀνάγκη θερμαίνεσθαι· διό, καθάπερ εἴρηται, τὰ μὲν τῶν ποιητικῶν ἀπαθῆ τὰ

δὲ παθητικά. Καὶ ὥσπερ ἐπὶ κινήσεως τὸν αὐτὸν ἔχει τρόπον καὶ ἐπὶ τῶν ποιητικῶν· ἐκεῖ τε γὰρ τὸ πρῶτον κινουὺν ἀκίνητον, καὶ ἐπὶ τῶν ποιητικῶν τὸ πρῶτον ποιοῦν ἀπαθές.

Ἔστι δὲ τὸ ποιητικὸν αἴτιον ὥς ὅθεν ἡ ἀρχὴ τῆς κινήσεως. Τὸ δ' οὗ ἔνεκα οὐ ποιητικόν. Διὸ ἡ ὑγίεια οὐ ποιητικόν, εἰ μὴ κατὰ μεταφοράν· καὶ γὰρ τοῦ μὲν ποιοῦντος ὅταν ὑπάρχη, γίνεται τι τὸ πάσχον, τῶν δ' ἕξεων παρουσῶν οὐκέτι γίνεται, ἀλλ' ἔστιν ἤδη· τὰ δ' εἶδη καὶ τὰ τέλη ἕξεις τινές, ἢ δ' ὕλη ἢ ὕλη παθητικόν. Τὸ μὲν οὖν πῦρ ἔχει ἐν ὕλῃ τὸ θερμόν· εἰ δέ τι εἶη θερμὸν χωριστόν, τοῦτο οὐθὲν ἂν πάσχοι. Τοῦτο μὲν οὖν ἴσως ἀδύνατον εἶναι χωριστόν· εἰ δ' ἔστιν ἓν ἅπαντα, ἐπ' ἐκείνων ἂν εἶη τὸ λεγόμενον ἀληθές. Τί μὲν οὖν τὸ ποιεῖν καὶ πάσχειν ἐστὶ καὶ τίσιν ὑπάρχει καὶ διὰ τί καὶ πῶς, διωρίσθω τοῦτον τὸν τρόπον.

Πῶς δὲ ἐνδέχεται τοῦτο συμβαίνειν, πάλιν λέγωμεν.

Κεφάλαιο 8

Τοῖς μὲν οὖν δοκεῖ πάσχειν ἕκαστον διὰ τινων πόρων εἰσιόντος τοῦ ποιούντος ἐσχάτου καὶ κυριωτάτου, καὶ τοῦτον τὸν τρόπον καὶ ὁρᾶν καὶ ἀκούειν ἡμᾶς φασὶ καὶ τὰς ἄλλας αἰσθήσεις αἰσθάνεσθαι πάσας, ἔτι δὲ ὁρᾶσθαι διὰ τε ἀέρος καὶ ὕδατος καὶ τῶν διαφανῶν, διὰ τὸ πόρους ἔχειν ἀοράτους μὲν διὰ μικρότητα, πυκνοὺς δὲ καὶ κατὰ στοῖχον, καὶ μᾶλλον ἔχειν τὰ διαφανῆ μᾶλλον. Οἱ μὲν οὖν ἐπὶ τινων οὕτω διώρισαν, ὥσπερ καὶ Ἐμπεδοκλῆς, οὐ μόνον ἐπὶ τῶν ποιούντων καὶ πασχόντων, ἀλλὰ καὶ μίγνυσθαι φησιν ὅσων οἱ πόροι σύμμετροι πρὸς ἀλλήλους εἰσίν. Ὅδῃ δὲ μάλιστα καὶ περὶ (325a.) πάντων ἐνὶ λόγῳ διωρίκασι Λεύκιππος καὶ Δημόκριτος, ἀρχὴν ποιησάμενοι κατὰ φύσιν ἥπερ ἐστίν.

Ἐνίοις γὰρ τῶν ἀρχαίων ἔδοξε τὸ ὄν ἐξ ἀνάγκης ἓν εἶναι καὶ ἀκίνητον· τὸ μὲν γὰρ κενὸν οὐκ ὄν, κινήθηναί δ' οὐκ ἂν δύνασθαι μὴ ὄντος κενοῦ κεχωρισμένου. Οὐδ' αὖ πολλὰ εἶναι μὴ ὄντος τοῦ διείργοντος· τοῦτο δὲ μὴδὲν διαφέρειν, εἴ τις οἶεται μὴ συνεχὲς εἶναι τὸ πᾶν ἀλλ' ἄπτεσθαι διηρημένον, τοῦ φάναι πολλὰ καὶ μὴ ἓν εἶναι καὶ κενόν. Εἰ μὲν γὰρ πάντῃ διαιρετόν, οὐδὲν εἶναι ἓν, ὥστε οὐδὲ πολλὰ, ἀλλὰ κενὸν τὸ ὅλον· εἰ δὲ τῇ μὲν τῇ δὲ μή, πεπλασμένῳ τινὶ τοῦτ' εἰοικέναι· μέχρι πόσου γὰρ καὶ διὰ τί τὸ μὲν οὕτως ἔχει τοῦ ὅλου καὶ πληρὲς ἐστὶ, τὸ δὲ διηρημένον; ἔτι ὁμοίως φάναι ἀναγκαῖον μὴ εἶναι κίνησιν. Ἐκ μὲν οὖν τούτων τῶν λόγων, ὑπερβάντες τὴν αἴσθησιν καὶ παριδόντες αὐτὴν ὡς τῷ λόγῳ δέον ἀκολουθεῖν, ἓν καὶ ἀκίνητον τὸ πᾶν εἶναι φασὶ καὶ ἄπειρον ἓνιοι· τὸ γὰρ πέρας περαίνειν ἂν πρὸς τὸ κενόν. Οἱ μὲν οὖν οὕτως καὶ διὰ ταύτας τὰς αἰτίας ἀπεφύγαντο περὶ τῆς ἀληθείας· ἐπεὶ δὲ ἐπὶ μὲν τῶν λόγων δοκεῖ ταῦτα συμβαίνειν, ἐπὶ δὲ τῶν πραγμάτων μανίᾳ παραπλήσιον εἶναι τὸ δοξάζειν οὕτως· οὐδένα γὰρ τῶν μαινομένων ἐξεστάναι τοσοῦτον ὥστε τὸ πῦρ ἓν εἶναι δοκεῖν καὶ τὸν κρύσταλλον, ἀλλὰ μόνον τὰ καλὰ καὶ τὰ φαινόμενα διὰ συνήθειαν, ταῦτ' ἐνίοις διὰ τὴν μανίαν οὐθὲν δοκεῖ διαφέρειν.

Λεύκιππος δ' ἔχειν ὥηθη λόγους οἳ τινες πρὸς τὴν αἴσθησιν ὁμολογούμενα λέγοντες οὐκ ἀναιρήσουσιν οὔτε γένεσιν οὔτε φθορὰν οὔτε κίνησιν καὶ τὸ πλῆθος τῶν ὄντων Ὁμολογήσας δὲ ταῦτα μὲν τοῖς φαινομένοις, τοῖς δὲ τὸ ἓν κατασκευάζουσιν ὡς οὐκ

ἂν κίνησιν οὕσαν ἄνευ κενοῦ τό τε κενὸν μὴ ὄν, καὶ τοῦ ὄντος οὐθὲν μὴ ὄν φησιν εἶναι.

Τὸ γὰρ κυρίως ὄν παμπληρὲς ὄν· ἀλλ’ εἶναι τὸ τοιοῦτον οὐχ ἔν, ἀλλ’ ἄπειρα τὸ πλῆθος καὶ ἀόρατα διὰ σμικρότητα τῶν ὄγκων. Ταῦτα δ’ ἐν τῷ κενῷ φέρεσθαι (κενὸν γὰρ εἶναι), καὶ συνιστάμενα μὲν γένεσιν ποιεῖν, διαλυόμενα δὲ φθοράν. Ποιεῖν δὲ καὶ πάσχειν ἢ τυγχάνουσιν ἀπτόμενα· ταύτη γὰρ οὐχ ἔν εἶναι. Καὶ συντιθέμενα δὲ καὶ περιπλεκόμενα γεννᾶν· ἐκ δὲ τοῦ κατ’ ἀλήθειαν ἑνὸς οὐκ ἂν γενέσθαι πλῆθος, οὐδ’ ἐκ τῶν ἀληθῶς πολλῶν ἔν, ἀλλ’ εἶναι τοῦτ’ ἀδύνατον, ἀλλ’ (325b.) ὥσπερ Ἐμπεδοκλῆς καὶ τῶν ἄλλων τινές φασι πάσχειν διὰ πόρων, οὕτω πᾶσαν ἀλλοίωσιν καὶ πᾶν τὸ πάσχειν τοῦτον γίνεσθαι τὸν τρόπον, διὰ τοῦ κενοῦ γινομένης τῆς διαλύσεως καὶ τῆς φθορᾶς, ὁμοίως δὲ καὶ τῆς αὐξήσεως, ὑπεισδυομένων στερεῶν. Σχεδὸν δὲ καὶ Ἐμπεδοκλεῖ ἀναγκαῖον λέγειν, ὥσπερ καὶ Λευκίππος φησιν· εἶναι γὰρ ἅττα στερεά, ἀδιαίρετα δέ, εἰ μὴ πάντη πόροι συνεχεῖς εἰσιν. Τοῦτο δ’ ἀδύνατον· οὐθὲν γὰρ ἔσται ἕτερον στερεὸν παρὰ τοὺς πόρους, ἀλλὰ πᾶν κενόν. Ἀνάγκη ἄρα τὰ μὲν ἀπτόμενα εἶναι ἀδιαίρετα, τὰ δὲ μεταξὺ αὐτῶν κενά, οὓς ἐκεῖνος λέγει πόρους. Οὕτως δὲ καὶ Λευκίππος λέγει περὶ τοῦ ποιεῖν καὶ πάσχειν.

Οἱ μὲν οὖν τρόποι καθ’ οὓς τὰ μὲν ποιεῖ τὰ δὲ πάσχει σχεδὸν οὕτοι λέγονται· καὶ περὶ μὲν τούτων, καὶ πῶς λέγουσι, δηλόν, καὶ πρὸς τὰς αὐτῶν θέσεις αἷς χρῶνται σχεδὸν ὁμολογουμένως φαίνεται συμβαῖνον. Τοῖς δ’ ἄλλοις ἦττον, οἷον Ἐμπεδοκλεῖ τίνα τρόπον ἔσται γένεσις καὶ φθορά καὶ ἀλλοίωσις οὐ δηλόν. Τοῖς μὲν γάρ ἐστιν ἀδιαίρετα τὰ πρῶτα τῶν σωμάτων, σχήματι διαφέροντα μόνον, ἐξ ὧν πρῶτων σύγκειται καὶ εἰς ἃ ἔσχατα διαλύεται· Ἐμπεδοκλεῖ δὲ τὰ μὲν ἄλλα φανερόν ὅτι μέχρι τῶν στοιχείων ἔχει τὴν γένεσιν καὶ τὴν φθοράν, αὐτῶν δὲ τούτων πῶς γίνεται καὶ φθείρεται τὸ σωρευόμενον μέγεθος, οὔτε δηλόν οὔτε ἐνδέχεται λέγειν αὐτῷ μὴ λέγοντι καὶ τοῦ πυρὸς εἶναι στοιχεῖον, ὁμοίως δὲ καὶ τῶν ἄλλων ἀπάντων, ὥσπερ ἐν τῷ Τιμαίῳ γέγραφε Πλάτων.

Τοσοῦτον γὰρ διαφέρει τοῦ μὴ τὸν αὐτὸν τρόπον Λευκίππῳ λέγειν, ὅτι ὁ μὲν στερεὰ ὁ δ’ ἐπίπεδα λέγει τὰ ἀδιαίρετα, καὶ ὁ μὲν ἀπείροις ὠρίσθαι σχήμασι τῶν ἀδιαιρέτων στερεῶν ἕκαστον ὁ δὲ ὠρισμένοις, ἐπεὶ ἀδιαίρετά γε ἀμφοτέροι λέγουσι καὶ ὠρισμένα σχήμασιν. Ἐκδὴ τούτων αἱ γενέσεις καὶ αἱ διακρίσεις Λευκίππῳ μὲν

δύο τρόποι ἂν εἶεν, διὰ τε τοῦ κενοῦ καὶ διὰ τῆς ἀφῆς (ταύτη γὰρ διαιρετὸν ἕκαστον), Πλάτωνι δὲ κατὰ τὴν ἀφὴν μόνον· κενὸν γὰρ οὐκ εἶναί φησιν· καὶ περὶ μὲν τῶν ἀδιαιρέτων ἐπιπέδων εἰρήκαμεν ἐν τοῖς πρότερον λόγοις· περὶ δὲ τῶν ἀδιαιρέτων στερεῶν τὸ μὲν ἐπὶ πλεον θεωρῆσαι τὸ συμβαῖνον ἀφείσθω τὸ νῦν, ὥς δὲ μικρὸν παρεκβᾶσιν εἰπεῖν, (326a.) ἀναγκαῖον ἀπαθές τε ἕκαστον λέγειν τῶν ἀδιαιρέτων (οὐ γὰρ οἷόν τε πάσχειν ἄλλ’ ἢ διὰ τοῦ κενοῦ) καὶ μηθενὸς ποιητικὸν πάθους· οὔτε γὰρ ψυχρὸν οὔτε σκληρὸν οἷόν τ’ εἶναι. Καίτοι τοῦτό γε ἄτοπον, τὸ μόνον ἀποδοῦναι τῷ περιφερεῖ σχήματι τὸ θερμόν· ἀνάγκη γὰρ καὶ τοῦναντίον τὸ ψυχρὸν ἄλλῳ τινὶ προσῆκειν τῶν σχημάτων. Ἄτοπον δὲ κἂν εἰ ταῦτα μὲν ὑπάρχει, λέγω δὲ θερμότης καὶ ψυχρότης, βαρύτης δὲ καὶ κουφότης καὶ σκληρότης καὶ μαλακότης μὴ ὑπάρξει· καίτοι βαρύτερόν γε κατὰ τὴν ὑπεροχὴν φησιν εἶναι Δημόκριτος ἕκαστον τῶν ἀδιαιρέτων, ὥστε δῆλον ὅτι καὶ θερμότερον. Τοιαῦτα δ’ ὄντα μὴ πάσχειν ὑπ’ ἀλλήλων ἀδύνατον, οἷον ὑπὸ τοῦ πολὺ ὑπερβάλλοντος θερμοῦ τὸ ἡρέμα θερμόν.

Ἀλλὰ μὴν εἰ σκληρόν, καὶ μαλακόν. Τὸ δὲ μαλακὸν ἤδη τῷ πάσχειν τι λέγεται· τὸ γὰρ ὑπεικτικὸν μαλακόν. Ἀλλὰ μὴν ἄτοπον καὶ εἰ μηθὲν ὑπάρχει ἄλλ’ ἢ μόνον σχῆμα· καὶ εἰ ὑπάρχει, ἐν δὲ μόνον, οἷον τὸ μὲν ψυχρὸν τὸ δὲ θερμόν· οὐδὲ γὰρ ἂν μία τις εἴη ἡ φύσις αὐτῶν. Ὅμοίως δὲ ἀδύνατον καὶ εἰ πλείω τῷ ἐνὶ ἀδιαίρετον γὰρ ὃν ἐν τῷ αὐτῷ ἔξει τὰ πάθη, ὥστε καὶ ἐὰν πάσχη ἥπερ ψύχεται, ταύτη τι καὶ ἄλλο ποιήσει ἢ πείσεται. Τὸν αὐτὸν δὲ τρόπον καὶ ἐπὶ τῶν ἄλλων παθημάτων· τοῦτο γὰρ καὶ τοῖς στερεὰ καὶ τοῖς ἐπίπεδα λέγουσιν ἀδιαίρετα συμβαίνει τὸν αὐτὸν τρόπον· οὔτε γὰρ μανότερα οὔτε πυκνότερα οἷόν τε γίνεσθαι κενοῦ μὴ ὄντος ἐν τοῖς ἀδιαιρέτοις.

Ἔτι δ’ ἄτοπον καὶ τὸ μικρὰ μὲν ἀδιαίρετα εἶναι, μεγάλα δὲ μή· νῦν μὲν γὰρ εὐλόγως τὰ μείζω θραύεται μᾶλλον τῶν μικρῶν· τὰ μὲν γὰρ διαλύεται ῥαδίως, οἷον τὰ μεγάλα· προσκόπτει γὰρ πολλοῖς· τὸ δὲ ἀδιαίρετον ὅλως διὰ τί μᾶλλον ὑπάρχει τῶν μεγάλων τοῖς μικροῖς; ἔτι δὲ πότερον μία πάντων ἢ φύσις ἐκείνων τῶν στερεῶν, ἢ διαφέρει θάτερα τῶν ἐτέρων, ὥσπερ ἂν εἰ τὰ μὲν εἴη πύρινα, τὰ δὲ γήινα τὸν ὄγκον; εἰ μὲν γὰρ μία φύσις ἐστὶν ἀπάντων, τί τὸ χωρίσαν; ἢ διὰ τί οὐ γίνεται ἀσάμενα ἐν, ὥσπερ ὕδωρ ὕδατος ὅταν θίγῃ; οὐδὲν γὰρ διαφέρει τὸ ὕστερον τοῦ προτέρου. Εἰ δ’ ἕτερα, ποῖα ταῦτα; καὶ δῆλον ὥς ταῦτα θετέον ἀρχὰς καὶ αἰτίας τῶν (326b.) συμβαινόντων

μᾶλλον ἢ τὰ σχήματα. Ἔτι δὲ διαφέροντα τὴν φύσιν, κἂν ποιοῖ κἂν πάσχοι θιγγάνοντα ἀλλήλων. Ἔτι δὲ τί τὸ κινοῦν; εἰ μὲν γὰρ ἕτερον, παθητικόν· εἰ δ' αὐτὸ αὐτὸ ἕκαστον, ἢ διαιρετὸν ἔσται, κατ' ἄλλο μὲν κινοῦν κατ' ἄλλο δὲ κινούμενον, ἢ κατὰ ταὐτὸ τάναντία ὑπάρξει, καὶ ἡ ὕλη οὐ μόνον ἀριθμῶ ἔσται μία ἀλλὰ καὶ δυνάμει.

Ὅσοι (6) μὲν οὖν διὰ τῆς <διὰ> τῶν πόρων κινήσεως φασι τὰ πάθη συμβαίνειν, εἰ μὲν καὶ πεπληρωμένων τῶν πόρων, περίεργον οἱ πόροι· εἰ γὰρ ταύτη τι πάσχει τὸ πᾶν, κἂν μὴ πόρους ἔχον ἀλλ' αὐτὸ συνεχές ὃν πάσχοι τὸν αὐτὸν τρόπον. Ἔτι δὲ πῶς ἐνδέχεται περὶ τοῦ διορᾶν συμβαίνειν ὡς λέγουσιν; οὔτε γὰρ κατὰ τὰς ἀφὰς ἐνδέχεται διέναι διὰ τῶν διαφανῶν, οὔτε διὰ τῶν πόρων, εἰ πλήρης ἕκαστος· τί γὰρ διοίσει τοῦ μὴ ἔχειν πόρους; πᾶν γὰρ ὁμοίως ἔσται πλήρες.

Ἀλλὰ μὴν εἰ καὶ κενὰ μὲν ταῦτα, ἀνάγκη δὲ σώματα ἐν αὐτοῖς ἔχειν, ταὐτὸ συμβήσεται πάλιν. Εἰ δὲ τηλικαῦτα τὸ μέγεθος ὥστε μὴ δέχεσθαι σῶμα μηδέν, γελοῖον τὸ μικρὸν μὲν οἶεσθαι κενὸν εἶναι, μέγα δὲ μὴ μὴδ' ὀπηλικονοῦν, ἢ τὸ κενὸν ἄλλο τι οἶεσθαι λέγειν πλὴν χώραν σώματος, ὥστε δῆλον ὅτι παντὶ σώματι τὸν ὄγκον ἴσον ἔσται κενόν.

Ὅλως δὲ τὸ πόρους ποιεῖν περίεργον· εἰ μὲν γὰρ μηδέν ποιεῖ κατὰ τὴν ἀφήν, οὐδὲ διὰ τῶν πόρων ποιήσει διόν· εἰ δὲ τῷ ἅπτεσθαι, καὶ μὴ πόρων ὄντων τὰ μὲν πείσεται τὰ δὲ ποιήσει τῶν πρὸς ἄλληλα τοῦτον τὸν τρόπον πεφυκότων.

Ὅτι μὲν οὖν οὕτως λέγειν τοὺς πόρους, ὥς τινες ὑπολαμβάνουσιν, ἢ ψεῦδος ἢ μάταιον, φανερόν ἐκ τούτων ἐστίν· διαιρετῶν δ' ὄντων πάντη τῶν σωμάτων πόρους ποιεῖν γελοῖον· ἢ γὰρ διαιρετά, δύναται χωρίζεσθαι.

Κεφάλαιο 9

Τίνα δὲ τρόπον ὑπάρχει τοῖς οὖσι γεννᾶν καὶ ποιεῖν καὶ πάσχειν, λέγωμεν λαβόντες ἀρχὴν τὴν πολλακίς εἰρημένην.

Εἰ γάρ ἐστι τὸ μὲν δυνάμει τὸ δ' ἐντελεχεία τοιοῦτον, πέφυκεν οὐ τῇ μὲν τῇ δ' οὐ πάσχειν, ἀλλὰ πάντῃ καθ' ὅσον ἐστὶ τοιοῦτον, ἦττον δὲ καὶ μᾶλλον ἢ τοιοῦτον μᾶλλον ἐστὶ καὶ ἦττον· καὶ ταύτῃ πόρους ἂν τις λέγοι μᾶλλον, καθάπερ ἐν τοῖς μεταλλευομένοις διατείνουσι τοῦ παθητικοῦ φλέβες (327a.) συνεχεῖς. Συμφυεὺς μὲν οὖν ἕκαστον καὶ ἐν ὄν ἀπαθές.

Ὅμοίως δὲ καὶ μὴ θιγγάνοντα μήτε αὐτῶν μήτ' ἄλλων, ἃ ποιεῖν πέφυκε καὶ πάσχειν. Λέγω δ' οἶον οὐ μόνον ἀπτόμενον θερμαίνει τὸ πῦρ, ἀλλὰ κἂν ἄποθεν ἦ· τὸν μὲν γὰρ ἀέρα τὸ πῦρ, ὁ δ' ἀήρ τὸ σῶμα θερμαίνει, πεφυκῶς ποιεῖν καὶ πάσχειν.

Τὸ δὲ τῇ μὲν οἶεσθαι πάσχειν τῇ δὲ μή, διορίσαντας ἐν ἀρχῇ τοῦτο λεκτέον. Εἰ μὲν γὰρ μὴ πάντῃ διαιρετὸν τὸ μέγεθος, ἀλλ' ἐστὶ σῶμα ἀδιαίρετον ἢ πλάτος, οὐκ ἂν εἴη πάντῃ παθητικόν, ἀλλ' οὐδὲ συνεχές οὐδέν· εἰ δὲ τοῦτο ψεῦδος καὶ πᾶν σῶμα διαιρετὸν, οὐδὲν διαφέρει διηρηθῆναι μὲν ἄπτεσθαι δέ, ἢ διαιρετὸν εἶναι· εἰ γὰρ διακρίνεσθαι δύναται κατὰ τὰς ἀφάς, ὥσπερ φασὶ τινες, κἂν μήπω ἦ διηρημένον, ἔσται διηρημένον· δυνατόν γὰρ διαιρεθῆναι· γίνεται γὰρ οὐθὲν ἀδύνατον.

Ὅλως δὲ τὸ τοῦτον γίνεσθαι τὸν τρόπον μόνον σχιζομένων τῶν σωμάτων ἄτοπον· ἀναιρεῖ γὰρ οὗτος ὁ λόγος ἀλλοίωσιν, ὁρῶμεν δὲ τὸ αὐτὸ σῶμα συνεχές ὄν ὅτε μὲν ὑγρὸν ὅτε δὲ πεπηγός, οὐ διαιρέσει καὶ συνθέσει τοῦτο παθόν, οὐδὲ τροπῇ καὶ διαθιγῇ, καθάπερ λέγει Δημόκριτος· οὔτε γὰρ μεταταχθὲν οὔτε μετατεθὲν τὴν φύσιν πεπηγός ἐξ ὑγροῦ γέγονεν· οὐδ' ἐνυπάρχει τὰ σκληρὰ καὶ πεπηγότα ἀδιαίρετα τοὺς ὄγκους· ἀλλ' ὁμοίως ἅπαν ὑγρὸν, ὅτε δὲ σκληρὸν καὶ πεπηγός ἐστιν.

Ἔτι δ' οὐδ' αὖξισιν οἶόν τ' εἶναι καὶ φθίσιν· οὐ γὰρ ὅτιοῦν ἔσται γεγονὸς μεῖζον, εἴπερ ἔσται πρόσθεσις, καὶ μὴ πᾶν μεταβεβληκός, ἢ μιχθέντος τινὸς ἢ καθ' αὐτὸ μεταβαλόντος.

Ὅτι μὲν οὖν ἐστὶ τὸ γεννᾶν καὶ τὸ ποιεῖν καὶ τὸ γίνεσθαι τε καὶ πάσχειν ὑπ' ἀλλήλων, καὶ τίνα τρόπον ἐνδέχεται, καὶ τίνα φασὶ μὲν τινες οὐκ ἐνδέχεται δέ, διωρίσθω τοῦτον τὸν τρόπον.

Κεφάλαιο 10

Λοιπὸν δὲ θεωρήσαι περὶ μίξεως κατὰ τὸν αὐτὸν τρόπον τῆς μεθόδου· τοῦτο γὰρ ἦν τρίτον τῶν προτεθέντων ἐξ ἀρχῆς. Σκεπτέον δὲ τί τ' ἐστὶν ἡ μίξις καὶ τί τὸ μικτόν, καὶ τίσιν ὑπάρχει τῶν ὄντων καὶ πῶς, ἔτι δὲ πότερον ἔστι μίξις ἢ τοῦτο ψεῦδος· ἀδύνατον γὰρ ἐστὶ μιχθῆναί τι ἕτερον ἐτέρῳ, καθάπερ λέγουσί τινες· ὄντων μὲν γὰρ ἔτι τῶν (327b.) μιχθέντων καὶ μὴ ἡλλοιωμένων οὐδὲν μᾶλλον νῦν μεμίχθαι φασὶν ἢ πρότερον, ἀλλ' ὁμοίως ἔχειν, θατέρου δὲ φθαρέντος οὐ μεμίχθαι, ἀλλὰ τὸ μὲν εἶναι τὸ δ' οὐκ εἶναι, τὴν δὲ μίξιν ὁμοίως ἐχόντων εἶναι τὸν αὐτὸν δὲ τρόπον καὶ εἰ ἀμφοτέρων συνελθόντων ἔφθαρται τῶν μινυμένων ἐκάτερον· οὐ γὰρ εἶναι μεμιγμένα τὰ γε ὅλως οὐκ ὄντα. Οὗτος μὲν οὖν ὁ λόγος ἔοικε ζητεῖν διορίσαι τί διαφέρει μίξις γενέσεως καὶ φθορᾶς, καὶ τί τὸ μικτόν τοῦ γεννητοῦ καὶ φθαρτοῦ· δηλὸν γὰρ ὥς δεῖ διαφέρειν, εἴπερ ἔστιν. Ὡστε τούτων ὄντων φανερῶν τὰ διαφορηθέντα λύονται' ἄν.

Ἀλλὰ μὴν οὐδὲ τὴν ὕλην τῷ πυρὶ μεμίχθαι φαμέν οὐδὲ μίγνυσθαι καιομένην, οὐτ' αὐτὴν αὐτῆς τοῖς μορίοις οὔτε τῷ πυρί, ἀλλὰ τὸ μὲν πῦρ γίνεσθαι, τὴν δὲ φθείρεσθαι. Τὸν αὐτὸν δὲ τρόπον οὔτε τῷ σώματι τὴν τροφήν οὔτε τὸ σχῆμα τῷ κηρῷ μινγνύμενον σχηματίζειν τὸν ὄγκον· οὐδὲ τὸ σῶμα καὶ τὸ λευκὸν οὐδ' ὅλως τὰ πάθη καὶ τὰς ἕξεις οἷόν τε μίγνυσθαι τοῖς πράγμασιν· σωζόμενα γὰρ ὁράται. Ἀλλὰ μὴν οὐδὲ τὸ λευκὸν γε καὶ τὴν ἐπιστήμην ἐνδέχεται μιχθῆναι, οὐδ' ἄλλο τῶν μὴ χωριστῶν οὐδέν. Ἀλλὰ τοῦτο λέγουσιν οὐ καλῶς οἱ πάντα ποτὲ ὁμοῦ φάσκοντες εἶναι καὶ μεμίχθαι· οὐ γὰρ ἅπαν ἅπαντι μικτόν, ἀλλ' ὑπάρχειν δεῖ χωριστὸν ἐκάτερον τῶν μιχθέντων· τῶν δὲ παθῶν οὐθὲν χωριστόν. Ἐπεὶ δ' ἐστὶ τὰ μὲν δυνάμει τὰ δ' ἐνεργείᾳ τῶν ὄντων, ἐνδέχεται τὰ μιχθέντα εἶναί πως καὶ μὴ εἶναι, ἐνεργείᾳ μὲν ἐτέρου ὄντος τοῦ γεγονότος ἐξ αὐτῶν, δυνάμει δ' ἔτι ἐκατέρου ἅπερ ἦσαν πρὶν μιχθῆναι, καὶ οὐκ ἀπολωλότα· τοῦτο γὰρ ὁ λόγος διηπόρει πρότερον· φαίνεται δὲ τὰ μινγνύμενα πρότερόν τε ἐκ κεχωρισμένων συνιόντα καὶ δυνάμενα χωρίζεσθαι πάλιν· οὔτε διαμένουσιν οὖν ἐνεργείᾳ ὥσπερ τὸ σῶμα καὶ τὸ λευκόν, οὔτε φθείρονται, οὔτε θάτερον οὐτ' ἄμφω· σώζεται γὰρ ἡ δύναμις αὐτῶν.

Διὸ ταῦτα μὲν ἀφείσθω· τὸ δὲ συνεχές τούτοις ἀπόρημα διαιρετέον, πότερον ἡ μίξις πρὸς τὴν αἴσθησιν τί ἐστίν. Ὅταν γὰρ

οὕτως εἰς μικρὰ διαιρεθῇ τὰ μινύμενα, καὶ τεθῇ παρ' ἄλληλα τοῦτον τὸν τρόπον ὥστε μὴ δῆλον ἕκαστον εἶναι τῇ αἰσθήσει, τότε μέμικται (328a.) ἢ οὐ, ἀλλ' ἔστιν ὥστε ὅτιοῦν εἶναι μόριον τῶν μιχθέντων; λέγεται μὲν οὖν ἐκείνως, οἷον κριθᾶς μεμίχθαι πυροῖς, ὅταν ἡτισοῦν παρ' ὄντινόν τεθῇ. Εἰ δ' ἐστὶ πᾶν σῶμα διαιρετόν, εἴπερ ἐστὶ σῶμα σώματι μικτόν ὁμοιομερές, ὅτιοῦν ἂν δέοι μέρος γίνεσθαι παρ' ὅτιοῦν. Ἐπεὶ δ' οὐκ ἔστιν εἰς τάλάχιστα διαιρεθῆναι, <οὐδὲ> σύνθεσις ταῦτό καὶ μίξις ἀλλ' ἕτερον, δῆλον ὡς οὔτε κατὰ μικρὰ σωζόμενα δεῖ τὰ μινύμενα φάναι μεμίχθαι. Σύνθεσις γὰρ ἔσται καὶ οὐ κρᾶσις οὐδὲ μίξις, οὐδ' ἔξει τὸν αὐτὸν λόγον τῷ ὅλῳ τὸ μόριον.

Φαμὲν δ', εἴπερ δεῖ μεμίχθαι τι, τὸ μιχθὲν ὁμοιομερές εἶναι, καὶ ὥσπερ τοῦ ὕδατος τὸ μέρος ὕδωρ, οὕτω καὶ τοῦ κραθέντος. Ἄν δ' ἢ κατὰ μικρὰ σύνθεσις ἢ μίξις, οὐθὲν συμβήσεται τούτων, ἀλλὰ μόνον μεμιγμένα πρὸς τὴν αἴσθησιν (καὶ τὸ αὐτὸ τῷ μὲν μεμιγμένον, ἐὰν μὴ βλέπῃ ὀξύ, τῷ Λυγκεῖ δ' οὐθὲν μεμιγμένον), <οὐδὲ> τῇ διαιρέσει, ὥστε ὅτιοῦν παρ' ὅτιοῦν μέρος, ἀδύνατον γὰρ οὕτω διαιρεθῆναι. Ἡ οὖν οὐκ ἔστι μίξις, ἢ λεκτέον τοῦτο πῶς ἐνδέχεται γίνεσθαι πάλιν.

Ἔστι δὴ, ὡς ἔφαμεν, τῶν ὄντων τὰ μὲν ποιητικὰ τὰ δ' ὑπὸ τούτων παθητικά. Τὰ μὲν οὖν ἀντιστρέφει, ὅσων ἡ αὐτὴ ὕλη ἐστί, καὶ ποιητικὰ ἀλλήλων καὶ παθητικὰ ὑπ' ἀλλήλων· τὰ δὲ ποιεῖ ἀπαθῆ ὄντα, ὅσων μὴ ἡ αὐτὴ ὕλη. Τούτων μὲν οὖν οὐκ ἔστι μίξις· διὸ οὐδ' ἡ ἱατρικὴ ποιεῖ ὑγίειαν οὐδ' ἡ ὑγίεια μινυμένη τοῖς σώμασιν. Τῶν δὲ ποιητικῶν καὶ παθητικῶν ὅσα εὐδιαίρετα, πολλὰ μὲν ὀλίγοις καὶ μεγάλα μικροῖς συντιθέμενα οὐ ποιεῖ μίξιν, ἀλλ' αὔξισιν τοῦ κρατοῦντος· μεταβάλλει γὰρ θάτερον εἰς τὸ κρατοῦν, οἷον σταλαγμοὺς οἴνου μυρίοις χοεῦσιν ὕδατος οὐ μίγνυται· λύεται γὰρ τὸ εἶδος καὶ μεταβάλλει εἰς τὸ πᾶν ὕδωρ. Ὅταν δὲ ταῖς δυνάμεσιν ἰσάζῃ πως, τότε μεταβάλλει μὲν ἐκάτερον εἰς τὸ κρατοῦν ἐκ τῆς αὐτοῦ φύσεως, οὐ γίνεται δὲ θάτερον, ἀλλὰ μεταξύ καὶ κοινόν.

Φανερόν οὖν ὅτι ταῦτ' ἐστὶ μικτὰ ὅσα ἐναντίωσιν ἔχει τῶν ποιούντων· ταῦτα γὰρ δὴ ὑπ' ἀλλήλων ἐστὶ παθητικά. Καὶ μικρὰ δὲ μικροῖς παρατιθέμενα μίγνυται μᾶλλον· ῥᾶον γὰρ καὶ θᾶπτον ἄλληλα μεθίστησιν.

Τὸ δὲ πολὺ καὶ ὑπὸ πολλοῦ χρονίως τοῦτο δρᾷ. Διὸ τὰ (328b.) εὐόριστα τῶν διαιρετῶν καὶ παθητικῶν μικτὰ (διαιρεῖται γὰρ εἰς μικρὰ ταῦτα ῥαδίως· τοῦτο γὰρ ἦν τὸ εὐορίστω εἶναι), οἷον τὰ ὑγρά

μικτὰ μάλιστα τῶν σωμάτων· εὐόριστον γὰρ μάλιστα τὸ ὑγρὸν τῶν διαιρετῶν, ἐὰν μὴ γλίσχρον ἦ· ταῦτα γὰρ δὴ πλείω καὶ μείζω μόνον ποιεῖ τὸν ὄγκον.

Ὅταν δ' ἡ θάτερον μόνον παθητικὸν ἢ σφόδρα, τὸ δὲ πάμπαν ἡρέμα, ἢ οὐθὲν πλεῖον τὸ μιχθὲν ἐξ ἀμφοῖν ἢ μικρόν, ὅπερ συμβαίνει περὶ τὸν καττίτερον καὶ τὸν χαλκόν. Ἐνια γὰρ ψελλίζεται πρὸς ἄλληλα τῶν ὄντων καὶ ἐπαμφοτερίζει· φαίνεται γὰρ πως καὶ μικτὰ ἡρέμα, καὶ ὡς θάτερον μὲν δεκτικὸν θάτερον δ' εἶδος. Ὅπερ ἐπὶ τούτων συμβαίνει· ὁ γὰρ καττίτερος ὡς πάθος τι ὦν ἄνευ ὕλης τοῦ χαλκοῦ σχεδὸν ἀφανίζεται καὶ μιχθεὶς ἅπεισι χρωματίσας μόνον. Ταὐτὸ δὲ τοῦτο συμβαίνει καὶ ἐφ' ἐτέρων.

Φανερόν τοίνυν ἐκ τῶν εἰρημένων καὶ ὅτι ἔστι μίξις καὶ τί ἐστι καὶ διὰ τί, καὶ ποῖα μικτὰ τῶν ὄντων, ἐπεὶ ἐστὶν ἓνια τοιαῦτα οἷα παθητικά τε ὑπ' ἀλλήλων καὶ εὐόριστα καὶ εὐδιαίρετα· ταῦτα γὰρ οὐτ' ἐφθάρθαι ἀνάγκη μεμιγμένα οὐτ' ἔτι ταῦτ' ἀπλῶς εἶναι, οὔτε σύνθεσιν εἶναι τὴν μίξιν αὐτῶν, οὔτε πρὸς τὴν αἴσθησιν· ἀλλ' ἔστι μικτὸν μὲν ὃ ἂν εὐόριστον ὢν παθητικὸν ἦ καὶ ποιητικὸν καὶ τοιούτῳ μικτόν (πρὸς ὁμώνυμον γὰρ τὸ μικτόν), ἢ δὲ μίξις τῶν μικτῶν ἀλλοιωθέντων ἔνωσις.

Κεφάλαιο 1

Περὶ μὲν οὖν μίξεως καὶ ἀφῆς καὶ τοῦ ποιεῖν καὶ πάσχειν εἴρηται πῶς ὑπάρχει τοῖς μεταβάλλουσι κατὰ φύσιν, ἔτι δὲ περὶ γενέσεως καὶ φθορᾶς τῆς ἀπλῆς, τίνος καὶ πῶς ἐστὶ καὶ διὰ τίν' αἰτίαν. Ὅμοίως δὲ καὶ περὶ ἀλλοιώσεως εἴρηται, τί τὸ ἀλλοιοῦσθαι καὶ τίν' ἔχει διαφορὰν αὐτῶν.

Λοιπὸν δὲ θεωρῆσαι περὶ τὰ καλούμενα στοιχεῖα τῶν σωμάτων. Γένεσις μὲν γὰρ καὶ φθορὰ πάσαις ταῖς φύσει συνεστώσαις οὐσίαις οὐκ ἄνευ τῶν αἰσθητῶν σωμάτων.

Τούτων δὲ τὴν ὑποκειμένην ὕλην οἱ μὲν φασιν εἶναι μίαν, οἷον ἀέρα τιθέντες ἢ πῦρ ἢ τι μεταξὺ τούτων, σῶμά τε ὃν καὶ χωριστόν, (329a.) οἱ δὲ πλείω τὸν ἀριθμὸν ἑνός, οἱ μὲν πῦρ καὶ γῆν, οἱ δὲ ταῦτά τε καὶ ἀέρα τρίτον, οἱ δὲ καὶ ὕδωρ τούτων τέταρτον, ὥσπερ Ἐμπεδοκλῆς· ἐξ ὧν συγκρινομένων καὶ διακρινομένων ἢ ἀλλοιουμένων συμβαίνειν τὴν γένεσιν καὶ τὴν φθορὰν τοῖς πράγμασιν.

Ὅτι μὲν οὖν τὰ πρῶτα ἀρχὰς καὶ στοιχεῖα καλῶς ἔχει λέγειν, ἔστω συνομολογούμενον, ἐξ ὧν μεταβαλλόντων ἢ κατὰ σύγκρισιν καὶ διάκρισιν ἢ κατ' ἄλλην μεταβολὴν συμβαίνει γένεσιν εἶναι καὶ φθοράν. Ἄλλ' οἱ μὲν ποιοῦντες μίαν ὕλην παρὰ τὰ εἰρημένα, ταύτην δὲ σωματικὴν καὶ χωριστὴν, ἀμαρτάνουσιν· ἀδύνατον γὰρ ἄνευ ἐναντιώσεως εἶναι τὸ σῶμα τοῦτο αἰσθητῆς· ἢ γὰρ κοῦφον ἢ βαρὺ ἢ ψυχρὸν ἢ θερμὸν ἀνάγκη εἶναι τὸ ἄπειρον τοῦτο, ὃ λέγουσί τινες εἶναι τὴν ἀρχήν. Ὡς δ' ἐν τῷ Τιμαίῳ γέγραπται, οὐδένα ἔχει διορισμόν· οὐ γὰρ εἴρηκε σαφῶς τὸ πανδεχές, εἰ χωρίζεται τῶν στοιχείων. Οὐδὲ χρῆται οὐδέν, φήσας εἶναι ὑποκειμένον τι τοῖς καλουμένοις στοιχείοις πρότερον, οἷον χρυσὸν τοῖς ἔργοις τοῖς χρυσοῖς. Καίτοι καὶ τοῦτο οὐ καλῶς λέγεται τοῦτον τὸν τρόπον λεγόμενον, ἀλλ' ὧν μὲν ἀλλοίωσις, ἐστὶν οὕτως, ὧν δὲ γένεσις καὶ φθορά, ἀδύνατον ἐκεῖνο προσαγορεύεσθαι ἐξ οὗ γέγονεν. Καίτοι γέφησι μακρῷ ἀληθέστατον εἶναι χρυσὸν λέγειν ἕκαστον εἶναι. Ἀλλὰ τῶν στοιχείων ὄντων στερεῶν μέχρι ἐπιπέδων ποιεῖται τὴν ἀνάλυσιν· ἀδύνατον δὲ τὴν τιθήνην καὶ τὴν ὕλην τὴν πρώτην τὰ ἐπίπεδα εἶναι. Ἡμεῖς δὲ φαμέν μὲν εἶναί τινα ὕλην τῶν σωμάτων τῶν αἰσθητῶν, ἀλλὰ ταύτην οὐ χωριστὴν ἀλλ' αἰετ' ἐναντιώσεως, ἐξ ἧς γίνεται

τὰ καλούμενα στοιχεῖα.

Διόρισται δὲ περὶ αὐτῶν ἐν ἑτέροις ἀκριβέστερον. Οὐ μὴν ἀλλ' ἐπειδὴ καὶ τὸν τρόπον τοῦτόν ἐστιν ἐκ τῆς ὕλης τὰ σώματα τὰ πρῶτα, διοριστέον καὶ περὶ τούτων, ἀρχὴν μὲν καὶ πρώτην οἰομένοις εἶναι τὴν ὕλην τὴν ἀχώριστον μὲν, ὑποκειμένην δὲ τοῖς ἐναντίοις· οὔτε γὰρ τὸ θερμὸν ὕλῃ τῷ ψυχρῷ οὔτε τοῦτο τῷ θερμῷ, ἀλλὰ τὸ ὑποκείμενον ἀμφοῖν. Ὡστε πρῶτον μὲν τὸ δυνάμει σῶμα αἰσθητὸν ἀρχή, δεύτερον δ' αἱ ἐναντιώσεις, λέγω δ' οἷον θερμότης καὶ ψυχρότης, τρίτον δ' ἤδη πῦρ καὶ ὕδωρ καὶ τὰ τοιαῦτα· ταῦτα μὲν γὰρ μεταβάλλει εἰς ἄλληλα, καὶ οὐχ ὥς Ἐμπεδοκλῆς καὶ (329b.) ἕτεροι λέγουσιν (οὐδὲ γὰρ ἂν ἦν ἀλλοίωσις), αἱ δ' ἐναντιώσεις οὐ μεταβάλλουσιν. Ἀλλ' οὐδὲν ἦττον καὶ ὥς σώματος ποίας καὶ πόσας λεκτέον ἀρχάς· οἱ μὲν γὰρ ἄλλοι ὑποθέμενοι χρῶνται, καὶ οὐδὲν λέγουσι διὰ τί αὗται ἢ τοσαῦται.

Κεφάλαιο 2

Ἐπεὶ οὖν ζητοῦμεν αἰσθητοῦ σώματος ἀρχάς, τοῦτο δ' ἐστὶν ἄπτοῦ, ἄπτὸν δ' οὗ ἢ αἰσθησις ἀφή, φανερόν ὅτι οὐ πᾶσαι αἱ ἐναντιώσεις σώματος εἶδη καὶ ἀρχάς ποιοῦσιν, ἀλλὰ μόνον αἱ κατὰ τὴν ἀφήν· κατ' ἐναντιώσιν τε γὰρ διαφέρουσι, καὶ κατὰ ἀπτήν ἐναντιώσιν. Διὸ οὔτε λευκότης καὶ μελανία οὔτε γλυκύτης καὶ πικρότης, ὁμοίως δ' οὐδὲ τῶν ἄλλων τῶν αἰσθητῶν ἐναντιώσεων οὐδὲν ποιεῖ στοιχεῖον. Καίτοι πρότερον ὅψις ἀφῆς, ὥστε καὶ τὸ ὑποκείμενον πρότερον.

Ἀλλ' οὐκ ἔστι σώματος ἄπτοῦ πάθος ἢ ἄπτὸν, ἀλλὰ καθ' ἕτερον, καὶ εἰ ἔτυχε τῇ φύσει πρότερον. Αὐτῶν δὴ πρῶτον τῶν ἀπτῶν διαιρετέον ποῖαι πρῶται διαφοραὶ καὶ ἐναντιώσεις. Εἰσὶ δ' ἐναντιώσεις κατὰ τὴν ἀφήν αἶδε, θερμὸν ψυχρόν, ξηρὸν ὑγρόν, βαρὺ κοῦφον, σκληρὸν μαλακόν, γλίσχρον κραῦρον, τραχὺ λεῖον, παχὺ λεπτόν. Τούτων δὲ βαρὺ μὲν καὶ κοῦφον οὐ ποιητικά οὐδὲ παθητικά· οὐ γὰρ τῷ ποιεῖν τε ἕτερον ἢ πάσχειν ὑφ' ἐτέρου λέγονται. Δεῖ δὲ ποιητικά καὶ παθητικά εἶναι ἀλλήλων τὰ στοιχεῖα· μίγνυται γὰρ καὶ μεταβάλλει εἰς ἄλληλα. Θερμὸν δὲ καὶ ψυχρόν καὶ ὑγρόν καὶ ξηρὸν τὰ μὲν τῷ ποιητικά εἶναι τὰ δὲ τῷ παθητικά λέγεται· θερμὸν γὰρ ἐστὶ τὸ συγκρίνον τὰ ὁμογενῇ (τὸ γὰρ διακρίνειν, ὅπερ φασι ποιεῖν τὸ πῦρ, συγκρίνειν ἐστὶ τὰ ὁμόφυλα· συμβαίνει γὰρ ἐξαιρεῖν τὰ ἀλλότρια), ψυχρόν δὲ τὸ συνάγον καὶ συγκρίνον ὁμοίως τὰ τε συγγενῇ καὶ τὰ μὴ ὁμόφυλα, ὑγρόν δὲ τὸ ἀόριστον οἰκείῳ ὄρω εὐόριστον ὄν, ξηρὸν δὲ τὸ εὐόριστον μὲν οἰκείῳ ὄρω, δυσόριστον δέ. Τὸ δὲ λεπτὸν καὶ παχὺ καὶ γλίσχρον καὶ κραῦρον καὶ σκληρὸν καὶ μαλακόν καὶ αἱ ἄλλαι διαφοραὶ ἐκ τούτων· ἐπεὶ γὰρ τὸ ἀναπληστικόν ἐστὶ τοῦ ὑγροῦ διὰ τὸ μὴ ὀρίσθαι μὲν εὐόριστον δ' εἶναι καὶ ἀκολουθεῖν τῷ (330a.) ἄπτομένῳ, τὸ δὲ λεπτὸν ἀναπληστικόν (λεπτομερὲς γάρ, καὶ τὸ μικρομερὲς ἀναπληστικόν· ὅλον γὰρ ὅλου ἄπτεται· τὸ δὲ λεπτὸν μάλιστα τοιοῦτον), φανερόν ὅτι τὸ μὲν λεπτὸν ἔσται τοῦ ὑγροῦ, τὸ δὲ παχὺ τοῦ ξηροῦ. Πάλιν δὲ τὸ μὲν γλίσχρον τοῦ ὑγροῦ (τὸ γὰρ γλίσχρον ὑγρὸν πεπονθὸς τί ἐστίν, οἷον τὸ ἔλαιον), τὸ δὲ κραῦρον τοῦ ξηροῦ· κραῦρον γὰρ τὸ τελέως ξηρόν, ὥστε καὶ πεπηγέναι δι' ἔλλειψιν ὑγρότητος.

Ἔτι τὸ μὲν μαλακόν τοῦ ὑγροῦ (μαλακόν γὰρ τὸ ὑπεῖκον εἰς

ἑαυτὸ καὶ μὴ μεθιστάμενον, ὅπερ ποιεῖ τὸ ὑγρόν· διὸ καὶ οὐκ ἔστι τὸ ὑγρὸν μαλακόν, ἀλλὰ τὸ μαλακὸν τοῦ ὑγροῦ), τὸ δὲ σκληρὸν τοῦ ξηροῦ· σκληρὸν γάρ ἐστι τὸ πεπηγὸς, τὸ δὲ πεπηγὸς ξηρόν. Λέγεται δὲ ξηρὸν καὶ ὑγρὸν πλεοναχῶς· ἀντίκειται γὰρ τῷ ξηρῷ καὶ τὸ ὑγρὸν καὶ τὸ διερόν, καὶ πάλιν τῷ ὑγρῷ καὶ τὸ ξηρὸν καὶ τὸ πεπηγὸς· ἅπαντα δὲ ταῦτ' ἐστὶ τοῦ ξηροῦ καὶ τοῦ ὑγροῦ τῶν πρώτως λεχθέντων.

Ἐπεὶ γὰρ ἀντίκειται τῷ διερῷ τὸ ξηρόν, καὶ διερὸν μὲν ἐστὶ τὸ ἔχον ἀλλοτρίαν ὑγρότητα ἐπιπολῆς, βεβρεγμένον δὲ τὸ εἰς βάθος, ξηρὸν δὲ τὸ ἐστερημένον ταύτης, φανερόν ὅτι τὸ μὲν διερὸν ἔσται τοῦ ὑγροῦ, τὸ δ' ἀντικείμενον ξηρὸν τοῦ πρώτως ξηροῦ. Πάλιν δὲ τὸ ὑγρὸν καὶ τὸ πεπηγὸς ὡσαύτως· ὑγρὸν μὲν γάρ ἐστι τὸ ἔχον οἰκείαν ὑγρότητα, βεβρεγμένον δὲ τὸ ἔχον ἀλλοτρίαν ὑγρότητα ἐν τῷ βάθει, πεπηγὸς δὲ τὸ ἐστερημένον ταύτης. Ὡστε καὶ τούτων ἔσται τὸ μὲν ξηροῦ τὸ δὲ ὑγροῦ. Δῆλον τοίνυν ὅτι πᾶσαι αἱ ἄλλαι διαφοραὶ ἀνάγονται εἰς τὰς πρώτας τέτταρας. Αὗται δὲ οὐκέτι εἰς ἐλάττους· οὔτε γὰρ τὸ θερμὸν ὅπερ ὑγρὸν ἢ ὅπερ ξηρόν, οὔτε τὸ ὑγρὸν ὅπερ θερμὸν ἢ ὅπερ ψυχρόν, οὔτε τὸ ψυχρὸν καὶ τὸ ξηρὸν οὔθ' ὑπ' ἄλληλ' οὔθ' ὑπὸ τὸ θερμὸν καὶ τὸ ὑγρὸν εἰσιν ὥστ' ἀνάγκη τέτταρας εἶναι ταύτας.

Κεφάλαιο 3

Ἐπεὶ δὲ τέτταρα τὰ στοιχεῖα, τῶν δὲ τεττάρων ἕξ αἱ συζεύξεις, τὰ δ' ἐναντία οὐ πέφυκε συνδυάζεσθαι (θερμὸν γὰρ καὶ ψυχρὸν εἶναι τὸ αὐτὸ καὶ πάλιν ξηρὸν καὶ ὑγρὸν ἀδύνατον), φανερόν ὅτι τέτταρες ἔσονται αἱ τῶν στοιχείων συζεύξεις, θερμοῦ καὶ ξηροῦ, καὶ θερμοῦ καὶ ὑγροῦ, καὶ (330b.) πάλιν ψυχροῦ καὶ ὑγροῦ, καὶ ψυχροῦ καὶ ξηροῦ. Καὶ ἠκολούθηκε κατὰ λόγον τοῖς ἀπλοῖς φαινομένοις σώμασι, πυρὶ καὶ ἀέρι καὶ ὕδατι καὶ γῇ· τὸ μὲν γὰρ πῦρ θερμὸν καὶ ξηρόν, ὁ δ' ἀήρ θερμὸν καὶ ὑγρόν (οἷον ἀτμὶς γὰρ ὁ ἀήρ), τὸ δ' ὕδωρ ψυχρὸν καὶ ὑγρόν, ἡ δὲ γῆ ψυχρὸν καὶ ξηρόν, ὥστ' εὐλόγως διανεμέσθαι τὰς διαφορὰς τοῖς πρώτοις σώμασι, καὶ τὸ πλῆθος αὐτῶν εἶναι κατὰ λόγον. Ἄπαντες γὰρ οἱ τὰ ἀπλᾶ σώματα στοιχεῖα ποιοῦντες οἱ μὲν ἓν, οἱ δὲ δύο, οἱ δὲ τρία, οἱ δὲ τέτταρα ποιοῦσιν. Ὅσοι μὲν οὖν ἓν μόνον λέγουσιν, εἴτα πυκνώσει καὶ μανώσκει τᾶλλα γεννῶσι, τούτοις συμβαίνει δύο ποιεῖν τὰς ἀρχάς, τό τε μανὸν καὶ τὸ πυκνὸν ἢ τὸ θερμὸν καὶ τὸ ψυχρὸν· ταῦτα γὰρ τὰ δημιουργοῦντα, τὸ δ' ἓν ὑπόκειται καθάπερ ὕλη.

Οἱ δ' εὐθὺς δύο ποιοῦντες, ὥσπερ Παρμενίδης πῦρ καὶ γῆν, τὰ μεταξὺ μίγματα ποιοῦσι τούτων, οἷον ἀέρα καὶ ὕδωρ. Ὡσαύτως δὲ καὶ οἱ τρία λέγοντες, καθάπερ Πλάτων ἐν ταῖς διαιρέσεσιν· τὸ γὰρ μέσον μίγμα ποιεῖ. Καὶ σχεδὸν ταῦτά λέγουσιν οἱ τε δύο καὶ οἱ τρία ποιοῦντες· πλὴν οἱ μὲν τέμνουσιν εἰς δύο τὸ μέσον, οἱ δ' ἓν μόνον ποιοῦσιν. Ἐνιοὶ δ' εὐθὺς τέτταρα λέγουσιν, οἷον Ἐμπεδοκλῆς. Συνάγει δὲ καὶ οὗτος εἰς τὰ δύο· τῷ γὰρ πυρὶ τᾶλλα πάντα ἀντιτίθησιν. Οὐκ ἔστι δὲ τὸ πῦρ καὶ ὁ ἀήρ καὶ ἕκαστον τῶν εἰρημένων ἀπλοῦν, ἀλλὰ μικτόν.

Τὰ δ' ἀπλᾶ τοιαῦτα μὲν ἔστιν, οὐ μέντοι ταῦτά, οἷον εἴ τι τῷ πυρὶ ὁμοῖον, πυροειδές, οὐ πῦρ, καὶ τὸ τῷ ἀέρι ἀεροειδές· ὁμοίως δὲ καὶ πῦρ τῶν ἄλλων. Τὸ δὲ πῦρ ἔστιν ὑπερβολὴ θερμότητος, ὥσπερ καὶ κρύσταλλος ψυχρότητος· ἡ γὰρ πῆξις καὶ ἡ ζέσις ὑπερβολαί τινές εἰσιν, ἡ μὲν ψυχρότης, ἡ δὲ θερμότης. Εἰ οὖν ὁ κρύσταλλός ἐστι πῆξις ὑγροῦ ψυχροῦ, καὶ τὸ πῦρ ἔσται ζέσις ξηροῦ θερμοῦ. Διὸ καὶ οὐδὲν οὗτ' ἐκ κρυστάλλου γίνεται οὗτ' ἐκ πυρός.

Ὅντων δὲ τεττάρων τῶν ἀπλῶν σωμάτων, ἑκάτερα τοῖν δυοῖν ἑκατέρου τῶν τόπων ἐστίν· πῦρ μὲν γὰρ καὶ ἀήρ τοῦ πρὸς τὸν ὅρον

φερομένου, γῆ δὲ καὶ ὕδωρ τοῦ πρὸς τὸ μέσον. Καὶ ἄκρα μὲν καὶ εἰλικρινέστατα πῦρ καὶ γῆ, μέσα δὲ καὶ μεμιγμένα μᾶλλον (331a.) ὕδωρ καὶ ἀήρ. Καὶ ἐκάτερα ἐκατέροις ἐναντία· πυρὶ μὲν γὰρ ἐναντίον ὕδωρ, ἀέρι δὲ γῆ· ταῦτα γὰρ ἐκ τῶν ἐναντίων παθημάτων συνέστηκεν. Οὐ μὲν ἀλλ' ἀπλῶς γε τέτταρα ὄντα ἐνὸς ἑκάστων ἐστι, γῆ μὲν ξηροῦ μᾶλλον ἢ ψυχροῦ, ὕδωρ δὲ ψυχροῦ μᾶλλον ἢ ὑγροῦ, ἀήρ δ' ὑγροῦ μᾶλλον ἢ θερμοῦ, πῦρ δὲ θερμοῦ μᾶλλον ἢ ξηροῦ.

Κεφάλαιο 4

Ἐπεὶ δὲ διώρισται πρότερον ὅτι τοῖς ἀπλοῖς σώμασιν ἐξ ἀλλήλων ἢ γένεσις, ἅμα δὲ καὶ κατὰ τὴν αἴσθησιν φαίνεται γινόμενα (οὐ γὰρ ἂν ἦν ἀλλοιώσις· κατὰ γὰρ τὰ τῶν ἀπτῶν πάθη ἀλλοιώσις ἐστίν), λεκτέον τίς ὁ τρόπος τῆς εἰς ἄλληλα μεταβολῆς, καὶ πότερον ἅπαν ἐξ ἅπαντος γίνεσθαι δυνατόν ἢ τὰ μὲν δυνατόν τὰ δ' ἀδύνατον. Ὅτι μὲν οὖν ἅπαντα πέφυκεν εἰς ἄλληλα μεταβάλλειν, φανερόν· ἡ γὰρ γένεσις εἰς ἐναντία καὶ ἐξ ἐναντίων, τὰ δὲ στοιχεῖα πάντα ἔχει ἐναντίωσιν πρὸς ἄλληλα διὰ τὸ τὰς διαφορὰς ἐναντίας εἶναι· τοῖς μὲν γὰρ ἀμφοτέραι ἐναντίαι, οἷον πυρὶ καὶ ὕδατι (τὸ μὲν γὰρ ξηρόν καὶ θερμόν, τὸ δ' ὑγρόν καὶ ψυχρόν), τοῖς δ' ἡ ἐτέρα μόνον, οἷον ἀέρι καὶ ὕδατι (τὸ μὲν γὰρ ὑγρόν καὶ θερμόν, τὸ δὲ ὑγρόν καὶ ψυχρόν).

Ὡστε καθόλου μὲν φανερόν ὅτι πᾶν ἐκ παντὸς γίνεσθαι πέφυκεν, ἥδη δὲ καθ' ἕκαστον οὐ χαλεπὸν ἰδεῖν πῶς· ἅπαντα μὲν γὰρ ἐξ ἀπάντων ἔσται, διοίσει δὲ τῷ θᾶττον καὶ βραδύτερον καὶ τῷ ῥᾶον καὶ χαλεπώτερον. Ὅσα μὲν γὰρ ἔχει σύμβολα πρὸς ἄλληλα, ταχεῖα τούτων ἢ μετάβασις, ὅσα δὲ μὴ ἔχει, βραδεῖα, διὰ τὸ ῥᾶον εἶναι τὸ ἐν ἢ τὰ πολλὰ μεταβάλλειν, οἷον ἐκ πυρὸς μὲν ἔσται ἀήρ θατέρου μεταβάλλοντος (τὸ μὲν γὰρ ἦν θερμόν καὶ ξηρόν, τὸ δὲ θερμόν καὶ ὑγρόν, ὥστε ἂν κρατηθῇ τὸ ξηρόν ὑπὸ τοῦ ὑγροῦ, ἀήρ ἔσται), πάλιν δὲ ἐξ ἀέρος ὕδωρ, ἐὰν κρατηθῇ τὸ θερμόν ὑπὸ τοῦ ψυχροῦ (τὸ μὲν γὰρ ἦν θερμόν καὶ ὑγρόν, τὸ δὲ ψυχρόν καὶ ὑγρόν, ὥστε μεταβάλλοντος τοῦ θερμοῦ ὕδωρ ἔσται). Τὸν αὐτὸν δὲ τρόπον καὶ ἐξ ὕδατος γῆ καὶ ἐκ γῆς πῦρ· ἔχει γὰρ ἄμφω πρὸς ἄμφω σύμβολα· τὸ μὲν γὰρ ὕδωρ ὑγρόν καὶ ψυχρόν, ἡ δὲ γῆ ψυχρόν καὶ ξηρόν, ὥστε κρατηθέντος τοῦ ὑγροῦ γῆ ἔσται. Καὶ πάλιν ἐπεὶ τὸ μὲν πῦρ ξηρόν καὶ θερμόν, ἡ δὲ (331b.) γῆ ψυχρόν καὶ ξηρόν, ἐὰν φθαρῇ τὸ ψυχρόν, πῦρ ἔσται ἐκ γῆς. Ὡστε φανερόν ὅτι κύκλω τε ἔσται ἡ γένεσις τοῖς ἀπλοῖς σώμασι, καὶ ῥᾶστος οὗτος ὁ τρόπος τῆς μεταβολῆς διὰ τὸ σύμβολα ἐνυπάρχειν τοῖς ἐφεξῆς.

Ἐκ πυρὸς δὲ ὕδωρ καὶ ἐξ ἀέρος γῆν καὶ πάλιν ἐξ ὕδατος καὶ γῆς ἀέρα καὶ πῦρ ἐνδέχεται μὲν γίνεσθαι, χαλεπώτερον δὲ διὰ τὸ πλειόνων εἶναι τὴν μεταβολήν· ἀνάγκη γάρ, εἰ ἔσται ἐξ ὕδατος πῦρ, φθαρῆναι καὶ τὸ ψυχρόν καὶ τὸ ὑγρόν, καὶ πάλιν εἰ ἐκ γῆς ἀήρ, φθαρῆναι καὶ τὸ ψυχρόν καὶ τὸ ξηρόν. Ὡσαύτως δὲ καὶ εἰ ἐκ πυρὸς

καὶ ἀέρος ὕδωρ καὶ γῆ, ἀνάγκη ἀμφοτέρα μεταβάλλειν. Αὕτη μὲν οὖν χρονιωτέρα ἢ γένεσις· ἐὰν δ' ἐκατέρου φθαρῇ θάτερον, ῥάων μὲν, οὐκ εἰς ἄλληλα δὲ ἢ μετάβασις, ἀλλ' ἐκ πυρὸς μὲν καὶ ὕδατος ἔσται γῆ καὶ ἀήρ, ἐξ ἀέρος δὲ καὶ γῆς πῦρ καὶ ὕδωρ. Ὅταν μὲν γὰρ τοῦ ὕδατος φθαρῇ τὸ ψυχρόν τοῦ δὲ πυρὸς τὸ ξηρόν, ἀήρ ἔσται (λείπεται γὰρ τοῦ μὲν τὸ θερμὸν τοῦ δὲ τὸ ὑγρόν), ὅταν δὲ τοῦ μὲν πυρὸς τὸ θερμὸν τοῦ δ' ὕδατος τὸ ὑγρόν, γῆ, διὰ τὸ λείπεσθαι τοῦ μὲν τὸ ξηρόν τοῦ δὲ τὸ ψυχρόν. Ὡσαύτως δὲ καὶ ἐξ ἀέρος καὶ γῆς πῦρ καὶ ὕδωρ· ὅταν μὲν γὰρ τοῦ ἀέρος φθαρῇ τὸ θερμὸν τῆς δὲ γῆς τὸ ξηρόν, ὕδωρ ἔσται (λείπεται γὰρ τοῦ μὲν τὸ ὑγρὸν τῆς δὲ τὸ ψυχρόν), ὅταν δὲ τοῦ μὲν ἀέρος τὸ ὑγρὸν τῆς δὲ γῆς τὸ ψυχρόν, πῦρ, διὰ τὸ λείπεσθαι τοῦ μὲν τὸ θερμὸν τῆς δὲ τὸ ξηρόν, ἅπερ ἦν πυρός.

Ὁμολογουμένη δὲ καὶ τῇ αἰσθήσει ἡ τοῦ πυρὸς γένεσις. Μάλιστα μὲν γὰρ πῦρ ἢ φλόξ, αὕτη δ' ἐστὶ καπνὸς καίόμενος, ὁ δὲ καπνὸς ἐξ ἀέρος καὶ γῆς. Ἐν δὲ τοῖς ἐφεξῆς οὐκ ἐνδέχεται φθαρέντος ἐν ἐκατέρῳ θατέρου τῶν στοιχείων γενέσθαι μετάβασιν εἰς οὐδὲν τῶν σωμάτων διὰ τὸ λείπεσθαι ἐν ἀμφοῖν ἢ ταῦτά ἢ τὰναντία. Ἐξ οὐδετέρων δὲ ἐγχωρεῖ γίνεσθαι σῶμα, οἷον εἰ μὲν τοῦ πυρὸς φθαρεῖ τὸ ξηρόν, τοῦ δ' ἀέρος τὸ ὑγρόν· λείπεται γὰρ ἐν ἀμφοῖν τὸ θερμόν· ἐὰν δ' ἐξ ἐκατέρου τὸ θερμόν, λείπεται τὰναντία, ξηρόν καὶ ὑγρόν. Ὁμοίως δὲ καὶ ἐν τοῖς ἄλλοις· ἐν ἅπασιν γὰρ τοῖς ἐφεξῆς ἐνυπάρχει τὸ μὲν ταῦτὸ τὸ δ' ἐναντίον.

Ὡσθ' ἅμα δῆλον ὅτι τὰ μὲν ἐξ ἐνὸς εἰς ἐν μεταβαίνοντα ἐνὸς φθαρέντος γίνεται, τὰ δ' ἐκ δυοῖν εἰς ἐν πλειόνων. Ὅτι (332a.) μὲν οὖν ἅπαντα ἐκ παντὸς γίνεται, καὶ τίνα τρόπον εἰς ἄλληλα μετάβασις γίνεται, εἴρηται. Οὐ μὴν ἀλλ' ἔτι καὶ ὧδε θεωρήσωμεν περὶ αὐτῶν.

Κεφάλαιο 5

Εἰ γάρ ἐστι τῶν φυσικῶν σωμάτων ὕλη, ὥσπερ καὶ δοκεῖ ἐνίοις, ὕδωρ καὶ ἀήρ καὶ τὰ τοιαῦτα, ἀνάγκη ᾗτοι ἐν ἡ δύο εἶναι ταῦτα ἢ πλειώ. Ἐν μὲν δὴ πάντα οὐχ οἶόν τε, οἶον ἀέρα πάντα ἢ ὕδωρ ἢ πῦρ ἢ γῆν, εἴπερ ἡ μεταβολὴ εἰς τάναντία. Εἰ γὰρ εἴη ἀήρ, εἰ μὲν ὑπομένει, ἀλλοίωσις ἔσται ἀλλ' οὐ γένεσις. Ἄμα δ' οὐδ' οὕτω δοκεῖ, ὥστε ὕδωρ εἶναι ἅμα καὶ ἀέρα ἢ ἄλλ' ὅτιοῦν. Ἔσται δὴ τις ἐναντίωσις καὶ διαφορὰ ἧς ἕξει τι θάτερον μόνιον, τὸ πῦρ οἶον θερμότητα. Ἀλλὰ μὴν οὐκ ἔσται τό γε πῦρ ἀήρ θερμός· ἀλλοίωσίς τε γὰρ τὸ τοιοῦτον, καὶ οὐ φαίνεται. Ἄμα δὲ πάλιν εἰ ἔσται ἐκ πυρός ἀήρ, τοῦ θερμοῦ εἰς τὸναντίον μεταβάλλοντος ἔσται. Ὑπάρξει ἄρα τῷ ἀέρι τοῦτο, καὶ ἔσται ὁ ἀήρ ψυχρόν τι. Ὡστε ἀδύνατον τὸ πῦρ ἀέρα θερμὸν εἶναι· ἅμα γὰρ τὸ αὐτὸ θερμὸν καὶ ψυχρὸν ἔσται. Ἄλλο τι ἄρ' ἀμφοτέρα τὸ αὐτὸ ἔσται, καὶ ἄλλη τις ὕλη κοινή.

Ὁ δ' αὐτὸς λόγος περὶ ἀπάντων, ὅτι οὐκ ἔστιν ἐν τούτων ἐξ οὗ τὰ πάντα. Οὐ μὴν οὐδ' ἄλλο τί γε παρὰ ταῦτα, οἶον μέσον τι ἀέρος καὶ ὕδατος ἢ ἀέρος καὶ πυρός, ἀέρος μὲν παχύτερον καὶ πυρός, τῶν δὲ λεπτότερον· ἔσται γὰρ ἀήρ καὶ πῦρ ἐκείνο μετ' ἐναντιότητος· ἀλλὰ στερήσις τὸ ἕτερον τῶν ἐναντίων· ὥστ' οὐκ ἐνδέχεται μονοῦσθαι ἐκεῖνο οὐδέποτε, ὥσπερ φασί τινες τὸ ἄπειρον καὶ τὸ περιέχον. Ὁμοίως ἄρα ὅτιοῦν τούτων ἢ οὐδέν. Εἰ οὖν μηδὲν αἰσθητόν γε πρότερον τούτων, ταῦτα ἂν εἴη πάντα. Ἀνάγκη τοίνυν ἢ αἰεὶ μένοντα καὶ ἀμετάβλητα εἰς ἄλληλα, ἢ μεταβάλλοντα, καὶ ἢ ἅπαντα, ἢ τὰ μὲν τὰ δ' οὐ, ὥσπερ ἐν τῷ Τιμαίῳ Πλάτων ἔγραψεν. Ὅτι μὲν τοίνυν μεταβάλλειν ἀνάγκη εἰς ἄλληλα, δέδεικται πρότερον· ὅτι δ' οὐχ ὁμοίως ταχέως ἄλλο ἐξ ἄλλου, εἴρηται πρότερον, ὅτι τὰ μὲν ἔχοντα σύμβολον θάττον γίνεται ἐξ ἀλλήλων, τὰ δ' οὐκ ἔχοντα βραδύτερον.

Εἰ μὲν τοίνυν ἡ ἐναντιότης μία ἐστὶ καθ' ἣν μεταβάλλουσιν, ἀνάγκη δύο εἶναι· ἡ γὰρ ὕλη τὸ μέσον ἀναίσθητος οὕσα (332b.) καὶ ἀχώριστος. Ἐπεὶ δὲ πλειώ ὁράται ὄντα, δύο ἂν εἶεν αἱ ἐλάχισται. Δύο δ' οὐσῶν οὐχ οἶόν τε τρία εἶναι, ἀλλὰ τέσσαρα, ὥσπερ φαίνεται· τοσαῦτα γὰρ αἱ συζυγίαι· ἐξ γὰρ οὐσῶν τὰς δύο ἀδύνατον γενέσθαι διὰ τὸ ἐναντίας εἶναι ἀλλήλαις. Περὶ μὲν οὖν τούτων εἴρηται πρότερον.

Ὅτι δ' ἐπειδὴ μεταβάλλουσιν εἰς ἄλληλα, ἀδύνατον ἀρχὴν τινα

εἶναι αὐτῶν ἢ ἐπὶ τῷ ἄκρῳ ἢ μέσῳ, ἐκ τῶνδε δῆλον. Ἐπὶ μὲν οὖν τοῖς ἄκροις οὐκ ἔσται, ὅτι πῦρ ἔσται ἢ γῆ πάντα· καὶ ὁ αὐτὸς λόγος τῷ φάναι ἐκ πυρὸς ἢ γῆς εἶναι πάντα.

Ὅτι δ' οὐδὲ μέσον, ὥσπερ δοκεῖ τισιν ἀῆρ μὲν καὶ εἰς πῦρ μεταβάλλειν καὶ εἰς ὕδωρ, ὕδωρ δὲ καὶ εἰς ἀέρα καὶ εἰς γῆν· τὰ δ' ἔσχατα οὐκέτι εἰς ἄλληλα· δεῖ μὲν γὰρ στῆναι καὶ μὴ εἰς ἄπειρον τοῦτο ἰέναι ἐπ' εὐθείας ἐφ' ἑκάτερα.

Ἄπειροι γὰρ ἐναντιότητες ἐπὶ τοῦ ἐνὸς ἔσονται. Γῆ ἐφ' ᾧ Γ, ὕδωρ ἐφ' ᾧ Υ, ἀῆρ ἐφ' ᾧ Α, πῦρ ἐφ' ᾧ Π. Εἰ δὴ τὸ Α μεταβάλλει εἰς τὸ Π καὶ Υ, ἐναντιότης ἔσται τῶν Α Π.

Ἔστω ταῦτα λευκότης καὶ μελανία. Πάλιν εἰ εἰς τὸ Υ τὸ Α, ἔσται ἄλλη· οὐ γὰρ ταῦτὸ τὸ Υ καὶ Π. Ἔστω δὲ ξηρότης καὶ ὑγρότης, τὸ μὲν Ξ ξηρότης, τὸ δὲ Υ ὑγρότης.

Οὐκοῦν εἰ μὲν μένει τὸ λευκόν, ὑπάρξει τὸ ὕδωρ ὑγρὸν καὶ λευκόν, εἰ δὲ μὴ, μέλαν ἔσται τὸ ὕδωρ· εἰς τὰναντία γὰρ ἡ μεταβολή. Ἀνάγκη ἄρα ἢ λευκὸν ἢ μέλαν εἶναι τὸ ὕδωρ.

Ἔστω δὴ τὸ πρῶτον. Ὅμοίως τοίνυν καὶ τῷ Π τὸ Ξ ὑπάρξει ἡ ξηρότης. Ἔσται ἄρα καὶ τῷ Π τῷ πυρὶ μεταβολὴ εἰς τὸ ὕδωρ· ἐναντία γὰρ ὑπάρχει· τὸ μὲν γὰρ πῦρ τὸ πρῶτον μέλαν ἦν, ἔπειτα δὲ ξηρόν, τὸ δ' ὕδωρ ὑγρόν, ἔπειτα δὲ λευκόν. Φανερόν δὴ ὅτι πᾶσιν ἐξ ἀλλήλων ἔσται ἡ μεταβολή, καὶ ἐπὶ γε τούτων, ὅτι καὶ ἐν τῷ Γ τῇ γῇ ὑπάρξει τὰ λοιπά, καὶ δύο σύμβολα τὸ μέλαν καὶ τὸ ὑγρόν· ταῦτα γὰρ οὐ συνδεδύασται πως.

Ὅτι δ' εἰς ἄπειρον οὐχ οἷόν τ' ἰέναι, ὅπερ μελλήσαντες δείξειν ἐπὶ τοῦτο ἔμπροσθεν ἤλθομεν, δῆλον ἐκ τῶνδε. Εἰ γὰρ πάλιν τὸ πῦρ, ἐφ' ᾧ Π, εἰς ἄλλο μεταβαλεῖ καὶ μὴ ἀνακάμψει, οἷον εἰς τὸ Ψ, ἐναντιότης τις τῷ πυρὶ καὶ τῷ Ψ ἄλλη ὑπάρξει τῶν εἰρημένων· οὐδενὶ γὰρ τὸ αὐτὸ ὑπόκειται τῶν Γ Υ Α Π (333a.) τὸ Ψ. Ἔστω δὴ τῷ μὲν Π τὸ Κ, τῷ δὲ Ψ τὸ Φ. Τὸ δὴ Κ πᾶσιν ὑπάρξει τοῖς Γ Υ Α Π· μεταβάλλουσι γὰρ εἰς ἄλληλα. Ἀλλὰ γὰρ τοῦτο μὲν ἔστω μήπω δεδειγμένον· ἄλλ' ἐκεῖνο δῆλον, ὅτι εἰ πάλιν τὸ Ψ εἰς ἄλλο, ἄλλη ἐναντιότης καὶ τῷ Ψ ὑπάρξει καὶ τῷ πυρὶ τῷ Π. Ὅμοίως δ' αἰετὰ μετὰ τοῦ προστιθεμένου ἐναντιότης τις ὑπάρξει τοῖς ἔμπροσθεν, ὥστ' εἰ ἄπειρα, καὶ ἐναντιότητες ἄπειροι τῷ ἐνὶ ὑπάρξουσιν. Εἰ δὲ τοῦτο, οὐκ ἔσται οὔτε ὀρίσασθαι οὐδὲν οὔτε γενέσθαι· δεήσει γάρ, εἰ ἄλλο ἔσται ἐξ ἄλλου, τοσαύτας διεξελεθεῖν ἐναντιότητας, καὶ ἔτι πλείους, ὥστ' εἰς ἓνα μὲν οὐδέποτε ἔσται μεταβολή, οἷον εἰ ἄπειρα τὰ μεταξύ· ἀνάγκη δ', εἴπερ

ἄπειρα τὰ στοιχεῖα· ἔτι δ' οὐδ' ἐξ ἀέρος εἰς πῦρ, εἰ ἄπειροι αἱ ἐναντιότητες. Γίνεται δὲ καὶ πάντα ἓν· ἀνάγκη γὰρ πάσας ὑπάρχειν τοῖς μὲν κάτω τοῦ Π τὰς τῶν ἄνωθεν, τούτοις δὲ τὰς τῶν κάτωθεν, ὥστε πάντα ἓν ἔσται.

Κεφάλαιο 6

Θαυμάσειε δ' ἂν τις τῶν λεγόντων πλείω ἐνὸς τὰ στοιχεῖα τῶν σωμάτων ὥστε μὴ μεταβάλλειν εἰς ἄλληλα, καθάπερ Ἐμπεδοκλῆς φησι, πῶς ἐνδέχεται λέγειν αὐτοῖς εἶναι συμβλητὰ τὰ στοιχεῖα. Καίτοι λέγει οὕτω· “ταῦτα γὰρ ἴσα τε πάντα”. Εἰ μὲν οὖν κατὰ τὸ ποσόν, ἀνάγκη ταυτό τι εἶναι ὑπάρχον ἅπασι τοῖς συμβλητοῖς ὃ μετροῦνται, οἷον εἰ ἐξ ὕδατος κοτύλης εἶεν ἄερος δέκα· τὸ αὐτό τι ἦν ἄρα ἅμφω, εἰ μετρεῖται τῷ αὐτῷ. Εἰ δὲ μὴ οὕτω κατὰ τὸ ποσόν συμβλητὰ ὡς ποσὸν ἐκ ποσοῦ, ἀλλ' ὅσον δύναται, οἷον εἰ κοτύλη ὕδατος ἴσον δύναται ψύχειν καὶ δέκα ἄερος, καὶ οὕτως κατὰ τὸ ποσὸν οὐχ ἢ ποσὸν συμβλητά, ἀλλ' ἢ δύναταί τι. Εἴη δ' ἂν καὶ μὴ τῷ τοῦ ποσοῦ μέτρῳ συμβάλλεσθαι τὰς δυνάμεις, ἀλλὰ κατ' ἀναλογίαν, οἷον ὡς τόδε λευκὸν τόδε θερμόν. Τὸ δ' ὡς τόδε σημαίνει ἐν μὲν ποιῷ τὸ ὅμοιον, ἐν δὲ τῷ ποσῷ τὸ ἴσον. Ἀτοπον δὴ φαίνεται, εἰ τὰ σώματα ἀμετάβλητα ὄντα μὴ ἀναλογία συμβλητά ἐστιν, ἀλλὰ μέτρῳ τῶν δυνάμεων καὶ τῷ εἶναι ἴσον θερμόν ἢ ὅμοιον πυρὸς τοσονδὶ καὶ ἄερος πολλαπλασίον· τὸ γὰρ αὐτὸ πλεῖον τῷ ὁμογενὲς εἶναι τοιοῦτον ἔξει τὸν λόγον.

Ἀλλὰ μὴν οὐδ' αὖξησης ἂν εἴη κατ' Ἐμπεδοκλέα, ἀλλ' ἢ (333b.) κατὰ πρόσθεσιν· πυρὶ γὰρ αὖξει τὸ πῦρ· “αὖξει δὲ χθὼν μὲν σφέτερον δέμας, αἰθέρα δ' αἰθήρ”. Ταῦτα δὲ προστίθεται· δοκεῖ δ' οὐχ οὕτως αὖξεσθαι τὰ αὖξανόμενα.

Πολὺ δὲ χαλεπώτερον ἀποδοῦναι περὶ γενέσεως τῆς κατὰ φύσιν. Τὰ γὰρ γινόμενα φύσει πάντα γίνεται ἢ αἰεὶ ἢ ὡς ἐπὶ τὸ πολὺ, τὰ δὲ παρὰ τὸ αἰεὶ καὶ ὡς ἐπὶ τὸ πολὺ ἀπὸ ταυτομάτου καὶ ἀπὸ τύχης. Τί οὖν τὸ αἴτιον τοῦ ἐξ ἀνθρώπου ἄνθρωπον ἢ αἰεὶ ἢ ὡς ἐπὶ τὸ πολὺ, καὶ ἐκ τοῦ πυροῦ πυρὸν ἀλλὰ μὴ ἐλαίαν; ἢ καὶ ἐὰν ὠδὶ συντεθῇ ὅστουν; οὐ γὰρ ὅπως ἔτυχε συνελθόντων οὐδὲν γίνεται, καθ' ἃ ἐκεῖνός φησιν, ἀλλὰ λόγῳ τινί. Τί οὖν τούτων αἴτιον; οὐ γὰρ δὴ πῦρ γε ἢ γῆ. Ἀλλὰ μὴν οὐδ' ἡ φιλία καὶ τὸ νεῖκος· συγκρίσεως γὰρ <τὸ μὲν>, τὸ δὲ διακρίσεως αἴτιον. Τοῦτο δ' ἐστὶν ἡ οὐσία ἢ ἐκάστου, ἀλλ' οὐ “μόνον μίξις τε διάλλαξις τε μιγέντων”, ὥσπερ ἐκεῖνός φησιν. Τύχη δ' ἐπὶ τούτοις ὀνομάζεται, ἀλλ' οὐ λόγος· ἔστι γὰρ μιχθῆναι ὡς ἔτυχεν. Τῶν δὴ φύσει ὄντων αἴτιον τὸ οὕτως ἔχειν, καὶ ἡ ἐκάστου φύσις αὕτη, περὶ ἧς οὐδὲν λέγει. Οὐδὲν ἄρα περὶ φύσεως λέγει.

Ἀλλὰ μὴν καὶ τὸ εὖ τοῦτο καὶ ἀγαθόν· ὁ δὲ τὴν μίξιν μόνον ἐπαινεῖ. Καίτοι τά γε στοιχεῖα διακρίνει οὐ τὸ νεῖκος, ἀλλ' ἡ φιλία τὰ φύσει πρότερα τοῦ θεοῦ· θεοὶ δὲ καὶ ταῦτα.

Ἔτι δὲ περὶ κινήσεως ἀπλῶς λέγει· οὐ γὰρ ἰκανὸν εἰπεῖν διότι ἡ φιλία καὶ τὸ νεῖκος κινεῖ, εἰ μὴ τοῦτ' ἦν φιλία εἶναι τὸ κινήσει τοιαδί, νεῖκει δὲ τὸ τοιαδί. Ἔδει οὖν ἢ ὀρίσασθαι ἢ ὑποθέσθαι ἢ ἀποδείξαι, ἢ ἀκριβῶς ἢ μαλακῶς, ἢ ἄλλως γέ πως. Ἔτι δ' ἐπεὶ φαίνεται καὶ βία καὶ παρὰ φύσιν κινούμενα τὰ σώματα καὶ κατὰ φύσιν, οἷον τὸ πῦρ ἄνω μὲν οὐ βία, κάτω δὲ βία, τῷ δὲ βία τὸ κατὰ φύσιν ἐναντίον, ἔστι δὲ τὸ βία, ἔστιν ἄρα καὶ τὸ κατὰ φύσιν κινεῖσθαι. Ταύτην οὖν ἡ φιλία κινεῖ; ἢ οὐ; τοῦναντίον γὰρ τὴν γῆν ἄνω καὶ διακρίσει ἔοικεν, καὶ μᾶλλον τὸ νεῖκος αἴτιον τῆς κατὰ φύσιν κινήσεως ἢ ἡ φιλία. Ὡστε καὶ ὅλως παρὰ φύσιν ἡ φιλία ἂν εἴη μᾶλλον. Ἀπλῶς δὲ εἰ μὴ ἡ φιλία ἢ τὸ νεῖκος κινεῖ, αὐτῶν τῶν σωμάτων οὐδεμία κίνησις ἐστὶν οὐδὲ μονή· ἀλλ' ἄτοπον. Ἔτι δὲ καὶ φαίνεται κινούμενα· (334a.) διέκρινε μὲν γὰρ τὸ νεῖκος, ἠνέχθη δ' ἄνω ὁ αἰθήρ οὐχ ὑπὸ τοῦ νείκους, ἀλλ' ὅτε μὲν φησιν ὥσπερ ἀπὸ τύχης “οὕτω γὰρ συνέκυρσε θεῶν τοτέ, πολλάκι δ' ἄλλως” ὅτε δὲ φησι πεφυκέναι τὸ πῦρ ἄνω φέρεσθαι, ὁ δ' αἰθήρ, φησί, “<δ' αὖ> μακρῆσι κατὰ χθόνα δύετο ρίζαις”. Ἄμα δὲ καὶ τὸν κόσμον ὁμοίως ἔχειν φησὶν ἐπὶ τε τοῦ νείκους νῦν καὶ πρότερον ἐπὶ τῆς φιλίας. Τί οὖν ἐστὶ τὸ κινεῖν πρῶτον καὶ αἴτιον τῆς κινήσεως; οὐ γὰρ δὴ ἡ φιλία καὶ τὸ νεῖκος, ἀλλὰ τινος κινήσεως ταῦτα αἴτια· εἰ δ' ἔστιν, ἐκεῖνο ἀρχή· ἄτοπον δὲ καὶ εἰ ἡ ψυχὴ ἐκ τῶν στοιχείων ἢ ἓν τι αὐτῶν· αἱ γὰρ ἀλλοιώσεις αἱ τῆς ψυχῆς πῶς ἔσσονται, οἷον τὸ μουσικὸν εἶναι καὶ πάλιν ἄμουςον, ἢ μνήμη ἢ λήθη; δηλὸν γὰρ ὅτι εἰ μὲν πῦρ ἢ ψυχὴ, τὰ πάθη ὑπάρξει αὐτῇ ὅσα πυρὶ ἢ πῦρ· εἰ δὲ μικτόν, τὰ σωματικά· τούτων δ' οὐδὲν σωματικόν. Ἀλλὰ περὶ μὲν τούτων ἐτέρας ἔργον ἐστὶ θεωρίας.

Κεφάλαιο 7

Περὶ δὲ τῶν στοιχείων ἐξ ὧν τὰ σώματα συνέστηκεν, ὅσοις μὲν δοκεῖ τι εἶναι κοινὸν ἢ μεταβάλλειν εἰς ἄλληλα, ἀνάγκη εἰ θάτερον τούτων, καὶ θάτερον συμβαίνειν· ὅσοι δὲ μὴ ποιοῦσιν ἐξ ἀλλήλων γένεσιν μηδ' ὥς ἐξ ἐκάστου, πλὴν ὥς ἐκ τοίχου πλίνθους, ἄτοπον πῶς ἐξ ἐκείνων ἔσονται σάρκες καὶ ὅστ' αὖ καὶ τῶν ἄλλων ὁτιοῦν. Ἐχει δὲ τὸ λεγόμενον ἀπορίαν καὶ τοῖς ἐξ ἀλλήλων γεννῶσιν, τίνα τρόπον γίνεται ἐξ αὐτῶν ἕτερόν τι παρ' αὐτά. Λέγω δ' οἷον ἔστιν ἐκ πυρὸς ὕδωρ καὶ ἐκ τούτου γίνεσθαι πῦρ· ἔστι γάρ τι κοινὸν ὑποκείμενον.

Ἀλλὰ δὴ καὶ σὰρξ ἐξ αὐτῶν γίνεται καὶ μυελός· ταῦτα δὴ γίνεται πῶς; ἐκείνοις τε γὰρ τοῖς λέγουσιν ὥς Ἐμπεδοκλῆς τίς ἔσται τρόπος; ἀνάγκη γὰρ σύνθεσιν εἶναι καθάπερ ἐξ πλίνθων καὶ λίθων τοίχος· καὶ τὸ μίγμα δὲ τοῦτο ἐκ σωζομένων μὲν ἔσται τῶν στοιχείων, κατὰ μικρὰ δὲ παρ' ἄλληλα συγκεκλιμένων. Οὕτω δὴ σὰρξ καὶ τῶν ἄλλων ἕκαστον. Συμβαίνει δὴ μὴ ἐξ ὁτουοῦν μέρους σαρκὸς γίνεσθαι πῦρ καὶ ὕδωρ, ὥσπερ ἐκ κηροῦ γένοιτ' ἂν ἐκ μὲν τουδὶ τοῦ μέρους σφαῖρα, πυραμὶς δ' ἐξ ἄλλου τινός· ἀλλ' ἐνεδέχετό γε ἐξ ἐκάτερου ἑκάτερον γενέσθαι. Τοῦτο μὲν δὴ τοῦτον γίνεται τὸν τρόπον ἐκ τῆς σαρκὸς ἐξ ὁτουοῦν ἅμφω· τοῖς δ' ἐκείνως λέγουσιν οὐκ ἐνδέχεται, ἀλλ' ὥς ἐκ τοίχου λίθος καὶ πλίνθος, (334b.) ἑκάτερον ἐξ ἄλλου τόπου καὶ μέρους. Ὅμοίως δὲ καὶ τοῖς ποιοῦσι μίαν αὐτῶν ὕλην ἔχει τινὰ ἀπορίαν, πῶς ἔσται τι ἐξ ἀμφοτέρων, οἷον ψυχροῦ καὶ θερμοῦ ἢ πυρὸς καὶ γῆς. Εἰ ἔστιν ἡ σὰρξ ἐξ ἀμφοῖν καὶ μηδέτερον ἐκείνων, μηδ' αὖ σύνθεσις σωζομένων, τί λείπεται πλὴν τὴν ὕλην εἶναι τὸ ἐξ ἐκείνων; ἢ γὰρ θατέρου φθορὰ ἢ θάτερον ποιεῖ ἢ τὴν ὕλην.

Ἄρ' οὖν ἐπειδὴ ἔστι καὶ μᾶλλον καὶ ἥττον θερμὸν καὶ ψυχρόν, ὅταν μὲν ἀπλῶς ἢ θάτερον ἐντελεχεία, δυνάμει θάτερον ἔσται· ὅταν δὲ μὴ παντελῶς, ἀλλ' ὥς μὲν θερμὸν ψυχρόν, ὥς δὲ ψυχρὸν θερμὸν διὰ τὸ μιγνύμενα φθείρειν τὰς ὑπεροχὰς ἀλλήλων, τότε οὐθ' ἡ ὕλη ἔσται οὔτε ἐκείνων τῶν ἐναντίων ἑκάτερον ἐντελεχεία ἀπλῶς, ἀλλὰ μεταξύ· κατὰ δὲ τὸ δυνάμει μᾶλλον εἶναι θερμὸν ἢ ψυχρὸν ἢ τούναντίον, κατὰ τοῦτον τὸν λόγον διπλασίως θερμὸν δυνάμει ἢ ψυχρόν, ἢ τριπλασίως, ἢ κατ' ἄλλον τρόπον τοιοῦτον.

Ἔσται δὴ μιχθέντων τᾶλλ' ἐκ τῶν ἐναντίων ἢ τῶν στοιχείων, καὶ

τὰ στοιχεῖα ἐξ ἐκείνων δυνάμει πως ὄντων, οὐχ οὕτω δὲ ὡς ἡ ὕλη, ἀλλὰ τὸν εἰρημένον τρόπον· καὶ ἔστιν οὕτω μὲν μίξις, ἐκείνως δὲ ὕλη τὸ γινόμενον. Ἐπεὶ δὲ καὶ πάσχει τὰναντία κατὰ τὸν ἐν τοῖς πρώτοις διορισμόν· ἔστι γὰρ τὸ ἐνεργεῖα θερμόν δυνάμει ψυχρόν καὶ τὸ ἐνεργεῖα ψυχρόν δυνάμει θερμόν, ὥστε ἐὰν μὴ ἰσάζῃ, μεταβάλλει εἰς ἄλληλα· ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων ἐναντίων. Καὶ πρῶτον οὕτω τὰ στοιχεῖα μεταβάλλει, ἐκ δὲ τούτων σάρκες καὶ ὀστᾶ καὶ τὰ τοιαῦτα, τοῦ μὲν θερμοῦ γινομένου ψυχροῦ, τοῦ δὲ ψυχροῦ θερμοῦ, ὅταν πρὸς τὸ μέσον ἔλθῃ· ἐνταῦθα γὰρ οὐδέτερον, τὸ δὲ μέσον πολὺ καὶ οὐκ ἀδιαίρετον. Ὅμοίως δὲ καὶ τὸ ξηρὸν καὶ ὑγρὸν καὶ τὰ τοιαῦτα κατὰ μεσότητα ποιοῦσι σάρκα καὶ ὀστοῦν καὶ τᾶλλα.

Κεφάλαιο 8

Ἄπαντα δὲ τὰ μικτὰ σώματα, ὅσα περὶ τὸν τοῦ μέσου τόπον ἐστίν, ἐξ ἀπάντων σύγκειται τῶν ἀπλῶν. Γῆ μὲν γὰρ ἐνυπάρχει πᾶσι διὰ τὸ ἕκαστον εἶναι μάλιστα καὶ πλείστον ἐν τῷ οἰκείῳ τόπῳ, ὕδωρ δὲ διὰ τὸ δεῖν μὲν ὀρίζεσθαι τὸ σύνθετον, μόνον δ' εἶναι τῶν ἀπλῶν εὐόριστον τὸ (335a.) ὕδωρ, ἔτι δὲ καὶ τὴν γῆν ἄνευ τοῦ ὑγροῦ μὴ δύνασθαι συμμένειν, ἀλλὰ τοῦτ' εἶναι τὸ συνεχόν· εἰ γὰρ ἐξαιρεθεῖη τελέως ἐξ αὐτῆς τὸ ὑγρόν, διαπίπτει ἅν. Γῆ μὲν οὖν καὶ ὕδωρ διὰ ταύτας ἐνυπάρχει τὰς αἰτίας, ἀῆρ δὲ καὶ πῦρ, ὅτι ἐναντία ἐστὶ γῆ καὶ ὕδατι· γῆ μὲν γὰρ ἀέρι, ὕδωρ δὲ πυρὶ ἐναντίον ἐστίν, ὡς ἐνδέχεται οὐσίαν οὐσία ἐναντίαν εἶναι. Ἐπεὶ οὖν αἱ γενέσεις ἐκ τῶν ἐναντίων εἰσίν, ἐνυπάρχει δὲ θάτερα ἄκρα τῶν ἐναντίων, ἀνάγκη καὶ θάτερον ἐνυπάρχειν, ὥστ' ἐν ἅπαντι τῷ συνθέτῳ πάντα τὰ ἀπλᾶ ἐνέσται. Μαρτυρεῖν δ' ἔοικε καὶ ἡ τροφή ἐκάστων· ἅπαντα μὲν γὰρ τρέφεται τοῖς αὐτοῖς ἐξ ὧνπέρ ἐστιν, ἅπαντα δὲ πλείοσι τρέφεται. Καὶ γὰρ ἅπερ ἂν δόξειεν ἐνὶ μόνῳ τρέφεσθαι, τῷ ὕδατι τὰ φυτά, πλείοσι τρέφεται· μέμικται γὰρ τῷ ὕδατι γῆ· διὸ καὶ οἱ γεωργοὶ πειρῶνται μίξαντες ἄρδεν.

Ἐπεὶ δ' ἐστὶν ἡ μὲν τροφή τῆς ὕλης, τὸ δὲ τρεφόμενον συνειλημμένον τῇ ὕλῃ ἢ μορφῇ καὶ τὸ εἶδος, εὐλογον ἤδη τὸ μόνον τῶν ἀπλῶν σωμάτων τρέφεσθαι τὸ πῦρ ἀπάντων ἐξ ἀλλήλων γινομένων, ὥσπερ καὶ οἱ πρότεροι λέγουσιν· μόνον γάρ ἐστι καὶ μάλιστα τοῦ εἶδους τὸ πῦρ διὰ τὸ πεφυκέναι φέρεσθαι πρὸς τὸν ὅρον. Ἐκαστον δὲ πέφυκεν εἰς τὴν ἑαυτοῦ χώραν φέρεσθαι· ἡ δὲ μορφή καὶ τὸ εἶδος ἀπάντων ἐν τοῖς ὅροις. Ὅτι μὲν οὖν ἅπαντα τὰ σώματα ἐξ ἀπάντων συνέστηκε τῶν ἀπλῶν, εἴρηται.

Κεφάλαιο 9

Ἐπεὶ δ' ἐστὶν ἓνια γενητὰ καὶ φθαρτά, καὶ ἡ γένεσις τυγχάνει οὕσα ἐν τῷ περὶ τὸ μέσον τόπῳ, λεκτέον περὶ πάσης γενέσεως ὁμοίως πόσαι τε καὶ τίνες αὐτῆς ἀρχαί· ῥῆον γὰρ οὕτω τὰ καθ' ἕκαστον θεωρήσομεν, ὅταν περὶ τῶν καθόλου λάβωμεν πρῶτον. Εἰσὶν οὖν καὶ τὸν ἀριθμὸν ἴσαι καὶ τῷ γένει αἱ αὐταὶ αἵπερ ἐν τοῖς αἰδίοις τε καὶ πρώτοις· ἡ μὲν γὰρ ἐστὶν ὡς ὕλη, ἡ δ' ὡς μορφή. Δεῖ δὲ καὶ τὴν τρίτην ἔτι προσυπάρχειν· οὐ γὰρ ἰκαναὶ πρὸς τὸ γεννηθῆσαι αἱ δύο, καθάπερ οὐδ' ἐν τοῖς πρώτοις. Ὡς μὲν οὖν ὕλη τοῖς γενητοῖς ἐστὶν αἷτιον τὸ δυνατόν εἶναι καὶ μὴ εἶναι. Τὰ μὲν γὰρ ἐξ ἀνάγκης ἐστίν, οἷον τὰ αἰδία, τὰ δ' ἐξ ἀνάγκης οὐκ ἔστιν. Τούτων δὲ τὰ μὲν ἀδύνατον μὴ εἶναι, τὰ δὲ ἀδύνατον (335b.) εἶναι διὰ τὸ μὴ ἐνδέχεσθαι παρὰ τὸ ἀναγκαῖον ἄλλως ἔχειν. Ἐνια δὲ καὶ εἶναι καὶ μὴ εἶναι δυνατά, ὅπερ ἐστὶ τὸ γενητὸν καὶ φθαρτὸν· ποτὲ μὲν γὰρ ἔστι τοῦτο, ποτὲ δ' οὐκ ἔστιν. Ὡστ' ἀνάγκη γένεσιν εἶναι καὶ φθορὰν περὶ τὸ δυνατόν εἶναι καὶ μὴ εἶναι. Διὸ καὶ ὡς μὲν ὕλη τοῦτ' ἐστὶν αἷτιον τοῖς γενητοῖς, ὡς δὲ τὸ οὐ ἔνεκεν ἡ μορφή καὶ τὸ εἶδος· τοῦτο δ' ἐστὶν ὁ λόγος ὁ τῆς ἐκάστου οὐσίας.

Δεῖ δὲ προσεῖναι καὶ τὴν τρίτην, ἣν ἅπαντες μὲν ὀνειρώττουσι, λέγει δ' οὐδεὶς, ἀλλ' οἱ μὲν ἰκανὴν ᾤθησαν αἰτίαν εἶναι πρὸς τὸ γίνεσθαι τὴν τῶν εἰδῶν φύσιν, ὥσπερ ὁ ἐν Φαίδωνι Σωκράτης· καὶ γὰρ ἐκεῖνος, ἐπιτιμήσας τοῖς ἄλλοις ὡς οὐδὲν εἰρηκόσιν, ὑποτίθεται ὅτι ἐστὶ τῶν ὄντων τὰ μὲν εἶδη τὰ δὲ μεθεκτικά τῶν εἰδῶν, καὶ ὅτι εἶναι μὲν ἕκαστον λέγεται κατὰ τὸ εἶδος, γίνεσθαι δὲ κατὰ τὴν μετάλληψιν καὶ φθείρεσθαι κατὰ τὴν ἀποβολήν, ὥστ' εἰ ταῦτα ἀληθῆ, τὰ εἶδη οἶεται ἐξ ἀνάγκης αἷτια εἶναι καὶ γενέσεως καὶ φθορᾶς. Οἱ δ' αὐτὴν τὴν ὕλην· ἀπὸ ταύτης γὰρ εἶναι τὴν κίνησιν. Οὐδέτεροι δὲ λέγουσι καλῶς.

Εἰ μὲν γὰρ ἐστὶν αἷτια τὰ εἶδη, διὰ τί οὐκ ἀεὶ γεννᾷ συνεχῶς, ἀλλὰ ποτὲ μὲν ποτὲ δ' οὐ, ὄντων καὶ τῶν εἰδῶν ἀεὶ καὶ τῶν μεθεκτικῶν; ἔτι δ' ἐπ' ἐνίων θεωροῦμεν ἄλλο τὸ αἷτιον ὄν· ὑγίειαν γὰρ ὁ ἰατρὸς ἐμποιεῖ καὶ ἐπιστήμην ὁ ἐπιστήμων, οὕσης καὶ ὑγείας αὐτῆς καὶ ἐπιστήμης καὶ τῶν μεθεκτικῶν· ὡσαύτως δὲ καὶ ἐπὶ τῶν ἄλλων τῶν κατὰ δύναμιν πραττομένων. Εἰ δὲ τὴν ὕλην τις φήσειε γεννᾶν διὰ τὴν κίνησιν, φυσικώτερον μὲν ἂν λέγοι τῶν οὕτω λεγόντων· τὸ γὰρ

ἀλλοιοῦν καὶ τὸ μετασχηματίζον αἰτιώτερόν τε τοῦ γεννᾶν, καὶ ἐν ἅπασιν εἰώθαμεν τοῦτο λέγειν τὸ ποιοῦν, ὁμοίως ἔν τε τοῖς φύσει καὶ ἐν τοῖς ἀπὸ τέχνης, ὃ ἂν ᾗ κινητικόν.

Οὐ μὴν ἀλλὰ καὶ οὗτοι οὐκ ὀρθῶς λέγουσιν· τῆς μὲν γὰρ ὕλης τὸ πάσχειν ἐστὶ καὶ τὸ κινεῖσθαι, τὸ δὲ κινεῖν καὶ ποιεῖν ἑτέρας δυνάμεως. Δῆλον δὲ καὶ ἐπὶ τῶν τέχνη καὶ ἐπὶ τῶν φύσει γινομένων· οὐ γὰρ αὐτὸ ποιεῖ τὸ ὕδωρ ζῶον ἐξ αὐτοῦ, οὐδὲ τὸ ξύλον κλίνην, ἀλλ' ἡ τέχνη. Ὡστε καὶ οὗτοι διὰ τοῦτο λέγουσιν οὐκ ὀρθῶς, καὶ ὅτι παραλείπουσι τὴν κυριωτέραν αἰτίαν· ἐξαιροῦσι γὰρ τὸ τί ἦν εἶναι καὶ τὴν μορφήν.

(336a.) Ἦτι δὲ καὶ τὰς δυνάμεις ἀποδιδόασιν τοῖς σώμασι, δι' ἃς γεννῶσι, λίαν ὀργανικῶς, ἀφαιροῦντες τὴν κατὰ τὸ εἶδος αἰτίαν. Ἐπειδὴ γὰρ πέφυκεν, ὥς φασι, τὸ μὲν θερμὸν διακρίνειν τὸ δὲ ψυχρὸν συνιστάναι, καὶ τῶν ἄλλων ἕκαστον τὸ μὲν ποιεῖν τὸ δὲ πάσχειν, ἐκ τούτων λέγουσι καὶ διὰ τούτων ἅπαντα τᾶλλα γίνεσθαι καὶ φθείρεσθαι· φαίνεται δὲ καὶ τὸ πῦρ αὐτὸ κινούμενον καὶ πάσχον. Ἦτι δὲ παραπλήσιον ποιοῦσιν ὥσπερ εἴ τις τῷ πρίονι καὶ ἐκάστῳ τῶν ὀργάνων ἀπονέμοι τὴν αἰτίαν τῶν γινομένων· ἀνάγκη γὰρ πρίονος ὄντος διαιρεῖσθαι καὶ ξέοντος λεαίνεσθαι, καὶ ἐπὶ τῶν ἄλλων ὁμοίως. Ὡστ' εἰ ὅτι μάλιστα ποιεῖ καὶ κινεῖ τὸ πῦρ, ἀλλὰ πῶς κινεῖ οὐχ ὀρθῶς, ὅτι χεῖρον ἢ τὰ ὄργανα.

Κεφάλαιο 10

Ἡμῖν δὲ καθόλου τε πρότερον εἴρηται περὶ τῶν αἰτίων, καὶ νῦν διώρισται περὶ τε τῆς ὕλης καὶ τῆς μορφῆς.

Ἔτι δὲ ἐπεὶ ἡ κατὰ τὴν φορὰν κίνησις δέδεικται ὅτι αἰδίδιος, ἀνάγκη τούτων ὄντων καὶ γένεσιν εἶναι συνεχῶς· ἡ γὰρ φορὰ ποιήσει τὴν γένεσιν ἐνδελεχῶς διὰ τὸ προσάγειν καὶ ἀπάγειν τὸ γεννητικόν. Ἄμα δὲ δῆλον ὅτι καὶ τὸ πρότερον καλῶς εἴρηται, τὸ πρώτην τῶν μεταβολῶν τὴν φορὰν ἀλλὰ μὴ τὴν γένεσιν εἰπεῖν· πολὺ γὰρ εὐλογώτερον τὸ ὄν τῷ μὴ ὄντι γενέσεως αἴτιον εἶναι ἢ τὸ μὴ ὄν τῷ ὄντι τοῦ εἶναι. Τὸ μὲν οὖν φερόμενον ἔστι, τὸ δὲ γινόμενον οὐκ ἔστι· διὸ καὶ ἡ φορὰ προτέρα τῆς γενέσεως. Ἐπεὶ δ' ὑπόκειται καὶ δέδεικται συνεχῆς οὕσα τοῖς πράγμασι καὶ γένεσις καὶ φθορά, φαμὲν δ' αἰτίαν εἶναι τὴν φορὰν τοῦ γίνεσθαι, φανερόν ὅτι μιᾶς μὲν οὔσης τῆς φορᾶς οὐκ ἐνδέχεται γίνεσθαι ἄμφω διὰ τὸ ἐναντία εἶναι· τὸ γὰρ αὐτὸ καὶ ὡσαύτως ἔχον ἀεὶ τὸ αὐτὸ πέφυκε ποιεῖν. Ὡστε ἤτοι γένεσις ἀεὶ ἔσται ἢ φθορά. Δεῖ <δὴ> πλείους εἶναι τὰς κινήσεις καὶ ἐναντίας, ἢ τῇ φορᾷ ἢ τῇ ἀνωμαλίᾳ· τῶν γὰρ ἐναντίων τάναντία αἷτια· διὸ καὶ οὐχ ἡ πρώτη φορὰ αἰτία ἐστὶ γενέσεως καὶ φθορᾶς, ἀλλ' ἡ κατὰ τὸν λοξὸν κύκλον· ἐν ταύτῃ γὰρ καὶ τὸ συνεχές ἐστι καὶ τὸ κινεῖσθαι δύο κινήσεις· ἀνάγκη γάρ, εἴ γε ἀεὶ ἔσται συνεχῆς γένεσις καὶ (336b.) φθορά, ἀεὶ μὲν τι κινεῖσθαι, ἵνα μὴ ἐπιλείπωσιν αὐταὶ αἱ μεταβολαί, δύο δ', ὅπως μὴ θάτερον συμβαίνει μόνον.

Τῆς μὲν οὖν συνεχείας ἡ τοῦ ὅλου φορὰ αἰτία, τοῦ δὲ προσιέναι καὶ ἀπιέναι ἡ ἐγκλισις· συμβαίνει γὰρ ὅτε μὲν πόρρω γίνεσθαι ὅτε δ' ἐγγύς. Ἀνίσου δὲ τοῦ διαστήματος ὄντος ἀνώμαλος ἔσται ἡ κίνησις· ὥστ' εἰ τῷ προσιέναι καὶ ἐγγύς εἶναι γεννᾷ, τῷ ἀπιέναι ταυτὸν τοῦτο καὶ πόρρω γίνεσθαι φθείρει, καὶ εἰ τῷ πολλάκις προσελθεῖν γεννᾷ, καὶ τῷ πολλάκις ἀπελθεῖν φθείρει· τῶν γὰρ ἐναντίων τάναντία αἷτια. Καὶ ἐν ἴσῳ χρόνῳ καὶ ἡ φθορὰ καὶ ἡ γένεσις ἡ κατὰ φύσιν. Διὸ καὶ οἱ χρόνοι καὶ οἱ βίοι ἐκάστων ἀριθμὸν ἔχουσι καὶ τούτῳ διορίζονται· πάντων γάρ ἐστι τάξις, καὶ πᾶς βίος καὶ χρόνος μετρεῖται περιόδῳ, πλὴν οὐ τῇ αὐτῇ πάντες, ἀλλ' οἱ μὲν ἐλάττονι οἱ δὲ πλείονι· τοῖς μὲν γὰρ ἐνιαυτός, τοῖς δὲ μείζων, τοῖς δὲ ἐλάττων ἡ περίοδος ἐστὶ τὸ μέτρον.

Φαίνεται δὲ καὶ κατὰ τὴν αἴσθησιν ὁμολογούμενα τοῖς παρ' ἡμῶν

λόγοις· ὁρῶμεν γὰρ ὅτι προσιόντος μὲν τοῦ ἡλίου γένεσις ἐστίν, ἀπιόντος δὲ φθίσις, καὶ ἐν ἴσῳ χρόνῳ ἐκάτερον· ἴσος γὰρ ὁ χρόνος τῆς φθορᾶς καὶ τῆς γενέσεως τῆς κατὰ φύσιν.

Ἀλλὰ συμβαίνει πολλάκις ἐν ἐλάττονι φθείρεσθαι διὰ τὴν πρὸς ἄλληλα σύγκρασιν· ἀνωμάλου γὰρ οὕσης τῆς ὕλης καὶ οὐ πανταχοῦ τῆς αὐτῆς ἀνάγκη καὶ τὰς γενέσεις ἀνωμάλους εἶναι καὶ τὰς μὲν θάπτους τὰς δὲ βραδυτέρας, ὥστε συμβαίνει διὰ τὴν τούτων γένεσιν ἄλλοις γίνεσθαι φθοράν.

Ἀεὶ δ', ὥσπερ εἴρηται, συνεχῆς ἔσται ἡ γένεσις καὶ ἡ φθορά, καὶ οὐδέποτε ὑπολείπει δι' ἣν εἵπομεν αἰτίαν. Τοῦτο δ' εὐλόγως συμβέβηκεν· ἐπεὶ γὰρ ἐν ᾗσιν αἰεὶ τοῦ βελτίονος ὀρέγεσθαι φαμεν τὴν φύσιν, βέλτιον δὲ τὸ εἶναι ἢ τὸ μὴ εἶναι (τὸ δ' εἶναι ποσαχῶς λέγομεν ἐν ἄλλοις εἴρηται), τοῦτο δ' ἀδύνατον ἐν ᾗσιν ὑπάρχειν διὰ τὸ πόρρω τῆς ἀρχῆς ἀφίστασθαι, τῷ λειπομένῳ τρόπῳ συνεπλήρωσε τὸ ὅλον ὁ θεός, ἐνδελεχῇ ποιήσας τὴν γένεσιν· οὕτω γὰρ ἂν μάλιστα συνείροιο τὸ εἶναι διὰ τὸ ἐγγύτατα εἶναι τῆς οὐσίας τὸ γίνεσθαι αἰεὶ καὶ τὴν γένεσιν. Τούτου δ' αἴτιον, ὥσπερ (337a.) εἴρηται πολλάκις, ἡ κύκλω φορά· μόνη γὰρ συνεχῆς. Διὸ καὶ τᾶλλα ὅσα μεταβάλλει εἰς ἄλληλα κατὰ τὰ πάθη καὶ τὰς δυνάμεις, οἷον τὰ ἀπλᾶ σώματα, μιμεῖται τὴν κύκλω φοράν· ὅταν γὰρ ἐξ ὕδατος ἀῆρ γένηται καὶ ἐξ ἀέρος πῦρ καὶ πάλιν ἐκ πυρὸς ὕδωρ, κύκλω φαμέν περιεληλυθέναι τὴν γένεσιν διὰ τὸ πάλιν ἀνακάμπτειν. Ὡστε καὶ ἡ εὐθεῖα φορὰ μιμουμένη τὴν κύκλω συνεχῆς ἐστίν.

Ἄμα δὲ δηλὸν ἐκ τούτων ὅτινες ἀποροῦσιν, διὰ τί ἐκάστου τῶν σωμάτων εἰς τὴν οἰκείαν φερομένου χώραν ἐν τῷ ἀπείρῳ χρόνῳ οὐ διεστᾶσι τὰ σώματα. Αἴτιον γὰρ τούτου ἐστίν ἢ εἰς ἄλληλα μεταβάσεις· εἰ γὰρ ἕκαστον ἔμενεν ἐν τῇ αὐτοῦ χώρᾳ καὶ μὴ μετέβαλλεν ὑπὸ τοῦ πλησίον, ἤδη ἂν διεστήκεσαν.

Μεταβάλλει μὲν οὖν διὰ τὴν φοράν διπλὴν οὕσαν· διὰ δὲ τὸ μεταβάλλειν οὐκ ἐνδέχεται μένειν οὐδὲν αὐτῶν ἐν οὐδεμιᾷ χώρᾳ τεταγμένη.

Διότι μὲν οὖν ἔστι γένεσις καὶ φθορά καὶ διὰ τίν' αἰτίαν, καὶ τί τὸ γενητὸν καὶ φθαρτὸν, φανερὸν ἐκ τῶν εἰρημένων. Ἐπεὶ δ' ἀνάγκη εἶναί τι τὸ κινοῦν εἰ κίνησις ἔσται, ὥσπερ εἴρηται πρότερον ἐν ἑτέροις, καὶ εἰ ἀεὶ, ὅτι αἰεὶ τι δεῖ εἶναι, καὶ εἰ συνεχῆς, ἐν τὸ αὐτὸ καὶ ἀκίνητον καὶ ἀγέννητον καὶ ἀναλλοίωτον, καὶ εἰ πλείους εἶεν αἱ κύκλω κινήσεις, πλείους μὲν, πάσας δὲ πῶς εἶναι ταύτας ἀνάγκη ὑπὸ

μίαν ἀρχήν· συνεχοῦς δ' ὄντος τοῦ χρόνου ἀνάγκη τὴν κίνησιν συνεχῇ εἶναι, εἴπερ ἀδύνατον χρόνον χωρὶς κινήσεως εἶναι· συνεχοῦς ἄρα τινὸς ἀριθμὸς ὁ χρόνος, τῆς κύκλῳ ἄρα, καθάπερ ἐν τοῖς ἐν ἀρχῇ λόγοις διωρίσθη. Συνεχῆς δ' ἡ κίνησις πότερον τῷ τὸ κινούμενον συνεχές εἶναι ἢ τῷ τὸ ἐν ᾧ κινεῖται, οἷον τὸν τόπον λέγω ἢ τὸ πάθος; δῆλον δὴ ὅτι τῷ τὸ κινούμενον· πῶς γὰρ τὸ πάθος συνεχές ἄλλ' ἢ τῷ τὸ πρᾶγμα ᾧ συμβέβηκε συνεχές εἶναι; εἰ δὲ καὶ τῷ ἐν ᾧ, μόνῳ τοῦτο τῷ τόπῳ ὑπάρχει· μέγεθος γάρ τι ἔχει, τούτου δὲ τὸ κύκλῳ μόνον συνεχές, ὥστε αὐτὸ αὐτῷ ἀεὶ συνεχές. Τοῦτο ἄρα ἐστὶν ὃ ποιεῖ συνεχῇ κίνησιν, τὸ κύκλῳ σῶμα φερόμενον· ἡ δὲ κίνησις τὸν χρόνον.

Κεφάλαιο 11

Ἐπεὶ δ' ἐν τοῖς συνεχῶς κινουμένοις κατὰ γενέσιν ἢ ἀλλοίωσιν ἢ ὅλως μεταβολὴν ὁρῶμεν τὸ ἐφεξῆς ὄν καὶ (337b.) γινόμενον τότε μετὰ τότε ὥστε μὴ διαλείπειν, σκεπτέον πότερον ἔστι τι ὃ ἐξ ἀνάγκης ἔσται, ἢ οὐδέν, ἀλλὰ πάντα ἐνδέχεται μὴ γενέσθαι. Ὅτι μὲν γὰρ ἔνια, δῆλον, καὶ εὐθὺς τὸ ἔσται καὶ τὸ μέλλον ἕτερον διὰ τοῦτο· ὃ μὲν γὰρ ἀληθὲς εἰπεῖν ὅτι ἔσται, δεῖ τοῦτο εἶναί ποτε ἀληθὲς ὅτι ἐστίν· ὃ δὲ νῦν ἀληθὲς εἰπεῖν ὅτι μέλλει, οὐδὲν κωλύει μὴ γενέσθαι· μέλλον γὰρ ἂν βαδίζειν τις οὐκ ἂν βαδίσειεν. Ὅλως δ', ἐπεὶ ἐνδέχεται ἔνια τῶν ὄντων καὶ μὴ εἶναι, δῆλον ὅτι καὶ τὰ γινόμενα οὕτως ἔξει, καὶ οὐκ ἐξ ἀνάγκης τοῦτ' ἔσται.

Πότερον οὖν ἅπαντα τοιαῦτα ἢ οὐ, ἀλλ' ἔνια ἀναγκαῖον ἀπλῶς γίνεσθαι, καὶ ἔστιν ὥσπερ ἐπὶ τοῦ εἶναι τὰ μὲν ἀδύνατα μὴ εἶναι τὰ δὲ δυνατά, οὕτως καὶ περὶ τὴν γενέσιν; οἷον τροπὰς ἄρα ἀνάγκη γενέσθαι, καὶ οὐχ οἷον τε μὴ ἐνδέχεσθαι;

Εἰ δὴ τὸ πρότερον ἀνάγκη γενέσθαι, εἰ τὸ ὕστερον ἔσται, οἷον εἰ οἰκία, θεμέλιον, εἰ δὲ τοῦτο, πηλόν, ἄρ' οὖν καὶ εἰ θεμέλιος γέγονεν, ἀνάγκη οἰκίαν γενέσθαι; ἢ οὐκέτι, εἰ μὴ κάκεῖνο ἀνάγκη γενέσθαι ἀπλῶς· εἰ δὲ τοῦτο, ἀνάγκη καὶ θεμελίου γενομένου γενέσθαι οἰκίαν· οὕτω γὰρ ἦν τὸ πρότερον ἔχον πρὸς τὸ ὕστερον, ὥστ' εἰ ἐκεῖνο ἔσται, ἀνάγκη ἐκεῖνο πρότερον. Εἰ τοίνυν ἀνάγκη γενέσθαι τὸ ὕστερον, καὶ τὸ πρότερον ἀνάγκη· καὶ εἰ τὸ πρότερον, καὶ τὸ ὕστερον τοίνυν ἀνάγκη, ἀλλ' οὐ δι' ἐκεῖνο, ἀλλ' ὅτι ὑπέκειτο ἐξ ἀνάγκης ἐσόμενον. Ἐν οἷς ἄρα τὸ ὕστερον ἀνάγκη εἶναι, ἐν τούτοις ἀντιστρέφει, καὶ αἰεὶ τοῦ προτέρου γενομένου ἀνάγκη γενέσθαι τὸ ὕστερον. Εἰ μὲν οὖν εἰς ἅπειρον εἰσιν ἐπὶ τὸ κάτω, οὐκ ἔσται ἀνάγκη τὸ ὕστερον τότε γενέσθαι ἀπλῶς. Ἀλλ' ἐξ ὑποθέσεως· αἰεὶ γὰρ ἕτερον ἔμπροσθεν ἀνάγκη ἔσται, δι' ὃ ἐκεῖνο ἀνάγκη γενέσθαι. Ὡστ' εἰ μὴ ἔστιν ἀρχὴ τοῦ ἀπείρου, οὐδὲ πρῶτον ἔσται οὐδὲν δι' ὃ ἀναγκαῖον ἔσται γενέσθαι. Ἀλλὰ μὴν οὐδ' ἐν τοῖς πέρας ἔχουσι τοῦτ' ἔσται εἰπεῖν ἀληθῶς, ὅτι ἀπλῶς ἀνάγκη γενέσθαι, οἷον οἰκίαν, ὅταν θεμέλιος γένηται· ὅταν γὰρ γένηται, εἰ μὴ αἰεὶ τοῦτο ἀνάγκη γίνεσθαι, συμβήσεται αἰεὶ εἶναι τὸ ἐνδεχόμενον μὴ αἰεὶ εἶναι. Ἀλλὰ δεῖ τῇ γενέσει αἰεὶ εἶναι, εἰ ἐξ ἀνάγκης αὐτοῦ ἐστὶν ἡ γένεσις· τὸ γὰρ ἐξ ἀνάγκης καὶ αἰεὶ ἅμα· ὃ γὰρ εἶναι ἀνάγκη (338a.) οὐχ οἷον τε μὴ

εἶναι· ὥστ' εἰ ἔστιν ἐξ ἀνάγκης, αἰδιόν ἐστι, καὶ εἰ αἰδιον, ἐξ ἀνάγκης. Καὶ εἰ ἡ γένεσις τοίνυν ἐξ ἀνάγκης, αἰδιος ἡ γένεσις τούτου, καὶ εἰ αἰδιος, ἐξ ἀνάγκης.

Εἰ ἄρα τινὸς ἐξ ἀνάγκης ἀπλῶς ἡ γένεσις, ἀνάγκη ἀνακυκλεῖν καὶ ἀνακάμπτειν. Ἀνάγκη γὰρ ἤτοι πέρας ἔχειν τὴν γένεσιν ἢ μὴ, καὶ εἰ μὴ, ἢ εἰς εὐθὺ ἢ κύκλῳ. Τούτων δ' εἴπερ ἔσται αἰδιος, οὐκ εἰς εὐθὺ οἶόν τε διὰ τὸ μηδαμῶς εἶναι ἀρχὴν μὴτ' ἂν κάτω, ὥς ἐπὶ τῶν ἐσομένων λαμβανομένων, μὴτ' ἄνω, ὥς ἐπὶ τῶν γενομένων· ἀνάγκη δ' εἶναι ἀρχήν, μὴ πεπερασμένης οὕσης, καὶ αἰδιον εἶναι. Διὸ ἀνάγκη κύκλῳ εἶναι. Ἀντιστρέφειν ἄρα ἀνάγκη ἔσται, οἶον εἰ τοδὶ ἐξ ἀνάγκης, καὶ τὸ πρότερον ἄρα· ἀλλὰ μὴν εἰ τοῦτο, καὶ τὸ ὕστερον ἀνάγκη γενέσθαι. Καὶ τοῦτο αἰεὶ δὴ συνεχῶς· οὐδὲν γὰρ τοῦτο διαφέρει λέγειν διὰ δύο ἢ πολλῶν. Ἐν τῇ κύκλῳ ἄρα κινήσει καὶ γενέσει ἐστὶ τὸ ἐξ ἀνάγκης ἀπλῶς· καὶ εἴτε κύκλῳ, ἀνάγκη ἕκαστον γίνεσθαι καὶ γεγονέναι, καὶ εἰ ἀνάγκη, ἢ τούτων γένεσις κύκλῳ.

Ταῦτα μὲν δὴ εὐλόγως, ἐπεὶ αἰδιος καὶ ἄλλως ἐφάνη ἡ κύκλῳ κίνησις καὶ ἡ τοῦ οὐρανοῦ, ὅτι ταῦτα ἐξ ἀνάγκης γίνεται καὶ ἔσται, ὅσαι (338b.) ταύτης κινήσεις καὶ ὅσαι διὰ ταύτην· εἰ γὰρ τὸ κύκλῳ κινούμενον αἰεὶ τι κινεῖ, ἀνάγκη καὶ τούτων κύκλῳ εἶναι τὴν κίνησιν, οἶον τῆς ἄνω φορᾶς οὕσης κύκλῳ ὁ ἥλιος ὡδί, ἐπεὶ δ' οὕτως, αἱ ὥραι διὰ τοῦτο κύκλῳ γίνονται καὶ ἀνακάμπουσιν, τούτων δ' οὕτω γινομένων πάλιν τὰ ὑπὸ τούτων.

Τί οὖν δὴ ποτε τὰ μὲν οὕτω φαίνεται, οἶον ὕδατα καὶ ἀῆρ κύκλῳ γινόμενα, καὶ εἰ μὲν νέφος ἔσται, δεῖ ὕσαι, καὶ εἰ ὕσει γε, δεῖ καὶ νέφος εἶναι, ἄνθρωποι δὲ καὶ ζῷα οὐκ ἀνακάμπουσιν εἰς αὐτοὺς ὥστε πάλιν γίνεσθαι τὸν αὐτόν· οὐ γὰρ ἀνάγκη, εἰ ὁ πατήρ ἐγένετο, σὲ γενέσθαι· ἀλλ' εἰ σύ, ἐκεῖνον. Εἰς εὐθὺ δὲ ἔοικεν εἶναι αὕτη ἡ γένεσις.

Ἀρχὴ δὲ τῆς σκέψεως πάλιν αὕτη, πότερον ὁμοίως ἅπαντα ἀνακάμπτει ἢ οὐ, ἀλλὰ τὰ μὲν ἀριθμῷ τὰ δὲ εἶδει μόνον.

Ὅσων μὲν οὖν ἄφθαρτος ἡ οὐσία ἡ κινουμένη, φανερόν ὅτι καὶ ἀριθμῷ ταυτὰ ἔσται (ἡ γὰρ κίνησις ἀκολουθεῖ τῷ κινουμένῳ), ὅσων δὲ μὴ ἀλλὰ φθαρτή, ἀνάγκη τῷ εἶδει, ἀριθμῷ δὲ μὴ ἀνακάμπτειν. Διὸ ὕδωρ ἐξ ἀέρος καὶ ἀῆρ ἐξ ὕδατος εἶδει ὁ αὐτός, οὐκ ἀριθμῷ. Εἰ δὲ καὶ ταῦτα ἀριθμῷ, ἀλλ' οὐχ ὧν ἡ οὐσία γίνεται οὕσα τοιαύτη οἷα ἐνδέχεσθαι μὴ εἶναι.

Μετεωρολογικά (338a) Meteorology

Βιβλίον Α' Περὶ μὲν οὖν τῶν πρώτων αἰτίων τῆς φύσεως καὶ περὶ πάσης κινήσεως φυσικῆς, ἔτι δὲ περὶ τῶν κατὰ τὴν ἄνω φορὰν διακεκοσμημένων ἄστρον καὶ περὶ τῶν στοιχείων τῶν σωματικῶν, πόσα τε καὶ ποῖα, καὶ τῆς εἰς ἄλληλα μεταβολῆς, καὶ περὶ γενέσεως καὶ φθορᾶς τῆς κοινῆς εἴρηται πρότερον. λοιπὸν δ' ἐστὶ μέρος τῆς μεθόδου ταύτης ἔτι θεωρητέον, ὃ πάντες οἱ πρότεροι μετεωρολογίαν ἐκάλουν· ταῦτα [338b.20] δ' ἐστὶν ὅσα συμβαίνει κατὰ φύσιν μὲν, ἀτακτοτέραν μέντοι τῆς τοῦ πρώτου στοιχείου τῶν σωμάτων, περὶ τὸν γεινιῶντα μάλιστα τόπον τῇ φορᾷ τῇ τῶν ἄστρον, οἷον περὶ τε γάλακτος καὶ κομητῶν καὶ τῶν ἐκπυρουμένων καὶ κινουμένων φασμάτων, ὅσα τε θεΐμεν ἂν ἀέρος εἶναι κοινὰ πάθη καὶ ὕδατος, ἔτι δὲ γῆς ὅσα μέρη καὶ εἶδη καὶ πάθη τῶν μερῶν, ἐξ ὧν περὶ τε πνευμάτων καὶ σεισμῶν θεωρήσαιμεν ἂν τὰς αἰτίας [339a] καὶ περὶ πάντων τῶν γιγνομένων κατὰ τὰς κινήσεις τὰς τούτων· ἐν οἷς τὰ μὲν ἀποροῦμεν, τῶν δὲ ἐφαπτόμεθ' αἰνὰ τρόπον· ἔτι δὲ περὶ κεραυνῶν πτώσεως καὶ τυφῶνων καὶ πρηστήρων καὶ τῶν ἄλλων τῶν ἐγκυκλίων, ὅσα διὰ πῆξιν συμβαίνει πάθη τῶν αὐτῶν σωμάτων τούτων. διελθόντες δὲ περὶ τούτων, θεωρήσωμεν εἴ τι δυνάμεθα κατὰ τὸν ὑψηλόμενον τρόπον ἀποδοῦναι περὶ ζώων καὶ φυτῶν, καθόλου τε καὶ χωρὶς· σχεδὸν γὰρ τούτων ῥηθέντων τέλος ἂν εἴη γεγονὸς τῆς ἐξ ἀρχῆς ἡμῖν προαιρέσεως πάσης. ὧδ' οὖν ἀρξάμενοι λέγωμεν περὶ αὐτῶν πρώτον.

ἐπειδὴ γὰρ διώρισται πρότερον ἡμῖν μία μὲν ἀρχὴ τῶν σωμάτων, ἐξ ὧν συνέστηκεν ἡ τῶν ἐγκυκλίων φερομένων σωμάτων φύσις, ἄλλα δὲ τέτταρα σώματα διὰ τὰς τέτταρας ἀρχάς, ὧν διπλῆν εἶναι φαμεν τὴν κίνησιν, τὴν μὲν ἀπὸ τοῦ μέσου τὴν δ' ἐπὶ τὸ μέσον· τεττάρων δ' ὄντων τούτων, πυρὸς καὶ ἀέρος καὶ ὕδατος καὶ γῆς, τὸ μὲν τούτοις πᾶσιν ἐπιπολάζον εἶναι πῦρ, τὸ δ' ὑφιστάμενον γῆν· δύο δὲ ἂ πρὸς αὐτὰ τούτοις ἀνάλογον ἔχει (ἡρ μὲν γὰρ πυρὸς ἐγγυτάτω τῶν ἄλλων, ὕδωρ δὲ γῆς)· ὁ δὲ περὶ τὴν γῆν ὅλος κόσμος ἐκ τούτων

συνέστηκε τῶν σωμάτων· περὶ οὗ τὰ συμβαίνοντα πάθη φαμέν εἶναι ληπτέον. ἔστιν δ' ἐξ ἀνάγκης συνεχῆς οὗτος ταῖς ἄνω φοραῖς, ὥστε πᾶσαν αὐτοῦ τὴν δύναμιν κυβερνᾶσθαι ἐκεῖθεν· ὅθεν γὰρ ἡ τῆς κινήσεως ἀρχὴ πᾶσιν, ἐκείνην αἰτίαν νομιστέον πρώτην. πρὸς δὲ τούτοις ἡ μὲν αἰδῖος καὶ τέλος οὐκ ἔχουσα τῷ τόπῳ τῆς κινήσεως, ἀλλ' αἰεὶ ἐν τέλει· ταῦτα δὲ τὰ σώματα πάντα πεπερασμένους διέστηκε τόπους ἀλλήλων. ὥστε τῶν συμβαινόντων περὶ αὐτὸν πῦρ μὲν καὶ γῆν καὶ τὰ συγγενῇ τούτοις ὡς ἐν ὕλης εἶδει τῶν γιγνομένων αἷτια χρὴ νομίζειν (τὸ γὰρ ὑποκείμενον καὶ πάσχον τοῦτον προσαγορεύομεν τὸν τρόπον), τὸ δ' οὕτως αἷτιον ὅθεν ἡ τῆς κινήσεως ἀρχή, τὴν τῶν αἰεὶ κινουμένων αἰτιατέον δύναμιν.

ἀναλαβόντες οὖν τὰς ἐξ ἀρχῆς θέσεις καὶ τοὺς εἰρημένους πρότερον διορισμούς, λέγωμεν περὶ τε τῆς τοῦ γάλακτος φαντασίας καὶ περὶ κομητῶν καὶ τῶν ἄλλων ὅσα τυγχάνει τούτοις ὄντα συγγενῇ. φαμέν δὴ πῦρ καὶ ἀέρα καὶ ὕδωρ καὶ γῆν γίνεσθαι ἐξ ἀλλήλων, καὶ ἕκαστον ἐν ἑκάστῳ [339b] ὑπάρχειν τούτων δυνάμει, ὥσπερ καὶ τῶν ἄλλων οἷς ἐν τι καὶ ταῦτὸν ὑπόκειται, εἰς ὃ δὴ ἀναλύονται ἔσχατον. πρῶτον μὲν οὖν ἀπορήσειεν ἂν τις περὶ τὸν καλούμενον ἀέρα, τίνα τε χρὴ λαβεῖν αὐτοῦ τὴν φύσιν ἐν τῷ περιέχοντι κόσμῳ τὴν γῆν, καὶ πῶς ἔχει τῇ τάξει πρὸς τᾶλλα τὰ λεγόμενα στοιχεῖα τῶν σωμάτων. ὁ μὲν γὰρ δὴ τῆς γῆς ὄγκος πηλίκος ἂν τις εἴη πρὸς τὰ περιέχοντα μεγέθη, οὐκ ἄδηλον· ἤδη γὰρ ὥπται διὰ τῶν ἀστρολογικῶν θεωρημάτων ἡμῖν ὅτι πολὺ καὶ τῶν ἄστρον ἐνίων ἐλάττων ἐστίν. ὕδατος δὲ φύσιν συνεστηκυῖαν καὶ ἀφωρισμένην οὐθ' ὁρῶμεν οὔτ' ἐνδέχεται κεχωρισμένην εἶναι τοῦ περὶ τὴν γῆν ἰδρυμένου σώματος, οἷον τῶν τε φανερῶν, θαλάττης καὶ ποταμῶν, κἂν εἴ τι κατὰ βάθους ἄδηλον ἡμῖν ἐστίν. τὸ δὲ δὴ μεταξὺ τῆς γῆς τε καὶ τῶν ἐσχάτων ἄστρον πότερον ἐν τι νομιστέον εἶναι σῶμα τὴν φύσιν ἢ πλείω, κἂν εἰ πλείω, πόσα, καὶ μέχρι ποῦ διώρισται τοῖς τόποις; ἡμῖν μὲν οὖν εἴρηται πρότερον περὶ τοῦ πρώτου στοιχείου, ποῖόν τι τὴν δυνάμιν ἐστίν, καὶ διότι πᾶς ὁ περὶ τὰς ἄνω φορὰς κόσμος ἐκείνου τοῦ σώματος πλήρης ἐστί. καὶ ταύτην τὴν δόξαν οὐ μόνον ἡμεῖς τυγχάνομεν ἔχοντες, φαίνεται δὲ ἀρχαία τις ὑπόληψις αὕτη καὶ τῶν πρότερον ἀνθρώπων· ὁ γὰρ λεγόμενος αἰθὴρ παλαιὰν εἴληφε τὴν προσηγορίαν, ἣν Ἀναξαγόρας μὲν τῷ πυρὶ ταῦτὸν ἰγήσασθαι μοι δοκεῖ σημαίνειν· τὰ τε γὰρ ἄνω πλήρη πυρὸς εἶναι, κἀκεῖνος τὴν ἐκεῖ δύναμιν αἰθέρα καλεῖν ἐνόμισεν, τοῦτο μὲν ὀρθῶς νομίσας· τὸ γὰρ

ἀεὶ σῶμα θεόν ἅμα καὶ θεϊόν τι τὴν φύσιν εἰκόσιν ὑπολαβεῖν, καὶ διώρισαν ὀνομάζειν αἰθέρα τὸ τοιοῦτον ὡς ὃν οὐδενὶ τῶν παρ' ἡμῖν τὸ αὐτό· οὐ γὰρ δὴ φήσομεν ἅπαξ οὐδὲ δις οὐδ' ὀλιγάκις τὰς αὐτὰς δόξας ἀνακυκλεῖν γιγνομένας ἐν τοῖς ἀνθρώποις, ἀλλ' ἀπειράκις. ὅσοι δὲ πῦρ καθαρὸν εἶναί φασι τὸ περιέχον καὶ μὴ μόνον τὰ φερόμενα σώματα, τὸ δὲ μεταξὺ γῆς καὶ τῶν ἄστρον ἄερα, θεωρήσαντες ἂν τὰ νῦν δεικνύμενα διὰ τῶν μαθημάτων ἱκανῶς ἴσως ἂν ἐπαύσαντο ταύτης τῆς παιδικῆς δόξης· λίαν γὰρ ἀπλοῦν τὸ νομίζειν μικρὸν τοῖς μεγέθεσιν εἶναι τῶν φερομένων ἕκαστον, ὅτι φαίνεται θεωροῦσιν ἐντεῦθεν ἡμῖν οὕτως. εἴρηται μὲν οὖν καὶ πρότερον ἐν τοῖς περὶ τὸν ἄνω τόπον θεωρήμασι· λέγωμεν δὲ τὸν αὐτὸν λόγον καὶ νῦν. [340a] εἰ γὰρ τὰ τε διαστήματα πλήρη πυρὸς καὶ τὰ σώματα συνέστηκεν ἐκ πυρός, πάλαι φροῦδον ἂν ἦν ἕκαστον τῶν ἄλλων στοιχείων. ἀλλὰ μὴν οὐδ' ἀέρος γε μόνου πλήρη· πολὺ γὰρ ἂν ὑπερβάλλοι τὴν ἰσότητα τῆς κοινῆς ἀναλογίας πρὸς τὰ σύστοιχα σώματα, κἂν εἰ δύο στοιχείων πλήρης ὁ μεταξὺ γῆς τε καὶ οὐρανοῦ τόπος ἐστίν· οὐδὲν γὰρ ὡς εἶπεῖν μόνιον ὁ τῆς γῆς ἐστὶν ὄγκος, ἐν ᾧ συνείληπται πᾶν καὶ τὸ τοῦ ὕδατος πλῆθος, πρὸς τὸ περιέχον μέγεθος. ὁρῶμεν δ' οὐκ ἐν τοσοῦτῳ μεγέθει γιγνομένην τὴν ὑπεροχὴν τῶν ὄγκων, ὅταν ἐξ ὕδατος ἀῆρ γένηται διακριθέντος ἢ πῦρ ἐξ ἀέρος· ἀνάγκη δὲ τὸν αὐτὸν ἔχειν λόγον ὃν ἔχει τὸ τοσονδὶ καὶ μικρὸν ὕδωρ πρὸς τὸν ἐξ αὐτοῦ γιγνόμενον ἄερα, καὶ τὸν πάντα πρὸς τὸ πᾶν ὕδωρ. διαφέρει δ' οὐδὲν οὐδ' εἴ τις φήσει μὲν μὴ γίνεσθαι ταῦτα ἐξ ἀλλήλων, ἴσα μέντοι τὴν δύναμιν εἶναι· κατὰ τοῦτον γὰρ τὸν τρόπον ἀνάγκη τὴν ἰσότητα τῆς δυνάμεως ὑπάρχειν τοῖς μεγέθεσιν αὐτῶν, ὥσπερ κἂν εἰ γιγνόμενα ἐξ ἀλλήλων ὑπῆρχεν. ὅτι μὲν οὖν οὕτ' ἀῆρ οὐτε πῦρ συμπεπλήρωκε μόνον τὸν μεταξὺ τόπον, φανερόν ἐστι· λοιπὸν δὲ διαπορήσαντας εἶπεῖν πῶς τέτακται τὰ δύο πρὸς τὴν τοῦ πρώτου σώματος θέσιν, λέγω δὲ ἄερα τε καὶ πῦρ, καὶ διὰ τίν' αἰτίαν ἢ θερμότης ἀπὸ τῶν ἄνωθεν ἄστρον γίνεται τοῖς περὶ τὴν γῆν τόποις. περὶ ἀέρος οὖν εἰπόντες πρῶτον, ὥσπερ ὑπεθέμεθα, λέγωμεν οὕτω καὶ περὶ τούτων πάλιν. εἰ δὴ γίνεται ὕδωρ ἐξ ἀέρος καὶ ἀῆρ ἐξ ὕδατος, διὰ τίνα ποτ' αἰτίαν οὐ συνίσταται νέφη κατὰ τὸν ἄνω τόπον; προσήκε γὰρ μᾶλλον ὅσῳ πορρώτερον ὁ τόπος τῆς γῆς καὶ ψυχρότερος, διὰ τὸ μῆθ' οὕτω πλησίον εἶναι τῶν ἄστρον θερμῶν ὄντων μήτε τῶν ἀπὸ τῆς γῆς ἀνακλωμένων ἀκτίνων, αἱ κωλύουσι πλησίον τῆς γῆς συνίστασθαι, διακρίνουσαι τῇ

θερμότητι τὰς συστάσεις· γίνονται γὰρ αἱ τῶν νεφῶν ἀθροίσεις, οὗ λήγουσιν ἤδη διὰ τὸ σχίζεσθαι εἰς ἀχανὲς αἱ ἀκτῖνες. ἡ οὖν οὐκ ἐξ ἅπαντος τοῦ ἀέρος πέφυκεν ὕδωρ γίνεσθαι, ἢ εἰ ὁμοίως ἐξ ἅπαντος, ὁ περὶ τὴν γῆν οὐ μόνον ἀήρ ἐστὶν ἀλλ' οἶον ἀτμίς, διὸ πάλιν συνίσταται εἰς ὕδωρ. ἀλλὰ μὴν εἰ τοσοῦτος ὢν ὁ ἀήρ ἅπας ἀτμίς ἐστὶ, δόξειεν ἂν πολὺ ὑπερβάλλειν ἢ τοῦ ἀέρος φύσις καὶ ἢ τοῦ ὕδατος, εἴπερ τὰ τε διαστήματα τῶν ἄνω πλήρη ἐστί [340b] σώματός τινος, καὶ πυρὸς μὲν ἀδύνατον διὰ τὸ κατεξηράνθαι ἂν τᾶλλα πάντα, λείπεται δ' ἀέρος καὶ τοῦ περὶ τὴν γῆν πᾶσαν ὕδατος· ἢ γὰρ ἀτμίς ὕδατος διάκρισις ἐστίν. περὶ μὲν οὖν τούτων ἡπορήσθω τοῦτον τὸν τρόπον· ἡμεῖς δὲ λέγωμεν ἅμα πρὸς τε τὰ λεχθησόμενα διορίζοντες καὶ πρὸς τὰ νῦν εἰρημένα. τὸ μὲν γὰρ ἄνω καὶ μέχρι σελήνης ἕτερον εἶναι σῶμά φαμεν πυρὸς τε καὶ ἀέρος, οὐ μὴν ἀλλ' ἐν αὐτῷ γε τὸ μὲν καθαρώτερον εἶναι τὸ δ' ἥττον εἰλικρινές, καὶ διαφορὰς ἔχειν, καὶ μάλιστα ἥ καταλήγει πρὸς τὸν ἀέρα καὶ πρὸς τὸν περὶ τὴν γῆν κόσμον. φερομένου δὲ τοῦ πρώτου στοιχείου κύκλῳ καὶ τῶν ἐν αὐτῷ σωμάτων, τὸ προσεχὲς αἰὶ τοῦ κάτω κόσμου καὶ σώματος τῇ κινήσει διακρινόμενον ἐκπυροῦται καὶ ποιεῖ τὴν θερμότητα. δεῖ δὲ νοεῖν οὕτως καὶ ἐντεῦθεν ἀρξαμένους. τὸ γὰρ ὑπὸ τὴν ἄνω περιφορὰν σῶμα οἶον ὕλη τις οὔσα καὶ δυνάμει θερμῇ καὶ ψυχρᾷ καὶ ξηρᾷ καὶ ὑγρᾷ, καὶ ὅσα ἄλλα τούτοις ἀκολουθεῖ πάθη, γίνεται τοιαύτη καὶ ἔστιν ὑπὸ κινήσεως καὶ ἀκινήσιας, ἧς τὴν αἰτίαν καὶ τὴν ἀρχὴν εἰρήκαμεν πρότερον. ἐπὶ μὲν οὖν τοῦ μέσου καὶ περὶ τὸ μέσον τὸ βαρύτερόν ἐστιν καὶ ψυχρότατον ἀποκεκριμένον, γῆ καὶ ὕδωρ· περὶ δὲ ταῦτα καὶ ἐχόμενα τούτων, ἀήρ τε καὶ ὁ διὰ συνήθειαν καλοῦμεν πῦρ, οὐκ ἔστι δὲ πῦρ· ὑπερβολὴ γὰρ θερμοῦ καὶ οἶον ζέσις ἐστὶ τὸ πῦρ. ἀλλὰ δεῖ νοῆσαι τοῦ λεγομένου ὕφ' ἡμῶν ἀέρος τὸ μὲν περὶ τὴν γῆν οἶον ὑγρὸν καὶ θερμὸν εἶναι διὰ τὸ ἀτμίζειν τε καὶ ἀναθυμιάσιν ἔχειν γῆς, τὸ δὲ ὑπὲρ τοῦτο θερμὸν ἤδη καὶ ξηρόν. ἔστιν γὰρ ἀτμίδος μὲν φύσις ὑγρὸν καὶ θερμὸν, ἀναθυμιάσεως δὲ θερμὸν καὶ ξηρόν· καὶ ἔστιν ἀτμίς μὲν δυνάμει οἶον ὕδωρ, ἀναθυμιάσις δὲ δυνάμει οἶον πῦρ. τοῦ μὲν οὖν ἐν τῷ ἄνω τόπῳ μὴ συνίστασθαι νέφη ταύτην ὑποληπτέον αἰτίαν εἶναι, ὅτι οὐκ ἔνεστιν ἀήρ μόνον ἀλλὰ μᾶλλον οἶον πῦρ. οὐδὲν δὲ κωλύει καὶ διὰ τὴν κύκλῳ φορὰν κωλύεσθαι συνίστασθαι νέφη ἐν τῷ ἀνωτέρῳ τόπῳ· ρεῖν γὰρ ἀναγκαῖον ἅπαντα τὸν κύκλῳ ἀέρα, ὅσος μὴ ἐντὸς τῆς περιφερείας λαμβάνεται τῆς ἀπαρτιζούσης ὥστε τὴν γῆν σφαιροειδῆ εἶναι πᾶσαν· φαίνεται γὰρ

καὶ νῦν ἡ τῶν ἀνέμων γένεσις ἐν τοῖς λιμνάζουσι τόποις τῆς γῆς, καὶ οὐχ [341a] ὑπερβάλλειν τὰ πνεύματα τῶν ὑψηλῶν ὀρῶν. ῥεῖ δὲ κύκλῳ διὰ τὸ συνεφέλκεσθαι τῇ τοῦ ὄλου περιφορᾷ. τὸ μὲν γὰρ πῦρ τῷ ἄνω στοιχείῳ, τῷ δὲ πυρὶ ὁ ἀῆρ συνεχῆς ἐστίν· ὥστε καὶ διὰ τὴν κίνησιν κωλύεται συγκρίνεσθαι εἰς ὕδωρ, ἀλλ' ἀεὶ ὁ τι ἂν βαρύνηται μόριον αὐτοῦ ἐκθλιβομένου εἰς τὸν ἄνω τόπον τοῦ θερμοῦ κάτω φέρεται, ἄλλα δ' ἐν μέρει συναναφέρεται τῷ ἀναθυμιωμένῳ πυρί, καὶ οὕτω συνεχῶς τὸ [341a.8] μὲν ἀέρος διατελεῖ πληρὲς ὄν τὸ δὲ πυρὸς, καὶ ἀεὶ ἄλλο καὶ ἄλλο γίγνεται ἕκαστον αὐτῶν. περὶ μὲν οὖν τοῦ μὴ γίνεσθαι νέφη μὴδ' εἰς ὕδωρ σύγκρισιν, καὶ πῶς δεῖ λαβεῖν περὶ τοῦ μεταξὺ τόπου τῶν ἄστρον καὶ τῆς γῆς, καὶ τίνος ἐστὶν σώματος πλήρης, τοσαῦτα εἰρήσθω. περὶ δὲ τῆς γιγνομένης θερμότητος, ἣν παρέχεται ὁ ἥλιος, μᾶλλον μὲν καθ' ἑαυτὸ καὶ ἀκριβῶς ἐν τοῖς περὶ αἰσθήσεως προσήκει λέγειν (πάθος γάρ τι τὸ θερμὸν αἰσθήσεώς ἐστίν), διὰ τίνα δ' αἰτίαν γίγνεται μὴ τοιούτων ὄντων ἐκείνων τὴν φύσιν, λεκτέον καὶ νῦν. ὁρῶμεν δὴ τὴν κίνησιν ὅτι δύναται διακρίνειν τὸν ἀέρα καὶ ἐκπυροῦν, ὥστε καὶ τὰ φερόμενα τηκόμενα φαίνεσθαι πολλάκις. τὸ μὲν οὖν γίνεσθαι τὴν ἀλέαν καὶ τὴν θερμότητα ἱκανὴ ἐστὶν παρασκευάζειν καὶ ἡ τοῦ ἡλίου φορὰ μόνον· ταχεῖάν τε γὰρ δεῖ καὶ μὴ πόρρω εἶναι. ἡ μὲν οὖν τῶν ἄστρον ταχεῖα μὲν πόρρω δέ, ἡ δὲ τῆς σελήνης κάτω μὲν βραδεῖα δέ· ἡ δὲ τοῦ ἡλίου ἄμφω ταῦτα ἔχει ἱκανῶς. τὸ δὲ μᾶλλον γίνεσθαι ἅμα τῷ ἡλίῳ αὐτῷ τὴν θερμότητα εὐλογον, λαμβάνοντας τὸ ὅμοιον ἐκ τῶν παρ' ἡμῖν γιγνομένων· καὶ γὰρ ἐνταῦθα τῶν βία φερομένων ὁ πλησιάζων ἀῆρ μάλιστα γίγνεται θερμός. καὶ τοῦτ' εὐλόγως συμβαίνει· μάλιστα γὰρ ἡ τοῦ στερεοῦ διακρίνει κίνησις αὐτόν. διὰ τε ταύτην οὖν τὴν αἰτίαν ἀφικνεῖται πρὸς τόνδε τὸν τόπον ἡ θερμότης, καὶ διὰ τὸ τὸ περιέχον πῦρ τὸν ἀέρα διαρραίνεσθαι τῇ κινήσει πολλάκις καὶ φέρεσθαι βία κάτω. σημεῖον δ' ἱκανὸν ὅτι ὁ ἄνω τόπος οὐκ ἔστι θερμὸς οὐδ' ἐκτεπυρωμένος καὶ αἱ διαδρομαὶ τῶν ἀστέρων. ἐκεῖ μὲν γὰρ οὐ γίνονται, κάτω δέ· καίτοι τὰ μᾶλλον κινούμενα καὶ θάττον, ἐκπυροῦται θάττον. πρὸς δὲ τούτοις ὁ ἥλιος, ὅσπερ μάλιστα εἶναι δοκεῖ θερμός, φαίνεται λευκὸς ἄλλ' οὐ πυρώδης ὢν. [341b] τούτων δὲ διωρισμένων, λέγωμεν διὰ τίν' αἰτίαν αἱ τε φλόγες αἱ καιόμεναι φαίνονται περὶ τὸν οὐρανὸν καὶ οἱ διαθέοντες ἀστέρες καὶ οἱ καλούμενοι ὑπὸ τινων δαλοὶ καὶ αἶγες· ταῦτα γὰρ πάντ' ἐστὶν τὸ αὐτὸ καὶ διὰ τὴν αὐτὴν αἰτίαν, διαφέρει δὲ τῷ μᾶλλον

καὶ ἦττον. ἀρχὴ δὲ ἐστὶν καὶ τούτων καὶ πολλῶν ἄλλων ἥδε. θερμαινομένης γὰρ τῆς γῆς ὑπὸ τοῦ ἡλίου τὴν ἀναθυμίασιν ἀναγκαῖον γίνεσθαι μὴ ἀπλῆν, ὥς τινες οἴονται, ἀλλὰ διπλῆν, τὴν μὲν ἀτμιδωδεστέραν τὴν δὲ πνευματωδεστέραν, τὴν μὲν τοῦ ἐν τῇ γῇ καὶ ἐπὶ τῇ γῇ ὑγροῦ ἀτμίδα, τὴν δ' αὐτῆς τῆς γῆς οὔσης ξηρᾶς καπνώδη· καὶ τούτων τὴν μὲν πνευματώδη ἐπιπολάζειν διὰ τὸ θερμόν, τὴν δὲ ὑγροτέραν ὑφίστασθαι διὰ τὸ βάρος. καὶ διὰ ταῦτα τοῦτον τὸν τρόπον κεκόσμηται τὸ περίξ· πρῶτον μὲν γὰρ ὑπὸ τὴν ἐγκύκλιον φορὰν ἐστὶν τὸ θερμόν καὶ ξηρόν, ὃ λέγομεν πῦρ (ἀνώνυμον γὰρ τὸ κοινὸν ἐπὶ πάσης τῆς καπνώδους διακρίσεως· ὁμως δὲ διὰ τὸ μάλιστα πεφυκέναι τὸ τοιοῦτον ἐκκαίεσθαι τῶν σωμάτων οὕτως ἀναγκαῖον χρῆσθαι τοῖς ὀνόμασιν), ὑπὸ δὲ ταύτην τὴν φύσιν ἀήρ. δεῖ δὴ νοῆσαι οἷον ὑπέκκαυμα τοῦτο ὃ νῦν εἵπομεν πῦρ περιτετάσθαι τῆς περὶ τὴν γῆν σφαίρας ἔσχατον, ὥστε μικρὰς κινήσεως τυχὸν ἐκκαίεσθαι πολλάκις ὥσπερ τὸν καπνόν· ἔστι γὰρ ἡ φλόξ πνεύματος ξηροῦ ζέσις. ἥ ἂν οὖν μάλιστα εὐκαίρως ἔχη ἡ τοιαύτη σύστασις, ὅταν ὑπὸ τῆς περιφορᾶς κινηθῇ πως, ἐκκάεται. διαφέρει δ' ἤδη κατὰ τὴν τοῦ ὑπεκκαύματος θέσιν ἢ τὸ πλῆθος· ἂν μὲν γὰρ πλάτος ἔχη καὶ μῆκος τὸ ὑπέκκαυμα, πολλάκις ὀράται καιομένη φλόξ ὥσπερ ἐν ἀρούρα καιομένης καλάμης, ἐὰν δὲ κατὰ μῆκος μόνον, οἱ καλούμενοι δαλοὶ καὶ αἶγες καὶ ἀστέρες. ἐὰν μὲν πλέον τὸ ὑπέκκαυμα ἢ κατὰ τὸ μῆκος ἢ τὸ πλάτος, ὅταν μὲν οἷον ἀποσπινθηρίζῃ ἅμα καιόμενον (τοῦτο δὲ γίνεται διὰ τὸ παρεκτυροῦσθαι, κατὰ μικρὰ μὲν, ἐπ' ἀρχὴν δέ), αἷξ καλεῖται, ὅταν δ' ἄνευ τούτου τοῦ πάθους, δαλός. ἐὰν δὲ τὰ μήκη τῆς ἀναθυμιάσεως κατὰ μικρά τε καὶ πολλαχῇ διεσπαρμένα ἢ καὶ ὁμοίως κατὰ πλάτος καὶ βάθος, οἱ δοκοῦντες ἀστέρες διάττειν γίνονται. ὅτε μὲν οὖν ὑπὸ τῆς κινήσεως ἡ ἀναθυμίασις ἐκκαιομένη γεννᾷ αὐτά· ὅτε δὲ ὑπὸ τοῦ διὰ τὴν ψύξιν [342a] συνισταμένου ἀέρος ἐκθλίβεται καὶ ἐκκρίνεται τὸ θερμόν, διὸ καὶ ἔοικεν ἡ φορὰ ρίψει μᾶλλον αὐτῶν, ἀλλ' οὐκ ἐκκαύσει. ἀπορήσειε γὰρ ἂν τις πότερον ὥσπερ ἢ ὑπὸ τοὺς λύχνους τιθεμένη ἀναθυμίασις ἀπὸ τῆς ἄνωθεν φλογὸς ἅπτει τὸν κάτωθεν λύχνον (θαυμαστὴ γὰρ καὶ τούτου ἡ ταχυτὴς ἐστὶν καὶ ὁμοία ρίψει, ἀλλ' οὐχ ὡς ἄλλου καὶ ἄλλου γιγνομένου πυρός), ἢ ρίψεις τοῦ αὐτοῦ τινος σώματός εἰσιν αἱ διαδρομαί. ἔοικε δὲ δι' ἅμφω· καὶ γὰρ οὕτως ὡς ἡ ἀπὸ τοῦ λύχνου γίνεται, καὶ ἔνια διὰ τὸ ἐκθλίβεσθαι ρίπτεται, ὥσπερ οἱ ἐκ τῶν δακτύλων πυρῆνες, ὥστε καὶ εἰς τὴν γῆν καὶ εἰς τὴν

θάλατταν φαίνεσθαι πίπτοντα, καὶ νύκτωρ καὶ μεθ' ἡμέραν καὶ αἰθρίας οὐσης. κάτω δὲ ῥιπτεῖται διὰ τὸ τὴν πύκνωσιν εἰς τὸ κάτω ῥέπειν τὴν ἀπωθοῦσαν. διὸ καὶ οἱ κεραυνοὶ κάτω πίπτουσιν <, τοῦ πυρὸς ἄνω φερομένου [342a.14] κατὰ φύσιν>· πάντων γὰρ τούτων ἡ γένεσις οὐκ ἔκκαυσις ἀλλ' ἔκκρισις ὑπὸ τῆς ἐκθλίψεως ἐστίν, ἐπεὶ κατὰ φύσιν γε τὸ θερμὸν ἄνω πέφυκε φέρεσθαι πᾶν. ὅσα μὲν οὖν μᾶλλον ἐν τῷ ἀνωτάτῳ τόπῳ συνίσταται, ἐκκαιομένης γίγνεται τῆς ἀναθυμιάσεως, ὅσα δὲ κατώτερον, ἐκκρινομένης διὰ τὸ συνιέναι καὶ ψύχεσθαι τὴν ὑγροτέραν ἀναθυμιάσιν· αὕτη γὰρ συνιοῦσα καὶ κάτω ῥέπουσα ἀπωθεῖ πυκνουμένη καὶ κάτω ποιεῖ τοῦ θερμοῦ τὴν ῥῖψιν· διὰ δὲ τὴν θέσιν τῆς ἀναθυμιάσεως, ὅπως ἂν τύχῃ κειμένη τοῦ πλάτους καὶ τοῦ βάθους, οὕτω φέρεται ἢ ἄνω ἢ κάτω ἢ εἰς τὸ πλάγιον. τὰ πλεῖστα δ' εἰς τὸ πλάγιον διὰ τὸ δύο φέρεσθαι φοράς, βίᾳ μὲν κάτω, φύσει δ' ἄνω· πάντα γὰρ κατὰ τὴν διάμετρον φέρεται τὰ τοιαῦτα. διὸ καὶ τῶν διαθεόντων ἀστέρων ἡ πλείστη λοξὴ γίγνεται φορά. πάντων δὲ τούτων αἴτιον ὥς μὲν ὕλη ἢ ἀναθυμιάσις, ὥς δὲ τὸ κινεῖν ὅτε μὲν ἡ ἄνω φορά, ὅτε δ' ἡ τοῦ ἀέρος συγκρινομένου πῆξις. πάντα δὲ κάτω ταῦτα σελήνης γίγνεται. σημεῖον δ' ἡ φαινομένη αὐτῶν ταχυτῆς ὁμοία οὕσα τοῖς ὑφ' ἡμῶν ῥιπτουμένοις, ἃ διὰ τὸ πλησίον εἶναι ἡμῶν πολὺ δοκεῖ τῷ τάχει παραλλάττειν ἄστρα τε καὶ ἥλιον καὶ σελήνην.

φαίνεται δὲ ποτε συνιστάμενα νύκτωρ αἰθρίας οὐσης πολλὰ φάσματα ἐν τῷ οὐρανῷ, οἷον χάσματά τε καὶ βόθυνοι καὶ αἱματώδη χρώματα. αἴτιον δὲ ἐπὶ τούτων τὸ [342b] αὐτό· ἐπεὶ γὰρ φανερός ἐστὶ συνιστάμενος ὁ ἄνω ἀήρ ὥστ' ἐκπυροῦσθαι, καὶ τὴν ἐκπύρωσιν ὅτε μὲν τοιαύτην γίγνεσθαι ὥστε φλόγα δοκεῖν καίεσθαι, ὅτε δὲ οἷον δαλοὺς φέρεσθαι καὶ ἀστέρας, οὐδὲν ἄτοπον εἰ χρωματίζεται ὁ αὐτὸς οὗτος ἀήρ συνιστάμενος παντοδαπὰς χροάς· διὰ τε γὰρ πυκνοτέρου διαφανόμενον ἔλαττον φῶς καὶ ἀνάκλασιν δεχόμενος ὁ ἀήρ παντοδαπὰ χρώματα ποιήσει, μάλιστα δὲ φοινικοῦν ἢ πορφυροῦν, διὰ τὸ ταῦτα μάλιστα ἐκ τοῦ πυρώδους καὶ λευκοῦ φαίνεσθαι μειγνυμένων κατὰ τὰς ἐπιπροσθήσεις, οἷον ἀνίσχοντα τὰ ἄστρα καὶ δυόμενα, ἐὰν ἦ καῦμα, καὶ διὰ καπνοῦ φοινικᾶ φαίνεται. καὶ τῇ ἀνακλάσει δὲ ποιήσει, ὅταν τὸ ἔνοπτρον ἦ τοιοῦτον ὥστε μὴ τὸ σχῆμα ἀλλὰ τὸ χρῶμα δέχεσθαι. τοῦ δὲ μὴ πολὺν χρόνον μένειν ταῦτα ἢ σύστασις αἰτία ταχεῖα οὕσα. τὰ δὲ χάσματα ἀναρρηγνυμένου τοῦ φωτὸς ἐκ κυανοῦ καὶ μέλανος ποιεῖ τι βάθος ἔχειν δοκεῖν.

πολλάκις δ' ἐκ τῶν τοιούτων καὶ δαλοὶ ἐκπίπτουσιν, ὅταν συγκριθῇ μᾶλλον· συνιὼν δ' ἔτι χάσμα [342b.18] δοκεῖ. ὅλως δ' ἐν τῷ μέλανι τὸ λευκὸν πολλὰς ποιεῖ ποικιλίας, οἷον ἢ φλόξ ἐν τῷ καπνῷ. ἡμέρας μὲν οὖν ὁ ἥλιος κωλύει, νυκτὸς δ' ἔξω τοῦ φοινικοῦ τὰ ἄλλα δι' ὁμόχροιαν οὐ φαίνεται. περὶ μὲν οὖν τῶν διαθεόντων ἀστέρων καὶ τῶν ἐκφυρομένων, ἔτι δὲ τῶν ἄλλων τῶν τοιούτων φασμάτων ὅσα ταχείας ποιεῖται τὰς φαντασίας, ταύτας ὑπολαβεῖν δεῖ τὰς αἰτίας.

περὶ δὲ τῶν κομητῶν καὶ τοῦ καλουμένου γάλακτος λέγωμεν, διαπορήσαντες πρὸς τὰ παρὰ τῶν ἄλλων εἰρημένα πρῶτον. Ἀναξαγόρας μὲν οὖν καὶ Δημόκριτός φασιν εἶναι τοὺς κομήτας σύμφασιν τῶν πλανήτων ἀστέρων, ὅταν διὰ τὸ πλησίον ἐλθεῖν δόξωσι θιγγάνειν ἀλλήλων. τῶν δ' Ἰταλικῶν τινες καλουμένων Πυθαγορείων ἓνα λέγουσιν αὐτὸν εἶναι τῶν πλανήτων ἀστέρων, ἀλλὰ διὰ πολλοῦ τε χρόνου τὴν φαντασίαν αὐτοῦ εἶναι καὶ τὴν ὑπερβολὴν ἐπὶ μικρόν, ὅπερ συμβαίνει καὶ περὶ τὸν τοῦ Ἑρμοῦ ἀστέρα· διὰ γὰρ τὸ μικρὸν ἐπαναβαίνειν πολλὰς ἐκλείπει φάσεις, ὥστε διὰ χρόνου φαίνεσθαι πολλοῦ. παραπλησίως δὲ τούτοις καὶ οἱ περὶ Ἰπποκράτην τὸν Χίον καὶ τὸν μαθητὴν αὐτοῦ [343a] Αἰσχύλον ἀπεφάναντο, πλὴν τὴν γε κόμην οὐκ ἐξ αὐτοῦ φασιν ἔχειν, ἀλλὰ πλανώμενον διὰ τὸν τόπον ἐνίοτε λαμβάνειν ἀνακλωμένης τῆς ἡμετέρας ὀψεως ἀπὸ τῆς ἐλκομένης ὑγρότητος ὑπ' αὐτοῦ πρὸς τὸν ἥλιον. διὰ δὲ τὸ ὑπολείπεσθαι βραδύτατα τῷ χρόνῳ διὰ πλείστου χρόνου φαίνεσθαι τῶν ἄλλων ἄστρον, ὥς ὅταν ἐκ ταυτοῦ φανῇ ὑπολελειμμένον ὅλον τὸν ἑαυτοῦ κύκλον· ὑπολείπεσθαι δ' αὐτὸν καὶ πρὸς ἄρκτον καὶ πρὸς νότον. ἐν μὲν οὖν τῷ μεταξὺ τόπῳ τῶν τροπικῶν οὐχ ἔλκειν τὸ ὕδωρ πρὸς ἑαυτὸν διὰ τὸ κεκαῦσθαι ὑπὸ τῆς τοῦ ἡλίου φορᾶς· πρὸς δὲ νότον ὅταν φέρεται, δαψίλειαν μὲν ἔχει τῆς τοιαύτης νοτίδος, ἀλλὰ διὰ τὸ μικρὸν εἶναι τὸ ὑπὲρ τῆς γῆς τμήμα τοῦ κύκλου, τὸ δὲ κάτω πολλαπλάσιον, οὐ δύνασθαι τὴν ὄψιν τῶν ἀνθρώπων φέρεσθαι κλωμένην πρὸς τὸν ἥλιον οὔτε τῷ τροπικῷ τόπῳ πλησιάζοντος οὔτ' ἐπὶ θεριναῖς τροπαῖς ὄντος τοῦ ἡλίου· διόπερ ἐν τούτοις μὲν τοῖς τόποις οὐ γίνεσθαι κομήτην αὐτόν· ὅταν δὲ πρὸς βορέαν ὑπολειφθῇς τύχη, λαμβάνειν κόμην διὰ τὸ μεγάλην εἶναι τὴν περιφέρειαν τὴν ἄνωθεν τοῦ ὀρίζοντος, τὸ δὲ κάτω μέρος τοῦ κύκλου μικρόν· ῥαδίως γὰρ τὴν ὄψιν τῶν ἀνθρώπων ἀφικνεῖσθαι τότε πρὸς τὸν ἥλιον. πᾶσιν δὲ τούτοις τὰ μὲν κοινῇ συμπίπτει λέγειν ἀδύνατα, τὰ δὲ χωρὶς. πρῶτον μὲν οὖν τοῖς λέγουσιν ὅτι τῶν

πλανωμένων ἐστὶν εἷς ἀστέρων ὁ κομήτης· οἱ γὰρ πλανώμενοι πάντες ἐν τῷ κύκλῳ ὑπολείπονται τῷ τῶν ζωδίων, κομῆται δὲ πολλοὶ ἑωραμένοι εἰσὶν ἔξω τοῦ κύκλου. εἴτα καὶ πλείους ἐνὸς ἅμα γεγένηνται πολλάκις. πρὸς δὲ τούτοις, εἰ διὰ τὴν ἀνάκλασιν τὴν κόμην ἴσχουσι, καθάπερ φησὶν Αἰσχύλος καὶ Ἱπποκράτης, ἔδει ποτὲ φαίνεσθαι καὶ ἄνευ κόμης τὸν ἀστέρα τοῦτον, ἐπειδὴ περ ὑπολείπεται μὲν καὶ εἰς ἄλλους τόπους, τὴν δὲ κόμην ἴσχει οὐ πανταχοῦ· νῦν δ' οὐδεὶς ὥπται παρὰ τοὺς πέντε ἀστέρας· οὗτοι δὲ πολλάκις ἅμα πάντες μετέωροι φαίνονται ὑπὲρ τοῦ ὀρίζοντος. καὶ φανερῶν δὲ ὄντων αὐτῶν ἀπάντων καὶ μὴ φαινομένων πάντων, ἀλλ' ἐνίων ὄντων πρὸς τῷ ἡλίῳ, οὐδὲν ἥττον κομῆται φαίνονται γιγνόμενοι πολλάκις. ἀλλὰ μὴν οὐδὲ τοῦτο ἀληθές, ὥς ἐν τῷ πρὸς ἄρκτον τόπῳ γίγνεται κομήτης μόνον, ἅμα καὶ τοῦ ἡλίου [343b] ὄντος περὶ θερινὰς τροπὰς· ὃ τε γὰρ μέγας κομήτης ὁ γενόμενος περὶ τὸν ἐν Ἀχαΐᾳ σεισμόν καὶ τὴν τοῦ κύματος ἔφοδον ἀπὸ δυσμῶν τῶν ἡσημερινῶν ἀνέσχεν, καὶ πρὸς νότον ἤδη πολλοὶ γεγόνασιν. ἐπὶ δ' ἄρχοντος Ἀθήνησιν Εὐκλέους τοῦ Μόλωνος ἐγένετο κομήτης ἀστήρ πρὸς ἄρκτον μηνὸς Γαμηλιῶνος περὶ τροπὰς ὄντος τοῦ ἡλίου χειμερινάς· καίτοι τοσοῦτον ἀνακλασθῆναι καὶ αὐτοὶ τῶν ἀδυνάτων εἶναί φασι. κοινὸν δὲ καὶ τούτοις καὶ τοῖς τὴν σύναψιν λέγουσιν πρῶτον μὲν ὅτι καὶ τῶν ἀπλανῶν λαμβάνουσι κόμην τινές. καὶ τοῦτ' οὐ μόνον Αἰγυπτίοις πιστεῦσαι δεῖ, καίτοι κάκεῖνοί φασιν, ἀλλὰ καὶ ἡμεῖς ἐφεωράκαμεν· τῶν γὰρ ἐν τῷ ἰσχύῳ τοῦ κυνὸς ἀστήρ τις ἔσχε κόμην, ἁμαυρὰν μέντοι· ἀτενίζουσιν μὲν γὰρ εἰς αὐτὸν ἁμυδρὸν ἐγίγνετο τὸ φέγγος, παραβλέπουσι δ' ἡρέμα τὴν ὄψιν πλέον. πρὸς δὲ τούτοις ἅπαντες οἱ καθ' ἡμᾶς ὠμμένοι ἄνευ δύσεως ἠφανίσθησαν ἐν τῷ ὑπὲρ τοῦ ὀρίζοντος τόπῳ ἀπομαρανθέντες κατὰ μικρὸν οὕτως, ὥστε μήτε ἐνὸς ἀστέρος ὑπολειφθῆναι σῶμα μήτε πλειόνων, ἐπεὶ καὶ ὁ μέγας ἀστήρ περὶ οὗ πρότερον ἐμνήσθημεν ἐφάνη μὲν χειμῶνος ἐν πάγοις καὶ αἰθρίαις ἀφ' ἐσπέρας, ἐπὶ Ἀστείου ἄρχοντος, καὶ τῇ μὲν πρώτῃ οὐκ ὤφθη ὡς προοδεδυκὼς τοῦ ἡλίου, τῇ δ' ὑστεραία ὤφθη· ὅσον ἐνδέχεται γὰρ ἐλάχιστον ὑπελείφθαι, καὶ εὐθὺς ἔδω· τὸ δὲ φέγγος ἀπέτεινε μέχρι τοῦ τρίτου μέρους τοῦ οὐρανοῦ οἷον ἄλμα· διὸ καὶ ἐκλήθη ὁδός. ἐπανῆλθε δὲ μέχρι τῆς ζώνης τοῦ Ὠρίωνος, καὶ ἐνταυθοὶ διελύθη. καίτοι Δημόκριτός γε προσπεφιλονείκηκεν τῇ δόξῃ τῇ αὐτοῦ· φησὶ γὰρ ὥφθαι διαλυομένων τῶν κομητῶν ἀστέρας τινάς. τοῦτο δὲ οὐχ ὅτε μὲν ἔδει γίνεσθαι ὅτε δὲ οὐ, ἀλλ' αἰεὶ πρὸς

δὲ τούτοις καὶ οἱ Αἰγύπτιοί φασι καὶ τῶν πλανήτων καὶ πρὸς αὐτοὺς καὶ πρὸς τοὺς ἀπλανεῖς γίνεσθαι συνόδους, καὶ αὐτοὶ ἐωράκαμεν τὸν ἀστέρα τὸν τοῦ Διὸς τῶν ἐν τοῖς διδύμοις συνελθόντα τινὶ ἤδη καὶ ἀφανίσαντα, ἀλλ' οὐ κομήτην γενόμενον. ἔτι δὲ καὶ ἐκ τοῦ λόγου φανερόν· οἱ γὰρ ἀστέρες κἂν εἰ μείζους καὶ ἐλάττους φαίνονται, ἀλλ' ὅμως ἀδιαίρετοί γε καθ' ἑαυτοὺς εἶναι δοκοῦσιν. ὥσπερ οὖν καὶ εἰ ἦσαν ἀδιαίρετοι, ἀψάμενοι οὐδὲν ἂν ἐποίησαν μέγεθος μεῖζον, οὕτως καὶ ἐπειδὴ οὐκ εἰσὶν μὲν φαίνονται δὲ [344a] ἀδιαίρετοι, καὶ συνελθόντες οὐδὲν φανοῦνται μείζους τὸ μέγεθος ὄντες. ὅτι μὲν οὖν αἱ λεγόμεναι περὶ αὐτῶν αἰτίαι ψευδεῖς οὔσαι τυγχάνουσιν, εἰ μὴ διὰ πλειόνων, ἀλλὰ καὶ διὰ τούτων ἱκανῶς δηλὸν ἐστίν.

ἐπεὶ δὲ περὶ τῶν ἀφανῶν τῇ αἰσθήσει νομίζομεν ἱκανῶς ἀποδεδείχθαι κατὰ τὸν λόγον, ἐὰν εἰς τὸ δυνατόν ἀναγάγωμεν, ἔκ τε τῶν νῦν φαινομένων ὑπολάβοι τις ἂν ὧδε περὶ τούτων μάλιστα συμβαίνειν· ὑπόκειται γὰρ ἡμῖν τοῦ κόσμου τοῦ περὶ τὴν γῆν, ὅσον ὑπὸ τὴν ἐγκύκλιόν ἐστιν φοράν, εἶναι τὸ πρῶτον μέρος ἀναθυμίαςιν ξηρὰν καὶ θερμὴν· αὕτη δὲ αὕτη τε καὶ τοῦ συνεχοῦς ὑπ' αὐτὴν ἀέρος ἐπὶ πολὺ συμπεριάγεται περὶ τὴν γῆν ὑπὸ τῆς φορᾶς καὶ τῆς κινήσεως τῆς κύκλω· φερομένη δὲ καὶ κινουμένη τοῦτον τὸν τρόπον, ἧ ἂν τύχη εὐκρατος οὔσα, πολλάκις ἐκπυροῦται· διὸ φάμεν γίνεσθαι καὶ τὰς τῶν σποράδων ἀστέρων διαδρομάς. ὅταν οὖν εἰς τὴν τοιαύτην πύκνωσιν ἐμπέσῃ διὰ τὴν ἄνωθεν κίνησιν ἀρχὴ πυρώδης, μήτε οὕτω πολλὴ λίαν ὥστε ταχὺ καὶ ἐπὶ πολὺ ἐκκαίειν, μήθ' οὕτως ἀσθενὴς ὥστε ἀποσβεσθῆναι ταχύ, ἀλλὰ πλείων καὶ ἐπὶ πολὺ, ἅμα δὲ κάτωθεν συμπίπτῃ ἀναβαίνειν εὐκρατον ἀναθυμίαςιν, ἀστὴρ τοῦτο γίγνεται κομήτης, ὅπως ἂν τὸ ἀναθυμιώμενον τύχη ἐσχηματισμένον· ἐὰν μὲν γὰρ πάντῃ ὁμοίως, κομήτης, ἐὰν δ' ἐπὶ μῆκος, καλεῖται πωγωνίας, ὥσπερ δὲ ἡ τοιαύτη φορὰ ἀστέρος φορὰ δοκεῖ εἶναι, οὕτως καὶ ἡ μονὴ ἢ ὁμοία ἀστέρος μονὴ δοκεῖ εἶναι· παραπλήσιον γὰρ τὸ γιγνόμενον οἶον εἴ τις εἰς ἀχύρων θημῶνα καὶ πληθος ὥσειε δαλὸν ἢ πυρὸς ἀρχὴν ἐμβάλοι μικράν· φαίνεται γὰρ ὁμοία καὶ ἡ τῶν ἀστέρων διαδρομὴ τούτῳ· ταχὺ γὰρ διὰ τὴν εὐφυῖαν τοῦ [344a.29] ὑπεκκαύματος διαδίδωσιν ἐπὶ μῆκος. εἰ δὲ τοῦτο μείνειε καὶ μὴ καταμαρανθεῖ διελθόν, ἧ μάλιστα ἐπύκνωσε τὸ ὑπέκκαυμα, γένοيت' ἂν ἀρχὴ τῆς φορᾶς ἢ τελευτὴ τῆς διαδρομῆς. τοιοῦτον ὁ κομήτης ἐστὶν ἀστὴρ, ὥσπερ διαδρομὴ ἀστέρος, ἔχων ἐν ἑαυτῷ πέρας καὶ ἀρχήν. ὅταν μὲν οὖν ἐν αὐτῷ τῷ κάτω τόπῳ ἢ ἀρχῇ

τῆς συστάσεως ἧ, καθ' ἑαυτὸν φαίνεται κομήτης· ὅταν δ' ὑπὸ τῶν ἄστρον τινός, ἢ τῶν ἀπλανῶν ἢ τῶν πλανήτων, ὑπὸ τῆς κινήσεως συνιστῇται ἢ [344b] ἀναθυμιάσις, τότε κομήτης γίνεταί τούτων τις· οὐ γὰρ πρὸς αὐτοῖς ἡ κόμη γίνεταί τοις ἄστροις, ἀλλ' ὥσπερ αἱ ἄλλω περὶ τὸν ἥλιον φαίνονται καὶ τὴν σελήνην παρακολουθοῦσαι, καίπερ μεθισταμένων, ὅταν οὕτως ἡ πεπυκνωμένος ὁ ἀήρ ὥστε τοῦτο γίνεσθαι τὸ πάθος ὑπὸ τὴν τοῦ ἡλίου πορείαν, οὕτω καὶ ἡ κόμη τοῖς ἄστροις οἷον ἄλλως ἐστίν· πλὴν ἡ μὲν γίνεταί δι' ἀνάκλασιν τοιαύτη τὴν χροάν, ἐκεῖ δ' ἐπ' αὐτῶν τὸ χρῶμα φαινόμενόν ἐστιν. ὅταν μὲν οὖν κατ' ἀστέρα γένηται ἡ τοιαύτη σύγκρισις, τὴν αὐτὴν ἀνάγκη φαίνεσθαι φορὰν κινούμενον τὸν κομήτην ἥπερ φέρεται ὁ ἀστήρ· ὅταν δὲ συστήῃ καθ' αὐτόν, τότε ὑπολειπόμενοι φαίνονται. τοιαύτη γὰρ ἡ φορὰ τοῦ κόσμου τοῦ περὶ τὴν γῆν. τοῦτο γὰρ μάλιστα μηνύει μὴ εἶναι ἀνάκλασιν τινα τὸν κομήτην, ὡς ἄλλω ἐν ὑπεκκαύματι καθαρῷ πρὸς αὐτὸν τὸν ἀστέρα γιγνομένην, καὶ μὴ ὡς λέγουσιν οἱ περὶ Ἰπποκράτην, πρὸς τὸν ἥλιον, ὅτι καὶ καθ' αὐτὸν γίνεταί κομήτης πολλάκις καὶ πλεονάκις ἢ περὶ τῶν ὠρισμένων τινὰς ἀστέρων. περὶ μὲν οὖν τῆς ἄλλω τὴν αἰτίαν ὕστερον ἐροῦμεν· περὶ δὲ τοῦ πυρώδη τὴν σύστασιν αὐτῶν εἶναι τεκμήριον χρὴ νομίζειν ὅτι σημαίνουνσι γιγνόμενοι πλείους πνεύματα καὶ αὐχμούς· δῆλον γὰρ ὅτι γίνονται διὰ τὸ πολλὴν εἶναι τὴν τοιαύτην ἔκκρισιν, ὥστε ξηρότερον ἀναγκαῖον εἶναι τὸν ἀέρα, καὶ διακρίνεσθαι καὶ διαλύεσθαι τὸ διατμίζον ὑγρὸν ὑπὸ τοῦ πλήθους τῆς θερμῆς ἀναθυμιάσεως, ὥστε μὴ συνίστασθαι ῥαδίως εἰς ὕδωρ. σαφέστερον δ' ἐροῦμεν καὶ περὶ τούτου τοῦ πάθους, ὅταν καὶ περὶ πνευμάτων λέγειν ἡ καιρός. ὅταν μὲν οὖν πυκνοὶ καὶ πλείους φαίνωνται, καθάπερ λέγομεν, ξηροὶ καὶ πνευματώδεις γίνονται οἱ ἐνιαυτοὶ ἐπιδήλως· ὅταν δὲ σπανιώτεροι καὶ ἀμαυρότεροι τὸ μέγεθος, ὁμοίως μὲν οὐ γίνεταί τὸ τοιοῦτον, οὐ μὴν ἀλλ' ὡς ἐπὶ τὸ πολὺ γίγνεταί τις ὑπερβολὴ πνεύματος ἢ κατὰ χρόνον ἢ κατὰ μέγεθος, ἐπεὶ καὶ ὅτε ὁ ἐν Αἰγὸς ποταμοῖς ἔπεσε λίθος ἐκ τοῦ ἀέρος, ὑπὸ πνεύματος ἀρθεὶς ἐξέπεσε μεθ' ἡμέραν· ἔτυχε δὲ καὶ τότε κομήτης ἀστήρ γενόμενος ἀφ' ἐσπέρας. καὶ περὶ τὸν μέγαν ἀστέρα τὸν κομήτην ξηρὸς ἦν ὁ χειμὼν καὶ βόρειος, καὶ τὸ κύμα δι' ἐναντίωσιν ἐγένετο πνευμάτων· ἐν μὲν γὰρ τῇ κόλπῳ [345a] βορέας κατεῖχεν, ἔξω δὲ νότος ἔπνευσε μέγας. ἔτι δ' ἐπ' ἄρχοντος Νικομάχου ἐγένετο ὀλίγας ἡμέρας κομήτης περὶ τὸν ἰσημερινὸν κύκλον, οὐκ ἀφ' ἐσπέρας ποιησάμενος

τὴν ἀνατολήν, ἐφ' ᾧ τὸ περὶ Κόρινθον πνεῦμα γενέσθαι συνέπεσεν. τοῦ δὲ μὴ γίγνεσθαι πολλοὺς μηδὲ πολλάκις κομήτας, καὶ μᾶλλον ἐκτὸς τῶν τροπικῶν ἢ ἐντός, αἴτιος ἢ τοῦ ἡλίου καὶ ἢ τῶν ἀστέρων κίνησις, οὐ μόνον ἐκκρίνουσα τὸ θερμόν, ἀλλὰ καὶ διακρίνουσα τὸ συνιστάμενον. μάλιστα δ' αἴτιον ὅτι τὸ πλεῖστον εἰς τὴν τοῦ γάλακτος ἀθροίζεται χώραν.

ὅπως δὲ καὶ διὰ τίν' αἰτίαν γίγνεται καὶ τί ἐστὶ τὸ γάλα, λέγωμεν ἤδη. προδιέλθωμεν δὲ καὶ περὶ τούτου τὰ παρὰ τῶν ἄλλων εἰρημένα πρῶτον. τῶν μὲν οὖν καλουμένων Πυθαγορείων φασὶ τινες ὁδὸν εἶναι ταύτην οἱ μὲν τῶν ἐκπεσόντων τινὸς ἀστέρων, κατὰ τὴν λεγομένην ἐπὶ Φαέθοντος φθοράν, οἱ δὲ τὸν ἥλιον τοῦτον τὸν κύκλον φέρεσθαι ποτὲ φασιν· οἷον οὖν διακεκαῦσθαι τὸν τόπον τοῦτον ἢ τι τοιοῦτον ἄλλο πεπονθέναι πάθος ὑπὸ τῆς φορᾶς αὐτῶν. ἄτοπον δὲ τὸ μὴ συννοεῖν ὅτι εἴπερ τοῦτ' ἦν τὸ αἴτιον, ἔδει καὶ τὸν τῶν ζωδίων κύκλον οὕτως ἔχειν, καὶ μᾶλλον ἢ τὸν τοῦ γάλακτος· ἅπαντα γὰρ ἐν αὐτῷ φέρεται τὰ πλανώμενα καὶ οὐχ ὁ ἥλιος μόνος. δῆλος δ' ἡμῖν ἅπας ὁ κύκλος· αἰεὶ γὰρ αὐτοῦ φανερόν ἡμικύκλιον τῆς νυκτός. ἀλλὰ πεπονθῶς οὐδὲν φαίνεται τοιοῦτον, πλὴν εἴ τι συνάπτει μόριον αὐτοῦ πρὸς τὸν τοῦ γάλακτος κύκλον. οἱ δὲ περὶ Ἀναξαγόραν καὶ Δημόκριτον φῶς εἶναι τὸ γάλα λέγουσιν ἄστρων τινῶν· τὸν γὰρ ἥλιον ὑπὸ τὴν γῆν φερόμενον οὐχ ὁρᾶν ἔνια τῶν ἄστρων. ὅσα μὲν οὖν περιορᾶται ὑπ' αὐτοῦ, τούτων μὲν οὐ φαίνεσθαι τὸ φῶς (κωλύεσθαι γὰρ ὑπὸ τῶν τοῦ ἡλίου ἀκτίνων)· ὅσοις δ' ἀντιφράττει ἡ γῆ ὥστε μὴ ὁρᾶσθαι ὑπὸ τοῦ ἡλίου, τὸ τούτων οἰκεῖον φῶς εἶναι φασὶ τὸ γάλα. φανερόν δ' ὅτι καὶ τοῦτ' ἀδύνατον· τὸ μὲν γὰρ γάλα αἰεὶ τὸ αὐτὸ ἐν τοῖς αὐτοῖς ἐστὶν ἄστροις (φαίνεται γὰρ μέγιστος ὢν κύκλος), ὑπὸ δὲ τοῦ ἡλίου αἰεὶ ἕτερα τὰ οὐχ ὁρώμενα διὰ τὸ μὴ ἐν ταῦτῳ μένειν τόπω. ἔδει οὖν μεθισταμένου τοῦ ἡλίου μεθίστασθαι καὶ τὸ γάλα· νῦν δὲ οὐ φαίνεται τοῦτο γιγνόμενον. πρὸς [345b] δὲ τούτοις, εἰ καθάπερ δείκνυται νῦν ἐν τοῖς περὶ ἀστρολογίαν θεωρήμασιν, τὸ τοῦ ἡλίου μέγεθος μεῖζόν ἐστιν ἢ τὸ τῆς γῆς καὶ τὸ διάστημα πολλαπλασιῶς μεῖζον τὸ τῶν ἄστρων πρὸς τὴν γῆν ἢ τὸ τοῦ ἡλίου, καθάπερ τὸ τοῦ ἡλίου πρὸς τὴν γῆν ἢ τὸ τῆς σελήνης, οὐκ ἂν πόρρω που τῆς γῆς ὁ κῶνος ὁ ἀπὸ τοῦ ἡλίου συμβάλλοι τὰς ἀκτῖνας, οὐδ' ἂν ἡ σκιὰ πρὸς τοῖς ἄστροις εἴη τῆς γῆς, ἢ καλουμένη νύξ· ἀλλ' ἀνάγκη πάντα τὸν ἥλιον τὰ ἄστρα περιορᾶν, καὶ μηδενὶ τὴν γῆν ἀντιφράττειν αὐτῶν. ἔτι δ' ἐστὶν τρίτη

τις υπόληψις περὶ αὐτοῦ· λέγουσιν γάρ τινες ἀνάκλασιν εἶναι τὸ γάλα τῆς ἡμετέρας ὄψεως πρὸς τὸν ἥλιον, ὥσπερ καὶ τὸν ἀστέρα τὸν κομήτην. ἀδύνατον δὲ καὶ τοῦτο· εἰ μὲν γὰρ τό τε ὀρῶν ἡρεμοίῃ καὶ τὸ ἑνοπτρον καὶ τὸ ὀρώμενον ἅπαν, ἐν τῷ αὐτῷ σημείῳ τοῦ ἐνόπτρου τὸ αὐτὸ φαίνοιτ' ἂν μέρος τῆς ἐμφάσεως· εἰ δὲ κινοῖτο τὸ ἑνοπτρον καὶ τὸ ὀρώμενον ἐν τῷ αὐτῷ μὲν ἀποστήματι πρὸς τὸ ὀρῶν καὶ ἡρεμοῦν, πρὸς ἄλληλα δὲ μήτε ἰσοταχῶς μηδ' ἐν τῷ αὐτῷ ἀεὶ διαστήματι, ἀδύνατον τὴν αὐτὴν ἔμφασιν ἐπὶ τοῦ αὐτοῦ εἶναι μέρους τοῦ ἐνόπτρου. τὰ δ' ἐν τῷ τοῦ γάλακτος κύκλῳ φερόμενα ἄστρα κινεῖται καὶ ὁ ἥλιος πρὸς ὃν ἡ ἀνάκλασις, μενόντων ἡμῶν, καὶ ὁμοίως καὶ ἴσον πρὸς ἡμᾶς ἀπέχοντα, αὐτῶν δ' οὐκ ἴσον· ὅτε μὲν γὰρ μέσων νυκτῶν ὁ δελφὶς ἐπιτέλλει, ὅτε δὲ ἔωθεν, τὰ δὲ μόρια τοῦ γάλακτος τὰ αὐτὰ μένει ἐν ἐκάστῳ. καίτοι οὐκ ἔδει, εἰ ἦν ἔμφασις, ἀλλὰ μὴ ἐν αὐτοῖς τι ἦν τοῦτο τὸ πάθος τοῖς τόποις. ἔτι δὲ νύκτωρ ἐν ὕδατι καὶ τοῖς τοιούτοις ἐνόπτροις τὸ μὲν γάλα ἐμφαίνεται θεωροῦσι, τὸ δὲ τὴν ὄψιν ἀνακλᾶσθαι πρὸς τὸν ἥλιον πῶς δυνατόν; ὅτι μὲν οὖν οὔτε ὁδὸς τῶν πλανήτων οὐδενὸς οὔτε φῶς ἐστὶ τῶν μὴ ὀρωμένων ἄστρον οὔτ' ἀνάκλασις, ἐκ τούτων φανερόν. σχεδὸν δὲ ταῦτ' ἐστὶν μόνον τὰ μέχρι τοῦ νῦν παραδεδομένα παρὰ τῶν ἄλλων. ἡμεῖς δὲ λέγωμεν ἀναλαμβάνοντες τὴν ὑποκειμένην ἀρχὴν ἡμῖν. εἴρηται γὰρ πρότερον ὅτι τὸ ἔσχατον τοῦ λεγομένου ἀέρος δύναμιν ἔχει πυρός, ὥστε τῇ κινήσει διακρινομένου τοῦ ἀέρος ἀποκρίνεσθαι τοιαύτην σύστασιν οἷαν καὶ τοὺς κομήτας ἀστέρας εἶναί φαμεν. τοιοῦτον δὲ δεῖ νοῆσαι γιγνόμενον ὅπερ ἐπ' ἐκείνων, ὅταν μὴ αὐτὴ [346a] καθ' αὐτὴν γένηται ἢ τοιαύτη ἔκκρισις, ἀλλ' ὑπὸ τινος τῶν [346a.2] ἄστρον ἢ τῶν ἐνδεδεμένων ἢ τῶν πλανωμένων· τότε γὰρ οὗτοι φαίνονται κομήται διὰ τὸ παρακολουθεῖν αὐτῶν τῇ φορᾷ ὥσπερ τῷ ἡλίῳ τὴν τοιαύτην σύγκρισιν, ἀφ' ἧς διὰ τὴν ἀνάκλασιν τὴν ἄλλω φαίνεσθαι φαμεν, ὅταν οὕτω τύχη κεκραμένος ὁ ἀήρ. ὁ δὲ καθ' ἓνα συμβαίνει τῶν ἀστέρων, τοῦτο δεῖ λαβεῖν γιγνόμενον περὶ ὅλον τὸν οὐρανὸν καὶ τὴν ἄνω φορὰν ἅπασαν· εὐλογον γάρ, εἴπερ ἡ ἐνὸς ἄστρου κίνησις, καὶ τὴν τῶν πάντων ποιεῖν τι τοιοῦτον καὶ ἐκριπίζειν ἀέρα [346a] τε καὶ διακρίνειν διὰ τὸ τοῦ κύκλου μέγεθος. <ἀνάγκη τοίνυν τῶν αὐτῶν μεγίστων κύκλων μάλιστα τὴν μέλλουσαν τοῦτο ποιήσιν φορὰν. . . χρή γὰρ τοῦτο, ἵνα πολλὰ κίνησις ἢ διὰ τὸ μέγεθος γιγνομένη καὶ πλείονα τὴν ἕξασιν ποιήσῃ.> [346a.10] καὶ πρὸς τούτοις ἔτι καθ' ὃν τόπον πυκνότατα καὶ πλεῖστα καὶ μέγιστα

τυγχάνουσιν ὄντα τῶν ἄστρον. ὁ μὲν οὖν τῶν ζωδίων διὰ τὴν τοῦ ἡλίου φορὰν καὶ τὴν τῶν πλανητῶν διαλύει τὴν τοιαύτην σύστασιν· διόπερ οἱ πολλοὶ τῶν κομητῶν ἐκτὸς γίνονται τῶν τροπικῶν. ἔτι δ' οὔτε περὶ τὸν ἥλιον οὔτε περὶ σελήνην γίγνεται κόμη· θάπτον γὰρ διακρίνουσιν ἢ ὥστε συστήναι τοιαύτην σύγκρισιν. οὗτος δ' ὁ κύκλος ἐν ᾧ τὸ γάλα φαίνεται τοῖς ὀρθῶσιν, ὃ τε μέγιστος ὢν τυγχάνει καὶ τῇ θέσει κείμενος οὕτως ὥστε πολὺ τοὺς τροπικοὺς ὑπερβάλλειν. πρὸς δὲ τούτοις ἄστρον ὁ τόπος πλήρης ἐστὶν τῶν μεγίστων καὶ λαμπροτάτων, καὶ ἔτι τῶν σποράδων καλουμένων (τοῦτο δ' ἐστὶν καὶ τοῖς ὄμμασιν ἰδεῖν φανερόν), ὥστε διὰ ταῦτα συνεχῶς καὶ ἀεὶ ταύτην πᾶσαν ἀθροίζεσθαι τὴν σύγκρισιν. σημεῖον δέ· καὶ γὰρ αὐτοῦ τοῦ κύκλου πλέον τὸ φῶς ἐστὶν ἐν θατέρῳ ἡμικυκλίῳ τῷ τὸ δίπλωμα ἔχοντι· ἐν τούτῳ γὰρ πλείω καὶ πυκνότερά ἐστιν ἄστρα ἢ ἐν θατέρῳ, ὡς οὐ δι' ἑτέραν τιν' αἰτίαν γιγνομένου τοῦ φέγγους ἢ διὰ τὴν τῶν ἄστρον φορὰν· εἰ γὰρ ἐν τε τῷ κύκλῳ τούτῳ γίγνεται ἐν ᾧ τὰ πλεῖστα κεῖται τῶν ἄστρον, καὶ αὐτοῦ τοῦ κύκλου ἐν ᾧ μᾶλλον φαίνεται καταπεπυκνωθῆαι καὶ μεγέθει καὶ πλήθει ἀστέρων, ταύτην εἰκὸς ὑπολαβεῖν οἰκειοτάτην αἰτίαν εἶναι τοῦ πάθους. θεωρεῖσθω δ' ὁ τε κύκλος καὶ τὰ ἐν αὐτῷ ἄστρα ἐκ τῆς ὑπογραφῆς. τοὺς δὲ σποράδας καλουμένους οὕτω μὲν εἰς τὴν σφαῖραν οὐκ ἔσται τάξι διὰ τὸ μηδεμίαν διὰ τέλους ἔχειν φανεράν ἕκαστον θέσιν, εἰς δὲ τὸν οὐρανὸν ἀναβλέπουσιν ἐστὶ δῆλον· ἐν μόνῳ γὰρ τούτῳ τῶν κύκλων τὰ μεταξὺ πλήρη τοιούτων ἀστέρων ἐστίν, ἐν δὲ τοῖς ἄλλοις διαλείπει [346b] φανερῶς. ὥστ' εἴπερ καὶ περὶ τοῦ φαίνεσθαι κομήτας ἀποδεχόμεθα τὴν αἰτίαν ὡς εἰρημένην μετρίως, καὶ περὶ τοῦ γάλακτος τὸν αὐτὸν ὑποληπτέον τρόπον ἔχειν· ὁ γὰρ ἐκεῖ περὶ ἓνα ἐστὶν πάθος ἢ κόμη, τοῦτο περὶ κύκλον τινὰ συμβαίνει γίνεσθαι τὸ αὐτό, καὶ ἔστιν τὸ γάλα, ὡς εἶπεῖν οἷον ὀριζόμενον, ἢ τοῦ μεγίστου διὰ τὴν ἔκκρισιν κύκλου κόμη. διὸ καθάπερ πρότερον εἶπομεν, οὐ πολλοὶ οὐδὲ πολλὰκις γίνονται κομήται, διὰ τὸ συνεχῶς ἀποκεκρίσθαι καὶ ἀποκρίνεσθαι καθ' ἑκάστην περίοδον εἰς τοῦτον τὸν τόπον αἰεὶ τὴν τοιαύτην σύστασιν. περὶ μὲν οὖν τῶν γιγνομένων ἐν τῷ περὶ τὴν γῆν κόσμῳ τῷ συνεχεῖ ταῖς φοραῖς εἴρηται, περὶ τε τῆς διαδρομῆς τῶν ἄστρον καὶ τῆς ἐκπιπραμένης φλογός, ἔτι δὲ περὶ τε κομητῶν καὶ τοῦ καλουμένου γάλακτος· σχεδὸν γάρ εἰσιν τοσαῦτα τὰ πάθη τὰ φαινόμενα περὶ τὸν τόπον τοῦτον.

περὶ δὲ τοῦ τῇ θέσει μὲν δευτέρου τόπου μετὰ τοῦτον, πρώτου δὲ

περὶ τὴν γῆν, λέγωμεν· οὗτος γὰρ κοινὸς ὕδατός τε τόπος καὶ ἀέρος καὶ τῶν συμβαινόντων περὶ τὴν ἄνω γενεσιν αὐτοῦ. ληπτέον δὲ καὶ τούτων τὰς ἀρχὰς καὶ τὰς αἰτίας πάντων ὁμοίως. ἡ μὲν οὖν ὥς κινούσα καὶ κυρία καὶ πρώτη τῶν ἀρχῶν ὁ κύκλος ἐστίν, ἐν ᾧ φανερώς ἡ τοῦ ἡλίου φορὰ διακρίνουσα καὶ συγκρίνουσα τῷ γίνεσθαι πλησίον ἢ πορρώτερον αἰτία τῆς γενέσεως καὶ τῆς φθορᾶς ἐστὶ. μενούσης δὲ τῆς γῆς, τὸ περὶ αὐτὴν ὑγρὸν ὑπὸ τῶν ἀκτίνων καὶ ὑπὸ τῆς ἄλλης τῆς ἄνωθεν θερμότητος ἀτμιδούμενον φέρεται ἄνω· τῆς δὲ θερμότητος ἀπολιπούσης τῆς ἀναγούσης αὐτό, καὶ τῆς μὲν διασκεδαννυμένης πρὸς τὸν ἄνω τόπον, τῆς δὲ καὶ σβεννυμένης διὰ τὸ μετεωρίζεσθαι πορρώτερον εἰς τὸν ὑπὲρ τῆς γῆς ἀέρα, συνίσταται πάλιν ἡ ἀτμὶς ψυχομένη διὰ τε τὴν ἀπόλειπιν τοῦ θερμοῦ καὶ τὸν τόπον, καὶ γίνεται ὕδωρ ἐξ ἀέρος· γενόμενον δὲ πάλιν φέρεται πρὸς τὴν γῆν. ἔστι δ' ἡ μὲν ἐξ ὕδατος ἀναθυμίασις ἀτμὶς, ἡ δ' ἐξ ἀέρος εἰς ὕδωρ νέφος· ὁμίχλη δὲ νεφέλης περίττωμα τῆς εἰς ὕδωρ συγκρίσεως. διὸ σημεῖον μᾶλλον ἐστὶν εὐδίας ἢ ὑδάτων· οἶον γάρ ἐστιν ἡ ὁμίχλη νεφέλη ἄγονος. γίνεται δὲ κύκλος οὗτος μιμούμενος τὸν τοῦ ἡλίου κύκλον· ἅμα γὰρ [347a] ἐκεῖνος εἰς τὰ πλάγια μεταβάλλει καὶ οὗτος ἄνω καὶ κάτω. δεῖ δὲ νοῆσαι τοῦτον ὥσπερ ποταμὸν ῥέοντα κύκλῳ ἄνω καὶ κάτω, κοινὸν ἀέρος καὶ ὕδατος· πλησίον μὲν γὰρ ὄντος τοῦ ἡλίου ὁ τῆς ἀτμίδος ἄνω ῥεῖ ποταμός, ἀφισταμένου δὲ ὁ τοῦ ὕδατος κάτω. καὶ τοῦτ' ἐνδεδεχὲς ἐθέλει γίνεσθαι κατὰ γε τὴν τάξιν· ὥστ' εἴπερ ἦνίπτοντο τὸν ὠκεανὸν οἱ πρότερον, τάχ' ἂν τοῦτον τὸν ποταμὸν λέγοιεν τὸν κύκλῳ ῥέοντα περὶ τὴν γῆν. ἀναγομένου δὲ τοῦ ὑγροῦ αἰεὶ διὰ τὴν τοῦ θερμοῦ δύναμιν καὶ πάλιν φερομένου κάτω διὰ τὴν ψύξιν πρὸς τὴν γῆν, οἰκειῶς τὰ ὀνόματα τοῖς πάθεσιν κεῖται καὶ τισιν διαφοραῖς αὐτῶν· ὅταν μὲν γὰρ κατὰ μικρὰ φέρηται, ψακάδες, ὅταν δὲ κατὰ μείζω μόρια, ὑετὸς καλεῖται.

ἐκ δὲ τοῦ καθ' ἡμέραν ἀτμίζοντος ὅσον ἂν μὴ μετεωρισθῇ δι' ὀλιγότητα τοῦ ἀνάγοντος αὐτὸ πυρὸς πρὸς τὸ ἀναγόμενον ὕδωρ, πάλιν καταφερόμενον ὅταν ψυχθῇ νύκτωρ, καλεῖται δρόσος καὶ πάχνη, πάχνη μὲν ὅταν ἡ ἀτμὶς παγῇ πρὶν εἰς ὕδωρ συγκριθῆναι πάλιν (γίνεται δὲ χειμῶνος, καὶ μᾶλλον ἐν τοῖς χειμερινοῖς τόποις), δρόσος δ' ὅταν συγκριθῇ εἰς ὕδωρ ἢ ἀτμὶς, καὶ μήθ' οὕτως ἔχη ἢ ἀλέα ὥστε ξηρᾶναι τὸ ἀναχθέν, μήθ' οὕτω ψῦχος ὥστε παγῆναι τὴν ἀτμίδα αὐτὴν διὰ τὸ ἢ τὸν τόπον ἀλεινότερον ἢ τὴν ὥραν εἶναι· γίνεται γὰρ μᾶλλον ἢ δρόσος ἐν εὐδία καὶ ἐν τοῖς εὐδαινοτέροις

τόποις, ἡ δὲ πάχνη, καθάπερ εἴρηται, τούναντίον· δῆλον γὰρ ὡς ἡ ἀτμίς θερμότερον ὕδατος (ἔχει γὰρ τὸ ἀνάγον ἐτι πῦρ), ὥστε πλείονος ψυχρότητος αὐτὴν πῆξαι. γίνεταί δ' ἄμφω αἰθρίας τε καὶ νηνεμίας· οὔτε γὰρ ἀναχθήσεται μὴ οὔσης αἰθρίας, οὔτε συστήναι δύναται ἂν ἀνέμου πνέοντος. σημεῖον δ' ὅτι γίνεταί ταῦτα διὰ τὸ μὴ πόρρω μετεωρίζεσθαι τὴν ἀτμίδα· ἐν γὰρ τοῖς ὄρεσιν οὐ γίνεταί πάχνη. αἰτία δὲ μία μὲν αὕτη, ὅτι ἀνάγεται ἐκ τῶν κοίλων καὶ ἐφύδρων τόπων, ὥστε καθάπερ φορτίον φέρουσα πλέον ἢ ἀνάγουσα θερμότης ἢ καθ' ἑαυτὴν οὐ δύναται μετεωρίζειν ἐπὶ πολὺν τόπον αὐτὸ τοῦ ὕψους, ἀλλ' ἐγγὺς ἀφήσιν· ἑτέρα δ' ὅτι καὶ ρεῖ μάλιστα ὁ ἀῆρ ῥέων ἐν τοῖς ὑψηλοῖς, ὅς διαλύει τὴν σύστασιν τὴν τοιαύτην. γίνεταί δ' ἡ δρόσος πανταχοῦ νοτίοις, οὐ βορείοις, πλὴν ἐν τῷ Πόντῳ. ἐκεῖ δὲ τούναντίον· βορείοις μὲν γὰρ γίνεταί, νοτίοις δ' οὐ [347b] γίνεταί. αἴτιον δ' ὁμοίως ὥσπερ ὅτι εὐδίας μὲν γίνεταί, χειμῶνος δ' οὔ· ὁ μὲν γὰρ νότος εὐδίαν ποιεῖ, ὁ δὲ βορέας χειμῶνα· ψυχρὸς γάρ, ὥστ' ἐκ τοῦ χειμῶνος τῆς ἀναθυμιάσεως σβέννυσιν τὴν θερμότητα. ἐν δὲ τῷ Πόντῳ ὁ μὲν νότος οὐχ οὕτως ποιεῖ εὐδίαν ὥστε γίνεσθαι ἀτμίδα, ὁ δὲ βορέας διὰ τὴν ψυχρότητα ἀντιπεριστάς τὸ θερμὸν [347b.7] ἀθροίζει, ὥστε πλέον ἀτμίζει μᾶλλον. πολλάκις δὲ τοῦτο καὶ ἐν τοῖς ἔξω τόποις ἰδεῖν γιγνόμενον ἔστιν· ἀτμίζει γὰρ τὰ φρέατα βορείοις μᾶλλον ἢ νοτίοις· ἀλλὰ τὰ μὲν βόρεια σβέννυσιν πρὶν συστήναι τι πλῆθος, ἐν δὲ τοῖς νοτίοις ἔαται ἀθροίζεσθαι ἢ ἀναθυμιάσις. αὐτὸ δὲ τὸ ὕδωρ οὐ πῆγνυται, καθάπερ ἐν τῷ περὶ τὰ νέφη τόπῳ. ἐκεῖθεν γὰρ τρία φοιτᾷ σώματα συνιστάμενα διὰ τὴν ψύξιν, ὕδωρ καὶ χιών καὶ χάλαζα. τούτων δὲ τὰ μὲν δύο ἀνάλογον καὶ διὰ τὰς αὐτὰς αἰτίας γίνεταί τοῖς κάτω, διαφέροντα τῷ μᾶλλον καὶ ἥττον καὶ πλῆθει καὶ ὀλιγότητι· χιών γὰρ καὶ πάχνη ταυτόν, καὶ ὑετὸς καὶ δρόσος, ἀλλὰ τὸ μὲν πολὺ τὸ δ' ὀλίγον. ὁ μὲν γὰρ ὑετὸς ἐκ πολλῆς ἀτμίδος γίνεταί ψυχομένης· τούτου δ' αἴτιον ὃ τε τόπος πολὺς καὶ ὁ χρόνος ὢν, ἐν ᾧ συλλέγεται καὶ ἐξ οὗ. τὸ δ' ὀλίγον ἢ δρόσος· ἐφήμερος γὰρ ἡ σύστασις καὶ ὁ τόπος μικρός· δηλοῖ τε ἢ τε γένεσις οὔσα ταχεῖα καὶ βραχὺ τὸ πλῆθος. ὁμοίως δὲ καὶ πάχνη καὶ χιών· ὅταν γὰρ παγῇ τὸ νέφος, χιών ἔστιν, ὅταν δ' ἡ ἀτμίς, πάχνη. διὸ ἢ ὥρας ἢ χώρας ἔστιν σημεῖον ψυχρᾶς· οὐ γὰρ ἂν ἐπήγνυτο ἐτι πολλῆς ἐνούσης θερμότητος, εἰ μὴ ἐπεκράτει τὸ ψυχρός· ἐν γὰρ τῷ νέφει ἐτι ἔνεστιν πολὺ θερμὸν τὸ ὑπόλοιπον τοῦ ἐξατμίσαντος ἐκ τῆς γῆς τὸ ὑγρὸν πυρός. χάλαζα δ'

ἐκεῖ μὲν γίγνεται, ἐν δὲ τῷ πλησίον τῆς γῆς ἀτμίζοντι τοῦτ' ἐκλείπει· καθάπερ γὰρ εἶπομεν, ὥς μὲν ἐκεῖ χιών, ἐνταῦθα γίγνεται πάχνη, ὥς δ' ἐκεῖ ὑέτός, ἐνταῦθα δρόσος· ὥς δ' ἐκεῖ χάλαζα, ἐνταῦθα οὐκ ἀνταποδίδωσι τὸ ὅμοιον. τὸ δ' αἴτιον εἰποῦσι περὶ χαλάζης ἔσται δῆλον.

δεῖ δὲ λαβεῖν ἅμα καὶ τὰ συμβαίνοντα περὶ τὴν γένεσιν αὐτῆς, τά τε μὴ πλανῶντα καὶ τὰ δοκοῦντ' εἶναι παράλογα. ἔστι μὲν γὰρ ἡ χάλαζα κρύσταλλος, πηγνυται δὲ τὸ ὕδωρ τοῦ χειμῶνος· αἱ δὲ χάλαζαι γίνονται ἕαρος μὲν [348a] καὶ μετοπώρου μάλιστα, εἴτα δὲ καὶ τῆς ὁπώρας, χειμῶνος δ' ὀλιγάκις, καὶ ὅταν ἦττον ἢ ψῦχος. καὶ ὅλως δὲ γίνονται χάλαζαι μὲν ἐν τοῖς εὐδιεινοτέροις τόποις, αἱ δὲ χιόνες ἐν τοῖς ψυχροτέροις. ἄτοπον δὲ καὶ τὸ πηγνυσθαι ὕδωρ ἐν τῷ ἄνω τόπῳ· οὔτε γὰρ παγῆναι δυνατὸν πρὶν γενέσθαι ὕδωρ, οὔτε τὸ ὕδωρ οὐδένα χρόνον οἶόν τε μένειν μετέωρον ὄν. ἀλλὰ μὴν οὐδ' ὥσπερ αἱ ψακάδες ἄνω μὲν ὀχοῦνται διὰ μικρότητα, ἐνδιατρίψασαι δ' ἐπὶ τοῦ ἀέρος, ὥσπερ καὶ ἐπὶ τοῦ ὕδατος γῆ καὶ χρυσὸς διὰ μικρομέρειαν πολλάκις ἐπιπλέουσιν, οὕτως ἐπὶ τοῦ ἀέρος τὸ ὕδωρ, συνελθόντων δὲ πολλῶν μικρῶν μεγάλαι καταφέρονται ψακάδες· τοῦτο γὰρ οὐκ ἐνδέχεται γενέσθαι ἐπὶ τῆς χαλάζης· οὐ γὰρ συμφύεται τὰ πεπηγότα ὥσπερ τὰ ὑγρά. δῆλον οὖν ὅτι ἄνω τοσοῦτον ὕδωρ ἔμεινεν· οὐ γὰρ ἂν ἐπάγῃ τοσοῦτον. τοῖς μὲν οὖν δοκεῖ τοῦ πάθους αἴτιον εἶναι τούτου καὶ τῆς γενέσεως, ὅταν ἀπωσθῇ τὸ νέφος εἰς τὸν ἄνω τόπον μᾶλλον ὄντα ψυχρὸν διὰ τὸ λήγειν ἐκεῖ τὰς ἀπὸ τῆς γῆς τῶν ἀκτίνων ἀνακλάσεις, ἐλθὼν δ' ἐκεῖ πηγνυσθαι τὸ ὕδωρ· διὸ καὶ θέρους μᾶλλον καὶ ἐν ταῖς ἀλεειναῖς χώραις γίνεσθαι τὰς χαλάζας, ὅτι ἐπὶ πλέον τὸ θερμὸν ἀνωθεὶ ἀπὸ τῆς γῆς τὰς νεφέλας. συμβαίνει δ' ἐν τοῖς σφόδρα ὑψηλοῖς ἥκιστα γίνεσθαι χάλαζαν· καίτοι ἔδει, ὥσπερ καὶ τὴν χιόνα ὀρῶμεν ἐπὶ τοῖς ὑψηλοῖς μάλιστα γιγνομένην. ἔτι δὲ πολλάκις ὥπται νέφη φερόμενα σὺν ψόφῳ πολλῷ παρ' αὐτὴν τὴν γῆν, ὥστε φοβερὸν εἶναι τοῖς ἀκούουσιν καὶ ὀρῶσιν ὥς ἐσομένου τινὸς μεῖζονος. ὅτε δὲ καὶ ἄνευ ψόφου τοιούτων ὀφθέντων νεφῶν χάλαζα γίγνεται πολλὴ καὶ τὸ μέγεθος ἄπιστος, καὶ τοῖς σχήμασιν οὐ στρογγύλῃ, διὰ τὸ μὴ πολὺν χρόνον γίνεσθαι τὴν φορὰν αὐτῆς ὥς πλησίον τῆς πῆξεως γενομένης τῆς γῆς, ἀλλ' οὐχ ὥσπερ ἐκεῖνοί φασιν. ἀλλὰ μὴν ἀναγκαῖον ὑπὸ τοῦ μάλιστ' αἰτίου τῆς πῆξεως μεγάλας γίνεσθαι χαλάζας· κρύσταλλος γὰρ ἡ χάλαζα, καὶ τοῦτο παντὶ δῆλον. μεγάλα δ' εἰσὶν αἱ τοῖς σχήμασιν μὴ

στρογγύλαι. τοῦτο δ' ἐστὶ σημεῖον τοῦ παγῆναι πλησίον τῆς γῆς· αἱ γὰρ φερόμεναι πόρρωθεν διὰ τὸ φέρεσθαι μακρὰν περιθραυόμεναι γίνονται τό τε σχῆμα περιφερεῖς καὶ τὸ μέγεθος ἐλάττους. ὅτι μὲν [348b] οὖν οὐ τῷ ἀπωθεῖσθαι εἰς τὸν ἄνω τόπον τὸν ψυχρὸν ἢ πῆξις συμβαίνει, δηλον· ἀλλ' ἐπειδὴ ὁρῶμεν ὅτι γίνεταί ἀντιπερίστασις τῷ θερμῷ καὶ ψυχρῷ ἀλλήλοις (διὸ ἐν τε ταῖς ἀλέαις ψυχρὰ τὰ κάτω τῆς γῆς καὶ ἀλεεῖνὰ ἐν τοῖς πάγοις), τοῦτο δεῖ νομίζειν καὶ ἐν τῷ ἄνω γίνεσθαι τόπω, ὥστ' ἐν ταῖς ἀλεεινότεραις ὥραις ἀντιπεριστάμενον εἶσω τὸ ψυχρὸν διὰ τὴν κύκλῳ θερμότητα ὅτε μὲν ταχὺ ὕδωρ ἐκ νέφους ποιεῖ· διὸ καὶ αἱ ψακάδες πολλὸν μείζους ἐν ταῖς ἀλεειναῖς γίνονται ἡμέραις ἢ ἐν τῷ χειμῶνι, καὶ ὕδατα λαβρότερα· λαβρότερα μὲν γὰρ λέγεται ὅταν ἄθροώτερα, ἄθροώτερα δὲ διὰ τὸ τάχος τῆς πυκνώσεως. (τοῦτο δὲ γίνεταί αὐτὸ τὸναντίον ἢ ὡς Ἀναξαγόρας λέγει· ὁ μὲν γὰρ ὅταν εἰς τὸν ψυχρὸν ἀέρα ἐπανεέλθῃ φησὶ τοῦτο πάσχειν, ἡμεῖς δ' ὅταν εἰς τὸν θερμὸν κατέλθῃ, καὶ μάλιστα ὅταν μάλιστα.) ὅταν δ' ἔτι μᾶλλον ἀντιπεριστῇ ἐντὸς τὸ ψυχρὸν ὑπὸ τοῦ ἕξω θερμοῦ, ὕδωρ ποιῆσαν ἔπηξεν καὶ γίνεταί χάλαζα. συμβαίνει δὲ τοῦτο ὅταν θᾶπτον ἦ ἢ πῆξις ἢ ἢ τοῦ ὕδατος φορὰ ἢ κάτω· εἰ γὰρ φέρεται μὲν ἐν τοσῷδε χρόνῳ, ἢ δὲ ψυχρότης σφοδρὰ οὕσα ἐν ἐλάττονι ἔπηξεν, οὐδὲν κωλύει μετέωρον παγῆναι, ἐὰν ἢ πῆξις ἐν ἐλάττονι γίγνηται χρόνῳ τῆς κάτω φορᾶς. καὶ ὅσῳ δ' ἂν ἐγγύτερον καὶ ἄθροωτέρα γένηται ἢ πῆξις, τά τε ὕδατα λαβρότερα γίνεταί καὶ αἱ ψακάδες καὶ αἱ χάλαζαι μείζους διὰ τὸ βραχὺν φέρεσθαι τόπον. καὶ οὐ πυκναὶ αἱ ψακάδες αἱ μεγάλαι πίπτουσιν διὰ τὴν αὐτὴν αἰτίαν. ἦττον δὲ τοῦ θέρους γίνεταί ἢ ἕαρος καὶ μετοπώρου, μᾶλλον μέντοι ἢ χειμῶνος, ὅτι ξηρότερος ὁ ἀήρ τοῦ θέρους· ἐν δὲ τῷ ἕαρι ἔτι ὑγρός, ἐν δὲ τῷ μετοπώρῳ ἤδη ὑγραίνεται. γίνονται δὲ ποτε, καθάπερ εἴρηται, καὶ τῆς ὁπώρας χάλαζαι διὰ τὴν αὐτὴν αἰτίαν. συμβάλλεται δ' ἔτι πρὸς τὴν ταχυτήτα τῆς πήξεως καὶ τὸ προτεθερμάνθαι τὸ ὕδωρ· θᾶπτον γὰρ ψύχεται. διὸ πολλοὶ ὅταν τὸ ὕδωρ ψύξαι ταχὺ βουληθῶσιν, εἰς τὸν ἥλιον τιθέασιν πρῶτον, καὶ οἱ περὶ τὸν Πόντον ὅταν ἐπὶ τοῦ κρυστάλλου σκηνοποιῶνται πρὸς τὰς τῶν ἰχθύων θήρας (θηρεύουσι γὰρ διακόπτοντες τὸν κρύσταλλον), ὕδωρ θερμὸν [349a] περιχέουσι τοῖς καλάμοις διὰ τὸ θᾶπτον πήγνυσθαι· χρῶνται γὰρ τῷ κρυστάλλῳ ὥσπερ τῷ μολύβδῳ, ἵν' ἡρεμῶσιν οἱ καλάμοι. θερμὸν δὲ γίνεταί ταχὺ τὸ συνιστάμενον ὕδωρ ἐν τε ταῖς χώραις καὶ ταῖς ὥραις ταῖς ἀλεειναῖς. γίνεταί δὲ καὶ περὶ τὴν Ἀραβίαν καὶ τὴν Αἰθιοπίαν

τοῦ θέρους τὰ ὕδατα καὶ οὐ τοῦ χειμῶνος, καὶ ταῦτα ῥαγδαῖα, καὶ τῆς αὐτῆς ἡμέρας πολλάκις, διὰ τὴν αὐτὴν αἰτίαν· ταχὺ γὰρ ψύχεται τῇ ἀντιπεριστάσει, ἢ γίγνεται διὰ τὸ ἀλεινὴν εἶναι τὴν χώραν ἰσχυρῶς. περὶ μὲν οὖν ὑετοῦ καὶ δρόσου καὶ νιφετοῦ καὶ ἀάχνης καὶ χαλάζης, διὰ τίν' αἰτίαν γίγνεται καὶ τίς ἡ φύσις αὐτῶν ἐστίν, εἰρήσθω τοσαῦτα.

περὶ δὲ ἀνέμων καὶ πάντων πνευμάτων, ἔτι δὲ ποταμῶν καὶ θαλάττης λέγωμεν, πρῶτον καὶ περὶ τούτων διαπορήσαντες πρὸς ἡμᾶς αὐτοὺς· ὥσπερ γὰρ καὶ περὶ ἄλλων, οὕτως καὶ περὶ τούτων οὐδὲν παρειλήφαμεν λεγόμενον τοιοῦτον ὃ μὴ καὶ ὁ τυχὼν εἴπειεν. εἰσὶ δὲ τινες οἳ φασὶ τὸν καλούμενον ἀέρα κινούμενον μὲν καὶ ῥέοντα ἄνεμον εἶναι, [349a.18] συνιστάμενον δὲ τὸν αὐτὸν τοῦτον πάλιν νέφος καὶ ὕδωρ, ὡς τῆς αὐτῆς φύσεως οὔσης ὕδατος καὶ πνεύματος, καὶ τὸν ἄνεμον εἶναι κίνησιν ἀέρος. διὸ καὶ τῶν σοφῶς βουλομένων λέγειν τινὲς ἓνα φασὶν ἄνεμον εἶναι πάντας τοὺς ἀνέμους, ὅτι συμπέπτωκε καὶ τὸν ἀέρα τὸν κινούμενον ἓνα καὶ τὸν αὐτὸν εἶναι πάντα, δοκεῖν δὲ διαφέρειν οὐδὲν διαφέροντα διὰ τοὺς τόπους ὅθεν ἂν τυγχάνῃ ῥέων ἐκάστοτε, παραπλησίως λέγοντες ὥσπερ ἂν εἴ τις οἶοιτο καὶ τοὺς ποταμοὺς πάντας ἓνα ποταμὸν εἶναι. διὸ βέλτιον οἱ πολλοὶ λέγουσιν ἄνευ ζητήσεως τῶν μετὰ ζητήσεως οὕτω λεγόντων· εἰ μὲν γὰρ ἐκ μιᾶς ἀρχῆς ἅπαντες ῥέουσι, κάκει τὰ πνεύματα τὸν αὐτὸν τρόπον, τάχα λέγοιεν ἂν τι οἱ λέγοντες οὕτως· εἰ δ' ὁμοίως ἐνταῦθα κάκει, δῆλον ὅτι τὸ κόμπευμα ἂν εἴη τοῦτο ψεῦδος, ἐπεὶ τοῦτό γε προσήκουσαν ἔχει σκέψιν, τί τ' ἐστὶν ὁ ἄνεμος, καὶ γίγνεται πῶς, καὶ τί τὸ κινοῦν, καὶ ἡ ἀρχὴ πόθεν αὐτῶν, καὶ πότερον ἄρ' ὥσπερ ἐξ ἀγγείου δεῖ λαβεῖν ῥέοντα τὸν ἄνεμον, καὶ μέχρι τούτου ῥεῖν ἕως ἂν κενωθῇ τὸ ἀγγεῖον, οἷον ἐξ ἀσκῶν ἀφιέμενον, [349b] ἢ καθάπερ καὶ οἱ γραφεῖς γράφουσιν, ἐξ αὐτῶν τὴν ἀρχὴν ἀφιέντας. ὁμοίως δὲ καὶ περὶ τῆς τῶν ποταμῶν γενέσεως δοκεῖ τισιν ἔχειν· τὸ γὰρ ἀναχθὲν ὑπὸ τοῦ ἡλίου ὕδωρ πάλιν ὑόμενον ἀθροισθὲν ὑπὸ γῆν ῥεῖν ἐκ κοιλίας μεγάλης, ἢ πάντας μιᾶς ἢ ἄλλον ἄλλης· καὶ οὐ γίνεσθαι ὕδωρ οὐδέν, ἀλλὰ τὸ συλλεχθὲν ἐκ τοῦ χειμῶνος εἰς τὰς τοιαύτας ὑποδοχάς, τοῦτο γίνεσθαι τὸ πλῆθος τὸ τῶν ποταμῶν. διὸ καὶ μείζους ἀεὶ τοῦ χειμῶνος ῥεῖν ἢ τοῦ θέρους, καὶ τοὺς μὲν ἀενάους εἶναι τοὺς δ' οὐκ ἀενάους· ὅσων μὲν γὰρ διὰ τὸ μέγεθος τῆς κοιλίας πολὺ τὸ συλλεγόμενον ὕδωρ ἐστίν, ὥστε διαρκεῖν καὶ μὴ προαναλίσκεσθαι πρὶν ἐπελθεῖν τὸ ὄμβριον ἐν τῷ

χειμῶνι πάλιν, τούτους μὲν ἀενάους εἶναι διὰ τέλους, ὅσοις δὲ ἐλάττους αἱ ὑποδοχαί, τούτους δὲ δι' ὀλιγότητα τοῦ ὕδατος φθάνειν ξηραينوμένους πρὶν ἐπελθεῖν τὸ ἐκ τοῦ οὐρανοῦ, κενουμένου τοῦ ἀγγείου. καίτοι φανερόν, εἴ τις βούλεται ποιήσας οἶον ὑποδοχὴν πρὸ ὀμμάτων τῷ καθ' ἡμέραν ὕδατι ῥέοντι συνεχῶς νοῆσαι τὸ πλήθος· ὑπερβάλλοι γὰρ ἂν τῷ μεγέθει τὸν τῆς γῆς ὄγκον ἢ οὐ πολὺ ἂν ἐλλείποι τὸ δεχόμενον πᾶν τὸ ῥέον ὕδωρ εἰς τὸν ἐνιαυτόν. ἀλλὰ δηλὸν ὅτι συμβαίνει μὲν καὶ πολλὰ τοιαῦτα πολλαχοῦ τῆς γῆς, οὐ μὴν ἄλλ' ἄτοπον εἴ τις μὴ νομίζει διὰ τὴν αὐτὴν αἰτίαν ὕδωρ ἐξ ἀέρος γίνεσθαι δι' ἣνπερ ὑπὲρ γῆς καὶ ἐν τῇ γῇ. ὥστ' εἴπερ κάκει διὰ ψυχρότητα συνίσταται ὁ ἀτμίζων ἀήρ εἰς ὕδωρ, καὶ ὑπὸ τῆς ἐν τῇ γῇ ψυχρότητος τὸ αὐτὸ τοῦτο δεῖ νομίζειν συμβαίνειν, καὶ γίνεσθαι μὴ μόνον τὸ ἀποκεκριμένον ὕδωρ ἐν αὐτῇ, καὶ τοῦτο ῥεῖν, ἀλλὰ καὶ γίνεσθαι συνεχῶς. ἔτι δὲ τοῦ μὴ γιγνομένου ἄλλ' ὑπάρχοντος ὕδατος καθ' ἡμέραν μὴ τοιαύτην εἶναι τὴν ἀρχὴν τῶν ποταμῶν, οἶον ὑπὸ γῆν λίμνας τινὰς ἀποκεκριμένας, καθάπερ ἔνιοι λέγουσιν, ἄλλ' ὁμοίως ὥσπερ καὶ ἐν τῷ ὑπὲρ γῆς τόπῳ μικραὶ συνιστάμεναι ῥανίδες, καὶ πάλιν αὗται ἐτέραις, τέλος μετὰ πλήθους καταβαίνει τὸ ὑόμενον ὕδωρ, οὕτω καὶ ἐν τῇ γῇ ἐκ μικρῶν συλλεμβέσθαι τὸ πρῶτον καὶ εἶναι οἶον πιδώσης εἰς ἐν τῆς γῆς τὰς ἀρχὰς τῶν ποταμῶν. δηλοῖ δ' αὐτὸ τὸ ἔργον· οἱ γὰρ τὰς ὑδραγωγίας [350a] ποιοῦντες ὑπονόμοις καὶ διώρυξι συνάγουσιν, ὥσπερ ἂν ιδιούσης τῆς γῆς ἀπὸ τῶν ὑψηλῶν. διὸ καὶ τὰ ῥεύματα τῶν ποταμῶν ἐκ τῶν ὀρῶν φαίνεται ῥέοντα, καὶ πλεῖστοι καὶ μέγιστοι ποταμοὶ ῥέουσιν ἐκ τῶν μεγίστων ὀρῶν. ὁμοίως δὲ καὶ αἱ κρῆναι αἱ πλεῖσται ὄρεσιν καὶ τόποις ὑψηλοῖς γειτνιῶσιν· ἐν δὲ τοῖς πεδίοις ἄνευ ποταμῶν ὀλίγαι γίνονται πάμπαν. οἱ γὰρ ὀρεινοὶ καὶ ὑψηλοὶ τόποι, οἶον σπόγγος πυκνὸς ἐπικρεμάμενοι, κατὰ μικρὰ μὲν πολλαχῇ δὲ διαπιδῶσι καὶ συλλεμβέουσιν τὸ ὕδωρ· δέχονται τε γὰρ τοῦ κατιόντος ὕδατος πολὺ πλῆθος (τί γὰρ διαφέρει κοίλην καὶ ὑπτίαν ἢ πρηνὴ τὴν περιφέρειαν εἶναι καὶ κυρτήν; ἀμφοτέρως γὰρ τὸν ἴσον ὄγκον περιλήψεται σώματος) καὶ τὴν ἀνιούσαν ἀτμίδα ψύχουσι καὶ συγκρίνουσι πάλιν εἰς ὕδωρ· διὸ, καθάπερ εἵπομεν, οἱ μέγιστοι τῶν ποταμῶν ἐκ τῶν μεγίστων φαίνονται ῥέοντες ὀρῶν. δηλὸν δ' ἐστὶ τοῦτο θεωμένοις τὰς τῆς γῆς περιόδους· ταύτας γὰρ ἐκ τοῦ πυνθάνεσθαι παρ' ἐκάστων οὕτως ἀνέγραψαν, ὅσων μὴ συμβέβηκεν αὐτόπτας γενέσθαι τοὺς λέγοντας. ἐν μὲν οὖν τῇ Ἀσίᾳ πλεῖστοι μὲν ἐκ τοῦ Παρνασσοῦ

καλουμένου φαίνονται ρέοντες ὄρους καὶ μέγιστοι ποταμοί, τοῦτο δ' ὁμολογεῖται πάντων εἶναι μέγιστον τὸ ὄρος τῶν πρὸς τὴν ἔω τὴν χειμερινήν· ὑπερβάντι γὰρ ἤδη τοῦτο φαίνεται ἢ ἔξω θάλαττα, ἥς τὸ πέρας οὐ δῆλον τοῖς ἐντεῦθεν. ἐκ μὲν οὖν τούτου ρέουσιν ἄλλοι τε ποταμοὶ καὶ ὁ Βάκτρος καὶ ὁ Χοάσπης καὶ ὁ Ἀράξης· τούτου δ' ὁ Τάναϊς ἀποσχίζεται μέρος ὧν εἰς τὴν Μαιῶτιν λίμνην. ρεῖ δὲ καὶ ὁ Ἰνδὸς ἐξ αὐτοῦ, πάντων τῶν ποταμῶν ρεῦμα πλεῖστον. ἐκ δὲ τοῦ Καυκάσου ἄλλοι τε ρέουσι πολλοὶ καὶ κατὰ πλῆθος καὶ κατὰ μέγεθος ὑπερβάλλοντες, καὶ ὁ Φᾶσις· ὁ δὲ Καύκασος μέγιστον ὄρος τῶν πρὸς τὴν ἔω τὴν θερινήν ἐστιν καὶ πλήθει καὶ ὕψει. σημεῖα δὲ τοῦ μὲν ὕψους ὅτι ὁράται καὶ ἀπὸ τῶν καλουμένων βαθέων καὶ εἰς τὴν λίμνην εἰσπλεόντων, ἔτι δ' ἡλιοῦται τῆς νυκτὸς αὐτοῦ τὰ ἄκρα μέχρι τοῦ τρίτου μέρους ἀπὸ τε τῆς ἔω καὶ πάλιν ἀπὸ τῆς ἐσπέρας· τοῦ δὲ πλῆθους ὅτι πολλὰς ἔχον ἑδρας, ἐν αἷς ἔθνη τε κατοικεῖ πολλὰ καὶ λίμνας εἶναι φασι μεγάλας, ἀλλ' ὅμως πάσας τὰς ἑδρας εἶναι φασι φανεράς μέχρι τῆς ἐσχάτης κορυφῆς. ἐκ δὲ [350b] τῆς Πυρήνης (τοῦτο δ' ἐστὶν ὄρος πρὸς δυσμὴν ἰσημερινήν ἐν τῇ Κελτικῇ) ρέουσιν ὃ τε Ἰστρος καὶ ὁ Ταρτησσός. οὗτος μὲν οὖν ἔξω στηλῶν, ὁ δ' Ἰστρος δι' ὅλης τῆς Εὐρώπης εἰς τὸν Εὐξείνιον πόντον. τῶν δ' ἄλλων ποταμῶν οἱ πλεῖστοι πρὸς ἄρκτον ἐκ τῶν ὀρῶν τῶν Ἀρκυνίων· ταῦτα δὲ καὶ ὕψει καὶ πλήθει μέγιστα περὶ τὸν τόπον τοῦτόν ἐστιν. ὑπ' αὐτὴν δὲ τὴν ἄρκτον ὑπὲρ τῆς ἐσχάτης Σκυθίας αἱ καλούμεναι Ῥῖπαι, περὶ ὧν τοῦ μεγέθους λίαν εἰσὶν οἱ λεγόμενοι λόγοι μυθώδεις· ρέουσι δ' οὖν οἱ πλεῖστοι καὶ μέγιστοι μετὰ τὸν Ἰστρον τῶν ἄλλων ποταμῶν ἐντεῦθεν, ὥς φασιν. ὁμοίως δὲ καὶ περὶ τὴν Λιβύην οἱ μὲν ἐκ τῶν Αἰθιοπικῶν ὀρῶν, ὃ τε Αἰγὼν καὶ ὁ Νύσης, οἱ δὲ μέγιστοι τῶν διωνομασμένων, ὃ τε Χρεμέτης καλούμενος, ὃς εἰς τὴν ἔξω ρεῖ θάλατταν, καὶ τοῦ Νείλου τὸ ρεῦμα τὸ πρῶτον, ἐκ τοῦ Ἀργυροῦ καλουμένου ὄρους. τῶν δὲ περὶ τὸν Ἑλληνικὸν τόπον ὁ μὲν Ἀχελῷος ἐκ Πίνδου, καὶ ὁ Ἰναχος ἐντεῦθεν, ὁ δὲ Στρυμὼν καὶ Νέσσος καὶ ὁ Ἐβρος ἅπαντες τρεῖς ὄντες ἐκ τοῦ Σκόμβρου· πολλὰ δὲ ρεύματα καὶ ἐκ τῆς Ῥοδόπης ἐστίν. ὁμοίως δὲ καὶ τοὺς ἄλλους ποταμοὺς εὖροι τις ἂν ρέοντας· ἀλλὰ μαρτυρίου χάριν τούτους εἵπομεν· ἐπεὶ καὶ ὅσοι αὐτῶν ρέουσιν ἐξ ἐλῶν, τὰ ἔλη ὑπὸ ὀρη κεῖσθαι συμβαίνει πάντα σχεδὸν ἢ τόπους ὑψηλοὺς ἐκ προσαγωγῆς. ὅτι μὲν οὖν οὐ δεῖ νομίζειν οὕτω γίνεσθαι τὰς ἀρχὰς τῶν ποταμῶν ὥς ἐξ ἀφωρισμένων κοιλιῶν, φανερόν· οὔτε γὰρ ἂν ὁ τόπος ἱκανὸς

γὰρ εἰς τὸ μέσον εἰσρέουσιν ἄφ' οὗπερ ἐκρέουσιν, οὐδὲν μᾶλλον
ῥευσοῦνται κάτωθεν ἢ ἄνωθεν, ἀλλ' ἐφ' ὁπότερ' ἂν ῥέψῃ κυμαίνων
ὁ Τάρταρος. καίτοι τούτου συμβαίνοντος γένοιτ' ἂν τὸ λεγόμενον
ἄνω ποταμῶν· ὅπερ ἀδύνατον. ἔτι τὸ γινόμενον ὕδωρ καὶ τὸ πάλιν
ἀναγόμενον πόθεν ἔσται; τοῦτο γὰρ ἐξαίρειν ὅλον ἀναγκαῖον, εἴπερ
ἀεὶ σφίζεται τὸ ἴσον· ὅσον γὰρ ἔξω ῥεῖ, πάλιν ῥεῖ πρὸς τὴν ἀρχήν.
καίτοι πάντες οἱ ποταμοὶ φαίνονται τελευτῶντες εἰς τὴν θάλατταν,
ὅσοι μὴ εἰς ἀλλήλους· εἰς δὲ γῆν οὐδεῖς, ἀλλὰ κἂν ἀφανισθῇ, πάλιν

διὰ κοίλης· πολλῶν γὰρ δέχονται ῥεύματα ποταμῶν, ὑποτεμνόμενοι
τῷ τόπῳ καὶ τῷ μήκει τὰς ὁδοὺς· διόπερ ὁ τ' Ἴστρος καὶ ὁ Νεῖλος
μέγιστοι τῶν ποταμῶν εἰσιν τῶν εἰς τήνδε τὴν θάλατταν ἐξιόντων.
καὶ περὶ τῶν πηγῶν ἄλλοι λέγουσιν ἐκάστου τῶν ποταμῶν ἄλλας

ὕδωρ ὑπὸ τοῦ ἡλίου ἥξει πάλιν, ἢ εἴπερ τοῦτ' ἔσται, ἀναγκαῖον ἦτοι

ἀεὶ ἢ μέχρι οὐ̣περ ἂν ἦ τοῦτο ὑπολείπεσθαι τὴν θάλατταν, καὶ πάλιν ἀναχθῆναι ἐκεῖνο πρότερον δεήσει τὸ πότιμον. ὥστε οὐδέποτε ξηρανεῖται· πάλιν γὰρ ἐκεῖνο φθήσεται καταβὰν εἰς τὴν αὐτὴν τὸ προανελθόν· διαφέρει γὰρ οὐδὲν ἅπαξ τοῦτ' εἰπεῖν ἢ πολλάκις. εἰ μὲν οὖν τὸν ἥλιον παύσει τις τῆς φορᾶς, τί ἔσται τὸ ξηραῖνον; εἰ δ' ἑάσει εἶναι τὴν περιφορὰν, ἀεὶ πλησιάζων τὸ πότιμον, καθάπερ εἵπομεν, ἀνάξει, ἀφήσει δὲ πάλιν ἀναχωρῶν. ἔλαβον δὲ ταύτην τὴν διάνοιαν κατὰ τῆς θαλάττης ἐκ τοῦ πολλοὺς τόπους φαίνεσθαι ξηροτέρους νῦν ἢ πρότερον· περὶ οὗ τὴν αἰτίαν εἵπομεν, ὅτι τῶν κατὰ τινα χρόνον ὑπερβολῶν γιγνομένων ὕδατος τοῦτ' ἔστιν τὸ πάθος, ἀλλ' οὐ διὰ τὴν τοῦ παντὸς γένεσιν καὶ τῶν μορίων· καὶ πάλιν γ' ἔσται τοῦναντίον· καὶ [357a] ὅταν γένηται, ξηρανεῖται πάλιν· καὶ τοῦθ' οὕτως κατὰ κύκλον ἀναγκαῖον ἀεὶ βαδίζειν· μᾶλλον γὰρ οὕτως εὐλογον ὑπολαβεῖν ἢ διὰ ταῦτα τὸν οὐρανὸν ὅλον μεταβάλλειν. ἀλλὰ περὶ μὲν τούτων πλείω τῆς ἀξίας ἐνδιατέτριφεν ὁ λόγος· περὶ δὲ τῆς ἀλμυρότητος, τοῖς μὲν ἅπαξ γεννήσασι καὶ ὅλως αὐτὴν γεννῶσιν ἀδύνατόν ἐστιν ἀλμυρὰν ποιεῖν. εἰ γὰρ παντὸς τοῦ ὕγρου τοῦ περὶ τὴν γῆν ὄντος καὶ ἀναχθέντος ὑπὸ τοῦ ἡλίου τὸ ὑπολειφθὲν ἐγένετο θάλαττα, εἴτ' ἐνυπῆρχε τοσοῦτος χυμὸς ἐν τῷ πολλῷ ὕδατι καὶ γλυκεῖ διὰ τὸ συμμειχθῆναι τινα γῆν τοιαύτην, οὐδὲν ἦττον ἐλθόντος πάλιν τοῦ διατμίσαντος ὕδατος ἀνάγκη, ἴσου γ' ὄντος τοῦ πλήθους, καὶ τὸ πρῶτον· ἢ εἰ μὴδὲ τὸ πρῶτον, μὴδ' ὕστερον ἀλμυρὰν αὐτὴν εἶναι. εἰ δὲ καὶ τὸ πρῶτον εὐθὺς ἦν, λεκτέον τίς ἡ αἰτία, καὶ ἅμα διὰ τί οὐκ εἰ καὶ τότε ἀνήχθη καὶ νῦν πάσχει ταυτό. ἀλλὰ μὴν καὶ ὅσοι τὴν γῆν αἰτιῶνται τῆς ἀλμυρότητος ἐμμειγνυμένην (ἔχειν γὰρ φασὶ πολλοὺς χυμοὺς αὐτὴν, ὥσθ' ὑπὸ τῶν ποταμῶν συγκαταφερομένην διὰ τὴν μεῖζιν ποιεῖν ἀλμυρὰν), ἄτοπον τὸ μὴ καὶ τοὺς ποταμοὺς ἀλμυροὺς εἶναι· πῶς γὰρ δυνατόν ἐν πολλῷ μὲν πλήθει ὕδατος ἐπίδηλον οὕτως ποιεῖν τὴν μεῖζιν τῆς τοιαύτης γῆς, ἐν ἐκάστῳ δὲ μὴ; δῆλον γὰρ ὅτι ἡ θάλαττα ἐστὶν ἅπαν τὸ ποτάμιον ὕδωρ· οὐδενὶ γὰρ διέφερεν ἀλλ' ἢ τῷ ἀλμυρὰ εἶναι τῶν ποταμῶν· τοῦτο δ' ἐν ἐκείνοις ἔρχεται εἰς τὸν τόπον εἰς ὃν ἀθρόοι ρέουσιν. ὁμοίως δὲ γελοῖον κἂν εἴ τις εἰπὼν ἰδρωτὰ τῆς γῆς εἶναι τὴν θάλατταν οἶεται τι σαφὲς εἰρηκέναι, καθάπερ Ἐμπεδοκλῆς· πρὸς ποιήσιν μὲν γὰρ οὕτως εἰπὼν ἴσως εἴρηκεν ἱκανῶς (ἢ γὰρ μεταφορὰ ποιητικόν), πρὸς δὲ τὸ γνῶναι τὴν φύσιν οὐχ ἱκανῶς· οὐδὲ γὰρ ἐνταῦθα δῆλον πῶς ἐκ γλυκέος τοῦ πόματος ἀλμυρὸς γίγνεται ὁ ἰδρῶς, πότερον ἀπελθόντος τινὸς μόνον

οἶον τοῦ γλυκυτάτου, ἢ συμμειχθέντος τινός, καθάπερ ἐν τοῖς διὰ τῆς τέφρας ἡθουμένοις ὕδασιν. φαίνεται δὲ τὸ αἷτιον ταῦτό καὶ περὶ τὸ εἰς τὴν κύστιν περίττωμα συλλεγόμενον· καὶ γὰρ ἐκεῖνο πικρὸν καὶ ἄλμυρόν γίγνεται τοῦ πινομένου καὶ τοῦ ἐν τῇ τροφῇ ὑγροῦ [357b] γλυκέος ὄντος. εἰ δὴ ὥσπερ τὸ διὰ τῆς κονίας ἡθούμενον ὕδωρ γίγνεται πικρόν, καὶ ταῦτα, τῷ μὲν οὖρῳ συγκαταφερομένης τοιαύτης τινὸς δυνάμεως οἷα καὶ φαίνεται ὑφισταμένη ἐν τοῖς ἀγγείοις ἄλμυρίς, τῷ δ' ἰδρῶτι συνεκκρινομένης ἐκ τῶν σαρκῶν, οἶον καταπλύνοντος τὸ τοιοῦτον ἐκ τοῦ σώματος τοῦ ἐξιόντος ὑγροῦ, δῆλον ὅτι καὶ τῇ θαλάττῃ τὸ ἐκ τῆς γῆς συγκαταμισγόμενον τῷ ὑγρῷ αἷτιον τῆς ἄλμυρότητος. ἐν μὲν οὖν τῷ σώματι γίγνεται τὸ τοιοῦτον ἢ τῆς τροφῆς ὑπόστασις διὰ τὴν ἀπεψίαν· ἐν δὲ τῇ γῇ τίνα τρόπον ὑπῆρχε, λεκτέον. ὅλως δὲ πῶς οἶόν τε τοσοῦτον ὕδατος πλήθος [357b.11] ξηρανομένης καὶ θερμαινομένης ἐκκριθῆναι; πολλοστὸν γὰρ δεῖ μέρος αὐτὸ τοῦ λειφθέντος εἶναι ἐν τῇ γῇ. ἔτι διὰ τί οὐ καὶ νῦν ὅταν ξηρανομένη τύχη γῆ, εἴτε πλείων εἴτε ἐλάττων, ἰδίει; (ἢ γὰρ ὑγρότης καὶ ὁ ἰδρῶς γίγνεται πικρός.) εἴπερ γὰρ καὶ τότε, καὶ νῦν ἐχρῆν. οὐ φαίνεται δὲ τοῦτο συμβαῖνον, ἀλλὰ ξηρὰ μὲν οὔσα ὑγραίνεται, ὑγρὰ δ' οὔσα οὐδὲν πάσχει τοιοῦτον. πῶς οὖν οἶόν τε περὶ τὴν πρώτην γένεσιν, ὑγρὰς οὔσης τῆς γῆς, ἰδίειν ξηρανομένην; ἀλλὰ μᾶλλον εἰκός, ὥσπερ φασὶ τινες, ἀπελθόντος τοῦ πλείστου καὶ μετεωρισθέντος τοῦ ὑγροῦ διὰ τὸν ἥλιον, τὸ λειφθὲν εἶναι θάλατταν· ὑγρὰν δ' οὔσαν ἰδίειν ἀδύνατον. τὰ μὲν οὖν λεγόμενα τῆς ἄλμυρότητος αἷτια διαφεύγειν φαίνεται τὸν λόγον· ἡμεῖς δὲ λέγωμεν ἀρχὴν λαβόντες τὴν αὐτὴν ἣν καὶ πρότερον· ἐπειδὴ γὰρ κεῖται διπλῆν εἶναι τὴν ἀναθυμίασιν, τὴν μὲν ὑγρὰν τὴν δὲ ξηρὰν, δῆλον ὅτι ταύτην οἰητέον ἀρχὴν εἶναι τῶν τοιούτων. καὶ δὴ καὶ περὶ οὗ ἀπορῆσαι πρότερον ἀναγκαῖον, πότερον καὶ ἡ θάλαττα ἀεὶ διαμένει τῶν αὐτῶν οὔσα μορίων ἀριθμῷ ἢ τῷ εἶδει καὶ τῷ ποσῷ μεταβαλλόντων ἀεὶ τῶν μερῶν, καθάπερ ἀῆρ καὶ τὸ πότιμον ὕδωρ καὶ πῦρ (ἀεὶ γὰρ ἄλλο καὶ ἄλλο γίγνεται τούτων ἕκαστον, τὸ δ' εἶδος τοῦ πλήθους ἐκάστου τούτων μένει, καθάπερ τὸ τῶν ρεόντων ὑδάτων καὶ τὸ τῆς φλογὸς ρεῦμα)· φανερόν δὴ καὶ τοῦτο καὶ πιθανόν, ὥς ἀδύνατον μὴ τὸν αὐτὸν εἶναι περὶ πάντων τούτων λόγον, καὶ διαφέρειν ταχυτῆτι καὶ [358a] βραδυτῆτι τῆς μεταβολῆς, ἐπὶ πάντων τε φθορὰν εἶναι καὶ γένεσιν, ταύτην μέντοι τεταγμένως συμβαίνειν πᾶσιν αὐτοῖς. τούτων δ' οὕτως ἐχόντων, πειρατέον

ἀποδοῦναι τὴν αἰτίαν καὶ περὶ τῆς ἀλμυρότητος. φανερόν δὴ διὰ πολλῶν σημείων ὅτι γίγνεται τοιοῦτος ὁ χυμὸς διὰ σύμμειξιν τινος. ἐν τε γὰρ τοῖς σώμασι τὸ ἀπεπτότατον ἀλμυρὸν καὶ πικρόν, ὥσπερ καὶ πρότερον εἶπομεν· ἀπεπτότατον γὰρ τὸ περίττωμα τῆς ὑγρᾶς τροφῆς· τοιαύτη δὲ πᾶσα μὲν ἢ ὑπόστασις, μάλιστα δὲ ἢ εἰς τὴν κύστιν (σημεῖον δ' ὅτι λεπτοτάτη ἐστίν· τὰ δὲ πεττώμενα πάντα συνίστασθαι πέφυκεν)· ἔπειτα ἰδρώς [αἰεῖ]· ἐν οἷς τὸ αὐτὸ σῶμα συνεκκρίνεται, ὃ ποιεῖ τὸν χυμὸν τοῦτον. ὁμοίως δὲ καὶ ἐν τοῖς καομένοις· οὗ γὰρ ἂν μὴ κρατήσῃ τὸ θερμόν, ἐν μὲν τοῖς σώμασι γίγνεται περίττωσις, ἐν δὲ τοῖς καομένοις τέφρα. διὸ καὶ τὴν θάλατταν τινες ἐκ κατακεκαυμένης φασὶ γενέσθαι γῆς. ὃ οὕτω μὲν εἰπεῖν ἄτοπον, τὸ μέντοι ἐκ τοιαύτης ἀληθείας· ὥσπερ γὰρ καὶ ἐν τοῖς εἰρημένοις, οὕτω καὶ ἐν τῷ ὄλῳ ἐκ τε τῶν φυομένων καὶ γιγνομένων κατὰ φύσιν αἰεῖ δεῖ νοεῖν, ὥσπερ ἐκ πεπυρωμένων τὸ λειπόμενον τοιαύτην εἶναι γῆν, καὶ δὴ καὶ τὴν ἐν τῇ ξηρᾷ ἀναθυμίασιν πᾶσαν· αὕτη γὰρ καὶ παρέχεται τὸ πολὺ τοῦτο πλῆθος. μεμειγμένης δ' οὔσης, ὥσπερ εἶπομεν, τῆς τε ἀτμιδώδους ἀναθυμιάσεως καὶ τῆς ξηρᾶς, ὅταν συνιστῇται εἰς νέφη καὶ ὕδωρ, ἀναγκαῖον ἐμπεριλαμβάνεσθαι τι πλῆθος αἰεῖ ταύτης τῆς δυνάμεως, καὶ συγκαταφέρεσθαι πάλιν ὕοντος, καὶ τοῦτ' αἰεῖ γίνεσθαι κατὰ τινὰ τάξιν, ὡς ἐνδέχεται μετέχειν τὰ ἐνταῦθα τάξεως. ὅθεν μὲν οὖν ἡ γένεσις ἔνεστιν τοῦ ἀλμυροῦ ἐν τῷ ὕδατι, εἴρηται. καὶ διὰ τοῦτο τά τε νότια ὕδατα πλατύτερα καὶ τὰ πρῶτα τῶν μετοπωρινῶν· ὃ τε γὰρ νότος καὶ τῷ μεγέθει καὶ τῷ πνεύματι ἀλειυνότατος ἄνεμός ἐστιν, καὶ πνεῖ ἀπὸ τόπων ξηρῶν καὶ θερμῶν, ὥστε μετ' ὀλίγης ἀτμιδος. διὸ καὶ θερμός ἐστιν· εἰ γὰρ καὶ μὴ τοιοῦτος, ἀλλ' ὅθεν ἄρχεται πνεῖν ψυχρός, οὐδὲν ἦττον προῖων διὰ τὸ συμπεριλαμβάνειν πολλὴν ἀναθυμίασιν ξηρὰν ἐκ τῶν σύνεγγυς τόπων θερμός ἐστιν· ὁ δὲ βορέας ἅτε ἀφ' ὑγρῶν τόπων ἀτμιδώδης· διὸ [358b] ψυχρός· τῷ δ' ἀπωθεῖν αἶθριος ἐνταῦθα, ἐν δὲ τοῖς ἐναντίοις ὑδατώδης. ὁμοίως δὲ καὶ ὁ νότος αἶθριος τοῖς περὶ τὴν Λιβύην. πολὺ οὖν ἐν τῷ καταφερομένῳ ὕδατι συμβάλλεται τοιοῦτον, καὶ τοῦ μετοπώρου πλατέα τὰ ὕδατα· ἀνάγκη γὰρ τὰ βαρύτερα πρῶτα φέρεσθαι. ὥστ' ἐν ὅσοις ἔνεστι τῆς τοιαύτης γῆς πλῆθος, ῥέπει τάχιστα κάτω ταῦτα. καὶ θερμὴ γε ἡ θάλαττα διὰ τοῦτό ἐστιν· πάντα γὰρ ὅσα πεπύρωται, ἔχει δυνάμει θερμότητα ἐν αὐτοῖς. ὁρᾷν δ' ἔξεστι καὶ τὴν κονίαν καὶ τὴν τέφραν καὶ τὴν ὑπόστασιν τῶν ζώων καὶ τὴν ξηρὰν καὶ τὴν ὑγρὰν·

καὶ τῶν θερμοτάτων γε κατὰ τὴν κοιλίαν ζῶων συμβαίνει
θερμοτάτην εἶναι τὴν ὑπόστασιν. γίγνεται μὲν οὖν αἰεὶ τε πλατυτέρα
διὰ ταύτην τὴν αἰτίαν, ἀνάγεται δ' αἰεὶ τι μέρος αὐτῆς μετὰ τοῦ
γλυκέος (ἄλλ' ἔλαττον τοσοῦτω ὅσῳ καὶ ἐν τῷ ὑομένῳ τὸ ἄλμυρον
καὶ πλατὺ τοῦ γλυκέος ἔλαττον· διόπερ ἰσάζει ὡς ἐπίπαν εἰπεῖν). ὅτι
δὲ γίγνεται ἀτμίζουσα πότιμος καὶ οὐκ εἰς θάλατταν συγκρίνεται τὸ
ἀτμίζον, ὅταν συνιστῇται πάλιν, πεπειραμένοι λέγωμεν. πάσχει δὲ
καὶ τᾶλλα ταυτό· καὶ γὰρ οἶνος καὶ πάντες οἱ χυμοί, ὅσοι ἂν
ἀτμίσαντες πάλιν εἰς ὑγρὸν συστῶσιν, ὕδωρ γίνονται· πάθη γὰρ
τᾶλλα διὰ τινὰ σύμμιξιν τοῦ ὕδατός ἐστιν, καὶ οἶον ἂν τι ἢ τὸ
συμμιχθέν, τοιοῦτον ποιεῖ τὸν χυμόν. ἀλλὰ περὶ μὲν τούτων ἐν
ἄλλοις καιροῖς οἰκειότεροις ποιητέον τὴν σκέψιν. νῦν δὲ τοσοῦτον
λέγωμεν, ὅτι τῆς θαλάττης ὑπαρχούσης αἰεὶ τι ἀνάγεται καὶ γίγνεται
πότιμον καὶ ἄνωθεν ἐν τῷ ὑομένῳ κατέρχεται ἄλλο γεγεννημένον, οὐ
τὸ ἀναχθέν· καὶ διὰ βάρους ὑφίσταται τῷ ποτίμῳ. καὶ διὰ τοῦτο οὐτ'
ἐπιλείπει, ὥσπερ οἱ ποταμοί, ἀλλ' ἢ τοῖς τόποις (τοῦτο δ' ἐπ'
ἀμφοτέρων ἀνάγκη συμβαίνειν ὁμοίως), οὔτε αἰεὶ τὰ αὐτὰ μέρη
διαμένει, οὔτε γῆς οὔτε θαλάττης, ἀλλ' ἢ μόνον ὁ πᾶς ὄγκος. καὶ γὰρ
καὶ περὶ γῆς ὁμοίως δεῖ ὑπολαβεῖν· τὸ μὲν γὰρ ἀνέρχεται, τὸ δὲ πάλιν
συγκαταβαίνει, καὶ τοὺς τόπους μεταβάλλει τά τ' ἐπιπολάζοντα καὶ
τὰ κατιόντα πάλιν. ὅτι δ' ἐστὶν ἐν μείξει τινὸς τὸ ἄλμυρόν, δηλὸν οὐ
μόνον ἐκ τῶν εἰρημένων, ἀλλὰ καὶ ἐάν τις ἀγγεῖον [359a] πλάσας θῇ
κῆρινον εἰς τὴν θάλατταν, περιδήσας τὸ στόμα τοιοῦτοις ὥστε μὴ
παρεγχεῖσθαι τῆς θαλάττης· τὸ γὰρ εἰσιὼν διὰ τῶν τοίχων τῶν
κηρίνων γίγνεται πότιμον ὕδωρ· ὥσπερ γὰρ δι' ἡθμοῦ τὸ γεῶδες
ἀποκρίνεται καὶ τὸ ποιοῦν τὴν ἄλμυρότητα διὰ τὴν σύμμιξιν. τοῦτο
γὰρ αἴτιον καὶ τοῦ βάρους (πλέον γὰρ ἔλκει τὸ ἄλμυρόν ἢ τὸ
πότιμον) καὶ τοῦ πάχους· καὶ γὰρ τὸ πάχος διαφέρει τοσοῦτον ὥστε
τὰ πλοῖα ἀπὸ τοῦ αὐτοῦ τῶν ἀγωγίμων βάρους ἐν μὲν τοῖς ποταμοῖς
ὀλίγου καταδύνειν, ἐν δὲ τῇ θαλάττῃ μετρίως ἔχειν καὶ πλευστικῶς·
διόπερ ἔνιοι τῶν ἐν τοῖς ποταμοῖς γεμιζόντων διὰ ταύτην τὴν ἄγνοιαν
ἐξημιώθησαν. τεκμήριον δὲ τοῦ μειγνυμένου τὸ παχύτερον εἶναι τὸν
ὄγκον· ἐάν γάρ τις ὕδωρ ἄλμυρόν ποιήσῃ σφόδρα μείζας ἄλας,
ἐπιπλέουσι τὰ ψά, κἂν ἢ πλήρη· σχεδὸν γὰρ ὥσπερ πηλὸς γίγνεται·
τοσοῦτον ἔχει σωματῶδες πλῆθος ἢ θάλαττα. ταῦτο δὲ τοῦτο δρῶσι
καὶ περὶ τὰς ταριχείας. εἰ δ' ἔστιν ὥσπερ μυθολογοῦσί τινες ἐν
Παλαιστίνῃ τοιαύτη λίμνη, εἰς ἣν ἐάν τις ἐμβάλῃ συνδήσας

ἄνθρωπον ἢ ὑποζύγιον ἐπιπλεῖν καὶ οὐ καταδύεσθαι κατὰ τοῦ ὕδατος, μαρτύριον ἂν εἴη τι τοῖς εἰρημένοις· λέγουσι γὰρ πικρὰν οὕτως εἶναι τὴν λίμνην καὶ ἄλμυρὰν ὥστε μηδένα ἰχθὺν ἐγγίγνεσθαι, τὰ δὲ ἰμάτια ρύπτειν, ἐάν τις διασεῖσῃ βρέξας. ἔστι δὲ καὶ τὰ τοιαῦτα σημεῖα πάντα τῶν εἰρημένων, ὅτι τὸ ἄλμυρὸν ποιεῖ σῶμά τι, καὶ γεῶδές ἐστιν τὸ ἐνυπάρχον· ἐν τε γὰρ τῇ Χαονίᾳ κρήνῃ τίς ἐστιν ὕδατος πλατυτέρου, ἀπορρεῖ δ' [359a.26] αὕτη εἰς ποταμὸν πλησίον γλυκὺν μὲν, ἰχθὺς δ' οὐκ ἔχοντα· εἴλοντο γὰρ δὴ, ὥς οἱ ἐκεῖ μυθολογοῦσιν, ἐξουσίας δοθείσης ὑπὸ τοῦ Ἡρακλέους, ὅτ' ἦλθεν ἄγων ἐκ τῆς Ἐρυθρίας τὰς βοῦς, ἅλας ἀντὶ τῶν ἰχθύων, οἱ γίνονται αὐτοῖς ἐκ τῆς κρήνης· τούτου γὰρ τοῦ ὕδατος ἀφέποντές τι μέρος τιθέασι, καὶ γίνεται ψυχθὲν, ὅταν ἀπατμίσῃ τὸ ὑγρὸν ἅμα τῷ θερμῷ, ἅλες, οὐ χονδροὶ ἀλλὰ χαῦνοι καὶ λεπτοὶ ὥσπερ χιών. εἰσὶν τε τὴν τε δύναμιν ἀσθενέστεροι τῶν ἄλλων καὶ πλείους ἡδύνουσιν ἐμβληθέντες, καὶ τὴν χροιάν οὐχ ὁμοίως λευκοί. τοιοῦτον δ' ἕτερον γίνεται καὶ ἐν Ὀμβρικοῖς· [359b] ἔστι γὰρ τις τόπος ἐν ᾧ πεφύκασι κάλαμοι καὶ σχοῖνος· τούτων κατακάουσι, καὶ τὴν τέφραν ἐμβάλλοντες εἰς ὕδωρ ἀφέψουσιν· ὅταν δὲ λίπωσί τι μέρος τοῦ ὕδατος, τοῦτο ψυχθὲν ἁλῶν γίνεται πλῆθος. ὅσα δ' ἐστὶν ἄλμυρὰ ρεύματα ποταμῶν ἢ κρηνῶν, τὰ πλεῖστα θερμά ποτε εἶναι δεῖ νομίζειν, εἴτα τὴν μὲν ἀρχὴν ἀπεσβέσθαι τοῦ πυρός, δι' ἧς δὲ διηθοῦνται γῆς, ἔτι μένειν οὖσαν οἶον κονίαν καὶ τέφραν. εἰσὶ δὲ πολλαχοῦ καὶ κρῆναι καὶ ρεύματα ποταμῶν παντοδαποὺς ἔχοντα χυμούς, ὧν πάντων αἰτιατέον τὴν ἐνοῦσαν ἢ ἐγγιγνομένην δύναμιν πυρός· καομένη γὰρ ἢ γῆ τῷ μᾶλλον καὶ ἥττον παντοδαπὰς λαμβάνει μορφὰς καὶ χροὰς χυμῶν· στυπηρίας γὰρ καὶ κονίας καὶ τῶν ἄλλων τῶν τοιούτων γίνεται πλήρης δυνάμεων, δι' ὧν τὰ ἡθούμενα ὕδατα ὄντα γλυκέα μεταβάλλει, καὶ τὰ μὲν ὀξέα γίνονται, καθάπερ ἐν τῇ Σικάνῃ τῆς Σικελίας· ἐκεῖ γὰρ ὀξάλμη γίνονται, καὶ χρῶνται καθάπερ ὄξει πρὸς ἓνα τῶν ἐδεσμάτων αὐτῶ. ἔστι δὲ καὶ περὶ Λύγκον κρήνη τις ὕδατος ὀξέος, περὶ δὲ τὴν Σκυθικὴν πικρά· τὸ δ' ἀπορρέον αὐτῆς τὸν ποταμὸν εἰς ὃν εἰσβάλλει ποιεῖ πικρὸν ὅλον. αἱ δὲ διαφοραὶ τούτων ἐκεῖθεν δηλαί, ποῖοι χυμοὶ ἐκ ποίων γίνονται κράσεων· εἴρηται δὲ περὶ αὐτῶν χωρὶς ἐν ἄλλοις. περὶ μὲν οὖν ὕδατος καὶ θαλάττης, δι' ἧς αἰτίας αἰεὶ τε συνεχῶς εἰσι καὶ πῶς μεταβάλλουσι καὶ τίς ἡ φύσις αὐτῶν, ἔτι δ' ὅσα πάθη κατὰ φύσιν αὐτοῖς συμβαίνει ποιεῖν ἢ πάσχειν, εἴρηται σχεδὸν ἡμῖν περὶ τῶν πλείστων.

περὶ δὲ πνευμάτων λέγωμεν, λαβόντες ἀρχὴν τὴν εἰρημένην ἡμῖν ἤδη πρότερον. ἔστι γὰρ δύο εἶδη τῆς ἀναθυμιάσεως, ὥς φαμεν, ἡ μὲν ὑγρὰ ἡ δὲ ξηρά· καλεῖται δ' ἡ μὲν ἀτμίς, ἡ δὲ τὸ μὲν ὅλον ἀνώνυμος, τῷ δ' ἐπὶ μέρους ἀνάγκη χρωμένους καθόλου προσαγορεύειν αὐτὴν οἶον καπνόν· ἔστι δ' οὔτε τὸ ὑγρὸν ἄνευ τοῦ ξηροῦ οὔτε τὸ ξηρὸν ἄνευ τοῦ ὑγροῦ, ἀλλὰ πάντα ταῦτα λέγεται κατὰ τὴν ὑπεροχὴν. φερομένου δὴ τοῦ ἡλίου κύκλῳ, καὶ ὅταν μὲν πλησιάζῃ, τῇ θερμότητι ἀνάγοντος τὸ ὑγρὸν, πορρωτέρῳ [360a] δὲ γιγνομένου διὰ τὴν ψύξιν συνισταμένης πάλιν τῆς ἀναθθείσης ἀτμίδος εἰς ὕδωρ (διὸ χειμῶνός τε μᾶλλον γίγνεται τὰ ὕδατα, καὶ νύκτωρ ἢ μεθ' ἡμέραν· ἀλλ' οὐ δοκεῖ, διὰ τὸ λανθάνειν τὰ νυκτερινὰ τῶν μεθ' ἡμέραν μᾶλλον), τὸ δὲ κατιὸν ὕδωρ διαδίδεται πᾶν εἰς τὴν γῆν, ὑπάρχει δ' ἐν τῇ γῇ πολὺ πῦρ καὶ πολλὴ θερμότης, καὶ ὁ ἥλιος οὐ μόνον τὸ ἐπιπολάζον τῆς γῆς ὑγρὸν ἔλκει, ἀλλὰ καὶ τὴν γῆν αὐτὴν ξηραίνει θερμαίνων· τῆς δ' ἀναθυμιάσεως, ὥσπερ εἴρηται, διπλῆς οὕσης, τῆς μὲν ἀτμιδώδους τῆς δὲ καπνώδους, ἀμφοτέρας ἀναγκαῖον γίνεσθαι. τούτων δ' ἡ μὲν ὑγροῦ πλεον ἔχουσα πλῆθος ἀναθυμιάσις ἀρχὴ τοῦ ὑομένου ὕδατός ἐστιν, ὥσπερ εἴρηται πρότερον, ἡ δὲ ξηρὰ τῶν πνευμάτων ἀρχὴ καὶ φύσις πάντων. ταῦτα δὲ ὅτι τοῦτον τὸν τρόπον ἀναγκαῖον συμβαίνειν, καὶ ἐξ αὐτῶν τῶν ἔργων δηλόν· καὶ γὰρ τὴν ἀναθυμίασιν διαφέρειν ἀναγκαῖον, καὶ τὸν ἥλιον καὶ τὴν ἐν τῇ γῇ θερμότητα ταῦτα ποιεῖν οὐ μόνον δυνατόν ἀλλ' ἀναγκαῖόν ἐστιν. ἐπειδὴ δ' ἕτερον ἑκατέρας τὸ εἶδος, φανερόν ὅτι διαφέρει, καὶ οὐχ ἡ αὐτὴ ἐστὶν ἢ τε ἀνέμου φύσις καὶ ἡ τοῦ ὑομένου ὕδατος, καθάπερ τινὲς λέγουσιν· τὸν γὰρ αὐτὸν ἀέρα κινούμενον μὲν ἄνεμον εἶναι, συνιστάμενον δὲ πάλιν ὕδωρ. ὁ μὲν οὖν ἀήρ, καθάπερ ἐν τοῖς πρὸ τούτων λόγοις εἰρήκαμεν, γίγνεται ἐκ τούτων· ἡ μὲν γὰρ ἀτμίς ὑγρὸν καὶ ψυχρόν (εὐόριστον μὲν γὰρ ὡς ὑγρὸν, διὰ δὲ τὸ ὕδατος εἶναι ψυχρόν τῇ οἰκείᾳ φύσει, ὥσπερ ὕδωρ μὴ θερμανθέν), ὁ δὲ καπνὸς θερμὸν καὶ ξηρόν· ὥστε καθάπερ ἐκ συμβόλων, συνίσταται ἂν ὁ ἀήρ ὑγρὸς καὶ θερμὸς. καὶ γὰρ ἄτοπον εἰ ὁ περὶ ἐκάστους περικεχυμένος ἀήρ οὗτος γίγνεται κινούμενος πνεῦμα, καὶ ὅθεν ἂν τύχῃ κινηθεῖς, ἄνεμος ἔσται, ἀλλ' οὐ καθάπερ τοὺς ποταμοὺς ὑπολαμβάνομεν οὐχ ὁπωσοῦν τοῦ ὕδατος εἶναι ρέοντος, οὐδ' ἂν ἔχῃ πλῆθος, ἀλλὰ δεῖ πηγαῖον εἶναι τὸ ρέον· οὕτω γὰρ καὶ περὶ τῶν ἀνέμων ἔχει· κινηθεῖη γὰρ ἂν πολὺ πλῆθος ἀέρος ὑπὸ τινος μεγάλης πτώσεως, οὐκ ἔχον ἀρχὴν οὐδὲ πηγὴν. μαρτυρεῖ δὲ τὰ γιγνόμενα τοῖς εἰρημένοις· διὰ

ὁ δ' ἥλιος καὶ παύει καὶ συνεξορμᾷ τὰ πνεύματα· ἀσθενεῖς μὲν γὰρ καὶ ὀλίγας οὔσας τὰς ἀναθυμιάσεις μαραίνει τῷ πλείονι θερμῷ τὸ ἐν τῇ ἀναθυμιάσει ἔλαττον ὄν, καὶ διακρίνει. ἔτι δὲ αὐτὴν τὴν γῆν φθάνει ξηραίνων πρὶν γενέσθαι ἔκκρισιν ἀθρόαν, ὥσπερ εἰς πολλὸν πῦρ ἐὰν ὀλίγον ἐμπέσῃ ὑπέκκαυμα, φθάνει πολλάκις πρὶν καπνὸν ποιῆσαι κατακαυθέν. διὰ μὲν οὖν ταύτας τὰς αἰτίας καταπαύει τε τὰ πνεύματα καὶ ἐξ ἀρχῆς γίνεσθαι κωλύει, τῇ μὲν μαράνσει καταπαύων, τῷ δὲ τάχει τῆς ξηρότητος γίνεσθαι κωλύων· διὸ περὶ Ὠρίωνος ἀνατολὴν μάλιστα γίνεται νηνεμία, καὶ μέχρι τῶν ἐτησίων καὶ προδρόμων. ὅλως δὲ γίνονται αἱ νηνεμῖαι διὰ δύο αἰτίας· ἡ γὰρ διὰ ψυχὸς ἀποσβεννυμένης τῆς ἀναθυμιάσεως, οἷον ὅταν γένηται πάγος ἰσχυρός, ἡ καταμαραινομένης ὑπὸ τοῦ πνίγους. αἱ δὲ πλεῖσται καὶ ἐν ταῖς ἀνὰ μέσον ὥραις, ἡ τῷ μήπω ἀναθυμιάσθαι, ἡ τῷ ἤδη ἐξεληλυθέναι τὴν ἀναθυμιάσιν καὶ ἄλλην μήπω ἐπιρρεῖν. ἄκριτος δὲ καὶ χαλεπὸς ὁ Ὠρίων εἶναι δοκεῖ, καὶ δύνων καὶ ἐπιτέλλων, διὰ τὸ ἐν μεταβολῇ ὥρας συμβαίνειν τὴν δύσιν καὶ τὴν ἀνατολήν, θέρους ἡ χειμῶνος, καὶ διὰ τὸ μέγεθος τοῦ ἄστρου ἡμερῶν γίνεται πλῆθος· αἱ δὲ μεταβολαὶ πάντων ταραχώδεις διὰ τὴν ἀοριστίαν εἰσίν. οἱ δ' ἐτησίαι πνέουσι μετὰ τροπὰς καὶ κυνὸς ἐπιτολήν, καὶ οὔτε τηνικαῦτα ὅτε μάλιστα πλησιάζει ὁ ἥλιος, [362a] οὔτε ὅτε πόρρω· καὶ τὰς μὲν ἡμέρας πνέουσι, τὰς δὲ νύκτας παύονται. αἴτιον δ' ὅτι πλησίον μὲν ὢν φθάνει ξηραίνων πρὶν γενέσθαι τὴν ἀναθυμιάσιν· ὅταν δ' ἀπέλθῃ μικρόν, σύμμετρος ἤδη γίνεται ἡ ἀναθυμιάσις καὶ ἡ θερμότης, ὥστε τὰ πεπηγότα ὕδατα τήκεσθαι, καὶ τῆς γῆς ξηραينوμένης ὑπὸ τε τῆς οἰκείας θερμότητος καὶ ὑπὸ τῆς τοῦ ἡλίου οἷον τύφεσθαι καὶ θυμιάσθαι. τῆς δὲ νυκτὸς λωφῶσι διὰ τὸ τὰ πεπηγότα τηκόμενα παύεσθαι διὰ τὴν ψυχρότητα τῶν νυκτῶν. θυμιᾶται δ' οὔτε τὸ πεπηγὸς οὔτε τὸ μηδὲν ἔχον ξηρόν, ἀλλ' ὅταν ἔχῃ τὸ ξηρόν ὑγρότητα, τοῦτο θερμαινόμενον θυμιᾶται. ἀποροῦσι δὲ τινες διὰ τί βορέαι μὲν γίνονται συνεχεῖς, οὓς καλοῦμεν ἐτησίας, μετὰ τὰς θερινὰς τροπὰς, νότοι δὲ οὕτως οὐ γίνονται μετὰ τὰς χειμερινὰς. ἔχει δὲ οὐκ ἀλόγως· γίνονται μὲν γὰρ οἱ καλούμενοι λευκόνοτοι τὴν ἀντικειμένην ὥραν, οὐχ οὕτως δὲ γίνονται συνεχεῖς· διὸ λανθάνοντες ποιοῦσιν ἐπιζητεῖν. αἴτιον δ' ὅτι ὁ μὲν βορέας ἀπὸ τῶν ὑπὸ τὴν ἄρκτον πνεῖ τόπων, οἱ πῆλεις ὕδατος καὶ χιόνος εἰσὶ πολλῆς, ὢν τηκομένων ὑπὸ τοῦ ἡλίου μετὰ τὰς θερινὰς τροπὰς

 ἰσημερινή. ἐναντίος δὲ τούτῳ ἀπηλιώτης ἀπὸ τοῦ Β· τοῦτο γὰρ
 ἀνατολὴ ἰσημερινή. βορέας δὲ <καὶ> ἀπαρκτίας ἀπὸ τοῦ Η· ἐνταῦθα
 γὰρ ἡ ἄρκτος. ἐναντίος δὲ τούτῳ νότος ἀπὸ τοῦ Θ· μεσημβρία τε γὰρ

 οὐχ ὁ ἀπὸ τοῦ Γ λίψ, ἀλλ' ὁ ἀπὸ τοῦ Ε, ὃν καλοῦσιν οἱ μὲν

ἐστὶ καὶ τοῦτον τέτακται τὸν τρόπον· τοῦ δ' εἶναι πλείους ἀνέμους ἀπὸ τῶν πρὸς ἄρκτον τόπων ἢ τῶν πρὸς μεσημβρίαν αἴτιον τό τε τὴν οἰκουμένην ὑποκεῖσθαι πρὸς τοῦτον τὸν τόπον, καὶ ὅτι πολλῶ πλεον ὕδωρ καὶ χιὼν ἀπωθεῖται εἰς τοῦτο τὸ μέρος διὰ τὸ ἐκεῖνα ὑπὸ τὸν ἥλιον εἶναι καὶ τὴν ἐκεῖνου φοράν, ὧν τηκομένων εἰς τὴν γῆν καὶ θερμαινομένων ὑπὸ τοῦ ἡλίου καὶ τῆς γῆς ἀναγκαῖον πλεῖω καὶ ἐπὶ πλεῖω τόπον γίνεσθαι τὴν ἀναθυμίασιν διὰ ταύτην τὴν αἰτίαν. ἔστι δὲ τῶν εἰρημένων πνευμάτων βορέας μὲν ὃ τ' ἀπαρκτίας κυριώτατα, καὶ θρασκίας καὶ μέσης· ὁ δὲ καικίας κοινὸς ἀπηλιώτου καὶ βορέου· νότος δὲ ὃ τε ἰθαγενῆς ὁ ἀπὸ μεσημβρίας καὶ λίψ· ἀπηλιώτης δὲ ὃ τε ἀπ' ἀνατολῆς ἰσημερινῆς καὶ ὁ εὖρος· ὁ δὲ φοινικίας κοινός· ζέφυρος δὲ ὃ τε ἰθαγενῆς καὶ ὁ ἀργέστης καλούμενος. ὅλως δὲ τὰ μὲν βόρεια τούτων καλεῖται, τὰ δὲ νότια· προστίθεται δὲ τὰ μὲν ζεφυρικὰ τῷ βορέα (ψυχρότερα γὰρ διὰ τὸ ἀπὸ δυσμῶν πνεῖν), νότῳ δὲ τὰ ἀπηλιωτικά (θερμότερα γὰρ διὰ τὸ ἀπ' ἀνατολῆς πνεῖν). διωρισμένων οὖν τῷ ψυχρῷ καὶ τῷ θερμῷ καὶ ἀλεινῷ τῶν πνευμάτων οὕτως ἐκάλεσαν. θερμότερα μὲν τὰ ἀπὸ τῆς ἑω τῶν ἀπὸ δυσμῆς, ὅτι πλεῖω χρόνον ὑπὸ τὸν ἥλιόν ἐστι τὰ ἀπ' ἀνατολῆς· τὰ δ' ἀπὸ δυσμῆς ἀπολείπει τε θάττον καὶ πλησιάζει τῷ τόπῳ ὀψιότερον. οὕτω δὲ τεταγμένων τῶν ἀνέμων, δῆλον ὅτι ἅμα πνεῖν τοὺς μὲν ἐναντίους οὐχ οἷόν τε (κατὰ διάμετρον γάρ· ἄτερος οὖν παύσεται ἀποβιασθεῖς), τοὺς δὲ μὴ οὕτως κειμένους πρὸς ἀλλήλους οὐδὲν κωλύει, οἷον τὸν Ζ καὶ Δ. διὰ [364a.31] τοῦτο ἅμα πνέουσιν ἐνίστε ἀμφοτέρω οὐριοι, ἐπὶ τὸ αὐτὸ σημεῖον, οὐκ ἐκ ταύτου οὐδὲ τῷ αὐτῷ πνεύματι. κατὰ δὲ τὰς ὥρας τὰς ἐναντίας οἱ ἐναντίοι μάλιστα πνέουσιν, οἷον περὶ [364b] ἰσημερίαν τὴν μὲν ἑαρινὴν καικίας καὶ ὅλως τὰ ἐπέκεινα τροπῆς θερινῆς, περὶ δὲ τὴν μετοπωρινὴν λίβες, περὶ δὲ τροπὰς θερινὰς μὲν ζέφυρος, χειμερινὰς δὲ εὖρος. ἐπιπίπτουσι δὲ τοῖς ἄλλοις μάλιστα καὶ παύουσιν ἀπαρκτία καὶ θρασκία καὶ ἀργέστα· διὰ τὸ ἐγγυτάτω γὰρ τὴν ὁρμὴν αὐτῶν εἶναι πολλοί τε καὶ ἰσχυροὶ πνέουσιν μάλιστα οὗτοι. διὸ καὶ αἰθριώτατοί εἰσι τῶν ἀνέμων· πνέοντες γὰρ ἐγγύθεν μάλιστα ἀποβιαζόμενοί τε τὰλλα πνεύματα παύουσι, καὶ ἀποφυσῶντες τὰ συνιστάμενα νέφη ποιοῦσιν αἰθρίαν, ἂν μὴ ψυχροὶ σφόδρα τύχωσιν ἅμα ὄντες. τότε δὲ οὐκ αἰθριοί· ἐὰν γὰρ ὥσι μᾶλλον ψυχροὶ ἢ μεγάλοι, φθάνουσι πηγνύντες ἢ προωθοῦντες. ὁ δὲ καικίας οὐκ αἰθριος, ὅτι ἀνακάμπει εἰς αὐτόν· ὅθεν καὶ λέγεται ἡ παροιμία “ἔλκων ἐφ' αὐτὸν ὥστε

καικίας νέφος.” αἱ δὲ περιστάσεις γίνονται αὐτῶν καταπαυομένων εἰς τοὺς ἐχομένους κατὰ τὴν τοῦ ἡλίου μετάστασιν, διὰ τὸ κινεῖσθαι μάλιστα τὸ ἐχόμενον τῆς ἀρχῆς· ἡ δὲ ἀρχὴ οὕτω κινεῖται τῶν πνευμάτων ὥς ὁ ἥλιος. οἱ ἐναντίοι δὲ ἢ ταῦτο ποιοῦσιν ἢ ἐναντίον, οἷον ὕγροι λῖψ καὶ καικίας, ὃν ἐλλησποντίαν ἔνιοι καλοῦσιν, καὶ εὖρος, ὃν ἀπηλιώτην. ξηροὶ δὲ ἀργέστης καὶ εὖρος· ἀπ’ ἀρχῆς δὲ οὗτος ξηρός, τελευτῶν δὲ ὕδατώδης. νιφετώδης δὲ μέσης καὶ ἀπαρκτίας μάλιστα· οὗτοι γὰρ ψυχρότατοι. χαλαζώδεις δὲ ἀπαρκτίας καὶ θρασκίας καὶ ἀργέστης. καυματώδης δὲ νότος καὶ ζέφυρος καὶ εὖρος. νέφεσι δὲ πυκνοῦσι τὸν οὐρανὸν καικίας μὲν σφόδρα, λῖψ δὲ ἀραιότεροις, καικίας μὲν διὰ τε τὸ ἀνακάμπειν πρὸς αὐτὸν καὶ διὰ τὸ κοινὸς εἶναι βορέου καὶ εὖρου, ὥστε διὰ μὲν τὸ ψυχρὸς εἶναι πηγνὺς τὸν ἀτμίζοντα ἀέρα συνίστησι, διὰ δὲ τὸ τῷ τόπῳ ἀπηλιωτικὸς εἶναι ἔχει πολλὴν ὕλην καὶ ἀτμίδα ἣν προωθεῖ. αἶθριοι δὲ ἀπαρκτίας, θρασκίας, ἀργέστης· ἡ δ’ αἰτία εἴρηται πρότερον. ἀστραπὰς δὲ ποιοῦσιν μάλιστα οὗτοί τε καὶ ὁ μέσης· διὰ μὲν γὰρ τὸ ἐγγύθεν πνεῖν ψυχροὶ εἰσιν, διὰ δὲ τὸ ψυχρὸν ἀστραπὴ γίγνεται· ἐκκρίνεται γὰρ συνιόντων τῶν νεφῶν. διὸ καὶ ἔνιοι τῶν αὐτῶν τούτων [365a] χαλαζώδεις εἰσίν· ταχὺ γὰρ πηγνύουσιν. ἐκνεφαίαι δὲ γίνονται μετωπώρου μὲν μάλιστα, εἴτα ἔαρος, καὶ μάλιστα ἀπαρκτίας καὶ θρασκίας καὶ ἀργέστης. αἴτιον δ’ ὅτι οἱ ἐκνεφαίαι γίνονται μάλιστα ὅταν τῶν ἄλλων πνεόντων ἐμπίπτωσιν ἕτεροι, οὗτοι δὲ μάλιστα ἐμπίπτουσιν τοῖς ἄλλοις πνέουσιν· ἡ δ’ αἰτία εἴρηται καὶ τούτου πρότερον. οἱ δ’ ἐτησίαι περιίστανται τοῖς μὲν περὶ δυσμᾶς οἰκοῦσιν ἐκ τῶν ἀπαρκτίων εἰς θρασκίας καὶ ἀργέστας καὶ ζεφύρους (ὁ γὰρ ἀπαρκτίας . . . ζέφυρός ἐστιν), ἀρχόμενοι μὲν ἀπὸ τῆς ἄρκτου, τελευτῶντες δ’ εἰς τοὺς πόρρω· τοῖς δὲ πρὸς ἔω περιίστανται μέχρι τοῦ ἀπηλιώτου. περὶ μὲν οὖν ἀνέμων, τῆς τε ἐξ ἀρχῆς αὐτῶν γενέσεως καὶ οὐσίας καὶ τῶν συμβαινόντων κοινῇ τε παθημάτων καὶ περὶ ἕκαστον, τοσαῦθ’ ἡμῖν εἰρήσθω.

περὶ δὲ σεισμοῦ καὶ κινήσεως γῆς μετὰ ταῦτα λεκτέον· ἡ γὰρ αἰτία τοῦ πάθους ἐχομένη τούτου τοῦ γένους ἐστίν. ἔστι δὲ τὰ παρειλημμένα μέχρι γε τοῦ νῦν χρόνου τρία καὶ παρὰ τριῶν. Ἀναξαγόρας τε γὰρ ὁ Κλαζομένιος καὶ πρότερον Ἀναξιμένης ὁ Μιλήσιος ἀπεφάναντο, καὶ τούτων ὕστερον Δημόκριτος ὁ Ἀβδηρίτης. Ἀναξαγόρας μὲν οὖν φησι τὸν αἰθέρα πεφυκότα φέρεσθαι ἄνω, ἐμπίπτοντα δ’ εἰς τὰ κάτω τῆς γῆς καὶ κοῖλα κινεῖν

αὐτήν· τὰ μὲν γὰρ ἄνω συναλληλεῖσθαι διὰ τοὺς ὄμβρους (ἐπεὶ φύσει γε ἅπασαν ὁμοίως εἶναι σομφήν), ὡς ὄντος τοῦ μὲν ἄνω τοῦ δὲ κάτω τῆς ὅλης σφαίρας, καὶ ἄνω μὲν τούτου ὄντος τοῦ μορίου ἐφ’ οὗ τυγχάνομεν οἰκοῦντες, κάτω δὲ θατέρου. πρὸς μὲν οὖν ταύτην τὴν αἰτίαν οὐδὲν ἴσως δεῖ λέγειν ὡς λίαν ἀπλῶς εἰρημένην· τό τε γὰρ ἄνω καὶ τὸ κάτω νομίζουσιν οὕτως ἔχειν ὥστε μὴ πρὸς μὲν τὴν γῆν πάντῃ φέρεσθαι τὰ βάρος ἔχοντα τῶν σωμάτων, ἄνω δὲ τὰ κοῦφα καὶ τὸ πῦρ, εὐηθες, καὶ ταῦθ’ ὀρῶντας τὸν ὀρίζοντα τὴν οἰκουμένην, ὅσῃν ἡμεῖς ἴσμεν, ἕτερον ἀεὶ γιγνόμενον μεθισταμένων, ὡς οὔσης κυρτῆς καὶ σφαιροειδοῦς· καὶ τὸ λέγειν μὲν ὡς διὰ τὸ μέγεθος ἐπὶ τοῦ ἀέρος μένειν, σείεσθαι δὲ φάσκειν τυπτομένην κάτωθεν ἄνω δι’ ὅλης. πρὸς δὲ τούτοις οὐδὲν ἀποδίδωσι τῶν συμβαινόντων περὶ τοὺς σεισμούς· οὔτε γὰρ χῶραι οὔτε ὥραι αἱ τυχοῦσαι μετέχουσι τούτου τοῦ πάθους. [365b] Δημόκριτος δὲ φησι πλήρη τὴν γῆν ὕδατος οὔσαν, καὶ πολὺ δεχομένην ἕτερον ὄμβριον ὕδωρ, ὑπὸ τούτου κινεῖσθαι· πλείονός τε γὰρ γιγνομένου διὰ τὸ μὴ δύνασθαι δέχεσθαι τὰς κοιλίας ἀποβιαζόμενον ποιεῖν τὸν σεισμόν, καὶ ξηρανομένην ἔλκουσαν εἰς τοὺς κενοὺς τόπους ἐκ τῶν πληρεστέρων τὸ μεταβάλλον ἐμπίπτον κινεῖν. Ἀναξιμένης δὲ φησιν βρεχομένην τὴν γῆν καὶ ξηρανομένην ῥήγνυσθαι, καὶ ὑπὸ τούτων τῶν ἀπορρηγνυμένων κολωνῶν ἐμπιπτόντων σείεσθαι· διὸ καὶ γίνεσθαι τοὺς σεισμούς ἐν τε τοῖς αὐχμοῖς καὶ πάλιν ἐν ταῖς ἐπομβρίαις· ἐν τε γὰρ τοῖς αὐχμοῖς, ὥσπερ εἴρηται, ξηρανομένην ῥήγνυσθαι, καὶ ὑπὸ τῶν ὑδάτων ὑπερυγραιομένην διαπίπτειν. ἔδει δὲ τούτου συμβαινόντος ὑπονοστοῦσαν πολλαχῇ φαίνεσθαι τὴν γῆν. ἔτι δὲ διὰ τίν’ αἰτίαν περὶ τόπους τινὰς πολλάκις γίνεται τοῦτο τὸ πάθος οὐδεμιᾷ διαφέροντας ὑπερβολῇ τοιαύτη παρὰ τοὺς ἄλλους; καίτοι ἐχρῆν. ὅλως δὲ τοῖς οὕτως ὑπολαμβάνουσιν ἀναγκαῖον ἦττον ἀεὶ τοὺς σεισμούς φάναι γίνεσθαι, καὶ τέλος παύσασθαι ποτε σειομένην· τὸ γὰρ σαττόμενον τοιαύτην ἔχει φύσιν. ὥστ’ εἰ τοῦτ’ ἀδύνατον, δῆλον ὅτι ἀδύνατον καὶ ταύτην εἶναι τὴν αἰτίαν.

ἀλλ’ ἐπειδὴ φανερόν ὅτι ἀναγκαῖον καὶ ἀπὸ ὑγροῦ καὶ ἀπὸ ξηροῦ γίνεσθαι ἀναθυμιάσιν, ὥσπερ εἵπομεν ἐν τοῖς πρότερον, ἀνάγκη τούτων ὑπαρχόντων γίνεσθαι τοὺς σεισμούς. ὑπάρχει γὰρ ἡ γῆ καθ’ αὐτήν μὲν ξηρά, διὰ δὲ τοὺς ὄμβρους ἔχουσα ἐν αὐτῇ νοτίδα πολλήν, ὥσθ’ ὑπὸ τε τοῦ ἡλίου καὶ τοῦ ἐν αὐτῇ πυρὸς θερμαινομένης πολὺ μὲν ἔξω πολὺ δ’ ἐντὸς γίνεσθαι τὸ πνεῦμα· καὶ τοῦτο ὅτε μὲν

συνεχῆς ἔξω ρεῖ πᾶν, ὅτε δ' εἴσω πᾶν, ἐνίστε δὲ καὶ μερίζεται. εἰ δὴ τοῦτ' ἀδύνατον ἄλλως ἔχειν, τὸ μετὰ τοῦτο σκεπτέον ἂν εἴη ποῖον κινητικώτατον εἴη τῶν σωμάτων· ἀνάγκη γὰρ τὸ ἐπὶ πλεῖστόν τε πεφυκὸς ἰέναι καὶ σφοδρότατον μάλιστα τοιοῦτον εἶναι. σφοδρότατον μὲν οὖν ἔξ ἀνάγκης τὸ τάχιστα φερόμενον· πλήσσει γὰρ μάλιστα διὰ τὸ τάχος· ἐπὶ πλεῖστον δὲ πέφυκε διέναι τὸ διὰ παντὸς ἰέναι μάλιστα δυνάμενον, τοιοῦτον δὲ τὸ λεπτότατον. ὥστ' εἴπερ ἢ τοῦ [366a] πνεύματος φύσις τοιαύτη, μάλιστα τῶν σωμάτων τὸ πνεῦμα κινητικόν· καὶ γὰρ τὸ πῦρ ὅταν μετὰ πνεύματος ἦ, γίγνεται φλόξ καὶ φέρεται ταχέως. οὐκ ἂν οὖν ὕδωρ οὐδὲ γῆ αἴτιον εἴη, ἀλλὰ πνεῦμα τῆς κινήσεως, ὅταν εἴσω τύχη ῥυέν τὸ ἔξω ἀναθυμώμενον. διὸ γίνονται νηνεμίας οἱ πλεῖστοι καὶ μέγιστοι τῶν σεισμῶν· συνεχῆς γὰρ οὖσα ἡ ἀναθυμίασις ἀκολουθεῖ ὡς ἐπὶ τὸ πολὺ τῇ ὀρμῇ τῆς ἀρχῆς, ὥστε ἢ ἔσω ἅμα ἢ ἔξω ὀρμᾷ πᾶσα. τὸ δ' ἐνίους γίγνεσθαι καὶ πνεύματος ὄντος οὐδὲν ἄλογον· ὀρῶμεν γὰρ ἐνίστε ἅμα πλείους πνέοντας ἀνέμους, ὧν ὅταν εἰς τὴν γῆν ὀρμήσῃ θάτερον, ἔσται πνεύματος ὄντος ὁ σεισμός. ἐλάττους δ' οὗτοι τὸ μέγεθος [366a.12] γίνονται διὰ τὸ διηρηθῆσθαι τὴν ἀρχὴν καὶ τὴν αἰτίαν αὐτῶν. νυκτὸς δ' οἱ πλείους καὶ μείζους γίνονται τῶν σεισμῶν, οἱ δὲ τῆς ἡμέρας περὶ μεσημβρίαν· νηνεμώτατον γὰρ ἔστιν ὡς ἐπὶ τὸ πολὺ τῆς ἡμέρας ἡ μεσημβρία (ὁ γὰρ ἥλιος ὅταν μάλιστα κρατῇ, κατακλείει τὴν ἀναθυμίασιν εἰς τὴν γῆν· κρατεῖ δὲ μάλιστα περὶ τὴν μεσημβρίαν), καὶ αἱ νύκτες δὲ τῶν ἡμερῶν νηνεμώτεραι διὰ τὴν ἀπουσίαν τὴν τοῦ ἡλίου· ὥστ' ἔσω γίγνεται πάλιν ἡ ῥύσις, ὥσπερ ἄμπωτις, εἰς τοῦναντίον τῆς ἔξω πλημμυρίδος, καὶ πρὸς ὀρθρον μάλιστα· τηνικαῦτα γὰρ καὶ τὰ πνεύματα πέφυκεν ἄρχεσθαι πνεῖν. ἐὰν οὖν εἴσω τύχη μεταβάλλουσα ἡ ἀρχὴ αὐτῶν ὥσπερ Εὐριπος, διὰ τὸ πλῆθος ἰσχυρότερον ποιεῖ τὸν σεισμόν. ἔτι δὲ περὶ τόπους τοιούτους οἱ ἰσχυρότατοι γίνονται τῶν σεισμῶν, ὅπου θάλαττα ῥοώδης ἢ ἡ χώρα σομφή καὶ ὑπαντρος· διὸ καὶ περὶ Ἑλλήσποντον καὶ περὶ Ἀχαΐαν καὶ Σικελίαν, καὶ τῆς Εὐβοίας περὶ τούτους τοὺς τόπους· δοκεῖ γὰρ διαυλωνίζεῖν ὑπὸ τὴν γῆν ἢ θάλαττα· διὸ καὶ τὰ θερμὰ τὰ περὶ Αἰδηψὸν ἀπὸ τοιαύτης αἰτίας γέγονε. περὶ δὲ τοὺς εἰρημένους τόπους οἱ σεισμοὶ γίνονται μάλιστα διὰ τὴν στενότητα· τὸ γὰρ πνεῦμα γιγνόμενον σφοδρὸν καὶ διὰ τὸ πλῆθος τῆς θαλάττης πολλῆς προσφερομένης ἀπωθεῖται πάλιν εἰς τὴν γῆν, τὸ πεφυκὸς ἀποπνεῖν ἐκ τῆς γῆς. αἱ τε χῶραι ὅσαι [366b]

σομοφους ἔχουσι τοὺς κάτω τόπους, πολὺ δεχόμεναι πνεῦμα σείονται μάλλον. καὶ ἔαρος δὲ καὶ μετοπώρου μάλιστα καὶ ἐν ἐπομβρίαις καὶ ἐν αὐχμοῖς γίνονται διὰ τὴν αὐτὴν αἰτίαν· αἱ τε γὰρ ὥραι αὗται πνευματωδέσταται· τὸ γὰρ θέρος καὶ ὁ χειμὼν, τὸ μὲν διὰ τὸν πάγον, τὸ δὲ διὰ τὴν ἀλέαν ποιεῖ τὴν ἀκινήσιαν· τὸ μὲν γὰρ ἄγαν ψυχρόν, τὸ δ' ἄγαν ξηρόν ἐστι· καὶ ἐν μὲν τοῖς αὐχμοῖς πνευματώδης ὁ ἀήρ· τοῦτο γὰρ αὐτό ἐστιν ὁ αὐχμός, ὅταν πλείων ἢ ἀναθυμιάσις ἢ ξηρὰ γίγνηται τῆς ὑγρᾶς· ἐν δὲ ταῖς ὑπερομβρίαις πλείω τε ποιεῖ τὴν ἐντὸς ἀναθυμίασιν, καὶ τῷ ἐναπολαμβάνεσθαι ἐν στενοτέροις τόποις καὶ ἀποβιάζεσθαι εἰς ἐλάττω τόπον τὴν τοιαύτην ἀπόκρισιν, πληρουμένων τῶν κοιλιῶν ὕδατος, ὅταν ἄρξηται κρατεῖν διὰ τὸ πολὺ εἰς ὀλίγον πιληθῆναι τόπον, ἰσχυρῶς κινεῖ ῥέων ὁ ἄνεμος καὶ προσπίπτων· δεῖ γὰρ νοεῖν ὅτι ὥσπερ ἐν τῷ σώματι ἡμῶν καὶ τρόμων καὶ σφυγμῶν αἰτίον ἐστιν ἡ τοῦ πνεύματος ἐναπολαμβανομένη δύναμις, οὕτω καὶ ἐν τῇ γῇ τὸ πνεῦμα παραπλήσιον ποιεῖν, καὶ τὸν μὲν τῶν σεισμῶν οἶον τρόπον εἶναι τὸν δ' οἶον σφυγμόν, καὶ καθάπερ συμβαίνει πολλάκις μετὰ τὴν οὖρησιν (διὰ τοῦ σώματος γὰρ γίνεται ὥσπερ τρόμος τις ἀντιμεθισταμένου τοῦ πνεύματος ἔξωθεν εἴσω ἀθρόου), τοιαῦτα [γὰρ] γίνεσθαι καὶ περὶ τὴν γῆν. ὅσῃν δ' ἔχει τὸ πνεῦμα δύναμιν, οὐ μόνον ἐκ τῶν ἐν τῷ ἀέρι δεῖ θεωρεῖν γιγνομένων (ἐνταῦθα μὲν γὰρ διὰ τὸ μέγεθος ὑπολάβοι τις ἂν τοιαῦτα δύνασθαι ποιεῖν) ἀλλὰ καὶ ἐν τοῖς σώμασι τοῖς τῶν ζώων· οἱ τε γὰρ τέταννοι καὶ οἱ σπασμοὶ πνεύματος μὲν εἰσιν κινήσεις, τοσαύτην δὲ ἔχουσιν ἰσχὺν ὥστε πολλοὺς ἅμα πειρωμένους ἀποβιάζεσθαι μὴ δύνασθαι κρατεῖν τῆς κινήσεως τῶν ἄρρωστούντων. τοιοῦτον δὲ δεῖ νοεῖν τὸ γινόμενον καὶ ἐν τῇ γῇ, ὡς εἰκάσαι πρὸς μικρὸν μεῖζον. σημεῖα δὲ τούτων καὶ πρὸς τὴν ἡμετέραν αἴσθησιν πολλαχῇ γέγονεν· ἥδη γὰρ σεισμός ἐν τόποις τισὶν γιγνόμενος οὐ πρότερον ἔληξε πρὶν ἐκρήξας εἰς τὸν ὑπὲρ τῆς γῆς τόπον φανερώς ὥσπερ ἐκνεφίας ἐξῆλθεν ὁ κινήσας ἄνεμος, [367a] οἶον καὶ περὶ Ἡράκλειαν ἐγένετο τὴν ἐν τῷ Πόντῳ νεωστί, καὶ πρότερον περὶ τὴν Ἰερὰν νῆσον (αὕτη δ' ἐστὶν μία τῶν Αἰόλου καλουμένων νήσων)· ἐν ταύτῃ γὰρ ἀνῶδει τι τῆς γῆς, καὶ ἀνήει οἶον λοφώδης ὄγκος μετὰ ψόφου· τέλος δὲ ῥαγέντος ἐξῆλθεν πνεῦμα πολὺ καὶ τὸν φέψαλον καὶ τὴν τέφραν ἀνήκεν καὶ τὴν τε Λιπαραίων πόλιν οὕσαν οὐ πόρρω πασαν κατετέφρωσε καὶ εἰς ἐνίας τῶν ἐν Ἰταλίᾳ πόλεων ἦλθεν· καὶ νῦν ὅπου τὸ ἀναφύσημα τοῦτο ἐγένετο,

περὶ δὲ ἀστραπῆς καὶ βροντῆς, ἔτι δὲ περὶ τυφῶνος καὶ πρηστιῆρος καὶ κεραυνῶν λέγωμεν· καὶ γὰρ τούτων τὴν αὐτὴν ἀρχὴν ὑπολαβεῖν δεῖ πάντων. τῆς γὰρ ἀναθυμιάσεως, ὥσπερ εἵπομεν, οὐσης διττῆς, τῆς μὲν ὑγρᾶς τῆς δὲ ξηρᾶς, καὶ τῆς συγκρίσεως ἐχούσης ἄμφω ταῦτα δυνάμει καὶ συνισταμένης εἰς νέφος, ὥσπερ εἴρηται πρότερον, ἔτι δὲ πυκνοτέρας τῆς συστάσεως τῶν νεφῶν γιγνομένης πρὸς τὸ ἔσχατον πέρας (ἥ γὰρ ἐκλείπει τὸ θερμὸν διακρινόμενον εἰς τὸν ἄνω τόπον, ταύτη πυκνοτέραν καὶ ψυχροτέραν ἀναγκαῖον εἶναι τὴν σύστασιν· διὸ καὶ οἱ κεραυνοὶ καὶ οἱ ἐκνεφίαὶ καὶ πάντα τὰ τοιαῦτα φέρεται κάτω, καίτοι πεφυκότος ἄνω τοῦ θερμοῦ φέρεσθαι παντός· ἀλλ’ εἰς τοῦναντίον τῆς πυκνότητος ἀναγκαῖον γίνεσθαι τὴν ἐκθλιψιν, οἷον οἱ πυρῆνες οἱ ἐκ τῶν δακτύλων ἐκπηδῶντες· καὶ γὰρ ταῦτα βάρος ἔχοντα φέρεται πολλάκις ἄνω)· ἡ μὲν οὖν ἐκκρινομένη θερμότης εἰς τὸν ἄνω διασπείρεται τόπον· ὅση δ’ ἐμπεριλαμβάνεται τῆς ξηρᾶς ἀναθυμιάσεως ἐν τῇ μεταβολῇ ψυχομένου τοῦ ἀέρος, αὕτη συνιόντων τῶν νεφῶν ἐκκρίνεται, βίᾳ δὲ φερομένη καὶ προσπίπτουσα τοῖς περιεχομένοις νέφεσι ποιεῖ πληγὴν, ἧς ὁ ψόφος καλεῖται βροντή. γίνεται δ’ ἡ πληγὴ τὸν αὐτὸν τρόπον, ὡς παρειαῖσαι μείζονι μικρὸν πάθος, τῷ ἐν τῇ φλογὶ γιγνομένῳ ψόφῳ, ὃν καλοῦσιν οἱ μὲν τὸν Ἥφαιστον γελαῖν, οἱ δὲ τὴν Ἑστίαν, οἱ δ’ ἀπειλὴν τούτων. γίνεται δ’ ὅταν ἡ ἀναθυμίασις εἰς τὴν φλόγα συνεστραμμένη φέρηται, ῥηγνυμένων καὶ ξηραιομένων τῶν ξύλων· οὕτως γὰρ καὶ ἐν τοῖς νέφεσι ἡ γιγνομένη τοῦ πνεύματος ἔκκρισις πρὸς τὴν πυκνότητα τῶν νεφῶν ἐμπίπτουσα [369b] ποιεῖ τὴν

βροντήν. παντοδαποὶ δὲ ψόφοι διὰ τὴν ἀνωμαλίαν τε γίνονται τῶν νεφῶν καὶ διὰ τὰς μεταξὺ κοιλίας, ἥ τὸ συνεχὲς ἐκλείπει τῆς πυκνότητος. ἢ μὲν οὖν βροντὴ τοῦτ' ἔστι, καὶ γίγνεται διὰ ταύτην τὴν αἰτίαν· τὸ δὲ πνεῦμα τὸ ἐκθλιβόμενον τὰ πολλὰ μὲν ἐκπυροῦται λεπτῇ καὶ ἀσθενεῖ πυρώσει, καὶ τοῦτ' ἔστιν ἣν καλοῦμεν ἀστραπὴν, ἥ ἂν ὥσπερ [369b.7] ἐκπίπτον τὸ πνεῦμα χρωματισθὲν ὀφθῇ. γίγνεται δὲ μετὰ τὴν πληγὴν καὶ ὕστερον τῆς βροντῆς· ἀλλὰ φαίνεται πρότερον διὰ τὸ τὴν ὄψιν προτερεῖν τῆς ἀκοῆς. δηλοῖ δ' ἐπὶ τῆς εἰρεσίας τῶν τριήρων· ἥδη γὰρ ἀναφερόντων πάλιν τὰς κώπας ὁ πρῶτος ἀφικνεῖται ψόφος τῆς κωπηλασίας. καίτοι τινὲς λέγουσιν ὡς ἐν τοῖς νέφεσιν ἐγγίγνεται πῦρ· τοῦτο δ' Ἐμπεδοκλῆς μὲν φησιν εἶναι τὸ ἐμπεριλαμβανόμενον τῶν τοῦ ἡλίου ἀκτίνων, Ἀναξαγόρας δὲ τοῦ ἄνωθεν αἰθέρος, ὃ δὴ ἐκεῖνος καλεῖ πῦρ κατενεχθὲν ἄνωθεν κάτω. τὴν μὲν οὖν διάλαμψιν ἀστραπὴν εἶναι τὴν τούτου τοῦ πυρός, τὸν δὲ ψόφον ἐναποσβεννυμένου καὶ τὴν σίξιν βροντῆν, ὡς καθάπερ φαίνεται καὶ γινόμενον οὕτως καὶ πρότερον τὴν ἀστραπὴν οὖσαν τῆς βροντῆς. ἄλογος δὲ καὶ ἡ τοῦ πυρός ἐμπερίληψις, ἀμφοτέρως μὲν, μᾶλλον δ' ἢ κατάσπασις τοῦ ἄνωθεν αἰθέρος. τοῦ τε γὰρ κάτω φέρεσθαι τὸ πεφυκὸς ἄνω δεῖ λέγεσθαι τὴν αἰτίαν, καὶ διὰ τί ποτε τοῦτο γίγνεται κατὰ τὸν οὐρανὸν ὅταν ἐπινέφελον ἢ μόνον, ἀλλ' οὐ συνεχῶς οὕτως· αἰθρίας δὲ οὕσης οὐ γίγνεται. τοῦτο γὰρ παντάπασιν ἔοικεν εἰρησθαι προχείρως. ὁμοίως δὲ καὶ τὸ τὴν ἀπὸ τῶν ἀκτίνων θερμότητα φάναι τὴν ἀπολαμβανομένην ἐν τοῖς νέφεσιν εἶναι τούτων αἰτίαν οὐ πιθανόν· καὶ γὰρ οὗτος ὁ λόγος ἀπραγμόνως εἴρηται λίαν· ἀποκεκριμένον τε γὰρ ἀναγκαῖον εἶναι τὸ αἷτιον ἀεὶ καὶ ὠρισμένον, τό τε τῆς βροντῆς καὶ τῆς ἀστραπῆς καὶ τῶν ἄλλων τῶν τοιούτων, καὶ οὕτω γίνεσθαι. τοῦτο δὲ διαφέρει πλεῖστον· ὅμοιον γὰρ καὶ εἴ τις οἴοιτο τὸ ὕδωρ καὶ τὴν χιόνα καὶ τὴν χάλαζαν ἐνυπάρχοντα πρότερον ὕστερον ἐκκρίνεσθαι καὶ μὴ γίνεσθαι, οἷον ὑπὸ χεῖρα ποιούσης ἀεὶ τῆς συγκρίσεως ἕκαστον αὐτῶν· ὡσαύτως γὰρ ἐκεῖνά τε συγκρίσεις καὶ ταῦτα διακρίσεις ὑποληπτέον εἶναι, ὥστ' εἰ θάτερα τούτων μὴ γίγνεται ἀλλ' ἔστι, περὶ ἀμφοτέρων ὁ αὐτὸς [370a] ἀρμόσει λόγος. τὴν τ' ἐναπόληψιν τί ἂν ἀλλοιότερον λέγοι τις ἢ καθάπερ ἐν τοῖς πυκνοτέροις; καὶ γὰρ τὸ ὕδωρ ὑπὸ τοῦ ἡλίου καὶ τοῦ πυρός γίγνεται θερμόν· ἀλλ' ὅμως ὅταν πάλιν συνήη καὶ ψύχεται τὸ ὕδωρ πηγνύμενον, οὐδεμίαν συμβαίνει γίνεσθαι τοιαύτην ἐκπτωσιν οἷαν ἐκεῖνοι λέγουσιν. καίτοι γ' ἐχρῆν κατὰ

λόγον τοῦ μεγέθους τὴν ζέσιν ποιεῖν τὸ ἐγγιγνόμενον πνεῦμα ὑπὸ τοῦ πυρός, ἦν οὔτε δυνατὸν ἐνυπάρχειν πρότερον, οὔτ' ἐκεῖνοι τὸν ψόφον ζέσιν ποιοῦσιν ἀλλὰ σίξιν· ἔστι δὲ καὶ ἡ σίξις μικρὰ ζέσις· ἥ γὰρ τὸ προσπίπτον κρατεῖ σβεννύμενον, ταύτῃ ζέον ποιεῖ τὸν ψόφον. εἰσὶ δὲ τινες οἱ τὴν ἀστραπὴν, ὥσπερ καὶ Κλείδημος, οὐκ εἶναί φασιν ἀλλὰ φαίνεσθαι, παρεικάζοντες ὡς τὸ πάθος ὅμοιον ὄν καὶ ὅταν τὴν θάλατταν τις ῥάβδῳ τύπη· φαίνεται γὰρ τὸ ὕδωρ ἀποστίλβον τῆς νυκτός· οὕτως ἐν τῇ νεφέλῃ ῥαπιζομένου τοῦ ὕγροῦ τὴν φάντασιν τῆς λαμπρότητος εἶναι τὴν ἀστραπὴν. οὗτοι μὲν οὖν οὐπω συνήθεις ἦσαν ταῖς περὶ τῆς ἀνακλάσεως δόξαις, ὅπερ αἴτιον δοκεῖ τοῦ τοιοῦτου πάθους εἶναι· φαίνεται γὰρ τὸ ὕδωρ στίλβειν τυπτόμενον ἀνακλωμένης ἀπ' αὐτοῦ τῆς ὥσεως πρὸς τι τῶν λαμπρῶν. διὸ καὶ γίνεται μᾶλλον τοῦτο νύκτωρ· τῆς γὰρ ἡμέρας οὐ φαίνεται διὰ τὸ πλέον ὄν τὸ φέγγος τὸ τῆς ἡμέρας ἀφανίζειν. τὰ μὲν οὖν λεγόμενα περὶ βροντῆς τε καὶ ἀστραπῆς παρὰ τῶν ἄλλων ταῦτ' ἐστί, τῶν μὲν ὅτι ἀνάκλασις ἡ ἀστραπή, τῶν δ' ὅτι πυρὸς μὲν ἡ ἀστραπή διάλαμψις, ἡ δὲ βροντὴ σβέσις, οὐκ ἐγγιγνομένου παρ' ἑκαστον πάθος τοῦ πυρὸς ἀλλ' ἐνυπάρχοντος. ἡμεῖς δὲ φάμεν τὴν αὐτὴν εἶναι φύσιν ἐπὶ μὲν τῆς γῆς ἄνεμον, ἐν δὲ τῇ γῇ σεισμόν, ἐν δὲ τοῖς νέφεσι βροντὴν· πάντα γὰρ εἶναι ταῦτα τὴν οὐσίαν ταυτόν, ἀναθυμίασιν ξηράν, ἥ ῥέουσα μὲν πῶς ἄνεμός ἐστιν, ὡδὶ δὲ ποιεῖ τοὺς σεισμούς, ἐν δὲ τοῖς νέφεσι μεταβάλλουσα διακρινόμενη, συνιόντων καὶ συγκρινομένων αὐτῶν εἰς ὕδωρ, βροντάς τε καὶ ἀστραπὰς καὶ πρὸς τούτοις τᾶλλα τὰ τῆς αὐτῆς φύσεως τούτοις ὄντα. καὶ περὶ μὲν βροντῆς εἴρηται καὶ ἀστραπῆς.

Βιβλίο Γ' Περὶ δὲ τῶν ὑπολοίπων εἵπωμεν ἔργων τῆς ἐκκρίσεως ταύτης, τὸν ὑφηγημένον ἤδη τρόπον λέγοντες. τὸ γὰρ πνεῦμα τοῦτο ἐκκρινόμενον κατὰ μικρὰ μὲν καὶ σποράδην διαχεόμενον καὶ πολλάκις γιγνόμενον καὶ διαπνέον καὶ λεπτομερέστερον ὄν βροντὰς ποιεῖ καὶ ἀστραπὰς· ἂν δ' ἀθρόον καὶ πυκνότερον, ἥττον δ' ἐκκριθῇ λεπτόν, ἐκνεφίας ἄνεμος γίγνεται· διὸ καὶ βίαιος (τὸ γὰρ τάχος τῆς ἐκκρίσεως ποιεῖ τὴν ἰσχύν). ὅταν μὲν οὖν συνακολουθήσῃ πολλὴ καὶ συνεχὴς ἔκκρισις, τὸν αὐτὸν γίγνεται τρόπον ὥσπερ ὅταν πάλιν εἰς τοῦναντίον ὀρμήσῃ· τότε γὰρ ὑετὸς καὶ ὕδατος γίγνεται πλῆθος. ὑπάρχει μὲν οὖν ἅμφω δυνάμει ταῦτα κατὰ τὴν ὕλην· ὅταν δὲ ἀρχὴ γένηται τῆς δυνάμεως ὁποτερassoῦν, ἀκολουθεῖ συγκρινόμενον ἐκ τῆς ὕλης ὁποτέρου ἂν ἦ πλῆθος ἐνυπάρχον πλέον, καὶ γίγνεται τὸ μὲν ὄμβρος, τὸ δὲ τῆς ἐτέρας ἀναθυμιάσεως ἐκνεφίας. ὅταν δὲ τὸ ἐκκρινόμενον πνεῦμα τὸ ἐν τῷ νέφει ἐτέρῳ ἀντιτυπήσῃ οὕτως ὥσπερ ὅταν ἐξ εὐρέος εἰς στενὸν βιάζεται ὁ ἄνεμος ἐν πύλαις ἢ ὁδοῖς (συμβαίνει γὰρ πολλάκις ἐν τοῖς τοιοῦτοις ἀπωσθέντος τοῦ πρώτου μορίου τοῦ ῥέοντος σώματος διὰ τὸ μὴ ὑπείκειν, ἢ διὰ στενότητα ἢ διὰ τὸ ἀντιπνεῖν, κύκλον καὶ δίνην γίνεσθαι τοῦ πνεύματος· τὸ μὲν γὰρ εἰς τὸ πρόσθεν κωλύει προῖεναι, τὸ δ' ὀπισθεν ἐπωθεῖ, ὥστε ἀναγκάζεται εἰς τὸ πλάγιον, ἢ οὐ κωλύεται, φέρεσθαι, καὶ οὕτως ἀεὶ τὸ ἐχόμενον, ἕως ἂν ἐν γένηται, τοῦτο δ' ἐστὶ κύκλος· οὗ γὰρ μία φορὰ σχήματος, τοῦτο καὶ αὐτὸ ἀνάγκη ἐν εἶναι)· ἐπὶ τε τῆς γῆς οὖν διὰ ταῦτα γίνονται οἱ δῖνοι, καὶ ἐν τοῖς νέφεσιν ὁμοίως κατὰ τὴν ἀρχήν, πλὴν ὅτι, ὥσπερ, ὅταν ἐκνεφίας γίγνηται, ἀεὶ τὸ νέφος ἐκκρίνεται καὶ γίγνεται συνεχὴς ἄνεμος, οὕτως ἐνταῦθα ἀεὶ τὸ συνεχὲς ἀκολουθεῖ τοῦ νέφους· διὰ δὲ πυκνότητα οὐ δυνάμενον ἐκκριθῆναι τὸ πνεῦμα ἐκ τοῦ νέφους στρέφεται μὲν κύκλῳ τὸ πρῶτον διὰ τὴν εἰρημένην αἰτίαν, κάτω δὲ φέρεται διὰ [371a] τὸ ἀεὶ τὰ νέφη πυκνοῦσθαι, ἢ ἐκπίπτει τὸ θερμόν. καλεῖται δ', ἂν ἀχρωμάτιστον ἦ, τοῦτο τὸ πάθος τυφῶν, ἄνεμος ὧν, οἷον ἐκνεφίας ἄπεπτος. βορείοις δ' οὐ γίγνεται τυφῶν, οὐδὲ νιπτικῶς ἐχόντων ἐκνεφίας, διὰ τὸ πάντα ταῦτ' εἶναι πνεῦμα, τὸ δὲ πνεῦμα ξηρὰν εἶναι καὶ θερμὴν ἀναθυμίασιν. ὁ οὖν πάγος καὶ τὸ ψῦχος διὰ τὸ κρατεῖν σβέννυσιν εὐθὺς γιγνομένην ἔτι τὴν ἀρχήν. ὅτι δὲ κρατεῖ, δῆλον· οὐδὲ γὰρ ἂν ἦν νιφετός, οὐδὲ βόρεια τὰ ὑγρά· ταῦτα γὰρ συμβαίνει κρατούσης εἶναι τῆς ψυχρότητος. γίγνεται μὲν οὖν τυφῶν, ὅταν

ἐκνεφίας γιγνόμενος μὴ δύνηται ἐκκριθῆναι τοῦ νέφους· ἔστι δὲ διὰ τὴν ἀντίκρουσιν τῆς δίνης, ὅταν ἐπὶ γῆν φέρηται ἢ ἔλιξ συγκατάγουσα τὸ νέφος, οὐ δυναμένη ἀπολυθῆναι. ἥ δὲ κατ' εὐθυωρίαν ἐκπνεῖ, ταύτῃ τῷ πνεύματι κινεῖ, καὶ τῇ κύκλῳ κινήσει στρέφει καὶ ἀναφέρει ὧς ἂν προσπέσῃ βιαζόμενον. ὅταν δὲ κατασπώμενον ἐκπυρωθῇ (τοῦτο δ' ἐστὶν ἐὰν λεπτότερον τὸ πνεῦμα γένηται), καλεῖται πρηστήρ· συνεκπίμπρησι γὰρ τὸν ἀέρα τῇ πυρώσει χρωματίζων. ἐὰν δ' ἐν αὐτῷ τῷ νέφει πολὺ καὶ λεπτὸν ἐκθλιφθῇ πνεῦμα, τοῦτο γίγνεται κεραυνός, ἐὰν μὲν πάνυ λεπτόν, οὐκ ἐπικάων διὰ λεπτότητα, ὃν οἱ ποιηταὶ ἀργῆτα καλοῦσιν, ἐὰν δ' ἥττον, ἐπικάων, ὃν ψολόεντα καλοῦσιν· ὁ μὲν γὰρ διὰ τὴν λεπτότητα φέρεται, διὰ δὲ τὸ τάχος φθάνει διῶν πρὶν ἢ [371a.23] ἐκπυρῶσαι καὶ ἐπιδιατρίψας μελᾶναι· ὁ δὲ βραδύτερος ἔχρωσε μὲν, ἔκαυσε δ' οὐ, ἀλλ' ἔφθασε. διὸ καὶ τὰ μὲν ἀντιτυπήσαντα πάσχει τι, τὰ δὲ μὴ οὐδέν, οἷον ἀσπίδος ἤδη τὸ μὲν χάλκωμα ἐτάκη, τὸ δὲ ξύλον οὐδὲν ἔπαθεν· διὰ γὰρ μανότητα ἔφθασε τὸ πνεῦμα διηθηθὲν καὶ διελθόν· καὶ δι' ἱματίων ὁμοίως οὐ κατέκαυσεν, ἀλλ' οἷον τρυῆχος ἐποίησεν· ὥστε ὅτι γε πνεῦμα ταῦτα πάντα, δῆλον καὶ ἐκ τῶν τοιούτων. ἔστι δ' ἐνίστε καὶ τοῖς ὄμμασιν θεωρεῖν, οἷον καὶ νῦν ἐθεωροῦμεν περὶ τὸν ἐν Ἐφέσῳ ναὸν καόμενον· πολλαχῇ γὰρ ἢ φλόξ ἐφέρετο συνεχῆς, ἀποσπωμένη χωρίς. ὅτι μὲν γὰρ ὁ τε καπνὸς πνεῦμα καὶ κάεται ὁ καπνός, [371b] φανερόν, καὶ εἴρηται ἐν ἐτέροις πρότερον· ὅταν δ' ἀθρόον χωρῇ, τότε φανερώς δοκεῖ πνεῦμα εἶναι. ὅπερ οὖν ἐν ταῖς μικραῖς πυρκαϊαῖς φαίνεται, τοῦτο καὶ τότε πολλῆς ὕλης καομένης ἐγίγνετο πολλῷ ἰσχυρότερον. ῥηγνυμένων οὖν τῶν ξύλων, ὅθεν ἡ ἀρχὴ τοῦ πνεύματος ἦν, πολὺ ἐχώρει ἀθρόον, ἥ ἐξέπνει, καὶ ἐφέρετο ἄνω πεπυρωμένον. ὥστ' ἐφαίνετο ἡ φλόξ φέρεσθαι καὶ εἰσπίπτειν εἰς τὰς οἰκίας. αἰ γὰρ οἶεσθαι δεῖ ἐπακολουθεῖν τοῖς κεραυνοῖς πνεῦμα καὶ προϊέναι· ἀλλ' οὐχ ὁράται, διὰ τὸ ἀχρωμάτιστον εἶναι. διὸ καὶ ἡ μέλλει πατάζειν, κινεῖται πρὶν πληγῆναι, ἅτε πρότερον προσπιπτούσης τῆς ἀρχῆς τοῦ πνεύματος. καὶ αἱ βρονταὶ δὲ διυστᾶσιν οὐ τῷ ψόφῳ, ἀλλ' ὅτι ἅμα συνεκκρίνεται τὸ τὴν πληγὴν ποιῆσαν καὶ τὸν ψόφον πνεῦμα· ὁ ἐὰν πατάξῃ, διέστησεν, ἐπέκαυσε δ' οὐ. περὶ μὲν οὖν βροντῆς καὶ ἀστραπῆς καὶ ἐκνεφίου, ἔτι δὲ πρηστήρων τε καὶ τυφόνων καὶ κεραυνῶν, εἴρηται, καὶ ὅτι ταυτὸ πάντα, καὶ τίς ἡ διαφορὰ πάντων αὐτῶν.

περὶ δὲ ἄλλω καὶ ἱριδος, τί τε ἐκάτερον καὶ διὰ τίν' αἰτίαν γίγνεται,

λέγωμεν, καὶ περὶ παρηλίων καὶ ράβδων· καὶ γὰρ ταῦτα γίγνεται πάντα διὰ τὰς αὐτὰς αἰτίας ἀλλήλοις. πρῶτον δὲ δεῖ λαβεῖν τὰ πάθη καὶ τὰ συμβαίνοντα περὶ ἕκαστον αὐτῶν. τῆς μὲν οὖν ἄλω φαίνεται πολλάκις κύκλος ὅλος, καὶ γίγνεται περὶ ἥλιον καὶ σελήνην καὶ περὶ τὰ λαμπρὰ τῶν ἄστρων, ἔτι δ' οὐδὲν ἦττον νυκτὸς ἢ ἡμέρας καὶ περὶ μεσημβρίαν ἢ δείλην· ἔωθεν δ' ἐλαττονάκις καὶ περὶ δύοσιν. τῆς δ' ἱριδος οὐδέποτε γίγνεται κύκλος οὐδὲ μεῖζον ἡμικυκλίου τμήμα· καὶ δύνοντος μὲν καὶ ἀνατέλλοντος ἐλαχίστου μὲν κύκλου, μεγίστη δ' ἡ ἀψίς, αἰρομένου δὲ μᾶλλον κύκλου μὲν μεῖζονος, ἐλάττων δ' ἡ ἀψίς· καὶ μετὰ μὲν τὴν μετοπωρινὴν ἰσημερίαν, ἐν ταῖς βραχυτέραις ἡμέραις, πᾶσαν ὥραν γίγνεται τῆς ἡμέρας, ἐν δὲ ταῖς θεριναῖς οὐ γίγνεται περὶ μεσημβρίαν. οὐδὲ δὴ δυοῖν πλείους ἱριδες οὐ γίνονται ἅμα. τούτων δὲ τρίχως μὲν ἑκατέρω, καὶ τὰ [372a] χρώματα ταῦτα καὶ ἴσα τὸν ἀριθμὸν ἔχουσιν ἀλλήλαις, ἀμυδρότερα δ' ἐν τῇ ἐκτὸς καὶ ἐξ ἐναντίας κείμενα κατὰ τὴν θέσιν· ἡ μὲν γὰρ ἐντὸς τὴν πρώτην ἔχει περιφέρειαν τὴν μεγίστην φοινικίαν, ἡ δ' ἔξωθεν τὴν ἐλαχίστην μὲν ἐγγύτατα δὲ πρὸς ταύτην, καὶ τὰς ἄλλας ἀνάλογον. ἔστι δὲ τὰ χρώματα ταῦτα ἅπερ μόνον σχεδὸν οὐ δύνανται ποιεῖν οἱ γραφεῖς· ἕνια γὰρ αὐτοὶ κεραννύουσι, τὸ δὲ φοινικοῦν καὶ πράσινον καὶ ἄλουργόν οὐ γίγνεται κεραννύμενον· ἡ δὲ ἱρίς ταῦτ' ἔχει τὰ χρώματα. τὸ δὲ μεταξὺ τοῦ φοινικοῦ καὶ πρασίνου φαίνεται πολλάκις ξανθόν. παρήλιοι δὲ καὶ ράβδοι γίνονται ἐκ πλαγίας αἰεὶ καὶ οὐτ' ἄνωθεν οὔτε πρὸς τῆς γῆς οὐτ' ἐξ ἐναντίας, οὐδὲ δὴ νύκτωρ, ἀλλ' αἰεὶ περὶ τὸν ἥλιον, ἔτι δὲ ἢ αἰρομένου ἢ καταφερομένου· τὰ πλείστα δὲ πρὸς δυσμᾶς· μεσουρανοῦντος δὲ σπάνιον εἴ τι γέγονεν, οἷον ἐν Βοσπόρῳ ποτὲ συνέπεσε· δι' ὅλης γὰρ τῆς ἡμέρας συνανασχόντες δύο παρήλιοι διετέλεσαν μέχρι δυσμῶν. τὰ μὲν οὖν περὶ ἕκαστον αὐτῶν συμβαίνοντα ταῦτ' ἐστίν· τὸ δ' αἴτιον τούτων ἀπάντων ταυτό· πάντα γὰρ ἀνάκλασις ταῦτ' ἐστί. διαφέρουσι δὲ τοῖς τρόποις καὶ ἀφ' ὧν, καὶ ὡς συμβαίνει γίνεσθαι τὴν ἀνάκλασιν πρὸς τὸν ἥλιον ἢ πρὸς ἄλλο τι τῶν λαμπρῶν. καὶ μεθ' ἡμέραν μὲν ἱρίς γίγνεται, νύκτωρ δ' ἀπὸ σελήνης, ὡς μὲν οἱ ἀρχαῖοι ᾤοντο, οὐκ ἐγίγνετο· τοῦτο δ' ἔπαθον διὰ τὸ σπάνιον· ἐλάνθανε γὰρ αὐτοὺς· γίγνεται μὲν γάρ, ὀλιγάκις δὲ γίγνεται. τὸ δ' αἴτιον ὅτι τ' ἐν τῷ σκοτεινῷ λανθάνει τὰ χρώματα, καὶ ἄλλα πολλὰ δεῖ συμπεσεῖν, καὶ ταῦτα πάντα ἐν ἡμέρᾳ μιᾷ τοῦ μηνός· ἐν τῇ πανσελήνῳ γὰρ γενέσθαι ἀνάγκη τὸ μέλλον ἔσεσθαι, καὶ τότε ἀνατελλούσης ἢ δυνούσης· διόπερ ἐν ἔτεσιν ὑπὲρ

τὰ πεντήκοντα δις ἐνετύχομεν μόνον. ὅτι μὲν οὖν ἡ ὄψις ἀνακλᾶται, ὥσπερ καὶ ἀφ' ὕδατος, οὕτω καὶ ἀπὸ ἀέρος καὶ πάντων τῶν ἐχόντων τὴν ἐπιφάνειαν λεῖαν, ἐκ τῶν περὶ τὴν ὄψιν δεικνυμένων δεῖ λαμβάνειν τὴν πίστιν, καὶ διότι τῶν ἐνόπτρων ἐν ἐνίοις μὲν καὶ τὰ σχήματα ἐμφαίνεται, ἐν ἐνίοις δὲ τὰ χρώματα μόνον· τοιαῦτα δ' ἐστὶν ὅσα [372b] μικρὰ τῶν ἐνόπτρων, καὶ μηδεμίαν αἰσθητὴν ἔχει διαίρεσιν· ἐν γὰρ τούτοις τὸ μὲν σχῆμα ἀδύνατον ἐμφαίνεσθαι (δόξει γὰρ εἶναι διαιρετόν· πᾶν γὰρ σχῆμα ἅμα δοκεῖ σχῆμά τ' εἶναι καὶ διαίρεσιν ἔχειν), ἐπεὶ δ' ἐμφαίνεσθαι τι ἀναγκαῖον, τοῦτο δὲ ἀδύνατον, λείπεται τὸ χρῶμα μόνον ἐμφαίνεσθαι. τὸ δὲ χρῶμα ὅτε μὲν λαμπρὸν φαίνεται τῶν λαμπρῶν, ὅτε δέ, ἢ τῷ μείγνυσθαι τῷ τοῦ ἐνόπτρου ἢ διὰ τὴν ἀσθένειαν τῆς ὀψεως, ἄλλου χρώματος ἐμποιεῖ φαντασίαν. ἔστω δὲ περὶ τούτων ἡμῶν τεθεωρημένον ἐν τοῖς περὶ τὰς αἰσθήσεις δεικνυμένοις· διὸ τὰ μὲν λέγωμεν, τοῖς δ' ὥς ὑπάρχουσι χρῆσώμεθα αὐτῶν.

πρῶτον δὲ περὶ τῆς ἄλλω τοῦ σχήματος εἰπωμεν, διότι τε κύκλος γίγνεται, καὶ διότι περὶ τὸν ἥλιον ἢ τὴν σελήνην, ὁμοίως δὲ καὶ περὶ τι τῶν ἄλλων ἄστρον· ὁ γὰρ αὐτὸς ἐπὶ πάντων ἀρμόσει λόγος. γίγνεται μὲν οὖν ἡ ἀνάκλασις τῆς ὀψεως συνισταμένου τοῦ ἀέρος καὶ τῆς ἀτμίδος εἰς νέφος, ἐὰν ὁμαλῆς καὶ μικρομερῆς συνισταμένη τύχη. διὸ καὶ σημεῖον ἢ μὲν σύστασις ὕδατός ἐστιν, αἱ μέντοι διασπάσεις ἢ μαράνσεις, αὗται μὲν εὐδιῶν, αἱ δὲ διασπάσεις πνεύματος. ἐὰν μὲν γὰρ μήτε καταμαρανθῇ μήτε διασπασθῇ, ἀλλ' ἐαθῇ τὴν φύσιν ἀπολαμβάνειν τὴν αὐτῆς, ὕδατος εἰκότως σημεῖον ἐστὶ· δηλοῖ γὰρ ἤδη γίνεσθαι τοιαύτην τὴν σύστασιν, ἐξ ἧς τὸ συνεχὲς λαμβανούσης τῆς πυκνώσεως ἀναγκαῖον εἰς ὕδωρ ἐλθεῖν· διὸ καὶ μέλαινα γίνονται τὴν χροάν αὗται μάλιστα τῶν ἄλλων. ὅταν δὲ διασπασθῇ, πνεύματος σημεῖον· ἢ γὰρ διαίρεσις ὑπὸ πνεύματος γέγονεν ἤδη μὲν ὄντος, οὕπω δὲ παρόντος. σημεῖον δὲ τούτου διότι ἐντεῦθεν γίγνεται ὁ ἄνεμος, ὅθεν ἂν ἡ κυρία γίγνηται διάσπασις. ἀπομαραινόμενη δὲ εὐδίας· εἰ γὰρ μὴ ἔχει πως οὕτως ὁ ἀήρ ὥστε κρατεῖν τοῦ ἐναπολαμβανομένου θερμοῦ μηδ' ἔρχεσθαι εἰς πύκνωσιν ὑδατώδη, [ἀπὸ] δῆλον ὡς οὕπω ἢ ἀτμὶς ἀποκέκριται τῆς ἀναθυμιάσεως τῆς ξηρᾶς καὶ πυρώδους· τοῦτο δὲ εὐδίας αἴτιον. πῶς μὲν οὖν ἔχοντος τοῦ ἀέρος γίγνεται ἡ ἀνάκλασις, εἴρηται. [373a] ἀνακλᾶται δ' ἀπὸ τῆς συνισταμένης ἀχλύος περὶ τὸν ἥλιον ἢ τὴν σελήνην ἢ ὄψις· διὸ οὐκ ἐξ ἐναντίας ὥσπερ ἴρις φαίνεται. πάντοθεν

δὲ ὁμοίως ἀνακλωμένης ἀναγκαῖον κύκλον εἶναι ἢ κύκλου μέρος· ἀπὸ γὰρ τοῦ αὐτοῦ σημείου πρὸς τὸ αὐτὸ σημεῖον αἱ ἴσαι κλασθήσονται ἐπὶ κύκλου γραμμῆς ἀεὶ. ἔστω γὰρ ἀπὸ τοῦ σημείου ἐφ' ᾧ τὸ Α πρὸς τὸ Β κεκλασμένη ἢ τε τὸ ΑΓΒ καὶ ἢ τὸ ΑΖΒ καὶ ἢ τὸ ΑΔ Β· ἴσαι δὲ αὐταὶ τε αἱ ΑΓ ΑΖ ΑΔ ἀλλήλαις, καὶ [373a.9] αἱ πρὸς τὸ Β ἀλλήλαις, οἷον αἱ ΓΒ ΖΒ ΔΒ· καὶ ἐπεζεύχθω ἡ ΑΕΒ, ὥστε τὰ τρίγωνα ἴσα· καὶ γὰρ ἐπ' ἴσης τῆς ΑΕΒ. ἤχθωσαν δὲ κάθετοι ἐπὶ τὴν ΑΕΒ ἐκ τῶν γωνιῶν, ἀπὸ μὲν τῆς Γ ἢ τὸ ΓΕ, ἀπὸ δὲ τῆς Ζ ἢ τὸ ΖΕ, ἀπὸ δὲ τῆς Δ ἢ τὸ ΔΕ. ἴσαι δὲ αὐταί· ἐν ἴσοις γὰρ τριγώνοις καὶ ἐν ἐνὶ ἐπιπέδῳ πᾶσαι· πρὸς ὀρθὰς γὰρ πᾶσαι τῇ ΑΕΒ, καὶ ἐφ' ἐν σημεῖον τὸ Ε συνάπτουσι. κύκλος ἄρα ἔσται ἡ γραφομένη, κέντρον δὲ τὸ Ε. ἔστι δὴ τὸ μὲν Β ὁ ἥλιος, τὸ δὲ Α ἡ ὄψις, ἡ δὲ περὶ τὸ ΓΖΔ περιφέρεια τὸ νέφος ἀφ' οὗ ἀνακλᾶται ἡ ὄψις πρὸς τὸν ἥλιον. δεῖ δὲ νοεῖν συνεχῇ τὰ ἐνοπτρα· ἀλλὰ διὰ μικρότητα ἕκαστον μὲν ἀόρατον, τὸ δ' ἐξ ἀπάντων ἐν εἶναι δοκεῖ διὰ τὸ ἐφεξῆς. φαίνεται δὲ τὸ μὲν λευκόν, ὁ ἥλιος, κύκλῳ συνεχῶς ἐν ἐκάστῳ φαινόμενος τῶν ἐνόπτρων, καὶ μηδεμίαν ἔχων αἰσθητὴν διαίρεσιν, πρὸς δὲ τῇ γῇ μᾶλλον διὰ τὸ νηνεμώτερον εἶναι· πνεύματος γὰρ ὄντος οὐκ εἶναι στάσιν φανερόν. παρὰ δὲ τοῦτο μέλαινα ἡ ἐχομένη περιφέρεια, διὰ τὴν ἐκείνης λευκότητα δοκοῦσα εἶναι μελαντέρα. πλεονάκις δὲ γίνονται αἱ ἄλλω περὶ τὴν σελήνην διὰ τὸ τὸν ἥλιον θερμότερον ὄντα θάπττον διαλύειν τὰς συστάσεις τοῦ ἀέρος. περὶ δὲ τοὺς ἀστέρας γίνονται μὲν διὰ τὰς αὐτὰς αἰτίας, οὐ σημειώδεις δ' ὁμοίως, ὅτι μικρὰς πάμπαν ἐπιδηλοῦσι τὰς συστάσεις καὶ οὕτω γονίμους.

ἡ δ' ἴρις ὅτι μὲν ἐστὶν ἀνάκλασις, εἴρηται πρότερον· ποία δέ τις ἀνάκλασις, καὶ πῶς καὶ διὰ τίν' αἰτίαν ἕκαστα γίνεταί τῶν συμβαινόντων περὶ ταύτην, λέγωμεν νῦν. ἀνακλωμένη μὲν οὖν ἡ ὄψις ἀπὸ πάντων φαίνεται τῶν λείων, [373b] τούτων δ' ἐστὶν καὶ ἀήρ καὶ ὕδωρ. γίνεταί δὲ ἀπὸ μὲν ἀέρος, ὅταν τύχῃ συνιστάμενος. διὰ δὲ τὴν τῆς ὀψεως ἀσθενεῖαν πολλάκις καὶ ἄνευ συστάσεως ποιεῖ ἀνάκλασιν, οἷόν ποτε συνέβαινε τινὶ πάθος ἡρέμα καὶ οὐκ ὀξὺ βλέποντι· αἰεὶ γὰρ εἰδῶλον ἐδόκει προηγεῖσθαι βαδίζοντι αὐτῷ, ἐξ ἐναντίας βλέπον πρὸς αὐτόν. τοῦτο δ' ἔπασχε διὰ τὸ τὴν ὄψιν ἀνακλᾶσθαι πρὸς αὐτόν· οὕτω γὰρ ἀσθενῆς ἦν καὶ λεπτὴ πάμπαν ὑπὸ τῆς ἀρρωστίας, ὥστ' ἐνοπτρον ἐγίγνετο καὶ ὁ πλησίον ἀήρ, καὶ οὐκ ἐδύνατο ἀπωθεῖν-ὥς ὁ πόρρω καὶ πυκνός· διόπερ αἱ τ' ἄκραι ἀνεσπασμένοι φαίνονται ἐν τῇ θαλάττῃ, καὶ μείζω τὰ μεγέθη πάντων,

ὅταν εὖροι πνέωσι, καὶ τὰ ἐν ταῖς ἀχλύσιν, οἷον καὶ ἥλιος καὶ ἄστρο

μάλιστα ἀνακλᾶται, καὶ ἀπὸ ἀρχομένου γίνεσθαι μᾶλλον ἔτι ἢ ἀπ’
ἀέρος· ἕκαστον γὰρ τῶν μορίων ἐξ ὧν γίνεται συνισταμένων ἢ

συμβαίνειν, ὅταν τοῦτον ἔχη τὸν τρόπον ὃ τε ἥλιος καὶ τὸ νέφος καὶ
ἡμεῖς ὤμεν μεταξὺ αὐτῶν, ἔσται διὰ τὴν ἀνάκλασιν ἔμφασίς τις.
ἀλλὰ μὴν καὶ φαίνεται τότε καὶ οὐκ ἄλλως ἐχόντων γιγνομένη ἡ ἴρις.
ὅτι μὲν οὖν ἀνάκλασις ἡ ἴρις τῆς ὀψεως πρὸς τὸν ἥλιόν ἐστι,
φανερὸν· διὸ καὶ ἐξ ἐναντίας αἰεὶ γίνεται, ἡ δ’ ἄλλως περὶ αὐτόν·
καίτοι ἅμφω ἀνάκλασις· ἀλλ’ ἢ γε τῶν χρωμάτων [374a] ποικιλία
διαφέρει· ἡ μὲν γὰρ ἀφ’ ὕδατος καὶ μέλανος γίνεται ἀνάκλασις καὶ
πόρρωθεν, ἡ δ’ ἐγγύθεν καὶ ἀπὸ ἀέρος λευκοτέρου τὴν φύσιν.
φαίνεται δὲ τὸ λαμπρὸν διὰ τοῦ μέλανος ἢ ἐν τῷ μέλανι (διαφέρει
γὰρ οὐδέν) φοινικοῦν (ὅρᾱν δ’ ἔξεστι τό γε τῶν χλωρῶν ξύλων πῦρ,
ὡς ἐρυθρὰν ἔχει τὴν φλόγα διὰ τὸ τῷ καπνῷ πολλῷ μεμειχθαι τὸ πῦρ
λαμπρὸν ὃν καὶ λευκόν)· καὶ δι’ ἀχλύος καὶ καπνοῦ ὁ ἥλιος φαίνεται
φοινικοῦς. διὸ ἡ μὲν τῆς ἱριδος ἀνάκλασις ἡ μὲν πρώτη τοιαύτην
ἔχειν φαίνεται τὴν χροάν (ἀπὸ ρανίδων γὰρ μικρῶν γίνεται ἡ
ἀνάκλασις), ἡ δὲ τῆς ἄλω οὐ. περὶ δὲ τῶν ἄλλων χρωμάτων ὕστερον
ἐροῦμεν. ἔτι δὲ περὶ αὐτὸν μὲν τὸν ἥλιον οὐ γίνεται διατριβὴ
τοιαύτης συστάσεως, ἀλλ’ ἡ ὑεὶ ἢ διαλύεται. ἐκ δὲ τῶν ἐναντίων ἐν
τῷ μεταξὺ τῆς τοῦ ὕδατος γενέσεως γίνεταί τις χρόνος· τούτου γὰρ
μὴ συμβαίνοντος ἦσαν ἂν κεχρωματισμέναι αἱ ἄλλως ὥσπερ ἡ ἴρις.
νῦν δ’ ὅλα μὲν οὐ γίνεται τοιαύτην ἔχοντα τὴν ἔμφασιν, οὐδὲ
κύκλω, μικρὰ δὲ καὶ κατὰ μόριον, αἱ καλοῦνται ῥάβδοι, ἐπεὶ εἰ
συνίστατο τοιαύτη ἀχλὺς οἷα γένοιτ’ ἂν ὕδατος ἢ τινος ἄλλου

μέλανος, καθάπερ λέγομεν, ἐφαίνετο ἂν ἡ ἴρις ὅλη, ὥσπερ ἡ περὶ τοὺς λύχνους. περὶ γὰρ τούτους τὰ πλεῖστα νοτίων ὄντων ἴρις γίγνεται τοῦ χειμῶνος, μάλιστα δὲ δήλη γίγνεται τοῖς ὑγροὺς ἔχουσι τοὺς ὀφθαλμούς· τούτων γὰρ ἡ ὄψις ταχὺ δι' ἀσθένειαν ἀνακλᾶται. γίγνεται δ' ἀπὸ τε τῆς τοῦ ἀέρος ὑγρότητος καὶ ἀπὸ λιγνύος τῆς ἀπὸ τῆς φλογὸς ἀπορρεοῦσης καὶ μειγνυμένης· τότε γὰρ γίγνεται ἔνοπτρον, καὶ διὰ τὴν μελανίαν· καπνώδης γὰρ ἡ λιγνύς· τὸ δὲ τοῦ λύχνου φῶς οὐ λευκὸν ἀλλὰ πορφυροῦν φαίνεται κύκλῳ καὶ ἱριῶδες, φοινικοῦν δ' οὐ· ἔστι γὰρ ἢ τε ὄψις ὀλίγη ἢ ἀνακλωμένη, καὶ μέλαν τὸ ἔνοπτρον. ἡ δ' ἀπὸ τῶν κωπῶν τῶν ἀναφερομένων ἐκ τῆς θαλάττης ἴρις τῇ μὲν θέσει τὸν αὐτὸν γίγνεται τρόπον τῇ ἐν τῷ οὐρανῷ, τὸ δὲ χρῶμα ὁμοιοτέρα τῇ περὶ τοὺς λύχνους· οὐ γὰρ φοινικὴν ἀλλὰ πορφυρᾶν ἔχουσα φαίνεται τὴν χροάν. ἡ δ' ἀνάκλασις ἀπὸ τῶν μικροτάτων μὲν συνεχῶν δὲ γίγνεται ῥανίδων· αὗται δ' ὕδωρ ἀποκεκριμένον εἰσὶν ἤδη παντελῶς. γίγνεται δὲ κἂν [374b] τις λεπταῖς ῥαίνῃ ῥανίσιν εἰς τι τοιοῦτον χωρίον ὃ τὴν θέσιν πρὸς τὸν ἥλιον ἐστραμμένον ἐστὶ καὶ τῇ μὲν ὁ ἥλιος ἀνέχῃ τῇ δὲ σκιάζῃ· ἐν τῷ τοιούτῳ γάρ, ἐὰν εἴσω τις ῥαίνῃ, τῷ ἐστῶτι ἐκτός, ἢ ἐπαλλάττουσιν αἱ ἀκτῖνες καὶ ποιοῦσι τὴν σκιάν, φαίνεται ἴρις. ὁ δὲ τρόπος καὶ ἡ χροά ὁμοία καὶ τὸ αἷτιον τὸ αὐτὸ τῇ ἀπὸ τῶν κωπῶν· τῇ γὰρ χειρὶ κώπη χρῆται ὁ ῥαίνων. ὅτι δὲ τὸ χρῶμα τοιοῦτον, ἅμα δῆλον ἔσται καὶ περὶ τῶν ἄλλων χρωμάτων τῆς φαντασίας, ἐκ τῶνδε. δεῖ γὰρ νοήσαντας, ὥσπερ εἴρηται, καὶ ὑποθεμένους πρῶτον μὲν ὅτι τὸ λαμπρὸν ἐν τῷ μέλανι ἢ διὰ τοῦ μέλανος χρῶμα ποιεῖ φοινικοῦν, δεῦτερον δ' ὅτι ἡ ὄψις ἐκτεινομένη ἀσθενεστέρα γίγνεται καὶ ἐλάττων, τρίτον δ' ὅτι τὸ μέλαν οἶον ἀπόφασις ἐστίν· τῷ γὰρ ἐκλείπειν τὴν ὄψιν φαίνεται μέλαν· διὸ τὰ πόρρω πάντα μελάντερα φαίνεται, διὰ τὸ μὴ διικνεῖσθαι τὴν ὄψιν. θεωρεῖσθω μὲν οὖν ταῦτ' ἐκ τῶν περὶ τὰς αἰσθήσεις συμβαινόντων· ἐκείνων γὰρ ἴδιοι οἱ περὶ τούτων λόγοι· νῦν δ' ὅσον ἀνάγκη, τοσοῦτον περὶ αὐτῶν λέγωμεν. φαίνεται δ' οὖν διὰ ταύτην τὴν αἰτίαν τὰ τε πόρρω μελάντερα καὶ ἐλάττω καὶ λειότερα, καὶ τὰ ἐν τοῖς ἐνόπτροις, καὶ τὰ νέφη μελάντερα βλέπουσιν εἰς τὸ ὕδωρ ἢ εἰς αὐτὰ τὰ νέφη. καὶ τοῦτο πάννυ ἐπιδήλως· διὰ γὰρ τὴν [374b.22] ἀνάκλασιν ὀλίγη τῇ ὄψει θεωροῦνται. διαφέρει δ' οὐδὲν τὸ ὁρώμενον μεταβάλλειν ἢ τὴν ὄψιν· ἀμφοτέρως γὰρ ἔσται ταυτόν. πρὸς δὲ τούτοις δεῖ μὴ λεληθέναι καὶ τόδε· συμβαίνει γὰρ ὅταν ἢ τοῦ ἡλίου νέφος πλησίον, εἰς μὲν αὐτὸ

βλέποντι μηδὲν φαίνεσθαι κεχρωματισμένον ἀλλ' εἶναι λευκόν, ἐν δὲ τῷ ὕδατι αὐτὸ τοῦτο θεωροῦντι χρῶμά τι ἔχειν τῆς ἱριδος. δηλον τοῖνυν ὅτι ἡ ὄψις ὥσπερ καὶ τὸ μέλαν κλωμένη δι' ἀσθένειαν μελάντερον ποιεῖ φαίνεσθαι, καὶ τὸ λευκὸν ἥττον λευκόν, καὶ προσάγει πρὸς τὸ μέλαν. ἡ μὲν οὖν ἰσχυροτέρα ὄψις εἰς φοινικοῦν χρῶμα μετέβαλεν, ἡ δ' ἐχομένη εἰς τὸ πράσινον, ἡ δὲ ἔτι ἀσθενεστέρα εἰς τὸ ἀλουργόν. ἐπὶ δὲ τὸ πλέον οὐκέτι φαίνεται, ἀλλ' ἐν τοῖς τρισίν, ὥσπερ καὶ τῶν ἄλλων τὰ πλεῖστα, καὶ τούτων ἔσχεν τέλος· τῶν δ' ἄλλων ἀναίσθητος ἡ μεταβολή. διὸ καὶ ἡ [375a] ἱρίς τρίχρως φαίνεται, ἑκατέρα μὲν, ἐναντίως δέ. ἡ μὲν οὖν πρώτη τὴν ἔξω φοινικὴν ἔχει· ἀπὸ μεγίστης γὰρ περιφερείας πλείστη προσπίπτει ὄψις πρὸς τὸν ἥλιον, μεγίστη δ' ἡ ἔξω· ἡ δ' ἐχομένη καὶ ἡ τρίτη ἀνάλογον. ὥστ' εἰ τὰ περὶ τῶν χρωμάτων τῆς φαντασίας εἴρηται καλῶς, ἀνάγκη τρίχρων τε εἶναι αὐτὴν καὶ τούτοις τοῖς χρώμασι κεχρῶσθαι μόνοις. τὸ δὲ ξανθὸν φαίνεται διὰ τὸ παρ' ἄλληλα φαίνεσθαι. τὸ γὰρ φοινικοῦν παρὰ τὸ πράσινον λευκὸν φαίνεται. σημεῖον δὲ τούτου· ἐν γὰρ τῷ μελαντάτῳ νέφει μάλιστα ἄκρατος γίνεταί ἱρίς· συμβαίνει δὲ τότε ξανθότερον εἶναι δοκεῖν τὸ φοινικοῦν. ἔστι δὲ τὸ ξανθὸν ἐν τῇ ἱρίδι χρῶμα μετὰ τοῦ τε φοινικοῦ καὶ πρασίνου χρώματος. διὰ τὴν μελανίαν οὖν τοῦ κύκλω νέφους ὅλον αὐτοῦ φαίνεται τὸ φοινικοῦν λευκόν· ἔστι γὰρ πρὸς ἐκεῖνα λευκόν. καὶ πάλιν ἀπομαραιομένης τῆς ἱριδος ἐγγύτατα, ὅταν λύηται τὸ φοινικοῦν· ἡ γὰρ νεφέλη λευκὴ οὖσα, προσπίπτουσα παρὰ τὸ πράσινον, μεταβάλλει εἰς τὸ ξανθόν. μέγιστον δὲ σημεῖον τούτων ἡ ἀπὸ τῆς σελήνης ἱρίς· φαίνεται γὰρ λευκὴ πάμπαν. γίνεταί δὲ τοῦτο ὅτι ἐν τε τῷ νέφει ζοφερῷ φαίνεται καὶ ἐν νυκτί. ὥσπερ οὖν πῦρ ἐπὶ πῦρ, μέλαν παρὰ μέλαν ποιεῖ τὸ ἡρέμα λευκὸν παντελῶς φαίνεσθαι λευκόν· τοῦτο δ' ἐστὶν τὸ φοινικοῦν. γίνεταί δὲ τοῦτο τὸ πάθος καταφανὲς καὶ ἐπὶ τῶν ἀνθῶν· ἐν γὰρ τοῖς ὑφάσμασιν καὶ ποικίλμασιν ἀμύθητον διαφέρει τῇ φαντασίᾳ ἄλλα παρ' ἄλλα τιθέμενα τῶν χρωμάτων, οἷον καὶ τὰ πορφυρᾶ ἐν λευκοῖς ἢ μέλασιν ἐρίοις, ἔτι δ' ἐν αὐγῇ τοιαδὶ ἢ τοιαδί· διὸ καὶ οἱ ποικιλαῖ φασὶ διαμαρτάνειν ἐργαζόμενοι πρὸς τὸν λύχνον πολλάκις τῶν ἀνθῶν, λαμβάνοντες ἕτερα ἀνθ' ἐτέρων. διότι μὲν οὖν τρίχρως τε, καὶ ὅτι ἐκ τούτων φαίνεται τῶν χρωμάτων μόνων ἡ ἱρίς, εἴρηται. διπλῇ δὲ καὶ ἀμαυροτέρα τοῖς χρώμασιν ἢ περιέχουσα, καὶ τῇ θέσει τὰς χροὰς ἐξ ἐναντίας ἔχει κειμένας διὰ τὴν αὐτὴν αἰτίαν· μακροτέρα γὰρ

ἀποτεινομένη ἢ ὅψις ὥσπερ τὸ πορρώτερον ὄρθ, καὶ τὸ ἐνταῦθα τὸν αὐτὸν τρόπον. ἀσθενεστέρα οὖν ἀπὸ τῆς ἔξωθεν ἢ [375b] ἀνάκλασις γίγνεται διὰ τὸ πορρώτερον ποιεῖσθαι τὴν ἀνάκλασιν, ὥστ' ἐλάττων προσπίπτουσα τὰ χρώματα ποιεῖ ἀμαυρότερα φαίνεσθαι. καὶ ἀντεστραμμένως δὴ διὰ τὸ πλείω ἀπὸ τῆς ἐλάττονος καὶ τῆς ἐντὸς περιφερείας προσπίπτειν πρὸς τὸν ἥλιον· ἐγγυτέρω γὰρ τῆς ὀψεως οὕσα ἀνακλᾶται ἀπὸ τῆς ἐγγυτάτῳ περιφερείας τῆς πρώτης ἱριδος. ἐγγυτάτῳ δὲ ἐν τῇ ἔξωθεν ἱριδι ἢ ἐλαχίστη περιφέρεια, ὥστε αὕτη ἔξει τὸ χρῶμα φοινικοῦν· ἢ δ' ἐχομένη καὶ ἡ τρίτη κατὰ λόγον. ἢ ἔξω ἱρις ἐφ' ᾧ τὸ Β· ἢ ἔσω, ἢ πρώτη, ἐφ' ᾧ τὸ Α· τὰ χρώματα δ', ἐφ' ᾧ τὸ Γ, φοινικοῦν, ἐφ' ᾧ τὸ Δ, πράσινον, ἐφ' ᾧ Ε, ἀλουργόν· τὸ ξανθὸν δὲ φαίνεται ἐφ' οὗ τὸ Ζ. τρεῖς δ' οὐκέτι γίνονται, οὐδὲ πλείους ἱριδες, διὰ τὸ καὶ τὴν δευτέραν γίνεσθαι ἀμαυροτέραν, ὥστε καὶ τὴν τρίτην ἀνάκλασιν πάμπαν ἀσθενῇ γίνεσθαι καὶ ἀδυνατεῖν ἀφικνεῖσθαι πρὸς τὸν ἥλιον.

ταῖς εἰρημέναις. γίγνεται γὰρ παρήλιος μὲν ἀνακλωμένης τῆς ὄψεως πρὸς τὸν ἥλιον, ῥάβδοι δὲ διὰ τὸ προσπίπτειν τοιαύτην οὖσαν τὴν ὄψιν, οἷαν εἶπομεν ἀεὶ γίνεσθαι ὅταν πλησίον ὄντων τοῦ ἡλίου νεφῶν ἀπὸ τινος ἀνακλασθῇ τῶν ὑγρῶν πρὸς τὸ νέφος· φαίνεται γὰρ αὐτὰ μὲν [377b] ἀχρωμάτιστα τὰ νέφη κατ' εὐθυωρίαν εἰσβλέπουσιν, ἐν δὲ τῷ ὕδατι ῥάβδων μεστὸν τὸ νέφος· πλὴν τότε μὲν ἐν τῷ ὕδατι δοκεῖ τὸ χρῶμα τοῦ νέφους εἶναι, ἐν δὲ ταῖς ῥάβδοις ἐπ' αὐτοῦ τοῦ νέφους. γίγνεται δὲ τοῦτο ὅταν ἀνώμαλος ἡ τοῦ νέφους ἢ σύστασις, καὶ τῇ μὲν πυκνότερον τῇ δὲ μανόν, καὶ τῇ μὲν ὑδατωδέστερον τῇ δ' ἥττον· ἀνακλασθείσης γὰρ τῆς [τοῦ ἡλίου] ὄψεως πρὸς τὸν ἥλιον, τὸ σχῆμα μὲν οὐχ ὁρᾶται [διὰ μικρότητα τῶν ἐνόπτρων], τὸ δὲ χρῶμα· διὰ δὲ τὸ ἐν ἀνωμάλῳ φαίνεσθαι λαμπρὸν καὶ λευκὸν τὸν ἥλιον, πρὸς ὃν ἀνεκλάσθη ἡ ὄψις, τὸ μὲν φοινικοῦν φαίνεται, τὸ δὲ πράσινον ἢ ξανθόν. διαφέρει γὰρ οὐδὲν διὰ τοιούτων ὁρᾶν ἢ ἀπὸ τοιούτων ἀνακλωμένην· ἀμφοτέρως γὰρ φαίνεται τὴν χροάν ὅμοιον, ὥστ' εἰ κακείνως φοινικοῦν, καὶ οὕτως. αἱ μὲν οὖν ῥάβδοι γίνονται δι' ἀνωμαλίαν τοῦ ἐνόπτρου οὐ τῷ σχήματι ἀλλὰ τῷ χρώματι· ὁ δὲ παρήλιος, ὅταν ὅτι μάλιστα ὁμαλὸς ἢ ὁ ἀῆρ καὶ πυκνὸς ὁμοίως· διὸ φαίνεται λευκός. ἡ μὲν γὰρ ὁμαλότης τοῦ ἐνόπτρου ποιεῖ χροάν μίαν τῆς ἐμφάσεως· ἡ δ' ἀνάκλασις ἀθρόας τῆς ὄψεως, διὰ τὸ ἅμα προσπίπτειν πρὸς τὸν ἥλιον ἀπὸ πυκνῆς οὖσης τῆς ἀχλύος, [διὰ] καὶ οὐπω μὲν οὖσης ὕδωρ ἐγγὺς δ' ὕδατος, τὸ ὑπάρχον τῷ ἡλίῳ ἐμφαίνεσθαι χρῶμα ποιεῖ, ὥσπερ ἀπὸ χαλκοῦ λείου κλωμένην διὰ τὴν πυκνότητα. ὥστ' ἐπεὶ τὸ χρῶμα τοῦ ἡλίου λευκόν, καὶ ὁ παρήλιος φαίνεται λευκός. διὰ δὲ τὸ αὐτὸ τοῦτο μᾶλλον ὕδατος σημεῖον ὁ παρήλιος τῶν ῥάβδων· μᾶλλον γὰρ συμβαίνει τὸν ἀέρα εὐεργῶς ἔχειν πρὸς γένεσιν ὕδατος. ὁ δὲ νότιος τοῦ βορείου μᾶλλον, ὅτι μᾶλλον ὁ νότιος ἀῆρ εἰς ὕδωρ μεταβάλλει τοῦ πρὸς ἄρκτον. γίνονται δ', ὥσπερ εἶπομεν, περὶ τε δυσμᾶς καὶ περὶ τὰς ἀνατολάς, καὶ οὔτε ἄνωθεν οὔτε κάτωθεν, ἀλλ' ἐκ τῶν πλαγίων καὶ ῥάβδοι καὶ παρήλιοι· καὶ οὗτ' ἐγγὺς τοῦ ἡλίου λίαν οὔτε πόρρω παντελῶς· ἐγγὺς μὲν γὰρ οὖσαν ὁ ἥλιος διαλύει τὴν σύστασιν, πόρρω δ' οὖσης ἡ ὄψις οὐκ ἀνακλασθήσεται· ἀπὸ γὰρ μικροῦ ἐνόπτρου πόρρω ἀποτεينوμένη ἀσθενὴς γίγνεται· διὸ καὶ αἱ ἄλλως οὐ γίνονται ἐξ ἐναντίας τοῦ ἡλίου. ἄνω [378a] μὲν οὖν ἐὰν γίγνηται καὶ ἐγγὺς, διαλύσει ὁ ἥλιος· ἐὰν δὲ πόρρω, ἐλάττων ἢ ὄψις οὖσα ἢ ὥστε ποιεῖν ἀνάκλασιν οὐ [ὑπὸ τὸν ἥλιον] προσπεσεῖται. ἐν

δὲ τῷ πλαγίῳ ἐστὶ τοσοῦτον ἀποστῆναι τὸ ἔνοπτρον, ὥστε μήτε τὸν ἥλιον διαλῦσαι, τὴν τε ὄψιν ἀθρόαν ἐλθεῖν, διὰ τὸ πρὸς τὴν γῆν φερομένην μὴ διασπᾶσθαι ὥσπερ δι' ἀχανοῦς φερομένην. ὑπὸ δὲ τὸν ἥλιον οὐ γίγνεται διὰ τὸ πλησίον μὲν τῆς γῆς διαλύεσθαι ἂν ὑπὸ τοῦ ἡλίου, ἄνω δὲ μεσουρανίου <γιγνομένης συστάσεως> τὴν ὄψιν διασπᾶσθαι. καὶ ὅλως οὐδ' ἐκ πλαγίου μεσουρανίου γίγνεται· ἡ γὰρ ὄψις οὐχ ὑπὸ τὴν γῆν φέρεται, ὥστε ὀλίγη ἀφικνεῖται πρὸς τὸ ἔνοπτρον, καὶ ἡ ἀνακλωμένη γίγνεται πάμπαν ἀσθενής. ὅσα μὲν οὖν ἔργα συμβαίνει παρέχεσθαι τὴν ἔκκρισιν ἐν τοῖς τόποις τοῖς ὑπὲρ τῆς γῆς, σχεδὸν ἐστὶ τοσαῦτα καὶ τοιαῦτα.

ὅσα δ' ἐν αὐτῇ τῇ γῇ, ἐγκατακλειομένη τοῖς τῆς γῆς μέρεσιν, ἀπεργάζεται, λεκτέον. ποιεῖ γὰρ δύο διαφορὰς σωμάτων διὰ τὸ διπλῇ πεφυκέναι καὶ αὐτῇ, καθάπερ καὶ ἐν τῷ μετεώρῳ· δύο μὲν γὰρ αἱ ἀναθυμιάσεις, ἡ μὲν ἀτμιδώδης ἡ δὲ καπνώδης, ὥς φαμεν, εἰσὶν· δύο δὲ καὶ τὰ εἶδη τῶν ἐν τῇ γῇ γιγνομένων, τὰ μὲν ὀρυκτὰ τὰ δὲ μεταλλευτά. ἡ μὲν οὖν ξηρὰ ἀναθυμίασις ἐστὶν ἢ τις ἐκπυροῦσα ποιεῖ τὰ ὀρυκτὰ πάντα, οἷον λίθων τε γένη τὰ [378a.23] ἄτηκτα καὶ σανδαράκην καὶ ὄχραν καὶ μίλτον καὶ θεῖον καὶ τᾶλλα τὰ τοιαῦτα. τὰ δὲ πλεῖστα τῶν ὀρυκτῶν ἐστὶν τὰ μὲν κονία κεχρωματισμένη, τὰ δὲ λίθος ἐκ τοιαύτης γεγρονῶς συστάσεως, οἷον τὸ κιννάβαρι. τῆς δ' ἀναθυμιάσεως τῆς ἀτμιδώδους, ὅσα μεταλλεύεται, καὶ ἔστιν ἡ χυτὰ ἡ ἐλατά, οἷον σίδηρος, χρυσός, χαλκός. ποιεῖ δὲ ταῦτα πάντα ἡ ἀναθυμίασις ἡ ἀτμιδώδης ἐγκατακλειομένη, καὶ μάλιστα ἐν τοῖς λίθοις, διὰ ξηρότητα εἰς ἓν συνθλιβομένη καὶ πηγνυμένη, οἷον ἡ δρόσος ἡ πάχνη, ὅταν ἀποκριθῇ. ἐνταῦθα δὲ πρὶν ἀποκριθῆναι γεννᾶται ταῦτα. διὸ ἔστι μὲν ὡς ὕδωρ ταῦτα, ἔστιν δ' ὡς οὐ· δυνάμει μὲν γὰρ ἡ ὕλη ὕδατος ἦν, ἔστι δ' οὐκέτι, οὐδ' ἐξ ὕδατος γενομένου διά τι πάθος, ὥσπερ [378b] οἱ χυμοί· οὐδὲ γὰρ οὕτω γίγνεται τὸ μὲν χαλκὸς τὸ δὲ χρυσός, ἀλλὰ πρὶν γενέσθαι παγείσης τῆς ἀναθυμιάσεως ἕκαστα τούτων ἐστίν. διὸ καὶ πυροῦται πάντα καὶ γῆν ἔχει· ξηρὰν γὰρ ἔχει ἀναθυμίασιν· ὁ δὲ χρυσὸς μόνος οὐ πυροῦται. κοινῇ μὲν οὖν εἴρηται περὶ αὐτῶν ἀπάντων, ἰδίᾳ δὲ σκεπτέον προχειριζομένοις περὶ ἕκαστον γένος.

Βιβλίον Δ' Ἐπεὶ δὲ τέτταρα αἰτία διώρισται τῶν στοιχείων, τούτων δὲ κατὰ συζυγίας καὶ τὰ στοιχεῖα τέτταρα συμβέβηκεν εἶναι, ὧν τὰ μὲν δύο ποιητικά, τὸ θερμὸν καὶ τὸ ψυχρόν, τὰ δὲ δύο παθητικά, τὸ ξηρὸν καὶ τὸ ὑγρόν· ἡ δὲ πίστις τούτων ἐκ τῆς ἐπαγωγῆς·

φαίνεται γὰρ ἐν πᾶσιν ἢ μὲν θερμότης καὶ ψυχρότης ὀρίζουσαι καὶ συμφύουσαι καὶ μεταβάλλουσαι τὰ θ' ὁμογενῇ καὶ τὰ μὴ ὁμογενῇ, καὶ ὑγραίνουσαι καὶ ξηραίνουσαι καὶ σκληρύνουσαι καὶ μαλάττουσαι, τὰ δὲ ξηρὰ καὶ ὑγρὰ ὀριζόμενα καὶ τᾶλλα τὰ εἰρημένα πάθη πάσχοντα αὐτὰ τε καθ' αὐτὰ καὶ ὅσα κοινὰ ἐξ ἀμφοῖν σώματα συνέστηκεν· ἔτι δ' ἐκ τῶν λόγων δηλόν, οἷς ὀριζόμεθα τὰς φύσεις αὐτῶν· τὸ μὲν γὰρ θερμὸν καὶ ψυχρὸν ὡς ποιητικὰ λέγομεν (τὸ γὰρ συγκριτικὸν ὥσπερ ποιητικόν τί ἐστι), τὸ δὲ ὑγρὸν καὶ ξηρὸν παθητικόν (τὸ γὰρ εὐόριστον καὶ δυσόριστον τῷ πάσχειν τι λέγεται τὴν φύσιν αὐτῶν)· ὅτι μὲν οὖν τὰ μὲν ποιητικὰ τὰ δὲ παθητικά, φανερόν· διωρισμένων δὲ τούτων ληπτέον ἂν εἴη τὰς ἐργασίας αὐτῶν, αἷς ἐργάζονται τὰ ποιητικά, καὶ τῶν παθητικῶν τὰ εἶδη. πρῶτον μὲν οὖν καθόλου ἡ ἀπλῇ γένεσις καὶ ἡ φυσικὴ μεταβολὴ τούτων τῶν δυνάμεων ἐστὶν ἔργον, καὶ ἡ ἀντικειμένη φθορὰ κατὰ φύσιν. αὗται μὲν οὖν τοῖς τε φυτοῖς ὑπάρχουσι καὶ ζώοις καὶ τοῖς μέρεσιν αὐτῶν. ἔστι δ' ἡ ἀπλῇ καὶ ἡ φυσικὴ γένεσις μεταβολὴ ὑπὸ τούτων τῶν δυνάμεων, ὅταν ἔχωσι λόγον, ἐκ τῆς ὑποκειμένης ὕλης ἐκάστη φύσει· αὗται δ' εἰσὶν αἱ εἰρημέναι δυνάμεις παθητικάι. [379a] γεννῶσι δὲ τὸ θερμὸν καὶ ψυχρὸν κρατοῦντα τῆς ὕλης· ὅταν δὲ μὴ κρατῇ, κατὰ μέρος μὲν μόλυνσις καὶ ἀπεψία γίγνεται. τῇ δ' ἀπλῇ γενέσει ἐναντίον μάλιστα κοινὸν σῆψις· πᾶσα γὰρ ἡ κατὰ φύσιν φθορὰ εἰς τοῦθ' ὁδὸς ἐστίν, οἷον γῆρας καὶ αὐανσις. τέλος δὲ πάντων τῶν ἄλλων τούτων σαπρότης, ἐὰν μὴ τι βία φθαρῇ τῶν φύσει συνεστώτων· ἔστιν γὰρ καὶ σάρκα καὶ ὅστουν καὶ ὀτιοῦν κατακαῦσαι, ὣν τὸ τέλος τῆς κατὰ φύσιν φθορᾶς σῆψις ἐστίν. διὸ ὑγρὰ πρῶτον, εἴτα ξηρὰ τέλος γίγνεται τὰ σηπόμενα· ἐκ τούτων γὰρ ἐγένετο, καὶ ὥρισθῇ τῷ ὑγρῷ τὸ ξηρὸν ἐργαζομένων τῶν ποιητικῶν. γίγνεται δ' ἡ φθορὰ ὅταν κρατῇ τοῦ ὀρίζοντος τὸ ὀριζόμενον διὰ τὸ περιέχον. (οὐ μὴν ἄλλ' ἰδίως γε λέγεται σῆψις ἐπὶ τῶν κατὰ μέρος φθειρομένων, ὅταν χωρισθῇ τῆς φύσεως.) διὸ καὶ σήπεται πάντα τᾶλλα πλὴν πυρός· καὶ γὰρ γῆ καὶ ὕδωρ καὶ ἀήρ σήπεται· πάντα γὰρ ὕλη τῷ πυρί ἐστι ταῦτα. σῆψις δ' ἐστὶν φθορὰ τῆς ἐν ἐκάστῳ ὑγρῷ οἰκείας καὶ κατὰ φύσιν θερμότητος ὑπ' ἀλλοτρίας θερμότητος· αὕτη δ' ἐστὶν ἡ τοῦ περιέχοντος. ὥστε ἐπεὶ κατ' ἐνδειαν πάσχει θερμοῦ, ἐνδεὲς δὲ ὄν τοιαύτης δυνάμεως ψυχρὸν πᾶν, ἄμφω ἂν αἷτια εἴη, καὶ κοινὸν τὸ πάθος ἡ σῆψις, ψυχρότητός τε οἰκείας καὶ θερμότητος ἀλλοτρίας. διὰ τοῦτο γὰρ καὶ ξηρότερα γίγνεται τὰ σηπόμενα πάντα,

καὶ τέλος γῆ καὶ κόπρος· ἐξιόντος γὰρ τοῦ οἰκείου θερμοῦ συνεξατμίζεται τὸ κατὰ φύσιν ὑγρὸν, καὶ τὸ σπῶν τὴν ὑγρότητα οὐκ ἔστιν· ἐπάγει γὰρ ἔλκουσα ἡ οἰκεία θερμότης. καὶ ἐν τοῖς ψύχεσι δ' ἥττον σήπεται ἢ ἐν ταῖς ἀλέαις (ἐν μὲν γὰρ τῷ χειμῶνι ὀλίγον ἐν τῷ περιέχοντι ἀέρι καὶ ὕδατι τὸ θερμόν, ὥστ' οὐδὲν ἰσχύει, ἐν δὲ τῷ θέρει πλεόν)· καὶ οὔτε τὸ πεπηγός (μᾶλλον γὰρ ψυχρὸν ἢ ὁ ἀήρ θερμόν· οὐκ οὐν κρατεῖται, τὸ δὲ κινεῖν κρατεῖ) οὔτε τὸ ζέον ἢ θερμόν (ἐλάττων γὰρ ἢ ἐν τῷ ἀέρι θερμότης τῆς ἐν τῷ πράγματι, ὥστ' οὐ κρατεῖ οὐδὲ ποιεῖ μεταβολὴν οὐδεμίαν). ὁμοίως δὲ καὶ τὸ κινούμενον καὶ ῥέον ἥττον σήπεται τοῦ ἀκινήζοντος· ἀσθενεστέρα γὰρ γίγνεται ἢ ὑπὸ τῆς ἐν τῷ ἀέρι θερμότητος κίνησις τῆς ἐν τῷ [379b] πράγματι προϋπαρχούσης, ὥστε οὐδὲν ποιεῖ μεταβάλλειν. ἢ δ' αὐτὴ αἰτία καὶ τοῦ τὸ πολὺ ἥττον τοῦ ὀλίγου σήπεσθαι· ἐν γὰρ τῷ πλεόνι πλεόν ἐστὶν πῦρ οἰκεῖον καὶ ψυχρὸν ἢ ὥστε κρατεῖν τὰς ἐν τῷ περιεστώτι δυνάμεις. διὸ ἡ θάλαττα κατὰ μέρος μὲν διαιρουμένη ταχὺ σήπεται, ἅπανσα δ' οὐ, καὶ τᾶλλα ὕδατα ὡσαύτως. καὶ ζῶα ἐγγίγνεται τοῖς σηπομένοις διὰ τὸ τὴν ἀποκεκριμένην θερμότητα φυσικὴν οὕσαν συνιστάναι τὰ ἐκκριθέντα. τί μὲν οὖν ἐστὶ γένεσις καὶ τί φθορά, εἴρηται.

λοιπὸν δ' εἰπεῖν τὰ ἐχόμενα εἶδη, ὅσα αἱ εἰρημέναι δυνάμεις ἐργάζονται ἐξ ὑποκειμένων τῶν φύσει συνεστώτων ἤδη. ἔστι δὴ θερμοῦ μὲν πέψις, πέψεως δὲ πέπανσις, ἔψησις, ἔτι ὀπτησις· ψυχρότητος δὲ ἀπεψία, ταύτης δὲ ὠμότης, μόλυνσις, στάτευσις. δεῖ δὲ ὑπολαμβάνειν μὴ κυρίως ταῦτα λέγεσθαι τὰ ὀνόματα τοῖς πράγμασιν, ἀλλ' οὐ κεῖται καθόλου τοῖς ὁμοίοις, ὥστε οὐ ταῦτα ἀλλὰ τοιαῦτα δεῖ νομίζειν εἶναι τὰ εἰρημένα εἶδη. εἴπωμεν δ' αὐτῶν ἕκαστον τί ἐστίν. πέψις μὲν οὖν ἐστὶν τελείωσις ὑπὸ τοῦ φυσικοῦ καὶ οἰκείου θερμοῦ ἐκ τῶν ἀντικειμένων παθητικῶν· ταῦτα δ' ἐστὶν ἡ οἰκεία ἐκάστῳ ὕλη. ὅταν γὰρ πεφθῇ, τετελειώται τε καὶ γέγονεν. καὶ ἡ ἀρχὴ τῆς τελειώσεως ὑπὸ θερμότητος τῆς οἰκείας συμβαίνει, κἂν διὰ τινος τῶν ἐκτὸς βοηθείας συνεπιτελεσθῇ, οἷον ἡ τροφὴ συμπέττεται καὶ διὰ λουτρῶν καὶ δι' ἄλλων τοιούτων· ἀλλ' ἢ γε ἀρχὴ ἢ ἐν αὐτῷ θερμότης ἐστίν. τὸ δὲ τέλος τοῖς μὲν ἢ φύσις ἐστίν, φύσις δὲ ἦν λέγομεν ὡς εἶδος καὶ οὐσίαν· τοῖς δὲ εἰς ὑποκειμένην τινὰ μορφήν τὸ τέλος ἐστὶ τῆς πέψεως, ὅταν τοιονδὶ γένηται καὶ τοσονδὶ τὸ ὑγρὸν ἢ ὀπτώμενον ἢ ἐψόμενον ἢ σηπόμενον ἢ ἄλλως πως θερμαινόμενον· τότε γὰρ χρήσιμόν ἐστι καὶ πεπέφθαι φαμέν,

ὥσπερ τὸ γλεῦκος καὶ τὰ ἐν τοῖς φύμασιν συνιστάμενα, ὅταν γένηται πύον, καὶ τὸ δάκρυον, ὅταν γένηται λήμη· ὁμοίως δὲ καὶ τᾶλλα. συμβαίνει δὲ τοῦτο πάσχειν ἅπασιν, ὅταν κρατηθῇ ἡ ὕλη καὶ ἡ ὑγρότης· αὕτη γὰρ ἐστὶν ἡ ὀριζομένη ὑπὸ τῆς ἐν τῇ φύσει θερμότητος. ἕως γὰρ ἂν ἐνῇ ἐν αὐτῇ ὁ λόγος, φύσις τοῦτ' ἐστίν. [380a] διὸ καὶ ὑγιείας σημεῖα τὰ τοιαῦτα, καὶ οὖρα καὶ ὑποχωρήσεις καὶ ὅλως τὰ περιττώματα. καὶ λέγεται πεπέφθαι, ὅτι δηλοῖ κρατεῖν τὴν θερμότητα τὴν οἰκείαν τοῦ ἀορίστου. ἀνάγκη δὲ τὰ πεττόμενα παχύτερα καὶ θερμότερα εἶναι· τοιοῦτον γὰρ ἀποτελεῖ τὸ θερμόν, εὐογκότερον καὶ παχύτερον καὶ ξηρότερον. πέψις μὲν οὖν τοῦτο ἐστίν· ἀπεψία δὲ ἀτέλεια δι' [380a.7] ἔνδειαν τῆς οἰκείας θερμότητος (ἡ δὲ ἔνδεια τῆς θερμότητος ψυχρότης ἐστίν)· ἡ δ' ἀτέλειά ἐστιν τῶν ἀντικειμένων παθητικῶν, ἥπερ ἐστὶν ἐκάστω φύσει ὕλη. πέψις μὲν οὖν καὶ ἀπεψία διωρίσθω τοῦτον τὸν τρόπον.

πέπανσις δ' ἐστὶν πέψις τις· ἡ γὰρ τῆς ἐν τοῖς περικαρπίοις τροφῆς πέψις πέπανσις λέγεται. ἐπεὶ δ' ἡ πέψις τελέωσις, τότε ἡ πέπανσις τελέα ἐστὶν ὅταν τὰ ἐν τῷ περικαρπίῳ σπέρματα δύνηται ἀποτελεῖν τοιοῦτον ἕτερον οἶον αὐτό· καὶ γὰρ ἐπὶ τῶν ἄλλων τὸ τέλος οὕτω λέγομεν. περικαρπίου μὲν οὖν αὕτη πέπανσις, λέγεται δὲ καὶ ἄλλα πολλὰ πέποννα τῶν πεπεμμένων, κατὰ μὲν τὴν αὐτὴν ιδέαν, μεταφοραῖς δέ, διὰ τὸ μὴ κεῖσθαι, καθάπερ εἴρηται καὶ πρότερον, ὀνόματα καθ' ἐκάστην τελείωσιν περὶ τὰ ὀριζόμενα ὑπὸ τῆς φυσικῆς θερμότητος καὶ ψυχρότητος. ἔστιν δὲ ἡ φυμάτων καὶ φλέγματος καὶ τῶν τοιούτων πέπανσις ἡ ὑπὸ τοῦ φυσικοῦ θερμοῦ τοῦ ἐνόντος ὑγροῦ πέψις· ἀδύνατον γὰρ ὀρίζειν μὴ κρατοῦν. ἐκ μὲν οὖν τῶν πνευματικῶν ὕδατῶδη, ἐκ δὲ τῶν τοιούτων τὰ γεηρὰ συνίσταται, καὶ ἐκ λεπτῶν αἰεὶ παχύτερα γίγνεται πεπαινόμενα πάντα. καὶ τὰ μὲν εἰς αὐτὴν ἡ φύσις ἄγει κατὰ τοῦτο, τὰ δὲ ἐκβάλλει. πέπανσις μὲν οὖν εἴρηται τί ἐστίν· ὁμότης δ' ἐστὶν τὸ ἐναντίον· ἐναντίον δὲ πεπάνσει ἀπεψία τῆς ἐν τῷ περικαρπίῳ τροφῆς· αὕτη δ' ἐστὶν ἡ ἀόριστος ὑγρότης. διὸ ἡ πνευματικὴ ἡ ὕδατῶδης ἡ τῶν ἐξ ἀμφοῖν ἐστὶν ἡ ὁμότης. ἐπεὶ δ' ἡ πέπανσις τελέωσις τίς ἐστίν, ἡ ὁμότης ἀτέλεια ἔσται. γίγνεται δ' ἡ ἀτέλεια δι' ἔνδειαν τοῦ φυσικοῦ θερμοῦ καὶ ἀσυμμετρίαν πρὸς τὸ ὑγρὸν τὸ πεπαινόμενον. οὐδὲν δὲ ὑγρὸν αὐτὸ καθ' αὐτὸ πεπαινέται ἄνευ ξηροῦ· ὕδωρ γὰρ οὐ παχύνεται μόνον τῶν ὑγρῶν. [380b] συμβαίνει δὲ τοῦτο ἡ τῷ τὸ θερμόν ὀλίγον εἶναι ἢ τῷ τὸ ὀριζόμενον πολὺ· διὸ καὶ λεπτοὶ οἱ χυμοὶ τῶν ὁμῶν, καὶ ψυχροὶ

μᾶλλον ἢ θερμοί, καὶ ἄβρωτοι καὶ ἄποτοι. λέγεται δὲ καὶ ἡ ὠμότης ὥσπερ καὶ ἡ πέπανσις, πολλαχῶς. ὅθεν καὶ οὖρα καὶ ὑποχωρήσεις καὶ κατάρροι ὠμοὶ λέγονται διὰ τὸ αὐτὸ αἴτιον· τῷ γὰρ μὴ κεκρατῆσθαι ὑπὸ τῆς θερμότητος μηδὲ συνεστάναι ὠμὰ πάντα προσαγορεύεται. πόρρω δὲ προϊόντων καὶ κέραμος ὠμὸς καὶ γάλα ὠμὸν καὶ ἄλλα πολλὰ λέγεται, ἐὰν δυνάμενα μεταβάλλειν καὶ συνίστασθαι ὑπὸ θερμότητος ἀπαθῇ ἢ. διὸ τὸ ὕδωρ ἐφθὸν μὲν λέγεται, ὠμὸν δ' οὐ, ὅτι οὐ παχύνεται. πέπανσις μὲν οὖν καὶ ὠμότης εἴρηται τί ἐστίν, καὶ διὰ τί ἐστὶν ἐκάτερον αὐτῶν· ἔψησις δ' ἐστὶν τὸ μὲν ὅλον πέψις ὑπὸ θερμότητος ὑγρᾶς τοῦ ἐνυπάρχοντος ἀορίστου ἐν τῷ ὑγρῷ, λέγεται δὲ τοῦνομα κυρίως μόνον ἐπὶ τῶν ἐψομένων. τοῦτο δ' ἂν εἴη, ὥσπερ εἴρηται, πνευματῶδες ἢ ὕδατῶδες. ἡ δὲ πέψις γίνεταί ἀπὸ τοῦ ἐν τῷ ὑγρῷ πυρός· τὸ γὰρ ἐπὶ τῶν τηγάνων ὀπτᾶται (ὑπὸ γὰρ τοῦ ἔξωθεν θερμοῦ πάσχει, ἐν ᾧ δ' ἐστὶν ὑγρῷ, ποιεῖ ἐκεῖνο μᾶλλον ξηρόν, εἰς αὐτὸ ἀναλαμβάνον), τὸ δ' ἐψόμενον τοῦναντίον ποιεῖ (ἐκκρίνεται γὰρ ἐξ αὐτοῦ τὸ ὑγρὸν ὑπὸ τῆς ἐν τῷ ἔξω ὑγρῷ θερμασίας)· διὸ ξηρότερα τὰ ἐφθὰ τῶν ὀπτῶν· οὐ γὰρ ἀνασπᾷ εἰς ἑαυτὰ τὸ ὑγρὸν τὰ ἐψόμενα· κρατεῖ γὰρ ἡ ἔξωθεν θερμότης τῆς ἐντός· εἰ δ' ἐκράτει ἡ ἐντός, εἴλκεν ἂν εἰς ἑαυτήν. ἐστὶν δ' οὐ πᾶν σῶμα ἐψητόν· οὔτε γὰρ ἐν ᾧ μηδὲν ἐστὶν ὑγρόν, οἷον ἐν λίθοις, οὔτ' ἐν οἷς ἔνεστι μὲν, ἀλλ' ἀδύνατον κρατηθῆναι διὰ πυκνότητα, οἷον ἐν τοῖς ξύλοις· ἀλλ' ὅσα τῶν σωμάτων ἔχει ὑγρότητα παθητικὴν ὑπὸ τῆς ἐν τῷ ὑγρῷ πυρώσεως. λέγεται δὲ καὶ χρυσὸς ἔψεσθαι καὶ ξύλον καὶ ἄλλα πολλὰ, κατὰ μὲν τὴν ιδέαν οὐ τὴν αὐτήν, μεταφορᾷ δέ· οὐ γὰρ κεῖται ὀνόματα ταῖς διαφοραῖς. καὶ τὰ ὑγρά δὲ ἔψεσθαι λέγομεν, οἷον γάλα καὶ γλεῦκος, ὅταν ἐν τῷ ὑγρῷ ὁ χυμὸς εἰς εἰδὸς τι μεταβάλλῃ ὑπὸ τοῦ κύκλω καὶ ἔξωθεν πυρὸς θερμαίνοντος, ὥστε τρόπον τινὰ παραπλήσιον τῇ εἰρημένῃ [381a] ἐψήσει ποιεῖ. (τέλος δὲ οὐ ταῦτο πᾶσιν, οὔτε ἐψομένοις οὔτε πεττομένοις, ἀλλὰ τοῖς μὲν πρὸς ἐδωδὴν, τοῖς δὲ πρὸς ρόφησιν, τοῖς δὲ πρὸς ἄλλην χρεῖαν, ἐπεὶ καὶ τὰ φάρμακα ἔψειν λέγομεν.) ὥστε ὅσα παχύτερα δύναται γίνεσθαι ἢ ἐλάττω ἢ βαρύτερα, ἢ τὰ μὲν αὐτῶν τοιαῦτα τὰ δ' ἐναντία, διὰ τὸ διακρινόμενα τὰ μὲν παχύνεσθαι τὰ δὲ λεπτύνεσθαι, ὥσπερ τὸ γάλα εἰς τε ὀρὸν καὶ πυετίαν, πάντα ἐψητά ἐστίν. τὸ δὲ ἔλαιον οὐχ ἔψεται αὐτὸ καθ' ἑαυτό, ὅτι τούτων οὐδὲν πάσχει. ἡ μὲν οὖν κατὰ τὴν ἐψησιν λεγομένη πέψις τοῦτ' ἐστίν· καὶ οὐδὲν διαφέρει ἐν ὀργάνοις τεχνικοῖς καὶ φυσικοῖς ἐάν τι γίγνηται· διὰ τὴν αὐτήν

γὰρ αἰτίαν πάντα ἔσται. μόλυνσις δὲ ἀπεψία μὲν ἢ ἐναντία ἐψήσει· εἴη δ' ἂν ἐναντία ἢ τε πρώτη λεχθεῖσα ἀπεψία τοῦ ἐν τῷ σώματι ἀορίστου δι' ἔνδειαν τῆς ἐν τῷ ὑγρῷ τῷ περίξ θερμότητος (ἢ δ' ἔνδεια μετὰ ψυχρότητος ὅτι ἐστίν, εἴρηται)· γίνεταί δὲ διὰ κίνησιν ἄλλην· ἐκκρούεται γὰρ ἡ πέττουσα, καὶ ἡ ἔνδεια δὲ ἢ διὰ τὸ πλῆθος τῆς ἐν τῷ ὑγρῷ ψυχρότητος ἢ διὰ τὸ ἐν τῷ ἐσομένῳ πλῆθος· τότε γὰρ συμβαίνει τὴν ἐν τῷ ὑγρῷ θερμότητα πλείω μὲν εἶναι ἢ ὥστε μὴ κινῆσαι, ἐλάττω δὲ ἢ ὥστε ὁμαλῶναι καὶ συμπέσαι. διὸ σκληρότερα μὲν τὰ μεμωλυσμένα γίνεταί τῶν ἐφθῶν, τὰ δ' ὑγρὰ διωρισμένα μᾶλλον. ἔψησις μὲν οὖν καὶ μόλυνσις εἴρηται, καὶ τί ἐστὶν καὶ διὰ τί ἐστίν· ὀπτησις δ' ἐστὶν πέψις ὑπὸ θερμότητος ξηρᾶς καὶ ἀλλοτρίας. διὰ τοῦτο καὶ ἔψων τις ποιῇ μεταβάλλειν καὶ πέττεσθαι, μὴ ὑπὸ τῆς τοῦ ὑγροῦ θερμότητος ἀλλ' ὑπὸ τῆς τοῦ πυρός, ὅταν τελεσθῇ, ὅπτον γίνεταί καὶ οὐχ ἐφθόν, καὶ τῇ ὑπερβολῇ προσκεκαῦσθαι λέγεται· ὑπὸ ξηρᾶς δὲ θερμότητος γίνεταί ὅταν ξηρότερον γίγνηται ἐπιτελεσθέν. διὸ καὶ τὰ ἐκτὸς ξηρότερα τῶν ἐντὸς· τὰ δ' ἐφθὰ τούναντίον. καὶ ἔργον ἐπὶ τῶν χειροκμήτων τὸ ὀπτῆσαι μείζον ἢ ἐψησαι· χαλεπὸν γὰρ τὰ ἐκτὸς καὶ τὰ ἐντὸς ὁμαλῶς θερμαίνειν. αἰ γὰρ τὰ ἐγγύτερον τοῦ πυρὸς ξηραίνεται [381b] θάττον, ὥστε καὶ μᾶλλον. συνιόντων οὖν τῶν ἔξω πόρων οὐ δύναται ἐκκρίνεσθαι τὸ ἐνυπάρχον ὑγρόν, ἀλλ' ἐγκατακλείεται, ὅταν οἱ πόροι μύσωσιν. ὀπτησις μὲν οὖν καὶ ἔψησις γίνονται μὲν τέχνη, ἔστιν δ', ὥσπερ λέγομεν, τὰ εἶδη καθόλου ταῦτά καὶ φύσει· ὅμοια γὰρ τὰ γιγνόμενα πάθη, ἀλλ' ἀνώνυμα· μιμεῖται γὰρ ἡ τέχνη τὴν φύσιν, ἐπεὶ καὶ ἡ τῆς τροφῆς ἐν τῷ σώματι πέψις ὁμοία ἐψήσει ἐστίν· καὶ γὰρ ἐν ὑγρῷ καὶ θερμῷ ὑπὸ τῆς τοῦ σώματος θερμότητος γίνεταί. καὶ ἀπεψία ἔναι ὅμοια τῇ μόλυνσει. καὶ ζῶον οὐκ ἐγγίγνεται ἐν τῇ πέψει, ὥσπερ τινὲς φασιν, ἀλλ' ἐν τῇ ἀποκρίσει σηπομένη ἐν τῇ κάτω κοιλίᾳ, εἴτ' ἐπανέρχεται ἄνω· πέττεται μὲν γὰρ ἐν τῇ ἄνω κοιλίᾳ, σήπεται δ' ἐν τῇ κάτω τὸ ἀποκριθέν· δι' ἣν δ' αἰτίαν, εἴρηται ἐν ἐτέροις. ἡ μὲν οὖν μόλυνσις τῇ ἐψήσει ἐναντίον· τῇ δὲ ὡς ὀπτήσῃ λεγομένη πέψει ἔστι μὲν τι ἀντικείμενον ὁμοίως, ἀνωνυμώτερον δέ. εἴη δ' ἂν οἷον εἰ γένοιτο στάτευσις ἀλλὰ μὴ ὀπτησις δι' ἔνδειαν θερμότητος, ἢ συμβαίη ἂν ἢ δι' ὀλιγότητα τοῦ ἔξω πυρὸς ἢ διὰ πλῆθος τοῦ ἐν τῷ ὀπτωμένῳ ὕδατος· τότε γὰρ πλείων μὲν ἐστὶν ἢ ὥστε μὴ κινῆσαι, ἐλάττων δὲ ἢ ὥστε πέσαι. τί μὲν οὖν ἐστὶ πέψις καὶ ἀπεψία, καὶ πέπανσις καὶ ὠμότης, καὶ ἔψησις καὶ ὀπτησις καὶ τάναντία τούτοις,

εἴρηται.

τῶν δὲ παθητικῶν, τοῦ ὑγροῦ καὶ τοῦ ξηροῦ, λεκτέον τὰ [381b.24] εἶδη. εἰσὶν δ' αἱ μὲν ἀρχαὶ τῶν σωμάτων αἱ παθητικαὶ ὑγρὸν καὶ ξηρὸν, τὰ δ' ἄλλα μεικτὰ μὲν ἐκ τούτων, ὁποτέρου δὲ μᾶλλον, τούτου μᾶλλον τὴν φύσιν ἐστίν, οἷον τὰ μὲν ξηροῦ μᾶλλον τὰ δ' ὑγροῦ. πάντα δὲ τὰ μὲν ἐντελεχεῖα ἔσται, τὰ δ' ἐν τῷ ἀντικειμένῳ· ἔχει δ' οὕτως τῆξις πρὸς τὸ τηκτόν. ἐπεὶ δ' ἐστὶν τὸ μὲν ὑγρὸν εὐόριστον, τὸ δὲ ξηρὸν δυσόριστον, ὅμοιόν τι τῷ ὄψῳ καὶ τοῖς ἡδύσμασι πρὸς ἄλληλα πάσχουσι· τὸ γὰρ ὑγρὸν τῷ ξηρῷ αἷτιον τοῦ ὀρίζεσθαι, καὶ ἐκάτερον ἐκατέρῳ οἷον κόλλα γίνγεται, ὥσπερ καὶ [382a] Ἐμπεδοκλῆς ἐποίησεν ἐν τοῖς φυσικοῖς “ἄλφитον ὕδατι κολλήσας.” καὶ διὰ τοῦτο ἐξ ἀμφοῖν ἐστὶν τὸ ὠρισμένον σῶμα. λέγεται δὲ τῶν στοιχείων ἰδιαίτατα ξηροῦ μὲν γῆ, ὑγροῦ δὲ ὕδωρ. διὰ τοῦτο ἅπαντά τε τὰ ὠρισμένα σώματα ἐνταῦθα οὐκ ἄνευ γῆς καὶ ὕδατος (ὁποτέρου δὲ πλεόν, κατὰ τὴν δύναμιν τούτου ἕκαστον φαίνεται)· καὶ ἐν γῇ καὶ ἐν ὕδατι ζῶα μόνον ἐστίν, ἐν ἀέρι δὲ καὶ πυρὶ οὐκ ἔστιν, ὅτι τῶν σωμάτων ὕλη ταῦτα. τῶν δὲ σωματικῶν παθημάτων ταῦτα πρῶτα ἀνάγκη ὑπάρχειν τῷ ὠρισμένῳ, σκληρότητα ἢ μαλακότητα· ἀνάγκη γὰρ τὸ ἐξ ὑγροῦ καὶ ξηροῦ ἢ σκληρὸν εἶναι ἢ μαλακόν. ἔστι δὲ σκληρὸν μὲν τὸ μὴ ὑπεῖκον εἰς αὐτὸ κατὰ τὸ ἐπίπεδον, μαλακὸν δὲ τὸ ὑπεῖκον τῷ μὴ ἀντιπεριίστασθαι· τὸ γὰρ ὕδωρ οὐ μαλακόν· οὐ γὰρ ὑπέικει τῇ θλίψει τὸ ἐπίπεδον εἰς βάθος, ἀλλ' ἀντιπεριίσταται. ἀπλῶς μὲν οὖν σκληρὸν ἢ μαλακὸν τὸ ἀπλῶς τοιοῦτον, πρὸς ἕτερον δὲ τὸ πρὸς ἐκεῖνο τοιοῦτον. πρὸς μὲν οὖν ἄλληλα ἀόριστα ἐστὶν τῷ μᾶλλον καὶ ἥττον· ἐπεὶ δὲ πρὸς τὴν αἴσθησιν πάντα κρίνομεν τὰ αἰσθητά, δηλὸν ὅτι καὶ τὸ σκληρὸν καὶ τὸ μαλακὸν ἀπλῶς πρὸς τὴν ἀφὴν ὠρίκαμεν, ὡς μεσότητι χρώμενοι τῇ ἀφῇ· διὸ τὸ μὲν ὑπερβάλλον αὐτὴν σκληρόν, τὸ δ' ἐλλεῖπον μαλακὸν εἶναι φαμεν.

ἀνάγκη δὲ σκληρὸν ἢ μαλακὸν εἶναι τὸ ὠρισμένον σῶμα οἰκείῳ ὄρῳ (ἢ γὰρ ὑπέικει ἢ μὴ)· ἔτι πεπηγὸς εἶναι (τούτῳ γὰρ ὀρίζεται)· ὥστ' ἐπεὶ πᾶν μὲν τὸ ὠρισμένον καὶ συνεστὸς ἢ μαλακὸν ἢ σκληρόν, ταῦτα δὲ πῆξις ἐστίν, ἅπαντ' ἂν εἴη τὰ σώματα τὰ σύνθετα καὶ ὠρισμένα οὐκ ἄνευ πῆξεως. πῆξεως οὖν πέρι ῥητέον. ἔστιν δὴ τὰ αἷτια τὰ παρὰ τὴν ὕλην δύο, τό τε ποιοῦν καὶ τὸ πάθος (τὸ μὲν οὖν ποιοῦν ὡς ὄθεν ἢ κίνησις, τὸ δὲ πάθος ὡς εἶδος)· ὥστε καὶ πῆξεως καὶ διαχύσεως, καὶ τοῦ ξηραίνεσθαι καὶ τοῦ ὑγραίνεσθαι. ποιεῖ δὲ τὸ

ποιοῦν δυσὶ δυνάμεσι, καὶ πάσχει παθήμασιν δυσὶν, ὥσπερ εἴρηται· ποιεῖ μὲν θερμῷ καὶ ψυχρῷ, τὸ δὲ πάθος ἢ ἀπουσία ἢ παρουσία θερμοῦ ἢ [382b] ψυχροῦ. ἐπεὶ δὲ τὸ πηγνυσθαι ξηραίνεσθαι πῶς ἐστίν, περὶ τούτου εἵπωμεν πρῶτον. τὸ δὴ πάσχον ἢ ὑγρὸν ἢ ξηρὸν ἢ ἐκ τούτων. τιθέμεθα δὲ ὑγροῦ σῶμα ὕδωρ, ξηροῦ δὲ γῆν· ταῦτα γὰρ τῶν ὑγρῶν καὶ τῶν ξηρῶν παθητικά. διὸ καὶ τὸ ψυχρὸν τῶν παθητικῶν μᾶλλον· ἐν τούτοις γὰρ ἐστίν· καὶ γὰρ ἡ γῆ καὶ τὸ ὕδωρ ψυχρὰ ὑπόκειται. ποιητικὸν δὲ τὸ ψυχρὸν ὡς φθαρτικὸν ἢ ὡς κατὰ συμβεβηκός, καθάπερ εἴρηται πρότερον· ἐνίστε γὰρ καὶ κάειν λέγεται καὶ θερμαίνειν τὸ ψυχρὸν, οὐχ ὡς τὸ θερμόν, ἀλλὰ τῷ συνάγειν ἢ ἀντιπεριστάναι τὸ θερμόν. ξηραίνεται δὲ ὅσα ἐστίν ὕδωρ καὶ ὕδατος εἶδη, ἢ ἔχει ὕδωρ εἴτ' ἐπακτὸν εἴτε συμφυές (λέγω δὲ ἐπακτὸν μὲν οἶον ἐν ἐρίῳ, σύμφυτον δ' οἶον ἐν γάλακτι). ὕδατος δ' εἶδη τὰ τοιάδε, οἶνος, οὔρον, ὀρός, καὶ ὅλως ὅσα μηδεμίαν ἢ βραχεῖαν ἔχει ὑπόστασιν, μὴ διὰ γλίσχρότητα· ἐνίοις γὰρ αἴτιον τοῦ μὴ ὑφίστασθαι μηδὲν ἢ γλίσχρότης, ὥσπερ ἐλαίῳ ἢ πίττῃ. ξηραίνεται δὲ πάντα ἢ θερμαινόμενα ἢ ψυχόμενα, ἀμφοτέρωθεν δὲ θερμῷ, καὶ ὑπὸ τῆς ἐντὸς θερμότητος ἢ τῆς ἔξω· καὶ γὰρ τὰ τῇ ψύξει ξηραίνόμενα, ὥσπερ ἱμάτιον, ἐὰν ἢ κεχωρισμένον αὐτὸ καθ' αὐτὸ τὸ ὑγρὸν, ὑπὸ τοῦ ἐντὸς θερμοῦ συνεξατμίζοντος τὸ ὑγρὸν ξηραίνεται, ἂν ὀλίγον ἢ τὸ ὑγρὸν, ἐξιούσης τῆς θερμότητος ὑπὸ τοῦ περισσώτους ψυχροῦ. ξηραίνεται μὲν οὖν, ὥσπερ εἴρηται, ἅπαντα ἢ θερμαινόμενα ἢ ψυχόμενα, καὶ πάντα θερμῷ, ἢ τῷ ἐντὸς ἢ τῷ ἐκτὸς συνεξατμίζοντι τὸ ὑγρὸν (λέγω δ' ἐκτὸς μὲν ὥσπερ τὰ ἐσόμενα, ἐντὸς δὲ ὅταν ἀφαιρεθέντος ὑφ' ἧς ἔχει θερμότητος ἀναλωθῇ ἀποπνεούσης). περὶ μὲν οὖν τοῦ ξηραίνεσθαι εἴρηται.

τὸ δ' ὑγραίνεσθαι ἐστίν ἐν μὲν τὸ ὕδωρ γίνεσθαι συνιστάμενον, ἐν δὲ τὸ τήκεσθαι τὸ πεπηγός. τούτων δὲ συνίσταται μὲν ψυχόμενον τὸ πνεῦμα· περὶ δὲ τήξεως ἅμα καὶ περὶ πήξεως ἔσται δῆλον. πηγνυται δὲ ὅσα πηγνυται ἢ ὕδατος ὄντα ἢ γῆς καὶ ὕδατος, καὶ ταῦτα ἢ θερμῷ ξηρῷ ἢ ψυχρῷ. διὸ καὶ λύεται τοῖς ἐναντίοις, ὅσα [383a] λύεται τῶν ὑπὸ θερμοῦ παγέντων ἢ ὑπὸ ψυχροῦ· τὰ μὲν γὰρ ὑπὸ ξηροῦ θερμοῦ παγέντα ὑπὸ ὕδατος λύεται, ὃ ἐστίν ὑγρὸν ψυχρὸν, τὰ δὲ ὑπὸ ψυχροῦ παγέντα ὑπὸ πυρός λύεται, ὃ ἐστίν θερμόν. πηγνυσθαι δ' ἐνία δόξειεν ἂν ὑπὸ ὕδατος, ὡς τὸ μέλι τὸ ἐφθόν· πηγνυται δὲ οὐχ ὑπὸ τοῦ ὕδατος, ἀλλ' ὑπὸ τοῦ ἐν αὐτῷ ψυχροῦ. ὅσα μὲν οὖν ἐστίν ὕδατος, οὐ πηγνυται ὑπὸ πυρός· λύεται γὰρ ὑπὸ πυρός,

τὸ δὲ αὐτὸ τῷ αὐτῷ κατὰ ταῦτὸ οὐκ ἔσται αἷτιον τοῦ ἐναντίου. ἔτι τῷ ἀπιέναι τὸ θερμὸν πηγνυται, ὥστε δηλὸν ὅτι τῷ εἰσιέναι λυθήσεται· ὥστε ποιοῦντος τοῦ ψυχροῦ πηγνυται. διὸ καὶ οὐ παχύνεται τὰ τοιαῦτα πηγνύμενα· ἡ γὰρ πάχυνσις ὑγροῦ μὲν ἀπιόντος γίγνεται, τοῦ ξηροῦ δὲ συνισταμένου· ὕδωρ δὲ τῶν ὑγρῶν οὐ παχύνεται μόνον. ὅσα δὲ κοινὰ γῆς καὶ ὕδατος, καὶ ὑπὸ πυρὸς πηγνυται καὶ ὑπὸ ψυχροῦ, παχύνεται δὲ ὑπ' ἀμφοῖν ἔστι μὲν ὡς τὸν αὐτὸν τρόπον, ἔστι δ' ὡς ἄλλως, ὑπὸ μὲν θερμοῦ τὸ ὑγρὸν ἐξάγοντος (ἐξατμίζοντος γὰρ τοῦ ὑγροῦ παχύνεται τὸ ξηρὸν καὶ συνίσταται), ὑπὸ δὲ ψυχροῦ τὸ θερμὸν ἐκθλίβοντος, μεθ' οὗ τὸ ὑγρὸν συναπέρχεται συνεξατμίζον. ὅσα μὲν οὖν μαλακὰ ἀλλὰ μὴ ὑγρά, οὐ παχύνεται ἀλλὰ πηγνυται ἐξιόντος τοῦ ὑγροῦ, οἷον ὁ ὀπτώμενος κέραμος· ὅσα δὲ ὑγρά τῶν μεικτῶν, καὶ παχύνεται, οἷον γάλα. πολλὰ δὲ καὶ ὑγραίνεται πρῶτον, ὅσα ἢ παχέα ἢ σκληρὰ ὑπὸ ψυχροῦ προὔπῃρχεν ὄντα, ὥσπερ καὶ ὁ κέραμος τὸ πρῶτον ὀπτώμενος ἀτμίζει καὶ μαλακώτερος γίγνεται· διὸ καὶ διαστρέφεται ἐν ταῖς καμίνοις. ὅσα μὲν οὖν ὑπὸ ψυχροῦ πηγνυται τῶν κοινῶν γῆς καὶ ὕδατος, πλεόν δὲ ἐχόντων γῆς, τὰ μὲν τῷ τὸ θερμὸν ἐξεληλυθέναι πηγνύμενα, ταῦτα τήκεται θερμῷ εἰσιόντος πάλιν τοῦ θερμοῦ, οἷον ὁ πηλὸς ὅταν παγῇ· ὅσα δὲ διὰ ψύξιν, καὶ τοῦ θερμοῦ συνεξατμίσαντος ἅπαντος, ταῦτα δὲ ἅλута μὴ ὑπερβαλλούση θερμότητι, ἀλλὰ μαλάττεται, οἷον σίδηρος καὶ κέρας. τήκεται δὲ καὶ ὁ εἰργασμένος σίδηρος, ὥστε ὑγρὸς γίνεσθαι καὶ πάλιν πηγνυσθαι. καὶ τὰ στομώματα ποιοῦσιν οὕτως· ὑφίσταται γὰρ καὶ ἀποκαθαίρεται κάτω [383b] ἡ σκωρία· ὅταν δὲ πολλάκις πάθῃ καὶ καθαρὸς γένηται, τοῦτο στόμωμα γίγνεται. οὐ ποιοῦσι δὲ πολλάκις αὐτὸ διὰ τὸ ἀπουσίαν γίνεσθαι πολλὴν καὶ τὸν σταθμὸν ἐλάττω ἀποκαθαιρομένου. ἔστιν δ' ἀμείνων σίδηρος ὁ ἐλάττω ἔχων ἀποκάθαρσιν. τήκεται δὲ καὶ ὁ λίθος ὁ πυρίμαχος ὥστε στάζειν καὶ ῥεῖν· τὸ δὲ πηγνύμενον ὅταν ῥυῇ, πάλιν γίγνεται σκληρόν. καὶ αἱ μύλαι τήκονται ὥστε ῥεῖν· τὸ δὲ ῥέον πηγνύμενον τὸ μὲν χρῶμα μέλαν, ὅμοιον δὲ γίγνεται τῇ τιτάνῳ. τήκεται δὲ καὶ ὁ πηλὸς καὶ ἡ γῆ. ὅσα δ' ὑπὸ [383b.10] ξηροῦ θερμοῦ πηγνυται, τὰ μὲν ἅλута, τὰ δὲ λυτὰ ὑγρῷ. κέραμος μὲν οὖν καὶ λίθων ἐνίων γένη, ὅσοι ὑπὸ πυρὸς τῆς γῆς συγκαυθείσης γίνονται, οἷον οἱ μυλῖαι, ἅλута, νίτρον δὲ καὶ ἄλλες λυτὰ ὑγρῷ, οὐ παντὶ δὲ ἀλλὰ ψυχρῷ· διὸ ὕδατι καὶ ὅσα ὕδατος εἶδη τήκεται, ἐλαίῳ δ' οὐ τήκεται· τῷ γὰρ ξηρῷ θερμῷ ἐναντίον ψυχρὸν ὑγρόν. εἰ οὖν ἔπηξεν θάτερον, θάτερον λύσει· οὕτω γὰρ

τάναντία ἔσται αἷτια τῶν ἐναντίων.

παχύνεται μὲν οὖν ὑπὸ πυρὸς μόνον, ὅσα ὕδατος πλέον ἔχει ἢ γῆς, πήγνυται δέ, ὅσα γῆς. διὸ καὶ τὸ νίτρον καὶ οἱ ἅλεις γῆς εἰσὶν μᾶλλον, καὶ λίθος καὶ κέραμος. ἀπορώτατα δὲ ἔχει ἢ τοῦ ἐλαίου φύσις. εἰ μὲν γὰρ ὕδατος, ἔδει πήγνυσθαι ὑπὸ ψυχροῦ, εἰ δὲ γῆς πλέον, ὑπὸ πυρός· νῦν δὲ πήγνυται μὲν ὑπ' οὐδετέρου, παχύνεται δὲ ὑπ' ἀμφοῖν. αἷτιον δ' ἐστὶν ὅτι ἀέρος ἐστὶν πλήρης. διὸ καὶ ἐν τῷ ὕδατι ἐπιπολάζει· καὶ γὰρ ὁ ἀήρ φέρεται ἄνω. τὸ μὲν οὖν ψυχρὸν ἐκ τοῦ ἐνόντος πνεύματος ὕδωρ ποιοῦν παχύνει· ἀεὶ γάρ, ὅταν μειχθῇ ὕδωρ καὶ ἔλαιον, ἀμφοῖν γίγνεται παχύτερον. ὑπὸ δὲ πυρός καὶ χρόνου παχύνεται καὶ λευκαίνεται, λευκαίνεται μὲν ἐξατμίζοντος εἴ τι ἐνῆν ὕδατος, παχύνεται δὲ διὰ τὸ μαραιομένου τοῦ θερμοῦ ἐκ τοῦ ἀέρος γίγενσθαι ὕδωρ. ἀμφοτέρως μὲν οὖν τὸ αὐτὸ γίγνεται πάθος, καὶ διὰ τὸ αὐτό, ἀλλ' οὐχ ὡσαύτως. παχύνεται μὲν οὖν ὑπ' ἀμφοτέρων, οὐ ξηραίνεται δ' ὑπ' οὐδετέρου· οὔτε γὰρ ὁ ἥλιος οὔτε τὸ ψῦχος ξηραίνει· οὐ μόνον διότι γλίσχρον, [384a] ἀλλὰ καὶ διότι ἀέρος ἐστίν. οὐ ξηραίνεται δὲ τὸ ὕδωρ οὐδ' ἔψεται ὑπὸ πυρός, ὅτι οὐκ ἀτμίζει διὰ γλίσχρότητα. ὅσα δὲ μεικτὰ ὕδατος καὶ γῆς, κατὰ τὸ πλήθος ἐκατέρου ἄξιον λέγεσθαι· οἶνος γάρ τις καὶ πήγνυται καὶ ἔψεται, οἶον τὸ γλεῦκος. ἀπέρχεται δὲ ἀπὸ πάντων τῶν τοιούτων ξηραινομένων τὸ ὕδωρ. σημεῖον δ' ὅτι τὸ ὕδωρ· ἢ γὰρ ἀτμὶς συνίσταται εἰς ὕδωρ, ἐάν τις βούληται συλλέγειν· ὥστε ὅσοις λείπεται τι, τοῦτο γῆς. ἔνια δὲ τούτων καὶ ὑπὸ ψυχροῦ, ὥσπερ εἴρηται, παχύνεται καὶ ξηραίνεται· τὸ γὰρ ψυχρὸν οὐ μόνον πήγνυσιν, ἀλλὰ ξηραίνει μὲν ὕδωρ, παχύνει δὲ τὸν ἀέρα ὕδωρ ποιοῦν· ἢ δὲ πῆξις εἴρηται ξηρασία τις οὔσα. ὅσα μὲν οὖν μὴ παχύνεται ὑπὸ τοῦ ψυχροῦ ἀλλὰ πήγνυται, ὕδατός ἐστι μᾶλλον, οἶον οἶνος καὶ οὔρον καὶ ὄξος καὶ κονία καὶ ὀρός· ὅσα δὲ παχύνεται μὴ ἐξατμίζοντα ὑπὸ πυρός, τὰ μὲν γῆς, τὰ δὲ κοινὰ ὕδατος καὶ ἀέρος, μέλι μὲν γῆς, ἔλαιον δ' ἀέρος. ἔστιν δὲ καὶ τὸ γάλα καὶ τὸ αἷμα ἀμφοῖν μὲν κοινὰ καὶ ὕδατος καὶ γῆς, μᾶλλον δὲ τὰ πολλὰ γῆς, ὥσπερ καὶ ἐξ ὅσων ὑγρῶν νίτρον γίγνεται καὶ ἅλεις (καὶ λίθοι δ' ἐκ τινων συνίστανται τοιούτων). διὸ ἐὰν μὴ χωρισθῇ ὁ ὀρός, ἐκκάεται ὑπὸ τοῦ πυρός ἐψόμενος. τὸ δὲ γεῶδες συνίσταται καὶ ὑπὸ τοῦ ὀποῦ, ἐὰν πως ἔψη τις, οἶον οἱ ἱατροὶ ὀπίζοντες. οὕτω δὲ χωρίζεται ὁ ὀρός καὶ ὁ τυρός. ὁ δὲ χωρισθεὶς ὀρός οὐκέτι παχύνεται, ἀλλ' ἐκκάεται ὥσπερ ὕδωρ. εἰ δὲ τι μὴ ἔχει τυρὸν γάλα ἢ ὀλίγον, τοῦτο μᾶλλον

ὕδατος καὶ ἄτροφον. καὶ τὸ αἷμα δὲ ὁμοίως· πήγνυται γὰρ τῷ
ξηραίνεσθαι ψυχόμενον. ὅσα δὲ μὴ πήγνυται, οἷον τὸ τῆς ἐλάφου, τὰ
τοιαῦτα ὕδατος μᾶλλον, καὶ ψυχρὰ ταῦτα. διὸ καὶ οὐκ ἔχει ἵνας· αἱ
γὰρ ἱνὲς εἰσιν γῆς καὶ στερεόν· ὥστε καὶ ἐξαιρεθεῖσων οὐ πήγνυται·
τοῦτο δ' ἐστὶν ὅτι οὐ ξηραίνεται· ὕδωρ γὰρ τὸ λοιπόν, ὡς τὸ γάλα
τοῦ τυροῦ ἐξαιρεθέντος. σημεῖον δέ· τὰ νοσώδη γὰρ αἵματα οὐ θέλει
πήγνυσθαι· ἰχωροειδῆ γάρ, τοῦτο δὲ φλέγμα καὶ ὕδωρ διὰ τὸ
ἄπεπτον εἶναι καὶ ἀκράτητον ὑπὸ τῆς φύσεως. ἔτι δὲ τὰ μὲν λυτὰ
ἐστίν, οἷον νίτρον, τὰ δὲ ἄλυτα, οἷον [384b] κέραμος, καὶ τούτων τὰ
μὲν μαλακτά, οἷον κέρας, τὰ δὲ ἀμάλακτα, οἷον κέραμος καὶ λίθος.
αἴτιον δ' ὅτι τάναντία τῶν ἐναντίων αἰτία, ὥστ' εἰ πήγνυται δυοῖν,
ψυχρῷ καὶ ξηρῷ, λύεσθαι ἀνάγκη θερμῷ καὶ ὑγρῷ· διὸ πυρὶ καὶ
ὕδατι (ταῦτα γὰρ ἐναντία), ὕδατι μὲν ὅσα πυρὶ μόνῳ, πυρὶ δὲ ὅσα
ψυχρῷ μόνῳ· ὥστ' εἴ τι ὑπ' ἀμφοῖν συμβαίνει πήγνυσθαι, ταῦτα
ἄλυτα μάλιστα. γίγνεται δὲ τοιαῦτα ὅσα θερμανθέντα ἔπειτα τῷ
ψυχρῷ πήγνυται· συμβαίνει γάρ, ὅταν τὸ θερμὸν ἐξικμάσῃ ἐξίον, τὸ
πλεῖστον ὑγρὸν συνθλίβεσθαι πάλιν ὑπὸ τοῦ ψυχροῦ, ὥστε μηδὲ
ὑγρῷ διδόναι δίοδον. καὶ διὰ ταῦτα οὔτε τὸ θερμὸν λύει· ὅσα γὰρ
ὑπὸ ψυχροῦ πήγνυται μόνου, ταῦτα λύει· οὔθ' ὑπὸ ὕδατος· ὅσα γὰρ
ὑπὸ ψυχροῦ πήγνυται, οὐ λύει, ἀλλ' ὅσα ὑπὸ θερμοῦ ξηροῦ μόνον. ὁ
δὲ σίδηρος τακεῖς ὑπὸ θερμοῦ ψυχθεὶς πήγνυται. τὰ δὲ ξύλα ἐστὶν
γῆς καὶ ἀέρος· διὸ καυστὰ καὶ οὐ τηκτὰ οὐδὲ μαλακτά, καὶ ἐπὶ τῷ
ὕδατι ἐπιπλεῖ, πλὴν ἐβένου· αὕτη δ' οὔ· τὰ μὲν γὰρ ἄλλα ἀέρος ἔχει
πλέον, ἐκ δὲ τῆς ἐβένου τῆς μελαίνης διαπέπνευκεν ὁ ἀήρ, καὶ ἔστι
πλέον ἐν αὐτῇ γῆς. κέραμος δὲ γῆς μόνον διὰ τὸ ξηραίνόμενος
παγῆναι κατὰ μικρόν· οὔτε γὰρ τὸ ὕδωρ εἰσόδους ἔχει, δι' ὧν μόνον
πνεῦμα ἐξῆλθεν, οὔτε πῦρ· ἔπηξε γὰρ αὐτό. τί μὲν οὖν ἐστὶ πῆξις καὶ
τῆξις, καὶ διὰ πόσα καὶ ἐν πόσοις ἐστίν, εἴρηται.

ἐκ δὲ τούτων φανερόν ὅτι ὑπὸ θερμοῦ καὶ ψυχροῦ συνίσταται τὰ
σώματα, ταῦτα δὲ παχύνοντα καὶ πηγνύντα ποιεῖται τὴν ἐργασίαν
αὐτῶν. διὰ δὲ τὸ ὑπὸ τούτων δημιουργεῖσθαι ἐν ἅπασιν ἔνεστι
θερμότης, τισὶ δὲ καὶ ψυχρότης ἣ ἐκλείπει. ὥστ' ἐπεὶ ταῦτα μὲν
ὑπάρχει διὰ τὸ ποιεῖν, ὑγρὸν δὲ καὶ ξηρὸν διὰ τὸ πάσχειν, μετέχει
αὐτῶν τὰ κοινὰ πάντων. ἐκ μὲν οὖν ὕδατος καὶ γῆς τὰ ὁμοιομερῆ
σώματα συνίσταται, καὶ ἐν φυτοῖς καὶ ἐν ζώοις, καὶ τὰ
μεταλλευόμενα, οἷον χρυσὸς καὶ ἄργυρος καὶ ὅσα ἄλλα τοιαῦτα, ἐξ
αὐτῶν τε καὶ ἐκ τῆς ἀναθυμιάσεως τῆς ἐκατέρου ἐγκατακλειομένης,

ὥσπερ εἴρηται ἐν ἄλλοις. ταῦτα [385a] δὲ διαφέρει ἀλλήλων τοῖς τε πρὸς τὰς αἰσθήσεις ἰδίους ἅπαντα, τῷ ποιεῖν τι δύνασθαι (λευκὸν γὰρ καὶ εὐῶδες καὶ ψοφητικὸν καὶ γλυκὺ καὶ θερμὸν καὶ ψυχρὸν τῷ ποιεῖν τι δύνασθαι τὴν αἴσθησίν ἐστι), καὶ ἄλλοις οἰκειότεροις πάθεσιν, ὅσα τῷ πάσχειν λέγονται, λέγω δ' οἷον τὸ τηκτὸν καὶ πηκτὸν καὶ καμπτὸν καὶ ὅσα ἄλλα τοιαῦτα· πάντα γὰρ τὰ τοιαῦτα παθητικά, ὥσπερ τὸ ὑγρὸν καὶ τὸ ξηρὸν. τούτοις δ' ἤδη διαφέρει ὁστοῦν καὶ σὰρξ καὶ νεῦρον καὶ ξύλον καὶ φλοιὸς καὶ λίθος καὶ τῶν ἄλλων ἕκαστον τῶν ὁμοιομερῶν μὲν φυσικῶν δὲ σωμάτων. εἴπωμεν δὲ πρῶτον τὸν ἀριθμὸν αὐτῶν, ὅσα κατὰ δύναμιν καὶ ἀδυναμίαν λέγεται. ἔστιν δὲ τάδε, πηκτὸν ἄπηκτον, τηκτὸν ἄτηκτον, μαλακτὸν ἀμάλακτον, τεγκτὸν ἄτεγκτον, καμπτὸν ἄκαμπτον, κατακτὸν ἀκάτακτον, θραυστὸν ἄθραυστον, θλαστὸν ἄθλαστον, πλαστὸν ἄπλαστον, πιεστὸν ἀπίεστον, ἐλκτὸν ἀνελκτον, ἐλατὸν ἀνήλατον, σχιστὸν ἄσχιστον, τμητὸν ἄτμητον, γλίσχρον ψαθυρόν, πιλητὸν ἀπίλητον, καυστὸν ἄκαυστον, θυμιατὸν ἀθυμίατον. τὰ μὲν οὖν πλεῖστα σχεδὸν τῶν σωμάτων τούτοις διαφέρει τοῖς πάθεσιν· τίνα δ' ἕκαστον τούτων ἔχει δύναμιν, εἴπωμεν. περὶ μὲν οὖν πηκτοῦ καὶ ἀπήκτου καὶ τηκτοῦ καὶ ἀτήκτου εἴρηται μὲν καθόλου πρότερον, ὅμως δ' ἐπανέλθωμεν καὶ νῦν. τῶν γὰρ σωμάτων ὅσα πήγνυται καὶ σκληρύνεται, τὰ μὲν ὑπὸ θερμοῦ πάσχει τοῦτο τὰ δ' ὑπὸ ψυχροῦ, ὑπὸ μὲν τοῦ θερμοῦ ξηραίνοντος τὸ ὑγρὸν, ὑπὸ δὲ τοῦ ψυχροῦ ἐκθλίβοντος τὸ θερμόν. ὥστε τὰ μὲν ὑγροῦ ἀπουσία τὰ δὲ θερμοῦ τοῦτο πάσχει, ὅσα μὲν ὕδατος, θερμοῦ, ὅσα δὲ γῆς, ὑγροῦ. τὰ μὲν [385a.28] οὖν ὑγροῦ ἀπουσία ὑπὸ ὑγροῦ διατήκεται, ἂν μὴ οὕτως συνέλθῃ ὥστε ἐλάττους τοὺς πόρους λειφθῆναι τῶν τοῦ ὕδατος ὀγκῶν, οἷον ὁ κέραμος· ὅσα δὲ μὴ οὕτω, πάντα ὑγρῷ τήκεται, οἷον νίτρον, ἄλες, γῆ ἢ ἐκ πηλοῦ· τὰ δὲ θερμοῦ στερήσει ὑπὸ θερμοῦ τήκεται, οἷον κρύσταλλος, μόλυβδος, χαλκός. ποῖα μὲν οὖν πηκτὰ καὶ τηκτὰ, εἴρηται, καὶ ποῖα [385b] ἄτηκτα. ἄπηκτα δὲ ὅσα μὴ ἔχει ὑγρότητα ὕδατῶδη, μηδὲ ὕδατός ἐστιν, ἀλλὰ πλέον θερμοῦ καὶ γῆς, οἷον μέλι καὶ γλεῦκος (ὥσπερ ζέοντα γάρ ἐστιν), καὶ ὅσα ὕδατος μὲν ἔχει, ἔστιν δὲ πλέον ἀέρος, ὥσπερ τὸ ἔλαιον καὶ ὁ ἄργυρος ὁ χυτός, καὶ εἴ τι γλίσχρον, οἷον <πίττα καὶ> ἰζός.

μαλακτὰ δ' ἐστὶ τῶν πεπηγότων ὅσα μὴ ἐξ ὕδατος, οἷον κρύσταλλος ὕδατος, ἀλλ' ὅσα γῆς μᾶλλον, καὶ μήτ' ἐξίκμασται πᾶν τὸ ὑγρὸν ὥσπερ ἐν νίτρῳ ἢ ἀλσί, μήτ' ἔχει ἀνωμάλως ὥσπερ ὁ

κέραμος, ἀλλ' ἢ ἐλκτὰ μὴ ὄντα διαντὰ, ἢ ἐλατὰ μὴ ὄντα ὕδατος, καὶ μαλακτὰ πυρί, οἷον σίδηρος καὶ κέρας καὶ ξύλα. ἔστι δὲ καὶ τῶν τηκτῶν καὶ τῶν ἀτήκτων τὰ μὲν τεγκτὰ τὰ δὲ ἄτεγκτα, οἷον χαλκὸς ἄτεγκτον, τηκτὸν ὄν, ἔριον δὲ καὶ γῆ τεγκτόν· βρέχεται γάρ. καὶ χαλκὸς μὲν δὴ τηκτόν, οὐχ ὑπὸ ὕδατος δὲ τηκτόν. ἀλλὰ καὶ τῶν ὑπὸ ὕδατος τηκτῶν ἔνια ἄτεγκτα, οἷον νίτρον καὶ ἄλες· οὐδὲ γὰρ ἄλλο τεγκτόν οὐδὲν ὃ μὴ μαλακώτερον γίνεταί βρεχόμενον. ἔνια δὲ τεγκτὰ ὄντα οὐ τηκτὰ ἐστίν, οἷον ἔριον καὶ οἱ καρποί. ἔστι δὲ τεγκτὰ μὲν ὅσα γῆς ὄντα ἔχει τοὺς πόρους μείζους τῶν τοῦ ὕδατος ὄγκων, ὄντων σκληροτέρων τοῦ ὕδατος. τηκτὰ δὲ ὕδατι ὅσα δι' ὅλου. διὰ τί δ' ἢ μὲν γῆ καὶ τήκεται καὶ τέγγεται ὑπὸ τοῦ ὕγρου, τὸ δὲ νίτρον τήκεται μὲν, τέγγεται δ' οὐ; ὅτι ἐν μὲν τῷ νίτρῳ δι' ὅλου οἱ πόροι, ὥστε διαιρεῖται εὐθὺς ὑπὸ τοῦ ὕδατος τὰ μόρια, ἐν δὲ τῇ γῇ καὶ παραλλάξ εἰσι πόροι, ὥστε ὁποτέρως ἂν δέξηται, διαφέρει τὸ πάθος. ἔστι δὲ καὶ τὰ μὲν τῶν σωμάτων καμπτὰ καὶ εὐθυντὰ, οἷον κάλαμος καὶ λύγος, τὰ δ' ἄκαμπτα τῶν σωμάτων, οἷον κέραμος καὶ λίθος. ἔστιν δὲ ἄκαμπτα μὲν καὶ ἀνεύθυντα ὅσων σωμάτων οὐ δύναται τὸ μῆκος εἰς εὐθύτητα ἐκ περιφερείας καὶ ἐξ εὐθύτητος εἰς περιφέρειαν μεταβάλλειν, καὶ τὸ κάμπτεσθαι καὶ τὸ εὐθύνεσθαι ἐστίν τὸ εἰς εὐθύτητα ἢ περιφέρειαν μεθίστασθαι ἢ κινεῖσθαι· καὶ γὰρ τὸ ἀνακαμπτόμενον καὶ τὸ [386a] κατακαμπτόμενον κάμπτεται. ἢ μὲν οὖν εἰς κυρτότητα ἢ κοιλότητα κίνησις τοῦ μήκους σφωζομένου κάμψις ἐστίν· εἰ γὰρ καὶ εἰς τὸ εὐθύ, εἴη ἂν ἅμα κεκαμμένον καὶ εὐθύ· ὅπερ ἀδύνατον, τὸ εὐθὺ κεκάμφθαι. καὶ εἰ κάμπτεται πᾶν ἢ ἀνακάμψει ἢ κατακάμψει, τούτων δὲ τὸ μὲν εἰς τὸ κυρτόν τὸ δ' εἰς τὸ κοῖλον μετάβασις, οὐκ ἂν εἴη καὶ εἰς τὸ εὐθὺ κάμψις, ἀλλ' ἔστι κάμψις καὶ εὐθυνσις ἄλλο καὶ ἄλλο. καὶ ταῦτά ἐστιν καμπτὰ καὶ εὐθυντὰ, καὶ ἄκαμπτα καὶ ἀνεύθυντα. καὶ τὰ μὲν κατακτὰ καὶ θραυστὰ ἅμα ἢ χωρίς, οἷον ξύλον μὲν κατακτόν, θραυστόν δ' οὐ, κρύσταλλος δὲ καὶ λίθος θραυστόν, κατακτόν δ' οὐ, κέραμος δὲ καὶ θραυστόν καὶ κατακτόν. διαφέρει δ', ὅτι κάταξις μὲν ἐστίν εἰς μεγάλα μέρη διαίρεσις καὶ χώρισις, θραῦσις δὲ εἰς τὰ τυχόντα καὶ πλείω δυοῖν. ὅσα μὲν οὖν οὕτω πέπηγεν ὥστε πολλοὺς ἔχειν παραλλάττοντας πόρους, θραυστὰ (μέχρι γὰρ τούτου δίσταται), ὅσα δ' εἰς πολὺ, κατακτὰ, ὅσα δ' ἄμφω, ἀμφοτέρα. καὶ τὰ μὲν θλαστὰ, οἷον χαλκὸς καὶ κηρός, τὰ δ' ἄθλαστα, οἷον κέραμος καὶ ὕδωρ. ἔστιν δὲ θλάσις ἐπιπέδου κατὰ μέρος εἰς βάθος μετάστασις ὥσει ἢ πληγῇ,

τὸ δ' ὅλον ἀφῆ. ἔστιν δὲ τὰ τοιαῦτα καὶ μαλακτά, οἷον κηρὸς μένοντος τοῦ ἄλλου ἐπιπέδου κατὰ μέρος μεθίσταται, καὶ σκληρά, οἷον χαλκός, καὶ ἄθλαστα καὶ σκληρά, οἷον κέραμος (οὐ γὰρ ὑπείκει εἰς βάθος τὸ ἐπίπεδον), καὶ ὑγρά, οἷον ὕδωρ (τὸ γὰρ ὕδωρ ὑπείκει μὲν, ἀλλ' οὐ κατὰ μέρος, ἀλλ' ἀντιμεθίσταται). τῶν δὲ θλαστῶν ὅσα μὲν μένει θλασθέντα καὶ εὐθλαστα χειρί, ταῦτα μὲν πλαστά, τὰ δὲ ἢ μὴ εὐθλαστα, ὥσπερ λίθος ἢ ξύλον, ἢ εὐθλαστα μὲν, μὴ μένει δὲ ἢ θλάσις, ὥσπερ ἐρίου ἢ σπόγγου, οὐ πλαστά, ἀλλὰ πιεστὰ ταῦτ' ἐστίν. ἔστι δὲ πιεστὰ ὅσα ὠθούμενα εἰς αὐτὰ συνιέναι δύναται, εἰς βάθος τοῦ ἐπιπέδου παραλλάττοντος, οὐ διαιρουμένου, καὶ <μὴ> μεθισταμένου ἄλλου ἄλλω μορίου, οἷον τὸ ὕδωρ ποιεῖ· τοῦτο γὰρ ἀντιμεθίσταται. ἔστι δὲ ὧσις ἢ κίνησις ὑπὸ τοῦ κινουντος, ἢ [386b] γίνεταί ἀπὸ τῆς ἄψεως· πληγὴ δέ, ὅταν ἀπὸ τῆς φορᾶς. πιάζεται δὲ ὅσα πόρους ἔχει κενοὺς συγγενοῦς σώματος· καὶ πιεστὰ ταῦτα ὅσα δύναται εἰς τὰ ἑαυτῶν κενὰ συνιέναι ἢ εἰς τοὺς ἑαυτῶν πόρους· [ἐνίστε γὰρ οὐ κενοὶ εἰσιν εἰς οὓς συνέρχεται,] οἷον ὁ βεβρεγμένος σπόγγος (πλήρεις γὰρ αὐτοῦ οἱ πόροι), ἀλλ' ὧν ἂν οἱ πόροι πλήρεις ὧσι μαλακωτέρων ἢ αὐτὸ τὸ πεφυκὸς συνιέναι εἰς αὐτά. πιεστὰ μὲν οὖν ἐστίν οἷον σπόγγος, κηρός, σάρξ· ἀπίεστα δὲ τὰ μὴ πεφυκότες συνιέναι ὥσει εἰς τοὺς ἑαυτῶν πόρους διὰ τὸ ἢ μὴ ἔχειν ἢ σκληροτέρων ἔχειν πλήρεις· ὁ γὰρ σίδηρος ἀπίεστος καὶ λίθος καὶ ὕδωρ καὶ πᾶν ὑγρόν. ἐλκτὰ δ' ἐστὶν ὅσων δυνατόν εἰς τὸ πλάγιον μεθίστασθαι τὸ ἐπίπεδον· τὸ γὰρ ἔλκεσθαι ἐστὶ τὸ ἐπὶ τὸ κινεῖν μεθίστασθαι τὸ ἐπίπεδον συνεχῆς ὄν. ἔστιν δὲ τὰ μὲν ἐλκτά, οἷον θρίξ, ἰμάς, νεῦρον, σταῖς, ἰζός, τὰ δ' ἀνελκτα, οἷον ὕδωρ καὶ λίθος. τὰ μὲν οὖν ταῦτά ἐστιν ἐλκτά καὶ πιεστὰ, οἷον ἔριον, τὰ δ' οὐ ταῦτα, οἷον φλέγμα πιεστὸν μὲν οὐκ ἔστιν, ἐλκτὸν δέ, καὶ ὁ σπόγγος πιεστὸν μὲν, οὐχ ἐλκτὸν δέ. ἔστιν δὲ καὶ τὰ μὲν ἐλατά, οἷον χαλκός, τὰ δ' ἀνήλατα, οἷον λίθος καὶ ξύλον. ἔστιν δ' ἐλατά μὲν ὅσα τῇ αὐτῇ πληγῇ δύναται ἅμα καὶ εἰς πλάτος καὶ εἰς βάθος τὸ ἐπίπεδον μεθίστασθαι κατὰ μέρος, ἀνήλατα δὲ ὅσα ἀδύνατα. ἔστιν δὲ τὰ μὲν ἐλατά ἅπαντα καὶ θλαστά, τὰ δὲ θλαστὰ οὐ πάντα ἐλατά, οἷον ξύλον· ὡς μέντοι ἐπίπαν εἰπεῖν, ἀντιστρέφει. τῶν δὲ πιεστῶν τὰ μὲν ἐλατά τὰ δ' οὐ, κηρὸς μὲν καὶ πηλὸς ἐλατά, ἔριον δ' οὐ [οὐδ' ὕδωρ]. ἔστιν δὲ καὶ τὰ μὲν σχιστά, οἷον ξύλον, τὰ δὲ ἄσχιστα, οἷον κέραμος. ἔστιν δὲ σχιστὸν τὸ δυνάμενον διαιρεῖσθαι ἐπὶ πλεόν ἢ τὸ διαιροῦν διαιρεῖ· σχίζεται γάρ, ὅταν ἐπὶ πλεόν διαιρῇται ἢ τὸ διαιροῦν διαιρεῖ, καὶ

προηγείται ἡ διαίρεσις· ἐν δὲ τῇ τμήσει οὐκ ἔστιν τοῦτο. ἄσχιστα δὲ ὅσα μὴ δύνανται τοῦτο πάσχειν. ἔστιν δὲ οὔτε μαλακὸν οὐδὲν σχιστόν (λέγω δὲ τῶν ἀπλῶς μαλακῶν καὶ μὴ πρὸς ἄλληλα· οὕτω μὲν γὰρ καὶ σίδηρος ἔσται μαλακός) οὔτε τὰ σκληρὰ πάντα, [387a] ἀλλ' ὅσα μήτε ὑγρά ἔστιν μήτε θλαστὰ μήτε θραυστά· τοιαῦτα δ' ἔστιν ὅσα κατὰ μῆκος ἔχει τοὺς πόρους, καθ' οὓς προσφύεται ἀλλήλοις, ἀλλὰ μὴ κατὰ πλάτος. τμητὰ δ' ἔστιν τῶν συνεστώτων σκληρῶν ἢ μαλακῶν ὅσα δύνανται μὴτ' ἐξ ἀνάγκης προηγῆσθαι τῆς διαιρέσεως μήτε θραύεσθαι διαιρούμενα· ὅσα δὲ μὴ ὑγρά ἢ, τὰ τοιαῦτα ἄτμητα. ἔνια δ' ἔστιν ταῦτα καὶ τμητὰ καὶ σχιστά, οἷον ξύλον· ἀλλ' ὥς ἐπὶ τὸ πολὺ σχιστόν μὲν κατὰ τὸ μῆκος, τμητὸν δὲ κατὰ τὸ πλάτος· ἐπεὶ γὰρ διαιρεῖται ἕκαστον εἰς πολλὰ, ἢ μὲν μήκη πολλὰ τὸ ἓν, σχιστόν ταύτη, ἢ δὲ πλάτη πολλὰ τὸ ἓν, τμητὸν ταύτη. γλίσχρον δ' ἔστιν ὅταν ἐλκτόν ἢ ὑγρὸν ὃν ἢ μαλακόν. τοιοῦτον δὲ γίνεταί τῃ ἐπαλλάξει ὅσα ὥσπερ αἱ ἀλύσεις σύγκεινται τῶν σωμάτων· [387a.14] ταῦτα γὰρ ἐπὶ πολὺ δύνανται ἐκτείνεσθαι καὶ συνιέναι. ὅσα δὲ μὴ τοιαῦτα, ψαθυρά. πηλητὰ δ' ὅσα τῶν πιεστώων μόνιμον ἔχει τὴν πίεσιν, ἀπίλητα δὲ ὅσα ἢ ὅλως ἀπίεστα ἢ μὴ μόνιμον ἔχει τὴν πίεσιν. καὶ τὰ μὲν καυστά ἔστιν τὰ δὲ ἄκαυστα, οἷον ξύλον μὲν καυστόν καὶ ἔριον καὶ ὀστοῦν, λίθος δὲ καὶ κρύσταλλος ἄκαυστον. ἔστιν δὲ καυστὰ ὅσα ἔχει πόρους δεκτικούς πυρὸς καὶ ὑγρότητα ἐν τοῖς κατ' εὐθυωρίαν πόροις ἀσθενεστέραν πυρός. ὅσα δὲ μὴ ἔχει ἢ ἰσχυροτέραν, οἷον κρύσταλλος καὶ τὰ σφόδρα χλωρά, ἄκαυστα. θυμιατὰ δ' ἔστι τῶν σωμάτων ὅσα ὑγρότητα ἔχει μὲν, οὕτω δ' ἔχει ὥστε μὴ ἐξατμίζειν πυρουμένων χωρὶς· ἔστιν γὰρ ἀτμὶς ἢ ὑπὸ θερμοῦ καυστικοῦ εἰς ἀέρα καὶ πνεῦμα ἑκκρίσις ἐξ ὑγροῦ διαντική. τὰ δὲ θυμιατὰ χρόνῳ εἰς ἀέρα ἐκκρίνεται, καὶ τὰ μὲν ἀφανιζόμενα ξηρά, τὰ δὲ γῇ γίνεταί. διαφέρει δ' αὕτη ἢ ἑκκρίσις, ὅτι οὔτε διαίνει οὔτε πνεῦμα γίνεταί. ἔστιν δὲ πνεῦμα ῥύσις συνεχῆς ἀέρος ἐπὶ μῆκος· θυμιάσις δ' ἔστιν ἢ ὑπὸ θερμοῦ καυστικοῦ κοινὴ ἑκκρίσις ξηροῦ καὶ ὑγροῦ ἀθρόως· διόπερ οὐ διαίνει, ἀλλὰ χρωματίζει μᾶλλον. ἔστι δ' ἢ μὲν ξυλώδους σώματος [387b] θυμιάσις καπνός. λέγω γὰρ καὶ ὀστά καὶ τρίχας καὶ πᾶν τὸ τοιοῦτον ἐν ταῦτῳ· οὐ γὰρ κεῖται ὄνομα κοινόν, ἀλλὰ κατ' ἀναλογίαν ὅμως ἐν ταῦτῳ πάντ' ἔστιν, ὥσπερ καὶ Ἐμπεδοκλῆς φησιν “ταῦτα τρίχες καὶ φύλλα καὶ οἰωνῶν πτερὰ πυκνὰ καὶ λοπίδες γίνονται ἐπὶ στιβαροῖσι μέλεσσιν.” ἢ δὲ πίνος θυμιάσις λιγνύς, ἢ δὲ λιπαροῦ κνῖσα. διὰ τοῦτο τὸ ἔλαιον

οὐχ ἔψεται οὐδὲ παχύνεται, ὅτι θυμιατόν ἐστιν ἀλλ' οὐκ ἀτμιστόν· ὕδωρ δ' οὐ θυμιατόν ἀλλ' ἀτμιστόν. οἶνος δ' ὁ μὲν γλυκὺς θυμιάται. πίων γάρ, καὶ ταῦτά ποιεῖ τῷ ἐλαίῳ· οὔτε γὰρ ὑπὸ ψύχους πήγνυται, καίεται τε. ἔστιν δὲ ὀνόματι οἶνος, ἔργῳ δ' οὐκ ἔστιν· οὐ γὰρ οἰνώδης ὁ χυμός· διὸ οὐ μεθύσκει, ὁ τυχὼν δ' οἶνος (μικρὰν δ' ἔχει θυμίασιν· διὸ ἀνίησιν φλόγα). καυστὰ δὲ δοκεῖ εἶναι ὅσα εἰς τέφραν διαλύεται τῶν σωμάτων. πάσχει δὲ τοῦτο πάντα ὅσα πέπηγεν ἢ ὑπὸ θερμοῦ ἢ ὑπ' ἀμφοῖν, ψυχροῦ καὶ θερμοῦ· ταῦτα γὰρ φαίνεται κρατούμενα ὑπὸ τοῦ πυρός· ἥκιστα δὲ τῶν λίθων ἢ σφραγίς, ὁ καλούμενος ἄνθραξ. τῶν δὲ καυστῶν τὰ μὲν φλογιστὰ ἐστὶν τὰ δ' ἀφλόγιστα· τούτων δ' ἔνια ἀνθρακευτά. φλογιστὰ μὲν οὖν ὅσα φλόγα δύναται παρέχεσθαι· ὅσα δὲ ἀδύνατα, ἀφλόγιστα. ἔστι δὲ φλογιστὰ ὅσα μὴ ὑγρά ὄντα θυμιατά ἐστίν· πίττα δὲ ἢ ἔλαιον ἢ κηρὸς μᾶλλον μετ' ἄλλων ἢ καθ' αὐτὰ φλογιστά· μάλιστα δ' ὅσα καπνὸν ἀνίησιν. ἀνθρακευτά δ' ὅσα τῶν τοιούτων γῆς πλέον ἔχει ἢ καπνοῦ. ἔτι δ' ἔνια τηκτὰ ὄντα οὐ φλογιστά ἐστίν, οἷον χαλκός, καὶ φλογιστὰ οὐ τηκτά, οἷον ξύλον, τὰ δ' ἄμφω, οἷον λιβανωτός. αἴτιον δ' ὅτι τὰ μὲν ξύλα ἀθρόον ἔχει τὸ ὑγρόν, καὶ δι' ὅλου συνεχές ἐστίν, ὥστε διακάεσθαι, ὁ δὲ χαλκὸς παρ' ἑκαστον μὲν μέρος, οὐ συνεχές δέ, καὶ ἔλαττον ἢ ὥστε φλόγα ποιῆσαι· ὁ δὲ λιβανωτός τῇ μὲν οὕτως τῇ δ' ἐκείνως ἔχει. φλογιστὰ δ' ἐστὶν τῶν θυμιατῶν ὅσα μὴ τηκτά ἐστὶν διὰ τὸ μᾶλλον εἶναι γῆς. (τὸ ξηρὸν γὰρ ἔχει κοινὸν τῷ [388a] πυρί· τοῦτ' οὖν θερμὸν ἂν γένηται τὸ ξηρόν, πῦρ γίνεταί. διὰ τοῦτο ἢ φλόξ πνεῦμα ἢ καπνὸς καόμενός ἐστιν.) ξύλων μὲν οὖν ἢ θυμίασις καπνός, κηροῦ δὲ καὶ λιβανωτοῦ καὶ τῶν τοιούτων καὶ πίττης, καὶ ὅσα ἔχει πίτταν ἢ τοιαῦτα, λιγνύς, ἐλαίου δὲ καὶ ὅσα ἐλαιώδη, κνῖσα, καὶ ὅσα ἥκιστα καίεται μόνα, ὅτι ὀλίγον ξηροῦ ἔχει, ἢ δὲ μετάβασις διὰ τούτου, μετὰ δ' ἐτέρου τάχιστα· τοῦτο γάρ ἐστίν τὸ πῖον, ξηρὸν λιπαρόν. τὰ μὲν οὖν ἐκθυμιάμενα τῶν ὑγρῶν ὑγροῦ μᾶλλον, ὥς ἔλαιον καὶ πίττα, τὰ δὲ καόμενα ξηροῦ.

τούτοις δὲ τοῖς παθήμασιν καὶ ταύταις ταῖς διαφοραῖς τὰ ὁμοιομερῇ τῶν σωμάτων, ὥσπερ εἴρηται, διαφέρει ἀλλήλων κατὰ τὴν ἀφήν, καὶ ἔτι χυμοῖς καὶ ὁσμαῖς καὶ χρώμασιν· λέγω δ' ὁμοιομερῇ οἷον τὰ τε μεταλλευόμενα-χαλκόν, χρυσόν, ἄργυρον, καττίτερον, σίδηρον, λίθον, καὶ τᾶλλα τὰ τοιαῦτα, καὶ ὅσα ἐκ τούτων γίνεταί ἐκκρινόμενα-καὶ τὰ ἐν τοῖς ζώοις καὶ φυτοῖς, οἷον σάρκες, ὅστᾳ, νεῦρον, δέρμα, σπλάγχνον, τρίχες, ἴνες, φλέβες, ἐξ ὧν ἤδη

εἰρημένων δεῖ μεταδιώκειν. ὅσα μὲν οὖν ὕδατος, ὥς ἐπὶ τὸ πολὺ
ψυχρά, ἐὰν μὴ ἀλλοτρίαν ἔχῃ θερμότητα, οἶον κονία, οὔρον, οἶνος·
ὅσα δὲ γῆς, ὥς ἐπὶ τὸ πολὺ θερμὰ διὰ τὴν τοῦ θερμοῦ δημιουργίαν,
οἶον τίτανος καὶ τέφρα. δεῖ δὲ λαβεῖν τὴν ὕλην ψυχρότητά τινα εἶναι·
ἐπεὶ γὰρ τὸ ξηρὸν καὶ τὸ ὑγρὸν ὕλη (ταῦτα γὰρ παθητικά), τούτων δὲ
σώματα μάλιστα γῆ καὶ ὕδωρ ἐστίν (ταῦτα γὰρ ψυχρότητι ὥριστα),
δηλὸν ὅτι πάντα τὰ σώματα ὅσα ἐκατέρου ἀπλῶς [389b] τοῦ
στοιχείου, ψυχρὰ μᾶλλον ἐστίν, ἐὰν μὴ ἔχῃ ἀλλοτρίαν θερμότητα,
οἶον τὸ ζέον ὕδωρ ἢ τὸ διὰ τέφρας ἡθημένον· καὶ γὰρ τοῦτο ἔχει τὴν
ἐκ τῆς τέφρας θερμότητα· ἐν ἅπασιν γὰρ ἐστὶ θερμότης, ἢ πλείων ἢ
ελάττων, τοῖς πεπυρωμένοις· διὸ καὶ ἐν τοῖς σαπροῖς ζῶα ἐγγίγνεται·

ἔνεστι γὰρ θερμότης ἢ φθείρασα τὴν ἐκάστου οἰκείαν θερμότητα. ὅσα δὲ κοινά, ἔχει θερμότητα· συνέστηκε γὰρ τὰ πλεῖστα ὑπὸ θερμότητος πεψάσης. ἓνια δὲ σήψεις εἰσὶν, οἷον τὰ συντηκτά· ὥστε ἔχοντα μὲν τὴν φύσιν θερμὰ καὶ αἷμα καὶ γονὴ καὶ μυελὸς καὶ ὀπὸς καὶ πάντα τὰ τοιαῦτα, φθειρόμενα δὲ καὶ ἐξιστάμενα τῆς φύσεως οὐκέτι· λείπεται γὰρ ἢ ὕλη, γῆ οὔσα ἢ ὕδωρ· διὸ ἀμφοτέρω δοκεῖ τισιν, καὶ οἱ μὲν ψυχρά οἱ δὲ θερμὰ ταῦτα φασιν εἶναι, ὁρῶντες, ὅταν μὲν ἐν τῇ φύσει ᾖσιν, θερμά, ὅταν δὲ χωρισθῶσιν, πηγνύμενα. ἔχει μὲν οὖν οὕτως, ὅμως δέ, ὥσπερ διώριστα, ἐν οἷς μὲν ἡ ὕλη ὕδατος τὸ πλεῖστον, ψυχρά (ἀντίκειται γὰρ μάλιστα τοῦτο τῷ πυρί), ἐν οἷς δὲ γῆς ἢ ἀέρος, θερμότερα. συμβαίνει δὲ ποτε ταῦτα γίνεσθαι ψυχρότατα καὶ θερμότατα ἄλλοτρία θερμότητι· ὅσα γὰρ μάλιστα πέπηγε καὶ στερεώτερα ἐστίν, ταῦτα ψυχρά τε μάλιστα, ἐὰν στερηθῇ θερμότητος, καὶ κάει μάλιστα, ἐὰν πυρωθῇ, οἷον ὕδωρ καπνοῦ καὶ ὁ λίθος ὕδατος καίει μᾶλλον.

ἐπεὶ δὲ περὶ τούτων διώριστα, καθ' ἕκαστον λέγωμεν τί σὰρξ ἢ ὀστοῦν ἢ τῶν ἄλλων τῶν ὁμοιομερῶν· ἔχομεν γὰρ ἐξ ὧν ἡ τῶν ὁμοιομερῶν φύσις συνέστηκεν, τὰ γένη αὐτῶν, τίνος ἕκαστον γένους, διὰ τῆς γενέσεως· ἐκ μὲν γὰρ τῶν στοιχείων τὰ ὁμοιομερῇ, ἐκ δὲ τούτων ὡς ὕλης τὰ ὅλα ἔργα τῆς φύσεως. ἔστιν δ' ἅπαντα ὡς μὲν ἐξ ὕλης ἐκ τῶν εἰρημένων, ὡς δὲ κατ' οὐσίαν τῷ λόγῳ. αἰεὶ δὲ μᾶλλον δῆλον ἐπὶ τῶν ὑστέρων καὶ ὅλως ὅσα οἷον ὄργανα καὶ ἕνεκά του. μᾶλλον γὰρ δῆλον ὅτι ὁ νεκρὸς ἄνθρωπος ὁμωνύμως. οὕτω τοίνυν καὶ χεὶρ τελευτήσαντος ὁμωνύμως, καθάπερ καὶ [390a] αὐλοὶ λίθινοι λεχθεῖσαν· οἷον γὰρ καὶ ταῦτα ὄργανα ἅττα ἔοικεν εἶναι. ἦττον δ' ἐπὶ σαρκὸς καὶ ὀστοῦ τὰ τοιαῦτα δῆλα. ἔτι δ' ἐπὶ πυρὸς καὶ ὕδατος ἦττον· τὸ γὰρ οὗ ἕνεκα ἦκιστα ἐνταῦθα δῆλον, ὅπου δὴ πλεῖστον τῆς ὕλης· ὥσπερ γὰρ εἰ καὶ τὰ ἔσχατα ληφθῇ, ἢ μὲν ὕλη οὐδὲν ἄλλο παρ' αὐτήν, ἢ δ' οὐσία οὐδὲν ἄλλο ἢ λόγος, τὰ δὲ μεταξὺ ἀνάλογον τῷ ἐγγὺς εἶναι ἕκαστον, ἐπεὶ καὶ τούτων ὅτιοι ἐστὶν ἕνεκά του, καὶ οὐ πάντως ἔχον ὕδωρ ἢ πῦρ, ὥσπερ οὐδὲ σὰρξ οὐδὲ σπλάγχχνον. τούτων δ' ἔτι μᾶλλον πρόσωπον καὶ χεὶρ. ἅπαντα δ' ἐστὶν ὠρισμένα τῷ ἔργῳ· τὰ μὲν γὰρ δυνάμενα ποιεῖν τὸ αὐτῶν ἔργον ἀληθῶς ἐστὶν ἕκαστον, οἷον ὀφθαλμὸς εἰ ὁρά, τὸ δὲ μὴ δυνάμενον ὁμωνύμως, οἷον ὁ τεθνεὺς ἢ ὁ λίθινος· οὐδὲ γὰρ πρίων ὁ ξύλινος, ἀλλ' ἢ ὡς εἰκὼν. οὕτω τοίνυν καὶ σὰρξ· ἀλλὰ τὸ ἔργον αὐτῆς ἦττον δῆλον ἢ τὸ τῆς γλώττης. ὁμοίως δὲ καὶ πῦρ· ἀλλ' ἔτι

ἤττον ἴσως δῆλον φυσικῶς ἢ τὸ τῆς σαρκὸς ἔργον. ὁμοίως δὲ καὶ τὰ ἐν τοῖς φυτοῖς καὶ τὰ ἄψυχα, οἷον χαλκὸς καὶ ἄργυρος· πάντα γὰρ δυνάμει τινὶ ἐστὶν ἢ τοῦ ποιεῖν ἢ τοῦ πάσχειν, ὥσπερ σὰρξ καὶ νεῦρον· ἀλλ' οἱ λόγοι αὐτῶν οὐκ ἀκριβεῖς. ὥστε πότε ὑπάρχει καὶ πότε οὐ, οὐ ῥάδιον διιδεῖν, ἂν μὴ σφόδρα ἐξίτηλον ἦ καὶ τὰ σχήματα μόνον ἢ λοιπά, οἷον καὶ τὰ τῶν παλαιουμένων νεκρῶν σώματα ἐξαίφνης τέφρα γίγνεται ἐν ταῖς θήκαις· καὶ καρποὶ μόνον τῷ [390b] σχήματι, τὴν δ' αἴσθησιν οὐ φαίνονται, παλαιούμενοι σφόδρα· καὶ τὰ ἐκ τοῦ γάλακτος πηγνύμενα. τὰ μὲν οὖν τοιαῦτα μόρια θερμότητι καὶ ψυχρότητι καὶ ταῖς ὑπὸ τούτων κινήσεσιν ἐνδέχεται γίνεσθαι, πηγνύμενα τῷ θερμῷ καὶ τῷ ψυχρῷ· λέγω δ' ὅσα ὁμοιομερῇ, οἷον σάρκα, ὀστούν, τρίχας, νεῦρον, καὶ ὅσα τοιαῦτα· πάντα γὰρ διαφέρει ταῖς πρότερον εἰρημέναις διαφοραῖς, τάσει, ἔλξει, θραύσει, σκληρότητι, μαλακότητι καὶ τοῖς ἄλλοις τοῖς τοιοῦτοις· ταῦτα δὲ ὑπὸ θερμοῦ καὶ ψυχροῦ καὶ τῶν κινήσεων γίγνεται μειγνυμένων. τὰ δ' ἐκ τούτων συνεστῶτα οὐδενὶ ἂν ἔτι δόξειεν τὰ ἀνομοιομερῇ, οἷον κεφαλὴ ἢ χεὶρ ἢ πούς, ἀλλ' ὥσπερ καὶ τοῦ χαλκὸν μὲν ἢ ἄργυρον γενέσθαι αἰτία ψυχρότης καὶ θερμότης καὶ κίνησις, τοῦ δὲ πρίονα ἢ φιάλην ἢ κιβωτὸν οὐκέτι, ἀλλ' ἐνταῦθα μὲν τέχνη, ἐκεῖ δὲ φύσις ἢ ἄλλη τις αἰτία. εἰ οὖν ἔχομεν τίνος γένους ἕκαστον τῶν ὁμοιομερῶν, ληπτέον καθ' ἕκαστον τί ἐστίν, οἷον τί αἷμα ἢ σὰρξ ἢ σπέρμα καὶ τῶν ἄλλων ἕκαστον· οὕτω γὰρ ἴσμεν ἕκαστον διὰ τί καὶ τί ἐστίν, ἐὰν ἢ τὴν ὕλην ἢ τὸν λόγον ἔχωμεν, μάλιστα δ' ὅταν ἄμφω τῆς τε γενέσεως καὶ φθορᾶς, καὶ πόθεν ἢ ἀρχὴ τῆς κινήσεως. δηλωθέντων δὲ τούτων ὁμοίως τὰ ἀνομοιομερῇ θεωρητέον, καὶ τέλος τὰ ἐκ τούτων συνεστῶτα, οἷον ἄνθρωπον, φυτόν, καὶ ἄλλα τὰ τοιαῦτα.

Περὶ κόσμου (ψευδεπίγραφο) (391a) On the Universe

Πολλάκις μὲν ἔμοιγε θεῖόν τι καὶ δαιμόνιον ὄντως χρῆμα, ὦ Ἀλέξανδρε, ἡ φιλοσοφία ἔδοξεν εἶναι, μάλιστα δὲ ἐν οἷς μόνη διαραμένη πρὸς τὴν τῶν ὄντων θέαν ἐσπούδασε γνῶναι τὴν ἐν αὐτοῖς ἀλήθειαν, καὶ τῶν ἄλλων ταύτης ἀποστάντων διὰ τὸ ὕψος καὶ τὸ μέγεθος, αὕτη τὸ πρᾶγμα οὐκ ἔδιδεν οὐδ' αὐτὴν τῶν καλλίστων ἀπηξίωσεν, ἀλλὰ καὶ συγγενεστάτην ἑαυτῇ καὶ μάλιστα πρέπουσαν ἐνόμισεν εἶναι τὴν ἐκείνων μάθησιν. Ἐπειδὴ γὰρ οὐχ οἶόν τε ἦν τῷ σώματι εἰς τὸν οὐράνιον ἀφικέσθαι τόπον καὶ τὴν γῆν ἐκλιπόντα τὸν ἱερὸν ἐκείνων χῶρον κατοπεῦσαι, καθάπερ οἱ ἀνόητοί ποτε ἐπενόουν Ἀλφάδαί, ἡ γοῦν ψυχὴ διὰ φιλοσοφίας, λαβοῦσα ἡγεμόνα τὸν νοῦν, ἐπαιριώθη καὶ ἐξεδήμησεν, ἀκοπιάτόν τινα ὁδὸν εὐροῦσα, καὶ τὰ πλείστον ἀλλήλων ἀφροσύνας τοῖς τόποις τῇ διανοίᾳ συνεφόρησε, ῥαδίως, οἶμαι, τὰ συγγενῇ γνωρίσασα, καὶ θείῳ ψυχῆς ὁμματι τὰ θεῖα καταλαβομένη, τοῖς τε ἀνθρώποις προφητεύουσα. Τοῦτο δὲ ἔπαθε, καθ' ὅσον οἶόν τε ἦν, πᾶσιν ἀφρόνως μεταδοῦναι βουλευθεῖσα τῶν παρ' αὐτῇ τιμίων. Διὸ καὶ τοὺς μετὰ σπουδῆς διαγράψαντας ἡμῖν ἐνὸς τόπου φύσιν ἢ μιᾶς σχῆμα πόλεως ἢ ποταμοῦ μέγεθος ἢ ὄρους κάλλος, οἷά τινες ἤδη πεποιήκασι, φράζοντες οἱ μὲν τὴν Ὀσσαν, οἱ δὲ τὴν Νύσσαν, οἱ δὲ τὸ Κωρύκιον ἄντρον, οἱ δὲ ὅτιοῦν ἔτυχε τῶν ἐπὶ μέρους, οἰκτίσειεν ἂν τις τῆς μικροψυχίας, τὰ τυχόντα ἐκπεπληγμένους καὶ μέγα φρονούντας ἐπὶ θεωρίᾳ μικρᾷ. Τοῦτο δὲ πάσχουσι διὰ τὸ ἀθέατοι τῶν κρειττόνων εἶναι, κόσμου λέγω καὶ τῶν ἐν κόσμῳ μεγίστων· οὐδέποτε γὰρ ἂν τούτοις γνησίως ἐπιστήσαντες ἐθαύμαζόν τι τῶν ἄλλων, ἀλλὰ πάντα αὐτοῖς τὰ ἄλλα μικρὰ κατεφαίνετο ἂν καὶ οὐδενὸς ἄξια πρὸς τὴν τούτων ὑπεροχὴν. Λέγωμεν δὴ ἡμεῖς καί, καθ' ὅσον ἐφικτόν, θεολογῶμεν περὶ τούτων συμπάντων, ὥς ἕκαστον ἔχει φύσεως καὶ θέσεως καὶ κινήσεως. Πρέπειν δέ γε οἶμαι καὶ σοί, ὄντι ἡγεμόνων ἀρίστῳ, τὴν τῶν μεγίστων ἱστορίαν μετιέναι, φιλοσοφία τε μηδὲν

μικρὸν ἐπινοεῖν, ἀλλὰ τοῖς τοιούτοις δώροις δεξιουῖσθαι τοὺς ἀρίστους.

Κόσμος μὲν οὖν ἐστὶ σύστημα ἐξ οὐρανοῦ καὶ γῆς καὶ τῶν ἐν τούτοις περιεχομένων φύσεων. Λέγεται δὲ καὶ ἐτέρως κόσμος ἢ τῶν ὅλων τάξις τε καὶ διακόσμησις, ὑπὸ θεοῦ τε καὶ διὰ θεὸν φυλαττομένη. Ταύτης δὲ τὸ μὲν μέσον, ἀκίνητόν τε καὶ ἑδραῖον ὄν, ἢ φερέσβιος εἵληχε γῆ, παντοδαπῶν ζώων ἐστία τε οὖσα καὶ μήτηρ. Τὸ δὲ ὑπερθεν αὐτῆς, πᾶν τε καὶ πάντῃ πεπερατωμένον εἰς τὸ ἀνωτάτω, θεῶν οἰκητήριον, οὐρανὸς ὠνόμασται. Πλήρης δὲ ὢν σωμάτων θείων, ἃ δὴ καλεῖν ἄστρα εἰώθαμεν, κινούμενος κίνησιν αἰδίων, μιᾷ περιαγωγῇ καὶ κύκλῳ συναναχορεύει πᾶσι τούτοις ἀπαύστως δι' αἰῶνος. Τοῦ δὲ σύμπαντος οὐρανοῦ τε καὶ κόσμου σφαιροειδοῦς ὄντος καὶ κινουμένου, καθάπερ εἶπον, ἐνδελεχῶς, δύο ἐξ ἀνάγκης ἀκίνητά ἐστι σημεῖα, καταντικρὺ ἀλλήλων, καθάπερ τῆς ἐν τὸρνῳ κυκλοφορουμένης σφαίρας, στερεὰ μένοντα καὶ συνέχοντα τὴν σφαῖραν, περὶ ἃ ὁ πᾶς ὄγκος κύκλῳ στρέφεται· καλοῦνται δὲ οὗτοι πόλοι· δι' ὧν εἰ νοήσαιμεν ἐπεξευγμένην εὐθεῖαν, ἣν τινες ἄξονα καλοῦσι, διάμετρος ἔσται τοῦ κόσμου, μέσον μὲν ἔχουσα τὴν γῆν, τοὺς δὲ δύο πόλους πέρατα. Τῶν δὲ ἀκινήτων πόλων τούτων ὁ μὲν αἰεὶ φανερός ἐστιν ὑπὲρ κορυφὴν ὢν κατὰ τὸ βόρειον κλίμα, ἀρκτικός καλούμενος, ὁ δὲ ὑπὸ γῆν αἰεὶ κατακέκρυπται, κατὰ τὸ νότιον, ἀνταρκτικός καλούμενος. Οὐρανοῦ δὲ καὶ ἄστρον οὐσίαν μὲν αἰθέρα καλοῦμεν, οὐχ, ὥς τινες, διὰ τὸ πυρῶδη οὔσαν αἰθεσθαι, πλημμελοῦντες περὶ τὴν πλεῖστον πυρὸς ἀπηλλαγμένην δύναμιν, ἀλλὰ διὰ τὸ αἰεὶ θεῖν κυκλοφορουμένην, στοιχεῖον οὔσαν ἕτερον τῶν τεττάρων, ἀκήρατόν τε καὶ θεῖον. Τῶν γε μὴν ἐμπεριεχομένων ἄστρον τὰ μὲν ἀπλανῶς τῷ σύμπαντι οὐρανῷ συμπεριστρέφεται, τὰς αὐτὰς ἔχοντα ἑδρας, ὧν μέσος ὁ ζωοφόρος καλούμενος κύκλος ἐγκάρσιος διὰ τῶν τροπικῶν διέζωσται, κατὰ μέρη διηρημένος εἰς δώδεκα ζωδίων χώρας, τὰ δέ, πλανητὰ ὄντα, οὔτε τοῖς προτέροις ὁμοταχῶς κινεῖσθαι πέφυκεν οὔτε ἀλλήλοις, ἀλλ' ἐν ἐτέροις καὶ ἐτέροις κύκλοις, ὥστε αὐτῶν τὸ μὲν προσγειότερον εἶναι, τὸ δὲ ἀνώτερον. Τὸ μὲν οὖν τῶν ἀπλανῶν πλῆθος ἀνεξεύρετόν ἐστιν ἀνθρώποις, καίπερ ἐπὶ μιᾷ κινουμένων ἐπιφανείας τῆς τοῦ σύμπαντος οὐρανοῦ· τὸ δὲ τῶν πλανήτων, εἰς ἑπτὰ μέρη κεφαλαιούμενον, ἐν τοσούτοις ἐστὶ κύκλοις ἐφεξῆς κειμένοις, ὥστε αἰεὶ τὸν ἀνωτέρω μείζω τοῦ ὑποκάτω εἶναι, τοὺς τε ἑπτὰ ἐν ἀλλήλοις

ἐμπεριέχεσθαι, πάντας γε μὴν ὑπὸ τῆς τῶν ἀπλανῶν σφαίρας περιελήφθαι. Συνεχῇ δὲ ἔχει αἰετὴν τὴν θέσιν ταύτην ὁ τοῦ Φαίνοντος ἅμα καὶ Κρόνου καλούμενος κύκλος, ἐφεξῆς δὲ ὁ τοῦ Φαέθοντος καὶ Διὸς λεγόμενος, εἴθ' ὁ Πυρόεις, Ἡρακλέους τε καὶ Ἄρεος προσαγορευόμενος, ἐξῆς δὲ ὁ Στίλβων, ὃν ἱερὸν Ἑρμοῦ καλοῦσιν ἔνιοι, τινὲς δὲ Ἀπόλλωνος· μεθ' ὃν ὁ τοῦ Φωσφόρου, ὃν Ἀφροδίτης, οἱ δὲ Ἥρας προσαγορεύουσιν, εἴτα ὁ ἡλίου, καὶ τελευταῖος ὁ τῆς σελήνης, μέχρις ἧς ὀρίζεται ὁ αἰθήρ, τὰ τε θεῖα ἐμπεριέχων σώματα καὶ τὴν τῆς κινήσεως τάξιν. Μετὰ δὲ τὴν αἰθέριον καὶ θεῖαν φύσιν, ἦντινα τεταγμένην ἀποφαίνομεν, ἔτι δὲ ἄτρεπτον καὶ ἀνετεροίωτον καὶ ἀπαθῆ, συνεχῆς ἐστὶν ἡ δι' ὅλων παθητὴ τε καὶ τρεπτὴ, καί, τὸ σύμπαν εἰπεῖν, φθαρτὴ τε καὶ ἐπίκηρος. Ταύτης δὲ αὐτῆς πρώτη μὲν ἐστὶν ἡ λεπτομερὴς καὶ φλογώδης οὐσία, ὑπὸ τῆς αἰθερίου πυρουμένη διὰ τὸ μέγεθος αὐτῆς καὶ τὴν ὀξύτητα τῆς κινήσεως· ἐν δὲ τῇ πυρώδει καὶ ἀτάκτῳ λεγομένη τὰ τε σέλα διάττει καὶ φλόγες ἀκοντίζονται καὶ δοκίδες τε καὶ βόθυνοι καὶ κομῆται λεγόμενοι στηρίζονται καὶ σβέννυνται πολλάκις. Ἐξῆς δὲ ταύτης ὁ αἰὴρ ὑποκέχυται, ζοφώδης ὢν καὶ παγετώδης τὴν φύσιν· ὑπὸ δὲ ἐκείνης λαμπόμενος ἅμα καὶ διακαιόμενος λαμπρὸς τε γίνεται καὶ ἀλεεινός. Ἐν δὲ τούτῳ, τῆς παθητῆς ὄντι καὶ αὐτῷ δυνάμει καὶ παντοδαπῶς ἀλλοιουμένῳ, νέφη τε συνίσταται καὶ ὄμβροι καταράσσουσι, χιόνες τε καὶ πάχνη καὶ χάλαζαι πνοαί τε ἀνέμων καὶ τυφώνων, ἔτι τε βρονταὶ καὶ ἀστραπαὶ καὶ πτώσεις κεραυνῶν μυρίων τε γνόφων συμπληγάδες.

Ἐξῆς δὲ τῆς αἰρίου φύσεως γῆ καὶ θάλασσα ἐρήρυσται, φυτοῖς βρύουσα καὶ ζώοις πηγαῖς τε καὶ ποταμοῖς, τοῖς μὲν ἐν γῇ ἀναλίσκομένοις, τοῖς δὲ ἀνερευγομένοις εἰς θάλασσαν. Πεποίκιλται δὲ καὶ χλόαις μυρίαὶς ὄρεσι τε ὑψηλοῖς καὶ βαθυξύλοις δρυμοῖς καὶ πόλεσιν, ἃς τὸ σοφὸν ζῶον, ὁ ἄνθρωπος, ἰδρύσατο, νήσοις τε ἐναλίοις καὶ ἡπείροις. Τὴν μὲν οὖν οἰκουμένην ὁ πολὺς λόγος εἰς τε νήσους καὶ ἡπείρους διεῖλεν, ἀγνοῶν ὅτι καὶ ἡ σύμπασα μία νῆσός ἐστιν, ὑπὸ τῆς Ἀτλαντικῆς καλουμένης θαλάσσης περιρρεομένη. Πολλὰς δὲ καὶ ἄλλας εἰκὸς τῆσδε ἀντιπόρθμους ἄπωθεν κεῖσθαι, τὰς μὲν μερίζουσιν αὐτῆς, τὰς δὲ ἐλάττους, ἡμῖν δὲ πάσας πλὴν τῆσδε ἀοράτους· ὅπερ γὰρ αἱ παρ' ἡμῖν νῆσοι πρὸς ταυτὶ τὰ πελάγη πεπόνθασιν, τοῦτο ἦδε ἡ οἰκουμένη πρὸς τὴν Ἀτλαντικὴν θάλασσαν πολλαί τε ἕτεραι πρὸς σύμπασαν τὴν θάλασσαν· καὶ γὰρ αὗται

μεγάλοι τινές εἰσι νῆσοι μεγάλοις περικλυζόμεναι πελάγεσιν. Ἡ δὲ σύμπασα τοῦ ὑγροῦ φύσις ἐπιπολάζουσα, κατὰ τινος τῆς γῆς σπίλους τὰς καλουμένας ἀναπεφαγκυῖα οἰκουμένας, ἐξῆς ἂν εἴη τῆς ἀερίου μάλιστα φύσεως. Μετὰ δὲ ταύτην ἐν τοῖς βυθοῖς κατὰ τὸ μεσαίτατον τοῦ κόσμου συνερηρυσμένη γῆ πᾶσα καὶ πεπιεσμένη συνέστηκεν, ἀκίνητος καὶ ἀσάλευτος· καὶ τοῦτ' ἔστι τοῦ κόσμου τὸ πᾶν ὃ καλοῦμεν κάτω. Πέντε δὴ στοιχεῖα ταῦτα ἐν πέντε χώραις σφαιρικῶς ἐγκείμενα, περιεχομένης ἀεὶ τῆς ἐλάττονος τῇ μείζονι - λέγω δὲ γῆς μὲν ἐν ὕδατι, ὕδατος δὲ ἐν ἀέρι, ἀέρος δὲ ἐν πυρὶ, πυρὸς δὲ ἐν αἰθέρι - τὸν ὅλον κόσμον συνεστήσατο, καὶ τὸ μὲν ἄνω πᾶν θεῶν ἀπέδειξεν οἰκητήριον, τὸ κάτω δὲ ἐφημέρων ζώων. Αὐτοῦ γε μὴν τούτου τὸ μὲν ὑγρὸν ἐστίν, ὃ καλεῖν ποταμοὺς καὶ νάματα καὶ θαλάσσας εἰθίσμεθα, τὸ δὲ ξηρὸν, ὃ γῆν τε καὶ ἡπείρους καὶ νήσους ὀνομάζομεν.

Τῶν δὲ νήσων αἱ μὲν εἰσι μεγάλοι, καθάπερ ἡ σύμπασα ἥδε οἰκουμένη λέλεκται πολλαί τε ἕτεραι μεγάλοις περιρρεόμεναι πελάγεσιν, αἱ δὲ ἐλάττους, φανεραὶ τε ἡμῖν καὶ ἐντὸς οὖσαι. Καὶ τούτων αἱ μὲν ἀξιόλογοι, Σικελία καὶ Σαρδῶ καὶ Κύρνος Κρήτη τε καὶ Εὐβοία καὶ Κύπρος καὶ Λέσβος, αἱ δὲ ὑποδεέστεραι, ὧν αἱ μὲν Σποράδες, αἱ δὲ Κυκλάδες, αἱ δὲ ἄλλως ὀνομάζονται.

Πέλαγος δὲ τὸ μὲν ἔξω τῆς οἰκουμένης Ἀτλαντικόν τε καὶ Ὠκεανὸς καλεῖται, περιρρέων ἡμᾶς. Ἐντὸς δὲ πρὸς δύσεις στενοπόρῳ διανεωγὼς στόματι, κατὰ τὰς Ἡρακλείους λεγομένας στήλας τὸν εἶσρουν εἰς τὴν ἔσω θάλασσαν ὥς ἂν εἰς λιμένα ποιεῖται, κατὰ μικρὸν δὲ ἐπιπλατυνόμενος ἀναχεῖται, μεγάλους περιλαμβάνων κόλπους ἀλλήλοις συναφεῖς, πῇ μὲν κατὰ στενοπόρους αὐχένας ἀνεστομωμένος, πῇ δὲ πάλιν πλατυνόμενος. Πρῶτον μὲν οὖν λέγεται ἐγκεκοιλῶσθαι ἐν δεξιᾷ εἰσπλέοντι τὰς Ἡρακλείους στήλας, διχῶς, εἰς τὰς καλουμένας Σύρτεις, ὧν τὴν μὲν Μεγάλην, τὴν δὲ Μικράν, καλοῦσιν· ἐπὶ θάτερα δὲ οὐκέτι ὁμοίως ἀποκοιλούμενος τρία ποιεῖ πελάγη, τό τε Σαρδόνιον καὶ τὸ Γαλατικὸν λεγόμενον καὶ Ἀδρίαν, ἐξῆς δὲ τούτων ἐγκάρσιον τὸ Σικελικόν, μετὰ δὲ τοῦτο τὸ Κρητικόν, συνεχὲς δὲ αὐτοῦ, τῇ μὲν τὸ Αἰγυπτίον τε καὶ Παμφύλιον καὶ Σύριον, τῇ δὲ τὸ Αἰγαῖόν τε καὶ Μυρτώον. Ἀντιπαρῆκει δὲ τοῖς εἰρημένοις πολυμερέστατος ὧν ὁ Πόντος, οὗ τὸ μὲν μυχαίτατον Μαῖωτις καλεῖται, τὸ δὲ ἔξω πρὸς τὸν Ἑλλήσποντον συναναστόμωται τῇ καλουμένη Προποντίδι. Πρὸς γε μὴν ταῖς ἀνασχέσεσι τοῦ ἡλίου

πάλιν εἰσρέων ὁ Ὠκεανός, τὸν Ἰνδικόν τε καὶ Περσικὸν διανοίξας κόλπον, ἀναφαίνει συνεχῇ τὴν Ἐρυθρὰν θάλασσαν διειληφώς. Ἐπὶ θάτερον δὲ κέρας κατὰ στενόν τε καὶ ἐπιμήκη διήκων αὐχένα, πάλιν ἀνευρύνεται, τὴν Ὑρκανίαν τε καὶ Κασπίαν ὀρίζων· τὸ δὲ ὑπὲρ ταύτην βαθὺν ἔχει τὸν ὑπὲρ τὴν Μαιῶτιν λίμνην τόπον. Εἴτα κατ' ὀλίγον ὑπὲρ τοὺς Σκύθας τε καὶ Κελτικὴν σφίγγει τὴν οἰκουμένην πρὸς τε τὸν Γαλατικὸν κόλπον καὶ τὰς προειρημένας Ἡρακλείους στήλας, ὧν ἔξω περιρρέει τὴν γῆν ὁ Ὠκεανός. Ἐν τούτῳ γε μὴν νῆσοι μέγισται τυγχάνουσιν οὖσαι δύο, Βρεττανικαὶ λεγόμεναι, Ἀλβίων καὶ Ἰέρνη, τῶν προϊστορημένων μείζους, ὑπὲρ τοὺς Κελτοὺς κείμεναι. Τούτων δὲ οὐκ ἐλάττους ἢ τε Ταπροβάνη πέραν Ἰνδῶν, λοξὴ πρὸς τὴν οἰκουμένην, καὶ ἡ †Φεβδὼλ καλουμένη, κατὰ τὸν Ἀραβικὸν κειμένη κόλπον. Οὐκ ὀλίγαι δὲ ἄλλαι μικραὶ περὶ τὰς Βρεττανικὰς καὶ τὴν Ἰβηρίαν κύκλῳ περιεστεφάνωνται τὴν οἰκουμένην ταύτην, ἣν δὴ νῆσον εἰρήκαμεν· ἥς πλάτος μὲν ἐστὶ κατὰ τὸ βαθύτατον τῆς ἡπείρου βραχὺ ἀποδέον τετρακισμυρίων σταδίων, ὥς φασιν οἱ εὖ γεωγραφήσαντες, μῆκος δὲ περὶ ἑπτακισμυρίους μάλιστα. Διαιρεῖται δὲ εἰς τε Εὐρώπην καὶ Ἀσίαν καὶ Λιβύην.

Εὐρώπη μὲν οὖν ἐστὶν ἥς ὅροι κύκλῳ στήλαι τε Ἡρακλέους καὶ μυχοὶ Πόντου θάλαττά τε Ὑρκανία, καθ' ἣν στενότατος ἰσθμὸς εἰς τὸν Πόντον διήκει· τινὲς δὲ ἀντὶ τοῦ ἰσθμοῦ Τάναϊν ποταμὸν εἰρήκασιν. Ἀσία δὲ ἐστὶ τὸ ἀπὸ τοῦ εἰρημένου ἰσθμοῦ τοῦ τε Πόντου καὶ τῆς Ὑρκανίας θαλάσσης μέχρι θατέρου ἰσθμοῦ, ὃς μεταξὺ κεῖται τοῦ τε Ἀραβικοῦ κόλπου καὶ τῆς ἔσω θαλάσσης, περιεχόμενος ὑπὸ τε ταύτης καὶ τοῦ πέριξ Ὠκεανοῦ· τινὲς δὲ ἀπὸ Τανάϊδος μέχρι Νείλου στομάτων τὸν τῆς Ἀσίας τίθενται ὅρον. Λιβύη δὲ τὸ ἀπὸ τοῦ Ἀραβικοῦ ἰσθμοῦ ἕως Ἡρακλέους στηλῶν. Οἱ δὲ ἀπὸ τοῦ Νείλου φασὶν ἕως ἐκείνων. Τὴν δὲ Αἴγυπτον, ὑπὸ τῶν τοῦ Νείλου στομάτων περιρρεομένην, οἱ μὲν τῇ Ἀσίᾳ, οἱ δὲ τῇ Λιβύῃ προσάπτουσι, καὶ τὰς νήσους οἱ μὲν ἐξαίρετους ποιοῦσιν, οἱ δὲ προσνέμουσι ταῖς γείτοσιν ἀεὶ μοίραις. Γῆς μὲν δὴ καὶ θαλάττης φύσιν καὶ θέσιν, ἣντινα καλεῖν εἰώθαμεν οἰκουμένην, τοιάνδε τινὰ ἱστορήκαμεν.

Περὶ δὲ τῶν ἀξιολογωτάτων ἐν αὐτῇ καὶ περὶ αὐτὴν παθῶν νῦν λέγωμεν, αὐτὰ τὰ ἀναγκαῖα κεφαλαιούμενοι. Δύο γὰρ δὴ τινες ἀπ' αὐτῆς ἀναθυμιάσεις ἀναφέρονται συνεχῶς εἰς τὸν ὑπὲρ ἡμᾶς ἄερα, λεπτομερεῖς καὶ ἀόρατοι παντάπασιν, εἰ [τι] μὴ κατὰ τὰς ἐφ' ἃς ἐστὶν ὅτε ἀπὸ ποταμῶν τε καὶ ναμάτων ἀναφερόμεναι θεωροῦνται. Τούτων

δὲ ἢ μὲν ἐστὶ ξηρὰ καὶ καπνώδης, ἀπὸ τῆς γῆς ἀπορρέουσα, ἢ δὲ νοτερὰ καὶ ἀτμώδης, ἀπὸ τῆς ὑγρᾶς ἀναθυμιωμένη φύσεως. Γίνονται δὲ ἀπὸ μὲν ταύτης ὁμίχλαι καὶ δρόσοι καὶ πάγων ἰδέαι νέφη τε καὶ ὄμβροι καὶ χιόνες καὶ χάλαζαι, ἀπὸ δὲ τῆς ξηρᾶς ἄνεμοί τε καὶ πνευμάτων διαφοραὶ βρονταὶ τε καὶ ἀστραπαὶ καὶ πρηστήρες καὶ κεραυνοὶ καὶ τὰ ἄλλα ἃ δὴ τούτοις ἐστὶ σύμφυλα. Ἔστι δὲ ὁμίχλη μὲν ἀτμώδης ἀναθυμιάσις ἄγονος ὕδατος, ἀέρος μὲν παχύτερα, νέφους δὲ ἀραιότερα· γίνεται δὲ ἥτοι ἐξ ἀρχῆς νέφους ἢ ἐξ ὑπολείμματος. Ἀντίπαλος δὲ αὐτῇ λέγεται τε καὶ ἔστιν αἰθρία, οὐδὲν ἄλλο οὔσα πλὴν ἀῆρ ἀνέφελος καὶ ἀνόμιχλος. Δρόσος δὲ ἐστὶν ὑγρὸν ἐξ αἰθρίας κατὰ σύστασιν λεπτὴν φερόμενον, κρύσταλλος δὲ ἀθρόον ὕδωρ ἐξ αἰθρίας πεπηγός, πάχνη δὲ δρόσος πεπηγυῖα, δροσοπάχνη δὲ ἡμιπαγὴς δρόσος. Νέφος δὲ ἐστὶ πάχος ἀτμῶδες συνεστραμμένον, γόνιμον ὕδατος· ὄμβρος δὲ γίνεται μὲν κατ' ἐκπτεσμὸν νέφους εὖ μάλα πεπαχυσμένου, διαφορὰς δὲ ἴσχει τοσάσδε ὅσας καὶ ἡ τοῦ νέφους θλίψις· ἡπία μὲν γὰρ οὔσα μαλακὰς ψεκάδας διασπείρει, σφοδρὰ δὲ ἀδροτέρας· καὶ τοῦτο καλοῦμεν ὑετὸν, ὄμβρου μείζω καὶ συνεχῇ συστρέμματα ἐπὶ γῆς φερόμενον. Χιὼν δὲ γίνεται κατὰ νεφῶν πεπυκνωμένων ἀπόθραυσιν πρὸ τῆς εἰς ὕδωρ μεταβολῆς ἀνακοπέντων· ἐργάζεται δὲ ἡ μὲν κοπὴ τὸ ἀφρῶδες καὶ ἐκλευκον, ἢ δὲ σύμπηξις τοῦ ἐνόντος ὑγροῦ τὴν ψυχρότητα οὐπω χυθέντος οὐδὲ ἡραιωμένου. Σφοδρὰ δὲ αὕτη καὶ ἀθρόα καταφερομένη νιφετὸς ὠνόμασται. Χάλαζα δὲ γίνεται νιφετοῦ συστραφέντος καὶ βρῖθος ἐκ πιλήματος εἰς καταφορὰν ταχύτεραν λαβόντος· παρὰ δὲ τὰ μεγέθη τῶν ἀπορρηγνυμένων θραυσμάτων οἷ τε ὄγκοι μείζους αἷ τε φοραὶ γίνονται βιαιότεραι. Ταῦτα μὲν οὖν ἐκ τῆς ὑγρᾶς ἀναθυμιάσεως ἐφύκε συμπίπτειν.

Ἐκ δὲ τῆς ξηρᾶς ὑπὸ ψύχους μὲν ὥσθείσης ὥστε ρεῖν ἄνεμος ἐγένετο· οὐδὲν γάρ ἐστιν οὗτος πλὴν ἀῆρ πολλὸς ῥέων καὶ ἀθρόος· ὅστις ἅμα καὶ πνεῦμα λέγεται. Λέγεται δὲ καὶ ἐτέρως πνεῦμα ἢ τε ἐν φυτοῖς καὶ ζώοις καὶ διὰ πάντων διήκουσα ἔμψυχός τε καὶ γόνιμος οὐσία, περὶ ἧς νῦν λέγειν οὐκ ἀναγκαῖον. Τὰ δὲ ἐν ἀέρι πνέοντα πνεύματα καλοῦμεν ἀνέμους, αὔρας δὲ τὰς ἐξ ὑγροῦ φερομένας ἐκπνοάς. Τῶν δὲ ἀνέμων οἱ μὲν ἐκ νενοτισμένης γῆς πνέοντες ἀπόγειοι λέγονται, οἱ δὲ ἐκ κόλπων διεξάπτοντες ἐγκολπία· τούτοις δὲ ἀνάλογόν τι ἔχουσιν οἱ ἐκ ποταμῶν καὶ λιμνῶν. Οἱ δὲ κατὰ ῥῆξιν νέφους γινόμενοι καὶ ἀνάλυσιν τοῦ πάχους εἰς ἑαυτοὺς ποιοῦμενοι

ἐκνεφίαι καλοῦνται· μεθ' ὕδατος δὲ ἀθρόον ῥαγέντες ἐξυδρίαί λέγονται. Καὶ οἱ μὲν ἀπὸ ἀνατολῆς συνεχεῖς εὖροι κέκληνται, βορέαι δὲ οἱ ἀπὸ ἄρκτου, ζέφυροι δὲ οἱ ἀπὸ δύσεως, νότοι δὲ οἱ ἀπὸ μεσημβρίας. Τῶν γε μὴν εὖρων καικίας μὲν λέγεται ὁ ἀπὸ τοῦ περὶ τὰς θερινὰς ἀνατολὰς τόπου πνέων ἄνεμος, ἀπηλιώτης δὲ ὁ ἀπὸ τοῦ περὶ τὰς ἡμερινὰς, εὖρος δὲ ὁ ἀπὸ τοῦ περὶ τὰς χειμερινὰς. Καὶ τῶν ἐναντίων ζεφύρων ἀργέστης μὲν ὁ ἀπὸ τῆς θερινῆς δύσεως, ὃν τινες καλοῦσιν ὀλυμπίαν, οἱ δὲ ἰάπυγα· ζέφυρος δὲ ὁ ἀπὸ τῆς ἡμερινῆς, λίψ δὲ ὁ ἀπὸ τῆς χειμερινῆς. Καὶ τῶν βορεῶν ἰδίως ὁ μὲν ἐξῆς τῷ καικίᾳ καλεῖται βορέας, ἀπαρκτίας δὲ ὁ ἐφεξῆς ἀπὸ τοῦ πόλου κατὰ τὸ μεσημβρινὸν πνέων, θρασκίας δὲ ὁ ἐξῆς πνέων τῷ ἀργέστη, ὃν ἔνιοι κερκίαν καλοῦσιν. Καὶ τῶν νότων ὁ μὲν ἀπὸ τοῦ ἀφανοῦς πόλου φερόμενος ἀντίπαλος τῷ ἀπαρκτίᾳ καλεῖται νότος, εὐρόνοτος δὲ ὁ μεταξὺ νότου καὶ εὖρου· τὸν δὲ ἐπὶ θάτερα μεταξὺ λιβὸς καὶ νότου οἱ μὲν λιβόνοτον, οἱ δὲ λιβοφοίνικα, καλοῦσιν. Τῶν δὲ ἀνέμων οἱ μὲν εἰσιν εὐθύπνοοι, ὅποσοι διεκπνέουσι πρόσω κατ' εὐθείαν, οἱ δὲ ἀνακαμπίπνοοι, καθάπερ ὁ καικίας λεγόμενος, καὶ οἱ μὲν χειμῶνος, ὥσπερ οἱ νότοι, δυναστεύοντες, οἱ δὲ θέρους, ὡς οἱ ἐτησῖαι λεγόμενοι, μῖξιν ἔχοντες τῶν τε ἀπὸ τῆς ἄρκτου φερομένων καὶ ζεφύρων· οἱ δὲ ὀρνιθῖαι καλούμενοι, ἑαρινοὶ τινες ὄντες ἄνεμοι, βορέαι εἰσὶ τῷ γένει. Τῶν γε μὴν βιαίων πνευμάτων καταιγὶς μὲν ἐστὶ πνεῦμα ἄνωθεν τύπτον ἐξαίφνης, θύελλα δὲ πνεῦμα βίαιον καὶ ἄφνω προσαλλόμενον, λαῖλαψ δὲ καὶ στρόβιλος πνεῦμα εἰλούμενον κάτωθεν ἄνω, ἀναφύσημα δὲ γῆς πνεῦμα ἄνω φερόμενον κατὰ τὴν ἐκ βυθοῦ τιнос ἢ ρήγματος ἀνάδοσιν· ὅταν δὲ εἰλούμενον πολὺ φέρῃται, πρηστήρ χθονίος ἐστίν. Εἰληθὲν δὲ πνεῦμα ἐν νέφει παχεῖ τε καὶ νοτερῷ, καὶ ἐξωσθὲν δι' αὐτοῦ, βιαίως ρηγνύον τὰ συνεχῆ πιλήματα τοῦ νέφους, βρόμον καὶ πάταγον μέγαν ἀπειργάσατο, <ὅς> βροντὴ λέγεται, ὥσπερ ἐν ὕδατι πνεῦμα σφοδρῶς ἐλαυνόμενον. Κατὰ δὲ τὴν τοῦ νέφους ἔκρηξιν πυρωθὲν τὸ πνεῦμα καὶ λάμψαν ἀστραπὴ λέγεται· ὃ δὴ πρότερον τῆς βροντῆς προσέπεσεν, ὕστερον γενόμενον, ἐπεὶ τὸ ἀκουστὸν ὑπὸ τοῦ ὁρατοῦ πέφυκε φθάνεσθαι, τοῦ μὲν καὶ πόρρωθεν ὁρωμένου, τοῦ δὲ ἐπειδὰν ἐμπελάσῃ τῇ ἀκοῇ, καὶ μάλιστα ὅταν τὸ μὲν τάχιστον ἢ τῶν ὄντων, λέγω δὲ τὸ πυρῶδες, τὸ δὲ ἥττον ταχύ, ἀερῶδες ὃν, ἐν τῇ πλήξει πρὸς ἀκοὴν ἀφικνούμενον. Τὸ δὲ ἀστράψαν ἀναπυρωθὲν, βιαίως ἄχρι τῆς γῆς διεκθέον, κεραυνὸς καλεῖται, ἐὰν δὲ ἡμίπυρον ἦ, σφοδρὸν δὲ ἄλλως καὶ

ἄθροον, πρηστήρ, ἐὰν δὲ ἄπυρον παντελῶς, τυφών· ἕκαστον δὲ τούτων κατασκήψαν εἰς τὴν γῆν σκηπτὸς ὀνομάζεται. Τῶν δὲ κεραυνῶν οἱ μὲν αἰθαλώδεις πολόεντες λέγονται, οἱ δὲ ταχέως διάττοντες ἀργῆτες, ἐλικίαι δὲ οἱ γραμμοειδῶς φερόμενοι, σκηπτοὶ δὲ ὅσοι κατασκήπτουσιν εἰς τὴν γῆν. Συλλήβδην δὲ τῶν ἐν ἀέρι φαντασμάτων τὰ μὲν ἐστὶ κατ' ἔμφασιν, τὰ δὲ καθ' ὑπόστασιν - κατ' ἔμφασιν μὲν ἴριδες καὶ ῥάβδοι καὶ τὰ τοιαῦτα, καθ' ὑπόστασιν δὲ σέλα τε καὶ διάττοντες καὶ κομῆται καὶ τὰ τούτοις παραπλήσια. Ἴρις μὲν οὖν ἐστὶν ἔμφασις ἡλίου τμήματος ἢ σελήνης, ἐν νέφει νοτερῷ καὶ κοίλῳ καὶ συνεχεῖ πρὸς φαντασίαν, ὡς ἐν κατόπτρῳ, θεωρουμένη κατὰ κύκλου περιφέρειαν. Ῥάβδος δὲ ἐστὶν ἴριδος ἔμφασις εὐθεΐα. Ἄλως δὲ ἐστὶν ἔμφασις λαμπρότητος ἄστρου περίανγος· διαφέρει δὲ ἴριδος ὅτι ἡ μὲν ἴρις ἐξ ἐναντίας φαίνεται ἡλίου καὶ σελήνης, ἡ δὲ ἄλως κύκλῳ παντὸς ἄστρου. Σέλας δὲ ἐστὶ πυρὸς ἀθρόου ἕξαισις ἐν ἀέρι. Τῶν δὲ σελάων ἃ μὲν ἀκοντίζεται, ἃ δὲ στηρίζεται. Ὁ μὲν οὖν ἕξακοντισμός ἐστὶ πυρὸς γένεσις ἐκ παρατρίψεως ἐν ἀέρι φερομένου ταχέως καὶ φαντασίαν μήκους ἐμφαίνοντος διὰ τὸ τάχος, ὁ δὲ στηριγμός ἐστὶ χωρὶς φορᾶς προμήκης ἔκτασις καὶ οἷον ἄστρου ῥύσις· πλατυνομένη δὲ κατὰ θάτερον κομήτης καλεῖται. Πολλάκις δὲ τῶν σελάων τὰ μὲν ἐπιμένει πλείονα χρόνον, τὰ δὲ παραχρήμα σβέννυται. Πολλαὶ δὲ καὶ ἄλλαι φαντασμάτων ιδέαι θεωροῦνται, λαμπάδες τε καλούμεναι καὶ δοκίδες καὶ πίθοι καὶ βόθυνοι, κατὰ τὴν πρὸς ταῦτα ὁμοιότητα ὧδε προσαγορευθεῖσαι. Καὶ τὰ μὲν τούτων ἐσπέρια, τὰ δὲ ἑῷα, τὰ δὲ ἀμφιφανῆ θεωρεῖται, σπανίως δὲ βόρεια καὶ νότια. Πάντα δὲ ἀβέβαια· οὐδέποτε γάρ τι τούτων αἰὶ φανερόν ἰστόρηται κατεστηριγμένον. Τὰ μὲν τοίνυν ἀέρια τοιαῦτα.

Ἐμπεριέχει δὲ καὶ ἡ γῆ πολλὰς ἐν αὐτῇ, καθάπερ ὕδατος, οὕτως καὶ πνεύματος καὶ πυρὸς πηγὰς· τούτων δὲ αἱ μὲν ὑπὸ γῆν εἰσιν ἀόρατοι, πολλαὶ δὲ ἀναπνοὰς ἔχουσι καὶ ἀναφυσῆσεις, ὥπερ Λιπάρα τε καὶ Αἴτνη καὶ αἱ ἐν Αἰόλου νήσοις· αἱ δὲ καὶ ῥέουσι πολλάκις ποταμοῦ δίκην, καὶ μύδρους ἀναρριπτοῦσι διαπύρους. Ἐνταῦθα δὲ ὑπὸ γῆν οὔσαι πλησίον πηγαίων ὑδάτων θερμαίνουσι ταῦτα, καὶ τὰ μὲν χλιαρὰ τῶν ναμάτων ἀνιάσι, τὰ δὲ ὑπέρζεστα, τὰ δὲ εὖ ἔχοντα κράσεως. Ὅμοίως δὲ καὶ τῶν πνευμάτων πολλὰ πολλαχοῦ γῆς στόμια ἀνέφκται· ὧν τὰ μὲν ἐνθουσιᾶν ποιεῖ τοὺς ἐμπελάζοντας, τὰ δὲ ἀτροφεῖν, τὰ δὲ χρησμοδεῖν, ὥπερ τὰ ἐν Δελφοῖς καὶ Λεβαδεῖα, τὰ δὲ καὶ παντάπασιν ἀναιρεῖ, καθάπερ τὸ ἐν

Φρυγία. Πολλάκις δὲ καὶ συγγενὲς πνεῦμα εὐκρατον ἐν γῇ παρεξωσθὲν εἰς μυχίους σήραγγας αὐτῆς, ἔξεδρον γενόμενον ἐκ τῶν οἰκείων τόπων, πολλὰ μέρη συνεκράδανεν. Πολλάκις δὲ πολὺ γενόμενον ἔξωθεν ἐγκατελήθη τοῖς ταύτης κοιλώμασι καὶ ἀποκλεισθὲν [ἐξόδου] μετὰ βίας αὐτὴν συνετίναξε, ζητοῦν ἔξοδον ἑαυτῷ, καὶ ἀπειργάσατο πάθος τοῦτο ὃ καλεῖν εἰώθαμεν σεισμόν. Τῶν δὲ σεισμῶν οἱ μὲν εἰς πλάγια σείοντες κατ' ὀξείας γωνίας ἐπικλίνονται καλοῦνται, οἱ δὲ ἄνω ῥιπτοῦντες καὶ κάτω κατ' ὀρθὰς γωνίας βράσται, οἱ δὲ συνιζήσεις ποιοῦντες εἰς τὰ κοῖλα ἰζηματῖαι· οἱ δὲ χάσματα ἀνοίγοντες καὶ τὴν γῆν ἀναρρηγνύντες ῥῆκται καλοῦνται. Τούτων δὲ οἱ μὲν καὶ πνεῦμα προσαναβάλλουσιν, οἱ δὲ πέτρας, οἱ δὲ πηλόν, οἱ δὲ πηγὰς φαίνουσι τὰς πρότερον οὐκ οὔσας. Τινὲς δὲ ἀνατρέπουσι κατὰ μίαν πρόωσιν, οὓς καλοῦσιν ὥστας. Οἱ δὲ ἀνταποπάλλונτες καὶ ταῖς εἰς ἑκάτερον ἐγκλίσεσι καὶ ἀποπάλσεσι διορθοῦντες αἰετὶ τὸ σειόμενον παλματῖαι λέγονται, τρόμφ πάθος ὁμοιον ἀπεργαζόμενοι. Γίνονται δὲ καὶ μυκηταὶ σειμοί, σείοντες τὴν γῆν μετὰ βρόμου. Πολλάκις δὲ καὶ χωρὶς σειμοῦ γίνεται μύκημα γῆς, ὅταν τὸ πνεῦμα σείειν μὲν μὴ αὐτάρκες ᾖ, ἐνείλουμενον δὲ ἐν αὐτῇ κόπτηται μετὰ ῥοθίου βίας. Συσσωματοποιεῖται δὲ τὰ εἰσιόντα πνεύματα καὶ ὑπὸ τῶν ἐν τῇ γῇ ὑγρῶν κεκρυμμένων.

Τὰ δὲ ἀνάλογον συμπίπτει [τούτοις] καὶ ἐν θαλάσσῃ· χάσματά τε γὰρ γίνεται θαλάσσης καὶ ἀναχωρήματα πολλάκις καὶ κυμάτων ἐπιδρομαί, ποτὲ μὲν ἀντανακοπὴν ἔχουσαι, ποτὲ δὲ πρόωσιν μόνον, ὥσπερ ἱστορεῖται περὶ Ἑλικὴν τε καὶ Βοῦραν. Πολλάκις δὲ καὶ ἀναφυσήματα γίνεται πυρὸς ἐν τῇ θαλάσσῃ καὶ πηγῶν ἀναβλύσεις καὶ ποταμῶν ἐκβολαὶ καὶ δένδρων ἐκφύσεις ῥοαὶ τε καὶ δῖναι ταῖς τῶν πνευμάτων ἀνάλογον, αἱ μὲν ἐν μέσοις πελάγεσιν, αἱ δὲ κατὰ τοὺς εὐρίπους τε καὶ πορθμούς. Πολλοὶ τε ἀμπώτεις λέγονται καὶ κυμάτων ἄρσεις συμπεριοδεύειν αἰετὶ τῇ σελήνῃ κατὰ τινὰς ὀρισμένους καιρούς. Ὡς δὲ τὸ πᾶν εἰπεῖν, τῶν στοιχείων ἐγκεκραμένων ἀλλήλοις ἐν ἀέρι τε καὶ γῇ καὶ θαλάσῃ κατὰ τὸ εἶκος αἱ τῶν παθῶν ὁμοιότητες συνίστανται, τοῖς μὲν ἐπὶ μέρους φθορὰς καὶ γενέσεις φέρουσαι, τὸ δὲ σύμπαν ἀνώλεθρόν τε καὶ ἀγένητον φυλάττουσαι.

Καίτοι γὰρ τις ἐθαύμασε πῶς ποτε, ἐκ τῶν ἐναντίων ἀρχῶν συνεστηκώς ὁ κόσμος, λέγω δὲ ξηρῶν τε καὶ ὑγρῶν, ψυχρῶν τε καὶ θερμῶν, οὐ πάλαι διέφθαρται καὶ ἀπόλωλεν, ὥς καὶ εἰ πόλιν τινὲς

θαυμάζοιεν, ὅπως διαμένει συνεστηκυῖα ἐκ τῶν ἐναντιωτάτων ἔθνων, πενήτων λέγω καὶ πλουσίων, νέων γερόντων, ἀσθενῶν ἰσχυρῶν, πονηρῶν χρηστῶν. Ἀγνοοῦσι δὲ ὅτι τοῦτ' ἦν πολιτικῆς ὁμονοίας τὸ θαυμασιώτατον, λέγω δὲ τὸ ἐκ πολλῶν μίαν καὶ ὁμοίαν ἐξ ἀνομοίων ἀποτελεῖν διάθεσιν ὑποδεχομένην πᾶσαν καὶ φύσιν καὶ τύχην. Ἴσως δὲ τῶν ἐναντίων ἡ φύσις γλίχεται καὶ ἐκ τούτων ἀποτελεῖ τὸ σύμφωνον, οὐκ ἐκ τῶν ὁμοίων, ὥσπερ ἀμέλει τὸ ἄρρεν συνήγαγε πρὸς τὸ θῆλυ καὶ οὐχ ἑκάτερον πρὸς τὸ ὁμόφυλον, καὶ τὴν πρώτην ὁμόνοιαν διὰ τῶν ἐναντίων σημήψεν, οὐ διὰ τῶν ὁμοίων. Ἔοικε δὲ καὶ ἡ τέχνη τὴν φύσιν μιμουμένη τοῦτο ποιεῖν. Ζωγραφία μὲν γὰρ λευκῶν τε καὶ μελάνων, ὠχρῶν τε καὶ ἐρυθρῶν, χρωμάτων ἐγκερασαμένη φύσεις τὰς εἰκόνας τοῖς προηγουμένοις ἀπετέλεσε συμφώνους, μουσικὴ δὲ ὀξεῖς ἅμα καὶ βαρεῖς, μακροὺς τε καὶ βραχεῖς, φθόγγους μίξασα ἐν διαφόροις φωναῖς μίαν ἀπετέλεσεν ἁρμονίαν, γραμματικὴ δὲ ἐκ φωνηέντων καὶ ἀφώνων γραμμάτων κρᾶσιν ποιησαμένη τὴν ὅλην τέχνην ἀπ' αὐτῶν συνεστήσατο. Ταῦτο δὲ τοῦτο ἦν καὶ τὸ παρὰ τῷ σκοτεινῷ λεγόμενον Ἡρακλείτῳ· “Συλλάβεις ὅλα καὶ οὐχ ὅλα, συμφερόμενον διαφερόμενον, συνᾶδον διᾶδον· ἐκ πάντων ἐν καὶ ἐξ ἑνὸς πάντα.” Οὕτως οὖν καὶ τὴν τῶν ὅλων σύστασιν, οὐρανοῦ λέγω καὶ γῆς τοῦ τε σύμπαντος κόσμου, διὰ τῆς τῶν ἐναντιωτάτων κράσεως ἀρχῶν μία διεκόσμησεν ἁρμονία· ξηρὸν γὰρ ὑγρῷ, θερμὸν δὲ ψυχρῷ, βαρεῖ τε κοῦφον μιγὲν, καὶ ὀρθὸν περιφερεῖ, γῆν τε πᾶσαν καὶ θάλασσαν αἰθέρα τε καὶ ἥλιον καὶ σελήνην καὶ τὸν ὅλον οὐρανὸν διεκόσμησε μία [ἡ] διὰ πάντων διήκουσα δύναμις, ἐκ τῶν ἀμίκτων καὶ ἑτεροίων, ἀέρος τε καὶ γῆς καὶ πυρὸς καὶ ὕδατος, τὸν σύμπαντα κόσμον δημιουργήσασα καὶ μιᾷ διαλαβοῦσα σφαίρας ἐπιφανείᾳ τὰς τε ἐναντιωτάτας ἐν αὐτῷ φύσεις ἀλλήλαις ἀναγκάσασα ὁμολογῆσαι καὶ ἐκ τούτων μηχανησαμένη τῷ παντὶ σωτηρίαν. Αἰτία δὲ ταύτης μὲν ἡ τῶν στοιχείων ὁμολογία, τῆς δὲ ὁμολογίας ἡ ἰσομοιρία καὶ τὸ μηδὲν αὐτῶν πλέον ἕτερον ἑτέρου δύνασθαι· τὴν γὰρ ἴσην ἀντίστασιν ἔχει τὰ βαρέα πρὸς τὰ κοῦφα καὶ τὰ θερμὰ πρὸς θάτερα, τῆς φύσεως ἐπὶ τῶν μειζόνων διδασκούσης ὅτι τὸ ἴσον σωστικόν πῶς ἐστὶν ὁμονοίας, ἡ δὲ ὁμόνοια τοῦ πάντων γενετήρος καὶ περικαλλεστάτου κόσμου. Τίς γὰρ ἂν εἴη φύσις τοῦδε κρείττων; ἦν γὰρ ἂν εἴπη τις, μέρος ἐστὶν αὐτοῦ. Τό τε καλὸν πᾶν ἐπώνυμόν ἐστι τούτου καὶ τὸ τεταγμένον, ἀπὸ τοῦ κόσμου λεγόμενον κεκοσμηθῆναι. Τί δὲ τῶν ἐπὶ μέρους δύναται ἂν ἐξισωθῆναι

τῇ κατ' οὐρανὸν τάξει τε καὶ φορᾷ τῶν ἄστρον ἡλίου τε καὶ σελήνης, κινουμένων ἐν ἀκριβεστάτοις μέτροις ἐξ αἰῶνος εἰς ἕτερον αἰῶνα; τίς δὲ γένοιτ' ἂν ἀψεύδεια τοιάδε, ἥντινα φυλάττουσιν αἱ καλαὶ καὶ γόνιμοι τῶν ὅλων ὥραι, θέρη τε καὶ χειμῶνας ἐπάγουσαι τεταγμένως ἡμέρας τε καὶ νύκτας εἰς μηνὸς ἀποτελέσματα καὶ ἐνιαυτοῦ; καὶ μὴν μεγέθει μὲν οὗτος πανυπέρτατος, κινήσει δὲ ὀξύτατος, λαμπρότητι δὲ εὐανγέστατος, δυνάμει δὲ ἀγήρως τε καὶ ἄφθαρτος. Οὗτος ἐναλίω ζῶων καὶ πεζῶν καὶ ἀερίων φύσεις ἐχώρισε καὶ βίους ἐμέτρησε ταῖς ἑαυτοῦ κινήσεσιν. Ἐκ τούτου πάντα ἐμπνεῖ τε καὶ ψυχὴν ἴσχει τὰ ζῶα. Τούτου καὶ αἱ παράδοξοι νεοχμώσεις τεταγμένως ἀποτελοῦνται, συναραπτόντων μὲν ἀνέμων παντοίων, πιπτόντων δὲ ἐξ οὐρανοῦ κεραυνῶν, ρηγνυμένων δὲ χειμῶνων ἐξαισίων. Διὰ δὲ τούτων τὸ νοτερόν ἐκπιεζόμενον τό τε πυρῶδες διαπνεόμενον εἰς ὁμόνοιαν ἄγει τὸ πᾶν καὶ καθίστησιν. Ἡ τε γῆ φυτοῖς κομῶσα παντοδαποῖς νάμασί τε περιβλύζουσα καὶ περιοχουμένη ζῴοις, κατὰ καιρὸν ἐκφύουσά τε πάντα καὶ τρέφουσα καὶ δεχομένη, μυρίας τε φέρουσα ιδέας καὶ πάθη, τὴν ἀγήρω φύσιν ὁμοίως τηρεῖ, καίτοι καὶ σεισμοῖς τινασσομένη καὶ πλημυρίσιν ἐπικλυζομένη πυρκαϊαῖς τε κατὰ μέρος φλογιζομένη. Ταῦτα δὲ πάντα ἔοικεν αὐτῇ πρὸς ἀγαθοῦ γινόμενα τὴν δι' αἰῶνος σωτηρίαν παρέχειν· σειομένης τε γὰρ διεξάπτουσιν αἱ τῶν πνευμάτων παρεμπτώσεις κατὰ τὰ ρήγματα τὰς ἀναπνοὰς ἴσχουσιν, καθὼς ἄνω λέλεκται, καθαιρομένη τε ὄμβροις ἀποκλύζεται πάντα τὰ νοσώδη, περιπνεομένη δὲ αὔραις τὰ τε ὑπ' αὐτὴν καὶ τὰ ὑπὲρ αὐτὴν εἰλικρινεῖται. Καὶ μὴν αἱ φλόγες μὲν τὸ παγετῶδες ἡπιαίνουνσιν, οἱ πάγοι δὲ τὰς φλόγας ἀνιᾶσιν. Καὶ τῶν ἐπὶ μέρους τὰ μὲν γίνεται, τὰ δὲ ἀκμάζει, τὰ δὲ φθείρεται. Καὶ αἱ μὲν γενέσεις ἐπαναστέλλουσι τὰς φθοράς, αἱ δὲ φθοραὶ κουφίζουσι τὰς γενέσεις. Μία δὲ ἐκ πάντων περαινομένη σωτηρία διὰ τέλους ἀντιπερισταμένων ἀλλήλοις καὶ τοτὲ μὲν κρατούντων, τοτὲ δὲ κρατουμένων, φυλάττει τὸ σύμπαν ἄφθαρτον δι' αἰῶνος.

Λοιπὸν δὴ περὶ τῆς τῶν ὅλων συνεκτικῆς αἰτίας κεφαλαιωδῶς εἰπεῖν, ὃν τρόπον καὶ περὶ τῶν ἄλλων· πλημμελεῖς γὰρ περὶ κόσμου λέγοντας, εἰ καὶ μὴ δι' ἀκριβείας, ἀλλ' οὖν γε ὥς εἰς τυπώδη μάθησιν, τὸ τοῦ κόσμου κυριώτατον παραλιπεῖν. Ἀρχαῖος μὲν οὖν τις λόγος καὶ πάτριός ἐστι πᾶσιν ἀνθρώποις ὥς ἐκ θεοῦ πάντα καὶ διὰ θεὸν συνέστηκεν, οὐδεμία δὲ φύσις αὐτὴ καθ' ἑαυτήν ἐστιν

αὐτάρκης, ἐρημωθείσα τῆς ἐκ τούτου σωτηρίας. Διὸ καὶ τῶν παλαιῶν εἰπεῖν τινες προήχθησαν ὅτι πάντα ταῦτά ἐστι θεῶν πλέα τὰ καὶ δι’ ὀφθαλμῶν ἰνδαλλόμενα ἡμῖν καὶ δι’ ἀκοῆς καὶ πάσης αἰσθήσεως, τῇ μὲν θείᾳ δυνάμει πρέποντα καταβαλλόμενοι λόγον, οὐ μὴν τῇ γε οὐσίᾳ. Σωτὴρ μὲν γὰρ ὄντως ἀπάντων ἐστὶ καὶ γενέτωρ τῶν ὁπωσδήποτε κατὰ τόνδε τὸν κόσμον συντελουμένων ὁ θεός, οὐ μὴν αὐτουργοῦ καὶ ἐπιπόνου ζώου κάματον ὑπομένων, ἀλλὰ δυνάμει χρώμενος ἀτρύτῳ, δι’ ἧς καὶ τῶν πόρρῳ δοκούντων εἶναι περιγίνεται. Τὴν μὲν οὖν ἀνωτάτῳ καὶ πρώτῃν ἔδραν αὐτὸς ἔλαχεν, ὑπατός τε διὰ τοῦτο ὠνόμασται, κατὰ τὸν ποιητὴν “ἀκροτάτη κορυφῇ” τοῦ σύμπαντος ἐγκαθιδρυμένος οὐρανοῦ· μάλιστα δέ πως αὐτοῦ τῆς δυνάμεως ἀπολαύει τὸ πλησίον αὐτοῦ σῶμα, καὶ ἔπειτα τὸ μετ’ ἐκεῖνο, καὶ ἐφεξῆς οὕτως ἄχρι τῶν καθ’ ἡμᾶς τόπων. Διὸ γῆ τε καὶ τὰ ἐπὶ γῆς ἔοικεν, ἐν ἀποστάσει πλείστη τῆς ἐκ θεοῦ ὄντα ὠφελείας, ἀσθενῇ καὶ ἀκατάλληλα εἶναι καὶ πολλῆς μεστὰ ταραχῆς· οὐ μὴν ἀλλὰ καθ’ ὅσον ἐπὶ πᾶν διικνεῖσθαι πέφυκε τὸ θεῖον, καὶ ἐπὶ τὰ καθ’ ἡμᾶς ὁμοίως συμβαίνει τά τε ὑπὲρ ἡμᾶς, κατὰ τὸ ἔγγιον τε καὶ πορρωτέρῳ θεοῦ εἶναι μᾶλλον τε καὶ ἥττον ὠφελείας μεταλαμβάνοντα. Κρεῖττον οὖν ὑπολαβεῖν, ὃ καὶ πρέπον ἐστὶ καὶ θεῷ μάλιστα ἀρμόζον, ὥς ἢ ἐν οὐρανῷ δύναμις ἰδρυμένη καὶ τοῖς πλείστον ἀφεστηκόσιν, ὥς ἔνι γε εἰπεῖν, καὶ σύμπασιν αἴτιος γίνεται σωτηρίας, μᾶλλον ἢ ὥς διήκουσα καὶ φοιτῶσα ἔνθα μὴ καλὸν μηδὲ εὐσχημον αὐτουργεῖν τὰ ἐπὶ γῆς. Τοῦτο μὲν γὰρ οὐδὲ ἀνθρώπων ἡγεμόσιν ἀρμόττει, παντὶ καὶ τῷ τυχόντι ἐφίστασθαι ἔργῳ, λέγω δὲ οἶον στρατιᾶς ἄρχοντι ἢ πόλεως ἢ οἴκου, [καὶ] εἰ χρεὼν στρωματόδεσμον εἶη δῆσαι καὶ εἴ τι φαυλότερον ἀποτελεῖν ἔργον, ὃ κἂν τὸ τυχὸν ἀνδράποδον ποιήσειεν, ἀλλ’ οἶον ἐπὶ τοῦ μεγάλου βασιλέως ἰστορεῖται. Τὸ <γὰρ> Καμβύσου Ξέρξου τε καὶ Δαρείου πρόσχημα εἰς σεμνότητος καὶ ὑπεροχῆς ὕψος μεγαλοπρεπῶς διεκεκόσμητο· αὐτὸς μὲν γάρ, ὥς λόγος, ἱδρυτο ἐν Σούσοις ἢ Ἐκβατάνοις, παντὶ ἀόρατος, θαυμαστὸν ἐπέχων βασιλείον οἶκον καὶ περίβολον χρυσῷ καὶ ἡλέκτρῳ καὶ ἐλέφαντι ἀστράπτοντα· πυλῶνες δὲ πολλοὶ καὶ συνεχεῖς πρόθυρά τε σύχνοις εἰργόμενα σταδίοις ἀπ’ ἀλλήλων θύραις τε χαλκαῖς καὶ τείχεσι μεγάλοις ὠχύρωτο· ἔξω δὲ τούτων ἄνδρες οἱ πρῶτοι καὶ δοκιμώτατοι διεκεκόσμηντο, οἱ μὲν ἄμφ’ αὐτὸν τὸν βασιλέα δορυφόροι τε καὶ θεράποντες, οἱ δὲ ἐκάστου περιβόλου φύλακες, πυλωροὶ τε καὶ ὠτακουσται λεγόμενοι, ὥς ἂν ὁ

βασιλεὺς αὐτός, δεσπότης καὶ θεὸς ὀνομαζόμενος, πάντα μὲν βλέπει, πάντα δὲ ἀκούει. Χωρὶς δὲ τούτων ἄλλοι καθειστήκεσαν προσόδων ταμίαι καὶ στρατηγοὶ πολέμων καὶ κυνηγεσίων δώρων τε ἀποδεκτῆρες τῶν τε λοιπῶν ἔργων ἕκαστοι κατὰ τὰς χρείας ἐπιμεληταί. Τὴν δὲ σύμπασαν ἀρχὴν τῆς Ἀσίας, περατουμένην Ἑλλησπόντῳ μὲν ἐκ τῶν πρὸς ἐσπέραν μερῶν, Ἰνδῷ δὲ ἐκ τῶν πρὸς ἑω, διειλήφεσαν κατὰ ἔθνη στρατηγοὶ καὶ σατράπαι καὶ βασιλεῖς, δοῦλοι τοῦ μεγάλου βασιλέως, ἡμεροδρόμοι τε καὶ σκοποὶ καὶ ἀγγελιαφόροι φρυκτωριῶν τε ἐποπτῆρες. Τοσοῦτος δὲ ἦν ὁ κόσμος, καὶ μάλιστα τῶν φρυκτωρ[ι]ῶν, κατὰ διαδοχὰς πυρσευόντων ἀλλήλοις ἐκ περάτων τῆς ἀρχῆς μέχρι Σούσων καὶ Ἑκβατάνων, ὥστε τὸν βασιλέα γινώσκειν αὐθημερὸν πάντα τὰ ἐν τῇ Ἀσίᾳ καινουργούμενα.

Νομιστέον δὴ τὴν τοῦ μεγάλου βασιλέως ὑπεροχὴν πρὸς τὴν τοῦ τὸν κόσμον ἐπέχοντος θεοῦ τοσοῦτον καταδεεστέραν ὅσον τῆς ἐκείνου τὴν τοῦ φαυλοτάτου τε καὶ ἀσθενεστάτου ζώου, ὥστε, εἴπερ ἄσεμνον ἦν αὐτὸν αὐτῷ δοκεῖν Ξέρξην αὐτουργεῖν ἅπαντα καὶ ἐπιτελεῖν ἃ βούλοιο καὶ ἐφιστάμενον «ἐκασταχοῦ» διοικεῖν, πολὺ μᾶλλον ἀπρεπὲς ἂν εἴη θεῷ. Σεμνότερον δὲ καὶ πρεπωδέστερον αὐτὸν μὲν ἐπὶ τῆς ἀνωτάτω χώρας ἰδρῦσθαι, τὴν δὲ δύναμιν διὰ τοῦ σύμπαντος κόσμου διήκουσαν ἥλιόν τε κινεῖν καὶ σελήνην καὶ τὸν πάντα οὐρανὸν περιάγειν αἰτιὸν τε γίνεσθαι τοῖς ἐπὶ τῆς γῆς σωτηρίας. Οὐδὲν γὰρ ἐπιτεχνήσεως δεῖ καὶ ὑπηρεσίας τῆς παρ' ἐτέρων, ὥσπερ τοῖς παρ' ἡμῖν ἄρχουσι τῆς πολυχειρίας διὰ τὴν ἀσθένειαν, ἀλλὰ τοῦτο ἦν τὸ θεϊότατον, τὸ μετὰ ῥαστώνης καὶ ἀπλῆς κινήσεως παντοδαπὰς ἀποτελεῖν ιδέας, ὥσπερ ἀμέλει δρῶσιν οἱ μηχανοτέχναι, διὰ μιᾶς ὀργάνου σχαστηρίας πολλὰς καὶ ποικίλας ἐνεργείας ἀποτελοῦντες. Ὅμοίως δὲ καὶ οἱ νευροσπάσται μίαν μήρινθον ἐπισπασάμενοι ποιοῦσι καὶ αὐχένα κινεῖσθαι καὶ χεῖρα τοῦ ζώου καὶ ὦμον καὶ ὀφθαλμόν, ἔστι δὲ ὅτε πάντα τὰ μέρη, μετὰ τινος εὐρυθμίας. Οὕτως οὖν καὶ ἡ θεία φύσις ἀπὸ τινος ἀπλῆς κινήσεως τοῦ πρώτου τὴν δύναμιν εἰς τὰ συνεχῆ δίδωσι καὶ ἀπ' ἐκείνων πάλιν εἰς τὰ πορρωτέρω, μέχρις ἂν διὰ τοῦ παντὸς διεξέλθῃ· κινήθην γὰρ ἕτερον ὑφ' ἐτέρου καὶ αὐτὸ πάλιν ἐκίνησεν ἄλλο σὺν κόσμῳ, δρῶντων μὲν πάντων οἰκείως ταῖς σφετέραις κατασκευαῖς, οὐ τῆς αὐτῆς δὲ ὁδοῦ πᾶσιν οὔσης, ἀλλὰ διαφόρου καὶ ἐτεροίας, ἔστι δὲ οἷς καὶ ἐναντίας, καίτοι τῆς πρώτης οἷον ἐνδόσεως εἰς κίνησιν μιᾶς

γενομένης· ὥσπερ ἂν εἴ τις ἐξ ἄγγους ὁμοῦ ρίψει σφαῖραν καὶ κύβον καὶ κῶνον καὶ κύλινδρον - ἕκαστον γὰρ αὐτῶν κατὰ τὸ ἴδιον κινηθήσεται σχῆμα - ἢ εἴ τις ὁμοῦ ζῶον ἔνυδρόν τε καὶ χερσαῖον καὶ πτηνὸν ἐν τοῖς κόλποις ἔχων ἐκβάλῃ· δηλὸν γὰρ ὅτι τὸ μὲν νηκτὸν ἀλόμενον εἰς τὴν ἑαυτοῦ δίαιταν ἐκνήζεται, τὸ δὲ χερσαῖον εἰς τὰ σφέτερα ἦθη καὶ νομοὺς διεξεργύσει, τὸ δὲ ἄερίον ἐξαρθὲν ἐκ γῆς μετάρσιον οἰχήσεται πετόμενον, μιᾷς τῆς πρώτης αἰτίας πᾶσιν ἀποδοῦσης τὴν οἰκείαν εὐμάρειαν. Οὕτως καὶ ἐπὶ κόσμου· διὰ γὰρ ἀπλῆς τοῦ σύμπαντος οὐρανοῦ περιαγωγῆς ἡμέρα καὶ νυκτὶ περατουμένης ἀλλοῖαι πάντων διέξοδοι γίνονται, καίτοι ὑπὸ μιᾷς σφαίρας περιεχομένων, τῶν μὲν θᾶπτον, τῶν δὲ σχολαιότερον κινουμένων παρά τε τὰ τῶν διαστημάτων μήκη καὶ τὰς ἰδίας ἐκάστων κατασκευάς. Σελήνη μὲν γὰρ ἐν μηνὶ τὸν ἑαυτῆς διαπεραίνεται κύκλον αὐξομένη τε καὶ μειουμένη καὶ φθίνουσα, ἥλιος δὲ ἐν ἐνιαυτῷ καὶ οἱ τούτου ἰσόδρομοι, ὃ τε Φωσφόρος καὶ ὁ Ἑρμὸς λεγόμενος, ὁ δὲ Πυρόεις ἐν διπλασίονι τούτων χρόνῳ, ὁ δὲ Διὸς ἐν ἐξαπλασίονι τούτου, καὶ τελευταῖος ὁ Κρόνου λεγόμενος ἐν διπλασίονι καὶ ἡμίσει τοῦ ὑποκάτω. Μία δὲ ἐκ πάντων ἀρμονία συναδόντων καὶ χορευόντων κατὰ τὸν οὐρανὸν ἐξ ἐνός τε γίνεται καὶ εἰς ἐν ἀπολήγει, κόσμον ἐτύμωσεν τὸ σύμπαν ἄλλ' οὐκ ἀκοσμίαν ὀνομάσασα. Καθάπερ δὲ ἐν χορῷ κορυφαίου κατάρξαντος συνεπηχεῖ πᾶς ὁ χορὸς ἀνδρῶν, ἔσθ' ὅτε καὶ γυναικῶν, ἐν διαφόροις φωναῖς ὀξυτέραις καὶ βαρυτέραις μίαν ἀρμονίαν ἐμμελῆ κεραννύντων, οὕτως ἔχει καὶ ἐπὶ τοῦ τὸ σύμπαν διέποντος θεοῦ· κατὰ γὰρ τὸ ἄνωθεν ἐνδόσιμον ὑπὸ τοῦ φερωνύμωσεν ἂν κορυφαίου προσαγορευθέντος κινεῖται μὲν τὰ ἄστρα αἰεὶ καὶ ὁ σύμπας οὐρανός, πορεύεται δὲ διττὰς πορείας ὁ παμφαῆς ἥλιος, τῇ μὲν ἡμέραν καὶ νύκτα διορίζων ἀνατολῇ καὶ δύσει, τῇ δὲ τὰς τέσσαρας ὥρας ἄγων τοῦ ἔτους, πρόσω τε βόρειος καὶ ὀπίσω νότιος διεξέρπων. Γίνονται δὲ ὑετοὶ κατὰ καιρὸν καὶ ἄνεμοι καὶ δρόσοι τὰ τε πάθη τὰ ἐν τῷ περιέχοντι συμβαίνοντα διὰ τὴν πρώτην καὶ ἀρχέγονον αἰτίαν. Ἔπονται δὲ τούτοις ποταμῶν ἐκροαί, θαλάσσης ἀνοιδήσεις, δένδρων ἐκφύσεις, καρπῶν πεπάνσεις, γοναὶ ζώων, ἐκτροφαὶ τε πάντων καὶ ἀκμαὶ καὶ φθίσεις, συμβαλλομένης πρὸς ταῦτα καὶ τῆς ἐκάστου κατασκευῆς, ὥς ἔφην. Ὅταν οὖν ὁ πάντων ἡγεμὼν τε καὶ γενέτωρ, ἀόρατος ὢν ἄλλῳ πλὴν λογισμῷ, σημήνῃ πάσῃ φύσει μεταξὺ οὐρανοῦ τε καὶ γῆς φερομένη, κινεῖται πᾶσα ἐνδελεχῶς ἐν κύκλοις

καὶ πέρασιν ἰδίους, ποτὲ μὲν ἀφανίζομένη, ποτὲ δὲ φαινομένη, μυρίας
ιδέας ἀναφαίνουσά τε καὶ πάλιν ἀποκρύπτουσα ἐκ μιᾶς ἀρχῆς.
Ἦοικε δὲ κομιδῇ τὸ δρώμενον τοῖς ἐν πολέμου καιροῖς μάλιστα
γινομένοις, ἐπειδὴν ἡ σάλπιγξ σημήνη τῷ στρατοπέδῳ· τότε γὰρ τῆς
φωνῆς ἕκαστος ἀκούσας ὁ μὲν ἀσπίδα ἀναιρεῖται, ὁ δὲ θώρακα
ἐνδύεται, ὁ δὲ κνημίδας ἢ κράνος ἢ ζωστήρα περιτίθεται· καὶ ὁ μὲν
ἵππον χαλινοῖ, ὁ δὲ συνωρίδα ἀναβαίνει, ὁ δὲ σύνθημα παρεγγυᾷ·
καθίσταται δὲ εὐθέως ὁ μὲν λοχαγὸς εἰς λόχον, ὁ δὲ ταξίαρχος εἰς
τάξιν, ὁ δὲ ἵππεὺς ἐπὶ κέρας, ὁ δὲ ψιλὸς εἰς τὴν ἰδίαν ἐκτρέχει χώραν·
πάντα δὲ ὑφ' ἑνα σημάντορα δονεῖται κατὰ προστάξιν τοῦ τὸ κράτος
ἔχοντος ἡγεμόνος. Οὕτω χρὴ καὶ περὶ τοῦ σύμπαντος φρονεῖν· ὑπὸ
γὰρ μιᾶς ῥοπῆς ὀτρυνομένων ἀπάντων γίνεται τὰ οἰκεῖα, καὶ ταύτης
ἀοράτου καὶ ἀφανοῦς. Ὅπερ οὐδαμῶς ἐστὶν ἐμπόδιον οὔτε ἐκείνῃ
πρὸς τὸ δρᾶν οὔτε ἡμῖν πρὸς τὸ πιστεῦσαι· καὶ γὰρ ἡ ψυχὴ, δι' ἣν
ζῶμέν τε καὶ οἴκους καὶ πόλεις ἔχομεν, ἀόρατος οὖσα τοῖς ἔργοις
αὐτῆς ὁράται· πᾶς γὰρ ὁ τοῦ βίου διάκοσμος ὑπὸ ταύτης εὗρηται καὶ
διατέτακται καὶ συνέχεται, γῆς ἀρόσεις καὶ φυτεύσεις, τέχνης
ἐπίνοιαι, χρήσεις νόμων, κόσμος πολιτείας, ἔνδημοι πράξεις,
ὑπερόριος πόλεμος, εἰρήνη. Ταῦτα χρὴ καὶ περὶ θεοῦ διανοεῖσθαι,
δυνάμει μὲν ὄντος ἰσχυροτάτου, κάλλει δὲ εὐπρεπεστάτου, ζωῇ δὲ
ἀθανάτου, ἀρετῇ δὲ κρατίστου, διότι πάσῃ θνητῇ φύσει γενόμενος
ἀθεώρητος ἀπ' αὐτῶν τῶν ἔργων θεωρεῖται. Τὰ γὰρ πάθη, καὶ τὰ δι'
ἀέρος ἅπαντα καὶ τὰ ἐπὶ γῆς καὶ τὰ ἐν ὕδατι, θεοῦ λέγοντ' ἂν ὄντως
ἔργα εἶναι τοῦ τὸν κόσμον ἐπέχοντος· ἐξ οὗ, κατὰ τὸν φυσικὸν
Ἑμπεδοκλέα,

“πάνθ' ὅσα τ' ἦν ὅσα τ' ἔσθ' ὅσα τ' ἔσται ὀπίσσω,
δένδρεα τ' ἐβλάστησε καὶ ἄνδρες ἡδὲ γυναῖκες
θῆρές τ' οἰωνοὶ τε καὶ ὕδατοθρέμμονες ἰχθῦς.”

Ἦοικε δὲ ὄντως, εἰ καὶ μικρότερον παραβαλεῖν, τοῖς ὀμφαλοῖς
λεγομένοις τοῖς ἐν ταῖς ψαλίσιν [λίθοις], οἱ μέσοι κείμενοι κατὰ τὴν
εἰς ἑκάτερον μέρος ἔνδесιν ἐν ἀρμονίᾳ τηροῦσι καὶ ἐν τάξει τὸ πᾶν
σχῆμα τῆς ψαλίδος καὶ ἀκίνητον. Φασὶ δὲ καὶ τὸν ἀγαλματοποιὸν
Φειδίαν κατασκευάζοντα τὴν ἐν ἀκροπόλει Ἀθηναῶν ἐν μέσῃ τῇ
ταύτης ἀσπίδι τὸ ἑαυτοῦ πρόσωπον ἐντυπώσασθαι, καὶ συνδῆσαι τῷ
ἀγάλματι διὰ τινος ἀφανοῦς δημιουργίας, ὥστε ἐξ ἀνάγκης, εἴ τις
βούλοιο αὐτὸ περιαιρεῖν, τὸ σύμπαν ἄγαλμα λύειν τε καὶ συγχεῖν.
Τοῦτον οὖν ἔχει τὸν λόγον ὁ θεὸς ἐν κόσμῳ, συνέχων τὴν τῶν ὅλων

ἁρμονίαν τε καὶ σωτηρίαν, πλὴν οὔτε μέσος ὢν, ἔνθα ἡ γῆ τε καὶ ὁ
θολερὸς τόπος οὗτος, ἀλλ' ἄνω καθαρὸς ἐν καθαρῷ χωρῷ βεβηκώς,
ὄν ἐτύμως καλοῦμεν οὐρανὸν μὲν ἀπὸ τοῦ ὅρον εἶναι τὸν ἄνω,
Ὁλύμπον δὲ οἷον ὀλοαμπῇ τε καὶ παντὸς ζόφου καὶ ἀτάκτου
κινήματος κεχωρισμένον, οἷα γίνεται παρ' ἡμῖν διὰ χειμῶνος καὶ
ἀνέμων βίας, ὥσπερ ἔφη καὶ ὁ ποιητῆς

“Οὐλύμπόνδ' ὄθι φασὶ θεῶν ἔδος ἀσφαλὲς αἰεὶ
ἔμμεναι· οὐτ' ἀνέμοισι τινάσσεται οὔτε ποτ' ὄμβρω
δεύεται, οὔτε χιῶν ἐπιπίλνεται, ἀλλὰ μάλ' αἶθρη
πέπταται ἀνέφελος, λευκὴ δ' ἐπιδέδρομεν αἴγλη.”

συνεπιμαρτυρεῖ δὲ καὶ ὁ βίος ἅπας, τὴν ἄνω χώραν ἀποδοὺς θεῷ·
καὶ γὰρ πάντες ἄνθρωποι ἀνατείνομεν τὰς χεῖρας εἰς τὸν οὐρανὸν
εὐχὰς ποιούμενοι. Καθ' ὃν λόγον οὐ κακῶς κάκεῖνο ἀναπεφώνηται

“Ζεὺς δ' ἔλαχ' οὐρανὸν εὐρὺν ἐν αἰθέρι καὶ νεφέλῃσι.”

διὸ καὶ τῶν αἰσθητῶν τὰ τιμιώτατα τὸν αὐτὸν ἐπέχει τόπον, ἄστρα
τε καὶ ἥλιος καὶ σελήνη, μόνα τε τὰ οὐράνια διὰ τοῦτο αἰεὶ τὴν αὐτὴν
σώζοντα τάξιν διακεκόσμηται, καὶ οὔποτε ἀλλοιωθέντα μετεκινήθη,
καθάπερ τὰ ἐπὶ γῆς εὐτρεπτα ὄντα πολλὰς ἑτεροιώσεις καὶ πάθη
ἀναδέδεκται· σεισμοὶ τε γὰρ ἤδη βίαιοι πολλὰ μέρη τῆς γῆς
ἀνέρρηξαν, ὄμβροι τε κατέκλυσαν ἐξαίσιον καταρραγέντες,
ἐπιδρομαὶ τε κυμάτων καὶ ἀναχωρήσεις πολλάκις καὶ ἡπείρους
ἐθαλάττωσαν καὶ θάλαττας ἡπείρωσαν, βιαί τε πνευμάτων καὶ
τυφῶνων ἔστιν ὅτε πόλεις ὅλας ἀνέτρεψαν, πυρκαϊαὶ τε καὶ φλόγες
αἱ μὲν ἐξ οὐρανοῦ γενόμεναι πρότερον, ὥσπερ φασίν, ἐπὶ Φαέθοντος
τὰ πρὸς ἕω μέρη κατέφλεξαν, αἱ δὲ πρὸς ἑσπέραν ἐκ γῆς
ἀναβλύσασαι καὶ ἐκφυσῆσασαι, καθάπερ τῶν ἐν Αἴτνῃ κρατήρων
ἀναρραγόντων καὶ ἀνὰ τὴν γῆν φερομένων χειμάρρου δίκην. Ἐνθα
καὶ τὸ τῶν εὐσεβῶν γένος ἐξόχως ἐτίμησε τὸ δαιμόνιον·
περικαταληφθέντων γὰρ «αὐτῶν» ὑπὸ τοῦ ῥεύματος διὰ τὸ βαστάζειν
γέροντας ἐπὶ τῶν ὤμων γονεῖς καὶ σώζειν, πλησίον [αὐτῶν]
γενόμενος ὁ τοῦ πυρὸς ποταμὸς ἐξεσχίσθη παρέτρεψέ τε τοῦ
φλογμοῦ τὸ μὲν ἔνθα, τὸ δὲ ἔνθα, καὶ ἐτήρησεν ἀβλαβεῖς ἅμα τοῖς
γονεῦσι τοὺς νεανίσκους. Καθόλου δὲ ὅπερ ἐν νηὶ μὲν κυβερνήτης,
ἐν ἄρματι δὲ ἡνίοχος, ἐν χορῷ δὲ κορυφαῖος, ἐν πόλει δὲ
νομοθέτης, ἐν στρατοπέδῳ δὲ ἡγεμὼν, τοῦτο θεὸς ἐν κόσμῳ, πλὴν
καθ' ὅσον τοῖς μὲν καματηρὸν τὸ ἄρχειν πολυκίνητόν τε καὶ
πολυμέριμον, τῷ δὲ ἄλυπον ἄπονόν τε καὶ πάσης κεχωρισμένον

σωματικῆς ἀσθενείας· ἐν ἀκινήτῳ γὰρ ἰδρυμένος δυνάμει πάντα κινεῖ καὶ περιάγει, ὅπου βούλεται καὶ ὅπως, ἐν διαφοροῖς ιδέαις τε καὶ φύσεσιν, ὥσπερ ἀμέλει καὶ ὁ τῆς πόλεως νόμος ἀκίνητος ὢν ἐν ταῖς τῶν χρωμένων ψυχαῖς πάντα οἰκονομεῖ τὰ κατὰ τὴν πολιτείαν· ἐφεπόμενοι γὰρ αὐτῷ δηλονότι ἐξίσιν ἄρχοντες μὲν ἐπὶ τὰ ἀρχεῖα, θεσμοθέται δὲ εἰς τὰ οἰκεῖα δικαστήρια, βουλευταὶ δὲ καὶ ἐκκλησιασταὶ εἰς συνέδρια τὰ προσήκοντα, καὶ ὁ μὲν τις εἰς τὸ πρυτανεῖον βαδίζει σιτησόμενος, ὁ δὲ πρὸς τοὺς δικαστὰς ἀπολογησόμενος, ὁ δὲ εἰς τὸ δεσμωτήριον ἀποθανούμενος. Γίνονται δὲ καὶ δημοθoinαὶ νόμιμοι καὶ πανηγύρεις ἐνιαύσιοι θεῶν τε θυσίαι καὶ ἡρώων θεραπεῖαι καὶ χοαὶ κεκμηκότων· ἄλλα δὲ ἄλλως ἐνεργούμενα κατὰ μίαν πρόσταξιν ἢ νόμιμον ἐξουσίαν σώζει τὸ τοῦ ποιήσαντος ὄντως ὅτι

“πόλις δ’ ὁμοῦ μὲν θυμιαμάτων γέμει,
ὁμοῦ δὲ παιάνων τε καὶ στεναγμάτων,”

οὕτως ὑποληπτέον καὶ ἐπὶ τῆς μείζονος πόλεως, λέγω δὲ τοῦ κόσμου· νόμος γὰρ ἡμῖν ἰσοκλινῆς ὁ θεός, οὐδεμίαν ἐπιδεχόμενος διόρθωσιν ἢ μετάθεσιν, κρείττων δέ, οἶμαι, καὶ βεβαιότερος τῶν ἐν ταῖς κύρβεσιν ἀναγεγραμμένων. Ἦγουμένου δὲ ἀκινήτως αὐτοῦ καὶ ἐμμελῶς ὁ σύμπας οἰκονομεῖται διάκοσμος οὐρανοῦ καὶ γῆς, μεμερισμένος κατὰ τὰς φύσεις πάσας διὰ τῶν οἰκείων σπερμάτων εἰς τε φυτὰ καὶ ζῶα κατὰ γένη τε καὶ εἶδη· καὶ γὰρ ἄμπελοι καὶ φοίνικες καὶ περσεαὶ

“σुकέαι τε γλυκεραὶ καὶ ἐλαῖαι”,

ὥς φησιν ὁ ποιητής, τὰ τε ἄκαρπα μὲν, ἄλλας δὲ παρεχόμενα χρεῖας, πλάτανοι καὶ πίτνες καὶ πύξοι

“κλήθρη τ’ αἰγείρος τε καὶ εὐώδης κυπάρισσος,”

αἱ τε καρπὸν ὁπώρας ἡδὺν ἄλλως δὲ δυσθησαύριστον φέρουσαι,

“ὄχνη καὶ ῥοιαὶ καὶ μηλέαι ἀγλαόκαρποι,”

τῶν τε ζῴων τὰ τε ἄγρια καὶ ἡμερα, τὰ τε ἐν ἁέρι καὶ ἐπὶ γῆς καὶ ἐν ὕδατι βοσκόμενα, γίνεται καὶ ἀκμάζει καὶ φθείρεται τοῖς τοῦ θεοῦ πειθόμενα θεσμοῖς· “πᾶν γὰρ ἐρπετὸν πληγῇ νέμεται”, ὥς φησιν Ἡράκλειτος.

Εἷς δὲ ὢν πολυώνυμός ἐστι, κατονομαζόμενος τοῖς πάθεσι πᾶσιν ἅπερ αὐτὸς νεοχμοῖ. Καλοῦμεν γὰρ αὐτὸν καὶ Ζῆνα καὶ Δία, παραλλήλως χρώμενοι τοῖς ὀνόμασιν, ὥς κἂν εἰ λέγοιμεν δι’ ὃν ζῶμεν. Κρόνου δὲ παῖς καὶ χρόνου λέγεται, διήκων ἐξ αἰῶνος

ἀτέρμονος εἰς ἕτερον αἰῶνα· ἀστραπαῖός τε καὶ βρονταῖος καὶ αἶθριος καὶ αἰθέριος κεραυνίος τε καὶ ὑέτιος ἀπὸ τῶν ὑετῶν καὶ κεραυνῶν καὶ τῶν ἄλλων καλεῖται. Καὶ μὴν ἐπικάρπιος μὲν ἀπὸ τῶν καρπῶν, πολιεὺς δὲ ἀπὸ τῶν πόλεων ὀνομάζεται, γενέθλιός τε καὶ ἐρκεῖος καὶ ὁμόγνιος καὶ πατρῷος ἀπὸ τῆς πρὸς ταῦτα κοινωνίας, ἑταιρεῖός τε καὶ φίλιος καὶ ξένιος καὶ στρατίος καὶ τροπαιοῦχος καθάρσιός τε καὶ παλαμναῖος καὶ ἰκέσιος καὶ μειλίχιος, ὥσπερ οἱ ποιηταὶ λέγουσι, σωτήρ τε καὶ ἐλευθέριος ἐτύμως, ὥς δὲ τὸ πᾶν εἰπεῖν, οὐράνιος τε καὶ χθόνιος, πάσης ἐπώνυμος φύσεως ὧν καὶ τύχης, ἅτε πάντων αὐτὸς αἴτιος ὧν. Διὸ καὶ ἐν τοῖς Ὀρφικοῖς οὐ κακῶς λέγεται

“Ζεὺς πρῶτος γένετο, Ζεὺς ὕστατος ἀρχικέραυνος·
Ζεὺς κεφαλὴ, Ζεὺς μέσσα, Διὸς δ’ ἐκ πάντα τέτυκται·
Ζεὺς πυθμὴν γαίης τε καὶ οὐρανοῦ ἀστερόεντος·
Ζεὺς ἄρσιν γένετο, Ζεὺς ἄμβροτος ἔπλετο νύμφη·
Ζεὺς πνοιὴ πάντων, Ζεὺς ἀκαμάτου πυρὸς ὁρμή·
Ζεὺς πόντου ρίζα, Ζεὺς ἥλιος ἡδὲ σελήνη·
Ζεὺς βασιλεύς, Ζεὺς ἀρχὸς ἀπάντων ἀρχικέραυνος·
πάντας γὰρ κρύψας αὖθις φάος ἐς πολυγηθὲς
ἐκ καθαρῆς κραδίης ἀνενέγκατο, μέρμερα ῥέζων.”

οἶμαι δὲ καὶ τὴν Ἀνάγκην οὐκ ἄλλο τι λέγεσθαι πλὴν τοῦτον, οἰοεὶ ἀνίκητον αἰτίαν ὄντα, Εἰμαρμένην δὲ διὰ τὸ εἴρειν τε καὶ χωρεῖν ἀκωλύτως, Πεπρωμένην δὲ διὰ τὸ πεπερατωθῆναι πάντα καὶ μηδὲν ἐν τοῖς οὕσιν ἄπειρον εἶναι, καὶ Μοῖραν μὲν ἀπὸ τοῦ μεμερίσθαι, Νέμεσιν δὲ ἀπὸ τῆς ἐκάστω διανεμήσεως, Ἀδράστειαν δὲ ἀναπόδραστον αἰτίαν οὖσαν κατὰ φύσιν, Αἶσαν δὲ αἰεὶ οὖσαν. Τὰ τε περὶ τὰς Μοίρας καὶ τὸν ἄτρακτον εἰς ταῦτό πως νεύει· τρεῖς μὲν γὰρ αἱ Μοῖραι, κατὰ τοὺς χρόνους μεμερισμέναι, νῆμα δὲ ἀτράκτου τὸ μὲν ἐξειργασμένον, τὸ δὲ μέλλον, τὸ δὲ περιστρεφόμενον· τέτακται δὲ κατὰ μὲν τὸ γεγονὸς μία τῶν Μοιρῶν, Ἄτροπος, ἐπεὶ τὰ παρελθόντα πάντα ἄτρεπτά ἐστι, κατὰ δὲ τὸ μέλλον Λάχεσις - [εἰς] πάντα γὰρ ἢ κατὰ φύσιν μένει λῆξις - κατὰ δὲ τὸ ἐνεστώς Κλωθώ, συμπεραίνουσα τε καὶ κλώθουσα ἐκάστω τὰ οἰκεῖα. Περαινέται δὲ καὶ ὁ μῦθος οὐκ ἀτάκτως. Ταῦτα δὲ πάντα ἐστὶν οὐκ ἄλλο τι πλὴν ὁ θεός, καθάπερ καὶ ὁ γενναῖος Πλάτων φησὶν· “ὁ μὲν δὴ θεός, ὥσπερ ὁ παλαιὸς λόγος, ἀρχὴν τε καὶ τελευτὴν καὶ μέσα τῶν ὄντων ἀπάντων ἔχων, εὐθείᾳ περαίνει κατὰ φύσιν πορευόμενος· τῷ δὲ αἰεὶ

ξυνέπεται δίκη, τῶν ἀπολειπομένων τοῦ θείου νόμου τιμωρός”, “ἥς ὁ γενήσεσθαι μέλλων μακάριός τε καὶ εὐδαίμων ἐξ ἀρχῆς εὐθὺς μέτοχος εἶη.”

Κεφάλαιο 1

[402a] Τῶν καλῶν καὶ τιμίων τὴν εἶδῃσιν ὑπολαμβάνοντες, μᾶλλον δ' ἐτέραν ἐτέρας ἢ κατ' ἀκρίβειαν ἢ τῷ βελτιόνων τε καὶ θαυμασιωτέρων εἶναι, δι' ἀμφοτέρω ταῦτα τὴν περὶ τῆς ψυχῆς ἱστορίαν εὐλόγως ἂν ἐν πρώτοις τιθεῖμεν. δοκεῖ δὲ καὶ πρὸς ἀλήθειαν ἅπασαν ἢ γινῶσις αὐτῆς μεγάλη συμβάλλεσθαι, μάλιστα δὲ πρὸς τὴν φύσιν· ἔστι γὰρ οἷον ἀρχὴ τῶν ζώων. ἐπιζητοῦμεν δὲ θεωρῆσαι καὶ γινῶναι τὴν τε φύσιν αὐτῆς καὶ τὴν οὐσίαν, εἴθ' ὅσα συμβέβηκε περὶ αὐτήν· ὧν τὰ μὲν ἴδια πάθη τῆς ψυχῆς εἶναι δοκεῖ, τὰ δὲ δι' ἐκείνην καὶ τοῖς ζώοις ὑπάρχειν.

πάντῃ δὲ πάντως ἐστὶ τῶν χαλεπωτάτων λαβεῖν τινα πίστιν περὶ αὐτῆς. καὶ γάρ, ὄντος κοινοῦ τοῦ ζητήματος καὶ πολλοῖς ἐτέροις, λέγω δὲ τοῦ περὶ τὴν οὐσίαν καὶ τὸ τί ἐστὶ, τάχ' ἂν τῷ δόξειε μία τις εἶναι μέθοδος κατὰ πάντων περὶ ὧν βουλόμεθα γινῶναι τὴν οὐσίαν, ὥσπερ καὶ τῶν κατὰ συμβεβηκὸς ἰδίων ἀπόδειξις, ὥστε ζητητέον ἂν εἴη τὴν μέθοδον ταύτην· εἰ δὲ μὴ ἔστι μία τις καὶ κοινὴ μέθοδος περὶ τὸ τί ἐστίν, ἔτι χαλεπώτερον γίνεται τὸ πραγματευθῆναι· δεήσει γὰρ λαβεῖν περὶ ἕκαστον τίς ὁ τρόπος, ἐὰν δὲ φανερόν ἢ πότερον ἀπόδειξις ἐστίν ἢ διαίρεσις ἢ καὶ τις ἄλλη μέθοδος, ἔτι πολλὰς ἀπορίας ἔχει καὶ πλάνας, ἐκ τίνων δεῖ ζητεῖν· ἄλλαι γὰρ ἄλλων ἀρχαί, καθάπερ ἀριθμῶν καὶ ἐπιπέδων.

πρῶτον δ' ἴσως ἀναγκαῖον διελεῖν ἐν τίνι τῶν γενῶν καὶ τί ἐστὶ, λέγω δὲ πότερον τὸδε τι καὶ οὐσία ἢ ποιὸν ἢ ποσόν, ἢ καὶ τις ἄλλη τῶν διαιρεθεισῶν κατηγοριῶν, ἔτι δὲ πότερον τῶν ἐν δυνάμει ὄντων ἢ μᾶλλον ἐντελέχειά τις· διαφέρει γὰρ οὗ τι [402b] μικρόν.

σκεπτέον δὲ καὶ εἰ μεριστὴ ἢ ἀμερὴς, καὶ πότερον ὁμοειδὴς ἅπασα ψυχὴ ἢ οὐ· εἰ δὲ μὴ ὁμοειδὴς, πότερον εἶδει διαφέρουσα ἢ γένει. νῦν μὲν γὰρ οἱ λέγοντες καὶ ζητοῦντες περὶ ψυχῆς περὶ τῆς ἀνθρωπίνης μόνῃς ἐοίκασιν ἐπισκοπεῖν·

εὐλαβητέον δ' ὅπως μὴ λανθάνῃ πότερον εἷς ὁ λόγος αὐτῆς ἐστὶ, καθάπερ ζώου, ἢ καθ' ἕκαστον ἕτερος, οἷον ἵππου, κυνός, ἀνθρώπου, θεοῦ, τὸ δὲ ζῶον τὸ καθόλου ἥτοι οὐθέν ἐστίν ἢ ὕστερον, ὁμοίως δὲ καὶ εἰ τι κοινὸν ἄλλο κατηγοροῖτο·

ἔτι δέ, εἰ μὴ πολλαὶ ψυχαὶ ἀλλὰ μόρια, πότερον δεῖ ζητεῖν πρότερον τὴν ὅλην ψυχὴν ἢ τὰ μόρια. χαλεπὸν δὲ καὶ τούτων

διορίσαι ποῖα πέφυκεν ἕτερα ἀλλήλων, καὶ πότερον τὰ μόρια χρῆ
ζητεῖν πρότερον ἢ τὰ ἔργα αὐτῶν, οἷον τὸ νοεῖν ἢ τὸν νοῦν, καὶ τὸ
αἰσθάνεσθαι ἢ τὸ αἰσθητικόν· ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων.

εἰ δὲ τὰ ἔργα πρότερον, πάλιν ἂν τις ἀπορήσειεν εἰ τὰ ἀντικείμενα
πρότερον τούτων ζητητέον, οἷον τὸ αἰσθητὸν τοῦ αἰσθητικοῦ, καὶ τὸ
νοητὸν τοῦ νοῦ.

[402b16] ἔοικε δ' οὐ μόνον τὸ τί ἐστὶ γινῶναι χρήσιμον εἶναι πρὸς
τὸ θεωρῆσαι τὰς αἰτίας τῶν συμβεβηκότων ταῖς οὐσίαις (ὥσπερ ἐν
τοῖς μαθήμασι τί τὸ εὐθὺ καὶ τὸ καμπύλον, ἢ τί γραμμὴ καὶ ἐπίπεδον,
πρὸς τὸ κατιδεῖν πόσαις ὀρθαῖς αἰ τοῦ τριγώνου γωνίαί ἴσαι), ἀλλὰ
καὶ ἀνάπαλιν τὰ συμβεβηκότα συμβάλλεται μέγα μέρος πρὸς τὸ
εἰδέναι τὸ τί ἐστίν· ἐπειδὴν γὰρ ἔχωμεν ἀποδιδόναι κατὰ τὴν
φαντασίαν περὶ τῶν συμβεβηκότων, ἢ πάντων ἢ τῶν πλείστων, τότε
καὶ περὶ τῆς οὐσίας ἔχομεν λέγειν κάλλιστα· πάσης γὰρ ἀποδείξεως
ἀρχὴ τὸ τί ἐστίν, ὥστε καθ' ὅσους τῶν ὀρισμῶν μὴ συμβαίνει τὰ
[403a] συμβεβηκότα γνωρίζειν, ἀλλὰ μὴδ' εἰκάσαι περὶ αὐτῶν
εὐμαρές, δῆλον ὅτι διαλεκτικῶς εἴρηνται καὶ κενῶς ἅπαντες.

[403a3] ἀπορίαν δ' ἔχει καὶ τὰ πάθη τῆς ψυχῆς, πότερόν ἐστι
πάντα κοινὰ καὶ τοῦ ἔχοντος ἢ ἐστὶ τι καὶ τῆς ψυχῆς ἴδιον αὐτῆς·
τοῦτο γὰρ λαβεῖν μὲν ἀναγκαῖον, οὐ ρᾶδιον δέ. φαίνεται δὲ τῶν μὲν
πλείστων οὐθὲν ἄνευ τοῦ σώματος πάσχειν οὐδὲ ποιεῖν, οἷον
ὀργίζεσθαι, θαρρεῖν, ἐπιθυμεῖν, ὅλως αἰσθάνεσθαι, μάλιστα δ' ἔοικεν
ιδίῳ τὸ νοεῖν· εἰ δ' ἐστὶ καὶ τοῦτο φαντασία τις ἢ μὴ ἄνευ φαντασίας,
οὐκ ἐνδέχεται ἂν οὐδὲ τοῦτ' ἄνευ σώματος εἶναι.

εἰ μὲν οὖν ἐστὶ τι τῶν τῆς ψυχῆς ἔργων ἢ παθημάτων ἴδιον,
ἐνδέχεται ἂν αὐτὴν χωρίζεσθαι· εἰ δὲ μὴθὲν ἐστὶν ἴδιον αὐτῆς, οὐκ ἂν
εἴη χωριστή, ἀλλὰ καθάπερ τῷ εὐθεῖ, ἢ εὐθύ, πολλὰ συμβαίνει, οἷον
ἅπτεσθαι τῆς [χαλκῆς] σφαίρας κατὰ στιγμήν, οὐ μέντοι γ' ἄψεται
οὕτως χωρισθέν τι εὐθύ· ἀχώριστον γάρ, εἴπερ ἀεὶ μετὰ σώματός
τινος ἐστίν. ἔοικε δὲ καὶ τὰ τῆς ψυχῆς πάθη πάντα εἶναι μετὰ
σώματος, θυμός, πραότης, φόβος, ἔλεος, θάρσος, ἔτι χαρὰ καὶ τὸ
φιλεῖν τε καὶ μισεῖν· ἅμα γὰρ τούτοις πάσχει τι τὸ σῶμα. μὴνυεῖ δὲ
τὸ ποτὲ μὲν ἰσχυρῶν καὶ ἐναργῶν παθημάτων συμβαινόντων μὴδὲν
παροξύνεσθαι ἢ φοβεῖσθαι, ἐνίοτε δ' ὑπὸ μικρῶν καὶ ἀμαυρῶν
κινεῖσθαι, ὅταν ὀργᾷ τὸ σῶμα καὶ οὕτως ἔχῃ ὥσπερ ὅταν ὀργίζεται.
ἔτι δὲ μᾶλλον τοῦτο φανερόν· μνηνός γὰρ φοβεροῦ συμβαίνοντος
ἐν τοῖς πάθεσι γίνονται τοῖς τοῦ φοβουμένου. εἰ δ' οὕτως ἔχει, δῆλον

ὅτι τὰ πάθη λόγοι ἔνυλοι εἰσιν· ὥστε οἱ ὅροι τοιοῦτοι οἷον “τὸ ὀργίζεσθαι κίνησις τις τοῦ τοιουδὶ σώματος ἢ μέρους ἢ δυνάμεως ὑπὸ τοῦδε ἔνεκα τοῦδε”,

καὶ διὰ ταῦτα ἤδη φυσικοῦ τὸ θεωρῆσαι περὶ ψυχῆς, ἢ πάσης ἢ τῆς τοιαύτης. διαφερόντως δ’ ἂν ὀρίσαιντο ὁ φυσικὸς [τε] καὶ ὁ διαλεκτικὸς ἕκαστον αὐτῶν, οἷον ὀργὴ τί ἐστίν· ὁ μὲν γὰρ ὀρεξίν ἀντιλυπήσεως ἢ τι τοιοῦτον, ὁ δὲ ζέσιν τοῦ περὶ καρδίαν αἵματος [403b] καὶ θερμοῦ. τούτων δὲ ὁ μὲν τὴν ὕλην ἀποδίδωσιν, ὁ δὲ τὸ εἶδος καὶ τὸν λόγον. ὁ μὲν γὰρ λόγος ὅδε τοῦ πράγματος, ἀνάγκη δ’ εἶναι τοῦτον ἐν ὕλῃ τοιαδί, εἰ ἔσται· ὥσπερ οἰκίας ὁ μὲν λόγος τοιοῦτος, ὅτι σκέπασμα κωλυτικὸν φθορᾶς ὑπ’ ἀνέμων καὶ ὄμβρων καὶ καυμάτων, ὁ δὲ φήσει λίθους καὶ πλίνθους καὶ ξύλα, ἕτερος δ’ ἐν τούτοις τὸ εἶδος <οὔ> ἔνεκα τωνδί. τίς οὖν ὁ φυσικὸς τούτων; πότερον ὁ περὶ τὴν ὕλην, τὸν δὲ λόγον ἀγνοῶν, ἢ ὁ περὶ τὸν λόγον μόνον; ἢ μᾶλλον ὁ ἐξ ἀμφοῖν; ἐκείνων δὲ δὴ τίς ἐκάτερος; ἢ οὐκ ἔστιν εἷς ὁ περὶ τὰ πάθη τῆς ὕλης τὰ μὴ χωριστὰ μηδ’ ἢ χωριστά, ἀλλ’ ὁ φυσικὸς περὶ ἅπανθ’ ὅσα τοῦ τοιουδὶ σώματος καὶ τῆς τοιαύτης ὕλης ἔργα καὶ πάθη, ὅσα δὲ μὴ τοιαῦτα, ἄλλος, καὶ περὶ τινῶν μὲν τεχνίτης, ἐὰν τύχη, οἷον τέκτων ἢ ἰατρός, τῶν δὲ μὴ χωριστῶν μὲν, ἢ δὲ μὴ τοιούτου σώματος πάθη καὶ ἐξ ἀφαιρέσεως, ὁ μαθηματικός, ἢ δὲ κεχωρισμένα, ὁ πρῶτος φιλόσοφος; ἀλλ’ ἐπανιτέον ὅθεν ὁ λόγος. ἐλέγομεν δὴ ὅτι τὰ πάθη τῆς ψυχῆς οὕτως ἀχώριστα τῆς φυσικῆς ὕλης τῶν ζώων, ἢ γε τοιαῦθ’ ὑπάρχει <οἷα> θυμὸς καὶ φόβος, καὶ οὐχ ὥσπερ γραμμὴ καὶ ἐπίπεδον.

Κεφάλαιο 2

[403b20] Ἐπισκοποῦντας δὲ περὶ ψυχῆς ἀναγκαῖον, ἅμα διαποροῦντας περὶ ὧν εὐπορεῖν δεῖ προελθόντας, τὰς τῶν προτέρων δόξας συμπαραλαμβάνειν ὅσοι τι περὶ αὐτῆς ἀπεφάνησαν, ὅπως τὰ μὲν καλῶς εἰρημένα λάβωμεν, εἰ δέ τι μὴ καλῶς, τοῦτ' εὐλαβηθῶμεν.

ἀρχὴ δὲ τῆς ζητήσεως προθέσθαι τὰ μάλιστα δοκοῦνθ' ὑπάρχειν αὐτῇ κατὰ φύσιν. τὸ ἔμψυχον δὴ τοῦ ἀψύχου δυσὶ μάλιστα διαφέρειν δοκεῖ, κινήσει τε καὶ τῷ αἰσθάνεσθαι. παρειλήφαμεν δὲ καὶ παρὰ τῶν προγενεστέρων σχεδὸν δύο ταῦτα περὶ ψυχῆς· φασὶ γὰρ ἔνιοι καὶ μάλιστα καὶ πρῶτως ψυχὴν εἶναι τὸ κινεῖν, οἰθηέντες δὲ τὸ μὴ κινούμενον αὐτὸ μὴ ἐνδέχεσθαι κινεῖν ἕτερον, τῶν κινουμένων τι τὴν ψυχὴν ὑπέλαβον εἶναι. ὅθεν Δημόκριτος μὲν [404a] πῦρ τι καὶ θερμόν φησιν αὐτὴν εἶναι· ἀπείρων γὰρ ὄντων σχημάτων καὶ ἀτόμων τὰ σφαιροειδῆ πῦρ καὶ ψυχὴν λέγει (οἷον ἐν τῷ ἀέρι τὰ καλούμενα ζύσματα, ἃ φαίνεται ἐν ταῖς διὰ τῶν θυρίδων ἀκτῖσιν), ὧν τὴν μὲν πανσπερμίαν στοιχεῖα λέγει τῆς ὅλης φύσεως (ὁμοίως δὲ καὶ Λεύκιππος), τούτων δὲ τὰ σφαιροειδῆ ψυχὴν, διὰ τὸ μάλιστα διὰ παντὸς δύνασθαι διαδύνειν τοὺς τοιούτους ῥυσμούς καὶ κινεῖν τὰ λοιπά, κινούμενα καὶ αὐτά, ὑπολαμβάνοντες τὴν ψυχὴν εἶναι τὸ παρέχον τοῖς ζώοις τὴν κίνησιν· διὸ καὶ τοῦ ζῆν ὅρον εἶναι τὴν ἀναπνοήν· συνάγοντος γὰρ τοῦ περιέχοντος τὰ σώματα καὶ ἐκθλίβοντος τῶν σχημάτων τὰ παρέχοντα τοῖς ζώοις τὴν κίνησιν διὰ τὸ μηδ' αὐτὰ ἡρεμεῖν μηδέποτε, βοήθειαν γίνεσθαι θύραθεν ἐπεισιόντων ἄλλων τοιούτων ἐν τῷ ἀναπνεῖν· κωλύειν γὰρ αὐτὰ καὶ τὰ ἐνυπάρχοντα ἐν τοῖς ζώοις ἐκκρίνεσθαι, συνανείργοντα τὸ συνάγον καὶ πηγνύον· καὶ ζῆν δὲ ἕως ἄν δύνωνται τοῦτο ποιεῖν.

[404a16] ἔοικε δὲ καὶ τὸ παρὰ τῶν Πυθαγορείων λεγόμενον τὴν αὐτὴν ἔχειν διάνοιαν· ἔφασαν γὰρ τινες αὐτῶν ψυχὴν εἶναι τὰ ἐν τῷ ἀέρι ζύσματα, οἱ δὲ τὸ ταῦτα κινεῖν, περὶ δὲ τούτων εἴρηται ὅτι συνεχῶς φαίνεται κινούμενα, κἂν ἢ νηνεμία παντελῆς. ἐπὶ ταῦτο δὲ φέρονται καὶ ὅσοι λέγουσι τὴν ψυχὴν τὸ αὐτὸ κινεῖν· εἰκόασι γὰρ οὗτοι πάντες ὑπειληφέναι τὴν κίνησιν οἰκειότατον εἶναι τῇ ψυχῇ, καὶ τὰ μὲν ἄλλα πάντα κινεῖσθαι διὰ τὴν ψυχὴν, ταύτην δ' ὑφ' ἑαυτῆς, διὰ τὸ μηθὲν ὁρᾶν κινεῖν ὃ μὴ καὶ αὐτὸ κινεῖται.

ὁμοίως δὲ καὶ Ἀναξαγόρας ψυχὴν εἶναι λέγει τὴν κινουσαν, καὶ εἴ τις ἄλλος εἴρηκεν ὡς τὸ πᾶν ἐκίνησε νοῦς· οὐ μὴν παντελῶς γ' ὥσπερ Δημόκριτος. ἐκεῖνος μὲν γὰρ ἀπλῶς ταῦτόν ψυχὴν καὶ νοῦν (τὸ γὰρ ἀληθὲς εἶναι τὸ φαινόμενον, διὸ καλῶς ποιῆσαι [τὸν] Ὅμηρον ὡς ὁ Ἑκτωρ “κεῖτ' ἄλλοφρονέων”· οὐ δὴ χρῆται τῷ νῷ ὡς δυνάμει τινὶ περὶ τὴν ἀλήθειαν, ἀλλὰ ταῦτό λέγει ψυχὴν καὶ νοῦν)·

[404b] Ἀναξαγόρας δ' ἦττον διασαφεῖ περὶ αὐτῶν· πολλαχοῦ μὲν γὰρ τὸ αἴτιον τοῦ καλῶς καὶ ὀρθῶς τὸν νοῦν λέγει, ἐτέρωθι δὲ τὸν νοῦν εἶναι ταῦτόν τῃ ψυχῇ· ἐν ἅπασιν γὰρ ὑπάρχειν αὐτὸν τοῖς ζώοις, καὶ μεγάλοις καὶ μικροῖς, καὶ τιμίοις καὶ ἀτιμοτέροις· οὐ φαίνεται δ' ὅ γε κατὰ φρόνησιν λεγόμενος νοῦς πᾶσιν ὁμοίως ὑπάρχειν τοῖς ζώοις, ἀλλ' οὐδὲ τοῖς ἀνθρώποις πᾶσιν.

ὅσοι μὲν οὖν ἐπὶ τὸ κινεῖσθαι τὸ ἔμψυχον ἀπέβλεψαν, οὗτοι τὸ κινητικώτατον ὑπέλαβον τὴν ψυχὴν· ὅσοι δ' ἐπὶ τὸ γινώσκειν καὶ τὸ αἰσθάνεσθαι τῶν ὄντων, οὗτοι δὲ λέγουσι τὴν ψυχὴν τὰς ἀρχάς, οἱ μὲν πλείους ποιοῦντες, ταύτας, οἱ δὲ μίαν, ταύτην, ὥσπερ Ἑμπεδοκλῆς μὲν ἐκ τῶν στοιχείων πάντων, εἶναι δὲ καὶ ἕκαστον ψυχὴν τούτων, λέγων οὕτως,

γαίῃ μὲν γὰρ γαῖαν ὀπάπαμεν, ὕδατι δ' ὕδωρ,
αἰθέρι δ' αἰθέρα διᾶν, ἀτὰρ πυρὶ πῦρ αἴδηλον,
στοργῇ δὲ στοργήν, νεῖκος δέ τε νεϊκεῖ λυγρῷ·

τὸν αὐτὸν δὲ τρόπον καὶ Πλάτων ἐν τῷ Τιμαίῳ τὴν ψυχὴν ἐκ τῶν στοιχείων ποιεῖ· γινώσκεσθαι γὰρ τῷ ὁμοίῳ τὸ ὅμοιον, τὰ δὲ πράγματα ἐκ τῶν ἀρχῶν εἶναι. ὁμοίως δὲ καὶ ἐν τοῖς περὶ φιλοσοφίας λεγομένοις διωρίσθη, αὐτὸ μὲν τὸ ζῶον ἐξ αὐτῆς τῆς τοῦ ἐνὸς ιδέας καὶ τοῦ πρώτου μήκους καὶ πλάτους καὶ βάθους, τὰ δ' ἄλλα ὁμοιοτρόπως· ἔτι δὲ καὶ ἄλλως, νοῦν μὲν τὸ ἓν, ἐπιστήμην δὲ τὰ δύο (μοναχῶς γὰρ ἐφ' ἓν), τὸν δὲ τοῦ ἐπιπέδου ἀριθμὸν δόξαν, αἰσθησιν δὲ τὸν τοῦ στερεοῦ. οἱ μὲν γὰρ ἀριθμοὶ τὰ εἶδη αὐτὰ καὶ αἱ [404b25] ἀρχαὶ ἐλέγοντο, εἰσὶ δ' ἐκ τῶν στοιχείων, κρίνεται δὲ τὰ πράγματα τὰ μὲν νῷ, τὰ δ' ἐπιστήμῃ, τὰ δὲ δόξῃ, τὰ δ' αἰσθήσει· εἶδη δ' οἱ ἀριθμοὶ οὗτοι τῶν πραγμάτων.

[404b27] ἐπεὶ δὲ καὶ κινητικὸν ἐδόκει ἡ ψυχὴ εἶναι καὶ γνωριστικὸν οὕτως, ἔνιοι συνέπλεξαν ἐξ ἀμφοῖν, ἀποφηνάμενοι τὴν ψυχὴν ἀριθμὸν κινουμένην αὐτόν,

διαφέρονται δὲ περὶ τῶν ἀρχῶν, τίνες καὶ πόσαι, μάλιστα μὲν οἱ σωματικὰς ποιοῦντες τοῖς ἀσωμάτους, [405a] τούτοις δ' οἱ μίξαντες

καὶ ἀπ' ἀμφοῖν τὰς ἀρχὰς ἀποφηνάμενοι.

διαφέρονται δὲ καὶ περὶ τοῦ πλήθους· οἱ μὲν γὰρ μίαν οἱ δὲ πλείους λέγουσιν. ἐπομένως δὲ τούτοις καὶ τὴν ψυχὴν ἀποδιδόασιν· τὸ γὰρ κινητικὸν τὴν φύσιν τῶν πρώτων ὑπειλήφασιν, οὐκ ἀλόγως.

ὅθεν ἔδοξε ἰσὶ πῦρ εἶναι· καὶ γὰρ τοῦτο λεπτομερέστατόν τε καὶ μάλιστα τῶν στοιχείων ἀσώματον, ἔτι δὲ κινεῖται τε καὶ κινεῖ τὰ ἄλλα πρώτως.

Δημόκριτος δὲ καὶ γλαφυρωτέρως εἴρηκεν ἀποφαινόμενος διὰ τί τούτων ἐκάτερον· ψυχὴν μὲν γὰρ εἶναι ταῦτό καὶ νοῦν, τοῦτο δ' εἶναι τῶν πρώτων καὶ ἀδιαιρέτων σωμάτων, κινητικὸν δὲ διὰ μικρομέρειαν καὶ τὸ σχῆμα· τῶν δὲ σχημάτων εὐκίνητότατον τὸ σφαιροειδὲς λέγει· τοιοῦτον δ' εἶναι τὸν τε νοῦν καὶ τὸ πῦρ.

Ἀναξαγόρας δ' ἔοικε μὲν ἕτερον λέγειν ψυχὴν τε καὶ νοῦν, ὥσπερ εἵπομεν καὶ πρότερον, χρήται δ' ἀμφοῖν ὡς μιᾷ φύσει, πλὴν ἀρχὴν γε τὸν νοῦν τίθεται μάλιστα πάντων· μόνον γοῦν φησὶν αὐτὸν τῶν ὄντων ἀπλοῦν εἶναι καὶ ἀμιγῆ τε καὶ καθαρὸν. ἀποδίδωσι δ' ἄμφω τῇ αὐτῇ ἀρχῇ, τό τε γινώσκειν καὶ τὸ κινεῖν, λέγων νοῦν κινῆσαι τὸ πᾶν.

ἔοικε δὲ καὶ Θαλῆς ἐξ ὧν ἀπομνημονεύουσι κινητικὸν τι τὴν ψυχὴν ὑπολαβεῖν, εἵπερ τὴν λίθον ἔφη ψυχὴν ἔχειν, ὅτι τὸν σίδηρον κινεῖ.

Διογένης δ' ὥσπερ καὶ ἕτεροὶ τινες ἀέρα, τοῦτον οἰηθεῖς πάντων λεπτομερέστατον εἶναι καὶ ἀρχήν· καὶ διὰ τοῦτο γινώσκειν τε καὶ κινεῖν τὴν ψυχὴν, ἥ μὲν πρῶτόν ἐστι, καὶ ἐκ τούτου τὰ λοιπά, γινώσκειν, ἥ δὲ λεπτότατον, κινητικὸν εἶναι.

καὶ Ἡράκλειτος δὲ τὴν ἀρχὴν εἶναι φησι ψυχὴν, εἵπερ τὴν ἀναθυμίασιν, ἐξ ἧς τᾶλλα συνίστησιν· καὶ ἀσωματώτατόν τε καὶ ῥέον αἰεὶ· τὸ δὲ κινούμενον κινουμένῳ γινώσκεσθαι· ἐν κινήσει δ' εἶναι τὰ ὄντα κάκεῖνος ᾤετο καὶ οἱ πολλοί.

παραπλησίως δὲ τούτοις καὶ Ἀλκμαίων ἔοικεν ὑπολαβεῖν περὶ ψυχῆς· φησὶ γὰρ αὐτὴν ἀθάνατον εἶναι διὰ τὸ εἰσφέρειν τοῖς ἀθανάτοις· τοῦτο δ' ὑπάρχειν αὐτῇ ὡς αἰεὶ κινουμένη· κινεῖσθαι γὰρ καὶ τὰ θεῖα πάντα συνεχῶς [405b] αἰεὶ, σελήνην, ἥλιον, τοὺς ἀστέρας καὶ τὸν οὐρανὸν ὅλον.

τῶν δὲ φορτικωτέρων καὶ ὕδωρ τινὲς ἀπεφάναντο, καθάπερ Ἴππων· πεισθῆναι δ' εἰκόασιν ἐκ τῆς γονῆς, ὅτι πάντων ὑγρὰ. καὶ γὰρ ἐλέγχει τοὺς αἵμα φάσκοντας τὴν ψυχὴν, ὅτι ἡ γονὴ οὐχ αἷμα· ταύτην δ' εἶναι τὴν πρώτην ψυχὴν.

ἕτεροι δ' αἷμα, καθάπερ Κριτίας, τὸ αἰσθάνεσθαι ψυχῆς οἰκειότατον ὑπολαμβάνοντες, τοῦτο δ' ὑπάρχειν διὰ τὴν τοῦ αἵματος φύσιν. πάντα γὰρ τὰ στοιχεῖα κριτὴν εἴληφε, πλὴν τῆς γῆς· ταύτην δ' οὐθεὶς ἀποπέφανται, πλὴν εἴ τις αὐτὴν εἴρηκεν ἐκ πάντων εἶναι τῶν στοιχείων ἢ πάντα.

ὀρίζονται δὲ πάντες τὴν ψυχὴν τρισὶν ὡς εἰπεῖν, κινήσει, αἰσθήσει, τῷ ἀσωμάτῳ· τούτων δ' ἕκαστον ἀνάγεται πρὸς τὰς ἀρχάς. διὸ καὶ οἱ τῷ γινώσκειν ὀριζόμενοι αὐτὴν ἢ στοιχεῖον ἢ ἐκ τῶν στοιχείων ποιοῦσι, λέγοντες παραπλησίως ἀλλήλοις, πλὴν ἑνός· φασὶ γὰρ γινώσκεσθαι τὸ ὅμοιον τῷ ὁμοίῳ· ἐπειδὴ γὰρ ἡ ψυχὴ πάντα γινώσκει, συνιστᾷσιν αὐτὴν ἐκ πασῶν τῶν ἀρχῶν.

ὅσοι μὲν οὖν μίαν τινὰ λέγουσιν αἰτίαν καὶ στοιχεῖον ἓν, καὶ τὴν ψυχὴν ἓν τιθέασιν, οἷον πῦρ ἢ ἀέρα· οἱ δὲ πλείους λέγοντες τὰς ἀρχὰς καὶ τὴν ψυχὴν πλείω ποιοῦσιν.

Ἀναξαγόρας δὲ μόνος ἀπαθῆ φησιν εἶναι τὸν νοῦν, καὶ κοινὸν οὐθὲν οὐθενὶ τῶν ἄλλων ἔχειν. τοιοῦτος δ' ὢν πῶς γνωριεῖ καὶ διὰ τίν' αἰτίαν, οὗτ' ἐκεῖνος εἴρηκεν οὗτ' ἐκ τῶν εἰρημένων συμφανές ἐστιν. ὅσοι δ' ἐναντιώσεις ποιοῦσιν ἐν ταῖς ἀρχαῖς, καὶ τὴν ψυχὴν ἐκ τῶν ἐναντίων συνιστᾷσιν· οἱ δὲ θάτερον τῶν ἐναντίων, οἷον θερμὸν ἢ ψυχρὸν ἢ τι τοιοῦτον ἄλλο, καὶ τὴν ψυχὴν ὁμοίως ἓν τι τούτων τιθέασιν. διὸ καὶ τοῖς ὀνόμασιν ἀκολουθοῦσιν, οἱ μὲν τὸ θερμὸν λέγοντες, ὅτι διὰ τοῦτο καὶ τὸ ζῆν ὀνόμασται, οἱ δὲ τὸ ψυχρὸν, <διὰ τὸ> διὰ τὴν ἀναπνοὴν καὶ τὴν κατάψυξιν καλεῖσθαι ψυχὴν.

τὰ μὲν οὖν παραδεδομένα περὶ ψυχῆς, καὶ δι' ἃς αἰτίας λέγουσιν οὕτω, ταῦτ' ἐστίν.

Κεφάλαιο 3

[405a31] Ἐπισκεπτέον δὲ πρῶτον μὲν περὶ κινήσεως· ἴσως γὰρ οὐ μόνον ψεῦδός ἐστι τὸ τὴν οὐσίαν αὐτῆς τοιαύτην εἶναι οἷαν [406a] φασὶν οἱ λέγοντες ψυχὴν εἶναι τὸ κινεῖν ἑαυτὸ ἢ δυνάμενον κινεῖν, ἀλλ' ἐν τι τῶν ἀδυνάτων τὸ ὑπάρχειν αὐτῇ κίνησιν.

ὅτι μὲν οὖν οὐκ ἀναγκαῖον τὸ κινεῖν καὶ αὐτὸ κινεῖσθαι, πρότερον εἴρηται. διχῶς δὲ κινουμένου παντός-ἢ γὰρ καθ' ἕτερον ἢ καθ' αὐτό· καθ' ἕτερον δὲ λέγομεν ὅσα κινεῖται τῷ ἐν κινουμένῳ εἶναι, οἷον πλωτῆρες· οὐ γὰρ ὁμοίως κινεῖνται τῷ πλοίῳ· τὸ μὲν γὰρ καθ' αὐτὸ κινεῖται, οἱ δὲ τῷ ἐν κινουμένῳ εἶναι (δῆλον δ' ἐπὶ τῶν μορίων· οἰκεία μὲν γάρ ἐστι κίνησις ποδῶν βάδισις, αὕτη δὲ καὶ ἀνθρώπων· οὐχ ὑπάρχει δὲ τοῖς πλωτῆρσι τόδε) -διχῶς δὲ λεγομένου τοῦ κινεῖσθαι νῦν ἐπισκοποῦμεν περὶ τῆς ψυχῆς εἰ καθ' αὐτὴν κινεῖται καὶ μετέχει κινήσεως.

[406a12] τεσσάρων δὲ κινήσεων οὐσῶν, φορᾶς ἀλλοιώσεως φθίσεως αὐξήσεως, ἢ μίαν τούτων κινεῖτ' ἂν ἢ πλείους ἢ πάσας. εἰ δὲ κινεῖται μὴ κατὰ συμβεβηκός, φύσει ἂν ὑπάρχῃ κίνησις αὐτῇ· εἰ δὲ τοῦτο, καὶ τόπος· πᾶσαι γὰρ αἱ λεχθεῖσαι κινήσεις ἐν τόπῳ. εἰ δ' ἐστὶν ἡ οὐσία τῆς ψυχῆς τὸ κινεῖν ἑαυτήν, οὐ κατὰ συμβεβηκός αὐτῇ τὸ κινεῖσθαι ὑπάρξει, ὥσπερ τῷ λευκῷ ἢ τῷ τριπῆχει· κινεῖται γὰρ καὶ ταῦτα, ἀλλὰ κατὰ συμβεβηκός· ὃ γὰρ ὑπάρχουσιν, ἐκεῖνο κινεῖται, τὸ σῶμα. διὸ καὶ οὐκ ἔστι τόπος αὐτῶν· τῆς δὲ ψυχῆς ἔσται, εἴπερ φύσει κινήσεως μετέχει.

ἔτι δ' εἰ φύσει κινεῖται, καὶν βία κινήθει· καὶν εἰ βία, καὶ φύσει. τὸν αὐτὸν δὲ τρόπον ἔχει καὶ περὶ ἡρεμίας· εἰς ὃ γὰρ κινεῖται φύσει, καὶ ἡρεμεῖ ἐν τούτῳ φύσει· ὁμοίως δὲ καὶ εἰς ὃ κινεῖται βία, καὶ ἡρεμεῖ ἐν τούτῳ βία. ποῖαι δὲ βίαιοι τῆς ψυχῆς κινήσεις ἔσονται καὶ ἡρεμῖαι, οὐδὲ πλάττειν βουλομένοις ῥᾶδιον ἀποδοῦναι.

ἔτι δ' εἰ μὲν ἄνω κινήσεται, πῦρ ἔσται, εἰ δὲ κάτω, γῆ· τούτων γὰρ τῶν σωμάτων αἱ κινήσεις αὗται·

ὁ δ' αὐτὸς λόγος καὶ περὶ τῶν μεταξύ. ἔτι δ' ἐπεὶ φαίνεται κινεῖσθαι τὸ σῶμα, ταύτας εὐλογον κινεῖν τὰς κινήσεις ἃς καὶ αὕτη κινεῖται. εἰ δὲ τοῦτο, καὶ ἀντιστρέψασιν εἰπεῖν ἀληθές ὅτι ἦν τὸ [406b] σῶμα κινεῖται, ταύτην καὶ αὐτή. τὸ δὲ σῶμα κινεῖται φορᾶ· ὥστε καὶ ἡ ψυχὴ μεταβάλλοι ἂν κατὰ τὸ σῶμα ἢ ὅλη ἢ κατὰ μόρια

μεθισταμένη. εἰ δὲ τοῦτ' ἐνδέχεται, καὶ ἐξελθοῦσαν εἰσιέναι πάλιν ἐνδέχοιτ' ἂν· τούτῳ δ' ἔποιτ' ἂν τὸ ἀνίστασθαι τὰ τεθνεῶτα τῶν ζώων.

τὴν δὲ κατὰ συμβεβηκὸς κίνησιν κἂν ὑφ' ἐτέρου κινεῖτο· ὥσθειν γὰρ ἂν βία τὸ ζῶον. οὐ δεῖ δὲ ᾧ τὸ ὑφ' ἑαυτοῦ κινεῖσθαι ἐν τῇ οὐσίᾳ, τοῦθ' ὑπ' ἄλλου κινεῖσθαι, πλὴν εἰ μὴ κατὰ συμβεβηκός, ὥσπερ οὐδὲ τὸ καθ' αὐτὸ ἀγαθὸν ἢ δι' αὐτό, τὸ μὲν δι' ἄλλο εἶναι, τὸ δ' ἐτέρου ἔνεκεν. τὴν δὲ ψυχὴν μάλιστα φαίη τις ἂν ὑπὸ τῶν αἰσθητῶν κινεῖσθαι, εἴπερ κινεῖται.

ἀλλὰ μὴν καὶ εἰ κινεῖ [406b12] γε αὐτὴ αὐτήν, καὶ αὐτὴ κινεῖτ' ἂν, ὥστ' εἰ πᾶσα κίνησις ἔκστασις ἐστὶ τοῦ κινουμένου ἢ κινεῖται, καὶ ἡ ψυχὴ ἐξίσταται' ἂν ἐκ τῆς οὐσίας, εἰ μὴ κατὰ συμβεβηκὸς ἑαυτὴν κινεῖ, ἀλλ' ἐστὶν ἡ κίνησις τῆς οὐσίας αὐτῆς καθ' αὐτήν.

ἔνιοι δὲ καὶ κινεῖν φασὶ τὴν ψυχὴν τὸ σῶμα ἐν ᾧ ἐστὶν, ὥς αὐτὴ κινεῖται, οἷον Δημόκριτος, παραπλησίως λέγων Φιλίππῳ τῷ κωμωδοδιδασκάλῳ· φησὶ γὰρ τὸν Δαίδαλον κινουμένην ποιῆσαι τὴν ξυλίνην Ἀφροδίτην, ἐγγέαντ' ἄργυρον χυτόν· ὁμοίως δὲ καὶ Δημόκριτος λέγει· κινουμένας γὰρ φησὶ τὰς ἀδιαίρετους σφαίρας, διὰ τὸ πεφυκέναι μηδέποτε μένειν, συνεφέλκειν καὶ κινεῖν τὸ σῶμα πᾶν. ἡμεῖς δ' ἐρωτήσομεν εἰ καὶ ἡρέμησιν ποιεῖ τοῦτο αὐτό· πῶς δὲ ποιήσει, χαλεπὸν ἢ καὶ ἀδύνατον εἰπεῖν. ὅλως δ' οὐχ οὕτω φαίνεται κινεῖν ἡ ψυχὴ τὸ ζῶον, ἀλλὰ διὰ προαιρέσεώς τινος καὶ νοήσεως.

τὸν αὐτὸν δὲ τρόπον καὶ ὁ Τίμαιος φυσιολογεῖ τὴν ψυχὴν κινεῖν τὸ σῶμα· τῷ γὰρ κινεῖσθαι αὐτὴν καὶ τὸ σῶμα κινεῖν διὰ τὸ συμπεπλῆχθαι πρὸς αὐτό. συνεστηκυῖαν γὰρ ἐκ τῶν στοιχείων καὶ μεμερισμένην κατὰ τοὺς ἀρμονικοὺς ἀριθμούς, ὅπως αἰσθησὶν τε σύμφυτον ἀρμονίας ἔχη καὶ τὸ πᾶν φέρεται συμφώνους φοράς, τὴν εὐθυωρίαν εἰς κύκλον κατέκαμψεν· καὶ διελὼν ἐκ τοῦ ἐνὸς δύο κύκλους δισσαχῇ συνημμένους [407a] πάλιν τὸν ἕνα διεῖλεν εἰς ἑπτὰ κύκλους, ὥς οὕσας τὰς τοῦ οὐρανοῦ φοράς τὰς τῆς ψυχῆς κινήσεις.

[407a2] πρῶτον μὲν οὖν οὐ καλῶς τὸ λέγειν τὴν ψυχὴν μέγεθος εἶναι· τὴν γὰρ τοῦ παντὸς δῆλον ὅτι τοιαύτην εἶναι βούλεται οἷον ποτ' ἐστὶν ὁ καλούμενος νοῦς (οὐ γὰρ δὴ οἷόν γ' ἡ αἰσθητική, οὐδ' οἷον ἡ ἐπιθυμητική· τούτων γὰρ ἡ κίνησις οὐ κυκλοφορία).

ὁ δὲ νοῦς εἷς καὶ συνεχὴς ὥσπερ καὶ ἡ νόησις· ἡ δὲ νόησις τὰ νοήματα· ταῦτα δὲ τῷ ἐφεξῆς ἔν, ὥς ὁ ἀριθμός, ἀλλ' οὐχ ὥς τὸ μέγεθος· διόπερ οὐδ' ὁ νοῦς οὕτω συνεχὴς, ἀλλ' ἥτοι ἀμερὴς ἢ οὐχ

ὥς μέγεθός τι συνεχής. πῶς γὰρ δὴ καὶ νοήσει, μέγεθος ὧν, πότερον ὀτφοῦν τῶν μορίων τῶν αὐτοῦ, μορίων δ' ἦτοι κατὰ μέγεθος ἢ κατὰ στιγμήν, εἰ δεῖ καὶ τοῦτο μόριον εἰπεῖν;

εἰ μὲν οὖν κατὰ στιγμήν, αὐται δ' ἄπειροι, δῆλον ὥς οὐδέποτε διέξισιν· εἰ δὲ κατὰ μέγεθος, πολλάκις ἢ ἀπειράκις νοήσει τὸ αὐτό. φαίνεται δὲ καὶ ἅπαξ ἐνδεχόμενον. εἰ δ' ἱκανὸν θιγεῖν ὀτφοῦν τῶν μορίων, τί δεῖ κύκλῳ κινεῖσθαι, ἢ καὶ ὅλως μέγεθος ἔχειν; εἰ δ' ἀναγκαῖον νοῆσαι τῷ ὅλῳ κύκλῳ θιγόντα, τίς ἐστὶν ἡ τοῖς μορίοις θίξις; ἔτι δὲ πῶς νοήσει τὸ μεριστὸν ἀμερεῖ ἢ τὸ ἀμερὲς μεριστῷ; ἀναγκαῖον δὲ τὸν νοῦν εἶναι τὸν κύκλον τοῦτον· νοῦ μὲν γὰρ κίνησις νόησις κύκλου δὲ περιφορά·

εἰ οὖν ἡ νόησις περιφορά, καὶ νοῦς ἂν εἴη ὁ κύκλος οὗ ἡ τοιαύτη περιφορά νόησις. ἀεὶ δὲ δὴ τί νοήσει (δεῖ γάρ, εἴπερ αἰδῖος ἡ περιφορά); τῶν μὲν γὰρ πρακτικῶν νοήσεων ἐστὶ πέρατα (πᾶσαι γὰρ ἑτέρου χάριν), αἱ δὲ θεωρητικαὶ τοῖς λόγοις ὁμοίως ὀρίζονται· λόγος δὲ πᾶς ὀρισμὸς ἢ ἀποδείξις· αἱ μὲν οὖν ἀποδείξεις καὶ ἀπ' ἀρχῆς καὶ ἔχουσαι πὼς τέλος, τὸν συλλογισμὸν ἢ τὸ συμπέρασμα (εἰ δὲ μὴ περατοῦνται, ἀλλ' οὐκ ἀνακάμπουσί γε πάλιν ἐπ' ἀρχήν, προσλαμβάνουσai δ' αἰεὶ μέσον καὶ ἄκρον εὐθυποροῦσιν· ἡ δὲ περιφορά πάλιν ἐπ' ἀρχήν ἀνακάμπει)· οἱ δ' ὀρισμοὶ πάντες πεπερασμένοι.

ἔτι εἰ ἡ αὐτὴ περιφορά πολλάκις, δεήσει πολλάκις νοεῖν τὸ αὐτό.

ἔτι δ' ἡ νόησις ἔοικεν ἡρεμήσει τινὶ καὶ ἐπιστάσει μᾶλλον ἢ κινήσει· τὸν αὐτὸν δὲ τρόπον καὶ ὁ συλλογισμὸς.

ἀλλὰ μὴν οὐδὲ μακάριόν γε τὸ μὴ [407b] ῥάδιον ἀλλὰ βίαιον· εἰ δ' ἐστὶν ἡ κίνησις αὐτῆς ἢ οὐσία, παρὰ φύσιν ἂν κινοῖτο. ἐπίπονον δὲ καὶ τὸ μεμῖχθαι τῷ σώματι μὴ δυνάμενον ἀπολυθῆναι, καὶ προσέτι φευκτόν, εἴπερ βέλτιον τῷ νῷ μὴ μετὰ σώματος εἶναι, καθάπερ εἰωθέ τε λέγεσθαι καὶ πολλοῖς συνδοκεῖ.

ἄδηλος δὲ καὶ τοῦ κύκλῳ φέρεσθαι τὸν οὐρανὸν ἢ αἰτία· οὔτε γὰρ τῆς ψυχῆς ἢ οὐσία αἰτία τοῦ κύκλῳ φέρεσθαι, ἀλλὰ κατὰ συμβεβηκὸς οὕτω κινεῖται, οὔτε τὸ σῶμα αἴτιον, ἀλλ' ἡ ψυχὴ μᾶλλον ἐκείνῳ. ἀλλὰ μὴν οὐδ' ὅτι βέλτιον λέγεται· καίτοι γ' ἐχρῆν διὰ τοῦτο τὸν θεὸν κύκλῳ ποιεῖν φέρεσθαι τὴν ψυχὴν, ὅτι βέλτιον αὐτῇ τὸ κινεῖσθαι τοῦ μένειν, κινεῖσθαι δ' οὕτως ἢ ἄλλως.

ἐπεὶ δ' ἐστὶν ἡ τοιαύτη σκέψις ἐτέρων λόγων οἰκειότερα, ταύτην μὲν ἀφῶμεν τὸ νῦν. ἐκεῖνο δὲ ἄτοπον συμβαίνει καὶ τούτῳ τῷ λόγῳ

καὶ τοῖς πλείστοις τῶν περὶ ψυχῆς· συνάπτουσι γὰρ καὶ τιθέασιν εἰς σῶμα τὴν ψυχὴν, οὐθὲν προσδιορίσαντες διὰ τίν' αἰτίαν καὶ πῶς ἔχοντος τοῦ σώματος. καίτοι δόξειεν ἂν τοῦτ' ἀναγκαῖον εἶναι· διὰ γὰρ τὴν κοινωνίαν τὸ μὲν ποιεῖ τὸ δὲ πάσχει καὶ τὸ μὲν κινεῖται τὸ δὲ κινεῖ, τούτων δ' οὐθὲν ὑπάρχει πρὸς ἄλληλα τοῖς τυχοῦσιν.

οἱ δὲ μόνον ἐπιχειροῦσι λέγειν ποῖόν τι ἡ ψυχὴ, περὶ δὲ τοῦ δεξιμένου σώματος οὐθὲν ἔτι προσδιορίζουσιν, ὥσπερ ἐνδεχόμενον κατὰ τοὺς Πυθαγορικοὺς μύθους τὴν τυχοῦσαν ψυχὴν εἰς τὸ τυχὸν ἐνδύεσθαι σῶμα. δοκεῖ γὰρ ἕκαστον ἴδιον ἔχειν εἶδος καὶ μορφήν, παραπλήσιον δὲ λέγουσιν ὥσπερ εἴ τις φαίῃ τὴν τεκτονικὴν εἰς αὐλοὺς ἐνδύεσθαι· δεῖ γὰρ τὴν μὲν τέχνην χρῆσθαι τοῖς ὀργάνοις, τὴν δὲ ψυχὴν τῷ σώματι.

Κεφάλαιο 4

[407b27] Καὶ ἄλλη δέ τις δόξα παραδέδοται περὶ ψυχῆς, πιθανὴ μὲν πολλοῖς οὐδεμιᾷς ἦττον τῶν λεγομένων, λόγον δ' ὥσπερ εὐθύνοις δεδωκυῖα καὶ τοῖς ἐν κοινῷ γεγενημένοις λόγοις. ἀρμονίαν γάρ τινα αὐτὴν λέγουσι· καὶ γὰρ τὴν ἀρμονίαν κρᾶσιν καὶ σύνθεσιν ἐναντίων εἶναι, καὶ τὸ σῶμα συγκεῖσθαι ἐξ ἐναντίων.

καίτοι γε ἡ μὲν ἀρμονία λόγος τίς ἐστι τῶν μιχθέντων ἢ σύνθεσις, τὴν δὲ ψυχὴν οὐδέτερον οἷόν τ' εἶναι τούτων. ἔτι δὲ τὸ κινεῖν οὐκ ἔστιν ἀρμονίας, ψυχῇ δὲ [408a] πάντες ἀπονέμουσι τοῦτο μάλισθ' ὥς εἰπεῖν. ἀρμόζει δὲ μᾶλλον καθ' ὑγείας λέγειν ἀρμονίαν, καὶ ὅλως τῶν σωματικῶν ἀρετῶν, ἢ κατὰ ψυχῆς. φανερώτατον δ' εἴ τις ἀποδιδόναι πειραθεῖται τὰ πάθη καὶ τὰ ἔργα τῆς ψυχῆς ἀρμονία τινί· χαλεπὸν γὰρ ἐφαρμόζειν.

ἔτι δ' εἰ λέγομεν τὴν ἀρμονίαν εἰς δύο ἀποβλέποντες, κυριώτατα μὲν, τῶν μεγεθῶν ἐν τοῖς ἔχουσι κίνησιν καὶ θέσιν, τὴν σύνθεσιν αὐτῶν, ἐπειδὴν οὕτω συναρμόζωσιν ὥστε μηδὲν συγγενὲς παραδέχεσθαι, ἐντεῦθεν δὲ καὶ τὸν τῶν μεμιγμένων λόγον· οὐδετέρως μὲν οὖν εὐλογον, ἢ δὲ σύνθεσις τῶν τοῦ σώματος μερῶν λίαν εὐεξέταστος. πολλάι τε γὰρ αἱ συνθέσεις τῶν μερῶν καὶ πολλαχῶς· τίνος οὖν ἢ πῶς ὑπολαβεῖν τὸν νοῦν χρή σύνθεσιν εἶναι, ἢ καὶ τὸ αἰσθητικὸν ἢ ὀρεκτικόν; ὁμοίως δὲ ἄτοπον καὶ τὸ τὸν λόγον τῆς μίξεως εἶναι τὴν ψυχὴν· οὐ γὰρ τὸν αὐτὸν ἔχει λόγον ἢ μίξις τῶν στοιχείων καθ' ἣν σὰρξ καὶ καθ' ἣν ὀστοῦν. συμβήσεται οὖν πολλὰς τε ψυχὰς ἔχειν καὶ κατὰ πᾶν τὸ σῶμα, εἴπερ πάντα μὲν ἐκ τῶν στοιχείων μεμιγμένων, ὁ δὲ τῆς μίξεως λόγος ἀρμονία καὶ ψυχὴ.

ἀπαιτήσκει δ' ἂν τις τοῦτό γε καὶ παρ' Ἑμπεδοκλέους· ἕκαστον γὰρ αὐτῶν λόγῳ τινί φησιν εἶναι· πότερον οὖν ὁ λόγος ἐστὶν ἢ ψυχὴ, ἢ μᾶλλον ἕτερόν τι οὐσα ἐγγίνεται τοῖς μέρεσιν; ἔτι δὲ πότερον ἢ φιλία τῆς τυχούσης αἰτία μίξεως ἢ τῆς κατὰ τὸν λόγον, καὶ αὕτη πότερον ὁ λόγος ἐστὶν ἢ παρὰ τὸν λόγον ἕτερόν τι;

ταῦτα μὲν οὖν ἔχει τοιαύτας ἀπορίας. εἰ δ' ἐστὶν ἕτερον ἢ ψυχὴ τῆς μίξεως, τί δὴ ποτε ἅμα τῷ σαρκὶ εἶναι ἀναιρεῖται καὶ τὸ τοῖς ἄλλοις μορίοις τοῦ ζώου; πρὸς δὲ τούτοις εἴπερ μὴ ἕκαστον τῶν μορίων ψυχὴν ἔχει, εἰ μὴ ἐστὶν ἢ ψυχὴ ὁ λόγος τῆς μίξεως, τί ἐστὶν ὃ φθείρεται τῆς ψυχῆς ἀπολιπούσης;

ὅτι μὲν οὖν οὐθ' ἁρμονίαν οἶόν τ' εἶναι τὴν ψυχὴν οὔτε κύκλῳ περιφέρεσθαι, δῆλον ἐκ τῶν εἰρημένων. κατὰ συμβεβηκὸς δὲ κινεῖσθαι, καθάπερ εἵπομεν, ἔστι, καὶ κινεῖν ἑαυτήν, οἶον κινεῖσθαι μὲν ἐν ᾧ ἔστι, τοῦτο δὲ κινεῖσθαι ὑπὸ τῆς ψυχῆς· ἄλλως δ' οὐχ οἶόν τε κινεῖσθαι κατὰ τόπον αὐτὴν.

εὐλογώτερον δ' ἀπορήσειεν ἂν τις περὶ αὐτῆς ὥς [408b] κινουμένης, εἰς τὰ τοιαῦτα ἀποβλέψας· φαμὲν γὰρ τὴν ψυχὴν λυπεῖσθαι χαίρειν, θαρρεῖν φοβεῖσθαι, ἔτι δὲ ὀργίζεσθαι τε καὶ αἰσθάνεσθαι καὶ διανοεῖσθαι· ταῦτα δὲ πάντα κινήσεις εἶναι δοκοῦσιν. ὅθεν οἰηθεῖται τις ἂν αὐτὴν κινεῖσθαι·

τὸ δ' οὐκ ἔστιν ἀναγκαῖον. εἰ γὰρ καὶ ὅτι μάλιστα τὸ λυπεῖσθαι ἢ χαίρειν ἢ διανοεῖσθαι κινήσεις εἰσὶ, καὶ ἕκαστον κινεῖσθαι τι τούτων, τὸ δὲ κινεῖσθαι ἔστιν ὑπὸ τῆς ψυχῆς, οἶον τὸ ὀργίζεσθαι ἢ φοβεῖσθαι τὸ τὴν καρδίαν ὡδὶ κινεῖσθαι, τὸ δὲ διανοεῖσθαι ἢ τι τοιοῦτον ἴσως ἢ ἕτερόν τι, τούτων δὲ συμβαίνει τὰ μὲν κατὰ φοράν τινων κινουμένων, τὰ δὲ κατ' ἀλλοίωσιν (ποῖα δὲ καὶ πῶς, ἕτερός ἐστι λόγος),

τὸ δὲ λέγειν ὀργίζεσθαι τὴν ψυχὴν ὁμοιον κἂν εἴ τις λέγοι τὴν ψυχὴν ὑφαίνειν ἢ οἰκοδομεῖν· βέλτιον γὰρ ἴσως μὴ λέγειν τὴν ψυχὴν ἔλεειν ἢ μανθάνειν ἢ διανοεῖσθαι, ἀλλὰ τὸν ἄνθρωπον τῇ ψυχῇ· τοῦτο δὲ μὴ ὥς ἐν ἐκείνῃ τῆς κινήσεως οὔσης, ἀλλ' ὅτε μὲν μέχρι ἐκείνης, ὅτε δ' ἀπ' ἐκείνης, οἶον ἢ μὲν αἰσθησις ἀπὸ τωνδὶ, ἢ δ' ἀνάμνησις ἀπ' ἐκείνης ἐπὶ τὰς ἐν τοῖς αἰσθητηρίοις κινήσεις ἢ μονάς.

[408b18] ὁ δὲ νοῦς ἔοικεν ἐγγίνεσθαι οὐσία τις οὔσα, καὶ οὐ φθείρεσθαι. μάλιστα γὰρ ἐφθείρετ' ἂν ὑπὸ τῆς ἐν τῷ γήρα ἁμαυρώσεως, νῦν δ' ὥσπερ ἐπὶ τῶν αἰσθητηρίων συμβαίνει· εἰ γὰρ λάβοι ὁ πρεσβύτης ὄμμα τοιονδί, βλέποι ἂν ὥσπερ καὶ ὁ νέος. ὥστε τὸ γήρας οὐ τῷ τὴν ψυχὴν τι πεπονθέναι, ἀλλ' ἐν ᾧ, καθάπερ ἐν μέθαις καὶ νόσοις.

καὶ τὸ νοεῖν δὴ καὶ τὸ θεωρεῖν μαραίνεται ἄλλου τινὸς ἔσω φθειρομένου, αὐτὸ δὲ ἀπαθές ἐστιν. τὸ δὲ διανοεῖσθαι καὶ φιλεῖν ἢ μισεῖν οὐκ ἔστιν ἐκείνου πάθη, ἀλλὰ τουδὶ τοῦ ἔχοντος ἐκεῖνο, ἢ ἐκεῖνο ἔχει. διὸ καὶ τούτου φθειρομένου οὔτε μνημονεύει οὔτε φιλεῖ· οὐ γὰρ ἐκείνου ἦν, ἀλλὰ τοῦ κοινου, ὃ ἀπόλωλεν· ὁ δὲ νοῦς ἴσως θειότερον τι καὶ ἀπαθές ἐστιν.

ὅτι μὲν οὖν οὐχ οἶόν τε κινεῖσθαι τὴν ψυχὴν, φανερόν ἐκ τούτων· εἰ δ' ὅλως μὴ κινεῖται, δῆλον ὥς οὐδ' ὑφ' ἑαυτῆς.

πολὺ δὲ τῶν εἰρημένων ἀλογώτατον τὸ λέγειν ἀριθμὸν εἶναι τὴν ψυχὴν κινεῖσθαι ἑαυτὸν· ὑπάρχει γὰρ αὐτοῖς ἀδύνατα πρῶτα μὲν τὰ ἐκ τοῦ κινεῖσθαι συμβαίνοντα, ἴδια δ' ἐκ τοῦ [409a] λέγειν αὐτὴν ἀριθμὸν. πῶς γὰρ χρὴ νοῆσαι μονάδα κινουμένην, καὶ ὑπὸ τίνος, καὶ πῶς, ἀμερῇ καὶ ἀδιάφορον οὖσαν; ἥ γάρ ἐστι κινητικὴ καὶ κινητή, διαφέρειν δεῖ. ἔτι δ' ἐπεὶ φασι κινηθεῖσαν γραμμὴν ἐπίπεδον ποιεῖν, στιγμὴν δὲ γραμμὴν, καὶ αἱ τῶν μονάδων κινήσεις γραμμαὶ ἔσονται· ἢ γὰρ στιγμή μονάς ἐστι θέσιν ἔχουσα, ὁ δ' ἀριθμὸς τῆς ψυχῆς ἤδη πού ἐστι καὶ θέσιν ἔχει.

ἔτι δ' ἀριθμοῦ μὲν ἔαν ἀφέλῃ τις ἀριθμὸν ἢ μονάδα, λείπεται ἄλλος ἀριθμὸς· τὰ δὲ φυτὰ καὶ τῶν ζώων πολλὰ διαιρούμενα ζῆ καὶ δοκεῖ τὴν αὐτὴν ψυχὴν ἔχειν τῷ εἶδει.

δόξειε δ' ἂν οὐθὲν διαφέρειν μονάδας λέγειν ἢ σώματα μικρά· καὶ γὰρ ἐκ τῶν Δημοκρίτου σφαιρίων ἔαν γένωνται στιγμαί, μόνον δὲ μένη τὸ ποσόν, ἔσται [τι] ἐν αὐτῷ τὸ μὲν κινεῖν τὸ δὲ κινούμενον, ὥσπερ ἐν τῷ συνεχεῖ· οὐ γὰρ διὰ τὸ μεγέθει διαφέρειν ἢ μικρότητι συμβαίνει τὸ λεχθέν, ἀλλ' ὅτι ποσόν· διὸ ἀναγκαῖον εἶναι τι τὸ κινήσον τὰς μονάδας. εἰ δ' ἐν τῷ ζῳῷ τὸ κινεῖν ἢ ψυχὴ, καὶ ἐν τῷ ἀριθμῷ, ὥστε οὐ τὸ κινεῖν καὶ κινούμενον ἢ ψυχὴ, ἀλλὰ τὸ κινεῖν μόνον.

ἐνδέχεται δὲ δὴ πῶς μονάδα ταύτην εἶναι; δεῖ γὰρ ὑπάρχειν τινὰ αὐτῇ διαφορὰν πρὸς τὰς ἄλλας, στιγμῆς δὲ μοναδικῆς τίς ἂν εἴη διαφορὰ πλὴν θέσις; εἰ μὲν οὖν εἰσὶν ἕτεραι αἱ ἐν τῷ σώματι μονάδες καὶ αἱ στιγμαί, ἐν τῷ αὐτῷ ἔσονται αἱ μονάδες· κατέξει γὰρ <ἐκάστη> χώραν στιγμῆς. καίτοι τί κωλύει ἐν τῷ αὐτῷ εἶναι, εἰ δύο, καὶ ἄπειρα; ὣν γὰρ ὁ τόπος ἀδιαίρετος, καὶ αὐτά.

εἰ δ' αἱ ἐν τῷ σώματι στιγμαὶ ὁ ἀριθμὸς ὁ τῆς ψυχῆς, ἢ εἰ ὁ τῶν ἐν τῷ σώματι στιγμῶν ἀριθμὸς ἢ ψυχὴ, διὰ τί οὐ πάντα ψυχὴν ἔχουσι τὰ σώματα; στιγμαὶ γὰρ ἐν ἅπασιν δοκοῦσιν εἶναι καὶ ἄπειροι.

ἔτι δὲ πῶς οἶόν τε χωρίζεσθαι τὰς στιγμάς καὶ ἀπολύεσθαι τῶν σωμάτων, εἴ γε μὴ διαιροῦνται αἱ γραμμαὶ εἰς στιγμάς;

Κεφάλαιο 5

[409a31] Συμβαίνει δέ, καθάπερ είπομεν, τῇ μὲν ταὐτὸ λέγειν τοῖς σῶμά τι λεπτομερές αὐτὴν τιθεῖσι, τῇ δ', ὥσπερ [409b] Δημόκριτος κινεῖσθαι φησιν ὑπὸ τῆς ψυχῆς, ἴδιον τὸ ἄτοπον. εἴπερ γάρ ἐστιν ἡ ψυχὴ ἐν παντὶ τῷ αἰσθανομένῳ σώματι, ἀναγκαῖον ἐν τῷ αὐτῷ δύο εἶναι σώματα, εἰ σῶμά τι ἡ ψυχὴ· τοῖς δ' ἀριθμὸν λέγουσιν, ἐν τῇ μιᾷ στιγμῇ πολλὰς στιγμάς, καὶ πᾶν σῶμα ψυχὴν ἔχειν, εἰ μὴ διαφέρων τις ἀριθμὸς ἐγγίνεται καὶ ἄλλος τις τῶν ὑπαρχουσῶν ἐν τῷ σώματι στιγμῶν·

συμβαίνει τε κινεῖσθαι τὸ ζῶον ὑπὸ τοῦ ἀριθμοῦ, καθάπερ καὶ Δημόκριτον αὐτὸ ἔφαμεν κινεῖν· τί γὰρ διαφέρει σφαίρας λέγειν μικρὰς ἢ μονάδας μεγάλας, ἢ ὅλως μονάδας φερομένας; ἀμφοτέρως γὰρ ἀναγκαῖον κινεῖν τὸ ζῶον τῷ κινεῖσθαι ταῦτα.

τοῖς δὴ συμπλέξασιν εἰς τὸ αὐτὸ κίνησιν καὶ ἀριθμὸν ταῦτά τε συμβαίνει καὶ πολλὰ ἕτερα τοιαῦτα· οὐ γὰρ μόνον ὀρισμὸν ψυχῆς ἀδύνατον τοιοῦτον εἶναι, ἀλλὰ καὶ συμβεβηκός. δῆλον δ' εἰ τις ἐπιχειρήσειεν ἐκ τοῦ λόγου τούτου τὰ πάθη καὶ τὰ ἔργα τῆς ψυχῆς ἀποδιδόναι, οἷον λογισμούς, αἰσθήσεις, ἡδονάς, λύπας, ὅσα ἄλλα τοιαῦτα· ὥσπερ γὰρ εἵπομεν πρότερον, οὐδὲ μαντεύσασθαι ῥάδιον ἐξ αὐτῶν.

τριῶν δὲ τρόπων παραδεδομένων καθ' οὓς ὀρίζονται τὴν ψυχὴν, οἱ μὲν τὸ κινητικώτατον ἀπεφίγαντο τῷ κινεῖν ἑαυτό, οἱ δὲ σῶμα τὸ λεπτομερέστατον ἢ τὸ ἀσωματώτατον τῶν ἄλλων. ταῦτα δὲ τίνας ἀπορίας τε καὶ ὑπεναντιώσεις ἔχει, διεληλύθαμεν σχεδόν·

λείπεται δ' ἐπισκέψασθαι πῶς λέγεται τὸ ἐκ τῶν στοιχείων αὐτὴν εἶναι. λέγουσι μὲν γάρ, ἴν' αἰσθάνηται τε τῶν ὄντων καὶ ἕκαστον γνωρίζῃ· ἀναγκαῖον δὲ συμβαίνειν πολλὰ καὶ ἀδύνατα τῷ λόγῳ. τίθενται γὰρ γνωρίζειν τῷ ὁμοίῳ τὸ ὅμοιον, ὥσπερ ἂν εἰ τὴν ψυχὴν τὰ πράγματα τιθέντες. οὐκ ἔστι δὲ μόνον ταῦτα, πολλὰ δὲ καὶ ἕτερα, μᾶλλον δ' ἴσως ἄπειρα τὸν ἀριθμὸν τὰ ἐκ τούτων. ἐξ ὧν μὲν οὖν ἐστιν ἕκαστον τούτων, ἔστω γινώσκειν τὴν ψυχὴν καὶ αἰσθάνεσθαι· ἀλλὰ τὸ σύνολον τίτι γνωριεῖ ἢ αἰσθήσεται, οἷον τί θεὸς ἢ ἄνθρωπος ἢ σὰρξ ἢ ὅσπου; ὁμοίως δὲ καὶ [410a] ἄλλο ὅτιοῦν τῶν συνθέτων· οὐ γὰρ ὅπως οὖν ἔχοντα τὰ στοιχεῖα τούτων ἕκαστον, ἀλλὰ λόγῳ τινὶ καὶ συνθέσει, καθάπερ φησὶ καὶ Ἐμπεδοκλῆς τὸ ὅσπου·

ἡ δὲ χθὼν ἐπίηρος ἐν εὐστέρνοις χοάνοισιν
τῷ δύο τῶν ὀκτὼ μερέων λάχε νήστιδος αἷγλης,
τέσσαρα δ' Ἡφαίστοιο· τὰ δ' ὅστέα λευκὰ γένοντο.

οὐδὲν οὖν ὄφελος ἐνεῖναι τὰ στοιχεῖα ἐν τῇ ψυχῇ, εἰ μὴ καὶ οἱ
λόγοι ἐνέσονται καὶ ἡ σύνθεσις· γνωριεῖ γὰρ ἕκαστον τὸ ὅμοιον, τὸ
δ' ὅστουν ἢ τὸν ἄνθρωπον οὐθέν, εἰ μὴ καὶ ταῦτ' ἐνέσται. τοῦτο δ'
ὅτι ἀδύνατον, οὐθέν δεῖ λέγειν· τίς γὰρ ἂν ἀπορήσειεν εἰ ἔνεστιν ἐν
τῇ ψυχῇ λίθος ἢ ἄνθρωπος; ὁμοίως δὲ καὶ τὸ ἀγαθὸν καὶ τὸ μὴ
ἀγαθόν· τὸν αὐτὸν δὲ τρόπον καὶ περὶ τῶν ἄλλων.

[410a13] ἔτι δὲ πολλαχῶς λεγομένου τοῦ ὄντος (σημαίνει γὰρ τὸ
μὲν τόδε τι, τὸ δὲ ποσὸν ἢ ποιὸν ἢ καὶ τινα ἄλλην τῶν διαιρεθεῖσων
κατηγοριῶν) πότερον ἐξ ἀπάντων ἔσται ἡ ψυχὴ ἢ οὐ; ἀλλ' οὐ δοκεῖ
κοινὰ πάντων εἶναι στοιχεῖα. ἄρ' οὖν ὅσα τῶν οὐσιῶν, ἐκ τούτων
μόνον; πῶς οὖν γινώσκει καὶ τῶν ἄλλων ἕκαστον; ἢ φήσουσιν
ἐκάστου γένους εἶναι στοιχεῖα καὶ ἀρχὰς ἰδίας, ἐξ ὧν τὴν ψυχὴν
συνεστάναι; ἔσται ἄρα ποσὸν καὶ ποιὸν καὶ οὐσία. ἀλλ' ἀδύνατον ἐκ
τῶν τοῦ ποσοῦ στοιχείων οὐσίαν εἶναι καὶ μὴ ποσόν. τοῖς δὴ
λέγουσιν ἐκ πάντων ταῦτά τε καὶ τοιαῦθ' ἕτερα συμβαίνει.

ἄτοπον δὲ καὶ τὸ φάναι μὲν ἀπαθὲς εἶναι τὸ ὅμοιον ὑπὸ τοῦ
ὁμοίου, αἰσθάνεσθαι δὲ τὸ ὅμοιον τοῦ ὁμοίου καὶ γινώσκειν τῷ
ὁμοίῳ τὸ ὅμοιον· τὸ δ' αἰσθάνεσθαι πάσχειν τι καὶ κινεῖσθαι
τιθέασιν· ὁμοίως δὲ καὶ τὸ νοεῖν τε καὶ γινώσκειν.

πολλὰς δ' ἀπορίας καὶ δυσχερείας ἔχοντος τοῦ λέγειν, καθάπερ
Ἐμπεδοκλῆς, ὡς τοῖς σωματικοῖς στοιχείοις ἕκαστα γνωρίζεται, καί,
πρός, τῷ ὁμοίῳ, μαρτυρεῖ τὸ νῦν λεχθέν· ὅσα γὰρ ἔστιν ἐν τοῖς τῶν
ζώων σώμασιν ἀπλῶς γῆς, οἷον [410b] ὅσῃ νεῦρα τρίχες, οὐθενὸς
αἰσθάνεσθαι δοκεῖ, ὥστ' οὐδὲ τῶν ὁμοίων· καίτοι προσῆκεν. ἔτι δ'
ἐκάστη τῶν ἀρχῶν ἄγνοια πλείων ἢ σύνεσις ὑπάρξει· γινώσεται μὲν
γὰρ ἐν ἐκάστη, πολλὰ δ' ἀγνοήσει· πάντα γὰρ τᾶλλα. συμβαίνει δ'
Ἐμπεδοκλεῖ γε καὶ ἀφρονέστατον εἶναι τὸν θεόν· μόνος γὰρ τῶν
στοιχείων ἐν οὐ γνωριεῖ, τὸ νεῖκος, τὰ δὲ θνητὰ πάντα· ἐκ πάντων
γὰρ ἕκαστον.

ὅλως τε διὰ τίν' αἰτίαν οὐχ ἅπαντα ψυχὴν ἔχει τὰ ὄντα, ἐπειδὴ πᾶν
ἥτοι στοιχεῖον ἢ ἐκ στοιχείου ἐνὸς ἢ πλειόνων ἢ πάντων; ἀναγκαῖον
γὰρ ἔστιν ἐν τι γινώσκειν ἢ τινα ἢ πάντα.

ἀπορήσειε δ' ἂν τις καὶ τί ποτ' ἐστὶ τὸ ἐνοποιοῦν αὐτά· ὕλη γὰρ
ἔοικε τὰ γε στοιχεῖα, κυριώτατον δ' ἐκεῖνο τὸ συνέχον, ὃ τί ποτ'

ἐστίν· τῆς δὲ ψυχῆς εἶναι τι κρεῖττον καὶ ἄρχον ἀδύνατον· ἀδυνατώτερον δ' ἔτι τοῦ νοῦ· εὐλογον γὰρ τοῦτον εἶναι προγενέστατον καὶ κύριον κατὰ φύσιν, τὰ δὲ στοιχεῖα φασὶ πρῶτα τῶν ὄντων εἶναι.

πάντες δὲ καὶ οἱ διὰ τὸ γνωρίζειν καὶ αἰσθάνεσθαι τὰ ὄντα τὴν ψυχὴν ἐκ τῶν στοιχείων λέγοντες αὐτήν, καὶ οἱ τὸ κινητικώτατον, οὐ περὶ πάσης λέγουσι ψυχῆς. οὔτε γὰρ τὰ αἰσθανόμενα πάντα κινητικά (φαίνεται γὰρ εἶναι τινα μόνιμα τῶν ζώων κατὰ τόπον· καίτοι δοκεῖ γε ταύτην μόνην τῶν κινήσεων κινεῖν ἢ ψυχὴ τὸ ζῶον)· ὁμοίως δὲ καὶ ὅσοι τὸν νοῦν καὶ τὸ αἰσθητικὸν ἐκ τῶν στοιχείων ποιοῦσιν. φαίνεται γὰρ τά τε φυτὰ ζῆν οὐ μετέχοντα [φορᾶς οὐδ'] αἰσθήσεως, καὶ τῶν ζώων <τὰ> πολλὰ διάνοιαν οὐκ ἔχειν.

εἰ δέ τις καὶ ταῦτα παραχωρήσειε καὶ θείῃ τὸν νοῦν μέρος τι τῆς ψυχῆς, ὁμοίως δὲ καὶ τὸ αἰσθητικόν, οὐδ' ἂν οὕτω λέγοιεν καθόλου περὶ πάσης ψυχῆς οὐδὲ περὶ ὅλης οὐδεμιᾶς.

τοῦτο δὲ πέπονθε καὶ ὁ ἐν τοῖς Ὀρφικοῖς καλουμένοις ἔπεισι λόγος· φησὶ γὰρ τὴν ψυχὴν ἐκ τοῦ ὅλου εἰσιέναι ἀναπνεόντων, φερομένην ὑπὸ τῶν ἀνέμων, οὐχ οἷόν τε δὲ τοῖς φυτοῖς τοῦτο συμβαίνειν οὐδὲ [411a] τῶν ζώων ἐνίοις, εἴπερ μὴ πάντα ἀναπνεύουσιν· τοῦτο δὲ λέληθε τοὺς οὕτως ὑπεληφότες.

(εἰ δὲ δεῖ τὴν ψυχὴν ἐκ τῶν στοιχείων ποιεῖν, οὐθὲν δεῖ ἐξ ἀπάντων· ἱκανὸν γὰρ θάτερον μέρος τῆς ἐναντιώσεως ἑαυτὸ τε κρίνειν καὶ τὸ ἀντικείμενον. καὶ γὰρ τῷ εὐθεῖ καὶ αὐτὸ καὶ τὸ καμπύλον γινώσκομεν· κριτὴς γὰρ ἀμφοῖν ὁ κανὼν, τὸ δὲ καμπύλον οὐθ' ἑαυτοῦ οὔτε τοῦ εὐθέος.)

καὶ ἐν τῷ ὅλῳ δὴ τινες αὐτὴν μεμίχθαι φασιν, ὅθεν ἴσως καὶ Θαλῆς ᾤκηθη πάντα πλήρη θεῶν εἶναι.

τοῦτο δ' ἔχει τινὰς ἀπορίας· διὰ τίνα γὰρ αἰτίαν ἐν μὲν τῷ ἀέρι ἢ τῷ πυρὶ οὐσα ἢ ψυχὴ οὐ ποιεῖ ζῶον, ἐν δὲ τοῖς μικτοῖς, καὶ ταῦτα βελτίων ἐν τούτοις εἶναι δοκοῦσα;

(ἐπιζητήσειε δ' ἂν τις καὶ διὰ τίν' αἰτίαν ἢ ἐν τῷ ἀέρι ψυχὴ τῆς ἐν τοῖς ζώοις βελτίων ἐστὶ καὶ ἀθανατωτέρα.)

συμβαίνει δ' ἀμφοτέρως ἄτοπον καὶ παράλογον· καὶ γὰρ τὸ λέγειν ζῶον τὸ πῦρ ἢ τὸν ἀέρα τῶν παραλογωτέρων ἐστὶ, καὶ τὸ μὴ λέγειν ζῶα ψυχῆς ἐνούσης ἄτοπον. ὑπολαβεῖν δ' εἰκότα εἶναι τὴν ψυχὴν ἐν τούτοις ὅτι τὸ ὅλον τοῖς μορίοις ὁμοειδές· ὥστ' ἀναγκαῖον αὐτοῖς λέγειν καὶ τὴν ψυχὴν ὁμοειδῆ τοῖς μορίοις εἶναι, εἰ τῷ

ἀπολαμβάνεσθαι τι τοῦ περιέχοντος ἐν τοῖς ζῷοις ἔμψυχα τὰ ζῷα γίνεται. εἰ δ' ὁ μὲν ἀὴρ διασπώμενος ὁμοειδής, ἡ δὲ ψυχὴ ἀνομοιομερής, τὸ μὲν τι αὐτῆς ὑπάρξει δηλὸν ὅτι, τὸ δ' οὐχ ὑπάρξει. ἀναγκαῖον οὖν αὐτὴν ἢ ὁμοιομερῆ εἶναι ἢ μὴ ἐνυπάρχειν ἐν ὀφροῦν μορίῳ τοῦ παντός.

φανερὸν οὖν ἐκ τῶν εἰρημένων ὥς οὔτε τὸ γινώσκειν ὑπάρχει τῇ ψυχῇ διὰ τὸ ἐκ τῶν στοιχείων εἶναι, οὔτε τὸ κινεῖσθαι αὐτὴν καλῶς οὐδ' ἀληθῶς λέγεται.

ἐπεὶ δὲ τὸ γινώσκειν τῆς ψυχῆς ἐστὶ καὶ τὸ αἰσθάνεσθαι τε καὶ τὸ δοξάζειν, ἔτι δὲ τὸ ἐπιθυμεῖν καὶ βούλεσθαι καὶ ὅλως αἰ ὀρέξεις, γίνεται δὲ καὶ ἡ κατὰ τόπον κίνησις τοῖς ζῷοις ὑπὸ τῆς ψυχῆς, ἔτι δ' αὖξιν τε καὶ ἀκμὴ καὶ φθίσις, πότερον ὅλη [411b] τῇ ψυχῇ τούτων ἕκαστον ὑπάρχει, καὶ πάσῃ νοοῦμέν τε καὶ αἰσθανόμεθα καὶ κινούμεθα καὶ τῶν ἄλλων ἕκαστον ποιοῦμέν τε καὶ πάσχομεν, ἢ μορίοις ἐτέροις ἕτερα; καὶ τὸ ζῆν δὴ πότερον ἐν τινι τούτων ἐστὶν ἐνὶ ἢ καὶ ἐν πλείοσιν ἢ πᾶσιν, ἢ καὶ ἄλλο τι αἷτιον;

λέγουσι δὴ τινες μεριστὴν αὐτὴν, καὶ ἄλλω μὲν νοεῖν ἄλλω δὲ ἐπιθυμεῖν. τί οὖν δὴ ποτε συνέχει τὴν ψυχὴν, εἰ μεριστὴ πέφυκεν; οὐ γὰρ δὴ τό γε σῶμα· δοκεῖ γὰρ τοῦναντίον μᾶλλον ἢ ψυχὴ τὸ σῶμα συνέχειν· ἐξελθούσης γοῦν διαπνεῖται καὶ σήπεται. εἰ οὖν ἕτερόν τι μίαν αὐτὴν ποιεῖ, ἐκεῖνο μάλιστ' ἂν εἴη ψυχὴ. δεήσει δὲ πάλιν κάκεῖνο ζητεῖν πότερον ἐν ἢ πολυμερές. εἰ μὲν γὰρ ἓν, διὰ τί οὐκ εὐθέως καὶ ἡ ψυχὴ ἓν; εἰ δὲ μεριστόν, πάλιν ὁ λόγος ζητήσῃ τί τὸ συνέχον ἐκεῖνο, καὶ οὕτω δὴ πρόεισιν ἐπὶ τὸ ἄπειρον.

[411b14] ἀπορήσειε δ' ἂν τις καὶ περὶ τῶν μορίων αὐτῆς, τίνας ἔχει δυνάμιν ἕκαστον ἐν τῷ σώματι. εἰ γὰρ ἡ ὅλη ψυχὴ πᾶν τὸ σῶμα συνέχει, προσήκει καὶ τῶν μορίων ἕκαστον συνέχειν τι τοῦ σώματος. τοῦτο δ' ἔοικεν ἀδυνάτῳ· ποῖον γὰρ μόριον ἢ πῶς ὁ νοῦς συνέξει, χαλεπὸν καὶ πλάσαι.

φαίνεται δὲ καὶ τὰ φυτὰ διαιρούμενα ζῆν καὶ τῶν ζῴων ἓνια τῶν ἐντόμων, ὥς τὴν αὐτὴν ἔχοντα ψυχὴν τῷ εἶδει, εἰ καὶ μὴ ἀριθμῷ· ἐκάτερον γὰρ τῶν μορίων αἰσθήσιν ἔχει καὶ κινεῖται κατὰ τόπον ἐπὶ τινι χρόνον. εἰ δὲ μὴ διατελοῦσιν, οὐθὲν ἄτοπον· ὄργανα γὰρ οὐκ ἔχουσιν ὥστε σώζειν τὴν φύσιν. ἀλλ' οὐδὲν ἦττον ἐν ἐκατέρῳ τῶν μορίων ἅπαντ' ἐνυπάρχει τὰ μόρια τῆς ψυχῆς, καὶ ὁμοειδὴ ἐστὶν ἀλλήλοισι καὶ τῇ ὅλῃ, ἀλλήλοισι μὲν ὥς οὐ χωριστὰ ὄντα, τῇ δ' ὅλη ψυχῇ ὥς οὐ διαιρετῇ οὔσῃ.

ἔοικε δὲ καὶ ἡ ἐν τοῖς φυτοῖς ἀρχὴ ψυχὴ τις εἶναι· μόνης γὰρ ταύτης κοινωνεῖ καὶ ζῶα καὶ φυτά, καὶ αὕτη μὲν χωρίζεται τῆς αἰσθητικῆς ἀρχῆς, αἰσθησιν δ' οὐθὲν ἄνευ ταύτης ἔχει.

Βιβλίο Β

Κεφάλαιο 1

[412a] 1. Τὰ μὲν δὴ ὑπὸ τῶν πρότερον παραδεδομένα περὶ ψυχῆς εἰρήσθω· πάλιν δ' ὥσπερ ἐξ ὑπαρχῆς ἐπανίωμεν, πειρώμενοι διορίσαι τί ἐστὶ ψυχὴ καὶ τίς ἂν εἴη κοινότατος λόγος αὐτῆς.

2. λέγομεν δὴ γένος ἓν τι τῶν ὄντων τὴν οὐσίαν, ταύτης δὲ τὸ μὲν, ὡς ὕλην, ὃ καθ' αὐτὸ οὐκ ἔστι τόδε τι, ἕτερον δὲ μορφήν καὶ εἶδος, καθ' ἣν ἤδη λέγεται τόδε τι, καὶ τρίτον τὸ ἐκ τούτων. ἔστι δ' ἡ μὲν ὕλη δύναμις, τὸ δ' εἶδος ἐντελέχεια, καὶ τοῦτο διχῶς, τὸ μὲν ὡς ἐπιστήμη, τὸ δ' ὡς τὸ θεωρεῖν.

3. οὐσίαι δὲ μάλιστ' εἶναι δοκοῦσι τὰ σώματα, καὶ τούτων τὰ φυσικά· ταῦτα γὰρ τῶν ἄλλων ἀρχαί. τῶν δὲ φυσικῶν τὰ μὲν ἔχει ζῶην, τὰ δ' οὐκ ἔχει· ζῶην δὲ λέγομεν τὴν δι' αὐτοῦ τροφήν τε καὶ αὐξήσιν καὶ φθίσιν. ὥστε πᾶν σῶμα φυσικὸν μετέχον ζωῆς οὐσία ἂν εἴη, οὐσία δ' οὕτως ὡς συνθέτη.

4. ἐπεὶ δ' ἐστὶ καὶ σῶμα καὶ τοιόνδε, ζῶην γὰρ ἔχον, οὐκ ἂν εἴη σῶμα ἢ ψυχὴ· οὐ γάρ ἐστι τῶν καθ' ὑποκειμένου τὸ σῶμα, μᾶλλον δ' ὡς ὑποκείμενον καὶ ὕλη. ἀναγκαῖον ἄρα τὴν ψυχὴν οὐσίαν εἶναι ὡς εἶδος σώματος φυσικοῦ δυνάμει ζῶην ἔχοντος. ἢ δ' οὐσία ἐντελέχεια· τοιούτου ἄρα σώματος ἐντελέχεια.

5. αὕτη δὲ λέγεται διχῶς, ἡ μὲν ὡς ἐπιστήμη, ἡ δ' ὡς τὸ θεωρεῖν. φανερόν οὖν ὅτι ὡς ἐπιστήμη· ἐν γὰρ τῷ ὑπάρχειν τὴν ψυχὴν καὶ ὕπνος καὶ ἐγρήγορσις ἐστίν, ἀνάλογον δ' ἡ μὲν ἐγρήγορσις τῷ θεωρεῖν, ὃ δ' ὕπνος τῷ ἔχειν καὶ μὴ ἐνεργεῖν· προτέρα δὲ τῇ γενέσει ἐπὶ τοῦ αὐτοῦ ἡ ἐπιστήμη. διὸ ἡ ψυχὴ ἐστὶν ἐντελέχεια ἢ πρώτη σώματος φυσικοῦ δυνάμει ζῶην ἔχοντος.

6. τοιοῦτον δὲ ὃ ἂν ᾗ ὀργανικόν. (ὄργανα δὲ καὶ τὰ τῶν φυτῶν μέρη, ἀλλὰ παντελῶς ἀπλᾶ, οἷον τὸ φύλλον περικαρπίου σκέπασμα, τὸ δὲ περικάρπιον καρποῦ· αἱ δὲ ρίζαι τῷ στόματι ἀνάλογον· ἅμφω γὰρ ἔλκει τὴν τροφήν.) εἰ δὴ τι κοινὸν ἐπὶ πάσης ψυχῆς δεῖ λέγειν, εἴη ἂν ἐντελέχεια ἢ πρώτη σώματος φυσικοῦ ὀργανικοῦ.

7. διὸ καὶ οὐ δεῖ ζητεῖν εἰ ἐν ἡ ψυχὴ καὶ τὸ σῶμα, ὥσπερ οὐδὲ τὸν κηρὸν καὶ τὸ σχῆμα, οὐδ' ὅλως τὴν ἐκάστου ὕλην καὶ τὸ οὐ ἢ ὕλη· τὸ γὰρ ἐν καὶ τὸ εἶναι ἐπεὶ πλεοναχῶς λέγεται, τὸ κυρίως ἢ ἐντελεχεία ἐστίν.

8. καθόλου μὲν οὖν εἴρηται τί ἐστὶν ἡ ψυχὴ· οὐσία γὰρ ἢ κατὰ τὸν

λόγον. τοῦτο δὲ τὸ τί ἦν εἶναι τῷ τοιῷδὶ σώματι, καθάπερ εἴ τι τῶν ὀργάνων φυσικὸν ἦν σῶμα, οἷον πέλεκυς· ἦν μὲν γὰρ ἂν τὸ πελέκει εἶναι ἢ οὐσία αὐτοῦ, καὶ ἢ ψυχὴ τοῦτο· χωρισθείσης δὲ ταύτης οὐκ ἂν ἔτι πέλεκυς ἦν, ἀλλ' ἢ ὁμωνύμως, νῦν δ' ἔστι πέλεκυς. οὐ γὰρ τοιούτου σώματος τὸ τί ἦν εἶναι καὶ ὁ λόγος ἢ ψυχὴ, ἀλλὰ φυσικοῦ τοιουδί, ἔχοντος ἀρχὴν κινήσεως καὶ στάσεως ἐν ἑαυτῷ.

9. θεωρεῖν δὲ καὶ ἐπὶ τῶν μερῶν δεῖ τὸ λεχθέν. εἰ γὰρ ἦν ὁ ὀφθαλμὸς ζῶον, ψυχὴ ἂν ἦν αὐτοῦ ἢ ὄψις· αὕτη γὰρ οὐσία ὀφθαλμοῦ ἢ κατὰ τὸν λόγον (ὁ δ' ὀφθαλμὸς ὕλη ὄψεως), ἧς ἀπολειπούσης οὐκέτ' ὀφθαλμός, πλὴν ὁμωνύμως, καθάπερ ὁ λίθινος καὶ ὁ γεγραμμένος. δεῖ δὴ λαβεῖν τὸ ἐπὶ μέρους ἐφ' ὅλου τοῦ ζῶντος σώματος· ἀνάλογον γὰρ ἔχει ὡς τὸ μέρος πρὸς τὸ μέρος, οὕτως ἢ ὅλη αἴσθησις πρὸς τὸ ὅλον σῶμα τὸ αἰσθητικόν, ἢ τοιούτον.

10. ἔστι δὲ οὐ τὸ ἀποβεβληκὸς τὴν ψυχὴν τὸ δυνάμει ὄν ὥστε ζῆν, ἀλλὰ τὸ ἔχον· τὸ δὲ σπέρμα καὶ ὁ καρπὸς τὸ δυνάμει τοιονδὶ σῶμα. ὡς μὲν οὖν ἢ τιμῆσι καὶ ἢ ὄρασις, οὕτω καὶ ἢ ἐργήγορσις ἐντελέ- [413a]χεια, ὡς δ' ἢ ὄψις καὶ ἢ δύναμις τοῦ ὀργάνου, ἢ ψυχὴ· τὸ δὲ σῶμα τὸ δυνάμει ὄν· ἀλλ' ὥσπερ ὀφθαλμὸς ἢ κόρη καὶ ἢ ὄψις, κάκει ἢ ψυχὴ καὶ τὸ σῶμα ζῶον.

11. ὅτι μὲν οὖν οὐκ ἔστιν ἢ ψυχὴ χωριστὴ τοῦ σώματος, ἢ μέρη τινὰ αὐτῆς, εἰ μεριστὴ πέφυκεν, οὐκ ἄδηλον· ἐνίων γὰρ ἢ ἐντελέχεια τῶν μερῶν ἐστὶν αὐτῶν. οὐ μὴν ἀλλ' ἐνία γε οὐθὲν κωλύει, διὰ τὸ μηθενὸς εἶναι σώματος ἐντελεχείας.

12. ἔτι δὲ ἄδηλον εἰ οὕτως ἐντελέχεια τοῦ σώματος ἢ ψυχὴ <ἢ> ὥσπερ πλωτὴρ πλοίου. τύπῳ μὲν οὖν ταύτῃ διωρίσθω καὶ ὑπογεγράφθω περὶ ψυχῆς.

Κεφάλαιο 2

[413a11] 1. Ἐπεὶ δ' ἐκ τῶν ἀσαφῶν μὲν φανερωτέρων δὲ γίνεται τὸ σαφές καὶ κατὰ τὸν λόγον γνωριμώτερον, πειρατέον πάλιν οὕτω γ' ἐπελθεῖν περὶ αὐτῆς· οὐ γὰρ μόνον τὸ ὅτι δεῖ τὸν ὀριστικὸν λόγον δηλοῦν, ὥσπερ οἱ πλεῖστοι τῶν ὄρων λέγουσιν, ἀλλὰ καὶ τὴν αἰτίαν ἐνυπάρχειν καὶ ἐμφαίνεσθαι. νῦν δ' ὥσπερ συμπεράσμαθ' οἱ λόγοι τῶν ὄρων εἰσίν· οἷον τί ἐστὶν ὁ τετραγωνισμός; τὸ ἴσον ἐτερομήκει ὀρθογώνιον εἶναι ισόπλευρον. ὁ δὲ τοιοῦτος ὅρος λόγος τοῦ συμπεράσματος· ὁ δὲ λέγων ὅτι ἐστὶν ὁ τετραγωνισμὸς μέσης εὐρεσις τοῦ πράγματος λέγει τὸ αἷτιον.

2. λέγομεν οὖν, ἀρχὴν λαβόντες τῆς σκέψεως, διωρίσθαι τὸ ἔμψυχον τοῦ ἀψύχου τῷ ζῆν. πλεοναχῶς δὲ τοῦ ζῆν λεγομένου, κἂν ἓν τι τούτων ἐνυπάρχη μόνον, ζῆν αὐτὸ φαμεν, οἷον νοῦς, αἴσθησις, κίνησις καὶ στάσις ἢ κατὰ τόπον, ἔτι κίνησις ἢ κατὰ τροφὴν καὶ φθίσις τε καὶ αὐξήσις.

3. διὸ καὶ τὰ φυόμενα πάντα δοκεῖ ζῆν· φαίνεται γὰρ ἐν αὐτοῖς ἔχοντα δύναμιν καὶ ἀρχὴν τοιαύτην, δι' ἧς αὐξήσιν τε καὶ φθίσιν λαμβάνουσι κατὰ τοὺς ἐναντίους τόπους· οὐ γὰρ ἄνω μὲν αὖξεται, κάτω δ' οὐ, ἀλλ' ὁμοίως ἐπ' ἅμφω καὶ πάντῃ, ὅσα ἀεὶ τρέφεται τε καὶ ζῇ διὰ τέλους, ἕως ἄν δύνηται λαμβάνειν τροφήν.

4. χωρίζεσθαι δὲ τοῦτο μὲν τῶν ἄλλων δυνατόν, τὰ δ' ἄλλα τούτου ἀδύνατον ἐν τοῖς θνητοῖς. φανερόν δ' ἐπὶ τῶν φυομένων· οὐδεμία γὰρ αὐτοῖς ὑπάρχει δύναμις ἄλλη [413b] ψυχῆς. τὸ μὲν οὖν ζῆν διὰ τὴν ἀρχὴν ταύτην ὑπάρχει τοῖς ζῶσι, τὸ δὲ ζῶν διὰ τὴν αἴσθησιν πρώτως· καὶ γὰρ τὰ μὴ κινούμενα μηδ' ἀλλάττοντα τόπον, ἔχοντα δ' αἴσθησιν, ζῶα λέγομεν καὶ οὐ ζῆν μόνον. αἰσθήσεως δὲ πρῶτον ὑπάρχει πᾶσιν ἀφή· ὥσπερ δὲ τὸ θρεπτικὸν δύναται χωρίζεσθαι τῆς ἀφῆς καὶ πάσης αἰσθήσεως, οὕτως ἡ ἀφή τῶν ἄλλων αἰσθήσεων (θρεπτικὸν δὲ λέγομεν τὸ τοιοῦτον μόνιον τῆς ψυχῆς οὐ καὶ τὰ φυόμενα μετέχει), τὰ δὲ ζῶα πάντα φαίνεται τὴν ἀπτικήν αἴσθησιν ἔχοντα· δι' ἣν δ' αἰτίαν ἐκάτερον τούτων συμβέβηκεν, ὕστερον ἐροῦμεν.

5. νῦν δ' ἐπὶ τοσοῦτον εἰρήσθω μόνον, ὅτι ἐστὶν ἡ ψυχὴ τῶν εἰρημένων τούτων ἀρχὴ καὶ τούτοις ὥρισται, θρεπτικῷ, αἰσθητικῷ, διανοητικῷ, κινήσει. πότερον δὲ τούτων ἕκαστόν ἐστι ψυχὴ ἢ μόνιον

ψυχῆς, καὶ εἰ μόριον, πότερον οὕτως ὥστ' εἶναι χωριστὸν λόγῳ μόνον ἢ καὶ τόπῳ, περὶ μὲν τινῶν τούτων οὐ χαλεπὸν ἰδεῖν, ἔνια δὲ ἀπορίαν ἔχει.

6. ὥσπερ γὰρ ἐπὶ τῶν φυτῶν ἔνια διαιρούμενα φαίνεται ζῶντα καὶ χωριζόμενα ἀπ' ἀλλήλων, ὡς οὕσης τῆς ἐν αὐτοῖς ψυχῆς ἐντελεχεία μὲν μιᾶς ἐν ἐκάστῳ φυτῷ, δυνάμει δὲ πλειόνων, οὕτως ὁρῶμεν καὶ περὶ ἐτέρας διαφορὰς τῆς ψυχῆς συμβαῖνον ἐπὶ τῶν ἐντόμων ἐν τοῖς διατεμνομένοις· καὶ γὰρ αἰσθησιν ἐκάτερον τῶν μερῶν ἔχει καὶ κίνησιν τὴν κατὰ τόπον, εἰ δ' αἰσθησιν, καὶ φαντασίαν καὶ ὄρεξιν· ὅπου μὲν γὰρ αἰσθησις, καὶ λύπη τε καὶ ἡδονή, ὅπου δὲ ταῦτα, ἐξ ἀνάγκης καὶ ἐπιθυμία.

7. περὶ δὲ τοῦ νοῦ καὶ τῆς θεωρητικῆς δυνάμεως οὐδὲν πῶ φανερόν, ἀλλ' ἔοικε ψυχῆς γένος ἕτερον εἶναι, καὶ τοῦτο μόνον ἐνδέχεσθαι χωρίζεσθαι, καθάπερ τὸ αἰθερὶον τοῦ φθαρτοῦ.

8. τὰ δὲ λοιπὰ μόρια τῆς ψυχῆς φανερόν ἐκ τούτων ὅτι οὐκ ἔστι χωριστά, καθάπερ τινὲς φασιν· τῷ δὲ λόγῳ ὅτι ἕτερα, φανερόν· αἰσθητικῷ γὰρ εἶναι καὶ δοξαστικῷ ἕτερον, εἴπερ καὶ τὸ αἰσθάνεσθαι τοῦ δοξάζειν, ὁμοίως δὲ καὶ τῶν ἄλλων ἕκαστον τῶν εἰρημένων.

9. ἔτι δ' ἐνίοις μὲν τῶν ζώων ἅπανθ' ὑπάρχει ταῦτα, τισὶ δὲ τινὰ τούτων, ἐτέροις δὲ ἐν μόνον (τοῦτο δὲ ποιεῖ δια- [414a] φορὰν τῶν ζώων)· διὰ τίνα δ' αἰτίαν, ὕστερον ἐπισκεπτέον. παραπλήσιον δὲ καὶ περὶ τὰς αἰσθήσεις συμβέβηκεν· τὰ μὲν γὰρ ἔχει πάσας, τὰ δὲ τινάς, τὰ δὲ μίαν τὴν ἀναγκαιοτάτην, ἀφῆν.

10. ἐπεὶ δὲ ᾧ ζῶμεν καὶ αἰσθανόμεθα διχῶς λέγεται, καθάπερ ᾧ ἐπιστάμεθα (λέγομεν δὲ τὸ μὲν ἐπιστήμην τὸ δὲ ψυχὴν, ἐκατέρῳ γὰρ τούτων φαμὲν ἐπίστασθαι), ὁμοίως δὲ καὶ [ᾧ] ὑγιαίνομεν τὸ μὲν ὑγιεῖα τὸ δὲ μορίῳ τινὶ τοῦ σώματος ἢ καὶ ὅλῳ, τούτων δ' ἡ μὲν ἐπιστήμη τε καὶ ὑγίεια μορφή καὶ εἰδός τι καὶ λόγος καὶ οἶον ἐνέργεια τοῦ δεκτικοῦ, ἡ μὲν τοῦ ἐπιστημονικοῦ, ἡ δὲ τοῦ ὑγιαστοῦ (δοκεῖ γὰρ ἐν τῷ πάσχοντι καὶ διατιθεμένῳ ἡ τῶν ποιητικῶν ὑπάρχειν ἐνέργεια), ἡ ψυχὴ δὲ τοῦτο ᾧ ζῶμεν καὶ αἰσθανόμεθα καὶ διανοοῦμεθα πρῶτως-ὥστε λόγος τις ἂν εἴη καὶ εἶδος, ἀλλ' οὐχ ὕλη καὶ τὸ ὑποκείμενον.

11. τριχῶς γὰρ λεγομένης τῆς οὐσίας, καθάπερ εἵπομεν, ὧν τὸ μὲν εἶδος, τὸ δὲ ὕλη, τὸ δὲ ἐξ ἀμφοῖν, τούτων δ' ἡ μὲν ὕλη δύνამις, τὸ δὲ εἶδος ἐντελέχεια, ἐπεὶ τὸ ἐξ ἀμφοῖν ἔμψυχον, οὐ τὸ σῶμά ἐστιν ἐντελέχεια ψυχῆς, ἀλλ' αὕτη σώματός τινος. καὶ διὰ τοῦτο καλῶς

ὑπολαμβάνουσιν οἷς δοκεῖ μήτ' ἄνευ σώματος εἶναι μήτε σῶμά τι ἢ ψυχή· σῶμα μὲν γὰρ οὐκ ἔστι, σώματος δέ τι,

12. καὶ διὰ τοῦτο ἐν σώματι ὑπάρχει, καὶ ἐν σώματι τοιούτῳ, καὶ οὐχ ὥσπερ οἱ πρότερον εἰς σῶμα ἐνήρμοζον αὐτήν, οὐθὲν προσδιορίζοντες ἐν τίνι καὶ ποίῳ, καίπερ οὐδὲ φαινομένου τοῦ τυχόντος δέχεσθαι τὸ τυχόν.

13. οὕτω δὲ γίνεται καὶ κατὰ λόγον· ἐκάστου γὰρ ἡ ἐντελέχεια ἐν τῷ δυνάμει ὑπάρχοντι καὶ τῇ οἰκείᾳ ὕλῃ πέφυκεν ἐγγίνεσθαι. ὅτι μὲν οὖν ἐντελέχειά τις ἐστὶ καὶ λόγος τοῦ δύνανμιν ἔχοντος εἶναι τοιούτου, φανερὸν ἐκ τούτων.

Κεφάλαιο 3

[414a27] 1. Τῶν δὲ δυνάμεων τῆς ψυχῆς αἱ λεχθεῖσαι τοῖς μὲν ὑπάρχουσι πᾶσαι, καθάπερ εἶπομεν, τοῖς δὲ τινὲς αὐτῶν, ἐνίοις δὲ μία μόνη. δυνάμεις δ' εἶπομεν θρεπτικόν, αἰσθητικόν, ὀρεκτικόν, κινητικόν κατὰ τόπον, διανοητικόν.

2. ὑπάρχει δὲ τοῖς μὲν φυτοῖς τὸ θρεπτικόν μόνον, ἐτέροις δὲ [414b] τοῦτό τε καὶ τὸ αἰσθητικόν. εἰ δὲ τὸ αἰσθητικόν, καὶ τὸ ὀρεκτικόν· ὄρεξις μὲν γὰρ ἐπιθυμία καὶ θυμὸς καὶ βούλησις, τὰ δὲ ζῶα πάντ' ἔχουσι μίαν γε τῶν αἰσθήσεων, τὴν ἀφήν· ὧ δ' αἰσθησις ὑπάρχει, τούτῳ ἡδονή τε καὶ λύπη καὶ τὸ ἡδύ τε καὶ λυπηρόν, οἷς δὲ ταῦτα, καὶ ἐπιθυμία· τοῦ γὰρ ἡδέος ὄρεξις αὕτη.

3. ἔτι δὲ τῆς τροφῆς αἰσθησιν ἔχουσιν· ἡ γὰρ ἀφή τῆς τροφῆς αἰσθησις· ξηροῖς γὰρ καὶ ὑγροῖς καὶ θερμοῖς καὶ ψυχροῖς τρέφεται τὰ ζῶντα πάντα, τούτων δ' αἰσθησις ἀφή, τῶν δ' ἄλλων αἰσθητῶν κατὰ συμβεβηκός. οὐθὲν γὰρ εἰς τροφήν συμβάλλεται ψόφος οὐδὲ χρῶμα οὐδὲ ὁσμή, ὁ δὲ χυμὸς ἐν τι τῶν ἀπτῶν ἐστίν. πεῖνα δὲ καὶ δίψα ἐπιθυμία, καὶ ἡ μὲν πεῖνα ξηροῦ καὶ θερμοῦ, ἡ δὲ δίψα ὑγροῦ καὶ ψυχροῦ· ὁ δὲ χυμὸς οἷον ἡδυσμά τι τούτων ἐστίν. διασαφετέον δὲ περὶ αὐτῶν ὕστερον, νῦν δ' ἐπὶ τοσοῦτον εἰρήσθω, ὅτι τῶν ζώντων τοῖς ἔχουσιν ἀφήν καὶ ὄρεξις ὑπάρχει. περὶ δὲ φαντασίας ἄδηλον, ὕστερον δ' ἐπισκεπτέον.

4. ἐνίοις δὲ πρὸς τούτοις ὑπάρχει καὶ τὸ κατὰ τόπον κινητικόν, ἐτέροις δὲ καὶ τὸ διανοητικόν τε καὶ νοῦς, οἷον ἀνθρώποις καὶ εἴ τι τοιοῦτον ἕτερον ἔστιν ἢ τιμιώτερον.

5. δῆλον οὖν ὅτι τὸν αὐτὸν τρόπον εἷς ἂν εἴη λόγος ψυχῆς τε καὶ σχήματος· οὔτε γὰρ ἐκεῖ σχῆμα παρὰ τὸ τρίγωνον ἔστι καὶ τὰ ἐφεξῆς, οὔτ' ἐνταῦθα ψυχὴ παρὰ τὰς εἰρημένας. γένοιτο δ' ἂν καὶ ἐπὶ τῶν σχημάτων λόγος κοινός, ὃς ἐφαρμόσει μὲν πᾶσιν, ἴδιος δ' οὐδενὸς ἔσται σχήματος. ὁμοίως δὲ καὶ ἐπὶ ταῖς εἰρημέναις ψυχαῖς. διὸ γελοῖον ζητεῖν τὸν κοινὸν λόγον καὶ ἐπὶ τούτων καὶ ἐφ' ἐτέρων, ὃς οὐδενὸς ἔσται τῶν ὄντων ἴδιος λόγος, οὐδὲ κατὰ τὸ οἰκεῖον καὶ ἄτομον εἶδος, ἀφέντας τὸν τοιοῦτον.

6. (παραπλησίως δ' ἔχει τῷ περὶ τῶν σχημάτων καὶ τὰ κατὰ ψυχὴν· αἰεὶ γὰρ ἐν τῷ ἐφεξῆς ὑπάρχει δυνάμει τὸ πρότερον ἐπὶ τε τῶν σχημάτων καὶ ἐπὶ τῶν ἐμψύχων, οἷον ἐν τετραγώνῳ μὲν τρίγωνον, ἐν

αἰσθητικῷ δὲ τὸ θρεπτικόν.) ὥστε καθ' ἕκαστον ζητητέον, τίς ἐκάστου ψυχῇ, οἷον τίς φυτοῦ καὶ τίς ἀνθρώπου ἢ θηρίου.

7. διὰ τίνα δ' αἰτίαν τῷ [415a] ἐφεξῆς οὕτως ἔχουσι, σκεπτέον. ἄνευ μὲν γὰρ τοῦ θρεπτικοῦ τὸ αἰσθητικὸν οὐκ ἔστιν· τοῦ δ' αἰσθητικοῦ χωρίζεται τὸ θρεπτικὸν ἐν τοῖς φυτοῖς. πάλιν δ' ἄνευ μὲν τοῦ ἀπτικοῦ τῶν ἄλλων αἰσθήσεων οὐδεμία ὑπάρχει, ἀφ' ἧς δ' ἄνευ τῶν ἄλλων ὑπάρχει· πολλὰ γὰρ τῶν ζώων οὔτ' ὄψιν οὔτ' ἀκοὴν ἔχουσιν οὔτ' ὁσμῆς αἰσθήσιν. καὶ τῶν αἰσθητικῶν δὲ τὰ μὲν ἔχει τὸ κατὰ τόπον κινητικόν, τὰ δ' οὐκ ἔχει· τελευταῖον δὲ καὶ ἐλάχιστα λογισμὸν καὶ διάνοιαν· οἷς μὲν γὰρ ὑπάρχει λογισμὸς τῶν φθαρτῶν, τούτοις καὶ τὰ λοιπὰ πάντα, οἷς δ' ἐκείνων ἕκαστον, οὐ πᾶσι λογισμός, ἀλλὰ τοῖς μὲν οὐδὲ φαντασία, τὰ δὲ ταύτη μόνῃ ζῶσιν. περὶ δὲ τοῦ θεωρητικοῦ νοῦ ἕτερος λόγος, ὅτι μὲν οὖν ὁ περὶ τούτων ἐκάστου λόγος, οὗτος οἰκειότατος καὶ περὶ ψυχῆς, δῆλον.

Κεφάλαιο 4

[415a13] 1. Αναγκαῖον δὲ τὸν μέλλοντα περὶ τούτων σκέψιν ποιῆσθαι λαβεῖν ἕκαστον αὐτῶν τί ἐστίν, εἴθ' οὕτως περὶ τῶν ἐχομένων καὶ περὶ τῶν ἄλλων ἐπιζητεῖν. εἰ δὲ χρή λέγειν τί ἕκαστον αὐτῶν, οἷον τί τὸ νοητικὸν ἢ τὸ αἰσθητικὸν ἢ τὸ θρεπτικόν, πρότερον ἔτι λεκτέον τί τὸ νοεῖν καὶ τί τὸ αἰσθάνεσθαι· πρότεραι γάρ εἰσι τῶν δυνάμεων αἱ ἐνέργειαι καὶ αἱ πράξεις κατὰ τὸν λόγον. εἰ δ' οὕτως, τούτων δ' ἔτι πρότερα τὰ ἀντικείμενα δεῖ τεθεωρηκέναι, περὶ ἐκείνων πρῶτον ἂν δέοι διορίσαι διὰ τὴν αὐτὴν αἰτίαν, οἷον περὶ τροφῆς καὶ αἰσθητοῦ καὶ νοητοῦ.

2. ὥστε πρῶτον περὶ τροφῆς καὶ γεννήσεως λεκτέον· ἡ γὰρ θρεπτικὴ ψυχὴ καὶ τοῖς ἄλλοις ὑπάρχει, καὶ πρώτη καὶ κοινοτάτη δυνάμεις ἐστὶ ψυχῆς, καθ' ἣν ὑπάρχει τὸ ζῆν ἅπασιν. ἥς ἐστὶν ἔργα γεννῆσαι καὶ τροφῇ χρησθαι· φυσικώτατον γὰρ τῶν ἔργων τοῖς ζῶσιν, ὅσα τέλεια καὶ μὴ πηρώματα ἢ τὴν γένεσιν αὐτομάτην ἔχει, τὸ ποιῆσαι ἕτερον οἷον αὐτό, ζῶον μὲν ζῶον, φυτὸν δὲ φυτόν, ἵνα τοῦ ἀεὶ καὶ τοῦ θεοῦ μετέχωσιν ἢ [415b] δύνανται· πάντα γὰρ ἐκείνου ὀρέγεται, καὶ ἐκείνου ἕνεκα πράττει ὅσα πράττει κατὰ φύσιν (τὸ δ' οὗ ἕνεκα διττόν, τὸ μὲν οὗ, τὸ δὲ ᾧ). ἐπεὶ οὖν κοινωνεῖν ἀδυνατεῖ τοῦ ἀεὶ καὶ τοῦ θεοῦ τῇ συνεχείᾳ, διὰ τὸ μηδὲν ἐνδέχεσθαι τῶν φθαρτῶν ταῦτό καὶ ἐν ἀριθμῷ διαμένειν, ἢ δύναται μετέχειν ἕκαστον, κοινωνεῖ ταύτῃ, τὸ μὲν μᾶλλον τὸ δ' ἥττον, καὶ διαμένει οὐκ αὐτὸ ἀλλ' οἷον αὐτό, ἀριθμῷ μὲν οὐχ ἓν, εἶδει δ' ἓν.

3. ἔστι δὲ ἡ ψυχὴ τοῦ ζῶντος σώματος αἰτία καὶ ἀρχή. ταῦτα δὲ πολλαχῶς λέγεται, ὁμοίως δ' ἡ ψυχὴ κατὰ τοὺς διωρισμένους τρόπους τρεῖς αἰτία· καὶ γὰρ ὅθεν ἡ κίνησις καὶ οὗ ἕνεκα καὶ ὡς ἡ οὐσία τῶν ἐμψύχων σωμάτων ἡ ψυχὴ αἰτία.

4. ὅτι μὲν οὖν ὡς οὐσία, δῆλον· τὸ γὰρ αἷτιον τοῦ εἶναι πᾶσιν ἡ οὐσία, τὸ δὲ ζῆν τοῖς ζῶσι τὸ εἶναι ἐστίν, αἰτία δὲ καὶ ἀρχὴ τούτου ἡ ψυχὴ. ἔτι τοῦ δυνάμει ὄντος λόγος ἡ ἐντελέχεια.

5. φανερόν δ' ὡς καὶ οὗ ἕνεκεν ἡ ψυχὴ αἰτία· ὥσπερ γὰρ ὁ νοῦς ἕνεκά του ποιεῖ, τὸν αὐτὸν τρόπον καὶ ἡ φύσις, καὶ τοῦτ' ἐστὶν αὐτῆς τέλος. τοιοῦτον δ' ἐν τοῖς ζῴοις ἡ ψυχὴ κατὰ φύσιν· πάντα γὰρ τὰ φυσικὰ σώματα τῆς ψυχῆς ὄργανα, καθάπερ τὰ τῶν ζῴων, οὕτω καὶ τὰ τῶν φυτῶν, ὡς ἕνεκα τῆς ψυχῆς ὄντα· διττῶς δὲ τὸ οὗ ἕνεκα, τό τε

οὐ καὶ τὸ ὄ.

6. ἀλλὰ μὴν καὶ ὅθεν πρῶτον ἡ κατὰ τόπον κίνησις, ψυχὴ· οὐ πᾶσι δ' ὑπάρχει τοῖς ζῶσιν ἡ δύναμις αὕτη. ἔστι δὲ καὶ ἀλλοιώσις καὶ αὐξήσις κατὰ ψυχὴν· ἡ μὲν γὰρ αἴσθησις ἀλλοιώσις τις εἶναι δοκεῖ, αἰσθάνεται δ' οὐθὲν ὃ μὴ μετέχει ψυχῆς, ὁμοίως δὲ καὶ περὶ αὐξήσεως τε καὶ φθίσεως ἔχει· οὐδὲν γὰρ φθίνει οὐδ' αὖξεται φυσικῶς μὴ τρεφόμενον, τρέφεται δ' οὐθὲν ὃ μὴ κοινωνεῖ ζωῆς.

7. Ἐμπεδοκλῆς δ' οὐ καλῶς εἶρηκε τοῦτο προστιθείς, τὴν αὐξήσιν συμβαίνειν τοῖς φυτοῖς κάτω μὲν συρριζουμένοις διὰ τὸ τὴν γῆν οὕτω φέρεσθαι κατὰ φύσιν, ἄνω δὲ διὰ τὸ <τὸ> πῦρ ὡσαύτως. οὔτε γὰρ τὸ ἄνω καὶ κάτω καλῶς λαμβάνει (οὐ γὰρ ταῦτο πᾶσι τὸ ἄνω καὶ κάτω καὶ τῷ παντί, ἀλλ' ὥς ἡ κεφαλὴ τῶν ζώων, οὕτως αἱ ῥίζαι τῶν φυτῶν, εἰ χρή τὰ ὄργανα λέγειν ἕτερα καὶ ταῦτα τοῖς ἔργοις) πρὸς δὲ τούτοις τί τὸ συνέχον εἰς τάναντία φερόμενα τὸ πῦρ καὶ τὴν γῆν; διασπασθήσεται γάρ, εἰ μὴ τι ἔσται τὸ κωλύον· εἰ δ' ἔσται, τοῦτ' ἔστιν ἡ ψυχὴ, καὶ τὸ αἷτιον τοῦ αὐ- ξάνεσθαι καὶ τρέφεσθαι.

8. δοκεῖ δὲ τισιν ἡ τοῦ πυρὸς φύσις ἀπλῶς αἰτία τῆς τροφῆς καὶ τῆς αὐξήσεως εἶναι· καὶ γὰρ αὐτὸ φαίνεται μόνον τῶν σωμάτων [ἢ τῶν στοιχείων] τρεφόμενον καὶ αὐξόμενον, διὸ καὶ ἐν τοῖς φυτοῖς καὶ ἐν τοῖς ζώοις ὑπολάβοι τις ἂν τοῦτο εἶναι τὸ ἐργαζόμενον. τὸ δὲ συναίτιον μὲν πῶς ἔστιν, οὐ μὴν ἀπλῶς γε αἷτιον, ἀλλὰ μᾶλλον ἡ ψυχὴ· ἡ μὲν γὰρ τοῦ πυρὸς αὐξήσις εἰς ἄπειρον, ἕως ἂν ἧ τὸ καυστόν, τῶν δὲ φύσει συνισταμένων πάντων ἔστι πέρας καὶ λόγος μεγέθους τε καὶ αὐξήσεως· ταῦτα δὲ ψυχῆς, ἀλλ' οὐ πυρός, καὶ λόγου μᾶλλον ἢ ὕλης.

9. ἐπεὶ δ' ἡ αὐτὴ δύναμις τῆς ψυχῆς θρεπτικὴ καὶ γεννητικὴ, περὶ τροφῆς ἀναγκαῖον διωρίσθαι πρῶτον· ἀφορίζεται γὰρ πρὸς τὰς ἄλλας δυνάμεις τῷ ἔργῳ τούτῳ. δοκεῖ δ' εἶναι ἡ τροφή τὸ ἐναντίον τῷ ἐναντίῳ, οὐ πᾶν δὲ παντί, ἀλλ' ὅσα τῶν ἐναντίων μὴ μόνον γένεσιν ἐξ ἀλλήλων ἔχουσιν ἀλλὰ καὶ αὐξήσιν· γίνεται γὰρ πολλὰ ἐξ ἀλλήλων, ἀλλ' οὐ πάντα ποσά, οἷον ὑγιὲς ἐκ κάμνοντος. φαίνεται δ' οὐδ' ἐκεῖνα τὸν αὐτὸν τρόπον ἀλλήλοισι εἶναι τροφή, ἀλλὰ τὸ μὲν ὕδωρ τῷ πυρὶ τροφή, τὸ δὲ πῦρ οὐ τρέφει τὸ ὕδωρ. ἐν μὲν οὖν τοῖς ἀπλοῖς σώμασι ταῦτ' εἶναι δοκεῖ μάλιστα τὸ μὲν τροφή τὸ δὲ τρεφόμενον.

10. ἀπορίαν δ' ἔχει· φασὶ γὰρ οἱ μὲν τὸ ὅμοιον τῷ ὁμοίῳ τρέφεσθαι, καθάπερ καὶ αὐξάνεσθαι, τοῖς δ' ὥσπερ εἶπομεν

τοῦμπαλιν δοκεῖ, τὸ ἐναντίον τῷ ἐναντίῳ, ὡς ἀπαθοῦς ὄντος τοῦ ὁμοίου ὑπὸ τοῦ ὁμοίου, τὴν δὲ τροφήν δεῖν μεταβάλλειν καὶ πέττεσθαι· ἡ δὲ μεταβολὴ πᾶσιν εἰς τὸ ἀντικείμενον ἢ τὸ μεταξύ. ἔτι πάσχει τι ἢ τροφή ὑπὸ τοῦ τρεφομένου, ἀλλ' οὐ τοῦτο ὑπὸ τῆς [416b]

11. τροφῆς, ὥσπερ οὐδ' ὁ τέκτων ὑπὸ τῆς ὕλης, ἀλλ' ὑπ' ἐκείνου αὐτῇ· ὁ δὲ τέκτων μεταβάλλει μόνον εἰς ἐνέργειαν ἐξ ἀργίας. πότερον δ' ἐστὶν ἡ τροφή τὸ τελευταῖον προσγινόμενον ἢ τὸ πρῶτον, ἔχει διαφοράν. εἰ δ' ἄμφω, ἀλλ' ἡ μὲν ἄπεπτος ἡ δὲ πεπεμμένη, ἀμφοτέρως ἂν ἐνδέχοιτο τὴν τροφήν λέγειν· ἥ μὲν γὰρ ἄπεπτος, τὸ ἐναντίον τῷ ἐναντίῳ τρέφεται, ἥ δὲ πεπεμμένη, τὸ ὅμοιον τῷ ὁμοίῳ. ὥστε φανερόν ὅτι λέγουσί τινα τρόπον ἀμφοτέροι καὶ ὀρθῶς καὶ οὐκ ὀρθῶς.

12. ἐπεὶ δ' οὐθὲν τρέφεται μὴ μετέχον ζωῆς, τὸ ἔμψυχον ἂν εἴη σῶμα τὸ τρεφόμενον, ἢ ἔμψυχον, ὥστε καὶ ἡ τροφή πρὸς ἔμψυχόν ἐστι, καὶ οὐ κατὰ συμβεβηκός. ἔστι δ' ἕτερον τροφῆ καὶ αὐξητικῷ εἶναι· ἥ μὲν γὰρ ποσόν τι τὸ ἔμψυχον, αὐξητικόν, ἥ δὲ τόδε τι καὶ οὐσία, τροφή (σώζει γὰρ τὴν οὐσίαν, καὶ μέχρι τούτου ἔστιν ἕως ἂν τρέφεται), καὶ γενέσεως ποιητικόν, οὐ τοῦ τρεφομένου, ἀλλ' οἷον τὸ τρεφόμενον· ἥδη γὰρ ἔστιν αὐτοῦ ἡ οὐσία, γεννᾷ δ' οὐθὲν αὐτὸ ἐαυτό, ἀλλὰ σώζει. ὥσθ' ἡ μὲν τοιαύτη τῆς ψυχῆς ἀρχὴ δύναμις ἐστὶν οἷα σώζειν τὸ ἔχον αὐτὴν ἢ τοιοῦτον, ἡ δὲ τροφή παρασκευάζει ἐνεργεῖν· διὸ στερηθὲν τροφῆς οὐ δύναται εἶναι.

13. [ἐπεὶ δ' ἔστι τρία, τὸ τρεφόμενον καὶ ὃ τρέφεται καὶ τὸ τρέφον, τὸ μὲν τρέφον ἐστὶν ἡ πρώτη ψυχὴ, τὸ δὲ τρεφόμενον τὸ ἔχον ταύτην σῶμα, ὃ δὲ τρέφεται, ἡ τροφή.] ἐπεὶ δὲ ἀπὸ τοῦ τέλους ἅπαντα προσαγορεύειν δίκαιον, τέλος δὲ τὸ γεννῆσαι οἷον αὐτό, εἴη ἂν ἡ πρώτη ψυχὴ γεννητικὴ οἷον αὐτό. ἔστι δὲ ὃ [416b26] τρέφει διττόν, ὥσπερ καὶ ὃ κυβερνᾷ καὶ ἡ χεὶρ καὶ τὸ πηδά- λιον, τὸ μὲν κινεῖν καὶ κινούμενον, τὸ δὲ κινούμενον μόνον. πᾶσαν δ' ἀναγκαῖον τροφήν δύνασθαι πέττεσθαι, ἐργάζεται δὲ τὴν πέσιν τὸ θερμόν· διὸ πᾶν ἔμψυχον ἔχει θερμότητα. τύπῳ μὲν οὖν ἡ τροφή τί ἐστὶν εἴρηται· διασαφητέον δ' ἐστὶν ὕστερον περὶ αὐτῆς ἐν τοῖς οἰκείοις λόγοις.

Κεφάλαιο 5

[416b32] 1. Διωρισμένων δὲ τούτων λέγωμεν κοινῇ περὶ πάσης αἰσθήσεως. ἡ δ' αἴσθησις ἐν τῷ κινεῖσθαι τε καὶ πάσχειν συμβαίνει, καθάπερ εἴρηται· δοκεῖ γὰρ ἀλλοιῶσιν τις εἶναι. φασὶ δέ τινες καὶ τὸ ὅμοιον ὑπὸ τοῦ ὁμοίου πάσχειν. [417a] τοῦτο δὲ πῶς δυνατόν ἢ ἀδύνατον, εἰρήκαμεν ἐν τοῖς καθόλου λόγοις περὶ τοῦ ποιεῖν καὶ πάσχειν.

2. ἔχει δ' ἀπορίαν διὰ τί καὶ τῶν αἰσθήσεων αὐτῶν οὐ γίνεται αἴσθησις, καὶ διὰ τί ἄνευ τῶν ἔξω οὐ ποιοῦσιν αἴσθησιν, ἐνόντος πυρὸς καὶ γῆς καὶ τῶν ἄλλων στοιχείων, ὧν ἐστὶν ἡ αἴσθησις καθ' αὐτὰ ἢ τὰ συμβεβηκότα τούτοις. δῆλον οὖν ὅτι τὸ αἰσθητικὸν οὐκ ἔστιν ἐνεργεία, ἀλλὰ δυνάμει μόνον, διὸ οὐκ αἰσθάνεται, καθάπερ τὸ καυστὸν οὐ καίεται αὐτὸ καθ' αὐτὸ ἄνευ τοῦ καυστικοῦ· ἔκαιε γὰρ ἂν ἑαυτό, καὶ οὐθὲν ἐδεῖτο τοῦ ἐντελεχείᾳ πυρὸς ὄντος. ἐπειδὴ δὲ τὸ αἰσθάνεσθαι λέγομεν διχῶς (τό τε γὰρ δυνάμει ἀκοῦον καὶ ὁρῶν ἀκούειν καὶ ὁρᾶν λέγομεν, κἂν τύχη καθεῦδον, καὶ τὸ ἤδη ἐνεργοῦν), διχῶς ἂν λέγοιτο καὶ ἡ αἴσθησις, ἡ μὲν ὡς δυνάμει, ἡ δὲ ὡς ἐνεργεία. ὁμοίως δὲ καὶ τὸ αἰσθητόν, τό τε δυνάμει ὄν καὶ τὸ ἐνεργεία.

3. πρῶτον μὲν οὖν ὡς τοῦ αὐτοῦ ὄντος τοῦ πάσχειν καὶ τοῦ κινεῖσθαι καὶ τοῦ ἐνεργεῖν λέγωμεν· καὶ γὰρ ἔστιν ἡ κίνησις ἐνεργεία τις, ἀτελὴς μέντοι, καθάπερ ἐν ἐτέροις εἴρηται. πάντα δὲ πάσχει καὶ κινεῖται ὑπὸ τοῦ ποιητικοῦ καὶ ἐνεργείᾳ ὄντος. διὸ ἔστι μὲν ὡς ὑπὸ τοῦ ὁμοίου πάσχει, ἔστι δὲ ὡς ὑπὸ τοῦ ἀνομοίου, καθάπερ εἵπομεν· πάσχει μὲν γὰρ τὸ ἀνόμοιον, πεπονθὸς δ' ὁμοίον ἐστίν.

4. διαιρετέον δὲ καὶ περὶ δυνάμεως καὶ ἐντελεχείας· νῦν γὰρ ἀπλῶς ἐλέγομεν περὶ αὐτῶν. ἔστι μὲν γὰρ οὕτως ἐπιστήμὸν τι ὡς ἂν εἵπομεν ἄνθρωπον ἐπιστήμονα ὅτι ὁ ἄνθρωπος τῶν ἐπιστημόνων καὶ ἐχόντων ἐπιστήμην· ἔστι δ' ὡς ἤδη λέγομεν ἐπιστήμονα τὸν ἔχοντα τὴν γραμματικὴν· ἑκάτερος δὲ τούτων οὐ τὸν αὐτὸν τρόπον δυνατός ἐστιν, ἀλλ' ὁ μὲν ὅτι τὸ γένος τοιοῦτον καὶ ἡ ὕλη, ὁ δ' ὅτι βουλευθεὶς δυνατός θεωρεῖν, ἂν μὴ τι κωλύση τῶν ἔξωθεν· ὁ δ' ἤδη θεωρῶν, ἐντελεχείᾳ ὦν καὶ κυρίως ἐπιστάμενος τόδε τὸ Α. ἀμφοτέροι μὲν οὖν οἱ πρῶτοι, κατὰ δύνάμιν ἐπιστήμονες <ὄντες, ἐνεργεία γίνονται ἐπιστήμονες,> ἀλλ' ὁ μὲν διὰ μαθήσεως ἀλλοιωθεὶς καὶ πολλάκις ἐξ ἐναντίας μεταβαλὼν ἔξεως, ὁ δ' ἐκ τοῦ ἔχειν τὴν ἀριθμητικὴν ἢ τὴν

γραμματικήν, μὴ ἐνεργεῖν δέ, εἰς τὸ ἐνεργεῖν, ἄλλον τρόπον.

5. οὐκ ἔστι δ' ἀπλοῦν οὐδὲ τὸ πάσχειν, ἀλλὰ τὸ μὲν φθορά τις ὑπὸ τοῦ ἐναντίου, τὸ δὲ σωτηρία μᾶλλον ὑπὸ τοῦ ἐντελεχείᾳ ὄντος τοῦ δυνάμει ὄντος καὶ ὁμοίου οὕτως ὡς δυνάμεις ἔχει πρὸς ἐντελέχειαν· θεωροῦν γὰρ γίνεται τὸ ἔχον τὴν ἐπιστήμην, ὅπερ ἢ οὐκ ἔστιν ἀλλοιοῦσθαι (εἰς αὐτὸ γὰρ ἡ ἐπίδοσις καὶ εἰς ἐντελέχειαν) ἢ ἕτερον γένος ἀλλοιώσεως. διὸ οὐ καλῶς ἔχει λέγειν τὸ φρονοῦν, ὅταν φρονῇ, ἀλλοιοῦσθαι, ὥσπερ οὐδὲ τὸν οἰκοδόμον ὅταν οἰκοδομῇ. τὸ μὲν οὖν εἰς ἐντελέχειαν ἄγειν ἐκ δυνάμει ὄντος [κατὰ] τὸ νοοῦν καὶ φρονοῦν οὐ διδασκαλίαν ἀλλ' ἐτέραν ἐπωνυμίαν ἔχειν δίκαιον· τὸ δ' ἐκ δυνάμει ὄντος μανθάνον καὶ λαμβάνον ἐπιστήμην ὑπὸ τοῦ ἐντελεχείᾳ ὄντος καὶ διδασκαλικοῦ ἤτοι οὐδὲ πάσχειν φατέον, [ὥσπερ εἴρηται,] ἢ δύο τρόπους εἶναι ἀλλοιώσεως, τὴν τε ἐπὶ τὰς στερητικὰς διαθέσεις μεταβολὴν καὶ τὴν ἐπὶ τὰς ἑξῆς καὶ τὴν φύσιν.

6. τοῦ δ' αἰσθητικοῦ ἡ μὲν πρώτη μεταβολὴ γίνεται ὑπὸ τοῦ γεννῶντος, ὅταν δὲ γεννηθῇ, ἔχει ἤδη, ὥσπερ ἐπιστήμην, καὶ τὸ αἰσθάνεσθαι. τὸ κατ' ἐνέργειαν δὲ ὁμοίως λέγεται τῷ θεωρεῖν· διαφέρει δέ, ὅτι τοῦ μὲν τὰ ποιητικὰ τῆς ἐνεργείας ἑξῶθεν, τὸ ὁρατὸν καὶ τὸ ἀκουστόν, ὁμοίως δὲ καὶ τὰ λοιπὰ τῶν αἰσθητῶν. αἴτιον δ' ὅτι τῶν καθ' ἕκαστον ἢ κατ' ἐνέργειαν αἰσθησις, ἢ δ' ἐπιστήμη τῶν καθόλου· ταῦτα δ' ἐν αὐτῇ πῶς ἐστὶ τῇ ψυχῇ.

διὸ νοῆσαι μὲν ἐπ' αὐτῷ, ὁπότεν βούληται, αἰσθάνεσθαι δ' οὐκ ἐπ' αὐτῷ· ἀναγκαῖον γὰρ ὑπάρχειν τὸ αἰσθητόν. ὁμοίως δὲ τοῦτο ἔχει κἀν ταῖς ἐπιστήμαις ταῖς τῶν αἰσθητῶν, καὶ διὰ τὴν αὐτὴν αἰτίαν, ὅτι τὰ αἰσθητὰ τῶν καθ' ἕκαστα καὶ τῶν ἑξῶθεν.

7. ἀλλὰ περὶ μὲν τούτων διασαφῆσαι καιρὸς γένοιτ' ἂν καὶ εἰσαυθις· νῦν δὲ διωρίσθω τοσοῦτον, ὅτι οὐχ ἀπλοῦ ὄντος τοῦ δυνάμει λεγομένου, ἀλλὰ τοῦ μὲν ὥσπερ ἂν εἴποιμεν τὸν παῖδα δύνασθαι στρατηγεῖν, τοῦ δὲ ὡς τὸν ἐν ἡλικίᾳ ὄντα, οὕτως ἔχει [[418a] τὸ αἰσθητικόν. ἐπεὶ δ' ἀνώνυμος αὐτῶν ἡ διαφορά, διώρισται δὲ περὶ αὐτῶν ὅτι ἕτερα καὶ πῶς ἕτερα, χρῆσθαι ἀναγκαῖον τῷ πάσχειν καὶ ἀλλοιοῦσθαι ὡς κυρίοις ὀνόμασιν. τὸ δ' αἰσθητικὸν δυνάμει ἐστὶν οἷον τὸ αἰσθητὸν ἤδη ἐντελεχείᾳ, καθάπερ εἴρηται. πάσχει μὲν οὖν οὐχ ὅμοιον ὄν, πεπονθὸς δ' ὁμοίωται καὶ ἔστιν οἷον ἐκεῖνο.

Κεφάλαιο 6

[418a7] 1. Λεκτέον δὲ καθ' ἐκάστην αἴσθησιν περὶ τῶν αἰσθητῶν πρῶτον. λέγεται δὲ τὸ αἰσθητὸν τριχῶς, ὧν δύο μὲν καθ' αὐτὰ φαμεν αἰσθάνεσθαι, τὸ δὲ ἐν κατὰ συμβεβηκός. τῶν δὲ δυοῖν τὸ μὲν ἴδιόν ἐστιν ἐκάστης αἰσθήσεως, τὸ δὲ κοινὸν πασῶν.

2. λέγω δ' ἴδιον μὲν ὃ μὴ ἐνδέχεται ἑτέρα αἰσθήσει αἰσθάνεσθαι, καὶ περὶ ὃ μὴ ἐνδέχεται ἀπατηθῆναι, οἷον ὄψις χρώματος καὶ ἀκοὴ ψόφου καὶ γεῦσις χυμοῦ, ἢ δ' ἀφῆ πλείους [μὲν] ἔχει διαφοράς, ἀλλ' ἐκάστη γε κρίνει περὶ τούτων, καὶ οὐκ ἀπατᾶται ὅτι χρῶμα οὐδ' ὅτι ψόφος, ἀλλὰ τί τὸ κεχρωσμένον ἢ ποῦ, ἢ τί τὸ ψοφοῦν ἢ ποῦ. τὰ μὲν οὖν τοιαῦτα λέγεται ἴδια ἐκάστης,

3. κοινὰ δὲ κίνησις, ἡρεμία, ἀριθμός, σχῆμα, μέγεθος· τὰ γὰρ τοιαῦτα οὐδεμιᾶς ἐστὶν ἴδια, ἀλλὰ κοινὰ πάσαις· καὶ γὰρ ἀφῆ κίνησις τίς ἐστιν αἰσθητὴ καὶ ὄψει.

4. κατὰ συμβεβηκὸς δὲ λέγεται αἰσθητόν, οἷον εἰ τὸ λευκὸν εἶη Διάρους υἱός· κατὰ συμβεβηκὸς γὰρ τούτου αἰσθάνεται, ὅτι τῷ λευκῷ συμβέβηκε τοῦτο, οὗ αἰσθάνεται· διὸ καὶ οὐδὲν πάσχει ἢ τοιοῦτον ὑπὸ τοῦ αἰσθητοῦ. τῶν δὲ καθ' αὐτὰ αἰσθητῶν τὰ ἴδια κυρίως ἐστὶν αἰσθητά, καὶ πρὸς ἃ ἡ οὐσία πέφυκεν ἐκάστης αἰσθήσεως.

Κεφάλαιο 7

[418a26] 1. Οὐ μὲν οὖν ἐστὶν ἡ ὄψις, τοῦτ' ἐστὶν ὁρατόν, ὁρατὸν δ' ἐστὶ χρῶμά τε καὶ ὁ λόγῳ μὲν ἐστὶν εἰπεῖν, ἀνώνυμον δὲ τυγχάνει ὄν· δῆλον δὲ ἔσται ὁ λέγομεν προελθοῦσι. τὸ γὰρ ὁρατόν ἐστὶ χρῶμα, τοῦτο δ' ἐστὶ τὸ ἐπὶ τοῦ καθ' αὐτὸ ὁρατοῦ· καθ' αὐτὸ δὲ οὐ τῷ λόγῳ, ἀλλ' ὅτι ἐν ἑαυτῷ ἔχει τὸ αἴτιον τοῦ εἶναι ὁρατόν. πᾶν δὲ χρῶμα [418b] κινητικόν ἐστὶ τοῦ κατ' ἐνέργειαν διαφανοῦς, καὶ τοῦτ' ἐστὶν αὐτοῦ ἡ φύσις· διόπερ οὐχ ὁρατὸν ἄνευ φωτός, ἀλλὰ πᾶν τὸ ἐκάστου χρῶμα ἐν φωτὶ ὁράται. διὸ περὶ φωτὸς πρῶτον λεκτέον τί ἐστὶν.

2. ἔστι δὴ τι διαφανές. διαφανές δὲ λέγω ὃ ἔστι μὲν ὁρατόν, οὐ καθ' αὐτὸ δὲ ὁρατὸν ὡς ἀπλῶς εἰπεῖν, ἀλλὰ δι' ἀλλότριον χρῶμα. τοιοῦτον δὲ ἐστὶν ἀήρ καὶ ὕδωρ καὶ πολλὰ τῶν στερεῶν· οὐ γὰρ ἡ ὕδωρ οὐδ' ἡ ἀήρ διαφανές, ἀλλ' ὅτι ἔστι τις φύσις ἐνυπάρχουσα ἡ αὐτὴ ἐν τούτοις ἀμφοτέροις καὶ ἐν τῷ αἰδίῳ τῷ ἄνω σώματι. φῶς δὲ ἐστὶν ἡ τούτου ἐνέργεια, τοῦ διαφανοῦς ἢ διαφανές. δυνάμει δέ, ἐν ᾧ τοῦτ' ἐστί, καὶ τὸ σκότος. τὸ δὲ φῶς οἷον χρῶμά ἐστὶ τοῦ διαφανοῦς, ὅταν ἡ ἐντελεχεία διαφανές ὑπὸ πυρὸς ἢ τοιούτου οἷον τὸ ἄνω σῶμα· καὶ γὰρ τούτῳ τι ὑπάρχει ἐν καὶ ταυτόν. τί μὲν οὖν τὸ διαφανές καὶ τί τὸ φῶς, εἴρηται, ὅτι οὔτε πῦρ οὔθ' ὅλως σῶμα οὐδ' ἀπορροή σώματος οὐδενός (εἴη γὰρ ἂν σῶμά τι καὶ οὕτως), ἀλλὰ πυρὸς ἢ τοιούτου τινὸς παρουσία ἐν τῷ διαφανεῖ· οὔτε γὰρ δύο σώματα ἅμα δυνατόν ἐν τῷ αὐτῷ εἶναι,

3. δοκεῖ τε τὸ φῶς ἐναντίον εἶναι τῷ σκότει· ἔστι δὲ τὸ σκότος στερήσις τῆς τοιαύτης ἑξέως ἐκ διαφανοῦς, ὥστε δῆλον ὅτι καὶ ἡ τούτου παρουσία τὸ φῶς ἐστὶν. καὶ οὐκ ὀρθῶς Ἐμπεδοκλῆς, οὐδ' εἴ τις ἄλλος οὕτως εἴρηκεν, ὡς φερομένου τοῦ φωτὸς καὶ γιγνομένου ποτὲ μεταξὺ τῆς γῆς καὶ τοῦ περιέχοντος, ἡμᾶς δὲ λανθάνοντος· τοῦτο γὰρ ἐστὶ καὶ παρὰ τὴν τοῦ λόγου ἐνάργειαν καὶ παρὰ τὰ φαινόμενα· ἐν μικρῷ μὲν γὰρ διαστήματι λάθοι ἂν, ἀπ' ἀνατολῆς δ' ἐπὶ δυσμᾶς τὸ λανθάνειν μέγα λίαν τὸ αἶτημα. [418b26]

4. ἔστι δὲ χρώματος μὲν δεκτικὸν τὸ ἄχρουν, ψόφου δὲ τὸ ἄψοφον. ἄχρουν δ' ἐστὶ τὸ διαφανές καὶ τὸ ἀόρατον ἢ τὸ μόλις ὁρώμενον, οἷον δοκεῖ τὸ σκοτεινόν. τοιοῦτον δὲ τὸ διαφανές μὲν, ἀλλ' οὐχ ὅταν ἡ ἐντελεχεία διαφανές, ἀλλ' ὅταν δυνάμει· ἡ γὰρ αὐτὴ φύσις ὅτε μὲν σκότος ὅτε δὲ φῶς [419a]

5. νῦν δ' ἐπὶ τοσοῦτον φανερόν ἐστιν, ὅτι τὸ μὲν ἐν φωτὶ ὁρώμενον χρῶμα (διὸ καὶ οὐχ ὁρᾶται ἄνευ φωτός· τοῦτο γὰρ ἦν αὐτῷ τὸ χρώματι εἶναι, τὸ κινητικῷ εἶναι τοῦ κατ' ἐνέργειαν διαφανοῦς), ἡ δ' ἐντελέχεια τοῦ διαφανοῦς φῶς ἐστιν. σημεῖον δὲ τούτου φανερόν· ἐὰν γὰρ τις θῇ τὸ ἔχον χρῶμα ἐπ' αὐτὴν τὴν ὄψιν, οὐκ ὄψεται· ἀλλὰ τὸ μὲν χρῶμα κινεῖ τὸ διαφανές, οἷον τὸν ἀέρα, ὑπὸ τούτου δὲ συνεχοῦς ὄντος κινεῖται τὸ αἰσθητήριον.

6. οὐ γὰρ καλῶς τοῦτο λέγει Δημόκριτος, οἰόμενος, εἰ γένοιτο κενὸν τὸ μεταξύ, ὁρᾶσθαι ἂν ἀκριβῶς καὶ εἰ μύρμηξ ἐν τῷ οὐρανῷ εἴη· τοῦτο γὰρ ἀδύνατόν ἐστιν. πάσχοντος γάρ τι τοῦ αἰσθητικοῦ γίνεται τὸ ὁρᾶν· ὑπ' αὐτοῦ μὲν οὖν τοῦ ὁρωμένου χρώματος ἀδύνατον· λείπεται δὴ ὑπὸ τοῦ μεταξύ, ὥστ' ἀναγκαῖόν τι εἶναι μεταξύ· κενοῦ δὲ γενομένου οὐχ ὅτι ἀκριβῶς, ἀλλ' ὅλως οὐθὲν ὀφθήσεται.

7. δι' ἣν μὲν οὖν αἰτίαν τὸ χρῶμα ἀναγκαῖον ἐν φωτὶ ὁρᾶσθαι, εἴρηται. πῦρ δὲ ἐν ἀμφοῖν ὁρᾶται, καὶ ἐν σκότει καὶ ἐν φωτί, καὶ τοῦτο ἐξ ἀνάγκης· τὸ γὰρ διαφανὲς ὑπὸ τούτου γίνεται διαφανές.

8. ὁ δ' αὐτὸς λόγος καὶ περὶ ψόφου καὶ ὁσμῆς ἐστιν· οὐθὲν γὰρ αὐτῶν ἀπτόμενον τοῦ αἰσθητηρίου ποιεῖ τὴν αἴσθησιν, ἀλλ' ὑπὸ μὲν ὁσμῆς καὶ ψόφου τὸ μεταξύ κινεῖται, ὑπὸ δὲ τούτου τῶν αἰσθητηρίων ἐκάτερον· ὅταν δ' ἐπ' αὐτό τις ἐπιθῇ τὸ αἰσθητήριον τὸ ψοφοῦν ἢ τὸ ὄζον, οὐδεμίαν αἴσθησιν ποιήσει. περὶ δὲ ἀφῆς καὶ γεύσεως ἔχει μὲν ὁμοίως, οὐ φαίνεται δέ· δι' ἣν δ' αἰτίαν, ὕστερον ἔσται δῆλον.

9. τὸ δὲ μεταξύ ψόφων μὲν ἀήρ, ὁσμῆς δ' ἀνώνυμον· κοινὸν γάρ τι πάθος ἐπ' ἀέρος καὶ ὕδατος ἐστιν, ὥσπερ τὸ διαφανὲς χρώματι, οὕτω τῷ ἔχοντι ὁσμὴν ὁ ἐν ἀμφοτέροις ὑπάρχει τούτοις· φαίνεται γὰρ καὶ τὰ ἔνυδρα τῶν ζώων [419b] ἔχειν αἴσθησιν ὁσμῆς. ἀλλ' ὁ μὲν ἄνθρωπος, καὶ τῶν πεζῶν ὅσα ἀναπνεῖ, ἀδυνατεῖ ὁσμεῖσθαι μὴ ἀναπνέοντα. ἡ δ' αἰτία καὶ περὶ τούτων ὕστερον λεχθήσεται.

Κεφάλαιο 8

[419b4] 1. Νῦν δὲ πρῶτον περὶ ψόφου καὶ ἀκοῆς διορίσωμεν. ἔστι δὲ διττὸς ὁ ψόφος· ὁ μὲν γὰρ ἐνέργειά τις, ὁ δὲ δύναμις· τὰ μὲν γὰρ οὐ φάμεν ἔχειν ψόφον, οἷον σπόγγον, ἔρια, τὰ δ' ἔχειν, οἷον χαλκὸν καὶ ὅσα στερεὰ καὶ λεῖα, ὅτι δύναται ψοφῆσαι (τοῦτο δ' ἐστὶν αὐτοῦ μεταξὺ καὶ τῆς ἀκοῆς ἐμποιῆσαι ψόφον ἐνέργεια).

2. γίνεται δ' ὁ κατ' ἐνέργειαν ψόφος αἰεὶ τινος πρὸς τι καὶ ἔν τινι· πληγὴ γὰρ ἐστὶν ἡ ποιούσα. διὸ καὶ ἀδύνατον ἐνὸς ὄντος γενέσθαι ψόφον· ἕτερον γὰρ τὸ τύπτον καὶ τὸ τυπτόμενον· ὥστε τὸ ψοφοῦν πρὸς τι ψοφεῖ· πληγὴ δ' οὐ γίνεται ἄνευ φορᾶς. ὥσπερ δ' εἵπομεν, οὐ τῶν τυχόντων πληγὴ ὁ ψόφος· οὐθένα γὰρ ποιεῖ ψόφον ἔρια ἢ πληγῇ, ἀλλὰ χαλκὸς καὶ ὅσα λεῖα καὶ κοῖλα· ὁ μὲν χαλκὸς ὅτι λεῖος, τὰ δὲ κοῖλα τῇ ἀνακλάσει πολλὰς ποιεῖ πληγὰς μετὰ τὴν πρώτην, ἀδυνατοῦντος ἐξελθεῖν τοῦ κινηθέντος.

3. ἔτι ἀκούεται ἐν ἀέρι, κὰν ὕδατι, ἀλλ' ἦττον, οὐκ ἔστι δὲ ψόφου κύριος ὁ ἀήρ οὐδὲ τὸ ὕδωρ, ἀλλὰ δεῖ στερεῶν πληγὴν γενέσθαι πρὸς ἄλληλα καὶ πρὸς τὸν ἀέρα. τοῦτο δὲ γίνεται ὅταν ὑπομένη πληγεῖς ὁ ἀήρ καὶ μὴ διαχυθῇ. διὸ ἐὰν ταχέως καὶ σφοδρῶς πληγῇ, ψοφεῖ· δεῖ γὰρ φθάσαι τὴν κίνησιν τοῦ ῥαπίζοντος τὴν θρύψιν τοῦ ἀέρος, ὥσπερ ἂν εἰ σωρὸν ἢ ὀρμαθὸν ψάμμου τύπτοι τις φερόμενον ταχύ.

4. ἡχὼ δὲ γίνεται ὅταν, ἀέρος ἐνὸς γενομένου διὰ τὸ ἀγγεῖον τὸ διορίσαν καὶ κωλύσαν θρυφθῆναι, πάλιν ὁ ἀήρ ἀπωσθῇ, ὥσπερ σφαῖρα. ἔοικε δ' αἰεὶ γίνεσθαι ἡχῶ, ἀλλ' οὐ σαφές, ἐπεὶ συμβαίνει γε ἐπὶ τοῦ ψόφου καθάπερ καὶ ἐπὶ τοῦ φωτός· καὶ γὰρ τὸ φῶς αἰεὶ ἀνακλᾶται (οὐδὲ γὰρ ἂν ἐγένετο πάντῃ φῶς, ἀλλὰ σκότος ἔξω τοῦ ἡλιουμένου), ἀλλ' οὐχ οὕτως ἀνακλᾶται ὥσπερ ἀφ' ὕδατος ἢ χαλκοῦ ἢ καὶ τινος ἄλλου τῶν λείων, ὥστε σκιὰν ποιεῖν, ἢ τὸ φῶς ὀρίζομεν.

5. τὸ δὲ κενὸν ὀρθῶς λέγεται κύριον τοῦ ἀκούειν. δοκεῖ γὰρ εἶναι κενὸν ὁ ἀήρ, οὗτος δ' ἐστὶν ὁ ποιὼν ἀκούειν, ὅταν κινηθῇ συνεχῆς καὶ εἷς. ἀλλὰ διὰ τὸ ψαθυρὸς [420a] εἶναι οὐ γεγωνεῖ, ἂν μὴ λείον ἢ τὸ πληγέν. τότε δὲ εἷς γίνεται ἅμα διὰ τὸ ἐπίπεδον· ἔν γὰρ τὸ τοῦ λείου ἐπίπεδον.

6. ψοφητικὸν μὲν οὖν τὸ κινητικὸν ἐνὸς ἀέρος συνεχεία μέχρις ἀκοῆς. ἀκοῇ δὲ συμφυῆς <ἐστιν> ἀήρ· διὰ δὲ τὸ ἐν ἀέρι εἶναι, κινουμένου τοῦ ἔξω ὁ εἶσω κινεῖται. διόπερ οὐ πάντῃ τὸ ζῶον

ἀκούει, οὐδὲ πάντῃ διέρχεται ὁ ἀήρ· οὐ γὰρ πάντῃ ἔχει ἀέρα τὸ κινησόμενον μέρος καὶ ἔμψυχον. αὐτὸς μὲν δὴ ἄσφοον ὁ ἀήρ διὰ τὸ εὐθρυπτον· ὅταν δὲ κωλυθῇ θρύπτεσθαι, ἢ τούτου κίνησις ψόφος. ὁ δ' ἐν τοῖς ὥσιν ἐγκατακοδόμεται πρὸς τὸ ἀκίνητος εἶναι, ὅπως ἀκριβῶς αἰσθάνηται πάσας τὰς διαφορὰς τῆς κινήσεως. διὰ ταῦτα δὲ καὶ ἐν ὕδατι ἀκούομεν, ὅτι οὐκ εἰσέρχεται πρὸς αὐτὸν τὸν συμφυῆ ἀέρα· ἀλλ' οὐδ' εἰς τὸ οὖς, διὰ τὰς ἑλικας. ὅταν δὲ τοῦτο συμβῇ, οὐκ ἀκούει· οὐδ' ἂν ἡ μῆνιγξ κάμη, ὥσπερ τὸ ἐπὶ τῇ κόρῃ δέρμα [ὅταν κάμη]. ἀλλ' οὐ σημεῖον τοῦ ἀκούειν ἢ μὴ τὸ ἡγεῖν τὸ οὖς ὥσπερ τὸ κέρας· ἀεὶ γὰρ οἰκείαν τινὰ κίνησιν ὁ ἀήρ κινεῖται ὁ ἐν τοῖς ὥσιν, ἀλλ' ὁ ψόφος ἀλλότριος καὶ οὐκ ἴδιος. καὶ διὰ τοῦτό φασιν ἀκούειν τῷ κενῷ καὶ ἡχοῦντι, ὅτι ἀκούομεν τῷ ἔχοντι ὠρισμένον τὸν ἀέρα. [420a.19]

7. πότερον δὲ ψοφεῖ τὸ τυπτόμενον ἢ τὸ τύπτον; ἢ καὶ ἄμφω, τρόπον δ' ἕτερον; ἔστι γὰρ ὁ ψόφος κίνησις τοῦ δυναμένου κινεῖσθαι τὸν τρόπον τοῦτον ὥνπερ τὰ ἀφαλλόμενα ἀπὸ τῶν λειῶν, ὅταν τις κρούσῃ. οὐ δὴ πᾶν, ὥσπερ εἴρηται, ψοφεῖ τυπτόμενον καὶ τύπτον, οἷον ἐὰν πατάξῃ βελόνη βελόνην, ἀλλὰ δεῖ τὸ τυπτόμενον ὁμαλὸν εἶναι, ὥστε τὸν ἀέρα ἀθροῦν ἀφάλλεσθαι καὶ σείεσθαι.

8. αἱ δὲ διαφοραὶ τῶν ψοφούντων ἐν τῷ κατ' ἐνέργειαν ψόφῳ δηλοῦνται· ὥσπερ γὰρ ἄνευ φωτὸς οὐχ ὁράται τὰ χρώματα, οὕτως οὐδ' ἄνευ ψόφου τὸ ὀξύ καὶ τὸ βαρὺ. ταῦτα δὲ λέγεται κατὰ μεταφορὰν ἀπὸ τῶν ἀπτῶν· τὸ μὲν γὰρ ὀξύ κινεῖ τὴν αἴσθησιν ἐν ὀλίγῳ χρόνῳ ἐπὶ πολὺ, τὸ δὲ βαρὺ ἐν πολλῷ ἐπ' ὀλίγον. οὐ δὴ ταχὺ τὸ ὀξύ, τὸ δὲ βαρὺ βραδύ, ἀλλὰ γίνεται τοῦ μὲν διὰ τὸ τάχος ἢ κίνησις τοιαύτη, τοῦ δὲ διὰ βραδυτήτα, [420b] καὶ ἔοικεν ἀνάλογον ἔχειν τῷ περὶ τὴν ἀφὴν ὀξεῖ καὶ ἀμβλεῖ· τὸ μὲν γὰρ ὀξύ οἷον κεντεῖ, τὸ δ' ἀμβλὺ οἷον ὠθεῖ, διὰ τὸ κινεῖν τὸ μὲν ἐν ὀλίγῳ τὸ δὲ ἐν πολλῷ, ὥστε συμβαίνει τὸ μὲν ταχὺ τὸ δὲ βραδύ εἶναι.

9. περὶ μὲν οὖν ψόφου ταύτη διωρίσθω. ἢ δὲ φωνὴ ψόφος τίς ἐστίν ἐμψύχου· τῶν γὰρ ἀψύχων οὐθὲν φωνεῖ, ἀλλὰ καθ' ὁμοιότητα λέγεται φωνεῖν, οἷον αὐλὸς καὶ λύρα καὶ ὅσα ἄλλα τῶν ἀψύχων ἀπότασιν ἔχει καὶ μέλος καὶ διάλεκτον. ἔοικε γάρ, ὅτι καὶ ἡ φωνὴ ταῦτ' ἔχει. πολλὰ δὲ τῶν ζώων οὐκ ἔχουσι φωνήν, οἷον τὰ τε ἄναιμα καὶ τῶν ἐναίμων ἰχθύες (καὶ τοῦτ' εὐλόγως, εἴπερ ἄερος κίνησις τίς ἐστίν ὁ ψόφος), ἀλλ' οἱ λεγόμενοι φωνεῖν, οἷον <οἱ> ἐν τῷ Ἀχελῷ, ψοφοῦσι τοῖς βραγχίοις ἢ τινι ἐτέρῳ τοιούτῳ,

10. φωνή δ' ἐστὶ ζώου ψόφος οὐ τῷ τυχόντι μορίῳ. ἀλλ' ἐπεὶ πᾶν ψοφεῖ τύπτοντός τινος καὶ τι καὶ ἔν τινι, τοῦτο δ' ἐστὶν ἀήρ, εὐλόγως ἂν φωνοίη ταῦτα μόνα ὅσα δέχεται τὸν ἀέρα. τῷ γὰρ ἤδη ἀναπνεομένῳ καταχρήται ἡ φύσις ἐπὶ δύο ἔργα-καθάπερ τῇ γλώττῃ ἐπὶ τε τὴν γεῦσιν καὶ τὴν διάλεκτον, ὧν ἡ μὲν γεῦσις ἀναγκαῖον (διὸ καὶ πλείοσιν ὑπάρχει), ἡ δ' ἐρμηνεία ἔνεκα τοῦ εὖ, οὕτω καὶ τῷ πνεύματι πρὸς τε τὴν θερ- μότητα τὴν ἐντὸς ὡς ἀναγκαῖον <ὄν> (τὸ δ' αἴτιον ἐν ἑτέροις εἰρήσεται) καὶ πρὸς τὴν φωνὴν ὅπως ὑπάρχει τὸ εὖ.

11. ὄργανον δὲ τῇ ἀναπνοῇ ὁ φάρυγξ· οὗ δ' ἔνεκα τὸ μόριόν ἐστι τοῦτο, πνεύμων· τούτῳ γὰρ τῷ μορίῳ πλέον ἔχει τὸ θερμὸν τὰ περὶ τῶν ἄλλων. δεῖται δὲ τῆς ἀναπνοῆς καὶ ὁ περὶ τὴν καρδίαν τόπος πρῶτος, διὸ ἀναγκαῖον εἶσω ἀναπνεόμενον εἰσιέναι τὸν ἀέρα. ὥστε ἡ πληγὴ τοῦ ἀναπνεομένου ἀέρος ὑπὸ τῆς ἐν τούτοις τοῖς μορίοις ψυχῆς πρὸς τὴν καλουμένην ἀρτηρίαν φωνή ἐστίν (οὐ γὰρ πᾶς ζώου ψόφος φωνή, καθάπερ εἵπομεν-ἐστὶ γὰρ καὶ τῇ γλώττῃ ψοφεῖν καὶ ὡς οἱ βήττοντες-ἀλλὰ δεῖ ἔμψυχόν τε εἶναι τὸ τύπτον καὶ μετὰ φαντασίας τινός· σημαντικὸς γὰρ δὴ τις ψόφος ἐστὶν ἡ φωνή)· καὶ οὐ τοῦ ἀναπνεομένου ἀέρος ὥσπερ ἡ βήξ, [421a] ἀλλὰ τούτῳ τύπτει τὸν ἐν τῇ ἀρτηρίᾳ πρὸς αὐτήν.

12. σημεῖον δὲ τὸ μὴ δύνασθαι φωνεῖν ἀναπνέοντα μὴδ' ἐκπνέοντα, ἀλλὰ κατέχοντα· κινεῖ γὰρ τούτῳ ὁ κατέχων. φανερόν δὲ καὶ διότι οἱ ἰχθύες ἄφωνοι· οὐ γὰρ ἔχουσι φάρυγγα. τοῦτο δὲ τὸ μόριον οὐκ ἔχουσιν ὅτι οὐ δέχονται τὸν ἀέρα οὐδ' ἀναπνέουσιν. δι' ἣν μὲν οὖν αἰτίαν, ἔτερός ἐστι λόγος.

Κεφάλαιο 9

[421a7] 1. Περὶ δὲ ὁσμῆς καὶ ὁσφραντοῦ ἥττον εὐδιόριστόν ἐστι τῶν εἰρημένων· οὐ γὰρ δῆλον ποῖόν τί ἐστιν ἡ ὁσμή, οὕτως ὥς ὁ ψόφος ἢ τὸ χρῶμα. αἴτιον δ' ὅτι τὴν αἴσθησιν ταύτην οὐκ ἔχομεν ἀκριβῆ, ἀλλὰ χεῖρω πολλῶν ζώων· φαύλως γὰρ ἄνθρωπος ὁσμάται, καὶ οὐθενὸς αἰσθάνεται τῶν ὁσφραντῶν ἄνευ τοῦ λυπηροῦ ἢ τοῦ ἡδέος, ὥς οὐκ ὄντος ἀκριβοῦς τοῦ αἰσθητηρίου.

2. εὐλογον δ' οὕτω καὶ τὰ σκληρόφθαλμα τῶν χρωμάτων αἰσθάνεσθαι, καὶ μὴ διαδήλους αὐτοῖς εἶναι τὰς διαφορὰς τῶν χρωμάτων πλὴν τῷ φοβερῷ καὶ ἀφόβῳ· οὕτω δὲ καὶ περὶ τὰς ὁσμάς τὸ τῶν ἀνθρώπων γένος. εἰσὶ γὰρ ἀνάλογον ἔχειν πρὸς τὴν γεῦσιν, καὶ ὁμοίως τὰ εἶδη τῶν χυμῶν τοῖς τῆς ὁσμῆς, ἀλλ' ἀκριβεστέραν ἔχομεν τὴν γεῦσιν διὰ τὸ εἶναι αὐτὴν ἀφήν τινα, ταύτην δ' ἔχειν τὴν αἴσθησιν τὸν ἄνθρωπον ἀκριβεστάτην· ἐν μὲν γὰρ ταῖς ἄλλαις λείπεται πολλῶν τῶν ζώων, κατὰ δὲ τὴν ἀφήν πολλῷ τῶν ἄλλων διαφερόντως ἀκριβοῖ· διὸ καὶ φρονιμώτατόν ἐστι τῶν ζώων. σημεῖον δὲ τὸ καὶ ἐν τῷ γένει τῶν ἀνθρώπων παρὰ τὸ αἰσθητήριον τοῦτο εἶναι εὐφυεῖς καὶ ἀφυεῖς, παρ' ἄλλο δὲ μηδέν· οἱ μὲν γὰρ σκληρόσαρκοι ἀφυεῖς τὴν διάνοιαν, οἱ δὲ μαλακόσαρκοι εὐφυεῖς. [421a26]

3. ἔστι δ', ὥσπερ χυμὸς ὁ μὲν γλυκὺς ὁ δὲ πικρὸς, οὕτω καὶ ὁσμαί, ἀλλὰ τὰ μὲν ἔχουσι τὴν ἀνάλογον ὁσμὴν καὶ χυμόν, λέγω δὲ οἶον γλυκεῖαν ὁσμὴν καὶ γλυκὺν χυμόν, τὰ δὲ τοῦναντίον. ὁμοίως δὲ καὶ δριμεῖα καὶ αὐστηρὰ καὶ ὀξεῖα καὶ λιπαρά ἐστιν ὁσμή. ἀλλ' ὥσπερ εἶπομεν, διὰ τὸ μὴ σφόδρα διαδήλους εἶναι τὰς ὁσμάς ὥσπερ τοὺς χυμούς, [ἀπὸ τούτων] εἴληφε τὰ [421b] ὀνόματα καθ' ὁμοιότητα τῶν πραγμάτων, ἡ μὲν γλυκεῖα κρόκου καὶ μέλιτος, ἡ δὲ δριμεῖα θύμου καὶ τῶν τοιούτων· τὸν αὐτὸν δὲ τρόπον καὶ ἐπὶ τῶν ἄλλων.

4. ἔστι δ' ὥσπερ ἡ ἀκοὴ καὶ ἐκάστη τῶν αἰσθήσεων, ἡ μὲν τοῦ ἀκουστοῦ καὶ ἀνηκούστου, ἡ δὲ τοῦ ὁρατοῦ καὶ ἀοράτου, καὶ ἡ ὁσφρησις τοῦ ὁσφραντοῦ καὶ ἀνοσφράντου. ἀνοσφραντον δὲ τὸ μὲν παρὰ τὸ ὅλως ἀδύνατον <εἶναι> ἔχειν ὁσμὴν, τὸ δὲ μικρὰν ἔχον καὶ φαύλην. ὁμοίως δὲ καὶ τὸ ἄγευστον λέγεται.

5. ἔστι δὲ καὶ ἡ ὁσφρησις διὰ τοῦ μεταξύ, οἶον ἀέρος ἢ ὕδατος·

καὶ γὰρ τὰ ἔνυδρα δοκοῦσιν ὁσμῆς αἰσθάνεσθαι, ὁμοίως καὶ τὰ ἔναιμα καὶ τὰ ἄναιμα, ὥσπερ καὶ τὰ ἐν τῷ ἀέρι· καὶ γὰρ τούτων ἔνια πόρρωθεν ἀπαντᾷ πρὸς τὴν τροφὴν ὕψοςμα γινόμενα.

6. διὸ καὶ ἄπορον φαίνεται εἰ πάντα μὲν ὁμοίως ὁσμάται, ὁ δ' ἄνθρωπος ἀναπνέων μὲν, μὴ ἀναπνέων δὲ ἀλλ' ἐκπνέων ἢ κατέχων τὸ πνεῦμα οὐκ ὁσμάται, οὔτε πόρρωθεν οὔτ' ἐγγύθεν, οὐδ' ἂν ἐπὶ τοῦ μυκτῆρος ἐντὸς τεθῇ· καὶ τὸ μὲν ἐπ' αὐτῷ τιθέμενον τῷ αἰσθητηρίῳ ἀναίσθητον εἶναι κοινὸν πάντων, ἀλλὰ τὸ ἄνευ τοῦ ἀναπνεῖν μὴ αἰσθάνεσθαι ἴδιον ἐπὶ τῶν ἀνθρώπων· δῆλον δὲ πειρωμένοις· ὥστε τὰ ἄναιμα, ἐπειδὴ οὐκ ἀναπνέουσιν, ἑτέραν ἂν τιν' αἰσθησιν ἔχει παρὰ τὰς λεγομένας. ἀλλ' ἀδύνατον, εἴπερ τῆς ὁσμῆς αἰσθάνεται· ἢ γὰρ τοῦ ὁσφραντοῦ αἰσθησις καὶ δυσώδους καὶ εὐώδους ὁσφρησίς ἐστιν. ἔτι δὲ καὶ φθειρόμενα φαίνεται ὑπὸ τῶν ἰσχυρῶν ὁσμών ὑφ' ὧνπερ ἄνθρωπος, οἷον ἀσφάλτου καὶ θείου καὶ τῶν τοιούτων. ὁσφραίνεσθαι μὲν οὖν ἀναγκαῖον, ἀλλ' οὐκ ἀναπνέοντα.

7. ἔοικε δὲ τοῖς ἀνθρώποις διαφέρειν τὸ αἰσθητήριον τοῦτο πρὸς τὸ τῶν ἄλλων ζώων, ὥσπερ τὰ ὄμματα πρὸς τὰ τῶν σκληροφθάλμων· τὰ μὲν γὰρ ἔχει φράγμα καὶ ὥσπερ ἔλυτρον τὰ βλέφαρα, ἃ μὴ κινήσας μὴδ' ἀνασπᾶσας οὐχ ὁρᾷ· τὰ δὲ σκληρόφθαλμα οὐδὲν ἔχει τοιοῦτον, ἀλλ' εὐθέως ὁρᾷ τὰ γινόμενα ἐν τῷ διαφανεῖ· οὕτως οὖν καὶ τὸ ὁσφραντικὸν αἰσθητήριον τοῖς μὲν [422a] ἀκαλυφὲς εἶναι, ὥσπερ τὸ ὄμμα, τοῖς δὲ τὸν ἀέρα δεχομένοις ἔχειν ἐπικάλυμμα, ὃ ἀναπνεόντων ἀποκαλύπτεται, διευρυνομένων τῶν φλεβίων καὶ τῶν πόρων.

8. καὶ διὰ τοῦτο τὰ ἀναπνέοντα οὐκ ὁσμάται ἐν τῷ ὑγρῷ· ἀναγκαῖον γὰρ ὁσφρανθῆναι ἀναπνεύσαντα, τοῦτο δὲ ποιεῖν ἐν τῷ ὑγρῷ ἀδύνατον. ἔστι δ' ἡ ὁσμὴ τοῦ ξηροῦ (ὥσπερ ὁ χυμὸς τοῦ ὑγροῦ), τὸ δὲ ὁσφραντικὸν αἰσθητήριον δυνάμει τοιοῦτον.

Κεφάλαιο 10

[422a8] 1. Τὸ δὲ γευστόν ἐστιν ἄπτόν τι· καὶ τοῦτ' αἴτιον τοῦ μὴ εἶναι αἰσθητόν διὰ τοῦ μεταξὺ ἄλλοτρίου ὄντος σώματος· οὐδὲ γὰρ τῇ ἀφῇ. καὶ τὸ σῶμα δὲ ἐν ᾧ ὁ χυμός, τὸ γευστόν, ἐν ὑγρῷ ὡς ὕλη· τοῦτο δ' ἄπτόν τι. διὸ κἂν εἰ ἐν ὕδατι ἤμεν, ἡσθανόμεθ' ἂν ἐμβληθέντος τοῦ γλυκέος, οὐκ ἦν δ' ἂν ἡ αἴσθησις ἡμῖν διὰ τοῦ μεταξύ, ἀλλὰ τῷ μιχθῆναι τῷ ὑγρῷ, καθάπερ ἐπὶ τοῦ ποτοῦ. τὸ δὲ χρῶμα οὐχ οὕτως ὁράται τῷ μίγνυσθαι, οὐδὲ ταῖς ἀπορροίαις. ὥς μὲν οὖν τὸ μεταξὺ οὐθὲν ἔστιν· ὡς δὲ χρῶμα τὸ ὁρατόν, οὕτω τὸ γευστόν ὁ χυμός. οὐθὲν δὲ ποιεῖ χυμοῦ αἴσθησιν ἄνευ ὑγρότητος, ἀλλ' ἔχει ἐνεργεία ἢ δυνάμει ὑγρότητα, οἷον τὸ ἀλμυρόν· εὐτηκτόν τε γὰρ αὐτὸ καὶ συντηκτικὸν γλώττης. ὥσπερ δὲ καὶ ἡ ὄψις ἐστὶ τοῦ τε ὁρατοῦ καὶ τοῦ ἀοράτου (τὸ γὰρ σκότος ἀόρατον, κρίνει δὲ καὶ τοῦτο ἡ ὄψις), ἔτι τε τοῦ λίαν λαμπροῦ (καὶ γὰρ τοῦτο ἀόρατον, ἄλλον δὲ τρόπον τοῦ σκότους), ὁμοίως δὲ καὶ ἡ ἀκοὴ ψόφου τε καὶ σιγῆς, ὧν τὸ μὲν ἀκουστόν τὸ δ' οὐκ ἀκουστόν, καὶ μεγάλου ψόφου καθάπερ ἡ ὄψις τοῦ λαμπροῦ (ὥσπερ γὰρ ὁ μικρὸς ψόφος ἀνήκουστος, τρόπον τινὰ καὶ ὁ μέγας τε καὶ ὁ βίαιος), ἀόρατον δὲ τὸ μὲν ὅλως λέγεται, ὥσπερ καὶ ἐπ' ἄλλων τὸ ἀδύνατον, τὸ δ' ἐὰν πεφυκὸς μὴ ἔχῃ ἢ φαύλως, ὥσπερ τὸ ἄπουν καὶ τὸ ἀπύρηνον· οὕτω δὴ καὶ ἡ γεῦσις τοῦ γευστοῦ τε καὶ ἀγεύστου, τοῦτο δὲ τὸ μικρὸν ἢ φαῦλον ἔχον χυμὸν ἢ φθαρτικὸν τῆς γεύσεως. [422b] δοκεῖ δ' εἶναι ἀρχὴ τὸ ποτὸν καὶ ἄποτον (γεῦσις γὰρ τις ἀμφοτέρου· ἀλλὰ τοῦ μὲν φαύλη καὶ φθαρτικὴ [τῆς γεύσεως], τοῦ δὲ κατὰ φύσιν)· ἔστι δὲ κοινὸν ἀφῆς καὶ γεύσεως τὸ ποτόν. ἐπεὶ δ' ὑγρὸν τὸ γευστόν,

ἀνάγκη καὶ τὸ αἰσθητήριον αὐτοῦ μήτε ὑγρὸν εἶναι ἐντελεχεία μήτε ἀδύνατον ὑγραίνεσθαι· πάσχει γάρ τι ἡ γεῦσις ὑπὸ τοῦ γευστοῦ, ἢ γευστόν. ἀναγκαῖον ἄρα ὑγρανθῆναι τὸ δυνάμενον μὲν ὑγραίνεσθαι σωζόμενον, μὴ ὑγρὸν δέ, τὸ γευστικὸν αἰσθητήριον. σημεῖον δὲ τὸ μήτε κατάξηρον οὔσαν τὴν γλῶτταν αἰσθάνεσθαι μήτε λίαν ὑγρὰν· αὕτη γὰρ ἀφῇ γίνεται τοῦ πρώτου ὑγροῦ, ὥσπερ ὅταν προγευματίσας τις ἰσχυροῦ χυμοῦ γεύηται ἐτέρου, καὶ οἷον τοῖς κάμνουσι πικρὰ πάντα φαίνεται διὰ τὸ τῇ γλώττῃ πλήρει τοιαύτης ὑγρότητος αἰσθάνεσθαι.

2. τὰ δ' εἶδη τῶν χυμῶν, ὥσπερ καὶ ἐπὶ τῶν χρωμάτων, ἀπλᾶ μὲν

τάναντία, τὸ γλυκὺ καὶ τὸ πικρὸν, ἐχόμενα δὲ τοῦ μὲν τὸ λιπαρόν, τοῦ δὲ τὸ ἀλμυρόν· μεταξὺ δὲ τούτων τό τε δριμὺ καὶ τὸ αὐστηρὸν καὶ στρυφνὸν καὶ ὀξύ· σχεδὸν γὰρ αὗται δοκοῦσιν εἶναι διαφοραὶ χυμῶν. ὥστε τὸ γευστικόν ἐστι τὸ δυνάμει τοιοῦτον, γευστὸν δὲ τὸ ποιητικὸν ἐντελεχείᾳ αὐτοῦ.

Κεφάλαιο 11

[422b17] 1. Περί δὲ τοῦ ἀπτοῦ καὶ περὶ ἀφῆς ὁ αὐτὸς λόγος· εἰ γὰρ ἡ ἀφῆ μὴ μία ἐστὶν αἴσθησις ἀλλὰ πλείους, ἀναγκαῖον καὶ τὰ ἀπτὰ αἰσθητὰ πλείω εἶναι. ἔχει δ' ἀπορίαν πότερον πλείους εἰσὶν ἢ μία, καὶ τί τὸ αἰσθητήριον τὸ τοῦ ἀπτικοῦ, πότερον ἡ σὰρξ καὶ ἐν τοῖς ἄλλοις τὸ ἀνάλογον, ἢ οὐ, ἀλλὰ τοῦτο μὲν ἐστὶ τὸ μεταξύ, τὸ δὲ πρῶτον αἰσθητήριον ἄλλο τί ἐστὶν ἐντός.

2. πᾶσα γὰρ αἴσθησις μιᾶς ἐναντιώσεως εἶναι δοκεῖ, οἷον ὄψις λευκοῦ καὶ μέλανος, καὶ ἀκοὴ ὀξέος καὶ βαρέος, καὶ γεῦσις πικροῦ καὶ γλυκέος· ἐν δὲ τῷ ἀπτῷ πολλὰ ἐνεῖσιν ἐναντιώσεις, θερμὸν ψυχρόν, ξηρὸν ὑγρόν, σκληρὸν μαλακόν, καὶ τῶν ἄλλων ὅσα τοιαῦτα. ἔχει δὲ τινα λύσιν πρὸς γε ταύτην τὴν ἀπορίαν, ὅτι καὶ ἐπὶ τῶν ἄλλων αἰσθήσεων εἰσὶν ἐναντιώσεις πλείους, οἷον ἐν φωνῇ οὐ μόνον ὀξύτης καὶ βαρύτης, ἀλλὰ καὶ μέγεθος καὶ μικρότης, καὶ λειότης καὶ τραχύτης φωνῆς, καὶ τοιαῦθ' ἕτερα. εἰσὶ δὲ καὶ περὶ χρῶμα διαφοραὶ τοιαῦται ἕτεραι. ἀλλὰ τί τὸ ἐν τῷ ὑποκείμενον, ὥσπερ ἀκοὴ ψόφος, οὕτω τῇ ἀφῇ, οὐκ ἔστιν ἐνδὴλον.

3. πότερον δ' ἐστὶ τὸ αἰσθητήριον ἐντός, ἢ οὐ, ἀλλ' [423a] εὐθέως ἢ σὰρξ, οὐδὲν δοκεῖ σημεῖον εἶναι τὸ γίνεσθαι τὴν αἴσθησιν ἅμα θιγγανομένων. καὶ γὰρ νῦν εἴ τίς <τι> περὶ τὴν σάρκα περιτείνειεν οἷον ὑμένα ποιήσας, ὁμοίως τὴν αἴσθησιν εὐθέως ἀσάμενος ἐνησημανεῖ· καίτοι δῆλον ὡς οὐκ ἔστιν ἐν τούτῳ τὸ αἰσθητήριον (εἰ δὲ καὶ συμφυεῖς γένοιτο, θᾶπτον ἔτι δικνοῖτ' ἂν ἡ αἴσθησις).

4. διὸ τὸ τοιοῦτον μόριον τοῦ σώματος ἔοικεν οὕτως ἔχειν ὥσπερ ἂν εἰ κύκλῳ ἡμῖν περιεπεφύκει ὁ ἀήρ· ἐδοκοῦμεν γὰρ ἂν ἐνὶ τινὶ αἰσθάνεσθαι καὶ ψόφου καὶ χρώματος καὶ ὁσμῆς, καὶ μία τις αἴσθησις εἶναι ὄψις ἀκοὴ ὄσφρησις. νῦν δὲ διὰ τὸ διωρίσθαι δι' οὐ γίνονται αἱ κινήσεις, φανερὰ τὰ εἰρημένα αἰσθητήρια ἕτερα ὄντα. ἐπὶ δὲ τῆς ἀφῆς τοῦτο νῦν ἄδηλον· ἐξ ἀέρος μὲν γὰρ ἡ ὕδατος ἀδύνατον συστήναι τὸ ἔμψυχον σῶμα· δεῖ γάρ τι στερεὸν εἶναι· λείπεται δὲ μικτὸν ἐκ τῆς καὶ τούτων εἶναι, οἷον βούλεται εἶναι ἡ σὰρξ καὶ τὸ ἀνάλογον· ὥστε ἀναγκαῖον τὸ σῶμα εἶναι τὸ μεταξύ τοῦ ἀπτικοῦ προσπεφυκός, δι' οὗ γίνονται αἱ αἰσθήσεις πλείους οὕσαι.

5. δηλοῖ δ' ὅτι πλείους ἢ ἐπὶ τῆς γλώττης ἀφῆ· ἀπάντων γὰρ τῶν ἀπτῶν αἰσθάνεται κατὰ τὸ αὐτὸ μόριον καὶ χυμοῦ. εἰ μὲν οὖν καὶ ἡ

ἄλλη σὰρξ ἡσθάνετο τοῦ χυμοῦ, ἐδόκει ἂν ἡ αὐτὴ καὶ μία εἶναι αἴσθησις ἡ γεῦσις καὶ ἡ ἀφή· νῦν δὲ δύο διὰ τὸ μὴ ἀντιστρέφειν.

6. ἀπορήσειε δ' ἂν τις, εἰ πᾶν σῶμα βάθος ἔχει, τοῦτο δ' ἐστὶ τὸ τρίτον μέγεθος, ὧν δ' ἐστὶ δύο σωμάτων μεταξύ σῶμά τι, οὐκ ἐνδέχεται ταῦτα ἀλλήλων ἅπτεσθαι, τὸ δ' ὑγρὸν οὐκ ἔστιν ἄνευ σώματος, οὐδὲ τὸ διερόν, ἀλλ' ἀναγκαῖον ὕδωρ εἶναι ἢ ἔχειν ὕδωρ,

τὰ δὲ ἀπτόμενα ἀλλήλων ἐν τῷ ὕδατι, μὴ ξηρῶν τῶν ἄκρων ὄντων, ἀναγκαῖον ὕδωρ ἔχειν μεταξύ, οὗ ἀνάπλεα τὰ ἔσχατα, εἰ δὲ τοῦτ' ἀληθές, ἀδύνατον ἅψασθαι ἄλλο ἄλλου ἐν ὕδατι, τὸν αὐτὸν δὲ τρόπον καὶ ἐν τῷ ἀέρι (ὁμοίως γὰρ ἔχει ὁ ἀήρ πρὸς τὰ ἐν αὐτῷ καὶ τὸ ὕδωρ πρὸς τὰ ἐν τῷ ὕδατι, λανθάνει δὲ μᾶλλον ἡμᾶς, ὥσπερ καὶ τὰ ἐν τῷ ὕδατι ζῶα [423b] εἰ διερόν διεροῦ ἅπτεται)

-πότερον οὖν πάντων ὁμοίως ἐστὶν ἡ αἴσθησις, ἢ ἄλλων ἄλλως, καθάπερ νῦν δοκεῖ ἡ μὲν γεῦσις καὶ ἡ ἀφή τῷ ἅπτεσθαι, αἱ δ' ἄλλαι ἅποθεν. τὸ δ' οὐκ ἔστιν, ἀλλὰ καὶ τὸ σκληρὸν καὶ τὸ μαλακὸν δι' ἐτέρων αἰσθανόμεθα, ὥσπερ καὶ τὸ ψοφητικὸν καὶ τὸ ὀρατὸν καὶ τὸ ὀσφραντόν· ἀλλὰ τὰ μὲν πόρρωθεν, τὰ δ' ἐγγύθεν, διὸ λανθάνει· ἐπεὶ αἰσθανόμεθα γε πάντων διὰ τοῦ μέσου, ἀλλ' ἐπὶ τούτων λανθάνει. καίτοι καθάπερ εἶπομεν καὶ πρότερον, κἂν εἰ δι' ὑμέως αἰσθανόμεθα τῶν ἀπτῶν ἀπάντων λανθάνοντος ὅτι διείργει, ὁμοίως ἂν ἔχοιμεν ὥσπερ καὶ νῦν ἐν τῷ ὕδατι καὶ ἐν τῷ ἀέρι· δοκοῦμεν γὰρ νῦν αὐτῶν ἅπτεσθαι καὶ οὐδὲν εἶναι διὰ μέσου.

8. ἀλλὰ διαφέρει τὸ ἀπτὸν τῶν ὀρατῶν καὶ τῶν ψοφητικῶν, ὅτι ἐκείνων μὲν αἰσθανόμεθα τῷ τὸ μεταξύ ποιεῖν τι ἡμᾶς, τῶν δὲ ἀπτῶν οὐχ ὑπὸ τοῦ μεταξύ ἀλλ' ἅμα τῷ μεταξύ, ὥσπερ ὁ δι' ἀσπίδος πληγεῖς· οὐ γὰρ ἡ ἀσπίς πληγεῖσα ἐπάταξεν, ἀλλ' ἅμ' ἅμφω συνέβη πληγῆναι.

9. ὅλως δ' ἔοικεν ἡ σὰρξ καὶ ἡ γλῶττα, ὡς ὁ ἀήρ καὶ τὸ ὕδωρ πρὸς τὴν ὄψιν καὶ τὴν ἀκοήν καὶ τὴν ὀσφρησιν ἔχουσιν, οὕτως ἔχειν πρὸς τὸ αἰσθητήριον ὥσπερ ἐκείνων ἕκαστον. αὐτοῦ δὲ τοῦ αἰσθητηρίου ἀπτομένου οὐτ' ἐκεῖ οὐτ' ἐνταῦθα γένοιτ' ἂν αἴσθησις, οἷον εἴ τις σῶμά τι λευκὸν ἐπὶ τοῦ ὄμματος θείῃ τὸ ἔσχατον. ἦ καὶ δῆλον ὅτι ἐντὸς τὸ τοῦ ἀπτοῦ αἰσθητικόν. οὕτω γὰρ ἂν συμβαίνοι ὅπερ καὶ ἐπὶ τῶν ἄλλων· ἐπιτιθεμένων γὰρ ἐπὶ τὸ αἰσθητήριον οὐκ αἰσθάνεται, ἐπὶ δὲ τὴν σάρκα ἐπιτιθεμένων αἰσθάνεται· ὥστε τὸ μεταξύ τοῦ ἀπτικοῦ ἢ σάρξ.

10. ἀπταὶ μὲν οὖν εἰσὶν αἱ διαφοραὶ τοῦ σώματος ἢ σῶμα· λέγω

δὲ διαφορὰς αἱ τὰ στοιχεῖα διορίζουσι, θερμὸν ψυχρόν, ξηρὸν ὑγρόν, περὶ ὧν εἰρήκαμεν πρότερον ἐν τοῖς περὶ τῶν στοιχείων.

11. τὸ δὲ αἰσθητήριον αὐτῶν τὸ ἀπτικόν, καὶ ἐν ᾧ ἡ καλουμένη ἀφή ὑπάρχει αἰσθησις πρώτῳ, τὸ δυνάμει τοιοῦτόν ἐστι μόριον· [424a] τὸ γὰρ αἰσθάνεσθαι πάσχειν τι ἐστίν· ὥστε τὸ ποιοῦν, οἷον αὐτὸ ἐνεργεία, τοιοῦτον ἐκείνο ποιεῖ, δυνάμει ὄν. διὸ τοῦ ὁμοίως θερμοῦ καὶ ψυχροῦ, ἢ σκληροῦ καὶ μαλακοῦ, οὐκ αἰσθανόμεθα, ἀλλὰ τῶν ὑπερβολῶν, ὡς τῆς αἰσθήσεως οἷον μεσότητός τινος οὔσης τῆς ἐν τοῖς αἰσθητοῖς ἐναντιώσεως. καὶ διὰ τοῦτο κρίνει τὰ αἰσθητά. τὸ γὰρ μέσον κριτικόν· γίνεται γὰρ πρὸς ἐκάτερον αὐτῶν θάτερον τῶν ἄκρων· καὶ δεῖ ὥσπερ τὸ μέλλον αἰσθῆσεσθαι λευκοῦ καὶ μέλανος μηδέτερον αὐτῶν εἶναι ἐνεργεία, δυνάμει δ' ἄμφω (οὔτῳ δὲ καὶ ἐπὶ τῶν ἄλλων), καὶ ἐπὶ τῆς ἀφῆς μήτε θερμὸν μήτε ψυχρόν.

12. ἔτι δ' ὥσπερ ὁρατοῦ καὶ ἀοράτου ἦν πως ἡ ὄψις, ὁμοίως δὲ καὶ αἱ λοιπαὶ τῶν ἀντικειμένων, οὔτῳ καὶ ἡ ἀφή τοῦ ἀπτοῦ καὶ ἀνάπτου· ἀναπτον δ' ἐστὶ τό τε μικρὰν ἔχον πάντα διαφορὰν τῶν ἀπτῶν, οἷον πέπονθεν ὁ ἀήρ, καὶ τῶν ἀπτῶν αἱ ὑπερβολαί, ὥσπερ τὰ φθαρτικά. καθ' ἐκάστην μὲν οὖν τῶν αἰσθήσεων εἴρηται τύπη.

Κεφάλαιο 12

[424a17] 1. Καθόλου δὲ περὶ πάσης αἰσθήσεως δεῖ λαβεῖν ὅτι ἡ μὲν αἴσθησις ἐστὶ τὸ δεκτικὸν τῶν αἰσθητῶν εἰδῶν ἄνευ τῆς ὕλης, οἷον ὁ κηρὸς τοῦ δακτυλίου ἄνευ τοῦ σιδήρου καὶ τοῦ χρυσοῦ δέχεται τὸ σημεῖον, λαμβάνει δὲ τὸ χρυσοῦν ἢ τὸ χαλκοῦν σημεῖον, ἀλλ' οὐχ ἢ χρυσὸς ἢ χαλκός· ὁμοίως δὲ καὶ ἡ αἴσθησις ἐκάστου ὑπὸ τοῦ ἔχοντος χρῶμα ἢ χυμὸν ἢ ψόφον πάσχει, ἀλλ' οὐχ ἢ ἕκαστον ἐκείνων λέγεται, ἀλλ' ἢ τοιονδί, καὶ κατὰ τὸν λόγον.

2. αἰσθητήριον δὲ πρῶτον ἐν ᾧ ἡ τοιαύτη δύναμις. ἔστι μὲν οὖν ταυτόν, τὸ δ' εἶναι ἕτερον· μέγεθος μὲν γὰρ ἂν τι εἴη τὸ αἰσθανόμενον, οὐ μὴν τό γε αἰσθητικῷ εἶναι οὐδ' ἡ αἴσθησις μέγεθός ἐστιν, ἀλλὰ λόγος τις καὶ δύναμις ἐκείνου.

3. φανερόν δ' ἐκ τούτων καὶ διὰ τί ποτε τῶν αἰσθητῶν αἱ ὑπερβολαὶ φθείρουσι τὰ αἰσθητήρια (ἐὰν γὰρ ἢ ἰσχυροτέρα τοῦ αἰσθητηρίου ἢ κίνησις, λύεται ὁ λόγος-τοῦτο δ' ἦν ἡ αἴσθησις-ὥσπερ καὶ ἡ συμφωνία καὶ ὁ τόνος κρουομένων σφόδρα τῶν χορδῶν),

4. καὶ διὰ τί ποτε τὰ φυτὰ οὐκ αἰσθάνεται, ἔχοντά τι μόριον ψυχικὸν καὶ πάσχοντά τι ὑπὸ τῶν ἀπτῶν (καὶ γὰρ ψύχε- [424b] ται καὶ θερμαίνεται)· αἷτιον γὰρ τὸ μὴ ἔχειν μεσότητα, μηδὲ τοιαύτην ἀρχὴν οἷαν τὰ εἶδη δέχεσθαι τῶν αἰσθητῶν, ἀλλὰ πάσχειν μετὰ τῆς ὕλης.

5. ἀπορήσειε δ' ἂν τις εἰ πάθοι ἂν τι ὑπ' ὁσμῆς τὸ ἀδύνατον ὀσφρανθῆναι, ἢ ὑπὸ χρώματος τὸ μὴ δυνάμενον ἰδεῖν· ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων. εἰ δὲ τὸ ὀσφραντὸν ὁσμῇ, εἴ τι ποιεῖ, τὴν ὀσφρησιν ἢ ὁσμὴ ποιεῖ· ὥστε τῶν ἀδυνάτων ὀσφρανθῆναι οὐθὲν οἷόν τε πάσχειν ὑπ' ὁσμῆς (ὁ δ' αὐτὸς λόγος καὶ ἐπὶ τῶν ἄλλων)· οὐδὲ τῶν δυνατῶν, ἀλλ' <ἢ> ἢ αἰσθητικὸν ἕκαστον. ἅμα δὲ δῆλον καὶ οὕτως· οὔτε γὰρ φῶς καὶ σκότος οὔτε ψόφος οὔτε ὁσμὴ οὐδὲν ποιεῖ τὰ σώματα, ἀλλ' ἐν οἷς ἐστίν, οἷον ἀήρ ὁ μετὰ βροντῆς δίιστησι τὸ ξύλον.

6. ἀλλὰ τὰ ἀπτά καὶ οἱ χυμοὶ ποιοῦσιν· εἰ γὰρ μή, ὑπὸ τίνος ἂν πάσχοι τὰ ἄψυχα καὶ ἀλλοιοῖτο; ἄρ' οὖν κάκεῖνα ποιήσει; ἢ οὐ πᾶν σῶμα παθητικὸν ὑπ' ὁσμῆς καὶ ψόφου, καὶ τὰ πάσχοντα ἀόριστα, καὶ οὐ μένει, οἷον ἀήρ (ᾧ γὰρ ὥσπερ παθὼν τι); τί οὖν ἐστὶ τὸ ὁσμᾶσθαι παρὰ τὸ πάσχειν τι; ἢ τὸ μὲν ὁσμᾶσθαι αἰσθάνεσθαι, ὁ δ' ἀήρ παθὼν ταχέως αἰσθητὸς γίνεται;

Βιβλίο Γ

Κεφάλαιο 1

[424b.22] 1. Ὅτι δ' οὐκ ἔστιν αἴσθησις ἑτέρα παρὰ τὰς πέντε (λέγω δὲ ταύτας ὄψιν, ἀκοήν, ὄσφρησιν, γεῦσιν, ἀφήν), ἐκ τῶνδε πιστεύσειεν ἂν τις. εἰ γὰρ παντὸς οὗ ἔστιν αἴσθησις ἀφή καὶ νῦν αἴσθησιν ἔχομεν (πάντα γὰρ τὰ τοῦ ἀπτοῦ ἢ ἀπτὸν πάθη τῇ ἀφῇ ἡμῖν αἰσθητά ἐστιν), ἀνάγκη τ', εἴπερ ἐκλείπει τις αἴσθησις, καὶ αἰσθητήριόν τι ἡμῖν ἐκλείπειν, καὶ ὅσων μὲν αὐτῶν ἀπτόμενοι αἰσθανόμεθα, τῇ ἀφῇ αἰσθητά ἐστιν, ἣν τυγχάνομεν ἔχοντες, ὅσα δὲ διὰ τῶν μεταξὺ καὶ μὴ αὐτῶν ἀπτόμενοι, τοῖς ἀπλοῖς, λέγω δ' οἶον ἀέρι καὶ ὕδατι,

2. ἔχει δ' οὕτως ὥστ' εἰ μὲν δι' ἐνὸς πλείω αἰσθητὰ ἑτερα ὄντα ἀλλήλων τῷ γένει, ἀνάγκη τὸν ἔχοντα τὸ τοιοῦτον αἰσθητήριον ἀμφοῖν αἰσθητικὸν εἶναι (οἶον εἰ ἐξ ἀέρος ἐστὶ τὸ αἰσθητήριον, καὶ ἔστιν ὁ ἀήρ καὶ ψόφου καὶ χρώας), εἰ δὲ πλείω [425a] τοῦ αὐτοῦ, οἶον χρώας καὶ ἀήρ καὶ ὕδωρ (ἄμφω γὰρ διαφανῇ), καὶ ὁ τὸ ἕτερον αὐτῶν ἔχων μόνον αἰσθήσεται τοῦ δι' ἀμφοῖν,

3. τῶν δὲ ἀπλῶν ἐκ δύο τούτων αἰσθητήρια μόνον ἐστίν, ἐξ ἀέρος καὶ ὕδατος (ἡ μὲν γὰρ κόρη ὕδατος, ἡ δ' ἀκοή ἀέρος, ἡ δ' ὄσφρησις θατέρου τούτων), τὸ δὲ πῦρ ἢ οὐθενὸς ἢ κοινὸν πάντων (οὐθέν γὰρ ἄνευ θερμότητος αἰσθητικόν), γῆ δὲ ἢ οὐθενός, ἢ ἐν τῇ ἀφῇ μάλιστα μέμικται ιδίως, διὸ λείποιτ' ἂν μηθὲν εἶναι αἰσθητήριον ἔξω ὕδατος καὶ ἀέρος,

4. ταῦτα δὲ καὶ νῦν ἔχουσιν ἓνια ζῶα-πᾶσαι ἄρα αἱ αἰσθήσεις ἔχονται ὑπὸ τῶν μὴ ἀτελῶν μηδὲ πεπηρωμένων (φαίνεται γὰρ καὶ ἡ ἀσπάλαξ ὑπὸ τὸ δέρμα ἔχουσα ὀφθαλμούς)· ὥστ' εἰ μὴ τι ἕτερον ἔστι σῶμα, καὶ πάθος ὃ μηθενός ἐστι τῶν ἐνταῦθα σωμάτων, οὐδεμία ἂν ἐκλείποι αἴσθησις.

5. ἀλλὰ μὴν οὐδὲ τῶν κοινῶν οἷόν τ' εἶναι αἰσθητήριόν τι ἴδιον, ὧν ἐκάστη αἰσθήσει αἰσθανόμεθα κατὰ συμβεβηκός, οἷον κινήσεως, στάσεως, σχήματος, μεγέθους, ἀριθμοῦ· ταῦτα γὰρ πάντα [κινήσει] αἰσθανόμεθα, οἷον μέγεθος κινήσει (ὥστε καὶ σχῆμα· μέγεθος γάρ τι τὸ σχῆμα), τὸ δ' ἡρεμοῦν τῷ μὴ κινεῖσθαι, ὃ δ' ἀριθμὸς τῇ ἀποφάσει τοῦ συνεχοῦς, καὶ τοῖς ἰδίους (ἐκάστη γὰρ ἐν αἰσθάνεται αἴσθησις)· ὥστε δῆλον ὅτι ἀδύνατον ὅτουοῦν ἰδίαν αἴσθησιν εἶναι τούτων, οἷον κινήσεως· οὕτω γὰρ ἔσται ὥσπερ νῦν τῇ ὄψει τὸ γλυκὺ

αἰσθανόμεθα·

6. τοῦτο δ' ὅτι ἀμφοῖν ἔχοντες τυγχάνομεν αἴσθησιν, ἥ ὅταν συμπεσώσιν ἅμα γνωρίζομεν. εἰ δὲ μή, οὐδαμῶς ἂν ἀλλ' ἢ κατὰ συμβεβηκὸς ἡσθανόμεθα (οἷον τὸν Κλέωνος υἱὸν οὐχ ὅτι Κλέωνος υἱός, ἀλλ' ὅτι λευκός, τούτῳ δὲ συμβέβηκεν υἱᾷ Κλέωνος εἶναι)·

7. τῶν δὲ κοινῶν ἤδη ἔχομεν αἴσθησιν κοινήν, οὐ κατὰ συμβεβηκός· οὐκ ἄρ' ἐστὶν ἰδία· οὐδαμῶς γὰρ ἂν ἡσθανόμεθα ἀλλ' ἢ οὕτως ὥσπερ εἴρηται [τὸν Κλέωνος υἱὸν ἡμᾶς ὁρᾶν]. τὰ δ' ἀλλήλων ἴδια κατὰ συμβεβηκὸς αἰσθάνονται αἱ αἰσθήσεις, οὐχ ἢ αὐταί, ἀλλ' ἢ μία, ὅταν [425b] ἅμα γένηται ἡ αἴσθησις ἐπὶ τοῦ αὐτοῦ, οἷον χολῆς ὅτι πικρὰ καὶ ξανθή (οὐ γὰρ δὴ ἐτέρας γε τὸ εἰπεῖν ὅτι ἅμφω ἔν)· διὸ καὶ ἀπατᾶται, καὶ ἐὰν ἢ ξανθόν, χολὴν οἶεται εἶναι.

8. ζητήσκει δ' ἂν τις τίνος ἔνεκα πλείους ἔχομεν αἰσθήσεις, ἀλλ' οὐ μίαν μόνην. ἢ ὅπως ἤττον λανθάνη τὰ ἀκολουθοῦντα καὶ κοινά, οἷον κίνησις καὶ μέγεθος καὶ ἀριθμός; εἰ γὰρ ἦν ἡ ὅψις μόνη, καὶ αὕτη λευκοῦ, ἐλάνθανεν ἂν μᾶλλον κἂν ἐδόκει ταῦτόν εἶναι πάντα διὰ τὸ ἀκολουθεῖν ἀλλήλοις ἅμα χρῶμα καὶ μέγεθος. νῦν δ' ἐπεὶ καὶ ἐν ἐτέρῳ αἰσθητῷ τὰ κοινὰ ὑπάρχει, δῆλον ποιεῖ ὅτι ἄλλο τι ἕκαστον αὐτῶν.

Κεφάλαιο 2

[425b12] 1. Ἐπει δ' αἰσθανόμεθα ὅτι ὁρῶμεν καὶ ἀκούομεν, ἀνάγκη ἢ τῇ ὄψει αἰσθάνεσθαι ὅτι ὁρᾷ, ἢ ἐτέρᾳ. ἀλλ' ἡ αὐτὴ ἔσται τῆς ὄψεως καὶ τοῦ ὑποκειμένου χρώματος, ὥστε ἡ δύο τοῦ αὐτοῦ ἔσονται ἢ αὐτὴ αὐτῆς.

2. ἔτι δ' εἰ καὶ ἐτέρα εἴη ἢ τῆς ὄψεως αἴσθησις, ἢ εἰς ἄπειρον εἴσιν ἢ αὐτὴ τις ἔσται αὐτῆς· ὥστ' ἐπὶ τῆς πρώτης τοῦτο ποιητέον. ἔχει δ' ἀπορίαν· εἰ γὰρ τὸ τῇ ὄψει αἰσθάνεσθαι ἔστιν ὁρᾶν, ὁρᾶται δὲ χρῶμα ἢ τὸ ἔχον, εἰ ὄψεται τις τὸ ὁρῶν, καὶ χρῶμα ἔξει τὸ ὁρῶν πρῶτον.

3. φανερόν τοίνυν ὅτι οὐχ ἐν τῇ ὄψει αἰσθάνεσθαι· καὶ γὰρ ὅταν μὴ ὁρῶμεν, τῇ ὄψει κρίνομεν καὶ τὸ σκότος καὶ τὸ φῶς, ἀλλ' οὐχ ὡσαύτως. ἔτι δὲ καὶ τὸ ὁρῶν ἔστιν ὡς κεχρωμάτισται· τὸ γὰρ αἰσθητήριον δεκτικὸν τοῦ αἰσθητοῦ ἄνευ τῆς ὕλης ἕκαστον· διὸ καὶ ἀπελθόντων τῶν αἰσθητῶν ἔννευσιν αἰσθήσεις καὶ φαντασίαι ἐν τοῖς αἰσθητηρίοις.

4. ἡ δὲ τοῦ αἰσθητοῦ ἐνέργεια καὶ τῆς αἰσθήσεως ἡ αὐτὴ μὲν ἔστι καὶ μία, τὸ δ' εἶναι οὐ τὸ αὐτὸ αὐταῖς· λέγω δ' οἷον ὁ ψόφος ὁ κατ' ἐνέργειαν καὶ ἡ ἀκοὴ ἡ κατ' ἐνέργειαν· ἔστι γὰρ ἀκοὴν ἔχοντα μὴ ἀκούειν, καὶ τὸ ἔχον ψόφον οὐκ ἀεὶ ψοφεῖ, ὅταν δ' ἐνεργῇ τὸ δυνάμενον ἀκούειν καὶ ψοφῇ τὸ δυνάμενον ψοφεῖν, τότε ἡ κατ' ἐνέργειαν ἀκοὴ ἅμα γίνεται καὶ ὁ κατ' [426a] ἐνέργειαν ψόφος, ὃν εἵπειν ἂν τις τὸ μὲν εἶναι ἄκουσιν τὸ δὲ ψόφησιν.

5. εἰ δὴ ἔστιν ἡ κίνησις (καὶ ἡ ποίησις καὶ τὸ πάθος) ἐν τῷ κινουμένῳ, ἀνάγκη καὶ τὸν ψόφον καὶ τὴν ἀκοὴν τὴν κατ' ἐνέργειαν ἐν τῷ κατὰ δύναμιν εἶναι· ἡ γὰρ τοῦ ποιητικοῦ καὶ κινητικοῦ ἐνέργεια ἐν τῷ πάσχοντι ἐγγίνεται· διὸ οὐκ ἀνάγκη τὸ κινεῖσθαι ἢ μὲν οὖν τοῦ ψοφητικοῦ ἐνέργειά ἔστι ψόφος ἢ ψόφησις, ἢ δὲ τοῦ ἀκουστικοῦ ἀκοὴ ἢ ἄκουσις· διττὸν γὰρ ἡ ἀκοή, καὶ διττὸν ὁ ψόφος.

6. ὁ δ' αὐτὸς λόγος καὶ ἐπὶ τῶν ἄλλων αἰσθήσεων καὶ αἰσθητῶν. ὥσπερ γὰρ καὶ ἡ ποίησις καὶ ἡ πάθησις ἐν τῷ πάσχοντι ἀλλ' οὐκ ἐν τῷ ποιῶντι, οὕτω καὶ ἡ τοῦ αἰσθητοῦ ἐνέργεια καὶ ἡ τοῦ αἰσθητικοῦ ἐν τῷ αἰσθητικῷ. ἀλλ' ἐπ' ἐνίων μὲν ὠνόμασται, οἷον ἡ ψόφησις καὶ ἡ ἄκουσις, ἐπ' ἐνίων δ' ἀνώνυμον θάτερον· ὅρασις γὰρ λέγεται ἢ τῆς ὄψεως ἐνέργεια, ἢ δὲ τοῦ χρώματος ἀνώνυμος, καὶ γεῦσις ἢ τοῦ

γευστικοῦ, ἡ δὲ τοῦ χυμοῦ ἀνώνυμος.

7. ἐπεὶ δὲ μία μὲν ἐστὶν ἐνέργεια ἡ τοῦ αἰσθητοῦ καὶ τοῦ αἰσθητικοῦ, τὸ δ' εἶναι ἕτερον, ἀνάγκη ἅμα φθεῖρεσθαι καὶ σώζεσθαι τὴν οὕτω λεγομένην ἀκοὴν καὶ ψόφον, καὶ χυμὸν δὴ καὶ γεῦσιν, καὶ τὰ ἄλλα ὁμοίως· τὰ δὲ κατὰ δύναμιν λεγόμενα οὐκ ἀνάγκη·

8. ἀλλ' οἱ πρότερον φυσιολόγοι τοῦτο οὐ καλῶς ἔλεγον, οὐθὲν οἰόμενοι οὔτε λευκὸν οὔτε μέλαν εἶναι ἄνευ ὀψεως, οὐδὲ χυμὸν ἄνευ γεύσεως. τῇ μὲν γὰρ ἔλεγον ὀρθῶς, τῇ δ' οὐκ ὀρθῶς· διχῶς γὰρ λεγομένης τῆς αἰσθήσεως καὶ τοῦ αἰσθητοῦ, τῶν μὲν κατὰ δύναμιν τῶν δὲ κατ' ἐνέργειαν, ἐπὶ τούτων μὲν συμβαίνει τὸ λεχθέν, ἐπὶ δὲ τῶν ἐτέρων οὐ συμβαίνει. ἀλλ' ἐκεῖνοι ἀπλῶς ἔλεγον περὶ τῶν λεγομένων οὐχ ἀπλῶς.

9. εἰ δ' ἡ φωνὴ συμφωνία τίς ἐστὶν, ἡ δὲ φωνὴ καὶ ἡ ἀκοὴ ἔστιν ὥς ἓν ἐστὶ [καὶ ἔστιν ὥς οὐχ ἓν τὸ αὐτό], λόγος δ' ἡ συμφωνία, ἀνάγκη καὶ τὴν ἀκοὴν λόγον τινὰ εἶναι. καὶ διὰ τοῦτο καὶ φθεῖρει ἕκαστον ὑπερβάλλον, καὶ τὸ ὀξύ καὶ τὸ βαρὺ, τὴν ἀκοήν· ὁμοίως δὲ καὶ ἐν χυμοῖς τὴν [426b] γεῦσιν, καὶ ἐν χρώμασι τὴν ὄψιν τὸ σφόδρα λαμπρὸν ἢ ζοφερόν, καὶ ἐν ὀσφρήσει ἡ ἰσχυρὰ ὀσμή, καὶ γλυκεῖα καὶ πικρά, ὥς λόγου τινὸς ὄντος τῆς αἰσθήσεως. διὸ καὶ ἡδέα μὲν, ὅταν εἰλικρινῇ καὶ ἄμικτα ὄντα ἄγεται εἰς τὸν λόγον, οἷον τὸ ὀξύ ἢ γλυκὺ ἢ ἄλμυρόν, ἡδέα γὰρ τότε· ὅλως δὲ μᾶλλον τὸ μικτόν, συμφωνία, ἡ τὸ ὀξύ ἢ βαρὺ, ἀπῆ δὲ τὸ θερμαντὸν ἢ ψυκτόν· ἡ δ' αἴσθησις ὁ λόγος· ὑπερβάλλοντα δὲ λύει ἢ φθεῖρει.

10. ἐκάστη μὲν οὖν αἴσθησις τοῦ ὑποκειμένου αἰσθητοῦ ἐστίν, ὑπάρχουσα ἐν τῷ αἰσθητηρίῳ ἢ αἰσθητήριον, καὶ κρίνει τὰς τοῦ ὑποκειμένου αἰσθητοῦ διαφοράς, οἷον λευκὸν μὲν καὶ μέλαν ὄψις, γλυκὺ δὲ καὶ πικρὸν γεῦσις· ὁμοίως δ' ἔχει τοῦτο καὶ ἐπὶ τῶν ἄλλων. ἐπεὶ δὲ καὶ τὸ λευκὸν καὶ τὸ γλυκὺ καὶ ἕκαστον τῶν αἰσθητῶν πρὸς ἕκαστον κρίνομεν, τινὶ καὶ αἰσθανόμεθα ὅτι διαφέρει. ἀνάγκη δὴ αἰσθήσει· αἰσθητὰ γὰρ ἐστίν.

11. ἡ καὶ δῆλον ὅτι ἡ σὰρξ οὐκ ἔστι τὸ ἔσχατον αἰσθητήριον· ἀνάγκη γὰρ ἂν ἦν ἀπτόμενον αὐτὸ κρίνειν τὸ κρῖνον. οὔτε δὴ κεχωρισμένοις ἐνδέχεται κρίνειν ὅτι ἕτερον τὸ γλυκὺ τοῦ λευκοῦ, ἀλλὰ δεῖ ἐνί τινι ἅμφω δῆλα εἶναι· οὕτω μὲν γὰρ κἂν εἰ τοῦ μὲν ἐγὼ τοῦ δὲ σὺ αἰσθοιο, δῆλον ἂν εἴη ὅτι ἕτερα ἀλλήλων, δεῖ δὲ τὸ ἐν λέγειν ὅτι ἕτερον· ἕτερον γὰρ τὸ γλυκὺ τοῦ λευκοῦ· λέγει ἄρα τὸ αὐτό· ὥστε ὥς λέγει, οὕτω καὶ νοεῖ καὶ αἰσθάνεται·

12. ὅτι μὲν οὖν οὐχ οἷόν τε κεχωρισμένοις κρίνειν τὰ κεχωρισμένα, δηλον· ὅτι δ' οὐδ' ἐν κεχωρισμένῳ χρόνῳ, ἐντεῦθεν. ὥσπερ γὰρ τὸ αὐτὸ λέγει ὅτι ἕτερον τὸ ἀγαθὸν καὶ τὸ κακόν, οὕτω καὶ ὅτε θάτερον λέγει ὅτι ἕτερον καὶ θάτερον (οὐ κατὰ συμβεβηκός τὸ ὅτε, λέγω δ', οἷον νῦν λέγω ὅτι ἕτερον, οὐ μέντοι ὅτι νῦν ἕτερον, ἀλλ' οὕτω λέγει, καὶ νῦν καὶ ὅτι νῦν)· ἅμα ἅρα. ὥστε ἀχώριστον καὶ ἐν ἀχωρίστῳ χρόνῳ.

13. ἀλλὰ μὴν ἀδύνατον ἅμα τὰς ἐναντίας κινήσεις κινεῖσθαι τὸ αὐτὸ ἢ ἀδιαίρετον, καὶ ἐν ἀδιαίρετῳ χρόνῳ. εἰ γὰρ γλυκύ, ὥδι κινεῖ τὴν αἴσθησιν [427a]

14. ἢ τὴν νόησιν, τὸ δὲ πικρὸν ἐναντίως, καὶ τὸ λευκὸν ἐτέρως. ἄρ' οὖν ἅμα μὲν ἀριθμῷ ἀδιαίρετον καὶ ἀχώριστον τὸ κρίνον, τῷ εἶναι δὲ κεχωρισμένον; ἔστι δὴ [πῶς] ὥς τὸ διαιρετὸν τῶν διηρημένων αἰσθάνεται, ἔστι δ' ὥς ἢ ἀδιαίρετον· τῷ εἶναι μὲν γὰρ διαιρετόν, τόπῳ δὲ καὶ ἀριθμῷ ἀδιαίρετον. ἢ οὐχ οἷόν τε; δυνάμει μὲν γὰρ τὸ αὐτὸ καὶ ἀδιαίρετον τάναντία, τῷ δ' εἶναι οὐ, ἀλλὰ τῷ ἐνεργεῖσθαι διαιρετόν, καὶ οὐχ οἷόν τε ἅμα λευκὸν καὶ μέλαν εἶναι, ὥστ' οὐδὲ τὰ εἶδη πάσχειν αὐτῶν, εἰ τοιοῦτον ἢ αἴσθησις καὶ ἡ νόησις.

15. ἀλλ' ὥσπερ ἦν καλοῦσί τινες στιγμὴν, ἢ μία καὶ δύο, ταύτη <καὶ ἀδιαίρετος> καὶ διαιρετή. ἢ μὲν οὖν ἀδιαίρετον, ἐν τῷ κρινόν ἐστι καὶ ἅμα, ἢ δὲ διαιρετὸν ὑπάρχει, δις τῷ αὐτῷ χρῆται σημείῳ ἅμα· ἢ μὲν οὖν δις χρῆται τῷ πέρατι, δύο κρίνει καὶ κεχωρισμένα, ἔστιν ὥς κεχωρισμένως· ἢ δὲ ἐνί, ἐν καὶ ἅμα. περὶ μὲν οὖν τῆς ἀρχῆς ἢ φαμέν τὸ ζῶον αἰσθητικὸν εἶναι, διωρίσθω τὸν τρόπον τοῦτον.

Κεφάλαιο 3

[427a17] 1. Ἐπεὶ δὲ δύο διαφοραῖς ὀρίζονται μάλιστα τὴν ψυχὴν, κινήσει τε τῇ κατὰ τόπον καὶ τῷ νοεῖν καὶ φρονεῖν καὶ αἰσθάνεσθαι, δοκεῖ δὲ καὶ τὸ νοεῖν καὶ τὸ φρονεῖν ὥσπερ αἰσθάνεσθαι τι εἶναι (ἐν ἀμφοτέροις γὰρ τούτοις κρίνει τι ἢ ψυχὴ καὶ γνωρίζει τῶν ὄντων), καὶ οἱ γε ἀρχαῖοι τὸ φρονεῖν καὶ τὸ αἰσθάνεσθαι ταὐτὸν εἶναι φασιν- ὥσπερ καὶ Ἐμπεδοκλῆς εἶρηκε “πρὸς παρεδὸν γὰρ μῆτις ἀέξεται ἀνθρώποισιν” καὶ ἐν ἄλλοις “ὅθεν σφίσιν αἰεὶ καὶ τὸ φρονεῖν ἄλλοῖα παρίσταται”, τὸ δ’ αὐτὸ τούτοις βούλεται καὶ τὸ Ὀμήρου “τοῖος γὰρ νόος ἐστίν”,

2. πάντες γὰρ οὗτοι τὸ νοεῖν σωματικὸν ὥσπερ τὸ αἰσθάνεσθαι ὑπολαμβάνουσιν, καὶ αἰσθάνεσθαι τε καὶ φρονεῖν τῷ ὁμοίῳ τὸ ὁμοιον, ὥσπερ καὶ ἐν τοῖς κατ’ ἀρχᾶς λόγοις διωρίσαμεν (καίτοι ἔδει ἅμα καὶ περὶ [427b] τοῦ ἡπατῆσθαι αὐτοὺς λέγειν, οἰκειότερον γὰρ τοῖς ζώοις, καὶ πλείω χρόνον ἐν τούτῳ διατελεῖ ἡ ψυχὴ· διὸ ἀνάγκη ἦτοι, ὥσπερ ἔνιοι λέγουσι, πάντα τὰ φαινόμενα εἶναι ἀληθῆ, ἢ τὴν τοῦ ἀνομοίου θίξιν ἀπάτην εἶναι, τοῦτο γὰρ ἐναντίον τῷ τὸ ὁμοιον τῷ ὁμοίῳ γνωρίζειν· δοκεῖ δὲ καὶ ἡ ἀπάτη καὶ ἡ ἐπιστήμη τῶν ἐναντίων ἢ αὐτὴ εἶναι)

3. ὅτι μὲν οὖν οὐ ταὐτόν ἐστι τὸ αἰσθάνεσθαι καὶ τὸ φρονεῖν, φανερόν· τοῦ μὲν γὰρ πᾶσι μέτεστι, τοῦ δὲ ὀλίγοις τῶν ζώων. ἀλλ’ οὐδὲ τὸ νοεῖν, ἐν ᾧ ἐστι τὸ ὀρθῶς καὶ τὸ μὴ ὀρθῶς, τὸ μὲν ὀρθῶς φρόνησις καὶ ἐπιστήμη καὶ δόξα ἀληθής, τὸ δὲ μὴ ὀρθῶς τάναντία τούτων-οὐδὲ τοῦτο ἐστι ταὐτὸ τῷ αἰσθάνεσθαι· ἡ μὲν γὰρ αἴσθησις τῶν ἰδίων αἰεὶ ἀληθής, καὶ πᾶσιν ὑπάρχει τοῖς ζώοις, διανοεῖσθαι δ’ ἐνδέχεται καὶ ψευδῶς, καὶ οὐδενὶ ὑπάρχει ᾧ μὴ καὶ λόγος·

4. φαντασία γὰρ ἕτερον καὶ αἰσθήσεως καὶ διανοίας, αὕτη τε οὐ γίγνεται ἄνευ αἰσθήσεως, καὶ ἄνευ ταύτης οὐκ ἔστιν ὑπόληψις. ὅτι δ’ οὐκ ἔστιν ἡ αὕτη [νόησις] καὶ ὑπόληψις, φανερόν. τοῦτο μὲν γὰρ τὸ πάθος ἐφ’ ἡμῖν ἐστίν, ὅταν βουλώμεθα (πρὸ ὁμμάτων γὰρ ἔστι τι ποιήσασθαι, ὥσπερ οἱ ἐν τοῖς μνημονικοῖς τιθέμενοι καὶ εἰδωλοποιοῦντες), δοξάζειν δ’ οὐκ ἐφ’ ἡμῖν· ἀνάγκη γὰρ ἢ ψεύδεσθαι ἢ ἀληθεύειν. ἔτι δὲ ὅταν μὲν δοξάσωμεν δεινόν τι ἢ φοβερόν, εὐθύς συμπάσχομεν, ὁμοίως δὲ καὶ θαρραλέον· κατὰ δὲ τὴν φαντασίαν ὡσαύτως ἔχομεν ὥσπερ ἂν εἰ θεώμενοι ἐν γραφῇ τὰ

δεινὰ ἢ θαρραλέα.

5. εἰσὶ δὲ καὶ αὐτῆς τῆς ὑπολήψεως διαφοραί, ἐπιστήμη καὶ δόξα καὶ φρόνησις καὶ τάναντία τούτων, περὶ ὧν τῆς διαφορᾶς ἕτερος ἔστω λόγος. περὶ δὲ τοῦ νοεῖν, ἐπεὶ ἕτερον τοῦ αἰσθάνεσθαι, τούτου δὲ τὸ μὲν φαντασία δοκεῖ εἶναι τὸ δὲ ὑπόληψις, περὶ φαντασίας διορίσαντας οὕτω περὶ θατέρου λεκτέον. [428a]

6. εἰ δὴ ἐστὶν ἡ φαντασία καθ' ἣν λέγομεν φάντασμα τι ἡμῖν γίνεσθαι καὶ μὴ εἶ τι κατὰ μεταφορὰν λέγομεν, <ἄρα> μία τις ἔστι τούτων δύναμις ἢ ἕξις καθ' ἧς κρίνομεν καὶ ἀληθεύομεν ἢ ψευδόμεθα; τοιαῦται δ' εἰσὶν αἰσθησις, δόξα, ἐπιστήμη, νοῦς. ὅτι μὲν οὖν οὐκ ἔστιν αἰσθησις, δηλὸν ἐκ τῶνδε. αἰσθησις μὲν γὰρ ἦτοι δύναμις ἢ ἐνέργεια, οἷον ὄψις καὶ ὄρασις, φαίνεται δέ τι καὶ μηδετέρου ὑπάρχοντος τούτων, οἷον τὰ ἐν τοῖς ὕπνοις. εἴτα αἰσθησις μὲν ἀεὶ πάρεστι, φαντασία δ' οὐ. εἰ δὲ τῇ ἐνεργείᾳ τὸ αὐτό, πᾶσιν ἂν ἐνδέχοιτο τοῖς θηρίοις φαντασίαν ὑπάρχειν· δοκεῖ δ' οὐ, οἷον μύρμηκι ἢ μελίττῃ, σκώληκι δ' οὐ. εἴτα αἰ μὲν ἀληθεῖς ἀεὶ, αἰ δὲ φαντασίαι γίνονται αἰ πλείους ψευδεῖς. ἔπειτα οὐδὲ λέγομεν, ὅταν ἐνεργῶμεν ἀκριβῶς περὶ τὸ αἰσθητόν, ὅτι φαίνεται τοῦτο ἡμῖν ἄνθρωπος, ἀλλὰ μᾶλλον ὅταν μὴ ἐναργῶς αἰσθανώμεθα πότερον ἀληθῆς ἢ ψευδῆς. καὶ ὅπερ δὴ ἐλέγομεν πρότερον, φαίνεται καὶ μύουσιν ὀράματα.

8. ἀλλὰ μὴν οὐδὲ τῶν ἀεὶ ἀληθευουσῶν οὐδεμία ἔσται, οἷον ἐπιστήμη ἢ νοῦς· ἔστι γὰρ φαντασία καὶ ψευδῆς. λείπεται ἄρα ἰδεῖν εἰ δόξα· γίνεται γὰρ δόξα καὶ ἀληθῆς καὶ ψευδῆς, ἀλλὰ δόξη μὲν ἔπεται πίστις (οὐκ ἐνδέχεται γὰρ δοξάζοντα οἷς δοκεῖ μὴ πιστεύειν), τῶν δὲ θηρίων οὐθενὶ ὑπάρχει πίστις, φαντασία δὲ πολλοῖς. [ἔτι πάση μὲν δόξη ἀκολουθεῖ πίστις, πιστεῖ δὲ τὸ πεπεισθαι, πειθοῖ δὲ λόγος· τῶν δὲ θηρίων ἐνίοις φαντασία μὲν ὑπάρχει, λόγος δ' οὐ.] [428a24]

9. φανερόν τοίνυν ὅτι οὐδὲ δόξα μετ' αἰσθήσεως, οὐδὲ δι' αἰσθήσεως, οὐδὲ συμπλοκῇ δόξης καὶ αἰσθήσεως, φαντασία ἂν εἴη, διὰ τε ταῦτα καὶ διότι οὐκ ἄλλου τινὸς ἔσται ἢ δόξα, ἀλλ' ἐκείνου, εἴπερ ἔστιν, οὗ καὶ ἡ αἰσθησις· λέγω δ', ἐκ τῆς τοῦ λευκοῦ δόξης καὶ αἰσθήσεως ἢ συμπλοκῇ φαντασία ἔσται· οὐ γὰρ δὴ ἐκ τῆς δόξης μὲν τῆς τοῦ ἀγαθοῦ, αἰσθήσεως δὲ τῆς τοῦ [428b] λευκοῦ. τὸ οὖν φαίνεσθαι ἔσται τὸ δοξάζειν ὅπερ αἰσθάνεται, μὴ κατὰ συμβεβηκός.

10. φαίνεται δέ γε καὶ ψευδῇ, περὶ ὧν ἅμα ὑπόληψιν ἀληθῆ ἔχει, οἷον φαίνεται μὲν ὁ ἥλιος ποδιαῖος, πιστεύεται δ' εἶναι μείζων τῆς

οίκουμένης· συμβαίνει οὖν ἥτοι ἀποβεβληκέναι τὴν ἑαυτοῦ ἀληθῆ δόξαν, ἣν εἶχε, σωζομένου τοῦ πράγματος, μὴ ἐπιλαθόμενον μηδὲ μεταπεισθέντα, ἢ εἰ ἔτι ἔχει, ἀνάγκη τὴν αὐτὴν ἀληθῆ εἶναι καὶ ψευδῆ. ἀλλὰ ψευδῆς ἐγένετο ὅτε λάθοι μεταπεσὼν τὸ πρᾶγμα. οὗτ' ἄρα ἐν τι τούτων ἐστὶν οὗτ' ἐκ τούτων ἢ φαντασία.

11. ἀλλ' ἐπεὶ δὴ ἔστι κινήεντος τουδὶ κινεῖσθαι ἕτερον ὑπὸ τούτου, ἢ δὲ φαντασία κίνησις τις δοκεῖ εἶναι καὶ οὐκ ἄνευ αἰσθήσεως γίνεσθαι ἀλλ' αἰσθανομένοις καὶ ὧν αἴσθησις ἔστιν, ἔστι δὲ γίνεσθαι κίνησιν ὑπὸ τῆς ἐνεργείας τῆς αἰσθήσεως, καὶ ταύτην ὁμοίαν ἀνάγκη εἶναι τῇ αἰσθήσει, εἴη ἂν αὕτη ἢ κίνησις οὔτε ἄνευ αἰσθήσεως ἐνδεχομένη οὔτε μὴ αἰσθανομένοις ὑπάρχειν, καὶ πολλὰ κατ' αὐτὴν καὶ ποιεῖν καὶ πάσχειν τὸ ἔχον, καὶ εἶναι καὶ ἀληθῆ καὶ ψευδῆ.

12. τοῦτο δὲ συμβαίνει διὰ τὰδε· ἢ αἴσθησις τῶν μὲν ἰδίων ἀληθῆς ἔστιν ἢ ὅτι ὀλίγιστον ἔχουσα τὸ ψεῦδος. δεύτερον δὲ τοῦ συμβεβηκέναι ταῦτα <ἃ συμβέβηκε τοῖς αἰσθητοῖς>· καὶ ἐνταῦθα ἤδη ἐνδέχεται διαψεύδεσθαι· ὅτι μὲν γὰρ λευκόν, οὐ ψεύδεται, εἰ δὲ τοῦτο τὸ λευκόν ἢ ἄλλο τι, ψεύδεται. τρίτον δὲ τῶν κοινῶν καὶ ἐπομένων τοῖς συμβεβηκόσιν οἷς ὑπάρχει τὰ ἴδια (λέγω δ' οἷον κίνησις καὶ μέγεθος) [ἃ συμβέβηκε τοῖς αἰσθητοῖς]· περὶ ἃ μάλιστα ἤδη ἔστιν ἀπατηθῆναι κατὰ τὴν αἴσθησιν.

13. ἢ δὲ κίνησις ἢ ὑπὸ τῆς ἐνεργείας τῆς αἰσθήσεως γινομένη διοίσει, ἢ ἀπὸ τούτων τῶν τριῶν αἰσθήσεων, καὶ ἢ μὲν πρώτη παρούσης τῆς αἰσθήσεως ἀληθῆς, αἱ δ' ἕτεραι καὶ παρούσης καὶ ἀπούσης εἶεν ἂν ψευδεῖς, καὶ μάλιστα ὅταν πόρρω τὸ αἰσθητὸν ᾗ. εἰ οὖν μηθὲν ἄλλο ἔχει τὰ εἰρημένα ἢ [429a] φαντασία (τοῦτο δ' ἐστὶ τὸ λεχθέν), ἢ φαντασία ἂν εἴη κίνησις ὑπὸ τῆς αἰσθήσεως τῆς κατ' ἐνέργειαν γιγνομένη.

14. ἐπεὶ δ' ἢ ὅψις μάλιστα αἴσθησις ἐστὶ, καὶ τὸ ὄνομα ἀπὸ τοῦ φάους εἰληφεν, ὅτι ἄνευ φωτὸς οὐκ ἔστιν ἰδεῖν.

15. καὶ διὰ τὸ ἐμμένειν καὶ ὁμοίας εἶναι ταῖς αἰσθήσεσι, πολλὰ κατ' αὐτάς πράττει τὰ ζῷα, τὰ μὲν διὰ τὸ μὴ ἔχειν νοῦν, οἷον τὰ θηρία, τὰ δὲ διὰ τὸ ἐπικαλύπτεσθαι τὸν νοῦν ἐνίοτε πάθει ἢ νόσῳ ἢ ὕπνῳ, οἷον οἱ ἄνθρωποι. περὶ μὲν οὖν φαντασίας, τί ἐστὶ καὶ διὰ τί ἐστὶν, εἰρήσθω ἐπὶ τοσοῦτον.

Κεφάλαιο 4

[429a10] 1. Περί δὲ τοῦ μορίου τοῦ τῆς ψυχῆς ὃ γινώσκει τε ἡ ψυχὴ καὶ φρονεῖ, εἴτε χωριστοῦ ὄντος εἴτε μὴ χωριστοῦ κατὰ μέγεθος ἀλλὰ κατὰ λόγον, σκεπτέον τίν' ἔχει διαφοράν, καὶ πῶς ποτὲ γίνεται τὸ νοεῖν.

2. εἰ δὴ ἐστὶ τὸ νοεῖν ὥσπερ τὸ αισθάνεσθαι, ἢ πάσχειν τι ἂν εἴη ὑπὸ τοῦ νοητοῦ ἢ τι τοιοῦτον ἕτερον.

3. ἀπαθὲς ἄρα δεῖ εἶναι, δεκτικὸν δὲ τοῦ εἶδους καὶ δυνάμει τοιοῦτον ἀλλὰ μὴ τοῦτο, καὶ ὁμοίως ἔχειν, ὥσπερ τὸ αισθητικὸν πρὸς τὰ αισθητά, οὕτω τὸν νοῦν πρὸς τὰ νοητά. ἀνάγκη ἄρα, ἐπεὶ πάντα νοεῖ, ἀμιγῆ εἶναι, ὥσπερ φησὶν Ἀναξαγόρας, ἵνα κρατῇ, τοῦτο δ' ἐστὶν ἵνα γνωρίζῃ (παρεμφαινόμενον γὰρ κωλύει τὸ ἀλλότριον καὶ ἀντιφράττει)· ὥστε μὴδ' αὐτοῦ εἶναι φύσιν μηδεμίαν ἀλλ' ἢ ταύτην, ὅτι δυνατός. ὁ ἄρα καλούμενος τῆς ψυχῆς νοῦς (λέγω δὲ νοῦν ὃ διανοεῖται καὶ ὑπολαμβάνει ἢ ψυχὴ) οὐθέν ἐστὶν ἐνεργεῖα τῶν ὄντων πρὶν νοεῖν.

4. διὸ οὐδὲ μεμῖχθαι εὐλόγον αὐτὸν τῷ σώματι· ποιός τις γὰρ ἂν γίνοιτο, ἢ ψυχρὸς ἢ θερμός, κἂν ὄργανόν τι εἴη, ὥσπερ τῷ αισθητικῷ· νῦν δ' οὐθέν ἐστιν. καὶ εὖ δὴ οἱ λέγοντες τὴν ψυχὴν εἶναι τόπον εἰδῶν, πλὴν ὅτι οὔτε ὅλη ἀλλ' ἢ νοητικὴ, οὔτε ἐντελεχεῖα ἀλλὰ δυνάμει τὰ εἶδη.

5. ὅτι δ' οὐχ ὁμοία ἡ ἀπάθεια τοῦ αισθητικοῦ καὶ τοῦ νοητικοῦ, φανερόν ἐπὶ τῶν αισθητηρίων καὶ τῆς αἰσθήσεως. ἡ μὲν γὰρ αἰσθησις οὐ δύναται [429b] αισθάνεσθαι ἐκ τοῦ σφόδρα αισθητοῦ, οἷον ψόφου ἐκ τῶν μεγάλων ψόφων, οὐδ' ἐκ τῶν ἰσχυρῶν χρωμάτων καὶ ὁσμῶν οὔτε ὁρᾶν οὔτε ὁσμάσθαι· ἀλλ' ὁ νοῦς ὅταν τι νοήσῃ σφόδρα νοητόν, οὐχ ἥττον νοεῖ τὰ ὑποδεέστερα, ἀλλὰ καὶ μᾶλλον· τὸ μὲν γὰρ αισθητικὸν οὐκ ἄνευ σώματος, ὁ δὲ χωριστός.

6. ὅταν δ' οὕτως ἕκαστα γένηται ὥς ὁ ἐπιστήμων λέγεται ὁ κατ' ἐνέργειαν (τοῦτο δὲ συμβαίνει ὅταν δύνῃται ἐνεργεῖν δι' αὐτοῦ), ἐστὶ μὲν καὶ τότε δυνάμει πῶς, οὐ μὴν ὁμοίως καὶ πρὶν μαθεῖν ἢ εὐρεῖν· καὶ αὐτὸς δι' αὐτοῦ τότε δύναται νοεῖν.

7. ἐπεὶ δ' ἄλλο ἐστὶ τὸ μέγεθος καὶ τὸ μεγέθει εἶναι, καὶ ὕδωρ καὶ ὕδατι εἶναι (οὕτω δὲ καὶ ἐφ' ἐτέρων πολλῶν, ἀλλ' οὐκ ἐπὶ πάντων· ἐπ' ἐνίων γὰρ ταυτόν ἐστι), τὸ σαρκὶ εἶναι καὶ σάρκα ἢ ἄλλῳ ἢ

ἄλλως ἔχοντι κρίνει· ἡ γὰρ σὰρξ οὐκ ἄνευ τῆς ὕλης, ἀλλ' ὥσπερ τὸ σιμόν, τόδε ἐν τῷδε. τῷ μὲν οὖν αἰσθητικῷ τὸ θερμὸν καὶ τὸ ψυχρὸν κρίνει, καὶ ὧν λόγος τις ἡ σὰρξ· ἄλλω δέ, ἥτοι χωριστῷ ἢ ὡς ἡ κεκλασμένη ἔχει πρὸς αὐτὴν ὅταν ἐκταθῇ, τὸ σαρκὶ εἶναι κρίνει.

8. πάλιν δ' ἐπὶ τῶν ἐν ἀφαιρέσει ὄντων τὸ εὐθὺς ὡς τὸ σιμόν· μετὰ συνεχοῦς γάρ· τὸ δὲ τί ἦν εἶναι, εἰ ἔστιν ἕτερον τὸ εὐθεῖ εἶναι καὶ τὸ εὐθύ, ἄλλο· ἔστω γὰρ δυνάς. ἐτέρω ἄρα ἢ ἐτέρως ἔχοντι κρίνει. ὅλως ἄρα ὡς χωριστὰ τὰ πράγματα τῆς ὕλης, οὕτω καὶ τὰ περὶ τὸν νοῦν. [429b22]

9. ἀπορήσειε δ' ἂν τις, εἰ ὁ νοῦς ἀπλοῦν ἐστὶ καὶ ἀπαθὲς καὶ μηθενὶ μηθὲν ἔχει κοινόν, ὥσπερ φησὶν Ἀναξαγόρας, πῶς νοήσει, εἰ τὸ νοεῖν πάσχειν τί ἐστὶν (ἧ γάρ τι κοινὸν ἀμφοῖν ὑπάρχει, τὸ μὲν ποιεῖν δοκεῖ τὸ δὲ πάσχειν),

10. ἔτι δ' εἰ νοητὸς καὶ αὐτός; ἡ γὰρ τοῖς ἄλλοις νοῦς ὑπάρξει, εἰ μὴ κατ' ἄλλο αὐτὸς νοητός, ἐν δέ τι τὸ νοητὸν εἶδει, ἢ μεμιγμένον τι ἔξει, ὃ ποιεῖ νοητὸν αὐτὸν ὥσπερ τᾶλλα.

11. ἡ τὸ μὲν πάσχειν κατὰ κοινόν τι διήρηται πρότερον, ὅτι δυνάμει πῶς ἐστὶ τὰ νοητὰ ὁ νοῦς, ἀλλ' ἐντελεχεία οὐδέν, πρὶν ἂν νοῇ· δυνάμει δ' οὕτως [430a] ὥσπερ ἐν γραμματείῳ ᾧ μηθὲν ἐνυπάρχει ἐντελεχεία γεγραμμένον· ὅπερ συμβαίνει ἐπὶ τοῦ νοῦ.

12. καὶ αὐτὸς δὲ νοητός ἐστὶν ὥσπερ τὰ νοητά. ἐπὶ μὲν γὰρ τῶν ἄνευ ὕλης τὸ αὐτό ἐστὶ τὸ νοοῦν καὶ τὸ νοούμενον· ἡ γὰρ ἐπιστήμη ἢ θεωρητικὴ καὶ τὸ οὕτως ἐπιστητὸν τὸ αὐτό ἐστὶν (τοῦ δὲ μὴ ἀεὶ νοεῖν τὸ αἴτιον ἐπισκεπτέον)· ἐν δὲ τοῖς ἔχουσιν ὕλην δυνάμει ἕκαστον ἐστὶ τῶν νοητῶν. ὥστ' ἐκείνοις μὲν οὐχ ὑπάρξει νοῦς (ἄνευ γὰρ ὕλης δύναμις ὁ νοῦς τῶν τοιούτων), ἐκείνῳ δὲ τὸ νοητὸν ὑπάρξει.

Κεφάλαιο 5

[4310a10] 1. Ἐπεὶ δ' [ὥσπερ] ἐν ἀπάσῃ τῇ φύσει ἐστὶ [τι] τὸ μὲν ὕλη ἐκάστῳ γένει (τοῦτο δὲ ὃ πάντα δυνάμει ἐκεῖνα), ἕτερον δὲ τὸ αἷτιον καὶ ποιητικόν, τῷ ποιεῖν πάντα, οἷον ἡ τέχνη πρὸς τὴν ὕλην πέπονθεν, ἀνάγκη καὶ ἐν τῇ ψυχῇ ὑπάρχειν ταύτας τὰς διαφοράς· καὶ ἔστιν ὁ μὲν τοιοῦτος νοῦς τῷ πάντα γίνεσθαι, ὁ δὲ τῷ πάντα ποιεῖν, ὡς ἕξις τις, οἷον τὸ φῶς· τρόπον γάρ τινα καὶ τὸ φῶς ποιεῖ τὰ δυνάμει ὄντα χρώματα ἐνεργείᾳ χρώματα. καὶ οὗτος ὁ νοῦς χωριστὸς καὶ ἀπαθὴς καὶ ἀμιγής, τῇ οὐσίᾳ ὦν ἐνέργεια·

2. αἰεὶ γὰρ τιμιώτερον τὸ ποιοῦν τοῦ πάσχοντος καὶ ἡ ἀρχὴ τῆς ὕλης. [τὸ δ' αὐτὸ ἐστὶν ἢ κατ' ἐνέργειαν ἐπιστήμη τῷ πράγματι· ἢ δὲ κατὰ δύνάμιν χρόνῳ προτέρα ἐν τῷ ἐνί, ὅλως δὲ οὐδὲ χρόνῳ, ἀλλ' οὐχ ὅτε μὲν νοεῖ ὅτε δ' οὐ νοεῖ.] χωρισθεῖς δ' ἐστὶ μόνον τοῦθ' ὅπερ ἐστὶ, καὶ τοῦτο μόνον ἀθάνατον καὶ αἰδῖον (οὐ μνημονεύομεν δέ, ὅτι τοῦτο μὲν ἀπαθές, ὁ δὲ παθητικὸς νοῦς φθαρτός)· καὶ ἄνευ τούτου οὐθὲν νοεῖ.

Κεφάλαιο 6

[430a27] 1. Ἡ μὲν οὖν τῶν ἀδιαιρέτων νόησις ἐν τούτοις περὶ ἃ οὐκ ἔστι τὸ ψεῦδος, ἐν οἷς δὲ καὶ τὸ ψεῦδος καὶ τὸ ἀληθές σύνθεσις τις ἤδη νοημάτων ὥσπερ ἐν ὄντων-καθάπερ Ἐμπεδοκλῆς ἔφη “ἢ πολλῶν μὲν κόρσαι ἀναύχενες ἐβλάστησαν”, ἔπειτα συντίθεσθαι τῇ φιλίᾳ, οὕτω καὶ ταῦτα κεχωρισμένα συντίθεται, οἷον τὸ ἀσύμμετρον καὶ ἡ διάμετρος -

2. ἂν δὲ [430b] γενομένων ἢ ἐσομένων, τὸν χρόνον προσεννοῶν [καὶ] συντίθησι. τὸ γὰρ ψεῦδος ἐν συνθέσει ἀεί· καὶ γὰρ ἂν τὸ λευκὸν μὴ λευκὸν <φῆ, τὸ λευκὸν καὶ> τὸ μὴ λευκὸν συνέθηκεν· ἐνδέχεται δὲ καὶ διαίρεσιν φάναι πάντα. ἀλλ’ οὖν ἔστι γε οὐ μόνον τὸ ψεῦδος ἢ ἀληθές ὅτι λευκὸς Κλέων ἐστίν, ἀλλὰ καὶ ὅτι ἦν ἢ ἔσται. τὸ δὲ ἐν ποιοῦν ἕκαστον, τοῦτο ὁ νοῦς. [430b6]

3. τὸ δ’ ἀδιαιρέτον ἐπεὶ διχῶς, ἢ δυνάμει ἢ ἐνεργείᾳ, οὐθὲν κωλύει νοεῖν τὸ <διαιρετὸν ἦ> ἀδιαιρέτον, <οἷον> ὅταν νοῇ τὸ μῆκος (ἀδιαιρέτον γὰρ ἐνεργείᾳ), καὶ ἐν χρόνῳ ἀδιαιρέτῳ· ὁμοίως γὰρ ὁ χρόνος διαιρετὸς καὶ ἀδιαιρέτος τῷ μήκει. οὐκ οὖν ἔστιν εἰπεῖν ἐν τῷ ἡμίσει τί ἐνόει ἑκατέρῳ· οὐ γὰρ ἔστιν, ἂν μὴ διαιρεθῇ, ἀλλ’ ἢ δυνάμει. χωρὶς δ’ ἑκάτερον νοῶν τῶν ἡμίσεων διαιρεῖ καὶ τὸν χρόνον ἅμα, τότε δ’ οἰονεῖ μήκη· εἰ δ’ ὥς ἐξ ἀμφοῖν, καὶ ἐν τῷ χρόνῳ τῷ ἐπ’ ἀμφοῖν.

4. [τὸ δὲ μὴ κατὰ τὸ ποσὸν ἀδιαιρέτον ἀλλὰ τῷ εἶδει νοεῖ ἐν ἀδιαιρέτῳ χρόνῳ καὶ ἀδιαιρέτῳ τῆς ψυχῆς.] κατὰ συμβεβηκὸς δέ, καὶ οὐχ ἢ ἐκεῖνα, διαιρετὰ ὁ νοεῖ καὶ ἐν ᾧ χρόνῳ, ἀλλ’ ἢ <ἐκεῖνα> ἀδιαιρέτα· ἔνεστι γὰρ κὰν τούτοις τι ἀδιαιρέτον, ἀλλ’ ἴσως οὐ χωριστόν, ὁ ποιεῖ ἓνα τὸν χρόνον καὶ τὸ μῆκος. καὶ τοῦθ’ ὁμοίως ἐν ἅπαντί ἐστι τῷ συνεχεῖ, καὶ χρόνῳ καὶ μήκει. [430b20] <τὸ δὲ μὴ κατὰ τὸ ποσὸν ἀδιαιρέτον ἀλλὰ τῷ εἶδει νοεῖ ἐν ἀδιαιρέτῳ χρόνῳ καὶ ἀδιαιρέτῳ <τῷ> τῆς ψυχῆς.>

5. ἢ δὲ στιγμή καὶ πᾶσα διαίρεσις, καὶ τὸ οὕτως ἀδιαιρέτον, δηλοῦται ὥσπερ ἡ στέρησις. καὶ ὁμοιος ὁ λόγος ἐπὶ τῶν ἄλλων, οἷον πῶς τὸ κακὸν γνωρίζει ἢ τὸ μέλαν· τῷ ἐναντίῳ γὰρ πῶς γνωρίζει.

6. δεῖ δὲ δυνάμει εἶναι τὸ γνωρίζον καὶ ἐνεῖναι ἐν αὐτῷ. εἰ δέ τινη μὴδὲν ἔστιν ἐναντίον [τῶν αἰτίων], αὐτὸ ἑαυτὸ γινώσκει καὶ ἐνεργείᾳ ἔστι καὶ χωριστόν.

7. ἔστι δ' ἡ μὲν φάσις τι κατὰ τινος, ὥσπερ καὶ ἡ ἀπόφασις, καὶ ἀληθοῦς ἢ ψευδοῦς πᾶσα· ὁ δὲ νοῦς οὐ πᾶς, ἀλλ' ὁ τοῦ τί ἐστι κατὰ τὸ τί ἦν εἶναι ἀληθοῦς, καὶ οὐ τι κατὰ τινος· ἀλλ' ὥσπερ τὸ ὁρᾶν τοῦ ἰδίου ἀληθές, εἰ δ' ἄνθρωπος τὸ λευκὸν ἢ μή, οὐκ ἀληθές ἀεί, οὕτως ἔχει ὅσα ἄνευ ὕλης.

Κεφάλαιο 7

[431a] 1. Τὸ δ' αὐτό ἐστὶν ἡ κατ' ἐνέργειαν ἐπιστήμη τῷ πράγματι. ἡ δὲ κατὰ δύναμιν χρόνῳ προτέρα ἐν τῷ ἐνί, ὅλως δὲ οὐδὲ χρόνῳ· ἔστι γὰρ ἐξ ἐντελεχείᾳ ὄντος πάντα τὰ γιγνόμενα. -φαίνεται δὲ τὸ μὲν αἰσθητὸν ἐκ δυνάμει ὄντος τοῦ αἰσθητικοῦ ἐνεργείᾳ ποιοῦν· οὐ γὰρ πάσχει οὐδ' ἀλλοιοῦται. διὸ ἄλλο εἶδος τοῦτο κινήσεως· ἡ γὰρ κίνησις τοῦ ἀτελοῦς ἐνέργεια, ἡ δ' ἀπλῶς ἐνέργεια ἐτέρα, ἡ τοῦ τετελεσμένου.

2. τὸ μὲν οὖν αἰσθάνεσθαι ὅμοιον τῷ φάναι μόνον καὶ νοεῖν· ὅταν δὲ ἡδὺ ἢ λυπηρόν, οἷον καταφᾶσα ἢ ἀποφᾶσα διώκει ἢ φεύγει· καὶ ἔστι τὸ ἡδεσθαι καὶ λυπεῖσθαι τὸ ἐνεργεῖν τῇ αἰσθητικῇ μεσότητι πρὸς τὸ ἀγαθὸν ἢ κακόν, ἢ τοιαῦτα. καὶ ἡ φυγὴ δὲ καὶ ἡ ὀρεξις ταῦτό, ἡ κατ' ἐνέργειαν, καὶ οὐχ ἕτερον τὸ ὀρεκτικὸν καὶ τὸ φευκτικόν, οὐτ' ἀλλήλων οὔτε τοῦ αἰσθητικοῦ· ἀλλὰ τὸ εἶναι ἄλλο.

3. τῇ δὲ διανοητικῇ ψυχῇ τὰ φαντάσματα οἷον αἰσθήματα ὑπάρχει, ὅταν δὲ ἀγαθὸν ἢ κακὸν φήσῃ ἢ ἀποφῇσῃ, φεύγει ἢ διώκει· διὸ οὐδέποτε νοεῖ ἄνευ φαντάσματος ἢ ψυχῇ. -ὥσπερ δὲ ὁ ἀῆρ τὴν κόρην τοιανδὶ ἐποίησεν, αὕτη δ' ἕτερον, καὶ ἡ ἀκοὴ ὡσαύτως, τὸ δὲ ἔσχατον ἓν, καὶ μία <ἡ> μεσότης, τὸ δ' εἶναι αὐτῇ πλεῖω ... [431a20]

4. -τίνι δ' ἐπικρίνει τί διαφέρει γλυκὺ καὶ θερμόν, εἴρηται μὲν καὶ πρότερον, λεκτέον δὲ καὶ ὧδε. ἔστι γὰρ ἐν τι, οὕτω δὲ ὡς ὁ ὅρος, καὶ ταῦτα, ἐν τῷ ἀνάλογον καὶ τῷ ἀριθμῷ ὄντα, ἔχει <ἐκάτερον> πρὸς ἐκάτερον ὡς ἐκεῖνα πρὸς ἄλληλα· τί γὰρ διαφέρει τὸ ἀπορεῖν πῶς τὰ μὴ ὁμογενῆ κρίνει ἢ τὰ ἐναντία, οἷον λευκὸν καὶ μέλαν; ἔστω δὴ ὡς τὸ Α τὸ λευκὸν πρὸς τὸ Β τὸ μέλαν, τὸ Γ πρὸς τὸ Δ [ὡς ἐκεῖνα πρὸς ἄλληλα]· ὥστε καὶ ἐναλλάξ. εἰ δὴ τὰ ΓΑ ἐνὶ εἴῃ ὑπάρχοντα, οὕτως ἔξει, ὥσπερ καὶ τὰ ΔΒ, τὸ αὐτὸ μὲν καὶ ἓν, τὸ δ' εἶναι οὐ τὸ αὐτό· κακεῖνα ὁμοίως. ὁ δ' αὐτὸς [431b] λόγος καὶ εἰ τὸ μὲν Α τὸ γλυκὺ εἴῃ, τὸ δὲ Β τὸ λευκόν.

5. τὰ μὲν οὖν εἶδη τὸ νοητικὸν ἐν τοῖς φαντάσμασι νοεῖ, καὶ ὡς ἐν ἐκείνοις ὥριστα αὐτῷ τὸ διωκτὸν καὶ φευκτὸν, καὶ ἐκτὸς τῆς αἰσθήσεως, ὅταν ἐπὶ τῶν φαντασμάτων ἦ, κινεῖται· οἷον, αἰσθανόμενος τὸν φρυκτὸν ὅτι πῦρ, τῇ κοινῇ ὁρῶν κινούμενον γνωρίζει ὅτι πολέμιος·

6. ὅτε δὲ τοῖς ἐν τῇ ψυχῇ φαντάσμασιν ἢ νοήμασιν, ὥσπερ ὁρῶν,

λογίζεται καὶ βουλεύεται τὰ μέλλοντα πρὸς τὰ παρόντα· καὶ ὅταν εἴπῃ ὡς ἐκεῖ τὸ ἥδὺ ἢ λυπηρόν, ἐνταῦθα φεύγει ἢ διώκει- καὶ ὅλως ἐν πράξει. καὶ τὸ ἄνευ δὲ πράξεως, τὸ ἀληθὲς καὶ τὸ ψεῦδος, ἐν τῷ αὐτῷ γένει ἐστὶ τῷ ἀγαθῷ καὶ τῷ κακῷ· ἀλλὰ τῷ γε ἀπλῶς διαφέρει καὶ τινί.

7. -τὰ δὲ ἐν ἀφαιρέσει λεγόμενα <νοεῖ> ὥσπερ, εἰ <τις> τὸ σιμὸν ἢ μὲν σιμὸν οὐ, κεχωρισμένως δὲ ἢ κοῖλον [εἴ τις] ἐνόει [ἐνεργεία], ἄνευ τῆς σαρκὸς ἂν ἐνόει ἐν ἢ τὸ κοῖλον-οὕτω τὰ μαθηματικά, οὐ κεχωρισμένα <ὄντα>, ὡς κεχωρισμένα νοεῖ, ὅταν νοῇ <ἢ> ἐκεῖνα.

8. ὅλως δὲ ὁ νοῦς ἐστίν, ὁ κατ' ἐνέργειαν, τὰ πράγματα. ἄρα δ' ἐνδέχεται τῶν κεχωρισμένων τι νοεῖν ὄντα αὐτὸν μὴ κεχωρισμένον μεγέθους, ἢ οὐ, σκεπτέον ὕστερον.

Κεφάλαιο 8

[431b20] 1. Νῦν δέ, περὶ ψυχῆς τὰ λεχθέντα συγκεφαλαιώσαντες, εἵπωμεν πάλιν ὅτι ἡ ψυχὴ τὰ ὄντα πῶς ἐστὶ πάντα· ἡ γὰρ αἰσθητὰ τὰ ὄντα ἢ νοητά, ἔστι δ' ἡ ἐπιστήμη μὲν τὰ ἐπιστητά πως, ἡ δ' αἰσθησις τὰ αἰσθητά·

2. πῶς δὲ τοῦτο, δεῖ ζητεῖν. τέμνεται οὖν ἡ ἐπιστήμη καὶ ἡ αἰσθησις εἰς τὰ πράγματα, ἡ μὲν δυνάμει εἰς τὰ δυνάμει, ἡ δ' ἐντελεχεία εἰς τὰ ἐντελεχεία· τῆς δὲ ψυχῆς τὸ αἰσθητικὸν καὶ τὸ ἐπιστημονικὸν δυνάμει ταῦτά ἐστι, τὸ μὲν <τὸ> ἐπιστητὸν τὸ δὲ <τὸ> αἰσθητόν. ἀνάγκη δ' ἡ αὐτὰ ἢ τὰ εἶδη εἶναι. αὐτὰ μὲν δὴ οὐ· οὐ γὰρ ὁ λίθος ἐν τῇ ψυχῇ, ἀλλὰ τὸ [432a] εἶδος· ὥστε ἡ ψυχὴ ὥσπερ ἡ χεὶρ ἐστίν· καὶ γὰρ ἡ χεὶρ ὄργανόν ἐστιν ὀργάνων, καὶ ὁ νοῦς εἶδος εἰδῶν καὶ ἡ αἰσθησις εἶδος αἰσθητῶν.

3. ἐπεὶ δὲ οὐδὲ πρᾶγμα οὐθὲν ἔστι παρὰ τὰ μεγέθη, ὥς δοκεῖ, τὰ αἰσθητὰ κεχωρισμένον, ἐν τοῖς εἶδεσι τοῖς αἰσθητοῖς τὰ νοητά ἐστι, τά τε ἐν ἀφαιρέσει λεγόμενα καὶ ὅσα τῶν αἰσθητῶν ἔξεις καὶ πάθη. καὶ διὰ τοῦτο οὔτε μὴ αἰσθανόμενος μὴθὲν οὐθὲν ἂν μάθοι οὐδὲ ζυνείη, ὅταν τε θεωρῇ, ἀνάγκη ἅμα φάντασμα τι θεωρεῖν· τὰ γὰρ φαντάσματα ὥσπερ αἰσθήματά ἐστι, πλὴν ἄνευ ὕλης. ἔστι δ' ἡ φαντασία ἕτερον φάσεως καὶ ἀποφάσεως· συμπλοκὴ γὰρ νοημάτων ἐστὶ τὸ ἀληθὲς ἢ ψεῦδος. τὰ δὲ πρῶτα νοήματα τί διοίσει τοῦ μὴ φαντάσματα εἶναι; ἢ οὐδὲ ταῦτα φαντάσματα, ἀλλ' οὐκ ἄνευ φαντασμάτων.

Κεφάλαιο 9

[432a15] 1. Ἐπεὶ δὲ ἡ ψυχὴ κατὰ δύο ὥριται δυνάμεις ἡ τῶν ζῴων, τῷ τε κριτικῷ, ὃ διανοίας ἔργον ἐστὶ καὶ αἰσθήσεως, καὶ ἔτι τῷ κινεῖν τὴν κατὰ τόπον κίνησιν, περὶ μὲν αἰσθήσεως καὶ νοῦ διωρίσθω τοσαῦτα, περὶ δὲ τοῦ κινουῦντος, τί ποτὲ ἐστὶ τῆς ψυχῆς, σκεπτέον, πότερον ἓν τι μόριον αὐτῆς χωριστὸν ὄν ἢ μεγέθει ἢ λόγῳ, ἢ πᾶσα ἡ ψυχὴ, καὶ εἰ μόριόν τι, πότερον ἴδιόν τι παρὰ τὰ εἰωθότα λέγεσθαι καὶ τὰ εἰρημένα, ἢ τούτων ἓν τι.

2. ἔχει δὲ ἀπορίαν εὐθὺς πῶς τε δεῖ μόρια λέγειν τῆς ψυχῆς καὶ πόσα. τρόπον γάρ τινα ἄπειρα φαίνεται, καὶ οὐ μόνον ἅ τινες λέγουσι διορίζοντες, λογιστικὸν καὶ θυμικὸν καὶ ἐπιθυμητικόν, οἱ δὲ τὸ λόγον ἔχον καὶ τὸ ἄλογον· κατὰ γὰρ τὰς διαφορὰς δι' ἃς ταῦτα χωρίζουσι, καὶ ἄλλα φαίνεται μόρια μείζω διάστασιν ἔχοντα τούτων, περὶ ὧν καὶ νῦν εἴρηται, τό τε θεραπευτικόν, ὃ καὶ τοῖς φυτοῖς ὑπάρχει καὶ πᾶσι τοῖς ζῴοις, καὶ τὸ αἰσθητικόν, ὃ οὔτε ὡς ἄλογον οὔτε ὡς λόγον ἔχον θεὸν ἂν τις ῥαδίως·

3. ἔτι δὲ τὸ φανταστικόν, [432b] ὃ τῷ μὲν εἶναι πάντων ἕτερον, τίνι δὲ τούτων ταῦτόν ἢ ἕτερον ἔχει πολλὴν ἀπορίαν, εἴ τις θήσει κεχωρισμένα μόρια τῆς ψυχῆς· πρὸς δὲ τούτοις τὸ ὀρεκτικόν, ὃ καὶ λόγῳ καὶ δυνάμει ἕτερον ἂν δόξειεν εἶναι πάντων. καὶ ἄτοπον δὴ τὸ τοῦτο διασπᾶν· ἓν τε τῷ λογιστικῷ γὰρ ἡ βούλησις γίνεται, καὶ ἐν τῷ ἀλόγῳ ἡ ἐπιθυμία καὶ ὁ θυμός· εἰ δὲ τρία ἢ ψυχὴ, ἐν ἐκάστῳ ἔσται ὀρεξις.

4. καὶ δὴ καὶ περὶ οὗ νῦν ὁ λόγος ἐνέστηκε, τί τὸ κινεῖν κατὰ τόπον τὸ ζῷόν ἐστιν; τὴν μὲν γὰρ κατ' αὖξιν καὶ φθίνιν κίνησιν, ἅπασιν ὑπάρχουσιν, τὸ πᾶσιν ὑπάρχον δόξειεν ἂν κινεῖν, τὸ γεννητικὸν καὶ θεραπευτικόν· περὶ δὲ ἀναπνοῆς καὶ ἐκπνοῆς, καὶ ὕπνου καὶ ἐγρηγόρσεως, ὕστερον ἐπισκεπτέον· ἔχει γὰρ καὶ ταῦτα πολλὴν ἀπορίαν.

5. ἀλλὰ περὶ τῆς κατὰ τόπον κινήσεως, τί τὸ κινεῖν τὸ ζῷον τὴν πορευτικὴν κίνησιν, σκεπτέον. ὅτι μὲν οὖν οὐχ ἡ θεραπευτικὴ δύναμις, δῆλον· ἀεὶ τε γὰρ ἕνεκά του ἡ κίνησις αὕτη, καὶ μετὰ φαντασίας καὶ ὀρέξεώς ἐστιν· οὐθὲν γὰρ μὴ ὀρεγόμενον ἢ φεῦγον κινεῖται ἀλλ' ἢ βία· ἔτι κἂν τὰ φυτὰ κινητικὰ ᾖν, κἂν εἶχέ τι μόριον ὀργανικὸν πρὸς τὴν κίνησιν ταύτην.

6. ὁμοίως δὲ οὐδὲ τὸ αἰσθητικόν· πολλὰ γὰρ ἔστι τῶν ζώων ἃ αἰσθῆσιν μὲν ἔχει, μόνιμα δ' ἐστὶ καὶ ἀκίνητα διὰ τέλους. εἰ οὖν ἡ φύσις μήτε ποιεῖ μάτην μηθὲν μήτε ἀπολείπει τι τῶν ἀναγκαίων, πλὴν ἐν τοῖς πηρώμασι καὶ ἐν τοῖς ἀτελέσιν, τὰ δὲ τοιαῦτα τῶν ζώων τέλεια καὶ οὐ πηρώματά ἐστιν (σημεῖον δ' ὅτι ἐστὶ γεννητικὰ καὶ ἀκμὴν ἔχει καὶ φθίσιν) -ὥστ' εἶχεν ἂν καὶ τὰ ὀργανικὰ μέρη τῆς πορείας.

7. ἀλλὰ μὴν οὐδὲ τὸ λογιστικόν καὶ ὁ καλούμενος νοῦς ἐστὶν ὁ κινῶν· ὁ μὲν γὰρ θεωρητικὸς οὐθὲν θεωρεῖ πρακτόν, οὐδὲ λέγει περὶ φευκτοῦ καὶ διωκτοῦ οὐθέν, ἀεὶ δὲ ἡ κίνησις ἢ φεύγοντός τι ἢ διώκοντός τί ἐστιν. ἀλλ' οὐδ' ὅταν θεωρῇ τι τοιοῦτον, ἤδη κελεύει φεύγειν ἢ διώκειν, οἷον πολλάκις διανοεῖται φοβερόν τι ἢ ἡδύ, οὐ κελεύει δὲ φοβεῖσθαι, ἢ δὲ καρδία [433a] κινεῖται, ἂν δ' ἡδύ, ἕτερόν τι μόριον.

8. ἔτι καὶ ἐπιτάττοντος τοῦ νοῦ καὶ λεγούσης τῆς διανοίας φεύγειν τι ἢ διώκειν οὐ κινεῖται, ἀλλὰ κατὰ τὴν ἐπιθυμίαν πράττει, οἷον ὁ ἀκρατής. καὶ ὅλως δὲ ὁρῶμεν ὅτι ὁ ἔχων τὴν ἰατρικὴν οὐκ ἰᾶται, ὥς ἐτέρου τινὸς κυρίου ὄντος τοῦ ποιεῖν κατὰ τὴν ἐπιστήμην, ἀλλ' οὐ τῆς ἐπιστήμης. ἀλλὰ μὴν οὐδ' ἡ ὄρεξις ταύτης κυρία τῆς κινήσεως· οἱ γὰρ ἐγκρατεῖς ὀρεγόμενοι καὶ ἐπιθυμοῦντες οὐ πράττουσιν ὧν ἔχουσι τὴν ὄρεξιν, ἀλλ' ἀκολουθοῦσι τῷ νῷ.

Κεφάλαιο 10

[433a9] 1. Φαίνεται δέ γε δύο ταῦτα κινούμενα, ἡ ὄρεξις ἢ νοῦς, εἴ τις τὴν φαντασίαν τιθεῖν ὡς νόησιν τινα· πολλοὶ γὰρ παρὰ τὴν ἐπιστήμην ἀκολουθοῦσι ταῖς φαντασίαις, καὶ ἐν τοῖς ἄλλοις ζώοις οὐ νόησις οὐδὲ λογισμὸς ἔστιν, ἀλλὰ φαντασία. ἅμφω ἄρα ταῦτα κινητικὰ κατὰ τόπον, νοῦς καὶ ὄρεξις,

2. νοῦς δὲ ὁ ἕνεκά του λογιζόμενος καὶ ὁ πρακτικός· διαφέρει δὲ τοῦ θεωρητικοῦ τῷ τέλει. καὶ ἡ ὄρεξις <δ’> ἕνεκά του πᾶσα· οὗ γὰρ ἡ ὄρεξις, αὕτη ἀρχὴ τοῦ πρακτικοῦ νοῦ, τὸ δ’ ἔσχατον ἀρχὴ τῆς πράξεως. ὥστε εὐλόγως δύο ταῦτα φαίνεται τὰ κινούμενα, ὄρεξις καὶ διάνοια πρακτική· τὸ ὀρεκτὸν γὰρ κι- νεῖ, καὶ διὰ τοῦτο ἡ διάνοια κινεῖ, ὅτι ἀρχὴ αὐτῆς ἐστὶ τὸ ὀρεκτόν.

3. καὶ ἡ φαντασία δὲ ὅταν κινῇ, οὐ κινεῖ ἄνευ ὀρέξεως. ἐν δὲ τι τὸ κινεῖν, τὸ ὀρεκτικόν. εἰ γὰρ δύο, νοῦς καὶ ὄρεξις, ἐκίνουν, κατὰ κοινὸν ἂν τι ἐκίνουν εἶδος· νῦν δὲ ὁ μὲν νοῦς οὐ φαίνεται κινῶν ἄνευ ὀρέξεως (ἡ γὰρ βούλησις ὄρεξις, ὅταν δὲ κατὰ τὸν λογισμὸν κινῆται, καὶ κατὰ βούλησιν κινεῖται), ἡ δ’ ὄρεξις κινεῖ καὶ παρὰ τὸν λογισμόν· ἡ γὰρ ἐπιθυμία ὀρεξίς τίς ἐστιν.

4. νοῦς μὲν οὖν πᾶς ὀρθός ἐστιν· ὄρεξις δὲ καὶ φαντασία καὶ ὀρθὴ καὶ οὐκ ὀρθή. διὸ αἰεὶ κινεῖ μὲν τὸ ὀρεκτόν, ἀλλὰ τοῦτ’ ἐστὶν ἡ τὸ ἀγαθὸν ἢ τὸ φαινόμενον ἀγαθόν· οὐ πᾶν δέ, ἀλλὰ τὸ πρακτὸν ἀγαθόν. πρακτὸν δ’ ἐστὶ τὸ ἐνδεχόμενον καὶ ἄλλως ἔχειν.

5. ὅτι μὲν οὖν ἡ τοιαύτη δύναμις κινεῖ τῆς ψυχῆς, ἡ καλουμένη [433b] ὄρεξις, φανερόν. τοῖς δὲ διαιροῦσι τὰ μέρη τῆς ψυχῆς, ἐὰν κατὰ τὰς δυνάμεις διαιρῶσι καὶ χωρίζωσι, πάμπολλα γίνεται, θρεπτικόν, αἰσθητικόν, νοητικόν, βουλευτικόν, ἔτι ὀρεκτικόν· ταῦτα γὰρ πλεον διαφέρει ἀλλήλων ἢ ἐπιθυμητικὸν καὶ θυμικόν.

6. ἐπεὶ δ’ ὀρέξεις γίνονται ἐναντίαι ἀλλήλαις, τοῦτο δὲ συμβαίνει ὅταν ὁ λόγος καὶ αἱ ἐπιθυμίαι ἐναντίαι ᾧσι, γίνεται δ’ ἐν τοῖς χρόνου αἴσθησιν ἔχουσιν (ὁ μὲν γὰρ νοῦς διὰ τὸ μέλλον ἀνθέλκειν κελεύει, ἡ δ’ ἐπιθυμία διὰ τὸ ἥδη· φαίνεται γὰρ τὸ ἥδη ἡδὺ καὶ ἀπλῶς ἡδὺ καὶ ἀγαθὸν ἀπλῶς, διὰ τὸ μὴ ὄραν τὸ μέλλον), εἶδει μὲν ἐν ᾧ εἴη τὸ κινεῖν, τὸ ὀρεκτικόν, ἢ ὀρεκτικόν-πρῶτον δὲ πάντων τὸ ὀρεκτόν· τοῦτο γὰρ κινεῖ οὐ κινούμενον, τῷ νοηθῆναι ἢ φαντασθῆναι-ἀριθμῶ δὲ πλείω τὰ κινούμενα.

7. ἐπεὶ δ' ἔστι τρία, ἐν μὲν τὸ κινεῖν, δεύτερον δ' ὃ κινεῖ, ἔτι τρίτον τὸ κινούμενον, τὸ δὲ κινεῖν διπτόν, τὸ μὲν ἀκίνητον, τὸ δὲ κινεῖν καὶ κινούμενον, ἔστι δὴ τὸ μὲν ἀκίνητον τὸ πρακτὸν ἀγαθόν, τὸ δὲ κινεῖν καὶ κινούμενον τὸ ὁρεκτικόν (κινεῖται γὰρ τὸ κινούμενον ἢ ὁρέγεται, καὶ ἡ ὄρεξις κίνησις τίς ἐστίν, ἡ ἐνεργεία), τὸ δὲ κινούμενον τὸ ζῶον· ὃ δὲ κινεῖ ὀργάνῳ ἢ ὄρεξις, ἥδη τοῦτο σωματικόν ἐστίν - διὸ ἐν τοῖς κοινοῖς σώματος καὶ ψυχῆς ἔργοις θεωρητέον περὶ αὐτοῦ.

8. νῦν δὲ ὡς ἐν κεφαλαίῳ εἰπεῖν, τὸ κινεῖν ὁργανικῶς ὅπου ἀρχὴ καὶ τελευτὴ τὸ αὐτό-οἶον ὁ γιγλυμός· ἐνταῦθα γὰρ τὸ κυρτόν καὶ τὸ κοῖλον τὸ μὲν τελευτὴ τὸ δ' ἀρχή (διὸ τὸ μὲν ἡρεμεῖ τὸ δὲ κινεῖται), λόγῳ μὲν ἕτερα ὄντα, μεγέθει δ' ἀχώριστα. πάντα γὰρ ὥσει καὶ ἔλξει κινεῖται· διὸ δεῖ, ὥσπερ ἐν κύκλῳ, μένειν τι, καὶ ἐντεῦθεν ἄρχεσθαι τὴν κίνησιν.

9. ὅλως μὲν οὖν, ὥσπερ εἴρηται, ἢ ὁρεκτικὸν τὸ ζῶον, ταύτῃ αὐτοῦ κινητικόν· ὁρεκτικὸν δὲ οὐκ ἄνευ φαντασίας· φαντασία δὲ πᾶσα ἢ λογιστικὴ ἢ αἰσθητικὴ. ταύτης μὲν οὖν καὶ τὰ ἄλλα ζῶα μετέχει.

Κεφάλαιο 11

[433b31] 1. Σκεπτέον δὲ καὶ περὶ τῶν ἀτελῶν τί τὸ κινεῖν ἐστίν, [434a] οἷς ἀφ᾽ ἑνὸς μόνον ὑπάρχει αἴσθησις, πότερον ἐνδέχεται φαντασίαν ὑπάρχειν τούτοις, ἢ οὐ, καὶ ἐπιθυμίαν. φαίνεται γὰρ λύπη καὶ ἡδονὴ ἐνοῦσα, εἰ δὲ ταῦτα, καὶ ἐπιθυμίαν ἀνάγκη. φαντασία δὲ πῶς ἂν ἐνεῖη; ἢ ὥσπερ καὶ κινεῖται ἀορίστως, καὶ ταῦτ' ἔνεστι μὲν, ἀορίστως δ' ἔνεστιν.

2. ἢ μὲν οὖν αἰσθητικὴ φαντασία, ὥσπερ εἴρηται, καὶ ἐν τοῖς ἄλλοις ζώοις ὑπάρχει, ἢ δὲ βουλευτικὴ ἐν τοῖς λογιστικοῖς (πότερον γὰρ πράξει τόδε ἢ τόδε, λογισμοῦ ἥδη ἐστὶν ἔργον· καὶ ἀνάγκη ἐνὶ μετρεῖν· τὸ μείζον γὰρ διώκει· ὥστε δύναται ἐν ἐκ πλειόνων φαντασμάτων ποιεῖν). καὶ αἴτιον τοῦτο τοῦ δόξαν μὴ δοκεῖν ἔχειν, ὅτι τὴν ἐκ συλλογισμοῦ οὐκ ἔχει, αὕτη δὲ κινεῖ.

3. διὸ τὸ βουλευτικὸν οὐκ ἔχει ἢ ὄρεξις· νικᾷ δ' ἐνίοτε καὶ κινεῖ ὅτε μὲν αὕτη ἐκείνην, ὅτε δ' ἐκείνη ταύτην, ὥσπερ σφαῖρα <σφαῖραν>, ἢ ὄρεξις τὴν ὄρεξιν, ὅταν ἀκρασία γένηται· φύσει δὲ αἰεὶ ἢ ἄνω ἀρχικωτέρα καὶ κινεῖ· ὥστε τρεῖς φορὰς ἤδη κινεῖσθαι.

4. τὸ δ' ἐπιστημονικὸν οὐ κινεῖται, ἀλλὰ μένει. ἐπεὶ δ' ἢ μὲν καθόλου ὑπόληψις καὶ λόγος, ἢ δὲ τοῦ καθ' ἑκάστον (ἢ μὲν γὰρ λέγει ὅτι δεῖ τὸν τοιοῦτον τὸ τοιόνδε πράττειν, ἢ δὲ ὅτι τόδε τοιόνδε, καὶ γὰρ δὲ τοιόσδε), ἢ δὴ αὕτη κινεῖ ἢ δόξα, οὐχ ἢ καθόλου, ἢ ἅμω, ἀλλ' ἢ μὲν ἡρεμοῦσα μᾶλλον, ἢ δ' οὐ.

Κεφάλαιο 12

[434a21] 1. Τὴν μὲν οὖν θεραπετικὴν ψυχὴν ἀνάγκη πᾶν ἔχειν ὅτι περ ἂν ζῇ καὶ ψυχὴν ἔχῃ, ἀπὸ γενέσεως καὶ μέχρι φθορᾶς· ἀνάγκη γὰρ τὸ γενόμενον αὐξήσιν ἔχειν καὶ ἀκμὴν καὶ φθίσιν, ταῦτα δ' ἄνευ τροφῆς ἀδύνατον· ἀνάγκη ἄρα ἐνεῖναι τὴν θεραπετικὴν δύναμιν ἐν πᾶσι τοῖς φυομένοις καὶ φθίνουσιν·

2. αἰσθῆσιν δ' οὐκ ἀναγκαῖον ἐν ἅπασι τοῖς ζῶσιν· οὔτε γὰρ ὅσων τὸ σῶμα ἀπλοῦν ἐνδέχεται αὐτὴν ἔχειν, [οὔτε ἄνευ ταύτης οἷόν τε οὐθὲν εἶναι ζῶον] οὔτε ὅσα μὴ δεκτικὰ τῶν εἰδῶν ἄνευ τῆς ὕλης.

3. τὸ δὲ ζῶον ἀναγκαῖον αἰσθῆσιν ἔχειν, [434a30] <οὐδὲ ἄνευ ταύτης οἷόν τε οὐθὲν εἶναι ζῶον,> εἰ μὴ ἐν μάτῃ ποιεῖ ἢ φύσις. ἔνεκά του γὰρ πάντα ὑπάρχει τὰ φύσει, ἢ συμπτώματα ἔσται τῶν ἔνεκά του. εἰ οὖν πᾶν σῶμα πορευτικόν, μὴ ἔχον αἰσθῆσιν, φθείροιτο ἂν καὶ [434b] εἰς τέλος οὐκ ἂν ἔλθοι, ὃ ἐστὶ φύσεως ἔργον (πῶς γὰρ θρέψεται; τοῖς μὲν γὰρ μονίμοις ὑπάρχει τοῦτο ὅθεν πεφύκασιν,

4. οὐχ οἷόν τε δὲ σῶμα ἔχειν μὲν ψυχὴν καὶ νοῦν κριτικόν, αἰσθῆσιν δὲ μὴ ἔχειν, μὴ μόνιμον ὄν, γενητὸν δέ-ἀλλὰ μὴν οὐδὲ ἀγένητον· διὰ τί γὰρ οὐχ ἔξει; ἢ γὰρ τῇ ψυχῇ βέλτιον ἢ τῷ σώματι, νῦν δ' οὐδέτερον· ἢ μὲν γὰρ οὐ μᾶλλον νοήσῃ, τῷ δ' οὐθὲν ἔσται μᾶλλον δι' ἐκεῖνο) -οὐθὲν ἄρα ἔχει ψυχὴν σῶμα μὴ μόνιμον <ὄν> ἄνευ αἰσθήσεως.

5. ἀλλὰ μὴν εἴγε αἰσθῆσιν ἔχει, ἀνάγκη τὸ σῶμα εἶναι ἢ ἀπλοῦν ἢ μικτόν. οὐχ οἷόν τε δὲ ἀπλοῦν· ἀφὴν γὰρ οὐχ ἔξει, ἔστι δὲ ἀνάγκη ταύτην ἔχειν. τοῦτο δὲ ἐκ τῶνδε δῆλον.

6. ἐπεὶ γὰρ τὸ ζῶον σῶμα ἔμψυχόν ἐστι, σῶμα δὲ ἅπαν ἀπτόν, [ἀπτόν δὲ τὸ αἰσθητὸν ἀφῆ.] ἀνάγκη [καὶ] τὸ τοῦ ζώου σῶμα ἀπτικόν εἶναι, εἰ μέλλει σώζεσθαι τὸ ζῶον. αἱ γὰρ ἄλλαι αἰσθήσεις δι' ἐτέρων αἰσθάνονται, οἷον ὄσφρησις ὄψις ἀκοή· ἀπτόμενον δέ, εἰ μὴ ἔξει αἰσθῆσιν, οὐ δυνήσεται τὰ μὲν φεύγειν τὰ δὲ λαβεῖν. εἰ δὲ τοῦτο, ἀδύνατον ἔσται σώζεσθαι τὸ ζῶον.

7. διὸ καὶ ἡ γεῦσις ἐστὶν ὥσπερ ἀφῆ τις· τροφῆς γὰρ ἐστὶν, ἡ δὲ τροφή τὸ σῶμα ἀπτόν. φόφος δὲ καὶ χρῶμα καὶ ὁσμὴ οὐ τρέφει, οὐδὲ ποιεῖ οὗτ' αὐξήσιν οὔτε φθίσιν· ὥστε καὶ τὴν γεῦσιν ἀνάγκη ἀφὴν εἶναι τινα, διὰ τὸ τοῦ ἀπτοῦ καὶ θεραπετικοῦ αἰσθῆσιν εἶναι· αὐταὶ μὲν οὖν ἀναγκαῖαι τῷ ζῳῳ, καὶ φανερόν ὅτι οὐχ οἷόν τε ἄνευ ἀφῆς εἶναι

ζῶον,

8. αἱ δὲ ἄλλαι τοῦ τε εὖ ἔνεκα καὶ γένει ζῶων ἤδη οὐ τῷ τυχόντι· ἀλλὰ τισίν, οἷον τῷ πορευτικῷ, ἀνάγκη ὑπάρχειν· εἰ γὰρ μέλλει σώζεσθαι, οὐ μόνον δεῖ ἀπτόμενον αἰσθάνεσθαι ἀλλὰ καὶ ἄποθεν. τοῦτο δ' ἂν εἴη, εἰ διὰ τοῦ μεταξὺ αἰσθητικὸν εἴη τῷ ἐκεῖνο μὲν ὑπὸ τοῦ αἰσθητοῦ πάσχειν καὶ κινεῖσθαι, αὐτὸ δ' ὑπ' ἐκείνου.

9. ὥσπερ γὰρ τὸ κινοῦν κατὰ τόπον μέχρι τοῦ μεταβάλλειν ποιεῖ, καὶ τὸ ὧσαν ἕτερον ποιεῖ ὥστε ὠθεῖν, καὶ ἔστι διὰ μέσου ἢ κίνησις, καὶ τὸ μὲν πρῶτον κινοῦν ὠθεῖ οὐκ ὠθούμενον, τὸ δ' ἔσχατον μόνον ὠθεῖται οὐκ ὧσαν, τὸ δὲ μέσον ἄμφω, [435a] πολλὰ δὲ τὰ μέσα, οὕτω καὶ ἐπ' ἀλλοιώσεως, πλὴν ὅτι μένοντος ἐν τῷ αὐτῷ τόπῳ ἀλλοιοῖ, οἷον εἰ εἰς κηρὸν βάψει τις, μέχρι τούτου ἐκινήθη, ἕως ἔβαψεν· λίθος δὲ οὐδέν, ἀλλ' ὕδωρ μέχρι πόρρω· ὁ δ' ἀὴρ ἐπὶ πλεῖστον κινεῖται καὶ ποιεῖ καὶ πάσχει, ἐὰν μένη καὶ εἷς ἡ. διὸ καὶ περὶ ἀνακλάσεως βέλτιον ἢ τὴν ὄψιν ἐξιοῦσαν ἀνακλᾶσθαι τὸν ἀέρα πάσχειν ὑπὸ τοῦ σχήματος καὶ χρώματος, μέχρι περ οὗ ἂν ἡ εἷς. ἐπὶ δὲ τοῦ λείου ἐστὶν εἷς· διὸ πάλιν οὗτος τὴν ὄψιν κινεῖ, ὥσπερ ἂν εἰ τὸ ἐν τῷ κηρῷ σημεῖον διεδίδοτο μέχρι τοῦ πέρατος.

Κεφάλαιο 13

[435a11] 1. Ὅτι δ' οὐχ οἶόν τε ἀπλοῦν εἶναι τὸ τοῦ ζῴου σῶμα, φανερόν, λέγω δ' οἶον πύρινον ἢ ἀέρινον. ἄνευ μὲν γὰρ ἀφῆς οὐδεμίαν ἐνδέχεται ἄλλην αἰσθησιν ἔχειν (τὸ γὰρ σῶμα ἀπτικὸν τὸ ἔμψυχον πᾶν, ὥσπερ εἴρηται)· τὰ δὲ ἄλλα ἔξω γῆς αἰσθητήρια μὲν ἂν γένοιτο, πάντα δὲ τῷ δι' ἐτέρου αἰσθάνεσθαι ποιεῖ τὴν αἰσθησιν, καὶ διὰ τῶν μετα- ξύ, ἢ δ' ἀφῆ τῷ αὐτῶν ἅπτεσθαί ἐστιν, διὸ καὶ τοῦνομα τοῦτο ἔχει. καίτοι καὶ τὰ ἄλλα αἰσθητήρια ἀφῆ αἰσθάνεται, ἀλλὰ δι' ἐτέρου· αὕτη δὲ δοκεῖ μόνη δι' αὐτῆς. ὥστε τῶν μὲν τοιούτων στοιχείων οὐθὲν ἂν εἴη σῶμα τοῦ ζῴου. οὐδὲ δὴ γῆνιν. πάντων γὰρ ἢ ἀφῆ τῶν ἀπτῶν ἐστὶν ὥσπερ μεσότης, καὶ δεκτικὸν τὸ αἰσθητήριον οὐ μόνον ὅσαι διαφοραὶ γῆς εἰσὶν, ἀλλὰ καὶ θερμοῦ καὶ ψυχροῦ καὶ τῶν ἄλλων ἀπτῶν ἀπάντων. καὶ διὰ τοῦτο τοῖς ὅστοις καὶ ταῖς θριξὶ καὶ τοῖς τοιούτοις μορίοις οὐκ αἰσθανόμεθα, ὅτι γῆς ἐστὶν, [435b] καὶ τὰ φυτὰ διὰ τοῦτο οὐδεμίαν ἔχει αἰσθησιν, ὅτι γῆς ἐστὶν· ἄνευ δὲ ἀφῆς οὐδεμίαν οἶόν τε ἄλλην ὑπάρχειν, τοῦτο δὲ τὸ αἰσθητήριον οὐκ ἔστιν οὔτε γῆς οὔτε ἄλλου τῶν στοιχείων οὐδενός.

2. φανερόν τοίνυν ὅτι ἀνάγκη μόνης ταύτης στερισκόμενα τῆς αἰσθήσεως τὰ ζῶα ἀποθνήσκουσιν· οὔτε γὰρ ταύτην ἔχειν οἶόν τε μὴ ζῶον ὄν, οὔτε ζῶον ὄν ἄλλην ἔχειν ἀνάγκη πλὴν ταύτην. καὶ διὰ τοῦτο τὰ μὲν ἄλλα αἰσθητὰ ταῖς ὑπερβολαῖς οὐ διαφθείρει τὸ ζῶον, οἶον χρῶμα καὶ ψόφος καὶ ὁσμή, ἀλλὰ μόνον τὰ αἰσθητήρια (ἂν μὴ κατὰ συμβεβηκός, οἶον ἂν ἅμα τῷ ψόφῳ ὥσις γένηται καὶ πληγή), καὶ ὑπὸ ὁραμάτων καὶ ὁσμῆς ἕτερα κινεῖται, ἃ τῇ ἀφῇ φθείρει (καὶ ὁ χυμὸς δὲ ἢ ἅμα συμβαίνει ἀπτικὸν εἶναι, ταύτη φθείρει),

3. ἢ δὲ τῶν ἀπτῶν ὑπερβολή, οἶον θερμῶν καὶ ψυχρῶν καὶ σκληρῶν, ἀναιρεῖ τὸ ζῶον· παντὸς μὲν γὰρ ὑπερβολὴ αἰσθητοῦ ἀναιρεῖ τὸ αἰσθητήριον, ὥστε καὶ τὸ ἀπτὸν τὴν ἀφήν, ταύτη δὲ ὥριστα τὸ ζῶον· ἄνευ γὰρ ἀφῆς δέδεικται ὅτι ἀδύνατον εἶναι ζῶον. διὸ ἢ τῶν ἀπτῶν ὑπερβολὴ οὐ μόνον τὸ αἰσθητήριον φθείρει, ἀλλὰ καὶ τὸ ζῶον, ὅτι ἀνάγκη μόνην ἔχειν ταύτην. τὰς δ' ἄλλας αἰσθήσεις ἔχει τὸ ζῶον, ὥσπερ εἴρηται, οὐ τοῦ εἶναι ἔνεκα ἀλλὰ τοῦ εἶναι, οἶον ὄψιν, ἐπεὶ ἐν ἀέρι καὶ ὕδατι, ὅπως ὀρεῖ, ὅλως δ' ἐπεὶ ἐν διαφανεῖ, γεῦσιν δὲ διὰ τὸ ἡδὺ καὶ λυπηρόν, ἵνα αἰσθάνηται τὸ ἐν τροφῇ καὶ ἐπιθυμῇ καὶ κινῆται, ἀκοὴν δὲ ὅπως σημαίνεται τι αὐτῷ [γλωτταν δὲ

ὅπως σημαίνει τι ἑτέρω].

Περὶ Αἰσθησεως καὶ Αἰσθητων (436a) Sense and Sensibilia

[436a] Ἐπεὶ δὲ περὶ ψυχῆς καθ' αὐτὴν διώρισται πρότερον καὶ περὶ τῶν δυνάμεων ἐκάστης κατὰ μόριον αὐτῆς, ἐχόμενόν ἐστι ποιήσασθαι τὴν ἐπίσκεψιν περὶ τῶν ζώων καὶ τῶν ζῶν ἐχόντων ἀπάντων, τίνες εἰσὶν ἴδιαι καὶ τίνες κοιναὶ πράξεις αὐτῶν. τὰ μὲν οὖν εἰρημένα περὶ ψυχῆς ὑποκείσθω, περὶ δὲ τῶν λοιπῶν λέγωμεν, καὶ πρῶτον περὶ τῶν πρώτων. φαίνεται δὲ τὰ μέγιστα, καὶ τὰ κοινὰ καὶ τὰ ἴδια τῶν ζώων, κοινὰ τῆς τε ψυχῆς ὄντα καὶ τοῦ σώματος, οἷον αἴσθησις καὶ μνήμη καὶ θυμὸς καὶ ἐπιθυμία καὶ ὅλως ὄρεξις, καὶ πρὸς τούτοις ἡδονὴ καὶ λύπη· καὶ γὰρ ταῦτα σχεδὸν ὑπάρχει πᾶσι τοῖς ζώοις. πρὸς δὲ τούτοις τὰ μὲν πάντων ἐστὶ τῶν μετεχόντων ζωῆς κοινὰ, τὰ δὲ τῶν ζώων ἐνίοις. τυγχάνουσι δὲ τούτων τὰ μέγιστα τέτταρες οὗσαι συζυγίαι τὸν ἀριθμόν, οἷον ἐργήγορσις καὶ ὕπνος, καὶ νεότης καὶ γῆρας, καὶ ἀναπνοὴ καὶ ἐκπνοή, καὶ ζωὴ καὶ θάνατος· περὶ ὧν θεωρητέον, τί τε ἕκαστον αὐτῶν, καὶ διὰ τίνας αἰτίας συμβαίνει. φυσικοῦ δὲ καὶ περὶ ὑγιείας καὶ νόσου τὰς πρώτας ἰδεῖν ἀρχάς· οὔτε γὰρ ὑγίειαν οὔτε νόσον οἷόν τε γίνεσθαι τοῖς ἐστερημένοις ζωῆς. διὸ σχεδὸν τῶν περὶ φύσεως οἱ πλείστοι καὶ τῶν ἱατρῶν οἱ φιλοσοφωτέως τὴν τέχνην μετιόντες, οἱ μὲν τελευτῶσιν εἰς τὰ περὶ ἱατρικῆς, [436b] οἱ δ' ἐκ τῶν περὶ φύσεως ἄρχονται [περὶ τῆς ἱατρικῆς].

ὅτι δὲ πάντα τὰ λεχθέντα κοινὰ τῆς τε ψυχῆς ἐστὶ καὶ τοῦ σώματος, οὐκ ἄδηλον. πάντα γὰρ τὰ μὲν μετ' αἰσθήσεως συμβαίνει, τὰ δὲ δι' αἰσθήσεως, ἔνια δὲ τὰ μὲν πάθη ταύτης ὄντα τυγχάνει, τὰ δ' ἕξεις, τὰ δὲ φυλακαὶ καὶ σωτηρίαι, τὰ δὲ φθοραὶ καὶ στερήσεις· ἢ δ' αἴσθησις ὅτι διὰ σώματος γίνεται τῇ ψυχῇ, δῆλον καὶ διὰ τοῦ λόγου καὶ τοῦ λόγου χωρὶς. ἀλλὰ περὶ μὲν αἰσθήσεως καὶ τοῦ αἰσθάνεσθαι, τί ἐστὶ καὶ διὰ τί συμβαίνει τοῖς ζώοις τοῦτο τὸ πάθος, εἴρηται πρότερον ἐν τοῖς περὶ ψυχῆς. τοῖς δὲ ζώοις, ἧ μὲν ζῶον ἕκαστον, ἀνάγκη ὑπάρχειν αἰσθεσθαι· τούτῳ γὰρ τὸ ζῶον εἶναι καὶ μὴ ζῶον

διορίζομεν. ἰδίᾳ δ' ἤδη καθ' ἕκαστον ἢ μὲν ἀφή καὶ γεῦσις ἀκολουθεῖ πᾶσιν ἐξ ἀνάγκης, ἢ μὲν ἀφή διὰ τὴν εἰρημένην αἰτίαν ἐν τοῖς περὶ ψυχῆς, ἢ δὲ γεῦσις διὰ τὴν τροφήν· τὸ γὰρ ἡδὺ διακρίνει καὶ τὸ λυπηρὸν αὐτῇ περὶ τὴν τροφήν, ὥστε τὸ μὲν φεύγειν τὸ δὲ διώκειν, καὶ ὅλως ὁ χυμὸς ἐστὶ τοῦ θραπευτικοῦ πάθος. αἱ δὲ διὰ τῶν ἔξωθεν αἰσθήσεις τοῖς πορευτικοῖς αὐτῶν, οἷον ὄσφρησις καὶ ἀκοή καὶ ὄψις, πᾶσι μὲν τοῖς ἔχουσι σωτηρίας ἔνεκεν ὑπάρχουσιν, ὅπως διώκωσί τε προαισθανόμενα τὴν τροφήν καὶ τὰ φαῦλα καὶ τὰ φθαρτικά [437a] φεύγωσι, τοῖς δὲ καὶ φρονήσεως τυγχάνουσι τοῦ εὖ ἔνεκα· πολλὰς γὰρ εἰσαγγέλλουσι διαφοράς, ἐξ ὧν ἢ τε τῶν νοητῶν ἐγγίνεται φρόνησις καὶ ἡ τῶν πρακτῶν.

αὐτῶν δὲ τούτων πρὸς μὲν τὰ ἀναγκαῖα κρείττων ἢ ὄψις καθ' αὐτήν, πρὸς δὲ νοῦν κατὰ συμβεβηκὸς ἢ ἀκοή. διαφορὰς μὲν γὰρ πολλὰς καὶ παντοδαπὰς ἢ τῆς ὄψεως εἰσαγγέλλει δύναμις διὰ τὸ πάντα τὰ σώματα μετέχειν χρώματος, ὥστε καὶ τὰ κοινὰ διὰ ταύτης αἰσθάνεσθαι μάλιστα (λέγω δὲ κοινὰ μέγεθος, σχῆμα, κίνησιν, ἀριθμόν), ἢ δ' ἀκοή τὰς τοῦ ψόφου διαφορὰς μόνον, ὀλίγοις δὲ καὶ τὰς τῆς φωνῆς· κατὰ συμβεβηκὸς δὲ πρὸς φρόνησιν ἢ ἀκοή πλεῖστον συμβάλλεται μέρος. ὁ γὰρ λόγος αἰτιὸς ἐστὶ τῆς μαθήσεως ἀκουστός ὢν, οὐ καθ' αὐτὸν ἀλλὰ κατὰ συμβεβηκός· ἐξ ὀνομάτων γὰρ σύγκειται, τῶν δ' ὀνομάτων ἕκαστον σύμβολόν ἐστιν. διόπερ φρονιμώτεροι τῶν ἐκ γενετῆς ἐστερημένων εἰσὶν ἑκατέρας τῆς αἰσθήσεως οἱ τυφλοὶ τῶν ἐνεῶν καὶ κωφῶν.

Περὶ μὲν οὖν τῆς δυνάμεως ἣν ἔχει τῶν αἰσθήσεων ἐκάστη, πρότερον εἴρηται. τοῦ δὲ σώματος ἐν οἷς ἐγγίγνεσθαι πέφυκεν αἰσθητηρίοις, ἔνιοι μὲν ζητοῦσι κατὰ τὰ στοιχεῖα τῶν σωμάτων· οὐκ εὐποροῦντες δὲ πρὸς τέτταρα πέντ' οὔσας συνάγειν, γλίσχονται περὶ τῆς πέμπτης. ποιοῦσι δὲ πάντες τὴν ὄψιν πυρὸς διὰ τὸ πάθους τινὸς ἄγνοεῖν τὴν αἰτίαν· θλιβομένου γὰρ καὶ κινουμένου τοῦ ὀφθαλμοῦ φαίνεται πῦρ ἐκλάμπειν· τοῦτο δ' ἐν τῷ σκότει πέφυκε συμβαίνειν, ἢ τῶν βλεφάρων ἐπικεκαλυμμένων· γίγνεται γὰρ καὶ τότε σκότος.

ἔχει δ' ἀπορίαν τοῦτο καὶ ἑτέραν. εἰ γὰρ μὴ ἔστι λανθάνειν <μὴ> αἰσθανόμενον καὶ ὀρῶντα, ἀνάγκη ἄρ' αὐτὸν ἑαυτὸν ὀρᾶν τὸν ὀφθαλμόν. διὰ τί οὖν ἡρεμοῦντι τοῦτ' οὐ συμβαίνει; τὸ δ' αἴτιον τούτου, καὶ τῆς ἀπορίας καὶ τοῦ δοκεῖν πῦρ εἶναι τὴν ὄψιν, ἐντεῦθεν ληπτέον. τὰ γὰρ λεῖα πέφυκεν ἐν τῷ σκότει λάμπειν, οὐ μέντοι φῶς γε ποιεῖν, τοῦ δ' ὀφθαλμοῦ [437b] τὸ καλούμενον μέλαν καὶ μέσον

λεῖον. φαίνεται δὲ τοῦτο κινουμένου τοῦ ὄμματος διὰ τὸ συμβαίνειν ὥσπερ δύο γίνεσθαι τὸ ἓν. τοῦτο δ' ἡ ταχυτῆς ποιεῖ τῆς κινήσεως, ὥστε δοκεῖν ἕτερον εἶναι τὸ ὄρων καὶ τὸ ὀρώμενον. διὸ καὶ οὐ γίγνεται, ἐὰν μὴ ταχέως καὶ ἐν σκότει τοῦτο συμβῇ· τὸ γὰρ λεῖον ἐν τῷ σκότει πέφυκε λάμπειν (οἷον κεφαλαὶ ἰχθύων τινῶν καὶ ὁ τῆς σηπίας θολός), καὶ βραδέως μεταβάλλοντος τοῦ ὄμματος οὐ συμβαίνει ὥστε δοκεῖν ἅμα ἐν καὶ δύο εἶναι τὸ θ' ὄρων καὶ τὸ ὀρώμενον. ἐκείνως δ' αὐτὸς αὐτὸν ὄρᾳ ὁ ὀφθαλμός, ὥσπερ καὶ ἐν τῇ ἀνακλάσει· ἐπεὶ εἴ γε πῦρ ἦν, καθάπερ Ἐμπεδοκλῆς φησὶ καὶ ἐν τῷ Τιμαίῳ γέγραπται, καὶ συνέβαινε τὸ ὄρᾳ ἐξιόντος ὥσπερ ἐκ λαμπτήρος τοῦ φωτός, διὰ τί οὐ καὶ ἐν τῷ σκότει ἑώρα ἂν ἡ ὄψις; τὸ δ' ἀποσβέννυσθαι φάναι ἐν τῷ σκότει ἐξιούσαν, ὥσπερ ὁ Τίμαιος λέγει, κενόν ἐστι παντελῶς· τίς γὰρ ἀπόσβεσις φωτός ἐστιν; σβέννυται γὰρ ἢ ὑγρῷ ἢ ψυχρῷ τὸ θερμὸν καὶ ξηρόν (οἷον δοκεῖ τό τ' ἐν τοῖς ἀνθρακώδεσιν εἶναι πῦρ καὶ ἡ φλόξ), ὣν τῷ φωτὶ οὐδέτερον φαίνεται ὑπάρχον. εἰ δ' ἄρα ὑπάρχει μὲν ἀλλὰ διὰ τὸ ἡρέμα λανθάνει ἡμᾶς, ἔδει μεθ' ἡμέραν γε καὶ ἐν τῷ ὕδατι ἀποσβέννυσθαι τὸ φῶς καὶ ἐν τοῖς πάγοις μᾶλλον γίνεσθαι σκότον· ἡ γοῦν φλόξ καὶ τὰ πεπυρωμένα σώματα πάσχει τοῦτο· νῦν δ' οὐδὲν συμβαίνει τοιοῦτον.

Ἐμπεδοκλῆς δ' ἔοικε νομίζοντι ὅτε μὲν ἐξιόντος τοῦ φωτός, ὥσπερ εἴρηται πρότερον, βλέπειν· λέγει γοῦν οὕτως·

ὥς δ' ὅτε τις πρόοδον νοέων ὠπλίσσατο λύχρον
χειμερίην διὰ νύκατα, πυρὸς σέλας αἰθομένοιο,
ἄσπας παντοίων ἀνέμων λαμπτήρας ἀμοργούς,
οἳ τ' ἀνέμων μὲν πνεῦμα διασκιδνᾷσιν ἀέντων,
πῦρ δ' ἔξω διαθρῶσκον, ὅσον ταναώτερον ἦεν,
λάμπεσκεν κατὰ βηλὸν ἀτειρέσιν ἀκτίνεσσιν·
ὥς δὲ τότε' ἐν μήνιγξιν ἐεργμένον ὠγύγιον πῦρ
[438a] λεπτῇσιν τ' ὀθόνησι λοχεύσατο κύκλοπα κούρην·

«αἶ» χοάνησι δίαντα τετρήατο θεσπεσίησιν·
αἱ δ' ὕδατος μὲν βένθος ἀπέστεγον ἀμφιναέντος,
πῦρ δ' ἔξω διέεσκον, ὅσον ταναώτερον ἦεν.

ὅτε μὲν οὖν οὕτως ὄρᾳ φησὶν, ὅτε δὲ ταῖς ἀπορροαῖς ταῖς ἀπὸ τῶν ὀρωμένων.

Δημόκριτος δ' ὅτι μὲν ὕδωρ εἶναί φησι, λέγει καλῶς, ὅτι δ' οἶται τὸ ὄρᾳ εἶναι τὴν ἔμφασιν, οὐ καλῶς· τοῦτο μὲν γὰρ

συμβαίνει ὅτι τὸ ὄμμα λεῖον, καὶ ἔστιν οὐκ ἐν ἐκείνῳ ἀλλ' ἐν τῷ ὁρᾶντι· ἀνάκλασις γὰρ τὸ πάθος, ἀλλὰ καθόλου περὶ τῶν ἐμφαινομένων καὶ ἀνακλάσεως οὐδὲν πω δῆλον ἦν, ὡς ἔοικεν. ἄτοπον δὲ καὶ τὸ μὴ ἐπελθεῖν αὐτῷ ἀπορῆσαι διὰ τί ὁ ὀφθαλμὸς ὁρᾷ μόνον, τῶν δ' ἄλλων οὐδὲν ἐν οἷς ἐμφαίνεται τὰ εἶδωλα. τὸ μὲν οὖν τὴν ὄψιν εἶναι ὕδατος ἀληθὲς μὲν, οὐ μέντοι συμβαίνει τὸ ὁρᾶν ἢ ὕδωρ ἀλλ' ἢ διαφανές· ὁ καὶ ἐπὶ τοῦ ἀέρος κοινόν ἐστιν. ἀλλ' εὐφυλακτότερον καὶ εὐπιλητότερον τὸ ὕδωρ τοῦ ἀέρος· διόπερ ἡ κόρη καὶ τὸ ὄμμα ὕδατός ἐστιν. τοῦτο δὲ καὶ ἐπ' αὐτῶν τῶν ἔργων δῆλον· φαίνεται γὰρ ὕδωρ τὸ ἐκρέον διαφθειρομένων, καὶ ἔν γε τοῖς πάμπαν ἐμβρύοις τῇ ψυχρότητι ὑπερβάλλον καὶ τῇ λαμπρότητι, καὶ τὸ λευκὸν τοῦ ὀμματος ἐν τοῖς ἔχουσιν αἷμα πῖον καὶ λιπαρόν· ὅπερ διὰ τοῦτ' ἐστί, πρὸς τὸ διαμένειν τὸ ὑγρὸν ἄπηκτον, καὶ διὰ τοῦτο τοῦ σώματος ἀρριγότατον ὁ ὀφθαλμὸς ἐστιν· οὐδεὶς γὰρ πω τὸ ἐντὸς τῶν βλεφάρων ἐρρίγωσεν. τῶν δ' ἀναίμων σκληρόδερμοι οἱ ὀφθαλμοὶ εἰσι, καὶ τοῦτο ποιεῖ τὴν σκέπην. ἄλογον δὲ ὅλως τὸ ἐξιόντι τινὶ τὴν ὄψιν ὁρᾶν, καὶ ἀποτείνεσθαι μέχρι τῶν ἄστρων, ἢ μέχρι τινὸς ἐξιούσαν συμφύεσθαι, καθάπερ λέγουσί τινες. τούτου μὲν γὰρ βέλτιον τὸ ἐν <τῇ> ἀρχῇ συμφύεσθαι τοῦ ὀμματος. ἀλλὰ καὶ τοῦτο εὐηθες· τό τε γὰρ συμφύεσθαι τί ἐστι φωτὶ πρὸς φῶς, ἢ πῶς οἶόν θ' ὑπάρχειν (οὐ γὰρ τῷ τυχόντι [438b] συμφύεται τὸ τυχόν), τό τ' ἐντὸς τῷ ἐκτὸς πῶς; ἢ γὰρ μῆνιγξ μεταξὺ ἐστιν.

περὶ μὲν οὖν τοῦ ἄνευ φωτὸς μὴ ὁρᾶν εἴρηται ἐν ἄλλοις· ἀλλ' εἴτε φῶς εἴτ' ἀήρ ἐστι τὸ μεταξὺ τοῦ ὁρωμένου καὶ τοῦ ὀμματος, ἢ διὰ τούτου κίνησίς ἐστιν ἢ ποιοῦσα τὸ ὁρᾶν. καὶ εὐλόγως τὸ ἐντὸς ἐστιν ὕδατος· διαφανὲς γὰρ τὸ ὕδωρ, ὁρᾶται δὲ ὥσπερ καὶ ἔξω οὐκ ἄνευ φωτός, οὕτως καὶ ἐντός· διαφανὲς ἄρα δεῖ εἶναι· ἀνάγκη ἄρα ὕδωρ εἶναι, ἐπειδὴ οὐκ ἀήρ. οὐ γὰρ ἐπὶ ἐσχάτου τοῦ ὀμματος ἡ ψυχὴ ἢ τῆς ψυχῆς τὸ αἰσθητικόν ἐστιν, ἀλλὰ δῆλον ὅτι ἐντός· διόπερ ἀνάγκη διαφανὲς εἶναι καὶ δεκτικὸν φωτὸς τὸ ἐντὸς τοῦ ὀμματος. καὶ τοῦτο καὶ ἐπὶ τῶν συμβαινόντων δῆλον· ἥδη γὰρ τισι πληγεῖσιν ἐν πολέμῳ παρὰ τὸν κρόταφον οὕτως ὥστ' ἀποτμηθῆναι τοὺς πόρους τοῦ ὀμματος ἔδοξε γενέσθαι σκότος ὥσπερ λύχνου ἀποσβεσθέντος, διὰ τὸ οἶον λαμπτήρᾳ τινι ἀποτμηθῆναι τὸ διαφανές, τὴν καλουμένην κόρην. ὥστ' εἴπερ ἐπὶ τούτων συμβαίνει καθάπερ λέγομεν, φανερόν ὡς εἰ δεῖ τοῦτον τὸν τρόπον ἀποδιδόναι καὶ προσάπτειν ἕκαστον τῶν αἰσθητηρίων ἐνὶ τῶν στοιχείων, τοῦ μὲν

ὄμματος τὸ ὁρατικὸν ὕδατος ὑποληπτέον, ἀέρος δὲ τὸ τῶν ψόφων αἰσθητικόν, πυρὸς δὲ τὴν ὀσφρησιν (ὃ γὰρ ἐνεργεία ἢ ὀσφρησις, τοῦτο δυνάμει τὸ ὀσφραντικόν· τὸ γὰρ αἰσθητὸν ἐνεργεῖν ποιεῖ τὴν αἴσθησιν, ὥσθ' ὑπάρχειν ἀναγκαῖον αὐτὴν δυνάμει πρότερον. ἢ δ' ὀσμή καπνώδης τίς ἐστὶν ἀναθυμίασις, ἢ δ' ἀναθυμίασις ἢ καπνώδης ἐκ πυρός. διὸ καὶ τῷ περὶ τὸν ἐγκέφαλον τόπῳ τὸ τῆς ὀσφρήσεως αἰσθητήριόν ἐστιν ἴδιον· δυνάμει γὰρ θερμὴ ἢ τοῦ ψυχροῦ ὕλη ἐστίν. καὶ ἢ τοῦ ὄμματος γένεσις τὸν αὐτὸν ἔχει τρόπον· ἀπὸ τοῦ ἐγκεφάλου γὰρ συνέστηκεν· οὗτος γὰρ ὑγρότατος καὶ ψυχρότατος τῶν ἐν τῷ σώματι μορίων ἐστίν). τὸ δ' ἀπτικὸν γῆς, τὸ δὲ γευστικὸν [439a] εἰδός τι ἀφῆς ἐστίν. καὶ διὰ τοῦτο πρὸς τῇ καρδίᾳ τὸ αἰσθητήριον αὐτῶν, τῆς γεύσεως καὶ τῆς ἀφῆς· ἀντίκειται γὰρ τῷ ἐγκεφάλῳ αὕτη, καὶ ἔστι θερμότατον τῶν μορίων. καὶ περὶ μὲν τῶν αἰσθητικῶν τοῦ σώματος μορίων ἔστω τοῦτον τὸν τρόπον διωρισμένα.

Περὶ δὲ τῶν αἰσθητῶν τῶν καθ' ἕκαστον αἰσθητήριον, οἷον λέγω χρώματος καὶ ψόφου καὶ ὀσμῆς καὶ χυμοῦ καὶ ἀφῆς, καθόλου μὲν εἴρηται ἐν τοῖς περὶ ψυχῆς, τί τὸ ἔργον αὐτῶν καὶ τί τὸ ἐνεργεῖν καθ' ἕκαστον τῶν αἰσθητηρίων. τί δέ ποτε δεῖ λέγειν ὅτιοῦν αὐτῶν, οἷον τί χρῶμα ἢ τί ψόφον ἢ τί ὀσμὴν ἢ χυμόν, ὁμοίως δὲ καὶ περὶ ἀφῆς, ἐπισκεπτέον, καὶ πρῶτον περὶ χρώματος. ἔστι μὲν οὖν ἕκαστον διχῶς λεγόμενον, τὸ μὲν ἐνεργεία τὸ δὲ δυνάμει. τὸ μὲν οὖν ἐνεργεία χρῶμα καὶ ψόφος πῶς ἐστὶ τὸ αὐτὸ ἢ ἕτερον ταῖς κατ' ἐνέργειαν αἰσθήσεσιν, οἷον ὁράσει καὶ ἀκούσει, εἴρηται ἐν τοῖς περὶ ψυχῆς· τί δὲ ἕκαστον αὐτῶν ὃν ποιήσει τὴν αἴσθησιν καὶ τὴν ἐνέργειαν, νῦν λέγωμεν. ὥσπερ οὖν εἴρηται περὶ φωτὸς ἐν ἐκείνοις, ὅτι ἐστὶ χρῶμα τοῦ διαφανοῦς κατὰ συμβεβηκός - ὅταν γὰρ ἡ τι πυρῶδες ἐν διαφανεῖ, ἢ μὲν παρουσία φῶς, ἢ δὲ στέρησίς ἐστι σκότος· ὃ δὲ λέγομεν διαφανὲς οὐκ ἔστιν ἴδιον ἀέρος ἢ ὕδατος οὐδ' ἄλλου τῶν οὕτω λεγομένων σωμάτων, ἀλλὰ τίς ἐστὶ κοινὴ φύσις καὶ δύνამις, ἢ χωριστὴ μὲν οὐκ ἔστιν, ἐν τούτοις δ' ἔστι, καὶ τοῖς ἄλλοις σώμασιν ἐνυπάρχει, τοῖς μὲν μᾶλλον τοῖς δ' ἥττον· ὥσπερ οὖν καὶ τῶν σωμάτων ἀνάγκη τι εἶναι ἔσχατον, καὶ ταύτης - ἢ μὲν οὖν τοῦ φωτὸς φύσις ἐν ἀορίστῳ τῷ διαφανεῖ ἐστίν· τοῦ δ' ἐν τοῖς σώμασι διαφανοῦς τὸ ἔσχατον ὅτι μὲν εἴη ἂν τι, δῆλον, ὅτι δὲ τοῦτ' ἐστὶ τὸ χρῶμα, ἐκ τῶν συμβαινόντων φανερόν. τὸ γὰρ χρῶμα ἢ ἐν τῷ πέρατι ἐστὶν ἢ πέρας (διὸ καὶ οἱ Πυθαγόρειοι τὴν ἐπιφάνειαν χροάν

ἐκάλουν)· ἔστι μὲν γὰρ ἐν τῷ τοῦ σώματος πέρατι, ἀλλ' οὐ τὸ τοῦ σώματος πέρας, ἀλλὰ τὴν αὐτὴν φύσιν δεῖ νομίζειν ἥπερ καὶ ἔξω [439b] χρωματίζεται, ταύτην καὶ ἐντός.

φαίνεται δὲ καὶ ἡρ καὶ ὕδωρ χρωματιζόμενα· καὶ γὰρ ἡ αὐγὴ τοιοῦτόν ἐστιν. ἀλλ' ἐκεῖ μὲν διὰ τὸ ἐν ἀορίστῳ οὐ τὴν αὐτὴν ἐγγύθεν καὶ προσιοῦσι καὶ πόρρωθεν ἔχει χροάν οὐθ' ὁ ἡρ οὐθ' ἡ θάλαττα· ἐν δὲ τοῖς σώμασιν, ἐὰν μὴ τὸ περιέχον ποιῇ μεταβάλλειν, ὥριστα καὶ ἡ φαντασία τῆς χροάς, δῆλον ἄρα ὅτι τὸ αὐτὸ κάκει κανθάδε δεκτικὸν τῆς χροάς ἐστίν. τὸ ἄρα διαφανὲς καθ' ὅσον ὑπάρχει ἐν τοῖς σώμασιν (ὑπάρχει δὲ μᾶλλον καὶ ἥττον ἐν πᾶσι) χρώματος ποιεῖ μετέχειν. ἐπεὶ δ' ἐν πέρατι ἡ χροά, τούτου ἂν ἐν πέρατι εἴη. ὥστε χρῶμα ἂν εἴη τὸ τοῦ διαφανοῦς ἐν σώματι ὠρισμένῳ πέρας, καὶ αὐτῶν δὲ τῶν διαφανῶν, οἷον ὕδατος καὶ εἰ τι ἄλλο τοιοῦτον, καὶ ὅσοις φαίνεται χρῶμα ἴδιον ὑπάρχειν, κατὰ τὸ ἔσχατον ὁμοίως πᾶσιν ὑπάρχει. ἔστι μὲν οὖν ἐνεῖναι ἐν τῷ διαφανεῖ τοῦθ' ὅπερ καὶ ἐν τῷ ἀέρι ποιεῖ φῶς, ἔστι δὲ μὴ, ἀλλ' ἐστερηθῆναι. ὥσπερ οὖν ἐκεῖ τὸ μὲν φῶς τὸ δὲ σκότος, οὕτως ἐν τοῖς σώμασιν ἐγγίγνεται τὸ λευκὸν καὶ τὸ μέλαν. περὶ δὲ τῶν ἄλλων χρωμάτων ἤδη, διελομένοις ποσαχῶς ἐνδέχεται γίνεσθαι, λεκτέον. ἐνδέχεται μὲν γὰρ παρ' ἄλληλα τιθέμενα τὸ λευκὸν καὶ τὸ μέλαν, ὥσθ' ἐκάτερον μὲν εἶναι ἀόρατον διὰ σμικρότητα, τὸ δ' ἐξ ἀμφοῖν ὁρατόν, οὕτω γίνεσθαι. τοῦτο γὰρ οὔτε λευκὸν οἷόν τε φαίνεσθαι οὔτε μέλαν· ἐπεὶ δ' ἀνάγκη μὲν τι ἔχειν χρῶμα, τούτων δ' οὐδέτερον δυνατόν, ἀνάγκη μεικτόν τι εἶναι καὶ εἰδός τι χροάς ἕτερον. ἔστι μὲν οὖν οὕτως ὑπολαβεῖν πλείους εἶναι χροάς παρὰ τὸ λευκὸν καὶ τὸ μέλαν, πολλὰς δὲ τῷ λόγῳ (τρία γὰρ πρὸς δύο, καὶ τρία πρὸς τέτταρα, καὶ κατ' ἄλλους ἀριθμοὺς ἔστι παρ' ἄλληλα κεῖσθαι· τὰ δ' ὅλως κατὰ μὲν λόγον μηδένα, καθ' ὑπεροχὴν δὲ τινα καὶ ἔλλειψιν ἀσύμμετρον), καὶ τὸν αὐτὸν δὴ τρόπον ἔχειν ταῦτα ταῖς συμφωνίαις· τὰ μὲν γὰρ ἐν ἀριθμοῖς εὐλογίστοις χρώματα, καθάπερ ἐκεῖ τὰς συμφωνίας, τὰ ἥδιστα τῶν χρωμάτων εἶναι δοκοῦντα, οἷον [440a] τὸ ἀλουργόν καὶ τὸ φοινικούν καὶ ὀλίγ' ἄττα τοιαῦτα (δι' ἣνπερ αἰτίαν καὶ αἱ συμφωνίαι ὀλίγαι), τὰ δὲ μὴ ἐν ἀριθμοῖς τᾶλλα χρώματα· ἡ καὶ πάσας τὰς χροάς ἐν ἀριθμοῖς εἶναι, τὰς μὲν τεταγμένας τὰς δὲ ἀτάκτους, καὶ αὐτὰς ταύτας, ὅταν μὴ καθαραὶ ᾖσι, διὰ τὸ μὴ ἐν ἀριθμοῖς εἶναι τοιαύτας γίνεσθαι.

εἰς μὲν οὖν τρόπος τῆς γενέσεως τῶν χρωμάτων οὗτος, εἰς δὲ

τὸ φαίνεσθαι δι' ἀλλήλων, οἷον ἐνίοτε οἱ γραφεῖς ποιοῦσιν, ἑτέραν χροάν ἐφ' ἑτέραν ἐναργεστέραν ἐπαλείφοντες, ὥσπερ ὅταν ἐν ὕδατι τι ἢ ἐν ἀέρι βούλωνται ποιῆσαι φαινόμενον, καὶ οἷον ὁ ἥλιος καθ' αὐτὸν μὲν λευκὸς φαίνεται, διὰ δ' ἀγλύος καὶ καπνοῦ φοινικοῦς. πολλαὶ δὲ καὶ οὕτως ἔσονται χροαὶ τὸν αὐτὸν τρόπον τῷ πρότερον εἰρημένῳ· λόγος γὰρ ἂν εἴη τις τῶν ἐπιπολῆς πρὸς τὰ ἐν βάθει, τὰ δὲ καὶ ὅλως οὐκ ἐν λόγῳ. τὸ μὲν οὖν, ὥσπερ οἱ ἀρχαῖοι, λέγειν ἀπόρροϊαν εἶναι τὴν χροάν καὶ ὀρᾶσθαι διὰ τοιαύτην αἰτίαν ἄτοπον· πάντως γὰρ δι' ἀφῆς ἀναγκαῖον αὐτοῖς ποιεῖν τὴν αἴσθησιν, ὥστ' εὐθὺς κρεῖττον φάναι τῷ κινεῖσθαι τὸ μεταξὺ τῆς αἰσθήσεως ὑπὸ τοῦ αἰσθητοῦ γίνεσθαι τὴν αἴσθησιν, ἀφῆ καὶ μὴ ταῖς ἀπορροαῖς. ἐπὶ μὲν οὖν τῶν παρ' ἄλληλα κειμένων ἀνάγκη ὥσπερ καὶ μέγεθος λαμβάνειν ἀόρατον, οὕτω καὶ χρόνον ἀναίσθητον, ἵνα λανθάνωσιν αἱ κινήσεις ἀφικνούμεναι καὶ ἐν δοκῇ εἶναι διὰ τὸ ἅμα φαίνεσθαι· ἐνταῦθα δὲ οὐδεμία ἀνάγκη, ἀλλὰ τὸ ἐπιπολῆς χρῶμα ἀκίνητον ὄν καὶ κινούμενον ὑπὸ τοῦ ὑποκειμένου οὐχ ὁμοίαν ποιήσει τὴν κίνησιν. διὸ καὶ ἕτερον φαίνεται καὶ οὔτε λευκὸν οὔτε μέλαν. ὥστ' εἰ μὴ ἐνδέχεται μὴδὲν εἶναι μέγεθος ἀόρατον, ἀλλὰ πᾶν ἕκ τινος ἀποστήματος ὀρατόν, καίτοι αὕτη τις ἂν εἴη χρωμάτων μίξις. κάκεινως δ' οὐδὲν κωλύει φαίνεσθαι τινα χροάν κοινήν τοῖς πόρρωθεν· ὅτι γὰρ οὐκ ἔστιν οὐδὲν μέγεθος ἀόρατον, ἐν τοῖς ὕστερον ἐπισκεπτέον.

εἰ δ' ἔστι μίξις τῶν σωμάτων [440b] μὴ μόνον τὸν τρόπον τοῦτον ὅνπερ οἰονταὶ τινες, παρ' ἄλληλα τῶν ἐλαχίστων τιθεμένων, ἀδήλων δ' ἡμῖν διὰ τὴν αἴσθησιν, ἀλλ' ὅλως πάντη πάντως, ὥσπερ ἐν τοῖς περὶ μίξεως εἴρηται καθόλου περὶ πάντων (ἐκεῖνως μὲν γὰρ μείγνυται ταῦτα μόνον ὅσα ἐνδέχεται διελεῖν εἰς τὰ ἐλάχιστα, καθάπερ ἄνθρωπους <ἢ> ἵππους ἢ τὰ σπέρματα· τῶν μὲν γὰρ ἀνθρώπων ἄνθρωπος ἐλάχιστος, τῶν δ' ἵππων ἵππος· ὥστε τῇ τούτων παρ' ἄλληλα θέσει τὸ πλῆθος μέμεικται τῶν συναμφοτέρων· ἄνθρωπον δὲ ἓνα ἐνὶ ἵπῳ οὐ λέγομεν μεμεῖχθαι· ὅσα δὲ μὴ διαιρεῖται εἰς τὸ ἐλάχιστον, τούτων οὐκ ἐνδέχεται μίξιν γενέσθαι τὸν τρόπον τοῦτον ἀλλὰ τῷ πάντῃ μεμεῖχθαι, ἅπερ καὶ μάλιστα μείγνυσθαι πέφυκεν· πῶς δὲ τοῦτο γίνεσθαι δυνατόν, ἐν τοῖς περὶ μίξεως εἴρηται πρότερον) - ἀλλ' ὅτι ἀνάγκη μειγνυμένων καὶ τὰς χροὰς μείγνυσθαι, δηλόν, καὶ ταύτην τὴν αἰτίαν εἶναι κυρίαν τοῦ πολλὰς εἶναι χροὰς, ἀλλὰ μὴ τὴν ἐπιπόλασιν μὴδὲ τὴν παρ' ἄλληλα

θέσιν· οὐ γὰρ πόρρωθεν μὲν ἐγγύθεν δ' οὐ φαίνεται μία χροὰ τῶν μεμειγμένων, ἀλλὰ πάντοθεν. πολλὰ δ' ἔσονται χροαὶ διὰ τὸ κατὰ πολλοὺς λόγους ἐνδέχεσθαι μείγνυσθαι ἀλλήλοις τὰ μειγνύμενα, καὶ τὰ μὲν ἐν ἀριθμοῖς τὰ δὲ καθ' ὑπεροχὴν μόνον. καὶ τᾶλλα δὴ τὸν αὐτὸν τρόπον ὥνπερ ἐπὶ τῶν παρ' ἄλληλα τιθεμένων χρωμάτων ἢ ἐπιπολῆς, ἐνδέχεται λέγειν καὶ περὶ τῶν μειγνυμένων. διὰ τίνα δ' αἰτίαν εἶδη τῶν χρωμάτων ἐστὶν ὠρισμένα καὶ οὐκ ἄπειρα, καὶ χυμῶν καὶ ψόφων, ὕστερον ἐπισκεπτέον.

Τί μὲν οὖν ἐστὶ χρῶμα καὶ διὰ τίν' αἰτίαν πολλὰ χροαὶ εἰσίν, εἴρηται· [περὶ δὲ ψόφου καὶ φωνῆς εἴρηται πρότερον ἐν τοῖς περὶ ψυχῆς·] περὶ δὲ ὁσμῆς καὶ χυμοῦ λεκτέον. σχεδὸν γὰρ ἐστὶ τὸ αὐτὸ πάθος, οὐκ ἐν τοῖς αὐτοῖς δ' ἐστὶν ἐκάτερον αὐτῶν. ἐναργέστερον δ' ἡμῖν ἐστὶ τὸ τῶν χυμῶν γένος ἢ τὸ τῆς ὁσμῆς. τούτου δ' αἴτιον ὅτι χειρίστην [441a] ἔχομεν τῶν ἄλλων ζώων τὴν ὁσφρησιν καὶ τῶν ἐν ἡμῖν αὐτοῖς αἰσθήσεων, τὴν δ' ἀφὴν ἀκριβεστάτην τῶν ἄλλων ζώων· ἢ δὲ γεῦσις ἀφ' ἧς τίς ἐστίν.

ἢ μὲν οὖν τοῦ ὕδατος φύσις βούλεται ἄχυμος εἶναι· ἀνάγκη δ' ἢ ἐν αὐτῷ τὸ ὕδωρ ἔχειν τὰ γένη τῶν χυμῶν ἀναίσθητα διὰ μικρότητα, καθάπερ Ἐμπεδοκλῆς φησίν, ἢ ὕλην τοιαύτην εἶναι οἷον πανσπερμίαν χυμῶν, καὶ ἅπαντα μὲν ἐξ ὕδατος γίνεσθαι, ἄλλο δ' ἐξ ἄλλου μέρους, ἢ μηδεμίαν ἔχοντος διαφορὰν τοῦ ὕδατος τὸ ποιοῦν αἴτιον εἶναι, οἷον εἰ τὸ θερμὸν καὶ τὸν ἥλιον φαίη τις. τούτων δ' ὥς μὲν Ἐμπεδοκλῆς λέγει λίαν εὐσύνοπτον τὸ ψεῦδος· ὁρῶμεν γὰρ μεταβάλλοντας ὑπὸ τοῦ θερμοῦ τοὺς χυμοὺς ἀφαιρουμένων τῶν περικαρπίων [εἰς τὸν ἥλιον] καὶ πυρουμένων, ὥς οὐ τῷ ἐκ τοῦ ὕδατος ἔλκειν τοιοῦτους γιγνομένους, ἀλλ' ἐν αὐτῷ τῷ περικαρπίῳ μεταβάλλοντας, καὶ ἐξικμαζομένους δὲ καὶ κειμένους διὰ τὸν χρόνον αὐστηροὺς ἐκ γλυκέων καὶ πικρῶν καὶ παντοδαποὺς γιγνομένους, καὶ ἐψομένους εἰς πάντα τὰ γένη τῶν χυμῶν ὥς εἰπεῖν μεταβάλλοντας. ὁμοίως δὲ καὶ τὸ πανσπερμίας εἶναι τὸ ὕδωρ ὕλην ἀδύνατον· ἐκ τοῦ αὐτοῦ γὰρ ὁρῶμεν ὥς [ἐκ τῆς αὐτῆς] τροφῆς γιγνομένους ἐτέρους χυμοὺς.

λείπεται δὴ τῷ πάσχειν τι τὸ ὕδωρ μεταβάλλειν. ὅτι μὲν τοίνυν οὐχ ὑπὸ τῆς τοῦ θερμοῦ μόνον δυνάμεως λαμβάνει ταύτην τὴν δύναμιν ἣν καλοῦμεν χυμόν, φανερόν. λεπτότατον γὰρ πάντων τῶν οὕτως ὑγρῶν τὸ ὕδωρ ἐστί, καὶ αὐτοῦ τοῦ ἐλαίου (ἀλλ' ἐπεκτείνεται ἐπὶ πλεον τοῦ ὕδατος τὸ ἔλαιον διὰ τὴν γλισχρότητα· τὸ δ' ὕδωρ

ψαθυρόν ἐστι, διὸ καὶ χαλεπώτερον φυλάξαι ἐν τῇ χειρὶ τὸ ὕδωρ ἢπερ ἔλαιον), ἐπεὶ δὲ θερμαινόμενον οὐδὲν φαίνεται παχυνόμενον τὸ ὕδωρ αὐτὸ μόνον, δῆλον ὅτι ἑτέρα τις ἂν εἴη αἰτία· οἱ γὰρ χυμοὶ πάντες πάχος ἔχουσι μᾶλλον· τὸ δὲ θερμὸν συναίτιον. φαίνονται δ' οἱ χυμοὶ ὅσοιπερ καὶ ἐν τοῖς περικαρπίοις, [441b] οὗτοι ὑπάρχοντες καὶ ἐν τῇ γῇ. διὸ καὶ πολλοὶ φασὶ τῶν ἀρχαίων φυσιολόγων τοιοῦτον εἶναι τὸ ὕδωρ δι' οἷας ἂν γῆς πορεύηται. καὶ τοῦτο δῆλόν ἐστιν ἐπὶ τῶν ἀλμυρῶν ὑδάτων μάλιστα· οἱ γὰρ ἅλες γῆς τι εἰδὸς εἰσιν. καὶ τὰ διὰ τῆς τέφρας διηθούμενα πικρᾶς οὔσης πικρὸν ποιεῖ τὸν χυμόν, εἰσὶ τε κρῆναι πολλαὶ αἱ μὲν πικραί, αἱ δ' ὀξεῖαι, αἱ δὲ παντοδαποὺς ἔχουσαι χυμοὺς ἄλλους. εὐλόγως δ' ἐν τοῖς φυομένοις τὸ τῶν χυμῶν γίγνεται γένος μάλιστα. πάσχειν γὰρ πέφυκε τὸ ὑγρόν, ὥσπερ καὶ τᾶλλα, ὑπὸ τοῦ ἐναντίου· ἐναντίον δὲ τὸ ξηρόν. διὸ καὶ ὑπὸ τοῦ πυρὸς πάσχει τι· ξηρὰ γὰρ ἢ τοῦ πυρὸς φύσις. ἀλλ' ἴδιον τοῦ πυρὸς τὸ θερμόν ἐστι, γῆς δὲ τὸ ξηρόν, ὥσπερ εἴρηται ἐν τοῖς περὶ στοιχείων. ἥ μὲν οὖν πῦρ καὶ ἡ γῆ, οὐδὲν πέφυκε ποιεῖν καὶ πάσχειν, οὐδ' ἄλλο οὐδέν· ἡ δ' ὑπάρχει ἐναντιότης ἐν ἐκάστω, ταύτῃ πάντα καὶ ποιοῦσι καὶ πάσχουσιν.

ὥσπερ οὖν οἱ ἐναποπλύνοντες ἐν τῷ ὑγρῷ τὰ χρώματα καὶ τοὺς χυμοὺς τοιοῦτον ἔχειν ποιοῦσι τὸ ὕδωρ, οὕτως καὶ ἡ φύσις τὸ ξηρόν καὶ γεῶδες, καὶ διὰ τοῦ ξηροῦ καὶ γεώδους διηθοῦσα καὶ κινοῦσα τῷ θερμῷ ποιόν τι τὸ ὑγρὸν παρασκευάζει. καὶ ἔστι τοῦτο χυμός, τὸ γινόμενον ὑπὸ τοῦ εἰρημένου ξηροῦ πάθος ἐν τῷ ὑγρῷ, τῆς γεύσεως τῆς κατὰ δύναμιν ἀλλοιωτικὸν <ὄν> εἰς ἐνέργειαν· ἄγει γὰρ τὸ αἰσθητικὸν εἰς τοῦτο δυνάμει προϋπάρχον· οὐ γὰρ κατὰ τὸ μανθάνειν ἀλλὰ κατὰ τὸ θεωρεῖν ἐστι τὸ αἰσθάνεσθαι. ὅτι δ' οὐ παντὸς ξηροῦ ἀλλὰ τοῦ τροφίμου οἱ χυμοὶ ἢ πάθος εἰσὶν ἢ στέρησις, δεῖ λαβεῖν ἐντεῦθεν, ὅτι οὔτε τὸ ξηρὸν ἄνευ τοῦ ὑγροῦ οὔτε τὸ ὑγρὸν ἄνευ τοῦ ξηροῦ· τροφή γὰρ οὐχ ἐν μόνον τοῖς ζώοις, ἀλλὰ τὸ μεμειγμένον. καὶ ἔστι τῆς προσφερομένης τροφῆς τοῖς ζώοις τὰ μὲν ἀπὰ τῶν αἰσθητῶν αὐξησιν ποιοῦντα καὶ φθίσιν· τούτων μὲν γὰρ αἷτιον ἢ θερμὸν καὶ ψυχρὸν τὸ προσφερόμενον (ταῦτα γὰρ ποιεῖ καὶ αὐξησιν [442a] καὶ φθίσιν), τρέφει δὲ ἢ γευστὸν τὸ προσφερόμενον (πάντα γὰρ τρέφεται τῷ γλυκεῖ, ἢ ἀπλῶς ἢ μεμειγμένῳ). δεῖ μὲν οὖν διορίζειν περὶ τούτων ἐν τοῖς περὶ γενέσεως, νῦν δ' ὅσον ἀναγκαῖον ἄψασθαι αὐτῶν. τὸ γὰρ θερμὸν αὐξάνει, καὶ δημιουργεῖ τὴν τροφήν, καὶ τὸ κοῦφον ἔλκει, τὸ δ' ἀλμυρὸν καὶ πικρὸν καταλείπει διὰ τὸ

βάρος. ὁ δὴ ἐν τοῖς ἔξω σώμασι ποιεῖ τὸ ἔξω θερμόν, τοῦτο τὸ ἐν τῇ φύσει τῶν ζώων καὶ φυτῶν· διὸ τρέφεται τῷ γλυκεῖ. συμμείγνυνται δ' οἱ ἄλλοι χυμοὶ εἰς τὴν τροφήν τὸν αὐτὸν τρόπον τῷ ἄλμυρῳ καὶ ὀξεῖ, ἀντὶ ἡδύσματος, ταῦτα δὲ διὰ τὸ ἀντισπᾶν τῷ λίαν τρόφιμον εἶναι τὸ γλυκὺ καὶ ἐπιπολαστικόν.

ὥσπερ δὲ τὰ χρώματα ἐκ λευκοῦ καὶ μέλανος μίξεώς ἐστιν, οὕτως οἱ χυμοὶ ἐκ γλυκέος καὶ πικροῦ, καὶ κατὰ λόγον δ' ἢ τῷ μᾶλλον καὶ ἥττον ἕκαστοί εἰσιν, εἴτε κατ' ἀριθμούς τινας τῆς μίξεως καὶ κινήσεως, εἴτε καὶ ἀορίστως, οἱ δὲ τὴν ἡδονὴν ποιοῦντες μειγνύμενοι, οὗτοι ἐν ἀριθμοῖς μόνον· ὁ μὲν οὖν λιπαρὸς τοῦ γλυκέος ἐστὶ χυμός, τὸ δ' ἄλμυρὸν καὶ πικρὸν σχεδὸν τὸ αὐτό, ὁ δὲ δριμύς καὶ αὐστηρὸς καὶ στρυφνὸς καὶ ὀξύς ἀνά μέσον. σχεδὸν γὰρ ἴσα καὶ τὰ τῶν χυμῶν εἶδη καὶ τὰ τῶν χρωμάτων ἐστίν· ἐπτα γὰρ ἀμφοτέρων εἶδη, ἃν τις τιθῇ, ὥσπερ εὐλογον, τὸ φαιὸν μέλαν τι εἶναι· λείπεται γὰρ τὸ ξανθὸν μὲν τοῦ λευκοῦ εἶναι ὥσπερ τὸ λιπαρὸν τοῦ γλυκέος, τὸ φοινικοῦν δὲ καὶ ἀλουργὸν καὶ πράσινον καὶ κυανοῦν μεταξὺ τοῦ λευκοῦ καὶ μέλανος, τὰ δ' ἄλλα μεικτὰ ἐκ τούτων. καὶ ὥσπερ τὸ μέλαν στήρησις ἐν τῷ διαφανεῖ τοῦ λευκοῦ, οὕτω τὸ ἄλμυρὸν καὶ τὸ πικρὸν τοῦ γλυκέος ἐν τῷ τροφίμῳ ὑγρῷ. διὸ καὶ ἡ τέφρα τῶν κατακαιομένων πικρὰ πάντων· ἐξίκμασται γὰρ τὸ πότιμον ἐξ αὐτῶν.

Δημόκριτος δὲ καὶ οἱ πλεῖστοι τῶν φυσιολόγων, ὅσοι λέγουσι περὶ αἰσθήσεως, ἀτοπώτατόν τι [442b] ποιοῦσιν· πάντα γὰρ τὰ αἰσθητὰ ἀπτὰ ποιοῦσιν. καίτοι εἰ τοῦτο οὕτως ἔχει, δῆλον ὡς καὶ τῶν ἄλλων αἰσθήσεων ἐκάστη ἀφή τίς ἐστιν· τοῦτο δ' ὅτι ἀδύνατον, οὐ χαλεπὸν συνιδεῖν. ἔτι δὲ τοῖς κοινοῖς τῶν αἰσθήσεων πασῶν χρῶνται ὡς ἰδίους· μέγεθος γὰρ καὶ σχῆμα καὶ τὸ τραχὺ καὶ τὸ λεῖον, ἔτι δὲ τὸ ὀξὺ καὶ τὸ ἀμβλὺ τὸ ἐν τοῖς ὄγκοις, κοινὰ τῶν αἰσθήσεών ἐστιν, εἰ δὲ μὴ πασῶν, ἀλλ' ὅψεώς γε καὶ ἀφῆς. διὸ καὶ περὶ μὲν τούτων ἀπατῶνται, περὶ δὲ τῶν ἰδίων οὐκ ἀπατῶνται, οἷον ἢ ὄψις περὶ χρώματος καὶ ἡ ἀκοή περὶ ψόφων. οἱ δὲ τὰ ἴδια εἰς ταῦτα ἀνάγουσιν, ὥσπερ Δημόκριτος· τὸ γὰρ λευκὸν καὶ τὸ μέλαν τὸ μὲν τραχύ φησιν εἶναι τὸ δὲ λεῖον, εἰς δὲ τὰ σχήματα ἀνάγει τοὺς χυμούς. καίτοι ἢ οὐδεμιᾶς ἢ μᾶλλον τῆς ὀψεως τὰ κοινὰ γνωρίζειν. εἰ δ' ἄρα τῆς γεύσεως μᾶλλον, τὰ γοῦν ἐλάχιστα τῆς ἀκριβεστάτης ἐστὶν αἰσθήσεως διακρίνειν περὶ ἕκαστον γένος, ὥστε ἐχρῆν τὴν γεῦσιν καὶ τῶν ἄλλων κοινῶν αἰσθάνεσθαι μάλιστα καὶ τῶν σχημάτων εἶναι

κριτικωτάτην. ἔτι τὰ μὲν αἰσθητὰ πάντα ἔχει ἐναντίωσιν, οἷον ἐν χρώματι τῷ μέλανι τὸ λευκὸν καὶ ἐν χυμοῖς τῷ γλυκεῖ τὸ πικρόν· σχῆμα δὲ σχήματι οὐ δοκεῖ εἶναι ἐναντίον· τίτι γὰρ τῶν πολυγώνων τὸ περιφερὲς ἐναντίον; ἔτι ἀπείρων ὄντων τῶν σχημάτων ἀναγκαῖον καὶ τοὺς χυμοὺς εἶναι ἀπείρους· διὰ τί γὰρ ὁ μὲν τῶν χυμῶν αἰσθησιν ποιήσει, ὁ δ' οὐκ ἂν ποιήσειεν; καὶ περὶ μὲν τοῦ γευστοῦ καὶ χυμοῦ εἴρηται· τὰ γὰρ ἄλλα πάθη τῶν χυμῶν οἰκείαν ἔχει τὴν σκέψιν ἐν τῇ φυσιολογίᾳ τῇ περὶ τῶν φυτῶν.

Τὸν αὐτὸν δὲ τρόπον δεῖ νοῆσαι καὶ περὶ τὰς ὁσμάς· ὅπερ γὰρ ποιεῖ ἐν τῷ ὑγρῷ τὸ ξηρόν, τοῦτο ποιεῖ ἐν ἄλλῳ γένει τὸ ἐγχυμον ὑγρόν, ἐν ἀέρι καὶ ὕδατι ὁμοίως. (κοινὸν δὲ κατὰ τούτων νῦν μὲν λέγομεν τὸ διαφανές, ἔστι δ' ὁσφραντὸν [443a] οὐχ ἡ διαφανές, ἀλλ' ἡ πλυτικὸν καὶ ῥυπτικὸν ἐγχύμου ξηρότητος.) οὐ γὰρ μόνον ἐν ἀέρι ἀλλὰ καὶ ἐν ὕδατι τὸ τῆς ὁσφρήσεως ἐστίν. δῆλον δ' ἐπὶ τῶν ἰχθύων καὶ τῶν ὀστρακοδέρμων· φαίνονται γὰρ ὁσφραίνόμενα οὔτε ἀέρος ὄντος ἐν τῷ ὕδατι (ἐπιπολάζει γὰρ ὁ ἀήρ, ὅταν ἐγγένηται) οὔτ' αὐτὰ ἀναπνέοντα. εἰ οὖν τις θεῖη καὶ τὸν ἀέρα καὶ τὸ ὕδωρ ἄμφω ὑγρά, εἴη ἂν ἢ ἐν ὑγρῷ τοῦ ἐγχύμου ξηροῦ φύσις ὁσμή, καὶ ὁσφραντὸν τὸ τοιοῦτον. ὅτι δ' ἅπ' ἐγχύμου ἐστὶ τὸ πάθος, δῆλον ἐκ τῶν ἐχόντων καὶ μὴ ἐχόντων ὁσμήν· τὰ τε γὰρ στοιχεῖα ἄοσμα, οἷον πῦρ ἀήρ γῆ ὕδωρ, διὰ τὸ τὰ τε ξηρὰ αὐτῶν καὶ τὰ ὑγρά ἄχυμα εἶναι, ἂν μὴ τι μειγνύμενον ποιῇ. διὸ καὶ ἡ θάλαττα ἔχει ὁσμήν (ἔχει γὰρ χυμὸν καὶ ξηρότητα), καὶ ἅλεις μᾶλλον νίτρου ὁσμώδεις (δηλοῖ δὲ τὸ ἐξικμαζόμενον ἐξ αὐτῶν ἔλαιον), τὸ δὲ νίτρον γῆς ἐστὶ μᾶλλον. ἔτι λίθος μὲν ἄοσμον, ἄχυμον γάρ, τὰ δὲ ξύλα ὁσμώδη, ἐγχυμα γάρ· καὶ τούτων τὰ ὑδατώδη ἦττον. ἔτι ἐπὶ τῶν μεταλλευομένων χρυσὸς ἄοσμον, ἄχυμον γάρ, ὁ δὲ χαλκὸς καὶ ὁ σίδηρος ὁσμώδη· ὅταν δ' ἐκκαυθῇ τὸ ὑγρόν, ἀοσμότεραι αἱ σκωρίαι γίνονται πάντων· ἄργυρος δὲ καὶ καττίτερος τῶν μὲν μᾶλλον ὁσμώδη τῶν δ' ἦττον· ὑδατώδη γάρ.

δοκεῖ δ' ἐνίοις ἡ καπνώδης ἀναθυμίασις εἶναι ὁσμή, οὔσα κοινὴ γῆς τε καὶ ἀέρος [καὶ πάντες ἐπιφέρονται ἐπὶ τοῦτο περὶ ὁσμῆς]· διὸ καὶ Ἡράκλειτος οὕτως εἴρηκεν, ὥς εἰ πάντα τὰ ὄντα καπνὸς γένοιτο, ῥίνες ἂν διαγνοῖεν, «καὶ πάντες ἐπιφέρονται ἐπὶ τοῦτο περὶ ὁσμῆς», οἱ μὲν ὥς ἀτμίδα, οἱ δ' ὥς ἀναθυμίασιν, οἱ δ' ὥς ἄμφω ταῦτα· ἔστι δ' ἢ μὲν ἀτμὶς ὑγρότης τις, ἢ δὲ καπνώδης ἀναθυμίασις, ὥσπερ εἴρηται, κοινὸν ἀέρος καὶ γῆς· καὶ συνίσταται

ἐκ μὲν ἐκείνης ὕδωρ, ἐκ δὲ ταύτης γῆς τι εἶδος. ἀλλ' οὐδέτερον τούτων ἔοικεν· ἡ μὲν γὰρ ἀτμὶς ἐστὶν ὕδατος, ἡ δὲ καπνώδης ἀναθυμίασις ἀδύνατος ἐν ὕδατι γενέσθαι· ὁσμάται δὲ καὶ τὰ ἐν τῷ ὕδατι, [443b] ὥσπερ εἴρηται πρότερον. ἔτι ἡ ἀναθυμίασις ὁμοίως λέγεται ταῖς ἀπορροαίσις· εἰ οὖν μὴδ' ἐκεῖναι καλῶς, οὐδ' αὕτη καλῶς. ὅτι μὲν οὖν ἐνδέχεται ἀπολαύειν τὸ ὑγρόν, καὶ τὸ ἐν τῷ πνεύματι καὶ τὸ ἐν τῷ ὕδατι, καὶ πάσχειν τι ὑπὸ τῆς ἐγγύμου ξηρότητος, οὐκ ἄδηλον· καὶ γὰρ ὁ ἀῆρ ὑγρὸν τὴν φύσιν ἐστίν. ἔτι δ' εἴπερ ὁμοίως ἐν τοῖς ὑγροῖς ποιεῖ καὶ ἐν τῷ ἀέρι οἶον ἀποπλυνόμενον τὸ ξηρόν, φανερόν ὅτι δεῖ ἀνάλογον εἶναι τὰς ὁσμάς τοῖς χυμοῖς. ἀλλὰ μὴν τοῦτό γε ἐπ' ἐνίων συμβέβηκεν· καὶ γὰρ δριμεῖαι καὶ γλυκεῖαι εἰσὶν ὁσμαὶ καὶ αὐστηραὶ καὶ στρυφναὶ καὶ λιπαραί, καὶ τοῖς πικροῖς τὰς σαπρὰς ἂν τις ἀνάλογον εἴποι· διὸ ὥσπερ ἐκεῖνα δυσκατάποτα, τὰ σαπρὰ δυσανάπνευστά ἐστιν. δῆλον ἄρα ὅτι ὅπερ ἐν τῷ ὕδατι ὁ χυμός, τοῦτ' ἐν τῷ ἀέρι καὶ ὕδατι ἡ ὁσμή. καὶ διὰ τοῦτο τὸ ψυχρόν καὶ ἡ πῆξις καὶ τοὺς χυμοὺς ἀμβλύνει καὶ τὰς ὁσμάς ἀφανίζει· τὸ γὰρ θερμὸν τὸ κινεῖν καὶ δημιουργοῦν ἀφανίζουσιν ἡ ψύξις καὶ ἡ πῆξις.

εἶδη δὲ τοῦ ὁσφραντοῦ δύο ἐστίν· οὐ γάρ, ὥσπερ τινές φασιν, οὐκ ἔστιν εἶδη τοῦ ὁσφραντοῦ, ἀλλ' ἔστιν. διοριστέον δὲ πῶς ἔστι καὶ πῶς οὐκ ἔστιν· τὸ μὲν γάρ ἐστι κατὰ τοὺς χυμοὺς τεταγμένον αὐτῶν, ὥσπερ εἵπομεν, καὶ τὸ ἡδὺ καὶ τὸ λυπηρόν κατὰ συμβεβηκὸς ἔχουσιν (διὰ γὰρ τὸ τοῦ θρεπτικοῦ πάθη εἶναι, ἐπιθυμούντων μὲν ἡδεῖαι αἱ ὁσμαὶ τούτων εἰσὶ, πεπληρωμένοις δὲ καὶ μὴδὲν δεομένοις οὐχ ἡδεῖαι, οὐδ' ὅσοις μὴ καὶ ἡ τροφή ἡ ἔχουσα τὰς ὁσμάς ἡδεῖα, οὐδὲ τούτοις) - ὥστε αὗται μὲν, καθάπερ εἵπομεν, κατὰ συμβεβηκὸς ἔχουσι τὸ ἡδὺ καὶ λυπηρόν, διὸ καὶ πάντων εἰσὶ κοινὰ τῶν ζώων· αἱ δὲ καθ' αὐτὰς ἡδεῖαι τῶν ὁσμῶν εἰσιν, οἷον αἱ τῶν ἀνθῶν· οὐδὲν γὰρ μᾶλλον οὐδ' ἥττον πρὸς τὴν τροφήν παρακαλοῦσιν, οὐδὲ συμβάλλονται πρὸς ἐπιθυμίαν οὐδέν, ἀλλὰ τοῦναντίον μᾶλλον· ἀληθὲς γὰρ ὅπερ Εὐριπίδην σκώπτων εἶπε Στράτις, “ὅταν φακὴν ἔψητε, μὴ ‘πιχεῖν μύρον.” οἱ δὲ νῦν μειγνύντες [444a] εἰς τὰ πόματα τὰς τοιαύτας δυνάμεις βιάζονται τῇ συνηθείᾳ τὴν ἡδονήν, ἕως ἂν ἐκ δὴ αἰσθήσεων γένηται τὸ ἡδὺ ὡς ἂν καὶ ἀπὸ μιᾶς.

τοῦτο μὲν οὖν τὸ ὁσφραντὸν ἴδιον ἀνθρώπου ἐστίν, ἡ δὲ κατὰ τοὺς χυμοὺς τεταγμένη καὶ τῶν ἄλλων ζώων, ὥσπερ εἴρηται πρότερον· κἀκείνων μὲν, διὰ τὸ κατὰ συμβεβηκὸς ἔχειν τὸ ἡδύ,

διήρηται τὰ εἶδη κατὰ τοὺς χυμούς, ταύτης δ' οὐκέτι, διὰ τὸ τὴν φύσιν αὐτῆς εἶναι καθ' αὐτὴν ἡδεῖαν ἢ λυπηράν. αἴτιον δὲ τοῦ ἴδιον εἶναι ἀνθρώπου τὴν τοιαύτην ὁσμὴν διὰ τὴν ἕξιν τὴν περὶ τὸν ἐγκέφαλον. ψυχροῦ γὰρ ὄντος τὴν φύσιν τοῦ ἐγκεφάλου, καὶ τοῦ αἵματος τοῦ περὶ αὐτὸν ἐν τοῖς φλεβίοις ὄντος λεπτοῦ μὲν καὶ καθαροῦ, εὐψύκτου δέ (διὸ καὶ ἡ τῆς τροφῆς ἀναθυμίασις ψυχομένη διὰ τὸν τόπον τὰ νοσηματικά ρεύματα ποιεῖ), τοῖς ἀνθρώποις πρὸς βοήθειαν ὑγείας γέγονε τὸ τοιοῦτον εἶδος τῆς ὁσμῆς· οὐδὲν γὰρ ἄλλο ἔργον ἐστὶν αὐτῆς ἢ τοῦτο. τοῦτο δὲ ποιεῖ φανερώς· ἡ μὲν γὰρ τροφή ἡδεῖα οὖσα, καὶ ἡ ξηρὰ καὶ ἡ ὑγρὰ, πολλάκις νοσώδης ἐστίν, ἡ δ' ἀπὸ τῆς ὁσμῆς τῆς καθ' αὐτὴν ἡδεῖας εὐωδία ὅπως οὖν ἔχουσιν ὠφέλιμος ὥς εἰπεῖν αἰεὶ. καὶ διὰ τοῦτο γίγνεται διὰ τῆς ἀναπνοῆς, οὐ πᾶσιν ἀλλὰ τοῖς ἀνθρώποις καὶ τῶν ἐναίμων οἶον τοῖς τετράποσι καὶ ὅσα μετέχει μᾶλλον τῆς τοῦ ἀέρος φύσεως· ἀναφερομένων γὰρ τῶν ὁσμῶν πρὸς τὸν ἐγκέφαλον διὰ τὴν ἐν αὐταῖς τῆς θερμότητος κουφότητα ὑγιεινότερως ἔχει τὰ περὶ τὸν τόπον τοῦτον· ἡ γὰρ τῆς ὁσμῆς δύναμις θερμὴ τὴν φύσιν ἐστίν. κατακέχρηται δ' ἡ φύσις τῇ ἀναπνοῇ ἐπὶ δύο, ὥς ἔργῳ μὲν ἐπὶ τὴν εἰς τὸν θώρακα βοήθειαν, ὥς παρέργῳ δ' ἐπὶ τὴν ὁσμὴν· ἀναπνέοντος γὰρ ὥσπερ ἐκ παρόδου ποιεῖται διὰ τῶν μυκτῆρων τὴν κίνησιν.

ἴδιον δὲ τῆς τοῦ ἀνθρώπου φύσεως ἐστὶ τὸ τῆς ὁσμῆς τῆς τοιαύτης γένος διὰ τὸ πλεῖστον ἐγκέφαλον καὶ ὑγρότατον ἔχειν τῶν ἄλλων ζώων ὥς κατὰ μέγεθος· διὰ γὰρ τοῦτο καὶ μόνον ὥς εἰπεῖν αἰσθάνεται τῶν ζώων ἄνθρωπος καὶ χαίρει ταῖς τῶν ἀνθῶν καὶ τῶν τοιούτων ὁσμαῖς· σύμμετρος γὰρ αὐτῶν [444b] ἡ θερμότης καὶ ἡ κίνησις πρὸς τὴν ὑπερβολὴν τῆς ἐν τῷ τόπῳ ὑγρότητος καὶ ψυχρότητός ἐστιν. τοῖς δ' ἄλλοις ὅσα πνεύμονα ἔχει διὰ τοῦ ἀναπνεῖν τοῦ ἐτέρου γένους τῆς ὁσμῆς τὴν αἴσθησιν ἀποδέδωκεν ἡ φύσις, ὅπως μὴ δύο αἰσθητήρια ποιῇ· ἀπόχρη γάρ, ἐπεὶ καὶ ὥς ἀναπνέουσιν, ὥσπερ τοῖς ἀνθρώποις ἀμφοτέρων τῶν ὁσφραντῶν, τούτοις τῶν ἐτέρων μόνων ὑπάρχουσα ἡ αἴσθησις. τὰ δὲ μὴ ἀναπνέοντα ὅτι μὲν ἔχει αἴσθησιν τοῦ ὁσφραντοῦ, φανερόν· καὶ γὰρ ἰχθύες καὶ τὸ τῶν ἐντόμων γένος πᾶν ἀκριβῶς καὶ πόρρωθεν αἰσθάνεται, διὰ τὸ θρεπτικὸν εἶδος τῆς ὁσμῆς, ἀπέχοντα πολὺ τῆς οἰκείας τροφῆς, οἷον αἱ τε μέλιττα [ποιοῦσι πρὸς τὸ μέλι] καὶ τὸ τῶν μικρῶν μυρμηκῶν γένος, οὓς καλοῦσί τινες κνίπας, καὶ τῶν θαλαττίων αἱ πορφύραι, καὶ πολλὰ τῶν ἄλλων τῶν τοιούτων ζώων

ὁξέως αἰσθάνεται τῆς τροφῆς διὰ τὴν ὁσμήν. ὅτω δὲ αἰσθάνεται, οὐχ ὁμοίως φανερόν. διὸ καὶ ἀπορήσειέ τις τίνοι αἰσθάνονται τῆς ὁσμῆς, εἴπερ ἀναπνέουσι μὲν γίγνεται τὸ ὁσμᾶσθαι μοναχῶς (τοῦτο γὰρ φαίνεται ἐπὶ τῶν ἀναπνεόντων συμβαῖνον πάντων), ἐκείνων δ' οὐθὲν ἀναπνεῖ, αἰσθάνεται μέντοι, εἰ μὴ τις παρὰ τὰς πέντε αἰσθήσεις ἑτέρα. τοῦτο δ' ἀδύνατον· τοῦ γὰρ ὁσφραντοῦ ὁσφρησις, ἐκεῖνα δὲ τούτου αἰσθάνεται, ἀλλ' οὐ τὸν αὐτὸν ἴσως τρόπον, ἀλλὰ τοῖς μὲν ἀναπνέουσι τὸ πνεῦμα ἀφαιρεῖ τὸ ἐπικείμενον ὥσπερ πῶμά τι (διὸ οὐκ αἰσθάνεται μὴ ἀναπνέοντα), τοῖς δὲ μὴ ἀναπνέουσιν ἀφήρηται τοῦτο, καθάπερ ἐπὶ τῶν ὀφθαλμῶν τὰ μὲν ἔχει βλέφαρα τῶν ζώων, ὧν μὴ ἀνακαλυφθέντων οὐ δύναται ὁρᾶν, τὰ δὲ σκληρόφθαλμα οὐκ ἔχει, διόπερ οὐ προσδεῖται οὐδενὸς τοῦ ἀνακαλύψοντος, ἀλλ' ὁρᾷ ἐκ τοῦ δυνατοῦ ὄντος αὐτοῖς εὐθύς.

ὁμοίως δὲ καὶ τῶν ἄλλων ζώων ὅτιοῦν οὐδὲν δυσχεραίνει τῶν καθ' αὐτὰ δυσωδῶν τὴν ὁσμήν, ἂν μὴ τι τύχη φθαρτικὸν ὄν, ὑπὸ τούτων δ' ὁμοίως φθαρεῖται καθάπερ καὶ οἱ ἄνθρωποι ὑπὸ τῆς τῶν ἀνθρώκων ἀτιμίδος καρηβαροῦσι καὶ φθείρονται πολλάκις· οὕτως ὑπὸ τῆς τοῦ θείου δυνάμεως καὶ τῶν ἀσφαλτωδῶν φθείρεται [445a] τᾶλλα ζῶα, καὶ φεύγει διὰ τὸ πάθος. αὐτῆς δὲ καθ' αὐτὴν τῆς δυσωδίας οὐδὲν φροντίζουσιν (καίτοι πολλὰ τῶν φυομένων δυσώδεις ἔχει τὰς ὁσμάς), ἐὰν μὴ τι συμβάλληται πρὸς τὴν γεῦσιν ἢ τὴν ἐδωδὴν αὐτοῖς. ἔοικε δ' ἡ αἴσθησις ἢ τοῦ ὁσφραίνεσθαι, περιττῶν οὐσῶν τῶν αἰσθήσεων καὶ τοῦ ἀριθμοῦ ἔχοντος μέσον τοῦ περιττοῦ, καὶ αὐτὴ μέση εἶναι τῶν τε ἀπτικῶν, οἷον ἀφῆς καὶ γεύσεως, καὶ τῶν δι' ἄλλου αἰσθητικῶν, οἷον ὄψεως καὶ ἀκοῆς. διὸ καὶ τὸ ὁσφραντὸν τῶν θρεπτικῶν ἐστὶ πάθος τι (ταῦτα δ' ἐν τῷ ἀπτῷ γένει), καὶ τοῦ ἀκουστοῦ δὲ καὶ τοῦ ὁρατοῦ, διὸ καὶ ἐν ἀέρι καὶ ἐν ὕδατι ὁσμῶνται. ὥστ' ἐστὶ τὸ ὁσφραντὸν κοινόν τι τούτων ἀμφοτέρων, καὶ τῷ τε ἀπτῷ ὑπάρχει καὶ τῷ ἀκουστῷ καὶ τῷ διαφανεῖ· διὸ καὶ εὐλόγως παρεῖκασται ξηρότητος ἐν ὑγρῷ καὶ χυτῷ οἷον βαφή τις εἶναι καὶ πλύσις. πῶς μὲν οὖν εἶδη δεῖ λέγειν καὶ πῶς οὐ δεῖ τοῦ ὁσφραντοῦ, ἐπὶ τοσοῦτον εἰρήσθω.

ὁ δὲ λέγουσί τινες τῶν Πυθαγορείων, οὐκ ἔστιν εὐλογον· τρέφεσθαι γάρ φασιν ἓνια ζῶα ταῖς ὁσμαῖς. πρῶτον μὲν γὰρ ὁρῶμεν ὅτι τὴν τροφήν δεῖ εἶναι συνθετὴν (καὶ γὰρ τὰ τρεφόμενα οὐχ ἀπλᾶ ἔστιν, διὸ καὶ περιττώματα γίγνεται τῆς τροφῆς, ἢ ἐν αὐτοῖς ἢ ἔξω, ὥσπερ τοῖς φυτοῖς, ἐπεὶ δ' οὐδὲ τὸ ὕδωρ ἐθέλει αὐτὸ μόνον ἄμεικτον

ὄν τρέφειν - σωματῶδες γάρ τι δεῖ εἶναι τὸ συστησόμενον - ἔτι πολὺ ἥττον εὐλογον τὸν ἀέρα σωματοῦσθαι· πρὸς δὲ τούτοις, ὅτι πᾶσιν ἔστι τοῖς ζώοις τόπος δεκτικὸς τῆς τροφῆς, ἐξ οὗ ἔλκον λαμβάνει τὸ σῶμα· τοῦ δ' ὀσφραντοῦ ἐν τῇ κεφαλῇ τὸ αἰσθητήριον, καὶ μετὰ πνευματώδους εἰσέρχεται ἀναθυμιάσεως, ὥστ' εἰς τὸν ἀναπνευστικὸν βαδίζοι ἂν τόπον. ὅτι μὲν οὖν οὐ συμβάλλεται εἰς τροφήν τὸ ὀσφραντόν, ἢ ὀσφραντόν, δῆλον· ὅτι μέντοι εἰς ὑγίειαν, καὶ ἐκ τῆς αἰσθήσεως καὶ ἐκ τῶν εἰρημένων φανερόν, ὥστε ὅπερ ὁ χυμὸς ἐν τῷ θρεπτικῷ καὶ πρὸς τὰ τρεφόμενα, τοῦτ' ἐστὶ πρὸς ὑγίειαν τὸ [445b] ὀσφραντόν. καθ' ἕκαστον μὲν οὖν αἰσθητήριον διωρίσθω τὸν τρόπον τοῦτον.

Ἀπορήσειε δ' ἂν τις, εἰ πᾶν σῶμα εἰς ἄπειρον διαιρεῖται, ἄρα καὶ τὰ παθήματα τὰ αἰσθητά, οἷον χρῶμα καὶ χυμὸς καὶ ὀσμὴ καὶ ψόφος, καὶ βαρὺ καὶ κοῦφον, καὶ θερμὸν καὶ ψυχρόν, καὶ σκληρὸν καὶ μαλακόν, ἢ ἀδύνατον. ποιητικὸν γάρ ἐστιν ἕκαστον αὐτῶν τῆς αἰσθήσεως (τῷ δύνασθαι γὰρ κινεῖν αὐτὴν λέγεται πάντα), ὥστ' ἀνάγκη, εἰ ἡ δύναμις, καὶ τὴν αἴσθησιν εἰς ἄπειρα διαιρεῖσθαι καὶ πᾶν εἶναι μέγεθος αἰσθητόν (ἀδύνατον γὰρ λευκὸν μὲν ὀρᾶν, μὴ ποσὸν δέ)· εἰ γὰρ μὴ οὕτως, ἐνδέχοιτ' ἂν εἶναί τι σῶμα μηδὲν ἔχον χρῶμα μηδὲ βάρος μηδ' ἄλλο τι τοιοῦτον πάθος, ὥστ' οὐδ' αἰσθητὸν ὄλως· ταῦτα γὰρ τὰ αἰσθητά. τὸ ἄρ' αἰσθητὸν ἔσται συγκείμενον οὐκ ἐξ αἰσθητῶν. ἀλλ' ἀναγκαῖον· οὐ γὰρ δι' ἕκ γε τῶν μαθηματικῶν. ἔτι τίτιν κρινοῦμεν ταῦτα καὶ γνωσόμεθα; ἢ τῷ νῷ; ἀλλ' οὐ νοητά, οὐδὲ νοεῖ ὁ νοῦς τὰ ἐκτὸς μὴ μετ' αἰσθήσεως. ἅμα δ' εἰ ταῦτ' ἔχει οὕτως, ἔοικε μαρτυρεῖν τοῖς τὰ ἄτομα ποιοῦσι μεγέθη· οὕτω γὰρ ἂν λύοιτο ὁ λόγος. ἀλλ' ἀδύνατα· εἴρηται δὲ περὶ αὐτῶν ἐν τοῖς λόγοις τοῖς περὶ κινήσεως.

περὶ δὲ τῆς λύσεως αὐτῶν ἅμα δῆλον ἔσται καὶ διὰ τί πεπέρανται τὰ εἶδη καὶ χρώματος καὶ χυμοῦ καὶ φθόγγων καὶ τῶν ἄλλων αἰσθητῶν. ὣν μὲν γὰρ ἐστὶν ἔσχατα, ἀνάγκη πεπεράνθαι τὰ ἐντός· τὰ δ' ἐναντία ἔσχατα, πᾶν δὲ τὸ αἰσθητὸν ἔχει ἐναντίωσιν, οἷον ἐν χρώματι τὸ λευκὸν καὶ τὸ μέλαν, ἐν χυμῷ γλυκὺ καὶ πικρόν· καὶ ἐν τοῖς ἄλλοις δὴ πᾶσιν ἐστὶν ἔσχατα τὰ ἐναντία. τὸ μὲν οὖν συνεχὲς εἰς ἄπειρα τέμνεται ἄνισα, εἰς δ' ἴσα πεπερασμένα· τὸ δὲ μὴ καθ' αὐτὸ συνεχὲς εἰς πεπερασμένα εἶδη. ἐπεὶ οὖν τὰ μὲν πάθη ὡς εἶδη λεκτέον, ὑπάρχει δὲ συνέχεια ἀεὶ ἐν τούτοις, ληπτέον ὅτι τὸ δυνάμει καὶ τὸ ἐνεργείᾳ ἕτερον· καὶ διὰ τοῦτο τὸ μυριοστημόριον

λανθάνει [446a] τῆς κέγχρου ὀρωμένης, καίτοι ἡ ὄψις ἐπελήλυθεν, καὶ ὁ ἐν τῇ διέσει φθόγγος λανθάνει, καίτοι συνεχοῦς ὄντος ἀκούει τοῦ μέλους παντός· τὸ δὲ διάστημα τὸ τοῦ μεταξὺ πρὸς τοὺς ἐσχάτους λανθάνει. ὁμοίως δὲ καὶ ἐν τοῖς ἄλλοις αἰσθητοῖς τὰ μικρὰ πάμπαν· δυνάμει γὰρ ὁρατά, ἐνεργεία δ' οὐ, ὅταν μὴ χωρὶς ἤ· καὶ γὰρ ἐνυπάρχει δυνάμει ἡ ποδιαία τῇ δίποδι, ἐνεργεία δ' ἤδη ἀφαιρεθεῖσα. χωριζόμεναι δ' αἱ τηλικαῦται ὑπεροχαὶ εὐλόγως μὲν ἂν καὶ διαλύοντο εἰς τὰ περιέχοντα, ὥσπερ καὶ ἀκαριαῖος χυμὸς εἰς τὴν θάλατταν ἐγχυθεῖς. οὐ μὴν ἄλλ' ἐπειδὴ οὐδ' ἡ τῆς αἰσθήσεως ὑπεροχὴ καθ' αὐτὴν αἰσθητὴ οὐδὲ χωριστὴ (δυνάμει γὰρ ἐνυπάρχει ἐν τῇ ἀκριβεστερᾷ ἢ ὑπεροχῇ), οὐδὲ τὸ τηλικοῦτον αἰσθητὸν χωριστὸν ἔσται ἐνεργεία αἰσθάνεσθαι. ἀλλ' ὅμως ἔσται αἰσθητόν· δυνάμει τε γὰρ ἐστὶν ἤδη, καὶ ἐνεργεία ἔσται προσγενόμενον. ὅτι μὲν οὖν ἓνια μεγέθη καὶ πάθη λανθάνει, καὶ διὰ τίν' αἰτίαν, καὶ πῶς αἰσθητὰ καὶ πῶς οὐ, εἴρηται. ὅταν δὲ δὴ ἐνυπάρχη τοῦτω τοσαῦτα ὥστε καὶ ἐνεργεία αἰσθητὰ εἶναι, καὶ μὴ μόνον ὅτι ἐν τῷ ὄλῳ ἀλλὰ καὶ χωρὶς, πεπερασμένα ἀνάγκη εἶναι τὸν ἀριθμὸν, καὶ χρώματα καὶ χυμοὺς καὶ φθόγγους.

ἀπορήσεις δ' ἂν τις, ἅρ' ἀφικνοῦνται ἢ τὰ αἰσθητὰ ἢ αἱ κινήσεις αἱ ἀπὸ τῶν αἰσθητῶν (ὅποτεως ποτὲ γίνεταί ἢ αἰσθησις), ὅταν ἐνεργῶσιν, εἰς τὸ μέσον πρῶτον, οἷον ἢ τε ὁσμὴ φαίνεται ποιοῦσα καὶ ὁ ψόφος· πρότερον γὰρ ὁ ἐγγὺς αἰσθάνεταί τῆς ὁσμῆς, καὶ ὁ ψόφος ὕστερον ἀφικνεῖται τῆς πληγῆς. ἅρ' οὖν οὕτω καὶ τὸ ὁρώμενον καὶ τὸ φῶς, καθάπερ καὶ Ἐμπεδοκλῆς φησὶν ἀφικνεῖσθαι πρότερον τὸ ἀπὸ τοῦ ἡλίου φῶς εἰς τὸ μεταξὺ πρὶν πρὸς τὴν ὄψιν ἢ ἐπὶ τὴν γῆν; δόξειε δ' ἂν εὐλόγως τοῦτο συμβαίνειν· τὸ γὰρ κινούμενον κινεῖται ποθὲν ποι, ὥστ' ἀνάγκη εἶναι τινα καὶ χρόνον ἐν ᾧ κινεῖται ἐκ θατέρου πρὸς θάτερον· ὁ δὲ [446b] χρόνος πᾶς διαιρετός, ὥστε ἦν ὅτε οὐ πῶ ἐωρᾶτο ἀλλ' ἔτ' ἐφέρετο ἢ ἀκτὶς ἐν τῷ μεταξύ. καὶ εἰ «καὶ» ἅπαν ἅμα ἀκούει καὶ ἀκήκοε, καὶ ὅλως αἰσθάνεταί καὶ ἦσθηται, καὶ μὴ ἐστὶ γένεσις αὐτῶν, ἀλλ' εἰσὶν ἄνευ τοῦ γίνεσθαι, ὅμως οὐδὲν ἤττον, ὥσπερ ὁ ψόφος ἤδη γεγεννημένης τῆς πληγῆς οὐ πῶ πρὸς τῇ ἀκοῇ - δηλοῖ δὲ τοῦτο καὶ ἡ τῶν γραμμάτων μετασχημάτισις, ὡς γιγνομένης τῆς φορᾶς ἐν τῷ μεταξύ· οὐ γὰρ τὸ λεχθὲν φαίνονται ἀκηκοότες διὰ τὸ μετασχηματίζεσθαι φερόμενον τὸν ἀέρα - ἅρ' οὖν οὕτω καὶ τὸ χρῶμα καὶ τὸ φῶς; οὐ γὰρ δὴ τῷ πῶς ἔχειν τὸ μὲν ὁρᾶ τὸ δ' ὁρᾶται, ὥσπερ ἴσα ἐστίν· οὐθὲν γὰρ

ἂν ἔδει που ἐκάτερον εἶναι· τοῖς γὰρ ἴσοις γιγνομένοις οὐδὲν διαφέρει ἢ ἐγγὺς ἢ πόρρω ἀλλήλων εἶναι.

ἢ περὶ μὲν τὸν ψόφον καὶ τὴν ὁσμὴν τοῦτο συμβαίνειν εὖλογον· ὥσπερ γὰρ ὁ ἀῆρ καὶ τὸ ὕδωρ, συνεχῇ μὲν, μεμέρισται δ' ἀμφοτέρων ἢ κίνησις, διὸ καὶ ἔστι μὲν ὡς τὸ αὐτὸ ἀκούει ὁ πρῶτος καὶ ὁ ὕστερος καὶ ὁσφραίνεται, ἔστι δ' ὡς οὐ. δοκεῖ δέ τισιν εἶναι ἀπορία καὶ περὶ τούτων· ἀδύνατον γὰρ φασὶ τινες ἄλλον ἄλλω τὸ αὐτὸ ἀκούειν καὶ ὄρᾶν καὶ ὁσφραίνεσθαι· οὐ γὰρ οἶόν τ' εἶναι πολλοὺς καὶ χωρὶς ὄντας <ἐν> ἀκούειν καὶ ὁσφραίνεσθαι· τὸ γὰρ ἐν χωρὶς ἂν αὐτὸ αὐτοῦ εἶναι. ἢ τοῦ μὲν κινήσαντος πρῶτου, οἶον τῆς κώδωνος ἢ λιβανωτοῦ ἢ πυρός, τοῦ αὐτοῦ καὶ ἐνὸς ἀριθμῷ αἰσθάνονται πάντες, τοῦ δὲ δὴ ἰδίου ἐτέρου ἀριθμῷ, εἶδει δὲ τοῦ αὐτοῦ, διὸ ἅμα πολλοὶ ὀρῶσι καὶ ὁσμῶνται καὶ ἀκούουσιν; ἔστι δ' οὔτε σώματα ταῦτα, ἀλλὰ πάθος καὶ κίνησίς τις (οὐ γὰρ ἂν τοῦτο συνέβαινεν), οὗτ' ἄνευ σώματος. περὶ δὲ τοῦ φωτὸς ἄλλος λόγος· τῷ ἐνεῖναι γάρ τι τὸ φῶς ἐστίν, ἀλλ' οὐ κίνησίς τις. ὅλως δὲ οὐδὲ ὁμοίως ἐπὶ τε ἀλλοιώσεως ἔχει καὶ φορᾶς· αἱ μὲν γὰρ φοραὶ εὐλόγως εἰς τὸ μεταξὺ πρῶτον ἀφικνοῦνται (δοκεῖ δ' ὁ ψόφος εἶναι φερομένου [447a] τινὸς κίνησις), ὅσα δ' ἀλλοιοῦται, οὐκέτι ὁμοίως· ἐνδέχεται γὰρ ἀθρόον ἀλλοιοῦσθαι, καὶ μὴ τὸ ἡμῖς προτέρον, οἶον τὸ ὕδωρ ἅμα πᾶν πηγνυσθαι. οὐ μὴν ἀλλ' ἂν ἢ πολὺ τὸ θερμαινόμενον ἢ πηγνύμενον, τὸ ἐχόμενον ὑπὸ τοῦ ἐχομένου πάσχει, τὸ δὲ πρῶτον ὑπ' αὐτοῦ τοῦ ἀλλοιοῦντος μεταβάλλει καὶ ἀνάγκη ἅμα ἀλλοιοῦσθαι καὶ ἀθρόον. ἦν δ' ἂν καὶ τὸ γεύεσθαι ὥσπερ ἡ ὁσμὴ, εἰ ἐν ὑγρῷ ἡμεν καὶ πορρωτέρωθεν πρὶν θιγεῖν αὐτοῦ ἡσθανόμεθα. εὐλόγως δὴ ὧν ἐστὶ μεταξὺ τοῦ αἰσθητηρίου, οὐχ ἅμα πάντα πάσχει, πλὴν ἐπὶ τοῦ φωτὸς διὰ τὸ εἰρημένον, διὰ τὸ αὐτὸ δὲ καὶ ἐπὶ τοῦ ὄρᾶν· τὸ γὰρ φῶς ποιεῖ τὸ ὄρᾶν.

Ἔστι δ' ἀπορία καὶ ἄλλη τις τοιάδε περὶ τὰς αἰσθήσεις, πότερον ἐνδέχεται δυεῖν ἅμα αἰσθάνεσθαι ἐν τῷ αὐτῷ καὶ ἀτόμῳ χρόνῳ, ἢ οὐ. εἰ δὴ ἀεὶ ἡ μείζων κίνησις τὴν ἐλάττω ἐκκρούει - διὸ ὑποφερομένων ὑπὸ τὰ ὅμματα οὐκ αἰσθάνονται, ἐὰν τύχωσι σφόδρα τι ἐννοῦντες ἢ φοβούμενοι ἢ ἀκούοντες πολὺν ψόφον - τοῦτο δὴ ὑποκείσθω, καὶ ὅτι ἐκάστου μᾶλλον ἔστιν αἰσθάνεσθαι ἀπλοῦ ὄντος ἢ κεκραμένου, οἶον οἴνου ἀκράτου ἢ κεκραμένου, καὶ μέλιτος, καὶ χροᾶς, καὶ τῆς νήτης μόνης ἢ ἐν τῇ διὰ πασῶν, διὰ τὸ ἀφανίζειν ἀλληλα. τοῦτο δὲ ποιεῖ ἐξ ὧν ἐν τι γίγνεται. εἰ δὴ ἡ μείζων τὴν

ελάττω κίνησιν ἐκκρούει, ἀνάγκη, ἂν ἅμα ὦσι, καὶ αὐτὴν ἦττον αἰσθητὴν εἶναι ἢ εἰ μόνη ἦν· ἀφαιρεῖται γάρ τι ἢ ἐλάττων μειγνυμένη, εἴπερ ἅπαντα τὰ ἀπλᾶ μᾶλλον αἰσθητά ἐστιν. ἐὰν ἄρα ἴσαι ὦσιν ἕτεραι οὔσαι, οὐδετέρας ἔσται αἴσθησις· ἀφανιεῖ γὰρ ἡ ἑτέρα ὁμοίως τὴν ἑτέραν, ἀπλῆς δ' οὐκ ἔστιν αἰσθάνεσθαι. ὥστε ἡ οὐδεμία ἔσται αἴσθησις, ἢ ἄλλη ἐξ ἀμφοῖν· ὅπερ καὶ γίνεσθαι δοκεῖ ἐπὶ τῶν κεραυννυμένων ἐν ᾧ ἂν μειχθῶσιν.

ἐπεὶ οὖν ἐκ μὲν ἐνίων γίνεταί τι, ἐκ δ' ἐνίων οὐ γίνεταί, τοιαῦτα δὲ τὰ ὑφ' ἑτέραν αἴσθησιν (μειγνυνται γὰρ [447b] ὧν τὰ ἔσχατα ἐναντία· οὐκ ἔστι δ' ἐκ λευκοῦ καὶ ὀξέος ἐν γίνεσθαι ἀλλ' ἢ κατὰ συμβεβηκός, ἀλλ' οὐχ ὥς ἐξ ὀξέος καὶ βαρέος συμφωνία), οὐκ ἄρα οὐδ' αἰσθάνεσθαι ἐνδέχεται αὐτῶν ἅμα. ἴσαι μὲν γὰρ οὔσαι αἰ κινήσεις ἀφανιοῦσιν ἀλλήλας, ἐπεὶ μία οὐ γίνεταί ἐξ αὐτῶν· ἂν δ' ἄνισοι, ἢ κρείττων αἴσθησιν ἐμποιήσει. ἔτι μᾶλλον ἅμα δυοῖν αἰσθοῖτ' ἂν ἢ ψυχὴ τῇ μιᾷ αἰσθήσει ὧν μία αἴσθησις, οἷον ὀξέος καὶ βαρέος (μᾶλλον γὰρ ἅμα ἢ κινήσεις τῇ μιᾷ αὐτὴ ἐαυτῇ ἢ τοῖν δυοῖν, οἷον ὄψεως καὶ ἀκοῆς), τῇ μιᾷ δὲ ἅμα δυοῖν οὐκ ἔστιν αἰσθάνεσθαι ἂν μὴ μειχθῇ (τὸ γὰρ μείγμα ἐν βούλεται εἶναι, τοῦ δ' ἐνὸς μία αἴσθησις, ἢ δὲ μία ἅμα αὐτῇ), ὥστ' ἐξ ἀνάγκης τῶν μεμειγμένων ἅμα αἰσθάνεται, ὅτι μιᾷ αἰσθήσει κατ' ἐνέργειαν αἰσθάνεται· ἐνὸς μὲν γὰρ ἀριθμῷ ἢ κατ' ἐνέργειαν μία, εἶδει δὲ ἢ κατὰ δύναμιν μία· καὶ εἰ μία τοίνυν ἢ αἴσθησις ἢ κατ' ἐνέργειαν, ἐν ἐκεῖνα ἐρεῖ. μεμειχθαι ἄρα ἀνάγκη αὐτά. ὅταν ἄρα μὴ ἦ μεμειγμένα, δύο ἔσονται αἰσθήσεις αἱ κατ' ἐνέργειαν. ἀλλὰ κατὰ μίαν δύναμιν καὶ ἄτομον χρόνον μίαν ἀνάγκη εἶναι τὴν ἐνέργειαν· μιᾷ γὰρ ἢ εἰσάπαξ μία χρῆσις καὶ κίνησις, μία δὲ ἢ δύναμις. οὐκ ἄρα ἐνδέχεται δυοῖν ἅμα αἰσθάνεσθαι τῇ μιᾷ αἰσθήσει.

ἀλλὰ μὴν εἰ τὰ ὑπὸ τὴν αὐτὴν αἴσθησιν ἅμα ἀδύνατον, ἐὰν ἦ δύο, δῆλον ὅτι ἦττον ἔτι τὰ κατὰ δύο αἰσθήσεις ἐνδέχεται ἅμα αἰσθάνεσθαι, οἷον λευκὸν καὶ γλυκύ. φαίνεται γὰρ τὸ μὲν τῷ ἀριθμῷ ἐν ἢ ψυχῇ οὐδενὶ ἐτέρῳ λέγειν ἀλλ' ἢ τῷ ἅμα, τὸ δὲ τῷ εἶδει ἐν τῇ κρινούσῃ αἰσθήσει καὶ τῷ τρόπῳ. λέγω δὲ τοῦτο, ὅτι ἴσως τὸ λευκὸν καὶ τὸ μέλαν, ἕτερον τῷ εἶδει ὄν, ἢ αὐτὴ κρίνει, καὶ τὸ γλυκὺ καὶ τὸ πικρὸν ἢ αὐτὴ μὲν ἐαυτῇ, ἐκείνης δ' ἄλλῃ, ἀλλ' ἐτέρως ἐκάτερον τῶν ἐναντίων, ὥς δ' αὐτως ἐαυταῖς τὰ σύστοιχα, οἷον ὥς ἢ γεῦσις τὸ γλυκύ, οὕτως ἢ ὄψις τὸ λευκόν, [448a] ὥς δ' αὕτη τὸ μέλαν, οὕτως ἐκείνη τὸ πικρόν. ἔτι εἰ αἱ τῶν ἐναντίων κινήσεις ἐναντίαι, ἅμα δὲ τὰ

έναντία ἐν τῷ αὐτῷ καὶ ἀτόμῳ οὐκ ἐνδέχεται ὑπάρχειν, ὑπὸ δὲ τὴν αἰσθησιν τὴν μίαν ἐναντία ἐστίν, οἷον γλυκὺ πικρῷ, τούτων οὐκ ἂν ἐνδέχοιτο αἰσθάνεσθαι ἅμα. ὁμοίως δὲ δηλὸν ὅτι οὐδὲ τὰ μὴ ἐναντία· τὰ μὲν γὰρ τοῦ λευκοῦ τὰ δὲ τοῦ μέλανός ἐστιν, καὶ ἐν τοῖς ἄλλοις ὁμοίως, οἷον τῶν χυμῶν οἱ μὲν τοῦ γλυκέος οἱ δὲ τοῦ πικροῦ. οὐδὲ τὰ μεμειγμένα ἅμα (λόγοι γάρ εἰσιν ἀντικειμένων, οἷον τὸ διὰ πασῶν καὶ τὸ διὰ πέντε), ἐὰν μὴ ὡς ἐν αἰσθάνηται. οὕτως δ' εἰς ὁ λόγος ὁ τῶν ἄκρων γίγνεται· ἄλλως δ' οὐ, ἔσται γὰρ ἅμα ὁ μὲν πολλοῦ πρὸς ὀλίγον ἢ περιττοῦ πρὸς ἄρτιον, ὁ δ' ὀλίγου πρὸς πολὺ ἢ ἀρτίου πρὸς περιττόν. εἰ οὖν πλεῖον ἔτι ἀπέχει ἀλλήλων καὶ διαφέρει τὰ συστοίχως μὲν λεγόμενα ἐν ἄλλῳ δὲ γένει τῶν ἐν τῷ αὐτῷ γένει (λέγω δ' οἷον τὸ γλυκὺ καὶ τὸ λευκὸν καλῶ σύστοιχα, γένει δ' ἕτερα, τὸ γλυκὺ δὲ τοῦ λευκοῦ πλεῖον ἔτι τῷ εἶδει διαφέρει ἢ τὸ μέλαν), ἔτι ἂν ἦττον ἅμα ἐνδέχοιτο αὐτὰ αἰσθάνεσθαι ἢ τὰ τῷ γένει ταυτά. ὥστ' εἰ μὴ ταῦτα, οὐδ' ἐκεῖνα.

ὁ δὲ λέγουσί τινες τῶν περὶ τὰς συμφωνίας, ὅτι οὐχ ἅμα μὲν ἀφικνοῦνται οἱ ψόφοι, φαίνονται δέ, καὶ λανθάνει, ὅταν ὁ χρόνος ἢ ἀναίσθητος, πότερον ὀρθῶς λέγεται ἢ οὐ; τάχα γὰρ ἂν φαίη τις καὶ νῦν παρὰ τοῦτο δοκεῖν ἅμα ὁρᾶν καὶ ἀκοῦειν, ὅτι οἱ μεταξὺ χρόνοι λανθάνουσιν. ἢ τοῦτ' οὐκ ἀληθές, οὐδ' ἐνδέχεται χρόνον εἶναι ἀναίσθητον οὐδένα οὐδὲ λανθάνειν, ἀλλὰ παντὸς ἐνδέχεται αἰσθάνεσθαι; εἰ γάρ, ὅτε αὐτὸς αὐτοῦ τις αἰσθάνεται ἢ ἄλλου ἐν συνεχεῖ χρόνῳ, μὴ ἐνδέχεται τότε λανθάνειν ὅτι ἔστιν, ἔστι δέ τις ἐν τῷ συνεχεῖ καὶ τοσοῦτος ὅσος ὅλως ἀναίσθητός ἐστι, δηλὸν ὅτι τότε λανθάνοι ἂν εἰ ἔστιν αὐτὸς αὐτόν, καὶ εἰ ὁρᾷ καὶ αἰσθάνεται [καὶ εἰ αἰσθάνεται]. ἔτι οὐκ ἂν εἴη [448b] οὔτε χρόνος οὔτε πρᾶγμα οὐδὲν ὃ αἰσθάνεται ἢ ἐν ᾧ, εἰ μὴ οὕτως, ὅτι ἐν τούτου τινὶ ἢ ὅτι τούτου τι ὁρᾷ, εἴπερ ἔστι τι μέγεθος καὶ χρόνου καὶ πράγματος ἀναίσθητον ὅλως διὰ μικρότητα· εἰ γὰρ τὴν ὅλην ὁρᾷ, καὶ αἰσθάνεται τὸν αὐτὸν συνεχῶς χρόνον, οὕτω, τῷ ἐν τούτου τινί, ἀφηρήσθω τὸ ΓΒ, ἐν ᾧ οὐκ ἦσθάνετο. οὐκοῦν ἐν ταύτης τινὶ ἢ ταύτης τι, ὥσπερ τὴν γῆν ὁρᾷ ὅλην, ὅτι τοδὶ αὐτῆς, καὶ ἐν τῷ ἐνιαυτῷ βαδίζει, ὅτι ἐν τῷδὶ τῷ μέρει αὐτοῦ. ἀλλὰ μὴν ἐν τῷ ΓΒ οὐδὲν αἰσθάνεται. τῷ ἄρα ἐν τούτου τινὶ τοῦ ΑΒ αἰσθάνεσθαι λέγεται τοῦ ὅλου αἰσθάνεσθαι καὶ τὴν ὅλην. ὁ δ' αὐτὸς λόγος καὶ ἐπὶ τῆς ΑΓ· αἰεὶ γὰρ ἐν τινὶ καὶ τινός, ὅλου δ' οὐκ ἔστιν αἰσθάνεσθαι. ἅπαντα μὲν οὖν αἰσθητά ἐστιν, ἀλλ' οὐ φαίνεται ὅσα ἐστίν· τοῦ γὰρ ἡλίου τὸ μέγεθος ὁρᾷ καὶ τὸ τετράπηχυ

πόρρωθεν, ἀλλ' οὐ φαίνεται ὅσον, ἀλλ' ἐνίστε ἀδιαίρετον, <ὁ> ὁρᾷ δ' οὐκ ἀδιαίρετον. ἢ δ' αἰτία εἴρηται ἐν τοῖς ἐμπροσθεν περὶ τούτου.

ὅτι μὲν οὖν οὐθείς ἐστι χρόνος ἀναίσθητος, ἐκ τούτων φανερόν· περὶ δὲ τῆς πρότερον λεχθείσης ἀπορίας σκεπτέον, πότερον ἐνδέχεται ἅμα πλειόνων αἰσθάνεσθαι ἢ οὐκ ἐνδέχεται. τὸ δ' ἅμα λέγω ἐν ἐνὶ καὶ ἀτόμῳ χρόνῳ πρὸς ἄλληλα. πρῶτον μὲν οὖν ἄρ' ὥδ' ἐνδέχεται, ἅμα μὲν, ἐτέρῳ δὲ τῆς ψυχῆς αἰσθάνεσθαι, κὰν [οὐ τῷ ἀτόμῳ] οὕτως ἀτόμῳ ὥς παντὶ ὄντι συνεχεῖ; ἢ [ὅτι] πρῶτον μὲν κατὰ τὴν μίαν αἴσθησιν, οἷον λέγω ὅψιν, εἰ ἔσται ἄλλω αἰσθανομένη ἄλλου καὶ ἄλλου χρώματος, πλείω γε μέρη ἔξει εἶδει ταυτά; καὶ γὰρ ἂν αἰσθάνεται ἐν τῷ αὐτῷ γένει ἐστίν. εἰ δέ, [ὅτι] ὥς ὅμματα δύο, φαίη τις οὐδὲν κωλύειν οὕτω καὶ ἐν τῇ ψυχῇ, [ὅτι] ἴσως ἐκ μὲν τούτων ἓν τι γίγνεται καὶ μία ἢ ἐνέργεια αὐτῶν· ἐκεῖ δέ, εἰ μὲν ἐν τῷ ἐξ ἀμφοῖν, ἐκεῖνο τὸ αἰσθανόμενον ἔσται, εἰ δὲ χωρὶς, οὐχ ὁμοίως ἔξει. ἔτι αἰσθήσεις αἱ αὐταὶ πλείους ἔσονται, ὥσπερ εἴ τις ἐπιστήμας [449a] διαφόρους φαίη· οὔτε γὰρ ἢ ἐνέργεια ἄνευ τῆς κατ' αὐτὴν ἔσται δυνάμεως, οὔτ' ἄνευ ταύτης αἴσθησις ἔσται.

εἰ δὲ τούτων ἐν ἐνὶ καὶ ἀτόμῳ <μὴ> αἰσθάνεται, δῆλον ὅτι καὶ τῶν ἄλλων· μᾶλλον γὰρ ἐνεδέχετο τούτων ἅμα πλειόνων ἢ τῶν τῷ γένει ἐτέρων. εἰ δὲ δὴ ἄλλω μὲν γλυκέος ἄλλω δὲ λευκοῦ αἰσθάνεται ἢ ψυχὴ μέρει, ἥτοι τὸ ἐκ τούτων ἓν τί ἐστίν ἢ οὐχ ἓν. ἀλλ' ἀνάγκη ἓν· ἐν γάρ τι τὸ αἰσθητικὸν ἐστὶ μέρος. τίνος οὖν ἐκεῖνο ἐνός; οὐδὲν γὰρ ἐκ τούτων ἓν. ἀνάγκη ἄρα ἓν τι εἶναι τῆς ψυχῆς ᾧ ἅπαντα αἰσθάνεται, καθάπερ εἴρηται πρότερον, ἄλλο δὲ γένος δι' ἄλλου. ἄρ' οὖν ἢ μὲν ἀδιαίρετόν ἐστι κατ' ἐνέργειαν, ἓν τί ἐστὶ τὸ αἰσθητικὸν γλυκέος καὶ λευκοῦ, ὅταν δὲ διαιρετὸν γένηται κατ' ἐνέργειαν, ἕτερον; ἢ ὥσπερ ἐπὶ τῶν πραγμάτων αὐτῶν ἐνδέχεται, οὕτως καὶ ἐπὶ τῆς ψυχῆς; τὸ γὰρ αὐτὸ καὶ ἐν ἀριθμῷ λευκὸν καὶ γλυκὺ ἐστὶ, καὶ ἄλλα πολλά· εἰ γὰρ μὴ χωριστὰ τὰ πάθη ἀλλήλων, ἀλλὰ τὸ εἶναι ἕτερον ἐκάστω. ὁμοίως τοίνυν θετέον καὶ ἐπὶ τῆς ψυχῆς τὸ αὐτὸ καὶ ἐν εἶναι ἀριθμῷ τὸ αἰσθητικὸν πάντων, τὸ μέντοι εἶναι ἕτερον καὶ ἕτερον τῶν μὲν γένει τῶν δὲ εἶδει. ὥστε καὶ αἰσθάνοιτ' ἂν ἅμα τῷ αὐτῷ καὶ ἐνί, λόγῳ δ' οὐ τῷ αὐτῷ.

ὅτι δὲ τὸ αἰσθητὸν πᾶν ἐστὶ μέγεθος καὶ οὐκ ἔστιν ἀδιαίρετον αἰσθητόν, δῆλον. ἔστι γὰρ ὅθεν μὲν οὐκ ἂν ὀφθῇ ἀπειρον τὸ ἀπόστημα, ὅθεν δὲ ὁρᾶται, πεπερασμένον· ὁμοίως δὲ καὶ τὸ ὁσφραντὸν καὶ ἀκουστὸν καὶ ὅσων μὴ αὐτῶν ἀπτόμενοι

αἰσθάνονται. ἔστι δὴ τι ἔσχατον τοῦ ἀποστήματος ὅθεν οὐχ ὁρᾶται, καὶ πρῶτον ὅθεν ὁρᾶται. τοῦτο δὴ ἀνάγκη ἀδιαίρετον εἶναι, οὗ ἐν μὲν τῷ ἐπέκεινα οὐκ ἐνδέχεται αἰσθάνεσθαι ὄντος, ἐν δὲ τῷ ἐπὶ τάδε ἀνάγκη αἰσθάνεσθαι. εἰ δὴ τι ἔστιν ἀδιαίρετον αἰσθητόν, ὅταν τεθῇ ἐπὶ τῷ ἐσχάτῳ ὅθεν ἐστὶν ὕστατον μὲν οὐκ αἰσθητόν πρῶτον δ' αἰσθητόν, ἅμα συμβήσεται ὁρατὸν εἶναι καὶ ἀόρατον· τοῦτο δ' ἀδύνατον.

[449b] περὶ μὲν οὖν τῶν αἰσθητηρίων καὶ τῶν αἰσθητῶν τίνα τρόπον ἔχει καὶ κοινῇ καὶ καθ' ἕκαστον αἰσθητήριον εἴρηται· τῶν δὲ λοιπῶν πρῶτον σκεπτέον περὶ μνήμης καὶ τοῦ μνημονεύειν.

Περὶ Μνήμης καὶ Αναμνησεως (449b) On Memory

[449b] Περὶ μνήμης καὶ τοῦ μνημονεύειν λεκτέον τί ἐστὶ καὶ διὰ τίν' αἰτίαν γίγνεται καὶ τίνι τῶν τῆς ψυχῆς μορίων συμβαίνει τοῦτο τὸ πάθος καὶ τὸ ἀναμιμνήσκεσθαι· οὐ γὰρ οἱ αὐτοὶ εἰσι μνημονικοὶ καὶ ἀναμνηστικοί, ἀλλ' ὥς ἐπὶ τὸ πολὺ μνημονικώτεροι μὲν οἱ βραδεῖς, ἀναμνηστικώτεροι δὲ οἱ ταχεῖς καὶ εὐμαθεῖς. πρῶτον μὲν οὖν σκεπτέον ποῖά ἐστὶ τὰ μνημονευτά· πολλάκις γὰρ ἐξαπατᾷ τοῦτο. οὔτε γὰρ τὸ μέλλον ἐνδέχεται μνημονεύειν, ἀλλ' ἐστὶ δοξαστὸν καὶ ἐλπιστὸν (εἴη δ' ἂν καὶ ἐπιστήμη τις ἐλπιστική, καθάπερ τινὲς φασὶ τὴν μαντικήν), οὔτε τοῦ παρόντος, ἀλλ' αἴσθησις· ταύτη γὰρ οὔτε τὸ μέλλον οὔτε τὸ γενόμενον γνωρίζομεν, ἀλλὰ τὸ παρὸν μόνον. ἡ δὲ μνήμη τοῦ γενομένου· τὸ δὲ παρὸν ὅτε πάρεστιν, οἷον τοδὶ τὸ λευκὸν ὅτε ὄρᾳ, οὐδεὶς ἂν φαίη μνημονεύειν, οὐδὲ τὸ θεωρούμενον, ὅτε θεωρῶν τυγχάνει καὶ νοῶν, ἀλλὰ τὸ μὲν αἰσθάνεσθαι φησι, τὸ δ' ἐπίστασθαι μόνον· ὅταν δ' ἄνευ τῶν ἔργων σχῇ τὴν ἐπιστήμην καὶ τὴν αἴσθησιν, οὕτω μέμνηται [τὰς τοῦ τριγώνου ὅτι δύο ὀρθαῖς ἴσαι], τὸ μὲν ὅτι ἔμαθεν ἢ ἐθεώρησεν, τὸ δὲ ὅτι ἤκουσεν ἢ εἶδεν ἢ τι τοιοῦτον· αἰεὶ γὰρ ὅταν ἐνεργῇ κατὰ τὸ μνημονεύειν, οὕτως ἐν τῇ ψυχῇ λέγει, ὅτι πρότερον τοῦτο ἤκουσεν ἢ ἤσθετο ἢ ἐνόησεν. ἐστὶ μὲν οὖν ἡ μνήμη οὔτε αἴσθησις οὔτε ὑπόληψις, ἀλλὰ τούτων τινὸς ἕξις ἢ πάθος, ὅταν γένηται χρόνος. τοῦ δὲ νῦν ἐν τῷ νῦν οὐκ ἐστὶ μνήμη, καθάπερ εἴρηται [καὶ πρότερον], ἀλλὰ τοῦ μὲν παρόντος αἴσθησις, τοῦ δὲ μέλλοντος ἐλπίς, τοῦ δὲ γενομένου μνήμη· διὸ μετὰ χρόνου πᾶσα μνήμη. ὥσθ' ὅσα χρόνου αἰσθάνεται, ταῦτα μόνα τῶν ζώων μνημονεύει, καὶ τούτῳ ᾧ αἰσθάνεται.

ἐπεὶ δὲ περὶ φαντασίας εἴρηται πρότερον ἐν τοῖς περὶ ψυχῆς, καὶ νοεῖν οὐκ ἔστιν ἄνευ φαντάσματος [450a] - συμβαίνει γὰρ τὸ αὐτὸ πάθος ἐν τῷ νοεῖν ὅπερ καὶ ἐν τῷ διαγράφειν· ἐκεῖ τε γὰρ οὐθὲν προσχρώμενοι τῷ τὸ ποσὸν ὠρισμένον εἶναι τοῦ τριγώνου, ὅμως γράφομεν ὠρισμένον κατὰ τὸ ποσόν, καὶ ὁ νοῶν ὡσαύτως, κἂν μὴ ποσὸν νοῇ, τίθεται πρὸ ὁμμάτων ποσόν, νοεῖ δ' οὐχ ἢ ποσόν· ἂν δ' ἡ

φύσις ἢ τῶν ποσῶν, ἀορίστων δέ, τίθεται μὲν ποσὸν ὠρισμένον, νοεῖ δ' ἢ ποσὸν μόνον - διὰ τίνα μὲν οὖν αἰτίαν οὐκ ἐνδέχεται νοεῖν οὐδὲν ἄνευ συνεχοῦς, οὐδ' ἄνευ χρόνου τὰ μὴ ἐν χρόνῳ ὄντα, ἄλλος λόγος· μέγεθος δ' ἀναγκαῖον γνωρίζειν καὶ κίνησιν ᾧ καὶ χρόνον· [καὶ τὸ φάντασμα τῆς κοινῆς αἰσθήσεως πάθος ἐστίν] ὥστε φανερόν ὅτι τῷ πρώτῳ αἰσθητικῷ τούτων ἡ γνῶσις ἐστίν· ἡ δὲ μνήμη, καὶ ἡ τῶν νοητῶν, οὐκ ἄνευ φαντάσματος ἐστίν, «καὶ τὸ φάντασμα τῆς κοινῆς αἰσθήσεως πάθος ἐστίν»· ὥστε τοῦ νοῦ μὲν κατὰ συμβεβηκὸς ἂν εἴη, καθ' αὐτὸ δὲ τοῦ πρώτου αἰσθητικοῦ. διὸ καὶ ἑτέροις τισὶν ὑπάρχει τῶν ζώων, καὶ οὐ μόνον ἀνθρώποις καὶ τοῖς ἔχουσι δόξαν ἢ φρόνησιν. εἰ δὲ τῶν νοητικῶν τι μορίων ἦν, οὐκ ἂν ὑπῆρχε πολλοῖς τῶν ἄλλων ζώων, ἴσως δ' οὐδενὶ τῶν ἀνοήτων, ἐπεὶ οὐδὲ νῦν πᾶσι διὰ τὸ μὴ πάντα χρόνου αἰσθησιν ἔχειν· ἀεὶ γὰρ ὅταν ἐνεργῇ τῇ μνήμῃ, καθάπερ καὶ πρότερον εἵπομεν, ὅτι εἶδε τοῦτο ἢ ἤκουσεν ἢ ἔμαθε, προσαισθάνεται ὅτι πρότερον· τὸ δὲ πρότερον καὶ ὕστερον ἐν χρόνῳ ἐστίν. τίνος μὲν οὖν τῶν τῆς ψυχῆς ἐστὶ μνήμη, φανερόν, ὅτι οὐπὲρ καὶ ἡ φαντασία· καὶ ἐστὶ μνημονευτὰ καθ' αὐτὰ μὲν ὧν ἐστὶ φαντασία, κατὰ συμβεβηκὸς δὲ ὅσα μὴ ἄνευ φαντασίας.

ἀπορήσειε δ' ἂν τις πῶς ποτε τοῦ μὲν πάθους παρόντος τοῦ δὲ πράγματος ἀπόντος μνημονεύεται τὸ μὴ παρόν. δηλὸν γὰρ ὅτι δεῖ νοῆσαι τοιοῦτον τὸ γιγνόμενον διὰ τῆς αἰσθήσεως ἐν τῇ ψυχῇ καὶ τῷ μορίῳ τοῦ σώματος τῷ ἔχοντι αὐτήν - οἷον ζωγράφημά τι [τὸ πάθος] οὗ φαμεν τὴν ἕξιν μνήμην εἶναι· ἡ γὰρ γιγνομένη κίνησις ἐνσημαίνεται οἷον τύπον τινὰ τοῦ αἰσθήματος, καθάπερ οἱ σφραγιζόμενοι τοῖς δακτυλίοις. διὸ καὶ τοῖς [450b] μὲν ἐν κινήσει πολλῇ διὰ πάθος ἢ δι' ἡλικίαν οὗσιν οὐ γίνεταί μνήμη, καθάπερ ἂν εἰς ὕδωρ ῥέον ἐμπιπτούσης τῆς κινήσεως καὶ τῆς σφραγίδος· τοῖς δὲ διὰ τὸ ψήχεσθαι, καθάπερ τὰ παλαιὰ τῶν οἰκοδομημάτων, καὶ διὰ σκληρότητα τοῦ δεχομένου τὸ πάθος οὐκ ἐγγίγνεται ὁ τύπος. διόπερ οἱ τε σφόδρα νέοι καὶ οἱ γέροντες ἀμνήμονές εἰσιν· ῥέουσι γὰρ οἱ μὲν διὰ τὴν αὕξισιν, οἱ δὲ διὰ τὴν φθίσιν. ὁμοίως δὲ καὶ οἱ λίαν ταχεῖς καὶ οἱ λίαν βραδεῖς οὐδέτεροι φαίνονται μνήμονες· οἱ μὲν γάρ εἰσιν ὑγρότεροι τοῦ δέοντος, οἱ δὲ σκληρότεροι· τοῖς μὲν οὖν οὐ μένει τὸ φάντασμα ἐν τῇ ψυχῇ, τῶν δ' οὐχ ἄπτεται.

ἄλλ' εἰ δὴ τοιοῦτόν ἐστὶ τὸ συμβαῖνον περὶ τὴν μνήμην, πότερον τοῦτο μνημονεύει τὸ πάθος, ἢ ἐκεῖνο ἅφ' οὗ ἐγένετο; εἰ μὲν γὰρ τοῦτο, τῶν ἀπόντων οὐδὲν ἂν μνημονεύοιμεν· εἰ δ' ἐκεῖνο, πῶς

αἰσθανόμενοι τοῦτο μνημονεύομεν οὐ μὴ αἰσθανόμεθα, τὸ ἀπόν; εἴ τ' ἐστὶν ὅμοιον ὥσπερ τύπος ἢ γραφὴ ἐν ἡμῖν, ἢ τούτου αἴσθησις διὰ τί ἂν εἴη μνήμη ἑτέρου, ἀλλ' οὐκ αὐτοῦ τούτου; ὁ γὰρ ἐνεργῶν τῇ μνήμῃ θεωρεῖ τὸ πάθος τοῦτο καὶ αἰσθάνεται τούτου. πῶς οὖν τὸ μὴ παρὸν μνημονεύσει; εἴη γὰρ ἂν καὶ ὁρᾶν τὸ μὴ παρὸν καὶ ἀκούειν. ἢ ἔστιν ὡς ἐνδέχεται καὶ συμβαίνειν τοῦτο; οἷον γὰρ τὸ ἐν πίνακι γεγραμμένον ζῶον καὶ ζῶόν ἐστι καὶ εἰκὼν, καὶ τὸ αὐτὸ καὶ ἐν τοῦτ' ἐστὶν ἄμφω, τὸ μέντοι εἶναι οὐ ταῦτὸν ἀμφοῖν, καὶ ἔστι θεωρεῖν καὶ ὡς ζῶον καὶ ὡς εἰκόνα, οὕτω καὶ τὸ ἐν ἡμῖν φάντασμα δεῖ ὑπολαβεῖν καὶ αὐτὸ τι καθ' αὐτὸ εἶναι καὶ ἄλλου [φάντασμα]. ἢ μὲν οὖν καθ' αὐτό, θεώρημα ἢ φάντασμά ἐστιν, ἢ δ' ἄλλου, οἷον εἰκὼν καὶ μνημόνευμα. ὥστε καὶ ὅταν ἐνεργῇ ἡ κίνησις αὐτοῦ, ἂν μὲν ἢ καθ' αὐτό ἐστι, ταύτῃ αἰσθάνηται ἡ ψυχὴ αὐτοῦ, οἷον νόημά τι ἢ φάντασμα φαίνεται ἐπελθεῖν· ἂν δ' ἢ ἄλλου καὶ ὥσπερ ἐν τῇ γραφῇ ὡς εἰκόνα θεωρεῖ καί, μὴ ἑωρακῶς τὸν Κορίσκον, ὡς Κορίσκου, ἐνταῦθά τε ἄλλο τὸ πάθος τῆς θεωρίας ταύτης καὶ ὅταν ὡς ζῶον γεγραμμένον [451a] θεωρῇ, ἐν τε τῇ ψυχῇ τὸ μὲν γίνεταί ὥσπερ νόημα μόνον, τὸ δ' ὡς ἐκεῖ ὅτι εἰκὼν, μνημόνευμα. καὶ διὰ τοῦτο ἐνίот' οὐκ ἴσμεν, ἐγγινομένων ἡμῖν ἐν τῇ ψυχῇ τοιούτων κινήσεων ἀπὸ τοῦ αἰσθῆσθαι πρότερον, εἰ κατὰ τὸ ἡσθῆσθαι συμβαίνει, καὶ εἰ ἔστι μνήμη ἢ οὐ, διστάζομεν· ὅτε δὲ συμβαίνει ἐννοῆσαι καὶ ἀναμνησθῆναι ὅτι ἠκούσαμεν τι πρότερον ἢ εἶδομεν. τοῦτο δὲ συμβαίνει, ὅταν θεωρῶν ὡς αὐτὸ μεταβάλλῃ καὶ θεωρῇ ὡς ἄλλου.

γίνεται δὲ καὶ τούναντίον, οἷον συνέβη Ἀντιφέροντι τῷ Ὠρείτῃ καὶ ἄλλοις ἐξισταμένοις· τὰ γὰρ φαντάσματα ἔλεγον ὡς γενόμενα καὶ ὡς μνημονεύοντες. τοῦτο δὲ γίνεται ὅταν τις τὴν μὴ εἰκόνα ὡς εἰκόνα θεωρῇ. αἱ δὲ μελέται τὴν μνήμην σφύζουσι τῷ ἐπαναμνηνῆσκειν· τοῦτο δ' ἐστὶν οὐδὲν ἕτερον ἢ τὸ θεωρεῖν πολλάκις ὡς εἰκόνα καὶ μὴ ὡς καθ' αὐτό. τί μὲν οὖν ἐστὶ μνήμη καὶ τὸ μνημονεύειν, εἴρηται, ὅτι φαντάσματος, ὡς εἰκόνος οὐ φάντασμα, ἕξις, καὶ τίνος μορίου τῶν ἐν ἡμῖν, ὅτι τοῦ πρώτου αἰσθητικοῦ καὶ ᾧ χρόνου αἰσθανόμεθα.

Περὶ δὲ τοῦ ἀναμνηνῆσκεσθαι λοιπὸν εἰπεῖν. πρῶτον μὲν οὖν ὅσα ἐν τοῖς ἐπιχειρηματικοῖς λόγοις ἐστὶν ἀληθῆ, δεῖ τιθέναι ὡς ὑπάρχοντα. οὐτε γὰρ μνήμης ἐστὶν ἀνάληψις ἢ ἀνάμνησις οὔτε λῆψις· ὅταν γὰρ τὸ πρῶτον μάθῃ ἢ πάθῃ, οὐτ' ἀναλαμβάνει μνήμην οὐδεμίαν (οὐδεμία γὰρ προέγενεν) οὐτ' ἐξ ἀρχῆς λαμβάνει· ὅταν

γὰρ ἐγγένηται ἡ ἕξις ἢ τὸ πάθος, τότε μνήμη ἐστίν, ὥστε μετὰ τοῦ πάθους ἐγγινομένου οὐκ ἐγγίνεται. ἔτι δ' ὅτε τὸ πρῶτον ἐγγέγονε τῷ ἀτόμῳ καὶ ἐσχάτῳ, τὸ μὲν πάθος ἐνυπάρχει ἤδη τῷ παθόντι καὶ ἡ ἐπιστήμη, εἰ δεῖ καλεῖν ἐπιστήμην τὴν ἕξιν ἢ τὸ πάθος (οὐθὲν δὲ κωλύει κατὰ συμβεβηκὸς καὶ μνημονεύειν ἓνια ὧν ἐπιστάμεθα)· τὸ δὲ μνημονεύειν καθ' αὐτὸ οὐχ ὑπάρχει πρὶν χρονισθῆναι· μνημονεύει γὰρ νῦν ὃ εἶδεν ἢ ἔπαθε πρότερον, οὐχ ὃ νῦν ἔπαθε, νῦν μνημονεύει. ἔτι δὲ φανερόν [451b] ὅτι μνημονεύειν ἔστι μὴ νῦν ἀναμνησθέντα, ἀλλ' ἐξ ἀρχῆς αἰσθόμενον ἢ παθόντα· ἀλλ' ὅταν ἀναλαμβάνῃ ἦν πρότερον εἶχεν ἐπιστήμην ἢ αἴσθησιν ἢ οὐ ποτε τὴν ἕξιν ἐλέγομεν μνήμην, τοῦτ' ἐστὶ καὶ τότε τὸ ἀναμνησkesthai τῶν εἰρημένων τι, τῷ δὲ μνημονεύειν συμβαίνει καὶ μνήμην ἀκολουθεῖν. οὐδὲ δὴ ταῦτα ἀπλῶς, ἐὰν ἔμπροσθεν ὑπάρξαντα πάλιν ἐγγένηται, ἀλλ' ἔστιν ὥς, ἔστι δ' ὥς οὐ. δις γὰρ μαθεῖν καὶ εὐρεῖν ἐνδέχεται τὸν αὐτὸν τὸ αὐτό· δεῖ οὖν διαφέρειν τὸ ἀναμνησkesthai τούτων, καὶ ἐνούσης πλείονος ἀρχῆς ἢ ἐξ ἧς μανθάνουσιν ἀναμνησkesthai.

συμβαίνουνσι δ' αἱ ἀναμνήσεις ἐπειδὴ πέφυκεν ἡ κίνησις ἥδε γενέσθαι μετὰ τήνδε· εἰ μὲν ἐξ ἀνάγκης, δῆλον ὥς ὅταν ἐκείνην κινήθῃ, τήνδε κινήθησεται· εἰ δὲ μὴ ἐξ ἀνάγκης ἀλλ' ἔθει, ὥς ἐπὶ τὸ πολὺ κινήθησεται. συμβαίνει δ' ἐνίας ἅπαξ ἐθισθῆναι μᾶλλον ἢ ἐτέρας πολλάκις κινουμένους· διὸ ἓνια ἅπαξ ἰδόντες μᾶλλον μνημονεύομεν ἢ ἕτερα πολλάκις. ὅταν οὖν ἀναμνησκώμεθα, κινούμεθα τῶν προτέρων τινὰ κινήσεων, ἕως ἂν κινήθῶμεν μεθ' ἣν ἐκείνη εἶωθεν. διὸ καὶ τὸ ἐφεξῆς θηρεύομεν νοήσαντες ἀπὸ τοῦ νῦν ἢ ἄλλου τινός, καὶ ἀφ' ὁμοίου ἢ ἐναντίου ἢ τοῦ σύνεγγυς. διὰ τοῦτο γίγνεται ἡ ἀνάμνησις· αἱ γὰρ κινήσεις τούτων τῶν μὲν αἱ αὐταί, τῶν δ' ἅμα, τῶν δὲ μέρος ἔχουσιν, ὥστε τὸ λοιπὸν μικρὸν ὃ ἐκινήθη μετ' ἐκεῖνο.

ζητοῦσι μὲν οὖν οὕτω, καὶ μὴ ζητοῦντες δ' οὕτως ἀναμνησκονται, ὅταν μεθ' ἐτέραν κινήσιν ἐκείνη γένηται· ὥς δὲ τὰ πολλὰ ἐτέρων γενομένων κινήσεων οἷων εἶπομεν ἐγένετο ἐκείνη. οὐδὲν δὲ δεῖ σκοπεῖν τὰ πόρρω, πῶς μεμνήμεθα, ἀλλὰ τὰ σύνεγγυς· δῆλον γὰρ ὅτι ὁ αὐτός ἐστι τρόπος. [λέγω δὲ τὸ ἐφεξῆς οὐ προζητήσας οὐδ' ἀναμνησθεῖς.] τῷ γὰρ ἔθει ἀκολουθοῦσιν αἱ κινήσεις ἀλλήλαις, ἥδε μετὰ τήνδε, καὶ ὅταν τοίνυν ἀναμνησkesthai βούληται, τοῦτο ποιήσει· ζητήσει λαβεῖν ἀρχὴν κινήσεως, μεθ' ἣν ἐκείνη ἔσται. διὸ τάχιστα καὶ κάλλιστα γίνονται

[452a] ἀπ' ἀρχῆς αἱ ἀναμνήσεις· ὥς γὰρ ἔχουσι τὰ πράγματα πρὸς ἀλλήλα τῷ ἐφεξῆς, οὕτω καὶ αἱ κινήσεις. καὶ ἔστιν εὐμνημόνευτα ὅσα τάξιν τινὰ ἔχει, ὥσπερ τὰ μαθήματα· τὰ δὲ φαύλως καὶ χαλεπῶς. καὶ τοῦτω διαφέρει τὸ ἀναμνησέσθαι τοῦ πάλιν μανθάνειν, ὅτι δυνήσεται πὼς δι' αὐτοῦ κινηθῆναι ἐπὶ τὸ μετὰ τὴν ἀρχήν. ὅταν δὲ μὴ, ἀλλὰ δι' ἄλλου, οὐκέτι μέμνηται. πολλάκις δ' ἤδη μὲν ἀδυνατεῖ ἀναμνησθῆναι, ζητῶν δὲ δύναται καὶ εὐρίσκει. τοῦτο δὲ γίγνεται κινουῦντι πολλά, ἕως ἂν τοιαύτην κίνησιν κίνησιν ἣ ἀκολουθήσει τὸ πρᾶγμα. τὸ γὰρ μεμνησθῆναι ἔστι τὸ ἐνεῖναι δύναμιν τὴν κινουῦσαν· τοῦτο δέ, ὥστ' ἐξ αὐτοῦ καὶ ὧν ἔχει κινήσεων κινηθῆναι, ὥσπερ εἴρηται. δεῖ δὲ λαβέσθαι ἀρχῆς· διὸ ἀπὸ τόπων δοκοῦσιν ἀναμνησέσθαι ἐνίοτε. τὸ δ' αἴτιον ὅτι ταχὺ ἀπ' ἄλλου ἐπ' ἄλλο ἔρχονται, οἷον ἀπὸ γάλακτος ἐπὶ λευκόν, ἀπὸ λευκοῦ δ' ἐπ' ἀέρα, καὶ ἀπὸ τούτου ἐφ' ὑγρόν, ἀφ' οὗ ἐμνήσθη μετοπώρου, ταύτην ἐπιζητῶν τὴν ὥραν.

εἴκοι δὲ καθόλου ἀρχῇ καὶ τὸ μέσον πάντων· εἰ γὰρ μὴ πρότερον, ὅταν ἐπὶ τοῦτο ἔλθῃ μνησθήσεται, ἢ οὐκέτ' οὐδὲ ἄλλοθεν, οἷον εἴ τις νοήσειεν ἐφ' ὧν Α Β Γ Δ Ε Ζ Η Θ <Ι>· εἰ γὰρ μὴ ἐπὶ τοῦ Ι μέμνηται, ἐπὶ τοῦ Ε μνησθήσεται· ἐντεῦθεν γὰρ ἐπ' ἅμφω κινηθῆναι ἐνδέχεται, καὶ ἐπὶ τὸ Δ καὶ ἐπὶ τὸ Ζ. εἰ δὲ μὴ τούτων τι ἐζήτει, ἐπὶ τὸ Γ ἐλθὼν μνησθήσεται, εἰ τὸ Α ἢ τὸ Β ἐπιζητεῖ, εἰ δὲ μὴ, ἐπὶ τὸ Η· καὶ οὕτως αἰεὶ. τοῦ δ' ἀπὸ τοῦ αὐτοῦ ἐνίοτε μὲν μνησθῆναι, ἐνίοτε δὲ μὴ, αἴτιον ὅτι ἐπὶ πλείῳ ἐνδέχεται κινηθῆναι ἀπὸ τῆς αὐτῆς ἀρχῆς, οἷον ἀπὸ τοῦ Γ ἐπὶ τὸ Β ἢ τὸ Δ. ἐὰν οὖν διὰ πολλοῦ κινηθῇ, ἐπὶ τὸ συνθηδέστερον κινεῖται· ὥσπερ γὰρ φύσις ἤδη τὸ ἔθος. διὸ ἂν πολλάκις ἐννοοῦμεν, ταχὺ ἀναμνησκόμεθα· ὥσπερ γὰρ φύσει τότε μετὰ τότε ἐστίν, οὕτω καὶ ἐνεργείᾳ· τὸ δὲ πολλάκις φύσιν ποιεῖ. ἐπεὶ δ' ὥσπερ [452b] ἐν τοῖς φύσει γίγνεται καὶ παρὰ φύσιν καὶ ἀπὸ τύχης, ἔτι μᾶλλον ἐν τοῖς δι' ἔθος, οἷς ἢ φύσις γε μὴ ὁμοίως ὑπάρχει, ὥστε κινηθῆναι ἐνίοτε κάκεῖ καὶ ἄλλως, ἄλλως τε καὶ ὅταν ἀφέλκῃ <τι> ἐκεῖθεν αὐτόσε πη, διὰ τοῦτο καὶ ὅταν δέῃ ὄνομα μνημονεῦσαι, παρόμοιον <εἰ> ἴσμεν, εἰς ἐκεῖνο σολοικίζομεν. τὸ μὲν οὖν ἀναμνησέσθαι τοῦτον συμβαίνει τὸν τρόπον.

τὸ δὲ μέγιστον, γνωρίζειν δεῖ τὸν χρόνον, ἢ μέτρῳ ἢ ἀορίστως. ἔστω δέ τι ᾧ κρίνει τὸν πλείῳ καὶ ἐλάττω· εὐλογον δ' ὥσπερ τὰ μεγέθη· νοεῖ γὰρ τὰ μεγάλα καὶ πόρρω οὐ τῷ ἀποτείνειν ἐκεῖ τὴν διάνοιαν ὥσπερ τὴν ὄψιν φασὶ τινες (καὶ γὰρ μὴ ὄντων ὁμοίως

νοήσει), ἀλλὰ τῇ ἀνάλογον κινήσει· ἔστι γὰρ ἐν αὐτῇ τὰ ὅμοια σχήματα καὶ κινήσεις. τίνι οὖν διοίσει, ὅταν τὰ μείζω νοῇ, ὅτι ἐκεῖνα νοεῖ ἢ τὰ ἐλάττω; πάντα γὰρ τὰ ἐντὸς ἐλάττω, καὶ ἀνὰ λόγον [καὶ τὰ ἐκτός]. ἔστι δ' ἴσως ὥσπερ καὶ τοῖς εἶδεσιν ἀνάλογον λαβεῖν ἄλλο ἐν αὐτῷ, οὕτως καὶ τοῖς ἀποστήμασιν. ὥσπερ οὖν εἰ τὴν A B B E κινεῖται, ποιεῖ τὴν Γ Δ· ἀνάλογον γὰρ ἡ A Γ καὶ ἡ Γ Δ. τί οὖν μᾶλλον τὴν Γ Δ ἢ τὴν Z H ποιεῖ; ἢ ὥς ἡ A Γ πρὸς τὴν A B ἔχει, οὕτως ἡ Θ πρὸς τὴν I ἔχει; ταύτας οὖν ἅμα κινεῖται. ἂν δὲ τὴν Z H βούληται νοῆσαι, τὴν μὲν B E ὁμοίως νοεῖ, ἀντὶ δὲ τῶν Θ I τὰς K Λ νοεῖ· αὗται γὰρ ἔχουσιν ὡς Z A πρὸς B A.

ὅταν οὖν ἅμα ἢ τε τοῦ πράγματος γίνηται κίνησις καὶ ἡ τοῦ χρόνου, τότε τῇ μνήμῃ ἐνεργεῖ. ἂν δ' οἴηται μὴ ποιῶν, οἶεται μνημονεύειν· οὐθὲν γὰρ κωλύει διαψευσθῆναί τινα καὶ δοκεῖν μνημονεύειν μὴ μνημονεύοντα. ἐνεργοῦντα δὲ τῇ μνήμῃ μὴ οἶεσθαι ἀλλὰ λανθάνειν μεμνημένον οὐκ ἔστιν· τοῦτο γὰρ ἦν αὐτὸ τὸ μεμνησθαι. ἀλλ' ἐὰν ἡ τοῦ πράγματος γένηται χωρὶς τῆς τοῦ χρόνου ἢ αὕτη ἐκεῖνης, οὐ μέμνηται. ἡ δὲ τοῦ χρόνου διττὴ ἐστίν· ὅτε μὲν γὰρ μέτρῳ οὐ μέμνηται αὐτόν, [453a] οἷον ὅτι τρίτῃ ἡμέρᾳ ὀδήποτε ἐποίησεν, ὅτε δὲ καὶ μέτρῳ· ἀλλὰ μέμνηται καὶ ἐὰν μὴ μέτρῳ. εἰώθασι δὲ λέγειν ὅτι μέμνηνται μὲν, πότε μέντοι οὐκ ἴσασιν, ὅταν μὴ γνωρίζωσι τοῦ πότε τὸ ποσὸν μέτρῳ.

ὅτι μὲν οὖν οὐχ οἱ αὐτοὶ μνημονικοὶ καὶ ἀναμνηστικοί, ἐν τοῖς πρότερον εἴρηται. διαφέρει δὲ τοῦ μνημονεύειν τὸ ἀναμνησσκεσθαι οὐ μόνον κατὰ τὸν χρόνον, ἀλλ' ὅτι τοῦ μὲν μνημονεύειν καὶ τῶν ἄλλων ζώων μετέχει πολλά, τοῦ δ' ἀναμνησσκεσθαι οὐδὲν ὡς εἰπεῖν τῶν γνωριζομένων ζώων, πλὴν ἄνθρωπος. αἴτιον δ' ὅτι τὸ ἀναμνησσκεσθαι ἐστίν οἷον συλλογισμός τις· ὅτι γὰρ πρότερον εἶδεν ἢ ἤκουσεν ἢ τι τοιοῦτον ἔπαθε, συλλογίζεται ὁ ἀναμνησκόμενος, καὶ ἔστιν οἷον ζητησίς τις. τοῦτο δ' οἷς καὶ τὸ βουλευτικὸν ὑπάρχει, φύσει μόνοις συμβέβηκεν· καὶ γὰρ τὸ βουλευέσθαι συλλογισμός τις ἐστίν.

ὅτι δ' ἐστὶ σωματικόν τι τὸ πάθος, καὶ ἡ ἀνάμνησις ζητησις ἐν τοιούτῳ φαντάσματος, σημεῖον τὸ παρενοχλεῖν ἐνίους ἐπειδὰν μὴ δύνωνται ἀναμνησθῆναι καὶ πάνυ ἐπέχοντες τὴν διάνοιαν, καὶ οὐκέτ' ἐπιχειροῦντας ἀναμνησσκεσθαι οὐδὲν ἥττον, καὶ μάλιστα τοὺς μεγαγχολικούς· τούτους γὰρ φαντάσματα κινεῖ μάλιστα. αἴτιον δὲ τοῦ μὴ ἐπ' αὐτοῖς εἶναι [τὸ ἀναμνησσκεσθαι], ὅτι καθάπερ τοῖς

βάλλουσιν οὐκέτι ἐπ' αὐτοῖς τὸ στήσαι, οὕτως καὶ ὁ ἀναμιμνησκόμενος καὶ θηρεύων σωματικόν τι κινεῖ, ἐν ᾧ τὸ πάθος. μάλιστα δ' ἐνοχλοῦνται οἷς ἂν ὑγρότης τύχη ὑπάρχουσα περὶ τὸν αἰσθητικὸν τόπον· οὐ γὰρ ῥαδίως παύεται κινηθεῖσα, ἕως ἂν ἐπανέλθῃ τὸ ζητούμενον καὶ εὐθυπορήσῃ ἢ κίνησις. διὸ καὶ ὄργαι καὶ φόβοι, ὅταν τι κινήσωσιν, ἀντικινούντων πάλιν τούτων οὐ καθίστανται, ἀλλ' ἐπὶ τὸ αὐτὸ ἀντικινοῦσιν. καὶ ἔοικε τὸ πάθος τοῖς ὀνόμασι καὶ μέλεσι καὶ λόγοις, ὅταν διὰ στόματος γένηται τι αὐτῶν σφόδρα· παυσάμενοις γὰρ καὶ οὐ βουλομένοις ἐπέρχεται πάλιν ᾧδεῖν ἢ λέγειν. εἰσὶ δὲ καὶ οἱ τὰ ἄνω μείζω ἔχοντες καὶ οἱ νανώδεις [453b] ἀμνημονέστεροι τῶν ἐναντίων διὰ τὸ πολὺ βάρος ἔχειν ἐπὶ τῷ αἰσθητικῷ, καὶ μήτ' ἐξ ἀρχῆς τὰς κινήσεις δύνασθαι ἐμμένειν ἀλλὰ διαλύεσθαι μήτ' ἐν τῷ ἀναμνησκέσθαι ῥαδίως εὐθυπορεῖν. οἱ δὲ πάμπαν νέοι καὶ λίαν γέροντες ἀμνήμονες διὰ τὴν κίνησιν· οἱ μὲν γὰρ ἐν φθίσει, οἱ δ' ἐν ἀυξήσει πολλῇ εἰσίν· ἔτι δὲ τὰ γε παιδιά καὶ νανώδη ἐστὶ μέχρι πόρρω τῆς ἡλικίας.

περὶ μὲν οὖν μνήμης καὶ τοῦ μνημονεύειν, τίς ἡ φύσις αὐτῶν καὶ τίτι τῶν τῆς ψυχῆς μνημονεύει τὰ ζῶα, καὶ περὶ τοῦ ἀναμνησκέσθαι, τί ἐστὶ καὶ πῶς γίγνεται καὶ διὰ τίνας αἰτίας, εἴρηται.

Περὶ ὕπνου καὶ ἐγρηγόρσεως (453b) On Sleep

[453b] Περὶ δὲ ὕπνου καὶ ἐγρηγόρσεως ἐπισκεπτέον τίνα τε τυγχάνει ὄντα, καὶ πότερον ἴδια τῆς ψυχῆς ἢ τοῦ σώματος ἢ κοινά, καὶ εἰ κοινά, τίνος μορίου τῆς ψυχῆς ἢ τοῦ σώματος, καὶ διὰ τίν' αἰτίαν ὑπάρχει τοῖς ζώοις· καὶ πότερον ἅπαντα κεκοινωνήκεν ἀμφοτέρων, ἢ τὰ μὲν θατέρου τὰ δὲ θατέρου μόνον, ἢ τὰ μὲν οὐδετέρου τὰ δὲ ἀμφοτέρων· πρὸς δὲ τούτοις τί ἐστὶ τὸ ἐνύπνιον, καὶ διὰ τίνα αἰτίαν οἱ καθεύδοντες ὅτε μὲν ὄνειρώττουσιν ὅτε δὲ οὐ, ἢ συμβαίνει μὲν αἰεὶ τοῖς καθεύδουσιν ἐνυπνιάζειν, ἀλλ' οὐ μνημονεύουσιν, καὶ εἰ τοῦτο γίγνεται, διὰ τίνα αἰτίαν γίγνεται· καὶ πότερον ἐνδέχεται τὰ μέλλοντα προορᾶν ἢ οὐκ ἐνδέχεται, καὶ τίνα τρόπον εἰ ἐνδέχεται· καὶ πότερον τὰ μέλλοντα ὑπ' ἀνθρώπου πράσσεσθαι μόνον, ἢ καὶ ὧν τὸ δαιμόνιον ἔχει τὴν αἰτίαν, καὶ φύσει γίγνεται ἢ ἀπὸ ταυτομάτου.

πρῶτον μὲν οὖν τοῦτό γε φανερόν, ὅτι τῷ αὐτῷ τοῦ ζώου ἢ τε ἐγρήγορσις ὑπάρχει καὶ ὁ ὕπνος· ἀντίκεινται γάρ, καὶ φαίνεται στέρησίς τις ὁ ὕπνος τῆς ἐγρηγόρσεως· αἰεὶ γὰρ τὰ ἐναντία καὶ ἐπὶ τῶν ἄλλων καὶ ἐν τοῖς φυσικοῖς ἐν τῷ αὐτῷ δεκτικῷ φαίνεται γιγνόμενα, καὶ τοῦ αὐτοῦ ὄντα πάθη, λέγω δ' οἷον ὑγίεια καὶ νόσος, καὶ κάλλος καὶ αἴσχος, καὶ ἰσχύς καὶ ἀσθένεια, καὶ ὄψις καὶ τυφλότης, καὶ ἀκοή καὶ κωφότης. ἔτι δὲ [454a] καὶ ἐκ τῶνδε δῆλον· ὃ γὰρ τὸν ἐγρηγορότα γνωρίζομεν, τούτῳ καὶ τὸν καθυπνοῦντα· τὸν δὲ αἰσθανόμενον ἐγρηγορέναι νομίζομεν, καὶ τὸν ἐγρηγορότα πάντα ἢ τῶν ἔξωθεν τινος αἰσθάνεσθαι ἢ τῶν ἐν αὐτῷ κινήσεων. εἰ τοῖνυν τὸ ἐγρηγορέναι ἐν μηδενὶ ἄλλῳ ἐστὶν ἢ τῷ αἰσθάνεσθαι, δῆλον ὅτι ὃ περ αἰσθάνεται, τούτῳ καὶ ἐγρήγορε τὰ ἐγρηγορότα καὶ καθεύδει τὰ καθεύδοντα. ἐπεὶ δὲ οὔτε τῆς ψυχῆς ἴδιον τὸ αἰσθάνεσθαι οὔτε τοῦ σώματος (οὐ γὰρ ἡ δύναμις, τούτου καὶ ἡ ἐνέργεια· ἡ δὲ λεγομένη αἴσθησις ὡς ἐνέργεια κινήσις τις διὰ τοῦ σώματος τῆς ψυχῆς ἐστὶ), φανερόν ὡς οὔτε τῆς ψυχῆς τὸ πάθος ἴδιον, οὐτ' ἄψυχον σῶμα δυνατόν αἰσθάνεσθαι.

διωρισμένων δὲ πρότερον ἐν ἑτέροις περὶ τῶν λεγομένων ὡς

μορίων τῆς ψυχῆς, καὶ τοῦ μὲν θρεπτικοῦ χωριζομένου τῶν ἄλλων ἐν τοῖς ἔχουσι σώμασι ζωήν, τῶν δ' ἄλλων οὐδενὸς ἄνευ τούτου, δηλον ὡς ὅσα μὲν αὐξήσεως καὶ φθίσεως μετέχει μόνον τῶν ζώντων, [ὅτι] τούτοις οὐχ ὑπάρχει ὕπνος οὐδὲ ἐγρήγορσις, οἷον τοῖς φυτοῖς (οὐ γὰρ ἔχουσι τὸ αἰσθητικὸν μόριον, οὔτε εἰ χωριστόν ἐστιν οὔτε εἰ μὴ χωριστόν· τῇ γὰρ δυνάμει καὶ τῷ εἶναι χωριστόν ἐστιν)· ὁμοίως δὲ καὶ ὅτι οὐδὲν ἐστιν ὃ αἰεὶ ἐγρήγορεν ἢ αἰεὶ καθεύδει, ἀλλὰ τοῖς αὐτοῖς ὑπάρχει τῶν ζῶων ἀμφοτέρα τὰ πάθη ταῦτα. οὐ γὰρ, εἴ τι ἔστι ζῶον «μὴ» ἔχον αἴσθησιν, τοῦτ' ἐνδέχεται οὔτε καθεύδειν οὔτε ἐγρηγορέναι (ἄμφω γὰρ ἐστὶ τὰ πάθη ταῦτα περὶ αἴσθησιν τοῦ πρώτου αἰσθητικοῦ)· οὐκ ἐνδέχεται δὲ οὐδὲ θάτερον τούτων αἰεὶ ὑπάρχειν τῷ αὐτῷ, οἷον αἰεὶ τι γένος ζῶων καθεύδειν ἢ αἰεὶ τι ἐγρηγορέναι. ἔτι ὅσων ἔστι τι ἔργον κατὰ φύσιν, ὅταν ὑπερβάλλῃ τὸν χρόνον ὅσον δύναται τι ποιεῖν, ἀνάγκη ἀδυνατεῖν, οἷον τὰ ὄμματα ὁρῶντα, καὶ παύεσθαι τοῦτο ποιοῦντα, ὁμοίως δὲ καὶ χεῖρα καὶ ἄλλο πᾶν οὗ ἔστι τι ἔργον. εἰ δὴ τινός ἐστιν ἔργον τὸ αἰσθάνεσθαι, καὶ τοῦτο, ἂν ὑπερβάλλῃ ὅσον ἦν χρόνον δυνάμενον αἰσθάνεσθαι συνεχῶς, ἀδυνατήσει καὶ οὐκέτι τοῦτο ποιήσει. εἰ τοίνυν τὸ ἐγρηγορέναι ὥριται τῷ λελύσθαι [454b] τὴν αἴσθησιν, τῶν δ' ἐναντίων τῶν μὲν ἀνάγκη θάτερον αἰεὶ παρεῖναι τῶν δ' οὐ, τῷ δ' ἐγρηγορέναι τὸ καθεύδειν ἐναντίον, καὶ ἀναγκαῖον ἅπαντι θάτερον ὑπάρχειν, ἀναγκαῖον ἂν εἴη καθεύδειν. εἰ οὖν τὸ τοιοῦτον πάθος ὕπνος, τοῦτο δ' ἐστὶν ἀδυναμία δι' ὑπερβολὴν τοῦ ἐγρηγορέναι, ἢ δὲ τοῦ ἐγρηγορέναι ὑπερβολὴ ὅτε μὲν νοσώδης ὅτε δὲ ἄνευ νόσου γίγνεται, ὥστε καὶ ἡ ἀδυναμία καὶ ἡ διάλυσις ὡσαύτως ἔσται, ἀνάγκη πᾶν τὸ ἐγρηγορὸς ἐνδέχεσθαι καθεύδειν· ἀδύνατον γὰρ αἰεὶ ἐνεργεῖν.

ὁμοίως δὲ οὐδὲ καθεύδειν οὐδὲν αἰεὶ ἐνδέχεται. ὁ γὰρ ὕπνος πάθος τι τοῦ αἰσθητικοῦ μορίου ἐστίν, οἷον δεσμός τις καὶ ἀκίνησία, ὥστ' ἀνάγκη πᾶν τὸ καθεῦδον ἔχειν τὸ αἰσθητικὸν μόριον. αἰσθητικὸν δὲ τὸ δυνατόν αἰσθάνεσθαι κατ' ἐνέργειαν· ἐνεργεῖν δὲ τῇ αἰσθήσει κυρίως καὶ ἀπλῶς ἀδύνατον καθεῦδον ἅμα· διὸ ἀναγκαῖον ὕπνον πάντα ἐγερτὸν εἶναι. τὰ μὲν οὖν ἄλλα σχεδὸν ἅπαντα δηλαδὴ κοινωνοῦνθ' ὕπνου, καὶ πλωτὰ καὶ πτηνὰ καὶ πεζὰ· καὶ γὰρ τὰ τῶν ἰχθύων γένη πάντα καὶ τὰ τῶν μαλακίων ὥπται καθεύδοντα, καὶ τᾶλλα πάντα ὅσαπερ ἔχει ὀφθαλμούς· καὶ γὰρ τὰ σκληρόφθαλμα φανερά καὶ τὰ ἔντομα κοιμώμενα· βραχύπνα δὲ τὰ

φανερὸν δὲ ἐκ πολλῶν ὅτι οὐκ ἐν τῷ τὰς αἰσθήσεις ἀργεῖν καὶ μὴ χρῆσθαι αὐταῖς ὁ ὕπνος, οὐδ' ἐν τῷ μὴ δύνασθαι αἰσθάνεσθαι (καὶ γὰρ ἐν ταῖς λειποψυχίαις τοιοῦτόν τι συμβαίνει· ἀδυναμία γὰρ αἰσθήσεως ἢ λειποψυχία, γίνονται δὲ καὶ ἔκνοιαί τινες τοιαῦται· ἔτι δ' οἱ τὰς ἐν τῷ αὐχένι φλέβας καταλαμβανόμενοι ἀναίσθητοι γίνονται), ἀλλ' ὅταν ἡ ἀδυναμία τῆς χρήσεως μήτ' ἐν τῷ τυχόντι αἰσθητηρίῳ, μήτε δι' ἣν ἔτυχεν αἰτίαν, ἀλλὰ, καθάπερ εἴρηται νῦν, ἐν τῷ πρώτῳ ᾧ αἰσθάνεται πάντων· ὅταν μὲν γὰρ τοῦτ' ἀδυνατήσῃ, ἀνάγκη καὶ τοῖς αἰσθητηρίοις πᾶσιν ἀδυνατεῖν αἰσθέσθαι, ὅταν δ' ἐκείνων τι, οὐκ ἀνάγκη τούτῳ.

δι' ἣν δ' αἰτίαν συμβαίνει τὸ καθεύδειν, καὶ ποῖον τι τὸ πάθος ἐστί, λεκτέον. ἐπεὶ δὲ τρόποι πλείους τῆς αἰτίας (καὶ γὰρ τὸ τίος ἔνεκεν, καὶ ὅθεν ἢ ἀρχὴ τῆς κινήσεως, καὶ τὴν ὕλην καὶ τὸν λόγον αἴτιον εἶναι φαμεν), πρῶτον μὲν οὖν ἐπειδὴ λέγομεν τὴν φύσιν ἕνεκά του ποιεῖν, τοῦτο δὲ ἀγαθόν τι, τὴν δ' ἀναπαύσιν παντὶ τῷ πεφυκότι κινεῖσθαι, μὴ δυναμένῳ δ' αἰεὶ καὶ συνεχῶς κινεῖσθαι μεθ' ἡδονῆς, ἀναγκαῖον εἶναι καὶ ὠφέλιμον, τῷ δὲ ὕπνῳ αὐτῇ τῇ ἀληθείᾳ προσάπτουσι τὴν μεταφορὰν ταύτην ὡς ἀναπαύσει ὄντι - ὥστε σωτηρίας ἕνεκα τῶν ζώων ὑπάρχει. ἢ δ' ἐγρήγορσις τέλος· τὸ γὰρ αἰσθάνεσθαι καὶ τὸ φρονεῖν πᾶσι τέλος οἷς ὑπάρχει θάτερον αὐτῶν. βέλτιστα γὰρ ταῦτα, τὸ δὲ τέλος βέλτιστον. ἔτι δὲ ἀναγκαῖον ἐκάστῳ τῶν ζώων ὑπάρχειν τὸν ὕπνον. λέγω δ' ἐξ ὑποθέσεως τὴν ἀνάγκην, ὅτι εἰ ζῶον ἔσται ἔχον τὴν αὐτοῦ φύσιν, ἐξ ἀνάγκης τινὰ ὑπάρχειν αὐτῷ δεῖ, καὶ τούτων ὑπαρχόντων ἕτερα ὑπάρχειν. ἔτι δὲ ποίας κινήσεως καὶ πράξεως ἐν τοῖς σώμασι γιγνομένης συμβαίνει τό τε ἐγρηγορέναι καὶ τὸ καθεύδειν τοῖς ζώοις, μετὰ ταῦτα λεκτέον. τοῖς μὲν οὖν ἄλλοις ζώοις καθάπερ τοῖς ἐναίμοις ὑποληπτέον εἶναι τὰ αἴτια τοῦ πάθους ἢ ταῦτα ἢ τὰ ἀνάλογον, τοῖς δ' ἐναίμοις ἅπερ τοῖς ἀνθρώποις· ὥστε ἐκ τούτων πάντα θεωρητέον.

ὅτι μὲν οὖν ἡ τῆς αἰσθήσεως ἀρχὴ γίνεταί [456a] ἀπὸ τοῦ

αὐτοῦ μέρους τοῖς ζώοις ἅφ' οὗπερ καὶ ἡ τῆς κινήσεως, διώρισται πρότερον ἐν ἐτέροις. αὕτη δὲ ἐστὶ τριῶν διωρισμένων τόπων ὁ μέσος κεφαλῆς καὶ τῆς κάτω κοιλίας. τοῖς μὲν οὖν ἐναίμοις τοῦτ' ἐστὶ τὸ περὶ τὴν καρδίαν μέρος. πάντα γὰρ τὰ ἔναιμα καρδίαν ἔχει, καὶ ἡ ἀρχὴ τῆς κινήσεως καὶ τῆς αἰσθήσεως τῆς κυρίας ἐντεῦθεν ἐστίν. τῆς μὲν οὖν κινήσεως φανερόν ὅτι καὶ ἡ τοῦ πνεύματος ἀρχὴ καὶ ὅλως ἡ τῆς καταψύξεως ἐστὶν ἐνταῦθα, καὶ τὸ ἀναπνεῖν τε καὶ τὸ τῷ ὑγρῷ καταψύχεσθαι πρὸς γε τὴν σωτηρίαν τοῦ ἐν τούτῳ μορίῳ θερμοῦ ἡ φύσις πεπόρικεν· ῥηθήσεται δὲ περὶ αὐτῆς ὕστερον καθ' αὐτήν. τοῖς δὲ ἀναίμοις καὶ τοῖς ἐντόμοις καὶ μὴ δεχομένοις πνεῦμα ἐν τῷ ἀνάλογον τὸ σύμφυτον πνεῦμα ἀναφυσώμενον καὶ συνιζάνον φαίνεται. δῆλον δὲ τοῦτο ἐπὶ τῶν ὀλοπτέρων, οἷον σφηκῶν καὶ μελιττῶν, καὶ ἐν ταῖς μυῖαις καὶ ὅσα τοιαῦτα. ἐπεὶ δὲ κινεῖν μὲν τι ἢ ποιεῖν ἄνευ ἰσχύος ἀδύνατον, ἰσχὺν δὲ ποιεῖ ἡ τοῦ πνεύματος κάθεξις, τοῖς μὲν εἰσφερομένοις ἢ θύραθεν, τοῖς δὲ μὴ ἀναπνεύουσιν ἢ σύμφυτος (διὸ καὶ βομβοῦντα φαίνεται τὰ πτερωτά, ὅταν κινῆται, τῇ τρίψει τοῦ πνεύματος προσπίπτοντος πρὸς τὸ ὑπόζωμα τῶν ὀλοπτέρων), κινεῖται δὲ πᾶν αἰσθήσεώς τινος γενομένης, ἢ οἰκειάς ἢ ἄλλοτρίας, ἐν τῷ πρώτῳ αἰσθητηρίῳ - εἰ δὴ ἐστὶν ὁ ὕπνος καὶ ἡ ἐγρήγορσις πάθη τοῦ μορίου τούτου, ἐν ᾧ μὲν τόπῳ καὶ ἐν ᾧ μορίῳ πρώτῳ γίγνεται ὁ ὕπνος καὶ ἡ ἐγρήγορσις, φανερόν. κινοῦνται δ' ἔνιοι καθεύδοντες καὶ ποιοῦσι πολλὰ ἐγρηγορικά, οὐ μέντοι ἄνευ φαντάσματος καὶ αἰσθήσεώς τινος· τὸ γὰρ ἐνύπνιον ἐστὶν αἴσθημα τρόπον τινά· λεκτέον δὲ περὶ αὐτῶν ὕστερον. διότι δὲ τὰ μὲν ἐνύπνια μνημονεύουσιν ἐγερθέντες, τὰς δ' ἐγρηγορικὰς πράξεις ἀμνημονοῦσιν, ἐν τοῖς Προβληματικοῖς εἴρηται.

Ἐχόμενον δὲ τῶν εἰρημένων ἐστὶν ἐπελθεῖν τίνων γιγνομένων καὶ πόθεν ἡ ἀρχὴ τοῦ πάθους γίγνεται, τοῦ τ' ἐγρηγορέναι καὶ τοῦ καθεύδειν. φανερόν δὴ ὅτι ἐπεὶ ἀναγκαῖον τῷ ζῳῷ, ὅταν αἰσθησιν ἔχη, τότε πρώτον τροφήν τε λαμβάνειν καὶ αὔξησιν, τροφή δ' ἐστὶ πᾶσιν ἢ ἐσχάτῃ τοῖς μὲν ἐναίμοις ἢ τοῦ αἵματος φύσις, τοῖς δ' ἀναίμοις τὸ ἀνάλογον, [456b] τόπος δὲ τοῦ αἵματος αἱ φλέβες, τούτων δ' ἀρχὴ ἡ καρδία (φανερόν δὲ τὸ λεχθὲν ἐκ τῶν ἀνατομῶν) - τῆς μὲν οὖν θύραθεν τροφῆς εἰσιούσης εἰς τοὺς δεκτικούς τόπους γίγνεται ἢ ἀναθυμίασις εἰς τὰς φλέβας, ἐκεῖ δὲ μεταβάλλουσα ἐξαιματοῦται καὶ πορεύεται ἐπὶ τὴν ἀρχήν. εἴρηται δὲ περὶ τούτων ἐν τοῖς Περί τροφῆς· νῦν δὲ ἀναληπτέον ὑπὲρ αὐτῶν τούτου χάριν,

ὅπως τὰς ἀρχὰς τῆς κινήσεως θεωρήσωμεν, καὶ τί πάσχοντος τοῦ μορίου τοῦ αἰσθητικοῦ συμβαίνει ἢ ἐγρήγορσις καὶ ὁ ὕπνος. οὐ γὰρ ἐστὶν ὁ ὕπνος ἡτισοῦν ἀδυναμία τοῦ αἰσθητικοῦ, καθάπερ εἴρηται· καὶ γὰρ ἔκνοια καὶ πνιγμός τις καὶ λειποψυχία ποιεῖ τὴν τοιαύτην ἀδυναμίαν. ἤδη δὲ γεγένηται τισι καὶ φαντασία λειποψυχήσασιν ἰσχυρῶς.

τοῦτο μὲν οὖν ἔχει τινὰ ἀπορίαν· εἰ γὰρ ἐνδέχεται καταδαρθεῖν τὸν λειποψυχήσαντα, ἐνδέχοιτ' ἂν ἐνύπνιον εἶναι καὶ τὸ φάντασμα. πολλὰ δ' ἐστὶν ἃ λέγουσιν οἱ σφόδρα λειποψυχήσαντες καὶ δόξαντες τεθνάναι· περὶ ὧν τὸν αὐτὸν λόγον ὑποληπτέον εἶναι πάντων. ἀλλὰ γάρ, ὥσπερ εἶπομεν, οὐκ ἐστὶν ὁ ὕπνος ἀδυναμία πᾶσα τοῦ αἰσθητικοῦ, ἀλλ' ἐκ τῆς περὶ τὴν τροφὴν ἀναθυμιάσεως γίγνεται τὸ πάθος τοῦτο· ἀνάγκη γὰρ τὸ ἀναθυμιώμενον μέχρι τοῦ ὠθεῖσθαι, εἴτ' ἀντιστρέφειν καὶ μεταβάλλειν καθάπερ εὐριπον. τὸ δὲ θερμὸν ἐκάστου τῶν ζώων πρὸς τὸ ἄνω πέφυκε φέρεσθαι· ὅταν δ' ἐν τοῖς ἄνω τόποις γένηται, ἀθρόον πάλιν ἀντιστρέφει καὶ καταφέρεται. διὸ μάλιστα γίνονται ὕπνοι ἀπὸ τῆς τροφῆς· ἀθρόον γὰρ πολὺ τό τε ὑγρὸν καὶ τὸ σωματῶδες ἀναφέρεται. ἰστάμενον μὲν οὖν βαρύνει καὶ ποιεῖ νυστάζειν· ὅταν δὲ ῥέψῃ κάτω καὶ ἀντιστρέψαν ἀπώσῃ τὸ θερμὸν, τότε γίγνεται ὁ ὕπνος καὶ τὸ ζῶον καθεύδει. σημεῖον δὲ τούτων καὶ τὰ ὑπνωτικά· πάντα γὰρ καρηβαρίαν ποιεῖ, καὶ τὰ ποτὰ καὶ τὰ βρωτά, μήκων, μανδραγόρας, οἶνος, αἶραι. καὶ καταφερόμενοι καὶ νυστάζοντες τοῦτο δοκοῦσι πάσχειν, καὶ ἀδυνατοῦσιν αἶρειν τὴν κεφαλὴν καὶ τὰ βλέφαρα. καὶ μετὰ τὰ σιτία μάλιστα τοιοῦτος ὁ ὕπνος· πολλὴ γὰρ ἢ ἀπὸ τῶν σιτίων ἀναθυμιάσις. ἔτι δ' ἐκ κόπων ἐνίων· ὁ μὲν γὰρ κόπος συντηκτικόν, τὸ δὲ σύντηγμα γίγνεται ὥσπερ τροφή ἄπεπτος, [457a] ἂν μὴ ψυχρὸν ᾖ. καὶ νόσοι δέ τινες τὸ αὐτὸ τοῦτο ποιοῦσιν, ὅσαι ἀπὸ περιττώματος ὑγροῦ καὶ θερμοῦ, οἷον συμβαίνει τοῖς πυρέττουσι καὶ ἐν τοῖς ληθάργοις. ἔτι δ' ἡ πρώτη ἡλικία· τὰ γὰρ παιδία καθεύδει σφόδρα διὰ τὸ τὴν τροφὴν ἄνω φέρεσθαι πᾶσαν. σημεῖον δὲ τὸ ὑπερβάλλειν τὸ μέγεθος τῶν ἄνω πρὸς τὰ κάτω κατὰ τὴν πρώτην ἡλικίαν, διὰ τὸ ἐπὶ ταῦτα γίνεσθαι τὴν αὐξήσιν. διὰ ταύτην δὲ τὴν αἰτίαν καὶ ἐπιληπτικά γίγνεται· ὅμοιον γὰρ ὁ ὕπνος ἐπιλήψει, καὶ ἐστὶν τρόπον τινὰ ὁ ὕπνος ἐπίληψις. διὸ καὶ συμβαίνει τισὶν ἢ ἀρχὴ τούτου τοῦ πάθους καθεύδουσιν, καὶ καθεύδοντες μὲν ἀλίσκονται, ἐγρηγορότερες δ' οὐ· ὅταν γὰρ πολὺ φέρηται τὸ πνεῦμα ἄνω, καταβαῖνον πάλιν τὰς

φλέβας ὀγκοῖ, καὶ συνθλίβει τὸν πόρον δι' οὗ ἡ ἀναπνοὴ γίγνεται. διὸ τοῖς παιδίοις οὐ συμφέρουσιν οἱ οἶνοι, οὐδὲ ταῖς τίτθαις (διαφέρει γὰρ ἴσως οὐδὲν αὐτὰ πίνειν ἢ τὰς τίτθας), ἀλλὰ δεῖ πίνειν ὕδαρῃ καὶ ὀλίγον· πνευματῶδες γὰρ ὁ οἶνος καὶ τούτου μᾶλλον ὁ μέλας. οὕτω δὲ τὰ ἄνω πλήρη τροφῆς τοῖς παιδίοις, ὥστε πέντε μηνῶν οὐδὲ στρέφουσι τὸν αὐχένα· ὥσπερ γὰρ τοῖς σφόδρα μεθύουσιν, ὑγρότης ἀναφέρεται πολλή. εὐλογον δὲ τοῦτ' εἶναι τὸ πάθος αἴτιον καὶ τοῦ ἡρεμεῖν ἐν ταῖς μήτραις τὰ ἔμβρυα τὸ πρῶτον. καὶ τὸ ὅλον δὲ φίλυπνοι οἱ ἀδηλόφλεβοι καὶ οἱ νανώδεις καὶ οἱ μεγαλοκέφαλοι· τῶν μὲν γὰρ αἱ φλέβες στεναί, ὥστ' οὐ ράδιον διαρρεῖν κατιὸν τὸ ὑγρόν, τοῖς δὲ νανώδεσι καὶ μεγαλοκεφάλοις ἡ ἄνω ὀρμὴ πολλή καὶ ἀναθυμίασις. οἱ δὲ φλεβῶδεις οὐχ ὑπνωτικοὶ δι' εὐροίαν τῶν πόρων, ἂν μὴ τι ἄλλο πάθος ἔχουσιν ὑπεναντίον. οὐδ' οἱ μελαγχολικοὶ· κατέψυκται γὰρ ὁ εἶσω τόπος, ὥστ' οὐ γίγνεται πλῆθος αὐτοῖς ἀναθυμιάσεως. διὰ τοῦτο γὰρ καὶ βρωτικοί, σκληροὶ ὄντες· ὥσπερ γὰρ οὐδὲν ἀπολελαυκότα διάκειται τὰ σώματα αὐτοῖς. ἡ δὲ μέλαινα χολὴ φύσει ψυχρὰ οὖσα καὶ τὸν θρεπτικὸν τόπον ψυχρὸν ποιεῖ καὶ τὰ ἄλλα μόρια, ὅπου ἂν ὑπάρχη δυνάμει τὸ τοιοῦτον περίττωμα. ὥστε φανερὸν ἐκ [457b] τῶν εἰρημένων ὅτι ὁ ὕπνος ἐστὶ σύνοδος τις τοῦ θερμοῦ εἶσω καὶ ἀντιπερίστασις φυσικὴ διὰ τὴν εἰρημένην αἰτίαν· διὸ πολλὴ ἡ κίνησις τοῦ ὑπνοῦντος. ὅθεν δ' ἐκλείπει, καταψύχεται καὶ διὰ ψῦξιν καταπίπτει τὰ βλέφαρα, καὶ τὰ μὲν ἄνω κατέψυκται καὶ τὰ ἔξω, τὰ δ' ἐντος καὶ τὰ κάτω θερμά, οἷον τὰ περὶ τοὺς πόδας καὶ τὰ εἶσω.

καίτοι τοῦτό τις ἀπορήσειεν ἂν, ὅτι μετὰ τὰ σιτία ἰσχυρότατος ὁ ὕπνος γίγνεται, καὶ ἔστιν ὑπνωτικὰ οἶνος καὶ ἄλλα θερμότητα ἔχοντα τοιαῦτα, ἔστι δ' οὐκ εὐλογον τὸν μὲν ὕπνον εἶναι κατάψυξιν, τὰ δ' αἰτία τοῦ καθεύδειν θερμά. πότερον οὖν τοῦτο συμβαίνει ὅτι ὥσπερ ἡ κοιλία κενὴ μὲν οὖσα θερμὴ ἐστίν, ἡ δὲ πλήρωσις αὐτὴν καταψύχει διὰ τὴν κίνησιν, οὕτω καὶ οἱ ἐν τῇ κεφαλῇ πόροι καὶ τόποι καταψύχονται ἀναφερομένης τῆς ἀναθυμιάσεως; ἢ ὥσπερ τοῖς προσχεομένοις τὸ θερμὸν ἐξαίφνης φρίκη γίγνεται, κάκεῖ ἀνιόντος τοῦ θερμοῦ ἀθροιζόμενον τὸ ψυχρὸν καταψύχει, καὶ τὸ κατὰ φύσιν θερμὸν ποιεῖ ἐξαδυνατεῖν καὶ ὑποχωρεῖν; ἔτι δὲ πολλῆς ἐμπιπτούσης τροφῆς, ἣν ἀνάγει τὸ θερμόν, ὥσπερ τὸ πῦρ ἐπιτιθεμένων τῶν ξύλων, καταψύχεται, ἕως ἂν καταπεφθῇ. γίγνεται γὰρ ὁ ὕπνος, ὥσπερ εἴρηται, τοῦ σωματώδους ἀναφερομένου ὑπὸ τοῦ θερμοῦ διὰ

τῶν φλεβῶν πρὸς τὴν κεφαλὴν· ὅταν δὲ μηκέτι δύνηται, ἀλλὰ τῷ πλήθει ὑπερβάλλῃ τὸ ἀναχθέν, πάλιν ἀνταπωθεῖται καὶ κάτω ῥεῖ (διὸ καὶ πίπτουσί γε ὑποσπωμένου τοῦ θερμοῦ τοῦ ἀνάγοντος οἱ ἄνθρωποι· μόνον γὰρ ὀρθὸν τῶν ζώων), καὶ ἐπιπεσὸν μὲν ἔκνοιαν ποιεῖ, ὕστερον δὲ φαντασίαν.

ἢ αἱ μὲν νῦν λεγόμεναι λύσεις ἐνδεχόμεναι μὲν εἰσι τοῦ γίνεσθαι τὴν κατάψυξιν, οὐ μὴν ἀλλὰ κύριός γ' ἐστὶν ὁ τόπος ὁ περὶ τὸν ἐγκέφαλον, ὥσπερ ἐν ἄλλοις εἴρηται. πάντων δ' ἐστὶ τῶν ἐν τῷ σώματι ψυχρότατον ὁ ἐγκέφαλος, τοῖς δὲ μὴ ἔχουσι τὸ ἀνάλογον τούτῳ μόριον. ὥσπερ οὖν τὸ ἀπατμίζον ὑγρὸν ὑπὸ τῆς τοῦ ἡλίου θερμότητος, ὅταν ἔλθῃ εἰς τὸν ἄνω τόπον, διὰ τὴν ψυχρότητα αὐτοῦ καταψύχεται καὶ συστὰν καταφέρεται [458a] γενόμενον πάλιν ὕδωρ, οὕτως ἐν τῇ ἀναφορᾷ τοῦ θερμοῦ τῇ πρὸς τὸν ἐγκέφαλον ἢ μὲν περιττωματικῇ ἀναθυμίασις εἰς φλέγμα συνίσταται (διὸ καὶ οἱ κατάρροι φαίνονται γιγνώμενοι ἐκ τῆς κεφαλῆς), ἢ δὲ τροφίμος καὶ μὴ νοσώδης καταφέρεται συνισταμένη καὶ καταψύχει τὸ θερμόν. πρὸς δὲ τὸ καταψύχεσθαι καὶ μὴ δέχεσθαι ῥαδίως τὴν ἀναθυμίασιν συμβάλλεται καὶ ἡ λεπτότης καὶ [ἡ] στενότης τῶν περὶ τὸν ἐγκέφαλον φλεβῶν. τῆς μὲν οὖν καταψύξεως τοῦτ' ἐστὶν αἴτιον, καίπερ τῆς ἀναθυμιάσεως ὑπερβαλλούσης τῇ θερμότητι.

ἐγείρεται δ' ὅταν πεφθῇ καὶ κρατήσῃ ἡ συνεωσμένη θερμότης ἐν ὀλίγῳ πολλῇ ἐκ τοῦ περιεστῶτος, καὶ διακριθῇ τό τε σωματωδέστερον αἷμα καὶ τὸ καθαρώτερον. ἔστι δὲ λεπτότατον μὲν αἷμα καὶ καθαρώτατον τὸ ἐν τῇ κεφαλῇ, παχύτατον δὲ καὶ θολερώτατον τὸ ἐν τοῖς κάτω μέρεσιν. παντὸς δὲ τοῦ αἵματος ἀρχή, ὥσπερ εἴρηται καὶ ἐνταῦθα καὶ ἐν ἄλλοις, ἡ καρδία. τῶν δ' ἐν τῇ καρδίᾳ ἐκατέρας τῆς θαλάμης κοινὴ ἡ μέση· ἐκείνων δ' ἐκατέρα δέχεται ἐξ ἐκατέρας τῆς φλεβός, τῆς τε μεγάλης καλουμένης καὶ τῆς ἁορτῆς· ἐν δὲ τῇ μέσῃ γίγνεται ἡ διάκρισις. ἀλλὰ τὸ μὲν διορίζειν περὶ τούτων ἐτέρων ἐστὶ λόγων οἰκειότερον· διὰ δὲ τὸ γίνεσθαι ἀδιακριτώτερον τὸ αἷμα μετὰ τὴν τῆς τροφῆς προσφορὰν ὕπνος γίγνεται, ἕως ἂν διακριθῇ τοῦ αἵματος τὸ μὲν καθαρώτερον εἰς τὰ ἄνω, τὸ δὲ θολερότερον εἰς τὰ κάτω· ὅταν δὲ τοῦτο συμβῇ, ἐγείρονται ἀπολυθέντα τοῦ ἐκ τῆς τροφῆς βάρους.

τί μὲν οὖν τὸ αἴτιον τοῦ καθεύδειν εἴρηται, ὅτι ἡ [ὑπὸ] τοῦ σωματώδους τοῦ ἀναφερομένου ὑπὸ τοῦ συμφύτου θερμοῦ ἀντιπερίστασις ἀθρόως ἐπὶ τὸ πρῶτον αἰσθητήριον· καὶ τί ἐστὶν ὁ

ὕπνος, ὅτι τοῦ πρώτου αἰσθητηρίου κατάληψις πρὸς τὸ μὴ δύνασθαι ἐνεργεῖν, ἐξ ἀνάγκης μὲν γινόμενος (οὐ γὰρ ἐνδέχεται ζῶον εἶναι μὴ συμβαινόντων τῶν ἀπεργαζομένων αὐτό), ἔνεκα δὲ σωτηρίας· σώζει γὰρ ἢ ἀνάπαυσις.

Περὶ Ἐνυπνίων (458a) On Dreams

[458a] Μετὰ δὲ ταῦτα περὶ ἐνυπνίου ἐπιζητητέον, καὶ πρῶτον [458b] τίνι τῶν τῆς ψυχῆς φαίνεται, καὶ πότερον τοῦ νοητικοῦ τὸ πάθος ἐστὶ τοῦτο ἢ τοῦ αἰσθητικοῦ· τούτοις γὰρ μόνοις τῶν ἐν ἡμῖν γνωρίζομένων. εἰ δ' ἡ χρῆσις ὄψεως ὄρασις, καὶ ἀκοῆς τὸ ἀκούειν, καὶ ὅλως αἰσθήσεως τὸ αἰσθάνεσθαι, κοινὰ δ' ἐστὶ τῶν αἰσθήσεων οἷον σχῆμα καὶ μέγεθος καὶ κίνησις καὶ τᾶλλα τὰ τοιαῦτα, ἴδια δ' οἷον χρῶμα ψόφος χυμός, ἀδυνατεῖ δὲ πάντα μύοντα καὶ καθεύδοντα ὁρᾶν, ὁμοίως δὲ καὶ ἐπὶ τῶν λοιπῶν, δηλὸν ὅτι οὐκ αἰσθανόμεθα οὐδὲν ἐν τοῖς ὕπνοις· οὐκ ἄρα γε τῇ αἰσθήσει τὸ ἐνύπνιον αἰσθανόμεθα.

ἀλλὰ μὴν οὐδὲ τῇ δόξει· οὐ γὰρ μόνον τὸ προσιόν φαμεν ἄνθρωπον ἢ ἵππον εἶναι, ἀλλὰ καὶ λευκὸν ἢ καλόν· ὧν ἡ δόξα ἄνευ αἰσθήσεως οὐδὲν ἂν φήσειεν, οὔτ' ἀληθῶς οὔτε ψευδῶς. ἐν δὲ τοῖς ὕπνοις συμβαίνει τὴν ψυχὴν τοῦτο ποιεῖν· ὁμοίως γὰρ ὅτι ἄνθρωπος καὶ ὅτι λευκὸς ὁ προσιὼν δοκοῦμεν ὁρᾶν. ἔτι παρὰ τὸ ἐνύπνιον ἐννοοῦμεν ἄλλο τι, καθάπερ ἐν τῷ ἐγρηγορέναι αἰσθανόμενοι τι. περὶ οὗ γὰρ αἰσθανόμεθα, πολλάκις καὶ διανοοῦμεθ' αὐτό· οὕτω καὶ ἐν τοῖς ὕπνοις παρὰ τὰ φαντάσματα ἐνίοτε ἄλλα ἐννοοῦμεν. φανείη δ' ἂν τῷ τοῦτο, εἴ τις προσέχοι τὸν νοῦν καὶ πειρῶτο μνημονεύειν ἀναστὰς. ἤδη δὲ τινες καὶ ἐωράκασιν ἐνύπνια τοιαῦτα, οἷον οἱ δοκοῦντες κατὰ τὸ μνημονικὸν παράγγελμα τίθεσθαι τὰ προβαλλόμενα· συμβαίνει γὰρ αὐτοῖς πολλάκις ἄλλο τι παρὰ τὸ ἐνύπνιον τίθεσθαι πρὸ ὁμμάτων εἰς τὸν τόπον φάντασμα· ὥστε δηλὸν ὅτι οὐκ ἐνύπνιον πᾶν τὸ ἐν ὕπνῳ φάντασμα, καὶ ὅτι ὁ ἐννοοῦμεν τῇ δόξει δοξάζομεν. δηλὸν δὲ περὶ τούτων ἀπάντων τό γε τοσοῦτον, ὅτι τὸ αὐτὸ ᾧ καὶ ἐγρηγορότες ἐν ταῖς νόσοις ἀπατώμεθα, τοῦτ' αὐτὸ καὶ ἐν τῷ ὕπνῳ ποιεῖ τὸ πάθος. καὶ ὑγιαίνουσι δὲ καὶ εἰδόσιν ὅμως ὁ ἥλιος ποδιαῖος εἶναι δοκεῖ. ἀλλ' εἴτε δὴ ταῦτόν εἴθ' ἕτερον τὸ φανταστικὸν τῆς ψυχῆς καὶ τὸ αἰσθητικόν, οὐδὲν ἥττον οὐ γίνεται ἄνευ τοῦ ὁρᾶν καὶ αἰσθάνεσθαι· τὸ γὰρ παρορᾶν καὶ παρακούειν ὁρῶντος ἀληθές τι καὶ ἀκούοντος, οὐ μέντοι τοῦτο ὁ οἶεται. ἐν δὲ τῷ ὕπνῳ ὑπόκειται

μηδὲν ὁρᾶν [459a] μηδ' ἀκούειν μηδ' ὅλως αἰσθάνεσθαι. ἄρ' οὖν τὸ μὲν μὴ ὁρᾶν μηδὲν ἀληθές, τὸ δὲ μηδὲν πάσχειν τὴν αἴσθησιν οὐκ ἀληθές, ἀλλ' ἐνδέχεται καὶ τὴν ὄψιν πάσχειν τι καὶ τὰς ἄλλας αἰσθήσεις, ἕκαστον δὲ τούτων ὥσπερ ἐγρηγορότος προσβάλλει μὲν πως τῇ αἰσθήσει, οὐχ οὕτω δὲ ὥσπερ ἐγρηγορότος· καὶ ὅτε μὲν ἡ δόξα λέγει ὅτι ψεῦδος, ὥσπερ ἐγρηγορόσιν, ὅτε δὲ κατέχεται καὶ ἀκολουθεῖ τῷ φαντάσματι;

ὅτι μὲν οὖν οὐκ ἔστι τοῦ δοξάζοντος οὐδὲ τοῦ διανοουμένου τὸ πάθος τοῦτο ὃ καλοῦμεν ἐνυπνιάζειν, φανερόν. ἀλλ' οὐδὲ τοῦ αἰσθανομένου ἀπλῶς· ὁρᾶν γὰρ ἂν ἦν καὶ ἀκούειν ἀπλῶς. ἀλλὰ πῶς δὴ καὶ τίνα τρόπον, ἐπισκεπτέον. ὑποκείμεθω μὲν οὖν, ὅπερ ἐστὶ καὶ φανερόν, ὅτι τοῦ αἰσθητικοῦ τὸ πάθος, εἶπερ καὶ ὁ ὕπνος· οὐ γὰρ ἄλλω μὲν τινι τῶν ζώων ὑπάρχει ὁ ὕπνος, ἄλλω δὲ τὸ ἐνυπνιάζειν, ἀλλὰ τῷ αὐτῷ. ἐπεὶ δὲ περὶ φαντασίας ἐν τοῖς Περὶ ψυχῆς εἴρηται, καὶ ἔστι μὲν τὸ αὐτὸ τῷ αἰσθητικῷ τὸ φανταστικόν, τὸ δ' εἶναι φανταστικῷ καὶ αἰσθητικῷ ἕτερον, ἔστι δὲ φαντασία ἡ ὑπὸ τῆς κατ' ἐνέργειαν αἰσθήσεως γινομένη κίνησις, τὸ δ' ἐνύπνιον φάντασμα τι φαίνεται εἶναι (τὸ γὰρ ἐν ὕπνῳ φάντασμα ἐνύπνιον λέγομεν, εἴθ' ἀπλῶς εἴτε τρόπον τινὰ γινόμενον), φανερόν ὅτι τοῦ αἰσθητικοῦ μὲν ἔστι τὸ ἐνυπνιάζειν, τούτου δ' ἢ φανταστικόν.

Τί δ' ἐστὶ τὸ ἐνύπνιον, καὶ πῶς γίνεται, ἐκ τῶν περὶ τὸν ὕπνον συμβαινόντων μάλιστ' ἂν θεωρήσαιμεν. τὰ γὰρ αἰσθητὰ καθ' ἕκαστον αἰσθητήριον ἡμῖν ἐμποιοῦσιν αἴσθησιν, καὶ τὸ γινόμενον ὑπ' αὐτῶν πάθος οὐ μόνον ἐνυπάρχει ἐν τοῖς αἰσθητηρίοις ἐνεργουσῶν τῶν αἰσθήσεων, ἀλλὰ καὶ ἀπελθουσῶν. παραπλήσιον γὰρ τὸ πάθος ἐπὶ τε τούτων καὶ ἐπὶ τῶν φερομένων ἔοικεν εἶναι. καὶ γὰρ ἐπὶ τῶν φερομένων τοῦ κινήσαντος οὐκέτι θιγγάνοντος κινεῖται· τὸ γὰρ κινήσαν ἐκίνησεν ἀέρα τινά, καὶ πάλιν οὗτος κινούμενος ἕτερον· καὶ τοῦτον δὴ τὸν τρόπον, ἕως ἂν στῇ, ποιεῖται τὴν κίνησιν καὶ ἐν [459b] ἀέρι καὶ ἐν τοῖς ὑγροῖς.

ὁμοίως δὲ ὑπολαβεῖν τοῦτο δεῖ καὶ ἐπ' ἀλλοιώσεως· τὸ γὰρ θερμανθὲν ὑπὸ τοῦ θερμοῦ τὸ πλησίον θερμαίνει, καὶ τοῦτο διαδίδωσιν ἕως τῆς ἀρχῆς. ὥστε καὶ ἐν τῷ αἰσθάνεσθαι, ἐπειδὴ ἐστὶν ἀλλοιώσις τις ἢ κατ' ἐνέργειαν αἴσθησις, ἀνάγκη τοῦτο συμβαίνειν. διὸ τὸ πάθος ἐστὶν οὐ μόνον ἐν αἰσθανομένοις τοῖς αἰσθητηρίοις, ἀλλὰ καὶ ἐν πεπαυμένοις, καὶ ἐν βάθει καὶ ἐπιπολῆς. φανερόν δὲ ὅταν συνεχῶς αἰσθανώμεθά τι· μεταφερόντων γὰρ τὴν αἴσθησιν

ἀκολουθεῖ τὸ πάθος, οἷον ἐκ τοῦ ἡλίου εἰς τὸ σκότος· συμβαίνει γὰρ μηδὲν ὁρᾶν διὰ τὴν ἐτι ὑποῦσαν κίνησιν ἐν τοῖς ὅμμασιν ὑπὸ τοῦ φωτός. κἂν πρὸς ἓν χρῶμα πολὺν χρόνον βλέψωμεν ἢ λευκὸν ἢ χλωρόν, τοιοῦτον φαίνεται ἐφ' ὅπερ ἂν τὴν ὅψιν μεταβάλωμεν. κἂν πρὸς τὸν ἥλιον βλέψαντες ἢ ἄλλο τι λαμπρὸν μύσωμεν, παρατηρήσασι φαίνεται κατ' εὐθυωρίαν, ἢ συμβαίνει τὴν ὅψιν ὁρᾶν, πρῶτον μὲν τοιοῦτον τὴν χροάν, εἴτα μεταβάλλει εἰς φοινικοῦν κάπειτα πορφυροῦν, ἕως ἂν εἰς τὴν μέλαιναν ἔλθῃ χροάν καὶ ἀφανισθῇ. καὶ ἀπὸ τῶν κινουμένων δὲ μεταβάλλουσιν, οἷον ἀπὸ τῶν ποταμῶν, μάλιστα δὲ ἀπὸ τῶν τάχιστα ρεόντων, φαίνεται [γὰρ] τὰ ἡρεμοῦντα κινούμενα. γίνονται δὲ καὶ ἀπὸ τῶν μεγάλων ψόφων δύσκωφοι καὶ ἀπὸ τῶν ισχυρῶν ὁσμῶν δύσοσμοι, καὶ ἐπὶ τῶν ὁμοίων ὁμοίως. ταῦτά γε δὴ φανερώς συμβαίνει τοῦτον τὸν τρόπον.

ὅτι δὲ ταχὺ τὰ αἰσθητήρια καὶ μικρᾶς διαφορᾶς αἰσθάνεται, σημεῖον τὸ ἐπὶ τῶν ἐνόπτρων γινόμενον· περὶ οὗ καὶ αὐτοῦ ἐπιστήσας σκέψαιτό τις ἂν καὶ ἀπορήσειεν. ἅμα δ' ἐξ αὐτοῦ δηλὸν ὅτι ὥσπερ καὶ ἡ ὅψις πάσχει, οὕτω καὶ ποιεῖ τι. ἐν γὰρ τοῖς ἐνόπτροις τοῖς σφόδρα καθαροῖς, ὅταν τῶν καταμηνίων ταῖς γυναιξὶ γινομένων ἐμβλέψωσιν εἰς τὸ κάτοπτρον, γίνεται τὸ ἐπιπολῆς τοῦ ἐνόπτρου οἷον νεφέλη αἱματώδης· κἂν μὲν καινὸν ἦ τὸ κάτοπτρον, οὐ ῥᾶδιον ἐκμάξαι τὴν τοιαύτην κηλίδα, ἐὰν δὲ παλαιόν, ῥῶον. αἴτιον δέ, ὥσπερ εἵπομεν, [460a] ὅτι οὐ μόνον πάσχει ἡ ὅψις ὑπὸ τοῦ ἀέρος, ἀλλὰ καὶ ποιεῖ τι καὶ κινεῖ, ὥσπερ καὶ τὰ λαμπρά· καὶ γὰρ ἡ ὅψις τῶν λαμπρῶν καὶ ἐχόντων χρῶμα. τὰ μὲν οὖν ὅμματα εὐλόγως, ὅταν ἦ τὰ καταμήνια, διακεῖται ὥσπερ καὶ ἕτερον μέρος ὅτιοῦν· καὶ γὰρ φύσει τυγχάνουσι φλεβώδεις ὄντες. διὸ γινομένων τῶν καταμηνίων διὰ ταραχὴν καὶ φλεγμασίαν αἱματικὴν ἡμῖν μὲν ἢ ἐν τοῖς ὅμμασι διαφορὰ ἄδηλος, ἔνεστι δέ (ἢ γὰρ αὐτὴ φύσις σπέρματος καὶ καταμηνίων), ὁ δ' ἀὴρ κινεῖται ὑπ' αὐτῶν, καὶ τὸν ἐπὶ τῶν κατόπτρων ἀέρα συνεχῇ ὄντα ποιόν τινα ποιεῖ καὶ τοιοῦτον οἷον αὐτὸς πάσχει· ὁ δὲ τοῦ κατόπτρου τὴν ἐπιφάνειαν. ὥσπερ δὲ τῶν ἱματίων, τὰ μάλιστα καθαρὰ τάχιστα κηλιδοῦται· τὸ γὰρ καθαρὸν ἀκριβῶς δηλοῖ ὅ τι ἂν δέξηται, καὶ τὸ μάλιστα τὰς ἐλαχίστας κινήσεις. ὁ δὲ χαλκὸς διὰ μὲν τὸ λεῖος εἶναι ὅποιασοῦν ἀφῆς αἰσθάνεται μάλιστα (δεῖ δὲ νοῆσαι οἷον τρίψιν οὔσαν τὴν τοῦ ἀέρος ἀφὴν καὶ ὥσπερ ἔκμαξιν καὶ ἀνάπλυσιν), διὰ δὲ τὸ καθαρὸν ἔνδηλος

γίνεται όπηλικοῦν οὔσα. τοῦ δὲ μὴ ἀπιέναι ταχέως ἐκ τῶν καινῶν κατόπτρων αἴτιον τὸ καθαρόν εἶναι καὶ λεῖον· διαδεύται γὰρ διὰ τῶν τοιούτων καὶ εἰς βάθος καὶ πάντη, διὰ μὲν τὸ καθαρόν εἰς βάθος, διὰ δὲ τὸ λεῖον πάντη. ἐν δὲ τοῖς παλαιοῖς οὐκ ἐμμένει, ὅτι οὐχ ὁμοίως εἰσδύεται ἡ κηλὶς ἀλλ’ ἐπιπολαιότερον.

ὅτι μὲν οὖν καὶ ὑπὸ τῶν μικρῶν διαφορῶν γίνεται κίνησις, καὶ ὅτι ταχεῖα ἡ αἴσθησις, καὶ ὅτι οὐ μόνον πάσχει, ἀλλὰ καὶ ἀντιποιεῖ τὸ τῶν χρωμάτων αἰσθητήριον, φανερόν ἐκ τούτων. μαρτυρεῖ δὲ τοῖς εἰρημένοις καὶ τὰ περὶ τοὺς οἶνους καὶ τὴν μυρεψίαν συμβαίνοντα. τό τε γὰρ παρασκευασθὲν ἔλαιον ταχέως λαμβάνει τὰς τῶν πλησίον ὀσμάς, καὶ οἱ οἶνοι τὸ αὐτὸ τοῦτο πάσχουσιν· οὐ γὰρ μόνον τῶν ἐμβαλλομένων ἢ ὑποκιρναμένων ἀλλὰ καὶ τῶν πλησίον τοῖς ἀγγείοις τιθεμένων ἢ πεφυκότων ἀναλαμβάνουσι τὰς ὀσμάς.

πρὸς δὲ τὴν ἐξ ἀρχῆς [460b] σκέψιν ὑποκείσθω ἐν μὲν, ὅπερ ἐκ τῶν εἰρημένων φανερόν, ὅτι καὶ ἀπελθόντος τοῦ θύραθεν αἰσθητοῦ ἐμμένει τὰ αἰσθήματα αἰσθητὰ ὄντα, πρὸς δὲ τούτοις ὅτι ῥαδίως ἀπατώμεθα περὶ τὰς αἰσθήσεις ἐν τοῖς πάθεσιν ὄντες, ἄλλοι δὲ ἐν ἄλλοις, οἷον ὁ δειλὸς ἐν φόβῳ, ὁ δ’ ἐρωτικὸς ἐν ἔρωτι, ὥστε δοκεῖν ἀπὸ μικρᾶς ὁμοιότητος τὸν μὲν τοὺς πολέμιους ὄραν, τὸν δὲ τὸν ἐρώμενον· καὶ ταῦτα ὅσῳ ἂν ἐμπαθέστερος ᾖ, τοσούτῳ ἀπ’ ἐλάσσονος ὁμοιότητος φαίνεται. τὸν αὐτὸν δὲ τρόπον καὶ ἐν ὀργαῖς καὶ ἐν πάσαις ἐπιθυμίαις εὐαπάτητοι γίνονται πάντες, καὶ μᾶλλον ὅσῳ ἂν μᾶλλον ἐν τοῖς πάθεσιν ᾖσιν. διὸ καὶ τοῖς πυρέττουσιν ἐνίστε φαίνεται ζῶα ἐν τοῖς τοίχοις ἀπὸ μικρᾶς ὁμοιότητος τῶν γραμμῶν συντιθεμένων. καὶ ταῦτ’ ἐνίστε συνεπιτείνει τοῖς πάθεσιν οὕτως, ὥστε, ἂν μὲν μὴ σφόδρα κάμνωσι, μὴ λανθάνειν ὅτι ψεῦδος, ἐὰν δὲ μεῖζον ᾖ τὸ πάθος, καὶ κινεῖσθαι πρὸς αὐτά. αἴτιον δὲ τοῦ συμβαίνειν ταῦτα τὸ μὴ κατὰ τὴν αὐτὴν δύναμιν κρίνειν τό τε κύριον καὶ ὃ τὰ φαντάσματα γίνεται. τούτου δὲ σημεῖον ὅτι φαίνεται μὲν ὁ ἥλιος ποδιαῖος, ἀντίφῃσι δὲ πολλάκις ἕτερόν τι πρὸς τὴν φαντασίαν. καὶ τῇ ἐπαλλάξει τῶν δακτύλων τὸ ἐν δύο φαίνεται, ἀλλ’ ὅμως οὐ φαμεν δύο· κυριωτέρα γὰρ τῆς ἀφῆς ἢ ὀψις. εἰ δ’ ἦν ἡ ἀφή μόνη, καὶ ἐκρίνομεν τὸ ἐν δύο. τοῦ δὲ διεψεῦσθαι αἴτιον ὅτι οὐ μόνον τοῦ αἰσθητοῦ κινουντος φαίνεται ἀδήποτε, ἀλλὰ καὶ τῆς αἰσθήσεως κινουμένης αὐτῆς, ἐὰν ὡσαύτως κινῆται ὥπερ καὶ ὑπὸ τοῦ αἰσθητοῦ· λέγω δ’ οἷον ἡ γῆ δοκεῖ τοῖς πλέουσι κινεῖσθαι κινουμένης τῆς ὀψεως ὑπ’ ἄλλου.

Ἐκ δὴ τούτων φανερόν ὅτι οὐ μόνον ἐγρηγορότων αἱ κινήσεις αἱ ἀπὸ τῶν αἰσθημάτων γινόμεναι τῶν τε θύραθεν καὶ τῶν ἐκ τοῦ σώματος ἐνυπάρχουσιν, ἀλλὰ καὶ ὅταν γένηται τὸ πάθος τοῦτο ὃ καλεῖται ὕπνος, καὶ μᾶλλον τότε φαίνονται. μεθ' ἡμέραν μὲν γὰρ ἐκκρούονται ἐνεργουσῶν τῶν [461a] αἰσθήσεων καὶ τῆς διανοίας, καὶ ἀφανίζονται ὥσπερ παρὰ πολὺ πῦρ ἔλαττον καὶ λῦπαι καὶ ἡδοναὶ μικραὶ παρὰ μεγάλας, παυσαμένων δὲ ἐπιπολάζει καὶ τὰ μικρά· νύκτωρ δὲ δι' ἀργίαν τῶν κατὰ μόριον αἰσθήσεων καὶ ἀδυναμίαν τοῦ ἐνεργεῖν, διὰ τὸ ἐκ τῶν ἔξω εἰς τὸ ἐντὸς γίνεσθαι τὴν τοῦ θερμοῦ παλίρροian, ἐπὶ τὴν ἀρχὴν τῆς αἰσθήσεως καταφέρονται καὶ γίνονται φανεραὶ καθισταμένης τῆς ταραχῆς.

δεῖ δὲ ὑπολαβεῖν ὥσπερ τὰς μικρὰς δίνας τὰς ἐν τοῖς ποταμοῖς γινομένας, οὕτω τὴν κίνησιν ἐκάστην γίνεσθαι συνεχῶς, πολλάκις μὲν ὁμοίως, πολλάκις δὲ διαλυομένας εἰς ἄλλα σχήματα διὰ τὴν ἀντίκρουσιν. διὸ καὶ μετὰ τὴν τροφήν καὶ ἀμπαν νέοις οὔσιν, οἷον τοῖς παιδίοις, οὐ γίνεται ἐνύπνια· πολλὴ γὰρ ἡ κινήσις διὰ τὴν ἀπὸ τῆς τροφῆς θερμότητα. ὥστε καθάπερ ἐν ὑγρῷ, ἐὰν σφόδρα κινῇ τις, ὅτε μὲν οὐθὲν φαίνεται εἶδωλον, ὅτε δὲ φαίνεται μὲν, διεστραμμένον δὲ ἀμπαν, ὥστε φαίνεσθαι ἄλλοιον ἢ οἷόν ἐστιν, ἡρεμήσαντος δὲ καθαρὰ καὶ φανερά, οὕτω καὶ ἐν τῷ καθεύδειν τὰ φαντάσματα καὶ αἱ ὑπόλοιποι κινήσεις αἱ συμβαίνουσαι ἀπὸ τῶν αἰσθημάτων ὅτε μὲν ὑπὸ μεΐζονος οὔσης τῆς εἰρημένης κινήσεως ἀφανίζονται ἀμπαν, ὅτε δὲ τεταραγμένοι φαίνονται αἱ ὄψεις καὶ τερατώδεις, καὶ οὐκ εἰρόμενα τὰ ἐνύπνια, οἷον τοῖς μελαγχολικοῖς καὶ πυρέττουσι καὶ οἰνωμένοις· πάντα γὰρ τὰ τοιαῦτα πάθη πνευματώδη ὄντα πολλὴν ποιεῖ κίνησιν καὶ ταραχήν. καθισταμένου δὲ καὶ διακρινομένου τοῦ αἵματος ἐν τοῖς ἐναίμοις, σφριζομένη τῶν αἰσθημάτων ἡ κίνησις ἀφ' ἐκάστου τῶν αἰσθητηρίων εἰρόμενά τε ποιεῖ τὰ ἐνύπνια, καὶ φαίνεσθαι τι καὶ δοκεῖν διὰ μὲν τὰ ἀπὸ τῆς ὄψεως καταφερόμενα ὁρᾶν, διὰ δὲ τὰ ἀπὸ τῆς ἀκοῆς ἀκούειν, ὁμοιοτρόπως δὲ καὶ ἀπὸ τῶν ἄλλων αἰσθητηρίων· τῷ μὲν γὰρ ἐκεῖθεν ἀφικνεῖσθαι τὴν κίνησιν πρὸς τὴν ἀρχὴν καὶ ἐγρηγορῶς δοκεῖ [461b] ὁρᾶν καὶ ἀκούειν καὶ αἰσθάνεσθαι, καὶ διὰ τὸ τὴν ὄψιν ἐνίοτε κινεῖσθαι δοκεῖν, οὐ κινουμένην, ὁρᾶν φαμεν, καὶ τῷ τὴν ἀφὴν δύο κινήσεις εἰσαγγέλλειν τὸ ἐν δύο δοκεῖ. ὅλως γὰρ τὸ ἀφ' ἐκάστης αἰσθήσεως φησιν ἡ ἀρχή, ἐὰν μὴ ἐτέρα κυριωτέρα ἀντιφῇ. φαίνεται μὲν οὖν πάντως, δοκεῖ δὲ οὐ πάντως τὸ φαινόμενον, ἀλλ' ἂν τὸ ἐπικρῖνον κατέχεται ἢ μὴ

κινῆται τὴν οἰκείαν κίνησιν.

ὥσπερ δ' εἶπομεν ὅτι ἄλλοι δι' ἄλλο πάθος εὐαπάτητοι, οὕτως ὁ καθεύδων διὰ τὸν ὕπνον καὶ τὸ κινεῖσθαι τὰ αἰσθητήρια καὶ τᾶλλα τὰ συμβαίνοντα περὶ τὴν αἴσθησιν, ὥστε τὸ μικρὰν ἔχον ὁμοιότητα φαίνεται ἐκεῖνο. ὅταν γὰρ καθεύδῃ, κατιόντος τοῦ πλείστου αἵματος ἐπὶ τὴν ἀρχὴν συγκατέρχονται αἱ ἐνοῦσαι κινήσεις, αἱ μὲν δυνάμει αἱ δὲ ἐνεργείᾳ. οὕτω δ' ἔχουσιν ὥστε ἐν τῇ κινήσει τηδὶ ἥδε ἐπιπολάσει ἐξ αὐτοῦ ἡ κίνησις, ἂν δ' αὕτη φθαρῇ, ἥδε. καὶ πρὸς ἀλλήλας δὴ ἔχουσιν ὥσπερ οἱ πεπλασμένοι βάτραχοι οἱ ἀνιόντες ἐν τῷ ὕδατι τηκομένου τοῦ ἁλός - οὕτως ἔνεσι δυνάμει, ἀνειμένου δὲ τοῦ κωλύοντος ἐνεργοῦσιν, καὶ λυόμεναι ἐν ὀλίγῳ τῷ λοιπῷ αἵματι τῷ ἐν τοῖς αἰσθητηρίοις κινοῦνται, ἔχουσαι ὁμοιότητα ὥσπερ τὰ ἐν τοῖς νέφεσιν, ἃ παρεικάζουσιν ἀνθρώποις καὶ κενταύροις ταχέως μεταβάλλοντα. τούτων δὲ ἕκαστόν ἐστιν, ὥσπερ εἴρηται, ὑπόλειμμα τοῦ ἐν τῇ ἐνεργείᾳ αἰσθήματος· καὶ ἀπελθόντος τοῦ ἀληθοῦς ἔνεστι, καὶ ἀληθὲς εἰπεῖν ὅτι τοιοῦτον οἶον Κορίσκος, ἀλλ' οὐ Κορίσκος. ὅτε δὲ ἡσθάνετο, οὐκ ἔλεγε Κορίσκον τὸ κύριον καὶ τὸ ἐπικρῖνον, ἀλλὰ διὰ τοῦτο ἐκεῖνον Κορίσκον τὸν ἀληθινόν. ὁ δὲ καὶ αἰσθανόμενον λέγει τοῦτο, ἐὰν μὴ παντελῶς κατέχεται ὑπὸ τοῦ αἵματος, ὥσπερ αἰσθανόμενον τοῦτο κινεῖται ὑπὸ τῶν κινήσεων τῶν ἐν τοῖς αἰσθητηρίοις, καὶ δοκεῖ τὸ ὅμοιον αὐτὸ εἶναι τὸ ἀληθές· καὶ τοσαύτη τοῦ ὕπνου ἡ δύναμις ὥστε ποιεῖν τοῦτο λανθάνειν. ὥσπερ οὖν εἴ τινα λανθάνοι ὑποβαλλόμενος ὁ δάκτυλος τῷ ὀφθαλμῷ, [462a] οὐ μόνον φανεῖται ἀλλὰ καὶ δόξει εἶναι δύο τὸ ἓν, ἂν δὲ μὴ λανθάνῃ, φανεῖται μὲν οὐ δόξει δέ, οὕτω καὶ ἐν τοῖς ὕπνοις, ἐὰν μὲν αἰσθάνηται ὅτι καθεύδει, καὶ τοῦ πάθους ἐν ᾧ ἡ αἴσθησις τοῦ ὑπνωτικοῦ, φαίνεται μὲν, λέγει δέ τι ἐν αὐτῷ ὅτι φαίνεται μὲν Κορίσκος, οὐκ ἔστι δὲ ὁ Κορίσκος (πολλάκις γὰρ καθεύδοντας λέγει τι ἐν τῇ ψυχῇ ὅτι ἐνύπνιον τὸ φαινόμενον)· ἐὰν δὲ λανθάνῃ ὅτι καθεύδει, οὐδὲν ἀντιφῆσει τῇ φαντασίᾳ.

ὅτι δὲ ἀληθῆ λέγομεν καὶ εἰσὶ κινήσεις φανταστικαὶ ἐν τοῖς αἰσθητηρίοις, διῆλον, ἐὰν τις προσέχων πειράται μνημονεύειν ἃ πάσχομεν καταφερόμενοί τε καὶ ἐγειρόμενοι· ἐνίστε γὰρ τὰ φαινόμενα εἰδῶλα καθεύδοντι φωράσει ἐγειρόμενος κινήσεις οὔσας ἐν τοῖς αἰσθητηρίοις· καὶ ἐνίοις γε τῶν νεωτέρων καὶ πάνπαν διαβλέπουσιν, ἐὰν ἦ σκότος, φαίνεται εἰδῶλα πολλὰ κινούμενα, ὥστ' ἐγκαλύπτεσθαι πολλάκις φοβουμένους. ἐκ δὲ τούτων ἀπάντων δεῖ

συλλογίσασθαι ὅτι ἐστὶ τὸ ἐνύπνιον φάντασμα μὲν τι καὶ ἐν ὕπνῳ· τὰ γὰρ ἄρτι λεχθέντα εἰδῶλα οὐκ ἔστιν ἐνύπνια, οὐδ' εἴ τι ἄλλο λελυμένων τῶν αἰσθήσεων φαίνεται· οὐδὲ τὸ ἐν ὕπνῳ φάντασμα πᾶν. πρῶτον μὲν γὰρ ἐνίοις συμβαίνει καὶ αἰσθάνεσθαι πῃ καὶ ψόφῳ καὶ φωτὸς καὶ χυμοῦ καὶ ἀφῆς, ἀσθενικῶς μέντοι καὶ οἷον πόρρωθεν· ἤδη γὰρ ἐν τῷ καθεύδειν ὑποβλέποντες, ὃ ἡρέμα ἐώρων φῶς τοῦ λύχνου καθεύδοντες, ὡς ὄντο, ἐπεγερθέντες εὐθὺς ἐγνώρισαν τὸ τοῦ λύχνου ὄν, καὶ ἀλεκτρυόνων καὶ κυνῶν φωνὴν ἡρέμα ἀκούοντες ἐγερθέντες σαφῶς ἐγνώρισαν. ἔνιοι δὲ καὶ ἀποκρίνονται ἐρωτώμενοι· ἐνδέχεται γὰρ τοῦ ἐγρηγορέναι καὶ καθεύδειν ἀπλῶς θατέρου ὑπάρχοντος θατερόν πῃ ὑπάρχειν. ὦν οὐθὲν ἐνύπνιον φατέον, οὐδ' ὅσαι δὴ ἐν τῷ ὕπνῳ γίνονται ἀληθεῖς ἔννοιαι παρὰ τὰ φαντάσματα, ἀλλὰ τὸ φάντασμα τὸ ἀπὸ τῆς κινήσεως τῶν αἰσθημάτων, ὅταν ἐν τῷ καθεύδειν ἦ, ἢ καθεύδει, τοῦτ' ἐστὶν ἐνύπνιον.

ἤδη δέ τισι συμβέβηκεν μηδὲν [462b] ἐνύπνιον ἐωρακέναι κατὰ τὸν βίον, τοῖς δὲ πόρρῳ που προελθούσης τῆς ἡλικίας ἰδεῖν πρότερον μὴ ἐωρακόσιν. τὸ δ' αἷτιον τοῦ μὴ γίνεσθαι παραπλήσιον φαίνεται τῷ ἐπὶ τῶν παιδίων καὶ μετὰ τὴν τροφήν. ὅσοις γὰρ συνέστηκεν ἡ φύσις ὥστε πολλὴν ἀναθυμίασιν πρὸς τὸν ἄνω τόπον ἀναφέρεσθαι, ἢ πάλιν καταφερομένη ποιεῖ πλῆθος κινήσεως, εὐλόγως τούτοις οὐδὲν φαίνεται φάντασμα. προϊούσης δὲ τῆς ἡλικίας οὐδὲν ἄτοπον φανῆναι ἐνύπνιον· μεταβολῆς γὰρ τινος γενομένης ἢ καθ' ἡλικίαν ἢ κατὰ πάθος ἀναγκαῖον συμβῆναι τὴν ἐναντίωσιν ταύτην.

Περὶ Τῆς καθ' Ὑπνον Μαντικῆς (462b) On Divination in Sleep

[462b] Περὶ δὲ τῆς μαντικῆς τῆς ἐν τοῖς ὕπνοις γινομένης καὶ λεγομένης συμβαίνειν ἀπὸ τῶν ἐνυπνίων, οὔτε καταφρονῆσαι ῥάδιον οὔτε πεισθῆναι. τὸ μὲν γὰρ πάντα ἢ πολλοὺς ὑπολαμβάνειν ἔχειν τι σημειῶδες τὰ ἐνύπνια παρέχεται πίστιν ὥς ἐξ ἐμπειρίας λεγόμενον, καὶ τὸ περὶ ἐνίων εἶναι τὴν μαντικὴν ἐν τοῖς ἐνυπνίοις οὐκ ἄπιστον· ἔχει γὰρ τινα λόγον· διὸ καὶ περὶ τῶν ἄλλων ἐνυπνίων ὁμοίως ἂν τις οἰηθεῖ. τὸ δὲ μηδεμίαν αἰτίαν εὐλογον ὁρᾶν καθ' ἣν ἂν γίνοιτο, τοῦτο δὴ ἀπιστεῖν ποιεῖ· τό τε γὰρ θεὸν εἶναι τὸν πέμποντα, πρὸς τῇ ἄλλῃ ἀλογίᾳ, καὶ τὸ μὴ τοῖς βελτίστοις καὶ φρονιμωτάτοις ἀλλὰ τοῖς τυχοῦσι πέμπειν ἄτοπον. ἀφαιρεθείσης δὲ τῆς ἀπὸ τοῦ θεοῦ αἰτίας οὐδεμία τῶν ἄλλων εὐλογος εἶναι φαίνεται αἰτία· τοῦ γὰρ περὶ τῶν ἐφ' Ἑρακλείαις στήλαις ἢ τῶν ἐν Βορυσθένει προορᾶν τινὰς ὑπὲρ τὴν ἡμετέραν εἶναι δόξειεν ἂν σύνεσιν εὔρεϊν τὴν ἀρχήν. ἀνάγκη δ' οὖν τὰ ἐνύπνια ἢ αἷτια εἶναι ἢ σημεῖα τῶν γινομένων ἢ συμπτώματα, ἢ πάντα ἢ ἓν τούτων ἢ ἐν μόνον. λέγω δ' αἷτιον μὲν οἶον τὴν σελήνην τοῦ ἐκλείπειν τὸν ἥλιον, καὶ τὸν κόπον τοῦ πυρετοῦ, σημεῖον δὲ τῆς ἐκλείψεως τὸ τὸν ἀστέρα εἰσελθεῖν, τὴν δὲ τραχύτητα τῆς γλώττης τοῦ πυρέττειν, σύμπτωμα δὲ τὸ βαδίζοντος ἐκλείπειν τὸν ἥλιον· [463a] οὔτε γὰρ σημεῖον τοῦ ἐκλείπειν τοῦτ' ἐστὶν οὔτ' αἷτιον, οὔθ' ἢ ἐκλειψις τοῦ βαδίζειν· διὸ τῶν συμπτωμάτων οὐδὲν οὔτε ἀεὶ γίνεται, οὔθ' ὥς ἐπὶ τὸ πολὺ. ἄρ' οὖν ἐστὶ τῶν ἐνυπνίων τὰ μὲν αἷτια, τὰ δὲ σημεῖα, οἶον τῶν περὶ τὸ σῶμα συμβαινόντων; λέγουσι γοῦν καὶ τῶν ἱατρῶν οἱ χαρίεντες ὅτι δεῖ σφόδρα προσέχειν τοῖς ἐνυπνίοις· εὐλογον δὲ οὕτως ὑπολαβεῖν καὶ τοῖς μὴ τεχνίταις μὲν, σκοποῦμένοις δὲ τι καὶ φιλοσοφοῦσιν. αἱ γὰρ μεθ' ἡμέραν γινόμεναι κινήσεις, ἂν μὴ σφόδρα μεγάλαι ᾧσι καὶ ἰσχυραί, λανθάνουσι παρὰ μείζους τὰς ἐγρηγορικὰς κινήσεις, ἐν δὲ τῷ καθεύδειν τούναντίον· καὶ γὰρ αἱ μικραὶ μεγάλαι δοκοῦσιν εἶναι. δῆλον δ' ἐπὶ τῶν συμβαινόντων κατὰ τοὺς ὕπνους πολλάκις· οἶονται

γὰρ κεραυνοῦσθαι καὶ βροντᾶσθαι μικρῶν ἤχων ἐν τοῖς ὥσι γινομένων, καὶ μέλιτος καὶ γλυκέων χυμῶν ἀπολαύειν ἀκαριαίου φλέγματος καταρρέοντος, καὶ βαδίζειν διὰ πυρὸς καὶ θερμαίνεσθαι σφόδρα μικρᾶς θερμασίας περὶ τινα μέρη γινομένης, ἐπεγειρομένοις δὲ ταῦτα φανερὰ τοῦτον ἔχοντα τὸν τρόπον· ὥστ' ἐπεὶ μικραὶ πάντων αἱ ἀρχαί, δῆλον ὅτι καὶ τῶν νόσων καὶ τῶν ἄλλων παθημάτων τῶν ἐν τοῖς σώμασι μελλόντων γίνεσθαι. φανερόν οὖν ὅτι ταῦτα ἀναγκαῖον ἐν τοῖς ὕπνοις εἶναι καταφανῆ μᾶλλον ἢ ἐν τῷ ἐγρηγορέναι.

ἀλλὰ μὴν καὶ ἑνία γε τῶν καθ' ὕπνον φαντασμάτων αἷτια εἶναι τῶν οἰκείων ἐκάστῳ πράξεων οὐκ ἄλογον· ὥσπερ γὰρ μέλλοντες πράττειν ἢ ἐν ταῖς πράξεσιν ὄντες ἢ πεπραχότες πολλάκις εὐθυνοειρία ταύταις σύνεσμεν καὶ πράττομεν (αἷτιον δ' ὅτι προωδοποιημένη τυγχάνει ἡ κίνησις ἀπὸ τῶν μεθ' ἡμέραν ἀρχῶν), οὕτω πάλιν ἀναγκαῖον καὶ τὰς καθ' ὕπνον κινήσεις πολλάκις ἀρχὰς εἶναι τῶν μεθ' ἡμέραν πράξεων διὰ τὸ προωδοποιηθῆναι πάλιν καὶ τούτων τὴν διάνοιαν ἐν τοῖς φαντάσμασι τοῖς νυκτερινοῖς. οὕτω μὲν οὖν ἐνδέχεται τῶν ἐνυπνίων ἑνία καὶ σημεῖα καὶ αἷτια εἶναι. τὰ δὲ πολλὰ συμπτώμασιν [463b] ἔοικε, μάλιστα δὲ τὰ τε ὑπερβατὰ πάντα καὶ ὧν μὴ ἐν αὐτοῖς ἡ ἀρχή, ἀλλὰ περὶ ναυμαχίας καὶ τῶν πόρρω συμβαινόντων ἐστίν· περὶ γὰρ τούτων τὸν αὐτὸν τρόπον ἔχειν εἰκὸς ὃν ὅταν μεμνημένῳ τινὶ περὶ τινος τυχῇ τοῦτο γιγνόμενον· τί γὰρ κωλύει καὶ ἐν τοῖς ὕπνοις οὕτως; μᾶλλον δ' εἰκὸς πολλὰ τοιαῦτα συμβαίνειν. ὥσπερ οὖν οὐδὲ τὸ μνησθῆναι περὶ τοῦδε σημείου οὐδὲ αἷτιον τοῦ παραγενέσθαι αὐτόν, οὕτως οὐδ' ἐκεῖ τοῦ ἀποβῆναι τὸ ἐνύπνιον τῷ ἰδόντι οὔτε σημεῖον οὔτ' αἷτιον, ἀλλὰ σύμπτωμα. διὸ καὶ πολλὰ τῶν ἐνυπνίων οὐκ ἀποβαίνει· τὰ γὰρ συμπτώματα οὔτε ἀεὶ οὔθ' ὥς ἐπὶ τὸ πολὺ γίγνεται.

Ὅλως δὲ ἐπεὶ καὶ τῶν ἄλλων ζῴων ὄνειρώττει τινά, θεόπεμπτα μὲν οὐκ ἂν εἴη τὰ ἐνύπνια, οὐδὲ γέγονε τούτου χάριν (δαιμόνια μέντοι· ἢ γὰρ φύσις δαιμονία, ἀλλ' οὐ θεία). σημεῖον δέ· πάνυ γὰρ εὐτελεῖς ἄνθρωποι προορατικοὶ εἰσι καὶ εὐθυόνειροι, ὥς οὐ θεοῦ πέμποντος, ἀλλ' ὅσων ὥσπερ ἂν εἰ λάλος ἡ φύσις ἐστὶ καὶ μελαγχολική, παντοδαπὰς ὅψεις ὀρώσιν· διὰ γὰρ τὸ πολλὰ καὶ παντοδαπὰ κινεῖσθαι ἐπιτυγχάνουσιν ὁμοίοις θεωρήμασιν, ἐπιτυχεῖς ὄντες ἐν τούτοις ὥσπερ ἑνιοὶ ἀρτιάζοντες· ὥσπερ γὰρ καὶ λέγεται “ἂν πολλὰ βάλλης, ἄλλοτ' ἄλλοιον βαλεῖς”, καὶ ἐπὶ τούτων τοῦτο

συμβαίνει. ὅτι δ' οὐκ ἀποβαίνει πολλά τῶν ἐνυπνίων, οὐδὲν ἄτοπον· οὐδὲ γὰρ τῶν ἐν τοῖς σώμασι σημείων καὶ τῶν οὐρανίων, οἷον τὰ τῶν ὑδάτων καὶ τὰ τῶν πνευμάτων (ἂν γὰρ ἄλλη κυριωτέρα ταύτης συμβῇ κίνησις, ἀφ' ἧς μελλούσης ἐγένετο τὸ σημεῖον, οὐ γίνεται), καὶ πολλά βουλευθέντα καλῶς τῶνπραχθῆναι δεόντων διελύθη δι' ἄλλας κυριωτέρας ἀρχάς. ὅλως γὰρ οὐ πᾶν γίνεται τὸ μελλῆσαν, οὐδὲ τὸ αὐτὸ τὸ ἐσόμενον καὶ τὸ μέλλον· ἀλλ' ὅμως ἀρχάς γέ τινας λεκτέον εἶναι ἀφ' ὧν οὐκ ἐπετελέσθη, καὶ σημεῖα πέφυκε ταῦτά τινων οὐ γενομένων.

περὶ δὲ τῶν μὴ τοιαύτας [464a] ἐχόντων ἀρχὰς ἐνυπνίων οἷας εἵπομεν, ἀλλ' ὑπερορίας ἢ τοῖς χρόνοις ἢ τοῖς τόποις ἢ τοῖς μεγέθεσιν, ἢ τούτων μὲν μηδέν, μὴ μέντοι γε ἐν αὐτοῖς ἐχόντων τὰς ἀρχὰς τῶν ἰδόντων τὸ ἐνύπνιον, εἰ μὴ γίνεται τὸ προορᾶν ἀπὸ συμπτώματος, τοιόνδ' ἂν εἴη μᾶλλον ἢ ὥσπερ λέγει Δημόκριτος εἰδῶλα καὶ ἀπορροίας αἰτιώμενος. ὥσπερ γὰρ ὅταν κινήσῃ τι τὸ ὕδωρ ἢ τὸν ἀέρα, τοῦθ' ἕτερον ἐκίνησε, καὶ παυσαμένου ἐκείνου συμβαίνει τὴν τοιαύτην κίνησιν προῖεναι μέχρι τινός, τοῦ κινήσαντος οὐ πάροντος, οὕτως οὐδὲν κωλύει κινήσιν τινα καὶ αἰσθησιν ἀφικνεῖσθαι πρὸς τὰς ψυχὰς τὰς ἐνυπνιαζούσας (ἀφ' ὧν ἐκεῖνος τὰ εἰδῶλα ποιεῖ καὶ τὰς ἀπορροίας), καὶ ὅποι δὴ ἔτυχεν ἀφικνουμένας μᾶλλον αἰσθητάς εἶναι νύκτωρ διὰ τὸ μεθ' ἡμέραν φερομένας διαλύεσθαι μᾶλλον (ἀταραχωδέστερος γὰρ ὁ ἀὴρ τῆς νυκτὸς διὰ τὸ νηνεμωτέρας εἶναι τὰς νύκτας), καὶ ἐν τῷ σώματι ποιεῖν αἰσθησιν διὰ τὸν ὕπνον, διὰ τὸ καὶ τῶν μικρῶν κινήσεων τῶν ἐντὸς αἰσθάνεσθαι καθεύδοντας μᾶλλον ἢ ἐγρηγορούτας. αὗται δ' αἱ κινήσεις φαντάσματα ποιοῦσιν, ἐξ ὧν προορῶσι τὰ μέλλοντα καὶ περὶ τῶν τοιούτων, καὶ διὰ ταῦτα συμβαίνει τὸ πάθος τοῦτο τοῖς τυχοῦσι καὶ οὐ τοῖς φρονιμωτάτοις. μεθ' ἡμέραν τε γὰρ ἐγίνετ' ἂν καὶ τοῖς σοφοῖς, εἰ θεὸς ἦν ὁ πέμπων· οὕτω δ' εἰκὸς τοὺς τυχόντας προορᾶν· ἢ γὰρ διάνοια τῶν τοιούτων οὐ φροντιστική, ἀλλ' ὥσπερ ἔρημος καὶ κενὴ πάντων, καὶ κινήθεισα κατὰ τὸ κινεῖν ἄγεται.

τοῦ δ' ἐνίου τῶν ἐκστατικῶν προορᾶν αἴτιον ὅτι αἱ οἰκεῖται κινήσεις οὐκ ἐνοχλοῦσιν ἀλλ' ἀπορραπίζονται· τῶν ξενικῶν οὖν μάλιστα αἰσθάνονται. τὸ δὲ τινας εὐθυονεῖρους εἶναι καὶ τὸ τοὺς γνωρίμους περὶ τῶν γνωρίμων μάλιστα προορᾶν συμβαίνει διὰ τὸ μάλιστα τοὺς γνωρίμους ὑπὲρ ἀλλήλων φροντίζειν· ὥσπερ γὰρ πόρρω ὄντων τάχιστα γνωρίζουσι καὶ αἰσθάνονται, οὕτω καὶ τῶν

κινήσεων· αἱ γὰρ τῶν γνωρίμων γνωριμώτεραι. οἱ δὲ μελαγχολικοὶ διὰ τὸ σφοδρὸν, ὥσπερ βάλλοντες πόρρωθεν, εὖστοχοί εἰσιν, καὶ διὰ τὸ μεταβλητικὸν [464b] ταχὺ τὸ ἐχόμενον φαντάζεται αὐτοῖς· ὥσπερ γὰρ τὰ Φιλαινίδος ποιήματα καὶ οἱ ἔμμανεῖς ἐχόμενα τοῦ ὁμοίου λέγουσι καὶ διανοοῦνται, οἷον Ἀφροδίτην φροδίτην, καὶ οὕτω συνείρουσιν εἰς τὸ πρόσω. ἔτι δὲ διὰ τὴν σφοδρότητα οὐκ ἐκκρούεται αὐτῶν ἡ κίνησις ὑφ' ἑτέρας κινήσεως.

τεχνικώτατος δ' ἐστὶ κριτὴς ἐνυπνίων ὅστις δύναται τὰς ὁμοιότητας θεωρεῖν· τὰς γὰρ εὐθυονειρίας κρίνειν παντός ἐστιν. λέγω δὲ τὰς ὁμοιότητας, ὅτι παραπλήσια συμβαίνει τὰ φαντάσματα τοῖς ἐν τοῖς ὕδασιν εἰδώλοις, καθάπερ καὶ πρότερον εἵπομεν. ἐκεῖ δέ, ἂν πολλὴ γίγνηται ἡ κίνησις, οὐδὲν ὅμοια γίνεται ἡ ἔμφασις καὶ τὰ εἶδωλα τοῖς ἀληθινοῖς. δεινὸς δὴ τὰς ἐμφάσεις κρίνειν εἴη ἂν ὁ δυνάμενος ταχὺ διαισθάνεσθαι καὶ συνορᾶν τὰ διαπεφορημένα καὶ διεστραμμένα τῶν εἰδώλων, ὅτι ἐστὶν ἀνθρώπου ἢ ἵππου ἢ ὅτουδ' ἄποτε, κακεῖ δὴ ὁμοίως τί δύναται τὸ ἐνύπνιον τοῦτο. ἡ γὰρ κίνησις ἐκκόπτει τὴν εὐθυονειρίαν. τί μὲν οὖν ἐστὶν ὕπνος καὶ τί ἐνύπνιον, καὶ διὰ τί τιν' αἰτίαν ἐκάτερον αὐτῶν γίνεται, ἔτι δὲ περὶ τῆς ἐκ τῶν ἐνυπνίων μαντείας εἴρηται περὶ πάσης· [περὶ δὲ κινήσεως τῆς κοινῆς τῶν ζώων λεκτέον.]

Περὶ Μακροβιοτητοῦ καὶ Βραχυβιοτητοῦ (464b) On Length and Shortness of Life

[464b] Περὶ δὲ τοῦ τὰ μὲν εἶναι μακρόβια τῶν ζώων τὰ δὲ βραχύβια, καὶ περὶ ζωῆς ὅλως μήκους καὶ βραχύτητος, ἐπισκεπτέον τὰς αἰτίας, ἀρχὴ δὲ τῆς σκέψεως ἀναγκαῖα πρῶτον ἐκ τοῦ διαπορῆσαι περὶ αὐτῶν. οὐ γάρ ἐστι δῆλον πότερον ἕτερον ἢ τὸ αὐτὸ αἴτιον πᾶσι τοῖς ζώοις καὶ φυτοῖς τοῦ τὰ μὲν εἶναι μακρόβια τὰ δὲ βραχύβια (καὶ γὰρ τῶν φυτῶν τὰ μὲν ἐπέτειον τὰ δὲ πολυχρόνιον ἔχει τὴν ζωὴν)· ἔτι δὲ πότερον ταῦτὰ μακρόβια καὶ τὴν φύσιν ὑγιεινὰ τῶν φύσει συνεστῶτων, ἢ κεχώρισται [καὶ] τὸ βραχύβιον καὶ τὸ νοσῶδες, ἢ κατ' ἐνίας μὲν νόσους ἐπαλλάττει τὰ νοσῶδη τὴν φύσιν σώματα τοῖς βραχυβίοις, κατ' ἐνίας δ' οὐδὲν κωλύει νοσῶδεις εἶναι μακροβίους ὄντας. περὶ μὲν οὖν ὕπνου καὶ ἐγρηγόρσεως εἴρηται πρότερον, περὶ δὲ ζωῆς καὶ θανάτου λεκτέον ὕστερον, ὁμοίως δὲ καὶ περὶ νόσου καὶ ὑγείας, ὅσον ἐπιβάλλει τῇ φυσικῇ φιλοσοφίᾳ· νῦν [465a] δὲ περὶ τὰς αἰτίας τοῦ τὰ μὲν εἶναι μακρόβια τὰ δὲ βραχύβια, καθάπερ εἴρηται πρότερον, θεωρητέον. ἔστι δ' ἔχοντα τὴν διαφορὰν ταύτην ὅλα τε πρὸς ὅλα γένη καὶ τῶν ὑφ' ἐν εἶδος ἕτερα πρὸς ἕτερα. λέγω δὲ κατὰ γένος μὲν διαφέρειν οἷον ἄνθρωπον πρὸς ἵππον (μακροβιώτερον γὰρ τὸ τῶν ἀνθρώπων γένος ἢ τὸ τῶν ἵππων), κατ' εἶδος δ' ἄνθρωπον πρὸς ἄνθρωπον· εἰσὶ γὰρ καὶ ἄνθρωποι οἱ μὲν μακρόβιοι οἱ δὲ βραχύβιοι ἕτεροι καθ' ἐτέρους τρόπους διεστῶτες (τὰ μὲν γὰρ ἐν τοῖς θερμοῖς τῶν ἐθνῶν μακροβιώτερα, τὰ δ' ἐν τοῖς ψυχροῖς βραχυβιώτερα), καὶ τῶν τὸν αὐτὸν δὲ τρόπον οἰκούντων διαφέρουσιν ὁμοίως τινὲς ταύτην τὴν πρὸς ἀλλήλους διαφορὰν.

Δεῖ δὴ λαβεῖν τί τὸ εὐφθαρτον ἐν τοῖς φύσει συνεστῶσι καὶ τί τὸ οὐκ εὐφθαρτον. πῦρ γὰρ καὶ ὕδωρ καὶ τὰ τούτοις συγγενῇ, οὐκ ἔχοντα τὴν αὐτὴν δύναμιν, τυγχάνει γενέσεως καὶ φθορᾶς αἰτία ἀλλήλοις, ὥστε καὶ τῶν ἄλλων ἕκαστον ἐκ τούτων ὄντα καὶ συνεστῶτα μετέχειν τῆς τούτων φύσεως εὐλογον, ὅσα μὴ συνθέσει ἐκ πολλῶν ἐστίν, οἷον οἰκία. περὶ μὲν οὖν τῶν ἄλλων ἕτερος λόγος·

εἰσὶ γὰρ ἴδιαι φθοραὶ πολλοῖς τῶν ὄντων, οἷον ἐπιστήμη «καὶ ἀγνοία», καὶ ὑγεία καὶ νόσος· ταῦτα γὰρ φθείρεται καὶ μὴ φθειρομένων τῶν δεκτικῶν ἀλλὰ σφωζομένων, οἷον ἀγνοίας μὲν φθορὰ ἀνάμνησις καὶ μάθησις, ἐπιστήμης δὲ λήθη καὶ ἀπάτη. κατὰ συμβεβηκὸς δ' ἀκολουθοῦσι τοῖς φυσικοῖς αἱ τῶν ἄλλων φθοραὶ· φθειρομένων γὰρ τῶν ζώων φθείρεται καὶ ἡ ἐπιστήμη καὶ ἡ ὑγεία ἡ ἐν τοῖς ζώοις. διὸ καὶ περὶ ψυχῆς λογίσαιτ' ἂν τις ἐκ τούτων· εἰ γὰρ ἐστὶ μὴ φύσει ἀλλ' ὥσπερ ἐπιστήμη ἐν ψυχῇ, οὕτω καὶ ψυχὴ ἐν σώματι, εἴη ἂν τις αὐτῆς καὶ ἄλλη φθορὰ παρὰ τὴν φθορὰν ἣν φθείρεται φθειρομένου τοῦ σώματος. ὥστ' ἐπεὶ οὐ φαίνεται τοιαύτη οὕσα, ἄλλως ἂν ἔχοι πρὸς τὴν τοῦ σώματος κοινωνίαν.

[465b] Ἰσως δ' ἂν τις ἀπορήσειεν εὐλόγως, ἄρ' ἐστὶν οὗ ἄφθαρτον ἔσται τὸ φθαρτόν, οἷον τὸ πῦρ ἄνω, οὗ μὴ ἔστι τὸ ἐναντίον. φθείρεται γὰρ τὰ μὲν ὑπάρχοντα τοῖς ἐναντίοις κατὰ συμβεβηκὸς, τῷ ἐκείνῳ φθείρεσθαι (ἀναιρεῖται γὰρ τὰναντία ὑπ' ἀλλήλων), κατὰ συμβεβηκὸς δ' οὐθὲν τῶν ἐν ταῖς οὐσίαις ἐναντίων φθείρεται, διὰ τὸ μηθενὸς ὑποκειμένου κατηγορεῖσθαι τὴν οὐσίαν. ὥσθ' ὅ μὴ ἔστιν ἐναντίον καὶ ὅπου μὴ ἔστιν, ἀδύνατον ἂν εἴη φθαρῆναι· τί γὰρ ἔσται τὸ φθεροῦν, εἴπερ ὑπ' ἐναντίων μὲν φθείρεσθαι συμβαίνει μόνων, τοῦτο δὲ μὴ ὑπάρχει, ἢ ὅλως ἢ ἐνταῦθα; ἢ τοῦτο τῇ μὲν ἀληθὲς ἐστὶ τῇ δ' οὐ; ἀδύνατον γὰρ τῷ ὕλῃ ἔχοντι μὴ ὑπάρχειν πῶς τὸ ἐναντίον. παντὶ μὲν γὰρ ἐνεῖναι τὸ θερμὸν ἢ τὸ εὐθὺ ἐνδέχεται, πᾶν δ' εἶναι ἀδύνατον ἢ θερμὸν ἢ εὐθὺ ἢ λευκόν· ἔσται γὰρ τὰ πάθη κεχωρισμένα. εἰ οὖν, ὅταν ἅμα ἢ τὸ ποιητικὸν καὶ τὸ παθητικόν, αἰεὶ τὸ μὲν ποιεῖ τὸ δὲ πάσχει, ἀδύνατον μὴ μεταβάλλειν. ἔτι καὶ εἰ ἀνάγκη περίττωμα ποιεῖν, τὸ δὲ περίττωμα ἐναντίον· ἐξ ἐναντίου γὰρ αἰεὶ ἡ μεταβολή, τὸ δὲ περίττωμα ὑπόλειμμα τοῦ προτέρου. εἰ δὲ πᾶν ἐξελαύνει τὸ ἐνεργεῖα ἐναντίον, κἂν ἐνταῦθ' ἄφθαρτον ἂν εἴη. ἢ οὐ, ἀλλ' ὑπὸ τοῦ περιέχοντος φθείρεται; εἰ μὲν οὖν, ἱκανὸν ἐκ τῶν εἰρημένων· εἰ δὲ μή, ὑποθέσθαι δεῖ ὅτι ἐνεστί τι ἐνεργεῖα ἐναντίον, καὶ περίττωμα γίνεται. [διὸ ἡ ἐλάττων φλόξ κατακαίεται ὑπὸ τῆς πολλῆς κατὰ συμβεβηκὸς, ὅτι ἡ τροφή ἦν ἐκείνη ἐν πολλῷ χρόνῳ ἀναλίσκει, τὸν καπνόν, ταύτην ἢ πολλὴ φλόξ ταχύ.] διὸ πάντα αἰεὶ ἐν κινήσει ἐστί, καὶ γίνεται ἢ φθείρεται. τὸ δὲ περιέχον ἢ συμπράττει ἢ ἀντιπράττει· καὶ διὰ τοῦτο μετατιθέμενα πολυχρονιώτερα μὲν γίνεται καὶ ὀλιγοχρονιώτερα τῆς φύσεως, αἴδια δ' οὐδαμοῦ, ὅσοις ἐναντία ἔστιν· εὐθὺς γὰρ ἡ ὕλη τὸ

έναντίον ἔχει, ὥστ' εἰ μὲν τοῦ ποῦ, κατὰ τόπον μεταβάλλει, εἰ δὲ τοῦ ποσοῦ, κατ' αὐξησιν καὶ φθίσιν, εἰ δὲ πάθους, ἀλλοιοῦται.

[466a] Ἔστι δ' οὔτε τὰ μέγιστα ἀφθαρτότερα (ἵππος γὰρ ἀνθρώπου βραχυβιώτερον) οὔτε τὰ μικρά (ἐπέτεια γὰρ τὰ πολλὰ τῶν ἐντόμων), οὔτε τὰ φυτὰ ὅλως τῶν ζώων (ἐπέτεια γὰρ ἔνια τῶν φυτῶν), οὔτε τὰ ἔναιμα (μέλιττα γὰρ πολυχρονιώτερον ἐνίων ἐναίμων) οὔτε τὰ ἄναιμα (τὰ γὰρ μαλάκια ἐπέτεια μὲν, ἄναιμα δέ), οὔτε τὰ ἐν τῇ γῇ (καὶ γὰρ φυτὰ ἐπέτεια ἔστι καὶ ζῶα πεζά) οὔτε τὰ ἐν τῇ θαλάττῃ (καὶ γὰρ ἐκεῖ βραχύβια καὶ τὰ ὀστρακηρὰ καὶ τὰ μαλάκια). ὅλως δὲ τὰ μακροβιώτατα ἐν τοῖς φυτοῖς ἐστίν, οἷον ὁ φοῖνιξ. εἴτ' ἐν τοῖς ἐναίμοις ζώοις μᾶλλον ἢ ἐν τοῖς ἀναίμοις, καὶ ἐν τοῖς πεζοῖς ἢ ἐν τοῖς ἐνύδροις· ὥστε καὶ συνδυασθέντων ἐν τοῖς ἐναίμοις καὶ πεζοῖς τὰ μακροβιώτατα τῶν ζώων ἐστίν, οἷον ἄνθρωπος καὶ ἐλέφας. καὶ δὴ καὶ τὰ μείζω ὥς ἐπὶ τὸ πολὺ εἰπεῖν τῶν ἐλαττόνων μακροβιώτερα· καὶ γὰρ τοῖς ἄλλοις συμβέβηκε τοῖς μακροβιωτάτοις μέγεθος, ὥσπερ καὶ τοῖς εἰρημένοις.

Τὴν δ' αἰτίαν περὶ τούτων ἀπάντων ἐντεῦθεν ἂν τις θεωρήσειεν. δεῖ γὰρ λαβεῖν ὅτι τὸ ζῶον ἐστὶ φύσει ὑγρὸν καὶ θερμόν, καὶ τὸ ζῆν τοιοῦτον, τὸ δὲ γῆρας ξηρὸν καὶ ψυχρόν, καὶ τὸ τεθνηκός· φαίνεται γὰρ οὕτως. ὕλη δὲ τῶν σωμάτων τοῖς ζώοις ταῦτα, τὸ θερμόν καὶ τὸ ψυχρόν, καὶ τὸ ξηρὸν καὶ τὸ ὑγρόν. ἀνάγκη τοίνυν γηράσκοντα ξηραίνεσθαι· διὸ δεῖ μὴ εὐξήραντον εἶναι τὸ ὑγρόν. καὶ διὰ τοῦτο τὰ λιπαρὰ ἄσηπτα· αἴτιον δ' ὅτι ἀέρος, ὁ δ' ἀήρ πρὸς τᾶλλα πῦρ, πῦρ δ' οὐ γίνεται σαπρόν. οὐδ' αὖ ὀλίγον δεῖ εἶναι τὸ ὑγρόν· εὐξήραντον γὰρ καὶ τὸ ὀλίγον. διὸ καὶ τὰ μέγала καὶ ζῶα καὶ φυτὰ ὥς ὅλως εἰπεῖν μακροβιώτερα, καθάπερ ἐλέχθη πρότερον· εὐλογον γὰρ τὰ μείζω πλέον ἔχειν ὑγρόν. οὐ μόνον δὲ διὰ τοῦτο μακροβιώτερα· δύο γὰρ τὰ αἴτια, τό τε ποσὸν καὶ τὸ ποιόν, ὥστε δεῖ μὴ μόνον πλῆθος εἶναι ὑγροῦ, ἀλλὰ τοῦτο καὶ θερμόν, ἵνα μήτε εὐπηκτον μήτε εὐξήραντον ᾗ. καὶ διὰ τοῦτο ἄνθρωπος μακρόβιον μᾶλλον ἐνίων μειζόνων· μακροβιώτερα γὰρ τὰ λειπόμενα τῷ πλήθει τοῦ [466b] ὑγροῦ, ἐὰν πλείονι λόγῳ ὑπερέχη κατὰ τὸ ποιόν ἢ λείπεται κατὰ τὸ ποσόν. ἔστι δ' ἐνίοις μὲν τὸ θερμόν τὸ λιπαρόν, ὃ ἅμα ποιεῖ τό τε μὴ εὐξήραντον καὶ τὸ μὴ εὐψυκτον· ἐνίοις δ' ἄλλον ἔχει χυμόν.

ἔτι δεῖ τὸ μέλλον εἶναι μὴ εὐφθαρτον μὴ περιττωματικὸν εἶναι. ἀναιρεῖ γὰρ τὸ τοιοῦτον ἢ νόσῳ ἢ φύσει· ἐναντία γὰρ ἢ τοῦ

περιττώματος δύναμις καὶ φθαρτικὴ ἢ μὲν τῆς φύσεως ἢ δὲ μορίου. διὸ καὶ τὰ ὀχευτικὰ καὶ πολύσπερμα γηράσκει ταχύ· τὸ γὰρ σπέρμα περιττώμα, καὶ ἔτι ξηραίνει ἀπίον. καὶ διὰ τοῦτο ἡμίονος μακροβιώτερος καὶ ἵππου καὶ ὄνου, ἐξ ὧν ἐγένετο, καὶ τὰ θήλεα τῶν ἄρρένων, ἐὰν ὀχευτικὰ ἢ τὰ ἄρρενα· διὸ οἱ στρουθοὶ οἱ ἄρρενες βραχυβιώτεροι τῶν θηλειῶν. ἔτι δὲ καὶ ὅσα πονητικὰ τῶν ἄρρένων καὶ διὰ τὸν πόνον γηράσκει μᾶλλον· ξηραίνει γὰρ ὁ πόνος, τὸ δὲ γῆρας ξηρόν ἐστιν. φύσει δὲ καὶ ὥς ἐπὶ τὸ πᾶν εἰπεῖν τὰ ἄρρενα τῶν θηλειῶν μακροβιώτερα· αἴτιον δ' ὅτι θερμότερον ζῶον τὸ ἄρρεν τοῦ θήλεος.

τὰ δ' αὐτὰ ἐν τοῖς ἀλεινοῖς μακροβιώτερα ἐστὶν ἢ ἐν τοῖς ψυχροῖς τόποις, διὰ τὴν αὐτὴν αἰτίαν δι' ἣν περ καὶ μεῖζω. καὶ μάλιστα ἐπίδηλον τὸ μέγεθος τῶν τὴν φύσιν ψυχρῶν ζώων· διὸ οἱ τ' ὄφεις καὶ αἱ σαῦραι καὶ τὰ φολιδωτὰ μεγάλα ἐν τοῖς θερμοῖς τόποις, καὶ ἐν τῇ θαλάττῃ τῇ ἐρυθρᾷ τὰ ὀστρακόδερμα· τῆς τε γὰρ αὐξήσεως ἢ θερμῇ ὑγρότης αἰτία καὶ τῆς ζωῆς. ἐν δὲ τοῖς ψυχροῖς τόποις ὑδατωδέστερον τὸ ὑγρὸν τὸ ἐν τοῖς ζώοις ἐστίν· διὸ εὐπηκτον, ὥστε τὰ μὲν οὐ γίνεται ὅλως τῶν ζώων τῶν ὀλιγαίμων ἢ ἀναίμων ἐν τοῖς πρὸς τὴν ἄρκτον τόποις, οὔτε τὰ πεζὰ ἐν τῇ γῇ οὔτε τὰ ἐνυδρα ἐν τῇ θαλάττῃ, τὰ δὲ γίνεται μὲν, ἐλάττω δὲ καὶ βραχυβιώτερα· ἀφαιρεῖται γὰρ ὁ πάγος τὴν αὕξησιν. τροφὴν δὲ μὴ λαμβάνοντα καὶ τὰ φυτὰ καὶ τὰ ζῶα φθείρεται· συντήκει γὰρ αὐτὰ ἐαυτὰ· ὥσπερ γὰρ ἡ πολλὴ φλόξ κατακαίει καὶ φθείρει τὴν ὀλίγην τῷ τὴν τροφὴν ἀναλίσκειν, οὕτω τὸ φυσικὸν θερμόν, τὸ πρῶτον πεπτικὸν ὄν, ἀναλίσκει τὴν ὕλην ἐν ἣ ἐστὶν. τὰ δ' ἐνυδρα τῶν πεζῶν ἥττον μακρόβια οὐχ ὅτι [467a] ὑγρὰ ἀπλῶς, ἀλλ' ὅτι ὑδατώδη· τὸ δὲ τοιοῦτον ὑγρὸν εὐφθαρτον, ὅτι ψυχρὸν καὶ εὐπηκτον. καὶ τὸ ἀναιμον διὰ τὸ αὐτό, ἐὰν μὴ μεγέθει ἀπαμύνηται· οὔτε γὰρ λίπος οὔτε γλυκὺ ἔχει. ἐν γὰρ ζῶῳ τὸ λιπαρὸν γλυκὺ· διὸ αἱ μέλιτται μακροβιώτεραι ἐτέρων μειζόνων ζώων.

Ἐν δὲ τοῖς φυτοῖς ἐστὶ τὰ μακροβιώτατα, καὶ μᾶλλον ἢ ἐν τοῖς ζώοις, πρῶτον μὲν ὅτι ἥττον ὑδατώδη, ὥστ' οὐκ εὐπηκτα· εἴτ' ἔχει λιπαρότητα καὶ γλισχρότητα, διὸ καὶ ξηρὰ καὶ γεώδη ὄντα ὅμως οὐκ εὐξήραντον ἔχουσι τὸ ὑγρόν. περὶ δὲ τοῦ πολυχρόνιον εἶναι τὴν τῶν δένδρων φύσιν δεῖ λαβεῖν τὴν αἰτίαν· ἔχει γὰρ ἰδίαν πρὸς τὰ ζῶα, πλὴν πρὸς τὰ ἐντομα. νέα γὰρ αἰεὶ τὰ φυτὰ γίνεται· διὸ πολυχρόνια. αἰεὶ γὰρ ἕτεροι οἱ πτόρθοι, οἱ δὲ γηράσκουσιν, καὶ αἱ ρίζαι ὁμοίως.

ἀλλ' οὐχ ἅμα, ἀλλ' ὅτε μὲν μόνον τὸ στέλεχος καὶ οἱ κλάδοι ἀπώλοντο, ἕτεροι δὲ παρεφύησαν· ὅταν δ' οὕτως ποιῶσιν, αἱ ῥίζαι ἄλλαι ἐκ τοῦ ὑπάρχοντος γίνονται, καὶ οὕτως αἰεὶ διατελεῖ τὸ μὲν φθειρόμενον τὸ δὲ γινόμενον· διὸ καὶ μακρόβια. ἔοικε δὲ τὰ φυτὰ τοῖς ἐντόμοις, ὥσπερ εἴρηται πρότερον· διαιρούμενα γὰρ ζῆ, καὶ δύο καὶ πολλὰ γίνεται ἐξ ἑνός. τὰ δ' ἔντομα μέχρι μὲν τοῦ ζῆν ἦλθεν, πολλὴν δ' οὐ δύναται χρόνον· οὐ γὰρ ἔχει ὄργανα, οὐδὲ δύναται ποιεῖν αὐτὰ ἢ ἀρχὴν ἢ ἐν ἐκάστω. ἢ δ' ἐν τῷ φυτῷ δύναται· πανταχῇ γὰρ ἔχει καὶ ῥίζαν καὶ καυλὸν δυνάμει. διὸ ἀπὸ ταύτης αἰεὶ προέρχεται τὸ μὲν νέον τὸ δὲ γηράσκον, μικρόν τι διαφέροντα τοῦ εἶναι μακρόβια οὕτως ὥσπερ τὰ ἀποφυτευόμενα. καὶ γὰρ ἐν τῇ ἀποφυτεΐᾳ τρόπον τινὰ φαίη ἂν τις ταῦτα συμβαίνειν· μόριον γάρ τι τὸ ἀποφυτευθέν. ἐν μὲν οὖν τῇ ἀποφυτεΐᾳ χωριζομένων συμβαίνει τοῦτο, ἐκεῖ δὲ διὰ τοῦ συνεχοῦς. αἴτιον δ' ὅτι ἐνυπάρχει πάντῃ ἢ ἀρχῇ δυνάμει ἐνοῦσα.

συμβαίνει δὲ ταῦτό ἐπὶ τε τῶν ζώων καὶ φυτῶν. ἐν τε γὰρ τοῖς ζώοις τὰ ἄρρενα μακροβιώτερα ὥς ἐπὶ τὸ πολὺ - τούτων δὲ τὰ ἄνω μείζω ἢ τὰ κάτω (νανωδέστερον γὰρ τοῦ θήλεος τὸ ἄρρεν), ἐν δὲ τῷ ἄνω τὸ θερμόν, καὶ τὸ ψυχρὸν ἐν τῷ κάτω - καὶ τῶν φυτῶν τὰ κεφαλοβαρῇ μακροβιώτερα.

[467b] τοιαῦτα δὲ τὰ μὴ ἐπέτεια ἀλλὰ δενδρώδη· τὸ γὰρ ἄνω τοῦ φυτοῦ καὶ κεφαλὴ ἢ ῥίζα ἐστί, τὰ δ' ἐπέτεια ἐπὶ τὰ κάτω καὶ τὸν καρπὸν λαμβάνει τὴν αὔξησιν. ἀλλὰ περὶ μὲν τούτων καὶ καθ' αὐτὰ ἐν τοῖς Περὶ φυτῶν διορισθήσεται· νῦν δὲ περὶ τῶν ἄλλων [ζώων] εἴρηται τὸ αἴτιον περὶ τε μεγέθους ζωῆς καὶ βραχυβιότητος. λοιπὸν δ' ἡμῖν θεωρῆσαι περὶ τε νεότητος καὶ γήρωος καὶ ζωῆς καὶ θανάτου· τούτων γὰρ διορισθέντων τέλος ἂν ἡ περὶ τῶν ζώων ἔχοι μέθοδος.

Περί Νεότητος καὶ Γήρωσ, καὶ Ζωῆς καὶ Θανάτου, καὶ Αναπνοῆς (467b) On Youth, Old Age, Life and Death, and Respiration

[467b] Περί δὲ νεότητος καὶ γήρωσ καὶ περὶ ζωῆς καὶ θανάτου λεκτέον νῦν· ἅμα δὲ καὶ περὶ ἀναπνοῆς ἀναγκαῖον ἴσως τὰς αἰτίας εἰπεῖν· ἐνίοις γὰρ τῶν ζώων διὰ τοῦτο συμβαίνει τὸ ζῆν καὶ τὸ μὴ ζῆν. ἐπεὶ δὲ περὶ ψυχῆς ἐν ἑτέροις διώριστα, καὶ δῆλον ὅτι οὐχ οἷόν τ' εἶναι σῶμα τὴν οὐσίαν αὐτῆς, ἀλλ' ὅμως ὅτι γ' ἐν τινι τοῦ σώματος ὑπάρχει μορίῳ φανερόν, καὶ ἐν τούτῳ τινὶ τῶν ἐχόντων δύνάμιν ἐν τοῖς μορίοις, τὰ μὲν οὖν ἄλλα τῆς ψυχῆς ἢ μόρια ἢ δυνάμεις, ὅποτερως ποτὲ δεῖ καλεῖν, ἀφείσθω τὰ νῦν· ὅσα δὲ ζῶα λέγεται καὶ ζῆν, ἐν μὲν τοῖς ἀμφοτέρων τούτων τετυχηκόσι (λέγω δ' ἀμφοτέρων τοῦ τε ζῶον εἶναι καὶ τοῦ ζῆν) ἀνάγκη ταῦτόν εἶναι καὶ ἐν μόριον καθ' ὃ τε ζῆ καὶ καθ' ὃ προσαγορεύομεν αὐτὸ ζῶον· τὸ μὲν γὰρ ζῶον ἢ ζῶον ἀδύνατον μὴ ζῆν· ἢ δὲ ζῆ, ταύτη ζῶον ὑπάρχειν οὐκ ἀναγκαῖον· τὰ γὰρ φυτὰ ζῆ μὲν, οὐκ ἔχει δ' αἰσθῆσιν, τῷ δ' αἰσθάνεσθαι τὸ ζῶον πρὸς τὸ μὴ ζῶον διορίζομεν.

ἀριθμῷ μὲν οὖν ἀναγκαῖον ἐν εἶναι καὶ τὸ αὐτὸ τοῦτο τὸ μόριον, τῷ δ' εἶναι πλείω καὶ ἕτερα· οὐ γὰρ ταῦτό τὸ ζῶον εἶναι καὶ τὸ ζῆν. ἐπεὶ οὖν τῶν ιδίων αἰσθητηρίων ἐν τι κοινόν ἐστιν αἰσθητήριον, εἰς ὃ τὰς κατ' ἐνέργειαν αἰσθήσεις ἀναγκαῖον ἀπαντᾶν, τοῦτο δ' ἂν εἴη μέσον τοῦ πρόσθεν καλουμένου καὶ ὀπισθεν (ἔμπροσθεν μὲν γὰρ λέγεται ἐφ' ὃ ἐστιν ἡμῖν ἡ αἴσθησις, ὀπισθεν δὲ τὸ ἀντικείμενον), ἔτι δὲ διηρημένου τοῦ σώματος τῶν ζώντων πάντων τῷ τ' ἄνω καὶ κάτω (πάντα γὰρ ἔχει τὸ ἄνω καὶ τὸ κάτω, ὥστε καὶ τὰ φυτὰ), δῆλον ὅτι τὴν θρεπτικὴν [468a] ἀρχὴν ἔχει ἂν ἐν μέσῳ τούτων· καθ' ὃ μὲν γὰρ εἰσέρχεται μόριον ἢ τροφή, ἄνω καλοῦμεν, πρὸς αὐτὸ βλέποντες ἀλλ' οὐ πρὸς τὸ περιέχον ὅλον, κάτω δὲ καθ' ὃ τὸ περίττωμα ἀφίησι τὸ πρῶτον. ἔχει δ' ἐναντίως τοῖς φυτοῖς τοῦτο καὶ τοῖς ζώοις· τῷ μὲν γὰρ ἀνθρώπῳ διὰ τὴν ὀρθότητα μάλιστα ὑπάρχει τοῦτο τῶν ζώων, τὸ ἔχειν τὸ ἄνω μόριον πρὸς τὸ

τοῦ παντὸς ἄνω, τοῖς δ' ἄλλοις μεταξύ· τοῖς δὲ φυτοῖς ἀκινήτοις οὕσι καὶ λαμβάνουσιν ἐκ τῆς γῆς τὴν τροφήν ἀναγκαῖον ἀεὶ κάτω τοῦτ' ἔχειν τὸ μόριον. ἀνάλογον γάρ εἰσιν αἱ ῥίζαι τοῖς φυτοῖς καὶ τὸ καλούμενον στόμα τοῖς ζώοις, δι' οὗ τὴν τροφήν τὰ μὲν ἐκ τῆς γῆς λαμβάνει, τὰ δὲ δι' αὐτῶν.

Τριῶν δὲ μερῶν ὄντων εἰς ἃ διαιρεῖται πάντα τὰ τέλεια τῶν ζώων, ἐνὸς μὲν ἣ δέχεται τὴν τροφήν, ἐνὸς δ' ἣ τὸ περίττωμα προίεται, τρίτου δὲ τοῦ μέσου τούτων, τοῦτο ἐν μὲν τοῖς μεγίστοις τῶν ζώων καλεῖται στήθος, ἐν δὲ τοῖς ἄλλοις τὸ ἀνάλογον, διήρθρωται δὲ μᾶλλον ἐτέροις ἐτέρων. ὅσα δ' αὐτῶν ἐστὶ πορευτικά, πρόσκειται καὶ μόρια τὰ πρὸς ταύτην τὴν ὑπηρεσίαν, οἷς τὸ πᾶν οἴσουσι κύτος, σκέλη τε καὶ πόδες καὶ τὰ τούτοις ἔχοντα τὴν αὐτὴν δύναμιν. ἀλλ' ἢ γε τῆς θεραπευτικῆς ἀρχῇ ψυχῆς ἐν τῷ μέσῳ τῶν τριῶν μορίων καὶ κατὰ τὴν αἴσθησιν οὕσα φαίνεται καὶ κατὰ τὸν λόγον· πολλὰ γὰρ τῶν ζώων ἀφαιρουμένου ἑκατέρου τῶν μορίων, τῆς τε καλουμένης κεφαλῆς καὶ τοῦ δεκτικοῦ τῆς τροφῆς, ζῆ μεθ' οὗπερ ἂν ἦ τὸ μέσον. δῆλον δ' ἐπὶ τῶν ἐντόμων, οἷον σφηκῶν τε καὶ μελιττῶν, τοῦτο συμβαῖνον· καὶ τῶν μὴ ἐντόμων δὲ πολλὰ διαιρούμενα δύναται ζῆν διὰ τὸ θεραπευτικόν. τὸ δὲ τοιοῦτον μόριον ἐνεργείᾳ μὲν ἔχει ἓν, δυνάμει δὲ πλείω· τὸν αὐτὸν γὰρ συνέστηκε τοῖς φυτοῖς τρόπον· καὶ γὰρ τὰ φυτὰ διαιρούμενα ζῆ χωρίς, καὶ γίνεται πολλὰ ἀπὸ μιᾶς ἀρχῆς δένδρα. δι' ἐν δ' αἰτίαν τὰ μὲν οὐ δύναται διαιρούμενα ζῆν, τὰ δ' ἀποφυτεύεται τῶν φυτῶν, ἕτερος [468b] ἔσται λόγος. ἀλλ' ὁμοίως ἔχει κατὰ γε τοῦτο τὰ τε φυτὰ καὶ τὸ τῶν ἐντόμων γένος.

ἀνάγκη δὲ καὶ τὴν θεραπευτικὴν ψυχὴν ἐνεργείᾳ μὲν ἐν τοῖς ἔχουσιν εἶναι μίαν, δυνάμει δὲ πλείους, ὁμοίως δὲ καὶ τὴν αἰσθητικήν· φαίνεται γὰρ ἔχοντα αἴσθησιν τὰ διαιρούμενα αὐτῶν. ἀλλὰ πρὸς τὸ σφύζεσθαι τὴν φύσιν, τὰ μὲν φυτὰ δύναται, ταῦτα δ' οὐ δύναται διὰ τὸ μὴ ἔχειν ὄργανα πρὸς σωτηρίαν, ἐνδεᾶ τ' εἶναι τὰ μὲν τοῦ ληψομένου τὰ δὲ τοῦ δεξομένου τὴν τροφήν, τὰ δ' ἄλλων τε καὶ τούτων ἀμφοτέρων. εἰκόασι γὰρ τὰ τοιαῦτα τῶν ζώων πολλοῖς ζώοις συμπεφυκόσιν (τὰ δ' ἄριστα συνεστηκότα τοῦτ' οὐ πάσχει τῶν ζώων διὰ τὸ εἶναι τὴν φύσιν αὐτῶν ὡς ἐνδέχεται μάλιστα μίαν). διὸ καὶ μικρὰν αἴσθησιν ἓνια ποιεῖ διαιρούμενα τῶν μορίων ὅτι ἔχει τι ψυχικὸν πάθος· χωριζομένων γὰρ τῶν σπλάγχχνων ποιεῖται κίνησιν, οἷον καὶ αἱ χελῶναί τῆς καρδίας ἀφηρημένης.

Ἔτι δὲ ἐπὶ τε τῶν φυτῶν δῆλον καὶ ἐπὶ τῶν ζώων, τῶν μὲν φυτῶν τὴν τ' ἐκ τῶν σπερμάτων γένεσιν ἐπισκοποῦσι καὶ τὰς ἐμφυτείας τε καὶ τὰς ἀποφυτείας. ἢ τε γὰρ ἐκ τῶν σπερμάτων γένεσις συμβαίνει πᾶσιν ἐκ τοῦ μέσου (διθύρων γὰρ ὄντων πάντων, ἢ συμπέφυκεν καὶ τὸ μέσον ἔστιν ἑκατέρου τῶν μορίων, ἐντεῦθεν ὃ τε καυλὸς ἐκφύεται καὶ ἡ ῥίζα τῶν φυομένων, ἡ δ' ἀρχὴ τὸ μέσον αὐτῶν ἔστιν), ἐν τε ταῖς ἐμφυτεῖαις καὶ ταῖς ἀποφυτεῖαις μάλιστα συμβαίνει τοῦτο περὶ τοὺς ὄζους· ἔστι γὰρ ἀρχὴ τις ὁ ὄζος τοῦ κλάδου, ἅμα δὲ καὶ μέσον, ὥστε ἢ τοῦτο ἀφαιροῦσιν ἢ εἰς τοῦτο ἐμβάλλουσιν, ἵνα ἢ ὁ κλάδος ἢ αἱ ῥίζαι ἐκ τούτου γίνωνται, ὡς οὕσης τῆς ἀρχῆς ἐκ τοῦ μέσου κλάδου καὶ ῥίζης. καὶ τῶν ζώων τῶν ἐναίμων ἡ καρδιά γίνεται πρῶτον· τοῦτο δὲ δῆλον ἐξ ὧν ἐν τοῖς ἐνδεχομένοις ἔτι γινομένοις ἰδεῖν τεθεωρήκαμεν. ὥστε καὶ ἐν τοῖς ἀναίμοις ἀναγκαῖον τὸ ἀνάλογον τῇ καρδίᾳ γίνεσθαι πρῶτον. ἡ δὲ καρδιά ὅτι ἔστιν ἀρχή, τῶν φλεβῶν ἐν τοῖς περὶ τὰ Πέρη τῶν ζώων εἴρηται [469a] πρότερον· καὶ ὅτι τὸ αἷμα τοῖς ἐναίμοις ἐστὶ τελευταία τροφή, ἐξ οὗ γίνεται τὰ μόρια. φανερόν τοίνυν ὅτι μίαν μὲν τινα ἐργασίαν ἢ τοῦ στόματος λειτουργεῖ δύναμις, ἑτέραν δ' ἢ τῆς κοιλίας, περὶ τὴν τροφήν, ἡ δὲ καρδιά κυριωτάτη, καὶ τὸ τέλος ἐπιτίθησιν. ὥστ' ἀνάγκη καὶ τῆς αἰσθητικῆς καὶ τῆς θρεπτικῆς ψυχῆς ἐν τῇ καρδίᾳ τὴν ἀρχὴν εἶναι τοῖς ἐναίμοις· τὰ γὰρ τῶν ἄλλων μορίων ἔργα περὶ τὴν τροφήν τοῦ ταύτης ἔργου χάριν ἐστί· δεῖ μὲν γὰρ τὸ κύριον πρὸς τὸ οὗ ἕνεκα διατελεῖν, ἀλλ' οὐκ ἐν τοῖς τούτου ἕνεκα, οἷον ἰατρὸς πρὸς τὴν υἰγίειαν.

ἀλλὰ μὴν τό γε κύριον τῶν αἰσθήσεων ἐν ταύτῃ τοῖς ἐναίμοις πᾶσιν· ἐν τούτῳ γὰρ ἀναγκαῖον εἶναι τὸ πάντων τῶν αἰσθητηρίων κοινὸν αἰσθητήριον. δύο δὲ φανερῶς ἐνταῦθα συντεινούσας ὁρῶμεν, τὴν τε γεῦσιν καὶ τὴν ἀφήν, ὥστε καὶ τὰς ἄλλας ἀναγκαῖον· ἐν τούτῳ μὲν γὰρ τοῖς ἄλλοις αἰσθητηρίοις ἐνδέχεται ποιεῖσθαι τὴν κίνησιν, ταῦτα δ' οὐδὲν συντείνει πρὸς τὸν ἄνω τόπον. χωρὶς δὲ τούτων, εἰ τὸ ζῆν ἐν τούτῳ τῷ μορίῳ πᾶσιν ἔστι, δῆλον ὅτι καὶ τὴν αἰσθητικὴν ἀρχὴν ἀναγκαῖον· ἢ μὲν γὰρ ζῶον, ταύτῃ καὶ ζῆν φαμεν, ἢ δ' αἰσθητικόν, ταύτῃ τὸ σῶμα ζῶον εἶναι λέγομεν. διὰ τί δ' αἱ μὲν τῶν αἰσθήσεων φανερῶς συντείνουν πρὸς τὴν καρδίαν, αἱ δ' εἰσὶν ἐν τῇ κεφαλῇ (διὸ καὶ δοκεῖ τισιν αἰσθάνεσθαι τὰ ζῶα διὰ τὸν ἐγκέφαλον), τὸ αἷτιον τούτων ἐν ἐτέροις εἴρηται χωρίς.

κατὰ μὲν οὖν τὰ φαινόμενα δῆλον ἐκ τῶν εἰρημένων ὅτι ἐν

τούτω τε καὶ ἐν τῷ μέσῳ τοῦ σώματος τῶν τριῶν μορίων ἢ τε τῆς αἰσθητικῆς ψυχῆς ἀρχή ἐστι καὶ ἡ τῆς αὐξητικῆς καὶ θρεπτικῆς· κατὰ δὲ τὸν λόγον, ὅτι τὴν φύσιν ὀρῶμεν ἐν πᾶσιν ἐκ τῶν δυνατῶν ποιοῦσαν τὸ κάλλιστον· ἐν τῷ μέσῳ δὲ τῆς οὐσίας τῆς ἀρχῆς οὔσης ἐκατέρας μάλιστα ἂν ἀποτελοῖ τῶν μορίων ἐκάτερον τὸ αὐτοῦ ἔργον, τό τε κατεργαζόμενον τὴν ἐσχάτην τροφήν καὶ τὸ δεκτικόν· πρὸς ἐκατέρῳ γὰρ αὐτῶν οὕτως ἔσται, καὶ ἔστιν ἡ τοῦ τοιούτου μέσου χώρα ἄρχοντος [469b] χώρα. ἔτι τὸ χρώμενον καὶ ὃ χρῆται τὸ χρώμενον δεῖ διαφέρειν (ὥσπερ δὲ τὴν δύναμιν, οὕτως, ἂν ἐνδέχεται, καὶ τὸν τόπον), ὥσπερ οἱ τ' αὐλοὶ καὶ τὸ κινοῦν τοὺς αὐλοὺς, ἡ χεὶρ. εἴπερ οὖν τὸ ζῶον ὥριστα τῷ τὴν αἰσθητικὴν ἔχειν ψυχὴν, τοῖς μὲν ἐναίμοις ἀναγκαῖον ἐν τῇ καρδίᾳ ταύτην ἔχειν τὴν ἀρχήν, τοῖς δ' ἀναίμοις ἐν τῷ ἀνάλογον μορίῳ. πάντα δὲ τὰ μόρια καὶ πᾶν τὸ σῶμα τῶν ζώων ἔχει τινὰ σύμφυτον θερμότητα φυσικὴν· διὸ ζῶντα μὲν φαίνεται θερμά, τελευτῶντα δὲ καὶ στερισκόμενα τοῦ ζῆν τοῦναντίον. ἀναγκαῖον δὴ ταύτης τὴν ἀρχὴν τῆς θερμότητος ἐν τῇ καρδίᾳ τοῖς ἐναίμοις εἶναι, τοῖς δ' ἀναίμοις ἐν τῷ ἀνάλογον· ἐργάζεται γὰρ καὶ πέττει τῷ φυσικῷ θερμῷ τὴν τροφήν πάντα, μάλιστα δὲ τὸ κυριώτατον. διὸ τῶν μὲν ἄλλων μορίων ψυχομένων ὑπομένει τὸ ζῆν, τοῦ δ' ἐν ταύτῃ φθείρεται ἀμπαν, διὰ τὸ τὴν ἀρχὴν ἐντεῦθεν τῆς θερμότητος ἡρτῆσθαι πᾶσι, καὶ τῆς ψυχῆς ὥσπερ ἐμπεπυρευμένης ἐν τοῖς μορίοις τούτοις, τῶν μὲν ἀναίμων ἐν τῷ ἀνάλογον, ἐν δὲ τῇ καρδίᾳ τῶν ἐναίμων. ἀνάγκη τοίνυν ἅμα τό τε ζῆν ὑπάρχειν καὶ τὴν τοῦ θερμοῦ τούτου σωτηρίαν, καὶ τὸν καλούμενον θάνατον εἶναι τὴν τούτου φθοράν.

Ἀλλὰ μὴν πυρός γε δύο ὀρῶμεν φθοράς, μάρανσιν τε καὶ σβέσιν. καλοῦμεν δὲ τὴν μὲν ὑφ' αὐτοῦ μάρανσιν, τὴν δ' ὑπὸ τῶν ἐναντίων σβέσιν, [τὴν μὲν γήρα, τὴν δὲ βίαιον,] συμβαίνει δ' ἀμφοτέρας διὰ ταῦτ' εἶναι τὰς φθοράς· ὑπολειπούσης γὰρ τῆς τροφῆς, οὐ δυναμένου λαμβάνειν τοῦ θερμοῦ τὴν τροφήν, φθορὰ γίνεται τοῦ πυρός. τὸ μὲν γὰρ ἐναντίον παῦον τὴν πέψιν κωλύει τρέφεσθαι· ὅτε δὲ μαραίνεσθαι συμβαίνει, πλείονος ἀθροιζομένου θερμοῦ διὰ τὸ μὴ ἀναπνεῖν μηδὲ καταψύχεσθαι· ταχὺ γὰρ καὶ οὕτω καταναλίσκει τὴν τροφήν πολὺ συναθροιζόμενον τὸ θερμόν, καὶ φθάνει καταναλίσκον πρὶν ἐπιστῆναι τὴν ἀναθυμίασιν. διόπερ οὐ μόνον μαραίνεται τὸ ἔλαττον παρὰ τὸ πλεῖον πῦρ, ἀλλὰ καὶ αὕτη καθ' αὐτὴν ἡ τοῦ λύχνου φλόξ ἐντιθεμένη πλείονι φλογὶ [470a]

κατακαίεται, καθάπερ ότιούν άλλο τών καυστών. αίτιον δ' ότι τήν μέν ούσαν έν τή φλογί τροφήν φθάνει λαμβάνουσα ή μείζων φλόξ πρίν έπελθεϊν έτέραν, τó δέ πυρ άεί διατελεϊ γινόμενον και ρέον ώσπερ ποταμός, άλλα λανθάνει διά τó τάχος. δήλον τοίνυν ώς είπερ δεϊ σφζεσθαι τó θερμόν (τούτο δ' άναγκαϊόν, είπερ μέλλει ζήν), δεϊ γίνεσθαι τινα του θερμού του έν τή άρχή κατάψυξιν. παράδειγμα δέ τούτου λαβεϊν έστι τó συμβαϊνον έπί τών καταπνιγομένων άνθράκων· άν μέν γάρ ώσι περιπεπωμασμένοι τῷ καλουμένῳ πνιγεϊ συνεχώς, άποσβέννυνται ταχώς· άν δέ παρ' άλληλά τις ποιή πυκνά τήν άφαιρεσιν και τήν έπίθεσιν, μένουσι πεπυρωμένοι πολύν χρόνον. ή δ' έγκρυψις σφζει τó πυρ· ούτε γάρ άποπνεϊν κωλύεται, διά μανότητα τής τέφρας, αντιφράττει τε τῷ περίξ άέρι πρòς τó μη σβεννύναι, τῷ πλήθει τής ένυπαρχούσης αὐτῷ θερμότητος. άλλα περὶ μέν τής αίτίας ταύτης, ότι τó έναντίον συμβαίνει τῷ έγκρυπτομένῳ και καταπνιγομένῳ πυρί (τό μέν γάρ μαραίνεται, τó δέ διαμένει πλείω χρόνον), είρηται έν τοῖς προβλήμασιν.

Έπει δέ πάν ζῶν έχει ψυχήν, αύτη δ' ούκ άνευ φυσικῆς ύπάρχει θερμότητος, ώσπερ είπομεν, τοῖς μέν φυτοῖς ή διά τής τροφῆς και του περιέχοντος ικανή γίνεται βοήθεια πρòς τήν του φυσικοῦ θερμού σωτηρίαν. και γάρ ή τροφή ποιεϊ κατάψυξιν εισιούσα, καθάπερ και τοῖς άνθρώποις τó πρῶτον προσενεγκαμένοις, αί δέ νηστεϊα θερμαίνουσι και δίψας ποιοῦσιν· ακίνητος γάρ ὢν ό άήρ άεί θερμαίνεται, τής δέ τροφῆς εισιούσης καταψύχεται κινούμενος, έως άν λάβη τήν πέψιν. εάν δέ τó περιέχον υπερβάλλη ψυχρότητι διά τήν ώραν, ισχυρῶν γινομένων πάγων, έξαυαίνεται ή του θερμού ισχύς, άν δέ συμβαίη καύματα και μη δύνηται τó σπώμενον εκ τής γῆς ύγρὸν καταψύχειν, φθείρεται μαραινόμενον τó θερμόν, και λέγεται σφακελίζειν και άστρόβλητα γίνεσθαι τὰ δένδρα περὶ τοὺς καιροὺς τούτους. διό και γένη τινα λίθων ταῖς ρίζαις υποβάλλουσι και ύδωρ έν άγγείοις, ὅπως αί ρίζαι ψύχωνται τῶν φυτῶν. τῶν δέ ζῶων έπει τὰ μέν έστιν ένυδρα τὰ δ' έν τῷ άέρι ποιεῖται τήν διάιταν, εκ τούτων και διά τούτων πορίζεται τήν κατάψυξιν, τὰ μέν τῷ ύδατι τὰ δέ τῷ άέρι. τίνα δέ τρόπον και πῶς, λεκτέον έπιστήσασι τὸν λόγον μάλλον.

Ανωνυμου περι Πνευματος (481a) On Breath

[481a] Τίς ἡ τοῦ ἐμφύτου πνεύματος διαμονή, καὶ τίς ἡ αὔξησις; ὁρῶμεν γὰρ ὅτι πλέον καὶ ἰσχυρότερον γίνεται καὶ καθ' ἡλικίας μεταβολὴν καὶ κατὰ διάθεσιν σώματος. ἢ ὡς τᾶλλα μέρη, προσγινομένου τινός; προσγίνεται δὲ τροφή τοῖς ἐμψύχοις, ὥστε ταύτην σκεπτέον ποία τε καὶ πόθεν. δύο δὴ τρόποι δι' ὧν γίνεται, ἢ διὰ τῆς ἀναπνοῆς, ἢ διὰ τῆς κατὰ τὴν τῆς τροφῆς προσφορὰν πέψεως, καθάπερ τοῖς ἄλλοις. τούτων ἴσως οὐχ ἦττον ἂν [οὐχ οὕτω] δόξειεν διὰ τῆς τροφῆς· σῶμα γὰρ ὑπὸ σώματος τρέφεται, τὸ δὲ πνεῦμα σῶμα. τίς οὖν ὁ τρόπος; ἢ δῆλον ὡς ἐκ τῆς φλεβὸς ὀλκῇ τι καὶ πέψει. τὸ γὰρ αἷμα ἢ ἐσχάτη τροφή καὶ ἡ αὐτὴ πᾶσιν. ὥσπερ οὖν καὶ εἰς τὸ ἀγγεῖον αὐτοῦ καὶ εἰς τὸ περιεχόμενον λαμβάνει τροφήν εἰς τὸ θερμόν. ἄγει δ' ὁ ἀήρ τὴν ἐνέργειαν ποιῶν, τὴν τε πεπτικὴν αὐτὸς αὐτῷ προστιθεὶς αὔξει καὶ τρέφει. οὐδὲν δ' ἴσως ἄτοπον αὐτὸ γε τοῦτο, ἀλλὰ γενέσθαι τὸ πρῶτον ἐκ τῆς τροφῆς. καθαρώτερον γὰρ ὁ τῇ ψυχῇ συμφυὲς, εἰ μὴ καὶ τὴν ψυχὴν ὕστερον λέγοι γίνεσθαι, διακρινομένων τῶν σπερμάτων καὶ εἰς φύσιν ἰόντων. εἴτε περίττωμα πάσης τροφῆς ἐστὶ, ποία διαπέμπεται τοῦτο; κατὰ μὲν γὰρ τὴν ἐκπνοὴν οὐκ εὐλογον· ἀντιλαμβάνει γὰρ εὐθύς. λοιπὸν δὲ δῆλον ὅτι διὰ τῶν τῆς ἀρτηρίας πόρων. τὸ δ' ἐκκρινόμενον ἦτοι λεπτότερον ἢ παχύτερον. ἀμφοτέρως δ' ἄτοπον, εἰ τοῦτο πάντων ἔσται καθαρώτατον. εἰ δὲ παχύτερον, ἔσονται τινες πόροι μείζους. εἰ δ' ἄρα κατὰ τοὺς αὐτοὺς λαμβάνει καὶ ἐκπέμπει, τοῦτ' αὐτὸ παράλογον καὶ ἄτοπον. ἢ μὲν οὖν ἐκ τῆς τροφῆς αὔξησις καὶ διαμονὴ σχεδὸν ταῦτα.

Ἡ δ' ἐκ τῆς ἀναπνοῆς, ὥσπερ Ἀριστογένης οἶεται (τροφήν γὰρ οἶεται καὶ τὸ πνεῦμα πεττομένου τοῦ ἀέρος ἐν τῷ πνεύμονι· τοῦτο δ' εἰς τὰ ἀγγεῖα διαδίδοσθαι, τὸ [481b] περίττωμα πάλιν ἐκπέμπεσθαι) πλείους ἔχει τὰς ἀπορίας. ἢ τε γὰρ πέψις ὑπὸ τίνος; εἰκὸς μὲν γὰρ ὑπ' αὐτοῦ, καθάπερ καὶ τῶν ἄλλων. αὐτὸ δὲ τοῦτ' ἄτοπον, εἰ μὴ διαφέρει τοῦ ἔξω ἀέρος· οὕτω δ' ἡ θερμότης ἂν πέττοι. καὶ μὴν καὶ παχύτερον

εἰ δὲ ποιεῖ καὶ οἶον ἀναζωπυρεῖ θερμῷ τὸ θερμόν, γίγνοιτ' ἄν. ἔτι πάντων τῶν ἐχόντων θερμότητα σύμφυτον πῶς ἢ διαμονή, μηδενὸς ἀντικειμένου μηδὲ καταψύχοντος; ὅτι γὰρ πάντα δεῖται καταψύξεως, σχεδὸν φανερόν τῳ <τὸ> αἷμα κατέχειν ἐν τῇ φλεβί τὸ θερμόν οἶον ἀποστέγον· διὸ καὶ ὅταν ἐκρυσθῇ, μεθιέναι τε καὶ θνήσκειν, τῷ τὸ ἥπαρ οὐκ ἔχειν οὐδεμίαν ἀρτηρίαν.

καὶ τούτων τὴν μορφήν οἰκείαν τῇ φύσει, διάφορα δὲ τοῖς πτητικωτέροις καὶ βραδυτέροις. πόδας δὲ τροφῆς χάριν καὶ ἀναστάσεως, πλὴν τῆς νυκτερίδος· διὸ καὶ τὴν τροφήν ἐκ τοῦ ἀέρος. καὶ μὴ δεῖσθαι διαναπαύσεως· οὐ δέονται γὰρ δι' ἄλλων. τὰ δὲ ὀστρακόδερμα τῶν ἐνύδρων ὑπόποδα διὰ τὸ βάρος. καὶ ταῦτα μὲν πρὸς τὴν κατὰ τόπον ἀλλαγὴν· ὅσα δὲ πρὸς τὴν ἄλλην χρεῖαν, ὥσπερ ὑφηγεῖται καὶ ἐκάστου τὰ ἴδια, καὶ εἴ τι μὴ προφανές, οἶον διὰ τί τὰ πολύποδα βραδυτάτα. (καίτοι τὰ τετράποδα θάπτω τῶν διπόδων) πότερον ὅτι ἐπὶ γῆς ὅλα τὰ σώματα ἢ ὅτι φύσει ψυχρὰ καὶ δυσκίνητα ἢ δι' ἄλλην αἰτίαν.

Οἱ ἀναιροῦντες ὡς οὐ τὸ θερμὸν τὸ ἐργαζόμενον ἐν τοῖς σώμασιν, ἢ ὅτι μία τις φορὰ καὶ δύναμις ἡ τμητικὴ τοῦ πυρός, οὐ καλῶς λέγουσιν. οὐδὲ γὰρ ὅλα τοῖς ἀψύχοις ταῦτο ποιεῖ πᾶσιν, ἀλλὰ τὰ μὲν πυκνοῖ, τὰ δὲ μανοῖ, καὶ τήκει, τὰ δὲ πήγνυσιν. ἐν δὲ δὴ τοῖς ἐμψύχοις οὕτως ὑποληπτέον, ὥσπερ φύσεως πῦρ ζητοῦντα, καθάπερ τέχνης· καὶ γὰρ ἐν ταῖς τέχναις ἕτερον τὸ χρυσοχοϊκὸν καὶ τὸ χαλκευτικὸν καὶ τὸ τεκτονικὸν πῦρ ἀποτελεῖ, καὶ τὸ μαγειρικόν. ἴσως δ' ἀληθέστερον ὅτι αἱ τέχναι· χρῶνται γὰρ [485b] ὥσπερ ὀργάνῳ μαλάττουσαι καὶ τήκουσαι καὶ ξηραίνουσαι, ἓνια δὲ καὶ ῥυθμίζουσαι. τὸ αὐτὸ δὴ τοῦτο καὶ αἱ φύσεις· ὅθεν δὴ καὶ <αἱ> πρὸς ἀλλήλα διαφοραί. διὸ γελοῖον πρὸς τὸ ἔξω κρίνειν· εἴτε γὰρ διακρίνον εἴτε λεπτύνον εἶθ' ὅτιδήποτ' ἐστὶ τὸ θερμαίνεσθαι καὶ πυροῦσθαι, διάφορα ἔξει τὰ ἔργα τοῖς χρωμένοις. ἀλλ' αἱ μὲν τέχναι ὡς ὀργάνῳ χρῶνται, ἡ δὲ φύσις ἅμα καὶ ὡς ὕλῃ. οὐ δὴ τοῦτο χαλεπὸν, ἀλλὰ μᾶλλον τὸ τὴν φύσιν αὐτὴν νοῆσαι τὴν χρωμένην, ἣτις ἅμα τοῖς αἰσθητοῖς πάθεσι καὶ τὸν ῥυθμὸν ἀποδώσει. τοῦτο γὰρ οὐκέτι πυρὸς οὐδὲ πνεύματος. τούτοις δὴ καταμεμεῖχθαι τοιαύτην δύναμιν θαυμαστόν. ἔτι δὲ τοῦτο θαυμαστὸν ταῦτόν καὶ περὶ ψυχῆς· ἐν τούτοις γὰρ ὑπάρχει. διόπερ οὐ κακῶς εἰς ταυτόν, ἢ ἀπλῶς ἢ μόνον τι τὸ δημιουργοῦν, καὶ τὸ τὴν κίνησιν ἀεὶ τὴν ὁμοίαν ὑπάρχειν ἐνεργοῦν. καὶ γὰρ ἡ φύσις, ἀφ' ἧς καὶ ἡ γένεσις. ἀλλὰ δὴ τίς ἡ διαφορὰ τοῦ καθ' ἕκαστον θερμοῦ, εἶθ' ὡς ὄργανον εἶθ' ὡς ὕλην εἶθ' ὡς ἄμφω; πυρὸς γὰρ διαφοραὶ κατὰ τὸ μᾶλλον καὶ ἥττον. τοῦτο δὲ σχεδὸν ὥσπερ ἐν μίξει καὶ ἀμιξίᾳ· τὸ γὰρ καθαρώτερον μᾶλλον. ὁ αὐτὸς δὲ λόγος καὶ ἐπὶ τῶν ἄλλων ἀπλῶν. ἀνάγκη γάρ, ἐπεὶπερ ἕτερον ὅστωεν καὶ σὰρξ ἢ ἵππου καὶ ἢ βοός, ἢ τῷ ἐξ ἐτέρων εἶναι ἢ τῇ χρήσει διαφέρειν. εἰ μὲν οὖν ἕτερα, τίνες αἱ διαφοραὶ

ἐκάστου τῶν ἀπλῶν καὶ τίς ταύτας γὰρ ζητοῦμεν. εἰ δὲ ταῦτά, τοῖς λόγοις ἂν διαφέροι. ἀνάγκη γὰρ δυοῖν θάτερον, καθάπερ ἐν τοῖς ἄλλοις· οἶνου μὲν γὰρ καὶ μέλιτος κρᾶσις διὰ τὸ ὑποκείμενον, οἶνου δ' αὐτοῦ, εἴπερ ἑτέρα, διὰ τὸν λόγον. διὸ καὶ Ἐμπεδοκλῆς μίαν ἀπλῶς τὴν τοῦ ὀστοῦ φύσιν εἴπερ ἅπαντα τὸν αὐτὸν λόγον ἔχει τῆς μίξεως, ἀδιάφορα ἔχρῃν ἵππου καὶ λέοντος καὶ ἀνθρώπου εἶναι. νῦν δὲ διαφέρει σκληρότητι, μαλακότητι, πυκνότητι, τοῖς ἄλλοις ὁμοίως καὶ σὰρξ καὶ τὰ ἄλλα μόρια. ἔτι δὲ τὰ ἐν τῷ αὐτῷ ζῷῳ διαφέρουσι πυκνότητι καὶ μανότητι καὶ τοῖς ἄλλοις, ὥστ' οὐχ ἡ αὐτὴ κρᾶσις. παχὺ μὲν γὰρ καὶ λεπτὸν καὶ μέγα καὶ μικρὸν <ἂν> εἴη ἐν τῷ ποσῷ, σκληρὸν δὲ καὶ πυκνὸν καὶ τὰ ἐναντία τούτοις ἐν τῷ ποιῷ τῷ τῆς μίξεως. ἀναγκαῖον δὲ τοῖς οὕτω λέγουσιν εἰδέναι, πῶς τὸ δημιουργοῦν ἕτερον εἴη ἂν καὶ τῷ [486a] τοῦτο πλεον ἢ ἔλαττον εἶναι, καὶ τῷ καθ' αὐτὸ καὶ <τῷ> μεμειγμένῳ ἢ ἐν ἄλλῳ πυροῦσθαι [καθάπερ τὰ ἐννόμενα καὶ ὀπτώμενα. ὅπερ ἴσως ἀληθές]. ἅμα γὰρ ἐγκαταμείγνυται καὶ ποιεῖ τὸ τῆς φύσεως. ἄρα ὁ αὐτὸς καὶ περὶ σαρκὸς [486b] λόγος· καὶ γὰρ αἱ αὐταὶ διαφοραί, σχεδὸν δὲ καὶ περὶ φλεβὸς καὶ ἀρτηρίας καὶ τῶν λοιπῶν. ὥστε δυεῖν θάτερον, ἢ οὐχ εἰς ὁ λόγος τούτων κατὰ τὴν μίξιν, ἢ οὐ σκληρότητι καὶ πυκνότητι καὶ τοῖς ἐναντίοις τοὺς λόγους ληπτέον.

Κεφάλαιο 1

(486a.) Τῶν ἐν τοῖς ζώοις μορίων τὰ μὲν ἐστὶν ἀσύνθετα, ὅσα διαιρεῖται εἰς ὁμοιομερῆ, οἷον σάρκες εἰς σάρκας, τὰ δὲ σύνθετα, ὅσα εἰς ἀνομοιομερῆ, οἷον ἡ χεὶρ οὐκ εἰς χεῖρας διαιρεῖται οὐδὲ τὸ πρόσωπον εἰς πρόσωπα. Τῶν δὲ τοιούτων ἓνα οὐ μόνον μέρη ἀλλὰ καὶ μέλη καλεῖται. Τοιαῦτα δ' ἐστὶν ὅσα τῶν μερῶν ὅλα ὄντα ἕτερα μέρη ἔχει ἐν αὐτοῖς, οἷον κεφαλὴ καὶ σκέλος καὶ χεὶρ καὶ ὄλος ὁ βραχίον καὶ ὁ θώραξ· ταῦτα γὰρ αὐτὰ τ' ἐστὶ μέρη ὅλα, καὶ ἔστιν αὐτῶν ἕτερα μόρια. Πάντα δὲ τὰ ἀνομοιομερῆ σύγκειται ἐκ τῶν ὁμοιομερῶν, οἷον χεὶρ ἐκ σαρκὸς καὶ νεύρων καὶ ὀστέων.

Ἔχει δὲ τῶν ζώων ἓνα μὲν πάντα τὰ μόρια ταῦτ' ἀλλήλοις, ἓνα δ' ἕτερα. Ταῦτα δὲ τὰ μὲν εἶδει τῶν μορίων ἐστίν, οἷον ἀνθρώπου ρίς καὶ ὀφθαλμὸς ἀνθρώπου ρίνι καὶ ὀφθαλμῷ, καὶ σαρκὶ σὰρξ καὶ ὀστέῳ ὀστοῦν· τὸν αὐτὸν δὲ τρόπον καὶ ἵππου καὶ τῶν ἄλλων ζώων, ὅσα τῷ εἶδει ταῦτα λέγομεν ἑαυτοῖς· ὁμοίως γὰρ ὥσπερ τὸ ὅλον ἔχει πρὸς τὸ ὅλον, καὶ τῶν μορίων ἔχει ἕκαστον πρὸς ἕκαστον. Τὰ δὲ ταῦτα μὲν ἐστὶν, διαφέρει δὲ καθ' ὑπεροχὴν καὶ ἔλλειψιν, ὅσων τὸ γένος ἐστὶ ταυτόν. Λέγω δὲ γένος οἷον ὄρνιθα καὶ ἰχθύν· τούτων γὰρ ἑκάτερον ἔχει διαφορὰν κατὰ τὸ γένος, καὶ ἔστιν εἶδη πλείω ἰχθύων καὶ ὀρνίθων. Διαφέρει δὲ σχεδὸν τὰ πλείστα τῶν (486b.) μορίων ἐν αὐτοῖς παρὰ τὰς τῶν παθημάτων ἐναντιώσεις, οἷον Χρώματος καὶ σχήματος, τῷ τὰ μὲν μᾶλλον αὐτὰ πεπονθέναι τὰ δ' ἤττον, ἔτι δὲ πλήθει καὶ ὀλιγότητι καὶ μεγέθει καὶ σμικρότητι καὶ ὅλως ὑπεροχῇ καὶ ἔλλείψει. Τὰ μὲν γὰρ ἐστὶ μαλακόσαρκα αὐτῶν τὰ δὲ σκληρόσαρκα, καὶ τὰ μὲν μακρὸν ἔχει τὸ ρύγχος τὰ δὲ βραχύ, καὶ τὰ μὲν πολύπτερα τὰ δ' ὀλιγόπτερα ἐστὶν. Οὐ μὴν ἄλλ' ἐνία γε καὶ ἐν τούτοις ἕτερα ἐτέροις μόρια ὑπάρχει, οἷον τὰ μὲν ἔχει πληκτρα τὰ δ' οὐ, καὶ τὰ μὲν λόφον ἔχει τὰ δ' οὐκ ἔχει. Ἀλλ' ὥς εἰπεῖν τὰ πλείστα καὶ ἐξ ὧν μερῶν ὁ πᾶς ὄγκος συνέστηκεν, ἢ ταῦτα ἐστὶν ἢ διαφέρει τοῖς τ' ἐναντίοις καὶ καθ' ὑπεροχὴν καὶ ἔλλειψιν· τὸ γὰρ μᾶλλον καὶ ἤττον ὑπεροχὴν ἢ τις καὶ ἔλλειψιν θεῖη. Ἔνια δὲ τῶν ζώων οὔτε εἶδει τὰ μόρια ταῦτα ἔχει οὔτε καθ' ὑπεροχὴν καὶ ἔλλειψιν, ἀλλὰ κατ' ἀναλογίαν, οἷον πέπονθεν ὀστοῦν πρὸς ἄκανθαν καὶ ὄνυξ πρὸς ὀπλὴν καὶ χεὶρ πρὸς χηλὴν καὶ πρὸς πτερόν λεπίς· ὁ γὰρ ἐν ὀρνιθι πτερόν, τοῦτο ἐν τῷ ἰχθύϊ ἐστὶ λεπίς. Κατὰ μὲν οὖν τὰ μόρια αἱ

ἔχουσιν ἕκαστα τῶν ζώων, τοῦτόν τε τὸν τρόπον ἕτερά ἐστι καὶ ταυτά, καὶ ἔτι τῇ θέσει τῶν μερῶν· πολλὰ γὰρ τῶν ζώων ἔχει μὲν ταυτά μέρη, ἀλλὰ κείμενα οὐχ ὡσαύτως, οἷον μαστοὺς τὰ μὲν ἐν τῷ στήθει τὰ (487a.) δὲ πρὸς τοῖς μηροῖς.

Ἔστι δὲ τῶν ὁμοιομερῶν τὰ μὲν μαλακὰ καὶ ὑγρά, τὰ δὲ ξηρὰ καὶ στερεά, ὑγρά μὲν, ἢ ὅλως ἢ ἕως ἂν ἢ ἐν τῇ φύσει, οἷον αἷμα, ἰχώρ, πιμελή, στέαρ, μυελός, γονή, χολή, γάλα ἐν τοῖς ἔχουσι, σάρξ τε καὶ τὰ τούτοις ἀνάλογον, ἔτι ἄλλον τρόπον τὰ περιττώματα, οἷον φλέγμα, καὶ τὰ ὑποστήματα τῆς κοιλίας καὶ κύστεως· ξηρὰ δὲ καὶ στερεὰ οἷον νεῦρον, δέρμα, φλέψ, θρίξ, ὀστοῦν, χόνδρος, ὄνυξ, κέρας (ὁμώνυμον γὰρ τὸ μέρος, ὅταν τῷ σχήματι καὶ τὸ ὅλον λέγεται κέρας), ἔτι ὅσα ἀνάλογον τούτοις.

Αἱ δὲ διαφοραὶ τῶν ζώων εἰσὶ κατὰ τε τοὺς βίους καὶ τὰς πράξεις καὶ τὰ ἦθη καὶ τὰ μόρια, περὶ ὧν τύπῳ μὲν εἴπωμεν πρῶτον, ὕστερον δὲ περὶ ἕκαστον γένος ἐπιστήσαντες ἐροῦμεν. Εἰσὶ δὲ διαφοραὶ κατὰ μὲν τοὺς βίους καὶ τὰ ἦθη καὶ τὰς πράξεις αἱ τοιαίδε, ἢ τὰ μὲν ἔνυδρα αὐτῶν ἐστὶ τὰ δὲ χερσαῖα, ἔνυδρα δὲ διχῶς, τὰ μὲν ὅτι τὸν βίον καὶ τὴν τροφήν ποιεῖται ἐν τῷ ὑγρῷ, καὶ δέχεται τὸ ὑγρὸν καὶ ἀφίησι, τούτου δὲ στερισκόμενα οὐ δύναται ζῆν, οἷον πολλοῖς συμβαίνει τῶν ἰχθύων· τὰ δὲ τὴν μὲν τροφήν ποιεῖται καὶ τὴν διατριβὴν ἐν τῷ ὑγρῷ, οὐ μέντοι δέχεται τὸ ὕδωρ ἀλλὰ τὸν ἀέρα, καὶ γεννᾷ ἔξω. Πολλὰ δ' ἐστὶ τοιαῦτα καὶ περὶ ζῶντων, ὥσπερ ἔνυδρις καὶ λάταξ καὶ κροκόδειλος, καὶ πτηνὰ, οἷον αἴθουα καὶ κολυμβίς, καὶ ἄποδα, οἷον ὕδρος. Ἐνια δὲ τὴν μὲν τροφήν ἐν τῷ ὑγρῷ ποιεῖται καὶ οὐ δύναται ζῆν ἐκτός, οὐ μέντοι δέχεται οὔτε τὸν ἀέρα οὔτε τὸ ὑγρὸν, οἷον ἀκαλήφη καὶ τὰ ὄστρεα. Τῶν δ' ἐνύδρων τὰ μὲν ἐστὶ θαλάττια, τὰ δὲ ποτάμια, τὰ δὲ λιμναῖα, τὰ δὲ τελματιαῖα, οἷον βάτραχος καὶ κορδύλος.

Τῶν δὲ χερσαίων τὰ μὲν δέχεται τὸν ἀέρα καὶ ἀφίησιν, ὃ καλεῖται ἀναπνεῖν καὶ ἐκπνεῖν, οἷον ἄνθρωπος καὶ πάντα ὅσα πλεύμονα ἔχει τῶν χερσαίων· τὰ δὲ τὸν ἀέρα μὲν οὐ δέχεται, ζῆ δὲ καὶ τὴν τροφήν ἔχει ἐν τῇ γῇ, οἷον σφῆξ καὶ μέλιττα καὶ τὰ ἄλλα ἔντομα. Καλῶ δ' ἔντομα ὅσα ἔχει κατὰ τὸ σῶμα ἔντομάς, ἢ ἐν τοῖς ὑπτίοις ἢ ἐν τούτοις τε καὶ τοῖς πρανεῖσιν. Καὶ τῶν μὲν χερσαίων (487b.) πολλὰ, ὥσπερ εἴρηται, ἐκ τοῦ ὑγροῦ τὴν τροφήν πορίζεται τῶν δ' ἐνύδρων καὶ δεχομένων τὴν θάλατταν οὐδὲν ἐκ τῆς γῆς. Ἐνια δὲ τῶν ζώων τὸ μὲν πρῶτον ζῆ ἐν τῷ ὑγρῷ, ἔπειτα μεταβάλλει εἰς ἄλλην μορφήν καὶ

ζῆ ἔξω, οἷον ἐπὶ τῶν ἐν τοῖς ποταμοῖς ἀσκαρίδων· γίνεται γὰρ ἐξ αὐτῶν ὁ οἶστρος.

Ἔτι τὰ μὲν ἐστὶ μόνιμα τῶν ζώων, τὰ δὲ μεταβλητικά. Ἔστι δὲ τὰ μόνιμα ἐν τῷ ὑγρῷ· τῶν δὲ χερσαίων οὐδὲν μόνιμον. Ἐν δὲ τῷ ὑγρῷ πολλὰ τῷ προσπεφυκέναι ζῆ, οἷον γένη ὀστρέων πολλά. Δοκεῖ δὲ καὶ ὁ σπόγγος ἔχειν τινὰ αἴσθησιν· σημεῖον δ' ὅτι χαλεπώτερον ἀποσπᾶται, ἂν μὴ γένηται λαθραίως ἢ κίνησις, ὥς φασιν. Τὰ δὲ καὶ προσφύεται καὶ ἀπολύεται, οἷόν ἐστι γένος τι τῆς καλουμένης ἀκαλήφης· τούτων γὰρ τινες νύκτωρ ἀπολυόμεναι νέμονται.

Πολλὰ δ' ἀπολελυμένα μὲν ἐστὶν ἀκίνητα δέ, οἷον ὄστρεα καὶ τὰ καλούμενα ὀλοθούρια. Τὰ δὲ νευστικά, οἷον ἰχθύες καὶ τὰ μαλάκια καὶ τὰ μαλακόστρακα, οἷον κάραβοι. Τὰ δὲ πορευτικά, οἷον τὸ τῶν καρκίνων γένος· τοῦτο γὰρ ἐνυδρον ὃν τὴν φύσιν πορευτικόν ἐστιν.

Τῶν δὲ χερσαίων ἐστὶ τὰ μὲν πτηνά, ὥσπερ ὄρνιθες καὶ μέλιττα, καὶ ταῦτ' ἄλλον τρόπον ἀλλήλων, τὰ δὲ πεζά. Καὶ τῶν πεζῶν τὰ μὲν πορευτικά, τὰ δ' ἐρπυστικά, τὰ δ' ἰλυσπαστικά. Πτηνὸν δὲ μόνον οὐδὲν ἐστὶν, ὥσπερ νευστικὸν μόνον ἰχθύς· καὶ γὰρ τὰ δερμόπτερα πεζεύει, καὶ νυκτερίδι πόδες εἰσὶ, καὶ τῇ φώκῃ κεκολωβωμένοι πόδες. Καὶ τῶν ὀρνίθων εἰσὶ τινες κακόποδες, οἱ διὰ τοῦτο καλοῦνται ἄποδες· ἔστι δ' εὐπτερον τοῦτο τὸ ὀρνίθιον. Σχεδὸν δὲ καὶ τὰ ὅμοια αὐτῷ εὐπτερα μὲν κακόποδα δ' ἐστίν, οἷον χελιδὼν καὶ δρεπανίς· ὁμοιότροπά τε γὰρ καὶ ὁμοιόπτερα πάντα ταῦτα, καὶ τὰς ὀψεις ἐγγὺς ἀλλήλων. Φαίνεται δ' ὁ μὲν ἄπους πᾶσαν ὥραν, ἡ δὲ δρεπανίς ὅταν ὕσῃ τοῦ θέρους· τότε γὰρ ὀρᾶται καὶ ἀλίσκεται, ὅλως δὲ καὶ σπάνιόν ἐστι τοῦτο τὸ ὄρνεον. Πορευτικά δὲ καὶ νευστικά πολλὰ τῶν ζώων ἐστίν.

Εἰσὶ δὲ καὶ αἱ τοιαίδε διαφοραὶ κατὰ τοὺς βίους καὶ τὰς πράξεις. Τὰ μὲν γὰρ αὐτῶν ἐστὶν ἀγελαῖα τὰ δὲ (488a.) μοναδικά, καὶ πεζὰ καὶ πτηνὰ καὶ πλωτά, τὰ δ' ἐπαμφοτερίζει. Καὶ τῶν ἀγελαίων καὶ τῶν μοναδικῶν τὰ μὲν πολιτικά τὰ δὲ σποραδικά ἐστὶν. Ἀγελαῖα μὲν οὖν οἷον ἐν τοῖς πτηνοῖς τὸ τῶν περιστερῶν γένος καὶ γέρανος καὶ κύκνος (γαμψώνυχον δ' οὐδὲν ἀγελαῖον), καὶ τῶν πλωτῶν πολλὰ γένη τῶν ἰχθύων, οἷον οὓς καλοῦσι δρομάδας, θύννοι, πηλαμύδες, ἀμίαι· ὁ δ' ἄνθρωπος ἐπαμφοτερίζει. Πολιτικά δ' ἐστὶν ὧν ἐν τι καὶ κοινὸν γίνεται πάντων τὸ ἔργον· ὅπερ οὐ πάντα ποιεῖ τὰ ἀγελαῖα. Ἔστι δὲ τοιοῦτον ἄνθρωπος, μέλιττα, σφήξ, μύρμηξ, γέρανος. Καὶ τούτων τὰ μὲν ὑφ' ἡγεμόνα ἐστὶ τὰ δ' ἄναρχα, οἷον γέρανος μὲν καὶ

τὸ τῶν μελιττῶν γένος ὕφ' ἡγεμόνα, μύρμηκες δὲ καὶ μυρία ἄλλα ἄναρχα. Καὶ τὰ μὲν ἐπιδημητικὰ καὶ τῶν ἀγελαίων καὶ τῶν μοναδικῶν, τὰ δ' ἐκτοπιστικά.

Καὶ τὰ μὲν σαρκοφάγα, τὰ δὲ καρποφάγα, τὰ δὲ παμφάγα, τὰ δ' ἰδιότροφα, οἷον τὸ τῶν μελιττῶν γένος καὶ τὸ τῶν ἀραχνῶν· τὸ μὲν γὰρ μέλιτι καὶ τισιν ἄλλοις ὀλίγοις τῶν γλυκέων χρῆται τροφῇ, οἱ δ' ἀράχνη ἀπὸ τῆς τῶν μυιῶν θήρας ζῶσιν, τὰ δ' ἰχθύσι χρῶνται τροφῇ. Καὶ τὰ μὲν θηρευτικά, τὰ δὲ θησαυριστικά τῆς τροφῆς ἐστὶ, τὰ δ' οὐ. Καὶ τὰ μὲν οἰκητικά τὰ δ' ἄοικα, οἰκητικά μὲν οἷον ἀσπάλαξ, μῦς, μύρμηξ, μέλιττα, ἄοικα δὲ πολλὰ τῶν ἐντόμων καὶ τῶν τετραπόδων. Ἔτι τοῖς τόποις τὰ μὲν τρωγλοδυτικά, οἷον σαύρα, ὄφις, τὰ δ' ὑπέργεια, οἷον ἵππος, κύων. Καὶ τὰ μὲν τρηματώδη τὰ δ' ἄτρητα. Καὶ τὰ μὲν νυκτερόβια, οἷον γλαύξ, νυκτερίς, τὰ δ' ἐν τῷ φωτὶ ζῇ.

Ἔτι δ' ἡμερα καὶ ἄγρια, καὶ τὰ μὲν αἰεῖ, οἷον ὄνος καὶ ὄρεὺς αἰεὶ ἡμερα, τὰ δ' ἄγρια, ὥσπερ ἀρδάλις καὶ λύκος· τὰ δὲ καὶ ἡμεροῦσθαι δύναται ταχύ, οἷον ἐλέφας. Ἔτι ἄλλον τρόπον· πάντα γὰρ ὅσα ἡμερὰ ἐστὶ γένη, καὶ ἄγριά ἐστὶν, οἷον ἵπποι, βόες, ὕες, ἄνθρωποι, πρόβατα, αἶγες, κύνες.

Καὶ τὰ μὲν ψοφητικά, τὰ δ' ἄφωνα, τὰ δὲ φωνήεντα, καὶ τούτων τὰ μὲν διάλεκτον ἔχει τὰ δ' ἀγράμματα, καὶ τὰ μὲν κωτίλα τὰ δὲ σιγηλά, τὰ δ' ὠδικὰ τὰ δ' ἄνωδα· πάντων (488b.) δὲ κοινὸν τὸ περὶ τὰς ὀχείας μάλιστα ἄδειν καὶ λαλεῖν.

Καὶ τὰ μὲν ἄγροικα, ὥσπερ φάττα, τὰ δ' ὄρεια, ὥσπερ ἔποψ, τὰ δὲ συνανθρωπίζει, οἷον περιστέρα.

Καὶ τὰ μὲν ἀφροδισιαστικά, οἷον τὸ τῶν περδίκων καὶ ἀλεκτρούνων γένος, τὰ δ' ἀγνευτικά, οἷον τὸ τῶν κορακοειδῶν ὀρνίθων γένος· ταῦτα γὰρ σπανίως ποιεῖται τὴν ὀχείαν.

Καὶ τῶν θαλαττίων τὰ μὲν πελάγια, τὰ δ' αἰγιαλώδη, τὰ δὲ πετραῖα.

Ἔτι τὰ μὲν ἀμυντικά τὰ δὲ φυλακτικά· ἐστὶ δ' ἀμυντικά μὲν ὅσα ἢ ἐπιτίθεται ἢ ἀδικούμενα ἀμύνεται, φυλακτικά δ' ὅσα πρὸς τὸ μὴ παθεῖν τι ἔχει ἐν αὐτοῖς ἀλεωρὴν.

Διαφέρουσι δὲ καὶ ταῖς τοιαῖσδε διαφοραῖς κατὰ τὸ ἦθος.

Τὰ μὲν γάρ ἐστι πρᾶα καὶ δύσθυμα καὶ οὐκ ἐνστατικά, οἷον βοῦς, τὰ δὲ θυμώδη καὶ ἐνστατικά καὶ ἀμαθῇ, οἷον ὕς ἄγριος, τὰ δὲ φρόνιμα καὶ δειλά, οἷον ἔλαφος, δασύπους, τὰ δ' ἀνελεύθερα καὶ

ἐπίβουλα, οἷον οἱ ὄφεις, τὰ δ' ἐλευθέρια καὶ ἀνδρεῖα καὶ εὐγενῆ, οἷον λέων, τὰ δὲ γενναῖα καὶ ἄγρια καὶ ἐπίβουλα, οἷον λύκος· εὐγενὲς μὲν γάρ ἐστι τὸ ἐξ ἀγαθοῦ γένους, γενναῖον δὲ τὸ μὴ ἐξιστάμενον ἐκ τῆς αὐτοῦ φύσεως. Καὶ τὰ μὲν πανοῦργα καὶ κακοῦργα, οἷον ἀλώπηξ, τὰ δὲ θυμικὰ καὶ φιλητικὰ καὶ θωπευτικά, οἷον κύων, τὰ δὲ πρᾶα καὶ τιθασσευτικά, οἷον ἐλέφας, τὰ δ' αἰσχυνητὰ καὶ φυλακτικά, οἷον χήν, τὰ δὲ φθονερά καὶ φιλόκαλα, οἷον ταῶς. Βουλευτικὸν δὲ μόνον ἄνθρωπός ἐστι τῶν ζώων. Καὶ μνήμης μὲν καὶ διδαχῆς πολλὰ κοινωνεῖ, ἀναμνήσκεσθαι δ' οὐδὲν ἄλλο δύναται πλὴν ἄνθρωπος.

Περὶ ἕκαστον δὲ τῶν γενῶν τά τε περὶ τὰ ἥθη καὶ τοὺς βίους ὕστερον λεχθήσεται δι' ἀκριβείας μᾶλλον.

Κεφάλαιο 2

Πάντων δ' ἐστὶ τῶν ζώων κοινὰ μόρια, ἧ δέχεται τὴν τροφήν καὶ εἰς ὃ δέχεται· ταῦτα δ' ἐστὶ ταῦτά καὶ ἕτερα κατὰ τοὺς εἰρημένους τρόπους, ἢ κατ' εἶδος ἢ καθ' ὑπεροχὴν ἢ κατ' ἀναλογίαν ἢ τῇ θέσει διαφέροντα. Μετὰ δὲ ταῦτα ἄλλα κοινὰ μόρια ἔχει τὰ πλεῖστα τῶν ζώων πρὸς τούτοις, ἧ ἀφίησι τὸ περιττώμα τῆς τροφῆς [καὶ ἧ λαμβάνει]· οὐ (489a.) γὰρ πᾶσιν ὑπάρχει τοῦτο. Καλεῖται δ' ἧ μὲν λαμβάνει, στόμα, εἰς ὃ δὲ δέχεται, κοιλία· τὸ δὲ λοιπὸν πολυώνυμόν ἐστιν. Τοῦ δὲ περιττώματος ὄντος διττοῦ, ὅσα μὲν ἔχει δεκτικὰ μόρια τοῦ ὑγροῦ περιττώματος, ἔχει καὶ τῆς ξηρᾶς τροφῆς, ὅσα δὲ ταύτης, ἐκείνης οὐ πάντα. Διὸ ὅσα μὲν κύστιν ἔχει, καὶ κοιλίαν ἔχει, ὅσα δὲ κοιλίαν ἔχει, οὐ πάντα κύστιν ἔχει.

Ὀνομάζεται γὰρ τὸ μὲν τῆς ὑγρᾶς περιττώσεως δεκτικὸν μόριον κύστις, κοιλία δὲ τὸ τῆς ξηρᾶς.

Κεφάλαιο 3

Τῶν δὲ λοιπῶν πολλοῖς ὑπάρχει ταῦτά τε τὰ μόρια καὶ ἔτι ἢ τὸ σπέρμα ἀφιαῖσιν· καὶ τούτων ἐν οἷς μὲν ὑπάρχει γενεσις ζώων τὸ μὲν εἰς αὐτὸ ἀφιέν, τὸ δ' εἰς ἕτερον. Καλεῖται δὲ τὸ μὲν εἰς αὐτὸ ἀφιέν θῆλυ, τὸ δ' εἰς τοῦτο ἄρρεν. Ἐν ἐνίοις δ' οὐκ ἔστι τὸ ἄρρεν καὶ θῆλυ· ἢ καὶ τῶν μορίων τῶν πρὸς τὴν δημιουργίαν ταύτην διαφέρει τὸ εἶδος· τὰ μὲν γὰρ ἔχει ὑστέραν, τὰ δὲ τὸ ἀνάλογον. Ὅσα μὲν οὖν ἀναγκαιότατα μόρια τοῖς ζώοις τὰ μὲν πᾶσιν ἔχειν συμβέβηκε, τὰ δὲ τοῖς πλείστοις, ταῦτ' ἐστίν.

Πᾶσι δὲ τοῖς ζώοις αἴσθησις μία ὑπάρχει κοινὴ μόνη ἢ ἀφή, ὥστε καὶ ἐν ᾧ αὕτη μορίῳ γίνεσθαι πέφυκεν, ἀνώνυμόν ἐστιν· τοῖς μὲν γὰρ ταὐτὸ τοῖς δὲ τὸ ἀνάλογόν ἐστιν.

Κεφάλαιο 4

Ἔχει δὲ καὶ ὑγρότητα πᾶν ζῷον, ἥς στερισκόμενον ἢ φύσει ἢ βίᾳ φθείρεται. Ἐτι ἐν ᾧ γίνεται, τοῦτο ἄλλο. Ἔστι δὲ τοῦτο τοῖς μὲν αἷμα καὶ φλέψ, τοῖς δὲ τὸ ἀνάλογον τούτων· ἔστι δ' ἀτελὴ ταῦτα, οἷον τὸ μὲν ἰς τὸ δ' ἰχώρ. Ἡ μὲν οὖν ἀφή ἐν ὁμοιομερεῖ ἐγγίνεται μέρει, οἷον ἐν σαρκὶ ἢ τοιούτῳ τινί, καὶ ὅλως ἐν τοῖς αἱματικοῖς, ὅσα ἔχει αἷμα· τοῖς δ' ἐν τῷ ἀνάλογον, πᾶσι δ' ἐν τοῖς ὁμοιομερέσιν. Αἱ δὲ ποιητικαὶ δυνάμεις ἐν τοῖς ἀνομοιομερέσιν, οἷον ἡ τῆς τροφῆς ἐργασία ἐν στόματι καὶ ἡ τῆς κινήσεως τῆς κατὰ τόπον ἐν ποσὶν ἢ πτέρυξιν ἢ τοῖς ἀνάλογον.

Πρὸς δὲ τούτοις τὰ μὲν ἔναιμα τυγχάνει ὄντα, οἷον ἄνθρωπος καὶ ἵππος καὶ πάνθ' ὅσα ἢ ἄποδά ἐστι τέλεα ὄντα ἢ δίποδα ἢ τετράποδα, τὰ δ' ἄναιμα, οἷον μέλιττα καὶ σφήξ καὶ τῶν θαλαττίων σηπία καὶ κάραβος καὶ πάνθ' ὅσα πλείους πόδας ἔχει τεττάρων.

Κεφάλαιο 5

Καὶ τὰ μὲν ζωοτόκα τὰ δ' ὠτόκα τὰ δὲ σκωληκοτόκα, ζωοτόκα μὲν οἶον ἄνθρωπος καὶ ἵππος (489b.) καὶ φώκη καὶ τὰ ἄλλα ὅσα ἔχει τρίχας, καὶ τῶν ἐνύδρων τὰ κητώδη, οἶον δελφίς, καὶ τὰ καλούμενα σελάχη. Τούτων δὲ τὰ μὲν αὐλὸν ἔχει, βράγχια δ' οὐκ ἔχει, οἶον δελφίς καὶ φάλαινα (ἔχει δ' ὁ μὲν δελφίς τὸν αὐλὸν διὰ τοῦ νώτου, ἡ δὲ φάλαινα ἐν τῷ μετώπῳ), τὰ δ' ἀκάλυπτα βράγχια, οἶον τὰ σελάχη, γαλεοὶ τε καὶ βάτοι.

Καλεῖται δ' ὥν μὲν τῶν κυημάτων τῶν τελείων, ἐξ οὗ γίνεται τὸ γινόμενον ζῷον, ἐκ μορίου τὴν ἀρχήν, τὸ δ' ἄλλο τροφή τῷ γινομένῳ ἐστίν· σκώληξ δ' ἐστὶν ἐξ οὗ ὅλου ὅλον γίνεται τὸ ζῷον, διαρθρουμένου καὶ αὐξανομένου τοῦ κυήματος. Τὰ μὲν οὖν ἐν αὐτοῖς ὠτοκεῖ τῶν ζωοτόκων, οἶον τὰ σελάχη, τὰ δὲ ζωοτοκεῖ ἐν αὐτοῖς, οἶον ἄνθρωπος καὶ ἵππος· εἰς δὲ τὸ φανερόν τῶν μὲν τελεωθέντος τοῦ κυήματος ζῷον ἐξέρχεται, τῶν δ' ὥν, τῶν δὲ σκώληξ.

Τῶν δ' ὥν τὰ μὲν ὀστρακόδερμά ἐστι καὶ δίχροα, οἶον τὰ τῶν ὀρνίθων, τὰ δὲ μαλακόδερμα καὶ μονόχροα, οἶον τὰ τῶν σελαχῶν. Καὶ τῶν σκωλήκων οἱ μὲν εὐθύς κινητικοὶ οἱ δ' ἀκίνητοι. Ἀλλὰ περὶ μὲν τούτων ἐν τοῖς περὶ γενέσεως δι' ἀκριβείας ὕστερον λεκτέον.

Ἔτι δὲ τῶν ζῴων τὰ μὲν ἔχει πόδας τὰ δ' ἄποδα, καὶ τῶν ἐχόντων τὰ μὲν δύο πόδας ἔχει, οἶον ἄνθρωπος καὶ ὄρνις μόνα, τὰ δὲ τέτταρας, οἶον σαύρα καὶ κύων, τὰ δὲ πλείους, οἶον σκολόπενδρα καὶ μέλιττα· πάντα δ' ἀρτίους ἔχει πόδας.

Τῶν δὲ νευστικῶν ὅσα ἄποδα, τὰ μὲν πτερύγια ἔχει, ὥσπερ ἰχθύς, καὶ τούτων οἱ μὲν τέτταρα πτερύγια, δύο μὲν ἄνω ἐν τοῖς πρᾶνεσι, δύο δὲ κάτω ἐν τοῖς ὑπτίοις, οἶον χρύσοφρυς καὶ λάβραξ, τὰ δὲ δύο μόνον, ὅσα προμήκη καὶ λεῖα, οἶον ἔγχελος καὶ γόγγρος· τὰ δ' ὅλως οὐκ ἔχει, οἶον σμύραινα καὶ ὅσα ἄλλα χρῆται τῇ θαλάττῃ ὥσπερ οἱ ὄφεις τῇ γῇ, καὶ ἐν τῷ ὕγρῳ ὁμοίως νέουσιν. Τῶν δὲ σελαχῶν ἔνια μὲν οὐκ ἔχει πτερύγια, οἶον τὰ πλατέα καὶ κερκοφόρα, ὥσπερ βάτος καὶ τρυγών, ἀλλ' αὐτοῖς νεῖ τοῖς πλάτεσιν· βάτραχος δ' ἔχει, καὶ ὅσα τὸ πλάτος μὴ ἔχει ἀπολελεπτυσμένον. Ὅσα δὲ δοκεῖ πόδας ἔχειν, καθάπερ καὶ τὰ μαλάκια, τούτοις νεῖ καὶ τοῖς πτερυγίοις, καὶ θᾶπτον ἐπὶ κύτος, οἶον σηπία καὶ τευθίς καὶ (490a.) πολύπους· βαδίζει δὲ

τούτων οὐδέτερον, ὥσπερ πολύπους.

Τὰ δὲ σκληρόδερμα, οἷον κάραβος, τοῖς οὐραίοις νεῖ, τάχιστα δ' ἐπὶ τὴν κέρκον τοῖς ἐν ἐκείνῃ πτερυγίοις· καὶ ὁ κορδύλος τοῖς ποσὶ καὶ τῷ οὐραίῳ· ἔχει δ' ὅμοιον γλάνει τὸ οὐραῖον, ὥς μικρὸν εἰκάσαι μεγάλῳ. Τῶν δὲ πτηνῶν τὰ μὲν πτερωτά ἐστίν, οἷον ἀετὸς καὶ ἰέραξ, τὰ δὲ πτιλωτά, οἷον μέλιττα καὶ μηλολόνη, τὰ δὲ δερμόπτερα, οἷον ἀλώπηξ καὶ νυκτερίς. Πτερωτά μὲν οὖν ἐστίν ὅσα ἔναιμα, καὶ δερμόπτερα ὡσαύτως· πτιλωτά δ' ὅσα ἄναιμα, οἷον τὰ ἔντομα.

Ἔστι δὲ τὰ μὲν πτερωτά καὶ δερμόπτερα δίποδα πάντα ἢ ἄποδα· λέγονται γὰρ εἶναι τινες ὄφεις τοιοῦτοι περὶ Αἰθιοπίαν.

Τὸ μὲν οὖν πτερωτὸν γένος τῶν ζῴων ὄρνις καλεῖται, τὰ δὲ λοιπὰ δύο ἀνώνυμα ἐνὶ ὀνόματι.

Τῶν δὲ πτηνῶν μὲν ἀναίμων δὲ τὰ μὲν κολεόπτερά ἐστίν (ἔχει γὰρ ἐν ἐλύτρῳ τὰ πτερά, οἷον αἱ μηλολόνη καὶ οἱ κάνθαροι), τὰ δ' ἀνέλυτρα, καὶ τούτων τὰ μὲν δίπτερα τὰ δὲ τετράπτερα, τετράπτερα μὲν ὅσα μέγεθος ἔχει ἢ ὅσα ὀπισθόκεντρά ἐστι, δίπτερα δ' ὅσα ἢ μέγεθος μὴ ἔχει ἢ ἐμπροσθόκεντρά ἐστίν.

Τῶν δὲ κολεοπτέρων οὐδὲν ἔχει κέντρον. Τὰ δὲ δίπτερα ἐμπροσθεν ἔχει τὰ κέντρα, οἷον μυῖα καὶ μύωψ καὶ οἷστρος καὶ ἐμπίς. Πάντα δὲ τὰ ἄναιμα ἐλάττω τὰ μεγέθη ἐστὶ τῶν ἐναίμων ζῴων· πλὴν ὀλίγα ἐν τῇ θαλάττῃ μείζονα ἄναιμά ἐστίν, οἷον τῶν μαλακίων ἔνια. Μέγιστα δὲ γίνεται ταῦτα τὰ γένη αὐτῶν ἐν τοῖς ἀλεινοτάτοις, καὶ ἐν τῇ θαλάττῃ μᾶλλον ἢ ἐν τῇ γῇ καὶ ἐν τοῖς γλυκέσιν ὕδασιν.

Κινεῖται δὲ τὰ κινούμενα πάντα τέτταρσι σημείοις ἢ πλείοσι, τὰ μὲν ἔναιμα τέτταρσι μόνον, οἷον ἄνθρωπος μὲν χερσὶ δυσὶ καὶ ποσὶ δυσὶν, ὄρνις δὲ πτέρυξι δυσὶ καὶ ποσὶ δυσὶ, τὰ δὲ τετράποδα καὶ ἰχθύες τὰ μὲν τέτταρσι ποσὶν, οἱ δὲ τέτταρσι πτερυγίοις. Ὅσα δὲ δύο ἔχει πτερύγια ἢ ὅλως μὴ, οἷον ὄφεις, τέτταρσι σημείοις οὐδὲν ἤττον· αἱ γὰρ καμπαὶ τέτταρες, ἢ δύο σὺν τοῖς πτερυγίοις. Ὅσα δ' ἄναιμα ὄντα πλείους πόδας ἔχει, εἴτε πτηνὰ εἴτε πεζά, σημείοις κινεῖται πλείοσιν, οἷον τὸ καλούμενον ζῶον ἐφήμερον τέτταρσι καὶ (490b.) ποσὶ καὶ πτεροῖς· τούτῳ γὰρ οὐ μόνον κατὰ τὸν βίον συμβαίνει τὸ ἴδιον, ὅθεν καὶ τὴν ἐπωνυμίαν ἔχει, ἀλλ' ὅτι καὶ πτηνὸν ἐστὶ τετράπουον ὄν.

Πάντα δὲ κινεῖται ὁμοίως, τὰ τετράποδα καὶ πολύποδα· κατὰ διάμετρον γὰρ κινεῖται. Τὰ μὲν οὖν ἄλλα ζῶα δύο τοὺς ἡγεμόνας ἔχει πόδας, ὁ δὲ καρκίνος μόνος τῶν ζῴων τέτταρας.

Κεφάλαιο 6

Γένη δὲ μέγιστα τῶν ζώων, εἰς ἃ διήρηται τᾶλλα ζῶα, τάδ' ἐστίν, ἔν μὲν ὀρνίθων, ἔν δ' ἰχθύων, ἄλλο δὲ κῆτος. Ταῦτα μὲν οὖν πάντα ἔναιμά ἐστιν. Ἄλλο δὲ γένος ἐστὶ τὸ τῶν ὀστρακοδέρμων, ὃ καλεῖται ὄστρεον· ἄλλο τὸ τῶν μαλακοστράκων, ἀνώνυμον ἐνὶ ὀνόματι, οἷον κάραβοι καὶ γένη τινὰ καρκίνων καὶ ἀστακῶν· ἄλλο τὸ τῶν μαλακίων, οἷον τευθίδες τε καὶ τεῦθοι καὶ σηπίαι· ἕτερον τὸ τῶν ἐντόμων. Ταῦτα δὲ πάντα μὲν ἐστὶν ἄναιμα, ὅσα δὲ πόδας ἔχει, πολυπόδα· τῶν δ' ἐντόμων ἔνια καὶ πτηνά ἐστίν.

Τῶν δὲ λοιπῶν ζώων οὐκέτι τὰ γένη μεγάλα· οὐ γὰρ περιέχει πολλά εἶδη ἓν εἶδος, ἀλλὰ τὸ μὲν ἐστὶν ἀπλοῦν αὐτὸ οὐκ ἔχον διαφορὰν τὸ εἶδος, οἷον ἄνθρωπος, τὰ δ' ἔχει μὲν, ἀλλ' ἀνώνυμα τὰ εἶδη. Ἔστι γὰρ τὰ τετράποδα καὶ μὴ πτερωτὰ ἔναιμα μὲν πάντα, ἀλλὰ τὰ μὲν ζωοτόκα τὰ δ' ὠοτόκα αὐτῶν. Ὅσα μὲν οὖν ζωοτόκα, οὐ πάντα τρίχας ἔχει, ὅσα δ' ὠοτόκα, φολίδας· ἔστι δ' ἢ φολίς ὁμοιον χώρα λεπίδος. Ἄπουν δὲ φύσει ἐστὶν ἔναιμον πεζὸν τὸ τῶν ὄφεων γένος· ἔστι δὲ τοῦτο φολιδωτόν. Ἄλλ' οἱ μὲν ἄλλοι ὠοτοκοῦσιν ὄφεις, ἢ δ' ἔχιδνα μόνον ζωοτοκεῖ. Τὰ μὲν γὰρ ζωοτοκοῦντα οὐ πάντα τρίχας ἔχει· καὶ γὰρ τῶν ἰχθύων τινὲς ζωοτοκοῦσιν· ὅσα μέντοι ἔχει τρίχας, ἅπαντα ζωοτοκεῖ.

Τριχῶν γὰρ τι εἶδος θετέον καὶ τὰς ἀκανθώδεις τρίχας, οἷας οἱ χερσαῖοι ἔχουσιν ἐχῖνοι καὶ οἱ ὕστριχες· τριχὸς γὰρ χρεῖαν παρέχουσιν, ἀλλ' οὐ ποδῶν, ὥσπερ αἱ τῶν θαλαττίων.

Τοῦ δὲ γένους τοῦ τῶν τετραπόδων ζώων καὶ ζωοτόκων εἶδη μὲν ἐστὶ πολλά, ἀνώνυμα δέ· ἀλλὰ καθ' ἕκαστον αὐτῶν ὡς εἰπεῖν, ὥσπερ ἄνθρωπος εἴρηται, λέων, ἔλαφος, ἵππος, κύων καὶ τᾶλλα τοῦτον τὸν τρόπον, ἐπεὶ ἐστὶν ἓν τι γένος μόνον (491a.) ἐπὶ τοῖς λοφούροις καλουμένοις, οἷον ἵππῳ καὶ ὄνῳ καὶ ὀρεῖ καὶ γίνῳ [καὶ ἱνῳ] καὶ ταῖς ἐν Συρίᾳ καλουμέναις ἡμίονοις, αἱ καλοῦνται ἡμίονοι δι' ὁμοιότητα, οὐκ οὕσαι ἀπλῶς τὸ αὐτὸ εἶδος· καὶ γὰρ ὀχεύονται καὶ γεννῶνται ἐξ ἀλλήλων. Διὸ καὶ χωρὶς λαμβάνοντας ἀνάγκη θεωρεῖν ἐκάστου τὴν φύσιν αὐτῶν.

Ταῦτα μὲν οὖν τοῦτον τὸν τρόπον εἴρηται νῦν ὡς ἐν τύπῳ, γεύματος χάριν περὶ ὅσων καὶ ὅσα θεωρητέον· δι' ἀκριβείας δ' ὕστερον ἐροῦμεν, ἵνα πρῶτον τὰς ὑπαρχούσας διαφορὰς καὶ τὰ

συρβεβηκότα πᾶσι λαμβάνωμεν. Μετὰ δὲ τοῦτο τὰς αἰτίας τούτων πειρατέον εὐρεῖν. Οὕτω γὰρ κατὰ φύσιν ἐστὶ ποιεῖσθαι τὴν μέθοδον, ὑπαρχούσης τῆς ἱστορίας τῆς περὶ ἕκαστον· περὶ ὧν τε γὰρ καὶ ἐξ ὧν εἶναι δεῖ τὴν ἀπόδειξιν, ἐκ τούτων γίνεται φανερόν.

Ληπτέον δὲ πρῶτον τὰ μέρη τῶν ζώων ἐξ ὧν συνέστηκεν. Κατὰ γὰρ ταῦτα μάλιστα καὶ πρῶτα διαφέρει καὶ τὰ ὅλα, ἢ τῷ τὰ μὲν ἔχειν τὰ δὲ μὴ ἔχειν, ἢ τῇ θέσει καὶ τῇ τάξει, ἢ καὶ κατὰ τὰς εἰρημένους πρότερον διαφοράς, εἶδει καὶ ὑπεροχῇ καὶ ἀναλογίᾳ καὶ τῶν παθημάτων ἐναντιότητι. Πρῶτον δὲ τὰ τοῦ ἀνθρώπου μέρη ληπτέον· ὥσπερ γὰρ τὰ νομίσματα πρὸς τὸ αὐτοῖς ἕκαστοι γνωριμώτατον δοκιμάζουσιν, οὕτω δὴ καὶ ἐν τοῖς ἄλλοις· ὁ δ' ἄνθρωπος τῶν ζώων γνωριμώτατον ἡμῖν ἐξ ἀνάγκης ἐστίν. Τῇ μὲν οὖν αἰσθήσει οὐκ ἄδηλα τὰ μόρια· ὅμως δ' ἔνεκεν τοῦ μὴ παραλιπεῖν τε τὸ ἐφεξῆς καὶ τοῦ λόγον ἔχειν μετὰ τῆς αἰσθήσεως, λεκτέον τὰ μέρη πρῶτον μὲν τὰ ὀργανικά, εἶτα τὰ ὁμοιομερῆ.

Κεφάλαιο 7

Μέγιστα μὲν οὖν ἐστὶ τάδε τῶν μερῶν εἰς ἃ διαιρεῖται τὸ σῶμα τὸ σύνολον, κεφαλὴ, αὐχὴν, θώραξ, βραχίονες δύο, σκέλη δύο (τὸ ἀπ' αὐχένος μέχρι αἰδοίων κύτος, ὃ καλεῖται θώραξ). Κεφαλῆς μὲν οὖν μέρη τὸ μὲν τριχωτὸν κρανίον καλεῖται. Τούτου δὲ μέρη τὸ μὲν πρόσθιον βρέγμα, ὑστερογενές (τελευταῖον γὰρ τῶν ἐν τῷ σώματι πηγνυται ὀστέων), τὸ δ' ὀπίσθιον ἰνίον, μέσον δ' ἰνίου καὶ βρέγματος κορυφή. Ὑπὸ μὲν οὖν τὸ βρέγμα ὁ ἐγκέφαλός ἐστιν, τὸ δ' (491b.) ἰνίον κενόν. Ἔστι δὲ τὸ κρανίον ἅπαν ἄραιον ὀστοῦν, στρογγύλον, ἀσάρκῳ δέρματι περιεχόμενον. Ἔχει δὲ ραφὰς τῶν μὲν γυναικῶν μίαν κύκλῳ, τῶν δ' ἀνδρῶν τρεῖς εἰς ἓν συναπτούσας ὡς ἐπὶ τὸ πολὺ· ἥδη δ' ὠμμένη ἐστὶ κεφαλὴ ἀνδρὸς οὐδεμίαν ἔχουσα ραφήν. Τοῦ δὲ κρανίου κορυφὴ καλεῖται τὸ μέσον λίσσωμα τῶν τριχῶν. Τοῦτο δ' ἐνίοις διπλοῦν ἐστίν· γίνονται γάρ τινες δικόροφοι, οὐ τῷ ὀστέῳ ἀλλὰ τῇ τῶν τριχῶν λισσώσει.

Κεφάλαιο 8

Τὸ δ' ὑπὸ τὸ κρανίον ὀνομάζεται πρόσωπον ἐπὶ μόνου τῶν ἄλλων ζώων ἀνθρώπου· ἰχθύος γὰρ καὶ βοῶς οὐ λέγεται πρόσωπον. Προσώπου δὲ τὸ μὲν ὑπὸ τὸ βρέγμα μεταξὺ τῶν ὀμμάτων μέτωπον. Τοῦτο δ' οἷς μὲν μέγα, βραδύτεροι, οἷς δὲ μικρόν, εὐκίνητοι· καὶ οἷς μὲν πλατύ, ἐκστατικοί, οἷς δὲ περιφερές, θυμικοί.

Κεφάλαιο 9

Ὑπὸ δὲ τῷ μετώπῳ ὀφρύες διφυεῖς· ὧν αἱ μὲν εὐθεῖαι μαλακοῦ ἥθους σημεῖον, αἱ δὲ πρὸς τὴν ῥίνα τὴν καμπυλότητ' ἔχουσαι στρυφνοῦ, αἱ δὲ πρὸς τοὺς κροτάφους μωκοῦ καὶ εἴρωνος, αἱ δὲ κατεσπασμέναι φθόνου. Ὑφ' αἷς ὀφθαλμοί. Οὗτοι κατὰ φύσιν δύο. Τούτων μέρη ἑκατέρου βλέφαρον τὸ ἄνω καὶ κάτω. Τούτου τρίχες αἱ ἔσχαται βλεφαρίδες. Τὸ δ' ἐντὸς τοῦ ὀφθαλμοῦ, τὸ μὲν ὑγρόν, ᾧ βλέπει, κόρη, τὸ δὲ περὶ τοῦτο μέλαν, τὸ δ' ἐκτὸς τούτου λευκόν. Κοινὸν δὲ τῆς βλεφαρίδος μέρος τῆς ἄνω καὶ κάτω κανθοὶ δύο, ὁ μὲν πρὸς τῇ ῥινί, ὁ δὲ πρὸς τοῖς κροτάφοις· οἱ ἂν μὲν ὥσι μακροί, κακοηθείας σημεῖον, ἂν δ' οἷον οἱ ἰκτῖνες κρεῶδες ἔχωσι τὸ πρὸς τῷ μυκτῆρι, πονηρίας.

Τὰ μὲν οὖν ἄλλα γένη πάντα τῶν ζώων πλὴν τῶν ὀστρακοδέρμων καὶ εἴ τι ἄλλο ἀτελές, ἔχει ὀφθαλμούς· τὰ δὲ ζωοτόκα πάντα πλὴν ἀσπάλακος. Τοῦτον δὲ τρόπον μὲν τιν' ἔχειν ἂν θεῖη τις, ὅλως δ' οὐκ ἔχειν. Ὅλως μὲν γὰρ οὐθ' ὀρᾷ οὐτ' ἔχει εἰς τὸ φανερόν δήλους ὀφθαλμούς· ἀφαιρεθέντος δὲ τοῦ δέρματος ἔχει τὴν τε χώραν τῶν ὀμμάτων καὶ τῶν ὀφθαλμῶν τὰ μέλανα κατὰ τὸν τόπον καὶ τὴν χώραν τὴν φύσει τοῖς ὀφθαλμοῖς ὑπάρχουσιν ἐν τῷ ἐκτός, ὡς ἐν τῇ γενέσει πηρουμένων καὶ ἐπιφυομένου τοῦ δέρματος.

Κεφάλαιο 10

Ὁφθαλμοῦ (492a.) δὲ τὸ μὲν λευκὸν ὅμοιον ὡς ἐπὶ τὸ πολὺ πᾶσιν, τὸ δὲ καλούμενον μέλαν διαφέρει· τοῖς μὲν γάρ ἐστι μέλαν, τοῖς δὲ σφόδρα γλαυκόν, τοῖς δὲ χαροπόν, ἐνίοις δὲ αἰγωπόν· τοῦτο ἥθους βελτίστου σημεῖον καὶ πρὸς ὀξύτητα ὄψεως κράτιστον.

Μόνον δ' ἡ μάλιστα τῶν ζώων ἄνθρωπος πολύχρους τὰ ὀμμάτα ἐστίν· τῶν δ' ἄλλων ἐν εἶδος· ἵπποι δὲ γίνονται γλαυκοὶ ἔνιοι.

Τῶν δ' ὀφθαλμῶν οἱ μὲν μεγάλοι, οἱ δὲ μικροί, οἱ δὲ μέσοι· οἱ μέσοι βέλτιστοι. Καὶ ἡ ἐκτὸς σφόδρα ἢ ἐντὸς ἢ μέσως· τούτων οἱ ἐντὸς μάλιστα ὀξυωπέστατοι ἐπὶ παντὸς ζώου, τὸ δὲ μέσον ἥθους βελτίστου σημεῖον. Καὶ ἡ σκαρδαμυκτικοὶ ἢ ἀτενεῖς ἢ μέσοι· βελτίστου δ' ἥθους οἱ μέσοι, ἐκείνων δ' ὁ μὲν ἀναιδής ὁ δ' ἀβέβαιος.

Κεφάλαιο 11

Ἔτι δὲ κεφαλῆς μόριον, δι' οὗ ἀκούει, ἄπνουν, τὸ οὗς· Ἀλκμαίων γὰρ οὐκ ἀληθῆ λέγει, φάμενος ἀναπνεῖν τὰς αἶγας κατὰ τὰ ὦτα. Ὡτὸς δὲ μέρος τὸ μὲν ἀνώνυμον, τὸ δὲ λοβός. Ὅλον δ' ἐκ χόνδρου καὶ σαρκὸς σύγκειται. Εἴσω δὲ τὴν μὲν φύσιν ἔχει οἶον οἱ στρόμβοι, τὸ δ' ἔσχατον ὁστοῦν ὅμοιον τῷ ὠτί, εἰς ὃ ὥσπερ ἀγγεῖον ἔσχατον ἀφικνεῖται ὁ ψόφος. Τοῦτο δ' εἰς μὲν τὸν ἐγκέφαλον οὐκ ἔχει πόρον, εἰς δὲ τὸν τοῦ στόματος οὐρανόν· καὶ ἐκ τοῦ ἐγκεφάλου φλέψ τείνει εἰς αὐτό. Περαινοῦσι δὲ καὶ οἱ ὀφθαλμοὶ εἰς τὸν ἐγκέφαλον, καὶ κεῖται ἐπὶ φλεβίου ἐκάτερος. Ἀκίνητον δὲ τὸ οὗς ἄνθρωπος ἔχει μόνος τῶν ἐχόντων τοῦτο τὸ μόριον. Τῶν γὰρ ἐχόντων ἀκοὴν τὰ μὲν ἔχει ὦτα, τὰ δ' οὐκ ἔχει, ἀλλὰ τὸν πόρον φανερόν, οἶον ὅσα πτερωτὰ ἢ φολιδωτά. Ὅσα δὲ ζωοτοκεῖ, ἔξω φώκης καὶ δελφίνος καὶ τῶν ἄλλων ὅσα οὕτω κητώδη, πάντα ἔχει ὦτα· ζωοτοκεῖ γὰρ καὶ τὰ σελάχη· ἀλλὰ μόνον ἄνθρωπος οὐ κινεῖ. Ἡ μὲν οὖν φώκη πόρους ἔχει φανεροὺς ἢ ἀκούει· ὁ δὲ δελφὶς ἀκούει μὲν, οὐκ ἔχει δ' ὦτα.

Τὰ δ' ἄλλα κινεῖ πάντα. Κεῖται δὲ τὰ ὦτα ἐπὶ τῆς αὐτῆς περιφερείας τοῖς ὀφθαλμοῖς, καὶ οὐχ ὥσπερ ἐνίοις τῶν τετραπόδων ἄνωθεν. Ὡτων δὲ τὰ μὲν φιλά, τὰ δὲ δασέα, τὰ δὲ μέσα· βέλτιστα δὲ τὰ μέσα πρὸς ἀκοήν, ἥθος δ' οὐδὲν σημαίνει. Καὶ ἡ μεγάλη ἢ μικρὰ ἢ μέσα, ἢ ἐπανεστηκότα (492b.) σφόδρα ἢ οὐδὲν ἢ μέσον· τὰ δὲ μέσα βελτίστου ἥθους σημείον, τὰ δὲ μεγάλα καὶ ἐπανεστηκότα μωρολογίας καὶ ἀδολεσχίας. Τὸ δὲ μεταξὺ ὀφθαλμοῦ καὶ ὠτὸς καὶ κορυφῆς καλεῖται κρόταφος.

Ἔτι προσώπου μέρος τὸ μὲν ὄν τῷ πνεύματι πόρος ρίς· καὶ γὰρ ἀναπνεῖ καὶ ἐκπνεῖ ταύτῃ, καὶ ὁ παρμὸς διὰ ταύτης γίνεται, πνεύματος ἀθρόου ἔξοδος, σημείον οἰωνιστικὸν καὶ ἱερὸν μόνον τῶν πνευμάτων. Ἄμα δ' ἡ ἀνάπνευσις καὶ ἐκπνευσις γίνεται εἰς τὸ στήθος, καὶ ἀδύνατον χωρὶς τοῖς μυκτῆρσιν ἀναπνεῦσαι ἢ ἐκπνεῦσαι, διὰ τὸ ἐκ τοῦ στήθους εἶναι τὴν ἀναπνοὴν καὶ ἐκπνοὴν κατὰ τὸν γαργαεῶνα, καὶ μὴ ἐκ τῆς κεφαλῆς τινι μέρει· ἐνδέχεται δὲ καὶ μὴ χρώμενον ταύτῃ ζῆν. Ἡ δ' ὁσφρησις γίνεται διὰ τούτου τοῦ μέρους· αὕτη δ' ἐστὶν ἡ αἴσθησις ὁσμῆς. Εὐκίνητος δ' ὁ μυκτῆρ, καὶ οὐχ ὥσπερ τὸ οὗς ἀκίνητον κατ' ἰδίαν. Μέρος δ' αὐτοῦ τὸ μὲν διάφραγμα χόνδρος, τὸ δ' ὀχέτευμα κενόν· ἔστι γὰρ ὁ μυκτῆρ

διχότομος. Τοῖς δ' ἐλέφασιν ὁ μυκτὴρ γίνεται μακρὸς καὶ ἰσχυρὸς, καὶ χρῆται αὐτῷ ὥσπερ χειρί· προσάγεται τε γὰρ καὶ λαμβάνει τούτῳ καὶ εἰς τὸ στόμα προσφέρεται τὴν τροφήν, καὶ τὴν ὑγρὰν καὶ τὴν ξηράν, μόνον τῶν ζώων.

Ἔτι δὲ σιαγόνες δύο· τούτων τὸ πρόσθιον γένειον, τὸ δ' ὀπίσθιον γένυς. Κινεῖ δὲ πάντα τὰ ζῷα τὴν κάτωθεν γένυν, πλὴν τοῦ ποταμίου κροκοδείλου· οὗτος δὲ τὴν ἄνω μόνον.

Μετὰ δὲ τὴν ῥίνα χεῖλη δύο, σὰρξ εὐκίνητος. Τὸ δ' ἐντὸς στόμα σιαγόνων καὶ χειλῶν. Τούτου μέρη τὸ μὲν ὑπερῷα τὸ δὲ φάρυγξ. Τὸ δ' αἰσθητικὸν χυμοῦ γλῶττα· ἢ δ' αἰσθησις ἐν τῷ ἄκρῳ· ἐὰν δέ <τι> ἐπὶ τὸ πλατὺ ἐπιτεθῇ, ἥττον. Αἰσθάνεται δὲ καὶ ὧν ἡ ἄλλη σὰρξ πάντων, οἷον σκληροῦ θερμοῦ καὶ ψυχροῦ καθ' ὅτι οὖν μέρος, ὥσπερ καὶ χυμοῦ. Αὕτη δ' ἢ πλατεῖα ἢ στενὴ ἢ μέση· ἢ μέση δὲ βελτίστη καὶ σαφεστάτη.

Καὶ ἡ λελυμένη ἢ καταδεδεμένη, ὥσπερ τοῖς ψελλοῖς καὶ τοῖς τραυλοῖς. Ἔστι δ' ἡ γλῶττα σὰρξ μακρὰ καὶ στροφία.

Ταύτης τι μέρος ἐπιγλωττίς. Καὶ τὸ μὲν διφυὲς τοῦ (493a.) στόματος παρίσθμιον, τὸ δὲ πολυφυὲς οὖλον· σάρκινα δὲ ταῦτα. Ἐντὸς δ' ὀδόντες ὀστέиноι. Εἴσω δ' ἄλλο μόριον σταφυλοφόρον, κίων ἐπίφλεβος· ὃς ἐὰν ἐξυγρυνθεῖς φλεγμῇ, σταφυλὴ καλεῖται καὶ πνίγει.

Κεφάλαιο 12

Αὐχὴν δὲ τὸ μεταξὺ προσώπου καὶ θώρακος. Καὶ τούτου τὸ μὲν πρόσθιον μέρος λάρυγξ, [τὸ δ' ὀπίσθιον στόμαχος].

Τούτου δὲ τὸ μὲν χονδρῶδες καὶ πρόσθιον, δι' οὗ ἡ φωνὴ καὶ ἡ ἀναπνοή, ἀρτηρία· τὸ δὲ σαρκῶδες στόμαχος, ἐντὸς πρὸ τῆς ράχεως. Τὸ δ' ὀπίσθιον αὐχένος μέρος ἐπωμὶς. Ταῦτα μὲν οὖν τὰ μόρια μέχρι τοῦ θώρακος.

Θώρακος δὲ μέρη τὰ μὲν πρόσθια τὰ δ' ὀπίσθια.

Πρῶτον μὲν μετὰ τὸν αὐχένα ἐν τοῖς προσθίοις στήθος διφυὲς μαστοῖς. Τούτων ἡ θηλὴ διφυής, δι' ἧς τοῖς θήλεσι τὸ γάλα διηθεῖται· ὁ δὲ μαστὸς μανός. Ἐγγίνεται δὲ καὶ τοῖς ἄρρεσι γάλα· ἀλλὰ πυκνὴ ἡ σὰρξ τοῖς ἄρρεσι, ταῖς δὲ γυναιξὶ σομφή καὶ πόρων μεστή.

Κεφάλαιο 13

Μετὰ δὲ τὸν θώρακα ἐν τοῖς προσθίοις γαστήρ, καὶ ταύτης ρίζα ὀμφαλός· ὑπόρριζον δὲ τὸ μὲν διφυῆς λαγών, τὸ δὲ μονοφυῆς τὸ μὲν ὑπὸ τὸν ὀμφαλὸν ἦτρον (τούτου δὲ τὸ ἔσχατον ἐπίσιον), τὸ δ' ὑπὲρ τὸν ὀμφαλὸν ὑποχόνδριον, τὸ δὲ κοινὸν ὑποχονδρίου καὶ λαγόνος χολάς.

Τῶν δ' ὀπισθεν διάζωμα μὲν ἡ ὀσφύς (ὅθεν καὶ τοῦνομ' ἔχει· δοκεῖ γὰρ εἶναι ἰσοφυῆς), τοῦ δὲ διεξοδικοῦ τὸ μὲν οἶον ἐφέδρανον γλουτός, τὸ δ' ἐν ᾧ στρέφεται ὁ μηρός, κοτυληδών.

Τοῦ δὲ θήλεος ἴδιον μέρος ὑστέρα, καὶ τοῦ ἄρρενος αἰδοῖον, ἔξωθεν ἐπὶ τῷ τέλει τοῦ θώρακος, διμερές, τὸ μὲν ἄκρον σαρκῶδες καὶ αἰεὶ λεῖον <καὶ> ὡς εἰπεῖν ἴσον, ὃ καλεῖται βάλανος, τὸ δὲ περὶ αὐτὴν ἀνώνυμον δέρμα, ὃ ἐὰν διακοπῇ, οὐ συμφύεται, οὐδὲ γνάθος οὐδὲ βλεφαρίς. Κοινὸν δὲ τούτου καὶ τῆς βαλάνου ἀκροποσθία. Τὸ δὲ λοιπὸν μέρος χονδρῶδες, εὐανξές, καὶ ἐξέρχεται καὶ εἰσέρχεται ἐναντίως ἢ τοῖς λοφούροις. Τοῦ δ' αἰδοίου ὑποκάτω ὄρχεις δύο. Τὸ δὲ πέριξ δέρμα, ὃ καλεῖται ὄσχεος. Οἱ δ' ὄρχεις οὔτε ταὐτὸ σαρκὶ οὔτε πόρρω σαρκός· ὃν (493b.) τρόπον δ' ἔχουσιν, ὕστερον δι' ἀκριβείας λεχθήσεται καθόλου περὶ πάντων τῶν τοιούτων μορίων.

Κεφάλαιο 14

Τὸ δὲ τῆς γυναικὸς αἰδοῖον ἐξ ἐναντίας τῷ τῶν ἀρρένων· κοῖλον γὰρ τὸ ὑπὸ τὴν ἥβην καὶ οὐχ ὥσπερ τὸ τοῦ ἄρρενος ἐξεστηκός. Καὶ οὐρήθρα ἔξω τῶν ὑστερῶν, δίοδος τῷ σπέρματι τοῦ ἄρρενος. Τοῦ δ' ὕγρου περιττώματος ἀμφοῖν ἔξοδος.

Κοινὸν δὲ μέρος αὐχένος καὶ στήθους σφαγὴ, πλευρᾶς δὲ καὶ βραχίονος καὶ ὤμου μασχάλη, μηροῦ δὲ καὶ ἥτρου βουβών. Μηροῦ δὲ καὶ γλουτοῦ τὸ ἐντὸς περίνειον, μηροῦ δὲ καὶ γλουτοῦ τὸ ἔξω ὑπογλουτίς.

Θώρακος δὲ περὶ μὲν τῶν ἔμπροσθεν εἴρηται, τοῦ δὲ στήθους τὸ ὀπισθεν νῶτος.

Κεφάλαιο 15

Νώτου δὲ μέρη ὁμοπλάται δύο καὶ ῥάχισ, ὑποκάτωθεν δὲ κατὰ τὴν γαστέρα ὀσφύς. Κοινὸν δὲ τοῦ ἄνω καὶ κάτω τοῦ θώρακος πλευραί, ἐκατέρωθεν ὀκτώ· περὶ γὰρ Λιγύων τῶν καλουμένων ἑπταπλεύρων οὐδενός πω ἀξιολίτου ἀκηκόαμεν.

Ἔχει δ' ὁ ἄνθρωπος καὶ τὸ ἄνω καὶ τὸ κάτω, καὶ τὰ ἔμπροσθεν καὶ τὰ ὀπίσθια, καὶ δεξιὰ καὶ ἀριστερά. Τὰ μὲν οὖν δεξιὰ καὶ ἀριστερὰ ὅμοια σχεδὸν ἐν τοῖς μέρεσι καὶ ταῦτά πάντα, πλὴν ἀσθενέστερα τὰ ἀριστερά· τὰ δ' ὀπίσθια τοῖς προσθίοις ἀνόμοια, καὶ τὰ κάτω τοῖς ἄνω, πλὴν ὧδε ὅμοια, τὰ κάτω τοῦ ἥτρου οἶον τὸ πρόσωπον εὐσαρκία καὶ ἀσαρκία, καὶ τὰ σκέλη πρὸς τοὺς βραχίονας ἀντίκειται· καὶ οἷς βραχεῖς οἱ ἀγκῶνες, καὶ οἱ μηροὶ ὡς ἐπὶ τὸ πολὺ, καὶ οἷς οἱ πόδες μικροί, καὶ αἱ χεῖρες.

Κώλων δὲ τὸ μὲν διφυῆς βραχίων· βραχίονος δὲ ὦμος, ἀγκῶν, ὠλέκρανον, πῆχυς, χεῖρ· χειρὸς δὲ θέναρ, δάκτυλοι πέντε· δακτύλου δὲ τὸ μὲν καμπτικὸν κόνδυλος, τὸ δ' ἄκαμπτον φάλαγξ. Δάκτυλος δ' ὁ μὲν μέγας μονοκόνδυλος, οἱ δ' ἄλλοι δικόνδυλοι. Ἡ δὲ κάμψις καὶ τῷ βραχίονι καὶ τῷ δακτύλῳ εἴσω πᾶσιν· κάμπτεται δ' ὁ βραχίων κατὰ τὸ ὠλέκρανον. Χειρὸς δὲ τὸ μὲν ἐντὸς θέναρ, σαρκῶδες καὶ διηρημένον ἄρθροις, τοῖς μὲν μακροβίοις ἐνὶ ἡ (494a.) δυσὶ δι' ὅλου, τοῖς δὲ βραχυβίοις δυσὶ καὶ οὐ δι' ὅλου. Ἄρθρον δὲ χειρὸς καὶ βραχίονος καρπός. Τὸ δ' ἔξω τῆς χειρὸς νευρῶδες καὶ ἀνώνυμον.

Κώλων δὲ διμερὲς ἄλλο σκέλος. Σκέλους δὲ τὸ μὲν ἀμφικέφαλον μηρός, τὸ δὲ πλανησίεδρον μύλη, τὸ δὲ διόστεον κνήμη, καὶ ταύτης τὸ μὲν πρόσθιον ἀντικνήμιον, τὸ δ' ὀπίσθιον γαστροκνημία, σὰρξ νευρώδης καὶ φλεβώδης, τοῖς μὲν ἀνεσπασμένη ἄνω πρὸς τὴν ἰγνύν, ὅσοι μεγάλα τὰ ἰσχία ἔχουσι, τοῖς δ' ἐναντίως κατεσπασμένη· τὸ δ' ἔσχατον ἀντικνημίου σφυρόν, διφυῆς ἐν ἐκατέρῳ τῷ σκέλει. Τὸ δὲ πολυόστεον τοῦ σκέλους πούς. Τούτου δὲ τὸ μὲν ὀπίσθιον μέρος πτέρνα, τὸ δ' ἐμπρόσθιον τοῦ ποδὸς τὸ μὲν ἐσχισμένον δάκτυλοι πέντε, τὸ δὲ σαρκῶδες κάτωθεν στήθος, τὸ δ' ἄνωθεν ἐν τοῖς πρηνέσι νευρῶδες καὶ ἀνώνυμον. Δακτύλου δὲ τὸ μὲν ὄνυξ, τὸ δὲ καμπή· πάντων δ' ὁ ὄνυξ ἐπ' ἄκρῳ· μονόκαμπτοι δὲ πάντες οἱ κάτω δάκτυλοι. Τοῦ δὲ ποδὸς ὅσοις τὸ ἐντὸς παχὺ καὶ μὴ κοῖλον, ἀλλὰ βαίνουνσιν ὄλῳ, πανοῦργοι. Κοινὸν δὲ μηροῦ καὶ κνήμης γόνυ

καμπή.

Ταῦτα μὲν οὖν τὰ μέρη κοινὰ καὶ θήλεος καὶ ἄρρενος.

Ἡ δὲ θέσις τῶν μερῶν πρὸς τὸ ἄνω καὶ κάτω καὶ πρόσθιον καὶ ὀπίσθιον καὶ δεξιὸν καὶ ἀριστερὸν ὡς ἔχει, φανερὰ μὲν ἂν εἶναι δόξειε τὰ ἔξωθεν κατὰ τὴν αἴσθησιν, οὐ μὴν ἀλλὰ διὰ τὴν αὐτὴν αἰτίαν λεκτέον δι' ἣν περ καὶ τὰ πρότερον εἰρήκαμεν, ἵνα περαίνηται τὸ ἐφεξῆς, καὶ καταριθμουμένων ὅπως ἦττον λανθάνη τὰ μὴ τὸν αὐτὸν ἔχοντα τρόπον ἐπὶ τε τῶν ἄλλων ζώων καὶ ἐπὶ τῶν ἀνθρώπων.

Μάλιστα δ' ἔχει διωρισμένα πρὸς τοὺς κατὰ φύσιν τόπους τὰ ἄνω καὶ κάτω ἄνθρωπος τῶν ἄλλων ζώων· τὰ τε γὰρ ἄνω καὶ κάτω πρὸς τὰ τοῦ παντὸς ἄνω καὶ κάτω τέτακται. Τὸν αὐτὸν τρόπον καὶ τὰ πρόσθια καὶ τὰ ὀπίσθια καὶ τὰ δεξιὰ καὶ τὰ ἀριστερὰ κατὰ φύσιν ἔχει. Τῶν δ' ἄλλων ζώων τὰ μὲν οὐκ ἔχει, τὰ δ' ἔχει μὲν συγκεχυμένα δ' ἔχει μᾶλλον. Ἡ μὲν οὖν κεφαλὴ πᾶσιν ἄνω πρὸς τὸ σῶμα τὸ ἐαυτῶν· ὁ δ' ἄνθρωπος μόνος, ὥσπερ εἴρηται, πρὸς τὸ τοῦ ὅλου τελειωθείς (494b.) ἔχει τοῦτο τὸ μόριον.

Μετὰ δὲ τὴν κεφαλὴν ἐστὶν ὁ αὐχὴν, εἴτα στῆθος καὶ νῶτος, τὸ μὲν ἐκ τοῦ πρόσθεν τὸ δ' ἐκ τοῦ ὀπισθεν. Καὶ ἐχόμενα τούτων γαστήρ καὶ ὀσφύς καὶ αἰδοῖον καὶ ἰσχίον, εἴτα μηρὸς καὶ κνήμη, τελευταῖον δὲ πόδες. Εἰς τὸ πρόσθεν δὲ καὶ τὰ σκέλη τὴν κάμψιν ἔχει, ἐφ' ᾧ καὶ ἡ πορεία, καὶ τῶν ποδῶν τὸ κινητικώτερον μέρος καὶ ἡ κάμψις· ἡ δὲ πτέρνα ἐκ τοῦ ὀπισθεν· τῶν δὲ σφυρῶν ἐκάτερον κατὰ τὸ οὗς. Ἐκ δὲ τῶν πλαγίων τῶν δεξιῶν καὶ τῶν ἀριστερῶν οἱ βραχίονες, τὴν κάμψιν ἔχοντες εἰς τὸ ἐντός, ὥστε τὰ κυρτὰ τῶν σκελῶν καὶ τῶν βραχιόνων πρὸς ἀλλήλα εἶναι ἐπ' ἀνθρώπου μάλιστα.

Τὰς δ' αἰσθήσεις καὶ τὰ αἰσθητήρια, ὀφθαλμοὺς καὶ μυκτῆρας καὶ γλῶτταν, ἐπὶ ταὐτὸ καὶ εἰς τὸ πρόσθιον ἔχει· τὴν δ' ἀκοὴν καὶ τὸ αἰσθητήριον αὐτῆς, τὰ ὦτα, ἐκ τοῦ πλαγίου μὲν, ἐπὶ τῆς αὐτῆς δὲ περιφερείας τοῖς ὅμμασιν. Τὰ δ' ὅμματα ἐλάχιστον κατὰ μέγεθος διέστηκεν ἀνθρώπῳ τῶν ζώων. Ἐχει δ' ἀκριβεστάτην ἄνθρωπος τῶν αἰσθήσεων τὴν ἀφήν, δευτέραν δὲ τὴν γεῦσιν· ἐν δὲ ταῖς ἄλλαις λείπεται πολλῶν.

Κεφάλαιο 16

Τὰ μὲν οὖν μόρια τὰ πρὸς τὴν ἔξω ἐπιφάνειαν τοῦτον τέτακται τὸν τρόπον, καὶ καθάπερ ἐλέχθη, διωνόμασται τε μάλιστα καὶ γνῶριμα διὰ τὴν συνήθειάν ἐστιν· τὰ δ' ἐντὸς τούναντίον. Ἄγνωστα γάρ ἐστι μάλιστα τὰ τῶν ἀνθρώπων, ὥστε δεῖ πρὸς τὰ τῶν ἄλλων μόρια ζῶων ἀνάγοντας σκοπεῖν, οἷς ἔχει παραπλησίαν τὴν φύσιν.

Πρῶτον μὲν οὖν τῆς κεφαλῆς κεῖται τὴν θέσιν ἐν τῷ πρόσθεν ἔχων ὁ ἐγκέφαλος. Ὅμοίως δὲ καὶ τοῖς ἄλλοις ζώοις, ὅσα ἔχει τοῦτο τὸ μόριον· ἔχει δ' ἅπαντα ὅσα ἔχει αἷμα, καὶ ἔτι τὰ μαλάκια· κατὰ μέγεθος δ' ὁμοίως ἔχει ἄνθρωπος πλεῖστον ἐγκέφαλον καὶ ὑγρότατον. Ὑμένες δ' αὐτὸν δύο περιέχουσιν, ὁ μὲν περὶ τὸ ὅστουν ἰσχυρότερος, ὁ δὲ περὶ αὐτὸν τὸν ἐγκέφαλον ἦττων ἐκείνου. Διφυῆς δ' ἐν πᾶσιν ἐστὶν ὁ ἐγκέφαλος. Καὶ ἐπὶ τούτου ἡ καλουμένη παρεγκεφαλὶς ἔσχατον, ἑτέραν ἔχουσα τὴν μορφήν καὶ κατὰ τὴν ἀφήν καὶ κατὰ τὴν ὄψιν.

Τὸ δ' ὀπισθεν τῆς κεφαλῆς κενὸν καὶ κοῖλον πᾶσιν, ὡς ἐκάστοις (495a.) ὑπάρχει μεγέθους. Ἐνια μὲν γὰρ μεγάλην ἔχει τὴν κεφαλὴν, τὸ δ' ὑποκείμενον τοῦ προσώπου μόριον ἔλαττον, ὅσα στρογγυλοπρόσωπα· τὰ δὲ τὴν μὲν κεφαλὴν μικράν, τὰς δὲ σιαγόνας μακράς, οἷον τὸ τῶν λοφούρων γένος πᾶν.

Ἄναιμος δ' ὁ ἐγκέφαλος ἅπασι, καὶ οὐδεμίαν ἔχων ἐν αὐτῷ φλέβα, καὶ θιγγανόμενος κατὰ φύσιν ψυχρός. Ἐχει δ' ἐν τῷ μέσῳ ὁ τῶν πλείστων [πᾶς] κοῖλόν τι μικρόν. Ἡ δὲ περὶ αὐτὸν μῆνιγξ φλεβώδης· ἔστι δ' ὑμὴν δερματικὸς ἢ μῆνιγξ ὁ περιέχων τὸν ἐγκέφαλον. Ὑπὲρ δὲ τοῦ ἐγκεφάλου λεπτότατον ὅστουν καὶ ἀσθενέστατον τῆς κεφαλῆς ἐστὶν, ὃ καλεῖται βρέγμα.

Φέρουσι δ' ἐκ τοῦ ὀφθαλμοῦ τρεῖς πόροι εἰς τὸν ἐγκέφαλον, ὁ μὲν μέγιστος καὶ ὁ μέσος εἰς τὴν παρεγκεφαλίδα, ὁ δ' ἐλάχιστος εἰς αὐτὸν τὸν ἐγκέφαλον· ἐλάχιστος δ' ἐστὶν ὁ πρὸς τῷ μυκτῆρι μάλιστα. Οἱ μὲν οὖν μέγιστοι παράλληλοί εἰσι καὶ οὐ συμπίπτουσιν, οἱ δὲ μέσοι συμπίπτουσι (δῆλον δὲ τοῦτο μάλιστα ἐπὶ τῶν ἰχθύων)· καὶ γὰρ ἐγγύτερον οὗτοι τοῦ ἐγκεφάλου ἢ οἱ μεγάλοι· οἱ δ' ἐλάχιστοι πλεῖστον τε ἀπήρτηνται ἀλλήλων καὶ οὐ συμπίπτουσιν.

Ἐντὸς δὲ τοῦ αὐχένος ὁ τ' οἰσοφάγος καλούμενός ἐστιν, ἔχων τὴν ἐπωνυμίαν ἀπὸ τοῦ μήκους καὶ τῆς στενότητος, καὶ ἡ ἄρτηρία.

Πρότερον δὲ τῇ θέσει ἡ ἀρτηρία κεῖται τοῦ οἰσοφάγου ἐν πᾶσι τοῖς ἔχουσιν αὐτήν· ἔχει δὲ ταύτην πάντα ὅσαπερ πλεύμονα ἔχει.

Ἔστι δ' ἡ μὲν ἀρτηρία χονδρώδης τὴν φύσιν καὶ ὀλίγαιμος, πολλοῖς λεπτοῖς φλεβίοις περιεχομένη, κεῖται δ' ἐπὶ μὲν τὰ ἄνω πρὸς τὸ στόμα κατὰ τὴν ἐκ τῶν μυκτῆρων σύντρησιν εἰς τὸ στόμα, ἥ καὶ ὅταν πίνοντες ἀνασπᾶσώσι τι τοῦ ποτοῦ, χωρεῖ ἐκ τοῦ στόματος διὰ τῶν μυκτῆρων ἔξω. Μεταξὺ δ' ἔχει τῶν τρήσεων τὴν ἐπιγλωττίδα καλουμένην, ἐπιπτύσσεσθαι δυναμένην ἐπὶ τὸ τῆς ἀρτηρίας τρήμα τὸ εἰς τὸ στόμα τείνον. Ταύτη δὲ τὸ πέρας συνήρτηται τῆς γλώττης. Ἐπὶ δὲ θάτερα καθήκει εἰς τὸ μεταξὺ τοῦ πλεύμονος, εἴτ' ἀπὸ τούτου σχίζεται εἰς ἑκάτερον τῶν μερῶν τοῦ πλεύμονος. Θέλει γὰρ εἶναι διμερὴς ὁ πλεύμων ἐν ἅπασι τοῖς ἔχουσιν αὐτόν· ἀλλ' ἐν μὲν τοῖς ζωοτόκοις οὐχ ὁμοίως ἡ διάστασις φανερά, ἥκιστα (495b.) δ' ἐν ἀνθρώπῳ. Ἔστι δ' οὐ πολυσχιδὴς ὁ τοῦ ἀνθρώπου, ὥσπερ ἐνίων ζωοτόκων, οὐδὲ λεῖος, ἀλλ' ἔχει ἀνωμαλίαν.

Ἐν δὲ τοῖς ὠοτόκοις, οἷον ὄρνισι καὶ τῶν τετραπόδων ὅσα ὠοτόκα, πολλὸν τὸ μέρος ἑκάτερον ἀπ' ἀλλήλων ἔσχισται, ὥστε δοκεῖν δύο ἔχειν πλεύμονας· καὶ ἀπὸ μιᾶς δύο ἐστὶ μόρια τῆς ἀρτηρίας, εἰς ἑκάτερον τὸ μέρος τείνοντα τοῦ πλεύμονος. Συνήρτηται δὲ καὶ τῇ μεγάλῃ φλεβί καὶ τῇ ἀορτῇ καλουμένην.

Φυσωμένης δὲ τῆς ἀρτηρίας διαδίδωσιν εἰς τὰ κοῖλα μέρη τοῦ πλεύμονος τὸ πνεῦμα. Ταῦτα δὲ διαφύσεις ἔχει χονδρώδεις εἰς ὅξυ συνηκούσας· ἐκ δὲ τῶν διαφύσεων τρήματα διὰ παντός ἐστι τοῦ πλεύμονος, αἰεὶ ἐκ μειζόνων εἰς ἐλάττω διαδιδόμενα.

Συνήρτηται δὲ καὶ ἡ καρδία τῇ ἀρτηρίᾳ πιμελώδεσι καὶ χονδρώδεσι καὶ ἰνώδεσι δεσμοῖς· ἥ δὲ συνήρτηται, κοῖλόν ἐστιν. Φυσωμένης δὲ τῆς ἀρτηρίας ἐν ἐνίοις μὲν οὐ κατάδηλον ποιεῖ, ἐν δὲ τοῖς μείζοσι τῶν ζώων δῆλον ὅτι εἰσέρχεται τὸ πνεῦμα εἰς αὐτήν. Ἡ μὲν οὖν ἀρτηρία τοῦτον ἔχει τὸν τρόπον, καὶ δέχεται μόνον τὸ πνεῦμα καὶ ἀφίησιν, ἄλλο δ' οὐδὲν οὔτε ξηρὸν οὔθ' ὑγρόν, ἢ πόνον παρέχει, ἕως ἂν ἐκβήξῃ τὸ κατελθόν.

Ὁ δὲ στόμαχος ἡρτηται μὲν ἄνωθεν ἀπὸ τοῦ στόματος, ἐχόμενος τῆς ἀρτηρίας, συνεχὴς ὢν πρὸς τε τὴν ράχιν καὶ τὴν ἀρτηρίαν ὑμενώδεσι δεσμοῖς, τελευτᾷ δὲ διὰ τοῦ διαζώματος εἰς τὴν κοιλίαν, σαρκοειδὴς ὢν τὴν φύσιν, καὶ τάσιν ἔχων καὶ ἐπὶ μῆκος καὶ ἐπὶ πλάτος.

Ἡ δὲ κοιλία ἡ τοῦ ἀνθρώπου ὁμοία τῇ κυνεῖᾳ ἐστίν· οὐ πολλῶ

γὰρ τοῦ ἐντέρου μείζων, ἀλλ' εἰκουῖα οἶονεῖ ἐντέρω τινὶ εὖρος ἔχοντι· εἶτα ἔντερον ἀπλοῦν, εἰλιγμένον, ἐπιεικῶς πλατύ. Ἡ δὲ κάτω κοιλία ὁμοία τῇ ὑείᾳ· πλατεῖά τε γάρ ἐστι, καὶ τὸ ἀπὸ ταύτης πρὸς τὴν ἔδραν παχὺ καὶ βραχύ. Τὸ δ' ἐπίπλοον ἀπὸ μέσης τῆς κοιλίας ἥρτηται, ἔστι δὲ τὴν φύσιν ὕμην πιμελώδης, ὥσπερ καὶ τοῖς ἄλλοις τοῖς μονοκοιλίοις καὶ ἀμφώδουσιν.

Ὑπὲρ δὲ τῶν ἐντέρων τὸ μεσεντέριόν ἐστιν· ὕμενώδες δ' ἐστὶ καὶ τοῦτο καὶ πλατύ, καὶ πῖον γίνεται. Ἐξήρτηται δ' ἐκ τῆς μεγάλης φλεβὸς καὶ τῆς ἀορτῆς, καὶ δι' αὐτοῦ φλέβες πολλαὶ καὶ πυκναί, (496a.) κατατείνουσαι πρὸς τὴν τῶν ἐντέρων θέσιν, ἄνωθεν ἀρξάμεναι μέχρι κάτω. Τὰ μὲν οὖν περὶ τὸν στόμαχον καὶ τὴν ἀρτηρίαν οὕτως ἔχει, καὶ τὰ περὶ τὴν κοιλίαν.

Κεφάλαιο 17

Ἡ δὲ καρδιά ἔχει μὲν τρεῖς κοιλίας, κεῖται δ' ἀνωτέρω τοῦ πλεύμονος κατὰ τὴν σχίσιν τῆς ἀρτηρίας, ἔχει δ' ὑμένα πιμελώδη καὶ παχύν, ἣ προσπέφυκε τῇ φλεβί τῇ μεγάλῃ καὶ τῇ ἀορτῇ. Κεῖται δ' ἐπὶ τῇ ἀορτῇ κατὰ τὰ ὀξέα.

Κεῖται δὲ τὰ ὀξέα κατὰ τὸ στήθος ὁμοίως ἀπάντων τῶν ζώων, ὅσα ἔχει στήθος. Πᾶσι δ' ὁμοίως καὶ τοῖς ἔχουσι καὶ τοῖς μὴ ἔχουσι τοῦτο τὸ μόριον εἰς τὸ πρόσθεν ἔχει ἡ καρδιά τὸ ὀξύ· λάθοι δ' ἂν πολλάκις διὰ τὸ μεταπίπτειν διαιρουμένων. Τὸ δὲ κυρτὸν αὐτῆς ἐστὶν ἄνω. Ἐχει δὲ τὸ ὀξύ σαρκῶδες ἐπὶ πολὺ καὶ πυκνόν, καὶ ἐν τοῖς κοίλοις αὐτῆς νεῦρα ἔνεστιν.

Κεῖται δὲ τὴν θέσιν ἐν μὲν τοῖς ἄλλοις κατὰ μέσον τὸ στήθος, ὅσα ἔχει στήθος, τοῖς δ' ἀνθρώποις ἐν τοῖς ἀριστεροῖς μᾶλλον, μικρὸν τῆς διαιρέσεως τῶν μαστῶν ἐγκλίνουσα εἰς τὸν ἀριστερὸν μαστὸν ἐν τῷ ἄνω μέρει τοῦ στήθους.

Καὶ οὕτε μεγάλη, τό θ' ὅλον αὐτῆς εἶδος οὐ πρόμηκές ἐστὶν ἀλλὰ στρογγυλώτερον· πλὴν τὸ ἄκρον εἰς ὀξύ συνῆκται. Ἐχει δὲ κοιλίας τρεῖς, ὥσπερ εἴρηται, μεγίστην μὲν τὴν ἐν τοῖς δεξιοῖς, ἐλαχίστην δὲ τὴν ἐν τοῖς ἀριστεροῖς, μέσην δὲ μεγέθει τὴν ἀνὰ μέσον· καὶ εἰσὶν εἰς τὸν πλεύμονα τετρημέναι πᾶσαι. [Ἀμφοτέρας δ' ἔχει τὰς δύο μικράς, καὶ τὸν πλεύμονα τετρημένας πάσας]. Κατάδηλον δὲ κατὰ μίαν τῶν κοιλιῶν.

Κάτωθεν δ' ἐκ τῆς προσφύσεως· κατὰ μὲν τὴν μεγίστην κοιλίαν ἐξήρτηται τῇ μεγάλῃ φλεβί, πρὸς ἣν καὶ τὸ μεσεντέριόν ἐστι, κατὰ δὲ τὴν μέσην τῇ ἀορτῇ.

Φέρουσι δὲ καὶ εἰς τὸν πλεύμονα πόροι ἀπὸ τῆς καρδίας, καὶ σχίζονται τὸν αὐτὸν τρόπον ὥνπερ ἡ ἀρτηρία, κατὰ πάντα τὸν πλεύμονα παρακολουθοῦντες τοῖς ἀπὸ τῆς ἀρτηρίας. Ἐπάνω δ' εἰσὶν οἱ ἀπὸ τῆς καρδίας· πόρος δ' οὐδεὶς ἐστὶ κοινός, ἀλλὰ διὰ τὴν σύναψιν δέχονται τὸ πνεῦμα καὶ τῇ καρδίᾳ διαπέμπουσιν· φέρει γὰρ ὁ μὲν εἰς τὸ δεξιὸν κοῖλον τῶν πόρων, ὁ δ' εἰς τὸ ἀριστερόν. Περὶ δὲ τῆς φλεβὸς τῆς μεγάλης καὶ τῆς ἀορτῆς κατ' αὐτὰς κοινῇ περὶ ἀμφοτέρων ἐροῦμεν ὕστερον.

Αἷμα (496b.) δὲ πλεῖστον μὲν ὁ πλεύμων ἔχει τῶν ἐν τοῖς ζώοις μορίων τοῖς ἔχουσιν τε πλεύμονα καὶ ζωοτοκοῦσιν ἐν αὐτοῖς τε καὶ

ἐκτός· ἅπας μὲν γάρ ἐστι σομφός, παρ' ἐκάστην δὲ τὴν σύριγγα πόροι Φέρουσι τῆς μεγάλης Φλεβός. Ἄλλ' οἱ νομίζοντες εἶναι κενὸν διηπάτηνται, θεωροῦντες τοὺς ἐξηρημένους ἐκ τῶν διαιρουμένων τῶν ζώων, ὧν εὐθὺς ἐξελήλυθε τὸ αἷμα ἀθρόον.

Τῶν δ' ἄλλων σπλάγχων ἡ καρδία μόνον ἔχει αἷμα. Καὶ ὁ μὲν πλεύμων οὐκ ἐν αὐτῷ ἀλλ' ἐν ταῖς φλεψίν, ἡ δὲ καρδία ἐν αὐτῇ· ἐν ἐκάστη γὰρ ἔχει αἷμα τῶν κοιλιῶν, λεπτότατον δ' ἐστὶ τὸ ἐν τῇ μέσῃ.

Ὑπὸ δὲ τὸν πλεύμονά ἐστι τὸ διάζωμα τὸ τοῦ θώρακος, αἱ καλούμεναι φρένες, πρὸς μὲν τὰ πλευρὰ καὶ τὰ ὑποχόνδρια καὶ τὴν ῥάχιν συνηρτημέναι, ἐν μέσῳ δ' ἔχει τὰ λεπτὰ καὶ ὑμενώδη. Ἐχει δὲ δι' αὐτοῦ καὶ φλέβας τεταμένας· εἰσὶ δ' αἱ τοῦ ἀνθρώπου φρένες παχεῖαι ὡς κατὰ λόγον τοῦ σώματος.

Ὑπὸ δὲ τὸ διάζωμα ἐν μὲν τοῖς δεξιόις κεῖται τὸ ἥπαρ, ἐν δὲ τοῖς ἀριστεροῖς ὁ σπλήν, ὁμοίως ἐν ἅπασιν τοῖς ἔχουσι ταῦτα τὰ μόρια κατὰ φύσιν καὶ μὴ τερατωδῶς· ἥδη γὰρ ὥπται μετηλλαχότα τὴν τάξιν ἐν τισὶ τῶν τετραπόδων. Συνήρτηται δὲ τῇ κοιλίᾳ κατὰ τὸ ἐπίπλοον. Τὴν δ' ὄψιν ἐστὶν ὁ τοῦ ἀνθρώπου σπλήν στενός καὶ μακρός, ὅμοιος τῷ ὑεῖω. Τὸ δ' ἥπαρ ὡς μὲν ἐπὶ τὸ πολὺ καὶ ἐν τοῖς πλείστοις ἔχει χολήν, ἐπ' ἐνίοις δ' οὐκ ἔπεστιν. Στρογγύλον δ' ἐστὶ τὸ τοῦ ἀνθρώπου ἥπαρ καὶ ὅμοιον τῷ βοεῖω. Συμβαίνει δὲ τοῦτο καὶ ἐν τοῖς ἱερείοις, οἷον ἐν μὲν τόπῳ τινὶ τῆς ἐν Εὐβοίᾳ Χαλκιδικῆς οὐκ ἔχει τὰ πρόβατα χολήν, ἐν δὲ Νάξῳ πάντα σχεδὸν τὰ τετράποδα τοσαύτην ὥστ' ἐκπλήττεσθαι τοὺς θύοντας τῶν ξένων, οἰομένους αὐτῶν ἴδιον εἶναι τὸ σημεῖον, ἀλλ' οὐ φύσιν αὐτῶν εἶναι ταύτην. Προσπέφυκε δὲ τῇ μεγάλῃ φλεβί τὸ ἥπαρ, τῇ δ' ἀορτῇ οὐ κοινωνεῖ· διὰ γὰρ τοῦ ἥπατος διέχει ἡ ἀπὸ τῆς μεγάλης φλεβὸς φλέψ, ἥ αἱ καλούμεναι πύλαι εἰσὶ τοῦ ἥπατος. Συνήρτηται δὲ καὶ ὁ σπλήν τῇ μεγάλῃ φλεβί μόνον· τείνει γὰρ ἀπ' αὐτῆς φλέψ εἰς τὸν σπλήνα.

Μετὰ δὲ ταῦτα οἱ νεφροὶ πρὸς αὐτῇ τῇ ῥάχει κεῖνται, ὅμοιοι τὴν φύσιν ὄντες τοῖς βοεῖοις. (497a.) Ἀνώτερος δ' ὁ δεξιός ἐστὶν ἐν πᾶσι τοῖς ζώοις τοῖς ἔχουσι νεφρούς· καὶ ἐλάττω δὲ πιμελὴν ἔχει τοῦ ἀριστεροῦ καὶ αὐχμηρότερος ὁ δεξιός. Ἐν πᾶσι δ' ἔχει ὁμοίως τοῖς ἄλλοις καὶ τοῦτο. Φέρουσι δ' εἰς αὐτοὺς πόροι ἕκ τε τῆς μεγάλης φλεβὸς καὶ τῆς ἀορτῆς, πλὴν οὐκ εἰς τὸ κοῖλον. Ἐχουσι γὰρ οἱ νεφροὶ ἐν μέσῳ κοῖλον, οἱ μὲν μεῖζον οἱ δ' ἔλαττον, πλὴν οἱ τῆς φώκης· οὗτοι δ' ὅμοιοι τοῖς βοεῖοις ὄντες στερεώτατοι πάντων εἰσίν. Οἱ δὲ πόροι οἱ τείνοντες εἰς αὐτοὺς εἰς τὸ σῶμα καταναλίσκονται

τῶν νεφρῶν· σημεῖον δ' ὅτι οὐ περαίνουσι τὸ μὴ ἔχειν αἷμα μηδὲ πήγνυσθαι ἐν αὐτοῖς.

Ἔχουσι δὲ κοιλίαν, ὥσπερ εἴρηται, μικράν. Ἐκ δὲ τοῦ κοίλου τῶν νεφρῶν φέρουσιν εἰς τὴν κύστιν πόροι δύο νεανικοί, καὶ ἄλλοι ἐκ τῆς ἁορτῆς ἰσχυροὶ καὶ συνεχεῖς. Ἐκ μέσου δὲ τῶν νεφρῶν ἐκατέρου φλέψ κοίλη καὶ νευρώδης ἐξήρτηται, τείνουσα παρ' αὐτὴν τὴν ῥάχιν διὰ τῶν στενῶν· εἴτα εἰς ἐκάτερον τὸ ἰσχίον ἀφανίζονται, καὶ πάλιν δῆλαι γίνονται τεταμέναι πρὸς τὸ ἰσχίον. Αὗται δ' αἱ ἀποτομαὶ τῶν φλεβίων εἰς τὴν κύστιν καθήκουσιν. Τελευταία γὰρ ἡ κύστις κεῖται, τὴν μὲν ἐξάρτησιν ἔχουσα τοῖς ἀπὸ τῶν νεφρῶν τεταμένοις πόροις παρὰ τὸν καυλὸν τὸν ἐπὶ τὴν οὐρήθραν τείνοντα, καὶ σχεδὸν πάντῃ κύκλῳ λεπτοῖς καὶ ἰνώδεσιν ὑμένιοις ἐστὶ προσειλημμένη, παραπλησίους οὕσι τρόπον τινὰ τῷ διαζώματι τοῦ θώρακος. Ἔστι δ' ἡ τοῦ ἀνθρώπου κύστις ἐπιεικῶς ἔχουσα μέγεθος.

Πρὸς δὲ τὸν καυλὸν τὸν τῆς κύστεως συνήρτηται τὸ αἰδοῖον, τὸ μὲν ἐξωτάτῳ τρημα συνερρωγὸς εἰς ταυτό, μικρὸν δ' ὑποκάτω. Τὸ μὲν οὖν εἰς τοὺς ὄρχεις φέρει τῶν τρημάτων, τὸ δ' εἰς τὴν κύστιν, νευρῶδες καὶ χονδρῶδες ὄν. Τοῦτον δ' ἐξήρτηνται οἱ ὄρχεις τοῖς ἄρρεσι, περὶ ὧν ἐν τοῖς κοινῇ λεγομένοις διορισθήσεται πῶς ἔχουσιν.

Τὸν αὐτὸν δὲ τρόπον καὶ ἐν τῷ θήλει πάντα πέφυκεν· διαφέρει γὰρ οὐδενὶ τῶν ἔσω πλὴν ταῖς ὑστέραις, ὧν ἡ μὲν ὄψις θεωρεῖσθαι ἐκ τῆς διαγραφῆς τῆς ἐν ταῖς ἀνατομαῖς, ἡ δὲ θέσις ἐστὶν ἐπὶ τοῖς ἐντέροις· ἐπὶ δὲ τῆς ὑστέρας ἡ κύστις. Λεκτέον δὲ καὶ περὶ ὑστερῶν κοινῇ πασῶν ἐν τοῖς ἐπομένοις· οὔτε γὰρ ὅμοιαι πᾶσιν οὔθ' ὁμοίως ἔχουσιν.

(497b.) Τὰ μὲν οὖν μόρια καὶ τὰ ἐντὸς καὶ τὰ ἐκτὸς τοῦ ἀνθρώπου ταῦτα καὶ τοιαῦτα, καὶ τοῦτον ἔχει τὸν τρόπον.

Βιβλίο 2

Κεφάλαιο 1

Τῶν δ' ἄλλων ζώων τὰ μόρια τὰ μὲν κοινὰ πάντων ἐστίν, ὥσπερ εἴρηται πρότερον, τὰ δὲ γενῶν τινων. Ταῦτά δὲ καὶ ἕτερα ἐστὶν ἀλλήλων τὸν ἤδη πολλάκις εἰρημένον τρόπον. Σχεδὸν γὰρ ὅσα γ' ἐστὶ γένει ἕτερα τῶν ζώων, καὶ τὰ πλεῖστα τῶν μερῶν ἔχει ἕτερα τῷ εἶδει, καὶ τὰ μὲν κατ' ἀναλογίαν ἀδιάφορα μόνον, τῷ γένει δ' ἕτερα, τὰ δὲ τῷ γένει μὲν ταῦτά τῷ εἶδει δ' ἕτερα· πολλὰ δὲ τοῖς μὲν ὑπάρχει, τοῖς δ' οὐχ ὑπάρχει.

Τὰ μὲν οὖν τετράποδα καὶ ζωοτόκα κεφαλὴν μὲν ἔχει καὶ αὐχένα καὶ τὰ ἐν τῇ κεφαλῇ μόρια ἅπαντα, διαφέρει δὲ τὰς μορφὰς τῶν μορίων ἕκαστον. Καὶ ὁ γε λέων τὸ τοῦ αὐχένος ἔχει ἐν ὅστωι, σφονδύλους δ' οὐκ ἔχει· τὰ δ' ἐντὸς ἀνοιχθεὶς ὅμοια πάντ' ἔχει κυνί. Ἐχει δὲ τὰ τετράποδα ζῶα καὶ ζωοτόκα ἀντὶ τῶν βραχιόνων σκέλη πρόσθια, πάντα μὲν τὰ τετράποδα, μάλιστα δ' ἀνάλογα ταῖς χερσὶ τὰ πολυσχιδῇ αὐτῶν· χρῆται γὰρ πρὸς πολλὰ ὡς χερσίν. Καὶ τὰ ἀριστερὰ δ' ἦττον ἔχει ἀπολελυμένα τῶν ἀνθρώπων, πλὴν ἐλέφαντος. Οὗτος δὲ τὰ τε περὶ τοὺς δακτύλους ἀδιαρθρωτότερα ἔχει τῶν ποδῶν, καὶ τὰ πρόσθια σκέλη πολλῷ μείζω. Ἔστι δὲ πενταδάκτυλον, καὶ πρὸς τοῖς ὀπισθίοις σκέλεσι σφυρὰ ἔχει βραχέα. Ἐχει δὲ μυκτῆρα τοιοῦτον καὶ τηλικοῦτον ὥστε ἀντὶ χειρῶν ἔχειν αὐτόν· πίνει γὰρ καὶ ἐσθίει ὀρέγων τούτῳ εἰς τὸ στόμα, καὶ τῷ ἐλεφαντιστῇ ἀνορέγει ἄνω. Τούτῳ καὶ δένδρα ἀνασπᾷ, καὶ διὰ τοῦ ὕδατος βαδίζων τούτῳ ἀναφυσᾷ. Τῷ δ' ἄκρῳ ἐγκλίνει, οὐ κάμπτεται δέ· χονδρῶδες γὰρ ἔχει. Μόνον δὲ καὶ ἀμφιδέξιον γίνεται τῶν ἄλλων ζώων ἄνθρωπος.

Τῷ δὲ στήθει τῷ τοῦ ἀνθρώπου πάντα τὰ ζῶα ἀνάλογον ἔχει τοῦτο τὸ μόριον, ἀλλ' οὐχ ὅμοιον· ὁ μὲν γὰρ πλατὺ τὸ στήθος, τὰ δ' ἄλλα στενόν. Μαστοὺς δ' οὐκ ἔχει οὐδὲν ἐν τῷ πρόσθεν ἀλλ' ἢ ἄνθρωπος· ὁ δ' ἐλέφας ἔχει (498a.) μὲν μαστοὺς δύο, ἀλλ' οὐκ ἐν τῷ στήθει ἀλλὰ πρὸς τῷ στήθει.

Τὰς δὲ κάμπεις τῶν κώλων καὶ τῶν ἔμπροσθεν καὶ τῶν ὀπισθεν ὑπεναντίας ἔχουσι καὶ ἑαυταῖς καὶ ταῖς τοῦ ἀνθρώπου καμπαῖς, πλὴν ἐλέφαντος. Τοῖς μὲν γὰρ ζωοτόκοις τῶν τετραπόδων κάμπτεται τὰ μὲν πρόσθια εἰς τὸ πρόσθεν τὰ δ' ὀπίσθια εἰς τοῦπισθεν, καὶ ἔχουσι τὰ κοῖλα τῆς περιφερείας πρὸς ἄλληλα ἀντεστραμμένα· ὁ δ' ἐλέφας

οὐχ ὥσπερ ἔλεγόν τινες, ἀλλὰ συγκαθίζει καὶ κάμπτει τὰ σκέλη, πλὴν οὐ δύναται διὰ τὸ βάρος ἐπ' ἀμφοτέρα ἅμα, ἀλλ' ἀνακλίνεται ἢ ἐπὶ τὰ εὐώνυμα ἢ ἐπὶ τὰ δεξιά, καὶ καθεύδει ἐν τούτῳ τῷ σχήματι, κάμπτει δὲ τὰ ὀπίσθια σκέλη ὥσπερ ἄνθρωπος.

Τοῖς φωτόκοις δέ, ὥσπερ κροκοδείλῳ καὶ σαύρα καὶ τοῖς ἄλλοις τοῖς τοιούτοις ἅπασιν, ἀμφοτέρα τὰ σκέλη καὶ τὰ πρόσθια καὶ τὰ ὀπίσθια εἰς τὸ πρόσθεν κάμπτεται, μικρὸν εἰς τὸ πλάγιον παρεγκλίνοντα. Ὅμοίως δὲ καὶ τοῖς ἄλλοις τοῖς πολύποσιν· πλὴν τὰ μεταξὺ τῶν ἐσχάτων ἀεὶ ἐπαμφοτερίζει καὶ τὴν κάμψιν ἔχει εἰς τὸ πλάγιον μᾶλλον. Ὁ δ' ἄνθρωπος ἅμφω τὰς καμπὰς τῶν κώλων ἐπὶ ταῦτόν ἔχει καὶ ἐξ ἐναντίας· τοὺς μὲν γὰρ βραχίονας εἰς τοῦπισθεν κάμπτει, πλὴν μικρὸν βεβλαίσωται ἐπὶ τὰ πλάγια τὰ ἐντός, τὰ δὲ σκέλη εἰς τοῦμπροσθεν. Εἰς δὲ τὸ ὀπισθεν τὰ τε πρόσθια καὶ τὰ ὀπίσθια οὐδὲν κάμπτει τῶν ζώων. Ἐναντίως δὲ τοῖς ἀγκῶσι καὶ τοῖς προσθίοις σκέλεσιν ἢ τῶν ὤμων ἔχει καμπὴ πᾶσι, καὶ τῶν ὀπισθεν γονάτων ἢ τῶν ἰσχύων, ὥστ' ἐπεὶ ὁ ἄνθρωπος τοῖς ἄλλοις ἐναντίως κάμπτει, καὶ οἱ ταῦτ' ἔχοντες ἐναντίως.

Παραπλησίους δὲ τὰς καμπὰς ἔχει καὶ ὁ ὄρνις τοῖς τετράποσι ζώοις· δίπους γὰρ ὢν τὰ μὲν σκέλη εἰς τὸ ὀπισθεν κάμπτει, ἀντὶ δὲ βραχιόνων καὶ σκελῶν τῶν ἔμπροσθεν πτέρυγας ἔχει, ὣν ἡ κάμψις ἐστὶν εἰς τὸ πρόσθεν. Ἡ δὲ φώκη ὥσπερ πεπηρωμένον τετράπουν ἐστὶν· εὐθύς γὰρ ἔχει μετὰ τὴν ὠμοπλάτην τοὺς πόδας ὁμοίους χερσίν, ὥσπερ καὶ οἱ τῆς ἄρκτου· πενταδάκτυλοι γὰρ εἰσι, καὶ ἕκαστος τῶν (498b.) δακτύλων καμπὰς ἔχει τρεῖς καὶ ὄνυχά οὐ μέγαν· οἱ δ' ὀπίσθιοι πόδες πενταδάκτυλοι μὲν εἰσι, καὶ τὰς καμπὰς καὶ τοὺς ὄνυχας ὁμοίους ἔχουσι τοῖς προσθίοις, τῷ δὲ σχήματι παραπλήσιοι ταῖς τῶν ἰχθύων οὐραῖς εἰσιν.

Αἱ δὲ κινήσεις τῶν ζώων τῶν μὲν τετραπόδων καὶ πολυπόδων κατὰ διάμετρόν εἰσι, καὶ ἐστᾶσιν οὕτως· ἢ δ' ἀρχὴ ἀπὸ τῶν δεξιῶν πᾶσιν. Κατὰ σκέλος δὲ βαδίζουσιν ὃ τε λέων καὶ αἱ κάμηλοι ἀμφοτέραι, αἷ τε Βακτριαναὶ καὶ αἱ Ἀράβιαι. Τὸ δὲ κατὰ σκέλος ἐστὶν ὅτε οὐ προβαίνει τῷ ἀριστερῷ τὸ δεξιόν, ἀλλ' ἐπακολουθεῖ.

Ἔχουσι δὲ τὰ τετράποδα ζῷα, ὅσα μὲν ὁ ἄνθρωπος μόρια ἔχει ἐν τῷ πρόσθεν, κάτω ἐν τοῖς ὑπτίοις, τὰ δ' ὀπίσθια ἐν τοῖς πρᾶνέσιν. Ἔτι δὲ τὰ πλεῖστα κέρκον ἔχει· καὶ γὰρ ἡ φώκη μικρὰν ἔχει, ὁμοίαν τῇ τοῦ ἐλάφου. Περὶ δὲ τῶν πιθηκοειδῶν ζώων ὕστερον διορισθήσεται. Πάντα δ' ὅσα τετράποδα καὶ ζωοτόκα, δασέα ὡς

εἰπεῖν ἐστὶ, καὶ οὐχ ὥσπερ ὁ ἄνθρωπος ὀλιγότριχον καὶ μικρότριχον πλὴν τῆς κεφαλῆς, τὴν δὲ κεφαλὴν δασύτατον τῶν ζώων. Ἔτι δὲ τῶν μὲν ἄλλων ζώων τῶν ἐχόντων τρίχας τὰ πρᾶνῃ δασύτερα, τὰ δ' ὕπτια ἢ λεῖα πάνπαν ἢ ἥττον δασέα· ὁ δ' ἄνθρωπος τοῦναντίον. Καὶ βλεφαρίδας ὁ μὲν ἄνθρωπος ἐπ' ἄμφω ἔχει, καὶ ἐν μασχάλαις ἔχει τρίχας καὶ ἐπὶ τῆς ἥβης· τῶν δ' ἄλλων οὐδὲν οὔτε τούτων οὐδέτερον οὔτε τὴν κάτω βλεφαρίδα, ἀλλὰ κάτωθεν τοῦ βλεφάρου ἐνίοις μαναι τρίχες πεφύκασιν.

Αὐτῶν δὲ τῶν τετραπόδων καὶ τρίχας ἐχόντων τῶν μὲν ἅπαν τὸ σῶμα δασύ, καθάπερ ὑὸς καὶ ἄρκτου καὶ κυνός· τὰ δὲ δασύτερα τὸν αὐχένα ὁμοίως πάντῃ, οἷον ὅσα χαίτην ἔχει, ὥσπερ λέων· τὰ δ' ἐπὶ τῷ πρᾶνεϊ τοῦ αὐχένος ἀπὸ τῆς κεφαλῆς μέχρι τῆς ἀκρωμίας, οἷον ὅσα λοφίαν ἔχει, ὥσπερ ἵππος καὶ ὄρεὺς καὶ τῶν ἀγρίων καὶ κερατοφόρων βόνασος. Ἔχει δὲ καὶ ὁ ἱππέλαφος καλούμενος ἐπὶ τῇ ἀκρωμίᾳ χαίτην καὶ τὸ θηρίον τὸ πάρδιον ὀνομαζόμενον· ἀπὸ δὲ τῆς κεφαλῆς ἐπὶ τὴν ἀκρωμίαν λεπτὴν ἐκάτερον· ἰδίᾳ δ' ὁ ἱππέλαφος πώγων (499a.) ἔχει κατὰ τὸν λάρυγγα. Ἔστι δ' ἀμφοτέρα κερατοφόρα καὶ διχαλά· ἡ δὲ θήλεια ἱππέλαφος οὐκ ἔχει κέρατα. Τὸ δὲ μέγεθός ἐστι τούτου τοῦ ζώου ἐλάφῳ προσεμφερές. Γίνονται δ' οἱ ἱππέλαφοι ἐν Ἀραχώταις, οὐπὲρ καὶ οἱ βόες οἱ ἄγριοι. Διαφέρουσι δ' οἱ ἄγριοι τῶν ἡμέρων ὅσον περ οἱ ὕες οἱ ἄγριοι πρὸς τοὺς ἡμέρους· μέλανές τε γὰρ εἰσι καὶ ἰσχυροὶ τῷ εἶδει καὶ ἐπίγρυποι, τὰ δὲ κέρατα ἐξυπτιάζοντα ἔχουσι μᾶλλον· τὰ δὲ τῶν ἱππελάφων κέρατα παραπλήσια τοῖς τῆς δορκάδος εἰσίν. Ὁ δ' ἐλέφας ἥκιστα δασύς ἐστι τῶν τετραπόδων. Ακολουθοῦσι δὲ κατὰ τὸ σῶμα καὶ αἱ κέρκοι δασύτητι καὶ ψιλότητι, ὅσων αἱ κέρκοι μέγεθος ἔχουσιν· ἓν γὰρ μικρὰν ἔχει πάνπαν.

Αἱ δὲ κάμηλοι ἴδιον ἔχουσι παρὰ τᾶλλα τετράποδα τὸν καλούμενον ὕβον ἐπὶ τῷ νώτῳ. Διαφέρουσι δ' αἱ Βάκτριαι τῶν Ἀραβίων· αἱ μὲν γὰρ δύο ἔχουσιν ὕβους, αἱ δ' ἓνα μόνον, ἄλλον δ' ἔχουσιν ὕβον τοιοῦτον οἷον ἄνω ἐν τοῖς κάτω, ἐφ' οὗ, ὅταν κατακλιθῇ εἰς γόνατα, ἐστήρικται τὸ ἄλλο σῶμα. Θηλάς μὲν οὖν ἔχει τέτταρας ἢ κάμηλος ὥσπερ βοῦς, καὶ κέρκον ὁμοίαν ὄνῳ, τὸ δ' αἰδοῖον ὀπισθεν. Καὶ γόνυ δ' ἔχει ἐν ἐκάστῳ τῷ σκέλει ἓν, καὶ τὰς καμπὰς οὐ πλείους, ὥσπερ λέγουσί τινες, ἀλλὰ φαίνεται διὰ τὴν ὑπόσταλσιν τῆς κοιλίας. Καὶ ἀστράγαλον ὅμοιον μὲν βοτῇ, ἰσχνὸν δὲ καὶ μικρὸν ὡς κατὰ τὸ μέγεθος. Ἔστι δὲ διχαλὸν καὶ οὐκ ἁμφωδον,

διχαλὸν δ' ὤδε. Ἐκ μὲν τοῦ ὀπισθεν μικρὸν ἔσχισται μέχρι τῆς δευτέρας καμπῆς τῶν δακτύλων· τὰ δ' ἔμπροσθεν ἔσχισται μικρὸν, ὅσον ἄχρι τῆς πρώτης καμπῆς τῶν δακτύλων ἐπ' ἄκρῳ, τέτταρα· καὶ ἔστι τι καὶ διὰ μέσου τῶν σχισμάτων, ὥσπερ τοῖς χησίν. Ὁ δὲ πούς ἐστὶ κάτωθεν σαρκώδης, ὥσπερ καὶ οἱ τῶν ἄρκτων· διὸ καὶ τὰς εἰς πόλεμον ἰούσας ὑποδοῦσι καρβατίνας, ὅταν ἀλγήσωσιν.

Πάντα δὲ τὰ τετράποδα ὁστώδη τὰ σκέλη ἔχει καὶ νευρώδη καὶ ἄσαρκα· ὅλως δὲ καὶ τᾶλλα ζῷα ἅπαντα, (499b.) ὅσα ἔχει πόδας, ἐκτὸς ἀνθρώπου. Ἔτι δ' ἀνίσχια· καὶ γὰρ οἱ ὄρνιθες ἔτι μᾶλλον τοῦτο πεπόνθασιν. Ὁ δ' ἄνθρωπος τούναντίον· σαρκώδη γὰρ ἔχει σχεδὸν μάλιστα τοῦ σώματος τὰ ἰσχία καὶ τοὺς μηρούς καὶ τὰς κνήμας· αἱ γὰρ καλούμεναι γαστροκνημιαί ἐν ταῖς κνήμαις εἰσὶ σαρκώδεις.

Τῶν δὲ τετραπόδων καὶ ἐναίμων καὶ ζωοτόκων τὰ μὲν ἐστὶ πολυσχιδῆ, ὥσπερ αἱ τοῦ ἀνθρώπου χεῖρες καὶ οἱ πόδες (πολυδάκτυλα γὰρ ἑνία ἐστίν, οἷον λέων, κύων, πάρδαλις), τὰ δὲ δισχιδῆ, καὶ ἀντὶ τῶν ὀνύχων χηλὰς ἔχει, ὥσπερ πρόβατον καὶ αἰξ καὶ ἔλαφος καὶ ἵππος ὁ ποτάμιος· τὰ δ' ἀσχιδῆ, οἷον τὰ μώνυχα, ὥσπερ ἵππος καὶ ὄρεϋς. Τὸ δὲ τῶν ὑῶν γένος ἐπαμφοτερίζει· εἰσὶ γὰρ καὶ ἐν Ἰλλυριοῖς καὶ ἐν Παιονίᾳ καὶ ἄλλοθι μώνυχες ὕες. Τὰ μὲν οὖν διχαλὰ δύο ἔχει σχίσσεις ὀπισθεν· τοῖς δὲ μώνυξι τοῦτ' ἐστὶ συνεχές.

Ἔστι δὲ καὶ τὰ μὲν κερατοφόρα τῶν ζώων τὰ δ' ἄκερα. Τὰ μὲν οὖν πλεῖστα τῶν ἐχόντων κέρατα διχαλὰ κατὰ φύσιν ἐστίν, οἷον βοῦς καὶ ἔλαφος καὶ αἰξ· μώνυχον δὲ καὶ δίκερων οὐδὲν ὥπται. Μονοκέρατα δὲ καὶ μώνυχα ὀλίγα, οἷον ὁ Ἰνδικὸς ὄνος. Μονόκερων δὲ καὶ διχαλὸν ὄρυξ. Καὶ ἀστράγαλον δ' ὁ Ἰνδικὸς ὄνος ἔχει τῶν μωνύχων μόνον· ἡ γὰρ ὕς, ὥσπερ ἐλέχθη πρότερον, ἐπαμφοτερίζει, διὸ καὶ οὐ καλλιαστράγαλόν ἐστίν. Τῶν δὲ διχαλῶν πολλὰ ἔχει ἀστράγαλον. Πολυσχιδῆς δ' οὐδὲν ὥπται τοιοῦτον ἔχον ἀστράγαλον, ὥσπερ οὐδ' ἄνθρωπος, ἀλλ' ἡ μὲν λυγρὴ ὁμοίον ἡμιαστραγαλίῳ, ὁ δὲ λέων, οἷον περ πλάττουσι, λαβυρινθώδη. Πάντα δὲ τὰ ἔχοντα ἀστραγάλους ἐν τοῖς ὀπισθεν ἔχει σκέλεσιν. Ἔχει δ' ὀρθὸν τὸν ἀστράγαλον ἐν τῇ καμπῇ, τὸ μὲν πρηνὲς ἔξω, τὸ δ' ὑπτίον εἰσω, καὶ τὰ μὲν κῶα ἐντὸς ἐστραμμένα πρὸς ἄλληλα, τὰ δὲ χῖα καλούμενα ἔξω, καὶ τὰς κεραίας ἄνω. Ἡ μὲν οὖν θέσις τῶν ἀστραγάλων τοῖς ἔχουσι πᾶσι τοῦτον ἔχει τὸν τρόπον.

Διχαλὰ δ' ἅμα καὶ χαίτην ἔχοντα καὶ κέρατα δύο κεκαμμένα εἰς

αὐτά ἐστιν (500a.) ἓνια τῶν ζώων, οἷον ὁ βόνασος, ὃς γίνεται περὶ τὴν Παιονίαν καὶ τὴν Μαιδικήν. Πάντα δ' ὅσα κερατοφόρα, τετράποδά ἐστιν, εἰ μὴ τι κατὰ μεταφορὰν λέγεται ἔχειν κέρας καὶ λόγου χάριν, ὥσπερ τοὺς περὶ Θήβας ὄφεις οἱ Αἰγύπτιοί φασιν, ἔχοντας ἐπανάστασιν ὅσον προφάσεως χάριν.

Τῶν δ' ἐχόντων κέρας δι' ὅλου μὲν ἔχει στερεὸν μόνον ἔλαφος, τὰ δ' ἄλλα κοῖλα μέχρι τινός, τὸ δ' ἔσχατον στερεόν. Τὸ μὲν οὖν κοῖλον ἐκ τοῦ δέρματος πέφυκε μᾶλλον· ὁ δὲ περὶ τοῦτο περιήρμωσται τὸ στερεὸν ἐκ τῶν ὀστέων, οἷον τὰ κέρατα τῶν βοῶν. Αποβάλλει δὲ τὰ κέρατα μόνον ἔλαφος κατ' ἔτος, ἀρξάμενος ἀπὸ διετοῦς, καὶ πάλιν φύει· τὰ δ' ἄλλα συνεχῶς ἔχει, ἐὰν μὴ τι βία πηρωθῇ.

Ἔτι δὲ περὶ τε τοὺς μαστοὺς ὑπεναντίως ἐν τοῖς ἄλλοις ζώοις ὑπάρχει πρὸς αὐτά τε καὶ πρὸς τὸν ἄνθρωπον, καὶ περὶ τὰ ὄργανα τὰ χρήσιμα πρὸς τὴν ὀχείαν. Τὰ μὲν γὰρ ἔμπροσθεν ἔχει τοὺς μαστοὺς ἐν τῷ στήθει ἢ πρὸς τῷ στήθει, καὶ δύο μαστοὺς καὶ δύο θηλάς, ὥσπερ ἄνθρωπος καὶ ἐλέφας, καθάπερ εἴρηται πρότερον. Καὶ γὰρ ὁ ἐλέφας ἔχει τοὺς μαστοὺς δύο περὶ τὰς μασχάλας· ἔχει δ' ἡ θήλεια τοὺς μαστοὺς μικροὺς παντελῶς καὶ οὐ κατὰ λόγον τοῦ σώματος, ὥστ' ἐκ τοῦ πλαγίου μὴ πάνυ ὀρᾶν· ἔχουσι δὲ καὶ οἱ ἄρρενες μαστούς, ὥσπερ αἱ θήλειαι, μικροὺς παντελῶς. Ἡ δ' ἄρκτος τέτταρας. Τὰ δὲ δύο μὲν μαστοὺς ἔχει, ἐν τοῖς μηροῖς δ' ἔχει, καὶ τὰς θηλάς δύο, ὥσπερ πρόβατον· τὰ δὲ τέτταρας θηλάς, ὥσπερ βοῦς. Τὰ δ' οὐτ' ἐν τῷ στήθει ἔχει τοὺς μαστοὺς οὐτ' ἐν τοῖς μηροῖς, ἀλλ' ἐν τῇ γαστρί, οἷον κύων καὶ ὕς, καὶ πολλοὺς, οὐ πάντας δ' ἴσους. Τὰ μὲν οὖν ἄλλα πλείους ἔχει, ἡ δὲ πάρδαλις τέτταρας ἐν τῇ γαστρί, ἡ δὲ λέαινα δύο ἐν τῇ γαστρί. Ἔχει δὲ καὶ ἡ κάμηλος μαστοὺς δύο καὶ θηλάς τέτταρας, ὥσπερ ὁ βοῦς. Τῶν δὲ μωνύχων τὰ ἄρρενα οὐκ ἔχουσι μαστούς, πλὴν ὅσα ἐοίκασιν τῇ μητρί, ὅπερ συμβαίνει ἐπὶ τῶν ἵππων.

Τὰ δ' αἰδοῖα τῶν μὲν ἄρρένων τὰ μὲν ἔξω ἔχει, οἷον ἄνθρωπος καὶ ἵππος καὶ ἄλλα πολλά, τὰ δ' ἐντός, (500b.) ὥσπερ δελφίς· καὶ τῶν ἔξω δ' ἐχόντων τὰ μὲν εἰς τὸ πρόσθεν, ὥσπερ καὶ τὰ εἰρημένα, καὶ τούτων τὰ μὲν ἀπολελυμένα καὶ τὸ αἰδοῖον καὶ τοὺς ὄρχεις, ὥσπερ ἄνθρωπος, τὰ δὲ πρὸς τῇ γαστρί καὶ τοὺς ὄρχεις καὶ τὸ αἰδοῖον, καὶ τὰ μὲν μᾶλλον τὰ δ' ἥττον ἀπολελυμένα· οὐ γὰρ ὡσαύτως ἀπολέλνται κάπρῳ καὶ ἵππῳ τοῦτο τὸ μόριον. Ἔχει δὲ καὶ ὁ ἐλέφας

τὸ αἰδοῖον ὅμοιον μὲν ἵππῳ, μικρὸν δὲ καὶ οὐκ ἀνὰ λόγον τοῦ σώματος, τοὺς δ' ὄρχεις οὐκ ἔξω φανερούς, ἀλλ' ἐντὸς περὶ τοὺς νεφρούς· διὸ καὶ ἐν τῇ ὀρχεῖᾳ ἀπαλλάττεται ταχέως. Ἡ δὲ θήλεια τὸ αἰδοῖον ἔχει ἐν τῷ τόπῳ οὗ τὰ οὐθατα τῶν προβάτων ἐστίν· ὅταν δ' ὀργᾷ ὀχεύεσθαι, ἀνασπᾷ ἄνω καὶ ἐκτρέπει πρὸς τὸν ἔξω τόπον, ὥστε ῥαδίαν εἶναι τῷ ἄρρενι τὴν ὀχείαν· ἀνέρρωγε δ' ἐπιεικῶς ἐπὶ πολὺ τὸ αἰδοῖον.

Τοῖς μὲν οὖν πλείστοις αὐτῶν τὰ αἰδοῖα τοῦτον ἔχει τὸν τρόπον· ἓνια δ' ὀπισθοιρητικά ἐστίν, οἷον λυγξ καὶ λέων καὶ κάμηλος καὶ δασύπους. Τὰ μὲν οὖν ἄρρενα ὑπεναντίως ἔχει ἀλλήλοις, καθάπερ εἴρηται, τὰ δὲ θήλεια πάντα ὀπισθοιρητικά ἐστίν· καὶ γὰρ ὁ θήλυς ἐλέφας ἔχει τὰ αἰδοῖα ὑπὸ τοῖς μηροῖς, καθάπερ καὶ τᾶλλα.

Τῶν δ' αἰδοίων διαφορὰ πολλή ἐστίν. Τὰ μὲν γὰρ ἔχει χονδρῶδες τὸ αἰδοῖον καὶ σαρκῶδες, ὥσπερ ἄνθρωπος· τὸ μὲν οὖν σαρκῶδες οὐκ ἐμφυσᾶται, τὸ δὲ χονδρῶδες ἔχει αὐξησιν. Τὰ δὲ νευρώδη, οἷον καμήλου καὶ ἐλάφου, τὰ δ' ὀστώδη, ὥσπερ ἀλώπεκος καὶ λύκου καὶ ἱκτιδος καὶ γαλῆς· καὶ γὰρ ἡ γαλῆ ὀστοῦν ἔχει τὸ αἰδοῖον.

Πρὸς δὲ τούτοις ὁ μὲν ἄνθρωπος τελειωθείς τὰ ἄνω ἔχει ἐλάττω τῶν κάτωθεν, τὰ δ' ἄλλα ζῶα, ὅσα ἔναιμα, τούναντίον. Λέγομεν δ' ἄνω τὸ ἀπὸ κεφαλῆς μέχρι τοῦ μορίου ἧ ἡ τοῦ περιττώματός ἐστιν ἔξοδος, κάτω δὲ τὸ ἀπὸ τούτου λοιπόν. Τοῖς μὲν οὖν ἔχουσι πόδας τὸ ὀπίσθιον ἐστὶ σκέλος τὸ κάτωθεν μέρος πρὸς τὸ μέγεθος, τοῖς δὲ μὴ ἔχουσιν οὐραὶ καὶ κέρκοι καὶ τὰ τοιαῦτα.

Τελειούμενα μὲν οὖν τοιαῦτ' ἐστίν, ἐν δὲ τῇ αὐξήσει διαφέρει· ὁ μὲν γὰρ ἄνθρωπος μεῖζω τὰ ἄνω ἔχει νέος ὢν ἢ τὰ κάτω, αὐξανόμενος δὲ μεταβάλλει (501a.) τούναντίον (διὸ καὶ μόνον οὐ τὴν αὐτὴν κίνησιν ποιεῖται τῆς πορείας νέος ὢν καὶ τελειωθείς, ἀλλὰ τὸ πρῶτον παιδίον ὃν ἔρπει τετραποδίζον), τὰ δ' ἀνὰ λόγον ἀποδίδωσι τὴν αὐξησιν, οἷον κύων. Ἐνια δὲ τὸ πρῶτον ἐλάττω τὰ ἄνω, τὰ δὲ κάτω μεῖζω ἔχει, αὐξανόμενα δὲ τὰ ἄνω γίνεται μεῖζω, ὥσπερ τὰ λοφοῦρα· τούτων γὰρ οὐδὲν γίνεται μεῖζον ὕστερον τὸ ἀπὸ τῆς ὀπλῆς μέχρι τοῦ ἰσχίου.

Ἔστι δὲ καὶ περὶ τοὺς ὀδόντας πολλὴ διαφορὰ τοῖς ἄλλοις ζῴοις καὶ πρὸς αὐτὰ καὶ πρὸς ἄνθρωπον. Ἐχει μὲν γὰρ πάντα ὀδόντας ὅσα τετράποδα καὶ ἔναιμα καὶ ζωοτόκα, ἀλλὰ πρῶτον τὰ μὲν ἐστὶ ἀμφώδοντα, τὰ δ' οὐκ ἀμφώδοντα. Ὅσα μὲν γὰρ ἐστὶ κερατοφόρα, οὐκ ἀμφώδοντα· οὐ γὰρ ἔχει τοὺς προσθίους ὀδόντας ἐπὶ τῆς ἄνω

σιαγόνος.

Ἔστι δ' ἓνια οὐκ ἀμφώδοντα καὶ ἀκέρατα, οἷον κάμηλος. Καὶ τὰ μὲν χαυλιόδοντα ἔχει, ὥσπερ οἱ ἄρρενες ὕες, τὰ δ' οὐκ ἔχει. Ἔτι δὲ τὰ μὲν ἐστὶ καρχαρόδοντα αὐτῶν, οἷον λέων καὶ πάρδαλις καὶ κύων, τὰ δ' ἀνεπάλλακτα, οἷον ἵππος καὶ βοῦς· καρχαρόδοντα γὰρ ἐστὶν ὅσα ἐπαλλάττει τοὺς ὀδόντας τοὺς ὀξεῖς. Ἄμα δὲ χαυλιόδοντα καὶ κέρας οὐδὲν ἔχει ζῶον, οὐδὲ καρχαρόδουν καὶ τούτων θάτερον. Τὰ δὲ πλεῖστα τοὺς προσθίους ἔχει ὀξεῖς, τοὺς δ' ἐντὸς πλατεῖς. Ἡ δὲ φώκη καρχαρόδουν ἐστὶ πᾶσι τοῖς ὀδοῦσιν, ὥς ἐπαλλάττουσα τῷ γένει τῶν ἰχθύων· οἱ γὰρ ἰχθύες πάντες σχεδὸν καρχαρόδοντές εἰσιν.

Διστοιχοὺς δ' ὀδόντας οὐδὲν ἔχει τούτων τῶν γενῶν. Ἔστι δέ τι, εἰ δεῖ πιστεῦσαι Κτησίᾳ· ἐκεῖνος γὰρ τὸ ἐν Ἰνδοῖς θηρίον, ᾧ ὄνομα εἶναι μαρτιχόραν, τοῦτ' ἔχειν ἐπ' ἀμφοτέρᾳ φησι τριστοιχοὺς τοὺς ὀδόντας· εἶναι δὲ μέγεθος μὲν ἡλίκον λέοντα καὶ δασὺ ὁμοίως, καὶ πόδας ἔχειν ὁμοίους, πρόσωπον δὲ καὶ ὦτα ἀνθρωποειδές, τὸ δ' ὄμμα γλαυκόν, τὸ δὲ χρῶμα κινναβάρινον, τὴν δὲ κέρκον ὁμοίαν τῇ τοῦ σκορπίου τοῦ χερσαίου, ἐν ᾗ κέντρον ἔχειν καὶ τὰς ἀποφυάδας ἀπακοντίζειν, φθέγγεσθαι δ' ὅμοιον φωνῇ ἅμα σύριγγος καὶ σάλπιγγος, ταχὺ δὲ θεῖν οὐχ ἥττον τῶν (501b.) ἐλάφων, καὶ εἶναι ἄγριον καὶ ἀνθρωποφάγον.

Ἄνθρωπος μὲν οὖν βάλλει τοὺς ὀδόντας, βάλλει δὲ καὶ ἄλλα τῶν ζώων, οἷον ἵππος καὶ ὀρεὺς καὶ ὄνος. Βάλλει δ' ἄνθρωπος τοὺς προσθίους, τοὺς δὲ γομφίους οὐδὲν βάλλει τῶν ζώων. Ὅμως δ' ὅλως οὐδένα βάλλει τῶν ὀδόντων.

Κεφάλαιο 2

Περὶ δὲ τῶν κυνῶν ἀμφισβητεῖται, καὶ οἱ μὲν ὅλως οὐκ οἶονται βάλλειν οὐδένα αὐτούς, οἱ δὲ τοὺς κυνόδοντας μόνον· ὥπται δ' ὅτι βάλλει καθάπερ καὶ ἄνθρωπος, ἀλλὰ λανθάνει διὰ τὸ μὴ βάλλειν πρότερον πρὶν ὑποφυῶσιν ἐντὸς ἴσοι. Ὅμοίως δὲ καὶ ἐπὶ τῶν ἄλλων τῶν ἀγρίων εἰκὸς συμβαίνειν, ἐπεὶ λέγονταί γε τοὺς κυνόδοντας μόνον βάλλειν. Τοὺς δὲ κύνας διαγινώσκουσι τοὺς νεωτέρους καὶ πρεσβυτέρους ἐκ τῶν ὀδόντων· οἱ μὲν γὰρ νέοι λευκοὺς ἔχουσι καὶ ὀξεῖς τοὺς ὀδόντας, οἱ δὲ πρεσβύτεροι μέλανας καὶ ἀμβλεῖς.

Κεφάλαιο 3

Ἐναντίως δὲ πρὸς τᾶλλα ζῶα καὶ ἐπὶ τῶν ἵππων συμβαίνει· τὰ μὲν γὰρ ἄλλα ζῶα πρεσβύτερα γινόμενα μελαντέρους ἔχει τοὺς ὀδόντας, ὁ δ' ἵππος λευκοτέρους.

Ὅριζουσι δὲ τοὺς τε ὀξεῖς καὶ τοὺς πλατεῖς οἱ καλούμενοι κυνόδοντες, ἀμφοτέρων μετέχοντες τῆς μορφῆς· κάτωθεν μὲν γὰρ πλατεῖς, ἄνωθεν δ' εἰσὶν ὀξεῖς.

Ἔχουσι δὲ πλείους οἱ ἄρρενες τῶν θηλειῶν ὀδόντας καὶ ἐν ἀνθρώποις καὶ ἐπὶ προβάτων καὶ αἰγῶν καὶ ὕων· ἐπὶ δὲ τῶν ἄλλων οὐ τεθεώρηταί πω.

Ὅσοι δὲ πλείους ἔχουσι, μακροβιώτεροι ὥς ἐπὶ τὸ πολὺ εἰσιν, οἱ δ' ἐλάττους καὶ ἀραιόδοντες ὥς ἐπὶ τὸ πολὺ βραχυβιώτεροι.

Κεφάλαιο 4

Φύονται δ' οἱ τελευταῖοι τοῖς ἀνθρώποις γόμφιοι, οὓς καλοῦσι κραντῆρας, περὶ τὰ εἴκοσιν ἔτη καὶ ἀνδράσι καὶ γυναιξίν. Ἦδη δέ τισι γυναιξὶ καὶ ὀγδοήκοντα ἐτῶν οὔσαις ἔφυσαν γόμφιοι ἐν τοῖς ἐσχάτοις, πόνον παρασχόντες ἐν τῇ ἀνατολῇ, καὶ ἀνδράσιν ὡσαύτως· τοῦτο δὲ συμβαίνει ὅσοις ἂν μὴ ἐν τῇ ἡλικίᾳ ἀνατείλωσιν οἱ κραντῆρες.

Κεφάλαιο 5

Ὁ δ' ἐλέφας ὀδόντας μὲν ἔχει τέτταρας ἐφ' ἐκάτερα, οἷς κατεργάζεται τὴν τροφήν (λεαίνει δ' ὥσπερ κρίμνα), χωρὶς δὲ τούτων ἄλλους δύο τοὺς μεγάλους. Ὁ μὲν οὖν ἄρρην τούτους ἔχει μεγάλους τε καὶ ἀνασίμους, ἡ δὲ θήλεια μικροὺς καὶ ἐξ (502a.) ἐναντίας τοῖς ἄρρεσιν· κάτω γὰρ οἱ ὀδόντες βλέπουσιν.

Κεφάλαιο 6

Ἔχει δ' ὁ ἐλέφας εὐθὺς γενόμενος ὀδόντας, τοὺς μέντοι μεγάλους ἀδήλους τὸ πρῶτον. Γλῶτταν δ' ἔχει μικράν τε σφόδρα καὶ ἐντός, ὥστε ἔργον ἐστὶν ἰδεῖν.

Κεφάλαιο 7

Ἔχουσι δὲ τὰ ζῷα καὶ τὰ μεγέθη διαφέροντα τοῦ στόματος. Τῶν μὲν γάρ ἐστι τὰ στόματα ἀνερρωγότα, ὥσπερ κυνὸς καὶ λέοντος καὶ πάντων τῶν καρχαροδόντων, τὰ δὲ μικρόστομα, ὥσπερ ἄνθρωπος, τὰ δὲ μεταξύ, οἷον τὸ τῶν ὕων γένος.

Ὁ δ' ἵππος ὁ ποτάμιος ὁ ἐν Αἰγύπτῳ χαίτην μὲν ἔχει ὥσπερ ἵππος, διχαλὸν δ' ἐστὶν ὥσπερ βοῦς, τὴν δ' ὄψιν σιμός. Ἔχει δὲ καὶ ἀστράγαλον ὥσπερ τὰ διχαλά, καὶ χαυλιόδοντας ὑποφαινομένους, κέρκον δ' ὕος, φωνὴν δ' ἵππου· μέγεθος δ' ἐστὶν ἡλίκον ὄνος. Τοῦ δὲ δέρματος τὸ πάχος ὥστε δόρατα ποιεῖσθαι ἐξ αὐτοῦ. Τὰ δ' ἐντὸς ἔχει ὅμοια ἵππῳ καὶ ὄνῳ.

Κεφάλαιο 8

Ἔνια δὲ τῶν ζώων ἐπαμφοτερίζει τὴν φύσιν τῷ τ' ἀνθρώπῳ καὶ τοῖς τετράποσιν, οἷον πίθηκοι καὶ κῆβοι καὶ κυνοκέφαλοι. Ἔστι δ' ὁ μὲν κῆβος πίθηκος ἔχων οὐράν. Καὶ οἱ κυνοκέφαλοι δὲ τὴν αὐτὴν ἔχουσι μορφήν τοῖς πιθήκοις, πλὴν μείζονές τ' εἰσὶ καὶ ἰσχυρότεροι καὶ τὰ πρόσωπα ἔχοντες κυνοειδέστερα, ἔτι δ' ἀγριώτερά τε τὰ ἦθη καὶ τοὺς ὀδόντας ἔχουσι κυνοειδεστέρους καὶ ἰσχυροτέρους. Οἱ δὲ πίθηκοι δασεῖς μὲν εἰσὶ τὰ πρηνῇ ὡς ὄντες τετράποδες, καὶ τὰ ὕπτια δ' ὡσαύτως ὡς ὄντες ἀνθρωποειδεῖς (τοῦτο γὰρ ἐπὶ τῶν ἀνθρώπων ἐναντίως ἔχει καὶ ἐπὶ τῶν τετραπόδων, καθάπερ ἐλέχθη πρότερον)· πλὴν ἢ τε θριξ παχεῖα, καὶ δασεῖς ἐπ' ἀμφοτέρα σφόδρα εἰσὶν οἱ πίθηκοι. Τὸ δὲ πρόσωπον ἔχει πολλὰς ὁμοιότητας τῷ τοῦ ἀνθρώπου· καὶ γὰρ μυκτῆρας καὶ ὦτα παραπλήσια ἔχει, καὶ ὀδόντας ὥσπερ ὁ ἄνθρωπος, καὶ τοὺς προσθίους καὶ τοὺς γομφίους.

Ἔτι δὲ βλεφαρίδας τῶν ἄλλων τετραπόδων ἐπὶ θάτερα οὐκ ἐχόντων οὗτος ἔχει μὲν λεπτὰς δὲ σφόδρα, καὶ μᾶλλον τὰς κάτω, καὶ μικρὰς πάμπαν· τὰ γὰρ ἄλλα τετράποδα ταύτας οὐκ ἔχει.

Ἔτι δ' ἐν τῷ στήθει δύο θηλὰς μαστῶν μικρῶν. Ἔχει δὲ καὶ βραχίονας ὥσπερ ἄνθρωπος, πλὴν (502b.) δασεῖς· καὶ κάμπτει καὶ τούτους καὶ τὰ σκέλη ὥσπερ ἄνθρωπος, τὰς περιφερείας πρὸς ἀλλήλας ἀμφοτέρων τῶν κώλων. Πρὸς δὲ τούτοις χεῖρας καὶ δακτύλους καὶ ὄνυχας ὁμοίους ἀνθρώπῳ, πλὴν πάντα ταῦτα ἐπὶ τὸ θηριωδέστερον.

Ἰδίους δὲ τοὺς πόδας· εἰσὶ γὰρ οἷον χεῖρες μεγάλαι, καὶ οἱ δάκτυλοι ὥσπερ οἱ τῶν χειρῶν, ὁ μέσος μακρότατος, καὶ τὸ κάτω τοῦ ποδὸς χειρὶ ὅμοιον, πλὴν ἐπιμηκέστερον τοῦ τῆς χειρός, ἐπὶ τὰ ἔσχατα τεῖνον, καθάπερ θέναρ· τοῦτο δ' ἐπ' ἄκρου σκληρότερον, κακῶς καὶ ἀμυδρῶς μιμούμενον πτέρνην. Κέχρηται δὲ τοῖς ποσὶν ἐπ' ἄμφω, καὶ ὡς χερσὶ καὶ ὡς ποσί, καὶ συγκάμπτει ὥσπερ χεῖρας. Ἔχει δὲ τὸν ἀγκῶνα καὶ τὸν μηρὸν βραχεῖς ὡς πρὸς τὸν βραχίονα καὶ τὴν κνήμην. Ὀμφαλὸν δ' ἐξέχοντα μὲν οὐκ ἔχει, σκληρὸν δέ τι κατὰ τὸν τόπον τοῦ ὀμφαλοῦ. Τὰ δ' ἄνω τοῦ κάτω πολὺ μείζονα ἔχει, ὥσπερ τὰ τετράποδα· σχεδὸν γὰρ ὡς πέντε πρὸς τρία ἐστίν. Καὶ διὰ τε ταῦτα καὶ διὰ τὸ τοὺς πόδας ἔχειν ὁμοίους χερσὶ καὶ ὥσπερανεῖ συγκειμένους ἐκ χειρὸς καὶ ποδός (ἐκ μὲν ποδὸς κατὰ τὸ τῆς πτέρνης

ἔσχατον, ἐκ δὲ χειρὸς τᾶλλα μέρη· καὶ γὰρ οἱ δάκτυλοι ἔχουσι τὸ καλούμενον θέναρ), διατελεῖ δὲ τὸν πλείω χρόνον τετράπουν ὃν μᾶλλον ἢ ὀρθόν· καὶ οὐτ' ἰσχία ἔχει ὡς τετράπουν ὃν οὔτε κέρκον ὡς δίπουν, πλὴν μικρὰν τὸ ὅλον, ὅσον σημείου χάριν. Ἔχει δὲ καὶ τὸ αἰδοῖον ἢ θήλεια ὅμοιον γυναικί, ὃ δ' ἄρρην κυνωδέστερον ἢ ὁ ἄνθρωπος.

Κεφάλαιο 9

Οἱ δὲ κῆβοι, καθάπερ εἴρηται πρότερον, ἔχουσι κέρκον. Τὰ δ' ἐντὸς διαιρεθέντα ὅμοια ἔχουσιν ἀνθρώπῳ πάντα τὰ τοιαῦτα.

Τὰ μὲν οὖν τῶν εἰς τὸ ἐκτὸς ζωοτοκούντων μόρια τοῦτον ἔχει τὸν τρόπον.

Κεφάλαιο 10

Τὰ δὲ τετράποδα μὲν ὠτόκα δὲ καὶ ἔναιμα (οὐδὲν δὲ ὠτοκεῖ χερσαῖον καὶ ἔναιμον μὴ τετράπουν ὃν ἢ ἄπουν) κεφαλὴν μὲν ἔχει καὶ αὐχένα καὶ νῶτον καὶ τὰ πρηνῆ καὶ τὰ ὕπτια τοῦ σώματος, ἔτι δὲ σκέλη πρόσθια καὶ ὀπίσθια καὶ τὸ ἀνάλογον τῷ στήθει, ὥσπερ τὰ ζῳτόκα τῶν τετραπόδων, καὶ κέρκον τὰ μὲν πλεῖστα μείζω, ὀλίγα δ' ἐλάττω. Πάντα δὲ πολυδάκτυλα καὶ πολυσχιδῆ ἐστί τὰ τοιαῦτα. Πρὸς δὲ τούτοις τὰ αἰσθητήρια καὶ γλῶτταν (503a.) πάντα, πλὴν ὁ ἐν Αἰγύπτῳ κροκόδειλος. Οὗτος δὲ παραπλησίως τῶν ἰχθύων τισίν· ὅλως μὲν γὰρ οἱ ἰχθύες ἀκανθώδη καὶ οὐκ ἀπολελυμένην ἔχουσι τὴν γλῶτταν, ἔνιοι δὲ πάμπαν λεῖον καὶ ἀδιάρθρωτον τὸν τόπον μὴ ἐγκλίναντι σφόδρα τὸ χεῖλος.

Ἦτα δ' οὐκ ἔχουσιν ἀλλὰ τὸν πόρον τῆς ἀκοῆς μόνον πάντα τὰ τοιαῦτα· οὐδὲ μαστούς, οὐδ' αἰδοῖον, οὐδ' ὄρχεις ἔξω φανεροὺς ἀλλ' ἐντός, οὐδὲ τρίχας, ἀλλὰ πάντ' ἐστὶ φολιδωτά. Ἔτι δὲ καρχαρόδοντα πάντα.

Οἱ δὲ κροκόδειλοι οἱ ποτάμιοι ἔχουσιν ὀφθαλμοὺς μὲν ὕος, ὀδόντας δὲ μεγάλους καὶ χαυλιόδοντας καὶ ὄνυχας ἰσχυροὺς καὶ δέρμα ἄρρηκτον φολιδωτόν· βλέπουσι δ' ἐν μὲν τῷ ὕδατι φαύλως, ἔξω δ' ὀξύτατον. Τὴν μὲν οὖν ἡμέραν ἐν τῇ γῇ τὸ πλεῖστον διατρίβει, τὴν δὲ νύκτα ἐν τῷ ὕδατι· ἀλεεινότερον γὰρ ἐστί τῆς αἰθρίας.

Κεφάλαιο 11

Ὁ δὲ χαμαιλέον ὅλον μὲν τοῦ σώματος ἔχει τὸ σχῆμα σαυροειδές, τὰ δὲ πλευρὰ κάτω καθήκει συνάπτοντα πρὸς τὸ ὑπογάστριον, καθάπερ τοῖς ἰχθύσι, καὶ ἡ ῥάχις ἐπανεστήκεν ὁμοίως τῇ τῶν ἰχθύων. Τὸ δὲ πρόσωπον ὁμοιότατον τῷ τοῦ χοιροπιθήκου. Κέρκον δ' ἔχει μακρὰν σφόδρα, εἰς λεπτὸν καθήκουσαν καὶ συνελιττομένην ἐπὶ πολὺ, καθάπερ ἱμάντα. Μετεωρότερος δ' ἐστὶ τῇ ἀπὸ τῆς γῆς ἀποστάσει τῶν σαύρων, τὰς δὲ καμπὰς τῶν σκελῶν καθάπερ οἱ σαῦροι ἔχει. Τῶν δὲ ποδῶν ἕκαστος αὐτοῦ διχῇ διήρηται εἰς μέρη θέσιν ὁμοίαν πρὸς αὐτὰ ἔχοντα οἴανπερ ὁ μέγας ἡμῶν δάκτυλος πρὸς τὸ λοιπὸν τῆς χειρὸς ἀντίθεσιν ἔχει. Ἐπὶ βραχὺ δὲ καὶ τούτων τῶν μερῶν ἕκαστον διήρηται εἰς τινὰς δακτύλους, τῶν μὲν ἔμπροσθεν ποδῶν τὰ μὲν πρὸς αὐτὸν τρίχα, τὰ δ' ἐκτὸς δίχα, τῶν δ' ὀπισθίων τὰ μὲν πρὸς αὐτὸν δίχα, τὰ δ' ἐκτὸς τρίχα. Ἐχει δὲ καὶ ὀνύχια ἐπὶ τούτων ὅμοια τοῖς τῶν γαμψωνύχων.

Τραχὺ δ' ἔχει ὅλον τὸ σῶμα, καθάπερ ὁ κροκόδειλος. Ὀφθαλμοὺς δ' ἔχει ἐν κοίλῳ τε κειμένους καὶ μεγάλους σφόδρα καὶ στρογγύλους καὶ δέρματι ὁμοίῳ τῷ τοῦ λοιποῦ σώματος περιεχομένους. Κατὰ μέσους δ' αὐτοὺς διαλέλειπται μικρὰ τῇ ὥσφι χώρα, δι' ἧς ὁρᾷ· οὐδέποτε δὲ τῷ δέρματι ἐπικαλύπτει τοῦτο. Στρέφει δὲ (503b.) τὸν ὀφθαλμὸν κύκλῳ τὴν ὥσιν ἐπὶ πάντας τοὺς τόπους μεταβάλλει, καὶ οὕτως ὁρᾷ ὃ βούλεται.

Τῆς δὲ χροιάς ἡ μεταβολὴ ἐμφυσωμένῳ αὐτῷ γίνεται· ἔχει δὲ καὶ μέλαιναν ταύτην, οὐ πόρρω τῆς τῶν κροκοδείλων, καὶ ὠχρὰν καθάπερ οἱ σαῦροι, μέλανι ὥσπερ τὰ παρδάλια διαπεποικιλμένην. Γίνεται δὲ καθ' ἅπαν τὸ σῶμα αὐτοῦ ἡ τοιαύτη μεταβολή· καὶ γὰρ οἱ ὀφθαλμοὶ συμμεταβάλλουσιν ὁμοίως τῷ λοιπῷ σώματι καὶ ἡ κέρκος. Ἡ δὲ κίνησις αὐτοῦ νωθῆς ἰσχυρῶς ἐστὶ, καθάπερ ἡ τῶν χελωνῶν. Καὶ ἀποθνήσκων τε ὠχρὸς γίνεται, καὶ τελευτήσαντος αὐτοῦ ἡ χροιά τοιαύτη ἐστίν.

Τὰ δὲ περὶ τὸν στόμαχον καὶ τὴν ἀρτηρίαν ὁμοίως ἔχει τοῖς σαύροις κείμενα. Σάρκα δ' οὐδαμοῦ ἔχει πλὴν πρὸς τῇ κεφαλῇ καὶ ταῖς σιαγόνσιν ὀλίγα σαρκία, καὶ περὶ ἄκραν τὴν τῆς κέρκου πρόσφυσιν. Καὶ αἷμα δ' ἔχει περὶ τε τὴν καρδίαν μόνον καὶ τὰ ὅμματα καὶ τὸν ἄνω τῆς καρδίας τόπον, καὶ ὅσα ἀπὸ τούτων φλέβια

ἀποτείνει· ἔστι δὲ καὶ ἐν τούτοις βραχὺ παντελῶς. Κεῖται δὲ καὶ ὁ ἐγκέφαλος ἀνώτερον μὲν ὀλίγω τῶν ὀφθαλμῶν, συνεχῆς δὲ τούτοις.

Περιαιρεθέντος δὲ τοῦ ἔξωθεν δέρματος τῶν ὀφθαλμῶν περιέχει τι διαλάμπον διὰ τούτων, οἷον κρίκος χαλκοῦς λεπτός.

Καθ' ἅπαν δ' αὐτοῦ τὸ σῶμα σχεδὸν διατείνουσιν ὑμένες πολλοὶ καὶ ἰσχυροὶ καὶ πολὺ ὑπερβάλλοντες τῶν περὶ τὰ λοιπὰ ὑπαρχόντων. Ἐνεργεῖ δὲ καὶ τῷ πνεύματι ἀνατετμημένος ὅλος ἐπὶ πολὺν χρόνον, βραχείας ἰσχυρῶς ἔτι κινήσεως ἐν αὐτῷ περὶ τὴν καρδίαν οὔσης, καὶ συνάγει διαφερόντως μὲν τὰ περὶ τὰ πλευρά, οὐ μὴν ἀλλὰ καὶ τὰ λοιπὰ μέρη τοῦ σώματος. Σπλῆνα δ' οὐδαμοῦ ἔχει φανερόν. Φωλεύει δὲ καθάπερ οἱ σαῦροι.

Κεφάλαιο 12

Ὅμοίως δ' ἔνια μόρια καὶ οἱ ὄρνιθες τοῖς εἰρημένοις ἔχουσι ζώοις· καὶ γὰρ κεφαλὴν καὶ αὐχένα πάντ' ἔχει καὶ νῶτον καὶ τὰ ὕπτια τοῦ σώματος καὶ τὸ ἀνάλογον τῷ στήθει· σκέλη δὲ δύο καθάπερ ἄνθρωπος μάλιστα τῶν ζώων· πλὴν κάμπτει εἰς τοῦπισθεν ὁμοίως τοῖς τετράποσιν, ὥσπερ εἴρηται πρότερον. Χεῖρας δ' οὐδὲ πόδας προσθίους ἔχει, ἀλλὰ πτέρυγας ἴδιον πρὸς τὰ ἄλλα ζῷα. Ἔτι δὲ τὸ ἰσχίον ὅμοιον (504a.) μηρῷ μακρὸν καὶ προσπεφυκὸς μέχρι ὑπὸ μέσην τὴν γαστέρα, ὥστε δοκεῖν διαιρούμενον μηρὸν εἶναι, τὸν δὲ μηρὸν μεταξὺ τῆς κνήμης, ἕτερόν τι μέρος. Μεγίστους δὲ τοὺς μηροὺς ἔχει τὰ γαμψώνυχα τῶν ὀρνίθων, καὶ τὸ στήθος ἰσχυρότερον τῶν ἄλλων.

Πολυώνυχοι δ' εἰσὶ πάντες οἱ ὄρνιθες, ἔτι δὲ πολυσχιδεῖς τρόπον τινὰ πάντες· τῶν μὲν γὰρ πλείστων διήρηνται οἱ δάκτυλοι, τὰ δὲ πλωτὰ στεγανόποδά ἐστι, διηρθρωμένους δ' ἔχει καὶ χωριστοὺς <τοὺς> δακτύλους. Εἰσὶ δ' ὅσοι αὐτῶν μετεωρίζονται πάντες τετραδάκτυλοι· τρεῖς μὲν γὰρ εἰς τὸ ἔμπροσθεν ἓνα δ' εἰς τὸ ὀπισθεν κείμενον ἔχουσιν οἱ πλείστοι ἀντὶ πτέρνης· ὀλίγοι δέ τινες δύο μὲν ἔμπροσθεν δύο δ' ὀπισθεν, οἷον ἡ καλουμένη ἴγξ. Αὕτη δ' ἐστὶ μικρῷ μὲν μείζων σπίζης, τὸ δ' εἶδος ποικίλον, ἴδια δ' ἔχει τὰ τε περὶ τοὺς δακτύλους καὶ τὴν γλῶτταν ὁμοίαν τοῖς ὄφεσιν· ἔχει γὰρ ἐπὶ μῆκος ἕκτασιν καὶ ἐπὶ τέτταρας δακτύλους, καὶ πάλιν συστέλλεται εἰς ἑαυτήν. Ἔτι δὲ περιστρέφει τὸν τράχηλον εἰς τοῦπίσω τοῦ λοιποῦ σώματος ἡρεμοῦντος, καθάπερ οἱ ὄφεις. Ὄνυχας δ' ἔχει μεγάλους μὲν ὁμοίως μέντοι πεφυκὸτας τοῖς τῶν κολοιῶν· τῇ δὲ φωνῇ τρίζει.

Στόμα δ' οἱ ὄρνιθες ἔχουσι μὲν ἴδιον δέ· οὔτε γὰρ χεῖλη οὔτ' ὀδόντας ἔχουσιν, ἀλλὰ ρύγχος, οὔτ' ὧτα οὔτε μυκτῆρας, ἀλλὰ τοὺς πόρους τούτων τῶν αἰσθήσεων, τῶν μὲν μυκτῆρων ἐν τῷ ρύγχει, τῆς δ' ἀκοῆς ἐν τῇ κεφαλῇ. Ὀφθαλμοὺς δὲ πάντες καθάπερ καὶ τᾶλλα ζῷα δύο, ἄνευ βλεφαρίδων. Μύουσι δ' οἱ βαρεῖς τῷ κάτω βλεφάρῳ, σκαρδαμύττουσι δ' ἐκ τοῦ κανθοῦ δέρματι ἐπιόντι πάντες, οἱ δὲ γλαυκῶδεις τῶν ὀρνίθων καὶ τῷ ἄνω βλεφάρῳ. Τὸ δ' αὐτὸ τοῦτο ποιοῦσι καὶ τὰ φολιδωτά, οἷον οἱ σαῦροι καὶ τᾶλλα τὰ ὁμοιογενῆ τούτοις τῶν ζώων· μύουσι γὰρ τῇ κάτω βλεφαρίδι πάντες, οὐ μέντοι σκαρδαμύττουσί γε ὥσπερ οἱ ὄρνιθες.

Ἔτι δ' οὔτε φολίδας οὔτε τρίχας ἔχουσιν, ἀλλὰ περὰ τὰ δὲ περὰ ἔχει καυλὸν ἅπαντα. Καὶ οὐρὰν μὲν οὐκ ἔχουσιν, ὀρροπύγιον δέ, οἱ μὲν μακροσκελεῖς καὶ στεγανόποδες βραχύ, οἱ δ' ἐναντίοι μέγα. Καὶ οὔτοι μὲν πρὸς τῇ γαστρὶ τοὺς πόδας ἔχοντες πέτονται, οἱ δὲ μικρορροπύγιοι ἐκτεταμένους.

Καὶ γλωτταν ἅπαντες, ταύτην δ' ἀνομοίαν· οἱ (504b.) μὲν γὰρ μακρὰν οἱ δὲ βραχεῖαν. Μάλιστα δὲ τῶν ζώων μετὰ τὸν ἄνθρωπον γράμματα φθέγγεται ἓνια τῶν ὀρνίθων γένη· τοιαῦτα δ' ἐστὶ τὰ πλατύγλωττα αὐτῶν μάλιστα.

Τὴν ἀλλὰ συνάγει καὶ διοίγει τὸν πόρον ὥστε μηδὲν κατιέναι τῶν ἐχόντων βάρος ἐπὶ τὸν πλεύμονα.

Γένη δ' ἓνια τῶν ὀρνίθων ἔχει καὶ πληκτρα· γαμψώνυχον δ' ἅμα καὶ πληκτρον ἔχον οὐδέν. Ἔστι δὲ τὰ μὲν γαμψώνυχα τῶν πτητικῶν, τὰ δὲ πληκτροφόρα τῶν βαρέων.

Ἔτι δ' ἓνια τῶν ὀρνέων λόφον ἔχουσι, τὰ μὲν αὐτῶν τῶν πτερῶν ἐπανεστηκότα, ὁ δ' ἄλεκτρον μόνος ἴδιον· οὔτε γὰρ σάρξ ἐστὶν οὔτε πόρρω σαρκὸς τὴν φύσιν.

Κεφάλαιο 13

Τῶν δ' ἐνύδρων ζώων τὸ τῶν ἰχθύων γένος ἐν ἀπὸ τῶν ἄλλων ἀφώρισται, πολλὰς περιέχον ιδέας. Κεφαλὴν μὲν γὰρ ἔχει καὶ τὰ πρηνῇ καὶ τὰ ὑπτία, ἐν ᾧ τόπων ἡ γαστήρ καὶ τὰ σπλάγχνα· καὶ ὀπίσθιον οὐραῖον συνεχὲς ἔχει καὶ ἄσχιστον· τοῦτο δ' οὐ πᾶσιν ὅμοιον. Αὐχένα δ' οὐδεὶς ἔχει ἰχθύς, οὐδὲ κῶλον οὐδέν, οὐδ' ὄρχεις ὅλως, οὔτ' ἐντὸς οὔτ' ἐκτός, οὐδὲ μαστοὺς. Τοῦτο μὲν οὖν ὅλως οὐδ' ἄλλο οὐδέν τῶν μὴ ζωοτοκοῦντων, οὐδὲ τὰ ζωοτοκοῦντα πάντα, ἀλλ' ὅσα εὐθύς ἐν αὐτοῖς ζωοτοκεῖ καὶ μὴ ὠοτοκεῖ πρῶτον. Καὶ γὰρ ὁ δελφὶς ζωοτοκεῖ, διὸ ἔχει μαστοὺς δύο, οὐκ ἄνω δ' ἀλλὰ πλησίον τῶν ἄρθρων. Ἐχει δ' οὐχ ὥσπερ τὰ τετράποδα ἐπιφανεῖς θηλάς, ἀλλ' οἶον ῥύακας δύο, ἐκατέρωθεν ἐκ τῶν πλαγίων ἓνα, ἐξ ὧν τὸ γάλα ῥεῖ· καὶ θηλάζεται ὑπὸ τῶν τέκνων παρακολουθούντων· καὶ τοῦτο ὥπται ἤδη ὑπὸ τινων φανερωῶς.

Οἱ δ' ἰχθύες, ὥσπερ εἴρηται, οὔτε μαστοὺς ἔχουσιν οὔτ' αἰδοίων πόρον ἐκτός οὐδένα φανερόν. Ἴδιον δ' ἔχουσι τὸ τε τῶν βραγχίων, ἧ τὸ ὕδωρ ἀφιάσι δεξάμενοι κατὰ τὸ στόμα, καὶ τὰ πτερύγια, οἱ μὲν πλεῖστοι τέτταρα, οἱ δὲ προμήκεις δύο, οἶον ἔγγελυς, δύο ὄντα πρὸς τὰ βράγχια. Ὁμοίως δὲ καὶ κεστρεῖς, οἶον ἐν Σιφαῖς οἱ ἐν τῇ λίμνῃ, δύο, καὶ ἡ καλουμένη ταινία ὡσαύτως. Ἐνια δὲ τῶν προμήκων οὐδὲ πτερύγια ἔχει, οἶον σμύραινα, οὐδὲ τὰ βράγχια διηρθρωμένα ὁμοίως τοῖς ἄλλοις ἰχθύσιν.

Αὐτῶν δὲ τῶν ἐχόντων βράγχια τὰ μὲν (505a.) ἔχει ἐπικάλυμμα τοῖς βραγχίοις, τὰ δὲ σελάχη πάντα ἀκάλυπτα. Καὶ τὰ μὲν ἔχοντα καλύμματα πάντα ἐκ πλαγίου ἔχει τὰ βράγχια, τῶν δὲ σελαχῶν τὰ μὲν πλατέα κάτω ἐν τοῖς ὑπτίοις, οἶον νάρκη καὶ βάτος, τὰ δὲ προμήκη ἐν τοῖς πλαγίοις, οἶον πάντα τὰ γαλεῶδη. Ὁ δὲ βάτραχος ἐκ πλαγίου μὲν ἔχει, καλυπτόμενα δ' οὐκ ἀκανθῶδει καλύμματι ὥσπερ οἱ μὴ σελαχῶδεις, ἀλλὰ δερματῶδει.

Ἐτι δὲ τῶν ἐχόντων βράγχια τῶν μὲν ἀπλᾶ ἐστὶ τὰ βράγχια, τῶν δὲ διπλᾶ· τὸ δ' ἔσχατον πρὸς τὸ σῶμα πάντων ἀπλοῦν. Καὶ πάλιν τὰ μὲν ὀλίγα βράγχια ἔχει, τὰ δὲ πλῆθος βραγχίων· ἴσα δ' ἐφ' ἐκάτερα πάντες. Ἐχει δ' ὁ ἐλάχιστος ἔχων ἐν ἐφ' ἐκάτερα βράγχιον, διπλοῦν δὲ τοῦτο, οἶον κάπρος· οἱ δὲ δύο ἐφ' ἐκάτερα, τὸ μὲν ἀπλοῦν τὸ δὲ διπλοῦν, οἶον γόγγρος καὶ σκάρως· οἱ δὲ τέτταρα ἐφ' ἐκάτερα ἀπλᾶ,

οἶον ἔλλοψ, συναγρίς, σμύραйна, ἔγγελυς· οἱ δὲ τέτταρα μὲν δίστοιχα δὲ πλὴν τοῦ ἐσχάτου, οἶον κίχλη καὶ πέρκη καὶ γλάνις καὶ κυπρίνος. Ἔχουσι δὲ καὶ οἱ γαλεώδεις διπλᾶ πάντες, καὶ πέντ' ἐφ' ἑκάτερα· ὁ δὲ ξιφίας ὀκτὼ διπλᾶ. Περὶ μὲν οὖν πλήθους βραγχίων ἐν τοῖς ἰχθύσι τοῦτον ἔχει τὸν τρόπον.

Ἔτι δὲ πρὸς τᾶλλα ζῶα οἱ ἰχθύες διαφέρουσι πρὸς τῇ διαφορᾷ τῇ περὶ τὰ βράγχια· οὔτε γὰρ ὥσπερ τῶν πεζῶν ὅσα ζωοτόκα ἔχει τρίχας, οὔθ' ὥσπερ ἕνια τῶν ὠοτοκούντων τετραπόδων φολίδας, οὔθ' ὥς τὸ τῶν ὀρνέων γένος πτερωτόν, ἀλλ' οἱ μὲν πλεῖστοι αὐτῶν λεπιδωτοὶ εἰσιν, ὀλίγοι δὲ τινες τραχεῖς, ἐλάχιστον δ' ἐστὶ πλῆθος αὐτῶν τὸ λεῖον. Τῶν μὲν οὖν σελαχῶν τὰ μὲν τραχεὰ ἐστὶ τὰ δὲ λεῖα, γόγγρος δὲ καὶ ἔγγελυς καὶ θύννος τῶν λείων.

Καρχαρόδοντες δὲ πάντες οἱ ἰχθύες ἔξω τοῦ σκάρου· καὶ πάντες ἔχουσιν ὀξεῖς τοὺς ὀδόντας καὶ πολυστοίχους, καὶ ἔνιοι ἐν τῇ γλώττῃ. Καὶ γλῶτταν σκληρὰν καὶ ἀκανθώδη ἔχουσι, καὶ προσπεφυκυῖαν οὕτως ὥστ' ἐνίστε μὴ δοκεῖν ἔχειν.

Τὸ δὲ στόμα οἱ μὲν ἀνερρωγός, ὥσπερ ἕνια τῶν ζωοτοκούντων καὶ τετραπόδων. Τῶν δ' αἰσθητηρίων τῶν μὲν ἄλλων οὐδὲν ἔχουσι φανερόν οὔτ' αὐτὸ οὔτε τοὺς πόρους, οὔτ' ἀκοῆς οὔτ' ὁσφρήσεως· ὀφθαλμοὺς δὲ πάντες ἔχουσιν ἄνευ βλεφάρων, οὐ (505b.) σκληρόφθαλμοι ὄντες.

Ἐναιμιον μὲν οὖν ἐστὶν ἅπαν τὸ τῶν ἰχθύων γένος, εἰσὶ δ' αὐτῶν οἱ μὲν ὠοτόκοι οἱ δὲ ζωοτόκοι, οἱ μὲν λεπιδωτοὶ πάντες ὠοτόκοι, τὰ δὲ σελάχη πάντα ζωοτόκα πλὴν βατράχου.

Κεφάλαιο 14

Λοιπὸν δὲ τῶν ἐναίμων ζώων τὸ τῶν ὄφεων γένος. Ἔστι δὲ κοινὸν ἀμφοῖν· τὸ μὲν γὰρ πλεῖστον αὐτῶν χερσαῖόν ἐστιν, ὀλίγον δὲ τὸ τῶν ἐνύδρων ἐν τοῖς ποτίμοις ὕδασι διατελεῖ.

Εἰσὶ δὲ καὶ θαλάττιοι ὄφεις, παραπλήσιοι τὴν μορφήν τοῖς χερσαίοις τᾶλλα· πλὴν τὴν κεφαλὴν ἔχουσι γογγοειδεστέραν. Γένη δὲ πολλὰ τῶν θαλαττίων ὄφεων ἐστι, καὶ χροῖαν ἔχουσι παντοδαπὴν· οὐ γίνονται δ' οὗτοι ἐν τοῖς σφόδρα βαθέσιν. Ἀποδες δ' εἰσὶν οἱ ὄφεις ὥσπερ τὸ τῶν ἰχθύων γένος.

Εἰσὶ δὲ καὶ σκολόπενδραι θαλάττιαι, παραπλήσιαι τὸ εἶδος ταῖς χερσαίαις, τὸ δὲ μέγεθος μικρῷ ἐλάττους· γίνονται δὲ περὶ τοὺς πετρώδεις τόπους. Τὴν δὲ χροῖάν εἰσιν ἐρυθρότεραι καὶ πολύποδες μᾶλλον καὶ λεπτοσκελέστεραι τῶν χερσαίων. Οὐ γίνονται δ' οὐδ' αὗται, ὥσπερ οὐδ' οἱ ὄφεις, ἐν τοῖς βαθέσι σφόδρα.

Ἔστι δ' ἰχθύδιόν τι τῶν πετραιῶν, ὃ καλοῦσιν τινες ἐχενηΐδα, καὶ χρῶνται τινες αὐτῷ πρὸς δίκας καὶ φίλτρα· ἔστι δ' ἄβρωτον· τοῦτο δ' ἔνιοί φασιν ἔχειν πόδας οὐκ ἔχον, ἀλλὰ φαίνεται διὰ τὸ τὰς πτέρυγας ὁμοίας ἔχειν ποσίν.

Τὰ μὲν οὖν ἔξω μόρια, καὶ πόσα καὶ ποῖα τῶν ἐναίμων ζώων, καὶ τίνας ἔχει πρὸς ἄλληλα διαφοράς, εἴρηται.

Κεφάλαιο 15

Τὰ δ' ἐντὸς πῶς ἔχει, λεκτέον ἐν τοῖς ἐναίμοις ζώοις πρῶτον· τούτῳ γὰρ διαφέρει τὰ μέγιστα γένη πρὸς τὰ λοιπὰ τῶν ἄλλων ζώων, τῷ τὰ μὲν ἔναιμα τὰ δ' ἄναιμα εἶναι.

Ἔστι δὲ ταῦτα ἀνθρωπὸς τε καὶ τὰ ζωοτόκα τῶν τετραπόδων, ἔτι δὲ καὶ τὰ φωτόκα τῶν τετραπόδων καὶ ὄρνις καὶ ἰχθὺς καὶ κῆτος, καὶ εἴ τι ἄλλο ἀνώνυμόν ἐστι διὰ τὸ μὴ εἶναι γένος ἄλλ' ἀπλοῦν τὸ εἶδος ἐπὶ τῶν καθ' ἕκαστον, οἷον ὄφιν καὶ κροκόδειλον.

Ὅσα μὲν οὖν ἐστι τετράποδα καὶ ζωοτόκα, στόμαχον μὲν καὶ ἀρτηρίαν πάντ' ἔχει, καὶ κείμενα τὸν αὐτὸν τρόπον ὥσπερ ἐν τοῖς ἀνθρώποις· ὁμοίως δὲ καὶ ὅσα φωτοκεῖ τῶν τετραπόδων, καὶ ἐν τοῖς ὄρνιθιν· ἀλλὰ τοῖς (506a.) εἶδеси τῶν μορίων τούτων διαφέρουσιν. Ὅλως δὲ πάντα ὅσα τὸν ἀέρα δεχόμενα ἀναπνεῖ καὶ ἐκπνεῖ, πάντ' ἔχει πλεύμονα καὶ ἀρτηρίαν καὶ στόμαχον, καὶ τὴν θέσιν τοῦ στομάχου καὶ τῆς ἀρτηρίας ὁμοίως, ἀλλ' οὐχ ὅμοια, τὸν δὲ πλεύμονα οὐθ' ὅμοιον οὔτε τῇ θέσει ὁμοίως ἔχοντα.

Ἔτι δὲ καρδίαν ἅπαντ' ἔχει ὅσα αἷμα ἔχει, καὶ τὸ διάζωμα, ὃ καλοῦνται φρένες· ἀλλ' ἐν τοῖς μικροῖς διὰ λεπτότητα καὶ σμικρότητα οὐ φαίνεται ὁμοίως, πλὴν ἐν τῇ καρδίᾳ. Ἴδιον δ' ἐστὶν ἐπὶ τῶν βοῶν· ἐστι γάρ τι γένος βοῶν, ἀλλ' οὐ πάντες, ὃ ἔχει ἐν τῇ καρδίᾳ ὅσπου. Ἔχει δὲ καὶ ἡ τῶν ἵππων καρδία ὅσπου.

Πλεύμονα δ' οὐ πάντα, οἷον ἰχθὺς οὐκ ἔχει, οὐδ' εἴ τι ἄλλο τῶν ζώων ἔχει βράγχια. Καὶ ἦπαρ ἅπαντ' ἔχει ὅσαπερ αἷμα. Σπλῆνα δὲ τὰ πλεῖστα ἔχει ὅσαπερ καὶ αἷμα. Τὰ δὲ πολλὰ τῶν μὴ ζωοτόκων ἀλλ' φωτόκων μικρὸν ἔχει τὸν σπλῆνα οὕτως ὥστε λανθάνειν ὀλίγου τὴν αἴσθησιν, ἐν τε τοῖς ὄρνιθιν τοῖς πλείστοις, οἷον ἐν περιστερᾷ καὶ ἰκτίνῳ καὶ ἰέρακι καὶ γλαυκί· ὃ δ' αἰγοκέφαλος ὅλως οὐκ ἔχει. Καὶ ἐπὶ τῶν φωτόκων δὲ καὶ τετραπόδων τὸν αὐτὸν τρόπον ἔχει· μικρὸν γὰρ πάμπαν ἔχουσι καὶ ταῦτα, οἷον χελώνη, ἐμύς, φρύνη, σαῦρος, κροκόδειλος, βάτραχος.

Χολήν δὲ τῶν ζώων τὰ μὲν ἔχει τὰ δ' οὐκ ἔχει ἐπὶ τῷ ἥπατι. Τῶν μὲν ζωοτόκων καὶ τετραπόδων ἔλαφος οὐκ ἔχει οὐδὲ πρόξ, ἔτι δ' ἵππος, ὄρεύς, ὄνος, φώκη καὶ τῶν ὑῶν ἐνιοί. Τῶν δ' ἐλάφων αἱ ἀχαῖναι καλούμεναι δοκοῦσιν ἔχειν ἐν τῇ κέρκῳ χολήν· ἐστὶ δ' ὃ λέγουσι τὸ μὲν χρῶμα ὅμοιον χολῇ, οὐ μέντοι ὅλον ὑγρὸν οὕτως,

ἀλλ' ὅμοιον τῷ τοῦ σπληνὸς τὰ ἐντός.

Σκώληκας μέντοι πάντες ἔχουσιν ἐν τῇ κεφαλῇ ζῶντας· ἐγγίνονται δ' ὑποκάτω τοῦ ὑπογλωττίου ἐν τῷ κοίλῳ καὶ περὶ τὸν σφόνδυλον, ἧ ἡ κεφαλὴ προσπέφυκε, τὸ μέγεθος οὐκ ἐλάττους ὄντες τῶν μεγίστων εὐλῶν· ἐγγίνονται δ' ἄθροοι καὶ συνεχεῖς, τὸν ἀριθμὸν δ' εἰσὶ μάλιστα περὶ εἴκοσι.

Χολὴν μὲν οὖν οὐκ ἔχουσιν οἱ ἔλαφοι, ὥσπερ εἴρηται· τὸ δ' ἔντερον αὐτῶν ἐστι πικρὸν οὕτως ὥστε μηδὲ τοὺς κύνας ἐθέλειν ἐσθίειν, ἂν μὴ (506b.) σφόδρα πίων ἧ ὁ ἔλαφος. Ἔχει δὲ καὶ ὁ ἐλέφας τὸ ἥπαρ ἄχολον μὲν, τεμνομένου μέντοι περὶ τὸν τόπον οὗ τοῖς ἔχουσιν ἐπιφύεται ἡ χολή, ῥεῖ ὑγρότης χολώδης ἢ πλείων ἢ ἐλάττων.

Τῶν δὲ δεχομένων τὴν θάλατταν καὶ ἐχόντων πλεύμονα δελφίς οὐκ ἔχει χολήν. Οἱ δ' ὄρνια καὶ οἱ ἰχθύες πάντες ἔχουσι, καὶ τὰ φωτόκα καὶ τετράποδα, καὶ ὡς ἐπίπαν εἰπεῖν ἢ πλείω ἢ ἐλάττω· ἀλλ' οἱ μὲν πρὸς τῷ ἥπατι τῶν ἰχθύων, οἷον οἱ τε γαλεῶδεις καὶ γλάνις καὶ ῥίνη καὶ λειόβατος καὶ νάρκη καὶ τῶν μακρῶν ἔγχελυσ καὶ βελόνη καὶ ζύγαινα. Ἔχει δὲ καὶ ὁ καλλιώνυμος ἐπὶ τῷ ἥπατι, ὅσπερ ἔχει μεγίστην τῶν ἰχθύων ὡς κατὰ μέγεθος. Οἱ δὲ πρὸς τοῖς ἐντέροις ἔχουσιν, ἀποτεταμένην ἀπὸ τοῦ ἥπατος πόροις ἐνίοις πάνυ λεπτοῖς. Ἡ μὲν οὖν ἀμία παρὰ τὸ ἔντερον παρατεταμένην ἰσομήκη ἔχει, πολλάκις δὲ καὶ ἐπαναδίπλωμα· οἱ δ' ἄλλοι πρὸς τοῖς ἐντέροις, οἱ μὲν πορρώτερον οἱ δ' ἐγγύτερον, οἷον βάτραχος, ἔλοψ, συναγρία, σμύραινα, ξιφίας. Πολτάκις δὲ καὶ τὸ αὐτὸ γένος ἐπ' ἀμφοτέρα φαίνεται ἔχον, οἷον γόγγροι οἱ μὲν πρὸς τῷ ἥπατι, οἱ δὲ κάτω ἀπηρητημένην. Ὁμοίως δ' ἔχει τοῦτο καὶ ἐπὶ τῶν ὀρνίθων· ἐνιοὶ γὰρ πρὸς τῇ κοιλίᾳ ἔχουσιν, οἱ δὲ πρὸς τοῖς ἐντέροις τὴν χολήν, οἷον περιστερὰ, κόραξ, ὄρνυξ, χελιδὼν, στρουθός. Ἐνιοὶ δ' ἅμα πρὸς τῷ ἥπατι ἔχουσι καὶ πρὸς τῇ κοιλίᾳ, οἷον αἰγοκέφαλος, οἱ δ' ἅμα πρὸς τῷ ἥπατι καὶ τοῖς ἐντέροις, οἷον ἰέραξ καὶ ἰκτίνος.

Κεφάλαιο 16

Νεφρούς δὲ καὶ κύστιν τὰ μὲν ζωτόκα τῶν τετραπόδων πάντ' ἔχει· ὅσα δ' ὀφοτοκεῖ, τῶν μὲν ἄλλων οὐδὲν ἔχει, οἶον οὔτ' ὄρνις οὔτ' ἰχθύς, τῶν δὲ τετραπόδων μόνη χελώνη ἢ θαλαττία μέγεθος κατὰ λόγον τῶν ἄλλων μορίων. Ὅμοίους δ' ἔχει τοὺς νεφροὺς ἢ θαλαττία χελώνη τοῖς βοείοις· ἔστι δ' ὁ τοῦ βοὸς οἶον ἐκ πολλῶν μικρῶν εἰς συγκείμενος. Ἔχει δὲ καὶ ὁ βόνασος τὰ ἐντὸς ἅπαντα ὅμοια βοῖ.

Κεφάλαιο 17

Τῇ δὲ θέσει, ὅσα ἔχει ταῦτα τὰ μόρια, ὁμοίως κείμενα ἔχει, τὴν τε καρδίαν περὶ τὸ μέσον, πλὴν ἐν (507a.) ἀνθρώπῳ· οὗτος δ' ἐν τῷ ἀριστερῷ μᾶλλον μέρει, καθάπερ ἐλέχθη πρότερον. Ἐχει δὲ καὶ τὸ ὀξύ ἢ καρδιά πάντων εἰς τὸ πρόσθεν· πλὴν ἐπὶ τῶν ἰχθύων οὐκ ἂν δόξειεν· οὐ γὰρ πρὸς τὸ στήθος ἔχει τὸ ὀξύ, ἀλλὰ πρὸς τὴν κεφαλὴν καὶ τὸ στόμα. Ἀνήρτηται δ' αὐτῶν τὸ ἄκρον ἢ συνάπτει τὰ βράγχια ἀλλήλοις τὰ δεξιὰ καὶ τὰ ἀριστερά. Εἰσὶ δὲ καὶ ἄλλοι πόροι τεταμένοι ἐξ αὐτῆς εἰς ἕκαστον τῶν βραγχίων, μείζους μὲν τοῖς μείζουσιν, ἐλάττους δὲ τοῖς ἐλάττους· ὁ δ' ἐπ' ἄκρας τῆς καρδίας τοῖς μεγάλοις αὐτῶν σφόδρα παχὺς αὐλὸς ἐστὶ καὶ λευκός. Στόμαχον δ' ὀλίγοι ἔχουσι τῶν ἰχθύων, οἷον γόγγρος καὶ ἔγγελυς, καὶ οὗτοι μικρόν.

Καὶ τὸ ἦπαρ τοῖς ἔχουσι τοῖς μὲν ἀσχιδὲς ἔχουσιν ἐστὶν ἐν τοῖς δεξιοῖς ὅλον, τοῖς δ' ἐσχισμένον ἀπ' ἀρχῆς τὸ μείζον ἐν τοῖς δεξιοῖς. Ἐνίοις γὰρ ἐκάτερον τὸ μόριον ἀπήρτηται καὶ οὐ συμπέφυκεν ἢ ἀρχῇ, οἷον τῶν τ' ἰχθύων τοῖς γαλεώδεσι, καὶ δασυπόδων τι γένος ἐστὶ καὶ ἄλλοθι καὶ περὶ τὴν λίμνην τὴν Βόλβην ἐν τῇ καλουμένῃ Συκίνῃ, οὓς ἂν τις δόξειε δύο ἦπατα ἔχειν διὰ τὸ πόρρω τοὺς πόρους συνάπτειν, ὥσπερ καὶ ἐπὶ τοῦ τῶν ὀρνίθων πλεύμονος.

Καὶ ὁ σπλὴν δ' ἐστὶ πᾶσιν ἐν τοῖς ἀριστεροῖς κατὰ φύσιν, καὶ οἱ νεφροὶ τοῖς ἔχουσι κείμενοι τὸν αὐτὸν τρόπον· ἤδη δὲ διανοιχθέν τι τῶν τετραπόδων ὥφθη ἔχον τὸν σπλῆνα μὲν ἐν τοῖς δεξιοῖς, τὸ δ' ἦπαρ ἐν τοῖς ἀριστεροῖς· ἀλλὰ τὰ τοιαῦτα ὡς τέρατα κρίνεται.

Τείνει δ' ἢ μὲν ἀρτηρία πᾶσιν εἰς τὸν πλεύμονα (ὄν δὲ τρόπον, ὕστερον ἐροῦμεν), ὁ δὲ στόμαχος εἰς τὴν κοιλίαν διὰ τοῦ διαζώματος, ὅσα ἔχει στόμαχον· οἱ γὰρ ἰχθύες, ὥσπερ εἴρηται πρότερον, οἱ πλείστοι οὐκ ἔχουσιν, ἀλλ' εὐθύς πρὸς τὸ στόμα συνάπτει ἢ κοιλία, διὸ πολλάκις ἐνίοις τῶν μεγάλων διώκουσι τοὺς ἐλάττους προπίπτει ἢ κοιλία εἰς τὸ στόμα.

Ἐχει δὲ κοιλίαν πάντα μὲν τὰ εἰρημένα, καὶ κειμένην ὁμοίως (κεῖται γὰρ ὑπὸ τὸ διάζωμα εὐθύς), καὶ τὸ ἔντερον ἐχόμενον καὶ τελευτῶν πρὸς τὴν ἔξοδον τῆς τροφῆς καὶ τὸν καλούμενον ἀρχόν. Ἀνομοίας δ' ἔχουσι τὰς κοιλίας.

Πρῶτον μὲν γὰρ τῶν τετραπόδων καὶ ζωοτόκων ὅσα μὴ ἔστιν

ἀμφώδοντα τῶν κερατοφόρων, τέτταρας ἔχει τοὺς τοιοῦτους πόρους· ἃ δὴ καὶ λέγεται μηρυκάζειν. Διήκει γὰρ ὁ μὲν στόμαχος ἀπὸ τοῦ στόματος ἀρξάμενος ἐπὶ τὰ κάτω παρὰ (507b.) τὸν πλεύμονα, ἀπὸ τοῦ διαζώματος ἐπὶ τὴν κοιλίαν τὴν μεγάλην· αὕτη δ' ἐστὶ τὰ ἔσω τραχεῖα καὶ διειλημμένη.

Συνήρτηται δ' αὕτῃ πλησίον τῆς τοῦ στομάχου προσβολῆς ὁ καλούμενος κεκρύφαλος ἀπὸ τῆς ὥσεως· ἔστι γὰρ τὰ μὲν ἔξωθεν ὅμοιος τῇ κοιλίᾳ, τὰ δ' ἐντὸς ὅμοιος τοῖς πλεκτοῖς κεκρυφάλοις· μεγέθει δὲ πολὺ ἐλάττων ἐστὶν ὁ κεκρύφαλος τῆς κοιλίας. Τούτου δ' ἔχεται ὁ ἐχῖνος, τὰ ἐντὸς ὧν τραχὺς καὶ πλακώδης, τὸ δὲ μέγεθος παραπλήσιος τῷ κεκρυφάλῳ.

Μετὰ δὲ τοῦτον τὸ καλούμενον ἥνυστρον ἐστὶ, τῷ μὲν μεγέθει τοῦ ἐχίνου μεῖζον, τὸ δὲ σχῆμα προμηκέστερον· ἔχει δ' ἐντὸς πλάκας πολλὰς καὶ μεγάλας καὶ λείας. Ἀπὸ δὲ τούτου τὸ ἔντερον ἦδη.

Τὰ μὲν οὖν κερατοφόρα καὶ μὴ ἀμφώδοντα τοιαύτην ἔχει τὴν κοιλίαν, διαφέρει δὲ πρὸς ἄλληλα τοῖς σχήμασι καὶ τοῖς μεγέθεσι τούτων τε καὶ τῷ τὸν στόμαχον εἰς μέσην ἢ πλαγίαν τείνειν τὴν κοιλίαν. Τὰ δ' ἀμφώδοντα μίαν ἔχει κοιλίαν, οἷον ἄνθρωπος, ὕς, κύων, ἄρκτος, λέων, λύκος. Ἔχει δὲ καὶ ὁ θῶς πάντα τὰ ἐντὸς ὅμοια λύκῳ.

Πάντα μὲν οὖν ἔχει μίαν κοιλίαν, καὶ μετὰ ταῦτα τὸ ἔντερον· ἀλλὰ τὰ μὲν ἔχει μεῖζω τὴν κοιλίαν, ὥσπερ ὕς καὶ ἄρκτος (καὶ ἡ γὰρ τῆς ὑδὸς ὀλίγας ἔχει λείας πλάκας), τὰ δὲ πολὺ ἐλάττω καὶ οὐ πολλῶ μεῖζω τοῦ ἐντέρου, καθάπερ λέων καὶ κύων καὶ ἄνθρωπος. Καὶ τῶν ἄλλων δὲ τὰ εἶδη διέστηκε πρὸς τὰς τούτων κοιλίας· τὰ μὲν γὰρ ὅμοιαν ἔχει τὰ δὲ κυνί, καὶ τὰ μεῖζω καὶ τὰ ἐλάττω τῶν ζῶων ὡσαύτως. Διαφορὰ δὲ καὶ ἐν τούτοις κατὰ τὰ μεγέθη καὶ τὰ σχήματα καὶ πάχῃ καὶ λεπτότητις ὑπάρχει τὰς τῆς κοιλίας, καὶ κατὰ τὴν τοῦ στομάχου τῇ θέσει σύντηρσιν.

Διαφέρει δὲ καὶ ἡ τῶν ἐντέρων φύσις ἐκατέροις τῶν εἰρημένων ζῶων, τοῖς τε μὴ ἀμφώδουσι καὶ τοῖς ἀμφώδουσι, τῷ μεγέθει καὶ πάχει καὶ ταῖς ἐπαναδιπλώσεσιν. Πάντα δὲ μεῖζω τὰ τῶν μὴ ἀμφωδόντων ἐστίν· καὶ γὰρ αὐτὰ πάντα μεῖζω· μικρὰ μὲν γὰρ ὀλίγα, πᾶμπαν δὲ μικρὸν οὐδὲν ἐστὶ κερατοφόρον. Ἔχουσι δ' ἓν καὶ ἀποφυάδας τῶν ἐντέρων, εὐθυέντερον δ' οὐδὲν ἐστὶ μὴ ἀμφώδουν. Ὁ δ' ἐλέφας ἔντερον ἔχει συμφύσεις ἔχον, ὥστε φαίνεσθαι τέτταρας κοιλίας ἔχειν. Ἐν τούτῳ καὶ ἡ τροφή ἐγγίνεται, χωρὶς δ' οὐκ ἔχει

ἀγγεῖον. Καὶ τὰ σπλάγχνα ἔχει παραπλήσια τοῖς (508a.) ὑείοις, πλὴν τὸ μὲν ἦπαρ τετραπλάσιον τοῦ βοείου καὶ τᾶλλα, τὸν δὲ σπλῆνα ἐλάττω ἢ κατὰ λόγον.

Τὸν αὐτὸν δὲ τρόπον ἔχει τὰ περὶ τὴν κοιλίαν καὶ τὴν τῶν ἐντέρων φύσιν καὶ τοῖς τετράποσι μὲν τῶν ζῴων ὠτόκοις δέ, οἷον χελώνη χερσαία καὶ χελώνη θαλαττία καὶ σαύρα καὶ τοῖς κροκοδείλοις ἀμφοῖν καὶ πᾶσιν ὅλως τοῖς τοιούτοις· ἀπλὴν τε γὰρ ἔχουσι καὶ μίαν τὴν κοιλίαν, καὶ τὰ μὲν ὁμοίαν τῇ ὑείᾳ, τὰ δὲ τῇ τοῦ κυνός.

Τὸ δὲ τῶν ὄφεων γένος ὁμοίον ἐστὶ καὶ ἔχει παραπλήσια σχεδὸν πάντα τῶν πεζῶν καὶ ὠτόκων τοῖς σαύροις, εἴ τις μῆκος ἀποδοὺς αὐτοῖς ἀφέλοι τοὺς πόδας. Φολιδωτόν τε γάρ ἐστι, καὶ τὰ πρηνῆ καὶ τὰ ὕπτια παραπλήσια τούτοις ἔχει· πλὴν ὄρχεις οὐκ ἔχει, ἀλλ' ὥσπερ ἰχθὺς δύο πόρους εἰς ἓν συνάπτοντας καὶ τὴν ὑστέραν μακρὰν καὶ δικρόαν. Τὰ δ' ἄλλα τὰ ἐντὸς τὰ αὐτὰ τοῖς σαύροις, πλὴν ἅπαντα διὰ τὴν στενότητα καὶ τὸ μῆκος στενὰ καὶ μακρὰ τὰ σπλάγχνα, ὥστε καὶ λανθάνειν διὰ τὴν ὁμοιότητα τῶν σχημάτων· τὴν τε γὰρ ἀρτηρίαν ἔχει σφόδρα μακράν, ἔτι δὲ μακρότερον τὸν στόμαχον. Ἀρχὴ δὲ τῆς ἀρτηρίας πρὸς αὐτῷ ἐστὶ τῷ στόματι, ὥστε δοκεῖν ὑπὸ ταύτην εἶναι τὴν γλῶτταν. Προέχειν δὲ δοκεῖ τῆς γλώττης ἡ ἀρτηρία διὰ τὸ συσπᾶσθαι τὴν γλῶτταν καὶ μὴ μένειν ὥσπερ τοῖς ἄλλοις. Ἔστι δ' ἡ γλῶττα λεπτὴ καὶ μακρὰ καὶ μέλαινα, καὶ ἐξέρχεται μέχρι πόρρω. Ἴδιον δὲ παρὰ τὰς τῶν ἄλλων γλώττας ἔχουσι καὶ οἱ ὄφεις καὶ οἱ σαῦροι τὸ δικρόαν αὐτῶν εἶναι τὴν γλῶτταν ἄκραν, πολὺ δὲ μάλιστα οἱ ὄφεις· τὰ γὰρ ἄκρα αὐτῶν ἐστὶ λεπτά ὥσπερ τρίχες.

Ἔχει δὲ καὶ ἡ φώκη ἐσχισμένην τὴν γλῶτταν.

Τὴν δὲ κοιλίαν ὁ ὄφις ἔχει οἷον ἔντερον εὐρυχωρέστερον, ὁμοίαν τῇ τοῦ κυνός· εἶτα τὸ ἔντερον μακρὸν καὶ λεπτὸν καὶ μέχρι τοῦ τέλους ἓν. Ἐπὶ δὲ τοῦ φάρυγγος ἡ καρδία, μικρὰ δὲ καὶ νεφροειδής· διὸ δόξειεν ἂν ἐνίοτε οὐ πρὸς τὸ στήθος ἔχειν τὸ ὀξύ. Εἴθ' ὁ πλεύμων ἀπλοῦς, ἰνῶδει πόρῳ διηρθρωμένος καὶ μακρὸς σφόδρα καὶ πολὺ ἀπληρημένος τῆς καρδίας. Καὶ τὸ ἦπαρ μακρὸν καὶ ἀπλοῦν, σπλῆνα δὲ μικρὸν καὶ στρογγύλον, ὥσπερ καὶ οἱ σαῦροι. Χολὴν δ' ἔχει ὁμοίως τοῖς (508b.) ἰχθύσιν· οἱ μὲν γὰρ ὕδροι πρὸς τῷ ἥπατι ἔχουσιν, οἱ δ' ἄλλοι πρὸς τοῖς ἐντέροις ὡς ἐπὶ τὸ πολὺ. Καρχαρόδοντες δὲ πάντες εἰσὶν. Πλευρὰς δ' ἔχουσιν ἴσας ταῖς ἐν τῷ μηνὶ ἡμέραις· τριάκοντα γὰρ ἔχουσιν. Λέγουσι δὲ τινες συμβαίνειν

περὶ τοὺς ὄφεις τὸ αὐτὸ ὅπερ καὶ περὶ τοὺς νεοττοὺς τῶν χελιδόνων· ἐὰν γὰρ τις ἐκκεντήσῃ τὰ ὄμματα τῶν ὄφεων, φασὶ φύεσθαι πάλιν. Καὶ αἱ κέρκοι δὲ ἀποτεμνόμεναι τῶν τε σαύρων καὶ τῶν ὄφεων φύονται.

Ὡσαύτως δὲ καὶ τοῖς ἰχθύσιν ἔχει τὰ περὶ τὰ ἔντερα καὶ τὴν κοιλίαν· μίαν γὰρ καὶ ἀπλὴν ἔχουσι, διαφέρουσιν τοῖς σχήμασιν. Ἔνιοι γὰρ πάμπαν ἐντεροειδῆ ἔχουσιν, οἷον ὃν καλοῦσι σκάρων, ὃς δὴ καὶ δοκεῖ μόνος ἰχθύς μηρυκάζειν. Καὶ τὸ τοῦ ἐντέρου δὲ μέγεθος ἀπλοῦν, καὶ ἀναδίπλωσιν ἔχει, ὃ ἀναλύεται εἰς ἓν.

Ἴδιον δὲ τῶν ἰχθύων ἐστὶ καὶ τῶν ὀρνίθων τῶν πλείστων τὸ ἔχειν ἀποφυάδας· ἀλλ' οἱ μὲν ὀρνιθες κάτωθεν καὶ ὀλίγας, οἱ δ' ἰχθύες ἄνωθεν περὶ τὴν κοιλίαν, καὶ ἔνιοι πολλὰς, οἷον κωβίος, γαλεός, πέρκη, σκορπίος, κίθαρος, τρίγλη, σπάρος· ὁ δὲ κεστρεὺς ἐπὶ μὲν θάτερα τῆς κοιλίας πολλὰς, ἐπὶ δὲ θάτερα μίαν. Ἔνιοι δ' ἔχουσι μὲν ὀλίγας δέ, οἷον ἥπατος, γλαῦκος· ἔχει δὲ καὶ ὁ χρύσοφρυς ὀλίγας. Διαφέρουσι δὲ καὶ αὐτοὶ αὐτῶν, οἷον χρύσοφρυς ἔχει ὁ μὲν πλείους ὁ δ' ἐλάττους. Εἰσὶ δὲ καὶ οἱ ὅλως οὐκ ἔχουσιν, οἷον οἱ πλείστοι τῶν σελαχιδῶν· τῶν δ' ἄλλων οἱ μὲν ὀλίγας, οἱ δὲ καὶ πάνυ πολλὰς. Πάντες δὲ παρ' αὐτὴν ἔχουσι τὴν κοιλίαν τὰς ἀποφυάδας οἱ ἰχθύες.

Οἱ δ' ὀρνιθες ἔχουσι καὶ πρὸς ἀλλήλους καὶ πρὸς τᾶλλα ζῶα περὶ τὰ ἐντὸς μέρη διαφοράν. Οἱ μὲν γὰρ ἔχουσι πρὸ τῆς κοιλίας πρόλοβον, οἷον ἀλεκτρυόν, φάττα, περιστερά, πέρδιξ· ἐστὶ δ' ὁ πρόλοβος δέρμα κοῖλον καὶ μέγα, ἐν ᾧ ἡ τροφή πρώτη εἰσιούσα ἀπεπτύσσεται.

Ἔστι δ' αὐτόθι μὲν ἀπὸ τοῦ στομάχου στενότερος, ἔπειτα εὐρύτερος, ἣ δὲ καθήκει πάλιν πρὸς τὴν κοιλίαν, λεπτότερος.

Τὴν δὲ κοιλίαν σαρκώδη καὶ στιφρὰν οἱ πλείστοι ἔχουσι, καὶ ἔσθωθεν δέρμα ἰσχυρὸν καὶ ἀφαιρούμενον ἀπὸ τοῦ σαρκώδους.

Οἱ δὲ πρόλοβον μὲν οὐκ ἔχουσιν, ἀλλ' ἀντὶ τούτου τὸν στόμαχον εὐρὺν καὶ πλατύν, ἢ δι' ὅλου ἢ τὸ πρὸς τὴν κοιλίαν τείνουν, οἷον (509a.) κολοῖος καὶ κόραξ καὶ κορώνη. Ἔχει δὲ καὶ ὁ ὄρνυξ τοῦ στομάχου τὸ πλατὺ κάτω, καὶ ὁ αἰγοκέφαλος μικρὸν εὐρύτερον τὸ κάτω καὶ ἡ γλαῦξ. Νῆττα δὲ καὶ χὴν καὶ λάρως καὶ καταρράκτης καὶ ὥτις τὸν στόμαχον εὐρὺν καὶ πλατύν ὅλον, καὶ ἄλλοι δὲ πολλοὶ τῶν ὀρνίθων ὁμοίως. Ἔνιοι δὲ τῆς κοιλίας αὐτῆς τι ἔχουσιν ὅμοιον πρόλοβῳ, οἷον ἡ κεγχρηΐς.

Ἔστι δ' ἃ οὐκ ἔχει οὔτε τὸν στόμαχον οὔτε τὸν πρόλοβον εὐρύν,

ἀλλὰ τὴν κοιλίαν μακράν, ὅσα μικρὰ τῶν ὀρνίθων, οἷον χελιδῶν καὶ στρουθός. Ὀλίγοι δ' οὔτε τὸν πρόλοβον ἔχουσιν οὔτε τὸν στόμαχον εὐρύν, ἀλλὰ σφόδρα μακρόν, ὅσοι τὸν αὐχένα μακρόν ἔχουσιν, οἷον πορφυρίων· σχεδὸν δ' οὗτοι καὶ τὸ περίττωμα ὑγρότερον τῶν ἄλλων προΐενται πάντες. Ὁ δ' ὄρνυξ ἰδίως ἔχει ταῦτα πρὸς τοὺς ἄλλους· ἔχει γὰρ καὶ πρόλοβον καὶ πρὸ τῆς γαστρὸς τὸν στόμαχον εὐρύν καὶ πλάτος ἔχοντα· διέχει δ' ὁ πρόλοβος τοῦ πρὸ τῆς γαστρὸς στομάχου συγχὸν ὡς κατὰ μέγεθος.

Ἔχουσι δὲ καὶ λεπτὸν τὸ ἔντερον οἱ πλεῖστοι καὶ ἀπλοῦν ἀναλυόμενον. Τὰς δ' ἀποφυάδας ἔχουσιν οἱ ὀρνιθες, καθάπερ εἴρηται, ὀλίγας, καὶ οὐκ ἄνωθεν ὥσπερ οἱ ἰχθύες, ἀλλὰ κάτωθεν κατὰ τὴν τοῦ ἐντέρου τελευτήν. Ἔχουσι δ' οὐ πάντες ἀλλ' οἱ πλεῖστοι, οἷον ἀλεκτρυών, πέρδιξ, νῆττα, νυκτικόραξ, λόκαλος, ἀσκάλαφος, χήν, κύκνος, ὠτίς, γλαύξ. Ἔχουσι δὲ καὶ τῶν μικρῶν τινές, ἀλλὰ μικρὰ πάνπαν, οἷον στρουθός.

Κεφάλαιο 1

Περὶ μὲν οὖν τῶν ἄλλων μορίων τῶν ἐντὸς εἴρηται, καὶ πόσα καὶ ποῖ' ἅττα, καὶ τίνας ἔχει πρὸς ἄλληλα διαφοράς· λοιπὸν δὲ περὶ τῶν εἰς τὴν γένεσιν συντελούντων μορίων εἰπεῖν.

Ταῦτα γὰρ τοῖς μὲν θήλεσι πᾶσιν ἐντός ἐστι, τὰ δὲ τῶν ἀρρένων διαφορὰς ἔχει πλείους. Τὰ μὲν γὰρ ὅλως τῶν ἐναίμων ζώων οὐκ ἔχει ὄρχεις, τὰ δ' ἔχει μὲν ἐντὸς δ' ἔχει, καὶ τῶν ἐντὸς ἐχόντων τὰ μὲν πρὸς τῇ ὁσφύϊ ἔχει περὶ τὸν τῶν νεφρῶν τόπον, τὰ δὲ πρὸς τῇ γαστρί, τὰ δ' ἐκτός. Καὶ τὸ αἰδοῖον τούτων τοῖς μὲν συνήρηται πρὸς τὴν (509b.) γαστέρα, τοῖς δ' ἀφεῖται καθάπερ καὶ οἱ ὄρχεις· πρὸς δὲ τὴν γαστέρα συνήρηται ἄλλως τοῖς τ' ἐμπροσθουρητικοῖς καὶ τοῖς ὀπισθουρητικοῖς.

Τῶν μὲν οὖν ἰχθύων οὐδεὶς ὄρχεις ἔχει, οὐδ' εἴ τι ἄλλο ἔχει βράγχια, οὐδὲ τὸ τῶν ὄφεων γένος ἅπαν, οὐδ' ὅλως ἅπουν οὐδέν, ὅσα μὴ ζωοτοκεῖ ἐν αὐτοῖς. Οἱ δ' ὄρνιθες ἔχουσι μὲν ὄρχεις, ἔχουσι δ' ἐντὸς πρὸς τῇ ὁσφύϊ.

Καὶ τῶν τετραπόδων ὅσα ὠοτοκεῖ, τὸν αὐτὸν ἔχει τρόπον, οἷον σαύρα καὶ χελώνη καὶ κροκόδειλος, καὶ τῶν ζωοτόκων ἐχίνος. Τὰ δὲ τῶν ἐντὸς ἐχόντων πρὸς τῇ γαστρὶ ἔχει, οἷον τῶν ἀπόδων μὲν δελφίς, τῶν δὲ τετραπόδων καὶ ζωοτόκων ἐλέφας· τὰ δ' ἄλλα φανεροὺς ἔχει.

Ἡ δ' ἐξάρτησις ἢ πρὸς τὴν κοιλίαν καὶ τὸν τόπον τὸν συνεχῇ τίνα διαφορὰν ἔχει, πρότερον εἴρηται· τοῖς μὲν γὰρ ἐκ τοῦ ὀπισθεν συνεχεῖς καὶ οὐκ ἀπηρητημένοι εἰσίν, οἷον τῷ γένει τῷ τῶν ὑῶν, τοῖς δ' ἀπηρητημένοι, καθάπερ τοῖς ἀνθρώποις. Οἱ μὲν οὖν ἰχθύες ὄρχεις μὲν οὐκ ἔχουσιν, ὥσπερ εἴρηται πρότερον, οὐδ' οἱ ὄφεις· πόρους δὲ δύο ἔχουσιν ἀπὸ τοῦ ὑποζώματος ἡρητημένους ἐφ' ἐκάτερα τῆς ῥάχεως, συνάπτοντας εἰς ἓνα πόρον ἄνωθεν τῆς τοῦ περιττώματος ἐξόδου· τὸ δ' ἄνωθεν λέγομεν τὸ πρὸς τὴν ἄκανθαν. Οὗτοι δὲ γίνονται περὶ τὴν ὥραν τῆς ὀχείας θοροῦ πλήρεις, καὶ θλιβομένων ἐξέρχεται τὸ σπέρμα λευκόν. Αὐτοὶ δὲ πρὸς αὐτοὺς ἦν ἔχουσι διαφορὰν, ἕκ τε τῶν ἀνατομῶν δεῖ θεωρεῖν καὶ ὕστερον λεχθήσεται ἐν τοῖς περὶ ἕκαστον αὐτῶν ἰδίους ἀκριβέστερον.

Ὅσα δ' ὠοτοκεῖ ἢ δίποδα ὄντα ἢ τετράποδα, πάντ' ἔχει ὄρχεις πρὸς τῇ ὁσφύϊ κάτωθεν τοῦ διαζώματος, τὰ μὲν λευκοτέρους τὰ δ' ὠχροτέρους, λεπτοῖς πάμπαν φλεβίοις περιεχομένους. Καὶ ἀφ'

ἐκατέρου τείνει πόρος συνάπτων εἰς ἓν, καθάπερ καὶ τοῖς ἰχθύσιν, ὑπὲρ τῆς τοῦ περιπτώματος ἐξόδου. Τοῦτο δ' ἐστὶν αἰδοῖον, ὃ τοῖς μὲν μικροῖς ἄδηλον, ἐν δὲ τοῖς μείζουσιν, οἷον ἐν χηνὶ καὶ τοῖς τηλικούτοις, φανερώτερον γίνεται, ὅταν ἡ ὀχεία πρόσφατος ᾖ.

Οἱ δὲ πόροι καὶ τοῖς ἰχθύσι καὶ τούτοις προσπεφύκασι πρὸς τῇ ὀσφύϊ ὑποκάτω τῆς κοιλίας καὶ τῶν ἐντέρων, μεταξὺ τῆς μεγάλης φλεβός, ἀφ' ἧς τείνουσι πόροι εἰς ἐκάτερον τῶν ὄρχεων. Ὡσπερ δὲ τοῖς ἰχθύσι περὶ μὲν τὴν ὥραν (510a.) τῆς ὀχείας θορός τε φαίνεται ἐνὼν καὶ οἱ πόροι σφόδρα δηλοῖ, ὅταν δὲ παρέλθῃ ἡ ὥρα, ἄδηλοι καὶ οἱ πόροι ἐνίοτε, οὕτω καὶ τῶν ὀρνίθων οἱ ὄρχεις· πρὶν μὲν ὀχεύειν, οἱ μὲν μικροὺς οἱ δὲ πάνπαν ἀδήλους ἔχουσιν, ὅταν δ' ὀχεύωσι, σφόδρα μεγάλους ἴσχουσιν. Ἐπιδηλότατα δὲ τοῦτο συμβαίνει ταῖς φάτταις καὶ τοῖς πέρδιξιν, ὥστ' ἐνιοὶ οἶονται οὐδ' ἔχειν τοῦ χειμῶνος ὄρχεις αὐτά.

Τῶν δ' ἐν τῷ ἔμπροσθεν ἐχόντων τοὺς ὄρχεις οἱ μὲν ἐντὸς ἔχουσι πρὸς τῇ γαστρί, καθάπερ δελφίς, οἱ δ' ἐκτὸς ἐν τῷ φανερῷ πρὸς τῷ τέλει τῆς γαστρού. Τούτοις δὲ τὰ μὲν ἄλλα ἔχει τὸν αὐτὸν τρόπον, διαφέρουσι δ' ὅτι οἱ μὲν αὐτῶν ἔχουσι καθ' αὐτοὺς τοὺς ὄρχεις, οἱ δ' ἐν τῇ καλουμένῃ ὀσχέᾳ, ὅσοι ἔξωθεν.

Αὐτοὶ δ' οἱ ὄρχεις ἐν πᾶσι τοῖς πεζοῖς καὶ ζωοτόκοις τόνδ' ἔχουσι τὸν τρόπον. Τείνουσιν ἐκ τῆς ἀορτῆς πόροι φλεβικοὶ μέχρι τῆς κεφαλῆς ἐκατέρου τοῦ ὄρχεως, καὶ ἄλλοι ἀπὸ τῶν νεφρῶν δύο· εἰσὶ δ' οὗτοι μὲν αἱματώδεις, οἱ δ' ἐκ τῆς ἀορτῆς ἄναιμοι. Ἀπὸ δὲ τῆς κεφαλῆς πρὸς αὐτῷ τῷ ὄρχει πόρος ἐστὶ πυκνότερος ἐκείνου καὶ νευρωδέστερος, ὃς ἀνακάμπει πάλιν ἐν ἐκατέρῳ τῷ ὄρχει πρὸς τὴν κεφαλὴν τοῦ ὄρχεως· ἀπὸ δὲ τῆς κεφαλῆς ἐκατέρας πάλιν εἰς ταῦτο συνάπτουσιν εἰς τὸ πρόσθεν ἐπὶ τὸ αἰδοῖον. Οἱ δ' ἐπανακάμπτοντες πόροι καὶ προσκαθήμενοι τοῖς ὄρχεσιν ὑμένι περιειλημμένοι εἰσὶ τῷ αὐτῷ, ὥστε δοκεῖν ἓνα εἶναι πόρον, ἂν μὴ διέλῃ τὸν ὑμένα τις. Ὁ μὲν οὖν προσκαθήμενος πόρος ἔτι αἱματώδης ἔχει τὸ ὑγρόν, ἦττον μέντοι τῶν ἄνω τῶν ἐκ τῆς ἀορτῆς· ἐν δὲ τοῖς ἐπανακάμπτονσιν εἰς τὸν καυλὸν τὸν ἐν τῷ αἰδοίῳ λευκὴ ἐστὶν ἡ ὑγρότης. Φέρει δὲ καὶ ἀπὸ τῆς κύστεως πόρος, καὶ συνάπτει ἄνωθεν εἰς τὸν καυλόν· περὶ τοῦτον δ' οἷον κέλυφός ἐστὶ τὸ καλούμενον αἰδοῖον. Θεωρεῖσθω δὲ τὰ εἰρημένα ταῦτα ἐκ τῆς ὑπογραφῆς τῆσδε. Τῶν πόρων ἀρχὴ τῶν ἀπὸ τῆς ἀορτῆς, ἐφ' οἷς Α· κεφαλαὶ τῶν ὄρχεων καὶ οἱ καθήκοντες πόροι, ἐφ' οἷς ΚΚ· οἱ ἀπὸ τούτων πρὸς τῷ ὄρχει προσκαθήμενοι, ἐφ'

οἷς τὰ ΩΩ· οἱ δ' ἀνακάμπτοντες, ἐν οἷς ἡ ὑγρότης ἡ λευκή, ἐφ' οἷς τὰ ΒΒ· αἰδοῖον Δ, κύστις Ε, ὄρχεις δ' ἐν οἷς τὰ ΨΨ.

Ἀποτεμνομένων δ' ἡ (510b.) ἀφαιρουμένων τῶν ὀρχεων αὐτῶν ἀνασπῶνται οἱ πόροι ἄνω. Διαφθείρουσι δ' οἱ μὲν ἔτι νέων ὄντων τρίψει, οἱ δὲ καὶ ὕστερον ἐκτέμνοντες· συνέβη δ' ἤδη ταῦρον ἐκτμηθέντα καὶ εὐθὺς ἐπιβάντα ὀχεῦσαι καὶ γεννηῆσαι. Τὰ μὲν οὖν περὶ τοὺς ὄρχεις τοῖς ζώοις τοῦτον ἔχει τὸν τρόπον.

Αἱ δ' ὑστέραι τῶν ἐχόντων ὑστέρας ζώων οὔτε τὸν αὐτὸν τρόπον ἔχουσιν οὐθ' ὅμοιαι πάντων εἰσίν, ἀλλὰ διαφέρουσι καὶ τῶν ζωοτοκούντων πρὸς ἄλληλα καὶ τῶν ὠοτοκούντων. Δίκροαι μὲν οὖν εἰσιν ἀπάντων τῶν πρὸς τοῖς ἄρθροις ἐχόντων τὰς ὑστέρας, καὶ τὸ μὲν αὐτῶν ἐν τοῖς δεξιοῖς μέρεσι, τὸ δ' ἕτερον ἐν τοῖς ἀριστεροῖς ἐστίν· ἡ δ' ἀρχὴ μία καὶ τὸ στόμα ἓν, οἷον καυλὸς σαρκώδης σφόδρα καὶ χονδρώδης τοῖς πλείστοις καὶ μεγίστοις.

Καλεῖται δὲ τούτων τὸ μὲν ὑστέρα καὶ δελφύς (ὅθεν καὶ ἀδελφοὺς προσαγορεύουσι), μήτρα δ' ὁ καυλὸς καὶ τὸ στόμα τῆς ὑστέρας. Ὅσα μὲν οὖν ἐστὶ ζωοτόκα καὶ δίποδα καὶ τετράποδα, τούτων μὲν ἡ ὑστέρα πάντων ἐστὶ κάτω τοῦ ὑποζώματος, οἷον ἀνθρώπῳ καὶ κυνὶ καὶ ὑἱ καὶ ἵππῳ καὶ βοῖ· καὶ τοῖς κερατοφόροις ὁμοίως ταῦτα γ' ἔχει πᾶσιν. Ἐπ' ἄκρων δ' αἱ ὑστέραι τῶν καλουμένων κερατίων εἰλιγμὸν ἔχουσιν αἱ τῶν πλείστων.

Τῶν δ' ὠοτοκούντων εἰς τοῦμφανὲς οὐχ ὁμοίως ἀπάντων ἔχουσιν, ἀλλ' αἱ μὲν τῶν ὀρνίθων πρὸς τῷ ὑποζώματι, αἱ δὲ τῶν ἰχθύων κάτω καθάπερ αἱ τῶν ζωοτοκούντων διπόδων καὶ τετραπόδων, πλὴν λεπταὶ καὶ ὑμενώδεις καὶ μακραί, ὥστ' ἐν τοῖς σφόδρα μικροῖς τῶν ἰχθύων δοκεῖν ἐκατέραν ὦν εἶναι ἓν, ὥς δύο ἐχόντων ὦα τῶν ἰχθύων τούτων, ὅσων λέγεται τὸ ὦν εἶναι ψαθυρόν· ἐστὶ γὰρ οὐχ ἓν ἀλλὰ πολλὰ, διόπερ διαχεῖται εἰς πολλὰ.

Ἡ δὲ τῶν ὀρνίθων ὑστέρα κάτωθεν μὲν ἔχει τὸν καυλὸν σαρκώδη καὶ στιφρόν, τὰ δὲ πρὸς τῷ ὑποζώματι ὑμενώδη καὶ λεπτὰ πάμπαν, ὥστε δόξαί ἂν ἔξω τῆς ὑστέρας εἶναι τὰ ὦα. Ἐν μὲν οὖν τοῖς μείζοσι τῶν ὀρνίθων δηλὸς ἐστὶν ὁ ὑμὴν μάλλον, καὶ φυσώμενος διὰ τοῦ καυλοῦ αἶρεται καὶ κολποῦται· ἐν δὲ τοῖς μικροῖς ἀδηλότερα πάντα ταῦτα.

Τὸν αὐτὸν δὲ τρόπον ἔχει ἡ ὑστέρα καὶ ἐν τοῖς τετράποσι μὲν τῶν ζώων ὠοτόκοις δέ, οἷον χελώνῃ καὶ σαύρα καὶ βατράχοις καὶ τοῖς ἄλλοις (511a.) τοῖς τοιοῦτοις· ὁ μὲν γὰρ καυλὸς κάτωθεν εἰς καὶ

σαρκωδέστερος, ἡ δὲ σχίσις καὶ τὰ ψὰ ἄνω πρὸς τῷ ὑποζώματι.

Ὅσα δὲ τῶν ἀπόδων εἰς τὸ φανερόν μὲν ζωοτοκεῖ ἐν αὐτοῖς δ' ὠτοκεῖ, οἷον οἱ τε γαλεοὶ καὶ τᾶλλα τὰ καλούμενα σελάχη (καλεῖται δὲ σέλαχος ὁ ἂν ἄπουν ὄν καὶ βράγχια ἔχον ζωοτόκον ἦ), τούτων δὴ δικρόα μὲν ἢ ὑστέρα, ὁμοίως δὲ καὶ πρὸς τὸ ὑπόζωμα τείνει, καθάπερ καὶ τῶν ὀρνίθων. Ἔτι δὲ διὰ μέσου τῶν δικρόων κάτωθεν ἀρξαμένη μέχρι πρὸς τὸ ὑπόζωμα τείνει, καὶ τὰ ψὰ ἐνταῦθα γίνεται καὶ ἄνω ἐπ' ἀρχῇ τοῦ ὑποζώματος· εἴτα προελθόντα εἰς τὴν εὐρυχωρίαν ζῶα γίνεται ἐκ τῶν ψῶν. Αὐτῶν δὲ τούτων πρὸς ἀλληλά τε καὶ πρὸς τοὺς ἄλλους ἰχθύς ἡ διαφορὰ τῶν ὑστερῶν ἀκριβέστερον ἂν θεωρηθεῖ τοῖς σχήμασιν ἐκ τῶν ἀνατομῶν.

Ἔχει δὲ καὶ τὸ τῶν ὄφεων γένος πρὸς τε ταῦτα καὶ πρὸς ἄλληλα διαφοράν. Τὰ μὲν γὰρ ἄλλα γένη τῶν ὄφεων ὠτοκεῖ πάντα, ὁ δ' ἔχισ ζωοτοκεῖ μόνον, ὠτοκῆσας ἐν αὐτῷ πρῶτον· διὸ παραπλησίως ἔχει τὰ περὶ τὴν ὑστέρα τοῖς σελάχεσιν. Ἡ δὲ τῶν ὄφεων ὑστέρα μακρά, καθάπερ τὸ σῶμα, τείνει κάτωθεν ἀρξαμένη ἀφ' ἐνὸς πόρου συνεχῆς, ἔνθεν καὶ ἔνθεν τῆς ἀκάνθης, οἷον πόρος ἐκάτερος ὦν, μέχρι πρὸς τὸ ὑπόζωμα, ἐν ᾗ τὰ ψὰ κατὰ στοῖχον ἐγγίνεται, καὶ ἐκτίκτει οὐ καθ' ἐν ἄλλὰ συνεχές.

Ἔχει δὲ τὴν ὑστέρα, ὅσα μὲν ζωοτοκεῖ καὶ ἐν αὐτοῖς καὶ εἰς τοῦμφανές, ἄνωθεν τῆς κοιλίας, ὅσα δ' ὠτοκεῖ, πάντα κάτωθεν πρὸς τῇ ὀσφυϊ. Ὅσα δ' εἰς τὸ φανερόν μὲν ζωοτοκεῖ ἐν αὐτοῖς δ' ὠτοκεῖ, ἐπαμφοτερίζει· τὸ μὲν γὰρ κάτωθεν πρὸς τὴν ὀσφύν αὐτῆς μέρος ἐστίν, ἐν ᾧ τὰ ψὰ, τὸ δὲ περὶ τὴν ἐξοδὸν ἐπάνω τῶν ἐντέρων.

Ἔτι δὲ διαφορὰ καὶ ἦδε πρὸς ἀλλήλας ἐστὶ τῶν ὑστερῶν. Τὰ μὲν γὰρ κερατοφόρα καὶ μὴ ἀμφώδοντα ἔχει κοτυληδόνας ἐν τῇ ὑστέρα, ὅταν ἔχη τὸ ἔμβρυον, καὶ τῶν ἀμφωδόντων οἷον δασύπους καὶ μῦς καὶ νυκτερίς· τὰ δ' ἄλλα τὰ ἀμφώδοντα καὶ ζωοτόκα καὶ ὑπόποδα πάντα λείαν ἔχει τὴν ὑστέρα, καὶ ἡ τῶν ἐμβρύων ἐξάρτησις ἐξ αὐτῆς ἐστὶ τῆς ὑστέρας, ἀλλ' οὐκ ἐκ κοτυληδόνης.

Τὰ μὲν οὖν ἀνομοιομερῆ ἐν τοῖς ζώοις μέρη τοῦτον ἔχει (511b.) τὸν τρόπον, καὶ τὰ ἐκτὸς καὶ τὰ ἐντός.

Κεφάλαιο 2

Τῶν δ' ὁμοιομερῶν κοινότατον μὲν ἐστὶ τὸ αἷμα πᾶσι τοῖς ἐναίμοις ζώοις καὶ τὸ μόριον ἐν ᾧ πέφυκεν ἐγγίνεσθαι (τοῦτο δὲ καλεῖται φλέψ), ἔπειτα δὲ τὸ ἀνάλογον τούτοις, ἰχώρ καὶ ἴνες, καὶ ὁ μάλιστα δὴ ἐστὶ τὸ σῶμα τῶν ζώων, ἡ σὰρξ καὶ τὸ τούτῳ ἀνάλογον ἐν ἐκάστῳ μόριον, ἔτι ὅστοῦν καὶ τὸ ἀνάλογον τούτῳ, οἶον ἄκανθα καὶ χόνδρος· ἔτι δὲ δέρμα, ὑμήν, νεῦρα, τρίχες, ὄνυχες, καὶ τὰ ὁμολογούμενα τούτοις· πρὸς δὲ τούτοις πιμελή, στέαρ καὶ τὰ περιττώματα· ταῦτα δ' ἐστὶ κόπρος, φλέγμα, χολή ξανθὴ καὶ μέλαινα.

Ἐπεὶ δ' ἀρχὴ ἔοικεν ἡ τοῦ αἵματος φύσις καὶ ἡ τῶν φλεβῶν, πρῶτον περὶ τούτων λεκτέον, ἄλλως τ' ἐπειδὴ καὶ τῶν πρότερον εἰρηκότων τινὲς οὐ καλῶς λέγουσιν. Αἴτιον δὲ τῆς ἀγνοίας τὸ δυσθεώρητον αὐτῶν. Ἐν μὲν γὰρ τοῖς τεθνεῶσι τῶν ζώων ἄδηλος ἡ φύσις τῶν κυριωτάτων φλεβῶν διὰ τὸ συμπίπτειν εὐθὺς ἐξιόντος τοῦ αἵματος μάλιστα ταύτας (ἐκ τούτων γὰρ ἐκχεῖται ἀθρόον ὥσπερ ἐξ ἀγγείου· καθ' αὐτὸ γὰρ οὐδὲν ἔχει αἷμα, πλὴν ὀλίγον ἐν τῇ καρδίᾳ, ἀλλὰ πᾶν ἐστὶν ἐν ταῖς φλεψίν). Ἐν δὲ τοῖς ζῶσιν ἀδύνατόν ἐστι θεάσασθαι πῶς ἔχουσιν· ἐντὸς γὰρ ἡ φύσις αὐτῶν. Ὡσθ' οἱ μὲν ἐν τεθνεῶσι καὶ διηρημένοις τοῖς ζώοις θεωροῦντες τὰς μεγίστας ἀρχὰς οὐκ ἐθεώρουν, οἱ δ' ἐν τοῖς λελεπτυσμένοις σφόδρα ἀνθρώποις ἐκ τῶν τότε ἔξωθεν φαινομένων τὰς ἀρχὰς τῶν φλεβῶν διώρισαν.

Συέννεσις μὲν ὁ Κύπριος ἱατρὸς τόνδε τὸν τρόπον λέγει. Αἱ φλέβες αἱ παχεῖαι ὧδε πεφύκασιν, ἐκ τοῦ ὀμφαλοῦ παρὰ τὴν ὀσφὺν διὰ τοῦ νότου παρὰ τὸν πλεύμονα ὑπὸ τοὺς μαστούς, ἡ μὲν ἐκ τοῦ δεξιοῦ εἰς τὰ ἀριστερά, ἡ δ' ἐκ τοῦ ἀριστεροῦ εἰς τὸ δεξιόν, ἡ μὲν ἐκ τοῦ ἀριστεροῦ διὰ τοῦ ἥπατος εἰς τὸν νεφρὸν καὶ εἰς τὸν ὄρχιν, ἡ δ' ἐκ τοῦ δεξιοῦ εἰς τὸν σπλῆνα καὶ νεφρὸν καὶ ὄρχιν, ἐντεῦθεν δ' εἰς τὸ αἰδοῖον.

Διογένης δ' ὁ Ἀπολλωνιάτης τάδε λέγει. Αἱ φλέβες ἐν τῷ ἀνθρώπῳ ὧδ' ἔχουσιν. Εἰσὶ δύο μέγισται· αὗται τείνουσι διὰ τῆς κοιλίας παρὰ τὴν νωτιαίαν ἄκανθαν, ἡ μὲν ἐπὶ δεξιᾷ ἡ δ' ἐπ' ἀριστερᾷ, εἰς τὰ σκέλη ἐκατέρα παρ' ἑαυτῇ, καὶ ἄνω εἰς τὴν κεφαλὴν παρὰ τὰς κλεῖδας διὰ τῶν σφαγῶν. Ἀπὸ δὲ τούτων καθ' (512a.) ἅπαν τὸ σῶμα φλέβες διατείνουσιν, ἀπὸ μὲν τῆς δεξιᾶς εἰς τὰ δεξιὰ, ἀπὸ

δὲ τῆς ἀριστερᾶς εἰς τὰ ἀριστερά, μέγισται μὲν δύο εἰς τὴν καρδίαν περὶ αὐτὴν τὴν νωτιαίαν ἄκανθαν, ἕτεραι δ' ὀλίγον ἀνωτέρω διὰ τῶν στηθῶν ὑπὸ τὴν μασχάλην εἰς ἑκατέραν τὴν χεῖρα τὴν παρ' ἑαυτῇ· καὶ καλεῖται ἡ μὲν σπληνίτις, ἡ δ' ἥπατιτις. Σχίζεται δ' αὐτῶν ἄκρα ἑκάτερα, ἡ μὲν ἐπὶ τὸν μέγαν δάκτυλον, ἡ δ' ἐπὶ τὸν ταρσόν· ἀπὸ δὲ τούτων λεπταὶ καὶ πολυόζοι ἐπὶ τὴν ἄλλην χεῖρα καὶ δακτύλους. Ἔτεραι δὲ λεπτότεραι ἀπὸ τῶν πρώτων φλεβῶν τείνουσιν, ἀπὸ μὲν τῆς δεξιᾶς εἰς τὸ ἥπαρ, ἀπὸ δὲ τῆς ἀριστερᾶς εἰς τὸν σπλῆνα καὶ τοὺς νεφρούς. Αἱ δ' εἰς τὰ σκέλη τείνουσαι σχίζονται κατὰ τὴν πρόσφυσιν, καὶ διὰ παντὸς τοῦ μηροῦ τείνουσιν. Ἡ δὲ μεγίστη αὐτῶν ὀπισθεν τείνει τοῦ μηροῦ, καὶ ἐκφαίνεται παχεῖα· ἑτέρα δ' εἴσω τοῦ μηροῦ, μικρὸν ἥττον παχεῖα ἐκείνης. Ἐπειτα παρὰ τὸ γόνυ τείνουσιν εἰς τὴν κνήμην τε καὶ τὸν πόδα. Καὶ καθάπερ αἱ εἰς τὰς χεῖρας, καὶ ἐπὶ τὸν ταρσόν τοῦ ποδὸς καθήκουσι, καὶ ἐντεῦθεν ἐπὶ τοὺς δακτύλους διατείνουσιν. Σχίζονται δὲ καὶ ἐπὶ τὴν κοιλίαν καὶ τὸ πλευρὸν πολλαὶ ἀπ' αὐτῶν καὶ λεπταὶ φλέβες.

Αἱ δ' εἰς τὴν κεφαλὴν τείνουσαι διὰ τῶν σφαγῶν φαίνονται ἐν τῷ αὐχένι μεγάλαι· ἀφ' ἑκατέρας δ' αὐτῶν, ἥ τελευτᾷ, σχίζονται εἰς τὴν κεφαλὴν πολλαί, αἱ μὲν ἐκ τῶν δεξιῶν εἰς τὰ ἀριστερά, αἱ δ' ἐκ τῶν ἀριστερῶν εἰς τὰ δεξιά· τελευτῶσι δὲ παρὰ τὸ οὖς ἑκάτερα. Ἔστι δ' ἑτέρα φλὲς ἐν τῷ τραχήλῳ παρὰ τὴν μεγάλην ἑκατέρωθεν, ἐλάττων ἐκείνης ὀλίγον, εἰς ἣν αἱ πλεῖσται ἐκ τῆς κεφαλῆς συνέχουσιν αὐτῆς· καὶ αὗται τείνουσι διὰ τῶν σφαγῶν εἴσω, καὶ ἀπ' αὐτῶν ἑκατέρας ὑπὸ τὴν ὠμοπλάτην τείνουσι καὶ εἰς τὰς χεῖρας. Καὶ φαίνονται παρὰ τε τὴν σπληνίτιν καὶ τὴν ἥπατιτιν ἕτεραι ὀλίγον ἐλάττους, ἃς ἀποσχάζουσιν, ὅταν τι ὑπὸ τὸ δέρμα λυπῇ· ἂν δέ τι περὶ τὴν κοιλίαν, τὴν ἥπατιτιν καὶ τὴν σπληνίτιν. Τείνουσι δὲ καὶ ὑπὸ τοὺς μαστοὺς ἀπὸ (512b.) τούτων ἕτεραι. Ἔτεραι δ' εἰσὶν αἱ ἀπὸ ἑκατέρας τείνουσαι διὰ τοῦ νωτιαίου μυελοῦ εἰς τοὺς ὄρχεις, λεπταί. Ἔτεραι δ' ὑπὸ τὸ δέρμα καὶ διὰ τῆς σαρκὸς τείνουσιν εἰς τοὺς νεφρούς, καὶ τελευτῶσιν εἰς τοὺς ὄρχεις τοῖς ἀνδράσι, ταῖς δὲ γυναιξιν εἰς τὰς ὑστέρας. Αἱ δὲ φλέβες αἱ μὲν πρώται ἐκ τῆς κοιλίας εὐρύτεραί εἰσιν, ἔπειτα λεπτότεραι γίνονται, ἕως ἂν μεταβάλωσιν ἐκ τῶν δεξιῶν εἰς τὰ ἀριστερά καὶ ἐκ τούτων εἰς τὰ δεξιά· αὗται δὲ σπερματίδες καλοῦνται.

Τὸ δ' αἷμα τὸ μὲν παχύτατον ὑπὸ τῶν σαρκῶν ἐγγίνεται· ὑπερβάλλον δ' εἰς τοὺς τόπους τούτους λεπτὸν καὶ θερμὸν καὶ

ἀφρῶδες γίνεται.

Κεφάλαιο 3

Συνέννεσις μὲν οὖν καὶ Διογένης οὕτως εἰρήκασιν, Πόλυβος δ' ὦδε. Τὰ δὲ τῶν φλεβῶν τέτταρα ζεύγη ἐστίν, ἐν μὲν ἀπὸ τοῦ ἐξόπισθεν τῆς κεφαλῆς διὰ τοῦ αὐχένος ἔξωθεν παρὰ τὴν ράχιν ἔνθεν καὶ ἔνθεν μέχρι τῶν ἰσχύων εἰς τὰ σκέλη, ἔπειτα διὰ τῶν κνημῶν ἐκ τῶν σφυρῶν εἰς τ' ἔξω καὶ εἰς τοὺς πόδας· διὸ καὶ τὰς φλεβοτομίας ποιοῦνται τῶν περὶ τὸν νῶτον ἀλγημάτων καὶ ἰσχίον ἀπὸ τῶν ἰγνύων καὶ τῶν σφυρῶν ἔξωθεν. Ἑτεραι δὲ φλέβες ἐκ τῆς κεφαλῆς παρὰ τὰ ὦτα διὰ τοῦ αὐχένος, αἱ καλοῦνται σφαγίτιδες, ἔνδοθεν παρὰ τὴν ράχιν ἐκάτεραι φέρουσαι παρὰ τὰς ψύας εἰς τοὺς ὄρχεις καὶ εἰς τοὺς μηρούς, καὶ διὰ τῶν ἰγνύων τοῦ ἔνδοθεν μορίου καὶ διὰ τῶν κνημῶν ἐπὶ τὰ σφυρὰ τὰ εἴσω καὶ τοὺς πόδας· διὸ καὶ τὰς φλεβοτομίας ποιοῦνται τῶν περὶ τὰς ψύας καὶ τοὺς ὄρχεις ἀλγημάτων ἀπὸ τῶν ἰγνύων καὶ τῶν σφυρῶν <εἴσωθεν>.

Τὸ δὲ τρίτον ζεύγος ἐκ τῶν κροτάφων διὰ τοῦ αὐχένος ὑπὸ τὰς ὁμοπλάτας εἰς τὸν πλεύμονα ἀφικνοῦνται, αἱ μὲν ἐκ τῶν δεξιῶν εἰς τὰ ἀριστερὰ ὑπὸ τὸν μαστὸν καὶ εἰς τὸν σπληνὰ τε καὶ εἰς τὸν νεφρόν, αἱ δ' ἀπὸ τῶν ἀριστερῶν εἰς τὸν δεξιὸν ἐκ τοῦ πλεύμονος ὑπὸ τὸν μαστὸν καὶ ἦπαρ καὶ εἰς τὸν νεφρόν· ἄμφω δὲ τελευτῶσιν εἰς τὸν ἀρχόν. Αἱ δὲ τέταρται ἀπὸ τοῦ ἔμπροσθεν τῆς κεφαλῆς καὶ (513a.) τῶν ὀφθαλμῶν ὑπὸ τὸν αὐχένα καὶ τὰς κλεῖδας· ἐντεῦθεν δὲ τείνουσι διὰ τῶν βραχιόνων ἄνωθεν εἰς τὰς καμπάς, εἴτα διὰ τῶν πήχεων ἐπὶ τοὺς καρπούς καὶ τὰς συγκαμπάς, καὶ διὰ τῶν βραχιόνων τοῦ κάτωθεν μορίου εἰς τὰς μασχάλας, καὶ ἐπὶ lt;τὸ> τῶν πλευρῶν ἄνωθεν, ἕως ἢ μὲν ἐπὶ τὸν σπληνα ἢ δ' ἐπὶ τὸ ἦπαρ ἀφίκεται· εἴθ' ὑπὲρ τῆς γαστρὸς εἰς τὸ αἰδοῖον ἄμφω τελευτῶσιν.

Τὰ μὲν οὖν ὑπὸ τῶν ἄλλων εἰρημένα σχεδὸν ταῦτ' ἐστίν· εἰσι δὲ καὶ τῶν περὶ φύσιν οἷ τοιαύτην μὲν οὐκ ἐπραγματεύθησαν ἀκριβολογίαν περὶ τὰς φλέβας, πάντες δ' ὁμοίως τὴν ἀρχὴν αὐτῶν ἐκ τῆς κεφαλῆς καὶ τοῦ ἐγκεφάλου ποιοῦσι, λέγοντες οὐ καλῶς. Χαλεπῆς δ' οὔσης, ὥσπερ εἴρηται πρότερον, τῆς θεωρίας ἐν μόνοις τοῖς ἀποπεπνιγμένοις τῶν ζώων προλεπυνθεῖσιν ἔστιν ἱκανῶς καταμαθεῖν, εἴ τι περὶ τῶν τοιούτων ἐπιμελές.

Ἐχει δὲ τοῦτον τὸν τρόπον ἢ τῶν φλεβῶν φύσις. Δύο φλέβες εἰσὶν ἐν τῷ θώρακι κατὰ τὴν ράχιν ἐντός, ἔστι δὲ κειμένη αὐτῶν ἢ

μὲν μείζων ἐν τοῖς ἔμπροσθεν, ἡ δ' ἐλάττων ὀπισθεν ταύτης, καὶ ἡ μὲν μείζων ἐν τοῖς δεξιοῖς μᾶλλον, ἡ δ' ἐλάττων ἐν τοῖς ἀριστεροῖς, ἦν καλοῦσί τινες ἄορτην ἐκ τοῦ τεθεᾶσθαι καὶ ἐν τοῖς τεθνεῶσι τὸ νευρῶδες αὐτῆς μόριον. Αὗται δ' ἔχουσι τὰς ἀρχὰς ἀπὸ τῆς καρδίας· διὰ μὲν γὰρ τῶν ἄλλων σπλάγγων, ἧ τυγχάνουσι τείνουσαι, ὅλαι δι' αὐτῶν διέρχονται σωζόμεναι καὶ οὔσαι φλέβες, ἡ δὲ καρδία ὥσπερ μόριον αὐτῶν ἐστὶ, καὶ μᾶλλον τῆς ἐμπροσθίας καὶ μείζονος, διὰ τὸ ἄνω μὲν καὶ κάτω τὰς φλέβας εἶναι ταύτας, ἐν μέσῳ δ' αὐτῶν τὴν καρδίαν.

Ἔχουσι δ' αἱ καρδίαι πᾶσαι μὲν κοιλίας ἐν αὐταῖς, ἀλλ' αἱ μὲν τῶν σφόδρα μικρῶν ζώων μόλις φανεράν τὴν μεγίστην ἔχουσι, τὰ δὲ μέσα τῷ μεγέθει τῶν ζώων καὶ τὴν ἑτέραν, τὰ δὲ μέγιστα τὰς τρεῖς. Ἔστι δὲ τῆς καρδίας τὸ ὁξὺ ἐχούσης εἰς τὸ πρόσθεν, καθάπερ εἴρηται πρότερον, ἡ μεγίστη μὲν κοιλία ἐν τοῖς δεξιοῖς καὶ ἀνωτάτῳ αὐτῆς, ἡ δ' ἐλαχίστη ἐν τοῖς ἀριστεροῖς, ἡ δὲ μέση μεγέθει τούτων ἐν τῷ μέσῳ ἀμφοῖν· ἀμφοτέραι δὲ πολλῷ ἐλάττους εἰσὶ τῆς μεγίστης. Συντέτρηνται μέντοι πᾶσαι αὗται πρὸς τὸν πλεύμονα, ἀλλ' ἄδηλοι διὰ σμικρότητα τῶν (513b.) πόρων πλὴν μιᾶς.

Ἡ μὲν οὖν μεγάλη φλέψ ἐκ τῆς μεγίστης ἥρτηται κοιλίας τῆς ἄνω καὶ ἐν τοῖς δεξιοῖς, εἶτα διὰ τοῦ κοίλου τοῦ μέσου τείνεται πάλιν φλέψ, ὡς οὔσης τῆς κοιλίας μορίου τῆς φλεβὸς ἐν ᾧ λιμνάζει τὸ αἷμα. Ἡ δ' ἄορτὴ ἀπὸ τῆς μέσης· πλὴν οὐχ οὕτως ἀλλὰ κατὰ στενωτέραν σύριγγα πολλῷ κοινωνεῖ. Καὶ ἡ μὲν φλέψ διὰ τῆς καρδίας, εἰς δὲ τὴν ἄορτην ἀπὸ τῆς καρδίας τείνει. Καὶ ἔστιν ἡ μὲν μεγάλη φλέψ ὑμενώδης καὶ δερματώδης, ἡ δ' ἄορτὴ στενωτέρα μὲν ταύτης, σφόδρα δὲ νευρώδης· καὶ ἀποτεينوμένη πόρρῳ πρὸς τε τὴν κεφαλὴν καὶ πρὸς τὰ κάτω μόρια στενὴ τε γίνεται καὶ νευρώδης πάμπαν.

Τείνει δὲ πρῶτον μὲν ἄνω ἀπὸ τῆς καρδίας τῆς μεγάλης φλεβὸς μόριον πρὸς τὸν πλεύμονα καὶ τὴν σύναψιν τῆς ἄορτῆς, ἄσχιστος καὶ μεγάλη οὔσα φλέψ. Σχίζεται δ' ἀπ' αὐτῆς μόρια δύο, τὸ μὲν ἐπὶ τὸν πλεύμονα, τὸ δ' ἐπὶ τὴν ράχιν καὶ τὸν ὕστατον τοῦ τραχήλου σφόνδυλον. Ἡ μὲν οὖν ἐπὶ τὸν πλεύμονα τείνουσα φλέψ εἰς διμερῆ ὄντ' αὐτὸν διχῇ σχίζεται πρῶτον, εἶτα παρ' ἐκάστην σύριγγα καὶ ἕκαστον τρῆμα τείνει, μείζων μὲν παρὰ τὰ μείζω, ἐλάττων δὲ παρὰ τὰ ἐλάττω, οὕτως ὥστε μηδὲν εἶναι μόριον λαβεῖν ἐν ᾧ οὐ τρῆμά τ' ἔνεστι καὶ φλέβιον· τὰ γὰρ τελευταῖα τῷ μεγέθει ἄδηλα διὰ τὴν

μικρότητά ἐστιν, ἀλλὰ πᾶς ὁ πλεύμων φαίνεται μεστὸς ὦν αἵματος. Ἐπάνω δ' οἱ ἀπὸ τῆς φλεβὸς εἰσι πόροι τῶν ἀπὸ τῆς ἀρτηρίας συρίγγων τεινουσῶν. Ἡ δ' ἐπὶ τὸν σφόνδυλον τοῦ τραχήλου τείνουσα φλέψ καὶ τὴν ράχιν πάλιν παρὰ τὴν ράχιν τείνει· ἦν καὶ μηρὸς ἐν τοῖς ἔπεσιν εἴρηκε ποιήσας “ἀπὸ δὲ φλέβα πᾶσαν ἔκερσεν, ἥ τ' ἀνὰ νῶτα θέουσα διαμπερὲς αὐχέν' ἰκάνει”. Ἀπὸ δὲ ταύτης τείνουσι παρὰ τε τὴν πλευρὰν ἐκάστην φλέβια καὶ πρὸς ἕκαστον τὸν σφόνδυλον, κατὰ δὲ τὸν ὑπὲρ τῶν νεφρῶν σφόνδυλον σχίζεται διχῇ.

Ταῦτα μὲν οὖν τὰ μόρια ἀπὸ τῆς μεγάλης φλεβὸς τοῦτον ἔσχισται τὸν τρόπον· ὑπεράνω δὲ τούτων ἀπὸ τῆς ἐκ τῆς καρδίας τεταμένης πάλιν ἡ ὅλη σχίζεται εἰς δύο τόπους. Αἱ μὲν γὰρ φέρουσιν εἰς τὰ πλάγια καὶ τὰς κλεῖδας, κᾶπειτα διὰ τῶν μασχαλῶν τοῖς μὲν ἀνθρώποις εἰς τοὺς βραχίονας, τοῖς δὲ τετράποσιν εἰς (514a.) τὰ πρόσθια σκέλη τείνουσι, τοῖς δ' ὄρνισιν εἰς τὰς πτέρυγας, τοῖς δ' ἰχθύσιν εἰς τὰ πτερύγια τὰ πρηνῇ. Αἱ δ' ἀρχαὶ τούτων τῶν φλεβῶν, ἧ σχίζονται τὸ πρῶτον, καλοῦνται σφαγίτιδες· ἧ δὲ σχίζονται εἰς τὸν αὐχένα [ἀπὸ τῆς μεγάλης φλεβός], παρὰ τὴν ἀρτηρίαν τείνουσι τὴν τοῦ πλεύμονος· ὦν ἐπιλαμβανομένων ἐνίστε ἔξωθεν ἄνευ πνιγμοῦ καταπίπτουσιν οἱ ἄνθρωποι μετ' ἀναισθησίας, τὰ βλέφαρα συμβεβληκότες. Οὕτω δὲ τείνουσαι, καὶ μεταξὺ λαμβάνουσαι τὴν ἀρτηρίαν, φέρουσιν μέχρι τῶν ὠτων, ἧ συμβάλλουσιν αἱ γένυες τῇ κεφαλῇ. Πάλιν δ' ἐντεῦθεν εἰς τέτταρας σχίζονται φλέβας, ὧν μία μὲν ἐπανακάμψασα καταβαίνει διὰ τοῦ τραχήλου καὶ τοῦ ὤμου, καὶ συμβάλλει τῇ πρότερον ἀποσχίσει τῆς φλεβὸς κατὰ τὴν τοῦ βραχίονος καμπήν, τὸ δ' ἕτερον μόριον εἰς τὴν χεῖρα τελευτᾷ καὶ τοὺς δακτύλους· μία δ' ἑτέρα ἀφ' ἐκατέρου τοῦ τόπου τοῦ περὶ τὰ ὦτα ἐπὶ τὸν ἐγκέφαλον τείνει, καὶ σχίζεται εἰς πολλὰ καὶ λεπτὰ φλέβια εἰς τὴν καλουμένην μήνιγγα τὴν περὶ τὸν ἐγκέφαλον. Αὐτὸς δ' ὁ ἐγκέφαλος ἄναιμος πάντων ἐστί, καὶ οὔτε μικρὸν οὔτε μέγα φλέβιον τελευτᾷ εἰς αὐτόν. Τῶν δὲ λοιπῶν τῶν ἀπὸ τῆς φλεβὸς ταύτης σχισθεισῶν φλεβῶν αἱ μὲν τὴν κεφαλὴν κύκλῳ περιλαμβάνουσιν, αἱ δ' εἰς τὰ αἰσθητήρια ἀποτελευτῶσι καὶ τοὺς ὀδόντας λεπτοῖς πάμπαν φλεβίοις.

Κεφάλαιο 4

Τὸν δ' αὐτὸν τρόπον καὶ τὰ τῆς ἐλάττονος φλεβός, καλουμένης δ' ἄορτῆς, ἔσχισται μέρη, συμπαρακολουθοῦντα τοῖς τῆς μεγάλης· πλὴν ἐλάττους οἱ πόροι καὶ τὰ φλέβια πολλῷ ἐλάττω ταύτης ἐστὶ τῶν τῆς μεγάλης φλεβός.

Τὰ μὲν οὖν ἄνωθεν τῆς καρδίας τοῦτον ἔχουσι τὸν τρόπον αἱ φλέβες· τὸ δ' ὑποκάτω τῆς καρδίας μέρος τῆς μεγάλης φλεβός τείνει μετέωρον διὰ τοῦ ὑποζώματος, συνέχεται δὲ καὶ πρὸς τὴν ἄορτὴν καὶ πρὸς τὴν ῥάχιν πόροις ὑμενώδεσι καὶ χαλαροῖς. Τείνει δ' ἅπ' αὐτῆς μία μὲν διὰ τοῦ ἥπατος φλέψ, βραχεῖα μὲν πλατεῖα δέ, ἅφ' ἧς πολλαὶ καὶ λεπταὶ εἰς τὸ ἥπαρ ἀποτείνουσαι ἀφανίζονται. Δύο δ' ἀπὸ τῆς διὰ τοῦ ἥπατος φλεβός ἀποσχίσαις εἰσὶν, ὧν ἡ μὲν εἰς τὸ ὑπόζωμα τελευτᾷ καὶ τὰς καλουμένας φρένας, ἡ δὲ πάλιν ἐπανελθοῦσα διὰ τῆς μασχάλης εἰς τὸν (514b.) βραχίονα τὸν δεξιὸν συμβάλλει ταῖς ἐτέραις φλεψὶ κατὰ τὴν ἐντὸς καμπήν· διὸ ἀποσχαζόντων τῶν ἱατρῶν ταύτην ἀπολύονται τινῶν πόνων περὶ τὸ ἥπαρ.

Ἐκ δὲ τῶν ἀριστερῶν αὐτῆς μικρὰ μὲν παχεῖα δὲ φλέψ τείνει εἰς τὸν σπλῆνα, καὶ ἀφανίζεται τὰ ἅπ' αὐτῆς φλέβια εἰς τοῦτον. Ἅτερον δὲ μέρος ἀπὸ τῶν ἀριστερῶν τῆς μεγάλης φλεβός ἀποσχισθὲν τὸν αὐτὸν τρόπον ἀναβαίνει ἐπὶ τὸν ἀριστερὸν βραχίονα· πλὴν ἐκείνη μὲν ἢ διὰ τοῦ ἥπατός ἐστιν, αὕτη δ' ἑτέρα τῆς εἰς τὸν σπλῆνα τεινούσης.

Ἔτι δ' ἄλλαι ἀπὸ τῆς μεγάλης φλεβός ἀποσχίζονται, ἡ μὲν ἐπὶ τὸ ἐπίπλοον, ἡ δ' ἐπὶ τὸ καλούμενον πάγκρεας. Ἀπὸ δὲ ταύτης πολλαὶ φλέβες διὰ τοῦ μεσεντερίου τείνουσιν. Πᾶσαι δ' αὗται εἰς μίαν φλέβα μεγάλην τελευτῶσιν, παρὰ πᾶν τὸ ἔντερον καὶ τὴν κοιλίαν μέχρι τοῦ στομάχου τεταμένην. Καὶ περὶ ταῦτα τὰ μόρια πολλαὶ ἅπ' αὐτῶν σχίζονται φλέβες.

Μέχρι μὲν οὖν τῶν νεφρῶν μία οὕσα ἑκάτερα τείνει, καὶ ἡ ἄορτὴ καὶ ἡ μεγάλη φλέψ· ἐνταῦθα δὲ πρὸς τε τὴν ῥάχιν μᾶλλον προσπεφύκασιν, καὶ σχίζονται εἰς δύο ὥσπερ εἰ λάμβδα ἑκάτερα, καὶ γίνεται εἰς τοῦπισθεν μᾶλλον ἡ μεγάλη φλέψ τῆς ἄορτῆς. Προσπέφυκε δ' ἡ ἄορτὴ μάλιστα τῇ ῥάχει περὶ τὴν καρδίαν· ἡ δὲ πρόσφυσις ἐστὶ φλεβίοις νευρώδεσι καὶ μικροῖς.

Ἔστι δ' ἡ ἄορτὴ ἀπὸ μὲν τῆς καρδίας ἀγομένη εὖ μάλα κοίλῃ,

προϊούσα δ' ἐστὶ στενωτέρα καὶ νευρωδεστέρα. Τείνουσι δὲ καὶ ἀπὸ τῆς ἀορτῆς εἰς τὸ μεσεντέριον φλέβες ὥσπερ αἱ ἀπὸ τῆς μεγάλης φλεβός, πλὴν πολλῶ λειπόμεναι τῷ μεγέθει· στεναὶ γάρ εἰσι καὶ ἰνώδεις· λεπτοῖς γὰρ καὶ ποικίλοις καὶ ἰνώδεσι τελευτῶσι φλεβίοις. Εἰς δὲ τὸ ἦπαρ καὶ τὸν σπλῆνα οὐδεμία τείνει ἀπὸ τῆς ἀορτῆς φλέψ.

Αἱ δὲ σχίσεις ἐκατέρας τῆς φλεβός τείνουσιν εἰς τὸ ἰσχίον ἐκάτερον, καὶ καθάπτουσιν εἰς τὸ ὅστουν ἀμφοτέρα. Φέρουσι δὲ καὶ εἰς τοὺς νεφροὺς ἀπὸ τε τῆς μεγάλης φλεβός καὶ τῆς ἀορτῆς φλέβες· πλὴν οὐκ εἰς τὸ κοῖλον ἄλλ' εἰς τὸ σῶμα καταναλίσκονται τῶν νεφρῶν. Ἀπὸ μὲν οὖν τῆς ἀορτῆς ἄλλοι δύο πόροι φέρουσιν εἰς τὴν κύστιν, ἰσχυροὶ καὶ συνεχεῖς, καὶ ἄλλοι ἐκ τοῦ κοίλου τῶν νεφρῶν, οὐδὲν κοινωνοῦντες τῇ μεγάλῃ φλεβί. Ἐκ μέσου δὲ τῶν νεφρῶν ἐκατέρου φλέψ κοίλῃ καὶ νευρώδῃ ἐξήρηται, τείνουσα παρ' αὐτὴν τὴν ράχιν διὰ (515a.) τῶν στενῶν· εἶτα εἰς ἐκάτερον τὸ ἰσχίον ἀφανίζεται ἐκάτερα πρῶτον, ἔπειτα δηλαὶ γίνονται πάλιν διατεταμέναι πρὸς τὸ ἰσχίον. Καθάπτουσι δὲ πρὸς τὴν κύστιν καὶ τὸ αἰδοῖον τὰ πέρατα αὐτῶν ἐν τοῖς ἄρρεσιν, ἐν δὲ τοῖς θήλεσι πρὸς τὰς ὑστέρας. Τείνει δ' ἀπὸ μὲν τῆς μεγάλης φλεβός οὐδεμία εἰς τὰς ὑστέρας, ἀπὸ δὲ τῆς ἀορτῆς πολλαὶ καὶ πυκναί. Τείνουσι δ' ἀπὸ τῆς ἀορτῆς καὶ τῆς μεγάλης φλεβός ἀπὸ τῶν σχιζομένων καὶ ἄλλαι, αἱ μὲν ἐπὶ τοὺς βουβῶνας πρῶτον μεγάλαι καὶ κοῖλαι, ἔπειτα διὰ τῶν σκελῶν τελευτῶσιν εἰς τοὺς πόδας καὶ τοὺς δακτύλους· καὶ πάλιν ἕτεραι διὰ τῶν βουβώνων καὶ τῶν μηρῶν φέρουσιν ἐναλλάξ, ἡ μὲν ἐκ τῶν ἀριστερῶν εἰς τὰ δεξιὰ, ἡ δ' εἰς τὰ ἀριστερὰ ἐκ τῶν δεξιῶν· καὶ συνάπτουσι περὶ τὰς ἰγνύας ταῖς ἐτέραις φλεψίν.

Ὅν μὲν οὖν τρόπον ἔχουσιν αἱ φλέβες καὶ πόθεν ἤρτηνται τὰς ἀρχάς, φανερόν ἐκ τούτων. Ἔχει δ' ἐν ἅπασιν μὲν τοῖς ἐναίμοις ζῴοις οὕτω τὰ περὶ τὰς ἀρχὰς καὶ τὰς μεγίστας φλέβας (τὸ γὰρ ἄλλο πλῆθος τῶν φλεβῶν οὐχ ὡσαύτως ἔχει πᾶσιν· οὐδὲ γὰρ τὰ μέρη τὸν αὐτὸν τρόπον ἔχουσιν, οὐδὲ ταῦτα πάντα ἔχουσιν), οὐ μὴν οὐδ' ὁμοίως ἐν ἅπασιν ἐστὶ φανερόν, ἀλλὰ μάλιστα ἐν τοῖς μάλιστα πολυαίμοις καὶ μεγίστοις. Ἐν γὰρ τοῖς μικροῖς καὶ μὴ πολυαίμοις ἢ διὰ φύσιν ἢ διὰ πύοτητα τοῦ σώματος οὐχ ὁμοίως ἔστι καταμαθεῖν· τῶν μὲν γὰρ οἱ πόροι συγκεχυμένοι καθάπερ ὀχαιοὶ τινες ὑπὸ πολλῆς ἰλῦος εἰσίν, οἱ δ' ὀλίγας καὶ ταύτας ἵνας ἀντὶ φλεβῶν ἔχουσιν. Ἡ δὲ μεγάλη φλέψ ἐν πᾶσι μάλιστα διάδηλος, καὶ τοῖς μικροῖς.

Κεφάλαιο 5

Τὰ δὲ νεῦρα τοῖς ζώοις ἔχει τόνδε τὸν τρόπον. Ἡ μὲν ἀρχὴ καὶ τούτων ἐστὶν ἀπὸ τῆς καρδίας· καὶ γὰρ ἐν αὐτῇ ἡ καρδία ἔχει νεῦρα ἐν τῇ μεγίστῃ κοιλίᾳ, καὶ ἡ καλουμένη ἀορτὴ νευρώδης ἐστὶ φλέψ, τὰ μὲν τελευταῖα καὶ παντελῶς αὐτῆς· ἄκοιλα γὰρ ἐστὶ, καὶ τάσιν ἔχει τοιαύτην οἶαν περ τὰ νεῦρα, ἥ τελευτᾷ πρὸς τὰς καμπὰς τῶν ὀστέων. Οὐ μὴν ἀλλ' οὐκ ἔστι συνεχῆς ἡ τῶν νεύρων φύσις ἀπὸ μιᾶς ἀρχῆς, ὥσπερ αἱ φλέβες. Αἱ μὲν γὰρ φλέβες, ὥσπερ ἐν τοῖς γραφομένοις κανάβοις, τὸ τοῦ σώματος ἔχουσι σχῆμα παντός (515b.) οὕτως ὥστ' ἐν τοῖς σφόδρα λελεπτυσμένοις πάντα τὸν ὄγκον φαίνεσθαι πλήρη φλεβίων (γίνεται γὰρ ὁ αὐτὸς τόπος λεπτῶν μὲν ὄντων φλέβια, παχυνθέντων δὲ σάρκες), τὰ δὲ νεῦρα διεσπασμένα περὶ τὰ ἄρθρα καὶ τὰς τῶν ὀστέων ἐστὶ κάμψεις. Εἰ δ' ἦν συνεχῆς ἡ φύσις αὐτῶν, ἐν τοῖς λελεπτυσμένοις ἂν καταφανῆς ἐγίνετο ἡ συνέχεια πάντων.

Μέγιστα δὲ μέρη τῶν νεύρων τό τε περὶ τὸ μόριον τὸ τῆς ἄλσεως κύριον (καλεῖται δὲ τοῦτο ἰγνύα), καὶ ἕτερον νεῦρον διπτυχές, ὁ τένων, καὶ τὰ πρὸς τὴν ἰσχὺν βοηθητικά, ἐπίτονός τε καὶ ὠμιαῖα. Τὰ δ' ἀνώνυμα περὶ τὴν τῶν ὀστέων ἐστὶ κάμψιν· πάντα γὰρ τὰ ὀστᾶ, ὅσα ἀπτόμενα πρὸς ἄλληλα σύγκεινται, συνδέδενται νεύροις, καὶ περὶ πάντα ἐστὶ τὰ ὀστᾶ πλῆθος νεύρων. Πλὴν ἐν τῇ κεφαλῇ οὐκ ἔστιν οὐδέν, ἀλλ' αἱ ῥαφαὶ αὐταὶ τῶν ὀστέων συνέχουσιν αὐτήν.

Ἔστι δ' ἡ τοῦ νεύρου φύσις σχιστὴ κατὰ μῆκος, κατὰ δὲ πλάτος ἄσχιστος καὶ τάσιν ἔχουσα πολλήν. Ὑγρότης δὲ περὶ αὐτὰ μυξώδης γίνεται, λευκὴ καὶ κολλώδης, ἥ τρέφεται καὶ ἐξ ἧς γινόμενα φαίνεται. Ἡ μὲν οὖν φλέψ δύναται πυροῦσθαι, νεῦρον δὲ πᾶν φθείρεται πυρωθέν· κἂν διακοπῇ, οὐ συμφύεται πάλιν. Οὐ λαμβάνει δ' οὐδὲ νάρκη, ὅπου μὴ νεῦρόν ἐστὶ τοῦ σώματος.

Πλεῖστα δ' ἐστὶ νεῦρα περὶ τοὺς πόδας καὶ τὰς χεῖρας καὶ πλευρὰς καὶ ὠμοπλάτας καὶ περὶ τὸν αὐχένα καὶ τοὺς βραχίονας. Ἐχει δὲ νεῦρα πάντα ὅσα ἔχει αἷμα· ἀλλ' ἐν οἷς μὴ εἰσι καμπαὶ ἀλλ' ἄποδα καὶ ἄχειρά ἐστι, λεπτὰ καὶ ἄδηλα· διὸ τῶν ἰχθύων μάλιστά ἐστι δῆλα πρὸς τοῖς πτερυγίοις.

Κεφάλαιο 6

Αἱ δ' ἵνες εἰσι μεταξὺ νεύρου καὶ φλεβός. Ἐναι δ' αὐτῶν ἔχουσιν ὑγρότητα τὴν τοῦ ἰχθῶρος, καὶ διέχουσιν ἀπὸ τε τῶν νεύρων πρὸς τὰς φλέβας καὶ ἀπ' ἐκείνων πρὸς τὰ νεῦρα.

Ἔστι δὲ καὶ ἄλλο γένος ἰνῶν, ὃ γίνεται μὲν ἐν αἵματι, οὐκ ἐν ἅπαντος δὲ ζώου αἵματι· ὧν ἐξαιρουμένων ἐκ τοῦ αἵματος οὐ πηγνυται τὸ αἷμα, ἐὰν δὲ μὴ ἐξαιρεθῶσι, πηγνυται.

Ἐν μὲν οὖν τῷ τῶν πλείστων αἵματι ζῶων ἔνεισιν, ἐν δὲ τῷ τῆς ἐλάφου καὶ προκὸς καὶ βουβαλίδος καὶ ἄλλων τινῶν οὐκ ἔνεισιν ἵνες· διὸ καὶ οὐ πηγνυται αὐτῶν τὸ αἷμα ὁμοίως τοῖς (516a.) ἄλλοις, ἀλλὰ τὸ μὲν τῶν ἐλάφων παραπλησίως τῷ τῶν δασυπόδων (ἔστι δ' ἀμφοτέρων αὐτῶν ἡ πῆξις οὐ στιφρά, καθάπερ ἡ τῶν ἄλλων, ἀλλὰ πλαδῶσα, καθάπερ ἡ τοῦ γάλακτος, ἂν τις εἰς αὐτὸ τὸ πῆγμα μὴ ἐμβάλῃ), τὸ δὲ τῆς βουβαλίδος πηγνυται μᾶλλον· παραπλησίως γὰρ συνίσταται ἢ μικρῷ ἤττον τοῦ τῶν προβάτων.

Περὶ μὲν οὖν φλεβός καὶ νεύρου καὶ ἰνὸς τοῦτον ἔχει τὸν τρόπον.

Κεφάλαιο 7

Τὰ δ' ὁστᾶ τοῖς ζώοις ἀφ' ἐνὸς πάντα συνηρημένα ἐστὶ καὶ συνεχῇ ἀλλήλοις ὥσπερ αἱ φλέβες· αὐτὸ δὲ καθ' αὐτὸ οὐδέν ἐστιν ὁστοῦν. Ἀρχὴ δ' ἡ ῥάχις ἐστὶν ἐν πᾶσι τοῖς ἔχουσιν ὁστᾶ. Σύγκειται δ' ἡ ῥάχις ἐκ σφονδύλων, τείνει δ' ἀπὸ τῆς κεφαλῆς μέχρι πρὸς τὰ ἰσχία. Οἱ μὲν οὖν σφόνδυλοι πάντες τετρημένοι εἰσὶν, ἄνω δὲ τὸ τῆς κεφαλῆς ὁστοῦν συνεχές ἐστι τοῖς ἐσχάτοις σφονδύλοις, ὃ καλεῖται κρανίον.

Τούτου δὲ τὸ πριονωτὸν μέρος ῥαφή. Ἔστι δ' οὐ πᾶσιν ὁμοίως ἔχον τοῦτο τοῖς ζώοις· τὰ μὲν γὰρ ἔχει μονόστεον τὸ κρανίον, ὥσπερ κύων, τὰ δὲ συγκείμενον, ὥσπερ ἄνθρωπος, καὶ τούτου τὸ μὲν θῆλυ κύκλω ἔχει τὴν ῥαφήν, τὸ δ' ἄρρεν τρεῖς ῥαφὰς ἄνωθεν συναπτούσας, τριγωνοειδεῖς· ἥδη δ' ὥφθη καὶ ἀνδρὸς κεφαλὴ οὐκ ἔχουσα ῥαφάς.

Σύγκειται δ' ἡ κεφαλὴ οὐκ ἐκ τεττάρων ὁστών, ἀλλ' ἐξ ἑξ· ἐστὶ δὲ δύο τούτων περὶ τὰ ὦτα, μικρὰ πρὸς τὰ λοιπά. Ἀπὸ δὲ τῆς κεφαλῆς αἱ σιαγόνες τείνουσιν ὁστᾶ. Κινεῖται δὲ τοῖς μὲν ἄλλοις ζώοις ἅπασιν ἢ κάτωθεν σιαγών· ὁ δὲ κροκόδειλος ὁ ποτάμιος μόνος τῶν ζώων κινεῖ τὴν σιαγόνα τὴν ἄνωθεν. Ἐν δὲ ταῖς σιαγόσιν ἔνεστι τὸ τῶν ὀδόντων γένος, ὁστοῦν τῇ μὲν ἄτρητον τῇ δὲ τρητόν, καὶ ἀδύνατον γλύφεσθαι τῶν ὁστών μόνον.

Ἀπὸ δὲ τῆς ῥάχεως, ἥπερ περόνη ἐστί, καὶ αἱ κλεῖδες καὶ αἱ πλευραί. Ἔστι δὲ καὶ τὸ στῆθος ἐπὶ πλευραῖς κείμενον· ἀλλ' αὗται μὲν συνάπτουσιν, αἱ δ' ἄλλαι ἀσύναπτοι· οὐδέν γὰρ ἔχει ζῶον ὁστοῦν περὶ τὴν κοιλίαν. Ἔτι δὲ τὰ τ' ἐν τοῖς ὤμοις ὁστᾶ, καὶ αἱ καλούμεναι ὠμοπλάται, καὶ τὰ τῶν βραχιόνων ἐχόμενα, καὶ τούτων τὰ ἐν ταῖς χερσίν. Ὅσα δ' ἔχει σκέλη πρόσθια, καὶ ἐν τούτοις τὸν αὐτὸν ἔχει τρόπον.

Κάτω δ' ἥ περαίνει, μετὰ τὸ ἰσχίον ἢ κοτυληδών ἐστι καὶ τὰ τῶν σκελῶν ἥδη ὁστᾶ, τὰ τ' ἐν τοῖς μηροῖς καὶ κνήμαις, οἱ (516b.) καλοῦνται κωλῆνες, ὧν μέρος τὰ σφυρά, καὶ τούτων τὰ καλούμενα πληκτρα ἐν τοῖς ἔχουσι σφυρόν· καὶ τούτοις συνεχῇ τὰ ἐν τοῖς ποσίν.

Ὅσα μὲν οὖν τῶν ἐναίμων καὶ πεζῶν ζωοτόκα ἐστίν, οὐ πολὺ διαφέρει τὰ ὁστᾶ, ἀλλὰ κατ' ἀναλογίαν μόνον σκληρότητι καὶ μαλακότητι καὶ μεγέθει. Ἔτι δὲ τὰ μὲν ἔχει μυελὸν τὰ δ' οὐκ ἔχει

τῶν ἐν τῷ αὐτῷ ζῳῷ ὀστέων.

Ἐνια δὲ ζῷα οὐδ' ἂν ἔχειν δόξειεν ὅλως μυελὸν ἐν τοῖς ὀστοῖς, οἷον λέων, διὰ τὸ πάμπαν ἔχειν μικρὸν καὶ λεπτὸν καὶ ἐν ὀλίγοις· ἔχει δὲ καὶ ἐν τοῖς μηροῖς καὶ βραχίουσιν. Στερεὰ δὲ πάντων μάλιστα ὁ λέων ἔχει τὰ ὀστᾶ· οὕτω γάρ ἐστι σκληρὰ ὥστε συντριβομένων ὥσπερ ἐκ λίθων ἐκλάμπειν πῦρ.

Ἐχει δὲ καὶ ὁ δελφὶς ὀστᾶ, ἀλλ' οὐκ ἄκανθαν. Τὰ δὲ τῶν ἄλλων ζῳῶν τῶν ἐναίμων τὰ μὲν μικρὸν παραλλάττει, οἷον τὰ τῶν ὀρνίθων, τὰ δὲ τῷ ἀνάλογόν ἐστι ταυτά, οἷον ἐν τοῖς ἰχθύσι· τούτων γὰρ τὰ μὲν ζωοτοκοῦντα χονδράκανθά ἐστιν, οἷον τὰ καλούμενα σελάχη, τὰ δ' ὠοτοκοῦντα ἄκανθαν ἔχει, ἥ ἐστιν ὥσπερ ἐν τοῖς τετράποσιν ἡ ράχis. Ἴδιον δ' ἐν τοῖς ἰχθύσιν, ὅτι ἐν ἐνίοις εἰσὶ κατὰ τὴν σάρκα κεχωρισμένα ἀκάνθια λεπτὰ. Ὅμοίως δὲ καὶ ὁ ὄφis ἔχει τοῖς ἰχθύσιν· ἀκανθώδης γὰρ ἡ ράχis αὐτοῦ ἐστιν.

Τὰ δὲ τῶν τετραπόδων μὲν ὠοτοκούντων δὲ τῶν μὲν μειζόνων ὀστωδέστερά ἐστι, τῶν δ' ἐλαττόνων ἀκανθωδέστερα. Πάντα δὲ τὰ ζῷα ὅσα ἔναιμά ἐστιν, ἔχει ράχιν ἢ ὀστώδη ἢ ἀκανθώδη· τὰ δ' ἄλλα μόρια τῶν ὀστέων ἐν ἐνίοις μὲν ἐστιν, ἐν ἐνίοις δ' οὐκ ἔστιν, ἀλλ' ὥς ὑπάρχει τοῦ ἔχειν τὰ μόρια, οὕτω καὶ τοῦ ἔχειν τὰ ἐν τούτοις ὀστᾶ. Ὅσα γὰρ μὴ ἔχει σκέλη καὶ βραχίονας, οὐδὲ κωλῆνας ἔχει, οὐδ' ὅσα ταῦτα μὲν ἔχει μόρια, μὴ ὅμοια δέ· καὶ γὰρ ἐν τούτοις ἢ τῷ μᾶλλον καὶ ἥττον διαφέρει ἢ τῷ ἀνάλογον.

Τὰ μὲν οὖν περὶ τὴν τῶν ὀστέων φύσιν τοῦτον ἔχει τὸν τρόπον τοῖς ζῳοῖς.

Κεφάλαιο 8

Ἔστι δὲ καὶ ὁ χόνδρος τῆς αὐτῆς φύσεως τοῖς ὀστοῖς, ἀλλὰ τῷ μᾶλλον διαφέρει καὶ ἥττον.

Καὶ ὥσπερ οὐδ' ὀστοῦν οὐδ' ὁ χόνδρος αὐξάνεται, ἂν ἀποκοπῇ.

Εἰσὶ δ' ἐν μὲν τοῖς χερσαίοις καὶ ζωοτόκοις τῶν ἐναίμων ἄτρητοι οἱ χόνδροι, καὶ οὐ γίνεται ἐν αὐτοῖς ὥσπερ ἐν τοῖς ὀστοῖς μυελός· ἐν δὲ τοῖς σελάχεσιν (ταῦτα γάρ ἐστι (517a.) χονδράκανθα) ἔνεστιν αὐτῶν ἐν τοῖς πλατέσι τὸ κατὰ τὴν ῥάχιν ἀνάλογον τοῖς ὀστοῖς χονδρῶδες, ἐν οἷς ὑπάρχει ὑγρότης μυελώδης. Τῶν δὲ ζωοτοκούντων καὶ πεζῶν περὶ τε τὰ ὦτα χόνδροι εἰσὶ καὶ τοὺς μυκτῆρας καὶ ἔνια ἀκρωτήρια τῶν ὀστέων.

Κεφάλαιο 9

Ἔτι δ' ἐστὶν ἄλλα γένη μορίων, οὔτε τὴν αὐτὴν ἔχοντα φύσιν τούτοις οὔτε πόρρω τούτων, οἷον ὄνυχές τε καὶ ὅπλαι καὶ χηλαὶ καὶ κέρατα, καὶ ἔτι παρὰ ταῦτα ῥύγχος, οἷον ἔχουσιν οἱ ὄρνιας, ἐν οἷς ὑπάρχει ταῦτα τὰ μόρια τῶν ζῴων. Ταῦτα μὲν γὰρ καὶ καμπτὰ καὶ σχιστά, ὅστουν δ' οὐδὲν καμπτὸν οὐδὲ σχιστόν, ἀλλὰ θραυστόν. Καὶ τὰ χρώματα τῶν κεράτων καὶ ὀνύχων καὶ χηλῆς καὶ ὀπλῆς κατὰ τὴν τοῦ δέρματος καὶ τὴν τῶν τριχῶν ἀκολουθεῖ χροάν.

Τῶν τε γὰρ μελανοδερμάτων μέλανα τὰ κέρατα καὶ αἱ ὅπλαι καὶ αἱ χηλαί, ὅσα χηλὰς ἔχει, καὶ τῶν λευκῶν λευκά, μεταξὺ δὲ τὰ τῶν ἀνὰ μέσον. Ἔχει δὲ καὶ περὶ τοὺς ὄνυχας τὸν αὐτὸν τρόπον. Οἱ δ' ὀδόντες κατὰ τὴν τῶν ὀστέων εἰσι φύσιν. Διόπερ τῶν μελάνων ἀνθρώπων, ὥσπερ Αἰθιοπῶν καὶ τῶν τοιούτων, οἱ μὲν ὀδόντες λευκοὶ καὶ τὰ ὀστᾶ, οἱ δ' ὄνυχες μέλανε, ὥσπερ καὶ τὸ πᾶν δέρμα.

Τῶν δὲ κεράτων τὰ μὲν πλεῖστα κοῖλά ἐστὶν ἀπὸ τῆς προσφύσεως περὶ τὸ ἐντὸς ἐκπεφυκὸς ἐκ τῆς κεφαλῆς ὅστουν, ἐπ' ἄκρου δ' ἔχει τὸ στερεόν, καὶ ἔστιν ἀπλᾶ· τὰ δὲ τῶν ἐλάφων μόνα δι' ὅλου στερεὰ καὶ πολυσχιδῆ. Καὶ τῶν μὲν ἄλλων τῶν ἐχόντων κέρας οὐδὲν ἀποβάλλει τὰ κέρατα, ἔλαφος δὲ μόνος καθ' ἕκαστον ἔτος, ἐὰν μὴ ἐκτμηθῇ· περὶ δὲ τῶν ἐκτετμημένων ἐν τοῖς ὕστερον λεχθήσεται. Τὰ δὲ κέρατα προσπέφυκε μᾶλλον τῷ δέρματι ἢ τῷ ὀστέῳ· διὸ καὶ ἐν Φρυγίᾳ εἰσὶ βόες καὶ ἄλλοθι οἱ κινουσι τὰ κέρατα ὥσπερ τὰ ὄτα.

Τῶν δ' ἐχόντων ὄνυχας (ἔχει δ' ὄνυχας ἅπαντα ὅσαπερ δακτύλους, δακτύλους δ' ὅσα πόδας, πλὴν ἐλέφας· οὗτος δὲ καὶ δακτύλους ἀσχίστους καὶ ἡρέμα διηρθρωμένους καὶ ὄνυχας ὅλως οὐκ ἔχει) τῶν δ' ἐχόντων τὰ μὲν ἐστὶν εὐθυώνυχα, (517b.) ὥσπερ ἄνθρωπος, τὰ δὲ γαμψώνυχα, ὥσπερ καὶ τῶν πεζῶν λέων καὶ τῶν πτηνῶν ἀετός.

Κεφάλαιο 10

Περὶ δὲ τριχῶν καὶ τῶν ἀνάλογον καὶ δέρματος τόνδ' ἔχει τὸν τρόπον. Τρίχας μὲν ἔχει τῶν ζώων ὅσα πεζὰ καὶ ζωοτόκα, φολίδας δ' ὅσα πεζὰ καὶ ὠοτόκα, λεπίδας δ' ἰχθύες μόνοι, ὅσοι ὠοτοκοῦσι τὸ ψαθυρὸν ὠόν· τῶν γὰρ μακρῶν γόγγρος μὲν οὐ τοιοῦτον ἔχει ὠόν, οὐδ' ἡ μύραινα, ἔγγελυς δ' ὅλως οὐκ ἔχει.
